Methodology

- The Federal Procurement Data System (FPDS) was the primary source for this report.
- Federal regulations only require that all unclassified prime contracts worth \$2,500 and above be reported to FPDS.
- Overseas Contingency Operations funding and other supplementals are not separately classified in FPDS.
- The study team analyzed contracts using contract signed dates to divide the contracts into reform periods for analysis.
- The reform periods were determined by the date the final implementing guidelines were issued.
- All dollar figures are in constant 2014 dollars.

Study Questions

- Have the DoD components increased their rate of effective competition since the introduction of BBP in 2010?
- How successful have the components been at promoting contracting opportunities for small businesses?
- Have the DoD components implemented the guidance in BBP 2.0 regarding the proper mix of fixed price and cost plus contracts?

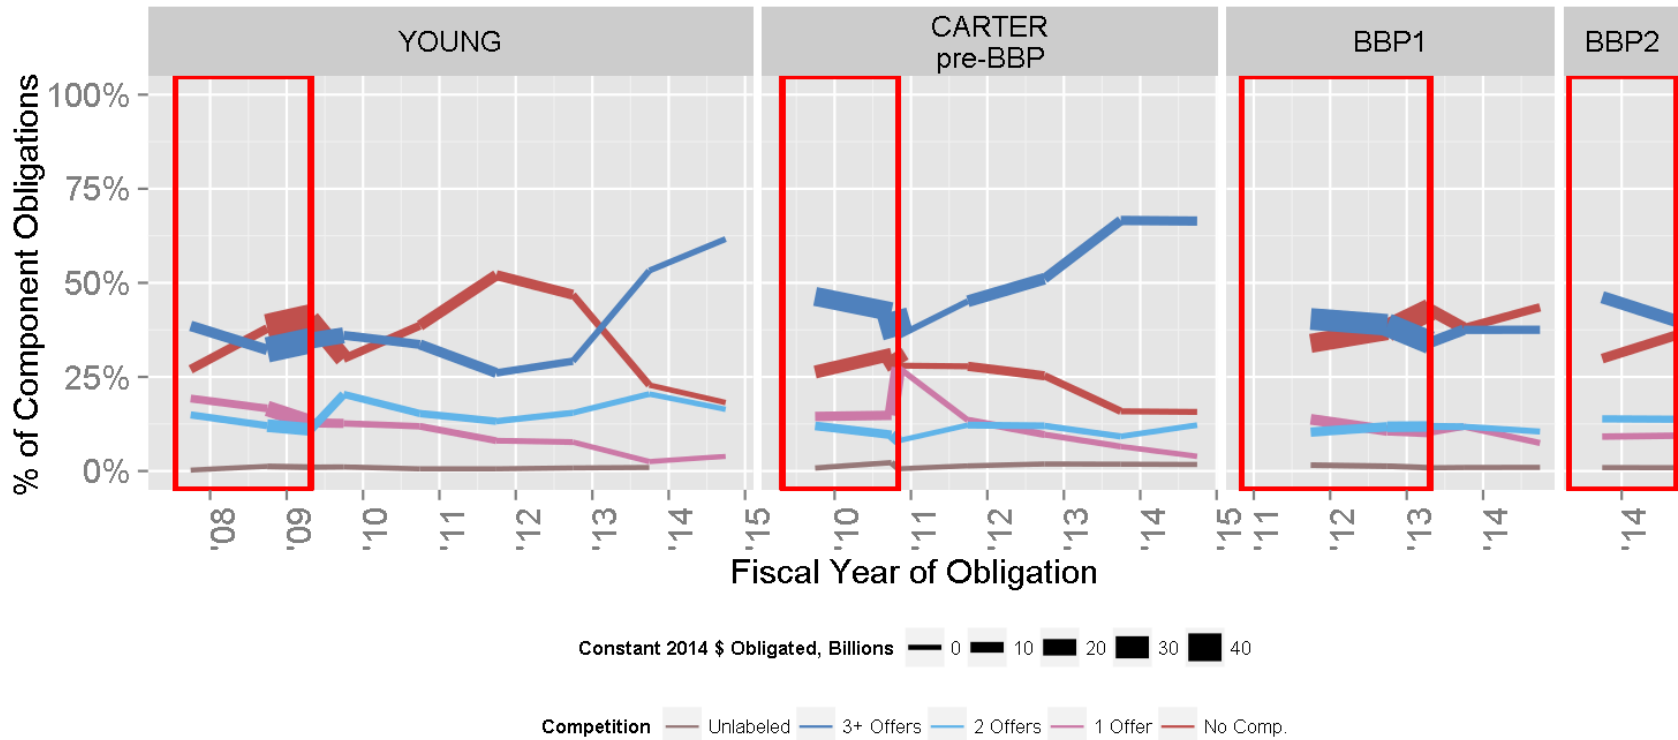

Competition

Have the DoD components increased their rate of effective competition since the introduction of BBP in 2010?

Reform Periods
