

Reducing Lifecycle Sustainment Costs

Hon David J. Berteau Assistant Secretary of Defense (Logistics and Materiel Readiness)

Life Cycle Costs

Optimizing the system for O&S Costs during the RDT&E phase allows the greatest ROI.

O&S Costs as a Percent of Total Life Cycle Cost

Source: OSD CAPE Analysis May 2009

O&S Costs range from 42% - 73% of total life cycle costs

External Impacts

O&S Cost Estimating

- O&S cost estimates reflect "peacetime perfection".
- Cost growth above inflation is greater than cost estimating inflation indices – a major driver in today's costs.
- Reliability/Maintainability Improvements
 - Reliability improvements do not always decrease O&S costs (but will always increase readiness).
 - Condition Based Maintenance is required by OSD Policy, but funding is not allocated for its implementation.
 - Technology Refresh often requires non-recurring engineering investment, but the Working Capital Funds can not be used to pay this expense.

Operating & Support (O&S) Cost Reduction

May 14, 2015

Dr. Rick Burke Deputy Director, Cost Assessment 12th Annual Acquisition OSD CAPE

Research Symposium

Cost Assessment

Agenda

- OSD CAPE
- History of O&S Cost Analyses and Estimates
 - Prior to WSARA of 2009
 - Post WSARA—O&S Cost Estimates Early and Often
 - O&S Cost Estimating Guide
- It's about the Data!-O&S Cost Actuals
 - VAMOSC Systems
 - Cost and Software Data Reports (CSDRs)
 - Contractor Logistics Support Contracts
 - Includes subcontractor reporting
 - Effects of Enterprise Resource Planning (ERP) systems
 - Industry
 - Government
- Keys to Achieving O&S Cost Reduction

O&S Cost Estimating Guide

OSD CAPE

- O&S cost-estimating guide (*published March 2014*)
 - Uses of O&S cost information at milestone reviews
 - Common data and analytic methods
 - Cost Assessment review process
 - Presentation formats with sample briefing charts
- Standardized cost terms and definitions
 - Organized as a taxonomy (i.e., O&S cost element structure)

http://www.cape.osd.mil/files/OS_Guide_v9_March_2014.pdf/

O&S Cost Data: VAMOSC

OSD CAPE

- DoD 5000.04-M provides guidance for VAMOSC data systems (At WHS for final issuance)
 - Establishes requirement for historical data collection system that supports well-defined, standard presentation formats for all major fielded systems
 - Flexible level of detail (platform, subsystem, component)
 - CAPE provides policy and conducts oversight
 - Military departments are allowed considerable latitude in implementation
 - Army: OSMIS
 - Navy: Navy VAMOSC
 - Air Force: AFTOC
- Naval VAMOSC Study underway to ensure it is the authoritative source for Navy/Marine Corps O&S Cost Data

CSDR Data We Collect Today

OSD CAPE

"By Tail Number" "Business Base" "Functional Breakout" **Progress Curve** Report (1921-2) Contractor Business **Functional Cost-Hour** Data Report (1921-3) Lot or Unit reporting of Report (1921-1) direct recurring costs to Direct and Indirect cost. Cost and hour data date for specific hardware hour and employee data (REC/NRE) for specific elements; Technical by functional category for elements broken down by Characteristics a Contractor Business functional category Unit "The Cost Summary" "Sustainment" Contractor Cost Data Summary Sustainment Report Report (1921) (1921-4/5)Summary cost data for all Nonrecurring and elements on approved recurring costs reported contract CSDR plan against a sustainment cost element structure "The Dictionary" "Software" **Contract Data** Software Resource **CSDRs Reporting Structure Data Report** Dictionary (SRDR) Lists all contract data reporting elements with Size, schedule and effort definitions of technical,

work & cost content

data on software development

CSDR Data Collection Over Time

OSD CAPE

Cost reporting for contractor sustainment costs is in its infancy relative to reporting of acquisition (i.e., development and procurement) cost actuals

Implications of ERP Systems

- OSD CAPE
- Reporting of KTR Cost Actuals (for O&S) becomes easier
 - Modern ERP systems deployed in industry are <u>very</u> powerful
 - Must 'tag' relevant data structure early to map to desired cost reporting structure
 - Reporting requirement must be established early, included in RFP
 - Post-award KTR/USG meeting to finalize reporting plans
- Contractor submissions can be simplified in the future
 - Currently reported electronically in structured format (1921-4/5)
 - To be replaced by "flex files"—files may be large (~1 million lines)
 - New tools required to receive and manipulate large files
- Both industry and government making progress in ERPs
 - Industry data systems ahead of government systems
 - Specific O&S needs in government: depots, software centers, VAMOSC/ERP interfaces

Achieving O&S Cost Reductions

OSD CAPE

- Early O&S Cost Estimates are essential
 - Estimates in AoAs, at MS A, at MS B
 - O&S Cost Targets for MS A, Cost Caps at MS B
 - An affordability analysis and management strategy is critical
- Collect O&S Cost Actuals to Compare to Estimates
 - VAMOSC reporting for operational systems
 - Cost and Software Data Reports
 - Contractor Logistics Support Contracts—Include in RFP
 - Plans should address key subcontractors
 - Early reliability data from test program is important
- Skilled analytic workforce to identify/analyze targeted cost reductions
 - Collaboration with contracting community for success

BACKUPS

Sustainment Plans in Process

Service	Program	Current Data Reporting Structure	O&S CES – Based Plans	Approved Plan	Subcontractor Reporting	
Army	Apache AH-64 D/E (5)	N/A	1921 O&S Format	Yes	No	
USAF	B-2	1921 O&S CES	In discussions	Not yet	TBD	
USAF	C-5 RERP	1921 O&S CES	Yes	Yes	No	
USAF	C-17	1921 O&S CES	2013 start	Yes	Engines waiver submitted	
Joint	C-130J	881A 1921 (partial)	Cited FAR Part 12 for large Navy sust contract	Yes, Partial	No	
USAF	COOLS	1921 O&S CES	Yes	Yes	Yes	
Navy	F/A-18E/F	1921 O&S CES	2014 start	Yes	Engines	
USAF	F-22	1921 O&S CES	2014 start	Yes	Engines	
Joint	F-35	1921 O&S CES	LRIP 8 start	Yes	Yes	
Army	Fixed Wing Sustainment (2)	1921 O&S CES	2016 Awards	Not yet	TBD	
USAF	Global Hawk	1921 O&S CES	Yes	Yes	IWO subs only	
Army	Gray Eagle PBL	1921 O&S CES	Yes	Yes	Yes	
Army	Javelin	1921 O&S CES	TBD		Yes	
Air Force	KC-10	TBD	Cited FAR Part 12	No	No	
Army	Light Utility Helicopter	Non-Standard	2016 start	Yes	None	

.

Insertion Point for sustainment requirement is either Major Contract Mod or New Contract

Logistics and Product Support Roles and Responsibilities

Mr. Dan Fri Deputy Assistant Secretary of the Air Force for Logistics and Product Support 14 May 2015

U.S. AIR FORCE

U.S. AIR FORCE

Reducing Life Cycle Costs Through Sustainment Planning

- > AF committed to the total life cycle management of systems – from initial acquisition to disposal
 - In FY12, PEOs given total life cycle management responsibility
 - PSM position mandated for ACAT I/II programs
- Shorter acquisition reporting chain facilitates increased focus on life cycle costs
- Affordability is enabled by maintaining a competitive environment throughout the life cycle
- Requires early, deliberate sustainment planning to:
 - Own the Technical Baseline
 - Delivery of appropriate data rights
 - Greater insight into contract cost drivers
 - Structured analysis of product support strategy (e.g., BCA, should-cost assessments)
 - Early Depot Repair planning and standup of Core capabilities
 - Reduce reliance on Interim Contract Support (ICS)
 - Stand up of initial Mx and Repair at DSOR Location
 - Ensure effective use of Performance Base Logistics (PBLs)

sustainment

Affordability is our Top Sustainment Concern

U.S. AIR FORCE

Assessing Sustainment in the Future

18

- Develop core tenets of sustainability to guide planning, such as:
 - Technical Data rights and delivery as contract cost competitive elements
 - No New MDS-unique Mx/SC IT Systems...focus on improving what we have
 - Standard Mx Tech Data format for example: S1000D standard
 - Start Core workload at CITE locations early in program's lifecycle
 - Common Support Equipment & Automatic Test Systems for standard functions
- Evaluate Life Cycle Sustainment Plans for adherence to core tenets
 - Clear expectations for the program and the reviewers
- > Establish Sustainment Readiness Levels (1-n)
 - Measure and report on program compliance
- Codify sustainment outcomes in Policy and enforce during reviews

Reducing Lifecycle Sustainment Costs

Mr. Scott DiLisio Director, Strategic Mobility/Combat Logistics Division Chief of Naval Operations

> Presentation to: 12th Annual Acquisition Research Symposium 14 May 2015

LIFE CYCLE COST HISTORICAL PRINCIPLES

- DRIVERS: COST, SCHEDULE, PERFORMANCE
- ESTIMATE PROGRAM COSTS
- INTERPRET DESIGN TRADES
- **PROGRAM AFFORDABILITY**
- ACQUISITION BOUNDARIES (NUNN MCCURDY)
- USE HISTORICAL BASIS FOR COST ANALOGY
- ESTABLISH FORMAL ESTIMATE
- GAIN APPROVAL FOR PROGRAM WITHIN PROGRAM BOUNDARIES

INSTITUTIONAL MYOPIA

LIFE CYCLE COST REVISED PRINCIPLES

- SYNERGY & COMMONALITY WITH EXISTING INVENTORY
- CONSIDER STANDALONE VICE INTEGRATED CAPABILITY
- INNOVATE / REUSE / REPURPOSE
- BEHAVIOR / UTILIZATION

WHY IS THIS CONVERSATION IMPORTANT?

WAVES WE ARE ON...

- FISCAL CONSTRAINTS
- BETTER BUYING POWER 3.0
- ADDITIVE MANUFACTURING
- ENERGY ISSUES
- SUSTAINABILITY CHALLENGES

OUR STAKEHOLDERS:

- THE PUBLIC
- CONGRESS
- INTERNATIONAL COMMUNITY
