Contracting as a Science

David V. Lamm

Naval Postgraduate School

What is a Science?

- Study of Observable Facts
- Scientific Method
- Description of Natural Phenomena
- Classification of Phenomena
- Empirical Relationships
- Systematized Body of Knowledge
- Theory, Principles, Laws, Paradigms
- Practical Problems
- Understanding, Explanation, Prediction, Control

Why a Contracting Science?

- Knowledge and Theory
- Cause and Effect Relationships
- Simplify Understanding
- Operational Definitions
- Practitioner-Oriented Research with Solutions to Problems
- Enhance Policy and Decision Making
- Focus Academic Research
- Enrich Education and Training

Body of Knowledge

Theoretical/Scientific Body of Knowledge

- Theories, Principles, Laws, Paradigms
- Research: Discovery of New Knowledge
- Scientific Method, Empirical Data
- Models, Taxonomies, Typologies

Practitioner Body of Knowledge

- Methods, Tools, Techniques, Procedures
- Research: Application of Knowledge
- Policies, Best Practices, Rules of Thumb

Classification/Taxonomy

- Description/Classification of Subject Matter
- Procurement Tasks
- Contracting Officer Decisions
- Goods/Services
- Buying Decision Approaches
- Potential Areas for Classification
 - Elements of Supplier Base
 - Supplier Performance Incentives
 - Contracting Relationships
 - Public Sector vs Private Sector Practices

"Schools" of Contracting Thought

- Process School
- Behavioral School
- Relationship School
- E-Procurement/E-Commerce School
- Reformist School
- Contracting Out/Privatization School
- Eclectic School
- Other Schools: Governance, Partnership/Alliance, Performance-Based

Potential Contracting Paradigms

- Management Concepts
- Economic Aspects
- Legal/Judicial Features
- Political Facets

Selected Theories Employed by Contracting

- Principal-Agent (Agency) Theory (Economics)
- Transaction Cost Theory (Economics)
- Theory of Organizational Buying Behavior (Marketing)
- Portfolio Theory (Finance)
- Resource Dependence Theory (Sociology)
- Relationship Marketing (Marketing)
- Expectancy Theory (Psychology/Marketing)

Selected Theories with Potential Application to Contracting

- Resource-Advantage Theory (Marketing)
- Prospect Theory (Psychology)
- Goal Setting Theory (Management)
- Equity Theory (Psychology)
- Representative Bureaucracy Theory (Sociology)
- Adaptation-Level Theory (Psychology)
- Stewardship Theory (Management)

Potential Contracting Theories

- Theory of Contract Types
- Theory of Equitable Adjustment
- Theory of Contract Termination
- Theory of Reasonableness

Is Contracting A Science?

- Applied Discipline
- Emerging Science
 - Distinct Subject Matter
 - Description and Classification of Subject Matter
 - Underlying Uniformities or Regularities Among Phenomena
 - Scientific Method
- Same Growing Pains as Other Social Sciences
- Behave as if a Science

Toward a Science of Contracting

- Dialogue Among Academics and Practitioners
- Colloquium on Contracting Science
- Journal of Contracting Research and Theory
- Annotated Bibliography of Contracting
- General Classification System(s)
- Scientific Body of Knowledge
- Contracting Paradigm(s)
- Contracting Theory
