This section should be retained in its entirety. At subsection (a), the military departments are afforded the opportunity to use fuel sources that are deemed most cost effective. This current version of the law promotes economy and efficiency in the acquisition of heating systems within DOD. At subsection (b), this statute sets forth various requirements on the conversion of established heating systems in Europe. This provision is not directly related to the acquisition of heating systems by the Department but rather deals with the management of systems that are already in place. Therefore, this subsection is outside the scope of the Panel's review.

#### **3.7.9.5. Relationship to Objectives**

Retention of subsection (a) of this statute promotes the best interests of DOD by permitting it to convert to gas or oil heating systems when cost effective and by otherwise authorizing the use of the most cost effective heating systems on military department lands.

**3.7.10. Public Law Number 99-661, § 316; Public Law Number 102-484, § 842**

**Prohibition on Purchase of Angolan Petroleum Products from Companies Producing Oil in Angola;**

**Purchase of Angolan Petroleum Products**

**3.7.10.1. Summary of Law**

Section 316 of Public Law 99-661 prohibits the Secretary of Defense from entering into contracts with a company for the purchase of petroleum products originating in Angola if that company is engaged in the production of petroleum products in Angola. The section also provides, however, that the Secretary of Defense may waive the limitation when in the best interest of the United States.

Section 842 of Public Law 102-484 provides, however, that this prohibition shall cease to be effective on the date on which the President certifies to Congress that free, fair and democratic elections have taken place in Angola.

**3.7.10.2. Background of Law**

This law was enacted by the National Defense Authorization Act for 1987.<sup>1</sup> The conference report stated that the prohibition was intended to prevent DOD from indirectly furnishing financial support to the Marxist government in Angola.<sup>2</sup> The conferees were concerned, however, that an outright prohibition would have a detrimental effect on the readiness of U.S. armed forces stationed in the Middle East and part of Africa. The waiver authority was intended to grant the Secretary the flexibility to procure such petroleum products when necessary for readiness purposes.<sup>3</sup>

Based on recent political developments in Angola, the prohibition was modified as set forth above. Specifically, elections were held in Angola on September 29 and 30, 1992, under United Nations auspices. Issues were subsequently raised regarding the conduct of the elections. In addition, a second round of presidential balloting is planned. However, on October 27, 1992, the United Nations envoy certified that "with all deficiencies taken into account, the elections held on 29/30 September can be considered to have been generally free and fair." <sup>4</sup>

---

<sup>1</sup>Pub. L. No. 99-661, §316, 100 Stat. 3726 (1986).

<sup>2</sup>S. CONF. REP. No. 583, 99th Cong., 2d Sess (1986).

<sup>3</sup>*Id.*

<sup>4</sup>Statement of Miss Margaret J. Ansten, Special Representative of the Secretary-General for Angola, dated 27 Oct. 1992.

### **3.7.10.3. Law in Practice**

Section 316 is implemented by DFARS 225.702, 225.703 and 225.704. Under those regulations, the Secretary of Defense or designee may waive the Angola restriction when in the best interest of the Government.<sup>5</sup> The Secretary of the department involved may approve an exception for other than small purchases after obtaining the advice of the Assistant Secretary of Defense (International Security Affairs) (ASD(ISA)).<sup>6</sup> Further, the advice of ASD (ISA) is not needed for emergency purchases or when supplies are not available from another source and substitute supplies are not acceptable.<sup>7</sup>

In practice, the Defense Fuel Supply Center (DFSC) reports that section 316 significantly limits effective competition in DOD fuel acquisition. That Office notes, for example, that Chevron USA and Shell Oil, two major refiners with production facilities in Angola, cannot bid to supply DOD requirements from certain refineries because they use Angolan crude oil in those refineries. Further, Chevron cannot currently bid to supply oil from its Philadelphia refinery and has been unable to compete in major fuel supply contracting actions in the DFSC Posts, Camps and Stations program and bulk fuel programs as a result.

In addition, Shell Oil cannot bid from its Norco, Louisiana refinery in the DFSC bulk fuel program. Competition in the upcoming conversion of the DFSC bulk fuels program to use of Kerojet (JP-8) will be hindered because several major suppliers of that fuel use Angolan crude.

Finally, DFSC recently had to disseminate special notices to over 1500 different activities in seven states and the District of Columbia to notify DOD activities not to purchase fuel at Chevron stations for a 3-month period under the Government National Credit Card program. This restriction resulted from Chevron's temporary need to use Angolan crude oil at its Port Arthur, Texas refinery.

In response to these problems, DFSC Office of Counsel recommends repeal of section 316. Initially, the Office of the Secretary of Defense, International Security Affairs (OSD/ISA), concurred in that recommendation. However, that Office has recently changed its recommendation in light of the new public law provision conditionally suspending section 316 upon certification of free and fair elections.

### **3.7.10.4. Recommendation and Justification**

#### **No Action**

The Panel notes that the section 316 prohibition creates a substantial burden for fuel procurement, thereby negatively affecting the national defense. The law was intended to prevent defense petroleum procurement from indirectly aiding a country that supported international terrorism.

---

<sup>5</sup>DFARS, 48 C.F.R. § 225.703.

<sup>6</sup>DFARS, 48 C.F.R. § 225.703(a)

<sup>7</sup>DFARS, 48 C.F.R. § 225.703(a).

**3.7.10.5. Relationship to Objectives**

Repeal of this statute would serve the best interests of DOD insofar as purchases of fuel are concerned. However, the Panel believes that recent congressional action sets the stage for negating the impact of the statute, which will achieve this objective.

## **3.8. Fiscal Statutes**

### **3.8.0. Introduction**

The Panel considered within the scope of its review numerous statutes, primarily located within Chapter 131 of Title 10, that relate to DOD fiscal authority and budgetary procedures.

Of these statutes, those that dealt with exemptions for various DOD expenditures from anti-deficiency requirements were deemed directly related to DOD acquisition and recommended for retention. The individual analyses for these sections are set forth herein. The Panel considered amendment and consolidation of these statutes into one Title 10 section that would contain all antideficiency laws relevant to the department. However, there was concern that consolidation might alter the legal affect of these exemptions. Therefore, the Panel decided not to alter these statutes in any respect.

The Panel determined that a number of the other fiscal and budgetary Title 10 statutes were not directly related to the DOD acquisition process and hence were outside the scope of the Panel's charter. However, fiscal and budgetary laws do affect the manner in which the DOD can acquire goods and services. Further, many of these sections lent themselves to consolidation or relocation to another section of Title 10.<sup>1</sup> Therefore, because of the arguably close relationship between these types of statutes and the acquisition process, individual analyses of each of these statutes are also set forth in this chapter. The Panel formally recommends no action for each of these laws, but notes that Congress may wish to consider the proposed disposition set forth in each analysis.

Finally, this subchapter also includes a recommended amendment to address the "M" account issue at 31 U.S.C. § 1552a, in order to deal with significant problems arising with both the DOD and its contractors when funds properly obligated on existing contracts are cancelled by operation of law.

---

<sup>1</sup>Many of these laws evolved out of the National Security Act Amendments of 1949, Pub. L. No. 81-216, 63 Stat. 578 (1949), and were part of that effort to broaden the authority of the Secretary of Defense within the Department. See, e.g., 10 U.S.C. §§ 2203 through 2209.

### **3.8.1. 41 U.S.C. § 11 (Revised Statutes, Sec. 3732)**

#### **The Food and Forage Act**

##### **3.8.1.1. Summary of Law**

Section 3732(a) of the Revised Statutes, known popularly as the Food and Forage Act, provides that:

No contract or purchase on behalf of the United States shall be made, unless the same is authorized by law or is under an appropriation adequate to its fulfillment, except in the Department of Defense and in the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy, for clothing, subsistence, forage, fuel, quarters, transportation, or medical and hospital supplies which, however, shall not exceed the necessities of the current year.

Section 3732(b) requires that a report be submitted to the Congress when such authority is exercised.

##### **3.8.1.2. Background of Law**

The Food and Forage Act was initially enacted in 1861 by "The Act Making Appropriations for Sundry Civil Expenses for 1862."<sup>1</sup> In conference, the House version of this provision was adopted and included other language relating to the advertising requirements for government contracts.<sup>2</sup>

---

<sup>1</sup>H.R. CONF. REP. No. 895, 33d Cong., 1st Sess., (1921).

<sup>2</sup>Cong. Globe, March 2, 1861. The full text of the provision as originally passed provided that:

That all purchases and contracts for supplies or services in any of the departments of the Government, except for personal services, when the public exigencies do not require the immediate delivery of the article or articles, or performance of the service, shall be made by advertising a sufficient time previously, for proposals respecting the same. When immediate delivery or performance is required by the public exigency, the articles or service required may be procured by open purchase or contract, at the places, and in the manner in which such articles are usually bought and sold, or such services engaged between individuals. No contract or purchase shall hereafter be made, unless the same is authorized by law, or is under an appropriation adequate to its fulfillment, except in the War and Navy Departments, for clothing, subsistence, forage, fuel, quarters or transportation; which, however, shall not exceed the necessities of the current year.

The DOD Appropriations Act for 1967 added the reporting requirement without explanation.<sup>3</sup> The Coast Guard Authorization Act for 1985 and 1986 added the exception for the Coast Guard, when not operating as a service in the Navy.<sup>4</sup> The reports for that legislation do not contain discussion of this amending provision.

### **3.8.1.3. Law in Practice**

The DOD Office of General Counsel states The Food and Forage Act authorities "have been used numerous times in the recent past to cover situations where emergent military necessities dictated their use. The most recent use of these statutes was in connection with Operation Desert Storm/Desert Shield where their use formed one of the fundamental building blocks in manning, operating, and maintaining the United States forces."<sup>5</sup> Because of the unique nature of this statute and the applicability of the exemptions solely to DOD, that Office recommends against any change to the statute.<sup>6</sup>

DOD Directive 7220.8 implements the Food and Forage Act exemptions and sets forth specific and narrowly-drawn circumstances in which that authority may be utilized as to the purchase of fuel.

The Defense Fuel Supply Center, Office of General Counsel, did not report any specific instances where the authority of the Food and Forage Act had been expressly utilized.

### **3.8.1.4. Recommendation and Justification**

#### **Retain**

The Panel recommends retention of this section in its entirety. This law is useful because it permits DOD to incur budgetary deficiencies for specified military expenses while responding to military necessities, within a calendar year. The recent use of these anti-deficiency exemptions during Operation Desert Storm/Desert Shield demonstrates the continued utility of this statute and supports the Panel's recommendation to retain.

### **3.8.1.5. Relationship to Objectives**

Retention of this statute promotes the best interests of the DOD by affording needed budgetary flexibility during military emergencies.

<sup>6</sup>*Id*

## **3.8.2. 41 U.S.C. § 11a**

**(Act of June 30, 1921. Sec. 1)**

### **3.8.2.1. Summary of Law**

This section authorizes the Secretary of the Army to incur obligations for fuel to meet the requirements for one year without regard to the current fiscal year and using funds appropriated for the fiscal year in which the contract is made or for the subsequent fiscal year.

### **3.8.2.2. Background of Law**

This language was originally enacted by the Army Appropriation Act of 1922 and was based on a request of the Army Quartermaster General for such authority.<sup>1</sup> During hearings on this legislation, a representative of that office stated:

I would like to explain [the request for this authority]. The reason for asking for that was so that I can make contracts for fuel at the time that the commercial firms make their contract with the wholesalers, that is in March or the 1st of April. At that time they have an agreement with the miners, there is an agreement between the miners and the operators at which the wages are settled for a year and the operators are in a position to make the very best price to the Government for coal. Heretofore, we have been unable to make contracts for any time beyond the fiscal year, and by getting this provision enacted into law it will enable us to make contracts for 12 months, and from the time that the wage scale is settled for the year. In that way we can get the very best rates on coal.<sup>2</sup>

The term "fuel" used in this provision has since been interpreted by the GAO as including gasoline and other petroleum products.<sup>3</sup>

### **3.8.2.3. Law in Practice**

There is no direct, regulatory implementation of this authority.

The Defense Fuel Supply Center, Office of General Counsel, did not report any specific instances where the authority present at 41 U.S.C. § 11a had been expressly utilized by that

---

<sup>1</sup>Pub. L. No. 67-27, ch. 33 § 1, 42, Stat. 78(1921).

<sup>2</sup>Hearings, Before the Senate Comm. on Appropriations, 67th Cong., 2nd Sess. 137 (Feb. 13, 1921), (statement of Gen. Rogers).

<sup>3</sup>28 Comp. Gen. 614 (Letter to the Secretary of the Army dated April 22, 1949).

Office. However, that Office strongly urges retention of this authority because of the critical nature of fuel and related products during any national emergency.

#### **3.8.2.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this statute in its entirety. This law is useful because it permits DOD to incur budgetary deficiencies for fuel without regard to the current fiscal year. This authority remains desirable because of the critical nature of fuel and other petroleum products during a military or other national emergency.

#### **3.8.2.5. Relationship to Objectives**

Retention of this statute promotes the best interests of the DOD by affording needed budgetary flexibility during military emergencies.

### 3.8.3. 10 U.S.C. § 2201(b) and (c)

#### Excepted Expenses

##### 3.8.3.1. Summary of the Laws

Subsections (b) and (c) of this statute exempt the costs of airborne alerts and the costs of any increases in active duty military personnel from section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)). That law, also known as the Food and Forage Act, provides in relevant part that no government contract may be made absent an appropriation adequate to fulfill it.

##### 3.8.3.2. Background of the Laws

The language of subsection (b) was initially contained in the House version of the DOD Appropriation Bill of 1960.<sup>1</sup> The House committee report stated its belief that airborne alerts would be necessary as a deterrent and in order to protect strategic forces.<sup>2</sup> However, no funds were then specifically programmed for airborne alerts. Therefore, the Committee included this language for the stated purpose of "giving the President authority to incur a deficiency in Air Force funds at any time he feels it necessary to maintain an airborne alert."<sup>3</sup> The Committee then also included the congressional reporting requirement.

The language contained in subsection (c) initially appeared in the House version of the DOD Appropriation Bill for 1962.<sup>4</sup> Again, the stated intent was to permit the Secretary of Defense "to incur deficiencies in the appropriations chargeable with any, or all, costs incident to an increase in military personnel."<sup>5</sup> That Report also stated that "[t]his authority is similar to that which has been provided in subsection (b) of the section and in the appropriation acts for fiscal years 1960 and 1961 in the case of airborne alert costs."<sup>6</sup>

Both of these freestanding provisions were made permanent law by the DOD Appropriations Act for 1986.<sup>7</sup> They were codified in Title 10 in 1988.<sup>8</sup>

##### 3.8.3.3. Law in Practice

With respect to 10 U.S.C. § 2201(b) and (c), the DOD Office of General Counsel states "that these authorities have been used numerous times in the recent past to cover situations where emergent military necessities dictated their use. The most recent use of these statutes was in

<sup>6</sup>*Id.*

<sup>7</sup>Pub. L. No. 99-190, § 101(b), 99 Stat. 1204 (1985).

<sup>8</sup>Pub. L. No. 100-370, § 1(d)(1)(a), 102 Stat. 841 (1988).

connection with Operation Desert Storm/Desert Shield where their use formed one of the fundamental building blocks in manning, operating, and maintaining the United States forces."<sup>9</sup> That Office further recommends no change or consolidation of these anti-deficiency exemptions with any other, pertinent anti-deficiency laws because of their unique applicability to DOD.<sup>10</sup>

There is no direct, regulatory implementation of this statute.

#### **3.8.3.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this section in its entirety. This law is useful because it permits DOD to incur budgetary deficiencies while responding to specified, military emergencies. The recent use of this authority during Operation Desert Storm/Desert Shield demonstrates the continued utility of this section and supports the Panel's recommendation to retain.

#### **3.8.3.5. Relationship to Objectives**

Retention of this statute promotes the best interests of DOD by affording needed budgetary flexibility during military emergencies.

---

<sup>9</sup>*Supra* note 5.

<sup>10</sup>*Id.*

### **3.8.4. 10 U.S.C. § 2201(a)**

#### **Apportionment of funds: authority for exemptions**

##### **3.8.4.1. Summary of the Law**

Subsection (a) exempts funds appropriated for military functions from section 1512 of Title 31 (formerly section 3679 of the Revised Statutes). Section 1512 of Title 31 requires that all appropriated funds be apportioned monthly in order to avoid the necessity for a supplemental appropriation.

##### **3.8.4.2. Background of the Law**

The language of subsection (a) was first contained in the DOD Appropriations Act for 1951.<sup>1</sup> The language was inserted into the bill by a floor amendment during the Senate debates.<sup>2</sup> The original language of that amendment had provided that:

Appropriations and contract authority contained in this chapter shall not be subject to the provisions of subsections (c) to (i), inclusive, of section 3679 of the Revised Statutes, as amended by section 1111 of this Act, during the existence of an emergency affecting the national security.

This amendment was reported in disagreement in the Conference Report. Section 630 of that Act ultimately provided that:

During the current fiscal year, appropriations, fund and contract authorizations, available for military functions under the Department of Defense, shall not be subject to the provisions of sub-section (c) of section 3679 of the Revised Statutes, as amended by section 1211 of this Act.<sup>3</sup>

In 1951, the language of subsection (a) was amended by the DOD Appropriations Act for 1952 to provide that "the President may exempt appropriations" from the apportionment requirements.<sup>4</sup> The House Committee Report noted that, by changing 'shall' to 'may,' "the proposed language makes the exemption discretionary rather than automatic."<sup>5</sup>

---

<sup>1</sup>Pub. L. No. 81-759, § 630, 64 Stat. 896 (1950).

<sup>2</sup>96 Cong. Rec. 11645 (1950).

<sup>3</sup>As indicated, this same appropriation bill also amended section 3679 of the Revised Statutes to insert the present day apportionment requirement. In so amending, the House authors noted that the anti-deficiency law by itself did not accommodate the modern, more complex budget procedures and that apportionment would serve to eliminate the constant need for supplemental appropriations.

<sup>4</sup>Pub. L. No. 82-532, § 626, 65 Stat. 1413 (1951).

<sup>5</sup>H.R. REP. No. 5054, 82 Cong., 1st Sess., sec. 626 (1950).

This language was omitted from the 1953 DOD Appropriation Act. However, it was reinserted in the 1954 DOD Appropriation Act in the House version.<sup>6</sup> In its discussion of the apportionment requirements at section 3679 of the Revised Statutes, the House Committee noted that the nation's defensive position would soon be reviewed by the Joint Chiefs of Staff, a review that might result in the immediate need for greater appropriations than those that were then being recommended by the Committee.<sup>7</sup> The House Report stated that:

the Committee feels that the Administration will respect the findings as they are reported by the Joint Chiefs, and the time element involved should result in negligible, if any delay. As to the interim period, attention is called to [the provision] which permits the President to exempt Department of Defense funds from the anti-deficiency law. Should developments demand it, all available funds could be obligated and expended within thirty days, if that were possible.<sup>8</sup>

As this 1954 House report indicates, this exemption was intended to provide a greater degree of flexibility to DOD by permitting the expenditure of funds in advance of apportionment.

#### **3.8.4.3. Law in Practice**

The DOD Office of General Counsel states with regard to this authority that "the provisions of section 2201 of Title 10, United States Code . . . are of vital importance to the Department. They have been used numerous times in the recent past to cover situations where emergent military necessities dictated their use. The most recent use of these statutes was in connection with Operation Desert Shield/Desert Storm, where their use formed one of the fundamental building blocks in manning, operating and maintaining the United States forces."

There is no other authority that permits the President to exempt DOD expenditures from apportionment requirements when in the national interest.

#### **3.8.4.4. Recommendation and Justification**

##### **No action**

The flexibility afforded by this section in the rate of expenditure of DOD-appropriated funds remains useful and is not provided by any other statutory authority. This authority was utilized by the department during Operation Desert Storm/Desert Shield, and it is likely that such authority would again be needed in any future military emergency. However, this section does not present any core acquisition issues and has only an indirect relationship to contracting.

---

<sup>6</sup>Pub. L. No. 83- 179, § 623, 67 Stat. 604 (1953).

<sup>7</sup>H.R. REP. No. 680, 83rd Cong., 1st Sess. 3-5 (1953).

<sup>8</sup>*Id.*, at 5.

**3.8.4.5. Relationship to Objectives**

**Action on this statute would not specifically promote the objectives of the Panel.**

### **3.8.5. 10 U.S.C. § 2203**

#### **Budget estimates**

##### **3.8.5.1. Summary of the Law**

This section provides that the DOD budget shall be prepared and administered in such form and manner as prescribed by the Secretary of Defense. It further provides that the budgets of the military departments shall be uniform so far as practicable. Finally, it requires that the department budget include line-item information on materiel readiness and contractor employee working hours.

##### **3.8.5.2. Background of the Law**

This section was enacted by the National Security Act Amendments of 1949.<sup>1</sup> The section was intended to mandate the gradual implementation of cost-of-performance budgeting; that is, budgeting based on functions, activities and projects instead of on individual sources of appropriations.<sup>2</sup>

The institution of performance budgeting was intended to strengthen congressional control over DOD expenditures and appropriations otherwise hindered by appropriation-based budgeting. The Senate Report stated: "The multiplicity of sources from which operational funds are now derived makes it practically impossible, in activities of any magnitude, to estimate in advance with any reasonable degree of certainty the cost of performance or operation of an identifiable activity or program. These difficulties prevent accurate and reliable cost accounting and thus deprive budget planners and the Congress of any real guide to the costs of project or budget programs."<sup>3</sup>

In 1982, section 2203 was amended to require that each submitted DOD budget include data analyzing the effect of the requested appropriations on materiel readiness requirements.<sup>4</sup> No legislative history is available for this amendment.

In 1986, section 2203 was amended again to require that each budget include data, in the same form as utilized for federal employees, on the number of contractor employees working on DOD contracts during the fiscal year for that budget.<sup>5</sup> The amendment was intended to provide Congress with information to improve its ability to judge the merits of decisions to contract out workload and services and the impact of such decisions on the DOD civilian work force.<sup>6</sup>

---

<sup>1</sup>Pub. L. No. 87-651, § 207(a), 76 Stat. 520 (1949).

<sup>2</sup>S. REP. NO. 366, 87th Cong., 2d Sess. 142, 43 (1949).

<sup>3</sup>*Id.*

<sup>4</sup>Pub. L. No. 97-295, § 1(1), 96 Stat. 1290 (1982).

<sup>5</sup>Pub. L. No. 99-661, § 311, 100 Stat. 3851 (1986).

<sup>6</sup>H.R. REP. NO. 99-718, 99th Cong., 2d Sess. 118 (1986).

### 3.8.5.3. Law in Practice

The provisions of this section duplicate, in part, law set forth elsewhere within the U.S. Code. That is, Title 31 of the U.S. Code already requires all executive agencies to utilize cost-of-performance budgets. Section 1108(b)(1) of Title 31 requires that:

"[t]he head of each agency shall prepare and submit to the president each appropriation request for the agency. . . . Agency appropriation requests shall be developed from cost-based budgets in the way and at times prescribed by the President. The head of the agency shall use the cost-based budget to administer the agency and to divide appropriations or amounts.

However, with respect to this provision of law, the DOD Office of General Counsel maintains that "the provisions of this section are . . . far broader than the provisions of section 1108 of Title 31, United States Code." This statute provides specific authority to the Secretary of Defense to prescribe the form, content, and manner of preparation of the Department of Defense budget. It forms the cornerstone of the planning, programming, and budgeting system of the department. This flexibility to address Department of Defense requirements in a concise manner should be retained."<sup>7</sup>

Arguably, the Secretary of Defense already retains implicit authority to direct the planning, programming, and budgeting system of the department. Section 113(b) of Title 10 provides that "The Secretary . . . has authority, direction, and control over the Department of Defense." With respect to budget authority, section 113 further provides in part, at subsection (g)(1), that:

The Secretary of Defense, with the advice and assistance of the Chairman of the Joint Chiefs of Staff, shall provide annually to the heads of Department of Defense components written policy guidance for the preparation and review of the program recommendations and budget proposals of their respective components . . . .

### 3.8.5.4. Recommendation and Justification

#### No Action

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

Congress should consider whether this law warrants repeal. The requirement for cost-based budgeting already exists elsewhere within the U.S. Code. Further, it is doubtful that line-

---

<sup>7</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General) Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

item information on materiel readiness and contractor employees is necessary for each submitted budget when this information may be gathered on an as-needed basis.

Congress may also wish to consider whether, to state more definitively the Secretary of Defense's authority over the DOD budgetary system, section 113(g) could be amended to add, as subsection (g)(3), the following language:

The Secretary of Defense, subject to the authority and direction of the President, shall direct the budgetary system of the Department of Defense and its components, including prescribing the form and manner of the budget estimates of the Department of Defense and its components. Appropriations made available to the Department of Defense or its components are available for obligation only under scheduled rates of obligations that have been approved by the Secretary of Defense. This section does not prohibit the Department of Defense from incurring a deficiency that it has been authorized by law to incur.

This recommendation is based on the premise that broad statements of the Secretary of Defense's authority, when required, should be contained within one section of Title 10 that delineates the entire scope of the Secretary of Defense's authority.

#### **3.8.5.5. Relationship to Objectives**

Action on this statute will not specifically further any of the Panel's objectives.

### 3.8.6. 10 U.S.C. § 2204

#### Obligation of appropriations

##### 3.8.6.1. Summary of the Law

This section states that the Secretary of Defense may obligate appropriated funds only under preapproved scheduled rates, for the purpose, as stated, of preventing overdrafts or deficiencies.

##### 3.8.6.2. Background of the Law

This section was originally enacted by the National Security Act Amendments of 1949.<sup>1</sup> The section repeats the requirement set forth at section 1512 of Title 31, that all appropriations be apportioned in order to prevent the incurrence of a deficiency. However, the Senate report acknowledged that then-current methods of apportionment, under which apportionments were centrally approved by the Bureau of the Budget, were inadequate to prevent the incurrence of deficits. Under those procedures, the Bureau of the Budget did not have any direct check or control over what the agencies reported to it. Hence, Congress enacted a specific apportionment requirement for DOD.<sup>2</sup> Congress stated, however, that it meant to maintain those statutes permitting the incurrence of deficits in expenditures for fuel, subsistence, and transportation (41 U.S.C. § 11(a)) and when necessary for the national defense (section 3732 of the Revised Statutes).<sup>3</sup>

##### 3.8.6.3. Law in Practice

The DOD Office of General Counsel maintains, with respect to this section:

This statute does far more than repeating [sic] the apportionment requirement of section 1512 of title 31. It provides the Secretary of Defense with the authority to control and manage the execution of the Department's budget by controlling rates of obligations. It gives him the authority to centrally manage budgetary execution. . . . [I]his enactment and placement in title 10 reflects the unique requirements and demands of managing a Department of the size and complexity of the DOD. Its continuation is still necessary and of vital importance to the Department not only with respect to the procurement appropriations but with respect to all DOD appropriations.<sup>4</sup>

<sup>1</sup>Pub. L. No. 87-651, § 207(a), 76 Stat. 506, (1948).

<sup>2</sup>S. REP. NO. 366, 87th Cong., 2d Sess. §406 (1948).

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General) Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

#### **3.8.6.4. Recommendation and Justification**

##### **No Action**

The authority set forth within this statute remains valuable because it is the only statutory authority that expressly permits the Secretary of Defense to maintain control over the rate of expenditure of DOD appropriations. This section does not present any core acquisition issues and has only an indirect relationship to contracting.

However, the Congress may wish to consider whether this section should be repealed and the authority relocated to 10 U.S.C. § 113 as the section that encompasses all broad statements of the Secretary of Defense's authority. The proposed amendment to 10 U.S.C. § 113 is set forth in the analysis for 10 U.S.C. § 2203.

#### **3.8.6.5. Relationship to Objectives**

Action on this statute will not specifically further any of the Panel's objectives.

### **3.8.7. 10 U.S.C. § 2205**

#### **Availability of reimbursements**

##### **3.8.7.1. Summary of the Law**

This section permits reimbursements made to DOD or its components by other executive agencies, by DOD components, or by any department or organization for services rendered or supplies furnished to be credited directly to authorized accounts.

##### **3.8.7.2. Background of the Law**

This section was originally enacted by the National Security Act Amendments of 1949.<sup>1</sup> It was intended to simplify procedures under the Economy Act by permitting the crediting to authorized accounts of reimbursements and sums paid for supplies furnished or for services rendered between the military departments.<sup>2</sup> This section eliminated the then-present necessity, under the Economy Act, of establishing working-fund advance accounts to accommodate the interchange of supplies and services between the military departments. The section was thus ultimately designed to facilitate the integration of DOD.<sup>3</sup> The section was restated to more clearly reflect its purpose when codified in 1962.<sup>4</sup> Minor language changes were made in 1980.

##### **3.8.7.3. Law in Practice**

The DOD Office of General Counsel maintains that this section is necessary for the administration of a department of the size and organizational and operational complexity of the DOD.<sup>5</sup>

Currently, Title 31 still requires that advance payments for interagency orders must be credited to advance, working fund accounts. Section 1536(a) of Title 31 provides:

An advance payment made on an order under section 1535 of this title is credited to a special working fund that the Secretary of the Treasury considers necessary to be established. Except as provided in this section, any other payment is credited to the appropriation or fund against which charges were made to fill the order.

The last sentence of this section, however, permits interagency reimbursements other than advance payments to be credited directly to the agency whose funds were used to fill an order.

<sup>2</sup>S. REP. No. 366, 81st Cong., 1st Sess., 410 (1949).

<sup>3</sup>*Id.*

<sup>4</sup>Pub. L. No. 87-651, § 207(a), 76 Stat. 520 (1962).

<sup>5</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General) Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

#### **3.8.7.4. Recommendation and Justification**

##### **No Action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

However, the Panel notes that this law continues to promote the desired goal of integration of operations within DOD by permitting the executive agencies within DOD to receive payments, including advance payments, for goods and services provided to each other without complying with Treasury Department procedures.

This section partially duplicates the authority set forth in the last sentence of 31 U.S.C. § 1536(a), which permits direct reimbursements for payments on interagency orders. However, absent this section, there is no other law that permits DOD executive agencies directly to receive advance payments for goods or services that it provides to other executive agencies.

#### **3.8.7.5. Relationship to Objectives**

Action on this statute will not specifically further any of the Panel's objectives.

### **3.8.8. 10 U.S.C. § 2206**

#### **Disbursement of funds of military department to cover obligations of another agency of Department of Defense**

##### **3.8.8.1. Summary of the Law**

This law permits the Secretary of Defense to authorize a disbursing official of one department to disburse funds on behalf of another.

##### **3.8.8.2. Background of the Law**

This section was enacted by the National Security Act Amendments of 1949.<sup>1</sup> It was intended to provide for greater economy and efficiency within DOD, as well as greater integration among the military departments, by making the disbursing and accounting facilities of one department available to the other departments, particularly in areas where the work load of a separate facility is insufficient to warrant the maintenance of separate facilities.<sup>2</sup>

##### **3.8.8.3. Law in Practice**

This section is implemented by DOD Directive 7300.4, "Appointment of Disbursing Agents and Responsibility for Entrusted Funds."

It is not clear that the Secretary of Defense would have this authority absent this section. Section 125(a) of Title 10 does provide that "the Secretary of Defense shall take appropriate action (including the transfer, reassignment, consolidation, or abolition of any function, power or duty) to provide more effective, efficient, and economical administration and operation, and to eliminate duplication, in the Department of Defense . . ." except those duties that are vested by law. Under section 3321 of Title 31, the authority of a disbursing official to disburse funds may only be delegated by the Secretary of the Treasury; hence, it is authority that is vested by law. Therefore, it is not clear that the Secretary of Defense would retain authority, under section 125 of Title 10, readily to consolidate interservice disbursing authority in one official.

The only other authority within the U.S. Code permitting interagency disbursing within DOD limits that authority to situations where it is specifically requested by the Secretary of the Treasury. After stating the general rule that only the Secretary of the Treasury or his delegate may designate disbursing officials, section 3321 of Title 31 further provides that:

(c) The head of each of the following agencies shall designate personnel of the agency as disbursing officials. . . .

(2) military departments of the Department of Defense.

---

<sup>1</sup>Pub. L. No. 81-216, ch. 412, § 409, 63 Stat. 590 (1948).

<sup>2</sup>S. REP. NO. 366, 81st Cong., 1st Sess. 411 (1949).

(d) on request of the Secretary and with the approval of the head of an executive agency referred to in subsection (c) of this section, facilities of the agency may be used to assist in disbursing public money available for expenditure by another executive agency.

The Department of the Treasury, Office of General Counsel, was unable to provide additional information as to the use of the DOD exception set forth in this statute in its disbursing practices.

With regard to section 2206, the DOD General Counsel maintains that it is necessary for the efficient administration of the DOD.<sup>3</sup>

#### **3.8.8.4. Recommendation and Justification**

##### **No Action**

The authority granted to the Secretary of Defense by this section remains useful and continues to serve the valid purpose of integrating DOD administration. However, this section does not present any core acquisition issues and has only an indirect relationship to contracting.

Nonetheless Congress may wish to consider amending 31 U.S.C. § 3321 (c) and (d), relating to DOD disbursement authority, as set forth below, to add this specific DOD authority. The latter recommendation, amending the Title 31 provision, would seem the preferable alternative because it keeps all statutory authority specifically relating to DOD disbursing authority within one statutory provision and within that portion of the U.S. Code dealing generally with executive agency disbursement procedures.

#### **3.8.8.5. Relationship to Objectives**

Action on this statute would not directly further any of the Panel's objectives.

#### **3.8.8.6. Proposed Statute**

##### **§ 3321. Disbursing authority in the executive branch**

(a) Except as provided in this section or another law, only officers and employees of the Department of the Treasury designated by the Secretary of the Treasury as disbursing officials may disburse public money available for expenditure by an executive agency.

(b) For economy and efficiency, the Secretary may delegate the authority to disburse public money to officers and employees of other executive agencies.

---

<sup>3</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General) Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

(c) The head of each of the following executive agencies shall designate personnel of the agency as disbursing officials to disburse public money available for expenditure by the agency:

(1) United States Marshal's Office

(2) ~~military departments of the Department of Defense~~ the Department of Defense and its components (except for disbursements for the departmental pay and expenses in the District of Columbia).

(d)(1) The Secretary of Defense may authorize disbursing officials of Department of Defense components to make disbursements on behalf of other Department of Defense components and to charge those disbursements to the appropriate appropriation of that department or agency;

(2) on request of the Secretary and with the approval of the head of an executive agency referred to in subsection (c) of this section, facilities of the agency may be used to assist in disbursing public money available for expenditure by another executive agency.

### **3.8.9. 10 U.S.C. § 2208**

#### **Working Capital Funds**

##### **3.8.9.1. Summary of the Law**

This section authorizes the use of, and provides overall guidance on, the operation of working capital funds within the DOD.

##### **3.8.9.2. Background of the Law**

Working capital funds were first authorized by the National Security Act Amendments of 1949.<sup>1</sup> Section 407 of that Act provided that the Secretary of Defense may establish funds in DOD to finance inventories of supplies, materials, and equipment as designated (stock funds) and to provide working capital for industrial- and commercial-type activities of the Department (industrial funds). The Conference Report indicated that Congress contemplated that materials with a high obsolescence factor, or semicapital items, would not be included in that designation. The Secretary was empowered to provide capital for such funds by capitalizing inventories on hand and by the transfer of unexpended surplus appropriations, provided that no deficiency was incurred thereby.<sup>2</sup>

The funds were to be charged with the costs of supplies acquired or services consumed. Conversely, the funds were to be reimbursed from available appropriations for supplies furnished or services rendered, including any applicable administrative expenses.<sup>3</sup>

The Secretary of Defense was also authorized to issue regulations governing the operations of such funds. The original section expressly permitted that any such implementing regulations could permit, as otherwise authorized by law, the sale to non-DOD purchasers or users of services or goods produced by the funds. In 1982, this section was amended, without comment, to permanently authorize the sale of supplies in working capital fund inventories to contractors for use in performing DOD contracts.

The stated purpose of the section was more "effectively to control and account for the costs of the programs and work performed, to provide adequate, accurate and current cost data which can be used as a measure of efficiency, and to facilitate the most economical administration and operation of the military departments."<sup>4</sup> The report noted that numerous contemporary studies had commented on the lack of adequate cost accounting under current procedures, which supervised only the allotment of specific appropriations rather than overall programs with

---

<sup>1</sup>Pub. L. No. 81-216, ch. 412, §11, 63 Stat. 587 (1949).

<sup>2</sup>S. CONF. REP. NO. 366, 81st Cong., 1st Sess. 407 (1949).

<sup>3</sup>*Id.*

<sup>4</sup>*Id.* at 25.

numerous sources of appropriations. The establishment of stock and industrial funds was intended to eliminate that problem.<sup>5</sup>

These funds would also enhance economy and efficiency in other ways. With stock funds, raw material could be purchased during favorable market conditions, manufactured directly into end items and then purchased at cost. Such accounts would also promote standardization in procurement and storage, "thus facilitating interservice utilization and balancing of stock."<sup>6</sup> Carrying stock items in a single inventory would reduce overall inventory requirements by permitting the reissuance of unused or returned stock.

The DOD Authorization Act for FY84 amended this section to require direct, annual authorization of appropriations to DOD working capital funds beginning in 1985.<sup>7</sup> The House report noted that extraordinary requirements had recently been imposed on Department of Defense working capital funds.<sup>8</sup> These demands required increasingly large, direct appropriations and increasing reassignment of amounts from operation and maintenance accounts to the funds. The report also stated the Committee's belief that the magnitude of these direct appropriations, not now subject to annual authorization, justifies the requirement for annual authorization ". . . to provide a sound basis for coherent, overall oversight of the operation and maintenance accounts and to establish . . . comprehensive review of readiness consideration associated with ongoing and proposed initiatives involving Department of Defense capital working funds."<sup>9</sup> The Senate receded to the House provision without comment.

The DOD Authorization Act for FY85 further amended this section to require that a set percentage of payments received in a fiscal year by the working capital funds be reinvested for capital equipment.<sup>10</sup> This Act also added a provision permitting the sale of large caliber cannons, gun mounts, or recoil mechanisms produced by a working capital-funded Army arsenal to a person outside DOD for use in performing a contract with a U.S. agency or friendly foreign government and under certain enumerated restrictions.<sup>11</sup> Both of these amendments originated in the House bill.

With regard to the requirement of capital reinvestment, the House Committee reported that the provision was an attempt to deal with increasing obsolescence of capital equipment at industrially funded DOD activities.<sup>12</sup> The Committee noted that DOD had developed the Asset Capitalization Program for the express purpose of providing for the future replacement of capital equipment by including the cost of such replacement in prices charged to the customer. However, the House Committee also reported that, while it strongly supported this program, the program had suffered from limited appropriations and inconsistent oversight. Accordingly, the House bill

<sup>9</sup>*Id.*

<sup>10</sup>Pub. L. No. 98-525, §305, 98 Stat. 2513 (1984).

<sup>11</sup>*Id.*

<sup>12</sup>H.R. REP. No. 691, 98th Cong., 2nd Sess. (1984).

mandated set levels of reinvestment into the capital equipment of industrially funded activities. The conferees ultimately limited the reinvestment requirements for a three-year period.<sup>13</sup>

The amendment adding the provision regarding the sale of certain articles produced by working capital-funded Army arsenals was designed to conform section 2208 to section 30 of the Arms Export Control Act.<sup>14</sup> That section authorized the sale to certain U.S. entities of defense items from certain government arsenals for incorporation into items destined for commercial export to friendly foreign countries. However, it did not address those items assembled in an industrially funded facility using both private and government parts. This amendment was solely intended to ensure that all defense items, whether manufactured in a private or in a government plant, receive the same treatment under the Arms Export Control Act.

The National Defense Authorization Act for Fiscal Year 1991 further amended this section to require that purchases of certain articles manufactured at Army arsenals be made by advance, incremental funding.<sup>15</sup> The National Defense Authorization Act for Fiscal Year 1992 also amended this section to authorize the sale of items of equipment from Army working capital-funded industrial activities in certain circumstances.<sup>16</sup>

### **3.8.9.3. Law in Practice**

The DOD Office of General Counsel states with regard to this provision:

The provisions of this statute contain essential authority for the Secretary of Defense to manage and control both existing and any future working capital funds of the Department. It is the authority, for instance, under which the Defense Business Operations fund could have been established, at least in significant part, in the absence of Congressional action. It could serve as the basis for the establishment of any future working capital funds of the Department which might be considered to be necessary. This statute provides the authority for the Department of Defense to manage its commercial and industrial operations in a sound manner and its continuation is of great importance to the Department.<sup>17</sup>

<sup>17</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General), Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

#### **3.8.9.4. Recommendation and Justification**

##### **No Action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting. Rather, it relates primarily to DOD working capital fund operations.

#### **3.8.9.5. Relationship to Objectives**

Action on this statute would not specifically promote any of the Panel's objectives.

### **3.8.10. 10 U.S.C. § 2209**

#### **Management funds**

##### **3.8.10.1. Summary of the Law**

This section provides that management funds may be established and operated by the military departments to finance DOD operations that involve two or more appropriations but where the costs cannot immediately be charged to those appropriations.

##### **3.8.10.2. Background of the Law**

The management funds established by this section were generated by the Navy's experience, in the early 1940s, with its Naval Procurement Fund and with its Naval Supply Account since the early 1900s.

The National Security Act Amendments of 1949 established comparable funds for all the military departments, identifying all of these funds, including the then-existing Navy fund, as Management Funds.<sup>1</sup> "Management funds, as distinguished from working-capital funds, are not continuing or revolving funds. They constitute an allotment of money to a common pool for a special purpose only. They thus provide a management tool for economical and efficient administration of specific joint operations, or operations requiring the support of two or more appropriations, where the costs of the operations are not susceptible of immediate distribution as charges against such appropriations."<sup>2</sup> Along with the adoption of the performance-based budget and use of working-capital funds, the initiation of Management Funds was deemed integral to the modernization of the military departments.

As amended, the Funds granted initial corpora to be augmented by subsequent appropriations. The Secretary of Defense was required to approve each individual account established by the Funds. The Funds were authorized to incur expenses for materials other than stock and for personal and contractual services, provided that all expenditures were properly chargeable to available appropriated funds. All such expenditures would then subsequently be reimbursed by the relevant appropriation.

##### **3.8.10.3. Law in Practice**

The DOD Office of General Counsel states that "the provisions of this statute, relating to the management funds of the Department, should be retained on the same basis that section 2208 should be retained."<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 81-216, ch. 402, §11, 63 Stat. 588 (1949).

<sup>2</sup>S. REP. NO. 366, 81st Cong., 1st Sess. 32 (1949).

<sup>3</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General), Department of Defense, to Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

#### **3.8.10.4. Recommendation and Justification**

##### **No Action**

It is clear that the continued use of these funds is necessary for the efficient administration of the department. In addition, the section provides authority to finance a DOD operation by using funds from two or more separate appropriations, and specifically provides for advance payments based on estimated costs in such operations. It does not appear that this same fiscal authority is present elsewhere in the U.S. Code. However, this section does not present any core acquisition issues and has only an indirect relationship to contracting. Rather, it relates primarily to DOD management fund operations.

#### **3.8.10.5. Relationship to Objectives**

Action on this statute would not specifically further any of the Panel's objectives.

**Proceeds of sales of supplies: credited to appropriations**

**3.8.11.1. Summary of the Law**

This section provides, at subsection (a), that DOD appropriations may be credited with the proceeds of the disposals of supplies that are not financed by funds established under section 2208. At subsection (b), this section provides that obligations may be incurred against anticipated reimbursements to stock funds, as determined by the Secretary of Defense and with presidential approval, as necessary to maintain planned operations for the next year.

**3.8.11.2. Background of the Law**

The legislative history of this section is obscure. The actual language of this section originated in the Senate version of the FY54 DOD Appropriations Act.<sup>1</sup> It appears that this language was inserted in response to a provision in the initial House version of that bill. The House Committee Report had noted that reimbursements from other agencies within and outside DOD for supplies from working capital funds were being directed to other, operating accounts, and that therefore excessive funding existed in these accounts.<sup>2</sup> The Committee noted that, contrary to legislative intent, these receipts were generally not used to replace the items that had been sold out of the working capital funds.<sup>3</sup> Instead, these receipts were being used to purchase other items and these purchases were not subject to congressional review. The Committee also reported that the problem was compounded by inadequate accounting procedures within DOD. Because these reimbursements from stock fund purchases to other accounts were not separately reported under then-current procedures, no one could ascertain the extent to which planned appropriations would actually increase the obligating authority of these other accounts.<sup>4</sup>

Therefore, the House version proposed to repeal all individual legislative authority for certain identified operating accounts and to extend the use of working capital stock funds. The Committee reported, however, that the same problem of overcapitalization and inadequate accounting existed with the stock funds and that procedures must be installed to correct this problem.

The Senate version of the 1954 Appropriation Act omitted the House language and included instead the language of this section as it appears today. The language was included in the final bill. Neither the Senate Committee nor the Conference Report contained any explanation of this language.

---

<sup>1</sup>Pub. L. No. 83-179, ch. 305, § 645, 67 Stat. 357 (1953).

<sup>2</sup>H.R. REP. 680, 83rd Cong., 1st Sess. 10-11 (1953).

<sup>3</sup>*Id.*

<sup>4</sup>*Id.*

It appears that the Senate language was inserted to address the concern with overcapitalization being raised by the House Committee. As a compromise, rather than eliminating the overfunded operating accounts, the first proviso in the Senate language prohibited the crediting to DOD appropriations of any proceeds from working capital stock fund sales. Thus, Congress would not be faced with the problem, identified by the House Committee, of not knowing the extent to which proceeds from sales from § 2208 accounts were augmenting other accounts. Nonetheless, the second proviso in the Senate language permits the incurrence of obligations against anticipated reimbursements made directly to the funds, as necessary to maintain normal operations for the next year. By permitting, within the level of planned operations, the utilization of capital raised by the working capital funds, the second proviso preserves the ability of the working capital funds to promote economy and efficiency, as intended when such funds were initially authorized.

### **3.8.11.3. Law in Practice**

With respect to this section, DOD Office of General Counsel states:

The provisions of subsection (a) of this section provide the basis for a significant number of the Department's reimbursable programs. The provisions of subsection (b) of this section provide the basis for the incurring of obligations by stock funds in order to maintain sufficient operating inventories in anticipation of sales and reimbursements. These provisions are of extreme importance to the execution of programs within the Department of Defense.<sup>5</sup>

### **3.8.11.4. Recommendation and Justification**

#### **No Action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

However, the Panel notes that the purpose of this section remains valid. Subsection (a) ensures that the working capital funds will not be subject to an additional depletion of funds by having reimbursements allocated to other funds within DOD. That remains a legitimate concern. Specifically, the 1983 amendment to section 2208 requiring annual authorization of appropriations to working capital funds was based on evidence of the ever-increasing drain upon such funds. The 1985 amendment to section 2208, requiring set levels of reinvestment, was similarly based on evidence of the lack of adequate funding to the Asset Capitalization Program for industrial funds. These amendments indicate the existence of a concern with chronic under capitalization of these funds.

---

<sup>5</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General, Department of Defense, to Counsel, Acquisition Law Task Force, dated 3 Mar. 1992.

Subsection (b) ensures that the working capital funds will be able to meet their intended goal of promoting greater efficiency by authorizing the incurrence of obligations against anticipated reimbursements to such funds for the next fiscal year.

Since, both of these subsections specifically address operations of stock funds established pursuant to 10 U.S.C. § 2208, they may warrant relocation to that section.

#### **3.8.11.5. Relationship to Objectives**

Action on this statute would not specifically further any of the Panel's objectives.

### **3.8.12. 10 U.S.C. § 2211**

#### **Reimbursement for equipment, material or services furnished members of the United Nations**

##### **3.8.12.1. Summary of the Law**

This section provides that reimbursements from United Nations members for equipment or supplies furnished in joint military operations may be credited directly to appropriate DOD appropriations as are proceeds from foreign military sales under 22 U.S.C. § 2392(d).

##### **3.8.12.2. Background of the Law**

This section was originally enacted by the Second DOD Supplemental Appropriation Act of 1951.<sup>1</sup> At that time, DOD maintained a practice of requesting from countries participating in joint United Nations military operations reimbursement for property or services rendered. This section was intended to make permanent this practice and to credit relevant appropriations in order to secure the earliest possible replenishment of military stock.<sup>2</sup>

##### **3.8.12.3. Law in Practice**

With respect to this section, DOD Office of General Counsel maintains: "As a separate statute dealing with assistance furnished under conditions other than those covered by [10 U.S.C. § 2345 and 22 U.S.C. § 2392(d)], it should be continued as a separate authority. Moreover, it is basically an accounting statute, again potentially affecting every appropriation of the Department."<sup>3</sup>

In addition, the authority contained in this section is not duplicated by any other statutory authority. While 22 U.S.C. § 2392(d) provides that "reimbursement shall be made to any United States Government agency, from funds available for use under . . . this chapter" for assistance furnished by that agency to foreign countries, that authority applies specifically to foreign military sales. In addition, section 2345 of Title 10, providing that any credits accrued from providing logistic support or supplies to NATO allies under this chapter shall be liquidated every 3 months and paid directly to the entity providing such support, applies solely to reimbursements received pursuant to NATO cross-servicing agreements. Finally, 10 U.S.C. § 2205, permitting reimbursements to DOD accounts from inter or intra-agency agreements, applies to U.S. government agencies and does not encompass reimbursement from entities such as UN members.

---

<sup>1</sup>Pub. L. No. 81-911, ch. 1213, § 703 64 Stat. 1235 (1951).

<sup>2</sup>H.R. REP. No. 3193, 81st Cong., 2d Sess. 892 (1950).

<sup>3</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General, Department of Defense, to Counsel, Acquisition Law Task Force, dated 3 Mar. 1992.

#### **3.8.12.4. Recommendation and Justification**

**No action**

This section remains useful authority that is not duplicated by any other statutory provision. However, it does not present any core acquisition issues and has only an indirect relationship to contracting.

#### **3.8.12.5. Relationship to Objectives**

Action on this statute will not specifically promote any of the Panel's objectives.

### **3.8.13. 10 U.S.C. § 2217**

#### **Comparable budgeting for common systems**

##### **3.8.13.1. Summary of the Law**

This section requires the Secretary of Defense, in the annual DOD budget, to identify common procurement weapon systems among the Services and to identify and explain variations in procurement unit costs for these systems.

##### **3.8.13.2. Background of the Law**

This section was enacted by the National Defense Authorization Act of 1987.<sup>1</sup> The provision originated in the House version of the bill. The House Committee Report indicates that this provision was based on the wide discrepancy found among the services in the budgeted unit costs of certain common weapon system procurements.<sup>2</sup> The section was intended to encourage greater economy and efficiency by promoting standardization among the services in unit costs for common procurement and by requiring a justification when such standardization is not present.<sup>3</sup>

##### **3.8.13.3. Law in Practice**

The DOD Office of the Comptroller (Investment), reports that this section is complied with by means of an exhibit attached to the annual DOD budget that sets forth the required information. That Office further reports that this exhibit essentially repeats procurement unit cost information already contained in the budget pursuant to the procurement section of the DOD Budget Guidance Manual. The exhibit does contain some explanatory material not otherwise present in the budget. However, the explanatory material in the exhibit is generally not extensive because there are very few situations in which significant differences exist in comparative unit costs. Based on the above, the Office of the Comptroller (Investment) recommends repeal of this section as a statutory reporting provision that is administratively cumbersome and that provides little meaningful oversight information to the Congress.

The General Accounting Office, Office of the General Counsel, notes with respect to this provision that the inclusion of unit cost information in the budget does not ensure that unit cost variations are, or could be, easily identified in the budget as it is in a separate exhibit prepared specifically for that purpose.<sup>4</sup>

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Mr. Gary Keplinger, Associate General Counsel, General Accounting Office, to Mr. Anthony Gamboa and Mr. LeRoy Haugh, dated 25 June 1992.

The DOD Office of General Counsel states that it has "no strong views on this provision one way or the other."<sup>5</sup>

#### **3.8.13.4. Recommendation and Justification**

##### **No action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

Congress may wish to consider, however, whether this section should be repealed as an example of excessive legislative detail. The requirement provides little benefit to the Congress while imposing yet another administrative burden on DOD. The Panel notes that the information regarding weapon system unit costs are already provided in the annual budget. Thus, Congress is already able to identify significant variations in unit costs in comparable systems. In addition, in recent years this report has contained little explanation for variations because significant variations have not existed. Finally, even absent this statutory provision, Congress can request such explanations on a case-by-case basis.

#### **3.8.13.5. Relationship to Objectives**

Action on this statute would not specifically promote any of the Panel's objectives.

---

<sup>5</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General), Department of Defense, General Counsel, Acquisition Law Task Force, dated 3 Mar. 1992.

### **3.8.14. 10 U.S.C. § 2309**

#### **Allocation of Appropriations**

##### **3.8.14.1. Summary of the Law**

This section permits reallocation of appropriated funds between agencies. It states that appropriations available for procurement by an agency named in section 2303 of this title may, through administrative allotment, be made available for obligation for procurements by any other agency in amounts authorized by the head of the allotting agency and without transfer of funds on the books of the Department of the Treasury. A disbursing official of the allotting agency may make any disbursement chargeable to an allotment upon receipt of a voucher certified by an officer or civilian employee of the procuring agency.

##### **3.8.14.2. Background of the Law**

This law was originally enacted by the Act to Facilitate the Procurement of Supplies and Services by the Departments of the Army, Navy and Air Force, the Coast Guard and the National Advisory Committee for Aeronautics.<sup>1</sup> The House Committee Report indicated that the purpose of the bill was to make available contracting authority conferred by that bill for the purchase of supplies for other departments and agencies of the federal government.<sup>2</sup>

##### **3.8.14.3. Law in Practice**

There appears to be no direct, regulatory implementation of this section.

##### **3.8.14.4. Recommendation and Justification**

###### **No Action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

##### **3.8.14.5. Relationship to Objectives**

Action on this statute will not specifically promote any of the Panel's objectives.

---

<sup>1</sup>Pub. L. No. 80-413, ch. 65, § 10, 62 Stat. 25 (1948).

<sup>2</sup>H.R. REP. No. 109, 80th C. g., 1st Sess. 5 (1947).

### **3.8.15. 10 U.S.C. § 2395**

#### **Availability of appropriations for procurement of technical military equipment and supplies**

##### **3.8.15.1. Summary of Law**

This section provides that funds appropriated to DOD for technical military equipment and supplies are available until spent.

##### **3.8.15.2. Background of Law**

This language was originally enacted in 1950 by the Act Authorizing the Composition of the Army and Air Force.<sup>1</sup> The original version provided that:

Moneys appropriated to the Departments of the Army, Navy, or Air Force for procurement of technical military equipment and supplies, the construction of public works, and for research and development, including moneys appropriated to the Department of the Navy for the procurement, construction and research and development of guided missiles, which are hereby authorized for the Department of the Navy, shall remain available until expended unless otherwise provided in the appropriation Act concerned.<sup>2</sup>

The House version of that bill had provided that moneys appropriated to the Army for procurement of materials and facilities, including guided missiles, would remain available for obligation during the fiscal year when appropriated and for 5 years thereafter and that Army and Air Force R&D money will remain available until expended. The House Committee Report stated that this provision:

is highly desirable because of the often necessarily great intervals of time which elapse between the obligation of funds and the completion of deliveries under a contract . . . . The majority of Army research and development projects are long-range in nature. Upon initiation of a project it may be estimated that completion will require 3 years. Subsequent estimates may extend the period by several more years. The results are unpredictable and do not lend themselves to a predetermined time schedule. For this reason, any arbitrary time limit for expenditure of appropriations may jeopardize a worth while project whose continuation depends on a subsequent year's appropriation. Civilian contractors, particularly

---

<sup>1</sup>Pub. L. No. 82-604, H.R. 1437, July 10, 1950. See H.R. CONF. REP No. 2322, 82nd Cong., 1st Sess. 28 (1950).

<sup>2</sup>*Id.*

educational institutions and nonprofit foundations, are reluctant to accept long-range projects and hire highly qualified personnel when there exists the possibility of cancellation prior to completion.<sup>3</sup>

The House Committee also reported, with respect to the Air Force language, that the language was necessary to ensure that the appropriations provided by Congress to carry out the purposes of the legislation remain available to achieve that purpose. The language also would ensure that appropriations and contract authority would be available for reobligation whenever adjustment of requirements necessitates adjustment of procurement programs.<sup>4</sup>

The Senate version essentially set forth the enacted language. The House accepted the Senate version but added the specific language relevant to the Navy.<sup>5</sup>

In 1956, the section was codified into Title 31. In 1971, the language was amended to provide that R&D funds would be available for two successive fiscal years.<sup>6</sup> The limitation was added to conform this authority to the prior year's DOD Appropriations Act.<sup>7</sup> It was specifically intended to encourage more timely and effective use of R&D funds and to provide a significant improvement in Congressional control of DOD spending.<sup>8</sup> Technical language changes were made at that time as well.

In 1982, this section was amended and relocated into Title 10 as section 2394.<sup>9</sup> The two-year limitation on R&D funds was separated out into the current 10 U.S.C. § 2351. The remaining language was then clarified, such as omitting the Navy guided missile authorization, and the "unless otherwise provided" clause, as unnecessary.

In 1986, the section was redesignated as the current section 2395.<sup>10</sup>

### 3.8.15.3. Law in Practice

With respect to this provision, DOD Office of General Counsel states in part that:

in recent years, it has provided a statutory basis and justification for making the procurement appropriations available for a period of three years and for making the research, development, test, and evaluation appropriations available for a period of two years. It is a useful statute and should be retained. It has been relied upon in numerous cases when questions have arisen concerning the authority for multiyear appropriations, such as the procurement

<sup>4</sup>*Id.* at 11.

<sup>5</sup>H.R. CONF. REP. NO. 2322, 82nd Cong., 1st Sess. 2, 6-7. (1950).

<sup>6</sup>Pub. L. No. 92-156, § 712, 85 Stat. 424 (1971).

<sup>7</sup>S. REP. NO. 447, 92 Cong., 1st Sess. 89 (1971).

<sup>8</sup>*Id.*

<sup>9</sup>Pub. L. No. 97-258, § 2(6), 96 Stat. 1053 (1982).

<sup>10</sup>Pub. L. No. 97-295, § 1, 96 Stat. 1291 (1986).

appropriations, and when attempts have been made to shorten the period of availability of those appropriations. . . . The provisions of 10 U.S.C. § 2202(b) apply generally to all appropriations of the Department 'except as otherwise provided by law.' 10 U.S.C. § 2395 is such a law falling within the exception recognized in section 2202(b).<sup>11</sup>

As noted, the authority in this section functionally relates to 10 U.S.C. § 2351 (setting forth a two-year limitation on RDT&E funds) and to 10 U.S.C. § 2202(b) (enacted in 1987 and setting forth a three-year limitation on all funds appropriated for any DOD program, project or activity unless a contract has been entered into and except as otherwise provided by law).

There are no published Comptroller General decisions discussing this statutory provision.

#### **3.8.15.4. Recommendation and Justification**

##### **No action**

This section does not present any core acquisition issues and has only an indirect relationship to contracting.

The Panel notes, however, that, for the same reasons set forth in the House report to the initial version of this authority, it remains desirable to have no-year funding authority available to the Department when funds are not otherwise expressly limited. Further, this authority is not superseded by any other statutory provision. The DOD Office of General Counsel notes that the language of this section is not superseded by 10 U.S.C. § 2202(b) because it falls within the "except otherwise provided by law" proviso set forth in that section.<sup>12</sup> Thus, section 2395 does provide multiyear authority for funds for DOD technical military supplies and equipment when such authority is not clearly provided by or limited by public law or another statutory provision. This section also buttresses the multiyear availability of funds if other, public law authority is ambiguous or if attempts are made to limit the availability of multiyear funds.<sup>13</sup>

#### **3.8.15.5. Relationship to Objectives**

Action on this statute would not specifically promote any of the Panel's objectives.

---

<sup>11</sup>Memorandum from Mr. Tom G. Morgan, Office of Deputy General Counsel (Fiscal and Inspector General), Department of Defense General Counsel, Acquisition Law Task Force, dated 2 Mar. 1992.

<sup>12</sup>In any event, the Panel has recommended repeal of section 2202(b) as obviated by annual authorization and appropriation legislation. See chapter 3.9.1.4. of this Report

<sup>13</sup>This section is not required, however, to establish the two-year availability of R&D funds as that availability is already established by 10 U.S.C. § 2351.

## **3.8.16. 31 U.S.C. § 1552**

### **Procedure for appropriation accounts available for definite periods**

#### **3.8.16.1. Summary of Law**

This section provides that, on September 30th of the 5th fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose.

#### **3.8.16.2. Background of Law**

This section was originally enacted in 1955.<sup>1</sup> It was codified into Title 31 in 1982.<sup>2</sup> As originally enacted, the section provided that each appropriation account available for a definite period shall be closed by transferring the obligated balance to an appropriation account of the agency responsible for the obligation. Unobligated balances were to revert to the Treasury. When the head of an agency decided that part of a withdrawn, unobligated balance was required to pay obligations, that part could be restored to the appropriate account. That withdrawal was accounted for and reported as of the fiscal year in which the appropriation concerned expired for obligation. The obligated balance of an appropriation made available for obligation under a discontinued appropriation was eventually merged into the account to which the transferred amount had been credited.

The "M" account legislation was the result of a combined initiative by the GAO, the Bureau of the Budget (now OMB) and the Department of Treasury. The law allowed appropriations to remain available for payment of Government obligations for an indefinite period of time. The original appropriations lost their identity after a number of years by being merged into a single appropriations account.<sup>3</sup> The purpose of the law was to simplify and streamline the Federal Government's system for paying obligations. The provision allowing the use of expired unobligated budget authority to cover unforeseen upward adjustments to contracts enabled an agency to expedite payments by utilizing funds already appropriated to it. This authority eliminated the need to continually ask Congress for a reappropriation of funds.<sup>4</sup> Agencies could use this money to fund: (1) cost overruns on cost-type procurements; (2) changes within the scope of a contract; and (3) other actions that were not considered a new procurement.

---

<sup>1</sup> Appropriations -- Fiscal Management, Pub. L. No. 84-798, ch. 727, 70 Stat. 754 (1955).

<sup>2</sup> Pub. L. No. 97-258, § 1, 96 Stat. 935 (1982).

<sup>3</sup> Hence, the phrase "M Account" developed to refer to these accounts.

<sup>4</sup> Nat. Asso. of Regional Councils v. Costle, 564 F.2d 583 (D.C. Cir. 1977)(law as intended to improve efficiency of government accounting procedures by permitting agencies to adjust amounts of obligations which proved insufficient because of errors, unforeseen cost increases, or other underestimates in original award without resort to new appropriations).

The section was amended in its entirety by the National Defense Authorization Act of FY 1991.<sup>5</sup> The Senate version of the bill would have repealed this section, and other, related sections within this chapter of Title 31, and substituted an entirely new statutory regime to govern the availability of appropriation accounts. The House bill had contained a more limited version pertaining only to the DOD. The House receded with an amendment that amended existing law to preserve several aspects of the Senate version. The Conferees stated:

The conferees note that this provision is an extremely important legislative initiative. It would first and foremost provide clear and concise rules that will govern appropriation accounts. It would close all accounts available for a definite period and cancel any remaining obligated or unobligated balances five years after the period of availability of those accounts. In the case of appropriation accounts available for an indefinite period, such accounts would be closed and thereafter not be available for obligation or expenditure when it is determined that the purposes for which the account was made have been carried out, and when no disbursement is made against the accounts for two consecutive years.<sup>6</sup>

The new law thus directs the phase-out of the "M" accounts by the end of FY 1993. By that date, all lapsed fund appropriations will have been closed and no further obligation or payment will be made against those appropriations. The law further provides that all appropriation accounts will be canceled on September 30 of the 5th fiscal year after the period of availability for obligation of a fixed appropriation ends, and on September 30th of each fiscal year thereafter.

### **3.8.16.3. Law in Practice**

In the past decade, the "M" accounts and surplus accounts have grown substantially.<sup>7</sup> Along with this growth, the number and dollar volume of transactions on those accounts also multiplied.

However, the mandated cancellation of no-year appropriations after a five-year period has several significant, negative effects.

First, performance of some contracts simply is not completed by the end of the five-year period. The required cancellation of funds would terminate performance of these contracts, as well.

---

<sup>5</sup>Pub. L. No. 100-510, § 1405, 104 Stat. 1676 (1990).

<sup>6</sup>H.R. CONF. REP No. 923, 101 Cong., 2d Sess. 663 (1990).

<sup>7</sup>Merged surplus accounts refers to those surplus, unobligated amounts remaining in accounts prior to being merged. See generally U.S. GAO, *Lapsed Accounts: Army, Navy, and Air Force "M" and Merged Surplus Authority Account Balances*, GAO/NSIAD-90-170 (May 1990).

Second, there are frequently situations where, although work is completed prior to cancellation of funds, related contract administration matters are not. Determination of overhead rates may last a considerable period of time beyond completion of contract work. Further, contract claims are rarely settled within a five-year period after initial appropriations of funds. This new law may pressure contracting officers to settle claims prematurely in order to fall within five-year funding period. Conversely, contracting officers may be tempted to delay settlement when funding would adversely impact current appropriations.<sup>8</sup>

The Air Force Logistics Command and Air Force Systems Command (now combined as the Air Force Materiel Command) have noted significant problems with this law. Those Offices maintain a number of large, complex contracts with performance periods in excess of eight years.<sup>9</sup> These contracts are generally priced on a fixed price incentive or cost reimbursement basis and cannot be repriced or closed without a DCAA audit of actual costs and final determination of overhead rates. These audits alone may take five years to complete. Because the contractor's costs are audited after performance is otherwise complete, such contracts may not be closed for eight to fifteen years beyond their inception. Consequently, under the current law, obligated but unexpended funds will usually have been lost before contract completion or closure can be accomplished. Approximately \$334 million in closed appropriations have already been lost as of 6 March 1991, and many more will be lost by September 1993. The Air Force will have to use current appropriations to replace these losses in order to satisfy its older but continuing contract obligations. Resort to current appropriations will be at the expense of new programs budgeted for the current year.

#### **3.8.16.4. Recommendation and Justification**

##### **Amend**

**Amend section 1552(a) to provide that accounts need not be canceled on the 5th fiscal year after the period of availability for obligation of a fixed appropriation ends, if the Secretary determines that amounts are required for contracts that are not yet closed and annually thereafter notifies Congress as to the balances remaining in each fixed appropriation account whether obligated or unobligated.**

The Panel recommends that this section be amended to provide that appropriations will not be canceled if the Secretary determines that amounts are required for contracts that are not yet closed and annually thereafter notifies Congress as to the balances remaining in each fixed appropriation account whether obligated or unobligated.

The current law results in the cancellation of appropriations that may be properly obligated on a contract or otherwise become necessary for a contract administration matter but

---

<sup>8</sup>After the five year period, older contracts may be funded with current appropriations of the same type as the original, not to exceed one percent of the current or supplemental appropriation.

<sup>9</sup>The following summary is obtained in part from a draft, Air Force legislative proposal in this area.

have not yet been disbursed. The Panel believes that it is not necessary to the underlying Congressional purpose to cause appropriated funds to be canceled. This cancellation creates, at least temporarily, a deficiency and certainly creates possible hardship to the contractor because of deferred payments.<sup>10</sup> The proposed recommendation would except such obligated or unobligated funds from the five-year rule. Thus, money properly obligated on a contract or necessary for contract closeout could be used to finalize all actions that remain open on existing contracts such as to complete unfinished work, closeout costs, and settle contract claims.

### **3.8.16.5. Relationship to Objectives**

Amendment of this statute as proposed will preserve meaningful congressional oversight over the funding process, as originally intended, while permitting the DOD the sufficient fiscal latitude to properly administer contracts.

### **3.8.16.6. Proposed Statute**

#### **Procedure for appropriation accounts available for definite periods**

(a) On September 30th of the 5th fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose; provided that such funds as the Secretary of Defense or secretary of the military department concerned determines are required for payment under contracts that are not closed shall not be canceled. At the end of each fiscal year, the agency shall notify Congress as to the obligated and unobligated balances remaining in each such fixed appropriation account with respect to open contracts and shall cancel all amounts not required for such contracts.

(b) Collections authorized or required to be credited to an appropriation account, but not received before closing of the account under subsection (a) or under section 1555 of this title shall be deposited in the Treasury as miscellaneous receipts.

---

<sup>10</sup>Deferred claim payments also result in substantial accrual of interest payment liability by the Government.

## **3.9. Miscellaneous**

### **3.9.0. Introduction**

This subchapter sets forth individual analyses for those laws, primarily located within Title 10, that do not readily fall within the topics of any of the other subchapters. It includes a provision, section 2202, relating to the Secretary of Defense's authority to issue regulations governing the supply system. That provision has been modernized. An antiquated system of procurement for experimental aviation, not currently in use within the DOD, has been recommended for repeal (Chapter 135 -- sections 2271 through 2279). Section 2385, exempting arms and ammunition from federal tax, is recommended for amendment to include another line item -- heavy wheeled vehicles. This addition is intended to reduce administrative costs and burden associated with compliance with the federal tax levy on such vehicles. Section 2401, authorizing long-term leasing of naval vessels or aircraft, is recommended for retention as the section continues adequately to serve a valid, oversight function. However, a related public law provision limiting vessel leasing to 18 month periods is recommended for repeal as inhibiting economy and efficiency in the acquisition process. Three sections relating to acquisition of services or supplies by DOD entities from nonappropriated fund entities are recommended for retention (sections 2422, 2423, 2424). These, and other sections, are discussed in greater detail within this subchapter.

### 3.9.1. 10 U.S.C. § 2202

#### Obligation of funds: limitation

##### 3.9.1.1. Summary of the Law

This statute provides, at subsection (a), that an officer or agency of the DOD may obligate funds for procuring, producing, warehousing, or distributing supplies, or for related functions of supply management, only under regulations prescribed by the Secretary of Defense. The purpose of this section is to achieve the efficient, economical, and practical operation of an integrated supply system to meet the needs of the military departments without duplicating or overlapping operations or functions.

At subsection (b), the statute expressly states that, except as otherwise provided by law, the availability for obligation of funds appropriated for any program, project, or activity of the DOD expires at the end of the three-year period beginning on the date that such funds initially become available for obligation unless before the end of such period the Secretary of Defense enters into a contract for such program, project, or activity.

##### 3.9.1.2. Background of the Law

Subsection (a) was originally enacted by the Defense Appropriations Act for FY53.<sup>1</sup> The Senate Committee Report to that legislation indicated that the provision was part of an overall effort to centralize and integrate supply management within the DOD. The provision was intended to impose an affirmative duty upon the Secretary of Defense to establish a program, through implementing regulations, to eliminate duplication and inefficiencies within the defense supply system.<sup>2</sup> As envisioned by the Congress, that program would involve, for example, the integration of maintenance facilities to serve all department requirements within a given area and the procurement, distribution, and maintenance of common-use items on a uniform basis. The report suggested that such a program would best be implemented by civilian personnel unencumbered by loyalty to a particular service.<sup>3</sup>

Subsection (b) was added by the National Defense Authorization Act for Fiscal Years 1988-89.<sup>4</sup> The language originated as a floor amendment to the House version of the bill. The House bill, as amended on the floor, had contained an additional provision that prohibited the Secretary of Defense from obligating any appropriated amount for any activity in excess of the amount needed to carry out that activity. That provision was deleted in conference without explanation.<sup>5</sup> There is no legislative history to accompany that amendment.

<sup>2</sup>S. REP. NO. 1861, 82nd Cong., 2nd Sess. 9-10 (1952).

<sup>3</sup>*Id.*

<sup>4</sup>Pub. L. No. 100-180, § 1202, 101 Stat. 1153-54 (1987).

<sup>5</sup>H.R. CONF. REP. No. 446, 100th Cong., 2nd Sess. 812 (1987).

### 3.9.1.3. Law in Practice

#### Subsection (a):

10 U.S.C. § 2202(a) provides a basis for all DOD acquisition-related directives. For example, DOD Directive 4000.8, "Basic Regulations in the Military Supply System," states that:

"(a) All Department of Defense Directives and Instructions which deal with procurement, production, cataloging, standardization, warehousing, distribution, maintenance, disposal, transportation of supplies or equipment, or related supply management or traffic management functions are regulations prescribed by the Secretary of Defense in compliance with Title 10, U.S. Code 2202.

(b) All regulations, procedures, and instructions of the Military Departments and all other DOD Components dealing with the subject enumerated in paragraph (a) of this section shall have the force and effect of regulations prescribed by the Secretary of Defense in compliance with 10 U.S.C. § 2202 to the extent that they are not inconsistent with DOD Directives and Instructions."

Subsection (a) also mandates that regulations be prescribed for the purpose of achieving an integrated, centralized supply system. To that end, subpart 208.70 of the DFARS establishes the DOD Coordinated Acquisition Program. Coordinated acquisition is defined there as acquisition by contracting activities within the continental United States, and by a Unified Commander at any location, of certain supplies to satisfy the requirements (including overseas requirements) of all departments. It also includes acquisition by agreement between departments or other agencies.<sup>6</sup> The Coordinated Acquisition program includes the purchase of commodities that are assigned to a single military department by the Deputy Assistant Secretary of Defense (Logistics) for management, including acquisition, under the Integrated Materiel Management Program. The Coordinated Acquisition program also applies to commodities assigned to the DLA or GSA for centralized acquisition.<sup>7</sup> However, the requiring department may also at its option purchase locally virtually any DLA or GSA centrally-managed, commercially available item. Local purchase must be in the best interest of the Government in terms of quality, timeliness, and cost. The item cannot be a mandatory centralized acquisition as described in 208.7100-1. For certain stock items, a local purchase can be made only if a statement of the local purchase advantage is made and approved.<sup>8</sup>

<sup>6</sup>DFARS, 48 C.F.R. § 208.7001.

<sup>7</sup>DFARS, 48 C.F.R. § 208.7000. "The primary objective of coordinated acquisition is to obtain for the Government maximum economy through the consolidation of requirements and the elimination thereby of competitive purchases among the Departments." *Id.* at 208.7003-6.

<sup>8</sup>DFARS, 48 C.F.R. § 208.7100-2. For other, internal DOD regulations regarding centralized acquisition, see:

Directive 4000.19, "Interservice, Interdepartmental, and Interagency Support," Oct. 14, 1980.

Directive 4115.1, "DOD-GSA Interagency Procurement,"

Directive 4140.14, "Local Procurement from GSA Federal Supply Schedule or National Buying Program"

Directive 4140.5, "Local Procurement from GSA Stores Depot"

Directive 5105.22, "DLA Authority to Enter Into Logistic Supply and Services Agreements with Other Agencies,"

Finally, with respect to subsection (a), we note that this provision historically was cited by the Secretary of Defense as the authority for establishing the Armed Services Procurement Regulation Committee (now the DAR Council) under the then cognizant office, the Assistant Secretary of Defense (Production & Logistics), to issue the Armed Services Procurement Regulation (now the Defense Federal Acquisition Regulation /supplement (DFARS)).

Overall, no significant comments were received from the military departments regarding this statute. The Sundstrand Corporation recommends retention of subsection (a) and repeal of subsection (b). The latter recommendation is based on the fact that the period for obligation of funds is now generally covered in individual authorization and appropriations acts.

#### **3.9.1.4. Recommendations and Justification**

##### **I**

#### **Amend subsection (a)**

As noted above, subsection (a) is relied upon within the Department of Defense as the statutory authority for all acquisition-related regulations issued by the Secretary of Defense, his delegate, or the secretary of a military department. Such authority does not appear to be subsumed within any broader grant of authority to the Secretary of Defense elsewhere in Title 10. The subsection is thus essential to a wide-ranging system of acquisition regulations.

However, this subsection, on its face, is not a grant of authority to the Secretary of Defense to issue regulations. Rather, the statute states that the DOD may obligate funds only under prescribed regulations. Thus, the statute textually is a restriction on authority to obligate. In this manner, there is a conflict between the historical utilization of this statute by the department and its facial meaning.

To resolve that conflict, we recommend that the subsection be amended to delete the latter two sentences and to amend the first sentence to more clearly state its role as the statutory basis for the Secretary's authority to issue regulations guiding the defense supply system.

##### **II**

#### **Repeal subsection (b)**

The Panel recommends repeal of this subsection as redundant of funding limitations that are routinely set forth in annual authorization and appropriations legislation.

#### **3.9.1.5. Relationship to Objectives**

Disposition of this statute as set forth above will further the goal of streamlining the DOD acquisition process.

### 3.9.1.6. Proposed Statute

#### § 2202. Obligation of funds: limitation

~~(a) The Secretary of Defense shall issue regulations to be followed by all agencies of the Department of Defense for the procurement, production, warehousing or distribution of supplies and related functions. Notwithstanding any other provision of law, an officer or agency of the Department of Defense may obligate funds for procuring, producing, warehousing, or distributing supplies, or for related functions of supply management, only under regulations prescribed by the Secretary of Defense. The purpose of this section is to achieve the efficient, economical, and practical operation of an integrated supply system to meet the needs of the military departments without duplicate or overlapping operations or functions.~~

~~(b) Except as otherwise provided by law, the availability for obligation of funds appropriated for any program, project, or activity of the Department of Defense expires at the end of the three-year period beginning on the date that such funds initially become available for obligation unless before the end of such period the Secretary of Defense enters into a contract for such program, project, or activity.~~

## **3.9.2. 10 U.S.C. Chapter 135, §§ 2271-2279**

### **Encouragement of Aviation**

#### **3.9.2.1. Summary of Laws**

All of these sections set forth an acquisition system designed exclusively for the procurement of aircraft, aircraft parts and accessories. This system includes a specific provision for the procurement of experimental aircraft and equipment, and for certain design rights for patent holders as against the government.

These sections are grouped together for analysis because all of them have virtually the identical legislative history. However, the sections individually provide as follows:

- **Section 2271:** This section sets forth a specific, sealed bid procedure for aeronautical design competition. It provides for mandatory advertisement of aeronautical design competitions, and for evaluation of submitted designs by a board appointed by the Secretary of the relevant military department. That evaluation can be based on any objective merit system set forth in the solicitation, not just price. The Board recommends a winning design to the Secretary, whose decision is final. Any reasonable showing of an error in the merit determination is submitted to an arbitral board, whose findings must also be approved by the Secretary.
- **Section 2272:** Under this section, the department Secretary is authorized to contract with a design competition winner for the design and/or the manufacture of the design. The Secretary is also authorized to contract with a design competition winner for the design and/or the manufacture of the design. The secretary is also authorized to divide contracts for a manufactured item to combine different features of submitted designs.
- **Section 2273:** This section provides that any executive or military department may construct any item according to any winning design after completed purchase of that design or any severable part of it without further compensation to the design winner. However, this section also provides that the winner may apply for a patent on any aspect of the designed item originated by him. Such a patent holder has exclusive rights under it against all persons except the United States or its vender. Finally, the section provides a cause of action in the U.S. Claims Court for any person who believes that an aeronautical design is being used or has been incorporated in an item by or for the government without just compensation.
- **Section 2274:** This section authorizes the Secretary to buy experimental aeronautical designs or items as necessary for developmental purposes as well as follow-on quantity procurements of the same item.

- **Section 2275:** Under this section, the Secretary is authorized to enter into any aviation contract under this chapter with the lowest responsible bidder. The Secretary's actions as to contract award, interpretation or administration are reviewable only by the President, relevant Federal court or as provided for by the contract.
- **Section 2276:** This section subjects the manufacturing plant and books of any contractor furnishing an aviation item under this chapter to inspection and audit by any executive department designee. The section also provides for civil and criminal penalties against any individual who attempts to deprive the government of full and free competition under this chapter or of any audit necessary to disclose contract cost.
- **Section 2277:** Under this section, any appropriations designated for aviation procurement may be used to purchase aeronautical designs and to pay for any related arbitration costs.
- **Section 2278:** This section authorizes the Army and Air Force Secretaries to purchase sample aircrafts from unsuccessful bidders.
- **Section 2279:** This section restricts access, by alien employees of contractors under this chapter, to plans or specifications for the contracted item as well as to the work under construction. This section also limits the participation of such individuals in trials under the contract.

### **3.9.2.2. Background of the Laws**

All of these sections were originally enacted by the 1926 Act to Increase the Efficiency of the Air Corps.<sup>1</sup> These sections were initially introduced as an amendment to the Senate version of this bill during floor debates. The initial Senate amendment had provided for a wholesale exemption from competitive bidding requirements for aviation design and manufacturing contracts. The amendment sponsor stated that the amendment was being offered in response to investigation that had been conducted the previous year by a Special House Committee on Aviation (the Lambert Committee). In those investigations, the Lambert committee had concluded that:

the aviation industry in the United States has dwindled and that the principal causes of the weakness of the industry are, among others, first, lack of continuity in Government orders; second, losses on Government contracts, both experimental and production; third, failure to recognize and protect design rights; and fourth, a destructive system of competitive bidding.<sup>2</sup>

<sup>1</sup>Pub. L. No. 34-798, ch. 721, § 10(i), 44 Stat. 788 (1926)

<sup>2</sup>Debates of the Senate Special House Committee on Aviation, 67 Cong. Rec. 10495 (June 3, 1926), (statement of Senator Bingham).

In conference with the House, this amendment was modified into the current version of the law, providing for an adapted sealed bid procedure where selection could be based on merit factors other than price. The House version, however, did expressly retain authority for noncompetitive procurement of aviation designs when necessary for developmental purposes. This provision was intended to encourage the development of aviation design, but without a wholesale exemption from competition.<sup>3</sup>

Subsequently, in hearings held in 1947 on the Armed Services Procurement Act (ASPA), an Air Force representative testified that the Air Force had not used this procedure since at least 1941.<sup>4</sup> The ASPA did expressly retain this statute. However, it did so solely for the purpose of preserving it as an alternative means of aviation design procurement until the procedures authorized by the ASPA had gone through a trial and error period.<sup>5</sup>

In 1971, the Comptroller General discussed the legislative history of these provisions in an unpublished, advisory opinion to the then-Chairman of the House Armed Services Committee. The Comptroller General concluded that these provisions were not applicable to the procurement of aircraft or aircraft parts, and recommended that the Congress consider their repeal as "dead letter law."<sup>6</sup>

### **3.9.2.3. Laws in Practice**

The system of procurement set forth in this chapter apparently has not been used in the last forty years. The Navy Office of General Counsel, Army Aviation Command Counsel's office, and the Air Force Office of General Counsel informally report that this procedure is not now currently used in aviation procurement by those services.<sup>7</sup>

### **3.9.2.4. Recommendation and Justification**

#### **Repeal**

These sections should be repealed in their entirety as obsolete laws. The procedures established by this chapter are not now used by the aviation buying commands surveyed, nor have they been used since prior to World War II.

### **3.9.2.5. Relationship to Objectives**

Repeal of these statutes promotes the goal of streamlining the DOD acquisition process by removing a series of obsolete provisions.

<sup>3</sup>H.R. REP. No. 1527, 39th Cong., 2nd Sess. (1926).

<sup>4</sup>House hearings on H.R. 1366, Feb. 4, 1947, p. 545.

<sup>5</sup>*Id.*

<sup>6</sup>Letter from Elmer B. Staats, Comptroller General of the United States, to Hon. L. Mendel Rivers, Chairman, House Armed Services Committee, B- 168664 (unpublished)(1971).

<sup>7</sup>These offices have so reported in informal, telephone conversations with Acquisition Law Task Force staff in November of 1991.

### **3.9.3. 10 U.S.C. 2314**

#### **Laws inapplicable to agencies named in section 2303 of this title**

##### **3.9.3.1. Summary of the Law**

This section exempts the Secretaries of Defense, Army, Navy, Air Force, and Transportation, and the Administrator of NASA from the advertising requirements of R.S. 3709 (41 U.S.C. § 5) and from the one-year bar on stationery or supply contracts at R.S. 3735 (41 U.S.C. § 13) in their procurement of property or services.

##### **3.9.3.2. Background of the Law**

This section was originally enacted by An Act to Facilitate Procurement of Supplies and Services by the Departments of the Army, the Navy and the Air Force, the Coast Guard, and the National Advisory Committee on Aeronautics and for other purposes.<sup>1</sup> The Senate Committee Report to that legislation stated that the bill was intended to repeal the listed statutes insofar as they apply to the named agencies.<sup>2</sup>

##### **3.9.3.3. Law in Practice**

There is no direct, regulatory implementation of this statute. No comments were received regarding this statute.

##### **3.9.3.4. Recommendation and Justification**

###### **Retain**

The Panel recommends that this statute be retained. This statute continues to serve a useful purpose by exempting the Secretaries of Defense, Army, Navy Air Force, and Transportation, and the Administrator of the NASA from the advertising requirements of R.S. 3709 and from the one-year bar on stationery or supply contracts at R.S. 3735.

Repeal of those Revised Statute sections would obviate this statute. However, the advertising requirements of R.S. 3709, codified at 41 U.S.C. § 5, still apply to procurement by the Congress and the judiciary. That statute thus continues to serve a valid purpose. Therefore, there is a continuing need for this statute in order to exempt DOD from those Revised Statute sections and avoid any conflict between the Revised Statute sections and the competition requirements of the CICA.

---

<sup>1</sup>Pub. L. No. 80-413, § 116, 62 Stat. 25 (1948).

<sup>2</sup>S. REP. NO. 571, 80th Cong., 1st Sess. 32 (1947).

### **3.9.3.5. Relationship to Objectives**

**Retention of this statute will further the best interests of DOD by exempting the named agencies from the advertising and other requirements of the cited Revised Statute sections.**

### **3.9.4. 10 U.S.C. § 2369**

#### **Product evaluation activity**

##### **3.9.4.1. Summary of the Law**

Subsection (a) declares that the Secretary of Defense acting through the Under Secretary of Defense for Acquisition shall establish a program for the supervision and coordination of product evaluation activities within the DOD.

Subsection (b) declares that the Secretary of each military department and the head of each Defense Agency may, subject to supervision and coordination by the Under Secretary of Defense for Acquisition, establish and conduct appropriate product evaluation activities. The purpose of each product evaluation activity is to evaluate products developed by private industry independent of any contract or other arrangement with the United States in order to determine the utility of such products to the DOD.

Subsection (c) delineates cost sharing policies as a condition to conducting an evaluation of any product under this section. The producer of the product shall be required to pay one half of the cost of conducting such evaluation. For product development proposed by a small business concern (within the meaning of section 3 of the Small Business Act (15 U.S.C. § 632)), the Secretary of Defense may pay up to 85 percent of the cost of product evaluation if the small business concern agrees to a not-for-profit contract.

##### **3.9.4.2. Background of the Law**

This section was originally enacted by the National Defense Authorization Act for Fiscal Year 1989.<sup>1</sup> The language originated in the Senate version of the bill. The Senate Committee Report indicated that the legislation was in response to efforts by private industry to develop products for potential use by the military departments. The Report noted that these efforts were not adequately coordinated with the government.<sup>2</sup> In conference, the House receded with an amendment clarifying that the provision was not intended to establish a separate office to administer this activity. Rather, the DOD was to set up a user point of contact for each potential product to approve the potential usefulness of that product.<sup>3</sup>

##### **3.9.4.3. Law in Practice**

It appears that this statute has never been implemented within the DOD.

---

<sup>1</sup>Pub. L. No. 100-456, § 842(2), 102 Stat. 2026 (1988).

<sup>2</sup>S. REP. NO. 100-326, 100th Cong., 2nd Sess. 114 (1988).

<sup>3</sup>H.R. CONF. REP. NO. 100-989, 100th Cong., 2nd Sess. 434-435 (1988).

The Council of Defense and Space Industry Associations (CODSIA) recommends the retention of the statute and a recommendation to the Congress that it direct the department to implement this program.

#### **3.9.4.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that this statute be repealed. Since the statute has never been implemented, there is no basis to evaluate it. However, the Panel believes that the goals of this statute are adequately addressed by the DOD nondevelopmental item and commercial programs.

#### **3.9.4.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process by removing an unnecessary statutory requirement.

### **3.9.5. 10 U.S.C. 2384a.**

#### **Supplies: economic order quantities**

##### **3.9.5.1. Summary of the Law**

Subsection (a)(1) declares an agency shall procure supplies in such quantity as (a) will result in the total cost and unit cost most advantageous to the United States, where practicable, and (b) does not exceed the quantity reasonably expected to be required by the agency. Subparagraph (a)(2) declares the Secretary of Defense shall take paragraph (1) into account in approving rates of obligation of appropriations under section 2204 of this title.

Subsection (b) specifies that each solicitation for a contract for supplies shall, if practicable, include a provision inviting each offeror responding to the solicitation to state an opinion on whether the quantity of the supplies proposed to be procured is economically advantageous to the United States and, if applicable, to recommend a quantity or quantities which would be more economically advantageous to the United States. Each such recommendation shall include a quotation of the total price and the unit price for supplies procured in each recommended quantity.

##### **3.9.5.2. Background of the Law**

This section was originally enacted by the National Defense Authorization Act for Fiscal Year 1985.<sup>1</sup> The language first appeared in the Senate version of the bill. The Senate Committee Report indicated that the provision was based upon a failure of the military departments to order spare parts in economic order quantities, and further noted that this failure has played a major factor in excessive prices for spare parts.<sup>2</sup> The House version of the bill had merely contained a policy statement in favor of economic order quantities. The House receded in conference.

##### **3.9.5.3. Law in Practice**

There is no direct, regulatory implementation of this statute.

Defense Logistics Agency (DLA) recommends repeal of this statute as no longer serving any useful purpose. DLA notes that it would continue to procure economic order quantities when appropriate in this absence of this statute as sound management practices.<sup>3</sup> The Sundstrand Corporation recommends that the statute be retained, noting that it was originally drafted with the support of industry and provides an alternative to high priced spare parts when the Government is soliciting limited quantities.

<sup>1</sup>Pub. L. No. 98-525 § 1233(2), 98 Stat. 2600 (1984).

<sup>2</sup>S. REP. NO. 500, 98th Cong., 2nd Sess. 251 (1984)

<sup>3</sup>Telephone conversation between Mr. Gary Quigley, Deputy General Counsel, DLA, with Acquisition Law Task Force, September, 1992.

No other comments regarding this statute were received from the military departments and other parties surveyed.

#### **3.9.5.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute. The statute was initially enacted to address a specific problem regarding spare parts pricing that arose in the 1980s. Currently, however, this statute mandates the type of sound, management practices that should not require legislative fiat.

#### **3.9.5.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process and specifically will further the goal of affording DOD acquisition managers the opportunity to exercise their discretion in managerial practices.

### **3.9.6. 10 U.S.C. § 2385**

#### **Arms and ammunition: immunity from taxation**

##### **3.9.6.1. Summary of the Law**

This statute prohibits imposing a tax on the sale or transfer of firearms, pistols, revolvers, shells, or cartridges when such articles are bought with funds appropriated for a military department.

##### **3.9.6.2. Background of the Law**

This section was originally enacted by the National Defense Appropriations Act for FY51.<sup>1</sup> The Report to that legislation merely stated that the provision was intended to exempt the purchase of these items from a specified, extant federal tax levy.

##### **3.9.6.3. Law in Practice**

There are no regulations directly implementing this statute.

The Office of the Judge Advocate General, Department of the Army, recommends that this statute be amended to add heavy wheeled vehicles as one of the items that are immune from federal tax.<sup>2</sup> The current federal excise tax of 12% applies to all highway vehicles of more than 33,000 lbs. The anticipated savings from eliminating the administrative burden of complying with the federal tax levy on the five-ton truck alone is estimated at \$114,302,000 to \$194,718,000. In support of this proposal, the Army notes, for example, that the federal excise tax creates administrative burdens when delivery destinations for vehicles change, as occurred during Operation Desert Shield/Desert Storm and as is anticipated during future force reductions. These changes cause contract modifications and changes in financial obligations. Exemption of the federal excise tax on military vehicles would, it is contended, eliminate the de-obligations and searches for additional funds to obligate when shipping changes occur. It would also save considerable personnel hours that are currently expended in contract management and execution.

No other entities of DOD have suggested any further line item additions to this statute.

---

<sup>1</sup>Pub. L. No. 78-124, § 812, 64 Stat. 1236 (1950).

<sup>2</sup>Datafax transmission from Mr. Larry R. Rowe, Chief, Tax and Property Law Team, Department of the Army, Office of the Judge Advocate General, dated 5 Nov. 1992.

#### **3.9.6.4. Recommendation and Justification**

##### **Amend**

The Panel recommends that this statute be amended to add heavy wheeled vehicles and trailers as one of the items exempt from federal tax. This class of vehicles is a single item whose addition to this statute as a federal tax-exempt item could result in significant savings to the government, both financially and in man-hours. Exemption will eliminate incongruity of Congress appropriating funds to pay truck manufacturers for excise taxes which are then returned to the United States.

#### **3.9.6.5. Relationship to Objectives**

Amendment of this statute would further the goals of the Panel by providing for optimum use of appropriations.

#### **3.9.6.6. Proposed Statute**

##### **Arms and ammunition: immunity from taxation**

No tax on the sale or transfer of firearms, pistols, revolvers, shells, or cartridges, or heavy wheeled vehicles and trailers may be imposed on such articles when bought with funds appropriated for a military department.

### **3.9.7. 10 U.S.C. § 2387**

#### **Procurement of table and kitchen equipment for officers' quarters: limitation on**

##### **3.9.7.1. Summary of the Law**

This statute provides that DOD appropriations may not be used to supply or replace table linen and kitchen dishes or utensils for officers' quarters on shore. It does not apply to field or temporary messes, fleet, air, or submarine bases and landing forces or expeditions.

##### **3.9.7.2. Background of the Law**

This statute was originally enacted by the DOD Appropriations Act for FY 1956.<sup>1</sup> The Report to that bill stated merely that this law had been in DOD Appropriations Acts for many years and was now made permanent law.<sup>2</sup>

##### **3.9.7.3. Law in Practice**

In the Department of the Army, this statute is implemented by AR 210-50, para. 10-15, under which a command may furnish certain household items, but not linen and tableware. Special command positions, however, are entitled to allowances for these items. In the Department of the Air Force, this statute is implemented by a Table of Allowances that is used to define what items will be purchased to support officer housing. Purchase requests for items listed in this statute are not approved unless they appear on the Table of Allowances.

Both the Office of the Judge Advocate General, Department of the Army, and the Operational Contracting Division, Deputy Assistant Secretary (Contracting) for Assistant Secretary of the Air Force (Acquisition), report that the limitation in this statute does not unduly hamper the acquisition process.

##### **3.9.7.4. Recommendation and Justification**

###### **Retain**

The Panel recommends that this statute be retained. Although the legislative history does not indicate the express congressional intent behind this statute, it appears that it was intended to function as a guard against pilferage. Thus, the statute continues adequately to serve a valid purpose. The services report that this statute does not unduly impede the acquisition process.

<sup>1</sup>Pub. L. No. 84-157, § 614, 69 Stat. 317 (1955).

<sup>2</sup>H.R. REP. No. 493, 84th Cong., 1st Sess. 2 (1955).

### **3.9.7.5 Relationship to Objectives**

Retention of this statute furthers the objective of ensuring that acquisition laws promote financial and ethical integrity.

### **3.9.8. 10 U.S.C. § 2389**

#### **Contracts for the procurement of milk: price adjustments; purchases from the Commodity Credit Corporation**

##### **3.9.8.1. Summary of Law**

Paragraph (a) of this section states under regulations prescribed by the Secretary of Defense, any contract for the procurement of fluid milk for beverage purposes which was being performed on or after March 1, 1966, may be amended to provide a price adjustment for losses incurred by a contractor because of increased prices paid to producers for such milk as a result of action by the Secretary of Agriculture on or after March 1, 1966, increasing the price of milk. A price adjustment shall not be made unless it has been determined by the department that (1) such amount is not included in the contract price; (2) the contract does not otherwise contain a provision providing for an adjustment in price; and (3) the contractor will suffer a loss, not merely a diminution of anticipated profit, under the contract because of such increases in producer prices.

Paragraph (b) of this section declares that (1) funds appropriated to the DOD may be used to purchase for enlisted members milk made available to the DOD under section 202 of the Agricultural Act of 1949 (7 U.S.C. § 1446a), and (2) the cost of milk so purchased (as determined by the Secretary of Defense) shall be included in the value of the commuted ration of enlisted members.

##### **3.9.8.2. Background of Law**

This statute was originally enacted by the Act Providing for Price Adjustments in DOD Contracts for the Procurement of Milk.<sup>1</sup> The bill was intended to provide relief for those defense contractors required to pay higher prices to milk producers because of federally-mandated increases in producer milk prices.<sup>2</sup>

##### **3.9.8.3. Law in Practice**

There appears to be no regulatory implementation of this section. CODSIA recommends repeal of subsection (a) as outdated. No other party surveyed submitted comments with respect to this section.

---

<sup>1</sup>Pub. L. No. 89-696, § 1(1), 80 Stat. 1056 (1966).

<sup>2</sup>H.R. REP. No. 2185, 89th Cong., 2nd Sess. 1-7 (1966).

#### **3.9.8.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute. The authority set forth was intended to address a specific, historical problem concerning federally-mandated increases in producer milk prices and is clearly outdated.

#### **3.9.8.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process by removing an obsolete law.

### 3.9.9. 10 U.S.C. § 2401

#### **Requirement for Authorization by Law of Certain Contracts Relating to Vessels and Aircraft.**

##### 3.9.9.1. Summary of Law

Section 2401 of Title 10 of the U.S. Code authorizes the Secretary of a military department to enter into a contract for a long-term lease, charter, or service contract for a naval vessel or aircraft, providing for a substantial termination liability, as long as the following statutory requirements are met.

- **Requirement for Authorization by Law.** The Secretary of a military department, if specifically authorized by law, may lease, charter, or sign an agreement to provide services accompanying a contract to lease or charter a naval vessel or aircraft.
- **Notification of Congressional Committees.** The statute requires that the Committees on Armed Services and Appropriations of the Senate and House of Representatives be notified of the issuance of a request for proposal (RFP) for a long-term lease, charter, or service contract on a naval vessel or aircraft. In addition, the statute requires that the Secretary of a military department provide in a timely manner a detailed description of the terms of the proposed lease or charter. The Secretary must also justify entering into the proposed contract rather than purchasing the vessel or aircraft that is to be leased or chartered.
- **Funding Restrictions.** The statute further provides that no funds will be appropriated for the long-term lease or charter of a naval vessel, or for the lease of a naval vessel or aircraft which provides for a substantial termination liability, unless funds for such leases have been specifically authorized by Congress.
- **Indemnity Prohibition.** Furthermore, the statute shall not apply to any lease or charter agreement entered into by the DOD before September 24, 1983. In addition, the statute states that no funds appropriated pursuant to the authorization contained in the statute may be used to pay attorneys fees in connection with such leases or charters or to indemnify any person for money owed as a result of liability arising under the Internal Revenue Code of 1954.<sup>1</sup>

---

<sup>1</sup>Prior to the enactment of section 2401, lease agreements signed by the Navy contained very favorable terms for lessors and charterers. For example, under the 25-year leases the Navy signed for vessels prior to 1983, the lessors received--

investment tax credits, . . . accelerated depreciation deductions, and should the IRS rule against any of these tax benefits, . . . the Navy contract guarantees the tax benefits. If the IRS against the investor, the Navy will pay the extra tax bill, the lawyer fees and the court costs.

- **Long-term lease or Charter Defined.** The statute defines a long-term lease or charter as an agreement for a period of five years or longer, or more than one-half the useful life of the vessel or aircraft. Leases or charters for less than five years with an option to renew or extend, which can extend the lease beyond five years or longer, are considered long-term leases or charters. Under certain circumstances, where the lessor or charterer is entitled to an investment tax credit or depreciation, a lease or charter of three years or longer will be considered to be a long-term lease or charter.
- **Substantial Termination Liability.** The statute provides that a substantial termination liability exists if the United States has to pay 25% or more of the value of the vessel or aircraft under lease or charter if the lease or charter is terminated. The statute also provides that substantial termination liability exists if the amounts of the termination liability and the costs attributable under the contract to capital-hire is more than one-half the price of the leased or chartered vessel or aircraft.
- **Request and Financial Analysis.** The statute further requires that any request submitted to Congress for authorization to contract for a long-term lease or charter of a naval vessel or aircraft, or for a lease or charter of a naval vessel or aircraft that provides for a substantial termination liability on the part of the United States, must contain: (1) a financial analysis from the Secretary of Defense comparing the cost of the lease or charter with the cost of direct procurement of the vessel or aircraft, and (2) a summary of the amount of tax revenue that will be lost to the government as a result of the lease or charter.
- **Review and Evaluation of Financial Analysis.** The statute furthermore requires that the financial analysis submitted by the Secretary of Defense be reviewed by the Director of the Office of Management and Budget and the Secretary of the Treasury and that the results of their review be reported to Congress not later than 45 days after the request and analysis are submitted to Congress.
- **Capital-Hire Portion of the Cost.** In addition, the statute requires that the Secretary of Defense include the capital-hire portion of the cost of a lease or charter of the vessel or an aircraft within the request for procurement and that such amount shall be reflected in the appropriate procurement account in the request.
- **Guidelines.** The statute also provides that the Director of the Office of Management and Budget and the Secretary of the Treasury are jointly to issue guidelines for determining under what circumstances the DOD may use lease or charter arrangements for aircraft and naval vessels rather than directly procuring such vessels and aircraft.

- Funding Restriction. The statute when enacted also restricted the amount of funds that can be used by the DOD during fiscal year 1984 for long-term leases or charters.<sup>2</sup>
- Maritime Propositioning of Ships Exception. Last, the statute when it was enacted made clear that nothing in this provision shall impede or affect the ability of the Navy to proceed to acquire the use of the TAKX Maritime Propositioning Ships and the T-5 tankers in accordance with leases entered into before the date of enactment of this act.<sup>3</sup>

### 3.9.9.2. Background of Law

- Enactment and Amendments. Section 2401 of Title 10 was enacted on September 24, 1983 as part of the DOD Authorization Act, 1984.<sup>4</sup> A minor amendment in 1984 was made to section 2401 redesignating certain clauses and striking a sentence providing for guidelines to be issued by October 31, 1984.<sup>5</sup> A minor amendment also was made to section 2401 in 1987 changing references to the Internal Revenue Code of 1954 to the Internal Revenue Code of 1986.<sup>6</sup>
- Purposes. In September 1982, the Navy signed long-term leases for "13 maritime propositioned ships--known as TAKX[s]--and 5 T-5 Tankers to be chartered by the Department of the Navy."<sup>7</sup> At the time "[t]hese lease contracts [were signed, they were determined to be] clearly in the national interest."<sup>8</sup> Indeed, the "[u]rgency of the requirement for the TAKX[s] was such that only a lease program provided the opportunity for the timely acquisition of these assets without major disruption of the Navy's shipbuilding program."<sup>9</sup>

"For this reason," Senator Cohen noted, section 2401 "includes a provision that makes clear that action is not being taken that would impede or affect the ability of the Navy to acquire 13 TAKX[s] and 5 T-5 tankers through the long-term charter arrangements negotiated by the Navy."<sup>10</sup> As noted, this part of the Historical and Statutory Notes no longer appears in 10 U.S.C. § 2401 (1992 Supp.).

The Office of Counsel for the Military Sealift Command is responsible for the 13 military propositioned ships that are part of the Navy's lease program. It was this group that was involved

<sup>2</sup>This provision now appears in the Historical and Statutory Notes portion of the statute.

<sup>3</sup>This section no longer appears in either the text of section 2401 or in the Historical and Statutory Notes portion of the statute.

<sup>4</sup>Pub. L. No. 98-94, § 1202(a)(1), 97 Stat. 679 (1983).

<sup>5</sup>Pub. L. No. 98-525, § 1232(a), 98 Stat. 2600 (1984).

<sup>6</sup>Pub. L. No. 100-26, § 2(a)(1), 101 Stat. 282 (1987).

<sup>7</sup>*Supra.* note 1 at 19271-272. The TAKX program . . . provide[s] forward deployed, floating depots of equipment and supplies to support three brigade-size Marine air ground task forces. The T-5 tankers which are point-to-point, non-combatant, clean petroleum carriers will replace five aging T-5 tankers in the current inventory." *Id.*

<sup>8</sup>*Id.* at 19272.

<sup>9</sup>*Id.*

<sup>10</sup>*Id.*

initially in leasing naval vessels rather than purchasing them outright. As Representative Pickle noted in 1983:

The 'privatization' of the TAKX maritime repositioning program had two principal economic effects, both negative.

First, as shown by the Joint Committee on Taxation, the lease option will cost taxpayers approximately 12 percent more than purchasing the ships, and second, the leasing transaction enabled the Navy to shift about 30 percent of the cost of procurement from its budget to the Treasury's budget in the form of lost tax revenues.<sup>11</sup>

Not only was the Navy pursuing this type of "privatization," but other agencies were involved in the same kind of business dealings which resulted in considerable tax losses to the government.

When the practice of leasing and chartering vessels and aircraft became known, Representative Bonior of Michigan questioned the wisdom of the practice. "Much of the cost," he noted, "is . . . hidden from view because it shows up in a loss to the Treasury, rather than a direct cost."<sup>12</sup>

Senator Cohen of the Subcommittee on Sea Power and Force Projection of the Senate Committee on Armed Services expressed similar concern "about the absence of adequate congressional oversight of these leasing arrangements" and "about the impact of these leases on the operation and maintenance account which has traditionally been the source of funding for these leases."<sup>13</sup>

After studying the issue, the Subcommittee on Sea Power and Force Projection recommended adding section 2401 to S. 675 (1) to "substantively tighte[n] congressional control over long-term leases by the DOD;"<sup>14</sup> (2) to "provide standard guidance to agencies on lease-versus-buy decisions;" and (3) to "insure that the total costs to the U.S. Government are fully considered, by both the executive branch and the Congress, in making lease decisions."<sup>15</sup>

c. General Accounting Office Report. The recommendations of the Subcommittee were consistent with the recommendations contained in a Report issued by the General Accounting Office on June 28, 1983.

d. Lease versus Purchase. Senator Metzenbaum underscored Congress' concern because it is apparent that "long-term leases are more expensive than outright purchases."<sup>16</sup> Senator

Metzenbaum's concern is shared by the Department of the Treasury, the Joint Tax Committee, and the Subcommittee on Seapower.

### 3.9.9.3. Law in Practice

There are no specific FARs, DFARs, CFRs, or Navy Supplement regulations implementing this statute. Subsection (f) of section 2401 provides that the "Director of the Office of Management and Budget and the Secretary of the Treasury shall jointly issue guidelines for determining under what circumstances the DOD may use lease or charter arrangements for aircraft and vessels rather than directly procuring such aircraft and vessels." 10 U.S.C. § 2401 (f) (1992 Supp.).

Guidelines to the DOD covering Lease or Charter Arrangements for Aircraft and Naval Vessels were issued by the Office of Management and Budget and the Department of the Treasury on October 31, 1984. The guidelines "provide that long-term leasing should not be used as an alternative to direct DOD purchase and ownership unless leasing has been shown, by a lease-versus-buy analysis, to be less expensive to the government than direct purchase."<sup>17</sup> The guidelines "set forth general policy directives, and a more detailed set of technical rules, to be used in making this analysis."<sup>18</sup>

The Department of the Navy, Military Sealift Command, Office of Counsel works with section 2401 and states that it is useful because it provides for congressional review of decisions made by the military departments to lease rather than purchase naval vessels and aircraft.<sup>19</sup> That Office suggests that the provisions of the section may be too restrictive and that it limits the options of the military departments to respond quickly to needs that can be filled by a lease or charter rather than contracting for something to be built.

That Office recommends, however, that this statute be amended to permit six year leasing arrangements in order to correspond the period to the now-current six year planning cycle of the DOD.<sup>20</sup>

The Assistant Secretary of the Air Force (Acquisition), Deputy Assistant Secretary (Contracting), Operational Contracting Division, notes that the requirements set forth in this statute are appropriate, given the major investment that such contracts represent.<sup>21</sup> That Office questions, however, whether the detailed lease versus buy guidance currently set forth in the statute is warranted, when such comparisons are usually set forth in implementing regulations.<sup>22</sup>

<sup>22</sup>*Id.*

#### **3.9.9.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this statute be retained. The Panel would not amend this statute to conform the statute to the six-year planning cycle currently in use at DCD as no value-added is perceived in such a proposition. Further, because the costing formula set forth in the statute was designed to address a specific problem with termination liability in such leases, the Panel would not seek to amend the statute in that respect, either.

This section was enacted in 1983 to close a major loophole in the defense budgeting process whereby the Navy and other services were using operation and maintenance funds to lease ships and planes instead of purchasing them with investment accounts. Not only do lease, charter, and service contracts often cost the government more in the long run, but before the enactment of section.2401, they also resulted in a large amount of revenue lost to the government because of the tax shelters that lessors and charterers could take advantage of when filing their federal tax returns.

Section 2401 closed these loopholes and introduced congressional oversight to this aspect of the budgeting process. For this reason, it continues adequately to serve a valid purpose and warrants retention.

#### **3.9.9.5. Relationship to Objectives**

Retention of this statute will further the goal of ensuring financial integrity in the DOD acquisition process.

**3.9.10. 10 U.S.C. § 2402**

**Prohibition of contractors limiting subcontractor sales directly to the United States**

**3.9.10.1. Summary of Law**

This statute states that each contract for the purchase of supplies or services made by the Department of Defense shall provide that the contractor will not enter into any agreement with a subcontractor under the contract that has the effect of unreasonably restricting sales by the subcontractor directly to the United States of any item or process (including computer software) made or furnished by the subcontractor under the contract (or any follow-on production contract); or otherwise act to restrict unreasonably the ability of a subcontractor to make sales to the United States.

**3.9.10.2. Background of Law**

This section was originally enacted by the DOD Authorization Act for FY85.<sup>1</sup> Comparable language was included in both the House and the Senate versions of that bill. The Committee Reports merely reiterated the requirements of the provision.

**3.9.10.3. Law in Practice**

This statute is implemented by FAR 3.503 and by the mandatory contract clause set forth at FAR 52.203-6.

Counsel of Defense and Space Industry Associations (CODSIA) recommends retention of this statute, noting that it was written to ensure that prime contractors do not use their leverage to prevent subcontractors from selling directly to the government.

**3.9.10.4. Recommendation and Justification**

**Amend to delete requirement for contract clause**

The Panel recommends that this statute be amended to state that the Secretary of Defense shall ensure that subcontractors are not unreasonably precluded from making direct sales to the government. This type of policy statement should not be cast as yet another mandatory contract clause. Rather, we recommend that this section be recast as a statement of policy.

---

<sup>1</sup>Pub. L. No. 98-525, § 1234(2), 98 Stat. 2601 (1984).

### **3.9.10.5. Relationship to Objectives**

Amendment of this statute will further the goal of streamlining the DOD acquisition process, and provide management flexibility to the Secretary of Defense.

### **3.9.10.6. Proposed Statute**

#### **§ 2402. Prohibition of contractors limiting subcontractor sales directly to the United States**

**(a) ~~The Secretary of Defense shall issue regulations to ensure that Each contract for the purchase of supplies or services made by the Department of Defense shall provide that the contractors will not-~~**

**(1) enter into any agreement with a subcontractor under the a contract that has the effect of unreasonably restricting sales by the subcontractor directly to the United States of any item or process (including computer software) made or furnished by the subcontractor under the contract (or any follow-on production contract); or**

**(2) otherwise act to restrict unreasonably the ability of a subcontractor to make sales to the United States described in clause (1).**

**(b) This section does not prohibit a contractor from asserting rights it otherwise has under law.**

### **3.9.11. 10 U.S.C. § 2421**

#### **Plantations and farms: operation, maintenance and improvement**

##### **3.9.11.1. Summary of Law**

This statute provides that appropriations for the subsistence of members of the Army, Navy, Air Force, or Marine Corps are available for expenditures to operate, maintain or improve farms or plantations outside the United States but within the jurisdiction of those departments, in order to provide fresh fruits and vegetables to the armed forces. The section expressly states that it does not authorize the purchase of land. Excess crops may be sold. Further, only U.S. nationals hired pursuant to this authority are entitled to the U.S. employment benefits. Finally, the statute provides that such farms or plantations should be operated by a private contractor as far as practicable. The military department secretary must first determine that such a contract is unreasonable before utilizing military personnel.

##### **3.9.11.2. Background of Law**

This section was originally enacted by the Act to Provide for the Management and Operation of Naval Plantations Outside the United States.<sup>1</sup> The legislative history contains no relevant discussion of this authority. However, the original authority was to expire 6 months after termination of World War II. Therefore, in 1947, the Navy sought, and Congress granted, an amendment to this statute to make to authority permanent law.<sup>2</sup> The House Committee Report to that legislation noted that the Navy then maintained two farms under this authority, one in Puerto Rico and another in the West Indies, and stated:

Both these farms are considered to be justified both economically and from a military viewpoint. The existence of an immediate and continuous supply of perishable foods is felt to be an important element of base defense and the source of supply provided by these farms reduces imports, saves transportation charges, and reduces shipping space necessary to supply the bases. Furthermore, these farms provide a variety of fresh fruits and vegetables which would not otherwise be available and to which our forces are accustomed and entitled if possible. This source of supply is at no greater cost to the Government than would be the case with purchases of similar products made at a continental activity.<sup>3</sup>

<sup>1</sup>Pub. L. No. 78-377, ch. 306, 58 Stat. 1 (1944).

<sup>2</sup>Pub. L. No. 80-149, ch. 188, 61 Stat. 234 (1947).

<sup>3</sup>H.R. REP. No. 142, 80th Cong., 1st Sess. 1259-60 (1947).

The Report further noted that any private contractor operating such a facility would in any event be entirely dependent on Navy facilities for many services. Thus, it was deemed advantageous to keep the option for operation by military personnel.<sup>4</sup>

This section was codified in 1956 and the authority extended to the remaining, listed services.

### **3.9.11.3. Law in Practice**

The Office of the Assistant Secretary of the Air Force (Acquisition) reports that it has no policy concerns regarding this statute.<sup>5</sup> It is unaware whether the Air Force, or any other DOD activities maintain plantations or farms that would require this authorizing statute. Similarly, the Navy Office of General Counsel reports that no information is available regarding utilization of this authority by the Navy.<sup>6</sup>

However, the Office of the Judge Advocate General, Department of the Army, recommends that this provision be retained.<sup>7</sup> Based on a survey that office conducted of command counsels worldwide, the Eighth Army notes that the statute provides flexibility in obtaining fresh produce for troops overseas. In many countries in which future military contingencies may arise, human manure is used as fertilizer. Local produce thus can contain active bacteria that can cause severe illness. This statute therefore provides authority for the Army to provide alternative sources of produce for armed forces personnel.

There is no direct, regulatory implementation of this statute.

### **3.9.11.4. Recommendation and Justification**

#### **Retain**

The Panel recommends that this statute be retained. While it is not relied upon by all the military departments, it enables the Army to address a potentially serious health hazard for troops overseas. Thus, the statute adequately serves a valid purpose and should be retained.

### **3.9.11.5. Relationship to Objectives**

Retention of this statute will promote the best interests of the DOD without otherwise hindering the acquisition process.

<sup>7</sup>Memorandum from Col. Maurice O'Brien, Chief, Contract Law Div., Department of the Army, Office of the Judge Advocate General, to Advisory Law Panel, dated 1 May 1992.

### **3.9.12. 10 U.S.C. § 2422**

#### **Bakery and dairy products: procurement outside the United States**

##### **3.9.12.1. Summary of Law**

This statute provides that the Secretary of Defense may authorize any DOD element that purchases bakery and dairy products for armed forces use to buy such products from Army and Air Force exchange services, located outside the U.S. and in operation before July 1, 1986, using noncompetitive procedures.

##### **3.9.12.2. Background of Law**

This statute was originally enacted by the National Defense Authorization Act for FY 1987.<sup>1</sup> The relevant reports contain no direct discussion of this section.

##### **3.9.12.3. Law in Practice**

Under DAR Cases 89-303 and 304, the DAR Council elected not to implement this law on the basis that the statute permits, but does not require, noncompetitive procurement of these materials. Further, the DAR Council noted that the statute does not prescribe any unique procedures that would distinguish this noncompetitive procurement from any other noncompetitive procurement.

However, the Office of the Judge Advocate General, Department of the Army, reports that this statute is currently relied upon by various Army commands<sup>2</sup> to purchase bakery and dairy products from service exchanges in foreign countries with substandard sanitation requirements and with products that would not otherwise satisfy military personnel preferences. It urges retention of this statute. The Operational Contract Division, Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), reports that this statute is not currently utilized by the Air Force. That Office also notes that independent authority to use the exchanges is limited under relevant Comptroller General decisions.<sup>3</sup> The Department of the Navy reports that it currently relies upon this statute as authority to purchase goods and services overseas.

---

<sup>1</sup>Pub. L. No. 99-661, § 312(a), 100 Stat. 3851 (1986).

<sup>2</sup>Those commands are Southern Command, the Community and Family Support Center, and the Army and Air Force Exchange Service.

<sup>3</sup>Obtaining Goods and Services from Nonappropriated Fund Activities through Intra-Departmental Procedures, 58 Comp. Gen. 94 (1978), 78-2 CPD P353 (FPASA does not apply to contracts with nonappropriated fund instrumentalities; sole-source procurement with a NAFFI permissible only when impracticable to obtain services elsewhere).

---

#### **3.9.12.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this statute be retained. It serves a valid purpose within DOD by affording the military departments authority to purchase noncompetitively supplies and services from non-appropriated fund instrumentalities where such authority would otherwise be limited. Moreover, this statute is recently enacted by the Congress and thus there is insufficient practical experience with this statute to warrant recommending repeal. However, the Panel suggests that the Congress consider consolidation of this statute with the authorities set forth at 10 U.S.C. § 2423 and 10 U.S.C. § 2424 into a single statute.

#### **3.9.12.5. Relationship to Objectives**

Retention of this statute furthers the goal of maintaining acquisition statutes that promote the best interests of the DOD.

### **3.9.13. 10 U.S.C. § 2423**

#### **Laundry and dry cleaning services: procurement from facilities operated by the Navy Resale and Services Support office**

##### **3.9.13.1. Summary of Law**

This statute provides that the Secretary of Defense may authorize a DOD element to contract, using noncompetitive procedures, with a laundry and dry cleaning facility operated by the Navy Resale and Services Support Office, for laundry and dry cleaning services for troops located outside the U.S. It applies to such facilities that began operation before October 1, 1989.

##### **3.9.13.2. Background of Law**

This law was originally enacted by the National Defense Authorization Act for FY 1990 and 1991.<sup>1</sup> The language originated in the House version of the bill. The House Report indicated that such naval laundry plants were built with capacity to support the appropriated fund activities, and that removing the government work load from these plants would risk significant capacity deficits that would jeopardize the resale operation.<sup>2</sup> Therefore, these operations were added to the list of exchange activities that can do work for the U. S. government on a reimbursable basis.

In conference, the Senate receded with an amendment limiting such authority to naval plants located outside the U.S.<sup>3</sup>

##### **3.9.13.3. Law in Practice**

Under DAR Cases 89-303 and 304, the DAR Council elected not to implement these laws on the basis that the statute permits, but does not require, noncompetitive procurement of these materials. Further, the DAR Council noted that the statute does not prescribe any unique procedures that would distinguish this noncompetitive procurement from any other noncompetitive procurement.

The Office of the Judge Advocate General, Department of the Army, reports that this statute is not currently relied upon by the Army. The Operational Contracting Division, Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), reports that this statute is not currently utilized by the Air Force. That Office also notes that independent authority to use the exchanges is limited under relevant Comptroller General decisions.<sup>4</sup> The

<sup>3</sup>H.R. CONF. REP. No. 331, 101st Cong., 1st Sess. 1019 (1989).

<sup>4</sup>Obtaining Goods and Services from Nonappropriated Fund Activities through Intra-Departmental Procedures, 58 Comp. Gen. 94 (1978), 78-2 CPD P353 (FPASA does not apply to contracts with nonappropriated fund instrumentalities; sole-source procurement with a NAFI permissible only when impracticable to obtain service elsewhere).

Department of the Navy reports, however, that several naval commands<sup>5</sup> currently rely upon this statute as authority to purchase such services overseas, and refers specifically to a laundry service operation in Naples, Italy that relies upon this statute to generate an adequate workload.

#### **3.9.13.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this statute be retained in its entirety. It serves a valid purpose within DOD by affording the military departments authority to purchase noncompetitively laundry and dry cleaning services from non-appropriated fund instrumentalities overseas where such authority would otherwise be limited. Moreover, this statute has been recently enacted by the Congress and thus there is insufficient practical experience with this statute to warrant recommending repeal. However, the Panel suggests that the Congress consider consolidation of this statute with the authorities set forth at 10 U.S.C. § 2422 and 10 U.S.C. § 2424 into a single statute.

#### **3.9.13.5. Relationship to Objectives**

Retention of this statute furthers the goal of maintaining acquisition statutes that promote the best interests of the DOD.

---

<sup>5</sup>Naval Supply Systems Command and the Navy Exchange Services Command have reported to the Navy Office of General Counsel regarding this statute.

### **3.9.14. 10 U.S.C. § 2424**

#### **Procurement of supplies and services from exchange stores outside the United States**

##### **3.9.14.1. Summary of Law**

This section provides that the Secretary of Defense may authorize a DOD element to contract noncompetitively with a military department exchange store located outside the U.S. for supplies or services for use by armed forces located outside the U.S. Such contracts may not exceed \$50,000, and must involve stock supplies that are regularly sold by the store.

##### **3.9.14.2. Background of Law**

This statute was originally enacted by the National Defense Authorization Act for FY 1990 and 1991.<sup>1</sup> The language originated in the House version of the bill. The House Report indicated that the authority was intended to reduce procurement administrative costs and decrease reliance upon foreign supplies.<sup>2</sup> The report noted that the authority permitted expeditious replenishment of commercial type items and services needed at reasonable prices. In conference, the Senate receded without amendment.

##### **3.9.14.3. Law in Practice**

Under DAR Cases 89-303 and 304, the DAR Council elected not to implement this law on the basis that the statute permits, but does not require, noncompetitive procurement of these materials. Further, the DAR Council noted that the statute does not prescribe any unique procedures that would distinguish this noncompetitive procurement from any other noncompetitive procurement.

The Office of the Judge Advocate General, Department of the Army, reports that this statute is currently relied upon by various Army commands<sup>3</sup> to purchase items that are not locally available or not available at a reasonable price. It notes that this authority was utilized during Operation Desert Storm and urges retention of this statute. The Operational Contracting Division, Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), reports that this statute is not currently utilized by the Air Force. That Office also notes that independent authority to use the exchanges is limited under relevant Comptroller General decisions.<sup>4</sup> The Department of the Navy reports that several of its commands<sup>5</sup> currently rely upon this statute as authority to purchase goods and services overseas.

Retention of this statute furthers the goal of maintaining acquisition statutes that promote the best interests of the DOD.

---

instrumentalities; sole-source procurement with a NAFFI permissible only when impracticable to obtain service elsewhere).

<sup>5</sup>Naval Supply Systems Command and the Navy Exchange Services Command have reported to the Navy Office of General Counsel regarding this statute.

### **3.9.15. 31 U.S.C. § 712**

#### **Investigating the use of public money**

##### **3.9.15.1. Summary of Law**

This statute provides that the Comptroller General shall investigate all matters related to the receipt, disbursement and use of public money and estimate the cost to the United States government of complying with each restriction on expenditures of a specific appropriation in a general appropriation law and report each estimate to Congress with recommendations that the Comptroller General considers desirable.

##### **3.9.15.2. Background of Law**

This section was codified by the Act to Revise, Codify and Enact Without Substantive Change Certain General and Permanent Laws, Related to Money and Finance as Title 31, U.S. Code, Money and Finance.<sup>1</sup> It was originally enacted by the Act of June 10, 1921. No legislative history on that law is available.

##### **3.9.15.3. Law in Practice**

The General Accounting Office (GAO), Office of General Counsel, reports that it views this statute as authority to engage in its fiscal investigatory activities, but not as a mandate to regularly engage in the listed activities.<sup>2</sup> It recommends retention of this statute.

##### **3.9.15.4. Recommendation and Justification**

###### **No Action**

The Panel considers this section not primarily related to the DOD acquisition process and recommends no further action with respect to this law.

##### **3.9.15.5. Relationship to Objectives**

Action on this statute will not specifically promote any of the Panel's objectives.

---

<sup>1</sup>Pub. L. No. 97-258, § 1, 97 Stat. 889 (1982).

<sup>2</sup>Telephonic conversation between Mr. James Hinchman, General Counsel, GAO, and Mr. LeRoy Haugh, on 30 Oct. 1992.

## **3.9.16. Public Law Number 101-165 § 9081**

### **DOD Appropriations for Fiscal Year 1990**

#### **3.9.16.1. Summary of the Law**

This section provides that no funds available to the DOD during the current fiscal year [fiscal year 1990] and thereafter may be used to enter into any contract with a term of eighteen months or more. It also provides that no such funds may be used to extend or renew any contract for a term of eighteen months or more, for any vessel, aircraft, or vehicles, through a lease, charter, or similar agreement without previously having been submitted to the Committees on Appropriations of the House of Representatives and the Senate in the budgetary process.

The section further provides that any contractual agreement which imposes an estimated termination liability (excluding the estimated value of the leased item at the time of termination) on the Government exceeding 50 per centum of the original purchase value of the vessel, aircraft, or vehicle must have specific authority in an appropriation Act for the obligation of 10 per centum of such termination liability.

#### **3.9.16.2. Background of the Law**

This section was enacted by Section 9081 of the DOD Appropriations Act for FY90.<sup>1</sup>

This language originated in the Act Making Further Continuing Appropriations for the DOD for FY85.<sup>2</sup> It was continued in annual DOD appropriations acts and was made permanent law in 1989.

The 18-month lease restriction resulted from congressional reaction to the off-budget financing of the Navy's MPS and T-5 tanker programs specifically, and to government leasing practices in general. Congress objected to government leasing programs because they were being increasingly used by government departments and agencies to obtain the long-term use of assets outside the budget process that traditionally had been the subject of direct purchase procurements within the budget process. These types of programs contributed to the deficit but were beyond congressional control or oversight in the budget process.<sup>3</sup>

#### **3.9.16.3 Law in Practice**

There is no direct, regulatory implementation of this restriction.

---

<sup>1</sup>Pub. L. No. 101-165, § 9081, 103 Stat. 1147 (1989).

<sup>2</sup>Pub. L. No. 99-190, 99 Stat. 1183 (1985).

<sup>3</sup>Datafax transmission from Mr. Richard P. Knutsen, Office of Counsel, Military Sealift Command, Department of the Navy, to Ms. Theresa Squillacote, dated 17 November 1992.

With respect to this provision, the Department of the Navy, Military Sealift Command (MSC), Office of Counsel seeks repeal of this permanent law provision.<sup>4</sup> It bases that recommendation on its contention that the statute now serves solely to inflate charter costs, rather than serving as a valid oversight provision.

MSC regularly charters privately owned tonnage to fulfill the strategic sealift mission of ocean transportation of DOD materials and supplies. MSC forecasts its need for ships in the basis of research program needs and cargo information and forecasts available from other DOD components. Because of the volatile nature of the ship charter market, MSC estimates that \$30 million per year could be saved if it was able to charter ships up to five years, rather than for 17 month periods.

Currently, MSC charters vessels for a 17 month firm charter period, with two 17 month options. Although this results in a 4.25 year charter period, only the first 17 months can be made firm. The 17 month firm period often prohibits MSC access to reflagged or upgraded private charters because the cost of reflagging, conversion or upgrade has to be amortized over such a short period. Thus, the charter rates are driven higher than they would be if MSC could offer a longer firm period.

Longer term charters would not only allow owners of vessels that need reflagging or upgrading to be made available to MSC at reasonable rates, but would also induce other owners to propose more reasonable charter rates because they would be insulated from the volatility of the market for longer periods of time.

#### **3.9.16.4 Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this permanent law provision. The oversight concerns underlying this statute are adequately addressed by the five-year lease restrictions set forth at 10 U.S.C. § 2401. Moreover, this statute demonstrably inhibits economy and efficiency within the DOD acquisition process. Based on that rationale, the Panel recommends repeal of this statute in its entirety.

#### **3.9.16.5 Relationship to Objectives**

**Repeal of this statute will further the best interests of the DOD acquisition process.**

## **4. SOCIOECONOMIC LAWS, SMALL BUSINESS, AND SIMPLIFIED ACQUISITION THRESHOLD**

### **4.0. Introduction**

This chapter sets forth the Panel's recommendations on those socioeconomic policies of the United States which apply to DOD. One of the mandates in the Panel's charter was to eliminate those statutes which were unnecessary to the buyer-seller relationship.<sup>1</sup> Under this criterion, few, if any, of the statutes discussed in this chapter would be retained. However, the proliferation of socioeconomic statutes applicable to DOD -- 114 such statutes (either separate sections of the U.S. Code or specific sections of various public laws) were reviewed by the Panel -- shows that the defense acquisition system reflects a balance between the requirements of efficiency or streamlining and the dictates of larger national goals. In short, the requirements of the common defense have always been balanced by the necessity to promote the general welfare. Each defense dollar is expected to perform double duty: not only satisfying the primary purpose for which it was authorized but contributing as well to the objectives of full, fair, and equal employment opportunity, proper utilization of the defense industrial base, promotion of small business and minority business, and protection of the environment.

The Panel's approach to socioeconomic legislation was to assume that the socioeconomic choices made by the Congress reflect its considered judgment that the bulk of DOD contract dollars should be subject to the full panoply of existing socioeconomic legislation. No attempt was made to assess whether the social goals fostered by socioeconomic legislation were or were not "correct." The "correctness" of the policy choice was taken as a given. In addition, the fact that a particular statute created impediments to efficient procurement was not considered to be a reason in and of itself to recommend repeal. Accordingly, the Panel focused its recommendations on streamlining certain parts of the existing statutes and in suggesting exemptions from socioeconomic laws in areas in which they were creating serious problems for DOD acquisition. The major points of this analysis are discussed in the subchapter introductions in this chapter and in Chapter 8.

Many of those points resulted from a process of extensive consultation between the Panel and a wide variety of people and organizations with strong interests in socioeconomic issues affecting DOD. Its scheduled meetings allowed the Panel to establish working relationships with many individuals from both Governmental and private organizations who personified a diverse range of experience and expertise. They typically included representatives from: the staffs of the Senate Small Business Committee, the Small Business Administration, and various offices of Small and Disadvantaged Business Utilization; the U.S. Chamber of Commerce and the Small Business Legislative Council; the Associated Builders and Contractors, and the National Association of Minority Business. TRIAD, a coalition of three major trade associations that has long been recognized as a key forum for the discussion of DOD small business and minority contracting issues, not only sponsored presentations by Panel members but mobilized their own membership to support Panel research objectives. Notices in the Federal Register also helped to

<sup>1</sup>Pub. L. No. 101-510 § 800, 104 Stat. 1587.

develop mailing lists that eventually totaled more than 100 correspondents, many of whom provided useful comments responding to various socioeconomic "strawman proposals" prepared for the Panel's review. These ongoing communications put the Panel into direct contact with an even wider variety of organizations and individuals -- including installation contracting officials, environmental specialists, and concerned citizens. Finally, the Panel held a public comment session on socioeconomic laws that was duly advertised in the Federal Register and convened on Capitol Hill on July 31, 1992.

Aided by these extensive contacts and comments, the Panel succeeded in identifying four major areas in which significant amendments to existing socioeconomic laws seemed required: acquisition of commercial items; purchases from and sales to foreign countries; small purchase acquisitions; and small business regulation generally. After reviewing the socioeconomic laws, the Panel makes the following major recommendations.

## I

### **Congress Should Enact a New, Comprehensive Structure for Acquisition of Commercial Items.**

The Panel was told that the application of socioeconomic regulatory requirements unique to defense contractors created significant barriers to the entry of companies which might otherwise compete for defense contracts. For example, The Boeing Company commented:<sup>2</sup>

... [a] contractor's choices are limited to spreading these costs [of socioeconomic and regulatory legislation] over its commercial sales (and thus becoming less competitive commercially) or absorbing the costs out of profits. Neither choice provides an incentive to do business with the U.S. Government. As a result, each Government contract-unique requirement should be viewed as the potential cause of yet another U.S. commercial contractor deciding not to compete for the sale of its commercial products to the Government.

The flow-down of socioeconomic restrictions to subcontractors, the Panel learned, also immensely complicates subcontract administration, disturbs existing buyer-seller relationships at the subcontractor level, and creates its own barriers to entry.

In light of these concerns, and the need for increasing civil-military integration, the Panel recommends a new, structured approach to commercial item acquisition, which is covered in Chapter 8 of this Report.

---

<sup>2</sup>Letter from Judy Morehouse, Director, Government Business Relations, The Boeing Company, to F. Whitten Peters dated Dec. 3, 1992.

## II

### **Congress Should Enact a New, Comprehensive Structure for Domestic Trade and Cooperation.**

In reviewing laws relating to domestic preferences, the Panel reached the conclusion that domestic preference legislation should not be reviewed as "socioeconomic" legislation, but as trade regulation and that such consideration required a comprehensive approach covering four areas: domestic preferences; defense industrial base and national security concerns; foreign treaties, trade agreements, and memoranda of understanding; and laws regulating sales of defense products to foreign Governments. As a result, the Panel created a defense trade working group which coordinated the analysis in all of these areas and reported this effort as Chapter 7 of this Report.

## III

### **Congress Should Enact a New, Comprehensive Structure for Smaller Purchases.**

The Panel found that there is no common approach to the implementation of socioeconomic policy. Some socioeconomic statutes apply to virtually all contracts, while others have thresholds. Where there are thresholds, they vary widely and without any apparent purpose. In addition, even as the small purchase threshold has increased from \$1000 in 1947 to \$25,000 today, thresholds in socioeconomic and regulatory statutes originally set to exempt small purchases have not been raised, with the result that many complex regulations now apply to the vast majority of contracts. Finally, the Panel was told by many witnesses that the application of socioeconomic policies to low-value contracts greatly increases the administrative costs of awarding and administering those contracts -- particularly when a statute calls for reporting information back to the contracting activity -- without much countervailing benefit to social goals. In order to restore the original concept that smaller contracts would be governed by simpler procedures and regulations, and to restore the cost-benefit balance between regulation and practicality, the Panel recommends in subchapter 4.1. a new uniform simplified acquisition threshold of \$100,000, below which simplified contracting procedures would be used.

## IV

### **Congress Should Enact a Comprehensive Chapter in Title 10 Setting Out All Socioeconomic Laws -- And Particularly Small Business Laws -- That Apply To DOD.**

Because existing socioeconomic laws represent such a hodgepodge, and because many of the laws affecting DOD are not even codified, the Panel recommends that Congress consider the adoption of a new chapter of Title 10 which would collect existing socioeconomic policy -- especially the small and minority business legislation that is today scattered in authorization and appropriation acts -- and would create a structure for future laws. Because of the press of time,

the Panel did not attempt to draft legislation for this proposed chapter although it did make limited recommendations in the small business area on a "stand alone" basis.<sup>3</sup>

The Panel believes that a comprehensive new chapter should do the following things:

**Enumerate the laws applicable to DOD.** -- The public laws reviewed by the Panel suggest a pattern in which annual defense authorization or appropriations acts regularly become the preferred vehicles for the imposition of new socioeconomic requirements on DOD. While adding new and often complex statutory requirements in uncodified law is itself a problem, this legal regime is complicated by two factors: Old laws are seldom repealed and they inevitably spawn an even greater number of regulations, an effect which amplifies the "ad hocness" of the statutes.<sup>4</sup> Because it is far easier to pass a law than to repeal one, it is also difficult to coordinate a comprehensive approach to key problem areas.

Whatever the reason, statutes passed in response to issues of concern in World War I or the Great Depression linger on, regardless of whether the original need continues. A good example of this is the Walsh-Healey Act which, when it was passed in 1933, addressed very real problems in the workplace. Half a century later, however, this Act continues to require clauses in every contract awarded by the Federal Government -- even though the labor hour and workplace safety provisions central to its purpose have long since been superseded by laws of more general applicability. Until the laws are enumerated, however, it is very difficult to determine which laws are no longer necessary, which conflict with others, and which in combination have impacts that no one anticipated or desired.

A single section detailing the socioeconomic requirements levied on DOD would also clarify the policy choices which must be made in the more austere defense budget environment that is just ahead. Clearly, understanding what the law is today is fundamental to decision-making on whether present or future programs represent added value to DOD and the taxpayer. As presently constituted, however, the diversity of socioeconomic statutes is such that it is difficult to make such assessments.

**Create a uniform theory of flow down of socioeconomic laws to subcontractors.** -- Some requirements of existing law flow down to subcontractors, while others do not, often without any apparent rationale. A consistent theory of flow down is required, especially since today many policies that flow down are not consistent with standard commercial practice or the laws generally applicable to U.S. business.

**Streamline requirements.** -- The 114 socioeconomic statutes which were reviewed for their impact upon defense procurement represent a jumble of requirements imposed upon the DOD from multiple sources with varying degrees of relevance, validity, and importance to the

---

<sup>3</sup>See subchapter 4.3. of this Report.

<sup>4</sup>In the labor area alone, for example, a 1988 study by the Logistics Management Institute found 38 separate thresholds affecting Government contracts, many of them the direct result of statutory requirements. See 2 Logistics Management Institute, *Reforming Acquisition Regulations: Revising Dollar Thresholds*, Report AL714R3, September, 1988, Bethesda, MD, pp. 85-113 [LMI Study].

national interest or the national defense. Some reflect key national policies, while others suggest more transitory intentions. The accumulation of an ever-expanding body of laws and regulations has a pernicious effect on both the Government and its suppliers, the most obvious of which is cost. Simply stated, it costs both sides money to maintain the personnel and procedures needed to prepare the countless reports, statistics, and administrative actions needed to ensure compliance. The reduction of these overhead costs is thus a common interest, both for a defense establishment that is rapidly being reduced and for Government contractors who must compete effectively for, and with, diminished resources. While each socioeconomic law may have been passed with the best of intentions and the purest of motives, the cumulative effect has been to create significant barriers to commercial-military integration.

While the necessity of streamlining the socioeconomic statutes is clearly driven by urgent requirements to reduce costs and to promote more effective integration between the commercial and Governmental marketplaces, there is another reason to take a more unitary view of defense capabilities. Changes in the international security environment and correspondingly reduced defense spending will clearly compel a wide range of future strategic choices. Because of their immediate flow-down to subcontractors and suppliers in every state of the Union, defense contracts have long been a convenient and effective vehicle for implementing new social policies, from the labor protections of the Depression to the small business policies of the present. However, reductions in the defense budget mean that it is no longer possible to use DOD to fund a large array of worthy social programs. Therefore it is vital that those strategic choices include a clear determination of the additional burdens that the defense acquisition system should be expected to bear. Such a determination is essential in ensuring that the fundamental balance between the bottom-line efficiency of that system and its support of larger national goals has been adjusted to take account of future challenges.

The ability to make such unblinking assessments, as well as the streamlining of the relevant statutes, would be considerably enhanced if a new chapter detailing the socioeconomic requirements pertaining to the Defense Department were added to Title 10 of the U.S. Code. Although justifiable on purely administrative grounds, the consolidation of those requirements under a single statutory heading is a solution that some would consider radical, if for no other reason than that difficult jurisdictional questions might be raised among various congressional committees. However, the Panel believes that this step is warranted for two reasons.

First, there needs to be a single authoritative source for determining all the socioeconomic requirements which pertain to DOD. The unique scope of defense procurement -- which accounted for \$140.1 billion in 1991<sup>5</sup> -- is itself an argument which strongly supports consolidation.<sup>6</sup> There is also a practical argument to be made for encouraging a unity of view among a divergent community of Government policy makers and administrators, as well as their suppliers.

---

<sup>5</sup>Table 1, Directorate for Information Operations and Reports, DOD PRIME CONTRACT AWARDS, SIZE DISTRIBUTION FISCAL YEAR 1991, p. 16 (this table does not include contract actions below \$25,000, which amounted to \$13.8 billion in 1991).

<sup>6</sup>U.S. DEPT OF DEFENSE, *DEFENSE 92*, September/October, 1992 (Washington: USGPO, 1992), p. 21.

Second, socioeconomic requirements levied on DOD should reflect reasoned policy choices and not the time-compressed decisions that frequently attend the passage of annual defense appropriations and authorization acts. Not only are the socioeconomic requirements contained in many of these acts passed with insufficient consideration, but there is some confusion over the legal standing of these provisions once appropriations have been expended. Consolidation into a new section of the U.S. Code would encourage the drafting of legislation based on a comprehensive view of the acquisition system.

**Balance the Desire to Legislate Against the Practicalities of a Decreasing DOD Workforce.** -- The Panel believes that balancing the socioeconomic requirements to be supported by DOD against the limits of its decreasing manpower is a critical issue. For example, a recent study by the Merit Systems Protection Board documented the fact that the Government's 31,000 contracting officers are hard-pressed even today to administer a procurement system characterized by a "potentially counterproductive growth in Federal procurement policy and procedures."<sup>7</sup> Despite the demands of increasingly complex legislation, currently planned budget decrements will reduce the defense acquisition work force. With fewer contract administrators and auditors available, DOD clearly needs to be able to focus the efforts of these specialists on contracts which carry the greatest number of dollars -- and a concomitantly higher degree of risk to the Government -- and the most important social programs.

The statistics in Table I below demonstrate a key fact of life in DOD contracting: There is an inverse relationship between the number of dollars expended in a contract and the number of contract actions. Because of this, it may be possible to eliminate vast amounts of work with small adjustments in statutes without losing the major thrust of a socioeconomic program. Such balancing is essential in light of the austere DOD budgets of the future.

**Reduce contractual implementation of laws.** -- In the past, many socioeconomic statutes have been implemented by contract clauses, with the result that most violations of statute are also breaches of contract. At the same time, many breaches will also be crimes or will result in false claims -- all of which are both crimes and civil wrongs punishable by stiff statutory penalties.

There is a fundamental irrationality about this sort of regulatory scheme, since there are usually no actual contractual damages from the breach. For example, seldom does a single breach of VietNam veterans preference provisions<sup>8</sup> give rise to termination of a contract. Moreover, in most cases of breach, what is really required is not a remedy in the Armed Services Board of Contract Appeals, but some assurance that a contractor will comply in the future with some ability to remove from federal contracting those companies who repeatedly fail to comply with mandated policy.

Accordingly, the Panel recommends that any comprehensive review of socioeconomic policy give serious consideration to replacing the doctrine of "enforcement through contract

---

<sup>8</sup>38 U.S.C. § 4212.

clauses" with a mechanism, such as suspension and debarment, which gives the Government the power needed to obtain compliance through direct enforcement. Since most socioeconomic policy is in fact -- and is intended to be -- implemented on a company-by-company basis and not a contract-by-contract basis, regulation through contract clauses is both burdensome and off the mark. More straightforward methods of obtaining compliance would: avoid the enormous clutter found in contemporary Government contracts, ease the burden on a shrinking contracting work force, and reduce barriers to commercial-military integration. It could also place enforcement responsibilities into the hands of administrators whose job it is to obtain compliance with Government policies and who are trained in obtaining the types of administrative agreements through which compliance can be both attained and maintained.

## **4.1. Simplified Acquisition Threshold**

### **4.1.0. Introduction**

As shown by the figures at Table 1, the DOD contracting work force spends much of its time on a large number of smaller contracts. This is a problem which has occurred despite long-standing efforts by Congress and DOD to simplify acquisition procedures for small-dollar contracts in order to reduce administrative costs and to speed procurement. Today, there is probably no single area of acquisition law where there is a greater potential to reduce costs than in small-dollar contracts while retaining the management controls needed for the accountability of public funds.

In 1947, Congress established a "small purchase threshold" at \$1000 with the passage of the Armed Services Procurement Act of 1947. The Federal Property and Administrative Services Act (passed in 1948) established the same threshold levels for civilian agencies at the time that the General Services Administration was established. Subsequent increases in the level of the small purchase threshold have primarily come about as Congress gradually recognized the effects of inflation upon small-dollar value purchases. In 1958, for example, Pub. L. No. 85-800 raised the threshold to \$2,500, a level which held constant for almost twenty years. In 1978, Pub. L. No. 95-507 raised the level to \$10,000, but inflationary pressures led to the passage of Pub. L. No. 99-500 in 1986, which brought the threshold to its present level of \$25,000 and provided for a regular periodic review.

Since 1947, Congress has enacted other legislative requirements which -- as shown throughout this study -- have increased the complexity of the defense procurement process. Because Congress has usually recognized the need to balance the benefits of the legislation with the potential for adverse impacts on the economy and efficiency of the procurement process, much of this legislation was deliberately drafted to have minimal impact upon small purchases. Congress usually accomplished this by setting a "floor" so that the requirements of the new law would not apply to contracts written at dollar values below the existing statutory "ceiling" for simplified acquisitions. Although the "ceiling" for simplified acquisitions was regularly adjusted to account for the declining purchasing power of the dollar, the "floors" for applying these other statutory requirements did not keep pace. As a result -- and contrary to the original intent of Congress -- the requirements of these statutes were gradually applied to formerly simplified acquisitions. Procedures originally intended to expedite the economic acquisition of small-dollar value items and services are now subject to a wide array of relatively complex and costly administrative steps, solicitation provisions, and contract clauses. Compliance with each of those provisions adds to the administrative overhead of both the Government and its suppliers, while also adding barriers to commercial-military integration.

#### **4.1.0.1. Key Elements**

The Panel believes that the best way to streamline smaller purchases is to create a new, uniform "simplified acquisition threshold" at a level of \$100,000 (adjusted every fifth year for

inflation) to replace the current small purchase threshold defined in 41 U.S.C. § 403(11) and, further, to amend 10 U.S.C. § 2304(g) to provide for simplified purchase procedures for contracts whose value is less than the new threshold. In addition, the Panel recommends extending the current small business reservation established by 15 U.S.C. § 644(j) up to the simplified acquisition threshold. By substituting a uniform threshold for today's many differing thresholds, contracting officers will not have to turn to a labyrinth of regulations, as they do today, to determine whether (and which) simplified procedures can be used. In addition, as DOD budgets decline, contracting offices will be able to conserve on contract administration resources and devote greater effort to contracts over \$100,000, through which over 90% of DOD's acquisition funds are spent. Finally, small businesses will be free from legislation that imposes unique contract requirements which require special skills to understand and often substantial expense to implement.

In recommending a simplified acquisition threshold of \$100,000, the Panel is not recommending or implying that all purchases of supplies or services below that threshold would be treated the same. Rather, the Panel is recommending a level below which the FAR and the DFAR would prescribe a range of simplified procedures that would vary by dollar value in terms of such factors as the amount (and documentation) of competition required, the formality and detail of price reasonableness documentation, and the contracting form to be used. Part 13 of FAR and DFAR provide a range of such procedures appropriate to the wide variety of simplified acquisitions, ranging from small imprest fund or credit card purchases to those in the upper ranges for which wider competition and more structured processes would be required by regulation.

The Panel's recommendation consists of four parts.

## I

### Establish a Simplified Acquisition Threshold at \$100,000.

The small purchase threshold was set at \$25,000 in 1986. Nonetheless, the Panel recommends that it be increased to \$100,000. Any particular level is, of course, somewhat arbitrary. The Panel recommends \$100,000 for several reasons.

First, the Panel reviewed available procurement statistics, which show that across a number of statutory programs, a \$100,000 threshold will remove from complex regulations over 50% of contract actions above \$25,000 while deregulating only 5% of DOD expenditures. In addition, adoption of a \$100,000 threshold will mean that some 98% of all DOD contract actions can be accomplished under simplified procedures. Thresholds above \$100,000 begin to impact more significantly on the amount of spending that would be released from complex regulation, although an argument could certainly be made -- and has been made by the executive branch in some cases -- for a higher threshold. On the other hand, stopping at a threshold of \$50,000 would only free about half as many contract actions from complex regulations as the \$100,000 threshold.

Second, recent Congressional actions establishing "floors" for the application of procurement laws have selected \$100,000 as the floor.<sup>1</sup>

Third, statements received by the Panel from several DOD agencies suggested that as a practical matter, as contract staffs are cut back as part of the overall defense "build-down," it will be difficult for contracting officers to spend much time on contracts below \$100,000.

Fourth, it seemed unlikely to the Panel that any company would actually be willing to spend the money to make fundamental changes in the way it does business in return for a sale of \$100,000 or less. This may be particularly true of small businesses, which are the preferred recipients of contracts of this size. Indeed, the Panel members are all familiar with anecdotal evidence showing that many small businesses never gain actual knowledge of, understand, or implement the "boilerplate" that is today inserted into smaller contracts.

Fifth, it appears that the great majority of contracts above \$25,000 and below \$100,000 are awarded on the basis of competition, which makes such contracts good candidates for reduced contractual requirements.

Sixth, a \$100,000 threshold was authorized for Operations Desert Shield and Desert Storm for overseas purchases and proved essential to the rapid mobilization of U.S. and Allied forces. The Panel understands that the major objection to use of the \$100,000 threshold for domestic purchases was the impact of such a threshold on small and minority businesses. As set out more fully below, the Panel has recommended statutory changes to protect the interests of small and minority businesses in receiving smaller contracts on a priority or set-aside basis. This, the Panel hopes, will remove the principal objection to use of the \$100,000 threshold for domestic acquisition.

Finally, as stated at the outset of this Chapter, the Panel approached its review of socioeconomic legislation with the presumption that each socioeconomic program created by Congress is important and should be implemented to the greatest extent consistent with reasonably efficient procurement procedures. At the same time, the Panel was mindful that its enabling legislation directed it to consider how procurement could be streamlined. The Panel believes that adoption of the \$100,000 threshold continues the Government's commitment to socioeconomic (and other regulatory) programs, reduces the barriers to small and small disadvantaged business participation in Government contracting, and streamlines the defense acquisition system.

---

<sup>1</sup>See 10 U.S.C. § 2397c(a)(1), 41 U.S.C. § 423(e)(7), and the Byrd Amendment, 31 U.S.C. § 1352 note.

## II

### Adjust Existing Statutory Floors to Not Less Than \$100,000.

The Panel identified some 30 laws imposing contract clauses which currently require action by a contracting officer or a Government contractor on contracts at various values below \$100,000.<sup>2</sup> The Panel makes two different recommendations with respect to such laws.

One group of laws (set out in Table II below) should continue to apply to simplified purchases, but should not require implementation in contracts. Examples of this type of law are prohibitions against gratuities or the hiring of certain debarred individuals. This set of laws, like criminal law, is binding whether or not clauses appear in a contract. The reason for removing the clauses is to permit smaller transactions to be handled by credit card, electronic data interchange, or other simplified means where there may be no "contract" in the classic sense of a paper document within which to place the clauses. Indeed, one of the greatest barriers to the implementation of credit card purchasing for smaller DOD contracts is the need to have a paper contract which contains clauses mandated by, for example, the Walsh-Healey Act or Exec. Order No. 11246. This recommendation is not without statutory precedent. When Congress passed recent legislation on procurement integrity<sup>3</sup> and lobbying,<sup>4</sup> Congress imposed restrictions on all contractors but did not require contractual coverage below \$100,000.

A second group of laws (set out in Table III below) is not self-executing, but applies only if implemented by contract clause. Examples are the Service Contract Act<sup>5</sup> and the Davis-Bacon Act.<sup>6</sup> As to these laws, the Panel recommends that the statutory floor below which the law does not apply be set as the simplified acquisition threshold (i.e., \$100,000 as adjusted for inflation). The reason for increasing these thresholds is to reduce the amount of paperwork required to award the contract and monitor its performance, to speed the award of smaller contracts, and to reduce costs of performance by the private sector -- which will hopefully lead to reductions in the price of smaller contracts. In this regard, the DOD Directorate for Contract Policy and Administration advised the Panel that the lead time for procurements above the small purchase threshold averages four to six months, while the lead time below the threshold averages one-month. In addition, a number of DOD agencies advised the Panel that cutbacks in defense manpower will, as a practical matter, make monitoring smaller contracts very difficult. The threshold recommended here will remove more than 50% of contract actions over \$25,000 from currently applicable law but impact only a very small percentage of total DOD spending. The Panel therefore believes that the \$100,000 threshold will conserve contract administration

---

<sup>2</sup>The statutes and clauses are set out in Tables II and III below. In addition, Exec. Order No. 11246 requires contracts above \$10,000 to contain specified affirmative action and anti discrimination clauses.

<sup>3</sup>41 U.S.C. § 423; *see id.* § 423(e)(7).

<sup>4</sup>The "Byrd Amendment," section 319 of the Department of the Interior and Related Agencies Act for Fiscal Year 1990, 31 U.S.C. § 1352 note.

<sup>5</sup>41 U.S.C. §§ 351-58.

<sup>6</sup>40 U.S.C. §§ 276a to 276a-7.

resources, allowing agencies to focus management efforts on high-value contracts while limiting any impact on socioeconomic programs.<sup>7</sup>

### III

#### Reserve Purchases Under the Simplified Acquisition Threshold For Small Business.

At present, all purchases below the small purchase threshold are reserved by statute (15 U.S.C. § 644(j)) for small business so long as there is a reasonable expectation that at least two small businesses will compete for the contract and can be competitive on price and quality. By regulation, contracts above the small purchase threshold can be set aside (totally or partially) for small business or small disadvantaged businesses,<sup>8</sup> again so long as there is a reasonable expectation that two or more responsible offerors will bid for the work and reasonable price and quality will result.<sup>9</sup> The Panel was advised by the DOD Office of Small and Disadvantaged Business Utilization that thousands of DOD contracts between \$25,000 and \$100,000, totaling in the hundreds of millions of dollars, are today set aside by regulation for small business or small disadvantaged business. The Panel believes it is appropriate to continue existing practice as the small purchase threshold is raised to \$100,000, and therefore recommends raising the statutory small business reservation in 15 U.S.C. § 644(j) to \$100,000 as well.

In recommending that the small business reservation be raised, the Panel is aware that today, many DOD contracts between \$25,000 and \$100,000 are awarded pursuant to section 8(a) of the Small Business Act (15 U.S.C. § 637(a)) or under the predecessors to 10 U.S.C. § 2323 (and related Public Laws).<sup>10</sup> It has therefore drafted amendments to 15 U.S.C. § 644(j) that permit set-asides of DOD contracts below \$100,000 to minority and small disadvantaged businesses to continue. The Panel stresses that the purpose of this amendment is to ensure that the enlarged small business reservation does not interfere with current practice. In addition, it is not the Panel's intention to "exempt" awards under the 8(a) program or section 2323 from the simplified purchase procedures authorized for contracts below \$100,000; to the contrary, the Panel believes that simplified procedures should be used to the maximum extent practical for all contracts under \$100,000 including those awarded under set-asides.

Finally, the Panel notes that section 801 of the National Defense Authorization Act for Fiscal Year 1993<sup>11</sup> has added a requirement<sup>12</sup> that the Secretary of Defense "provide guidance to Department of Defense Personnel on the relationship among" the set-aside programs created under section 8(a) of the Small Business Act, section 15 of the Small Business Act (15 U.S.C. §

<sup>7</sup>For a fuller examination of the \$100,000 floor, see the separate statutory discussion for each statute listed in Table III.

<sup>8</sup>See 10 U.S.C. § 2323 (1992).

<sup>9</sup>See FAR subpart 19.5; DFARS subpart 219.5. There are some restrictions on the types and levels of contracts that can be set aside. See, e.g., 10 U.S.C. § 2855 (architect-engineer contracts above \$85,000 cannot be set aside); DFARS 219.502-1, 219.502-2-70(b).

<sup>10</sup>Formerly the "section 1207 program." See Pub. L. No. 102-484, § 801, 106 Stat. 2315, 2442 (Oct. 23, 1992).

<sup>11</sup>Pub. L. No. 102-484, 106 Stat. 2315, 2442 (Oct. 23, 1992).

<sup>12</sup>10 U.S.C. § 2323(e)(5)(C), added by Pub. L. No. 102-484, § 801(C)(5), 106 Stat. 2443 (1992).

644), and section 2323 of Title 10. It is the Panel's recommendation that allocation of DOD contracts below the simplified acquisition threshold be made pursuant to such regulations and not be made by statute in order to permit the Secretary to meet the various socioeconomic participation goals levied on DOD.

#### IV

##### **Simplify and Modernize Contract Notice Procedures.**

In order to ensure broader public access to streamlined procurement opportunities, the Panel recommends increased use of electronic procurement notice and contracting methods. Current notice requirements are set by section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416). This provision requires DOD contracting offices to post public notices of any solicitation expected to exceed \$5,000 (\$10,000 for civilian agencies) and to advertise procurements above the small purchase threshold in the Commerce Business Daily (CBD).

The Panel recommends a series of amendments.<sup>13</sup> First, it recommends that the threshold for synopsis in the CBD be raised to the simplified acquisition threshold. This change alone should substantially decrease procurement lead times for smaller purchases.

Second, the Panel recommends that all solicitations above \$10,000 be posted locally, preferably through the use of electronic bulletin boards, 800-numbers or other methods of electronic advertising. When the synopsis threshold is raised to \$100,000, it is critical to small business that an effective, low-cost, and efficient replacement be found. Physical posting of a paper notice at a local contracting office does not fill this bill. There are, even today, however, a number of efforts within DOD to aggressively promote the use of electronic notice and contracting methods. Accordingly, the Panel has recommended that section 416 be amended by addition of a new subsection (e) which will require the Administrator for Federal Procurement Policy to develop uniform regulations to establish widespread notification of opportunities below the simplified acquisition threshold. Given the speed with which electronic technologies change, it would be inappropriate to legislate the form such notice must take. Instead, the Administrator is charged with phasing in electronic methods as the technology required becomes reasonably available to both Government and the business community. In promulgating regulations, the Administrator must carefully assess the costs and availability of this "re-tooling" on potential offerors, especially small businesses. In addition, nothing in the proposed amendment prevents the Administrator from imposing CBD notice requirements below the simplified acquisition threshold if required to provide adequate notice to small business until electronic notice can be properly implemented.<sup>14</sup>

---

<sup>13</sup>See section 1.2.9. of this Report for a full discussion of 41 U.S.C. § 416.

<sup>14</sup>It is the Panel's hope that the Administrator would encourage contracting offices to move to electronic notice and contracting by reducing procurement lead times for solicitations that are posted electronically.

#### **4.1.0.2. Simplified Acquisition Threshold: Effect on Contract Price and Reporting**

A key concern with increasing the simplified acquisition threshold to \$100,000 is its potential effect on DOD's ability to award contracts at reasonable prices. In 1991, there were \$5.6 billion dollars awarded in contract actions between the levels of \$25,000 and \$100,000. Competition was used in 84.7% of those actions to establish contract prices. In the remaining 15.3% (valued at \$0.8 billion, or 0.6% of the \$126 billion in contracts awarded by DOD in 1991) price analysis was the primary method used to establish the reasonableness of the costs factored into these contracts.<sup>15</sup> Because there is little reason to expect these relative percentages to change if the threshold for simplified acquisition procedures is raised to \$100,000, the historical record suggests two things: that competition will continue to be the primary tool used to establish the reasonableness of DOD contract prices; and, where competition is impractical, that DOD contract personnel have the analytical tools to determine the fair market value for these Government purchases. Therefore, increasing the simplified acquisition threshold to \$100,000 should have little, if any, impact on the contract prices negotiated by DOD.

A second concern in raising the simplified acquisition threshold to \$100,000 is its effect on contract reporting requirements. Section 19 of the Office of Federal Procurement Policy Act (41 U.S.C. § 417) requires each executive branch agency to establish and maintain for a period of five years a detailed record of all procurements other than small purchases. The Panel therefore faced the question of what to recommend for reporting contracts between the present small purchase level of \$25,000 and the proposed level of \$100,000. Representatives of the small business community were concerned about a potential loss of visibility for contract actions between these levels, while contract analysts voiced the same reservations over any discontinuity in the reporting of statistics at any range above the \$25,000 level. Senior officials of DOD assured the Panel, however, of their desire to monitor management performance by continuing current contract reporting procedures at \$25,000. Given those assurances, there should be no loss of either policy visibility or statistical control by the adoption of the simplified acquisition threshold at the \$100,000 level.

#### **4.1.0.3. Simplified Acquisition Threshold: Conforming Amendments**

After discussions with the Office of Federal Procurement Policy, the Panel reached the conclusion that the same considerations that warrant the creation of a simplified acquisition threshold for DOD also warrant creation of the same threshold for civilian agencies. Accordingly, the Panel recommends that the simplified acquisition threshold be implemented primarily by amending the Office of Federal Procurement Policy Act and by making conforming amendments to various sections of Title 10 rather than by implementing this threshold as part of Title 10. The amendments necessary to implement the threshold for DOD acquisitions are given immediately below:

---

<sup>15</sup>DOD Directorate for Information Operations and Reports, DOD Prime Table 4, Contract Awards, Size Distribution, See p. 4-5, note 5.

#### 4.1.0.3.1. Definitions

The Panel recommends that section 4(11) of the Office of Federal Procurement Policy Act, 41 U.S.C. § 403(11), be repealed in its entirety and replaced with the following:

(11) the term "simplified acquisition threshold" means \$100,000, adjusted on October 1 of each year divisible by 5 to the amount equal to \$100,000 in constant fiscal year 1990 dollars (rounded to the nearest \$1,000).

The Panel further recommends that the definition of "small purchase threshold" found in 10 U.S.C. § 2302(7) be replaced with a cross-reference to "simplified purchase threshold" as defined in 41 U.S.C. § 403(11).<sup>16</sup> A full discussion of proposed amendments to section 2302 can be found in section 1.1.2 of this Report.

#### 4.1.0.3.2. Authority for Simplified Procedures

Today, DOD has authority in 10 U.S.C. § 2304(g) to create and use simplified purchase procedures up to the small purchase threshold. The Panel recommends that section 2304(g) be amended to substitute the phrase "simplified purchase procedures" for the phrase "small purchase 1.procedures." A full discussion of the required changes to section 2304 can be found in section 2.1. of this Report.

#### 4.1.0.3.3. Notice

Today, notice of contract opportunities is governed by two sets of statutory provisions, one in the Small Business Act and one in the Office of Federal Procurement Policy Act. The panel proposes consolidating the notice provisions into a single provision in the Office of Federal Procurement Policy Act. To do this, sections 8(e), 8(f), and 8(g) of the Small Business Act (15 U.S.C. §§ 637(e)-637(g))<sup>17</sup> should be repealed and replaced by a new section 637(e) as follows:

<sup>16</sup>The Panel has recommended that section 2302(7) also allow DOD, during contingency operations, to issue simplified contracts for acquisitions up to twice the value of the simplified acquisition threshold if those contracts are to be performed abroad.

<sup>17</sup>(e)(1) Except as provided in subsection (g)--

(A) an executive agency intending to--

(i) solicit bids or proposals for a contract for property or services for a price expected to exceed the small purchase threshold; or

(ii) place an order, expected to exceed the small purchase threshold, under a basic agreement, basic ordering agreement, or similar arrangement,

shall furnish for publication by the Secretary of Commerce a notice described in subsection (f); and

(B) an executive agency intending to solicit bids or proposals for a contract for property or services shall post, for a period of not less than ten days, in a public place at the contracting office issuing the solicitation a notice of solicitation described in subsection (f)--

(i) in the case of an executive agency other than the Department of Defense, if the contract is for a price expected to exceed \$10,000, but not to exceed the small purchase threshold; and

(ii) in the case of the Department of Defense, if the contract is for a price expected to exceed \$5,000, but not to exceed the small purchase threshold; and (C) an executive agency awarding a contract

for property or services for a price exceeding the small purchase threshold, or placing an order referred to in clause (A)(ii) exceeding the small purchase threshold, shall furnish for publication by the Secretary of Commerce a notice announcing the award or order if there is likely to be any subcontract under such contract or order.

(2) The Secretary of Commerce shall publish promptly in the Commerce Business Daily each notice required by paragraph (1).

(3) Whenever an executive agency is required by paragraph (1)(A) to furnish a notice to the Secretary of Commerce, such executive agency may not--

(A) issue the solicitation earlier than 15 days after the date on which the notice is published by the Secretary of Commerce; or

(B) establish a deadline for the submission of all bids or proposals in response to the notice required by paragraph (1)(A) that--

(i) in the case of an order under a basic agreement, basic ordering agreement, or similar arrangement, is earlier than the date 30 days after the date the notice required by paragraph (1)(A)(ii) is published;

(ii) in the case of a solicitation for research and development, is earlier than the date 45 days after the date the notice required by paragraph (1)(A)(i) is published; or

(iii) in any other case, is earlier than the date 30 days after the date the solicitation is issued.

(f) Each notice of solicitation required by subparagraph (A) or (B) of subsection (e)(1) of this section shall include--

(1) an accurate description of the property or services to be contracted for, which description (A) shall not be unnecessarily restrictive of competition, and (B) shall include, as appropriate, the agency nomenclature, National Stock Number, or other part number, and a brief description of the item's form, fit, or function, physical dimensions, predominant material of manufacture, or similar information that will assist a prospective contractor to make an informed business judgment as to whether a copy of the solicitation should be requested;

(2) provisions that--

(A) state whether the technical data required to respond to the solicitation will not be furnished as part of such solicitation, and identify the source in the Government, if any, from which the technical data may be obtained; and

(B) state whether an offeror, its product, or service must meet a qualification requirement in order to be eligible for award, and, if so, identify the office from which a qualification requirement may be obtained;

(3) the name, business address, and telephone number of the contracting officer;

(4) a statement that all responsible sources may submit a bid, proposal, or quotation (as appropriate) which shall be considered by the agency; and

(5) in the case of a procurement using procedures other than competitive procedures, a statement of the reason justifying the use of such procedures and the identity of the intended source.

(g)(1) A notice is not required under subsection (e)(1) of this section if--

(A) the notice would disclose the executive agency's needs and the disclosure of such needs would compromise the national security;

(B) the proposed procurement would result from acceptance of--

(i) any unsolicited proposal that demonstrates a unique and innovative research concept and the publication of any notice of such unsolicited research proposal would disclose the originality of thought or innovativeness of the proposal or would disclose proprietary information associated with the proposal; or

(ii) a proposal submitted under section 638 of this title;

(C) the procurement is made against an order placed under a requirements contract;

(D) the procurement is made for perishable subsistence supplies; or

(E) the procurement is for utility services, other than telecommunication services, and only one source is available.

(2) The requirements of subsection (a)(1)(A) of this section do not apply to any procurement under conditions described in paragraph (2), (3), (4), (5), or (7) of section 303(c) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c)) or paragraph (2), (3), (4), (5), or (7) of section 2304(c) of Title 10.

#### **(e) Procurement Notice**

Publication, notification, and availability requirements for solicitations leading to the award of contracts for property and services are those set forth in section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416).

In addition, section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416) should be amended as set out in section 1.2.9. of this Report.

#### **4.1.0.4. Small Business Reservation**

Today, all acquisitions below the small purchase threshold are reserved for small business so long as two or more small businesses are capable of providing the supplies to be acquired at a fair price and with the required quality. As discussed above, the Panel recommends that this reservation be extended to cover all purchases not exceeding the simplified acquisition threshold while ensuring that contracts between \$25,000 and \$100,000 remain available for award under section 8(a) of the Small Business Act (15 U.S.C. § 637(a)), under the small disadvantaged business program authorized by 10 U.S.C. § 2323<sup>18</sup> (formerly known as the section 1207 program) and under section 712 of Pub. L. No. 100-656 (which creates a special category of "emerging small businesses").<sup>19</sup> Accordingly, the Panel recommends the following amendment to section 15(j) of the Small Business Act, 15 U.S.C. § 644(j):

---

(3) The requirements of subsection (a)(1)(A) of this section shall not apply in the case of any procurement for which the head of the executive agency makes a determination in writing, after consultation with the Administrator for Federal Procurement Policy and the Administrator of the Small Business Administration, that it is not appropriate or reasonable to publish a notice before issuing a solicitation.

<sup>18</sup>This provision was added by section 801 of the National Defense Authorization Act, *supra* note 9.

<sup>19</sup>102 Stat. 3890 (1988).

(j) Each contract for the procurement of goods and services which has an anticipated value not in excess of the ~~small-purchase~~ simplified acquisition threshold and which is subject to small simplified purchase procedures prescribed by 10 U.S.C. 2304(g) or 41 U.S.C. 253(g) shall be reserved exclusively for small business concerns unless the contracting officer is unable to obtain offers from two or more small business concerns that are competitive with market prices and in terms of quality and delivery of the goods or services being purchased; provided, however, that nothing in this subsection shall be construed as precluding the award of contracts with a value not in excess of the simplified acquisition threshold under the authority of section 8(a) of this Act (15 U.S.C. 837(a)), section 2323 of Title 10 or under section 712 of Public Law 100-656. In utilizing these procedures, contracting officers shall, wherever circumstances permit, choose a method of payment which minimizes paperwork and facilitates prompt payment to contractors.

#### 4.1.0.5. Exemptions

As in the case of commercial item procurement,<sup>20</sup> the Panel was told by a number of commentators that various contract clauses interfered greatly with the practical implementation of simplified purchase procedures. The problem clauses implement statutes which have no threshold for application, or whose threshold is less than \$100,000.<sup>21</sup> Accordingly, the Panel recommends that a new section 29 be added to the Office of Federal Procurement Policy Act as 41 U.S.C. § 424, which does two things. First, it eliminates the requirement to incorporate contract clauses in simplified contracts, which would otherwise be required by the self-enforcing statutes set out in Table II below. Second, it imposes a uniform \$100,000 floor on each of the statutes set out in Table III below.<sup>22</sup>

---

<sup>20</sup>See Chapter 8 of this Report.

<sup>21</sup>In addition, Exec. Order No. 11246, which requires extensive clauses to be inserted in any contract greater than \$10,000, was cited as an impediment to simplified purchasing. The Panel urges the Secretary of Defense to seek appropriate modification of this Executive Order. Various free trade agreements provide for a domestic preference up to amounts of \$25,000 or \$50,000. (See 19 U.S.C. § 2518 note.) When some of these were negotiated, the intent appears to have been to align the ceiling for domestic preferences to the small purchase threshold. The Panel notes that such an alignment, if it was intended, will be removed by the Panel's recommendations and will have to be restored, if that is desired, by amendments to various free trade agreements.

<sup>22</sup>The Panel did not attempt to analyze statutes applicable only to civilian agencies that might create impediments to efficient small purchase practices.

**TABLE II**  
**STATUTES TO BE RETAINED BUT NOT TO BE IMPLEMENTED BY CONTRACT CLAUSE**

Statute	Regulation(s)	Code <sup>23</sup>	Description of Statute or Regulations
10 U.S.C. § 2207	52.203-3	3	Gratuities
10 U.S.C. § 2306(b)	52.203-5	3	Covenant against contingent fees.
10 U.S.C. § 2397b	52.203-7000	4	Prohibition on Compensation to certain former DOD employees.
10 U.S.C. § 2402	52.203-6	3	Prohibits primes from entering into any agreement with subcontractor which prevents subcontractor from selling any item or process directly to U.S.
22 U.S.C. § 2370	52.225-11	3	Prohibition on assistance to certain countries.
31 U.S.C. § 1352 note	52.203-11; -12	3	Byrd Amendment
41 U.S.C. § 22	52.203-1	3	Officials not to benefit
41 U.S.C. § 35-45		3	Walsh-Healey Public Contracts Act <sup>24</sup>
41 U.S.C. § 57	52.203-7	2,3,6	Anti-Kickback Act; prohibits payments from any subcontractor to any prime or any employee of the prime; violation voids contract.

<sup>23</sup>The codes in this column mean the following:

1. Requires contractor to provide information or report.
2. Requires contractor to establish procedures or prepare and retain records, but does not require a report unless a violation occurs.
3. Requires no action other than compliance with statute.
4. Individual required to report; contractor not required to report.
5. Representation/certification/notification by contractor required.
6. Contractor required to request authority to take designated action(s).
7. Requires modification of contractors business methods or systems.

<sup>24</sup>The Panel has recommended that the Walsh-Healey Act be repealed. See section 4.2.3. of this Report.

**TABLE III**  
**STATUTORY EXEMPTION FOR CONTRACTS UNDER \$100,000**

Statute	Regulation(s)	Code	Description of Statute or Regulations
10 U.S.C. § 2313	15,106.1 , - 2,52.215-1,-2	1,2,7	See the discussion at section 2.3.2 of this report
10 U.S.C. § 2384(b)	217.7300 252.217-7026	1	Requires disclosure of actual manufacturer of component parts.
10 U.S.C. § 2393	52.209-5 and -6	5	Prohibits prime contractor from doing business with debarred or suspended subcontractors.
10 U.S.C. § 2397 <sup>25</sup>	252.203-7000	3, 4	Reports by former DOD employees.
10 U.S.C. § 2397a <sup>26</sup>	252.203-7000	3, 4	Reporting of employment contacts by DOD employees.
10 U.S.C. § 2397c <sup>27</sup>	252.203-7000	4	Prohibition on Compensation to Former DOD Employees.
10 U.S.C. § 2408	252.203-7001	3	Prohibition of employment of persons convicted of fraud.
10 U.S.C. § 2506 <sup>28</sup>	25.1 and 25.2	3	DOD variant of Buy American Act using component test to identify "American" product.
10 U.S.C. § 2507 <sup>29</sup>	25.1 and 25.2	3	Section 2507 contains specific U.S. source restrictions applicable to the acquisition of identified products.
10 U.S.C. § 2631	252.247-7022, -7023, -7024	5 6 5	Requires transportation of items by sea in US Flag vessels.
18 U.S.C. § 874; 40 U.S.C. § 276(e)	52.203-7	2	Anti-kickback procedures
18 U.S.C. § 4082(c)(2); Pub. L. No. 89-176	52.222-3	3	Use of convict labor.
29 U.S.C. § 793	52.222-36	3, 7	Rehabilitation Act of 1973; requires affirmative action to employ and advance handicapped individuals. Act applies to companies with 50 or more employees or annual US contracts of \$50,000 or more.
38 U.S.C. § 4212	52.222-35; 52.222-37	3, 7	Affirmative action for disabled and VietNam Era Veterans; Reports of employment of Viet nam era veterans
40 U.S.C. § 276a to § 276a-7	22.400	1, 7	Davis-Bacon Act
40 U.S.C. §§ 327- 333; 28 U.S.C. § 1499	22.300; 52.222-4	3, 7	Work Hours and Safety Act of 1962; Overtime compensation

<sup>25</sup>This provision does not apply below the small purchase threshold today. See 10 U.S.C. § 2307(a)(1). It should be amended to exempt contracts below the simplified acquisition threshold.

<sup>26</sup>This provision does not apply below the small purchase threshold today. See 10 U.S.C. § 2307a(a)(1), incorporating by reference *id.* § 2397(a)(1). It should be amended to exempt contracts below the simplified acquisition threshold.

<sup>27</sup>This section today applies only to contracts greater than \$100,000. See 10 U.S.C. § 2397c(a)(1). The reference in the statute to "\$100,000" should be changed to "simplified acquisition threshold."

<sup>28</sup>The Panel has recommended changing from the component test for compliance with the Buy American Act and 10 U.S.C. § 2506 to the "substantial transformation" test used by the Trade Agreements Act. If this amendment is made, then there is no need to exempt simplified purchases from compliance. See generally Chapter 7 of this Report.

<sup>29</sup>The Panel has recommended repeal of most of the source restrictions contained in 10 U.S.C. § 2507. If the Panel's recommendations are adopted, then there is no need to exempt simplified purchases from this section. See generally Chapter 7 of this Report.

41 U.S.C. § 10a -10d <sup>30</sup>	25.1 and 25.2	3, 7	Buy-American Act
41 U.S.C. § 351- 358	52.222-40; -41; -42	1, 2, 7	Service Contract Act
41 U.S.C. § 423	52, 203-8	3	Procurement Integrity <sup>31</sup>
41 U.S.C. § 701	52.223-5; -6	3, 7	Drug Free Workplace- certifications. This section requires employers to establish drug-free awareness programs and to report any convictions by their employees for drug-related offenses.
46 U.S.C. § 1241(b)	52.247-64	1.7	Preference for US Flag Vessels; requires 50% or more of gross tonnage of materials and equipment procured under government contracts be transported in US-flag vessels.

The text of the proposed new section 29 to the Office of Federal Procurement Policy Act is as follows:

**Section 29 [41 U.S.C. 424] SIMPLIFIED ACQUISITION PROCEDURES.--**

(a) Purchases made and contracts awarded with a value that is not in excess of the simplified acquisition threshold, shall be exempt from the following laws:

[list set out above in Table III]

(b) Unless otherwise determined by the Administrator, for contracts awarded with a value that is not in excess of the simplified acquisition threshold, no contract clauses shall be required to implement the following laws:

[list set out above in Table II]

(c) The exemptions set out in subsections (a) and (b) shall be effective notwithstanding any other provision of law hereafter enacted unless such other provision specifically refers to and amends this section.

**4.1.0.6. Reporting of Contract Actions**

Section 19 of the Office of Federal Procurement Policy Act (41 U.S.C. § 417) requires each executive agency to maintain a computer file of basic data about contract awards, (other than small purchases) including the recipient of the contract, the contract amount, and the nature of products or services obtained by the Government. This requirement is implemented in FAR Subpart 4.6. Several DOD agencies, including the Office of Small and Disadvantaged Business Utilization, and a number of industry groups commented that the floor for reporting should not be

<sup>30</sup>See notes 28 and 29 above.

<sup>31</sup>The reporting provisions of this section do not apply below \$100,000. See 41 U.S.C. § 423(c)(7). The Panel recommends that "\$100,000" be changed to "simplified acquisition threshold."

raised to \$100,000, since information about awards between the current floor and \$100,000 is very important to understanding the impact of Government spending on small, disadvantaged, and minority businesses. In addition, the Panel was told that it is important to be able to compare data across years, and that comparability requires retaining the current \$25,000 floor. No one identified any problems with the \$25,000 floor. Nonetheless as discussed in section 2.5.10. of this Report, the Panel believes that reporting between \$25,000 and \$100,000 should be controlled by regulation rather than statute. Accordingly, the Panel has recommended conforming 41 U.S.C. § 417 to the simplified acquisition threshold.

#### **4.1.0.7. Miscellaneous**

Section 8(d) of the Small Business Act, 15 U.S.C. § 637(d), relating to small business subcontracting plans, should be amended to change the exemption for contracts under the "small purchase threshold" to an exemption for contracts under the "simplified acquisition threshold."

Section 8(h) of the Small Business Act, 15 U.S.C. § 637(h), should be deleted since, after the amendment to sections 8(e) through 8(g), this section is duplicative of 10 U.S.C. § 2304(f) and 41 U.S.C. § 253(f).

Section 8(i) of the Small Business Act, 15 U.S.C. § 637(i), should be repealed since it duplicates section 18 of the Office of Federal Procurement Policy Act, 41 U.S.C. § 416.

Section 8(j) of the Small Business Act, 15 U.S.C. § 637(j) should be renumbered as section 8(g) of that Act.

Section 19(a) of the Office of Federal Procurement Policy Act, 41 U.S.C. § 417(a), should be amended as follows:

- (a) Each executive agency shall establish and maintain for a period of five years a computer file, by fiscal year, containing unclassified records of all procurements other than simplified acquisitions, in such fiscal year.

## 4.2. Labor and Equal Opportunity

### 4.2.0. Introduction

In its review of the labor statutes pertaining to defense procurement, the Panel proceeded upon the assumption that many of these laws reflect fundamental rights and protections that the Congress has properly guaranteed to the American worker. Over the years, these laws have created an infrastructure of requirements which are binding on all employers, including DOD and its suppliers. However, most of these national policies do not have a particular impact upon defense acquisition and for that reason were not considered as part of this review. For example, the review completed during this study showed that the Fair Labor Standards Act (40 U.S.C. § 328-333) prescribes common criteria for wages and overtime that apply equally to workers in the public and private sectors. The Panel concentrated instead on those statutes which single out DOD or which, because of their unique requirements, place an unusual burden upon the defense procurement system.

Of the labor laws that were considered, only three appeared to create such burdens: the Davis-Bacon, Service Contract, and Walsh-Healey Acts. It should be noted that, although these are "prevailing wage" statutes that do not single out DOD, *per se*, they apply to a wide range of defense contracts involving, respectively, construction, service, and manufactured goods. Although Davis-Bacon and Walsh-Healey were passed during the Great Depression, they have become legislative landmarks, surviving periodic attempts at repeal or reform. Critics have, for example, regularly pointed out that the two thousand dollar threshold imposed by Davis-Bacon is a living anachronism, and that the Labor Department ceased issuing Walsh-Healey wage rate determinations in 1963. Although the 1965 passage of the Service Contract Act is comparatively recent, its success at implementing prevailing wage rates has been no better. In fact, the General Accounting Office (GAO) has, in successive reports, urged the repeal of both the Davis-Bacon and Service Contracts Act, arguing that they are hard to administer and that they inflate the costs of Government contracts.<sup>1</sup>

The evidence gathered by the Panel is consistent with these GAO findings. A 1988 study by the Logistics Management Institute identified thirteen separate thresholds directly or indirectly linked to Davis-Bacon requirements, while four others reflected those of the Walsh-Healey Act.<sup>2</sup> Compliance with these laws means that each DOD contract to which these thresholds pertain, the two thousand dollar level of Davis-Bacon being especially inclusive, must contain one or more of the required regulatory clauses. This proliferation of clauses is one of the reasons why Government contracts typically devote far more pages to regulatory compliance provisions than to the "statement of work" which actually prescribes the tasks to be performed. Contract administrators in DOD, as well as the private businesses and corporations that execute Government contracts, bear the burden of carrying out the procedures specified in each one of these clauses. In the case of labor statutes, these clauses mandate record-keeping requirements

<sup>1</sup>See, respectively, U.S. General Accounting Office, *The Davis-Bacon Act Should Be Repealed*, GAO/HRD 79-18, April 27, 1979; and *The Congress Should Consider Repeal of the Service Contract Act*, GAO/HRD 83-4, Jan. 31, 1983.

<sup>2</sup>LMI Study, *op. cit.*, pp. 92-99.

for employee hours, wages, and other certifications that are especially burdensome. Inevitably, these costs must be passed along to the taxpayer -- who not only pays the salary of the DOD contract administrator but the overhead of the Government contractor, which must either recover its expenses or go out of business.

The linkage between thresholds and contract clauses is one of the reasons why the Panel is suggesting the new approach of the simplified acquisition threshold discussed above. The application of this threshold to the labor laws would provide a common floor of \$100,000 in place of the wide variations that currently prevail -- \$2,000 for Davis-Bacon and \$2,500 for the Service Contract Act, for example. For Davis-Bacon, the elevated threshold would streamline 52.5% of DOD contract actions above \$25,000 while affecting only 7.0% of the dollars; for the Service Contract Act, 57.3% of the actions would be streamlined while 7.8% of the contract dollars would be affected.<sup>3</sup>

The Panel's principal recommendations on the Davis-Bacon and Service Contract Acts were consequently formulated with the overriding objective of elevating their thresholds to a common level of \$100,000. DOD's administrative overhead can thereby be reduced and precious management resources used more productively -- all while minimizing the economic impact of these reforms in the marketplace. In taking this position, the Panel specifically rejected the advice of those who urged either higher threshold levels or the outright repeal of both these laws. Because the issues associated with these alternatives have become so well entrenched over the years, it seems unlikely that more ambitious proposals can attract the ground swell of popular support which would be a prerequisite for sweeping congressional action.

In contrast, the Panel accepted the recommendations of many people who urged the repeal of the Walsh-Healey Act. This statute is one that has gradually outlived whatever usefulness it may once have had, its major provisions having been whittled away by the passage of more progressive legislation over the years. While its repeal would eliminate unnecessary contract clauses and streamline the acquisition process, it should be emphasized that those provisions of Walsh-Healey which grant expanded procurement opportunities for the blind and severely handicapped (41 U.S.C. §§ 46-48c, also known as the Javits-Wagner-O'Day Act) would be preserved under the Panel's recommended changes.

Among the other benefits of the consolidated threshold would be a common framework for the application of a number of socioeconomic laws. Title 41 U.S.C. § 701, for example, is a law which mandates that any business holding a Federal contract worth more than \$25,000 must certify that it maintains a drug-free workplace. Title 38 U.S.C. § 4212 requires any business entering into a certain class of Federal contracts worth more than \$10,000 must take affirmative action to employ and promote VietNam era veterans and special disabled veterans. Both these laws promote highly commendable social objectives: but the inconsistencies in these and other thresholds not only compound the difficulties of contract administration noted above, they also act as barriers to the integration of commercial and defense procurement. The Panel believes that consolidating these obligations through the application of a single, consistent threshold of

---

<sup>3</sup>Source: OSD, Directorate for Information Operation and Reports, *DOD Prime Contract Awards, Size Distribution*, FY 1991, p. 16.

\$100,000 will balance the requirements of a streamlined acquisition process with the need for policies which promote larger national objectives.

The general need to consolidate a number of labor-related requirements at the \$100,000 level also led to the Panel's recommendations concerning the Miller Act ( 40 U.S.C. § 270a, *et seq.*). This law protects the Government against non-performance and related liabilities by imposing a bond requirement on prime contractors performing Federal construction projects exceeding \$25,000. The need for greater uniformity in contract administration led to the Panel's proposed amendment of the Miller Act, which would adjust this threshold to \$100,000. In presenting this recommendation, however, the Panel carefully considered a number of comments which strongly suggested that it was in the best interests of the Government to retain the present threshold. Because most contracts between \$25,000 and \$100,000 are primarily for remodeling, maintenance, and repair work, these contracts are often awarded to smaller contractors, which as a group are thought by many to be less financially stable than larger contractors. Raising the threshold to \$100,000, it was suggested, would expose the Government to a greater degree of financial risk in the event of default. The Panel concluded, however, that the potential cost savings from more uniform contract administration outweighed this risk. Not only have a number of states gone to the same threshold recommended here, but the record of default on construction contracts suggests that other safeguards are working well. While the Panel has no doubt concerning the appropriate level of the Miller Act threshold, it suggests that Congress may well wish to approach that goal through the intermediate step of either a test program or a study designed to monitor the application of the streamlined acquisition procedures recommended here.<sup>4</sup>

---

<sup>4</sup>The Panel also reviewed various equal opportunity statutes, but found no evidence of an undue burden on DOD. The Civil Rights Act of 1964, for example, is landmark legislation that has been at the core of the nation's social policy for almost a generation. Its requirements do not single out defense contractors or other such suppliers of services to the Government. In the intervening years, moreover, this statute has been reinforced by countless others at the state and local level, many of which impose far more stringent reporting and compliance requirements on commercial companies operating within their jurisdictions -- including defense contractors. The procurement process is more significantly affected by the affirmative action and related requirements imposed by Exec. Order No. 11246, issued by President Johnson on September 24, 1965. Exec. Order No. 11246 imposes both nondiscrimination and affirmative action requirements on federal contractors receiving contracts of \$10,000 or more. In addition, it mandates a series of clauses that must be included in every contract. The LMI study found that the \$10,000 threshold level was generally too low and this Panel agrees with their assessment. *Id.* pp. 101-109, esp. pp. 108-109. The LMI study also noted that some of the provisions with \$10,000 thresholds are no longer needed such as a "Certification of Nonsegregated Facilities" and recommended their repeal. As a matter of policy, the Panel chose not to address Executive Orders or to offer draft statutes to amend or repeal such Orders. Accordingly, while the Panel urges that Exec. Order No. 11246 be conformed to the simplified acquisition threshold, it offers no legislative proposal on this subject.

## **4.2.1. 10 U.S.C. § 7299**

### **Contracts: Application of Public Contracts Act**

#### **4.2.1.1. Summary of the Law**

This section states that the Walsh-Healey Public Contracts Act (41 U.S.C. §§ 35-45) shall apply to each contract for the construction, alteration, repair, or equipping of a naval vessel unless the President determines the requirement is not in the interest of national defense.

#### **4.2.1.2. Background of the Law**

When this section was enacted in 1940, Congress intended ship contracts to be subject to Walsh-Healey as originally enacted and not as modified by subsequent amendments.<sup>1</sup> Congressional intent was changed in 1958 by Pub. L. No. 85-747 to include the amendments to Walsh-Healey and to apply them to Federal contracts for shipbuilding and repair.<sup>2</sup>

#### **4.2.1.3. Law in Practice**

It is clear from the existence of this law that Congress intended ship repair and construction be governed by Federal labor law, but not the Davis-Bacon Act or the Service Contract Act. According to the Naval Sea Systems Command (NAVSEA), in the absence of 10 U.S.C. § 7299, the Davis-Bacon Act or the Service Contract Act would arguably apply to contracts for ship repair. NAVSEA recommends that the Walsh-Healey Act continue to apply to ship repair and construction because it believes that Walsh-Healey is less of an administrative and financial burden than either Davis-Bacon or the Service Contract Act.<sup>3</sup>

#### **4.2.1.4. Recommendation and Justification**

##### **Amend**

Since the Panel recommends the repeal of Walsh-Healey in DOD contracts, the Panel recommends an amendment to this section which states that neither the Davis-Bacon Act nor the Service Contract Act apply to contracts for ship construction, repair, maintenance, or alteration.

#### **4.2.1.5. Relationship to Objectives**

Amendment of this section will eliminate provisions that are unnecessary for the establishment and administration of the buyer and seller relationship.

<sup>1</sup>Act of July 30, 1936, ch. 881, 49 Stat. 2036.

<sup>2</sup>Act of Aug. 25, 1958, Pub. L. No. 85-747, 72 Stat. 839.

<sup>3</sup>Telephone interview with the Naval Sea Systems Command (May 26, 1992).

#### 4.2.1.6 Proposed Statute

Each No contract for the construction, alteration, furnishing, or equipping of a naval vessel shall be is subject to the ~~act entitled "An act to provide conditions for the purchase of supplies and the making of contracts by the United States and for other purposes," approved June 30, 1936 (commonly referred to as the "Walsh-Healey Act") (41 U.S.C. §§ 35-45); the Davis-Bacon Act (40 U.S.C. §§ 276a et seq.) or the Service Contract Act (41 U.S.C. §§ 351-358), as amended; unless the President determines that such requirement is in the interests of national defense.~~

## **4.2.2. 18 U.S.C. § 4082**

### **Commitment to Attorney General**

#### **4.2.2.1. Summary of the Law**

This section established the Attorney General's power to designate the place and type of confinement for persons convicted of an offense against the United States. This section remains in effect for persons who are incarcerated prior to the effective date of the Sentencing Reform Act of 1987 and governs work release programs for such prisoners.

#### **4.2.2.2. Background of the Law**

Exec. Order No. 325A, originally issued by President Theodore Roosevelt in 1905, prohibited the use of convict labor in the performance of Federal contracts.<sup>1</sup> In 1936, this prohibition was codified in section 1(d) of the Walsh-Healey Public Contracts Act.<sup>2</sup> In 1973, however, President Nixon issued Exec. Order No. 11755, which permitted the use of both state and Federal prisoners in the performance of Federal contracts under specified conditions.<sup>3</sup> Exec. Order No. 11755 is referenced in 18 U.S.C. § 4082.

In 1979, the use of prison labor on Federal contracts was sanctioned by an amendment to the Walsh-Healey Act which allowed convict labor if the requirements of 18 U.S.C. § 1761(c) were met. These requirements outline what compensation must be paid in connection with prison work.

#### **4.2.2.3. Law in Practice**

The U.S. Code contains two sections which regulate prison labor in Federal facilities. In addition to the extant provisions, current law permits the purchase of goods from Federal prison industries as well as goods made by Federal and state prisoners (inside and outside of prison) under the circumstances described in 18 U.S.C. § 1761, which establishes the guidelines for the manufacture, transportation, and importation of prison goods.

#### **4.2.2.4. Recommendation and Justification**

##### **Retain**

The Panel does not propose to change the substance of current law on convict labor and prison industries. Therefore, it is necessary to retain this provision in order to continue the effect

<sup>1</sup>Executive Order 11755, 39 Fed. Reg. 779 (1973).

<sup>2</sup>Act of June 30, 1936, ch. 881, 49 Stat. 2036 (1936).

<sup>3</sup>See generally 39 Fed. Reg. 779 (1973).

of current law. The Panel has recommended an amendment replacing the Walsh-Healey Act which continues the prohibition on the use of convict labor on government contracts.<sup>4</sup>

#### **4.2.2.5 Relationship to Objectives**

Retention of this law will ensure the continuing financial and ethical integrity of defense procurement programs.

---

<sup>4</sup>See section 4.2.9 of this Report.

### **4.2.3. 19 U.S.C. § 2516**

#### **Labor surplus area studies**

##### **4.2.3.1. Summary of the Law**

This section required the President to prepare a report assessing the economic impact on employment of waiving the Buy American Act in the procurement of products produced in labor surplus areas.

##### **4.2.3.2. Background of the Law**

This section was added as part of Pub. L. No. 96-39 on July 26, 1979.<sup>1</sup>

##### **4.2.3.3. Law in Practice**

The report referred to in this section was part of an effort to encourage procurement from labor surplus areas.

##### **4.2.3.4. Recommendation and Justification**

###### **Delete**

This section should be deleted from Title 19 because the mandated report was a one time requirement and was submitted to Congress on July 1, 1981.

##### **4.2.3.5. Relationship to Objectives**

Deletion of this section will eliminate an unnecessary law and thereby streamline the body of defense related acquisition laws.

---

<sup>1</sup>Trade Agreements Act of 1979, Pub. L. No. 96-39, 93 Stat. 144.

#### **4.2.4. 22 U.S.C. § 2755**

### **Discrimination prohibited if based on race, religion, national origin or sex**

#### **4.2.4.1. Summary of the Law**

This is an omnibus statute, passed in 1976, that expressly prohibits the U.S. and its agencies from entering into commercial contracts with any country the laws or policies of which prevent any U.S. person, "from participating in the furnishing of defense articles or defense services under this chapter on the basis of race, religion, national origin or sex." As a practical matter this law prohibits any foreign country from demanding that members of minority groups be prohibited from working on defense articles destined for their country.

#### **4.2.4.2. Background of the Law**

This section was passed as part of Pub. L. No. 94-329 signed into law on June 30, 1976<sup>1</sup> and is implemented at FAR 252.225-7028 which reiterates the above policy. FAR 225.7308(b) directs that this policy statement be included in contracts with foreign governments.

#### **4.2.4.3. Law in Practice**

The policy of nondiscrimination embodied in this section is made part of the contractual agreements reached between the U.S. and foreign countries who are purchasing defense articles or services. It notifies those countries that all U.S. citizens, regardless of their race, religion, national origin, or sex may work in the manufacture of defense articles or services supplied to their country. During the Persian Gulf conflict, for example, these provisions were successfully followed despite the unique religious strictures adhered to by various U.S. allies in that region.

#### **4.2.4.4. Recommendation and Justification**

##### **Retain**

Retention of this statute will promote the U.S. policy of nondiscrimination based on race, religion, national origin, or sex. It also sends a clear signal to other nations that U.S. sales and commercial transactions will follow this principle.

#### **4.2.4.5. Relationship to Objectives**

Retention of this statute will promote the financial and ethical integrity of DOD and the overseas contracting process.

---

<sup>1</sup>International Security Assistance Act of 1976, Pub. L. No. 94-329, 90 Stat. 729.

#### **4.2.5. 29 U.S.C. § 793**

### **Employment under Federal contracts**

#### **4.2.5.1. Summary of the Law**

This statute states that any party contracting with the United States for property or services in excess of \$10,000 must take "affirmative action" to employ and advance handicapped individuals. This provision must be a part of each contract with the United States in excess of the above amount.

A handicapped individual who believes that a contractor has not complied with this statute may file a complaint with the Department of Labor and that department shall promptly take such action as the facts and circumstances warrant.

The Secretary of Labor may waive the requirements of this law, in whole or in part, if the facilities of the contractor or subcontractor "are found to be in all respects separate and distinct from activities of the prime contractor or subcontractor related to the performance of the contract or subcontract. . . ." Such a waiver must be requested by the contractor or subcontractor.

#### **4.2.5.2. Background of the Law**

This statute was passed as part of the Rehabilitation Act Amendments of 1986, Pub. L. No. 99-506, which was signed into law on October 21, 1986. The House bill, passed in lieu of the Senate bill, was approved by the House on October 2, 1986 after consideration by the House Committee on Education and Labor.

The Rehabilitation Act Amendment of 1992, Pub. L. No. 102-973, raised the contract threshold of 29 U.S.C. § 793 from the previous figure of \$2,500 to the current \$10,000.

Although this statute is cited in the text of the recently passed Americans with Disabilities Act (ADA), Pub. L. No. 101-336, there is no language in the ADA which is duplicative of the provisions of 29 U.S.C. § 793.<sup>1</sup>

#### **4.2.5.3. Law in Practice**

Responsibility for implementing the provisions of this statute has been delegated to the Director of the Office of Federal Contract Compliance Programs, Department of Labor (OFCCP). According to H.R. Rep. No. 99-571, "Equal employment opportunity and affirmative action requirements for contract compliance cover all aspects of employment, including recruitment, hiring, training, seniority, promotion, and fringe benefits."<sup>2</sup>

---

<sup>1</sup>Telephone interview with the Senate Subcommittee on Disability Policy (Dec. 2, 1992).

<sup>2</sup>H.R. Rep. No. 99-571, p. 3481.

FAR 52.222-36 specifically references 29 U.S.C. § 793 and contains the clause that must be inserted into Government contracts in excess of \$10,000. FAR 52.222-36 also directs the contractor to post notices stating the contractor's obligation to take affirmative action to employ and advance qualified handicapped individuals and to notify each labor union or representative of workers with which it has a collective bargaining agreement that it is bound by the provisions of 29 U.S.C. § 793.

According to the Senate Subcommittee on Disability Policy, the term "affirmative action" in 29 U.S.C. § 793 does not impose any quotas on employers or any continuing demonstration of compliance. Problems are handled on case-by-case basis when allegations of violations occur.<sup>3</sup>

#### **4.2.5.4. Recommendations and Justification**

**Amend to raise the threshold from \$10,000 to the simplified acquisition threshold (\$100,000) and create an exemption for commercial items.**

In its recommendations concerning the Simplified Acquisition Threshold, the Panel has recommended a uniform threshold of \$100,000 for the operation of socioeconomic requirements.<sup>4</sup> In its recommendations concerning the acquisition of commercial items, the Panel has recommended a number of statutory changes designed to facilitate DOD's access to the commercial marketplace.<sup>5</sup> The intent of the proposed amendment is to make this statute consistent with those recommendations.

#### **4.2.5.5. Relationship to Objectives**

Amending this statute to conform to the \$100,000 threshold for socioeconomic requirements would facilitate DOD's purchase of commercial products and services while also maintaining the substance of the important social policy of employing handicapped individuals.

#### **4.2.5.6. Proposed Statute**

##### **§ 793. Employment under Federal contracts**

**(a) Amount of contracts or subcontracts; provisions for employment and advancement of qualified individuals with handicaps; regulations**

**Any contract, except a contract for commercial items as defined in 10 U.S.C. 2302, in excess of the simplified acquisition threshold, entered into by any Federal department or agency for the procurement of personal property and nonpersonal services (including construction) for the United States shall contain a provision requiring that, in employing persons to carry out such contract, the party contracting with the United States shall take affirmative action to employ and**

<sup>3</sup>Telephone interview with the Senate Subcommittee on Disability Policy (Dec. 2, 1992).

<sup>4</sup>See section 4.1. of this Chapter.

<sup>5</sup>See Chapter 8 *infra*.

advance in employment qualified individuals with handicaps as defined in section 706(8) of this title. The provisions of this section shall apply to any subcontract other than a subcontract for commercial items as defined in 10 U.S.C. 2302 in excess of the simplified acquisition threshold, entered into by a prime contractor in carrying out any contract for the procurement of personal property and nonpersonal services (including construction) for the U.S. The President shall implement the provisions of this section by promulgating regulations within ninety days after September 26, 1973.

## **4.2.6. 38 U.S.C. § 4212**

### **Veterans' employment emphasis under Federal contracts**

#### **4.2.6.1. Summary of the Law**

Subsection (a) of this law states that in any contract of \$10,000 or more entered into by any department or agency for the procurement of personal property and nonpersonal services there shall be a provision requiring that the party contracting with the United States take affirmative action to employ and advance in employment special disabled veterans and VietNam era veterans.

The section also provides that veterans who believe that any contractor has failed to comply with this law may file a complaint with the Secretary of Labor. The Secretary shall also submit an annual report on the number of complaints filed, the actions taken, and the resolutions thereof.

Each contractor to whom subsection (a) applies must report annually on the number of employees who are disabled or VietNam era veterans.

#### **4.2.6.2. Background of the Law**

This law was enacted by Pub. L. No. 92-540<sup>1</sup> and subsequently amended six times. The most recent amendment in 1991 (Pub. L. No. 102-83) redesignated section 2012 of Title 38 as this section, 38 U.S.C. § 4212.<sup>2</sup>

#### **4.2.6.3. Law in Practice**

This law is essentially an affirmative action program to promote the hiring of VietNam era and disabled veterans. Each contractor to whom this section applies must list all of its suitable job openings with the local employment service office, and the employment office must give such veterans priority in referral to job openings.

#### **4.2.6.4. Recommendation and Justification**

##### **Amend**

According to the Office of Contract Policy and Administration for the Undersecretary of Defense for Acquisition, this law presents no practical problems for DOD because its enforcement responsibility falls on the Department of Labor. In the event a violation of this section is alleged in regard to a defense contract, DOD simply passes this information to the Department of Labor for investigation and disposition.

---

<sup>1</sup>VietNam Era Veterans' Readjustment Assistance Act of 1972, Pub. L. No. 92-540, 86 Stat. 1074.

<sup>2</sup>Department of Veterans' Affairs Codification Act of 1991, Pub. L. No. 102-83, 105 Stat. 378.

Although this law is scheduled to expire in 1994, the Panel recommends that this section be amended to conform with its proposals concerning the simplified acquisition threshold of \$100,000 and the commercial items exemption. This amendment would make this statute consistent with the recommended threshold for other socioeconomic statutes affecting DOD procurement.

#### **4.2.6.5. Relationship to Objectives**

Amending this statute will promote the Panel's objectives of consistency and simplification of procurement laws while establishing a balance between an efficient procurement process and socioeconomic policies.

#### **4.2.6.6. Proposed Statute**

##### **§ 4212. Veterans' employment emphasis under Federal contracts**

(a) ~~Any contract, except a contract for commercial items as defined in 10 U.S.C. 2302, whose value is more than the simplified acquisition threshold in the amount of \$10,000 or more entered into by any department or agency for the procurement of personal property and non-personal services (including construction) for the United States, shall contain a provision requiring that the party contracting with the United States shall take affirmative action to employ and advance in employment qualified special disabled veterans and veterans of the Vietnam era. The provisions of this section shall apply to any subcontract entered into by a prime contractor in carrying out any contract for the procurement of personal property and non-personal services (including construction) for the United States. In addition to requiring affirmative action to employ such veterans under such contracts and subcontracts and in order to promote the implementation of such requirement, the President shall implement the provisions of this section by promulgating regulations which shall require that (1) each such contractor undertake in such contract to list immediately with the appropriate local employment service office all of its suitable employment openings, and (2) each such local office shall give such veterans priority in referral to such employment openings.~~

## 4.2.7. 40 U.S.C. §§ 270a et seq

### The Miller Act

#### 4.2.7.1. Summary of the Law

The Miller Act protects the Federal Government and designated persons furnishing material and labor on Federal construction projects exceeding \$25,000 by requiring the prime contractor to post a performance bond in favor of the United States and a payment bond in favor of those in privity of contract with the prime or with a subcontractor.<sup>1</sup>

#### 4.2.7.2. Background of the Law

A traditional remedy given to those who furnish labor and materials on construction projects is a lien on the project until such time as they are paid in full. If payment is not made, persons owed money on the project could foreclose on their "mechanics liens," with the result that the project would be sold and the proceeds used to make payment. However, laborers and material men could not perfect liens against Federal property to secure payments due on particular projects.<sup>2</sup> As a result, the sole protection afforded these subcontractors might arise from contractual provisions under which the contracting officer could withhold final payment on the contract until the prime contractor paid its debts.

To ameliorate the plight of persons providing labor and materials on Federal projects, but who had not been paid,<sup>3</sup> Congress passed the Heard Act of 1894.<sup>4</sup> This law required contractors to execute a single bond that would assure both performance of the contract and payment of parties who supplied material or labor on Federal projects. Insofar as the bond protected the United States, it was apparently viewed as a traditional method of doing business on construction projects. However, the bond was unusual in providing for the payment of labor and materials. In this respect, the bond was intended by Congress to be a substitute for state law mechanics lien rights.<sup>5</sup> A party which furnished labor or material on a Federal project could now sue on the prime contractor's bond in the name of the United States if the contractor did not pay "promptly."

As amended in 1905,<sup>6</sup> however, the Heard Act provided that the Government's right to sue on the bond was superior to the rights of material men and laborers. If the Government decided to sue, it had the right to satisfy its claims up to the full amount of the bond. Thus, while unpaid suppliers could intervene, their claims took second place to those of the Government and

---

<sup>1</sup>The protections of the Act do not extend to persons contracting with subcontractors at or below the second tier. *J.W. Bateson Co. v. United States ex rel. Board of Trustees*, 434 U.S. 586 (1978).

<sup>2</sup>*United States ex rel. Hill v. American Surety Co.*, 200 U.S. 197, 203 (1906).

<sup>3</sup>"[I]n many cases person or persons entering into contracts with the United States for the building of public buildings are wholly insolvent at the time or at the completion of such work, and thereby persons furnishing material or labor are without remedy." H.R. Rep. No. 97, 53d Cong., 1st Sess. 1 (1893).

<sup>4</sup>28 Stat. 278, ch. 280 (1894).

<sup>5</sup>See, e.g., *J.W. Bateson, supra*, at 203.

<sup>6</sup>33 Stat. 811, ch. 778 (1905) (repealed 1935).

might well not be satisfied. In addition, if the Government did not sue, the Act required workers to wait until six months after final contract settlement to file actions.<sup>7</sup>

In 1935, the Miller Act<sup>8</sup> repealed the Heard Act. The new law was a response to subcontractor complaints that the Heard Act was cumbersome and that it unduly delayed the collection of money otherwise due.<sup>9</sup> The Miller Act required a prime contractor to post two bonds: a performance bond for the protection of the Government<sup>10</sup> and a payment bond for the protection of laborers and subcontractors. The payment bond was intended to "assure payments as required by law to all persons supplying labor or material in the prosecution of the work provided for in the contract."<sup>11</sup> The amount of the payment bond depends on the price of the awarded contract.<sup>12</sup>

The use of separate bonds under the Miller Act prevents the subordination of subcontractors' claims to Government claims when a contractor fails to perform fully. Additionally, under the Miller Act, unpaid subcontractors (and those in privity with subcontractors) may file suit 90 days after providing the final labor or material on the project, instead of waiting until the contractor has completed the project.<sup>13</sup>

#### 4.2.7.3. The Law in Practice

The provisions of the Miller Act relating to performance bonds appear to be effective, reasonably well understood, and infrequently litigated. On the other hand, there has been substantial litigation over the scope of the persons protected by the payment bond. Although the Act required the payment bond to cover those furnishing materials or labor on Federal construction projects, the Supreme Court has on several occasions held that the actual coverage of the payment bond is less broad than coverage language would suggest.

---

<sup>7</sup>*Id.* at 812.

<sup>8</sup>49 Stat. 793-94, ch. 642 (1935), *codified as amended*, at 40 U.S.C. §§ 270a-f (1988).

<sup>9</sup>H.R. Rep. No. 1263, 74th Cong., 1st Sess., 1 (1935). A letter from the Treasury Department incorporated in this report indicated that in many instances several years elapsed after the completion of work before suppliers were able to file suit. *Id.* at 1-2.

<sup>10</sup>This bond assures "performance and fulfillment of the contractor's obligations under the contract." (FAR 28.001(f)) A performance bond generally will be 100% of the contract price unless the contracting officer determines a lesser amount will protect the interest of the government. (FAR 28.102-2(a)(1))

<sup>11</sup>FAR 28.001(e). The Supreme Court has held that the Miller Act extends only to first-tier subcontractors and parties in privity of contract with such a subcontractor. *J. W. Bateson Co., supra*, 434 U.S. at 594. For a party to be a Miller Act "subcontractor," the party must have a contract with the prime contractor and must perform a specific portion of the labor or material requirement for the prime contractor. *See, e.g., Clifford F. MacEvoy v. United States ex rel. Calvin Tompkins Co.*, 332 U.S. 102, 109 (1944).

<sup>12</sup>For contracts \$1 million or less, the bond must be 50% of the contract price. If the contract price is greater than \$1 million but no more than \$5 million, the law requires a bond for 40% of the contract price. For all contracts over \$5 million, the offeror must furnish a \$2.5 million bond. (40 U.S.C. § 270a(a)(2) (1982); *see also* FAR 28.102-2(b)(1))

<sup>13</sup>40 U.S.C. § 270b(a) (1982). Claimants must file suit in federal court in the district in which they performed the contract. A material man or laborer must initiate an action within one year of its providing the last supply or service for the project. *Id.* at § 270b(b).

The last significant case construing the scope of coverage of the payment bond is *J.W. Bateson Co. v. United States ex rel. Board of Trustees*, 434 U.S. 586 (1978). In that case the Court held that the payment bond ran in favor of persons and companies having a direct contract with the prime contractor and to those having a direct contract with a "subcontractor." The concept of a "subcontractor" is not defined in the Act itself, but, the Court held, is to be construed in the custom of the construction trades as one to whom the prime contractor has delegated a specific portion of the work to be performed by the prime, as opposed to mere suppliers or material men. Two Justices dissented in *Bateson*, arguing that persons at any level who furnished material or labor on the project should be covered by the payment bond.

The only controversial aspect of the Miller Act appears to be its threshold. In July, 1992, the Administrator for Federal Procurement Policy proposed an amendment to the Miller Act raising its threshold from \$25,000 to \$100,000 and offering the following rationale:

It will result in increased competition for Government contracts and, therefore, lower prices by facilitating access to newly emerging or small disadvantaged companies that may have difficulties obtaining bonds. It will also improve the efficiency of Federal construction contracting . . . by reducing the paperwork burden and costs incurred by both the Government and business firms.<sup>14</sup>

Although the Congress did not act on this proposal, it remains a contentious issue. The Panel received written comments opposing elevation of the Miller Act threshold to the simplified acquisition threshold (discussed above in Chapter 4.1.) from the National Association of Surety Bond Producers,<sup>15</sup> the American Surety Association,<sup>16</sup> the American Insurance Association,<sup>17</sup> the Associated General Contractors of America,<sup>18</sup> and twelve insurance or underwriting firms.

In general, the points made by these correspondents were as follows:

- Because the Miller Act permits the transfer of risk from the Government to surety companies, increasing its threshold means a concomitant increase in the risk borne by the Government.
- The increased risk to the Government would force Federal contracting officers to become increasingly burdened with the pre-qualification of contractors performing under the threshold -- a service now performed by surety companies.

---

<sup>14</sup>Letter, Administrator of the Office of Federal Procurement Policy to the Hon. Dan Quayle, President of the Senate, dated July 20, 1992.

<sup>15</sup>Letter from J. Martin Huber, National Association of Surety Bond Producers dated Dec. 11, 1992.

<sup>16</sup>Letter from Meg Nagle, American Surety Association dated Dec. 14, 1992.

<sup>17</sup>Letter from Lynn M. Schubert, American Insurance Association, dated Dec. 14, 1992.

<sup>18</sup>Letter from John R. Gentile, Associated General Contractors of America, dated Dec. 11, 1992.

- Because Federal contracts are not subject to lien laws, subcontractors and suppliers would be left without payment protection in the event of default. They would therefore be less likely to bid on DOD contracts or, if they did, would demand increased financial protection.

A government agency which made similar arguments was the Naval Facilities Engineering Command (NAVFAC), which stated that contracts between \$25,000 and \$100,000 are primarily awarded for maintenance, repair, and remodeling. These contracts usually go to smaller contractors which, as a group, tend to be less financially stable than larger contractors. As defense budgets are reduced, NAVFAC pointed out, the number of contracting officers will also be reduced, with the result that the monitoring of smaller contracts will become more difficult.<sup>19</sup>

#### 4.2.7.4. Recommendation and Justification

**Amend to raise the threshold of the Miller Act from its current level of \$25,000 to the level specified for the simplified acquisition threshold.**

This amendment raises the Miller Act to the simplified acquisition threshold (currently set at \$100,000) proposed by the Panel.<sup>20</sup>

Although it carefully considered the objections outlined above, the Panel believed that the additional risk to the Government in the \$25,000 to \$100,000 range was less than the value of establishing a uniform acquisition threshold for DOD. The \$100,000 threshold is the cornerstone of the Panel's effort to establish uniformity and simplicity in the DOD procurement process, in order to reduce overhead for both the Government and its suppliers. While the Panel agrees with NAVFAC that currently programmed personnel reductions will reduce DOD's ability to monitor small contracts using current practices, this is precisely the rationale for the streamlined procedures discussed above in Chapter 4.1. The Panel also determined that the issues surrounding its recommendation on the Miller Act did not warrant an exception. There are, for example, currently three states (Florida, Virginia, and Alaska) which have already established a \$100,000 threshold, while four others (Arizona, Colorado, Maine, and Michigan) have a \$50,000 threshold.<sup>21</sup> Those precedents, as well as the impact of inflation since the establishment of the Miller Act threshold in 1978, also suggest that the \$25,000 level in defense construction contracting has become an anomaly.

While the problem of defaults and attendant risk to the Government is an important issue, the Panel notes the statement by the Administrator for Federal Procurement Policy who, in introducing the threshold adjustment noted above, also pointed out that only nine defaults had

<sup>21</sup>Table, "Contract Size Under Which Contract Surety Bonds Are Excluded," National Association of Surety Bond Producers.

occurred in the 8,000 Federal construction contracts awarded during FY91.<sup>22</sup> Additional protections against defaults are also built into current procedures under which progress payments on construction contracts require certifications that all subcontractors and materialmen have been paid or will be paid in accordance with subcontract agreements.<sup>23</sup> Government contracting officers are also expected to help reduce the risk of default by performing their own responsibility determinations, considering the past performance of a firm in making contract awards. The Small Business Administration (SBA) also has been provided authority to exempt a limited number of participants under the 8(a) program from Miller Act requirements.<sup>24</sup> A March, 1992, study provided to the General Accounting Office by the SBA, indicated that no DOD construction projects conducted under this program had defaulted.<sup>25</sup> This record is attributed to the careful review of potential participants in the waiver program by the SBA and the limited number of waivers that have been granted.

Although the SBA fully supported the Administration's 1992 initiative to raise the Miller Act threshold to \$100,000, Administrator Patricia Saiki initially noted some of the same concerns expressed to this Panel. In order to address those issues, she suggested a two-step process, beginning with an elevation of the threshold to make it consistent with inflation since 1978.

Once this is done, however, we would recommend that a study be conducted to ascertain whether the concerns I have raised are justified before a further increase to \$100,000 is adopted. The study I am suggesting could determine what protection has been afforded requiring surety bonds on the contracts in question and whether the benefit of such protection outweighs the costs to the government. The study could also take advantage of the experience gained as a result of increasing the threshold by the rate of inflation to obtain hard data on which to base a determination of the appropriate level for the threshold.<sup>26</sup>

While the Panel believes the evidence supports a \$100,000 threshold for the Miller Act, it concurs with the thought that Congress may well wish to approach that goal through the intermediate step of either a test program or a study designed to monitor the application of the streamlined acquisition procedures recommended here.

<sup>24</sup>15 U.S.C. § 636 (13)(D).

<sup>25</sup>Letter from William Fisher, Small Business Administration to James Charlifue, General Accounting Office dated March 2, 1992, subject: Miller Act Exemptions

<sup>26</sup>Letter from Patricia Saiki, Administrator, Small Business Administration to Hon. Richard G. Darman, Director, Office of Management & Budget, dated April 30, 1992. Although the SBA initially advocated this two-step process, their final position reflected support for the Bush Administration initiative (note 14, *supra*) which advocated the \$100,000 threshold.

#### **4.2.7.5. Relationship to Objectives**

Amendment of this statute is consistent with the Panel's objectives concerning the need to balance the requirements between an efficient process with full and open access to the procurement system.

#### **4.2.7.6. Proposed Statute**

Add a new section 40 U.S.C. § 270g to the Miller Act as follows:

270g. Sections 270a through 270f of this title shall not apply to contracts with a value less than the simplified acquisition threshold.

4.2.8. 40 U.S.C. § 276a *et seq.*

**Davis-Bacon Act**

4.2.8.1. Summary of the Law

The Davis-Bacon Act<sup>1</sup> was enacted in 1931 to protect the wages of local construction workers. It covers each contract in excess of \$2,000 for the construction, alteration, or repair of a public building or other public works to which the United States is a party or in which the U.S. shares financing. The law requires that the wages (including fringe benefits) to be paid to various classes of laborers or mechanics engaged in such contracts are those determined by the Secretary of Labor to be prevailing on projects of a similar character in the area where the work is to be performed.

4.2.8.2. Background of the Law

The Davis-Bacon Act was passed at the height of the Great Depression in response to congressional concerns that local labor would be unable to compete with less costly labor brought in by unscrupulous contractors anxious to undercut local firms in the competitive bidding process for federal contracts. Because those contracts represented a high proportion of the limited job opportunities then available for construction workers, Congress acted to set a wage floor based on local standards for similar work.<sup>2</sup> In its original form, the Act provided that, for contracts over \$5,000 for the construction, repair, or alteration of any Federal building, the Secretary of Labor was to require each contractor to pay not less than the "prevailing wage" to the "corresponding classes of laborers or mechanics" employed on similar projects in the city, town, village, or other civil subdivision of the state in which the buildings were located.<sup>3</sup> Although the Secretary's determinations were conclusive, the Act provided him with no authority either to determine those wages or to enforce them, and contractors readily circumvented the law's intent.<sup>4</sup>

In response to these concerns, Congress passed amendments to the Davis-Bacon Act in 1935 which had dramatic effects. First, the Secretary of Labor was authorized to determine prevailing wages in advance of bid solicitation and to require that those determinations be publicly posted. That measure was specifically intended to provide contractors with a known wage standard for use in the competitive bidding process. Second, the Act was extended to cover painting and redecoration, two notable oversights from the original statute. Third, the contract threshold was lowered to \$2,000. Fourth, the scope of the Act was extended to cover such Federal construction projects as highways and dams. Fifth, contractors were required to pay workers weekly and in full. Sixth, enforcement provisions, such as set-asides, contract

<sup>1</sup>40 U.S.C. § 276a *et seq.* (1988).

<sup>2</sup>74 Cong. Rec. 6510 (Feb. 28, 1931).

<sup>3</sup>Act of March 3, 1931, ch. 411, 46 Stat. 1494 (1931).

<sup>4</sup>A.J. THIEBLOT, JR., PREVAILING WAGE LEGISLATION: THE DAVIS-BACON ACT, STATE "LITTLE DAVIS-BACON ACTS," THE WALSH-HEALEY ACT, AND THE SERVICE CONTRACT ACT, NO. 27 LABOR RELATIONS AND PUBLIC POLICY SERIES 31-33 (U. Pa. 1985).

terminations, blacklisting, and right to recovery actions by employees were added. Finally, the President was given the authority to suspend the Act in the event of a national emergency.<sup>5</sup>

In 1934, Congress also enacted a law which is closely related to Davis-Bacon, the Copeland Anti-Kickback and False Statements Acts, which regulates payroll deductions on Federal or federally assisted construction. This law prohibits anyone, under penalty of fine or imprisonment, from inducing an employee to "give up any part of the compensation to which he is entitled under his contract of employment." It further authorizes the Secretary of Labor to make "reasonable regulations" to further the purposes of the Act, a grant of authority which the Department of Labor uses to require all contractors on Federal construction projects to submit and certify weekly payroll reports detailing daily hours, wage rates, total earnings, and any deductions.<sup>6</sup>

Although the Davis-Bacon Act was further amended on four occasions, the Act itself has remained virtually unchanged since 1935 except for gradual expansions in its coverage. The most recent amendments in 1964, for example, defined wages to include fringe benefits, such as medical, life, and accident insurance as well as pension, unemployment, and retirement benefits.<sup>7</sup> While the socioeconomic factors which existed at the time of the Act's passage have receded into history, its longevity in the face of periodic attempts at repeal or reform has made it into a virtual landmark. A 1979 General Accounting Office study -- which strongly urged that Davis-Bacon be repealed -- found that no fewer than 77 laws were linked to the Act, bringing a large number of otherwise unrelated programs under its purview.<sup>8</sup>

#### 4.2.8.3. Law in Practice

The Davis-Bacon Act applies to virtually all DOD contracts for construction, repair, redecoration, or renovation through FAR 22.407(a). That section requires the insertion of a clause in all solicitations and contracts in excess of \$2,000 for construction within the United States which defines the wage, classification, workplace practice, and reporting requirements under the Davis-Bacon and Copeland Acts.<sup>9</sup>

The effect of the Davis-Bacon Act on Federal construction has been a recurring public policy issue as well as the subject of an impressive number of Government and private studies. While these studies have often generated heated debates that are seldom detached from constituency interests and institutional agendas, there are four areas relevant to this study where there is some degree of consensus. First, application of the Act to Federal construction projects clearly adds to their cost. Second, effective administration of the Act is difficult, if not impossible. Third, reporting and record keeping requirements under the Act are onerous. Fourth, application

<sup>9</sup>See FAR 52.222-6, 52.222-8.

of the Davis-Bacon Act may also serve as an impediment to small and minority business participation in Federal construction contracting.<sup>10</sup>

These studies and the strong convictions they generated were largely consistent with the range of opinions received by the Panel in response to its request for public comment. On one end of the spectrum there were recommendations for outright repeal of the Davis-Bacon Act from a number of executive branch agencies, including the Defense Logistics Agency<sup>11</sup> and the Air Force Materiel Command.<sup>12</sup> Other groups, such as the Coalition to Reform the Davis-Bacon Act,<sup>13</sup> the Associated Builders & Contractors,<sup>14</sup> and the American Society of Civil Engineers<sup>15</sup> generally supported repeal but also recommended elevating the threshold to levels ranging from \$500,000 to as much as \$1,000,000. At the other end of the spectrum, however, the Department of Labor strongly opposed any approach to Davis-Bacon Act reform that was not uniformly applicable to all government agencies. Additionally it stated, "Changes in the application of labor standards . . . must be based on the Administration's overall assessment of the desirability and need for such changes. In this regard, the Administration plans to submit a legislative proposal to Congress shortly to raise the Davis-Bacon Act (DBA) dollar threshold and to prohibit artificially splitting projects for the purpose of avoiding DBA coverage."<sup>16</sup>

In answer to its repeated requests for public comments, the Panel received a number of responses which described local problems caused by compliance with Davis-Bacon and other labor levels. The contracting director at Fort Campbell, Kentucky, supported outright repeal of the Davis-Bacon, Walsh-Healey, and Service Contract Acts, and added:

. . . our experience causes us to question Davis-Bacon wage surveys. Fort Campbell straddles the Tennessee-Kentucky line and a contractor must pay one rate to a worker on the Tennessee side, while 50 feet away across the Kentucky line, he must pay this same worker a much higher rate . . . Contractors argue that Davis-Bacon permits equal competition, and yet, most non-local contractors hire workers in the local community, and therefore local wages prevail for all contractors. Local contractors will always have one

competitive advantage as their mobilization costs are lower. Elimination of these laws would allow us to focus on the quality of work rather than also having to focus so diligently on administrative compliance with the legislation. If we insist on quality workmanship, contractors will have to hire skilled workers and will have to pay accordingly.<sup>17</sup>

#### 4.2.8.4. Recommendations and Justification

##### I

#### Increase Coverage Threshold to the Simplified Acquisition Threshold (\$100,000).

The current threshold of \$2,000 was placed in the statute in 1935 and has not been subsequently modified. The concurrent expansion of the Act's coverage, the continued use of a 1935 dollar threshold with no relevance in 1992, and the Act's subsequent expansion to additional areas of Government through related laws have all resulted in its application to virtually all DOD construction contracts. Raising the threshold would have the effect of eliminating Davis-Bacon coverage of a large number of small contracts, while preserving the Act's applicability to a majority of DOD construction dollars.<sup>18</sup> While the Administration supports raising the threshold to \$250,000,<sup>19</sup> the Panel believes that adopting the simplified acquisition threshold (\$100,000) would streamline and simplify the procurement process for a large number of small contracts as well as facilitate government contracting in the construction area. Equally important, the \$100,000 level for Davis-Bacon would be consistent with the simplified acquisition threshold being recommended as a general procurement practice by the Panel. Such an exemption might also allow the Department of Labor to conduct an increased number of site surveys, rather than relying on more general area surveys, so that wage scales could be more accurately based on local wage data and conform more closely to the original intent of the Act. Finally, by exempting small contracts from the Act's burdensome regulatory requirements, two major obstacles to small and minority business participation in federal construction would be removed: mandated use of wage scales (which do not always conform to local wage scales) and weekly reporting requirements.

<sup>17</sup>Letter from Leslie H. Carroll, Director of Contracting, Fort Campbell, Kentucky (June 12, 1992)

<sup>18</sup>According to data supplied by the Federal Procurement Data Center on prime construction contracts above the small purchase threshold (\$25,000), the proposed \$100,000 threshold would have exempted from coverage 52.5% of the Davis-Bacon covered contracts awarded in FY91. However, the threshold would only have exempted 7% of Federal prime construction contract spending in FY91. Figures for other thresholds that have been suggested are:

Threshold	% Contracts Excluded	% Spending Excluded
\$250,000	72%	14.3%
\$1,000,000	93%	62.7%

<sup>19</sup>See Statement of the Hon. Colin McMillan, Assistant Secretary of Defense for Production and Logistics, submitted to the Labor Standards Subcommittee of the House Education and Labor Committee on June 16, 1992, for its Hearing on H.R. 1987.

The Panel received strong support for this recommendation from the Aerospace Industries Association;<sup>20</sup> the Defense Logistics Agency (Directorate of Contracting and the Defense Construction Supply Center);<sup>21</sup> the Office of the Assistant Secretary of the Navy for Research, Development, and Acquisition;<sup>22</sup> and the Assistant Secretary of the Air Force for Acquisition.<sup>23</sup>

## II

### Modify Weekly Reporting Requirements.

Reporting requirements mandated on Davis-Bacon projects, as noted above, are onerous. They drive up the cost of Federal construction by requiring contractors to submit volumes of information on a weekly basis, a requirement which is of marginal utility to either the Federal Government or the employees it is presumably intended to benefit. The Panel believes that an appropriate reporting mechanism should permit contractors to submit certified payroll data at the beginning, midpoint, and end of the period covered by a construction contract or subcontract, but at least quarterly for those being executed over longer terms. In addition to this requirement, employers should ensure that all employees are continuously apprised of the correct rates of pay, including benefits and applicable deductions, and of avenues for recourse if pay is incorrect. Finally, the contractor should be required to submit the final certified payroll at least 60 days prior to seeking final payment on a contract in order to give all employees an opportunity to make claims before final payout and release of bonds.

## III

### Issue Comprehensive Davis-Bacon Wage Schedules Annually Per Locality.

As a result of the heavy burden placed upon the Department of Labor in the administration of the Davis-Bacon Act, particularly in the area of wage surveys and determinations, the Panel believes that issuing a single comprehensive annual wage scale covering all labor classifications in a given locality would stabilize wages on ongoing contracts awarded during the relevant year. Today, it is possible for a contractor to have wage scales for different classes of labor being adjusted at different times during the year, with a concomitant increase in record keeping and administration. Issuing a wage scale for each site covering all trades at a single time each year would also reduce bid preparation costs and expedite contract awards.<sup>24</sup> Finally, an annual

<sup>20</sup>Letter from Aerospace Industries Association (July 27, 1992).

<sup>21</sup>Letter from Defense Contract Management Command, Defense Logistics Agency, p. 13 (July 30, 1992).

<sup>22</sup>Memorandum from the Office of the Assistant Secretary of the Navy for Research, Development, and Acquisition (July 26, 1992).

<sup>23</sup>Letter, from Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force for Acquisition. This letter also reflected the view of Air Force contracting authorities who pointed to significant problems with Department of Labor regulations implementing Davis-Bacon (July 10, 1992).

<sup>24</sup>This point was specifically addressed in a letter (dated July 27, 1992) submitted to the Panel by the Aerospace Industries Association (AIA). While supporting the elevation of the Davis-Bacon threshold, AIA also noted the difficulties associated with differing wage rates for the same type of work. "There is a time lag from issuance of the wage determination to the time the prime contract is updated. In the meantime, subcontracts must be issued to keep

determination would greatly reduce the potential for bid amendments required to cover changing Davis-Bacon wage rates. Annual issuance of a Comprehensive Wage Schedule would not require statutory changes, but would require changes in Department of Labor regulations.

#### **4.2.8.5. Relationship to Objectives**

Repeated attempts to repeal or reform the Davis-Bacon Act have been unsuccessful. The changes recommended here will give little comfort to either side of what has become an almost theological debate; indeed, commentators from all sides have found fault with the position espoused here since it gives neither management nor labor a total and unequivocal victory.

However, as defense budgets are sharply cut back, more attention must be paid to pragmatic concerns: DOD simply will not have enough money to permit funds to be squandered on unnecessary weekly reports and on cumbersome wage-setting procedures which cause administrative waste on all sides. Something must give somewhere. It is the Panel's strong recommendation that Congress create a simplified acquisition threshold, initially set at \$100,000, under which contracts and contracting procedures can be unified and streamlined. As shown by the figures on the Davis-Bacon Act (see note 11, below), the simplified threshold will greatly reduce the costs of administering and performing small contracts while exempting from social programs a very small percentage of otherwise covered spending.

The amendments proposed here will greatly facilitate DOD acquisition process in the areas of military construction and family housing, while enhancing opportunities for small and minority business participation in federal construction. Cost savings should also be realized through the combined effects of exempting small contracts from Davis-Bacon coverage, decreasing administrative reporting burdens, and reducing the uncertainty of wage rate determinations. All of these things are consistent with two of the principal goals of the Panel: streamlining the acquisition process and protecting the best interests of DOD.

The proposed changes to the Davis-Bacon Act would establish a balance between an efficient procurement process and socioeconomic policies.

#### **4.2.8.6. Proposed Statute**

276a(a). The advertised specifications for every contract in excess of the simplified acquisition threshold \$2000 to which the United States or the District of Columbia is a party . . . .

276c The Secretary of Labor shall make reasonable regulations for contractors and subcontractors engaged in the construction, prosecution, completion or repair of public buildings, public works or buildings or works financed in whole or in part by loans or grants from the United States, including a provision that each contractor and subcontractor shall furnish weekly at the beginning, midpoint and end of the period covered by the contract or subcontract, but not less

---

the work going, and the subcontracts must comply with the rates cited in the prime contract" (p.7). The Panel believes that an annual wage rate determination would help to alleviate this problem.

frequently than every calendar quarter, a statement with respect to the wages paid each employee during the preceding week corresponding reporting period.

4.2.9. 41 U.S.C. §§ 35 - 45

**Walsh-Healey Public Contracts Act**

4.2.9.1. Summary of the Law

The Walsh-Healey Act applies to contracts entered into by "any executive department, independent establishment or other agency or instrumentality of the United States (or the District of Columbia) for the manufacture or furnishing of materials, supplies, articles, and equipment in excess of \$10,000."<sup>1</sup> Specifically, the Walsh-Healey Act requires contractors providing those items to:

- represent that they are a manufacturer or a regular dealer in the materials, supplies, articles, or equipment described above;<sup>2</sup>
- agree that all employers working under the contract be paid at least the minimum wage as determined by the Secretary of Labor;<sup>3</sup>
- agree that no employee shall work in excess of 40 hours a week unless paid at time and one-half in compliance with the Fair Labor Standards Act;<sup>4</sup>
- agree not to use convict labor or persons under the age of 18;<sup>5</sup> and
- agree that no part of such contract will be performed in work places that are unsanitary, hazardous, or dangerous.<sup>6</sup>

The scope of Walsh-Healey is also limited in various ways.<sup>7</sup> For example, it does not apply to Government purchases of perishables, agricultural, or farm products. Also exempted is carriage of freight or personnel by common carriers or where published tariff rates exist.

The Walsh-Healey Act further states that it does not apply to "purchases of such materials, supplies, articles, or equipment as may usually be bought in the open market."<sup>8</sup> However, the Secretary of Labor has placed narrow interpretation on the open market exemption. In 1963, the Secretary issued a determination that it would apply only "where the public exigency requires

<sup>8</sup>*Id.* at § 43.

immediate delivery of the goods" or if the purchase authorization contains the "express language" of the statute to buy "in the open market."<sup>9</sup>

Walsh-Healey's penalty clauses provide for both liquidated damages and cancellation of contracts. In addition to being liable to employees for wage underpayments, the violator is also liable in the amount of \$10 a day for each convict or underage person knowingly employed.<sup>10</sup> Violators may also be debarred from receiving Government contracts for a period of three years.<sup>11</sup>

#### 4.2.9.2. Background of the Law

The Walsh-Healey Act was part of a package of New Deal legislation enacted in response to the Great Depression and the unprecedented economic dislocation that existed in the 1930s. Walsh-Healey was introduced in the Senate by David I. Walsh (D-Mass.) and in the House by Arthur D. Healey (D-Mass.) in mid-1935 and was signed into law by President Roosevelt on June 30, 1936.<sup>12</sup> The Act sought to provide worker protection that had not previously existed in order to alleviate two major problems faced by workers during the depression: (1) the number of hours worked per week, and (2) minimum wages. However, as shown below, the protections provided by Walsh-Healey have been superseded by subsequent legislation and congressional action.

- **Work hours limitations:** With unemployment at record levels it was vitally important to set a ceiling on the number of hours employees could work. Preventing employees from working long hours would thereby increase employment opportunities for the unemployed, a crucial consideration at a time when the unemployment rate hovered around 20%. Walsh-Healey imposed such a limitation: a 40 hour work week and an 8 hour work day for Federal workers covered under the Act.<sup>13</sup>

However, the passage of the Fair Labor Standards Act of 1938<sup>14</sup> permitted overtime beyond 40 hours a week if time and one-half was paid. Walsh-Healey was amended in 1942 to adopt this provision, so that a major component of the original Act was very short lived. Action in the 99th Congress went still further. Pub. L. No: 99-145, the National Defense Authorization Act for Fiscal Year 1986, repealed the eight hour workday limitation of Walsh-Healey and established a standard 40 hour work week, with overtime pay in excess of that amount. This had the effect of

<sup>9</sup>U.S. Dep. of Labor, 2 Walsh-Healey Public Contracts Act, Rulings and Interpretations, 13 (1939); U.S. Dep. of Labor, 3 Walsh-Healey Public Contracts Act, Rulings and Interpretations, 3-7 (1963).

<sup>13</sup>*Id.* at 1.

<sup>14</sup>*Id.* at 3.

replacing the Walsh-Healey work hours limitations with the simple 40 hour work week of the Fair Labor Standards Act, making the work hours provisions of Walsh-Healey irrelevant.

- **Minimum wages:** Minimum wages were also a crucial consideration at the time Walsh-Healey was signed into law. Prior to this Act, only the Davis-Bacon Act and the National Industrial Recovery Act, later declared unconstitutional, had established minimum wage standards.<sup>15</sup>

Walsh-Healey established prevailing minimum wages "for persons employed on a similar work or in the particular or similar industries or groups of industries."<sup>16</sup> The act directs the Secretary of Labor to determine the prevailing minimum wage based on "the locality in which the materials, supplies, articles, or equipment are to be manufactured or furnished."

However, between 1937 and 1963 only 61 prevailing rate decisions were made, and in 1963, the Department of Labor (DOL) ceased issuing Walsh-Healey wage determinations altogether.<sup>17</sup> This cessation resulted from a court case holding that raw wage data collected by the DOL had to be released to the public if requested.<sup>18</sup> The Secretary of Labor refused to release information that had been provided confidentially, and the court therefore struck down the DOL wage determinations. Since that time the only minimum wage protection afforded supply contractor employees has been provided by the Fair Labor Standards Act which established a national minimum wage.

- **Child Labor:** The Walsh-Healey Act also prohibited the United States from purchasing goods made with child labor.<sup>19</sup> This prohibition, like the work hours provisions, was also largely superseded by the Fair Labor Standards Act, which contains its own prohibition of "oppressive child labor" in any facility that ships goods in interstate commerce.<sup>20</sup>

---

<sup>15</sup>*Id.* at 5-6.

<sup>17</sup>*Id.* at 226.

<sup>18</sup>*Wirtz v. Baldor Electric*, 337 F.2d 518 (D.C. Cir. 1964).

<sup>19</sup>41 U.S.C. § 35(d) prohibits labor by any male under age of 16 and of any "female person" under the age of 18.

<sup>20</sup>*See* 29 U.S.C. § 212. This section prohibits the shipment in commerce of goods made with "oppressive child labor" defined as labor provided by anyone under the age of 16. In addition, the Secretary of Labor is given authority to regulate labor by workers 16 to 18 and to provide by regulation exemptions permitted persons 14 to 16 to work in other than manufacturing and mining.

- **Convict Labor:** The convict labor provisions of Walsh-Healey have also become largely irrelevant over time. Prohibitions against the use of convict labor have a long history in Federal procurement. Exec. Order No. 325A, issued by President Theodore Roosevelt in 1905, prohibited the use of convict labor in the performance of Federal contracts.<sup>21</sup> In 1936, this prohibition was codified in section 1(d) of the Walsh-Healey Act. In 1973, however, President Nixon issued Exec. Order No. 11755,<sup>22</sup> which permitted the use of both state and Federal prisoners in the performance of Federal contracts under specified conditions.<sup>23</sup> In 1979, the use of prison labor on Federal contracts was sanctioned by an amendment to the Walsh-Healey Act<sup>24</sup> that resulted in the following language:

[41 U.S.C. § 35](d) . . . no convict labor will be employed by the contractor in the manufacture or production or furnishing of any of the materials, supplies, articles, or equipment included in such contract, *except that this section, or any other law or executive order containing similar prohibitions against the purchase of goods by the Federal Government, shall not apply to convict labor which satisfies the conditions of section 1761(c) of title 18, United States Code . . . [amendment in italics].*

Section 1761 of Title 18, as amended in 1979, prohibited the transportation in interstate or international commerce of any goods, wares, or merchandise manufactured, produced, or mined, wholly or in part, by convicts or prisoners unless the convict labor was furnished as part of an approved Federal or state work release program.<sup>25</sup> Prior to 1987, the U.S. Code contained two

<sup>21</sup>39 Fed. Reg. 779 (1973).

<sup>22</sup>See generally 39 Fed. Reg. 779 (1973).

<sup>23</sup>See generally *id.*

<sup>24</sup>Omnibus Crime Control and Safe Streets Act of 1968, Pub. L. No. 90-351, § 827(b), 93 Stat. 1215.

<sup>25</sup>This section provides as follows:

(a) Whoever knowingly transports in interstate commerce or from any foreign country into the United States any goods, wares, or merchandise manufactured, produced, or mined, wholly or in part by convicts or prisoners, except convicts or prisoners on parole, supervised release, or probation, or in any penal or reformatory institution, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

(b) This chapter shall not apply to agricultural commodities or parts for the repair of farm machinery, nor to commodities manufactured in a Federal, District of Columbia, or State institution for use by the Federal Government, or by the District of Columbia, or by any State or Political subdivision of a State.

(c) In addition to the exceptions set forth in subsection (b) of this section, this chapter shall not apply to goods, wares, or merchandise manufactured, produced, or mined by convicts or prisoners who—

(1) are participating in one of not more than 50 non-Federal prison work pilot projects designated by the Director of the Bureau of Justice Assistance; and

other sections that regulated prison labor in Federal facilities. The first was 18 U.S.C. § 4082 which regulated labor outside of a prison facility. This section is one of many that were superseded by the Sentencing Act of 1987.<sup>26</sup> The new section 4082 has no provisions relating to prison labor.<sup>27</sup> The second convict labor provision is 18 U.S.C. § 4122 which defines and establishes prison industries and specifically permits those industries to sell to the Federal Government.

#### 4.2.9.3. Law in Practice

The Walsh-Healey Act has no current effect on prevailing minimum wage rates. As noted above, the Department of Labor has not issued wage rate determinations since 1963 and has no plans to do so. Therefore, this provision of Walsh-Healey is permanently moribund.

The original Walsh-Healey limitations on work hours, a 40 hour week and an 8 hour day, are also no longer in effect. The 40 hour work week limitation was repealed by amendment in 1942 and the remaining 8 hour day limitation was repealed in 1985 by Pub. Law No. 99-145. Thus, the work limitations of Walsh-Healey have been completely superseded.

Except for convict labor prohibitions, the remaining provisions of the Walsh-Healey Act are also without effect. The prohibition of child labor has been replaced by the Fair Labor Standards Act, and the "safe and sanitary workplace" provisions have been expressly superseded by the Occupational Safety and Health Act. Finally, while 18 U.S.C. § 1761 makes it a crime to transport goods made with unapproved convict labor in interstate and international commerce, only the Walsh-Healey Act prohibits the purchase of such goods by the United States. In order to remove any possible gap in the regulation of convict labor, the Panel recommends that 41 U.S.C. § 35 be amended as discussed below.

The Panel sought public comments on the proposal to repeal the Walsh-Healey Act. Many comments were received, with virtually every commentor agreeing that the Act performed no meaningful function.<sup>28</sup> Among those who recommended repeal of the Walsh-Healey Act were the Defense Logistics Agency,<sup>29</sup> the U.S. Army Depot Systems Command,<sup>30</sup> the Department of

---

(2) have, in connection with such work, received wages at a rate which is not less than that paid for work of a similar nature in the locality in which the work was performed, except that such wages may be subject to deductions which shall not, in the aggregate, exceed 80 per centum of gross wages, ....

<sup>26</sup>Pub. L. No. 100-182, 101 Stat. 1266 (1987).

<sup>27</sup>However, under the effective date provisions of the Sentencing Reform Act, the old section 4082 remains in effect for persons incarcerated prior to Nov. 1, 1987.

<sup>28</sup>Some commentors noted that the Walsh-Healey definition of "manufacturer" and "regular dealer" are used in the Small Business Act and regulations issued thereunder. In that context, the definitions may have some usefulness in excluding agents of large businesses from obtaining the advantages of small business status for their principals. However, this function can be readily retained by adding appropriate definitions to the Small Business Act and regulations. Some also suggested that the Act kept "brokers" out of Government contracting. What a broker is, however, and why one should be kept out of Government contracting was never explained. Moreover, the standard prohibition against contingent fees coupled with required responsibility determinations should preclude any problem with brokering however defined.

<sup>29</sup>Letter from Defense Contract Management Command, Defense Logistics Agency, pp. 13-14 (July 30, 1992).

the Navy,<sup>31</sup> the Department of the Air Force,<sup>32</sup> and the Aerospace Industries Association.<sup>33</sup> While not specifically addressing Walsh-Healey, the Department of Labor noted its general opposition to any erosion of labor protection laws provided to workers on Government contracts.<sup>34</sup>

#### 4.2.9.4. Recommendation and Justification

##### Repeal

The continued existence of Walsh-Healey cannot be justified. In the 56 years since its enactment, all of its major provisions have either been repealed or superseded by subsequent Congressional action applicable to all companies in the United States without regard to whether such companies are Government contractors. Nonetheless, Government contractors must ritually declare in each and every Federal bid or proposal that they are a "manufacturer" or "regular dealer" of the products being acquired.<sup>35</sup> Streamlining of the procurement code requires the repeal of such meaningless rituals.

#### 4.2.9.5. Relationship to Objectives

Repeal of the Walsh-Healey Act will eliminate a law that is unnecessary for the establishment of the buyer-seller relationship and thereby streamline the defense acquisition process.

#### 4.2.9.6. Proposed Statute

In order to preserve the convict labor prohibitions of the Act, which appear to be the only portion of the Act with any continuing vitality, the Panel proposes that 41 U.S.C. § 35 be completely stricken out as written and replaced with the following language:

---

<sup>30</sup>Letter from Deputy Chief of Procurement, Headquarters, US Army Depot Systems Command, Chambersburg, PA (July 13, 1992).

<sup>31</sup>In a letter dated June 26, 1992, the Office of the Assistant Secretary of the Navy for Research, Development, and Acquisition noted: "This act has had no positive benefit on employees in many years. The administrative burden is almost zero although a problem does arise from time to time regarding whether a contractor is a regular dealer or manufacturer. We concur that the Walsh-Healey Act should be repealed."

<sup>32</sup>Memorandum from Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force for Acquisition (SAF/AQC), Att. 2, p. 2. This memorandum also noted: "The Air Force also concurs in the recommendation to repeal the Walsh-Healey Act. This act has had no positive effect on employees in many years." (May 29, 1992).

<sup>33</sup>Letter from Aerospace Industries Association, p. 6 (July 27, 1992).

<sup>34</sup>Letter received from the Department of Labor (July 14, 1992).

<sup>35</sup>See FAR 22.602, 22.608-1, 52.222-19.

**41 U.S.C. § 35 Prohibition on Convict Labor and Prison Goods**

No agency of the United States shall purchase any goods, wares or merchandise whose transportation in interstate commerce, or whose importation, is prohibited by 18 U.S.C. § 1761.

The suggested change keeps the substance of current law on convict labor and prison industries which permits the purchase of goods from Federal prison industries as well as goods made by Federal and state prisoners, inside or outside of prison, under the circumstances described in 18 U.S.C. § 1761.

## **4.2.10. 41 U.S.C. § 47**

### **Duties and Powers of the Committee**

#### **4.2.10.1. Summary of the Law**

Section 41 U.S.C. § 47 establishes the duties and powers of the Committee for the Purchase from the Blind and other Severely Handicapped. The Committee is empowered to make rules and regulations to promote the purchase of commodities and services from the blind and other severely handicapped.

#### **4.2.10.2. Background of the Law**

This section, as well as 41 U.S.C. § 46, is part of the Javits-Wagner-O'Day Act signed into law on June 23, 1971.<sup>1</sup>

#### **4.2.10.3. Law in Practice**

This law authorizes the Committee for the Purchase from the Blind and Other Severely Handicapped, an independent Federal Agency, to direct the Government to procure specific commodities and services from nonprofit agencies employing persons who are blind or have other severe disabilities. DOD routinely purchases commodities and services from such organizations. During Operation Desert Storm, for example, nonprofit agencies employing disabled persons dramatically increased both the number of employees and their working hours to supply items ranging from eating utensils to desert camouflage helmet covers.

#### **4.2.10.4. Recommendation and Justification**

##### **Retain**

This section should be retained. Nonprofit agencies employing blind and severely disabled persons have proven to be reliable and responsible producers of commodities and services for DOD. The Javits-Wagner-O'Day Act program also reduces the administrative burden on the DOD contracting staff, while promoting the important social objective of fully utilizing the abilities of people, regardless of their physical challenges.

#### **4.2.10.5. Relationship to Objectives**

Retention of this section promotes full and open access to the procurement system, including products made by the severely disabled. This recommendation is consistent with the Panel's goals of streamlining the acquisition process and reducing the administrative burden.

---

<sup>1</sup>Act of June 23, 1971, Pub. L. No. 92-28, 86 Stat. 77.

## **4.2.11. 41 U.S.C. § 258**

### **Laws applicable to contracts**

#### **4.2.11.1. Summary of the Law**

This section states that no contract shall be exempt from the Acts commonly known as Davis-Bacon (40 U.S.C. § 276a *et seq.*) and Walsh-Healey (41 U.S.C. § 35 *et seq.*) "solely by reason of having been awarded after using procedures other than sealed bid procedures," if those Acts are "otherwise applicable . . . to such purchases and contracts."

#### **4.2.11.2. Background of the Law**

This section became effective July 1, 1949, with the passage of the Property and Administrative Services Act of June 30, 1949, which established Government policy on procurement.<sup>1</sup>

#### **4.2.11.3. Law in Practice**

The purpose of this section is to enforce the uniform applicability of Walsh-Healey and Davis-Bacon which apply to all Federal construction and manufacturing contracts above \$2,000 and \$10,000, respectively.

#### **4.2.11.4. Recommendation and Justification**

##### **Repeal**

Both of these Acts are enforced regardless of how the purchases and contracts were created, sealed bid or otherwise. Therefore, this section is unnecessary and should be repealed.

#### **4.2.11.5. Relationship to Objectives**

Repeal of this section will eliminate an acquisition law that is unnecessary for the establishment and administration of the buyer and seller relationship in procurement.

---

<sup>1</sup>Federal Property and Administrative Services Act of 1949, ch. 288, 63 Stat. 377.

## 4.2.12. 41 U.S.C. §§ 351 - 358<sup>1</sup>

### The Service Contract Act

#### 4.2.12.1. Summary of the Law

The Service Contract Act applies to Federal contracts in excess of \$2,500 if the principal purpose of the contract is to furnish services in the United States through the use of service employees. The Act requires that contractors pay service employees the minimum wage prevailing in the locality and provide specified minimum fringe benefits. It also prohibits employment under hazardous or unsanitary conditions. Lastly, it provides sanctions to punish violations, vesting enforcement and regulatory powers in the Secretary of Labor.

#### 4.2.12.2. Background of the Law

In 1965, Congress passed the Act to fill the gap left by the Walsh-Healey Act which covered workers in supply contracts, and the Davis-Bacon Act which covered construction workers.<sup>2</sup> Congress intended the Act to protect blue collar service workers, having determined that, without the Act's provisions, Government contractors would depress wages in unskilled occupations while competing for public contracts awarded to the lowest bidder.<sup>3</sup> Despite apparently good intentions, the Act is vague and has been troubled by programmatic and interpretive difficulties.

Congress attempted to strengthen and clarify the Act in 1972. The most noteworthy amendment required that successor contractors pay service employees wages and fringe benefits no lower than those to which the predecessor contractor was committed to pay by a collective bargaining agreement. This change attempted to deal with the problems created by the fact that service contracts turn over rapidly.<sup>4</sup>

In 1976, a Florida district court found that Congress had meant to limit the Act's coverage to blue-collar workers doing jobs similar to "wage board" classifications defined for Federal service.<sup>5</sup> In response to this judicial limitation of the Act's application, Congress amended the Act again. The new amendment defined "service employee" as any person working on a Government service contract other than bona fide executives, administrators, and professionals, and reiterated that services include any operations, other than those specifically exempted from the original Act that do not result in a physical product.

---

<sup>1</sup>The Panel separately considered 41 U.S.C. § 354, which provides for debarment of persons violating the Service Contract Act. The Panel took no action on this provision since it was peripheral to the work of the Panel.

<sup>2</sup>Armand J. Thieblot, Jr., *Prevailing Wage Legislation: The Davis-Bacon Act, State "Little Davis-Bacon" Acts, The Walsh-Healey Act and the Service Contract Act*, 229-30 (hereafter Thieblot).

<sup>4</sup>*Id.* at 237.

<sup>5</sup>*Federal Electric Corp. v. Dunlop*, 419 F.Supp. 221 (MD Fl 1976).

#### 4.2.12.3. Law in Practice

Despite the congressional amendments and later regulatory changes by the Department of Labor (DOL), programmatic and interpretive uncertainties make implementation of the Act difficult. These uncertainties are, at least in part, the result of the Act's vagueness in key areas, the most significant of which may be its failure of the Act to define "locality."<sup>6</sup> That term is key in any determination of what prevailing wage rate should apply on a given contract. At least three possible definitions have been suggested: the location of the work to be performed, the location of the contractor's principal place of business, and the location of the contracting agency. The courts<sup>7</sup> have not resolved the issue, and DOL regulations are cumbersome and inefficient.

Another area of concern is the classification of contracts and employees covered by the Act. As originally passed, the Act protected service workers engaged in work such as building maintenance, laundry service, or window washers. It is often difficult to distinguish between a supply contract and a service contract, however. While the courts tended to interpret the Act narrowly, DOL began to interpret the Act broadly and expanded the protections of the Act to clerical and technical workers outside of the original protected group.<sup>8</sup> The 1976 amendment helped clarify the issue but many uncertainties were not resolved until the mid-1980s when the Reagan administration adopted regulatory changes. The regulatory changes excluded from coverage services performed as part of a contract whose principal purpose was not the provision of services. A still unresolved issue, however, is the application of the Act to clerical and nonexempt technical personnel of service firms.

The 1972 amendment required that successor contractors pay service employees wages and fringe benefits no lower than those to which the preceding contractor was committed by a collective bargaining agreement. The purpose of the amendment was to prevent individual wage busting.<sup>9</sup> Critics argue that this provision mandates the continuation of union wages, regardless of local labor conditions. Litigation, however, has revolved around the question of how far beyond wages and fringe benefits a successor contractor is required to go to comply with the Act.<sup>10</sup>

Another serious deficiency of the Act has been its inconsistent enforcement. The Act requires that DOL make wage and fringe benefit determinations for contracts over \$2,500. DOL has consistently failed to meet this requirement. In 1972, for example, the Commission on Government Procurement concluded that in the period 1968-70, DOL issued the required determinations for only about 35% of covered contracts.<sup>11</sup> The Commission also concluded that DOL wage determinations were made improperly and that the Act was anti-competitive.<sup>12</sup> In a

<sup>9</sup>Thieblot at 255.

<sup>10</sup>See, e.g., *Trinity Services, Inc. v. Marshall*, 493 F.2d 1250.

<sup>11</sup>REPORT OF THE COMMISSION ON GOVERNMENT PROCUREMENT 120-22, (Dec. 1972) [Hereafter *Commission Report*].

<sup>12</sup>*Commission Report* at 121.

compliance review published in 1978, the General Accounting Office (GAO) found that many DOD agencies failed to comply with the Act and that procurement personnel were uncertain about the Act's application.<sup>13</sup> The Commission report and the GAO review both noted that DOL lacked the personnel to make the required determinations. GAO also concluded that DOL had no effective system to monitor compliance, and that enforcement was uneven and limited essentially to the investigation of complaints.

A third GAO report, issued in 1983, concluded that DOL had been unable to administer the Act efficiently or effectively.<sup>14</sup> The 1983 report, like the 1972 report of the Commission, concluded that the Act is inflationary to the Government and reiterated the concerns over the administration of the Act that were noted in its 1978 and 1982 reports. GAO concluded that the Act costs the Government approximately \$500 million a year in additional costs. GAO also concluded that it would be impractical and very costly for DOL to administer the Act in a manner that would ensure accurate and equitable service wage determinations. For these and other reasons, the GAO report recommended that Congress repeal the Act, suggesting as well that changed administrative procedures and the Fair Labor Standards Act could provide comparable protections to service employees.<sup>15</sup>

The Commission on Government Procurement reached a similar conclusion about DOL's difficulty in implementing the Act. The Commission found that DOL rarely made the required wage determinations for small-dollar amounts and noted DOL's claim that it did not have sufficient personnel to make appropriate determination and often lacked adequate data. Given DOL's inability to meet its obligation under the Act, the Commission recommended an increase of the threshold. The Commission stated that a more realistic threshold of approximately \$10,000 would eliminate unproductive delay in waiting for wage determinations and, in its opinion, still leave most service contract employees protected.<sup>16</sup> The Commission's overall conclusion was that the "cost and administrative effort required by the social and economic programs that are imposed on low-dollar procurements cannot be justified by the results achieved."<sup>17</sup>

The Aerospace Industries Association expressed its support for the recommendations discussed below,<sup>18</sup> as did the Defense Contract Management Command (DCMC), an element of the Defense Logistics Agency. DCMC also noted that the Service Contract Act is difficult to administer and enforce with smaller companies and on small dollar contracts.<sup>19</sup> The office of the Assistant Secretary of the Air Force for Acquisition noted: "While we strongly support a higher dollar value threshold . . . it is fair to say that our experience with the SCA indicates that many of the problems associated with it have their genesis not in the act itself, but in DOL's implementation. . . ." The problems cited by the Air Force included tardiness in issuing wage

---

<sup>13</sup>GENERAL ACCOUNTING OFFICE REVIEW OF COMPLIANCE WITH LABOR STANDARDS FOR SERVICE CONTRACTS BY THE DEFENSE AND LABOR DEPARTMENTS (Jan. 19, 1978).

<sup>14</sup>Excerpts from GAO Report, *The Congress Should Consider Repeal of the Service Contract Act*, FEDERAL CONTRACTS REPORT, Feb. 7, 1983.

<sup>15</sup>*Id.* See also *Commission Report*.

<sup>16</sup>*Commission Report* at 121.

<sup>17</sup>*Id.* at 122.

<sup>18</sup>Letter from the Aerospace Industries Association, p. 7 (July 27, 1992).

<sup>19</sup>Letter from the Defense Contract Management Command, Defense Logistics Agency, p. 15 (July 30, 1992).

determinations and retroactive modification of contract clauses.<sup>20</sup> Many of these same points were echoed by the office of the Assistant Secretary of the Navy for Research, Development, and Acquisition: "It cannot be denied that DOL's rules, regulations, implementations, and operating procedures applicable to the SCA are, to contracting agencies, onerous in the extreme."<sup>21</sup> Both these offices recommended the creation of an ad hoc committee from DOL and all affected contracting agencies in order to review these regulations and procedures with a view toward their revision. In its comments to the Panel, the DOL advocated the continuing need for a uniform approach to be applied to all Government contracting activities. It opposed the Panel's recommendations for that reason: ". . . the proposal would virtually repeal the application of current law to DOD service contracts and thereby deny the benefits and protections of this law to employees, many of whom are low skilled and low paid."<sup>22</sup>

#### **4.2.12.4. Recommendation and Justification**

##### **Amend**

The Panel recommends that Congress exempt all contracts (DOD and civilian agencies) of less than the simplified acquisition threshold from the provisions of the Service Contract Act. The new threshold would exempt 57.3% of DOD contract actions above \$25,000 but would affect only 7.8% of the dollar value of DOD contracts, reducing paperwork and delay in the DOD procurement process. Further, in light of GAO's conclusion that the Act is inflationary, the proposed higher threshold has a potential to reduce the costs of DOD procurement.

#### **4.2.12.5. Relationship to Objectives**

The proposed changes would streamline the DOD procurement process by reducing paperwork and unnecessary delay. These recommendations are clearly consistent with the Panel's overall goal of streamlining the DOD procurement process.

#### **4.2.12.6. Proposed Statute**

The Panel proposes that 41 U.S.C. § 351 be amended as follows:

##### **§ 351. Required contract provisions; minimum wages**

(a) Every contract (and any bid specification therefor) entered into by the United States or the District of Columbia, in excess of \$2,500, other than contracts for commercial items as defined in 10 U.S.C. § 2302 or contracts whose value is less than the simplified acquisition threshold, and except as provided in section 356 of this title, whether negotiated or advertised, the

## 4.2.13. 41 U.S.C. § 701

### Drug-free work place requirements for Federal contractors

#### 4.2.13.1. Summary of the Law

This law requires entities awarded contracts in excess of \$25,000 to certify they will provide a drug free workplace by:

- posting notices that drug possession, distribution, or use is prohibited in the work place;
- imposing penalties for violations; and
- making drug free status a condition of employment and offering drug abuse assistance.

For failing to comply with the requirements of this section, contractors may be suspended or may be debarred for a period not to exceed five years. The Government may also suspend contract payments or terminate a contract because of violations.

#### 4.2.13.2. Background of the Law

This section was introduced by the 100th Congress in H.R. 4719 by Congressman Jack Brooks, referred to the Committee on Government Operations, and became law under Pub. L. No. 100-690 in November, 1988.<sup>1</sup> The Committee noted that while the extent of drug abuse in the workplace is not fully known, drug impaired workers greatly increase safety risks, diminish productivity, and create the possibility of defective products. During testimony before the Committee, the Chamber of Commerce asserted that 65% of employees entering the workplace have used illegal substances and that drug users in the workplace are four times more likely to be involved in an accident while at their job. The Associated General Contractors of America testified at Committee hearings that perhaps 23% of all U.S. workers use drugs on the job.<sup>2</sup> The Committee sought to use "the powerful weapon of Federal funding" to encourage employers to maintain a drug-free environment to the best of their ability. Representative Harold Volkmer stated in hearings that this law "is Government-wide, it is uniform in its application, it is systematic in that it utilizes existing agencies, structures, and processes of Government to achieve our stated goals."<sup>3</sup>

According to the Office of Federal Financial Management at the Office of Management and Budget (OMB), Congress perceived the \$25,000 threshold as a way of exempting small

---

<sup>2</sup>*Id.*

<sup>3</sup>*Id.*

business from the requirements of this section. This amount was tied to the small purchase threshold but is not scheduled to rise if that threshold rises.<sup>4</sup>

#### **4.2.13.3. Law in Practice**

This statute seeks to create a drug free work environment and provide substance abuse assistance consistent with the overall national policy. This law is also implemented in the FAR 23.500. The Office of Federal Financial Management at OMB maintains no statistical data on the effectiveness of this law, but the anecdotal evidence is positive. According to one source, "this law has raised the consciousness of companies that were not aware of a problem."<sup>5</sup>

#### **4.2.13.4. Recommendation and Justification**

**Amend this section by replacing the current \$25,000 threshold with the simplified acquisition threshold.**

The Panel recommends a uniform, across-the-board simplified acquisition threshold of \$100,000 to relieve small businesses from onerous reporting requirements, to establish consistency, and to reduce Government paperwork. While the Panel recognizes the unique and serious problem of drug abuse, a uniform threshold for all socioeconomic requirements will greatly unburden the contracting process and lead to substantial cost savings in both the public and private sectors. Therefore, the Panel recommends that this section be amended to conform to that uniform threshold of \$100,000.

#### **4.2.13.5. Relationship to Objectives**

This section, amended to provide for a threshold of \$100,000, will conform to the Panel's objectives of streamlining the acquisition process while maintaining the important policy objective of promoting drug-free work places.

#### **4.2.13.6. Proposed Statute**

##### **§ 701. Drug-free workplace requirements for Federal contractors**

##### **(a) Drug-free workplace requirement**

##### **(1) Requirement for persons other than individuals**

No person, other than an individual, shall be considered a responsible source, under the meaning of such term as defined in section 403(8) of this title, for the purposes of being awarded a

(A) ...

## **4.2.14. 42 U.S.C. § 1701**

### **Compensation for injury or death resulting from war-risk hazard**

#### **4.2.14.1. Summary of the Law**

This section extends death and disability benefits to civilian employees or any employee engaged on an overseas defense contract whose injury or death results from war or "war risk hazard."

#### **4.2.14.2. Background of the Law**

This section was originally signed into law on December 2, 1942.<sup>1</sup> It was subsequently amended several times, most recently by Pub. L. No. 98-426 in 1984 which substituted references to sections of the Longshore and Harbor Worker's Compensation Act for sections of the Longshoremen's and Harbor Worker's Compensation Act. These references have been translated to sections of Title 33 in the U.S. Code and required no change in the text.<sup>2</sup>

#### **4.2.14.3. Law in Practice**

This law extends death and disability benefits to overseas workers employed by the United States or by a contractor of the United States who are killed or injured from a war-risk hazard. The program is administered by the Division of Federal Employees Compensation at the U.S. Department of Labor. The benefits extended under this law are stated in subsection (b)(1). The intent of 42 U.S.C. § 1701 is to provide overseas workers with compensation similar to that provided by state Governments to domestic workers. According to the House Committee on Education and Labor, this law provided critically needed protection to the many workers employed by DOD and DOD contractors during Operations Desert Shield and Desert Storm.<sup>3</sup>

#### **4.2.14.4. Recommendation and Justification**

##### **No Action**

In its review the Panel found that, while this statute is tangentially related to DOD acquisition, it does not present any core acquisition issues, nor does it have more than an indirect relationship to contracting. Therefore, the Panel finds that it is not appropriate for further consideration.

#### **4.2.14.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

---

<sup>3</sup>Telephone interview with the House Committee on Education and Labor (Nov. 24, 1992).

## 4.3. Small and Disadvantaged Business Preferences

### 4.3.0. Introduction

One of the most important areas that was examined by the Panel concerned the relationship between the defense procurement system and those laws which the Congress has enacted in order to promote the interests of small business, especially those businesses which are both small and disadvantaged. There is no question that congressional attention to those interests represents a long-term commitment which reaches virtually every community across the nation. In FY91, for example, DOD awarded \$25.9 billion in prime contracts to small businesses, or 20.6% of the total of all defense contracts. Of that figure, \$4.4 billion, representing 3.5%, went to minority small business firms.<sup>1</sup> These figures demonstrate that the Small Business Act clearly has a major effect on DOD acquisition policy, an effect which has been magnified by a succession of defense authorization and appropriations acts mandating specific actions by DOD to support various small business programs.

In assessing the impact of these requirements, however, the Panel was mindful that another congressionally-chartered body, the U.S. Commission on Minority Business Development, had been formed in 1989 with the broader mandate of examining the operations and policies of the Small Business Administration, as well as assessing the general state of the minority small business community nationwide. The Commission's final report, issued in September, 1992, will clearly have a major influence upon future discussions of minority business issues.<sup>2</sup> Despite the differences in our respective charters -- as well as the time and other resources devoted to them -- this Panel has reached a number of general conclusions which parallel those of the Commission.

First, the Panel concluded that the current policies governing the DOD role in small business are the result of a patchwork of laws lacking a coherent framework and clearly stated objectives. These laws are highly volatile, sometimes changing within the same legislative session and always creating confusion and uncertainty for administrators, contracting officers, and (perhaps more importantly) the small business community. The lack of clearly stated objectives also makes it difficult for administrators in both the Small Business Administration and DOD to implement the laws properly and to issue the appropriate regulatory guidance. We therefore recommend that Congress replace the current patchwork of small business laws with a comprehensive and coherent program with clearly stated objectives.

Second, the Panel has concluded that Congress needs to look more closely at ways to augment its efforts to help small business, especially minority business. Current legislative directives place great emphasis on reallocating Federal procurement dollars to small and small disadvantaged businesses through the use of goals and preferences. While this approach has been successful at increasing the small business share of Government business, particularly in DOD, it

---

<sup>1</sup>Source: DOD, Office of Small and Disadvantaged Business Utilization.

<sup>2</sup>U.S., Commission on Minority Business Development, *Final Report*, (Washington, DC: USGPO, September, 1992).

has created problems as well. Among the difficulties most often noted: the frequent need to "fine tune" legislative programs, resulting in the volatility noted above; ever-increasing numbers of reports and certifications that add to the administrative overhead of both the Government and its suppliers; and continued expressions of dissatisfaction among the intended beneficiaries of these programs.

While access to procurement opportunities represents an important component of public policy, this emphasis often comes at the expense of two other equally significant needs of small and small disadvantaged business -- access to capital and access to training and management support. Despite the fact that the existing statutes prominently mention such needs, these neglected legs of the "triad" of support to small and small disadvantaged businesses have never been more important. While those issues have been more fully addressed by the Commission on Minority Business Development, their overall findings are consistent with the Panel's observations on small businesses seeking to do business with DOD.<sup>3</sup>

Despite the problems caused by the frequent changes in the legislation aimed at helping small business, DOD has made a commendably far-reaching effort to implement both the letter and the spirit of the laws. The Offices of Small and Disadvantaged Business Utilization throughout DOD have been the focal points of this effort as well as an important forum for the exchange of information on small business issues. The Panel also received a number of comments from the small business community suggesting that these efforts could be further enhanced by creation of a DOD advisory committee on small business. Appointed under the provisions of the Federal Advisory Committee Act, this group would be composed of distinguished leaders from the Government and private-sector small business community who could provide continuing advice to the Secretary of Defense on small business issues affecting DOD. Such a panel would also be useful in exploring possibilities for future DOD initiatives on small business as well as providing outside perspectives on emerging policy issues. The Panel recommends that the next Secretary of Defense consider the appointment of a DOD advisory committee on small business.

Because of these general conclusions about the need for a comprehensive overhaul of the laws broadly applying to small business, the Panel took a conservative approach to its recommendations for more specific statutory changes. However, our research in this area has led us to take positions on several key issues that affect defense-related small businesses. We note, for example, that the recently-passed DOD Authorization Act for 1993 (Pub. L. No. 102-484) contains in section 804 a provision which modifies the Certificate of Competency procedures for small businesses doing business with the Department. Because this section applies only to DOD contracts, it effectively burdens small businesses with two different sets of statutory requirements. Because such dual procedures add no value and much confusion to the contracting process, we recommend that Congress either repeal this provision or, alternatively, expand its coverage to all small business contracts with either DOD or civilian agencies of the Government.

The Panel also recommends that 15 U.S.C. § 637(a)(1) (Procurement Contracts) be amended to permit Government contracting officers, particularly those in the DOD, to deal

---

<sup>3</sup>*Id.* See in particular the Commission's findings on the Mentor-Protégé Program, pp. 74-83, and on access to capital, pp. 81-96.

directly with eligible 8(a) firms in the negotiations of Government contracts rather than going through the Small Business Administration. This amendment would streamline the contracting process by eliminating a third agency in the normal contracting process. Finally, the Panel recommends the amendment of 15 U.S.C. §644(j) and § 637(d) (Small business subcontracting plans). This amendment would alter the small purchase threshold in both of the referenced sections while preserving the small business reservation. The above changes are intended to parallel those being proposed in the Office of Federal Procurement Policy Act (41 U.S.C. § 403) relating to the existing small purchase threshold. That threshold would be raised to \$100,000 and defined as the level authorized for the operation of the new "simplified acquisition threshold" discussed earlier in this chapter. The new threshold is intended to permit greater flexibility in Government contracting for smaller purchases, typically those where small businesses have the greatest opportunities for participation.

The Panel recommends these statutory changes in the belief that they will promote wider participation of small business concerns in DOD contracting, particularly by disadvantaged and minority business concerns. The Panel's objective is to increase the opportunities for these entities to participate in DOD contracting, while at the same time reducing the administrative burden for both the Government and its suppliers.

## **4.3.1. 10 U.S.C. § 2322**

### **Limitation on small business set-asides**

#### **4.3.1.1. Summary of the Law**

This section addresses procurement under the Foreign Military Sales Program and limits authorization of small business set-aside provisions.

#### **4.3.1.2. Background of the Law**

This section was added by Pub. L. No. 98-525 on October 19, 1984.<sup>1</sup>

#### **4.3.1.3. Law in Practice**

This section prohibited the head of a Federal agency from authorizing a procurement to be set-aside for a small business concern in the case of a procurement under the Foreign Military Sales Program if the foreign purchaser specified the sources qualified to meet the requirement.

#### **4.3.1.4. Recommendation and Justification**

##### **Delete**

This section should be deleted from Title 10 because subsection (b) contains an expiration date of January 17, 1987.

#### **4.3.1.5. Relationship to Objectives**

Deletion of this section will eliminate an unnecessary law and thereby streamline the body of acquisition laws.

---

<sup>1</sup>Department of Defense Authorization Act 1985, Pub. L. No. 98-525, 98 Stat. 2492 (1984).

## **4.3.2. 10 U.S.C. § 2392**

### **Prohibition on use of funds to relieve economic dislocation**

#### **4.3.2.1. Summary of the Law**

This section prohibits DOD funds from being used in any contract with a price differential for the purpose of relieving economic dislocation.

#### **4.3.2.2. Background of the Law**

Subsection (b) of section 2392 is derived from a long-standing provision of annual Department of Defense Appropriation Acts commonly referred to as the "Maybank Amendment." In 1954, Senator Burnett Maybank of South Carolina authored and achieved passage of a law prohibiting Congress from giving economic preference to areas of high unemployment. With some exceptions, the "Maybank Amendment" has been enforced in DOD ever since.<sup>1</sup> Those exceptions occurred in FY83-85 when DOD contracts were awarded with a price differential for the purpose of relieving economic dislocations.<sup>2</sup> This test program, run by the Defense Logistics Agency, was not renewed. The Office of Small and Disadvantaged Business Utilization (SADBU) for the Office of the Secretary of Defense asserts that this test program was extremely burdensome, difficult to implement fairly, and fiscally unwise.<sup>3</sup> At the urging of DOD, this test program was replaced in 1985 by the Procurement Technical Assistance Act,<sup>4</sup> which is still in effect and which has been recommended for retention by the Panel.

#### **4.3.2.3. Law in Practice**

This law preserves DOD policy of awarding contracts based on price, quality, performance, and related factors that reinforce the efficiency and integrity of the procurement process rather than awarding contracts based on location or local employment concerns.

#### **4.3.2.4. Recommendation and Justification**

##### **Retain**

SADBU strongly recommends the retention of 10 U.S.C. § 2392 because the language of this section continues to serve its original purpose of prohibiting contract awards based purely on criteria that are not related to efficient procurement practices. Based upon its review, the Panel concurs with this recommendation.

---

<sup>1</sup> CONG. REC. S5030 (daily ed. May 14, 1981) (statement of Sen. Warner).

<sup>2</sup> 10 U.S.C. § 2392 note (a) (1984).

<sup>3</sup> Telephone interview with the Office of Small and Disadvantaged Business Utilization (May 7, 1992).

<sup>4</sup> 10 U.S.C. §§ 2411-2416.

#### **4.3.2.5. Relationship to Objectives**

Retention of this statute would promote the Panel's objectives of balancing an efficient procurement process with effective socioeconomic policies.

### 4.3.3. 10 U.S.C. §§ 2411-2418<sup>1</sup>

#### Procurement Technical Assistance Act (PTA)

##### 4.3.3.1. Summary of the Law

These eight sections, originally enacted in 1984, require DOD through the Defense Logistics Agency (DLA) to sponsor procurement technical assistance programs in order to encourage more participation in defense procurement. The Secretary of Defense, acting through the Director of the Defense Logistics Agency, enters into cooperative agreements with state and local governments or private nonprofit organizations to sponsor programs to furnish procurement technical assistance to business entities. The Secretary agrees to defray up to one-half to three-fourths of the costs depending on whether the services are provided in a "distressed area" (i.e., an area of high unemployment, low income, or a reservation).

##### 4.3.3.2. Background of the Law

In the early 1980s there was a perceived need to provide technical information and assistance to small businesses in order to enhance their ability to compete for Government defense contracts. The Northeast and Midwest Congressional (House) Coalition, an organization that represents business and environmental concerns of those regions, was involved in the organization and planning of this Act.<sup>2</sup>

##### 4.3.3.3. Law in Practice

The Procurement Technical Assistance Act program was launched in 1985 to assist state and local Governments and other nonprofit entities in establishing or maintaining PTA activities to help business firms market their goods and services to DOD. The purpose was to create economic stimulation in those areas without using direct procurement preferences for high unemployment areas. There are currently PTA centers in approximately 33 states. Cooperative agreement awards are made and administered by the Defense Contract Management District (DCMD) Small Business Offices. All cooperative agreement awards are made competitively and only for a 12 month period unless extended.<sup>3</sup>

<sup>2</sup>Fact sheet supplied by program manager of Defense Logistics Agency (DLA) (March 2, 1992).

<sup>3</sup>*Id.*

#### 4.3.3.4. Recommendation and Justification

##### Retain

The Cooperative Agreement Program Manager for DLA stated that the program has been a good one and has done a lot in the communities where it has been used. The program is fully utilized and, in fact, the DLA is currently able to fund only 45% of the applicants.<sup>4</sup> Program quality is measured in part by performance reports from the cooperative agreements. A recent GAO report, *DEFENSE CONTRACTING: IMPROVEMENTS NEEDED IN PTA* was generally positive about the program, while making a number of recommendations to improve future program efficiency.<sup>5</sup> The Panel recommends that these sections be retained.

#### 4.3.3.5. Relationship to Objectives

The PTA helps establish full and open access to the DOD procurement system and broadens the defense industrial base.

#### 4.3.4. 15 U.S.C. § 631 *et seq.*

### Small Business Act and Related Public Laws

#### 4.3.4.1. Summary of the Law

The Small Business Act of 1958 ("1958 Act")<sup>1</sup> sets forth basic congressional policy to support small business as a vital and integral part of the U.S. economy. The Act provides that small businesses should receive a "fair proportion" of Federal agency contracts and that small businesses and small minority businesses should have the "maximum practical opportunity" to participate in contracting with Federal agencies. To further this congressional policy and to provide loans, contracting opportunities, and technical and other assistance to small business, the Act established the Small Business Administration (SBA).

The principal sections of Title 15 that were analyzed for their impact upon DOD are as follows:

- **Section 631:** Declares that it is congressional policy to assist small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals and women.
- **Section 632:** Provides definitions of some of the principal groups targeted for assistance under the Act, such as American Indian tribes, organizations for the handicapped, and agricultural cooperatives; also mandates various reports to Congress on the state of small business.
- **Section 636:**<sup>2</sup> Grants additional powers to the SBA, including authority for making various loans to small business concerns and enumerates other forms of financing and capital development.
- **Section 637:** Grants additional powers to the SBA, including a broad grant of authority in section 8(a) that has been the traditional means for awarding Government contracts to small and disadvantaged businesses through a system of set-asides and reservations; also establishes small and minority business subcontracting program.

---

<sup>1</sup>Codified at 15 U.S.C. §§ 631 *et seq.*

<sup>2</sup>Sections 633-635 deal with the organization and general purpose of SBA and do not impact on DOD procurement.

- **Section 638:** Sets forth congressional policy relating to the assistance that must be given to small businesses in order for them to obtain Government contracts for research and development.
- **Section 644:** Delineates congressional policies regarding goals for Government contract participation by small businesses as well as those small businesses controlled by socially and economically disadvantaged persons; also established an "Office of Small and Disadvantaged Business Utilization" in each Federal agency having procurement powers.

#### **4.3.4.2. Background of the Law**

The Small Business Act is the backbone of a long-standing congressional commitment to foster the development of small business in the United States and to increase its role in the national economy. Congress originally created the Small Business Administration in 1953 as a successor to the Reconstruction Finance Corporation and the Small Defense Plant Administration. The 1958 Act expanded the SBA mission to include a flexible definition of "small business" itself. The agency was directed not only to revise its loan policies to assist small business development, but also to encourage those businesses to compete for Government research and development contracts. In the years that followed, the small business area became a convenient vehicle for the implementation of evolving social policies. To implement these policies, Congress enacted both business development and procurement provisions in the Small Business Act. Beginning in the 1980s, Congress began to direct a larger share of Federal procurement dollars to small business (minority and disadvantaged businesses in particular) using the annual Defense Appropriations and Authorization Acts to direct particular courses of action by DOD.

Small business programs have achieved some important national goals. In FY91, for example, small businesses accounted for more than 20% of DOD prime contract awards, an amount totaling almost \$26 billion. However, the steady accumulation of legislative enactments, entitlements, and reservations has created a system that is difficult to administer and equally confusing to contracting officers and small businesses alike. The specific steps in this statutory evolution that have had the greatest impact upon DOD can be highlighted as follows.

#### **Small Business Act Amendments (Pub. L. No. 95-89)**

In 1977, Congress passed Pub. L. No. 95-89<sup>3</sup> which amended the 1958 Act to expand the SBA's Certificate of Competency (COC) program. This amendment clarified congressional intent concerning the SBA's authority to determine that a small business was "responsible" and therefore eligible to be awarded Government contracts. Prior to 1977, the COC review by the SBA was generally limited to issues such as the capacity and creditworthiness of the small business. Once the SBA made its determination on those issues, the contracting officer was only "authorized" to award the contract. However, various procuring activities, to circumvent the SBA's

---

<sup>3</sup>91 Stat. 553 (1977).

determination of competency, had determined on their own authority that certain small businesses lacked the tenacity and perseverance to perform a contract. On the basis of that finding, these small businesses were deemed to be "non-responsible contractors" who were consequently ineligible for Government contracts. Because tenacity and perseverance were regarded as being outside the scope of the SBA's certification authority, an SBA appeal was of negligible value. Further, there were at the time only a limited number of appellate fora that were within the limited resources available to the typical small business. The legislative history of this amendment makes it clear that Congress intended the SBA's determination to be conclusive on all criteria used by procurement officers to evaluate a contractor.<sup>4</sup>

### **Amendments to the 1958 Act and the Small Business Investment Act of 1958 (Pub. L. No. 95-507)**

In 1978, Congress passed Pub. L. No. 95-507<sup>5</sup> to amend the Small Business Act and the Small Business Investment Act. One set of amendments redesigned the SBA's minority business program by shifting the focus from contract assistance to business development. This law fundamentally changed the operation and organization of the Government's preference procurement programs, including the program for socially and economically disadvantaged business concerns. The Act amended section 8(a) to redefine eligibility for contracts so that only business concerns that are at least 51% owned and controlled by a socially and economically disadvantaged person and that have a reasonable chance of success in competing in the private sector are included.<sup>6</sup> In addition, the Act established a special category of set-asides, identified as small-business-small-purchase set-asides, for the acquisition of supplies and services that have an anticipated value of \$10,000 (later raised to \$25,000) or less. The law also required each Federal agency with contracting authority to have an Office of Small and Disadvantaged Business Utilization (OSADBU). The Act directs that the Director of OSADBU be appointed by the head of the agency and report only to the head or the deputy head of the agency. The amendment clarified definitions (15 U.S.C. § 637(c)) and required the release of specific information regarding bid sets and specifications requested by any small business.<sup>7</sup> Finally, section 211 of this law established the subcontracting program for small and disadvantaged businesses.<sup>8</sup>

### **Small Business Innovation Development Act of 1982 (Pub. L. No. 97-219)**

In 1982, Congress passed the Small Business Innovation Development Act.<sup>9</sup> Congress intended the Act to stimulate technological innovation, to foster participation by minority and disadvantaged persons in technological innovation, and to encourage the use of small business to meet Federal research and development needs.<sup>10</sup> The Act requires Federal agencies with research and development budgets in excess of \$100 million, including military departments, to establish a

<sup>8</sup>These provisions are now codified at 15 U.S.C. § 637(d).

<sup>9</sup>Pub. L. No. 97-219, 96 Stat. 217 (1982).

<sup>10</sup>S. REP. NO. 97-194, 97th Cong., 2d Sess. 1-4, *reprinted in* 1982 U.S. Code, Cong. & Admin. News 512.

Small Business Innovation Research Program (SBIR). Agencies with research and development budgets of more than \$20 million are required to establish goals for funding research and development by small business concerns. Under SBIR, agencies with research and development budgets over \$100 million must set aside a specified portion of their research or research and development budget for award to small business concerns. The Act authorized the Administrator of SBA, after consultation with the Attorney General and the Chairman of the Federal Trade Commission, to approve agreements between small business firms providing for joint research and development programs that might otherwise subject the firms to prosecution for violation of anti-trust statutes. Both the Small Business Administration and the Office of Science and Technology Policy review and monitor the performance of agency SBIR programs.<sup>11</sup> The SBIR program was extended by Pub. L. No. 99-443 in 1986, an amendment that made the program permanent with a required congressional review every 10 years. In 1992, Congress extended the SBIR Program through the year 2000.<sup>12</sup>

### **Small Business and Federal Procurement Competition Enhancement Act of 1984 (Pub. L. No. 98-577)**

In the 1984 Small Business and Federal Procurement Competition Enhancement Act,<sup>13</sup> Congress again reiterated the policy that the SBA's determination of a small business' responsibility under the COC procedure is final and binding on a procuring agency. Congress also provided legislation to deal with obstacles faced by small business in procuring Federal contracts for spare parts. The Act mandated that small businesses and small business concerns owned and controlled by socially and economically disadvantaged individuals "shall have the maximum practicable opportunity to participate in the performance of contracts and subcontracts" for "spare parts" and that prime contractors develop and submit to the Government a plan that demonstrates the prime contractor's "best efforts" to place subcontracts with small and small disadvantaged businesses.<sup>14</sup> The Act also prohibits the award of contracts unless the contractor has an approved plan that provides the "maximum opportunity for small business concerns and small business concerns owned and operated by socially and economically disadvantaged individuals" to participate in the program.<sup>15</sup> Finally, the Act created "spare parts break-out coordinators" in all major buying commands and eliminated thresholds for certificates of competency.<sup>16</sup>

### **Small Business Administration Reauthorization and Amendment Act of 1988 (Pub. L. No. 100-590)**

In the reauthorization of the SBA in 1988,<sup>17</sup> Congress required that designated agencies, including DOD, develop rural area business enterprise development plans to encourage prime contractors, subcontractors, and grant recipients to use small business concerns located in rural

areas as subcontractors and suppliers. The reauthorization act also permits the SBA to appeal to the department Secretary a decision not to break out a system component when the SBA's Breakout Procurement Center Representative so requests.<sup>18</sup>

### **Business Opportunity Development Reform of 1988 and Small Business Competitiveness Demonstration Program Act of 1988 (Pub. L. No. 100-656)**

The Business Opportunity Development Reform Act of 1988<sup>19</sup> was intended to combat scandals involving the Minority Small Business/Capital Ownership Development Program administered by the Small Business Administration under section 8(a) of the Small Business Act and to remedy serious shortcomings in the day-to-day administration of that program. Specifically, Congress found that the program "has generally failed to meet its objectives" and that

too few concerns that have exited the Program have been prepared to compete successfully in the open marketplace on competitive procurements, and many concerns have developed an unhealthy dependency on sole-source contracts by the time they are required to leave the program.<sup>20</sup>

Significantly, the Act prohibited SBA from operating any facet of the section 8(a) program for political purposes, and imposed new criminal penalties on persons who falsely represented any fact related to eligibility for the Program.<sup>21</sup> In addition, the Act revised the SBA's administrative procedures, set limits on the length of time a firm could be in the section 8(a) program, and provided for a transition out of the program.<sup>22</sup> Moreover, the Act provided for competition among firms within the program for contracts whose anticipated value would exceed \$5 million for manufacturing and \$3 million for all other industries.<sup>23</sup> Finally, the Act established a Government-wide goal for participation by small business concerns at not less than 20% of the total value of all prime contracts and a goal for participation by small businesses owned and controlled by socially and economically disadvantage individuals of not less than 5%.<sup>24</sup>

The Reform Act also created the Commission on Minority Business Development to review and assess all Federal programs designed to promote and foster the development of minority owned businesses. The Act charged the Commission with assessing the overall effectiveness of the Minority Small Business and Capital Ownership Development Program, including not only contract awards, but also development assistance, availability of capital, and

the policies and procedures of major procurement agencies. The Commission issued its final report in September, 1992, which has been a major guide to this Panel.

Title VII of Pub. L. No. 100-656, the Small Business Competitiveness Demonstration Program Act of 1988, established a test program to determine whether:

- (1) the competitive capabilities of small business firms in certain industry categories will enable them to successfully compete on an unrestricted basis for Federal contracting opportunities,
- (2) the use of targeted goaling and management techniques by procuring agencies . . . can expand small business participation in Federal contracting opportunities which have been historically low, despite adequate numbers of qualified small business contractors in the economy, and
- (3) expanded use of full and open competition . . . adversely affects small business participation in certain industry categories . . . .<sup>25</sup>

The test program was initially to run through December 31, 1992. However, it was extended through September 30, 1996 by section 201 of Pub. L. No. 102-366.<sup>26</sup>

Four industry categories were chosen as "Designated Industry Groups" ("DIGs"): construction; refuse systems and related services; architectural and engineering services; and non-nuclear ship repair.<sup>27</sup> Within each DIG, 40% of contracts (by dollar value) were to be awarded to small businesses, with 15% going to "emerging small businesses," which the Act defined as a firm whose size was 50% or less of the small business size standard for firms doing the work required by a contract.<sup>28</sup> Section 15(j) of the Small Business Act, which creates the reservation for small business, was amended within the DIGs to permit a total reservation for emerging small businesses.<sup>29</sup>

As initially passed, section 713(b) of the Act required covered agencies to review their performance with respect to achieving the 40% goal for each of the four DIGs on a quarterly basis. So long as the goal was being met, contracts above the small purchase threshold were to be awarded on an unrestricted basis (subject to set-asides under section 8(a) of the Small Business Act and section 1207 of the FY 1987 Defense Authorization Act).<sup>30</sup> Otherwise, the agency was required to restrict all awards above the small purchase threshold for small business. The quarterly review, it turned out, could not be implemented effectively because data required to

<sup>25</sup>*Id.* at § 711(b), 102 Stat. 3889-90.

<sup>26</sup>106 Stat. 986, 993 (1992).

<sup>27</sup>*Id.* at § 717(a).

<sup>28</sup>*Id.* at §§ 712(a), 718(b).

<sup>29</sup>*Id.* at § 712(b), *amending* 15 U.S.C. § 644(j).

<sup>30</sup>Section 1207 has been codified as 10 U.S.C. § 2323 by section 801 of Pub. L. No. 102-484, the National Defense Authorization Act for Fiscal Year 1993.

make the determinations required by section 713 was not available in time to turn set-asides on and off. In addition, there was confusion as to the use of set-asides under section 1207, which were permitted so long as overall small business goals were being met and awards made without set-asides for small business, but which were not permitted when small business goals were not met and small business set asides were required to take priority over section 1207 awards. Pub. L. No. 102-366 sought to remedy certain of these practical problems by substituting an annual determination for the original quarterly goals.<sup>31</sup>

However, whereas section 713 had established the test at the agency level, section 202(b) of Pub. L. No. 102-366 establishes the test at the buying activity level. As a result, small businesses might have an exclusive preference for Army awards at Ft. Belvoir, Virginia, and section 1207 entities might have a preference for Marine Corps awards at Quantico, Virginia, even though these bases are in the same metropolitan area! The Panel believes that the buying-activity is not the correct place to make the determination of the type of set-aside to use in each DIG, and that Pub. L. No. 102-366 will add greater confusion for small businesses and small disadvantaged businesses. While not part of the formal recommendations detailed below, the Panel suggests that Congress review this feature of Pub. L. No. 102-366 over the next year to see whether an actual problem has arisen.

#### **Women's Business Ownership Act of 1988 (Pub. L. No. 100-533)**

In 1988, Congress also passed the Women's Business Ownership Act of 1988<sup>32</sup> to amend the Small Business Act. The purpose of the amendment is to stimulate the economy by aiding and encouraging the growth and development of small business concerns owned and controlled by women. The amendment did not change existing goals for small and small disadvantaged business but requires separate goals for small business concerns owned by women. It also requires separate reporting on the participation of women owned business in Government procurement activity. Congress established the National Women's Business Council to review the status of women-owned business nationwide and the impact of Federal, State, and local Governments' assistance for women-owned businesses.

#### **Department of Defense Authorization and Appropriations Acts**

In addition to the above laws that have Government-wide applicability, Congress has used various DOD Authorization and Appropriations Acts to mandate specific actions by DOD to assist small and small disadvantaged business.

#### **Department of Defense Authorization Act for FY 1987 (Pub. L. No. 99-661)**

Section 1207 of this Act<sup>33</sup> required that, for FY87 through 89, DOD "exercise (its) utmost authority, resourcefulness, and diligence"<sup>34</sup> in an effort to award 5% of designated

<sup>31</sup>See Pub. L. No. 102-366, § 202, 106 Stat. 986, 994-95 (1992).

<sup>32</sup>Pub. L. No. 100-533, 102 Stat. 2689 (1988).

<sup>33</sup>Pub. L. No. 99-661, § 1207, 100 Stat. 3973-75 (1986).

<sup>34</sup>*Id.* at § 1207(e)(1), 100 Stat. 3974.

procurement funds, though contracts or subcontracts, to small business concerns owned and controlled by socially and economically disadvantaged individuals (as defined in 15 U.S.C. § 637(d)), to historically Black colleges and universities, or to minority institutes as defined by the Secretary of Education. These three groups are frequently referred to as "1207 entities." The purpose of this provision was to increase the number of section 1207 entities in the defense industrial base. To fulfill that purpose, the Act required DOD to make technical assistance available to such entities and permits the Secretary to award contracts on a sole-source basis so long as the price for such contracts does not exceed "fair market costs by more than ten percent."<sup>35</sup>

#### **Department of Defense Appropriations Act, 1990 (Pub. L. No. 101-165)<sup>36</sup>**

Congress directed DOD and each of its purchasing and contracting activities to assist small and minority-owned businesses to participate equitably in furnishing commodities and services financed with funds appropriated under the act by increasing the resources and personnel assigned to promote both small and disadvantaged businesses.<sup>37</sup> Another section of the same law appropriated \$8 million for incentive payments to prime contractors who use Native American corporations as subcontractors.<sup>38</sup>

#### **National Defense Authorization Act for FY90 and 91 (Pub. L. No. 101-189)<sup>39</sup>**

Section 831 of this Act<sup>40</sup> extended the 1207 program through the end of FY93. Section 832 of the Act<sup>41</sup> provides that credit for meeting subcontracting goals can be granted for work done by Indian tribes or tribal companies or by other companies working on Indian lands, provided that not less than 40% of the workers directly engaged in performance of the work are Indian. Section 834 of the Act<sup>42</sup> requires each military department and defense agency to establish a test program for the negotiation of comprehensive small business subcontracting plans. Under the test, prime contractors negotiate a single plan for all contracts in lieu of a single plan for each and every contract, as required by 15 U.S.C. § 637(d). The purpose of the test is to determine if such plans would result in an increase in opportunities for small business concerns under DOD contracts. As originally passed, the test program subjected contractors who failed to make a good faith effort to comply with its company-wide subcontracting plan to liquidated damages under the Small Business Act.<sup>43</sup> Congress suspended this provision in the Small Business Reauthorization and Amendment Act of 1990.<sup>44</sup> The test began in October, 1990, and, although it was scheduled to conclude in September, 1993, the program was extended for an additional year by the FY93 Defense Authorization Act (Pub. L. No. 102-484).

<sup>43</sup>*See* 15 U.S.C. § 637(d)(4)(F).

<sup>44</sup>Pub. L. No. 101-574, § 402, 104 Stat. 2814, 2832 (1990).

**Defense Authorization Act for FY 1991 (Pub L. No 101-510)<sup>45</sup>**

Section 831 of this Act established the mentor-protégé pilot program:

to provide incentives for major Department of Defense contractors to furnish disadvantaged small business concerns with assistance designed to enhance the capabilities of disadvantaged small business concerns to perform as subcontractors and suppliers under Department of Defense contracts and other contracts and subcontracts in order to increase the participation of such business concerns as subcontractors and suppliers under Department of Defense contracts, other Federal Government contracts, and commercial contracts.<sup>46</sup>

The mentor-protégé pilot program is designed to "encourage large defense contractors to enter voluntarily into agreements to enhance the capabilities of small disadvantaged businesses (SDBs) to perform in the defense subcontract vendor base."<sup>47</sup> The mentor business would impart knowledge and skills necessary to help the small businesses to compete in the defense market. DOD reimburses the mentor firm for the total amount of any payments made to the protégé firm as contract payments and for the mentor's costs of giving assistance to the protégé. Congress intended that this program provide "a flexible framework for a mentor firm to develop SDBs capable of meeting available defense opportunities and should foster the establishment of stable, long-term business relationships."<sup>48</sup> Congress also expressed a hope that mentor firms would work with both established and emerging SDBs.<sup>49</sup>

By permitting the Secretary of Defense to promulgate regulations as to the types of firms permitted to participate in the programs, Congress expressed an intention that these regulations should encourage graduates of the Small Business Administration's section 8(a) program to participate as mentor firms.<sup>50</sup> Subsequent subsections provided for a developmental agreement between the parties. Congress intended that this agreement would include "agreed upon factors to assess the protégé firm's progress under the program and parameters concerning the number and type of subcontracts the protégé firm may anticipate being awarded."<sup>51</sup> The procedures the parties should follow in the event of termination should also be enumerated in the agreement.<sup>52</sup> Congress emphasized that the termination of the mentor-protégé agreement should not be construed as requiring the mentor and protégé to terminate or otherwise impair an existing subcontract awarded under the program.<sup>53</sup> In addition, the mentor firms are permitted to recover

<sup>49</sup>*Id.*

<sup>50</sup>*Id.*

<sup>51</sup>*Id.*

<sup>52</sup>*Id.*

<sup>53</sup>*Id.*

some unpaid costs involved in participation in the program through Government credits.<sup>54</sup> Congress also emphasized that an increase in the number of subcontracts awarded to small disadvantaged businesses would be the largest indicator of success of this program.<sup>55</sup>

Section 832 of this Act<sup>56</sup> amended section 1207 of the 1987 DOD Authorization Act by adding a requirement that DOD provide "infrastructure assistance" to historically Black colleges and universities. "Infrastructure assistance" included the establishment and enhancement of programs in scientific disciplines, use of DOD personnel to assist faculty members in the performance of defense related research, establishment of partnerships between historically Black colleges and universities, minority institutions and defense laboratories, the use of scholarships in disciplines critical to the national defense, and equipping or renovating laboratories for use in defense work.

Finally, section 806(a)(1) of this Act<sup>57</sup> established the small purchase threshold at \$25,000 by amending section four of the Office of Federal Procurement Policy Act,<sup>58</sup> and provided that this threshold would thereafter be adjusted for inflation every five years. The Small Business Act was conformed to this threshold.

#### **Defense Appropriations Act, 1991 (Pub. L. No. 101-511)<sup>59</sup>**

In section 8077, Congress made available \$8 million as incentive payments to contractors that had approved subcontracting plans utilizing Native American-owned firms as subcontractors. This action amended the Indian Financing Act of 1974<sup>60</sup> by authorizing the incentive payment of an additional 5% of the value of a subcontract given to Indians. The Act also mandated the "maximum opportunity" for nonprofit agencies for the blind and other severely handicapped individuals to participate as subcontractors and suppliers on DOD contracts.

#### **Defense Appropriations Act for FY92 (Pub. L. No. 102-172)<sup>61</sup>**

In section 8064A, Congress amended the Authorization Act of 1991 to redefine disadvantaged small business concerns specifically to include business entities owned and controlled by Indian tribes as defined in the Small Business Act, Native Hawaiian Organizations, and qualified organizations employing the severely disabled.

<sup>61</sup>105 Stat. 1150 (1991).

### **Defense Authorization Act for FY92 (Pub. L. No. 102-190)<sup>62</sup>**

Sections 811-814 of this Act authorized \$15 million for infrastructure assistance to historically Black colleges and universities, and minority institutions, \$30 million for the Mentor-Protégé Program, and \$9 million for the Procurement Technical Assistance Cooperative Agreement Program.<sup>63</sup> The Technical Assistance Program provides technical assistance in distressed areas. It also authorized DOD to waive surety bonds for certain minority businesses and to award construction contracts to contractors under the 8(a) program without the approval of -- or consultation with -- the SBA. The Act set a goal of 30 contracts to be awarded to minority businesses under the Minority Small Business and Capital Ownership Development Program of the Small Business Administration.

### **Defense Authorization Act for FY93 (Pub. L. No. 102-484)<sup>64</sup>**

In the 1993 Defense Authorization Act, enacted on October 23, 1992, Congress codified all section 1207 related provisions in a single new section 2323 of Title 10.<sup>65</sup> (Section 1207 of Pub. L. No. 99-661 is the DOD preference program for small and disadvantaged business, historically Black colleges and universities, and minority institutions.) In codifying section 1207, Congress retained the 5% goal and extended the program through the year 2000. Congress mandated that the Secretary of Defense ensure that "substantial progress" is made in increasing awards to the 1207 entities and required that the Secretary issue regulations to provide guidance to contracting officers for making payments to the 1207 entities. The Act also requires the issuance of regulations to guide contracting officers in providing incentives for prime contractors to increase subcontract awards to 1207 entities and to emphasize the award of contracts to the 1207 entities in all industry categories. Further, the Act requires the issuance of guidance to DOD personnel on the relationship between the section 2323 program, the 8(a) program (15 U.S.C. § 637(a)), and the small business set-aside program (15 U.S.C. § 644(a)).<sup>66</sup> The Secretary is directed to establish policies to ensure that the current dollar level of contracts awarded under the 8(a) program and the set-aside program are maintained and that implementation of the 1207 program will not adversely affect these programs. Congress authorized \$15 million for "infrastructure assistance" to historically Black colleges and universities, and minority institutions.

Section 802 of the Act directs the Secretary of Defense to enforce the requirement that DOD contractors comply with the subcontracting requirements of section 8(d) of the Small Business Act (15 U.S.C. § 637(d)).

Section 804 of the Act modifies the SBA's Certificate of Competency Program. The modification requires that a contracting officer who determines that a small business concern is nonresponsible notify the small business concern in writing of the determination, and inform the

---

<sup>62</sup>105 Stat. 1290 (1991).

<sup>63</sup>105 Stat. 1423-25.

<sup>64</sup>106 Stat. 2315 (1992).

<sup>65</sup>The other codified provisions are section 806 of Pub. L. No. 100-180 and section 832 of Pub. L. No. 101-189.

<sup>66</sup>Pub. L. No. 102-484, § 801, *adding* 10 U.S.C. § 2323(e)(5).

small business concern that it has the right to request a determination of its responsibility by the SBA. If the small business requests an SBA review, the small business must notify the contracting officer in writing within 14 days after receipt of the contracting officer's notice. The contracting officer may not award the contract during the 14 day period.

Section 805 of the Act extends the Comprehensive Small Business Subcontracting Test Plan, established in Pub. Law No. 101-189, above, through September 30, 1994. The program had been scheduled to expire on September 30, 1993. With respect to the Mentor-Protégé Program, the Act requires DOD to publish and maintain any DOD policy relating to the program in the DFARS. The Act also made changes to strengthen the program as it relates to the Small Business Act. Specifically, the Act directs that the SBA may not make a determination of affiliation or control based on the assistance a mentor firm provides to its protégé under the Program. Further, the Act prohibits the SBA from finding a disadvantaged small business ineligible for assistance under the 8(a) program based on its participation in the Mentor-Protégé Program. The Act also prohibits SBA from requiring a firm entering the Mentor-Protégé Program to submit the agreement or any other document required by DOD to the SBA for review or approval.

In section 807 of the Act, Congress authorized \$55 million for the Mentor-Protégé Program, including \$25 million solely for Mentor-Protégé programs involving major systems. However, the DOD Authorization Act provided only \$45 million for the program as a whole.

#### **4.3.4.3. Law in Practice**

As presently structured, the Small Business Act and DOD-specific legislation consists of myriad ad hoc programs designed to help small businesses and various subcategories of small businesses. The special groups covered by the law include small businesses owned and controlled by socially and economically disadvantaged individuals, emerging small businesses, various ethnic minorities, such as Blacks, American Indians, Aleuts, Hispanics, Hawaiians, historically Black colleges and universities, minority institutions, and women owned and operated small businesses. The Small Business Act, particularly the section 8(a) program, is the broadest program created by Congress to promote and foster small business and small businesses owned and controlled by socially and economically disadvantaged individuals. In 1992, the section 8(a) program accounted for 49% of all DOD contract awards to minority business firms, a figure that totaled approximately \$5.2 billion.<sup>67</sup>

#### **Small Disadvantaged Business Set-Aside Program**

Section 1207 of Pub. L. No. 99-661 gave DOD authority for other than "full and open" competition to meet the goal of awarding 5% of its contract dollars to small and disadvantaged business concerns. This authority has now been codified at 10 U.S.C. § 2323. Small and disadvantaged businesses are defined in the same manner as those firms qualifying for assistance under section 8(d) of the Small Business Act -- they must be owned by socially and economically

---

<sup>67</sup>Office of the Secretary of Defense, Directorate of Information Operations and Reports.

disadvantaged individuals who have day-to-day management control. Awards under the program are limited to small and disadvantaged businesses, historically Black colleges and universities, and minority institutions. As administered today, the contracting officer must first determine that there is a reasonable expectation of competition from at least two qualified sources ("the rule of two"). Second, the contracting officer must reasonably conclude that the award price will not exceed the fair market price by more than 10%. Third, the contract value must be over \$25,000. Congress also mandated that the small and disadvantaged business program should not displace the small business program or the 8(a) program. The DOD order of precedence for set-asides is: (1) total set-aside for small and disadvantaged business concerns; (2) total set-aside for small business concerns; and (3) partial set-asides for small and disadvantaged businesses with preferential consideration for small and disadvantaged business concerns.<sup>68</sup> Once a product or service is procured successfully by a contracting office through the section 1207 set-aside program, future requirements for that product or service are thereafter reserved as a set-aside. In FY91, DOD awarded \$4.4 billion, 3.5% of its prime contract awards, under the set-aside program.

In practice there has been confusion over the meaning of the terms "economically and socially disadvantaged," which are key terms in the Small Business Act as well. Congress intended the terms to be more broadly construed in section 1207 than in section 8(a) of the Small Business Act.<sup>69</sup> Congress likened section 1207 to small business set-asides under the Small Business Act, considering both to be procurement policies, not business development programs, like section 8(a), that requires considerable involvement by the SBA. Many firms that have successfully completed or graduated from the 8(a) program are excluded from the 1207 program because they exceed the size standard. There has been some consideration given to targeting the section 1207 program to assist new and emerging small disadvantaged businesses.<sup>70</sup>

The DOD report on the 1207 Program for FY91 indicates great variation in the success rates of its commands. Some commands report awarding tenths of one percent of prime contract dollars to 1207 entities while others have reported awards at double digit levels.<sup>71</sup> Overall, subcontract awards to 1207 entities declined two-tenths of one percent in FY91 compared to the preceding year, the first decrease since the inception of the program.<sup>72</sup> The response rate to the program by historically Black colleges and universities and minority institutions continues to be slow.<sup>73</sup>

Some critics have charged that the 1207 program -- combined with the Competitiveness Demonstration Program -- has a negative effect on non-minority construction contractors. During hearings conducted by the House Armed Services Committee in 1990, for example, one witness testified that it has had an adverse impact on non-minority construction contractors,

---

<sup>68</sup>DFARS 219.504.

<sup>69</sup>H.R. REP. NO. 101-665, 101st Cong., 2d Sess. 319-21, *reprinted in* 1990 U.S. Code, Cong. & Admin. News 2931.

<sup>70</sup>*Id.* at 322-23.

<sup>72</sup>*Id.*

<sup>73</sup>*Id.* at 230.

contrary to the congressional intent. In particular, the witness criticized the program because in some geographic areas it foreclosed small businesses from bidding on most or all contracts in FY89, since DOD relied on construction for a disproportionate share of minority participation. This was exacerbated by the Small Business Competitive Demonstration Program which allowed section 1207 set-asides for minority contractors while disallowing small business set-asides. The witness also claimed that the 1207 program has increased construction costs to DOD because of an effective lack of competition. Finally, the witness stated that it has been used by DOD to undermine the Small Business Competitiveness Demonstration Program because a threshold that had protected certain construction jobs from being set aside was lowered to a level that meant virtually all defense construction jobs would be eligible for set aside.<sup>74</sup> However, these views were sharply disputed by the Chairman of the Board of the National Association of Minority Business, who argued that small business programs were protected by statute and regulation from "intrusions by the SDB program." He also stated:

This falsehood that small businesses are losing contract opportunities, as a result of the SDB Program, has been purposely generated in some circles by opponents of any programs intended to benefit the minority population of this country. The allegation unfairly and unnecessarily seeks to alienate the small business community and, as a result, everyone loses!<sup>75</sup>

#### **Section 8(a) Program**

Section 8(a) of the Small Business Act authorizes the Small Business Administration to enter into all types of contracts with other agencies and to let subcontracts for performing those contracts to firms eligible to participate in the program. Under the program, the SBA certifies to an agency that the SBA is competent to perform a specific contract. Contracts under the program may be either sole source or awarded on a competitive basis. If mutually agreeable terms and conditions are established, the contracting officer is authorized to award the contract to the SBA. In an acquisition offered to the SBA in support of the section 8(a) program, the competition takes place among eligible 8(a) firms when: at least two eligible and responsible 8(a) firms will submit offers; the award can be made at a fair market price; and the anticipated award price of the contract, including options, will exceed \$5 million for acquisitions assigned manufacturing standard industrial classification codes and \$3 million for all other acquisitions. In a competitive situation, the contracting officer may negotiate directly with competing 8(a) firms. When an acquisition exceeds the competitive threshold, the SBA may accept the requirement for a sole source 8(a) award if:

---

<sup>74</sup>Statement by Bill Craven, representing the Associated Builders and Contractors, before the House Armed Services Subcommittee on Investigations, March 15, 1990.

<sup>75</sup>Statement by Clemon Wesley, Jr., Chairman of the Board, National Association of Minority Business, before the Investigations Subcommittee, Committee on Armed Services, House of Representatives, April 30, 1992. (The Panel heard many of these same points and divergent views on these special programs during a public comments session held in the Rayburn House Office Building on July 31, 1992.)

- There is not a reasonable expectation that at least two eligible and responsible 8(a) firms will submit offers at a fair and reasonable price; or
- The SBA determines that an 8(a) concern owned and controlled by an economically disadvantaged Indian tribe is eligible and responsible and needs the acquisition for its business development.

The final report of the U.S. Commission on Minority Business Development concluded that "mismanagement is so pervasive and so repetitive" in the 8(a) program that it cannot "be presumed to have occurred merely as the result of chance." The Commission recommended the termination of the program as part of the Small Business Administration and its transfer to another Federal agency.<sup>76</sup> Speaking in support of that finding, Weldon Latham, the General Counsel of the National Association of Minority Business, said,<sup>77</sup>

While there is no question that the 8(a) program is the most effective such program ever devised to significantly increase minority business access to contracts in the federal marketplace, the implementation of that program by the SBA and the treatment of the constituent minority firms intended to be served by this program, has often resembled that of a plantation mentality.

Similarly, a report by the General Accounting Office (GAO), published in January 1992, noted that, in 76% of the cases it reviewed for the first 11 months of 1990, the SBA did not meet the statutorily mandated 90 day limit to process applications. SBA does not know the full extent of management and technical assistance provided to 8(a) firms because it does not track the various forms of assistance provided by contractors and others. As of October 1, 1991, only 57% of the firms in the program had the required new or revised business plans approved by the SBA. Without such plans, SBA cannot properly monitor the development of 8(a) firms, and the firms themselves are statutorily ineligible for Government contracts. Nonetheless, SBA had chosen to work with the firms rather than withhold contracts as required by law. Other criticisms of the SBA program noted by GAO include failure to assure equitable geographic distribution of 8(a) contracts, inadequate use of competitive bidding, and missing and inaccurate data.<sup>78</sup>

### **Small Business Competitiveness Demonstration Program**

Congress created the Small Business Competitiveness Demonstration Program in 1988 as part of the Business Opportunity Development Reform Act. The program is designed to deal with the fact that many agencies, in order to assure small business participation in a fair proportion of Federal procurements as mandated by Congress, tend to concentrate awards to

<sup>76</sup>UNITED STATES COMMISSION ON MINORITY BUSINESS DEVELOPMENT, FINAL REPORT 48 (Sept. 1992).

<sup>77</sup>Weldon Latham, General Counsel of the National Association on Minority Business, speaking before the House Committee on Government Operations (July 28, 1992).

<sup>78</sup>GAO, *Small Business--Problems in Restructuring SBA's Minority Business Development Program 2-3* (RCED-92-68, January, 1992) [hereafter GAO Small Business Report].

small businesses in a limited number of categories, naturally dominated by small businesses, through the use of set-asides. The agencies participating in the program, including DOD, are required to establish a 40% small business participation goal within designated industry groups. The participating agencies may count all contract awards of \$25,000 or more to any small business to determine if the goal is met. Further, participating agencies are required to offer contracting opportunities above the \$25,000 small purchase threshold to small businesses as long as small business participation does not fall below the specified goal. If a 30% goal<sup>79</sup> is not met, agencies reinstitute set-asides and use them until the goal is attained.

The Demonstration Program began on January 1, 1989, and has been extended through September 30, 1996. According to the Office of Federal Procurement Policy (OFPP), the objectives of the Demonstration Program "are largely being achieved" by the participating agencies, including DOD.<sup>80</sup> The Demonstration Program established 40% goals for small business participation in the four industry groups covered by the program. OFPP concluded that the 10 participating agencies collectively have exceeded both the 40% small business goal and the 15% emerging small business award goals for all but one of the industry categories, Architectural and Engineering Services.<sup>81</sup>

### **Mentor-Protégé Pilot Program**

As noted above, this program was passed in 1990,<sup>82</sup> implemented in 1991, and amended during the Persian Gulf crisis in 1991.<sup>83</sup> In its comments to the Panel, the Air Force Systems Command noted that the 1991 amendment strengthened the original program by allowing mentor firms to recover costs incurred in assisting protégé firms as direct items of cost on defense contracts, through indirect expense recovery or through separate contracts or agreements.<sup>84</sup> The Air Force also commented that the future cost impacts of the amended program may be substantial.<sup>85</sup> Section 307 of the National Defense Authorization Act for 1993 continued the pilot mentor-protégé program and authorized \$55 million for the performance of its functions.<sup>86</sup> This section directed the Secretary of Defense to publish DOD's policy on the program and any regulations or guidance it has issued in the Department of Defense Supplement to the Federal Acquisition Regulations.<sup>87</sup> Congress also directed the Secretary to make certain changes to strengthen the program's small business aspects.<sup>88</sup>

---

<sup>79</sup>The 30% goal is established by regulation rather than statute. It applies only to subclassifications within the four designated industry groups.

<sup>87</sup>*Id.*

<sup>88</sup>*Id.*

The U.S. Commission on Minority Business recently examined the Mentor-Protégé Program and other congressionally mandated efforts to help small businesses and socially and economically disadvantaged businesses by selective reallocation of Government contracts. The Commission endorsed these efforts but concluded that they have been only partially successful. In its final report, the Commission stated that goals are of "marginal utility" and that the goal setting system is "mismanaged."<sup>89</sup> The Commission endorsed the idea of partnerships between large firms and small disadvantaged businesses such as those promoted by the Mentor-Protégé Program. However, since the program was authorized by Pub. L. No. 101-510, DOD has approved only 17 Mentor-Protégé Agreements. Some sources point out, however, this low figure may be partially attributable to the turbulence that has accompanied the downsizing of the defense industrial base. For many of these same reasons, company-wide contracting plans, authorized as a test by DOD by Pub. L. No. 101-189 in 1990, have not resulted in a significant number of such plans, even though private industry had indicated that the change would shift greater resources to finding and qualifying more small business subcontractors.<sup>90</sup>

A significant concern with the implementation of the program is that the close relationship between the mentor and the protégé could cause the protégé firm to lose its status as a small and disadvantaged business under the Small Business Administration. Additionally, under current SBA rules, an 8(a) firm must receive prior approval from the SBA before becoming a protégé and management assistance provided by the mentor firm is regarded as a management agreement requiring SBA prior approval even though DOD had already approved the developmental assistance provided by the mentor. Failure to obtain SBA approval could result in termination of 8(a) assistance to the protégé.<sup>91</sup>

### Summary

There are three general problem areas, all closely related, suggested by the Panel's examination of the Small Business Act and the statutes applicable to DOD:

- **Volatility and Complexity of the Law:** Over the years Congress has used the Small Business Act, its various amendments, and DOD appropriations and authorization acts as the primary means to promote a more equitable distribution of Federal procurement dollars among small and minority owned businesses. While these programs have had a generally positive impact, they are encumbered by "needless bureaucratic entanglements" that, in the words of the Chairman of the U.S. Commission on Minority Business Development, "strangle the lifeblood from businesses owned by minorities . . ."<sup>92</sup> Frequent changes to the small business statutes detract from the cohesiveness of the effort as a whole, even as they create a system that is complex, confusing, and uncertain. Myriad certification processes have also developed over the years that are cumbersome, duplicative, and time-

<sup>90</sup>*Id.* at 77.

<sup>91</sup>S. REP. NO. 102-352, 102d Cong., 2d Sess. 231-32.

<sup>92</sup>U.S. COMMISSION ON MINORITY BUSINESS DEVELOPMENT, FINAL REPORT xii (Sept. 1992).

consuming.<sup>93</sup> Burdensome as they are, certification and eligibility criteria are only parts of a complex administrative scheme that varies by program and agency, compounding the confusion that surrounds current efforts to promote small business concerns. The Panel believes that the small business area is characterized by a patchwork of legislative and administrative efforts, often based on expediency and good intentions rather than on a global view of how small businesses are to be helped by Federal procurement programs.

- **Need For Clear Goals And Objectives:** The problem of complex and constantly changing statutes is compounded by the absence of clear legislative goals and specific objectives. Many of the enacted programs contain no statutory language explaining the need for the program, its rationale, or its purpose. Often the purpose of a statute is expressed solely as "to promote small business," a vague statement at best. Pub. L. No. 99-661, for example, created the special program for historically Black colleges and universities, and minority institutions but does not explain the necessity for the program, how to judge its success, or how to integrate the program with other measures designed to assist minority business. Likewise, the legislative history of Pub. L. No. 101-574 does not fully explain the congressional decision to suspend the liquidated damages provision of the comprehensive small business subcontracting plan.<sup>94</sup> This lack of legislative clarity naturally leads to great difficulties for those who must administer these programs, particularly the Offices of Small and Disadvantaged Business Utilization in OSD, the uniformed services, and the defense agencies. Despite the great personal dedication of those who execute DOD small business policies, compliance with uncertain and frequently changing program goals represents a burden on the DOD procurement process that adds time, cost, and administrative overload.
- **Need For Streamlined Acquisition Procedures:** The legal complexity and unclear objectives surrounding the small business area also highlight the need for streamlined acquisition procedures. While many of the programs outlined above have been "reinforced" by a variety of compliance mechanisms, including the added "visibility" of individual reporting requirements and mandatory SBA involvement, the net effect of these measures is an overlay of procedural impediments that cannot always be justified by the value they add to the process. It is clearly in the best interests of the Government to reduce these burdens wherever possible as it seeks to reduce overhead costs in an era of reduced defense resources. Moreover, there was a surprising consensus from the small business community on the need to simplify the contracting process in order to make it easier for small businesses of all kinds to compete for procurement dollars. In particular, simplified purchase procedures, reductions in required paperwork during all phases of the contracting process, and wider access to procurement information were the factors consistently cited by the small business community as being important concerns.

<sup>94</sup>Pub. L. No. 101-574, 104 Stat. 2814 (1990).

#### **4.3.4.4. Recommendations and Justification**

##### **General Recommendations**

There are a number of reasons why this Panel refrains from making a more detailed and comprehensive set of recommendations concerning the Small Business Act, the most important of which is that this responsibility was not mandated by its charter. The body which was given that mission, the President's Commission on Minority Business Development, has spent several years compiling a report whose completion in September, 1992, marks the beginning of a period in which small business issues will be given intense scrutiny. Because DOD is an important stakeholder in this process, however, it is appropriate to state here some conclusions that may have a bearing on this larger debate.

##### **I**

##### **Congress Should Replace the Current Patchwork of Small Business Laws With a Comprehensive and Coherent Program With Clearly Stated Objectives.**

The frequent changes in the laws affecting small and minority business create confusion and uncertainty for administrators and contracting officers and, perhaps more importantly, among the intended beneficiaries of the legislation. The lack of clear objectives also makes it difficult for administrators in both the SBA and DOD to properly implement the law and issue necessary regulatory guidance.

##### **II**

##### **Congress Should Look Closely at Ways to Augment its Effort to Help Small Business, Especially in Promoting Minority Business.**

Present efforts to promote small business largely focus on goal-setting as a means to reallocate Federal procurement dollars to small businesses and small businesses owned and controlled by socially and economically disadvantaged individuals. While the objective remains laudable, this approach has also led to persistent problems: the frequent need to "fine tune" programs; ever-increasing numbers of reports and certifications; and continued expressions of dissatisfaction by many of the intended beneficiaries of these programs. While access to procurement opportunities represents an important component in encouraging support for small business, two other equally significant needs are access to capital and access to training. These neglected legs of the "triad" of support to small business have been specifically addressed by the Commission on Minority Business Development. The Panel recommends those findings to the Congress as being consistent with our own.

### III

#### **In Accordance With the Provisions of the Federal Advisory Committee Act, the Secretary Of Defense Should Give Appropriate Consideration to the Appointment of a DOD Advisory Committee on Small Business.**

The Panel received testimony and recommendations on this point from several representatives of the small business community, particularly the National Association of Minority Business (NAMB). In suggesting a rationale for this committee, NAMB said,

... it would provide general defense policy advice to the Secretary of Defense concerning small business matters, any prospective change in policy affecting small business procurement programs, matters arising in connection with the administration of small business policy of the Department of Defense, and the effect of small business policy initiatives on the small business community. The Committee would advise, consult with, and make recommendations to the Secretary of Defense and other relevant agencies on defense related small business issues. It would serve as an objective source of knowledge and information on developments in the public and private sector which relate to small business concerns.<sup>95</sup>

In considering this recommendation, the Panel notes the far-reaching effort that DOD has made to implement both the spirit and the letter of the laws affecting small business, despite the problems caused by frequent changes in those laws. In particular, the Offices of Small and Disadvantaged Business Utilization throughout DOD have been the focal points for this effort, as well as an important forum for the exchange of information on small business issues. However, a high-level committee along the lines proposed by NAMB could provide useful and timely advice to the Secretary of Defense. Given the need for DOD to make further progress on small business issues, the present Panel recommends that the Secretary of Defense give appropriate consideration to creating this body.

#### **4.3.4.5. Relationship to Objectives**

The Panel recommends the statutory changes set out below in the belief that they will promote wider participation of small business concerns in DOD contracting, particularly by disadvantaged and minority business concerns. The Panel's objective is to increase the opportunities for these entities to participate in DOD contracting while at the same time reducing the administrative burden for both the Government and its suppliers.

---

<sup>95</sup>Letter from Dwight Weaver, National Association of Minority Business to Acquisition Law Task Force, Subject: Small Business Advisory Committee, Nov. 13, 1992.

#### **4 3.4.6. Specific Recommendations and Proposed Statutes**

##### **4.3.4.5.1. Small Business Act**

###### **Miscellaneous**

The Panel recommends that the following sections of the Small Business Act be retained without modification: 15 U.S.C. § 631; 15 U.S.C. § 631a; 15 U.S.C. § 631b; 15 U.S.C. § 632; 15 U.S.C. § 636, and 15 U.S.C. § 638.<sup>96</sup>

###### **Direct Contracting With Small Business Under Section 8(a)**

###### **Amend**

Under present law and regulations, contracts are awarded to minority small businesses under the SBA section 8(a) program by the contracting agency awarding a contract to SBA and SBA awarding a contract to the small business. Usually both contracts contain or reference a "tripartite agreement" which, among other things, permits the contracting agency to bypass the SBA for most contract administration matters and gives the small business the benefit of the Changes and Disputes clauses. Both contractors and DOD agencies commented that this contractual structure is overly complex, redundant, and unnecessary. The Panel recommends an amendment to section 8(a) of the Small Business Act, 15 U.S.C. § 637(a), to permit the contracting agency to award a contract directly to the small business unless the contracting officer or the small business specifically requests that SBA be a signatory to the contract. This amendment would not affect any other assistance that SBA normally offers to small businesses. The language of the proposed amendment is as follows:

###### § 637. Additional powers

(a)(1) It shall be the duty of the Administration and it is hereby empowered, whenever it determines such action is necessary or appropriate--

(A) to enter into contracts with the United States Government and any department, agency, or officer thereof having procurement powers obligating the Administration to furnish articles, equipment, supplies, services, or materials to the Government or to perform construction work for the Government. In any case in which the Administration certifies to any officer of the Government having procurement powers that the Administration is competent and responsible to perform any specific Government procurement contract to be let by any such officer, such officer shall be authorized in his discretion (i) to let such

---

<sup>96</sup>The Panel did not review 15 U.S.C. §§ 633, 634, and 635 because they deal with the organization and general powers of the Small Business Administration and, as such, do not bear on DOD procurement.

procurement contract to the Administration upon such terms and conditions as may be agreed upon between the Administration and the procurement officer or (ii) to award such procurement contract directly to a socially and economically disadvantaged small business designated by the Administration provided that the small business does not request that the award be made through the Administration. Whenever the Administration and such procurement officer fail to agree, the matter shall be submitted for determination to the Secretary or the head of the appropriate department or agency by the Administrator . . . .

## **Implementation of Simplified Acquisition Threshold**

### **Amend**

In order to implement the simplified acquisition threshold, the Panel recommends that section 8(d) of the Small Business Act, 15 U.S.C. § 637(d), be amended to change the phrase "small purchase threshold" wherever it appears to "simplified acquisition threshold;" that section 8(e) of the Act, 15 U.S.C. § 637(e), be repealed in its present form and replaced with the language shown below, and that sections 8(f), 8(g), and 8(i) of the Small Business Act, 15 U.S.C. § 637(f) and (g), be deleted:

(e) PROCUREMENT NOTICE.—Publication, notification, and availability requirements for solicitations leading to the award of contracts for property and services are those set forth in section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416).

In addition, section 8(h) of the Act should be repealed since it duplicates 10 U.S.C. § 2304(f) and 41 U.S.C. § 253(f). Finally, section 8(j) of the Act should be renumbered as section 8(f), 15 U.S.C. § 637(f).

To implement the simplified acquisition threshold, the Panel also recommends the following amendment to section 15(j) of the Small Business Act, 15 U.S.C. § 644(j):

(j) Each contract for the procurement of goods and services which has an anticipated value not in excess of the ~~small purchase~~ simplified acquisition threshold and which is subject to ~~small~~ simplified purchase procedures prescribed by 10 U.S.C. § 2304(g) or 41 U.S.C. § 253(g) shall be reserved exclusively for small business concerns unless the contracting officer is unable to obtain offers from two or more small business concerns that are competitive with market prices and in terms of quality and delivery of the goods or services being purchased; provided, however, that nothing in this subsection shall be construed as precluding the award of contracts with a value not in excess of the simplified

acquisition threshold under the authority of section 8(a) of this Act (15 U.S.C. § 837(a)), section 2323 of Title 10 or under section 712 of Public Law 100-656. In utilizing these procedures, contracting officers shall, wherever circumstances permit, choose a method of payment which minimizes paperwork and facilitates prompt payment to contractors.

#### **4.3.4.6.2. Public Laws**

Subject to its overall recommendation that Congress make a comprehensive revision of all small business and small disadvantaged business statutes affecting Federal procurement generally and DOD procurement specifically, the Panel recommends that the small business portions of the following public laws be retained: Pub. L. No. 99-272; Pub. L. No. 101-165; Pub. L. No. 101-189; Pub. L. No. 101-511; Pub. L. No. 102-172; Pub. L. No. 102-190; Pub. L. No. 102-366.

#### **Mentor Protégé Pilot Program (Pub L. No. 101-510)**

##### **Retain**

The Panel recommends that this statute be retained as written. Because this is a recent statute for which the implementation process was only begun one year ago, time should be given for the program to be set into motion and its provisions observed in practice before any changes are made. Congress has endorsed this recommendation by retaining the statute in the 1993 National Defense Authorization Act and by providing for its implementation in the regulations.

#### **Small Business Subcontracting Plans**

##### **No Action**

The Panel was urged by many commentators, in Government, industry and small business, to recommend the immediate implementation of company-wide small business subcontracting plans by amending 15 U.S.C. § 637(d). Industry, in particular, stated that the contract-by-contract reporting required by current law and regulation is burdensome and costly. In response, small business took the position that under the present structure, there would be no assurance that small businesses got "high technology" work (versus construction or janitorial work) without imposing contract-by-contract requirements.

A number of commentators also stated that the current structure of small business contracting could be made more effective if offerors were required to submit small business plans at the time of consideration for contract award and if award factors included the extent of minority participation in planned subcontracts. Alternatively, some suggested that achievement of subcontracting goals should be reflected in increased award or incentive fees or in authorized profit levels. No one spoke in favor of liquidated damages for failure to comply with a subcontracting plan, with many stating that liquidated damages were "overkill" that could not practically be implemented.

In light of these somewhat conflicting positions and the absence of data concerning the effectiveness of company-wide subcontracting plans, the Panel recommends that: the liquidated damage provisions in 15 U.S.C. § 637(d), which are today suspended,<sup>97</sup> remain suspended until the end of the test program; but that Congress immediately take up the issue of small business subcontracting upon the termination of the test program created by Pub. L. No. 101-189.

## **Certificates of Competency**

### **Repeal**

Section 804 of the 1993 Defense Authorization Act modifies the Certificate of Competency procedures solely for DOD contracts. Because it applies only to DOD contracts, it is likely to be burdensome to small business, since it will require small businesses to comply with two different statutory requirements, one for DOD and another for civilian agencies. The Panel can discern no value added by this section and recommends that it be repealed to revert to the former system so that small business is not confronted with two regulatory schemes. Alternatively, the 14 day notice period should be shortened to 5 days with an added option for the contracting officer to refer a dispute over a contractor's responsibility directly to the SBA for a COC. If this section is not repealed, it should be expanded to apply both to DOD and civilian agencies to spare small businesses the burden of a complex, dual system. Finally, the application of either alternative should be expanded to encompass all small business.<sup>98</sup>

---

<sup>97</sup>See Pub. L. No. 101-574, § 402, 104 Stat. 2832 (1990).

<sup>98</sup>The Panel received a written comment on this point from the SBA: "While the SBA supports repeal of this legislation, we cannot conceive of any reason that the problem resulting from (it) should be imposed on other Federal agencies." Letter, Robert J. Moffitt, SBA Associate Administrator for Procurement Assistance to Donald H. Freedman, Executive Secretary, Acquisition Law Advisory Panel, Dec. 3, 1992.

#### **4.3.5. 25 U.S.C. § 1544**

### **Additional compensation to contractors of Federal agency**

#### **4.3.5.1. Summary of the Law**

This section allows a contractor working for a Federal agency to pay an additional amount of compensation equal to 5% of the amount paid, or to be paid, to a subcontractor or supplier if it is an Indian organization or Indian-owned enterprise.

#### **4.3.5.2. Background of the Law**

This law was passed as part of Pub. L. No. 100-442 in September, 1988.<sup>1</sup> The law was addressed in H.R. Comm. Rep. No. 100-838.<sup>2</sup>

#### **4.3.5.3. Law in Practice**

According to the Office of the Small and Disadvantaged Business Utilization, Office of the Under Secretary of Defense for Acquisition, they have no knowledge of DOD money paid under this section nor any related effect on DOD acquisition. However, they also stated that this issue was of great concern to the Indian and minority business community, presumably because of its impact upon non-DOD Government procurement.<sup>3</sup> This statute puts the Bureau of Indian Affairs (BIA) in much the same position with respect to Indian contracts that the Small Business Administration exercises in administering the 8(a) program. Those functions include issuing certificates of competency and resolving other contract disputes that may arise with Indian-owned concerns seeking to do business with the Federal Government.

The law is a relatively recent one, so BIA currently has no dollar figures available on the amount of DOD dollars affected by this statute. However, there is some reason to think that, like other set-asides, there may be an undetermined amount at the subcontracting level. Many tribal industries, for example, compete with a variety of second and third-tier subcontracts, especially in supplying clothing, electronics, and other piece-work goods to prime Federal contractors.

#### **4.3.5.4. Recommendation and Justification**

##### **Retain**

This is a new program with clear potential for fostering productive mentor-protégé type relationships. Although this law now has minimal impact on DOD, it is also possible that Indian

---

<sup>1</sup>Act of Sept. 22, 1988, Pub. L. No. 100-442, § 504, 102 Stat. 1763, 1765.

<sup>2</sup>H.R. REP. NO. 838, 100th Cong., 2d Sess. 6 (1988).

<sup>3</sup>Letter from the Office of the Small and Disadvantaged Business Utilization, Office of the Under Secretary of Defense for Acquisition (May 28, 1992).

subcontractors and suppliers developed under this program could be viable competitors for DOD contracts in the future. Because of this potential, as well as minimal present impact on DOD contracting, the Panel recommends retention.

#### **4.3.5.5. Relationship to Objectives**

Retaining this statute will assist in establishing a balance between an efficient process and socioeconomic policies.

## **4.3.6. 41 U.S.C. § 417a**

### **Procurement data**

#### **4.3.6.1. Summary of the Law**

This law requires each Federal agency to report to the Office of Federal Procurement Policy "the number of small business concerns owned and controlled by women and the number of small business concerns owned and controlled by socially and economically disadvantaged business, by gender, that are first time recipients from such agency."

#### **4.3.6.2. Background of the Law**

This section, passed in 1988 by the 100th Congress, was enacted as part of the Women's Business Ownership Act of 1988 to enhance business opportunities for women owned businesses.<sup>1</sup>

#### **4.3.6.3. Law in Practice**

When a contract is signed, DFAR 204.6 requires DOD to process DD Form 350 which contains the information to fulfill the requirements of this statute. According to the Deputy Assistant Administrator for Federal Procurement Policy, this information is collected automatically by their office through the use of contract establishment numbers and comparison to previous years.<sup>2</sup> Therefore, this section imposes no additional reporting requirement on any Government agency.

#### **4.3.6.4. Recommendation and Justification**

##### **Retain**

Because this statute imposes no great administrative burden on any Government agency but provides a means of collecting useful information, the Panel recommends its retention.

#### **4.3.6.5. Relationship to Objectives**

Retention of this section promotes the Panel's objective of fulfilling reporting requirements by using data that already exists and is already collected without imposing additional administrative burdens.

---

<sup>1</sup>Women's Business Ownership Act of 1988, Pub. L. No. 100-533, § 502, 102 Stat. 2689, 2697.

<sup>2</sup>Telephone interview with the Deputy Assistant Administrator for Federal Procurement Policy (May 4, 1992).

## 4.4. Protection of the Environment

### 4.4.0. Introduction

The Panel reviewed a number of statutes on environmental protection in order to determine if any of them represented an unusual burden upon DOD or its contractors. While some, such as the Marine Mammal Protection Act (10 U.S.C. § 7524), were primarily intended to correct specific defense policies, most were not. Eventually, only three statutes were selected for an in-depth review: the Clean Water Act (33 U.S.C. § 1368); the Clean Air Act (42 U.S.C. § 7606); and the Resource Recovery & Conservation Act (RCRA, 42 U.S.C. § 6962). All three laws clearly affect Government procurement, either by requiring contracts to contain implementing clauses or, in the case of RCRA, by directing agencies to establish "affirmative procurement programs." However, none of these laws contain provisions which appear to be unreasonable or to have an unusual impact upon defense-related firms. For that reason, all three of the laws reviewed here are recommended for retention without further amendment.

The Panel was aware of a September, 1989, report of a special environmental panel assembled under the auspices of the Defense Management Review, which uncovered 78 Federal statutes (as well as four Executive Orders and 8000 pages of regulations) that directly or indirectly affected the acquisition process.<sup>1</sup> However, when the Panel reviewed these 78 items, most were found to apply to businesses generally -- and hence did not warrant a special exception for DOD contractors -- or were related to environmental reporting or potential cleanup issues for DOD. Those concerns, while important, were only indirectly related to acquisition law.

While the Defense Management Review (DMR) Panel recommended a number of changes to individual statutes, one of its principal findings deserves special mention here:

A holistic approach to (environmental, safety, and occupational health) must begin with Congressional review of the patchwork quilt of Federal environmental laws. Recodification into a unified, consistent, and simplified scheme is essential. Currently, Federal agencies expend a large portion of their (environmental) resources compiling and filing reports -- not improving manufacturing processes, identifying environmentally safe substitutes for hazardous materials and developing environmentally sound advances in technology.<sup>2</sup>

Although three years have elapsed since the publication of this report, there is abundant evidence that the need identified by the DMR report has become progressively more acute. A study completed by the General Accounting Office (GAO) in October 1992, for example, documented a number of cases which had arisen concerning discrepancies in DOD reimbursement

---

<sup>1</sup>U.S. Dept. of Defense, *Defense Management Review Background Analysis: Environmental Panel*, September, 1989, Washington, DC, pp. 1-2.

<sup>2</sup>*Id.*, p. 5.

of three large defense contractors for the costs they had incurred at four Superfund cleanup sites. Although these reimbursements already totaled \$50 million through mid-1992, the GAO report noted that the potential for "future payments could be many hundreds of millions of dollars."<sup>3</sup> The report also noted the inconsistencies in the reimbursements allowed by Government contracting officers, actions that differed widely in both form and substance despite the high-dollar stakes which were involved. And it was admirably concise in summing up the principal reason for these inconsistencies: "These variations can occur because federal acquisition laws, regulations, and policies do not provide specific guidance to decision makers on how to treat environmental cleanup costs."<sup>4</sup>

As is the case with that part of this report dealing with small business, the Panel finds that environmental law is a field in which defense and defense acquisition are simply two stakeholders among a number of others. Accordingly, the Panel did not attempt to make the comprehensive revision suggested by the DMR report, leaving that task for others with particular expertise in environmental issues.

## 4.4.1. 33 U.S.C. § 1368

### Clean Water Act

#### 4.4.1.1. Summary of the Law

Section 1368 (section 508 of the Clean Water Act) prohibits Federal agencies from entering into procurement contracts that are to be performed at any facility from which a conviction of the contractor under section 1319(c) of Title 33 arose.<sup>1</sup> When the Environmental Protection Agency (EPA) certifies that the condition giving rise to the conviction has been corrected, the prohibition is lifted.<sup>2</sup>

The EPA is instructed to establish notification procedures to facilitate Federal agencies' compliance with the Act.<sup>3</sup> The original statute called upon the President to issue an order requiring relevant Federal agencies to "effectuate the purpose and policy of this chapter."<sup>4</sup> Also, the President is authorized to provide exemptions from the prohibition when he determines an exemption to be in the paramount national interest.<sup>5</sup> Finally, the statute requires the President to report to Congress any exemptions granted<sup>6</sup> and the measures taken to implement the Act's provisions.<sup>7</sup>

#### 4.4.1.2. Background of the Law

Congress enacted the statute in 1972 as a parallel provision to a 1970 amendment to the Clean Air Act<sup>8</sup> so that the Federal Government would not patronize or subsidize polluters through its procurement practices.<sup>9</sup> No evidence of resistance to the enactment of this statute can be found in the legislative history, and the House, Senate, and Conference versions of the bill were substantially the same.<sup>10</sup> The Senate report did elaborate on the statute's facility specific scope. A second plant within a corporation seeking a contract unrelated to a violation at the first plant should be not be barred from bidding and receiving the contract. However, if the second plant were to bid and transfer other work to the violating plant, the intent of the statute would be circumvented, and in such a case the second plant would be barred from bidding until the first plant returns to compliance.<sup>11</sup> The report also emphasizes that in order for the statute to be

<sup>10</sup>S. CONF. REP. NO. 1236, 92d Cong., 2d Sess. (1972).

<sup>11</sup>S. REP. NO. 414, 92d Cong., 2d Sess. (1972).

effective, the EPA must quickly and accurately apprise Federal agencies of a facility's current status.<sup>12</sup>

In 1987 and 1990, Congress amended section 1319 and expanded the number and types of violations that can serve as bases for debarment from procurement contracts.<sup>13</sup>

#### 4.4.1.3. Law in Practice

The Federal procurement provisions of both the Clean Air and Clean Water Acts (Acts) were implemented by Exec. Order No. 11738,<sup>14</sup> FAR subpart 23.1,<sup>15</sup> and EPA regulations part 15.<sup>16</sup> The Executive Order authorizes the EPA to compile and maintain a list of violating facilities and issue appropriate rules and regulations, forbids Federal procurement from facilities on the list, instructs that procurement regulations be amended to require insertion of compliance conditions into procurement contracts, establishes exemption procedures, and restricts application of the Acts to facilities within the United States.<sup>17</sup>

Regulations have been written in accordance with the Executive Order. Contracts and subcontracts under \$100,000 are exempt from the debarment and contracting requirements of the Acts and the regulations, if the facility to be used is not listed by the EPA for a conviction under the Acts.<sup>18</sup> Nonexempt contracts must certify, whether the facilities to be used are listed by the EPA, that the contractor will notify the contracting agency of any indication that the EPA is considering listing a facility to be used, and that every nonexempt subcontract will include the same certifications.<sup>19</sup> Furthermore, the contractor must agree: to comply with certain requirements of the Acts and regulations and guidelines issued thereunder; that no work will be performed at a listed facility; to use best efforts to comply with clean air and water standards at the facility to be used; and to insert these promises into any nonexempt subcontract.<sup>20</sup>

The EPA has established two mechanisms by which a facility can be listed. Mandatory listing occurs automatically upon conviction for a listed offense.<sup>21</sup> Discretionary listing follows a listing proceeding initiated by a recommendation from an EPA official, state governor, or member of the public which determines if there is a record of continuing or recurring noncompliance with clean air or water standards at the recommended facility.<sup>22</sup> Procedures for removing a facility from the list of violating facilities have also been established.<sup>23</sup>

<sup>20</sup>48 C.F.R. § 52.223-2.

<sup>21</sup>40 C.F.R. § 15.10.

<sup>22</sup>40 C.F.R. §§ 15.11-15.

<sup>23</sup>40 C.F.R. §§ 15.20-27.

#### **4.4.1.4. Recommendation and Justification**

##### **Retain**

It is recommended that no change be made to this statute. Section 1368 does not require the establishment of affirmative compliance structures by Government contractors. In a relatively limited and costless fashion, the statute and the regulations issued to implement it ensure that the Federal Government does not knowingly or unwittingly enhance the profitability of violating the Clean Water Act. The environmental cost of tampering with this statute outweighs the incremental streamlining benefit its revision would provide.

#### **4.4.1.5. Relationship to Objectives**

Because this statute does not place unwarranted burden on the procurement process and serves the important socioeconomic goal of promoting environmentally safe practices, its retention is consistent with the Panel's objectives concerning the proper balance between sound acquisition and socioeconomic policies.

## 4.4.2. 42 U.S.C. § 7606

### Clean Air Act

#### 4.4.2.1. Summary of the Law

Section 7606 (section 306 of the Clean Air Act (the Act)) prohibits Federal agencies from entering into procurement contracts that are to be performed at any facility from which a conviction of the contractor under section 7413 of Title 42 arose.<sup>1</sup> When the EPA certifies the condition giving rise to the conviction has been corrected, the prohibition is lifted.<sup>2</sup>

The EPA is instructed to establish notification procedures to facilitate Federal agencies' compliance with the Act.<sup>3</sup> The statute calls upon the President to issue an order requiring relevant Federal agencies to "effectuate the purpose and policy of this chapter."<sup>4</sup> Also, the President is authorized to provide exemptions from the prohibition when he determines an exemption to be in the national interest.<sup>5</sup> Finally, the statute requires the President to report to Congress any exemptions granted and the measures taken to implement the Act's provisions.<sup>6</sup>

#### 4.4.2.2. Background of the Law

Congress enacted the statute in 1970 so the Federal Government would not patronize or subsidize polluters through its procurement practices.<sup>7</sup> The ultimately adopted House Conference version of the bill was more limited than the original Senate bill, which extended the procurement ban to any person not in compliance with a Federal court order issued pursuant to the Act.<sup>8</sup> The statute is far less expansive than a bill introduced by Senator Cook of Kentucky. He criticized the statute for basing procurement prohibitions only upon "knowing violations" of standards of the Act, as had been set out in 42 U.S.C. § 7413(c)(1) prior to the 1990 amendments, and for banning individual facilities rather than entire companies for noncompliance with the Act.<sup>9</sup>

The Nixon Administration expressed reservations about section 7606. Health, Education and Welfare Secretary Robert Finch was concerned that effective enforcement would require "very substantial and probably unwarranted" expense and stated enforcement would be accomplished more simply and directly through Federal or state enforcement of the Act's air

<sup>9</sup>See Senate Debate, Sep. 22, 1970, in Legislative History of the Clean Air Act Amendments of 1970, at 343-47 (testimony of Senator Cook).

quality and emission standards.<sup>10</sup> The American Mining Congress also lobbied against section 7606, criticizing it as administratively unworkable and commenting that "[i]t could result in the inability of the government to procure essential commodities."<sup>11</sup> The National Steel Corporation condemned the disqualification of offenders from Government business as "unduly severe" in light of the "effective deterrent" effect of the other penalty provisions in the Act.<sup>12</sup>

In 1990 Congress amended sections 7606 and 7413 and expanded the number and types of violations which can serve as bases for debarment from procurement contracts.<sup>13</sup> Among the offenses added to the list is the negligent placing of another in imminent danger of death or serious bodily injury by the negligent release of a hazardous air pollutant.<sup>14</sup>

#### 4.4.2.3. Law in Practice

The Federal procurement provisions of both the Clean Air and Clean Water Acts (the Acts) were implemented by Exec. Order No. 11738,<sup>15</sup> FAR subpart 23.1,<sup>16</sup> and EPA regulations part 15.<sup>17</sup> The Executive Order authorizes EPA to compile and maintain a list of violating facilities and issue appropriate rules and regulations, forbids Federal procurement from facilities on the list, instructs that procurement regulations be amended to require insertion of compliance conditions into procurement contracts, establishes exemption procedures, and restricts application of the Acts to facilities within the United States.<sup>18</sup>

Regulations have been written in accordance with the Executive Order. Contracts and subcontracts under \$100,000 are exempt from the debarment and contracting requirements of the Acts and the regulations, if the facility to be used is not listed by the EPA for a conviction under the Acts.<sup>19</sup> Nonexempt contracts must certify: whether the facilities to be used are listed by the EPA, that the contractor will notify the contracting agency of any indication that the EPA is considering listing a facility to be used, and that every nonexempt subcontract will include the same certifications.<sup>20</sup> Furthermore, the contractor must agree: to comply with certain requirements of the Acts and regulations and guidelines issued thereunder, that no work will be performed at a listed facility, to use best efforts to comply with clean air and water standards at the facility to be used, and to insert these promises into any nonexempt subcontract.<sup>21</sup>

<sup>20</sup>See 48 C.F.R. § 52.223-1.

<sup>21</sup>See 48 C.F.R. § 52.223-2.

The EPA has established two mechanisms by which a facility can be listed. Mandatory listing occurs automatically upon conviction for a listed offense.<sup>22</sup> Discretionary listing follows a listing proceeding, initiated by a recommendation from an EPA official, state governor, or member of the public, which determines if there is a record of continuing or recurring noncompliance with clean air or water standards at the recommended facility.<sup>23</sup> Procedures for removing a facility from the list of violating facilities have also been established.<sup>24</sup>

#### **4.4.2.4. Recommendation and Justification**

##### **Retain**

It is recommended that no change be made to this statute. Section 7606 does not require the establishment of affirmative compliance structures by Government contractors. In a relatively limited and costless fashion, the statute and the regulations issued to implement it ensure that the Federal Government does not knowingly or unwittingly enhance the profitability of violating the Clean Air Act. The objections raised in 1970 do not seem to have materialized into substantial concerns. The environmental cost of tampering with this statute outweighs the incremental streamlining benefit its revision would provide.

#### **4.4.2.5. Relationship to Objectives**

Because retention of this law will not impose additional or undue administrative burdens on the acquisition process, its retention is consistent with the Panel's objectives concerning the balance between an efficient acquisition process and sound socioeconomic policies.

#### 4.4.3. 42 U.S.C. § 6962

### Section 6002 of the Resource Conservation and Recovery Act (RCRA)

#### 4.4.3.1. Summary of the Law

Responding to the problem of increasing amounts of hazardous and solid waste in this country, Congress in 1976 passed the Resource Conservation and Recovery Act, 42 U.S.C. §§ 6901-6991 (1988). One statutory objective of the Act was to encourage the reclamation of waste materials.<sup>1</sup> To this end, the Act imposed an obligation to buy recycled products on Federal procuring agencies.<sup>2</sup>

Section 6962 requires Federal agencies in contracts exceeding \$10,000 to procure items "composed of the highest percentage of recovered materials practicable consistent with maintaining a satisfactory level of competition."<sup>3</sup> This requirement is waived if an item made with recovered materials is "not reasonably available within a reasonable period of time, does not meet applicable specifications or reasonable performance standards, or is only available at an unreasonable price."<sup>4</sup> In addition, Federal fossil-fuel powered energy systems equipped to use fuels derived from solid waste are directed to use such fuels "to the maximum extent practicable."<sup>5</sup>

All Federal agencies are required to redraft their procurement specifications to eliminate any prohibition of recovered materials and any requirement of manufacture from virgin materials; specifications must instead require use of recovered materials to the maximum extent possible.<sup>6</sup> Further, agencies must require vendors to certify that the percentage of recovered materials in items offered to a Federal agency will meet the contractual specification for such items and, in addition, to estimate the percentage of total materials represented by recovered materials.<sup>7</sup>

The Environmental Protection Agency (EPA) is instructed to issue guidelines to assist agencies to comply with the statute.<sup>8</sup> The EPA must designate products that can be produced with recovered materials and recommend procurement and certification practices for those items after considering availability, solid waste impact, economic and technological feasibility, and

<sup>2</sup>42 U.S.C. §§ 6962(c)(1), 6903(17). RCRA imposes the same obligation on any State agency or agency of a political subdivision of a State which is using appropriated Federal funds for a procurement. *Id.*

<sup>3</sup>42 U.S.C. § 6962(a),(c)(1). The Act also requires the use of recycled material in the procurement of any item the total purchases of which exceeded \$10,000 in the prior fiscal year.

<sup>4</sup>See 42 U.S.C. § 6962(c)(1)(A)-(C).

<sup>5</sup>42 U.S.C. § 6962(c)(2).

<sup>6</sup>See 42 U.S.C. § 6962(d).

<sup>7</sup>See 42 U.S.C. § 6962(c)(3).

<sup>8</sup>See 42 U.S.C. § 6962(e).

multiple uses of recovered materials.<sup>9</sup> In addition, the Office of Federal Procurement Policy (OFPP) is directed to implement the requirements of the statute, coordinate other procurement policies with the statutory goal of maximizing use of recovered resources, and report every two years on progress in implementation.<sup>10</sup>

Finally, the statute sets out an "affirmative procurement program" required of each procuring agency. Agencies must establish a "recovered materials preference program," a program to promote the preference program, a program for requiring estimates and certification of recovered material content, and a system to review and monitor the program's effectiveness. Further, an agency must adopt either a case-by-case policy favoring vendors offering the highest percentage of recovered materials in their products, or minimum content specifications, or a substantially equivalent alternative.<sup>11</sup>

#### 4.4.3.2. Background of the Law

Congress enacted RCRA in 1976 to stimulate use of recovered materials by Government and private industry. By requiring Federal agencies (and state agencies spending Federal funds) to purchase goods made with recycled materials, Congress hoped to create a direct market for recycled goods and also to influence the buying habits of the private market through the publication of Federal guidelines and specifications.<sup>12</sup> "Procurement policy is one way the Federal Government can help solve solid waste and resource use problems without launching major regulatory or financial assistance programs."<sup>13</sup>

The original statute contained no affirmative procurement program nor did it define any product category or types of materials to be recovered. Deferring to agency expertise in procurement matters, Congress left responsibility for implementation to the individual agencies. However, it did not expect a "business-as-usual" attitude and warned that more prescriptive legislation would be in order if the required annual reports show a lack of progress in Federal practices and performance.<sup>14</sup>

By 1980 Congress found Federal agencies had still not complied with the statutory requirement to procure items composed of the highest percentage of recovered materials practicable. This failure was largely due to the absence of guidelines published by the EPA. Thus, Congress amended the statute, providing deadlines for EPA issuance of guidelines for specified product categories and extending the extant deadlines for Federal agencies conforming their procurement specifications to the mandate of the statute.<sup>15</sup>

<sup>9</sup>See *id.*

<sup>10</sup>See 42 U.S.C. § 6962(g).

<sup>11</sup>See 42 U.S.C. § 6962(i).

<sup>12</sup>See H. R. REP. NO. 94-1491, 94th Cong., 2d Sess. 51 (1976), reprinted in 1976 U.S.C.C.A.N. 6238, 6289-90.

<sup>13</sup>See S. REP. NO. 94-988, 94th Cong., 2d Sess. 21 (1976)(discussing earlier version of the final bill).

<sup>14</sup>See *id.*

<sup>15</sup>See S. REP. NO. 96-172, 96th Cong., 2d Sess. 4 (1980), reprinted in 1980 U.S.C.C.A.N. 5019, 5022-23.

By 1984 Congress had become frustrated with the EPA and the OFPP. Despite the explicit timetables set out in 1980 requiring guidelines for at least five product categories by September, 1982, EPA had issued only one guideline, and that was four months late. Likewise, the OFPP failed to encourage or require procuring agencies to maximize use of recovered materials. The House Energy and Commerce Committee characterized their efforts as "almost totally unresponsive" to the goals of the Act.<sup>16</sup> As a result, Congress established new mandatory deadlines, provided definitions of "recycled paper" and "waste paper" within the statute "[i]n order to provide the Agency a firm starting point" for its paper guideline, and set forth an affirmative procurement program for which the agencies are directly responsible.<sup>17</sup>

#### 4.4.3.3. Law in Practice

To date, the EPA has issued guidelines for five product categories: building insulation products,<sup>18</sup> cement and fly ash concrete;<sup>19</sup> paper and paper products;<sup>20</sup> lubricating oils;<sup>21</sup> and tires.<sup>22</sup> The Federal Acquisition Regulation requires contracting officers to purchase recycled materials to the maximum extent practicable, sets out a requirement that contracting officers insert a Recovered Materials Certification<sup>23</sup> in solicitations incorporating recovered materials specifications, and establishes the conditions under which a contracting officer may waive requirements for using recovered materials.<sup>24</sup>

As a result of a court challenge to EPA's failure to provide detailed price and availability information in its paper product guideline,<sup>25</sup> as specifically required by the Act, the EPA amended four of the guidelines to include references to where and how price and availability information may be obtained.<sup>26</sup> The EPA also issued an interpretation that the price of an item containing recycled materials is "unreasonable" within the meaning of section 6962(c)(1)(C), and hence that a Federal agency need not purchase such an item if the price of the recycled item exceeds in any way the price of an item made from virgin materials.<sup>27</sup> The U.S. Court of Appeals for the District of Columbia Circuit upheld EPA's interpretation of "unreasonable price" in 1989.<sup>28</sup>

In response to EPA's interpretation that an "unreasonable price" is any higher price, legislation has been proposed in the current Congress which would define "reasonable price" to

<sup>28</sup>*See Reilly*, 884 F.2d at 1434-37.

include any price up to 10% greater than the price of a competing product composed of virgin materials.<sup>29</sup> The 10% price preference is one of several provisions proposed in the RCRA Amendments of 1992 which expand the current requirements for Federal procurement of recycled materials. The Amendments would also require the EPA to prepare final guidelines for seven additional product categories, require the DOD to review its procurement specifications and eliminate requirements which discriminate against items containing recovered materials, and make explicit that agencies are required to procure items made of the highest percentage of recovered materials practicable even if the EPA has not yet issued applicable guidelines.<sup>30</sup> The bill would also extend the procurement requirements of section 6962 to products procured by the legislative and judicial branches of the Government.<sup>31</sup> EPA has estimated that the bill's new procurement provisions would result in an additional cost of \$21 million to the Federal Government.<sup>32</sup>

#### **4.4.3.4. Recommendation and Justification**

##### **Retain**

The history of RCRA demonstrates an unequivocal congressional commitment to create a Federal buyer's market for recycled materials. Unlike other source preferences, however, RCRA does not require defense contractors to modify their plants, equipment, administrative procedures, or workforce. Nor does RCRA create unwieldy set-asides. Instead, RCRA directs contracting officers, in performing market research in preparation for an acquisition, to consider the use of recycled materials and give priority to such use if recycled materials can reasonably meet the Government's requirements. Under either the EPA's interpretation of "reasonable price" or that contained in proposed legislation, the contracting officer and contracting agencies will retain substantial discretion to ensure that recycled products meet the needs of the procuring agency. Accordingly, the Panel recommends that 42 U.S.C. § 6962 be retained.

#### **4.4.3.5. Relationship to Objectives**

Because this law promotes the environmentally beneficial practice of recycling but does not impose undue administrative or financial burdens, its retention is consistent with the Panel's objectives concerning the balance between an efficient procurement process and sound socioeconomic policies.

<sup>32</sup>See Letter from Don Clay, Office of Solid Waste and Emergency Response, EPA, to Rep. Norman Lent (R-NY), (June 16, 1992) *summarized in* 23 Env't Rep. (BNA) 667 (1992).

## **4.5. Miscellaneous Statutes**

### **4.5.0. Introduction**

The Panel reviewed a number of statutes which had an apparent relationship to socioeconomic laws, but did not appear to pertain directly to any of the functional areas discussed above. For that reason, those laws are presented here with the Panel's recommendations as indicated.

## **4.5.1. 10 U.S.C. § 7341**

### **Airplanes and lighter-than-air craft: authorized number**

#### **4.5.1.1. Summary of the Law**

This section authorizes the President to construct and maintain "15,000 useful naval airplanes," including 200 lighter-than-air craft.

#### **4.5.1.2. Background of the Law**

This section was originally passed in 1926 and codified in 1956. The report language in the revised section of 1942 stressed the needs of the national defense in wartime, and specifically, the need for lighter-than-air craft for coastal defense.<sup>1</sup>

#### **4.5.1.3. Law in Practice**

According to the Naval Air Systems Command, this section has never been used.<sup>2</sup>

#### **4.5.1.4. Recommendation and Justification**

##### **Repeal**

This section addresses lighter-than-air craft that are no longer of significance. In addition, the issue of numbers of aircraft to be maintained is part of the annual authorization and appropriations of Congress.

The Naval Air Systems Command stated this section is a historical anachronism in present law and should be repealed on that basis alone. That Command also stated that to their knowledge this section has never been cited, used, or referred to, and is of no utility or relevance today.<sup>3</sup> The DOD General Counsel's Office concurred with the opinion of the Naval Air Systems Command.<sup>4</sup> The Panel recommends repeal of this section.

#### **4.5.1.5. Relationship to Objectives**

Repeal would streamline the body of defense related acquisition laws.

<sup>3</sup>*Id.*

<sup>4</sup>Telephone interview with the DOD Deputy General Counsel (Logistics) (Mar. 3, 1992).

## **4.5.2. 10 U.S.C. § 7342**

### **Percentage required to be constructed or manufactured in United States plants**

#### **4.5.2.1. Summary of the Law**

This section mandates that at least 10% of the aircraft and aircraft engines for the Navy be manufactured in plants owned and operated by the U.S. Government unless those plants are producing at full capacity.

#### **4.5.2.2. Background of the Law**

This section originally was passed in 1940 and codified in 1956. The revised edition of 1940 was accompanied by report language that cited the need for this law due to the "European war and its effect on the United States" and "the reluctant realization that we could trust no one but ourselves in a world speaking only the language of force."<sup>1</sup>

#### **4.5.2.3. Law in Practice**

According to the Naval Air Systems Command, this section is outdated and has not been used for decades.<sup>2</sup>

#### **4.5.2.4. Recommendation and Justification**

##### **Repeal**

The subject of this section is already addressed in the Buy American Act. The Naval Air Systems Command stated that this section is a historical anachronism in present law and should be repealed on that basis alone. That Command also stated that to their knowledge this section has never been cited, used, or referred to, and is of no utility or relevance today.<sup>3</sup> The DOD General Counsel's Office has concurred with that opinion.<sup>4</sup> The Panel recommends repeal of this section.

#### **4.5.2.5. Relationship to Objectives**

Requirements of this section are covered elsewhere in the U.S. Code. Repeal would streamline the body of defense related laws.

<sup>3</sup>*Id.*

<sup>4</sup>Telephone interview with the DOD Deputy General Counsel (Logistics) (Mar. 3, 1992).

### **4.5.3. 10 U.S.C. § 7343**

#### **Manufacture in United States plants under certain circumstances**

##### **4.5.3.1. Summary of the Law**

This section allows the President to construct any naval aircraft, including parts and engines, at Government owned facilities if the President determines there is collusion or other actions taken by contractors to deprive the United States of a fair price.

##### **4.5.3.2. Background of the Law**

This section was originally passed in 1934 and codified in 1956. The Act of 1934 authorized the President to procure naval arms in accordance with the Washington and London Naval Treaties of 1922 and 1930.<sup>1</sup>

##### **4.5.3.3. Law in Practice**

The Naval Air Systems Command reports that this section has never been used.<sup>2</sup>

##### **4.5.3.4. Recommendation and Justification**

#### **Repeal**

The subject of this section is already addressed by the Defense Production Act of 1950 and violations are specified in the Trade Agreements Act of 1979.

The Naval Air Systems Command stated this section is an historical anachronism in present law and should be repealed on that basis alone. That Command also stated that to their knowledge it has never been cited, used, or referred to, and is of no utility or relevance today.<sup>3</sup> The DOD General Counsel's Office has concurred with that opinion.<sup>4</sup> The Panel recommends repeal of this section.

##### **4.5.3.5. Relationship to Objectives**

The subject of this section is covered elsewhere in the U.S. Code. Repeal would streamline the body of defense related acquisition laws.

---

<sup>1</sup>S. REP. NO. 245, 73d Cong., 2d Sess. (1934).

<sup>2</sup>Telephone interview with the Legal Counsel of the Naval Air Systems Command (Mar. 2, 1992).

<sup>3</sup>*Id.*

<sup>4</sup>Telephone interview with the DOD Deputy General Counsel (Logistics) (Mar. 3, 1992).

#### **4.5.4. 10 U.S.C § 7345**

##### **Navy aircraft requirements: annual report**

###### **4.5.4.1. Summary of the Law**

This section requires the Secretary of the Navy to submit a report, no later than September 1st of each year, to the Committees on Armed Services and Committees on Appropriations of the House and Senate addressing "the current and projected aircraft requirements of the Navy and the plans of the Navy for aircraft acquisition and modernization."

###### **4.5.4.2. Background of the Law**

This legislation, passed in the 101st Congress, was the direct result of the back-to-back cancellation of two troubled naval aircraft programs -- the A-12 and the P-7. The great public attention generated by these cancellations impelled Congress to mandate this reporting requirement as an additional oversight measure.<sup>1</sup>

###### **4.5.4.3. Law in Practice**

Prior to the enactment of this section there was no statutory requirement for reporting. This law imposes such a requirement. However, the requirements of this law are already covered by other regulations and practices applicable to DOD as discussed immediately below.<sup>2</sup>

###### **4.5.4.4. Recommendation and Justification**

###### **Repeal**

This requirement is both burdensome and unnecessary and should be repealed.

First, DOD is routinely required to furnish accurate inventory information in the course of the annual appropriations process. According to the Office of the DOD Comptroller, for example, the data books submitted to Congress already contain this information on naval aircraft as justification for the President's budget request.<sup>3</sup>

Second, the Five Year Defense Plan (FYDP) routinely includes information on naval air squadrons that show both the types of aircraft being projected for procurement and their funding requirements. In fact, the Office of Investment in the DOD Comptroller's Office stated that the combination of these two reports covers the bulk of pertinent information requested by 10 U.S.C. § 7345.<sup>4</sup>

---

<sup>1</sup>Telephone interview with the Office of the DOD Comptroller (Mar. 4, 1992).

<sup>2</sup>*Id.*

<sup>3</sup>*Id.*

<sup>4</sup>Telephone interview with the Office of Investment, DOD Comptroller's Office (Mar. 5, 1992).

Third, repeal of this section, while justifiable on its own merits, is part of the larger issue of establishing common standards of effectiveness that both DOD and Congress can use to reinforce oversight and accountability of defense procurement programs.

**4.5.4.5. Relationship to Objectives**

Repeal of this law would allow the use of existing data to produce the information required for proper congressional oversight. The reduction of such administrative burdens, particularly those involving reporting requirements, is a specific objective of the Panel.

#### **4.5.5. Public Law Number 101-511 § 8034**

### **U.S. Army Engineer Waterways Experiment Station**

#### **4.5.5.1. Summary of the Law**

This section, enacted as part of the Fiscal Year 1991 Defense Appropriations Act, requires that funds obligated or made available by the Act shall continue to fully use the facilities of the U.S. Army Engineer Waterways Experiment Station, including the supercomputer capability of that station. The section further provides that none of the funds expended under the Act may be used for the purchase of any supercomputer which is not manufactured in the United States unless the Secretary of Defense certifies to the Armed Services and Appropriations Committees of the House and the Senate that such an acquisition must be made for national security purposes and that this capability is not available from U.S. manufacturers.

#### **4.5.5.2. Background of the Law**

This section is directly attributable to the House Appropriations Committee's active interest in the research capability represented by the Army Corps of Engineers Waterways Experiment Station in Vicksburg, Mississippi. This facility, which performs the bulk of the Corps' civil works research into the problems of canals and waterways, has been built into a unique research facility, the centerpiece of which is an advanced model of the CRAY supercomputer.

#### **4.5.5.3. Law in Practice**

The Office of the Chief Counsel, Army Corps of Engineers, states this authority is useful in developing the unique research capabilities of the Waterways Experiment Station, especially in maintaining the state-of-the-art capabilities of its supercomputer. Because this provision has not been renewed by subsequent appropriations acts, that authority remains extremely useful<sup>1</sup>. The domestic source restriction is largely a moot point since the United States remains the global leader in super computer technology.

#### **4.5.5.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this statute. This authority is useful in maintaining a unique research capability which is in the best interests of DOD because it supports a wide variety of military and related commercial applications.

---

<sup>1</sup>Information received by telephonic inquiry to the Office of the Chief Counsel, Army Corps of Engineers (17-18 Sept. 1992).

#### **4.5.5.5. Relationship to Objectives**

Further development of the above capabilities is consistent with the Panel's objectives of supporting the integration of civilian and military production and promoting a robust defense industrial base.

#### **4.5.6. Public Law Number 101-511 § 8057**

##### **Funding of Contractor in preparing material, reports lists, or analysis**

###### **4.5.6.1. Summary of the Law**

This section, enacted as part of the FY91 Defense Appropriations Act, states that no funds appropriated by the Act may be obligated or expended to assist any contractor of DOD in preparing any material, report, lists, or analysis with respect to the actual or projected economic or employment impact in a particular state or congressional district of an acquisition program for which all research, development, testing, and evaluation has not been completed.

###### **4.5.6.2. Background of the Law**

It is an article of faith that those defense programs with the widest degree of constituency support have the best chance of being fully funded during the Congressional budget process. In their efforts to build that support, defense contractors have sometimes prepared detailed analyses purporting to show the economic impact of prospective weapons programs. Depending on the size of the program, these analyses can be quite detailed, with some including figures to show the number of direct and indirect contract dollars expected to flow into each state and individual congressional district. While section 8017 of this Act follows the customary procedure of creating a general prohibition on the use of appropriated funds to influence, directly or indirectly, congressional action, section 8057 is a narrower restriction specifically intended to ensure these constituency analyses and the activities associated with them are not conducted with public funds.

###### **4.5.6.3. Law in Practice**

The Defense Acquisition Regulatory Council indicates this provision has not resulted in any cases or referrals, nor have they seen any necessity to incorporate it into the DFARS<sup>1</sup>. A number of industry sources have similarly indicated that this provision has a minimal impact, if any, upon the acquisition process, including their lobbying activities.

###### **4.5.6.4. Recommendation and Justification**

###### **Retain**

The Panel recommends retention of this statute even though it has minimal impact in dollar terms upon the defense acquisition process. Its recent enactment by the Congress, its promotion of sound ethical practices, and its potential for cost reductions, however slight, without

---

<sup>1</sup>Information received by telephonic inquiry to the Special Assistant (Acquisition Policy & Management), Office of the Assistant Secretary of Defense for Legislative Affairs (Sep. 17, 1992).

creating heavy compliance burdens are all reasons that fully justify retention. To ensure its consistency with defense acquisition law, it is also recommended that this section be codified.

#### **4.5.6.5. Relationship to Objectives**

Retention and codification of this statute is consistent with the Panel's objective of promoting acquisition laws that encourage efficient procurement practices and financial integrity in ways that are simple, understandable, and not unduly burdensome.

#### **4.5.6.6. Proposed Statute**

No funds appropriated by the Congress may be obligated or expended to assist any contractor of the DOD in preparing any material, report, lists, or analysis with respect to the actual or projected economic or employment impact in a particular state or congressional district of an acquisition program for which all research, development, testing, and evaluation has not been completed.

## **4.5.7. Public Law Number 101-511 § 8067**

### **Residents of a particular state for employment**

#### **4.5.7.1. Summary of the Law**

This law states that notwithstanding any other provision of law, each contract awarded by DOD in FY 91 for construction or service performed, in whole or in part, in a state which is not contiguous with another state and has an unemployment rate in excess of the national average as determined by the Secretary of Labor shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in such state that is not contiguous with any other state, individuals who are residents of such state and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills. The Secretary of Defense may waive the requirements of this section in the interest of national security.

#### **4.5.7.2. Background of the Law**

This statute was part of the DOD Appropriations Act of 1991, originally H.R. 5803, passed during the 101st Congress and signed into law on November 5, 1990.

#### **4.5.7.3. Law in Practice**

In effect, this law mandates that DOD contracts awarded in the states of Alaska or Hawaii shall contain a provision requiring the contractor to employ residents of that state if that state's unemployment rate is above the national average.

#### **4.5.7.4. Recommendation and Justification**

##### **No Action**

This law is related to DOD acquisition but is not of primary importance to the Panel at this time. Therefore, the Panel suggests no further consideration.

#### **4.5.7.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

## 5. INTELLECTUAL PROPERTY

### 5.0. Introduction

In the past decade there has been a major change in the relationship between the acquisition process and the research and development community in the United States. Prior to the 1980s, there was a general assumption that the technology necessary to support DOD could be obtained through direct funding of contracts for research and development and strong support of independent research and development conducted by defense contractors. The Department made use of some technology created in the commercial sector of the economy, but this was thought by many to be peripheral and, perhaps, aberrational. A corollary assumption was that very little technology produced by DOD research and development contracts had commercial application. Thus, the Department had no program to encourage commercial utilization of the technology it had sponsored. In this environment, the acquisition policies relating to intellectual property were properly focused on ensuring that the DOD obtained all of the rights in intellectual property that it needed to develop and use weapon systems. In some cases, the result of these policies was that DOD inadvertently took intellectual property rights in commercial products along with the rights in products developed at government expense.

In the 1980s it became more and more apparent that these earlier assumptions were becoming obsolete. As has been documented in the study of the Packard Commission and in the report by the Center for Strategic and International Studies, commercial technology has outpaced DOD technology in a number of areas of vital importance to the development of weapon systems. While the owners of this commercial technology may want to perform work for the Government, there appears to be increasing reluctance to use their best commercial technology if there is a possibility that DOD will take the intellectual property rights in that technology. It also appears that there will be a greater confluence of commercial and DOD technology in the future. This indicates that there may be greater opportunities to utilize DOD sponsored technology in the commercial sector of the economy. These premises require a different focus for the intellectual property policies of the Department in the acquisition process. The new focus must be on fulfilling the Department's needs in the least intrusive manner with regard to intellectual property and on maximizing the flow of technology from the commercial sector to DOD and from DOD to the commercial sector.

Both the Congress and the executive branch have recognized this new focus. Congress passed the Bayh-Dole bill in 1980 (35 U.S.C. § 200 et seq.) to ensure that small business and nonprofit organizations retained commercial rights to inventions made under Government contracts. In 1986, it passed the Federal Technology Transfer Act (15 U.S.C. § 3710a et seq.) to require Federal laboratories to enter into cooperative research and development agreements sharing technology with the private sector. These new policies were implemented and broadened by Executive Order 12591, April 10, 1987, which directed the head of each executive department, to the extent permitted by law, to:

- (1) delegate authority to its Government-owned, Government-operated Federal laboratories:

(A) enter into cooperative research and development agreements with other Federal laboratories, State and local governments, universities, and the private sector; and

(E) license, assign, or waive rights to intellectual property developed by the laboratory either under such cooperative research or development agreements or from within individual laboratories.

(2) identify and encourage persons to act as conduits between and among Federal laboratories, universities, and the private sector for the transfer of technology developed from federally funded research and development efforts;

(3) ensure that State and local governments, universities, and the private sector are provided with information on the technology, expertise, and facilities available in Federal laboratories;

(4) promote the commercialization, in accord with my Memorandum to the Heads of Executive Departments and Agencies of February 18, 1983, of patentable results of federally funded research by granting to all contractors, regardless of size, the title to patents made in whole or in part with Federal funds, in exchange for royalty-free use by or on behalf of the Government;

(5) implement, as expeditiously as practicable, royalty-sharing programs with inventors who were employees of the agency at the time their inventions were made, and cash award programs; and

(6) cooperate, under policy guidance provided by the Office of Federal Procurement Policy, with the heads of other affected departments and agencies in the development of a uniform policy permitting Federal contractors to retain rights to software, engineering drawings, and other technical data generated by Federal grants and contracts, in exchange for royalty-free use by or on behalf of the Government.

The Panel reviewed each law relating to the creation and use of intellectual property in the acquisition process to determine whether it impeded or furthered the attainment of these goals. In making this review it proceeded from three fundamental premises:

- That a company will not generally make the investment necessary to bring a product or service based on sophisticated technology to the commercial marketplace unless it has intellectual property protection in the form of a patent, copyright or trade secret.

- That a company will not generally use technology with strong commercial potential to perform DOD contracts unless it is assured that it retains intellectual property protection in that technology.
- That as a result of the first two premises, companies are discouraged from integrating their commercial with their military work.

The Panel found that there are a number of laws which are not fully in accord with the new goals. Its recommendations for change are generally made in order to complete the task which Congress began in 1980.

For purposes of review, the Working Group divided the Intellectual Property Laws into four subchapters as follows: (1) Rights in technical data; (2) Technology transfer; (3) Competitiveness of U.S. companies; and (4) Government use of private patents, copyrights, and trade secrets.

### **5.0.1. Background on Technical Data**

During the 1940s, the War Department reserved the right to reproduce, use, and disclose technical information specified to be delivered by a contractor under a contract. While this information was to be provided for governmental purposes only, in fact, the Government construed this limitation broadly to encompass use for competitive procurement. This policy was refined and modified by DOD in the late 1950s to recognize for the first time the contractor's rights in "proprietary data." Such data would include, for example, selected information on a contractor's trade secrets or manufacturing processes. This proprietary data was protected by a contract clause stating that the contractor need not deliver such data if form, fit or function data was provided as a substitute. This clause also provided that data pertaining to "standard commercial items" need not be delivered.

In 1964, the Department modified this data rights policy, abandoning the concept of allowing the contractor to withhold "proprietary data." It substituted a new policy of allowing the Government to have "limited rights" in data pertaining to items, components, or processes developed at private expense. These limited rights permitted the Government to use the data for its own purposes except that the data could not be used to manufacture the product "in-house." Moreover, the data could not be disclosed to other contractors -- effectively barring its use for competitive procurement. To avoid disputes, an effort was also made at that time to have the Government and contractor agree in advance on their respective rights in such data before undertaking the contract.

This basic policy remained in effect until the early 1980s. At that time, concerns about abuses in spare parts procurement caused Secretary of Defense Weinberger to seek greater rights for the Department in technical data. The result was new military department contract clauses which, for example, required contractors to sell or relinquish their data rights as a condition of award and provided that the government would acquire unlimited rights after a stated period (five years in one widely used clause).

Congress followed suit by enacting new statutory requirements aimed at acquiring adequate data to permit competitive procurement of spare parts. The Defense Procurement Improvement Act of 1984 (Pub. L. No. 98-525) included extensive and detailed provisions (codified at 10 U.S.C. §§ 2320 and 2321). These were subsequently modified by Pub. L. No. 99-661 in 1986 to ensure that the implementing regulations provide a balance between the Government's needs for technical data to get competition and the contractor's needs for protection of its proprietary data. The June 1986 Packard Commission report also pointed out the impact of the data rights policy on the willingness of firms to participate in the defense marketplace. DOD published proposed regulations implementing Pub. L. No. 98-525 in September 1985. However, these regulations failed to satisfy the industry demand for protection of data that was perceived as being vital to maintaining their competitive position in both Government and commercial markets. Two revised proposals were published in 1988, but these still failed to achieve the agreed-upon balance between the Government's needs for competitive procurement and the contractors' proprietary rights. DOD continued its attempts to draft an acceptable regulation, but at the time the Panel discussed this issue, there was no indication how the matter would be resolved.

The inability of the Department to formulate a technical data policy acceptable to all parties is not a result of incompetence or lack of effort but rather of the fact that there are many competing demands that must be met. From the point of view of the Department, it must obtain technical data to meet its many needs with sufficient rights to ensure that the data can be used as necessary. One of the most compelling needs has been to ensure reasonable prices for spare parts through competition. If data is needed to meet that competition requirement, the Government must obtain sufficient rights to permit the data to be disclosed to companies that have the capability of manufacturing the product. There is a significant segment of industry that is dependent on obtaining this technical data in order to win contracts to manufacture parts. These companies generally perform little development work but have proved to be efficient manufacturers of parts for the Department. Another segment of industry including many small businesses consists of the major contractors and specialty subcontractors that have invested significant funds in developing new products for the Department as well as for the commercial market. These companies feel the need to protect their technical data in order to recover their investment and maintain their competitive position in the domestic and international market. Reconciling these competing needs has proven to be a formidable task and may never be possible in any perfect sense.

Congress intervened again and pushed DOD and industry toward a resolution of their differences by creating another group, the Section 807 Government/industry technical data committee, in the 1992 Defense Authorization Act. This committee was directed to develop a compromise technical data rule acceptable to both Government and industry. The committee is made up of representatives of DOD and the key industry groups (representing prime contractors, and subcontractors) which have a special interest in how the rule should be structured. Its report is also planned for early 1993.

## 5.0.2. Recommendations on Technical Data

After considering various options on how to proceed, the Panel decided to follow a two-pronged approach:

- First, make minimal modifications to the technical data statute, but sufficient to allow the Secretary of Defense the flexibility to explore other ways of treating the issue; and,
- Second, outline a new alternative approach for dealing with technical data that, instead of focusing on rights, focuses on the Government's need to ensure reasonable life-cycle costs, ordinarily through competition, for spare parts and other follow-on purchases.

The Panel recommends statutory changes to expand the definition of "technical data" to include computer data bases and manuals and other publications supporting computer programs while continuing to exclude computer programs themselves from the definition. In addition, the changes limit the law's applicability only to those data called for under a contract -- this is consistent with the current regulatory coverage. Finally, the Panel recommends that the law be modified to limit its applicability to commercial items being offered to the Government, reflecting the Panel's goal of encouraging firms to integrate their commercial and military work.

The alternative approach mentioned above focuses not on the distribution of rights between Government and industry, but rather on ways to ensure that the Government has the means to ensure that procurement prices are reasonable. As such, it is both new and controversial. However, given the impasse that has existed over the last decade in developing a workable rights policy, the Panel presents this as a new idea to be considered. More work is needed to flesh it out fully and explore all of its implications so that it can be tested in certain programs to be designated by the Secretary of Defense.

The new approach is based on the concept that the Government would establish its needs for data on the basis of whether or not this data was necessary to achieve competition. Parts and components would be categorized according to the likelihood of their being repurchased and the cost effectiveness of subjecting them to full and open competition or limited competition. The Government program manager would be responsible for making the final decisions on the categorization, working with the contractor as the system is developed.

Under this approach, the contractor would be contractually obligated to deliver, when needed, a technical data package that was sufficient to permit competition for those parts and components so categorized. Where the Government approved the designation of a part or component for a single source, the developing contractor or subcontractor would not be required to give up its proprietary rights in the data. In this situation, contractors or subcontractors would prepare a detailed life-cycle analysis demonstrating that the part or component was properly acquired without generally distributing detailed technical data, either by using sole source procedures, form, fit and function competition, multisource qualification, or long term pricing agreement. If the part or component were designated for limited competition, the developing contractor or subcontractor would be allowed to maintain its proprietary rights to the data as long

as the contractor could provide one or more additional qualified sources that could compete for the work. These sources could be established through licensing, dual development, or even reverse engineering.

The key to this approach is that it recognizes those cases where there is no need for the Government to take reprourement rights in a contractor's technical data as long as the Government's need to ensure reasonable life-cycle costs is satisfied.

The Panel circulated several drafts of this proposal and received numerous comments, some positive, but many of them negative. The concerns varied. Some Government officials disagreed with the proposal because they believed the Government should take unlimited rights to technical data that resulted from the expenditure of any amount of Government funds (this was the pre-1984 policy). The alternative approach is based on a different philosophy -- that the Government should only seek the data rights it needs to achieve its objective of cost-effective acquisition, including reasonable life-cycle costs for reprourement parts. The alternative approach seeks to provide the Government with the means to achieve that objective while protecting contractors' commercially valuable technical data from disclosure, thereby further contributing to cost-effectiveness by facilitating Government access to commercial technologies, technology transfer, and commercial-military integration.

In response to the early drafts of the proposal, both Government and industry expressed concern that the process would be under the complete control of the prime contractor.<sup>1</sup> Firms in the breakout community and second tier vendor base that rely on the availability of technical data packages for their livelihood were particularly concerned that most of the parts and components would be categorized as subject to limited or no competition.<sup>2</sup> Also, since prime contractors would serve as data repositories under the alternative approach, subcontractors and small businesses were concerned that, under the proposed system, any contractor who wanted to compete with the original equipment manufacturer (OEM) in the military marketplace would have to get the data from the OEM, who would not be forthcoming or timely with the information.<sup>3</sup> Finally, some subcontractors that invested corporate funds in developing items for defense systems were afraid that this proposal would give the prime contractors too much bargaining power and permit them to force the subcontractors to license competitors.<sup>4</sup>

These concerns were addressed in the revised proposal by making clear that the contractor would be obligated to develop and comply with a Spare Parts Acquisition Plan which was developed under the control of the Government and was approved by the contracting officer. In addition, the revised proposal makes clear that the program manager would have to approve any

parts or components which a contractor or subcontractor proposed for inclusion in a category for which reprourement technical data would not be provided. As to the fear that OEMs would not furnish technical data, the revised proposal makes this a contractual requirement. Indeed, the Panel perceives this as one of the advantages of this proposal because it ensures that small businesses will have accurate data on these parts. As to any potential problem concerning a prime contractor's bargaining power, the Government would be able to challenge any recommendation that would limit competitive reprourement.

Although some Government officials also raised concerns about the program managers' abilities to manage such a system effectively, several program managers commented that they believed the proposal had promise because it would permit them to achieve their needs without continuing arguments about which party owned the rights to the data.

The Panel sees these comments as a further indication that the various groups have arrived at virtually irreconcilable positions on this issue. This would seem to indicate a need for a new approach to the problem. It is in this spirit that the Panel decided to suggest that the alternative approach be tested. The Panel is convinced that the concerns expressed primarily reflect a misunderstanding of the intent of the proposal and that the best way to alleviate this misunderstanding is to try it out on one or more programs where the Government agency and the contractor are supportive of the attempt to find a new way to resolve this dilemma. In doing so, the Secretary could continue to seek ways to refine the approach to address the concerns of the competing interests. Such experimentation would be particularly appropriate if the Section 807 committee is unable to report a workable approach that adequately protects the Government from excessive reprourement costs while providing adequate protection for commercially valuable technology.

The Panel would like it clearly understood that this proposal is in no way meant to relinquish Government control over the selection of which parts or components are appropriate for competition nor to revert to discredited sole source practices. Moreover, the Panel expects that the new approach would not alter significantly the proportion of competitive versus noncompetitive reprourements. Competitive reprourement would remain the primary means for protecting the Government from having to pay unreasonable prices for spare parts and other follow-on purchases. Indeed, the new approach is designed to ensure that complete technical data packages are made timely available so that interested firms can compete more effectively in spare parts procurements. Importantly, as explained below in the Technical Data discussion, the new approach could help to achieve the Government's goal of promoting the flow of technology from the commercial sector to the Government and from the Government to the commercial sector.

Taking into account both the controversial nature of technical data issues and the absence of any clear solution to the overall policy problems, the Panel presents this alternative approach as an option to be considered on a trial basis for further development and refinement and selective application during development of major systems or subsystems.

### **5.0.3. Other Intellectual Property Issues**

The other key intellectual property areas that the Panel addressed included those dealing with technology transfer, the competitiveness of U.S. companies and the Government's use of private patents, copyrights, and trade secrets. Again, the Panel approached these issues from the same policy framework described above, that is, of trying to meet Government or societal needs while continuing to protect the contractor's interest in the intellectual property it has developed.

### **5.0.4. Recommendations on Technology Transfer**

For technology transfer, three major statutes have been enacted to promote the transfer of technology from the Government to the private sector. These are the University, Small Business Patent Policy Act; the Federal Technology Transfer Act; and the Stevenson-Wydler Technology Innovation Act. The Panel found all were being well implemented by DOD and recommended only minor changes to the first two laws.

The University, Small Business Act promotes technology transfer by permitting small businesses and nonprofit organizations to retain title to inventions made in the performance of Government contracts if they elect to file for a patent. The Panel's recommended changes to this Act focus on obtaining earlier disclosure of both the contractor's invention and its intention to file for a patent abroad. They also would give more time for agency review of an invention to protect the Government's option to file if the contractor elects not to do so. A final change would have the contractor file the patent application within one year of election. These changes should help to protect valuable commercial technology while also accelerating the entry of new technologies into the marketplace.

The Federal Technology Innovation Act promotes technology transfer by letting Federal laboratories enter into cooperative research and development agreements with private contractors. The Panel recommends two changes in this area:

- Allowing Government laboratories to claim copyright protection in computer programs developed by their employees, similar to the protection employees receive on patents; and
- Allowing employees or former employees under certain conditions to assist in commercializing the technologies they have developed, even though they might be entitled to royalties for their invention.

In both cases, the changes should make it easier for technologies developed in the laboratories to find their way into the private sector.

### **5.0.5. Recommendations on the Competitiveness of U.S. Companies**

The Panel reviewed three statutes affecting the competitive status of the United States in the world market: the Invention Secrecy Act; the Arms Export Control Act; and, the Freedom of Information Act (FOIA). While the Panel recognizes the significant amounts of information (including at times information of value to contractors) released under FOIA requests, it believes the overall benefits of public disclosure of Government activities outweigh any potential negative effects. Therefore, it recommended no changes to FOIA.

For the Invention Secrecy Act, the Panel proposed that a new committee be established, chaired by DOD, and including representatives of the Patent Office, the Export Control Administration, and the Department of State, to review needs for secrecy orders on patent applications. Such orders are placed where the grant of a patent has been determined to be detrimental to the national security. The new committee should see that the policy is applied more consistently and effectively.

The key change recommended by the Panel for the Arms Export Control Act is the deletion of the requirement that the Government recoup nonrecurring costs when defense contractors sell major defense equipment through the Foreign Military Sales program. This recoupment requirement acts as a sales tax on U.S. goods, reducing the competitiveness of U.S. suppliers in world markets. The Panel's proposal is consistent with steps already taken by the Administration to eliminate all recoupment fees required by regulation. Existing Government export controls remain in place to determine what systems are appropriate for international sales and to which countries.

### **5.0.6. Recommendations on Government Use of Private Patents, Copyrights, and Trade Secrets**

28 U.S.C. § 1498 gives DOD necessary access to private technology by allowing contracting officer's to provide firms with the authorization or consent to use private patents on Government contracts. Often this is coupled with an indemnity clause protecting the Government from any liability should a patent owner decide to sue the Government for infringement. The liability would then rest with the infringing contractor. The changes proposed by the Panel would modify the law to provide further protections to a patent owner. Specifically, the change would allow the owner to sue an infringing contractor for damages directly, rather than having to sue the Government. This change should reduce any unfair competitive advantage for an infringing contractor. A similar approach would be followed for purchases of commercial items. This would be consistent with the Panel's goals to follow commercial practices when making such buys.

## **5.1. Technical Data**

### **5.1.0. Introduction**

The Panel reviewed two statutory provisions dealing with technical data generated or used by Government contractors in the performance of their contracts -- 10 U.S.C. §§ 2320 and 2321. In an attempt by Congress to establish overall policy for technical data, the above sections were enacted in 1984 by Pub. L. No. 98-525 and modified in 1986 by Pub. L. No. 99-661. In effect, section 2320 limits the conduct of both DOD and its contractors in negotiating for rights in technical data while section 2321 establishes procedures to be followed in validating the accuracy of the rights to data claimed by contractors. The Panel noted that section 2321 has been fully implemented by the Department without significant controversy but that section 2320 has been implemented by an interim regulation (issued in DFARS in October 1988) which has been vigorously challenged by industry. The Panel also noted that a separate committee, established by section 807 of the National Defense Authorization Act for 1992, is currently attempting to arrive at a data regulation which will resolve the Government-industry impasse on technical data policy.

In view of the fact that the controversy over rights in technical data has been unresolved between the Department and industry for almost a decade, the Panel expended considerable effort seeking a resolution of the controversy. It sought different approaches for resolving the conflict between the industry desire to protect its proprietary rights in commercially valuable data and the Government desire to have data for competitive procurement. The Panel has recommended a statutory modification to section 2320 which would make it possible for the Department to try different approaches for meeting the Government's need to ensure reasonable prices for spare parts and other follow-on acquisitions. In addition, the Panel describes in detail one such alternative method of dealing with the technical data issue which could be tested on a few programs.

A methodology for implementing the new alternative approach is outlined in the discussion of section 2320 and set forth in some detail in paragraph 5.1.1.7. In broad brush, it would allow the Government's contracting officials to utilize a policy based on the Government's need for competition rather than on an abstract rights in data policy. The approach recognizes that the Government needs to ensure reasonable prices for spare parts and other follow-on acquisitions. Competitive procurement would remain the primary means for ensuring reasonable prices. Therefore, the norm would be to require contractors to provide complete procurement technical data packages, if needed. That requirement would be clearly stated in the solicitation and would be included in the resultant contract so that firms interested in participating in a competitive procurement had an effective opportunity to do so.

Importantly, the alternative approach also recognizes that if the Government's procurement practices do not accommodate effective protection for commercially valuable technologies, contractors may not offer to apply those technologies when developing items for Government use. In addition, they will be discouraged from investing in commercial applications of new technologies that are developed for Government use. As a result, contractors will be encouraged to keep their commercial work separate from their Government work, thereby

thwarting technology transfer between the Government and commercial sectors. When this happens, the Government gets less for its money, the defense industrial base shrinks, and the competitiveness of U.S. firms suffers. Accordingly, the alternative approach would provide flexibility so that contracting officials could 1) agree to accept data for limited purposes for specifically identified parts and components, or 2) negotiate to acquire unlimited rights of the Government long term needs would thereby be better served. In any case, the Government would continue to receive the technical data necessary for internal purposes such as design verification, training, installation, operation, maintenance, and testing.

The Panel has also suggested other modifications to 41 U.S.C. § 403 that 1) make it clear that the section relates only to the situation where the Government orders technical data on a contract, 2) ensure that the Government does not demand excessive data rights when buying commercial items, and 3) clarify the provision dealing with time limits placed on limited rights in data. The Panel believes that these recommendations clarify the section without making significant substantive changes to the fundamental policies embodied in the section.

The Panel has also suggested a new definition of "technical data" in 41 U.S.C. § 403. This recommended change clarifies the distinction between technical data and computer programs so that policy in this area can address each of these issues separately. The definition recommended is essentially the same as has been agreed to in the latest proposed FAR provision on technical data and computer software.

Finally, the Panel recommends a minor modification to section 2321 that limits validation of technical data rights to those situations where the Government has identified a need to use the data for competitive procurement purposes. This modification is needed to ensure that the Government and its contractors do not expend resources determining the rights in technical data which will never be used by the Government for competitive procurement.

**5.1.1. 10 U.S.C. §§ 2320 - 2321<sup>1</sup>**

**Rights in technical data and validation of proprietary data restrictions**

**5.1.1.1. Summary of the Law**

Section 2320 states that the "Secretary of Defense shall prescribe regulations to define the legitimate interest of the United States and of a contractor or subcontractor in technical data pertaining to an item or process."<sup>2</sup> The section sets forth three categories of rights in technical data.

- **Government funded.** This is defined as an item or process that is developed by a contractor or subcontractor exclusively with Federal funds.<sup>3</sup> Under this category, the U.S. has unlimited rights to: (1) use technical data pertaining to the item or process; or (2) release or disclose the technical data to persons outside the Government or permit the use of the technical data by such persons.<sup>4</sup>
- **Privately funded** This is defined as an item or process that is developed by a contractor or subcontractor exclusively at private expense.<sup>5</sup> In this case, the contractor or subcontractor may restrict the right of the United States to release or disclose technical data pertaining to that item or process to persons outside the Government, or permit the use of the technical data by such persons.<sup>6</sup> This does not apply to technical data that: (1) constitutes a correction or change to data furnished by the U.S.; (2) relates to form, fit, or function; (3) is necessary for operation, maintenance, installation, or training (other than detailed manufacturing or process data); or (4) is otherwise publicly available or has been released or disclosed by the contractor or subcontractor without restriction on further release or disclosure.<sup>7</sup> The U.S. may also release or disclose technical data under this category if such release, disclosure, or use: (1) is necessary for emergency repair and overhaul; or (2) is a release or disclosure of technical data (other than detailed manufacturing or process data) to, or use of such data by, a foreign government that is in the interest of the U.S. and is required for evaluational or informational purposes.<sup>8</sup> Such release under this exception is made subject to a prohibition that the person to whom the data is released

or disclosed may not further release, disclose, or use such data and the contractor or subcontractor asserting the restriction is notified of such release, disclosure, or use.<sup>9</sup>

- **Mixed funding.** In this case, an item or process is developed in part with Federal funds and in part at private expense.<sup>10</sup> The statute provides that the respective rights of the U.S. and of the contractor or subcontractor in technical data pertaining to such item or process shall be established as early in the acquisition process as practicable (preferably during contract negotiations).<sup>11</sup> Such rights shall be based on the following considerations: (1) the congressional policy and objectives in section 200 of Title 35, the statement of purposes in section 2(b) of the Small Business Innovation Development Act of 1982, and the declaration of policy in section 2 of the Small Business Act;<sup>12</sup> (2) the interest of the U.S. in increasing competition and lowering costs by developing and locating alternative sources of supply and manufacture;<sup>13</sup> (3) the interest of the U.S. in encouraging contractors to develop at private expense items for use by the Government;<sup>14</sup> and (4) such other factors as the Secretary of Defense may prescribe.<sup>15</sup>

Section 2321 is applicable to any contract for supplies or services entered into by DOD that includes provisions for the delivery of technical data.<sup>16</sup> Under this section, a contractor and any subcontractor must be prepared to furnish a written justification to the contracting officer for any use or release restriction.<sup>17</sup> The Secretary of Defense must ensure that there is a thorough review of the appropriateness of any use or release restriction asserted.<sup>18</sup> This review must be conducted before the end of a three-year period beginning on the later of: (1) the date on which final payment is made on the contract under which the technical data is required to be delivered; or (2) the date on which the technical data is delivered under the contract.<sup>19</sup>

The Secretary of Defense may challenge a contractor or subcontractor's use or release restriction if the Secretary finds that: (1) reasonable grounds exist to question the current validity of the asserted restriction, and (2) the continued adherence to the asserted restriction would make it impracticable to procure the item competitively at a later time.<sup>20</sup> A challenge to an asserted use or release restriction may not be made, however, after the end of the three-year period unless the technical data: (1) are publicly available; (2) have been furnished to the U.S. without restriction; or (3) have been otherwise made available without restriction.<sup>21</sup> The Secretary must provide

written notice of the challenge to the contractor or subcontractor asserting the restriction.<sup>22</sup> If the contractor or subcontractor fails to respond to the notice, the contracting officer shall issue a final decision pertaining to the validity of the asserted restriction.<sup>23</sup> If a contractor or subcontractor submits a justification in response to the notice, the contracting officer must, within 60 days of receipt, issue a final decision or notify the party asserting the restriction of the time within which a final decision will be issued.<sup>24</sup>

The section also provides that it is a justification of an asserted use or release challenge that, within the three-year period preceding the challenge to the restriction, DOD validated a restriction identical to the asserted restriction if: (1) such validation occurred after a challenge to the validated restriction under this subsection, and (2) the validated restriction was asserted by the same contractor or subcontractor.<sup>25</sup>

Any claim submitted pertaining to the validity of an asserted restriction will be considered a claim within the meaning of the Contract Disputes Act.<sup>26</sup> If the contracting officer's challenge is sustained, then the restriction will be canceled and the contractor or subcontractor may be liable for fees and other expenses if the restriction is found not to be substantially justified.<sup>27</sup> If the contracting officer's challenge is not sustained, then the U.S. shall continue to be bound by the restriction and may be liable for payment to the party asserting the restriction for fees and other expenses.<sup>28</sup>

#### **5.1.1.2. Background of the Law**

During the early and middle 1940s, data rights were governed by a single paragraph in the patent provisions.<sup>29</sup> This paragraph was embodied in Procurement Regulation (PR) 3 of the War Department Regulations. In 1947, the Army Procurement Regulations (APR),<sup>30</sup> which superseded the War Department Procurement Regulations, issued a data rights provision that was basically identical to PR 3. This clause stated:

(d) Contractor agrees to and does hereby grant to the Government, to the full extent of Contractor's right to do so without payment of compensation to others, the right to reproduce, use and disclose for governmental purposes (including the right to give to foreign governments as national interest may demand) all or any part of the reports, drawings, blueprints, data and technical information specified to be delivered by Contractor to the Government under

<sup>28</sup>*Id.*

<sup>29</sup>See Judge Lane's opinion in *Bell Helicopter Textron*, ASBCA No. 21192, 85-3 BCA 18,415, for an excellent regulatory history of data rights.

<sup>30</sup>Army Procurement Regulations issued Nov. 1, 1947 (later renamed the Joint Procurement Regulations).

this contract; provided, however, that nothing contained in this sentence shall be deemed to grant a license under any patent now or hereafter issued or imply any right to reproduce anything else for this contract.<sup>31</sup>

The Armed Services Procurement Regulation (ASPR) superseded the APR (renamed Joint Procurement Regulations) in 1948.<sup>32</sup> The standard patent rights clause prescribed by ASPR 9-107.1 again contained essentially the same data rights provision as its predecessor clauses. This clause contained no provision for protecting proprietary information delivered to the Government by a contractor. The Government's reproduction, use, or disclosure of contractor's submitted data, however, was limited to Governmental purposes. The Government often ignored this limitation and viewed its rights as unlimited.

ASPR Revision No. 1 dated 4 January 1955 finally removed the data rights paragraph from the patent rights clause and made it a separate clause entitled "Reproduction and Use of Technical Data."<sup>33</sup> Judge Lane, in his opinion in *Bell Helicopter Textron*, stated that severing the data rights provision from the patent clause was done in anticipation of revising section IX, Part 2 to cover both technical data and copyright.<sup>34</sup>

The first comprehensive data policy was set forth in ASPR Revision 20 dated 26 March 1957. This was the first regulation to recognize a contractor's proprietary data. The revision deleted ASPR 9-112 and established three categories of data, which were: (1) operational data; (2) design data; and (3) proprietary data. This was the first time that contractors were given certain protections for their data. The policy also established the term "standard commercial items."

The three categories of data were defined as follows:

- (a) "Operational data" means data providing information suitable, among other things, for instruction, operation, maintenance, evaluation or testing.
- (b) "Design data" means data providing descriptive or design drawings which could be used by any competent manufacturer, in conjunction with its own internal manufacturing techniques and processes, to reproduce the supplies and services.
- (c) "Proprietary data" means data providing information concerning the details of the contractor's trade secrets or manufacturing

<sup>34</sup>*Bell Helicopter*, 85-3 B.C.A. at 92,388.

processes which are not disclosed by the design itself and which the contractor has the right to protect from use by others.<sup>35</sup>

Under this policy, "only proprietary data was recognized as legitimately entitled to protection against unlimited use by the Government."<sup>36</sup> The policy set forth two ways by which a contractor's proprietary data could be protected. First, a "Rights in Data -- Limited" clause could be inserted in supply contracts. This clause would be used when the Government had a specific need for the proprietary data for a limited purpose. The second way that a contractor's data could be protected was by a proscription against obtaining the data in the first place. The proscription could be used, for example, when the contract was for a "standard commercial item." The policy also introduced the procedure of placing restrictive legends or markings on technical data.<sup>37</sup>

In 1958, the ASPR provided increased protection for a contractor's proprietary data. Revision 38 dated 15 October 1958 added a general statement at ASPR 9-202.1(a) which provided:

(a) General. It is the policy of DOD to encourage inventiveness and to provide incentive therefor by honoring the "proprietary data" resulting from private developments and hence to limit demands for data to that which is essential for Government purposes.<sup>38</sup>

In carrying out this policy, ASPR 9-203.2, Revision 38, added a provision to the data clause that proprietary data need not be delivered for supply contracts unless "specifically identified in the schedule." Under research and development contracts, ASPR 9-202.1(c), Revision 38, adopted a broad proprietary data provision as follows:

Data need not be furnished for standard commercial items or services which are normally or have been sold or offered to the public commercially by any supplier and which are incorporated as component parts in or to be used with the product or process being developed if in lieu thereof identification of source and characteristics (including performance specifications, when necessary) sufficient to enable the Government to procure the part or an adequate substitute, are furnished; and further, proprietary data need not be furnished for other items which were developed at private expense and previously sold or offered for sale, including minor modifications thereof, which are incorporated as component parts in or to be used with the product or process being developed, if in lieu thereof the Contractor shall identify such other items and that "proprietary data" pertaining thereto which is necessary to enable reproduction or manufacture of the item or performance of

<sup>37</sup>ASPR 9-203.2 (ASPR 1955 ed., rev. 21, Apr. 9, 1957).

<sup>38</sup>ASPR 9-202.1(a) (ASPR 1955 ed., rev. 38, Oct. 15, 1958).

the process. For the purpose of this clause "proprietary data" means data providing information concerning the details of a Contractor's secrets of manufacture, such as may be contained in but not limited to its manufacturing processes, treatment and chemical composition of materials, plant layout and tooling, to the extent that such information is not disclosed by inspection or analysis of the product itself and to the extent that the Contractor has protected such information from unrestricted use by others.<sup>39</sup>

In 1964, DOD promulgated a new data rights policy in Defense Procurement Circular (DPC) No. 6.<sup>40</sup> The DPC was optional the first year and became mandatory the following year.<sup>41</sup> The policy, with some additional changes provided by DPC No. 24, was subsequently incorporated into the ASPR by Revision No. 10 dated 1 April 1965. This policy remained largely intact until the early 1980s. One of the factors possibly contributing to the longevity of this policy may have been that "developed at private expense" was never defined.

The 1964 policy abandoned the concept of withholding proprietary data and replaced it with a policy of requiring the delivery of certain contractor proprietary information with limited rights. Under this policy, the Government's rights in contractor data would be either "limited" or "unlimited." Limited rights in data would largely preclude the Government from releasing the data for use in competitive reprocurement or in-house manufacture. Unlimited rights would allow the Government unrestricted use and disclosure of the data (e.g., use in competitive reprocurement). The Government would have limited rights in "technical data pertaining to items, components or processes which were developed at private expense and incorporated into, or used in making the end-items, components, modifications, or processes developed."<sup>42</sup> There was a proviso that "form, fit, or function" data was furnished with unlimited rights.<sup>43</sup> Included in this policy was a provision for "predetermination of rights in data." This procedure was intended to be used to forestall disputes by having the Government and contractor agree on their rights before contract performance.

In 1965, DOD issued DPC No. 22,<sup>44</sup> promulgated in the 1963 edition of the ASPR. This DPC set forth a policy statement "that independent research and development costs (IR&D) were treated as 'private expense' for data rights purposes, even if reimbursed by the Government through indirect cost allocations."<sup>45</sup>

During the 1970s, the ASPR Committee proposed various definitions of the term "developed at private expense," hoping to find a definition suitable to both the Government and

<sup>45</sup>*Bell Helicopter*, 85-3 BCA at 92,392.

industry. The ASPR Committee eventually submitted a report with a proposed definition; however, it was never issued.<sup>46</sup>

In the early 1980s, the data rights policy collapsed primarily because of the adverse publicity from the procurement of spare parts at arguably excessive prices.<sup>47</sup> Secretary of Defense Weinberger issued a blanket deviation to the technical data regulations which allowed the military services to adopt a variety of policies to obtain greater rights in technical data. Congress then enacted new statutory requirements as part of the Defense Procurement Improvement Act of 1984 (Pub. L. No. 98-525), stressing the need to acquire data for competitive reprocurement of spare parts. These statutory provisions were modified in 1986 by Pub. L. No. 99-661 and are codified at 10 U.S.C. §§2320 and 2321. Other factors contributing to the enactment of these statutes included 1) the adoption of the Competition in Contracting Act (CICA) which became effective in April 1984 and which required increased competition in defense procurement, and 2) the increased unwillingness of contractors selling commercial products and computer software to agree to the policy of giving the Government unlimited rights to technical data and computer software developed in the performance of a Government contract.<sup>48</sup>

The development of workable implementing regulations was still elusive, notwithstanding Congress' direction to DOD to provide regulations which would balance the needs of the Government (to obtain competition) with the protection of contractors' proprietary rights. Coverage of data rights was noticeably missing from the FAR when it was published in 1984. This was because DOD and the civilian agencies could not agree on a single regulation. Instead, they decided to issue two data regulations. A proposed FAR was published for comment in the Federal Register in August 1985,<sup>49</sup> followed by a proposed DOD FAR supplement (DFARS) in September 1985.<sup>50</sup> The proposed DFARS was subsequently withdrawn primarily because of congressional and industry objections to the definition of the term "developed", and because it did not provide the balancing of interest required by the statute. An interim DFARS rule was subsequently published, which modified the pre-CICA coverage on data rights to comply with the Department's obligations under the new statute.

Also during 1984 and 1985, the Air Force and Navy devised their own clauses on data rights. In both cases, the clauses required contractors and subcontractors to sell or relinquish their data rights as a condition of award or to give up rights a short time after contract performance.

In June 1986, the Packard Commission issued its report which included extensive treatment on data rights. The Commission's report noted that the current practice discouraged

---

<sup>46</sup>The Navy members of the ASPR Subcommittee on Technical Data submitted a minority report disagreeing with this definition.

<sup>47</sup>See Ralph C. Nash, Jr., *Proprietary Rights in the Competitive Era*, Gov't. Excc. 51 (Apr. 1987).

<sup>50</sup>50 *Fed. Reg.* 36887 (1985).

firms from participating in defense markets.<sup>51</sup> Later that year, Secretary of Defense Weinberger rescinded the 1983 deviation waiver.

The proposed data rights regulation in the DFARS subpart 227 was published for comment on 16 January 1987.<sup>52</sup> The regulation, however, failed to address the contractors' needs for protection of their commercial technology which they had incorporated into military products.<sup>53</sup> Some of the features of the proposed DFARS regulation included a new type of right in the standard clause -- a "Government purpose license right" in technical data for items, components, or processes developed with mixed funding. This right would permit the Government to use the data for competitive procurement purposes, but would require recipients of such data to sign an agreement precluding disclosure and commercial use of the data.

Another significant feature of the proposed DFARS regulation was the definition of "developed at private expense." The proposed DFARS 227.471 followed the guidance of the Congressional Conference Committee on the definition of the term "developed." This guidance provided that "the item or component must have been constructed or the process practiced" and "workability" must be established. The proposed DFARS 227.471 definition of the term "at private expense," however, was less consistent with the congressional guidance. The proposed definition of "at private expense" was as follows:

The cost of the development has not been paid in whole or in part by the Government and that such development was not sponsored by or required as an element of performance under a Government contract or subcontract; provided, however, independent research and development and bid and proposal costs are deemed to be at private expense.

Pub. L. No. 99-661 amended 10 U.S.C. § 2320(a)(2)(F) to prohibit the Government from requiring a contractor "to sell or otherwise relinquish" rights in private expense data "as a condition of being responsive to a solicitation or as a condition for the award of a contract." This provision was directed at the practice of requiring offerors to submit alternative proposals giving up all rights and making their willingness to cooperate an evaluation factor in the source selection.

10 U.S.C. § 2320 was again amended by section 808 of the DOD Authorization Act of 1988, Pub. L. No. 100-180. The amendments to the statute were minor. On 10 April 1987, Executive Order No. 12591 was issued. This order provided that contractors be permitted to retain commercial rights in technical data and computer software developed on Government contracts. The order mandated that each agency shall:

---

<sup>51</sup>COMMISSION ON DEFENSE MANAGEMENT, A QUEST FOR EXCELLENCE -- FINAL REPORT TO THE PRESIDENT, 15 (June 1986).

<sup>52</sup>52 Fed. Reg. 2082 (1987).

<sup>53</sup>Ralph C. Nash & John Cibinic, *Proposed New Department of Defense Technical Data Policies*, 1 N&CR ¶ 16 (Feb. 1987).

(6) cooperate, under policy guidance provided by the Office of Federal Procurement Policy, with the heads of other affected departments and agencies in the development of a uniform policy permitting Federal contractors to retain rights to software, engineering drawings, and other technical data generated by Federal grants and contracts, in exchange for royalty-free use by or on behalf of the Government.

On 16 April 1987, proposed DFARS 227.471 set forth the following definition of "developed":

"Developed," as used in this subpart, means that the item, component, or process exists and is workable. Thus, the item or component must have been constructed or the process practiced. Workability is generally established when the item, component or process has been analyzed or tested sufficiently to demonstrate to reasonable people skilled in the applicable art that there is a high probability that it will operate as intended. Whether, how much, and what type of analysis or testing is required to establish workability depends on the nature of the item, component, or process, and the state of the art. To be considered "developed," the item, component, or process need not be at the stage where it could be offered for sale or sold on the commercial market, nor must the item, component or process be actually reduced to practice within the meaning of Title 35 of the U.S. Code.<sup>54</sup>

This resolved the major disagreement that had existed over the amount of "testing" required to prove that the item, component, or process was developed. Many individuals in Government had believed that the definition should require sufficient testing to show "a reduction to practice" as required with patentable inventions. Industry had objected to such a stringent requirement. Judge Lane, in his opinion in *Bell Helicopter Textron*, arrived at a middle ground stating that:

Practicability, workability, and functionality (which seem to be essentially synonymous concepts for this purpose) must be demonstrated, that is, the item or component must be analyzed and/or tested sufficiently to demonstrate to reasonable persons skilled in the applicable art that there is a high probability the item or component will work as intended. Whether testing is required in addition to analysis, and the degree of testing and whether dynamic as well as static, depends on the nature of the item or component and the state of the art.<sup>55</sup>

---

<sup>54</sup>This definition is based on the guidance contained in the Conference Report to The National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3876 and on the detailed analysis and holding in *Bell Helicopter Textron*, ASBCA 21192, 85-3 BCA ¶ 18, 414.

<sup>55</sup>*Bell Helicopter*, 85-3 BCA at 94,421 & 94, 422.

These words are used almost verbatim in the DFARS definition.

Proposed DFARS 227.471 also adopted the following definition of "private expense":

"Private expense," as used in this subpart, means that the cost of development has not been paid in whole or in part by the Government and that such development was not required as an element of performance under a Government contract or subcontract; provided, however, independent research and development and bid and proposal costs are deemed to be at private expense.

This definition largely reflected the views of the drafters of the 1964 DOD policy.

In May 1987, the FAR data provisions were finally issued.<sup>56</sup> FAR Subpart 27.4 provided a single policy for all agencies except DOD. Notably, the FAR provision also established a goal of 30 September 1988 for the issuance of a single regulation. The FAR clause provided the Government with unlimited rights in the following categories of data:

- (1) Data first produced in the performance of the contract;
- (2) Form, fit, and function data delivered under the contract;
- (3) Manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under the contract; and
- (4) All other data delivered under the contract other than limited rights data.<sup>57</sup>

These categories are similar to the unlimited rights provisions in the DFARS. Notice, however, that the FAR clause only gives data rights in data relating to the specific contract. The DFARS clause, on the other hand, is broader in that it gives rights in data relating to "this or any other Government contract or subcontract."

In April 1988, DOD issued an interim rule on a new technical data policy. This policy required "cradle to grave" negotiation of all technical data rights. There was, however, little guidance provided on the techniques to be used in the negotiation. The interim rule called for the negotiation of data rights pertaining to every item, component, and process for which the contractor was claiming a proprietary right. Under DFARS 227.473-1(c)(1)(iii), the parties had to agree to a list. This list was required to:

---

<sup>56</sup>52 *Fed. Reg.* 18140 (1987).

<sup>57</sup>See Ralph C. Nash & John Cibinic, *FAR Data Provisions Issued At Last*, 1 N&CR ¶ 51 (June 1987).

(A) identify the items, components, processes, or computer software to which the technical data pertains;

(B) identify or describe the technical data or computer software subject to other than unlimited rights; and

(C) identify or describe, as appropriate, the category or categories of Government rights, the agreed-to time limitations, or any special restrictions on the use or disclosure of the technical data or computer software.

DFARS 252.227-7013(b)(1)(ix) and (k) provided that the Government would obtain unlimited rights in any technical data not on the list. This provided contractors with an incentive to ensure that the list was complete.

DOD again revised its technical data policy by issuing another interim rule which took effect in November 1988.<sup>58</sup> The November interim rule backed away from the total negotiation policy set forth in the previous interim rule. This was the third data policy in less than three years. From the progression of these policies, it appears that DOD seems to be moving toward a balance between: (a) protecting contractor rights in technical data and (b) obtaining information necessary to conduct competitive procurements.

On 15 October 1990, an Advance Notice of Proposed Rule making was published.<sup>59</sup> The advance notice addressed four types of rights: (1) unlimited; (2) limited; (3) restricted; and (4) Government purpose. The proposal seemed to suggest that the Government should have unlimited rights in any data produced during a contract, regardless of whether the Government has a need for the data or whether Government acquisition of the data would destroy its commercial value. The Advance Notice of Proposed Rule making was not implemented.

### 5.1.1.3. Law in Practice

While representing extensive effort by both the Government and the private sector to ensure fair and workable rules, the current implementation of the law on technical data rights, 10 U.S.C. § 2320, is still a source of conflict and confusion for both sides. The recent changes in the law have solved some problems. For example, it now establishes a statutory basis for recognizing and protecting contractor rights in privately developed items, components, and processes and clarifies boundaries for the Government in pursuing data rights for full and open competition. The law also clarifies validation procedures, 10 U.S.C. § 2321.

The current procurement process, however, is driven by an allocation or determination of rights in technical data which begins during development but often occurs after the system has been produced, and when the Government's needs are more likely to conflict with the interests of the contractor and its vendors. The result is that the Government spends millions of dollars trying

---

<sup>58</sup>This interim rule was subject to further revision after receipt of public comments, 53 *Fed. Reg.* 43698 (1988).

<sup>59</sup>55 *Fed. Reg.* 41788 (1990).

to obtain and maintain full data packages for parts or components which may not be suitable for competition for technical reasons, while other parts or components for which competition may be appropriate are overlooked.

#### **5.1.1.4. Recommendations and Justification**

### **I**

#### **Amend 41 U.S.C. § 403 to provide a more accurate definition of "technical data."**

The current statutory definition of the term "technical data" was derived from the procurement regulations in 1984 when the statute was enacted. It excluded computer software but included computer software documentation based on the current thinking in the Department. Since that time, almost all persons that have addressed the technical data and computer software policies have agreed that this is not a useful breakdown of intellectual property as it regards computer software. The current thinking, as reflected in the Advance Notice of Proposed Rule making in October 1990, is that technical data should include computer data bases and manuals and other publications supporting computer programs but that all elements of the computer programs themselves should be excluded from the definition of technical data. The Panel agrees with this view and has recommended that the definition of "technical data" be revised to permit the new policy to be written on this basis.

### **II**

#### **Amend 10 U.S.C. § 2320 to more clearly define when it is applicable.**

#### **Amend 10 U.S.C. § 2321 to place reasonable limits on the scope of review.**

#### **Amend 10 U.S.C. §§ 2320 and 2321 to better clarify the laws.**

The proposed amendments to 10 U.S.C. § 2320 contain a clearer statement of when the law is applicable. Thus, the first sentence of section 2320(a)(1) is amended to state that "[t]he Secretary of Defense shall prescribe regulations to define, in all contracts where technical data is specified to be delivered, the respective rights of the U.S. and of a contractor or subcontractor." This change reflects the DFARS requirement that the policy applies when the Government is calling for data under a contract and not otherwise.

Section 2320(b)(7) is deleted in its entirety because the Panel concluded that the certification requirement is burdensome on contractors and acts counter to the goal of streamlining the acquisition process by reducing paperwork.

The Panel also concluded that section 2320(c) should be deleted in its entirety. This section is unnecessary because the Secretary already has authority under the basic statute to prescribe regulations and negotiate rights. Specifically, section 2320(a) provides the Secretary with the authority to prescribe regulations and section 2320(a)(2)(G) allows the Secretary to negotiate the acquisition of rights. Thus, section 2320(c) is redundant and should be repealed.

Section 2321(c) provides that the Secretary of Defense must review the appropriateness of any use or release restriction with respect to technical data delivered by a contractor or subcontractor. Technically, this requires the Secretary to review all technical data for which the contractor asserts a use or release restriction regardless of whether the Government has a need for the data. The proposed amendment provides that a review need not be conducted unless the Government has a need for the data and the contractor requests to provide less than full procurement data rights. This proposal attempts to place reasonable limits on the scope of review.

The remaining proposed statutory changes to sections 2320 and 2321 are primarily ones of clarification. For instance, the term "for any purpose" was added to sections 2320(a)(2)(A)(i) and (ii) to clarify that the Government has full data rights under these provisions. The proposed amendment to section 2320(a)(2)(B) attempts to clarify the use limitation by providing that the contractor or subcontractor may restrict the right of the U.S. to "use technical data pertaining to the item or process for manufacturing by the Government." Other minor clarification amendments include adding the word "final" before "decision" in section 2321(f) in order to be consistent with the Contract Disputes Act. Also, the proposed amendment to section 2321(g) clarifies that there is no requirement to state a sum certain to be considered a claim within the meaning of the Contract Disputes Act.

### III

#### **Amend 10 U.S.C. § 2320(a)(3) to provide a separate policy for commercial items or components.**

Section 2320(a)(3) is amended to limit its applicability to commercial items. DOD policy, as set forth in the DFARS, encourages the use of commercial items to the maximum extent possible. The DFARS state that DOD will normally only obtain technical data and data rights with regard to commercial items as provided in 10 U.S.C. § 2320(a)(2)(C) & (D). The proposed statutory amendment to section 2320 adopts this policy.

### IV

#### **Amend 10 U.S.C. § 2320 to permit the Secretary of Defense to utilize any technical data policy that would meet the Government's procurement needs while providing protection for commercially valuable technology.**

The proposed amendment to section 2320(a)(2)(G)(ii) would permit the Secretary of Defense to utilize any technical data policy that would meet the Government's reprourement needs while providing the maximum possible protection for commercially valuable technology. Thus, it would permit the Secretary to adopt policies that did not take reprourement rights in technical data for commercially valuable technology. This broad authority would enable the Secretary to consider a new approach for the procurement of replenishment parts and components of weapon systems that was based on ascertaining competition needs and meeting those needs without the necessity of negotiating rights to technical data. Under the amended provision, the Secretary would have the flexibility to test this new approach as an alternative method of dealing with technical data.

The new alternative approach is intended to be applied during the engineering and manufacturing development (EMD) and production of a system or product to be used by the Government. This proposal is not based on a distribution of technical data rights theory (as set forth in section 2320), but rather on a procurement strategy which relies on identifying the need for competitive acquisition based on a life cycle cost analysis and providing competitive sources to meet that need.

The approach would not significantly alter the current policies of the Department with regard to technical data needed for internal purposes such as design verification, training, installation, operation, maintenance, and testing. The contractor would be required to deliver all technical data needed to meet these needs, and, to the extent that data constituted form, fit, or function data and manuals, it would be required to be delivered with unlimited rights. To the extent the data required to meet these needs included detailed manufacturing drawings or detailed manufacturing process data, that data would be delivered with proprietary legends restricting the Government's use of the data to meet these internal needs.

With regard to the impact of the alternative approach on reprourement of parts, the prime contractor would be required to develop a Spare Parts Acquisition Plan and implement it during the design and early manufacture phases of the acquisition. This system would be modeled on the spare parts provisioning conferences that are presently being used by the services but it would move these conferences into the development process and place them under the responsibility of the Government program manager. By merging the present system of early identification of proprietary data with the provisioning conference system, the new methodology would focus the attention of the development contractor and the Government program manager on steps that could be taken in the development process to enhance competition.

The prime contractor, with the approval of the Government's program manager, would be required to categorize all parts and components of a system or product into three categories: (1) those for which no future competitive procurement was anticipated; (2) those for which limited competition was required because of the need for qualified vendors; and (3) those for which full and open competition was practicable. Category 3 would be the default option, and a contractor or subcontractor proposing to include an item in categories 1 or 2 would have the burden to demonstrate to the program manager's satisfaction that the Government would be protected from having to pay unreasonable reprourement prices. The Government program manager would

make the final decision on this categorization as the development of the system progressed and the contractor would implement the decisions that were made.

With regard to parts and components in category 1, the contractor would not deliver a detailed technical data package because they would be procured in the future on a sole source basis. With regard to parts and components in category 2, the contractor would qualify and develop competitive sources using techniques such as licensing, dual development, or reverse engineering. No detailed technical data package would be delivered on these parts and components because the Government would have the qualified sources available for future procurement using limited competition.

With regard to parts and components in category 3, the contractor would be required to deliver a detailed technical data package without proprietary rights that was sufficient to permit procurement from any competent manufacturer through full and open competition. The contractor would serve as the data repository for all data on the system or product and would be required to place that data in escrow in the event it did not perform its contract obligations or went out of business.

The goal of the approach is to shift the focus of attention from the question of who owns rights to technical data to the question of where will competition be cost effective in the future life of the system being developed. The premise is that there is no need for Government and industry to fight about proprietary rights if the Government's long term needs for competition is met through proper front end planning. The methodology for implementing the new approach outlined above has the added advantage that it minimizes the amount of proprietary data that must be delivered to the Government. This ensures contractors and subcontractors of protection of their proprietary information and reduces the Government's need for systems to store, retrieve, and protect large volumes of proprietary information.

Thus, the alternative approach, as implemented through the methodology outlined above, has a number of potential advantages over the current system:

- It obtains the agreement of the prime contractor to provide nonproprietary data packages for those parts and components where full and open competition will provide quality products. This allows the Government to obtain these parts and components through full and open competition with a guarantee of a current and accurate data package to be furnished from the data repository. This ensures that the competition is effective by responding to the constant complaint of vendors that they cannot obtain accurate data packages for such parts and components on a timely basis.
- It allows contractors and subcontractors to protect commercially valuable data, thereby facilitating technology transfer, integration, and Government access to commercial technologies. This enhances the quality and value of the products and components developed for Government use and strengthens the competitiveness of the firms and the industrial base generally.

- It ensures that manufacturers of parts and components that require qualification are adequately qualified prior to the competition. This responds to the complaint that vendors that win contracts to provide such parts and components deliver defective items or are very late in performing their contracts.
- It permits an orderly transition to a totally electronic data storage and retrieval system. As design is performed more and more by computer, the logical entity to act as the repository is the designing contractor or subcontractor. Necessary Government access to this repository, with appropriate protections, will become easier as electronic systems are put in place.

A more detailed description of the methodology outlined here for implementing the alternative approach is set forth in paragraph 5.1.1.7.

#### 5.1.1.5. Relationship to Objectives

The first recommendation expands the definition of "technical data" to include computer data bases and manuals and other publications supporting computer programs while continuing to exclude computer programs themselves from the definition. The second recommendation clarifies both sections 2320 and 2321. The third recommendation encourages the maximum use of commercial items by providing in section 2320 that DOD will normally only obtain technical data and data rights for commercial items that relate to form, fit, or function or which are necessary for operation, maintenance, installation, or training (other than detailed manufacturing or process data). This recommendation reflects the Panel's goal of encouraging firms to integrate their commercial and military work. The fourth recommendation offers one alternative approach to data which focuses not on the distribution of rights between Government and industry but rather on ways to ensure that the Government has the means to ensure procurement prices are reasonable, and that full and open competition is obtained, when appropriate.

#### 5.1.1.6. Proposed Statute

##### 41 U.S.C. §403. Definitions

(8) The term "technical data" means recorded information of a scientific or technical nature. It does not include computer programs but does include manuals, instructional materials and technical data formatted as a computer data base. ~~recorded information (regardless of the form or method of the recording) of a scientific or technical nature (including computer software documentation) relating to supplies procured by an agency.~~ Such term does not include ~~computer software or~~ financial, administrative, cost or pricing, or management data or other information incidental to contract administration.

##### 10 U.S.C. § 2320. Rights in technical data

(a)(1) The Secretary of Defense shall prescribe regulations to define, in all contracts where technical data is specified to be delivered, the respective rights legitimate interest of the United

States and of a contractor or subcontractor ~~in technical data pertaining to an item or process~~. Such regulations shall be included in regulations of the DOD prescribed as part of the Federal Acquisition Regulation. Such regulations may not impair any right of the United States or of any contractor or subcontractor with respect to patents or copyrights or any other right in technical data otherwise established by law. Such regulations also may not impair the right of a contractor or subcontractor to receive from a third party a fee or royalty for the use of technical data pertaining to an item or process developed exclusively at private expense by the contractor or subcontractor, except as otherwise specifically provided by law.

(2) Such regulations shall include the following provisions:

(A) In the case of an item component, or process that is developed by a contractor or subcontractor exclusively with Federal funds (other than an item component, or process developed under a contract or subcontract to which regulations under section 9(j)(2) of the Small Business Act (15 U.S.C. 638(j)(2)) apply), the United States shall have the unlimited right to-

(i) use technical data pertaining to the item component, or process for any purpose; or

(ii) release or disclose the technical data to persons outside the Government or permit the use of the technical data by such persons for any purpose.

(B) Except as provided in subparagraphs (C) and (D), in the case of an item component, or process that is developed by a contractor or subcontractor exclusively at private expense, the contractor or subcontractor may restrict the right of the United States to ~~--(i) use technical data pertaining to the item component, or process for manufacturing by the Government; or (ii) release or disclose technical data pertaining to the item component, or process to persons outside the Government, or permit the use of the technical data by such persons. For purposes of this section, amounts spent for independent research and development and bid and proposal costs shall be considered to be private expense. The Secretary shall specify the manner in which other indirect costs shall be treated.~~

(C) Subparagraph (B) does not apply to technical data that-

(i) constitutes a correction or change to data furnished by the United States;

(ii) relates to form, fit, or function;

(iii) is necessary for operation, maintenance, installation, or training (other than detailed manufacturing or process data); or

(iv) is otherwise publicly available or has been released or disclosed by the contractor or subcontractor without restriction on further release or disclosure.

(D) Notwithstanding subparagraph (B), the United States may release or disclose technical data to persons outside the Government, or permit the use of technical data by such persons, if

(i) such release, disclosure, or use-

(I) is necessary for emergency repair and overhaul; or

(II) is a release or disclosure of technical data (other than detailed manufacturing or process data) to, or use of such data by, a foreign government that is in the interest of the United States and is required for evaluational or informational purposes;

(ii) such release, disclosure, or use is made subject to a prohibition that the person to whom the data is released or disclosed may not further release, disclose, or use such data; and

(iii) the contractor or subcontractor asserting the restriction is notified of such release, disclosure, or use.

(E) In the case of an item, component, or process that is developed in part with Federal funds and in part at private expense, the respective rights of the United States and of the contractor or subcontractor in technical data pertaining to such item, component, or process shall be established as early in the acquisition process as practicable (preferably during contract negotiations) and shall be based upon negotiations between the United States and the contractor, except in any case in which the Secretary of Defense determines, on the basis of criteria established in the regulations, that negotiations would not be practicable. The establishment of such rights shall be based upon consideration of all of the following factors:

(i) The statement of congressional policy and objectives in section 200 of title 35, the statement of purposes in section 2(b) of the Small Business Innovation Development Act of 1982 (15 U.S.C. 638 note), and the declaration of policy in section 2 of the Small Business Act (15 U.S.C. 631).

(ii) The interest of the United States in increasing competition and lowering costs by developing and locating alternative sources of supply and manufacture.

(iii) The interest of the United States in encouraging contractors to develop at private expense items for use by the Government.

(iv) Such other factors as the Secretary of Defense may prescribe.

(F) A contractor or subcontractor (or a prospective contractor or subcontractor) may not be required, as a condition of being responsive to a solicitation or as a condition for the award of a contract--

(i) to sell or otherwise relinquish to the United States any rights in technical data except-

(I) rights in technical data described in subparagraph (C); or

(II) under the conditions described in subparagraph (D); or

(ii) to refrain from offering to use, or from using, an item, component, or process to which the contractor is entitled to restrict rights in data under subparagraph (B).

(G) The Secretary of Defense may-

(i) negotiate and enter into a contract with a contractor or subcontractor for the acquisition of rights in technical data not otherwise provided under subparagraph (C) or (D), if necessary to develop alternative sources of supply and manufacture;

(ii) agree to restrict rights in technical data otherwise accorded to the United States under this section if the United States receives a royalty-free license to use, release, or disclose the data for internal Government purposes of the United States (~~including purposes of competitive procurement~~); or

(iii) ~~encourage permit~~ a contractor or subcontractor to license directly to a third party the use of technical data which the contractor is otherwise allowed to restrict, if necessary to develop alternative sources of supply and manufacture.

~~(3) Notwithstanding paragraph (2) above, the Secretary of Defense shall prescribe regulations for contracts for commercial items or components, where technical data is specified to be delivered by a contractor or subcontractor, which prohibit the Government from obtaining unlimited rights to technical data; provided, however, that unlimited rights may be obtained when necessary to the extent specified in paragraphs (a)(2)(C) & (D). The Secretary of Defense shall define the terms "developed", "exclusively with Federal funds", and "exclusively at private expense" in regulations prescribed under paragraph (1). In defining such terms, the Secretary shall specify the manner in which indirect costs shall be treated and specify that amounts spent for independent research and development and bid and proposal costs shall not be considered to be Federal funds for the purpose of definitions under this paragraph.~~

(4) [Deleted]

(b) Regulations prescribed under subsection (a) shall require that, whenever practicable, a contract for supplies or services entered into by an agency named in section 2303 of this title [10 U.S.C. § 2303] contain appropriate provisions relating to technical data, including --

(1) defining the respective rights of the United States and the contractor or subcontractor (at any tier) regarding any technical data to be delivered under the contract;

(2) specifying the technical data, if any, to be delivered under the contract and delivery schedules for such delivery;

(3) establishing or referencing procedures for determining the acceptability of technical data to be delivered under the contract;

(4) establishing separate contract line items for the technical data, if any, to be delivered under the contract;

(5) to the maximum practicable extent, identifying, in advance of delivery, technical data which is to be delivered with a use or release restriction, as defined in section 2321(i)~~restrictions on the right of the United States to use such data;~~

(6) requiring the contractor to revise any technical data delivered under the contract to reflect engineering design changes made during the performance of the contract and affecting the form, fit, and function of the items specified in the contract and to deliver such revised technical data to an agency within a time specified in the contract;

~~(7) requiring the contractor to furnish written assurance at the time the technical data is delivered or is made available that the technical data is complete and accurate and satisfies the requirements of the contract concerning technical data;~~

~~(7)(8) establishing remedies to be available to the United States when deliverable technical data required to be delivered or made available under the contract is found to be incomplete or inadequate or to not to satisfy the requirements of the contract concerning technical data; and~~

~~(8)(9) authorizing the head of the agency to withhold payments under the contract (or exercise such other remedies as the head of the agency considers appropriate) during any period if the contractor does not meet the requirements of the contract pertaining to the delivery of technical data.~~

~~(c) Nothing in this section or in section 2305(d) of this title prohibits the Secretary of Defense from--~~

~~(1) prescribing standards for determining whether a contract entered into by the DOD shall provide for a time to be specified in the contract after which the United States shall have the right to use (or have used) for any purpose of the United States all technical data required to be delivered to the United States under the contract or providing for such a period of time (not to exceed 7 years) as a negotiation objective; or~~

~~(2) prescribing reasonable and flexible guidelines, including negotiation objectives, for the conduct of negotiations regarding the respective rights in technical data of the United States and the contractor.~~

(c) The Secretary of Defense shall by regulation establish programs which provide domestic business concerns an opportunity to purchase or borrow replenishment parts from the United States for the purpose of design replication or modification, to be used by such concerns in the submission of subsequent offers to sell the same or like parts to the United States. Nothing in this subsection limits the authority of the head of an agency to impose restrictions on such a program related to national security consideration, inventory needs of the United States, the improbability of future purchases of the same or like parts, or any additional restriction otherwise required by law.

#### **10 U.S.C. § 2321. Validation of proprietary data restrictions**

(a) Contracts covered by section. This section applies to any contract for supplies or services entered into by the DOD that includes provisions for the delivery of technical data.

(b) Contractor justification for restrictions. A contract subject to this section shall provide that a contractor under the contract and any subcontractor under the contract at any tier shall be prepared to furnish to the contracting officer a written justification for any use or release restriction (as defined in subsection (i)) asserted by the contractor or subcontractor.

(c) Review of restrictions.

(1) The Secretary of Defense shall ensure that there is a thorough review of the appropriateness of any use or release restriction asserted with respect to technical data to be delivered by a contractor or subcontractor at any tier under a contract subject to this section. This review need not be conducted when the Secretary of Defense determines that the Government will have no requirement for rights greater than permitted by any asserted restriction.

(2) The review of an asserted use or release restriction under paragraph (1) shall be conducted before the end of the three year period beginning on the later of

(A) the date on which final payment is made on the contract under which the technical data is required to be delivered; or

(B) the date on which the technical data is delivered under the contract.

(d) Challenges to restrictions.

(1) The Secretary of Defense may challenge a use or release restriction asserted with respect to technical data by a contractor or subcontractor at any tier under a contract subject to this section if the Secretary finds that-

(A) reasonable grounds exist to question the current validity of the asserted restriction; and

(B) the continued adherence [adherence] by the United States to the asserted restriction would make it impracticable to procure the item to which the technical data pertain competitively at a later time.

(2)(A) A challenge to an asserted use or release restriction may not be made under paragraph (1) after the end of the three-year period described in subparagraph (B) unless the technical data involved --

- (i) are publicly available;
- (ii) have been furnished to the United States without restriction; or
- (iii) have been otherwise made available without restriction.

(B) The three-year period referred to in subparagraph (A) is the three-year period beginning on the later of --

- (i) the date on which final payment is made on the contract under which the technical data are required to be delivered; or
- (ii) the date on which the technical data are delivered under the contract.

(3) If the Secretary challenges an asserted use or release restriction under paragraph (1), the Secretary shall provide written notice of the challenge to the contractor or subcontractor asserting the restriction. Any such notice shall --

(A) state the specific grounds for challenging the asserted restriction;

(B) require a response within 60 days justifying the current validity of the asserted restriction; and

(C) state that evidence of a justification described in paragraph (4) may be submitted.

(4) It is a justification of an asserted use or release restriction challenged under paragraph (1) that, (A) the DOD and the contractor or subcontractor agreed to a predetermination of rights; or (B) within the three-year period preceding the challenge to the restriction, the DOD validated a restriction identical to the asserted restriction if --

(i) ~~(A)~~ such validation occurred after a challenge to the validated restriction under this subsection; and

(ii) ~~(B)~~ the validated restriction was asserted by the same contractor or subcontractor (or a licensee of such contractor or subcontractor).

(e) Time for contractors to submit justifications. If a contractor or subcontractor asserting a use or release restriction submits to the contracting officer a written request, showing the need for additional time to comply with the requirement to justify the current validity of the asserted restriction, additional time to adequately permit the submission of such justification shall be provided by the contracting officer as appropriate. If a party asserting a restriction receives notices of challenges to restrictions on technical data from more than one contracting officer, and notifies each contracting officer of the existence of more than one challenge, the contracting officer initiating the first in time challenge, after consultation with the party asserting the restriction and the other contracting officers, shall formulate a schedule of responses to each of the challenges that will afford the party asserting the restriction with an equitable opportunity to respond to each such challenge.

(f) Decision by contracting officer.

(1) Upon a failure by the contractor or subcontractor to submit any response under subsection (d)(3), the contracting officer shall issue a final decision pertaining to the validity of the asserted restriction.

(2) After review of any justification submitted in response to the notice provided pursuant to subsection (d)(3), the contracting officer shall, within 60 days of receipt of any justification submitted, issue a final decision or notify the party asserting the restriction of the time within which a final decision will be issued.

(g) Claims. If a claim pertaining to the validity of the asserted restriction is submitted in writing to a contracting officer by a contractor or subcontractor at any tier, such claim shall be considered a claim within the meaning of the Contract Disputes Act of 1978 (41 U.S.C. 601 et seq.) without regard to the requirement to state a sum certain.

(h) Rights and liability upon final disposition.

(1) If, upon final disposition, the contracting officer's challenge to the use or release restriction is sustained --

(A) the restriction shall be canceled; and

(B) if the asserted restriction is found not to be substantially justified, the contractor or subcontractor asserting the restriction shall be liable to the United States for payment of the cost to the United States of reviewing the asserted restriction and the fees and other expenses (as defined in section 2412(d)(2)(A) of title 28 [28 U.S.C. § 2412(d)(2)(A)]) incurred by the United States in challenging the asserted restriction, unless special circumstances would make such payment unjust.

(2) If, upon final disposition, the contracting officer's challenge to the use or release restriction is not sustained --

(A) the United States shall continue to be bound by the restriction; and

(B) the United States shall be liable for payment to the party asserting the restriction for fees and other expenses (as defined in section 2412(d)(2)(A) of title 28 [28 U.S.C. § 2412(d)(2)(A)]) incurred by the party asserting the restriction in defending the asserted restriction if the challenge by the United States is found not to be made in good faith.

(i) Use or release restriction defined. In this section, the term "use or release restriction", with respect to technical data delivered to the United States under a contract subject to this section, means a restriction by the contractor or subcontractor on the right of the United States--

(1) to use such technical data; or

(2) to release or disclose such technical data to persons outside the Government or permit the use of such technical data by persons outside the Government.

#### **5.1.1.7. A Methodology for Implementing the Alternative Technical Data Approach**

During the competition for the development contract for a new system, the Request for Proposals would require competing prime contractors to present a Spare Parts Acquisition Plan. The plan would have to show what organization they would put in place: (1) to work with the Government program office to classify each component and part of the system during the development and early production phases, and (2) to obtain competition when it was required. They would also be expected to provide an overall appraisal of the amount of competition that they could develop during development of the system. The quality of this Spare Parts Acquisition Plan would normally be an evaluation factor in the source selection decision.

After the contract was awarded, the contractor would begin to classify all parts and components as the design progressed. If any of the subcontracted components contained repairable parts, the subcontractor could be tasked with the same classification obligation. Government employees would work closely with the contractor in this process and, as in the case of current spare parts provisioning conferences, would make the final decision on the proper classification of each part or component. They would have full access to all data, proprietary or nonproprietary, necessary fulfill their responsibilities in the process. The goal of the system would be to identify three categories of parts and components: (1) those for which no future competitive procurement was anticipated, (2) those for which limited competition was required because of the need for qualified sources, and (3) those for which full and open competition was practicable.

The initial determination would identify those parts and components which fell into category 1, where a life cycle cost analysis indicated that future competition would be impracticable or unproductive. This would include parts and components where there would be little need for replacement during use of the system, where a very large capital investment would be needed for manufacturing, or where there was very high sensitivity of the part or technology being incorporated in the item indicating that there would be only one suitable and cost effective source, or where considerations of criticality or proprietary rights precluded reprourement from

other sources. In each case, the contractor (or subcontractor) would prepare a detailed analysis, including life cycle cost where applicable, demonstrating that the part or component was properly placed in category 1 and the Government program manager would make the final decision to place the part or component in this category. When the part or component was placed in category 1, the contractor would not be required to deliver a detailed Technical Data Package to the Government as part of performance of the contract. However, the classification of the parts and components in this category would be subject to reconsideration whenever either the contractor or the Government determined that the circumstances had changed. As long as a part or component remained in category 1, additional parts or components would be procured by the Government using sole source procurement procedures.

With regard to those parts and components determined not to fall in category 1, there would be a presumption that they fell in category 3. This category would include the majority of parts and components which could clearly be manufactured by any competent company without special qualification. The new methodology would require the contractor to prepare a list of such parts and components and to develop and deliver (when needed for reprocurement) a nonproprietary Technical Data Package for them that was sufficiently detailed to support full and open competition. This Technical Data Package would be kept current in the contractor's data repository and would be available to the Government at any time on short notice. These Technical Data Packages would be used by the Government to procure these parts and components through normal procurement procedures as is done under current spare parts procurements.

With regard to any part or component that the contractor believed should be placed in category 2 because of the need for qualification of sources, it would have to present justification for this determination to the Government program manager who would make the final decision placing a part or component in this category and the number of sources to be qualified. Once it had been determined that a part or component was in category 2, the contractor would have the primary responsibility for developing and qualifying those competitive sources. As long as the sources were provided and performed, the contractor would not be required to deliver a detailed Technical Data Package to the Government but, as discussed earlier, the Government would have full access to all detailed data for internal purposes such as design review, inspection, or other necessary governmental purposes.

The contractor would be expected to develop at least two competitive sources for parts and components in category 2 through normal prime contractor qualification and procurement techniques. If the part or component was to be designed and manufactured by the contractor, the contractor would be contractually required to develop one or more of the competitive sources using the least expensive technique -- normally licensing another manufacturer. If the part or component was to be designed and manufactured by a subcontractor to a prime contractor's form, fit, or function specification, the contractor would normally request that subcontractor to agree to license another manufacturer. If the subcontractor was unwilling to license competitors, the contractor could seek to include the item in category 1, provided the Government was adequately protected under sole source procedures or some other form of protection, such as a long-term pricing agreement with that subcontractor or using a form, fit, or function specification to develop

two or more subcontractors. In the rare case where it was believed that the part or component could be bought in the future from another vendor using reverse engineering techniques, a single subcontract could be awarded in the early program phases with the intent to subsequently obtain competition through the use of this technique. In any case where competition was developed through licensing, the contractor or subcontractor would be paid a technology transfer fee, to be negotiated on a case-by-case basis by the contracting officer and the contractor or subcontractor. Once the competitive sources had been qualified and developed, parts and components would be procured from them by the Government using normal procurement procedures as is done in current spare parts procurements.

This system would require the constant attention of the prime contractor and the Government program manager to ensure that the parts and components were placed in the proper category and that each decision was fully substantiated by analytical data supporting the life cycle cost analysis and the technical decision that certain parts and components were of sufficient criticality or complexity to require procurement from qualified vendors. In all cases, the final decision of the categorization of parts and components would be made by the Government program manager but the contractor would be permitted to seek review of a decision to place a part or component in category 2 by the Assistant Secretary for Acquisition of the military service.

The system would be dynamic rather than static. Thus, any initial categorization of parts or components could be changed by the Government program manager as additional information became available. For example, a component initially placed in category 1 might be reclassified into category 2 or 3 if later usage information indicated that there would be need to acquire a considerably greater number of components that had been originally projected. Similarly, a component initially placed in category 2 might be reclassified into category 1 if the cost of developing and qualifying a competitive source was so great that it was determined by life cycle cost analysis that competition was not economical.

With regard to data necessary for modification of systems or significant subsystems, this methodology would require the development contractor to assist the Government in obtaining competition when the agency had determined that modification of the system or subsystem should be acquired competitively. At the direction of the Government, the contractor would qualify competitive modification sources, license modification sources providing necessary technical assistance, or make a data package available to the Government to permit procurement of the modification. If proprietary data were included in this package or sources were licensed, an appropriate fee would be negotiated to compensate the contractor or its subcontractors for transferring the technology. The same provisions would flow down to subcontractors furnishing significant subsystems.

Finally, the contractor would normally be the data repository for all technical data applicable to the system. As such, for category 3 type parts the contractor would be required to furnish such data to the Government for internal use or for competitive reprourement of parts and components whenever a procurement was imminent. The contractor and subcontractor would also be required to hold a full technical data package for all category 1, 2, and 3 parts or components in escrow for the Government in the event that the contractor failed to perform. The

contractor would be permitted to use subcontractors as data repositories when that was a more practicable means of maintaining the data in a current status. This escrow account would permit the Government to use the data to meet its needs if the contractor or subcontractor failed to perform its obligations under the contract, or terminated its business as a Government contractor or subcontractor. Decisions of the Government to use the escrow would be subject to appeal by the contractor or subcontractor under accelerated procedures. When the data was to be used for competitive reprourement, the contractor would be required to furnish a fully adequate technical data package in a short period of time -- to ensure that accurate data is available to support the competitive reprourement process.

## **5.2. Technology Transfer**

### **5.2.0. Introduction**

The Panel reviewed the three major statutes that have been enacted to promote the transfer of technology from the Government to the private sector. These statutes are the University, Small Business Patent Policy Act, Pub. L. No. 96-517, the Federal Technology Transfer Act, Pub. L. No. 99-502, and the Stevenson-Wydler Technology Innovation Act, Pub. L. No. 96-480. The Panel found that DOD has taken steps to implement all of these statutes -- indicating that a successful start has been made. The Panel also identified several small improvements that could be made to two of these statutes to enhance their effectiveness.

The University, Small Business Patent Policy Act promotes technology transfer by permitting small businesses and nonprofit organizations to retain title in inventions made in the performance of Government contracts if they elect to file for a patent. This policy leaves the commercial rights in such inventions in the hands of the organization where the invention was made -- under the theory that the organization has the strongest motivation to utilize the invention in the commercial marketplace. The Panel found that this policy has been fully implemented and that it works well. (The Panel found one major university that had licensed over 50% of its inventions to commercial companies.) However, the Panel found that provisions of the statute governing the time for reporting inventions as well as the period for electing to file were lax -- with the result that too little time was given to DOD agencies to file for patent protection in cases where the small business or nonprofit organization elected not to file. While there are probably not a large number of situations where agency personnel would find that a patent application should be filed to preserve valuable commercial or Government rights, the Panel recommends some minor changes to the statute which would make improvements in this area.

First, the Panel recommends that the statute be amended to require contractors to disclose each subject invention within a reasonable time, but in any event, prior to publication. This will enhance the ability of the contractor and the Federal agency, if the contractor elects not to retain title, to file for a patent before the time period for filing expires. Second, the Panel recommends that the law be amended to provide that contractors specifically state their election to retain title to a subject invention in the U.S. and in any foreign country. The purpose of this recommendation is to require contractors to disclose their intentions on filing abroad. If a contractor only planned on filing in the U.S., then the Federal agency would have an opportunity to file the patent abroad, thereby protecting domestic technologies from foreign competitors. Third, in order to provide the Federal agency sufficient time to review an invention and have a patent application prepared and filed, the Panel recommends that the period of election may be shortened by the Federal agency to a date that is not more than four months prior to the end of the statutory period. Lastly, to encourage more timely filing, the Panel recommends that the statute provide that whenever contractors elect to retain title, they will file a patent application within one year of election. The contractor may, however, have additional time to file upon approval by the Federal agency. Timely filing of patent applications will hasten the entry of new technologies into the marketplace.

The Federal Technology Transfer Act directly promotes technology transfer by permitting Federal laboratories to enter into cooperative research and development agreements (CRADAs) in the private sector. The Panel found that DOD laboratories are beginning to utilize this statute but that there are two impediments to its full utilization. First, under current law, although Federal laboratories may patent inventions of their employees, they may not claim copyright protection in works of their employees. This reduces the protection that the laboratories have over computer programs written by their employees. The result is a reduction of the laboratories' ability to enter into cooperative research and development agreements because many organizations in the private sector will not attempt to move technology into the private sector without protection of the intellectual property underlying that technology. The Panel has concluded that the dichotomy between patent protection and copyright protection is illogical and does not serve the goal of maximizing technology transfer. The Panel, therefore, recommends that Federal laboratories be permitted to claim copyright in computer programs when those programs can promote a cooperative research and development agreement. The Panel has crafted its proposed statutory change to ensure that the Government continues to have no right to claim copyright in other types of Government information which should be freely available to the public.

Second, the Panel recommends that section 3710a of the Federal Technology Transfer Act be amended to provide that employees or former employees may assist contractors in commercializing inventions, notwithstanding that such employees may have received, or subsequently be entitled to receive, royalties pursuant to section 3710c. This will clarify that such royalties, in and of themselves, do not constitute a conflict of interest. Recognizing that there are some situations where royalties should be considered a conflict of interest, the proposed amendment includes a limiting proviso that royalties may be considered a financial interest if the inventor or author participated in the selection of the collaborating party to the cooperative research and development agreement or in the negotiation of the licensing agreement. This recommendation should encourage Federal employees to work with contractors in the commercialization of inventions or copyrighted works.

The Stevenson-Wydler Technology Innovation Act establishes the program of enabling Federal laboratories to transfer technology to the private sector. The Panel makes no recommendations for changes to this Act.

Lastly the Panel recommends the repeal of 10 U.S.C. section 2363, which was enacted by the Department of Defense Authorization Act of 1986. The Panel found that this law was redundant with the Stevenson-Wydler Technology Innovation Act and, therefore, is unnecessary.

## 5.2.1. 15 U.S.C. §§ 3701 - 3710d

### Technology Innovation

#### 5.2.1.1. Summary of the Law

Chapter 63 of Title 15, U.S. Code entitled "technology innovation" encompasses two large acts. These Acts are the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. §§ 3701-3710) and the Federal Technology Transfer Act of 1986 (15 U.S.C. §§ 3710a-3710d). The following discussion focuses on the later Act with recommendations to enhance its effectiveness.

Section 3710a authorizes each Federal agency to permit the director of any of its Government-operated Federal laboratories, and to the extent provided in an agency-approved joint work statement, the director of any of its Government-owned, contractor-operated (GOCO) laboratories to enter into cooperative research and development agreements (CRADAs) on behalf of such agency with other Federal agencies; units of state or local governments; industrial organizations; public and private foundations; nonprofit organizations; or other persons.<sup>1</sup> The law also permits the director to negotiate licensing agreements for inventions made or other intellectual property developed at the laboratory and other inventions or other intellectual property that may be voluntarily assigned to the Government.<sup>2</sup>

Under the CRADA, the laboratories may:

(1) accept, retain, and use funds, personnel, services, and property from collaborating parties and provide personnel, services, and property to collaborating parties;

(2) grant or agree to grant in advance, to a collaborating party, patent licenses or assignments, or options thereto, on any invention made in whole or in part by a laboratory employee under the agreement, retaining a nonexclusive, nontransferable, irrevocable, paid-up license to practice the invention or have the invention practiced throughout the world by or on behalf of the

---

<sup>1</sup>15 U.S.C. § 3710a(a)(1).

<sup>2</sup>15 U.S.C. § 3710a(a)(2). The Army Intellectual Property Law Division pointed out that the Technology Transfer Act of 1986, as amended, allows the Government to license "other intellectual property." They surmise that the only reasonable inference to "other intellectual property" is that it includes copyrights, as it is a type of intellectual property. The division, therefore, concluded that the Government already has the ability statutorily to license copyrighted material. They recommended that the FAR and DFARS policy be changed to allow the contracting agency the ability to require the contractor to assign all copyright interest to the Government, unless the contractor can demonstrate a plan for commercialization. The Government then can license the copyright under the provisions of the Technology Transfer Act, thereby increasing the scope of commercialization.

Government and such other rights as the Federal laboratory deems appropriate;

(3) waive, subject to reservation by the Government of a nonexclusive, irrevocable, paid-up license to practice the invention or have the invention practiced throughout the world by or on behalf of the Government, in advance, in whole or in part, any right of ownership which the Federal Government may have to any subject invention made under the agreement by a collaborating party or employee of a collaborating party;

(4) determine rights in other intellectual property developed under an agreement entered into under a CRADA; and

(5) to the extent consistent with any applicable agency requirements and standards of conduct, permit employees or former employees of the laboratory to participate in efforts to commercialize inventions they made while in the service of the United States.<sup>3</sup>

To encourage technology development, section 3710b provides rewards for inventions, innovations, computer software, or other outstanding scientific or technological contributions of value to the U.S. made by its scientific, engineering, and technical personnel.<sup>4</sup> This section also rewards such personnel for exemplary activities that promote the domestic transfer of science and technology development within the Federal Government.<sup>5</sup>

Section 3710c directs that any royalties or other income received by a Federal agency from a licensing or assignment of inventions under agreements entered into by Government-operated Federal laboratories and inventions of Government-operated Federal laboratories shall be retained by the agency whose laboratory produced the invention.<sup>6</sup> Under this provision, at least 15% of the royalties or other income that the agency received on account of the invention must be paid to the inventor.<sup>7</sup> The balance of the royalties or other income must be transferred by the agency to its Government-operated laboratories, with the majority share of the royalties or other income from the invention going to the laboratory where the invention occurred.<sup>8</sup>

Section 3710d allows a Government employee, or former employee who made an invention during the course of employment with the Government, to retain title to the invention if

the Federal agency does not intend to file for a patent application or otherwise promote commercialization of the invention.<sup>9</sup>

### 5.2.1.2. Background of the Law

As stated above, this chapter consists of two large Acts. The Stevenson-Wydler Technology Innovation Act of 1980<sup>10</sup> was intended to address a perceived decline in industrial technological innovation by attempting to build links between the sources of technological innovation (universities and Federal laboratories) and the consumers of that information (industry and state and local governments).<sup>11</sup> The Federal Technology Innovation Act of 1986 permitted Government-operated Federal laboratories to enter into CRADAs.<sup>12</sup> A CRADA is defined as "an instrument that can be executed without triggering the many legal conditions that are placed on the other statutory methods [contracts, cooperative agreements, grants] under which the Federal Government may enter into legal agreements."<sup>13</sup> The National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, extended the authority contained in the Federal Technology Innovation Act to GOCO laboratories.<sup>14</sup>

The purpose of these Acts was to establish organizations in the executive branch to study and stimulate technology; promote technology development through the establishment of centers for industrial technology; stimulate improved use of federally funded technology developments by state and local governments and the private sector; provide encouragement for the development of technology transfer through rewards; and encourage the exchange of scientific and technical personnel among academia, industry, and Federal laboratories.<sup>15</sup>

Congress expressed concern that trends such as the declining real Federal research and development (R&D) expenditure, the decreasing domestic-origin patents, and the declining ratio of R&D expenditure to the gross national product indicated a significant decline in U.S. innovative performance.<sup>16</sup> The House Report to the Stevenson-Wydler Technology Innovation Act stated that technological innovation impacts both on domestic considerations as well as on the U.S. position in the international marketplace.<sup>17</sup> In particular, technological innovation plays a vital role in economic growth and contributes to increased productivity and efficiency.<sup>18</sup> The report also stated that testimony at congressional hearings had repeatedly highlighted the lack of a national policy as hindering technology transfer within the Federal Government.<sup>19</sup>

### 5.2.1.3. Law in Practice

In review of this chapter, the Panel found that DOD has taken steps to implement both the Stevenson-Wydler Technology Innovation Act and the Federal Technology Transfer Act. Because Stevenson-Wydler focuses on establishing centers to stimulate technology and is only remotely related to acquisition, the Panel made no recommendations to amend this Act. In regards to the Federal Technology Transfer Act, the Panel found that the DOD laboratories are beginning to utilize the provisions of the Act. There are, however, two impediments to its full utilization. First, under current law, although Federal laboratories may patent inventions of their employees, they may not claim copyright protection in works of their employees. This reduces the protection that the laboratories have over computer programs written by their employees. Second, the Act also contains a provision for a dual employee award system of royalty sharing and cash awards. There is a concern that the royalty received by the inventor under this provision is a financial interest, thereby subjecting the inventor to conflict of interest rules.

Concerned with the lack of copyright protection for computer software, Congresswoman Morella (R., MD) introduced H.R. 191.<sup>20</sup> This bill would allow copyright protection for Government computer software if the software is developed "in the course of work under a cooperative research and development agreement." Specifically, the bill amends the U.S. copyright law in order to authorize the Federal Government to obtain copyrights in computer software developed by Federal employees and to authorize the Federal Government to grant intellectual property rights for computer software to a collaborating party in a CRADA or under the provisions of the National Aeronautics Space Administration Act.<sup>21</sup> The intent of this legislation is to increase the transfer of technology from the Federal Government to the private sector, thereby increasing U.S. competitiveness in the international market.<sup>22</sup> The bill was referred jointly to the Committee on Science, Space, and Technology and the Committee on the Judiciary.

The Senate version of the bill deletes the language pertaining to copyright protection of pre-existing software.<sup>23</sup> This variance from the House bill may have been the result of testimony made by the Institute of Electrical and Electronics Engineers, Inc. (IEEE) before the House Subcommittee on Intellectual Property and Judicial Administration. IEEE argued before the subcommittee that protecting pre-existing software would be comparatively disadvantageous to newcomers because they would have to pay for this software while those who were already in the market would not.<sup>24</sup>

The policy behind the original copyright legislation<sup>25</sup> was to ensure easy and inexpensive public access to Federal documents. At the time of the legislation, most of what the Federal

<sup>23</sup>S. Rep. 1581, 102d Cong., 1st Sess. (1991).

<sup>24</sup>*Id.*

<sup>25</sup>The Copyright Act of 1909, Pub. L. No. 66-319, Ch. 320, prohibited the Federal Government from copyrighting any of its materials. (As a historical note, Congress enacted a statute forbidding the Federal Government to claim copyright in its own works as early as 1895.) Since 1909, this prohibition has been codified in the copyright laws.

Government published were laws, regulations, and policy letters. Modern technology, however, brought about a "new" kind of writing known as a computer program. Although not a writing in the traditional sense, computer programs fell under the copyright umbrella along with other writings. Consequently, because copyright laws do not protect writings of the U.S., they also do not protect computer programs. As a result, this law may be hindering commercialization of certain federally developed computer software.

#### **5.2.1.4. Recommendations and Justification**

##### **I**

**Amend 15 U.S.C. § 3710a to provide that each Federal agency may secure copyright registration on behalf of the U.S. as author or proprietor in any computer program and instructions necessary for its use (except data, data bases, and data base retrieval programs) prepared by civilian and/or military employees of the U.S. Government as part of their official duties in the course of work under, or related to, a CRADA.**

##### **II**

**Amend 15 U.S.C. § 3710a to establish the procedures for securing copyright, licensing, and sharing royalties with employees for copyrightable works.**

This proposal largely parallels the Morella bill that would allow copyright protection of computer programs developed "in the course of work under a cooperative research and development agreement." The proposal is broader than the Morella bill in that it includes copyrightable works that are related to a CRADA. The intent of permitting copyright protection in the course of work performed under, or related to, a CRADA is to increase the transfer of technology from the Federal Government to the private sector, thereby increasing U.S. competitiveness in the international market. In many cases, the most effective way to transfer computer software technology is by copyrighting and exclusively licensing it.

Several studies cited the Federal copyright prohibition as one of the major impediments to technology transfer. For instance, a March 1988 survey by the General Accounting Office (GAO) stated that businesses do not have an incentive to fully develop and market Federal computer software programs because such programs are publicly disseminated.<sup>26</sup> This dissemination often

---

The law was reenacted in the 1976 Copyright Act, Pub. L. No. 94-533, 90 Stat. 2541, when present section 105 was adopted. The House Report to the Act specifically stated that the intent of the law was to place all works of the United States, published or unpublished, in the public domain. See H. Rep. 1476, 94th Cong., 2d Sess., at 59 (1976), reprinted in 1976 U.S.C.C.A.N. 5673.

<sup>26</sup>U.S. GAO, *Technology Transfer: Constraints Perceived by Federal Laboratory and Agency Officials*, RCED-88-116BF at 3 (Mar. 1988).

provides foreign business competitors equal access to the software. Moreover, Federal employees who develop computer software do not have the same incentives to commercialize it as those who make inventions because they cannot share in royalty income.<sup>27</sup> Another report by GAO in 1989 cited the lack of copyright protection as a significant barrier to the effective implementation of the Federal Technology Transfer Act of 1986.<sup>28</sup>

The Federal Technology Transfer Act of 1986 directed the Secretary of Commerce to examine the issue of computer software and report to Congress. That report, dated June 1988, found that:

[M]any agencies are already reporting that the inability of their employees to have copyright protection for valuable computer software is limiting the success of their efforts. Companies are rightly afraid that if Federal employees create software with their support it will fall into the public domain. Thus, foreign competitors could obtain for nothing important discoveries largely funded by our private sector.

In testimony before the House Subcommittee on Intellectual Property and Judicial Administration on H.R. 191, the Assistant Secretary of Commerce for Technology Policy stated that "firms simply will not undertake the risk of developing commercial applications for federally developed software without copyright protection."<sup>29</sup> In support of this statement, the Assistant Secretary gave examples of lost opportunities cited by agency officials which included NIST-developed software that made use of innovative graphical procedures for designing and analyzing experiments; USDA-developed software that predicts the growth of food-borne pathogens and software that can be used in making decisions about irrigating, spraying, and fertilizing crops; and USAF-developed software for training people to use and maintain sophisticated equipment as well as software that can be used in hospital administration.<sup>30</sup>

The strongest opposition against allowing copyright protection for computer programs appears to come from the Information Industry Association (IIA). IIA claims that copyright protection for computer programs will lead to the demise of the public's access to Government information.<sup>31</sup> This assertion attempts to blur the distinction between public access to Government information and copyright protection of computer programs. Valuable computer program technology can be protected without impairment to the Freedom of Information Act (FOIA).

---

<sup>27</sup>*Id.*

<sup>28</sup>U.S. GAO, *Technology Transfer: Implementation Status of the Federal Technology Transfer Act of 1986*, RCED-89-154 at 37 (May 1989).

<sup>29</sup>Statement of Deborah L. Wince-Smith, Assistant Secretary of Commerce for Technology Policy on H.R. 191, The Technology Transfer Improvements Act, before the Subcommittee on Intellectual Property and Judicial Administration Committee on the Judiciary, U.S. House of Representatives at 7 (May 6, 1992).

<sup>30</sup>*Id.* at 7 & 8.

<sup>31</sup>See Statement of Steven J. Metalitz, vice-president and general counsel to Information Industries Association, before the Subcommittee on Intellectual Property and Judicial Administration Committee on the Judiciary, U.S. House of Representatives (May 6, 1992).

In support of their position, IIA states that it is often hard to distinguish between programs and data.<sup>32</sup> Copyright over software, therefore, readily translates to the ability to control access to the underlying data.<sup>33</sup> Although a valid concern, the proposed statutory language alleviates this fear. The proposed language, "data, data bases, or data base retrieval programs," refers to programs which are not created or used as a primary source of information about organizations, policies, functions, decisions, or procedures of a Government component. Thus, with this protective language in place, Government computer data bases, and the computer programs necessary to access those data bases, would continue to be available under the FOIA.

Opponents to H.R. 191 also state that the bill is merely an effort to increase the compensation paid to Federal employees above the limits set by law. This argument overlooks fairness to the Federal employee and the notion of encouraging technology transfer in the Federal laboratories. The bulk of any royalties received by the laboratories would be used to support Federal employees' research work, thereby leveraging Federal expenditures which will benefit U.S. taxpayers.

The procedural amendments to section 3710a are necessary in order to implement the proposal to allow copyright protection of works under, or related to, a CRADA. The recommended changes to section 3710a establish procedures for securing copyright, licensing, and sharing royalties with employees for copyrightable works. These procedural recommendations parallel the procedures already in existence for inventions.

### III

**Amend 15 U.S.C. § 3710a(b)(5) to permit employees or former employees of the laboratory to commercialize inventions they made or works they copyrighted while in the service of the U.S., notwithstanding that such employees may have received royalties pursuant to 15 U.S.C. § 3710(c); provided, however, that such inventor or author did not participate in the selection of the collaborating party to the cooperative research and development agreement or in the negotiation of the licensing agreement.**

The Federal Technology Transfer Act of 1986 recognized that "technology transfer will be enhanced if Government engineers and scientists have some financial motivation to work actively to move their inventions and discoveries into the commercial market."<sup>34</sup> The 1986 Act amended Stevenson-Wydler by establishing two types of financial motivation. First, section 3710b mandates a cash awards program. Second, section 3710c requires agencies to pay their Government engineers and scientists "at least 15%" of any license income received on inventions. It was thought that these two financial incentives would motivate employees to advocate

---

<sup>32</sup>*Id.* at 9.

<sup>33</sup>*Id.*

<sup>34</sup>Ralph C. Nash, Jr. & John Cibinic, *Transfer of Technology from the Government to the Private Sector*, 6 N&CR ¶ 40 (July 1992).

exploitation of their technologies. The legislative history to the 1986 Act notes that "providing a predictable, guaranteed reward from royalties to federally employed inventors provides a strong incentive to report, develop, and help license inventions with commercial potential."<sup>35</sup>

The legislative history, however, is ambiguous as to the application of the conflict of interest statutes to Federal employees who receive additional compensation pursuant to the royalty-sharing component of the Act.

The Department of Commerce has stated that royalties are no more than a reward for developing the invention. Thus, royalties should not be considered a financial interest within the provisions of 18 U.S.C. § 208. The Office of Government Ethics is presently reviewing two cases on this issue.

A conflict of interest can only arise when: (1) there is a flow of royalties; and (2) the employee has the ability to work for the contractor. The only authority which allows an employee to work for a contractor is 15 U.S.C. § 3710(a)(b)(5). This provision provides:

to the extent consistent with any applicable agency requirements and standards of conduct, permit employees or former employees of the laboratory to commercialize inventions they made while in the service of the U.S.

As a practical matter, a potential conflict of interest can only arise under a CRADA. Contractors desire to have the inventor assist in developing the technology for the commercial market because of the inventor's expertise. Because the goal is to move as much technology into the commercial market as possible, inventors should be encouraged to participate in assisting contractors. The authority permitting employees to work for contractors is broad. It appears that the drafters of the legislation intended to permit inventors to assist contractors in commercializing technologies. Royalties received for such assistance should not, in and of themselves, be considered a conflict of interest. That assertion would thwart the intentions of the Act by discouraging inventors from participating in the commercialization of their invention. Recognizing that there are some situations where royalties should be considered a conflict of interest, the proposed amendment includes a limiting proviso that royalties may be considered a financial interest if the inventor or author participated in the selection of the collaborating party to the cooperative research and development agreement or in the negotiation of the licensing agreement.

#### **5.2.1.5. Relationship to Objectives**

The proposed recommendations will facilitate commercial market access to Government developed technologies.

---

<sup>35</sup>H.R. Conf. Rep. No. 953, 99th Cong., 2d Sess. 20 (1986).

### 5.2.1.6. Proposed Statute

#### 15 U.S.C. § 3710a. Cooperative research and development agreements

(a) General Authority. Each Federal agency may permit the director of any of its Government-operated Federal laboratories, and, to the extent provided in an agency-approved joint work statement, the director of any of its Government-owned, contractor-operated laboratories:

(1) to enter into cooperative research and development agreements on behalf of such agency (subject to subsection (c) of this section) with other Federal agencies; units of State or local government; industrial organizations (including corporations, partnerships, and limited partnerships, and industrial development organizations); public and private foundations; nonprofit organizations (including universities); or other persons (including licensees of inventions or copyrighted works owned by the Federal agency); and

(2) to negotiate licensing agreements under section 207 of Title 35 or under other authorities (in the case of a Government-owned, contractor-operated laboratory, subject to subsection (c) of this section) for inventions made or other intellectual property developed at the laboratory and other inventions or other intellectual property that may be voluntarily assigned to the Government.

(3) to negotiate licensing agreements following the criteria set forth in section 207 of Title 35 or under other authorities (in the case of a Government-owned, contractor-operated laboratory, subject to subsection (c) of this section) for copyrighted works owned by the Government pursuant to section (h) or copyrighted works that may be voluntarily assigned to the Government.

(b) Enumerated authority. Under agreements entered into pursuant to subsection (a)(1), a Government-operated Federal laboratory, and, to the extent provided in an agency-approved joint work statement, a Government-owned, contractor-operated laboratory, may (subject to subsection (c) of this section):

(1) accept, retain, and use funds, personnel, services, and property from collaborating parties and provide personnel, services, and property to collaborating parties;

(2) grant or agree to grant in advance, to a collaborating party, patent and copyright licenses or assignments, or options thereto, in any invention made or copyrighted work prepared in whole or in part by a laboratory employee under the agreement, retaining a nonexclusive, nontransferable, irrevocable, paid-up license to practice the invention and exercise all rights under the copyright or have the invention practiced and have all rights under the copyright exercised throughout the world by or on behalf of the Government and such other rights as the Federal laboratory deems appropriate;

(3) waive, subject to reservation by the Government of a nonexclusive, irrevocable, paid-up license to practice the invention and reproduce the copyrighted work or have the invention

practiced and the copyrighted work reproduced throughout the world by or on behalf of the Government, in advance, in whole or in part, any right of ownership which the Federal Government may have to any subject invention made or copyrighted work prepared under the agreement by a collaborating party or employee of a collaborating party;

(4) determine rights in other intellectual property developed under an agreement entered into under subsection (a)(1) of this section; and

(5) to the extent consistent with any applicable agency requirements and standards of conduct, permit employees or former employees of the laboratory to participate in efforts to commercialize inventions they made or copyrighted works they prepared while in the service of the United States, notwithstanding that such employees may have received royalties pursuant to 15 U.S.C. § 3710(c); provided, however, that such inventor or author did not participate in the selection of the collaborating party to the cooperative research and development agreement or in the negotiation of the licensing agreement. A Government-owned, contractor-operated laboratory that enters into a cooperative research and development agreement under subsection (a)(1) of this section may use or obligate royalties or other income accruing to such laboratory under such agreement with respect to any invention or copyrighted work only (i) for payments to inventors; (ii) for the purposes described in section 3710c(a)(1)(B)(i),(ii), and (iv) of this title; and (iii) for scientific research and development consistent with the research and development mission and objectives of the laboratory.

\*\*\*\*\*

(d) Definition. As used in this section --

(1) the term "cooperative research and development agreement" means any agreement between one or more Federal laboratories and one or more non-Federal parties under which the Government, through its laboratories, provides personnel, services, facilities, equipment, or other resources with or without reimbursement (but not funds to non-Federal parties) and the non-Federal parties provide funds, personnel, services, facilities, equipment, or other resources toward the conduct of specified research or development efforts which are consistent with the missions of the laboratory; except that such term does not include a procurement contract or cooperative agreement as those terms are used in sections 6303, 6304, and 6305 of title 31, United States Code;

(2) the term "laboratory" means --

(A) a facility or group of facilities owned, leased, or otherwise used by a Federal agency, a substantial purpose of which is the performance of research, development, or engineering by employees of the Federal Government;

(B) a group of Government-owned, contractor-operated facilities under a common contract, when a substantial purpose of the contract is the performance of research and development for the Federal Government; and

(C) a Government-owned, contractor-operated facility that is not under a common contract described in subparagraph (B), and the primary purpose of which is the performance of research and development for the Federal Government, but such term does not include any facility covered by Executive Order No. 12344 [42 U.S.C. § 7158 note], dated February 1, 1982, pertaining to the naval nuclear propulsion program; and

(3) the term "joint work statement" means a proposal prepared for a Federal agency by the director of a Government-owned, contractor-operated laboratory describing the purpose and scope of a proposed cooperative research and development agreement, and assigning rights and responsibilities among the agency, the laboratory, and any other party or parties to the proposed agreement;

(4) the term "Computer Program" means a computer program as defined in section 101 of title 17, United States Code; and

(5) the term "Author" means a Federal officer or employee who has prepared a copyrighted work as part of that person's official duties.

\*\*\*\*\*

(h) Copyright of Computer Programs - Each Federal agency may secure copyright on behalf of the United States as author or proprietor in any computer program prepared by employees of the United States Government in the course of work under, or related to, a cooperative research and development agreement entered into under the authority of subsection (a)(1) of this section, or under any other equivalent authority, notwithstanding the limitations contained in section 105 of title 17, United States Code; and may grant or agree to grant in advance to a collaborating party, licenses or assignments for such copyrights, or options thereto, retaining a nonexclusive, nontransferable, irrevocable, paid-up license to reproduce, adapt, translate, distribute, and publicly perform or display the computer program throughout the world by or on behalf of the Government and such other rights as the Federal agency deems appropriate.

#### **15 U.S.C. § 3710c. Distribution of royalties received by Federal agencies**

##### **(a) In general**

(1) except as provided in paragraphs (2) and (4), royalties or other income received by a Federal agency from the licensing or assignment of inventions or copyrightable works under agreements entered into by Government-operated Federal laboratories under section 3710a of this title, and inventions or copyrightable works of Government-operated Federal laboratories licensed under section 207 of Title 35, or under any other provision of law, shall be retained by the agency whose laboratory produced the invention or copyrighted work and shall be disposed of as follows:

(A)(i) The Head of the agency or his designee shall pay at least 15 percent of the royalties or other income the agency receives on account of any invention to the inventor or copyrighted work of an author (or co-inventors or co-authors) if the inventor or author (or each

such co-inventor or co-author) has assigned his or her rights in the invention or copyrighted work to the United States. ~~This clause shall take effect on October 20, 1986, unless the agency publishes a notice in the Federal Register within 90 days of such date indicating its election to file a Notice of Proposed Rulemaking pursuant to clause (ii).~~

(ii) An agency may promulgate, in accordance with section 553 of Title 5, regulations providing for an alternative program for sharing royalties with inventors or authors under clause (i). Such regulations must --

(I) guarantee a fixed minimum payment to each such inventor or author, each year that the agency receives royalties from that inventor's invention or author's copyrighted work;

(II) provide a percentage royalty share to each such inventor or author, each year that the agency receives royalties from that inventor's invention or author's copyrighted work in excess of a threshold amount;

(III) provide appropriate incentives from royalties for those laboratory employees who contribute substantially to the technical development of a licensed invention or copyrighted work between the time of the filing of the patent application and the licensing of the invention or copyrighted work;

(IV) provide appropriate incentives from royalties for those laboratory employees who contribute substantially to the technical development of a licensed invention or copyrighted work between the time of the filing of the patent application and the licensing of the invention or copyrighted work.

(iii) An agency that has published its intention to promulgate regulations under clause (ii) may elect not to pay inventors or authors under clause (i) until the expiration of two years after October 20, 1986, or until the date of the promulgation of such regulations, whichever is earlier. If an agency makes such an election and after two years the regulations have not been promulgated, the agency shall make payments (in accordance with clause (i)) of at least 15 percent of the royalties involved, retroactive to October 20, 1986. If promulgation of the regulations occurs within two years after October 20, 1986, payments shall be made in accordance with such regulations, retroactive to October 20, 1986. The agency shall retain its royalties until the inventor's or author's portion is paid under either clause (i) or (ii). Such royalties shall not be transferred to the agency's Government-operated laboratories under subparagraph (B) and shall not revert to the Treasury pursuant to paragraph (2) as a result of any delay caused by rule making under this subparagraph.

(B) The balance of the royalties or other income shall be transferred by the agency to its Government-operated laboratories, with the majority share of the royalties or other income from any invention or copyrighted work going to the laboratory where the invention occurred or copyrighted work was prepared, and the funds so transferred to any such laboratory may be used

or obligated by that laboratory during the fiscal year in which they are received or during the succeeding fiscal year --

(i) for payment of expenses incidental to the administration and licensing of inventions or copyrighted work by that laboratory or by the agency with respect to inventions which occurred or copyrighted work prepared at that laboratory, including the fees or other costs for the services of other agencies, persons, or organizations for inventions or copyrighted work management and licensing services;

(ii) to reward scientific, engineering, and technical employees of that laboratory, including payments to inventors and developers of sensitive or classified technology, regardless of whether the technology has commercial applications;

(iii) to further scientific exchange among the Government-operated laboratories of the agency; or

(iv) for education and training of employees consistent with the research and development mission and objectives of the agency, and for other activities that increase the licensing potential for transfer of the technology of the laboratories of the agency.

Any of such funds not so used or obligated by the end of the fiscal year succeeding the fiscal year in which they are received shall be paid into the Treasury of the United States.

(2) If, after payments to inventors or authors under paragraph (1), the royalties received by an agency in any fiscal year exceed 5 percent of the budget of the Government-operated laboratories of the agency for that year, 75 percent of such excess shall be paid to the Treasury of the United States and the remaining 25 percent may be used or obligated for the purposes described in clauses (i) through (iv) of paragraph (1)(B) during that fiscal year or the succeeding fiscal year. Any funds not so obligated shall be paid into the Treasury of the United States.

(3) Any payment made to an employee under this section shall be in addition to the regular pay of the employee and to any other awards made to the employee, and shall not affect the entitlement of the employee to any regular pay, annuity, or award to which he is otherwise entitled or for which he is otherwise eligible or limit the amount thereof. Any payment made to an inventor or author as such shall continue after the inventor or author leaves the laboratory or agency. Payments made under this section shall not exceed \$100,000 per year to any one person, unless the President approves a larger award (with the excess over \$100,000 being treated as a Presidential award under section 4504 of Title 5).

(4) A Federal agency receiving royalties or other income as a result of invention, or copyrighted work, management services performed for another Federal agency, or laboratory under section 207 of Title 35 may retain such royalties or income to the extent required to offset the payment of royalties to inventors or authors under clause (i) of paragraph (1)(A), costs and expenses incurred under clause (i) of paragraph (1)(B), and the cost of foreign patenting or copyrighting and maintenance for any invention or copyright of the other agency. All royalties

and other income remaining after payment of the royalties, costs, and expenses described in the preceding sentence shall be transferred to the agency for which the services were performed, for distribution in accordance with clauses (i) through (iv) of paragraph (1)(B).

(b) Certain assignments. If the invention or copyrightable work involved was one assigned to the Federal agency --

(1) by a contractor, grantee, or participant in a cooperative agreement with the agency,  
or

(2) by an employee of the agency who was not working in the laboratory at the time the invention was made or copyrightable work prepared, the agency unit that was involved in such assignment shall be considered to be a laboratory for purposes of this section.

(c) Reports.

(1) In making their annual budget submissions Federal agencies shall submit, to the appropriate authorization and appropriation committees of both Houses of Congress, summaries of the amount of royalties or other income received and expenditures made (including inventor or author) under this section.

~~(2) The Comptroller General, five years after October 20, 1986, shall review the effectiveness of the various royalty sharing programs established under this section and report to the appropriate committees of the House of Representatives and the Senate, in a timely manner, his findings, conclusions, and recommendations for improvements in such programs.~~

#### 15 U.S.C. § 3710d. Employee Activities

(a) Rights to inventions prepared by Government employees [In general]

If a Federal agency which has the right of ownership to an invention under this chapter does not intend to file for a patent application or otherwise to promote commercialization of such invention, the agency shall allow the inventor, if the inventor is a Government employee or former employee who made the invention during the course of employment with the Government, to retain title to the invention (subject to reservation by the Government of a nonexclusive, nontransferable, irrevocable, paid-up license to practice the invention or have the invention practiced throughout the world by or on behalf of the Government). In addition, the agency may condition the inventor's right to title on the timely filing of a patent application in cases when the Government determines that it has or may have a need to practice the invention.

(b) Rights to computer programs prepared by Government employees

(1) A computer program prepared by an officer or employee of the United States Government as part of that person's official duties shall be a "work made for hire" as defined in subparagraph (1) of section 101 of title 17, United States Code, and the United States

Government shall obtain all rights, title, and interest therein as "author" in accordance with section 201(b) of title 17, United States Code unless otherwise provided in (b)(2).

(2) If a Federal agency has the right of ownership to a computer program for which the agency does not intend to copyright or otherwise promote the commercialization of such computer program, the agency may agree to allow the author to acquire title to copyright, subject to the reservation of a nonexclusive, nontransferable, irrevocable, paid-up license to exercise all rights under the copyright by or on behalf of the Government throughout the world, and such other reservations deemed necessary to assure distribution and utilization of the computer program.

**17 U.S.C. § 105. Subject matter of copyright: United States Government**

Copyright protection under this title is not available for any work of the United States Government, except as provided in section 3710a of Title 15, United States Code, but the United States is not precluded from receiving and holding copyrights transferred to it by assignment, bequest, or otherwise.

## **5.2.2. 10 U.S.C. § 2363**

### **Encouragement of technology transfer**

#### **5.2.2.1. Summary of the Law**

This section encourages the transfer of technology between laboratories and research centers of DOD and other Federal agencies, state and local governments, colleges and universities, and private persons in cases that are likely to result in the maximum domestic use of such technology.<sup>1</sup>

#### **5.2.2.2. Background of the Law**

This section was enacted by the Department of Defense Authorization Act of 1986, Pub. L. No. 99-145, § 1457 of Title XIV.<sup>2</sup> There is no comment on this section in the legislative history of Pub. L. No. 99-145. There was, however, extensive activity on Capitol Hill in 1985 dealing with Federal technology transfer as a way to improve the competitiveness of the American economy.

#### **5.2.2.3. Law in Practice**

The managers of the technology transfer programs in each of the uniform services were not familiar with section 2363. After review of the statute, the Air Force and Navy concluded that it did not provide them with either authority or support in the execution of their programs.

The Army Domestic Technology Transfer Program Manager, however, stated that section 2363 requires the Secretary of Defense to take positive action to encourage technology transfer from the defense laboratories. He stated that, although the amended Stevenson-Wydler provides for flexibility in implementation, it does not focus responsibility on the top management of the cabinet department as does section 2363. Moreover, he asserted that section 2363 was the only statutory expression of congressional intent to place responsibility upon top cabinet members for technology transfer. Based on this reason, the Army technology manager recommended retention of section 2363.

#### **5.2.2.4. Recommendation and Justification**

##### **Repeal**

Section 2363 only encourages the transfer of technology and does not explicitly place responsibility on top cabinet members for technology transfer. 15 U.S.C. § 3710 of the Stevenson-Wydler Act provides authority and permits specific technology transfer activities for all

---

<sup>1</sup>10 U.S.C. § 2363.

<sup>2</sup>Department of Defense Authorization Act of 1986, Pub. L. No. 99-145, § 1457, 99 Stat. 762 (1985).

Federal laboratories, including those in DOD. The Stevenson-Wydler Act encompasses the provisions of section 2363, and provides managers of the technology program with the authority and support to execute their programs.

#### **5.2.2.5. Relationship to Objectives**

This recommendation enhances the goal of streamlining the acquisition process by eliminating a redundant law.

#### **5.2.2.6. Proposed Statute**

##### **10 U.S.C. § 2363. Encouragement of technology transfer**

~~(a) The Secretary of Defense shall encourage, to the extent consistent with national security objectives, the transfer of technology between laboratories and research centers of the Department of Defense and other Federal agencies, State and local governments and universities, and private persons in cases that are likely to result in the maximum domestic use of such technology.~~

~~(b) The Secretary shall examine and implement methods, in addition to the encouragement referred to in subsection (a), that are consistent with national security objectives and will enable Department of Defense personnel to promote technology transfer in cases referred to in subsection (a).~~

### 5.2.3. 35 U.S.C. §§ 200 - 212<sup>1</sup>

## Patent Rights In Inventions Made With Federal Assistance

### 5.2.3.1. Summary of the Law

This statute uses the patent system to promote the utilization of inventions arising from federally supported research and development.<sup>2</sup> The objective of the statute is to encourage maximum participation of small business firms and nonprofit organizations in federally supported research and development efforts, promote collaboration between commercial concerns and nonprofit organizations, ensure that the Government obtains sufficient rights in federally supported inventions to meet its needs, and protect the public against nonuse or unreasonable use of inventions.<sup>3</sup>

Section 202 sets forth the disposition of rights between the nonprofit organization or small business and the Government.<sup>4</sup> Specifically, this section provides that each nonprofit organization or small business may elect to retain title to any subject invention within a reasonable time after disclosure to the Government.<sup>5</sup> The Government may receive title to any subject invention if not disclosed within a reasonable time.<sup>6</sup> The contractor must make a written election within two years after disclosure to the Federal agency whether to retain title to a subject invention.<sup>7</sup> However, where publication, sale, or public use has initiated the one year statutory period in which valid protection can still be retained in the United States,<sup>8</sup> the election may be shortened to a date that is not more than 60 days prior to the end of the statutory period.<sup>9</sup> The one year statutory period is set forth in 35 U.S.C. § 102(b). This statute provides that a person shall be entitled to a patent unless "the invention was patented or described in a printed publication in this

or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States."<sup>10</sup>

### 5.2.3.2. Background of the Law

In 1980, Congress enacted the first uniform patent policy statute applicable to all Federal agencies. This statute (Pub. L. No. 96-517) added 35 U.S.C. §§ 200-211 to the body of patent law.<sup>11</sup> The statute also repealed all other laws concerning Government patent policy that related to small business firms and nonprofit organizations. Thus, by enacting this statute, Congress established a distinct patent policy for small business firms and nonprofit organizations.

Pub. L. No. 96-517 permits small businesses and nonprofit organizations to retain title to inventions, called "subject inventions," made in the performance of funding agreements with Federal agencies. The House Report to Pub. L. No. 96-517 stated that nonprofit institutions and small businesses were to be given preferential treatment for obtaining patent rights in inventions. The report further stated a presumption that ownership of all patent rights in Government funded research would vest in any contractor that is a nonprofit institution or small business.<sup>12</sup> This policy substantially incorporated legislation separately introduced by the University, Small Business Patent Policy Act.<sup>13</sup> The purpose of the Act was to foster cooperative research arrangements among the Government, universities, and industry in order to "more effectively utilize the productive resources of the nation in the creation and commercialization of new technologies."<sup>14</sup>

### 5.2.3.3. Law in Practice

This statute encourages commercialization of subject inventions by giving the contractor the first opportunity to file for a patent. It has served its purpose well in the fact that a number of universities and small businesses have undertaken significant efforts to commercialize inventions made in Government contracts. However, the Panel found that provisions of the statute governing the time for reporting inventions as well as the period for electing to file are lax -- with the result that too little time is given to DOD agencies to file for patent protection in cases where the small business or nonprofit organization elected not to file.<sup>15</sup>

---

<sup>10</sup>35 U.S.C § 102(b).

<sup>11</sup>Pub. L. No. 96-517 was first implemented by the Office of Federal Procurement Policy (OFPP) in OMB Bulletin 81-22, 46 *Fed. Reg.* 34775 (1981). Unlike the usual guidance provided by OMB or OFPP, the Bulletin was a detailed regulation. Subsequently, DOD issued Defense Acquisition Circular 76-29 (Aug. 31, 1981) to implement Pub. L. No. 96-517 and the OMB Bulletin. NASA also implemented the policy by modifying its Patent Waiver Regulations, 46 *Fed. Reg.* 37023 (1981) and its procurement regulations, NASA PRD 81-5 (July 1, 1981). 35 U.S.C. § 212 was added Nov. 8, 1984 by Pub. L. No. 98-620.

<sup>15</sup>The Intellectual Property Counsel at Massachusetts Institute of Technology was neutral in its position on this proposal.

#### **5.2.3.4. Recommendations and Justification**

##### **I**

**Amend 35 U.S.C. § 202(c)(1) to require contractors to disclose each subject invention within a reasonable time, but in any event prior to publication.**

Under the current law, a contractor is required to disclose each subject invention to the Federal agency within a reasonable time after it becomes known to contractor personnel responsible for the administration of patent matters. Inventors may, however, publish their inventions and not bring them to the attention of contractor personnel responsible for patent matters. Once an invention is published, a one year time limit for filing for a patent begins to run. Requiring that each subject invention be reported "prior to publication" would enhance the ability of the contractor and the Federal agency, if the contractor elects not to retain title, to file for a patent before the time limit for filing expires.

##### **II**

**Amend 35 U.S.C. § 202(c)(2) to provide that contractors specifically state their election to retain title to a subject invention in the U.S. and in any foreign country.**

**Amend 35 U.S.C. § 202(c)(2) to provide that where publication, or sale, or public use, has initiated the one year statutory period in which valid patent protection can still be obtained in the U.S., the period for election may be shortened by the Federal agency to a date that is not more than four months prior to the end of the statutory period.**

The intent of the first recommendation is to require that contractors disclose their intentions on filing abroad. The current language only requires that contractors make a written election within two years, but is silent on the place of filing. Thus, contractors can satisfy the statute merely by telling the federal agency that they elect to retain title, while not disclosing their intentions on filing abroad. Often, contractors do not wish to file abroad. This leaves many domestic technologies without international protection. If a contractor planned to file only in the United States, then a Federal agency, having been made aware of this fact, could file the patent abroad.

The second recommendation would allow the Federal agency four months in which to evaluate an invention and file for a patent when the contractor elects not to retain title and the one year statutory bar had been initiated. Presently, the statute provides that the period of election may be shortened by the Federal agency to a date that is not more than 60 days prior to the end of the statutory period. The 60 day period is insufficient time for the invention evaluation board of the Federal agency to review the invention and have a patent application prepared and filed.

### III

**Amend 35 U.S.C. § 202(c)(3) to provide that whenever contractors elect to retain title, they will file a patent application within one year of election (or additional time as approved by the Federal agency).**

The intent of this recommendation is to encourage contractors to file in a timely manner after they elect to retain title. Sometimes, contractors elect to retain title but either delay filing or do not file for a patent. This proposal encourages contractors to file within one year of the election to retain title. The contractor may have additional time to file upon approval of the Federal agency. Timely filing will hasten the entry of new technologies into the market.

#### **5.2.3.5. Relationship to Objectives**

By encouraging the filing of patents by universities, industry, and the Government, the proposed recommendations will facilitate commercial market access to Government developed technologies.

#### **5.2.3.6. Proposed Statute**

##### **35 U.S.C. § 202. Disposition of rights**

(c) Each funding agreement with a small business firm or nonprofit organization shall contain appropriate provisions to effectuate the following:

(1) That the contractor disclose each subject invention to the Federal agency prior to publication of the invention and within a reasonable time after it becomes known to contractor personnel responsible for the administration of patent matters, and that the Federal Government may receive title to any subject invention not disclosed to it within such reasonable time.

(2) That the contractor make a written election within two years after disclosure to the Federal agency (or such additional time as may be approved by the Federal agency) whether to the contractor will retain title to a subject invention in the United States and in any foreign countries: Provided, That if a Contractor elects to retain title in the United States the election to retain title in any foreign country may be delayed until six months after filing the United States patent application. And provided further, That in any case where publication, or sale, or public use, has initiated the one year statutory period within in which a valid patent application must protection can still be filed obtained in the United States, the period for election may be shortened by the Federal agency to a date that is not more than four months sixty days prior to the end of the statutory period: And provided further, that the Federal Government may, after notice to the contractor, receive title to any subject invention in which the contractor does not elect to retain title rights or fails to elect rights within such time.

(3) That a contractor ~~electing rights in a subject invention~~ agrees to file a patent application on a subject invention in each elected country within one year of the written election to retain title (or such additional time as may be approved by the Federal agency) and, in any event, prior to any statutory bar date that may occur under this title due to publication, or sale, or public use, and shall thereafter file corresponding patent applications in other countries in which it wishes to retain within reasonable times, and that the Federal Government, may after notice to the contractor, receive title to any subject inventions in the ~~United States or other~~ countries in which the contractor has not filed patent applications ~~on the subject invention~~ within one year of election such times.

## **5.3. Competitiveness of United States Companies**

### **5.3.0. Introduction**

The Panel reviewed those statutes that affect the competitiveness of U.S. companies in competition for worldwide business, the Invention Secrecy Act; the Export Control Act; and the Freedom of Information Act. The Panel recognizes that U.S. companies are no longer dominant in their technological advantage over foreign companies and that Federal policy must, therefore, be carefully scrutinized to ensure that it does not inadvertently deprive U.S. companies of access to worldwide markets. The Panel has identified a few instances where these statutes have that effect and recommends changes to reduce it to a minimum.

The Invention Secrecy Act, 35 U.S.C. §§ 181-188, creates a process where the Patent Office may impose a secrecy order on a patent application when publication would be detrimental to the national defense. The Panel found that the process being used at the present time places many patents under secrecy order, thereby impeding the owner of the invention from using it in worldwide commerce. The Panel concluded that the number of secrecy orders was excessive because the process relies on decisions of lower level technical personnel in DOD who have been given little or no guidance on the current standards (generally export control criteria) for the imposition of these orders. The fact that export control criteria have been very dynamic in recent years exacerbates this problem. The Panel has concluded that the process will function much more effectively if the decision is made by a high level committee chaired by DOD and composed of personnel from the Export Control Administration, the Patent Office, and the Department of State. The Panel has also made some recommendations for technical amendments to this statute.

The Arms Export Control Act, 22 U.S.C. § 2751 et seq. is, in general, not sufficiently related to Government procurement to fall within the parameters of this study. However, one section of this statute, 22 U.S.C. § 2261(e), does impact worldwide competitiveness of defense contractors in that it requires recoupment of nonrecurring costs in foreign military sales. The Panel noted that the question of recoupment was thoroughly studied by the Administration in 1992 and the conclusion was reached that it impeded the ability of U.S. companies to compete in the foreign marketplace. It was, therefore, rescinded as a policy of the executive branch but remains statutory policy in this one section. The Panel agrees with the conclusion that recoupment impedes the ability of U.S. companies to compete in worldwide markets and recommends that this section of the Arms Export Control Act be repealed.

The Freedom of Information Act, 5 U.S.C. § 552, establishes the general principle that information possessed by the Government should be freely available to members of the public. While proprietary information received from contractors is generally exempt from this requirement, the statute releases large amounts of Government information to the public (including foreign companies and governments) and some of this information is inevitably technical information of value to contractors. The statute is also very costly for DOD to administer. However, the Panel recommends that no changes be made to this statute because of the validity of its overall purpose that Government should be conducted in the open.

In the course of reviewing the Freedom of Information Act, the Panel also reviewed two peripheral statutes, 10 U.S.C. § 130 and 10 U.S.C. § 2328, and recommends that both be retained. The first of these statutes provides that technical data subject to the export control laws may be withheld from release under the Freedom of Information Act. This statute serves the purpose of protecting U.S. companies in worldwide competition as well as the purpose of protecting information whose release would adversely impact on the national security. The second of these statutes provides that the Department may charge reasonable fees for searching and preparing information for release under the Freedom of Information Act -- fees in excess of those called for by that Act. The statute also permits waiver of this larger fee if the request is made by a U.S. company. This statute thus carries out the policy of ensuring that U.S. companies are not placed at a disadvantage in competing with foreign companies.

### 5.3.1. 35 U.S.C. §§ 181 - 188

## Secrecy of Certain Inventions and Filing Applications in Foreign Countries<sup>1</sup>

### 5.3.1.1. Summary of the Law

This statute authorizes the U.S. Patent and Trademark Office (PTO) to impose secrecy orders on patent applications when disclosure of an invention by publication of a patent would be detrimental to the national security.<sup>2</sup> A secrecy order withholds the grant of a patent, thereby restricting the dissemination of technical data contained in the application. Secrecy orders are imposed by the PTO upon specific recommendation by defense agencies, including the Army, Navy, Air Force, National Security Agency, Department of Energy, and National Aeronautics and Space Administration.<sup>3</sup>

Specifically, the law requires: (1) the Commissioner of Patents to impose a secrecy order on an application in which the Government has a property interest if, in the opinion of the interested Government agency, the grant of a patent would be detrimental to the national security; and (2) where there is no Government property interest, an application is made available by the PTO to defense agencies who have expressed an interest in the referenced technology. If, upon inspection, a defense agency determines that disclosure would be detrimental to the national security, it may recommend that the Commissioner of Patents place a secrecy order on the application. Upon receipt of such recommendation, the Commissioner must issue a secrecy order.<sup>4</sup>

Three specialized secrecy orders have been established to handle the different sensitivity levels of technical information contained in patent applications as well as other variables, such as the degree of Government ownership of the invention and the known ability of the owner to protect sensitive/classified information. These secrecy orders are intended to permit the broadest disclosure of the subject matter in a patent application that is consistent with existing statutory and regulatory controls.

<sup>1</sup>Section 181. Secrecy of certain inventions and withholding of patent.

Section 182. Abandonment of invention for unauthorized disclosure.

Section 183. Right to compensation.

Section 184. Filing of application in foreign country.

Section 185. Patent barred for filing without license.

Section 186. Penalty.

Section 187. Nonapplicability to certain persons.

Section 188. Rules and regulations, delegation of power.

This paper also includes discussion of 35 U.S.C. § 155 as it relates to recommendation II.

<sup>2</sup>35 U.S.C. § 181.

<sup>3</sup>*Id.*

<sup>4</sup>*Id.*

These orders are commonly identified as type 1, 2, and 3 secrecy orders, each having a different purpose and effect. A type 1 secrecy order is used for applications containing technical data that may be export controlled. Types 2 and 3 secrecy orders are used for those patent applications containing technical data that is classified or "classifiable" under an existing security guideline. Type 2 orders are generally used when the owner has a current industrial security agreement with DOD. A type 3 secrecy order is used in all instances where a type 1 or 2 order is not appropriate, *e.g.*, for applications containing classifiable subject matter of extreme sensitivity, where the owner has an industrial security agreement that is deemed insufficient to meet security requirements, or where the owner does not have an industrial security agreement in place.

Secrecy orders remain in effect until withdrawn by the PTO upon request by the sponsoring agency.<sup>5</sup> An applicant may, however, file a petition to the PTO requesting rescission of the secrecy order. The petition takes the form of a request for reconsideration of the sponsoring agency's recommendation to impose a secrecy order. When the PTO receives a petition for rescission, it forwards the petition to the sponsoring agency for recommendation. Experience has shown that to be successful, an applicant often has to have direct contact with the sponsoring agency or have the applicant's Congressman intercede.

#### **5.3.1.2. Background of the Law**

The authority of the Commissioner of Patents to withhold a patent when in the interest of national security may be traced back to World War I. The Act of October 6, 1917,<sup>6</sup> authorized the Commissioner of Patents to withhold, during time of war, the issuance of patents or inventions important to the national defense. It also provided such applicants the right to sue in the Court of Claims for damages resulting from the loss of use. On July 1, 1940, Pub. L. No. 76-700 was enacted to make the law applicable at any time by removing the wartime restriction. The House Report to that law stated that "[i]nventions useful in war are made and developed during times of peace and it is equally if not more important that this country be in a position to prevent knowledge of war inventions from being published and disclosed during times of peace as well as times of war."<sup>7</sup> In 1951, in light of the impending peace treaties with Germany and Japan, Congress began consideration of several bills designed to make these various laws permanent. As ultimately approved on February 1, 1952, the Invention Secrecy Act of 1951 made secrecy orders a permanent part of the patent system.<sup>8</sup>

#### **5.3.1.3. Law in Practice**

There is a lack of clear and consistent policy governing the imposition of secrecy orders. For instance, neither the PTO nor individual service branches and intelligence services have issued consistent guidance concerning procedures for determining which technologies deserve scrutiny.

---

<sup>5</sup>*Id.*

<sup>6</sup>Act of Oct. 6, 1917, Pub. L. No. 65-80, 40 Stat. 394.

<sup>7</sup>See H.R. Rep. No. 2515, 76th Cong.

<sup>8</sup>Invention Secrecy Act of 1951, Pub. L. No. 82-256, 66 Stat. 3 (codified by Pub. L. No. 82-593 at sections 181-188 of title 35, U.S. Code). See S. Rep. No. 1001, 82d Cong., 1st Sess. (1951), reprinted in 1952 U.S.C.C.A.N. 1321.

Agencies often rely on the Military Critical Technologies List (MCTL) to determine whether to recommend the imposition of a secrecy order to the PTO. According to the Institute for Defense Analysis, which administers the MCTL, the list was never intended for such use. The list contains references to freely traded and patented inventions. Using the list as a justification for the imposition of a secrecy order could cause severe constraints on the availability of critical technologies to U.S. defense industries by denying patent protection to U.S. technology innovators. Moreover, agencies often do not apply the other criteria used by the State and Commerce Departments when making export control determinations, specifically foreign availability and the extent of prior publication. Thus, section 181 has become a tool to implement unilateral export controls but in a manner inconsistent with contemporary policies and procedures of other agencies, specifically the State and Commerce Departments.

#### **5.3.1.4. Recommendations and Justification**

### **I**

#### **Amend 35 U.S.C. § 181 to establish a Patent and Trademark Technical Advisory Committee within DOD to review and administer the imposition of secrecy orders.**

Congress was primarily concerned with national security when enacting the Invention Secrecy Act of 1951. While national security should remain the primary focus, economic vitality and technological advancement should also be carefully considered when recommending the imposition of secrecy orders because these factors also promote the goal of maintaining U.S. national security. At the same time it is paramount that critical technologies not fall into the wrong hands. Thus, the statute should operate in a manner that will promote the U.S. technological base while at the same time impede the flow of technologies to potential adversaries.

This recommendation proposes the establishment of a Patent and Trademark Technical Advisory Committee within DOD to review and administer the imposition of secrecy orders. Presently, the defense agencies have the responsibility of recommending the imposition of secrecy orders to the PTO. This proposal would shift responsibility from agencies whose principal and often only concern is technology control to a body with expertise in both the control of technology and its development.

The problem with the current structure is that a considerable number of patent applications are being subjected to secrecy orders. This is largely due to the rampant use of the MCTL as well as the lack of clear guidance at the agency level as to what is "detrimental to the national security" as set forth in section 181. The Panel on the Impact of National Security Controls on International Technology Transfer foresaw this occurrence back in 1984.<sup>9</sup> The Panel stated that use of the MCTL or other broad criteria as guidance could result in a number of

---

<sup>9</sup>This Panel was organized by the National Academy complex in 1984. The purpose of the Panel was to examine the effect of export controls on commercial trade in high-technology goods.

applications being subjected to secrecy orders.<sup>10</sup> Moreover, the Panel stated that extensive use of secrecy orders would "undermine the benefits of the patent system, increase the duplication of R&D activities, and result in important innovations being withheld from commercial markets."<sup>11</sup> The extensive use of secrecy orders has, in fact, undermined the benefits of the patent system by stifling the development and transfer of technologies into the community.

Agencies often use the MCTL as a guide for determining whether to recommend the imposition of a secrecy order to the PTO.<sup>12</sup> The agencies generally do not, however, apply the other criteria used by the Departments of Commerce and State when making export control determinations, specifically foreign availability and the extent of prior publication. Thus, in practice, section 181 has become a tool to implement the unilateral export controls. Extending controls to unclassified technical data that relate to the wide range of technologies on the MCTL impedes the exchange of information in the technical community without necessarily enhancing national security.

Moreover, broad imposition of secrecy orders will result in reduced revenues from lost sales and market shares. This will lead to less investment, a lower growth rate, and reduced innovation, with resulting adverse effects on both the commercial and military sectors.

The time is ripe to shift from a purely DOD standard of national security to a standard as defined by both military and economic parameters. Only by this shift can the United States maintain national security, revitalize the economy, and continue to be the leader in technological advancement.

## II

**Amend 35 U.S.C § 155 to extend the term of any patent, which has been delayed from a grant by a secrecy order, for a period equal to the period of the delay, but not to exceed five years.**

## III

**Amend 35 U.S.C. § 183 to provide compensation only for periods of delay exceeding five years.**

These recommendations are interrelated and will be discussed together. The present statutory scheme, set forth in section 183, provides a right to just compensation for damages caused by a secrecy order. A claimant may apply to the head of any department or agency that

---

<sup>10</sup>*Balancing the National Interest* at 127 (National Academy Press, Washington, D.C. 1987).

<sup>11</sup>*Id.* at 128.

<sup>12</sup>Both the Contract Law Division and the Intellectual Property Counsel of the Army disagreed with the proposal stating that there is a proposed administrative recommendation within the Army and Navy not to apply the MCTL guidelines to secrecy applications and, therefore, the recommendation is not necessary. (memorandums from the Army Contract Law Division, Aug. 11, 1992 and the Intellectual Property Counsel of the Army, Aug. 10, 1992) Although this is a step in the right direction, the Army failed to state what guidance would be issued in its place.

caused the order to be issued for compensation for the damage caused by the order of secrecy and/or for the use of the invention by the Government, resulting from its disclosure.<sup>13</sup> A claimant may bring suit against the U.S. in the U.S. Claims Court or in the District Court of the U.S. for the district in which such claimant is a resident.<sup>14</sup>

While the primary value of a patent grant is the right to exclude others, just compensation for this loss is difficult to obtain. The administrative costs of complying with a secrecy order often are not recovered. For example, it may be necessary to notify people to whom the invention has already been disclosed. Additionally, there may be restrictions on seeking advice from others both as to prosecuting the application as well as to investigating marketing opportunities. It is also administratively burdensome to go through the court process of compensating a claimant for damages under section 183.

A scheme that would provide compensation "in-kind" would be more equitable than the current scheme, which puts the patent owner to the task of proving damages. Thus, section 155 should be amended to extend the term of any patent which has been delayed from a grant by a secrecy order for a period equal to the period of delay, up to five years.

Additionally, term extension would be much simpler to administer. The term can simply be extended for a period equal to that of the delay occasioned by the secrecy order. The extension would be capped at five years, while, simultaneously, compensation would be eliminated for damages caused by secrecy orders up to five years under section 183.

#### **5.3.1.5. Relationship to Objectives**

This proposal will further the development and preservation of the U.S. industrial base. Moreover, the proposal will ensure the implementation of a consistent policy governing the imposition of secrecy orders. This will facilitate both Government access to commercial technologies as well as commercial market access to Government technologies.

#### **5.3.1.6. Proposed Statute**

##### **35 U.S.C. § 181. Secrecy of certain inventions and withholding of patent**

(a) Whenever publication or disclosure by the grant of a patent on an invention in which, in the opinion of the Patent and Trademark Technical Advisory Committee or the Department of Energy, the Government has a property interest might, in the opinion of the head of the interested Government agency, be detrimental to the national security, the Commissioner upon being so notified shall order that the invention be kept secret and shall withhold the grant of a patent therefor under the conditions set forth hereinafter.

(b) The Patent and Trademark Technical Advisory Committee shall be chaired by the chairman of the Armed Services Patent Advisory Board or his/her designee within the Department of Defense.

<sup>13</sup>35 U.S.C. § 183.

<sup>14</sup>*Id.*

and shall consist of at least the Commissioner of the Patent and Trademark Office or his/her designee, the Deputy Assistant Secretary for Export Administration or his/her designee within the Department of Commerce, and the Director of the Bureau of Economic and Business Affairs or his/her designee within the Department of State. Whenever the publication or disclosure of an invention by the granting of a patent, in which the Government does not have a property interest, might, in the opinion of the Commissioner, be detrimental to the national security, he shall make the application for patent in which such invention is disclosed available for inspection to the Atomic Energy Commission, the Secretary of Defense, and the chief officer of any other department or agency of the Government designated by the President as a defense agency of the United States.

(c) Each individual to whom the application is disclosed shall sign a dated acknowledgment thereof, which acknowledgment shall be entered in the file of the application. If, in the opinion of the Patent and Trademark Technical Advisory Committee or the Department of Energy Atomic Energy Commission, the Secretary of a Defense Department, or the chief officer of another department or agency so designated, the publication or disclosure of the invention by the granting of the patent therefor would be detrimental to the national security, the Patent and Trademark Technical Advisory Committee and the Department of Energy Atomic Energy Commission, the Secretary of a Defense Department, or such other chief officer shall notify the Commissioner and the Commissioner shall order that the invention be kept secret and shall withhold the grant of a patent for such period as the national interest requires, and notify the applicant thereof. Upon proper showing by the chairman of the Patent and Trademark Technical Advisory Committee or the Department of Energy, head of the department or agency who caused the secrecy order to be issued that the examination of the application might jeopardize the national interest, the Commissioner shall thereupon maintain the application in a sealed condition and notify the applicant thereof. The owner of an application which has been placed under a secrecy order shall have a right to appeal from the order to the Secretary of Commerce under rules prescribed by him.

(d) An invention shall not be ordered kept secret and the grant of a patent withheld for a period of more than one year. The Commissioner shall renew the order at the end thereof, or at the end of any renewal period, for additional periods of one year upon notification by the Patent and Trademark Technical Advisory Committee or the Department of Energy head of the department or the chief officer of the agency who caused the order to be issued that an affirmative determination has been made that the national interest continues to so require. An order in effect, or issued, during a time when the United States is at war, shall remain in effect for the duration of hostilities and one year following cessation of hostilities. An order in effect, or issued, during a national emergency declared by the President shall remain in effect for the duration of the national emergency and six months thereafter. The Commissioner may rescind any order upon notification by the Patent and Trademark Technical Advisory Committee or the Department of Energy heads of the departments and the chief officers of the agencies who caused the order to be issued that the publication or disclosure of the invention is no longer deemed detrimental to the national security.

### 35 U.S.C. § 182. Abandonment of invention for unauthorized disclosure

The invention disclosed in an application for patent subject to an order made pursuant to section 181 of this title may be held abandoned upon its being established by the Commissioner that in violation of said order the invention has been published or disclosed or that an application for a patent therefor has been filed in a foreign country by the inventor, his successors, assigns, or legal representatives, or anyone in privity with him or them, without the consent of the Commissioner. The abandonment shall be held to have occurred as of the time of violation. The consent of the Commissioner shall not be given without the concurrence of the Patent and Trademark Technical Advisory Committee and the Department of Energy ~~heads of the departments and the chief officers of the agencies~~ who caused the order to be issued. A holding of abandonment shall constitute forfeiture by the applicant, his successors, assigns, or legal representatives, or anyone in privity with him or them, of all claims against the United States based upon such invention.

### 35 U.S.C. § 183. Right to compensation

An applicant, his successors, assigns, or legal representatives, whose patent is withheld as herein provided, shall have the right, beginning at the date the applicant is notified that, except for such order, his application is otherwise in condition for allowance, or February 1, 1952, whichever is later, and ending six years after a patent is issued thereon, to apply to the Secretary of Defense or the Department of Energy ~~head of any department or agency~~ who caused the order to be issued for compensation for the damage caused by the order of secrecy and/or for the use of the invention by the Government, resulting from his disclosure. The right to compensation for use shall begin five years from ~~on the date of~~ the first use of the invention by the Government. The head of the department or agency is authorized, upon the presentation of a claim, to enter into an agreement with the applicant, his successors, assigns, or legal representatives, in full settlement for the damage and/or use. This settlement agreement shall be conclusive for all purposes notwithstanding any other provision of law to the contrary. If full settlement of the claim cannot be effected, the Secretary of Defense or Department of Energy ~~head of the department or agency~~ may award and pay to such applicant, his successors, assigns, or legal representatives, a sum not exceeding 75 per centum of the sum which the Secretary of Defense or the Department of Energy ~~head of the department or agency~~ considers just compensation for the damage and/or use. A claimant may bring suit against the United States in the United States Claims Court or in the District Court of the United States for the district in which such claimant is a resident for an amount which when added to the award shall constitute just compensation for the damage and/or use of the invention by the Government. The owner of any patent issued upon an application that was subject to a secrecy order issued pursuant to section 181 of this title, who did not apply for compensation as above provided, shall have the right, after the date of issuance of such patent, to bring suit in the United States Claims Court for just compensation for the damage caused by reason of the order of secrecy and/or use by the Government of the invention resulting from his disclosure. The right to compensation for use shall begin five years from ~~on the date of~~ the first use of the invention by the Government. In a suit under the provisions of this section the United States may avail itself of all defenses it may plead in an action under section 1498 of title 28. This section shall not confer a right of action on anyone or his successors, assigns, or legal

representatives who, while in the full-time employment or service of the United States, discovered, invented, or developed the invention on which the claim is based.

### **35 U.S.C. § 184. Filing of application in foreign country**

Except when authorized by a license obtained from the Commissioner a person shall not file or cause or authorize to be filed in any foreign country prior to six months after filing in the United States an application for patent or for the registration of a utility model, industrial design, or model in respect of an invention made in this country. A license shall not be granted with respect to an invention subject to an order issued by the Commissioner pursuant to section 181 of this title [35 U.S.C. § 181] without the concurrence of the Patent and Trademark Technical Advisory Committee or the Department of Energy ~~head of the departments and the chief officers of the agencies~~ who caused the order to be issued. The license may be granted retroactively where an application has been filed abroad through error and without deceptive intent and the application does not disclose an invention within the scope of section 181 of this title [35 U.S.C. § 181].

The term "application" when used in this chapter [35 U.S.C. § 181 *et seq.*] includes applications and any modifications, amendments, or supplements thereto, or divisions thereof. The scope of a license shall permit subsequent modifications, amendments, and supplements containing additional subject matter if the application upon which the request for the license is based is not, or was not, required to be made available for inspection under section 181 of this title and if such modifications, amendments, and supplements do not change the general nature of the invention in a manner which would require such application to be made available for inspection under such section 181. In any case in which a license is not, or was not, required in order to file an application in any foreign country, such subsequent modifications, amendments, and supplements may be made, without a license, to the application filed in the foreign country if the United States application was not required to be made available for inspection under section 181 and if such modifications, amendments, and supplements do not, or did not, change the general nature of the invention in a manner which would require the United States application to have been made available for inspection under section 181.

### **35 U.S.C. § 185. Patent barred for filing without license**

Notwithstanding any other provisions of law, any person, and his successors, assigns, or legal representatives, shall not receive a United States patent for an invention if that person, or his successors, assigns, or legal representatives shall, without procuring the license prescribed in section 184 of this title, have made, or consented to or assisted another's making, application in a foreign country for a patent or for the registration of a utility model, industrial design, or model in respect of the invention. A United States patent issued to such person, his successors, assigns, or legal representatives shall be invalid, unless the failure to procure such license was through error and without deceptive intent, and the patent does not disclose subject matter within the scope of section 181 of this title.

### 35 U.S.C. § 186. Penalty

Whoever, during the period or periods of time an invention has been ordered to be kept secret and the grant of a patent thereon withheld pursuant to section 181 of this title, shall, with knowledge of such order and without due authorization, willfully publish or disclose or authorize or cause to be published or disclosed the invention, or material information with respect thereto, or whoever willfully, in violation of the provisions of section 184 of this title, shall file or cause or authorize to be filed in any foreign country an application for patent or for the registration of a utility model, industrial design, or model in respect of any invention made in the United States, shall, upon conviction, be fined not more than \$10,000 or imprisoned for not more than two years, or both.

### 35 U.S.C. § 187. Non applicability to certain persons

The prohibitions and penalties of this chapter shall not apply to any officer or agent of the United States acting within the scope of his authority, nor to any person acting upon his written instructions or permission.

### 35 U.S.C. § 188. Rules and regulations, delegation of power

~~The Department of Energy Atomic Energy Commission, the Secretary of a defense department, the chief officer of any other department or agency of the Government designated by the president as a defense agency of the United States, and the Secretary of Defense may separately issue rules and regulations to enable the respective department or agency to carry out the provisions of this chapter, assuring consistency with the regulations to implement the Export Administration Act of 1979, and may delegate any power conferred by this chapter. Upon the request of the Secretary of Defense, Secretary of Commerce and any other department of the Government designated by the President as a defense agency of the United States desiring participation on the Patent and Trademark Technical Advisory Committee, shall detail to the Committee, on a nonreimbursable basis, personnel with appropriate expertise to assist in the review of patent applications reasonably expected to contain matter the subject of which is deemed applicable to section 181 of this title.~~

### 35 U.S.C. § 155. Patent term extension

Notwithstanding the provisions of section 154 [35 U.S.C. § 154], the term of a patent shall be extended for any patent which:

(a) encompasses within its scope a composition of matter or a process for using such composition shall be extended if such composition or process has been subjected to a regulatory review by the Federal Food and Drug Administration pursuant to the Federal Food, Drug, and Cosmetic Act [21 U.S.C. § 301 *et seq.*] leading to the publication of regulation permitting the interstate distribution and sale of regulation of approval imposed pursuant to section 409 of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. § 348] which stay was in effect or January 1, 1981, by a length of time to be measured from the date such stay of regulation of approval was imposed until such proceedings are finally resolved and commercial marketing permitted. The patentee, his heirs, successors or assigns shall notify the Commissioner of Patents and Trademarks within

ninety days of the date of enactment of this section [enacted Jan. 3, 1983] or the date the stay of regulation of approval has been removed, whichever is later, of the number of the patent to be extended and the date the stay was imposed and the date commercial marketing was permitted. On receipt of such notice, the Commissioner shall promptly issue to the owner of record of the patent a certificate of extension, under seal, stating the fact and length of the extension and identifying the composition of matter or process for using such composition to which such extension is applicable. Such certificate shall be recorded in the official file of each patent extended and such certificate shall be considered as part of the original patent, and an appropriate notice shall be published in the Official Gazette of the Patent and Trademark Office, or

(b) was delayed, pursuant to 35 U.S.C. §§ 181-188, by the order of secrecy and/or for the use of the invention by the Government for the period of the delay, but not to exceed five years.

## 5.3.2. 22 U.S.C. § 2761(e)

### Charges; reduction or waiver

#### 5.3.2.1. Summary of the Law

This section provides that, after September 30, 1976, letters of offer for the sale of defense articles or for the sale of defense services shall include appropriate charges for a proportionate amount of any nonrecurring costs of research, development, and production of major defense equipment.<sup>1</sup>

Recoupment is based on the theory that if the Government pays for the development of a product, other purchasers should share in those costs when they buy the product. DOD implements recoupment in two ways. If a product is sold to a foreign government under a foreign military sales (FMS) arrangement, DOD recovers the recoupment charge directly from the foreign government. If the product is sold by the contractor directly to a foreign or domestic customer, or if a foreign company is licensed to manufacture the product, the contractor adds the recoupment charge to its contract and pays it to the Government.<sup>2</sup>

#### 5.3.2.2. Background of the Law

Recoupment was initiated by Secretary of Defense McNamara in 1963 when he directed that the Polaris Sales Agreement with the United Kingdom include a surcharge to cover a pro rata share of DOD's Research, Development, Test, and Evaluation (RDT&E) investment in the Polaris missile.<sup>3</sup>

In 1965, Secretary McNamara expanded this concept by including a nonrecurring cost (NRC) recoupment for the sale of C-130 and F-4 aircraft sold to the United Kingdom. In a June 1965 memorandum from the Assistant Secretary of Defense for International Security Affairs (ASD/ISA) to the military departments, Secretary McNamara stated that "on major weapons sales . . . arrange for the price to include an appropriate charge for all research and development costs."

DOD formalized this policy in DOD Directive 2140.2, Recovery of Nonrecurring Costs Applicable to Foreign Sales, March 15, 1967.<sup>4</sup> This directive called for recoupment of nonrecurring costs of development and production whenever an item of major defense equipment

<sup>2</sup>See Ralph C. Nash, Jr. & John Cibinic, *Recoupment: A Policy Enigma*, 6 N&CR 18 (Mar. 1992).

<sup>3</sup>Some individuals will attest that recoupment has been around since the 1950s. In 1957, the Navy Bureau of Aeronautics negotiated a recoupment clause in a development contract with the Hiller Helicopter Company. The clause was apparently used because the Navy believed that Hiller would subsequently sell a commercial version of the helicopter. There was a comparable commercial helicopter that had been developed with private funds by the Bell Helicopter Company. The Navy reasoned that recoupment was necessary to prevent Hiller from obtaining an unfair competitive advantage in the commercial marketplace.

<sup>4</sup>DOD Directive 2140.2 (Mar. 15, 1967).

(MDE) was sold to a foreign government by DOD or one of its customers.<sup>5</sup> The directive also required the use of a contract clause implementing the requirement for MDE.<sup>6</sup> The directive was limited, however, in that it did not apply to domestic commercial sales or foreign licenses. Moreover, MDE was defined as RDT&E in excess of \$25 million or a production investment in excess of \$100 million. ASD/ISA was charged with monitoring implementation of the directive in order to "avoid unfavorable impact on the Foreign Military Sales Program and the balance-of-payments problem."

In 1972, the thresholds for MDE doubled.<sup>7</sup> During that year, the Commission on Government Procurement recommended elimination of recoupment, except under unusual circumstances approved by the agency head.<sup>8</sup> The Commission voiced a concern that contractors might not undertake Federal research and development because of insufficient opportunity for commercial exploitation.<sup>9</sup> The Commission stated recoupment would be a disincentive to the participation of potential contractors and would impair the eventual availability of the results of Government-sponsored technology in the marketplace.<sup>10</sup>

Subsequently, in 1974, the directive was revised to split the recoupment charge into two segments, one for nonrecurring development costs and the other for nonrecurring production costs.<sup>11</sup> The directive stated that normally the development cost recoupment charge should be no more than 4% of the contract price.<sup>12</sup> Non-MDE threshold was defined as production costs, both nonrecurring and recurring exceeding \$5 million.<sup>13</sup> Also, during this year, the White House Council on International Economic Policy (CIEP) issued Decision Memorandum No. 23.<sup>14</sup> This memorandum announced that President Nixon had approved a CIEP recommendation that NRC recoupments be sought on product sales and that there be a "fair market recovery" on technology sales.<sup>15</sup> This memorandum was implemented only by DOD, Department of Energy, and NASA.

Congress first adopted the recoupment policy in the Arms Export Control Act of 1976 (Pub. L. No. 94-329). The Act contains a provision at 22 U.S.C. § 2761(e)(1)(B) requiring that FMS agreements include "a proportionate amount of any nonrecurring costs of research, development, and production of major defense equipment."<sup>16</sup> Congress obviously knew the Act was more limited than earlier DOD Policy and thus clearly intended to obtain recoupment only on FMS and MDE. DOD, however, implemented this statute by revising DOD Directive 2140.2.<sup>17</sup> The directive greatly expanded the requirement for recoupment by applying it to domestic

commercial sales and all sales of technology.<sup>18</sup> It also reduced the threshold for recoupment of development costs to equipment where there was a research and development investment in excess of \$5 million.<sup>19</sup>

In 1977, President Carter issued his Arms Policy (PD-13)<sup>20</sup> aimed at reducing arms exports. As part of an implementing White House directive to eliminate incentives for making arms sales, DOD changed its policy and procedures on the use of NRC recoupments. Prior to PD-13, recoupments were credited to the RDT&E appropriation accounts of the military departments and were reusable. After PD-13, recoupments were deposited into the Miscellaneous Receipts of the Treasury.

Recoupment further expanded in 1979 when Defense Acquisition Circular (DAC) 76-20 mandated a recoupment clause in all RDT&E or production contracts over \$1 million.<sup>21</sup> The revised clause also expressly excluded the recoupment amount from the Contract Disputes Clause.<sup>22</sup>

The Office of Federal Procurement Policy published a proposed policy letter on NRC recoupments in 1980. The intent of the policy letter was to implement CIEP Decision Memorandum No. 23 by providing criteria and guidelines. Industry opposed the policy letter and it was never issued in final form.<sup>23</sup>

The House Government Operations Committee issued a report in 1981 criticizing DOD's administration of NRC recoupments in both FMS and commercial exports.<sup>24</sup> The report also criticized the lack of specific criteria for waivers.<sup>25</sup> The Committee recommended that DOD should: (1) evaluate whether to reduce the \$5 million threshold; (2) consider adopting a flat rate surcharge on non-MDE; and (3) include the values of, and reasons for, waiver of NRC in the required quarterly FMS reports to Congress.<sup>26</sup>

In 1984, the chairman of the House Foreign Affairs Committee requested a report from the GAO on DOD's implementation of the NRC recoupment requirement on commercial sales. The GAO report concluded that the Arms Export Control Act did not require recouping a pro rata share of NRC on commercial sales by contractors, nor did any other statute. The GAO stated, however, that it was appropriate for DOD to collect an NRC recoupment on commercial sales even though not legislatively mandated. Moreover, unless the regulations were amended or

<sup>25</sup>*Id.* The 1987 DOD Appropriation Act included a rider requiring advance notification of proposed waivers to the Appropriations Committee. This rider was re-enacted in each of the subsequent six years and then dropped. The notifications did not result in any follow-up congressional inquiries.

<sup>26</sup>*Id.* Also in 1981, the Arms Export Control Act was amended to provide for establishment of the Special Defense Acquisition Fund (SDAF). One of the sources of capital for the SDAF is the NRC recoupment.

determined to be invalid by the judiciary, contractors must follow the regulations. Congress took no action on this report.

DOD Directive 2140.2 was again revised on August 5, 1985.<sup>27</sup> The revised directive further expanded the scope of recoupment by covering modification kits and major components of MDE items. The revision also reduced the thresholds for non-MDE to \$2 million. The directive called for assessment of recoupment charges on items of equipment which are "substantially different" from items developed on DOD contracts if they have some commonalty. This was the first departure from the concept of "essentially similar." Lastly, this directive included greater guidance on the computation of recoupment charges.

In February 1986, the GAO reported to the Secretary of Defense that DOD did not have a workable system to identify and monitor commercial sales to ensure that NRC recoupments were being paid. In March, the House Operations Committee held hearings on NRC recoupments. The DOD Inspector General (DODIG) testified that DOD elements were having difficulty determining the correct charges. The established procedures were also inadequate. The DODIG expressed doubt as to the soundness of going to a flat rate for MDE. A GAO witness stated Congress would probably have to change the law if it wanted to implement a flat rate for MDE. A Defense Security Assistance Agency witness opposed the flat rate proposal.

On July 27, 1987, DOD Directive 2140.2 was again amended to provide more specific guidance for re-examining the computation of the NRC charge when significant changes in the data bases occurred. Also, DOD in-house nonrecurring costs were added to the recoupment pools. To implement this directive, DOD issued DFARS Part 271 on March 22, 1989. This supplement interprets the policy to cover "derivative items," meaning items with at least 10% common parts. A standard recoupment clause was also included in DFARS 252.271-7001.<sup>28</sup> This policy is broad in that it covers a large number of situations with commensurate accounting requirements and unknown subcontract impacts.<sup>29</sup> There has been considerable negative reaction from industry on the current policy.

As a result of the negative industry reaction, DOD published a proposed new policy at 32 CFR Part 165 to revise DOD Directive 2140.2. DOD also proposed a new DFARS Subpart 215.70 to replace Part 270 on October 25, 1991.<sup>30</sup> This revision would reduce the scope of the recoupment policy. In particular, the revision would cover only major end items with development costs of over \$50 million or total production costs of over \$200 million and technical data packages or technology associated with such items. It would also redefine "derivative items" to include only items with 50% commonalty. The Office of Management and Budget (OMB) ruled that the recoupment regulations are a "major rule," thereby requiring a Regulatory Impact Analysis estimating the costs and benefits of the rule in comparison with

---

<sup>27</sup>DOD Directive 2140.2 (Aug. 5, 1985).

<sup>28</sup>In the 1991 revision to the DFARS, the policy is now in Subpart 270 and the clause is in DFARS 252.270-7000.

<sup>29</sup>Ralph C. Nash, Jr. & John Cibinic, *Recoupment: A Policy Enigma*, 6 N&CR 18 (Mar. 1992).

<sup>30</sup>56 *Fed. Reg.* 55250 *et seq.* (1991).

alternatives. As a result, DOD requested public comments on the cost/benefit issue on November 26, 1991.<sup>31</sup>

On January 13, 1992, the Defense Acquisition Regulatory (DAR) Council stopped implementation of DOD's proposed rule governing recoupment of nonrecurring costs on sales of U.S. products and technologies.<sup>32</sup> Although pleased with this measure, "industry still felt that a recoupment policy of any kind harmed U.S. competitiveness."<sup>33</sup> Both OMB and the President's Council on Competitiveness agreed with industry.

On June 19, 1992, the White House released a press report announcing a national policy of no recoupment.<sup>34</sup> The first stage of the new policy abolishes recoupment on any product (other than MDE) exported for military uses. The second stage of the policy supports the elimination of recoupment fees on MDE exported for military uses pursuant to 22 U.S.C. § 2761(e) of the Arms Export Control Act. This new policy is based on the historic political changes of the past three years, such as the end of the Cold War and the accompanying downsizing of the U.S. military. Recognizing the change in the world environment, the new policy hopes to facilitate efforts by defense-oriented companies to shift toward commercial activities. The policy change is "expected to eliminate a major barrier to the free flow of technology between the commercial and defense sectors of U.S. business."<sup>35</sup> The new policy will also enhance the ability of American firms to compete for billions of dollars of business that they might otherwise lose. This will hopefully avoid significant layoffs and preserve tens of thousands of American jobs.

In response to the President's direction, on July 2, 1992, DOD published an interim rule which eliminated the requirement to insert the recoupment clause in new DOD contracts other than those for FMS or commercial sales of MDE.<sup>36</sup> DOD also published a proposed rule for public comment which would delete the requirement with respect to new contracts for commercial sales of MDE.<sup>37</sup> Thus, when this rule is adopted recoupment will be eliminated except for FMS of MDE, which cannot be eliminated until section 21(e)(2) of the Arms Export Control Act is repealed.

### **5.3.2.3. Law in Practice**

Recoupment operates like a sales tax imposed only on U.S. companies. Because U.S. companies must add a recoupment charge to the price of their products, recoupment reduces U.S. defense industry competitiveness both in the U.S. and abroad.

In today's environment, many defense-oriented companies are attempting to redirect their efforts toward commercial products. The recoupment surcharge may make the product noncompetitive, thereby hindering integration and commercialization. This problem should largely dissipate under the President's new policy.

There is also an administrative burden associated with recoupment. Although this burden will be reduced under the first stage of the new policy, the costly paperwork and regulatory compliance requirements on MDE items will continue to be substantial.

### **5.3.2.4. Recommendations and Justification**

#### **Repeal**

Because of the historic changes in the world environment, recoupment should be repealed in its entirety. This recommendation will facilitate the transfer of technology between Government and commercial markets; aid integration of contractors' Government and commercial operations; increase U.S. competitiveness in worldwide markets; and enhance national security by preserving the industrial base.

Under the statute, when a contractor sells products or technologies developed under a Government contract or derivatives of them to a non-Government customer, the contractor must pay a fee, similar to a sales tax, to the U.S. Government. The recoupment surcharge may make the product noncompetitive and thus prevent a contractor from selling the product. Thus, recoupment may act as a disincentive to defense-oriented companies which may be attempting to redirect efforts toward commercial products. Eliminating recoupment will give defense contractors an incentive to develop products and technologies with larger markets.

There is an argument that without recoupment, a contractor might gain a competitive advantage by spinning commercial items out of Government funded research and development. This argument has several flaws. First, much of the Government funded research and development will have little application to any commercial derivative. Second, a company still has the costs of product modification in developing a commercial product. Finally, this argument acts counter to the goal of maximizing the development of dual use technologies.

The first stage of the President's new policy of abolishing recoupment on any product other than MDE will benefit defense-oriented companies attempting to redirect efforts toward commercial products. This proposal supports the second stage of the President's new policy by recommending 22 U.S.C. § 2761(e) be eliminated in its entirety.

Eliminating recoupment is necessary to make U.S. companies more competitive in worldwide markets. Since it appears DOD intends to reduce contracts for the production of military equipment, many production lines will be kept open only through foreign sales. Repealing the statute would enhance the ability of American companies to compete for billions of dollars of business they might otherwise lose. A national policy of no recoupment also enhances national security by strengthening defense-oriented U.S. companies, thereby preserving an industrial base.

There is also an administrative burden associated with recoupment. Although this burden will be reduced under the new policy, the costly paperwork and regulatory compliance requirements on MDE items will continue to be substantial. By eliminating recoupment, businesses can reinvest money otherwise expended for paperwork and regulatory compliance into developing new products and technologies.

#### **5.3.2.5. Relationship to Objectives**

This recommendation will encourage U.S. defense companies to develop products in the commercial market, thereby furthering the goal of commercial integration. The recommendation will also strengthen U.S. defense companies by making them more competitive in the international market.

#### **5.3.2.6. Proposed Statute**

##### **22 U.S.C. § 2761. Charges; reduction or waiver**

(e)(1) Letters of offer for the sale of defense articles or for the sale of defense services that are issued pursuant to this section or pursuant to section 2762 of this title shall include appropriate charges for:

(A) administrative services, calculated on an average percentage basis to recover the full estimated costs (excluding a pro rata share of fixed base operation costs) of administration of sales made under this Act to all purchasers of such articles and services as specified in section 43(b) and section 43(c) of the Act [22 U.S.C. § 2792(b),(c)];

~~(B) a proportionate amount of any nonrecurring costs of research, development, and production of major defense equipment (except for equipment wholly paid for either from funds transferred under section 503(a)(3) of the Foreign Assistance Act of 1961 [22 USCS § 2311(a)(3)] or from funds made available on a nonrepayable basis under section 23 of this Act [22 USCS § 2763]) ; and~~

~~(B) (C) the recovery of ordinary inventory losses associated with the sale from stock of defense articles that are being stored at the expense of the purchaser of such articles.~~

~~(2) The President may reduce or waive the charge or charges which would otherwise be considered appropriate under paragraph (1)(B) for particular sales that would, if made,~~

~~significantly advance United States Government interests in North Atlantic Treaty Organization standardization, standardization with the Armed Forces of Japan, Australia, or New Zealand in furtherance of the mutual defense treaties between the United States and those countries, or foreign procurement in the United States under coproduction arrangements.~~

(2) (3)(A) The President may waive the charges for administrative services that would otherwise be required by paragraph (1)(A) in connection with any sale to the Maintenance and Supply Agency of the North Atlantic Treaty Organization in support of:

(i) a weapon system partnership agreement; or

(ii) a NATO/SHAPE project.

(B) The Secretary of Defense may reimburse the fund established to carry out section 43(b) of this Act [22 U.S.C. § 2792(b)] in the amount of the charges waived under subparagraph (A) of this paragraph. Any such reimbursement may be made from any funds available to the Department of Defense.

(C) As used in this paragraph:

(i) the term "weapon system partnership agreement" means an agreement between two or more member countries of the Maintenance and Supply Agency of the North Atlantic Treaty Organization that:

(I) is entered into pursuant to the terms of the charter of that organization; and

(II) is for the common logistic support of a specific weapon system common to the participating countries; and

(III) the term "NATO/SHAPE project" means a common-funded project supported by allocated credits from North Atlantic Treaty Organization bodies or by host nations with NATO Infrastructure funds.

(ii) the term "NATO/SHAPE project" means a common-funded project supported by allocated credits from North Atlantic Treaty Organization bodies or by host nations with NATO Infrastructure funds.

### 5.3.3. 5 U.S.C. § 552

#### **Public Information: agency rules; opinions, orders, records, and proceedings**

##### 5.3.3.1. Summary of the Law

The Freedom of Information Act (FOIA) provides for the disclosure of agency records and information to the public (including foreign companies and governments) and some of this information is inevitably technical information of value to contractors. The basic premise of the FOIA is "that all records of agencies of the Federal Government must be accessible to the public unless specifically exempt from this requirement."<sup>1</sup>

The FOIA establishes requirements for disclosure by: (1) publication in the Federal Register (section 552(a)(1)); (2) availability for public inspection and copying (section 552(a)(2)); or (3) release pursuant to a request for access from "any person" (section 552(a)(3)).

An agency's failure to comply with requirements for disclosure under sections 552(a)(1) and (2) may lead to invalidation of related agency actions. In some cases, reliance on failure to comply with FOIA's publication requirements will provide a basis for invalidating agency action that would not be subject to attack on the rule making requirements of the Administrative Procedure Act (5 U.S.C. § 553).<sup>2</sup>

All records not covered by sections 552(a)(1) and (2) are to be made public unless exempted from mandatory disclosure by section 552(b) upon proper identification and request according to established agency rules. Nine exemptions permit an agency to withhold access to records requested under section 552(a)(3).

For purposes of Government procurement, the three exemptions most often relied upon by agencies for denying FOIA requests are: matters specifically exempted from disclosure by statute (section 552(b)(3)); trade secrets and commercial or financial information (section 552(b)(4)); and interagency or intra-agency memorandums or letters (section 552(b)(5)).

The FOIA allows the agency supplying the requested information to charge a reasonable fee set by regulation to cover the cost of searching, duplicating, and reviewing the information. The FOIA provides that the fee charged by agencies for supplying requested information can vary depending on whether the information is to be used for commercial or noncommercial purposes. The agency may also waive or reduce the fee.

---

<sup>1</sup>*Litigation Under the Federal Open Government Laws* 1 (Allan Robert Adler ed., American Civil Liberties Union, 17th ed.).

<sup>2</sup>*Id.* at 3-5.

### 5.3.3.2. Background of the Law

The FOIA was enacted September 6, 1966 by Pub. L. No. 89-554 to provide the public with access to Government records.<sup>3</sup> This was the first time that there was a statutory right of access by any person to Federal agency records. Prior to the enactment of the FOIA, requests for information from the Federal Government were made pursuant to section 3 of the Administrative Procedure Act (APA). This law provided that "official records" could be made available to "persons properly and directly concerned" with the information. Section 3, however, was often used as authority for withholding, rather than disclosing, information. Congress enacted the FOIA largely to prevent agencies from using section 3 to unduly restrict the release of public information.

### 5.3.3.3. Law in Practice

DOD reported to Congress that during 1991 it processed a total of 129,437 FOIA requests.<sup>4</sup> Of the total requested, DOD fully denied 7,709 and partially denied 1,993 on the basis of the FOIA exemptions. DOD's total operating cost associated with the 1991 FOIA requests was \$23,962,169.67. The fees collected for records provided to the public amounted to \$1,593,410.78. DOD report stated that the average processing cost of a single case during 1991 was \$185.<sup>5</sup>

### 5.3.3.4. Recommendations and Justification

#### Retain

Although the total operating cost associated with processing FOIA requests is very expensive, public policy dictates that the FOIA remain intact.

The FOIA establishes a presumption that records of the Federal Government are accessible to the public.<sup>6</sup> As stated above, prior to the passage of the FOIA, the Government's posture was to withhold rather than to disclose information to the public. Individuals seeking information were required to show a need for the information.<sup>7</sup> The "need to know" philosophy has been replaced by a "right to know" policy. This right is viewed as outweighing the administrative costs associated with the Act.

---

<sup>3</sup>President Johnson threatened a veto of the legislation after the Senate passed the bill. The House wrote a report that gave a broader interpretation to the exemptions. However, the House then passed the exact text as approved by the Senate.

<sup>4</sup>See Freedom of Information Act Program CY 1991, Report to Congress (prepared by the Office of the Assistant Secretary of Defense (Public Affairs) and the Directorate for Freedom of Information and Security Review).

<sup>5</sup>*Id.*

<sup>6</sup>A Citizen's Guide on Using the Freedom of Information Act and the Privacy Act of 1974 to Request Government Records, 4th Report by the Committee on Government Operations, 2 (Government Printing Office, Washington, D.C., 1991).

<sup>7</sup>*Id.*

### **5.3.3.5. Relationship to Objectives**

Although compliance with FOIA requires the expenditure of significant funds and effort by skilled procurement and legal personnel, it does not otherwise have any adverse effect on DOD procurement. Thus, retention of the Act has no impact on the objectives of the Panel.

#### 5.3.4. 10 U.S.C. § 130

### Authority to withhold from public disclosure certain technical data

#### 5.3.4.1. Summary of the Law

This section provides that "the Secretary of Defense may withhold from public disclosure any technical data with military or space application in the possession of, or under the control of, DOD, if such data may not be exported lawfully outside the U.S. without an approval, authorization, or license under the Export Administration Act of 1979 (50 U.S.C. App. 2401-2420) or the Arms Export Control Act (22 U.S.C. § 2751 *et seq.*)."<sup>1</sup> Technical data, however, may not be withheld under this section if regulations promulgated under either Act authorize the export of such data pursuant to a general, unrestricted license or exemption in such regulations.<sup>2</sup>

#### 5.3.4.2. Background of the Law

This section was enacted by the Department of Defense Authorization Act for FY1984, Pub. L. No. 98-94. The purpose of the legislation was to withhold from public disclosure certain kinds of valuable technical data with military or space application which are in the possession of or under the control of DOD.<sup>3</sup> Congress was concerned that "blueprints and military specifications for weapons and other military equipment, drawings, plans, technical data" could in many cases be released to foreign countries and foreign competitors under the Freedom of Information Act (FOIA).<sup>4</sup> The FOIA, in effect, was enabling foreign nationals to obtain data which they could not obtain under export control laws. The provisions of the statute apply to certain kinds of technical data that, if they were to be exported, could not be exported lawfully outside the U.S. without approval, authorization or license under either the Arms Export Control Act or the Export Administration Act.<sup>5</sup> Thus, by relating the Secretary's authority to withhold data to the export control laws, valuable technical data with military or space application could be protected.

#### 5.3.4.3. Law in Practice

This statute is implemented by DOD Directive 5230.25 "Withholding of Unclassified Technical Data from Public Disclosure."<sup>6</sup> Initially, when the statute was enacted, small businesses expressed concern that the broadened power of the Government over technical data might inhibit competition for military spare parts contracts.<sup>7</sup> One lobbying group argued that the law would

<sup>6</sup>DOD Directive 5230.25 (Nov. 6, 1984).

<sup>7</sup>Aviation Week & Space Technology at 26 (Aug. 29, 1983).

hurt small businesses by providing an obstacle to obtaining technical data, while large businesses and data brokers would not be affected.<sup>8</sup> There was also a concern among small businesses that the implementing regulations would not adequately limit DOD's power to withhold data. These concerns were allayed by the implementing DOD Directive.<sup>9</sup> The scope of the Directive specifically provides that the provision "does not introduce any additional controls on the dissemination of technical data by private enterprises or individuals beyond those specified by export control laws and regulations or in contracts or other mutual agreements."<sup>10</sup>

#### **5.3.4.4. Recommendations and Justification**

##### **Retain**

This law effectively ensures that the nation's export control laws are not by-passed by releasing certain technical data information with military or space application under FOIA that would require approval, authorization, or a license under export control laws. The statute also serves the purpose of protecting U.S. companies in worldwide competition as well as protecting information whose release would adversely impact on the national security. The law should, therefore, be retained.

#### **5.3.4.5. Relationship to Objectives**

This law serves the best interests of DOD because it protects U.S. companies in worldwide competition and also protects information whose release would adversely impact on the national security.

<sup>9</sup>*Id.*

<sup>10</sup>DOD Directive 5230.25 (Nov. 6, 1984).

### **5.3.5. 10 U.S.C. § 2328**

#### **Release of technical data under the Freedom of Information Act: recovery of costs**

##### **5.3.5.1. Summary of the Law**

This section provides that the Secretary of Defense, if required to release technical data under 5 U.S.C. § 552, shall release such technical data to a person requesting the release if the person pays all reasonable costs attributable to search, duplication, and review.<sup>1</sup>

Section 2328(b) provides that an amount received under this provision shall: (1) be retained by DOD or the element of DOD receiving the amount; and (2) be merged with and made available for the same purpose and the same time period as the appropriation from which the costs incurred in complying with requests for technical data were paid.<sup>2</sup>

Section 2328(c) provides that the Secretary of Defense shall waive the payment of costs required by subsection (a) which are in an amount greater than the costs that would be required for such release of information under 5 U.S.C. § 552 if: (1) the request is made by a citizen of the U.S. or a U.S. corporation and the citizen or corporation certifies that the technical data requested is required in order to submit an offer (or determine whether it is capable of submitting an offer) to provide the product to which the technical data relates to the U.S. or a contractor of the U.S.; (2) the release of technical data is requested in order to comply with the terms of an international agreement; or (3) the Secretary determines, in accordance with 5 U.S.C. § 552(a)(4)(A)(iii), that such waiver is in the interests of the U.S.<sup>3</sup>

##### **5.3.5.2. Background of the Law**

The House amendment to the Defense Authorization Act for Fiscal Year 1987 contained a provision (section 935) that would allow the Government to charge a fee for technical data released under the Freedom of Information Act (FOIA). The fee would be an amount equal to the true administrative cost of searching for and reproducing the technical data. The provision further required that such data would be released at no additional cost to any requester who was a U.S. citizen or U.S. corporation if such citizen or corporation certified that the data was needed in order to bid on or perform a Government contract. The Conference Report to the law noted that "volumes of technical data have been requested when the requester did not require the data to bid on a government contract or to determine whether it would bid on a future requirement."<sup>4</sup> The conferees stated that "the Government ought to be able to recover the full cost of dedicating personnel and equipment to provide such data."<sup>5</sup> This legislation was also intended to protect

---

<sup>1</sup>10 U.S.C. § 2328(a).

<sup>2</sup>10 U.S.C. § 2328(b).

<sup>3</sup>10 U.S.C. § 2328(c).

<sup>4</sup>H. Rep. 1001, 99th Cong., 2d Sess., at 513 (1986), *reprinted in* 1986 U.S.C.C.A.N. 6572.

<sup>5</sup>*Id.*

high tech firms that submit technical data information as part of their bid on a contract from data brokers. Data brokers file FOIA requests to obtain technical data and then sell the information to other entities. This may include competitors of the firm submitting the bid, thereby depriving the submitting firm of its competitive edge. The report specifically stated that this provision was not intended to affect the standards for releasing data.<sup>6</sup>

During 1985-86, the Navy was faced with an enormous volume of FOIA requests for technical data. The technical data repositories responding to the FOIA requests were not recovering the full costs incurred. Additionally, amounts received were required to go to the U. S. Treasury rather than be used by the agency. To remedy this situation, Congress enacted 10 U.S.C. § 2328.

#### **5.3.5.3. Law in Practice**

Parties requesting technical data information pursuant to this statute are required to pay all reasonable costs attributable to search, duplication, and review. 32 C.F.R. 518.92 defines reasonable costs as the full costs to the Government of rendering the service, or the fair market value of the service, whichever is higher. The regulation further states that full cost includes both direct and indirect costs to conduct the search and duplicate the records to be responsive to the request. Thus, the fees charged for the retrieval of technical data are generally higher than the fees charged for the retrieval of general public information under the FOIA statute. The statute also permits waiver of this larger fee if the request is made by a U.S. company.

#### **5.3.5.4. Recommendation and Justification**

##### **Retain**

This statute should be retained because it discourages the unnecessary release of defense contractors' technical data under FOIA. The statute also reduces the number of dedicated Government personnel and equipment necessary to provide such data. Lastly, by permitting waiver of the larger fee if the request is made by a U.S. company, the statute carries out the policy of ensuring that U.S. companies are not placed at a disadvantage in competing with foreign companies. Thus, the law serves the best interests of DOD.

#### **5.3.5.5. Relationship to Objectives**

This law meets the Panel's goal of serving the best interests of DOD.

---

<sup>6</sup>*Id.*

## **5.4. Government Use of Private Patents, Copyrights and Trade Secrets**

### **5.4.0. Introduction**

The Panel reviewed three statutes dealing with Government use of private patents, copyrights and trade secrets: 28 U.S.C. § 1498, 10 U.S.C. § 2386, and 10 U.S.C. § 7210. It found that these statutes give DOD necessary access to private technology but that they can be improved in several ways to ensure that owners of that technology are treated fairly when the Government must use their technology.

28 U.S.C. § 1498(a) provides that the sole remedy of a patent owner whose patent has been used by the Government or its contractors, with authorization and consent, is to sue the Government in the U.S. Court of Federal Claims for reasonable compensation. This, in effect, gives the Government the right of eminent domain over patents and the Government has exercised this right very widely -- giving authorization and consent to use private patents on almost all Government contracts. The Panel found two situations where such broad authorization and consent does not meet our objectives. It therefore recommends that the statute be amended to permit the Secretary of Defense to issue regulations providing for the withholding of authorization and consent when it would meet the Panel's objectives.

In the first situation, under current policy, when a patent owner claims that a procurement will require use of its patent, the contracting officer grants authorization and consent and may include a patent indemnity clause in the contract in an attempt to ensure that the infringing contractor is ultimately liable if the Government is required to pay compensation for the infringement. This creates a legal process where the patent owner sues the Government. The Government may in turn sue the infringing contractor -- a circumstance that does not appear to have induced infringing contractors to include this ultimate liability in their price. The result is that the infringing contractor gains an unfair advantage against the patent owner in competing for the work, since its price will not contain the cost of developing the invention. The Panel has concluded that a fairer competitive situation would occur if the contracting officer, in these circumstances, withheld authorization and consent with the result that the patent owner could sue the infringing contractor directly for damages. This would provide a strong inducement to the infringing contractor to include that amount in its price -- equalizing the competitive situation. The Panel has also recommended the addition of language to 35 U.S.C. § 283 to ensure that no injunction could be granted in these circumstances. This will ensure that the procurement could not be blocked by the patent owner.

In the second situation, under current policy, when a commercial item is procured, the contracting officer grants authorization and consent and includes a patent indemnity clause, resulting in the same convoluted system of remedies. The Panel has concluded that in most purchases of commercial items, the Government would be better served by merely withholding authorization and consent and letting commercial processes determine the winner of the procurement. This meets the Panel's objective of using commercial practices to the greatest extent possible in buying commercial items.

The Panel is aware that this may discourage some companies, including small businesses, from participating in some procurements, but believes that fair treatment of the patent owner warrants adoption of this statutory change. However, a number of Government commentators strongly argue that the benefits of competition outweigh the objectives sought under the proposed change.

10 U.S.C. § 2386 permits DOD to acquire rights in intellectual property, including the settlement of claims for rights previously taken, when such acquisition is necessary to carry out its mission. The Panel concludes that this statute serves a necessary purpose and should be retained, but that some of its terminology is obsolete. For instance, it describes one category as "designs, processes, and manufacturing data." The Panel recommends that these words be amended to use the current terminology -- "technical data and computer software." The Panel also recommends that the fourth category, permitting the purchase of releases (settlements of claims for past use), be broadened to give the Department greater flexibility. This will ensure that all such claims can be settled when that will further the procurement mission of the Department.

10 U.S.C. § 7210 is a Navy-unique statute that duplicates 10 U.S.C. § 2386. The Panel recommends that it be repealed.

## 5.4.1. 28 U.S.C. § 1498

### Patent and copyright cases

#### 5.4.1.1. Summary of the Law

Section 1498(a) provides that whenever a patented invention is used or manufactured by or for the U.S., without a license or lawful right, the owner's remedy is against the U.S. in the Claims Court for reasonable and entire compensation.<sup>1</sup> This section specifies that use or manufacture of a patented invention by a contractor with the authorization or consent of the Government is construed as use or manufacture for the U.S.<sup>2</sup>

Section 1498(b) provides similar protection for copyright owners where either the U.S. or a contractor, corporation, or any other person acting with the authorization or consent of the Government infringes an owner's copyright.<sup>3</sup>

The unauthorized use of a patented invention by the Government is considered a taking of the property by eminent domain. Specifically, Congress has taken the patent owner's right of injunctive relief and provided, instead, a right of reasonable and entire compensation. Thus, section 1498 limits the patent owner's remedies. In effect, this statute subjects the patents involved to compulsory licensing in favor of the Government.

#### 5.4.1.2. Background of the Law

Section 1498 is based on section 68 of Title 35 (June 25, 1910, Ch. 423). Section 68 marked the first time that patent owners were granted a specific remedy for the Government's use of their inventions. The 1910 Act provided "that whenever an invention . . . covered by a patent of the U.S. shall hereafter be used by the U.S. without license of the owner thereof or lawful right to use the same, such owner may recover reasonable compensation for such use by suit in the Court of Claims . . ." <sup>4</sup> The intent of the statute was to enlarge the jurisdiction of the Claims Court so that it could hear suits against the U.S. for patent infringement and award reasonable compensation to the patent owner.<sup>5</sup> Prior to this Act, Government use of patented inventions, without license or right, was considered an unauthorized act of the Federal employee supervising the activities. This individual was liable for patent infringement. There was no injunctive relief, however, against either the Government or its employee.<sup>6</sup>

<sup>3</sup>28 U.S.C. § 1498(b).

<sup>4</sup>Act of June 25, 1910, Pub. L. No. 61-305 [H.R. 24649].

<sup>5</sup>H. Rep. 1288.

<sup>6</sup>Discussion in Nash and Rawicz, *Patents and Technical Data* at 589 (1983).

The Supreme Court considered the scope of this Act in *Crozier v. Krupp*.<sup>7</sup> In *Crozier*, the Court held that this "statute . . . provides for the appropriation of a license [on behalf of the Government] to use inventions [and that] the appropriation [is] sanctioned by the . . . compensation for which the statute provides [for exercising the] power of eminent domain . . ."<sup>8</sup>

In *Cramp & Sons v. International Curtis Marine Turbine Co.*,<sup>9</sup> a private independent contractor used a patented invention in the performance of its contract with the Government. The Court held that use by a contractor was not a "use by the U.S. without license" under the 1910 Act.<sup>10</sup> Accordingly, the contractor was held liable for damages for patent infringement. As a result of this case, Congress passed the Act of July 1, 1918.<sup>11</sup> The purpose of this amendment was to prevent the halting of a contractor's work by means of an injunction. In *Richmond Screw Anchor Co. v. United States*,<sup>12</sup> the Court held that this amendment precluded suits against contractors regarding unauthorized use of patented inventions in production for the Government. The Court also held that under the 1918 amendment, the patent owner's only remedy was a suit against the Government in the Claims Court. The Court stated:

The purpose of the amendment was to relieve the contractor entirely from liability of every kind for the infringement of patents in manufacturing anything for the Government and to limit the owner of the patent and his assigns and all claiming through or under him to suit against the U.S. in the Court of Claims for the recovery of his reasonable and entire compensation for such use and manufacture. The word 'entire' emphasizes the exclusive and comprehensive character of the remedy provided.<sup>13</sup>

The 1918 amendment also introduced the concept of "authorization and consent" as a prerequisite to applicability of 28 U.S.C. § 1498(a). Procuring agencies use standard Authorization and Consent Clauses in most contracts.<sup>14</sup> These clauses provide a mechanism which forces the patent owner to sue the Government, while at the same time, prevents the disruption of manufacturing or research and development activities by prohibiting the patent owner from obtaining injunctive relief from the Government.

#### 5.4.1.3. Law in Practice

Section 271 of Title 35, U.S. Code provides that "whoever without authority makes, uses, or sells any patented invention, within the U.S. during the term of the patent therefor, infringes

<sup>7</sup>*Crozier v. Krupp*, 224 U.S. 290 (1912).

<sup>9</sup>*Cramp & Sons v. International Curtis Marine Turbine Co.*, 246 U.S. 28 (1917).

<sup>10</sup>*Id.*

<sup>11</sup>Act of July 1, 1918, 40 Stat. 705.

<sup>12</sup>*Richmond Screw Anchor Co. v. United States*, 275 U.S. 331 (1928).

<sup>13</sup>*Id.* at 343. The Richmond case has not been interpreted to mean that the Government may not shift liability of patent infringement back to the contractor by use of a Patent Indemnity Clause.

<sup>14</sup>FAR part 52.227.1.

the patent."<sup>15</sup> Under this statute, the patent owner can obtain injunctive relief (section 283) and/or monetary damages (section 284).

Section 1498 of Title 28, U.S. Code, on the other hand, protects a Government contractor from suit for patent infringement when the use is: (1) for the Government; and (2) with the authorization or consent of the Government. Under this statute, the patent owner is precluded from filing suit against the infringer. The patent owner's only relief is against the Government for monetary damages. The patent owner cannot obtain injunctive relief against the Government. The Government, in particular DOD, wanted to ensure that manufacturing and research and development activities would not be disrupted by a patent infringement claim. Thus, by limiting the patent owner's remedy to "reasonable and entire compensation," the Government is assured of continued contract performance even when there is a patent infringement claim.

Because the patent owner's only recourse is against the Government, the infringer is insulated from suit. The infringer also has a competitive advantage over the patent owner or licensee because the infringer can offer a price which does not include recovery of the costs of making the invention. FAR 27.203-1(b)(2) permits the use of a patent indemnity clause when a patent owner contends that infringement will occur. This procedure, however, has not been a satisfactory method of equalizing the competitive position of these parties.

#### **5.4.1.4. Recommendations and Justification**

##### **I**

**Amend 28 U.S.C. § 1498 to provide the Secretary of Defense with the authority to issue regulations prescribing when a contracting officer may withhold authorization or consent.**

##### **II**

**Amend 35 U.S.C. § 283 to prohibit a claimant from obtaining injunctive relief where the infringement has occurred in the performance of a Government contract.**

Section 1498(a) protects the Government contractor from suits for patent infringement when the use is: (1) for the Government; and (2) with the authorization or consent of the Government. The purpose of the authorization or consent clause is to limit the patent owner's remedy to suit against the Government for monetary damages, thereby preventing the halting of a contractor's work by means of an injunction. It has been the policy of the Government when implementing this statute to insert blanket "authorization or consent" clauses into most contracts.

This proposal provides the Secretary of Defense with the flexibility to vary this policy by issuing regulations prescribing when a contracting officer may withhold authorization or

---

<sup>15</sup>35 U.S.C. § 271.

consent.<sup>16</sup> The purpose of this recommendation is to ensure that the patent owner has the ability to effectively compete in the Government market. Two possible circumstances where withholding authorization or consent would be appropriate are: (1) where the patent owner comes forward claiming that award would infringe his patent; and (2) where the procurement is for a commercial product.

In the first instance, if a patent owner came forward asserting the patent, then the contracting officer could elect not to insert the "authorization or consent" clause in the solicitation. Since the infringer would no longer be protected from suit, the infringing offeror would have to factor the costs of an infringement suit into his offer. This price factor would bring the infringer's offer more in line with the patent owner's offer. Presently, an infringing offeror can sell an infringing product to the Government at a lower price than the inventor, thereby excluding the inventor from the Government market.<sup>17</sup> Although a patent indemnification clause is often contained in a Government contract, this may not induce infringers to include a meaningful factor into their offer to compensate for the potential liability. Making infringing offerors quantify the risk of suit will assist the patent owner to effectively compete in the Government market. Small businesses expressed concern over this proposal stating that they would not be able to compete against large defense contractors or critical aircraft spare parts if this proposal were adopted.<sup>18</sup> This issue will have to be addressed more fully as will the possible unintentional consequences of the Panel's recommendations.

The second instance where a contracting officer may want to withhold authorization or consent is where the procurement is for a commercial product. Generally, contractors do not infringe on commercial products because of the protection provided in section 2-312 of the Uniform Commercial Code. Under this provision, the seller warrants that:

- (1) the title conveyed shall be good, and its transfer rightful; and
- (2) the goods shall be delivered free from any security interest or other lien or encumbrance of which the buyer at the time of contracting has no knowledge.

Patent owners should be provided the same protection for commercial products sold to the Government as that given in section 2-312 of the Uniform Commercial Code. This proposal would improve the Government's commercial buying practices. Buying commercial products

---

<sup>16</sup>In response to a memorandum from the Panel to the acquisition community, both NASA and the Air Force stated that the proposed statutory change to section 1498 was unnecessary because the Secretary already has the authority to issue regulations prescribing when a contracting officer may withhold authorization or consent. See Memorandum from Dave Beck, Competition and Program Operations Division, Office of Procurement, NASA Headquarters (Oct. 19, 1992); Memorandum from the Office of the General Counsel, Department of the Air Force (Oct. 14, 1992); and Memorandum from Headquarters Air Force Materiel Command (Oct. 26, 1992). Although this is true, the proposed statute would directly address the waiver procedure option which could then be fully addressed in regulation.

<sup>17</sup>Even a licensee is at a disadvantage with the infringing offeror because the licensee will have to factor the price of the license into the bid proposal.

<sup>18</sup>Letter from Paul Seidman, Seidman & Associates (Oct. 19, 1992).

allows the Government to "take advantage of the broad based competition that occurs in the commercial market place."<sup>19</sup> Some of the benefits of buying in the commercial market include "lower costs resulting from price competition and scale economics, short lead-times provided by deliveries from existing production lines, and increased surge capacity available from a broadened industrial base."<sup>20</sup> Only by assimilating commercial practices when buying commercial products can the Government take full advantage of the commercial marketplace.

#### **5.4.1.5. Relationship to Objectives**

This proposal would improve the Government's commercial product buying practice by giving the patent owner the same protection against infringement as that provided in the commercial market. The recommendation would also better enable the patent owner to compete in the Government marketplace.

#### **5.4.1.6. Proposed Statute**

##### **28 U.S.C. § 1498. Patent and copyright cases**

(a) Whenever an invention described in and covered by a patent of the United States is used or manufactured by or for the United States without license of the owner thereof or lawful right to use or manufacture the same, the owner's remedy shall be by action against the United States in the United States Claims Court for the recovery of his reasonable and entire compensation for such use and manufacture.

For the purposes of this section, the use or manufacture of an invention described in and covered by a patent of the United States by a contractor, a subcontractor, or any person, firm, or corporation for the Government and with the authorization or consent of the Government, shall be construed as use or manufacture for the United States. The Secretary of Defense is authorized to issue regulations prescribing when a contracting officer may withhold authorization or consent. The court shall not award compensation under this section if the claim is based on the use or manufacture by or for the United States of any article owned, leased, used by, or in possession of the United States prior to July 1, 1918.

A Government employee shall have the right to bring suit against the Government under this section except where he was in a position to order, influence, or induce use of the invention by the Government. This section shall not confer a right of action on any patentee or any assignee of such patentee with respect to any invention discovered or invented by a person while in the employment or service of the United States, where the invention was related to the official functions of the employee, in cases in which such functions included research and development, or in the making of which Government time, materials, or facilities were used.

**35 U.S.C. § 283. Injunction**

Except where the infringement has occurred in the performance of a Government contract, the  
The several courts having jurisdiction of cases under this title [35 U.S.C. §§ 1 et seq.] may grant injunctions in accordance with the principles of equity to prevent the violation of any right secured by patent, on such terms as the court deems reasonable.

## 5.4.2. 10 U.S.C. § 2386

### Copyrights, patents, designs, etc., acquisition

#### 5.4.2.1. Summary of the Law

This law authorizes the military departments to settle claims and procure rights in intellectual property. It provides that funds appropriated for a military department, available for making or procuring supplies, may be used to acquire any of the following if the acquisition relates to supplies or processes produced or used by or for, or useful to, that department:

- Copyrights, patents, and applications for patents;
- Licenses under copyrights, patents, and applications for patents;
- Designs, processes, and manufacturing data; and
- Releases, before suit is brought, for past infringement of patents or copyrights.<sup>1</sup>

#### 5.4.2.2. Background of the Law

The Act of 1910<sup>2</sup> gave patent owners a judicial remedy against the Government for the unauthorized use of patented inventions. It was not, however, until the enactment of the Royalty Adjustment Act of 1942<sup>3</sup> that Government departments and agencies were expressly permitted to administratively settle claims for the unauthorized use of patented (and unpatented) inventions. Prior to 1942, some Government agencies had the authority to purchase future licenses to use patents. There was no law, however, which permitted a Government agency to administratively settle a claim after the occurrence of such use.

Section 3 of the Royalty Adjustment Act expressly authorized the heads of Government departments and agencies to enter into agreements to settle certain claims against the Government. It provided that:

The head of any department or agency of the Government which has ordered the manufacture, use, sale, or other disposition of an invention, whether patented or unpatented, and whether or not an order has been issued in connection therewith pursuant to section 1 hereof, is authorized and empowered to enter into an agreement, before suit against the U.S. has been instituted, with the owner or licensor of such invention, in full settlement and compromise of any

<sup>2</sup>35 U.S.C. § 68 (June 25, 1910, Ch. 423).

<sup>3</sup>Royalty Adjustment Act of October, 56 Stat. 1013 (1942).

claim against the U.S. accruing to such owner or licensor under the provisions of this Act or any other law by reason of such manufacture, use, sale, or other disposition, and for compensation to be paid such owner or licensor based on manufacture, use, sale, or other disposition of said invention.<sup>4</sup>

Most commentators assume that the Royalty Adjustment Act expired on April 1, 1953,<sup>5</sup> based on the view that the Act was primarily a war emergency measure which expired on April 1, 1953. In order to save this authority for DOD, section 609 of the Department of Defense Appropriation Act of 1954 was passed to provide express authority for making agreements previously authorized by section 3 of the Royalty Adjustment Act. This new law also provided for making agreements covering only past use. The Act of August 10, 1956, repealed the provisions of section 609 and codified at 10 U.S.C. § 2386.

A 1957 Comptroller General Opinion<sup>6</sup> stated that the authority to release past infringements was limited to acquisitions "before suit is brought." The Comptroller General further stated that "the responsibility for determining the action to be taken with respect to the compromise and settlement of such claims pending after suit is brought . . . [is] . . . vested in the Attorney General of the U.S. pursuant to section 5 of Executive Order No. 6166."<sup>7</sup> This Executive Order provides that it is the Department of Justice's (DOJ) decision to prosecute, defend, compromise, appeal, or abandon any prosecution or defense.

#### 5.4.2.3. Law in Practice

Section 2386 is an administrative remedy that permits DOD to acquire rights in intellectual property. The Panel found that the law serves a necessary purpose and should be retained. However, the law is drafted using somewhat obsolete terms. For instance, the law describes one category as "designs, processes, and manufacturing data." Also, the law allows releases under both sections 2386(1) and (2), but not section 2386(3).

#### 5.4.2.4. Recommendations and Justification

### I

**Amend 10 U.S.C. § 2386(3) by substituting the words "technical data and computer software" for "designs, processes, and manufacturing data."**

---

<sup>4</sup>Although the Royalty Adjustment Act was primarily a war emergency measure, section 3 was intended as permanent legislation.

<sup>5</sup>In *International Telephone & Telegraph Corp. v. United States*, 210 Ct. Cl. 410, 536 F.2d 1351, 191 U.S.P.Q. 739 (1976), the court held that section 3 of the Royalty Adjustment Act of 1942 had not expired. The court stated that Congress did not intend to repeal, and did not repeal, section 3 of the Act. Moreover, the court stated that the enactment of 10 U.S.C. § 2386 did not repeal section 3 by implication.

<sup>6</sup>37 Comp. Gen. 199, B-132729 (1957).

<sup>7</sup>*Id.* at 202. See also *Sullivan v. United States*, 348 U.S. 170, 172.

The term "designs, processes, and manufacturing data" is outdated. Both FAR and DFARS define technical data broadly to include all data which is of scientific or technical nature, other than computer software.<sup>8</sup> The phrase "designs and processes" covers computer software. Thus, section 2386(3) should be amended by substituting the words "technical data and computer software" for "designs, processes, and manufacturing data."

## II

**Amend 10 U.S.C. § 2386(4) to include the phrase "or for unauthorized use of technical data or computer software."**

Section 2386(4) authorizes military departments to settle copyrights and patents (sections 2386(1) and (2), respectively), but does not mention technical data and computer software as identified in section 2386(3). The law should authorize military departments to settle all three types of claims. Adding the phrase "or for unauthorized use of technical data or computer software" to the end of the clause would allow military departments to settle technical data claims and provide uniformity to the statute.

## III

**Amend 10 U.S.C. § 2386(4) by deleting the words "before suit is brought."**

The proposed amendment merely deletes the constraint "before suit is brought" in order to allow the agency maximum flexibility to settle patent infringement matters even after suit has been filed. Very few claims pursuant to section 2386 are settled at the agency level. The Intellectual Property Law Section of the Army Materiel Command stated that only one minor claim out of approximately 40 was settled at the agency level within a five year period.

Agencies wishing to negotiate a settlement after a claimant files suit are precluded from doing so because they no longer have authority over the matter. Thus, the agency often loses interest in the case once the claimant files suit because the agency is powerless to try to negotiate a settlement. Also, regardless of the outcome, once suit is filed, any settlement claim will not come out of the agency's appropriated funds.<sup>9</sup> As a consequence, once suit is filed, DOJ must start at the beginning of the negotiation process with the claimant. This results in further delay in the resolution of the matter.

This proposal will allow the Department broader flexibility to settle suits, thereby ensuring that all such claims can be settled when that will further the procurement mission of the Department.

---

<sup>8</sup>See FAR 27.401 and DFAR 227.401(18).

<sup>9</sup>Pursuant to 28 U.S.C. § 1498, when an agency voluntarily settles a patent claim, it must pay that claim out of its appropriated funds. On the other hand, if the agency declines to settle and the claimant files suit, the claim is ultimately paid out of the Permanent Judgment Appropriation.

#### 5.4.2.5. Relationship to Objectives

This proposal updates the wording of the law to current terminology. The proposal also gives the Department greater flexibility to settle claims by deleting the words "before suit is brought."

#### 5.4.2.6. Proposed Statute

##### **Copyrights, patents, designs, etc., acquisition**

Funds appropriated for a military department available for making or procuring supplies may be used to acquire any of the following if the acquisition relates to supplies or processes produced or used by or for, or useful to, that department:

(1) Copyrights, patents, and applications for patents.

(2) Licenses under copyrights, patents, and applications for patents.

(3) Technical data ~~Designs, processes, and manufacturing and computer software.~~

(4) ~~Releases, before suit is brought,~~ for past infringement of patents or copyrights or for unauthorized use of technical data or computer software.

### **5.4.3. 10 U.S.C. § 7210**

#### **Purchase of patents, patent applications, and licenses**

##### **5.4.3.1. Summary of the Law**

This law provides that the Secretary of the Navy may buy letters patent, applications for letters patent, and licenses under either letters patent or applications for letters patent.<sup>1</sup> The law further provides that the "purchases shall be made from appropriations available for the purchase or manufacture of the equipment or material to which the purchased letters patent, applications, or licenses pertain. Section 7210(b) authorizes the Secretary of Defense to delegate the authority of the Navy, with or without the authority to make successive redelegations."<sup>2</sup>

##### **5.4.3.2. Background of the Law**

This statute was enacted on 2 August 1946 by the Naval Appropriations Pay Readjustment Act, Pub. L. No. 79-604.

##### **5.4.3.3. Law in Practice**

The Office of the Chief of Naval Research stated that the Navy no longer uses this statute and recommended its repeal.

##### **5.4.3.4. Recommendation and Justification**

#### **Repeal**

This is a Navy-unique statute that duplicates 10 U.S.C. § 2386. According to the Office of the Chief of Naval Research, all of the military services use 10 U.S.C. § 2386 for the acquisition of patents. Thus, because the law is redundant with section 2386, it should be repealed in its entirety.

##### **5.4.3.5. Relationship to Objectives**

This proposal serves the best interests of DOD by eliminating a redundant law from the U.S. Code.

## 6. STANDARDS OF CONDUCT

### 6.0. Introduction

In this chapter the Panel has assembled and reviewed those statutes that directly or indirectly affect the defense acquisition process by imposing limitations upon the conduct of Government employees, contractor representatives, or contractors.

The chapter title was chosen, notwithstanding its connotation of administrative regulations and procedures, because the Panel's study included a sweep of topics extending far beyond the criminal provisions of Title 18. It ranged from the fraud and bribery section of that title to the statutory rulemaking powers of the Office of Government Ethics, for the reason that so many of the statutes in this area have become, over time, interwoven with threads of administrative interpretation and supplementation. The Panel thus chose to open its review from the broadest possible perspective, looking not just at the role played by each law standing in isolation, but at their interrelationships and cumulative contributions to the sound conduct of defense procurement.

Through a series of formal announcements and solicitations, the Panel sought views from both Government and industry. The majority of the statutes under consideration involved not just defense procurement, but were also laws of general application, prompting the Panel to be sensitive to their histories of amendment, enforcement, and judicial interpretation, and especially to the boundaries of its own charter.

The laws governing criminal and civil fraud, for example, represent carefully adjusted balances of public and private interests. Many of them have Civil War antecedents, and if redrafted today would, in all likelihood, emerge in starkly different form and vocabulary. With rare exception, however, they remain current and serve well. During the course of its deliberations, the Panel progressively narrowed the initial scope of its study and ultimately focused on only a very limited number of issues that were, in its judgment, of sufficient concern to warrant recommendations to Congress.

Subchapter 6.2 includes the laws concerning criminal fraud that were reviewed by the Panel. 18 U.S.C. §§ 286 and 287 address the submission of fraudulent claims against the United States and engaging in a conspiracy to do so. The Panel recommends no changes to those provisions, nor to the general prohibitions against conspiracy to defraud the Government at 18 U.S.C. § 371. The False Statements Act, 18 U.S.C. § 1001, also plays a prominent role in many procurement related prosecutions but raises no special problems of application or interpretation meriting attention.

The Major Fraud Act of 1988, 18 U.S.C. § 1031, addresses fraud in contracts or subcontracts of \$1 million or more. In the Panel's opinion, this provision has not been in effect long enough to judge its effect fairly. The Panel also made no recommendation regarding the mail fraud statutes at 18 U.S.C. §§ 1341, 1343, and 1346.

Subchapter 6.3 includes the Panel's review of the civil fraud provisions. It recommends no changes to the false claims provisions of the Contract Disputes Act at 41 U.S.C. § 604, nor to the Program Fraud Civil Remedies Act at 31 U.S.C. §§ 3801-12. The novel administrative enforcement procedures of the latter required extensive implementation within DOD and have not been in effect or used long enough to assess their effectiveness.

The Panel's review of the False Claims Act, 31 U.S.C. §3729-3732, developed a number of issues on which there proved to be considerable Government and industry interest, most particularly regarding the procedures at Section 3730 for *qui tam* suits initiated by Government employees or private citizens. By amendments made to these procedures in 1986, Congress provided additional financial incentives for the filing of false claims suits by private parties. Those changes have generated significant numbers of new cases, sizable Government recoveries, and questions as to whether in some respects the 1986 amendments may have overadjusted the balance of incentives and benefits inherent within the law.

On this topic the Panel sought views from industry, the Department of Justice, and agency personnel who participate in the Government's review of cases when they are filed. There was unanimity that the *qui tam* provisions serve a valuable function, and there was considerable agreement that their principal weakness was in their potential for manipulation by industry and Government employees seeking to maximize their personal share of recoveries. The Panel was sensitive to the fact that these special procedures were enacted to serve far beyond the limited confines of defense procurement, and for that reason it approached its review and resulting recommendations with particular deliberation.

The Panel's first recommendation is to limit the authority of Government employees to bring *qui tam* suits on the basis of information acquired during the course of their Government work. As interpreted in some federal courts, the law currently permits a Government auditor, for example, to file a *qui tam* suit against a firm he is auditing, and to receive a substantial portion of the Government's eventual recovery. Because situations such as that bear the potential for abuse and for inescapable conflicts of interest, the Panel suggests forbidding suits that rely upon information obtained during the course of the employee's official duties.

The Panel also suggests a change to balance the competing interests of Government, industry and *qui tam* plaintiffs in cases involving voluntary disclosures. It recommends that there be no right to sue if the *qui tam* plaintiff learned of the grounds for his suit from information conveyed to the Government as part of a voluntary disclosure program. The Panel makes an analogous recommendation that would forbid suits based upon information generated from a Government audit or investigation.

Finally, the Panel suggests that provision be made to permit the court to adjust recoveries awarded to *qui tam* plaintiffs who played a role in the fraud, or were deliberately slow to report it. The Panel considered, but on the strength of experience to date did not adopt, suggestions for creating additional procedural protections against frivolous *qui tam* suits, or for imposing a fixed dollar ceiling on plaintiffs' recoveries.

Apart from those *qui tam* matters, the Panel received comments addressing a number of perceived conflicts between the efficient resolution of contract disputes and the contemporaneous resolution of fraud issues relating to the same contract or dispute. Industry representatives contend that the resolution of fraud questions causes long delays and introduces uncertainty into the disputes process, whereas the Government understandably attaches a great deal of priority to the opportunity to perform a thorough investigation into suspected wrongdoing.

One factor long at the root of this conflict is the lack of a single forum that can resolve both contract claims and related fraud claims. The jurisdictional allocation today vests contract disputes resolution in the Claims Court and boards of contract appeals, places civil and criminal fraud cases in the district courts, and gives the Claims Court jurisdiction over Government fraud counterclaims asserted against contractor claims. There is also a natural tension present in such cases among the rights and interests of the parties. The question, then, is one of striking the appropriate balance.

Following its review, the Panel arrived at three proposed adjustments. First, to clarify what is often a threshold issue of board jurisdiction, the Panel recommends amending the Contract Disputes Act (CDA) to clarify that the process for obtaining or bypassing the contracting officer's final decision is available even in cases where fraud is suspected. Then, to facilitate resolving contractor claims and related Government assertions of fraud in a single forum, the Panel proposes two additional amendments to the CDA: first, it recommends giving boards the authority to transfer a pending appeal to the Claims Court when fraud is at issue, and second, it recommends amending the exclusive jurisdiction of the boards to permit trial of a board matter as a counterclaim in a district court fraud action that has been brought by the Government.

The Panel's final recommendation in this subchapter addresses the potential under the False Claims Act for the imposition of unreasonably excessive penalties. The mathematical calculations prescribed by the FCA hold the prospect, especially in the mass production settings prevalent in defense acquisition, of multiplying the effect of a single underlying false record or report into damages well in excess of the Government's actual harm and of ruinous proportions to a contractor. To lessen this concern, which was cited by many as a disincentive to becoming a Government contractor, the Panel has recommended an amendment authorizing the court to adjust FCA penalties whenever it finds they are disproportionate to the actual damages suffered by the Government.

The next segments of the chapter, beginning at 6.4, turn to the array of ethics laws that affect those engaged in defense procurement, both on behalf of Government and on behalf of industry. A handful of statutory restrictions governed this topic from the Civil War until quite recently, when the defense build-up of the 1980s was punctuated by a number of events that drew extensive public attention. The pricing of military diodes, ashtrays, and hammers coincided not only with revelations of corporate dog boarding at Government expense, but with reports that defense plant representatives and even senior departmental officials had accepted post-Government jobs with defense firms they had only recently supervised.

Concern came to be expressed that those phenomena might be related and that defense officials might occasionally be tempted to deal less than vigorously with firms they hoped would hire them in the future, precipitating several new ethics restrictions applicable to defense acquisition. The "Ill Wind" prosecutions renewed questions about the sufficiency of the laws and prompted additional legislation. Addressing related issues in slightly different terms, most of those provisions were concerned with the potential for conflicts of interest, or "appearances" of conflicts. The additional assurance they contributed toward public trust in Pentagon spending during the 1980s was judged at the time to merit whatever additional costs they added and the bookkeeping they required.

In what is now a different decade and a different procurement environment, the Panel believes it may be time to reassess the contribution of some of those provisions. In subchapter 6.5, the Panel has analyzed six legal restrictions and one comprehensive regulation, all of which potentially govern the receipt of a gift by a defense employee engaged in procurement: the bribery statute at 18 U.S.C. § 201(b); the criminal gratuities statute at 18 U.S.C. § 201(c); the gift provisions of the procurement integrity amendments to the OFPP Act at 41 U.S.C. §§ 423(a)(2) and (b)(2); the supplementation of salary statute at 18 U.S.C. § 209; the civil gratuities statute at 10 U.S.C. § 2207; the recently enacted gift statute at 5 U.S.C. § 7353; and the new executive branch standards of conduct regulations promulgated by the Office of Government Ethics (OGE) at 5 C.F.R. § 2635.

The Panel concluded that the new OGE regulations satisfy a long-standing need by imposing an enforceable and uniform rule on all executive branch employees, and that the special gift provisions at 41 U.S.C. §§ 423(a)(2) and (b)(2) are now essentially redundant and ought to be repealed to prevent potentially confusing overlap with the new uniform rules.

Subchapter 6.6 analyzes the restrictions imposed upon an employee's outside employment discussions by 18 U.S.C. § 208(a), 10 U.S.C. § 2397a, and 41 U.S.C. §§ 423 (a)(1), (b)(1), and (c). The Panel's review suggests that the latter provisions were enacted primarily to correct technical shortcomings in the basic Government-wide law, 18 U.S.C. § 208(a). The Panel believes those deficiencies are today even more comprehensively addressed by OGE at 5 C.F.R. § 2635. For that reason, the Panel recommends repeal of those two provisions to avoid confusing inconsistencies among their differing procedural requirements for recusal and disqualification.

"Revolving door" laws are analyzed next, including the military criminal selling statute at 18 U.S.C. § 281; the military civil selling statute at 37 U.S.C. § 801; the post-employment and reporting provisions of 10 U.S.C. §§ 2397, 2397b, and 2397c; and the post-employment portion of the procurement integrity amendments to the OFPP Act at 41 U.S.C. § 423(f).

For the reasons described in its analysis, the Panel recommends that all of those provisions be repealed. The two antiquated military statutes largely duplicate provisions of 18 U.S.C. § 207, and the others have proven to exact an enormous enforcement burden to regulate a very limited number of persons. Within the large family of revolving door laws, the chief independent contribution of the post-employment restrictions of 10 U.S.C. § 2397b and 41 U.S.C. § 423(f) is to prevent key employees and officials from switching sides in situations that might disadvantage

the Government through their behind-the-scenes assistance to a contractor. As an alternative that might better reach the same end, the Panel suggests a new subsection that could be added to the main body of Government post-employment laws at 18 U.S.C. § 207.

Next, at subchapter 6.8, are the provisions on protection of sensitive procurement information, including the Trade Secrets Act at 18 U.S.C. § 1905 and the information protection provisions of the procurement integrity amendments to the OFPP Act at 41 U.S.C. §§ 423(a)(3), (b)(3), and (d). The Panel concluded that the information protection provisions of section 423 fill a necessary and useful role in protecting bid and evaluation data during the procurement process, but that they suffer in clarity from having been drafted to fit the other definitions and objectives of the OFPP amendments. Here, too, the Panel believes that the current protections could be better executed through enactment of a comprehensive single-purpose law, a draft of which is offered as an alternative.

Subchapter 6.9 includes brief analyses of other portions of the procurement integrity amendments to the OFPP Act, including the certification requirements of 41 U.S.C. § 423(e); the provisions in section 423(l) mandating special training on the restrictions of section 423; and the requirements for issuing "safe harbor" legal opinion under section 423(k). The Panel concluded that these requirements are disproportionately burdensome, contribute very little in return, and should be repealed.

The remaining subsections of section 423 prescribing penalties are also recommended for repeal. The final analysis included in this subchapter is of 18 U.S.C. § 218, permitting the Government to void contracts in relation to which there has been a final conviction under one of the integrity sections of Title 18. The Panel recommends that 18 U.S.C. § 218 be retained.

For administrative convenience alone, the Panel has next included in this chapter, at 6.10, its analysis of major portions of the OFPP Act that were not analyzed in other chapters of this report, from 41 U.S.C. § 401 setting forth OFPP's mission through section 405 describing the power of the Administrator, to section 421 establishing the Federal Acquisition Regulations Council. The Panel's purpose was to inquire and to consider whether the basic authorities of OFPP seemed to be working effectively when they were viewed, not from the usual Government-wide perspective, but from the more parochial vantage point of defense acquisition. The Panel concluded they were, and recommended only amending a dollar threshold and the definition of technical data to conform to other recommendations being made by the Panel.

The final subchapter, 6.11, includes miscellaneous provisions that relate even less directly to defense procurement, three of which the Panel recommends be considered for repeal. The first of those is the Byrd Amendment at 31 U.S.C. § 1352, which forbids recipients of Federal grants and contracts from using appropriated funds to lobby for the award of contracts. The same substantive requirements exist elsewhere, and the Panel urges Congress, in its next review of this subject, to relieve DOD of the unproductive record keeping requirements imposed by this provision.

The Panel recommends a housekeeping action that would promptly reactivate the suspended whistle blower protection provision at 10 U.S.C. § 2409 to avoid a lapse in coverage, and finally recommends the repeal of 10 U.S.C. § 2408 regarding the debarment of persons convicted of felonies. The worthy objectives of the latter provision have become mired in administrative paperwork and could be better achieved through reliance on the established suspension and debarment process.

The Panel recommends the remainder of the statutes in this section be retained or, in one case, "no action" be taken because the provision does not primarily concern the acquisition process.

## 6.1. Fraud

### 6.1.0. Introduction

In analyzing the statutes selected for review from Title 18, the Panel was mindful that criminal law is an area which has significant effects that go far beyond DOD. Those public and private activities include other agencies of the Government, contractors, and grantees who do business with those civilian agencies and, most profoundly, millions of ordinary citizens. The Panel's review was, therefore, limited to those statutes which had only the greatest effect on defense procurement. Although eight separate sections of Title 18 were closely analyzed in this way, the Panel found no basis for recommending legislative changes. In some cases the laws were of such relatively recent vintage that there was insufficient historical evidence on which to base any recommendation for change. The Panel therefore recommends that no action be taken by the Congress on these criminal laws on the basis of their relationship to the defense procurement process.

In the area of civil fraud, the Panel primarily focused its review on one aspect of the False Claims Act. Congress passed the first false claims statute in 1863 to address widespread procurement fraud in the provisioning of the Union Army. Although it has been amended on numerous occasions since the Civil War, a key provision of this statute has been the authority it conveys upon a private citizen to bring a law suit on behalf of the Government -- a *qui tam* action. Although the law had largely fallen into disuse, it was revived in 1986 when Congress amended it in order to broaden the Government's ability to detect and prosecute fraud, including procurement fraud. The fundamental concept behind the *qui tam* amendments was to create incentives for individuals to assist the Government by identifying fraudulent practices on the part of Federal contractors, typically those involved in various forms of defense production. Consistent with previous practice, those persons could share in the recovery of damages due the Government.

There is no question that these recent amendments have had a profound and beneficial effect. Over 400 *qui tam* actions have been filed since 1986 with the Government recovering substantial damages. From its review, the Panel concluded that the fundamental basis for the amended law was sound, but compiled a number of suggestions for improving the effectiveness of the law's implementation.

## **6.2. Criminal Fraud**

### **6.2.0 Introduction**

This subchapter includes the Panel's review of the principal criminal fraud statutes that potentially affect defense procurement. These include: 18 U.S.C. §§ 286 and 287 on false claims and conspiracy to commit false claims; 18 U.S.C. § 371 on conspiring to defraud the Government; and 18 U.S.C. §§ 1341, 1343, and 1346 on mail fraud. The Panel made no recommendations on those provisions.

The Panel reviewed 18 U.S.C. § 1001, the False Statements Act, whose versatility has made it one of the primary criminal statutes used to prosecute procurement fraud cases. The Panel made no recommendations regarding that provision, nor regarding 18 U.S.C. § 1031, the section of the Major Fraud Act specifically aimed at contracts or subcontracts valued over \$1 million. The Panel felt that there had been an insufficient experience under that section to assess its effect.

The Panel reached a similar conclusion regarding the Program Fraud Civil Remedies Act at 31 U.S.C. §§ 3801-12. That Act provides an administrative procedure for pursuing false claims whose value is less than \$150,000, including formal hearing before an administrative law judge and the right to judicial review. Very few cases have been prosecuted by the Government under this alternate procedure, affording the Panel insufficient experience upon which to base any recommendations regarding its utility and effect.

## 6.2.1. 18 U.S.C. § 286

### Conspiracy to defraud the Government with respect to claims

#### 6.2.1.1. Summary of the Law

This statute makes it a crime to conspire to defraud the United States or any of its agencies or departments by obtaining or aiding to obtain payment or allowance of a false claim. The penalty for violation of this statute is \$10,000, or not more than 10 years imprisonment, or both.

#### 6.2.1.2. Background of the Law

This provision is based on a Civil War era statute,<sup>1</sup> and most recently from the Act of March 4, 1909, ch. 321 § 35, 35 Stat. 1095. The section appeared in its present form in the 1948 codification of the criminal statutes.

#### 6.2.1.3. Law in Practice

Section 286 is a "specific" conspiracy statute which requires agreement to defraud the Government through a particular device, that of submitting false claims. In other respects, the proof required is the same as for 18 U.S.C. § 371, the general statute proscribing conspiracy to defraud the Government. In 1991, the Court of Appeals for the 11th Circuit in *United States v. Lanier*<sup>2</sup> upheld a conviction of a section 8(a) small business contractor and a Small Business Administration official for violation of both sections 286 and 371. This ruling was based upon the Supreme Court decision in *Albernaz v. United States*<sup>3</sup> which found the dual conviction of defendants under two specific conspiracy statutes as not in conflict with the Double Jeopardy clause of the Constitution, notwithstanding the fact that there was evidence of only one conspiracy.

No comments were received regarding this provision.

#### 6.2.1.4. Recommendation and Justification

##### No Action

The Panel makes no recommendation concerning this statute. Although it is used to enforce criminal penalties against those who commit procurement fraud, it is a statute of general application and poses no special problems within the scope of the Panel's objectives to streamline the acquisition process.

---

<sup>1</sup>Act of March 21, 1862, ch. 67, 12 Stat. 696, 698, revised by R.S. 5438, as amended by Act of Aug 30, 1908, ch. 235, 35 Stat. 555.

<sup>2</sup>920 F.2d 887 (11th Cir. 1991).

<sup>3</sup>467 U.S. 333 (1981).

#### **6.2.1.5. Relationship to Objectives**

While this provision is beyond the immediate scope of the Panel's objectives, it promotes the integrity of defense procurement without being unduly burdensome.

## 6.2.2. 18 U.S.C. § 287

### False, fictitious or fraudulent claims

#### 6.2.2.1. Summary of the Law

This statute, commonly known as the Criminal False Claims Act, makes it a crime knowingly to present a false claim to any person or officer in the civil or military service of the United States or any of its agencies or departments.

#### 6.2.2.2. Background of the Law

Congress passed the first false claims statute, which contained both civil and criminal provisions, in 1863 as a result of Civil War era procurement scandals.<sup>1</sup> The civil and criminal provisions were separated and codified in 1878 without substantial change. The present statute is based on the Act, March 4, 1909, ch. 321 § 35, 35 Stat. 1095, and it appeared in its current form in the 1948 codification of the criminal statutes. The False Claims Amendments Act of 1986<sup>2</sup> increased penalties to require imprisonment for not more than five years and a fine of not more than \$10,000 or both, and the Department of Defense Authorization Act, 1986, increased the potential fine for violations related to defense contracts to \$1 million.<sup>3</sup>

#### 6.2.2.3. Law in Practice

Along with the False Statements Act, the False Claims Act is probably the most important criminal statute in combating procurement fraud. The False Claims Act has been used in prosecutions of many different procurement fraud schemes including defective pricing, product substitution, progress payment, and labor cost mischarging fraud.

A conviction under the act requires proof that a claim was presented against the Government; that the claim was false, fraudulent, or fictitious; and that the defendant submitted the claim knowing that it was such. Generally, it is not required that the Government prove that the defendant had the intent to defraud.<sup>4</sup> The common statutory history and subsequent judicial interpretations seem to support a common definition of "claim" for both the civil and criminal statutes.<sup>5</sup> This definition has evolved from decisional law<sup>6</sup> and in conjunction with 18 U.S.C. § 2,

<sup>1</sup>Act of March 2, 1863, ch 67, 12 Stat. 696.

<sup>2</sup>Pub. L. No 99-562, § 7, 100 Stat. 3169 (1986).

<sup>3</sup>Pub. L. No. 99-145, Title IX, § 931, 99 Stat. 699 (1985).

<sup>4</sup>*United States v. Maher*, 582 F.2d 842, (4th Cir. 1978 cert. denied 439 U.S. 1115, 1979), *United States v. Blecker*, 657 F.2d 629 (4th Cir 1981), cert. denied, 454 U.S. 1150 (1982) and *United States v. Milton*, 602 F.2d 231 (9th Cir. 1979).

<sup>5</sup>*United States v. Winchester*, 407 F. Supp. 261, 272 (D. Del. 1975). See also, W. Bruce Shirk, Bennett D. Greenberg, and William S. Dawson III, *Truth or Consequences: Expanding Civil and Criminal Liability for the Defective Pricing of Government Contracts*, 37 CATH. U. L. REV. 935, 975 (1988).

<sup>6</sup>*United States v. Cohn*, 270 U.S. 339, 70 L. Ed. 616, 46 S. Ct. 251 (1926). In *Cohn*, the Supreme Court, defining "claim" under the predecessor of section 287, stated 'a 'claim upon or against' the Government relates solely to the

the aiding and abetting statute, includes claims which are presented to the Government through an intermediary.<sup>7</sup>

Concerning the imposition of both criminal and civil penalties for false claims, the Supreme Court ruled in *United States v. Halper*<sup>8</sup> that civil penalties imposed on top of criminal penalties may in some cases be so harsh that they are violative of the Fifth Amendment's double jeopardy clause. This has been an important consideration in the recovery of damages and in the comprehensive settlement of False Claims Act cases.

No comments were received regarding this provision.

#### **6.2.2.4. Recommendation and Justification**

##### **No Action**

The Panel makes no recommendation concerning this statute. Although it is used to enforce criminal penalties against those who commit procurement fraud, it is a statute of general application and poses no special problems within the scope of the Panel's objectives to streamline the acquisition process.

#### **6.2.2.5. Relationship to Objectives**

While this provision is beyond the immediate scope of the Panel's objectives, it promotes the integrity of defense procurement without being unduly burdensome.

---

payment or approval or a claim for money or property to which a right is asserted against the Government, based upon the Government's own liability.

<sup>7</sup>*United States v. Beasley*, 550 F. 2d 261, 271, (5th Cir. 1977)

<sup>8</sup>109 S.Ct. 1842 (1989).

### 6.2.3. 18 U.S.C. § 371

## Conspiracy to commit offense or to defraud the United States

### 6.2.3.1. Summary of the Law

This statute makes it a crime for two or more persons to conspire to commit any offense against or defraud the United States or any of its agencies in any manner and for any purpose, and for one or more persons to do any act to bring about the object of the conspiracy. The penalty for commission of the offense is a fine of not more than \$10,000, or imprisonment for not more than five years, or both, except that if the object of the conspiracy is a misdemeanor, the penalty shall not exceed the maximum penalty for that misdemeanor.

### 6.2.3.2. Background of the Law

This statute is based on a statute which was enacted in 1867.<sup>1</sup> Its present form is derived from the Act of March 4, 1909, ch. 321 § 178a, 35 Stat. 1096. The statute appeared in its present form in the 1948 codification of the criminal statutes.

### 6.2.3.3. Law in Practice

Section 371 is one of the most versatile and frequently used statutes in prosecuting procurement fraud. This "general conspiracy statute" has been used to prosecute any conspiracy that "interferes with a lawful Government function."<sup>2</sup> Thus, conspiracy to commit a crime against or to defraud the United States has been charged in a wide variety of procurement fraud schemes from bid rigging<sup>3</sup> and conversion of Government property<sup>4</sup> to more general schemes to impede governmental functions such as collusion to impede the proper operation of a procurement system for awarding defense contracts.<sup>5</sup> It was repeatedly charged in the "Ill Wind" cases and resulted in convictions of corporate as well as individual defendants.<sup>6</sup>

A conviction under section 371 requires proof of an agreement between two or more persons to commit a crime against or to defraud the United States (impede lawful governmental

<sup>6</sup>*United States v. Unysts* and *United States v. Melvyn R. Paisley* (E.D. Va.).

functions) and proof of an overt act by one of the conspirators in furtherance of the conspiracy.<sup>7</sup> In 1988, the Court of Appeals for the 11th Circuit in *United States v. Lanier*<sup>8</sup> upheld a conviction of a section 8(a) small business contractor and a Small Business Administration official for violations of both 18 U.S.C. § 286 (conspiracy to defraud the Government by submitting false claims) and section 371. This ruling was based upon a 1988 Supreme Court decision which upheld the dual conviction of defendants under two specific conspiracy statutes as not in conflict with the Double Jeopardy clause of the Constitution.

No comments were received concerning this statute.

#### **6.2.3.4. Recommendation and Justification**

##### **No Action**

The Panel makes no recommendation concerning this statute. Although it is used to enforce criminal penalties against those who commit procurement fraud, it is a statute of general application and poses no special problems within the scope of the Panel's objectives to streamline the acquisition process.

#### **6.2.3.5. Relationship to Objectives**

While this provision is beyond the immediate scope of the Panel's objectives, it promotes the integrity of defense procurement without being unduly burdensome.

<sup>8</sup>920 F.2d 887 (11th Cir. 1991).

## 6.2.4. 18 U.S.C. § 1001

### Statements or entries generally

#### 6.2.4.1. Summary of the Law

The False Statements Act makes it a crime in any matter within the jurisdiction of the United States to knowingly and willfully falsify, conceal, or cover up by trick, scheme, or device a material fact, or make a false, fictitious, or fraudulent statement or representation, or use a false writing or document, knowing it to contain a false, fictitious, or fraudulent statement or entry. The penalty for commission of the offense is a fine of not more than \$10,000, or imprisonment for not more than five years, or both.

#### 6.2.4.2. Background of the Law

The false statements statute is based upon a Civil War era statute.<sup>1</sup> It was revised in 1908 by Act of May 30, 1908, ch. 235, 35 Stat. 565 and appeared in its contemporary form as the Act, March 4, 1909, ch. 321 § 35, 35 Stat. 1095.

#### 6.2.4.3. Law in Practice

The False Statements Act has been a mainstay in the prosecution of Government procurement fraud. The majority of schemes to defraud the Government probably involve some type of false statement or entry. Under section 1001, the Government has supported false statement prosecutions in such diverse types of fraud cases as defective pricing, cost mischarging, product substitution, and schemes to misappropriate Government documents. The statute has also been interpreted as a "catch all" to encompass a prohibition on false representations which might substantially impair the basic functions entrusted by law to a Federal agency.<sup>2</sup>

In order to successfully prosecute a false statement case, the Government must prove that the defendant submitted a false statement or made a false entry; that the defendant knew the statement was false; that the statement was made knowingly and willfully and with the intent to deceive (which may be established in some jurisdictions by a reckless disregard for and an avoidance of the truth); that the statement was material; and finally, that the statement concerned a matter within the jurisdiction of the United States.<sup>3</sup> The act is especially useful in prosecuting procurement fraud cases because it does not require a demand for, or payment of, money<sup>4</sup> and for that reason can support a conviction where the Government discovers the fraud before a claim has been made or paid.

<sup>4</sup>*United States v. Bedore*, 455 F. 2d 1109 (9th Cir. 1972).

No comments were received concerning this statute.

#### **6.2.4.4. Recommendation and Justification**

##### **No Action**

The Panel makes no recommendation concerning this statute. Although it is used to enforce criminal penalties against those who commit procurement fraud, it is a statute of general application and poses no special problems within the scope of the Panel's objectives to streamline the acquisition process.

#### **6.2.4.5. Relationship to Objectives**

While this provision is beyond the immediate scope of the Panel's objectives, it promotes the integrity of defense procurement without being unduly burdensome.

## **6.2.5. 18 U.S.C. § 1031**

### **Major fraud against the United States**

#### **6.2.5.1. Summary of the Law**

A section of the Major Fraud Act of 1988,<sup>1</sup> this statute makes it a crime knowingly to execute or attempt to execute a scheme with the intent to defraud the United States or to obtain money or property by false or fraudulent pretenses, representations, or promises in any procurement of property or services as a prime contractor, subcontractor, or supplier to the United States where the value of the contract or subcontract is \$1 million or more. The statute establishes maximum penalties of \$1 million or 10 years imprisonment, generally, but a fine of \$5 million for an offense if the loss to the Government or gain to the defendant is \$500,000 or more, or if the offense involves conscious or reckless risk of serious personal injury.

The Act contains a "whistle blower" provision which gives a contractor employee who suffers retaliation for assisting in a prosecution a right of civil action against the offending employer.

The Act also provides that under special circumstances, at the discretion of the Attorney General of the United States, payments not exceeding \$250,000 be made to persons furnishing information related to a possible prosecution under the Act. However, no payment may be made under this provision unless the individual is the "original source."

#### **6.2.5.2. Background of the Law**

This statute was section 2(a) of the Major Fraud Act of 1988.<sup>2</sup> It was amended in 1989 to provide for payment of rewards for information at the discretion of the Attorney General.<sup>3</sup>

#### **6.2.5.3. Law in Practice**

There are no reported cases involving prosecution under the Act, and no comments were received by the Panel.

#### **6.2.5.4. Recommendation and Justification**

##### **No Action**

This criminal statute is so new that any assessment of its effectiveness would be premature. As it generally takes many months to investigate and prosecute a case involving the

<sup>1</sup>Pub. L. No. 100-700, § 2a, 102 Stat. 4631 (1988).

<sup>2</sup>*Id.*

<sup>3</sup>Major Fraud Act Amendments of 1989, Pub. L. No. 101-123, § 3(a), 103 Stat. 759 (1989).

probable complexity of those which would be prosecuted under this Act, it is felt that this statute has not been in effect long enough to judge its merit fairly. The Panel recommends no action on that basis.

#### **6.2.5.5. Relationship to Objectives**

While this provision is beyond the immediate scope of the Panel's objectives, it promotes the integrity of defense procurement without being unduly burdensome.

## 6.2.6. 18 U.S.C. §§ 1341, 1343, and 1346

### Mail fraud statutes

#### 6.2.6.1. Summary of the Law

The mail fraud statutes make it a crime to use the mails in the case of 18 U.S.C. § 1341, or wire, radio, or television, in the case of 18 U.S.C. § 1343, having devised a scheme or artifice to defraud, to obtain money or property by false pretenses or promises. Section 1341 also makes it a crime under such circumstances to sell, loan, exchange, alter, give away, distribute, supply, furnish, or procure for unlawful use any counterfeit article to execute any scheme or artifice to defraud. Section 1346 defines "scheme or artifice to defraud" to include a scheme or artifice to deprive another of the "intangible right of honest services." The penalty for commission of the offense (excluding an offense involving a financial institution) is a fine of not more than \$1,000 or imprisonment for not more than five years, or both.

#### 6.2.6.2. Background of the Law

Section 1341 is based on an 1872 statute<sup>1</sup> which was codified in 1909.<sup>2</sup> The statute appeared in its present form in the 1940 codification of the criminal statutes and prior to that time only minor changes had been made to it. Section 1343 was added in 1952 by ch. 879 § 18(a), 66 Stat. 722 and amended in 1956 by ch. 561, 70 Stat. 523. Section 1346 was added by Pub. L. No. 100-690 Title VII § 7603, 102 Stat. 4508. Congress' intent in passing section 1346 was to override the 1987 decision of the Supreme Court which vacated the "intangible rights theory" of mail and wire fraud.<sup>3</sup>

#### 6.2.6.3. Law in Practice

The mail and wire fraud statutes have been significant and versatile tools in the prosecution of defense procurement fraud cases. Wire fraud charges were among the numerous different counts alleged in several "Ill Wind" prosecutions.<sup>4</sup> Two successful prosecutions involving mail fraud have been cited by the Department of Defense Inspector General's Office between April 1991, and March 1992.<sup>5</sup>

---

<sup>1</sup>Act of June 8, 1872, ch. 335, 17 Stat. 323. This original mail fraud statute was a new section of a recodification of the postal laws enacted to stem the practice in which the mails were used to solicit the purchase of counterfeit bills which were never delivered.

<sup>2</sup>The Act, March 4, 1909, ch. 321 § 215, 35 Stat. 1130, based on R.S. 5480, as amended by the Act, March 2, 1889, ch. 393 § 1, 25 Stat. 873, revised from the Act June 8, 1872, ch. 335, 17 Stat. 323 and repealed by the Act of March 4, 1909 ch. 321 § 341, 35 Stat. 1153.

<sup>4</sup>*United States v. United Technologies*, *United States v. Teledyne*, *United States v. Sullivan*, *United States v. Lachner*, and *United States v. Berlin*. (E.D. Va.).

<sup>5</sup>DEPARTMENT OF DEFENSE INSPECTOR GENERAL: SEMI-ANNUAL REPORT TO THE CONGRESS, Apr. 1, 1991 to Sept. 30, 1991 3-21 (discussing Wilderness Electronics) and DEPARTMENT OF DEFENSE INSPECTOR GENERAL:

No comments were received concerning these statutes.

#### **6.2.6.4. Recommendation and Justification**

##### **No Action**

The Panel makes no recommendation concerning these statutes. Although they are used to enforce criminal penalties against those who commit procurement fraud, they are statutes of general application and pose no special problems within the scope of the Panel's objectives to streamline the acquisition process.

#### **6.2.6.5. Relationship to Objectives**

While these provisions are beyond the immediate scope of the Panel's objectives, they promote the integrity of defense procurement without being unduly burdensome.

## **6.3. Civil Fraud**

### **6.3.0. Introduction**

The Panel concluded that the objectives and basic structure of the *qui tam* provision are sound, but suggests several amendments that it believes would contribute to the law's overall effectiveness. In brief, the Panel recommends limiting the authority of Government employees to bring *qui tam* suits on the basis of information acquired during the course of their duties; limiting the right of plaintiffs to sue on the basis of information generated from a Government audit or investigation, or information conveyed to the Government as part of a voluntary disclosure; and enabling the court to adjust the recoveries of culpable plaintiffs.

Addressing the subject of effective contract dispute resolution in situations where fraud allegations or investigations are pending, the Panel recommends amendments to the Contract Dispute Act that would clarify the process for obtaining or bypassing the contracting official's final decision when fraud is suspected; authorizing boards of contract appeals to transfer proceedings to the Claims Court when fraud is at issue; and to permit trial of a board matter as a counterclaim in a district court fraud action that has been brought by the Government.

Finally, the Panel recommends an amendment to the FCA that would address the law's current potential for the assessment of excessive penalties disproportionate to the damages actually suffered by the Government

## 6.3.1. 31 U.S.C. §§ 3729-3732

### False Claims Act

#### 6.3.1.1. Summary of the Law

The False Claims Act, 31 U.S.C. §§ 3729-3732 (often referred to as the Civil False Claims Act to distinguish it from its criminal counterpart at 18 U.S.C. § 287), permits the recovery of triple the amount of damages suffered by the United States and civil penalties of \$5,000 to \$10,000 per violation against any person who:<sup>1</sup>

- Knowingly presents a false or fraudulent claim (or causes it to be presented) to an officer or employee of the United States for payment or approval;
- Knowingly makes, uses or causes a false record to be made or used to get a fraudulent claim paid; or
- Conspires to defraud the Government by getting a false or fraudulent claim allowed or paid.

An action under the False Claims Act (FCA) can be brought by the United States (through the Department of Justice (DOJ)) or by a private party acting in the name of the United States.<sup>2</sup> The latter action is called a "*qui tam*" action<sup>3</sup> and the plaintiff, a "relator." Jurisdiction under the FCA resides in the Federal District Courts.<sup>4</sup>

#### 6.3.1.2. Background of the Law

Congress passed the first false claims statute in 1863 to address procurement fraud in provisioning the Union Army during the Civil War.<sup>5</sup> The 1863 Act contained both civil and criminal provisions, which were codified separately in 1878 without substantial change. As enacted, the Act provided for *qui tam* suits, which could be based on public information, with the *qui tam* relator entitled to up to 50% of any recovery.<sup>6</sup> In 1943, reading the Act literally, the Supreme Court held in *United States ex rel. Marcus v. Hess*,<sup>7</sup> that any person, even a relator whose only knowledge of the basis for the action came from information available to the Government, could bring a *qui tam* suit. Congress responded quickly by amending the Act to

---

<sup>1</sup>31 U.S.C. § 3729(a).

<sup>2</sup>31 U.S.C. § 3730(b).

<sup>3</sup>The latter had its genesis in English law enforcement. "*Qui tam pro domino rege quam pro se imposito sequitur*," the full Latin term, means "who brings the action as well for the king as for himself."

<sup>4</sup>31 U.S.C. § 3732(a).

<sup>5</sup>Act of March 2, 1863, ch. 67, 12 Stat. 696; see generally, Note, *The False Claims Act, Qui Tam Relators and the Government: Which Is the Real Party in Interest*, 43 STANFORD L. REV. 1061, 1063-68 (1991)

<sup>6</sup>*Id.* at 1066.

<sup>7</sup>317 U.S. 537 (1943). In this case, the government indicted Hess, who then entered a plea of *nolo contendere*. The relator based a *qui tam* suit on the public indictment, plea and subsequent fine in the criminal case.

require a relator to contribute new information, not known to the public, as a condition to bringing suit.<sup>8</sup> The 1943 amendment also cut the maximum amount a relator could obtain to 25% of any recovery and provided for the first time that the Government could take over the *qui tam* action.<sup>9</sup> If the Government took over the suit, moreover, the *qui tam* relator got nothing.<sup>10</sup>

Few *qui tam* actions were brought until the *qui tam* provisions of the FCA were substantially modified in 1986.<sup>11</sup> The 1986 amendments were aimed in large part at reducing procurement fraud through the increased risk of detection and financial loss for accounting fraud and intentional shipment of nonconforming goods. The legislative history of the 1986 amendments singled out a 1981 GAO study, which had concluded:

For those who are caught committing fraud, the chances of being prosecuted and eventually going to jail are slim . . . The sad truth is that crime against the Government often *does* pay.<sup>12</sup>

Accordingly, in the 1986 amendments, Congress sought to combat fraud by increasing the incentives to those who had direct knowledge of it -- typically, the employee of the Federal contractor who would be induced by the potential rewards of the *qui tam* suit into becoming a relator -- to make that knowledge public.<sup>13</sup> The 1986 amendments were intended by Congress to broaden the FCA by overturning restrictive judicial interpretations of the Act. The amendments:

- Increased damages available under the Act from double to treble the amount of actual damages and increased the penalty assessed for each false claim from \$2,000 to a range of \$5,000 to \$10,000;
- Amended § 3729(a)(1) to clarify that specific intent to defraud was not an element that had to be proved against the defendant;
- Modified the *qui tam* provisions to ensure that a relator got a substantial percentage of any recovery even if the Government intervened, thereby increasing the incentive to private citizens to detect and report fraud, particularly procurement fraud;<sup>14</sup> and

---

<sup>8</sup>See Note *supra* note 5, at 1066.

<sup>9</sup>*Id.*

<sup>10</sup>*Id.*

<sup>11</sup>Pub. L. 99-562, §§ 3,4 100 Stat. 3154 (1986). The FCA was recodified in 1982 as part of an overall reorganization of Title 31, see Pub. L. 97-258, 96 Stat. 978 (1982), and was amended in 1988 with the addition of what is now 31 U.S.C. § 3730(d)(3), see Pub. L. 100-700, § 9, 102 Stat. 4638 (1988).

<sup>12</sup>S. REP. NO. 345, 99th Cong., 2d Sess. 3 (1986), quoting a GAO Report entitled, *Fraud in Government Programs: How Extensive is it? How Can it be Controlled?*, at cover (1981), reprinted in 1986 U.S.C.C.A.N. 5266, 5268.

<sup>13</sup>See, e.g., S. REP. NO. 345, at 2, 1986 U.S.C.C.A.N. 5267.

<sup>14</sup>Prior to the amendment, the relator could recover up to 25% of a judgment, but only if the Government did not intervene. The 1986 amendments entitled the relator to 25% or 30% of a recovery if the Government did not intervene and 15% to 25% of the recovery otherwise (with reduction to 10% where the action was based in substantial part on public information).

- Lengthened the period during which suit could be brought to the latter of 6 years after the violation or 3 years after the facts were known or should have been known by the United States, but no longer than 10 years after the violation.

### 6.3.1.3. Law in Practice

The Government has a clear interest in deterring fraud and recovering taxpayer dollars improperly obtained by contractors. The FCA is one important tool in furthering this interest.<sup>15</sup> However, the Government -- and particularly DOD -- also has an interest in overseeing the administration of the FCA by both DOJ and *qui tam* relators to ensure that the Act will in operation further the sound procurement practices fundamental to the buyer-seller relationship and ensure that the stringent penalty structure of the Act does not cause damage to the defense technology and industrial base. Deterrence and punishment of fraud are important goals, but they must be carefully balanced against the need to encourage sound and efficient acquisition practices.

The FCA has been highly effective as a tool for recovering monetary damages for fraud. Civil actions by DOJ brought in the last decade against the "top 100" defense contractors have netted \$630 million in damage recoveries.<sup>16</sup> In addition, the numbers of *qui tam* cases filed have increased rapidly since the 1986 FCA amendments, from 33 in FY 1987 to 90 in FY 1989.<sup>17</sup> During a seven-month period ending April 1, 1992, 57 more cases were filed,<sup>18</sup> bringing to 407 the number of *qui tam* actions filed since the 1986 amendments.<sup>19</sup> As of the date of this report, 75 of these cases were still under investigation; 150 had been dismissed or were not being pursued; and 66 had been taken over by DOJ. Of the cases assumed by DOJ, 37 had been settled or judgments obtained, with a total recovery of \$147 million (representing 13.5% of DOJ's total fraud recoveries during this period). In these cases, the total distribution to relators was \$14.5 million.

In a 1991 study, Professor William E. Kovacic of George Mason University suggested that the efficiency of the *qui tam* mechanism was attributable to three basic factors: its unique ability to draw upon first-hand information in uncovering fraud; its augmentation of Government enforcement through the use of private citizens; and its encouragement of oversight efforts by

---

<sup>15</sup>The FCA is, of course, only one tool. In addition to the FCA, criminal statutes prohibit fraud against the government (e.g., 18 U.S.C. §§ 286, 287, 301, 1001) and, under any of these, the Government may be paid a fine of up to twice the amount of the gain to a criminal defendant or twice the amount of the Government's loss. See 18 U.S.C. § 3571(d). In addition, the Government also has a common law civil claim for fraud, which includes the right to obtain punitive damages. See, e.g., *United States v. Rockwell International Corp.*, 795 F. Supp. 1131 (N.D. Ga. 1992)

<sup>16</sup>See *At a Glance: Defense Procurement Fraud: Information and Plea Agreements and Settlements*, 20 CORP. CRIME REPORTER, App. II at 11 (October 12, 1992).

<sup>17</sup>See THE WASHINGTON POST, March 19, 1990, at F-1.

<sup>18</sup>See 56 FCR 267 (8/19/91).

<sup>19</sup>Statement of Stuart M. Gerson, Assistant Attorney General, Civil Division, before the Subcom. on Civil and Constitutional Rights, Comm. on the Judiciary, U.S. House of Representatives, April 1, 1992, at 19 [hereafter "Gerson Statement"]. The DOJ reports that 30 of the 407 cases "were filed by the same entity and are related."

procurement agencies.<sup>20</sup> However, he also pointed to potential problem areas with the FCA. Possible adverse management impacts upon defense contractors included: interference by disgruntled employees with legitimate management choices; other deliberate or accidental misconstruing of benign conduct; and deliberate delays by contractor employees in the identification of problem areas in order to increase subsequent *qui tam* awards. Because of the potential for *qui tam* actions, corporate information-sharing presented a heightened risk, which tended to restrict information-sharing not only within the contractor's organization, but also externally to suppliers and Government agencies. Sharing of information with the Government has become especially risky in light of the standing granted public employees to file independent *qui tam* actions, a standing which created a clear potential for significant conflicts of interest.<sup>21</sup> Finally, the Kovacic study noted that the FCA confronted "firms with distinctive costs that they do not incur in commercial markets," inhibiting entry into the Federal marketplace and possibly encouraging the exit of those already there.<sup>22</sup>

A Defense Systems Management College study of why firms are leaving the defense market also identified the highly adversarial climate between contractors and the DOD -- and the general lack of trust between these parties -- evidenced by the increased use of criminal and civil fraud as a regulatory mechanism, as a factor causing firms to leave the defense market.<sup>23</sup> Similarly, a defense industrial base study performed by the Center for Strategic and International Studies reported that one of the principal reasons firms refuse to do business with DOD is fear of crushing liability "for reporting errors or other perceived legal or regulatory abuses."<sup>24</sup>

Concern that the FCA as currently administered may impair other important contract administration and industrial base goals caused the Panel to focus its attention on three aspects of this statute:

- the functioning of *qui tam* procedures;
- the relation of the FCA to the Contract Disputes Act (CDA) process; and
- the level of penalties potentially assessable in FCA cases.

The Panel approached its review of these topics with caution and a keen appreciation that laws such as the FCA were enacted as protection against a universe of conduct extending far beyond defense procurement. The FCA is a law of general application that is routinely used throughout the Government in a host of non-defense areas. For example, the Act's *qui tam* procedures, which often attract notoriety when defense contractors are involved, are apparently being applied in significant numbers to health care programs and related fields. While the three topics outlined above clearly touch the defense acquisition process, the Panel is sensitive that its

review springs from a vantage point that is necessarily limited and, therefore, narrow. Consistent with its congressional mandate, the Panel has outlined on the following pages the rationale for several amendments that it believes would promote the best interests of DOD as those interests are affected by this statute. It does so in the hope that those recommendations will be balanced against larger policy objectives to ensure that the utility of this law is not adversely affected in non-defense situations.

### A. *Qui Tam* Procedures

The FCA creates a complex procedure for the initiation of a *qui tam* action. The *qui tam* plaintiff must bring the action in the name of the Government. The complaint, along with "written disclosure of substantially all material evidence and information the person possesses," must be served on the Government, which has at least 60 days to decide whether or not to take over the action.<sup>25</sup> A copy of the complaint must be filed *in camera* with the court and remain under seal for at least 60 days. The complaint may not be served on the defendant until the court so orders. In that event, the complaint is unsealed and served upon the defendant, who is given 20 days to respond.<sup>26</sup>

If the Government chooses to proceed with the action, it has the primary responsibility for prosecuting the action, although the *qui tam* plaintiff has the right to continue as a party.<sup>27</sup> The *qui tam* plaintiff still retains the right to receive from 15% to 25% of the recovery from the action or settlement of the claim.<sup>28</sup> If the Government declines to take over the action, "the person bringing the action shall have the right to conduct the action," and no person other than the Government may intervene or bring a related action based on the same underlying facts.<sup>29</sup> Moreover, if the Government declines to take over, the *qui tam* plaintiff is entitled to receive up to 30% of the proceeds recovered, along with attorneys' fees, expenses, and costs.<sup>30</sup>

There are some limits on who can be a *qui tam* plaintiff. Originally, in *United States ex. rel. Marcus v. Hess*, the FCA was interpreted to permit suit to be brought even by persons who learned of the essential allegations from a public source, including newspapers or Government documents. The 1986 Amendments narrowed the class of *qui tam* plaintiffs by barring actions based on information disclosed in suits to which the Government was already a party<sup>31</sup> or on information publicly disclosed in the course of Government hearings, audits or reports (unless the relator was the original source of the information disclosed).<sup>32</sup>

---

<sup>25</sup>The government is entitled to extensions of time in which to make its decision. See 31 U.S.C. § 3730(b)(2).

<sup>26</sup>*Id.* §§ 3730(b)(1), (b)(2), (b)(3).

<sup>27</sup>*Id.* §§ 3730(b)(4), (c)(1).

<sup>28</sup>*Id.* § 3730(d)(1).

<sup>29</sup>*Id.* §§ 3730(b)(4), (b)(5).

<sup>30</sup>*Id.* § 3730(d)(2).

<sup>31</sup>*Id.* §§ 3730(e)(3)-(e)(4).

<sup>32</sup>*Id.* § 3730(e)(4).

Government,<sup>33</sup> the bar<sup>34</sup> and industry<sup>35</sup> raised a number of concerns about *qui tam* practice, including the following: <sup>36</sup>

- Limiting actions by Government employees;
- Tightening the prohibition against certain "parasitic" actions (i.e., those based on information generated by others);
- Tightening limitations on compensation to relators who had themselves acted culpably as to the events supporting an FCA action;
- Tightening requirements on information to be provided by relators to the Government upon filing of a *qui tam* suit; and
- Placing a ceiling on total compensation to a relator.

#### **Limiting actions by Government employees**

At the present time, Government employees from the President to a contract auditor can file a *qui tam* action based on official knowledge, so long as that knowledge qualifies as an "original source." That broad interpretation of FCA has, however, been the subject of controversy. At the moment, there is a split of authorities as to whether the FCA should in fact be construed to permit a Government employee to initiate a *qui tam* action based on knowledge obtained from his or her Government employment. In *United States ex rel. Leblanc v. Raytheon Co.*, 913 F.2d 17 (1990), the First Circuit affirmed a dismissal of a *qui tam* action, ruling that LeBlanc did not have independent knowledge of the information underlying the claim as required by the Section 3730 (e)(4). In *United States ex rel. Williams v. NEC Corp.*, 931 F.2d 1493 (1991), on the other hand, the Eleventh Circuit held that a Government employee was not barred from bringing a *qui tam* action based on information he acquired in the course of his Government employment.

This issue has been a principal focus of the DOJ. As stated by Assistant Attorney General Stuart Gerson:

We simply must preclude: inherent conflicts of interest among federal employees that the potential of large *qui tam* rewards would create; the incentive for Government employees

---

<sup>33</sup>The Panel solicited comments from a wide variety of Government agencies, which responded both formally and informally. The Panel received especially informative letters from the Department of Justice, dated September 25, 1992, the Inspector General of the Department of Defense, dated October 15, 1992, the Department of the Air Force dated September 29, 1992, and NASA dated September 22, 1992.

<sup>34</sup>See letters from the American Bar Association's Section of Public Contract Law ("ABA") dated July 2, 1990, March 17, 1992, April 8, 1992 and July 22, 1992.

<sup>35</sup>See letters from (i) the Council of Defense and Space Industry Associations ("CODSIA") dated August 24 and September 10, 1992 and related communications from General Dynamics and Sundstrand Corporation dated July 22 and September 28, 1992, respectively; (ii) Chamber of Commerce dated September 4, 1992; (iii) FMC Corporation dated September 28, 1992; (iv) Hughes Corporation dated September 24, 1992; (v) Litton Industries dated June 12, 1992 (enclosing an article entitled "False Claims Act Erosion of Effective Contract Dispute Resolution:") and September 23, 1992.

<sup>36</sup>The Panel pursuant to notices met on three occasions with interested persons to receive comments on standards of conduct. On each occasion, the False Claims Act and its *qui tam* provisions were principal topics of discussion.

assigned to investigations to understate the significance of the cases that they are working on in the hope that the Government will not follow up, leaving the way open for a *qui tam* case; morale problems in Government service among employees assigned to non-fraud investigations or smaller dollar value investigations; and the misallocation of Government resources through individual decisions by Government employees to spend official time on cases they hope could lead to potential personal recoveries rather than on other assigned duties.

We also must forestall any incentive for Government employees to misappropriate Government audits, investigative reports, and other documents that could provide the basis for personal *qui tam* suit before the case has been referred to the Department of Justice and before a considered decision can be made about whether the case warrants criminal, civil or administrative action.

These are not speculative concerns. . . .<sup>37</sup>

DOJ recommends that a person not be allowed to initiate a *qui tam* action based in any part upon information obtained from federal Government employment. This recommendation was carried over into S.2785, 102d Cong., 2d Sess. (introduced March 26, 1992), and is consistent with a recommendation by CODSIA on this point.<sup>38</sup>

#### **Tightening The Prohibition Against Certain Actions Based On Public Information**

As summarized above, the FCA (31 U.S.C. § 3730(e)(3) and (4)) prohibits some suits which result from publicly available information. DOJ noted that these provisions, which it referred to as a "parasitic suit bar," are in some cases inadequate, stating that:

... *qui tam* suits should not be permitted while there is an open Department of Justice or Inspector General investigation into the allegations.<sup>39</sup>

As further explained by the General Counsel of Hughes Corporation:

[When there is an open Government investigation] the relator brings nothing to these suits and should not be authorized -- or encouraged, as is the case with current law -- to dictate allocation

---

<sup>37</sup>Gerson Statement at 9.

<sup>38</sup>See CODSIA letter dated August 24, 1992. The House Bill, H.R. 4563, 102d Cong., 2nd Sess., proposed a far less restrictive provision.

<sup>39</sup>Gerson Statement at 13-15.

of Government resources and litigation policy in such circumstances.<sup>40</sup>

### **Barring Actions Based On Voluntary Disclosures**

The DOD and DOJ have encouraged the development of an ethical culture within defense contractors, including voluntary compliance programs (e.g., DCAA's Contractor Risk Assessment Guide) and voluntary disclosures of situations in which there is reason to believe that a violation of law, regulation, or contract has occurred. Industry has responded positively to these initiatives by, among other things, promulgating its own Defense Industry Initiatives at the time of the Packard Commission Report. It has subsequently adopted enhanced compliance and ethics programs as well as voluntarily making a significant number of formal and informal disclosures.

FCA actions generally, and *qui tam* actions particularly, could undermine the objectives of such voluntary disclosure programs, if such actions can be based on information derived from the disclosure. In this regard, the DOD Inspector General commented:

We support the proposal to create a jurisdictional bar to *qui tam* lawsuits based on information obtained from or as a consequence of a submittal by a contractor for purposes of qualifying under or fulfilling a procuring agency's voluntary disclosure program. In our opinion, it would encourage more participation in the program and save participants from being exposed to expensive and time-consuming litigation.<sup>41</sup>

CODSIA has made a similar recommendation,<sup>42</sup> and other commenters have expressed a concern that the threat of FCA actions on matters which are disclosed voluntarily is a serious deterrent to voluntary disclosures.

### **Tightening Restrictions On Compensation To Culpable *Qui tam* Relators**

The False Claims Act allows a court to reduce a relator's compensation, if he or she planned or initiated the fraud.<sup>43</sup> This, however, leaves unaffected many others who may have been culpable -- those who, although not conceivers of a scheme, were active participants. DOJ has testified to Congress that

... We have several cases where the fraud is long-standing and the private person bringing the suit, while perhaps not planning or initiating the fraud, actively furthered it or delayed bringing it to the

---

<sup>40</sup>Letter dated September 24, 1992, from John J. Higgins, Senior Vice President and General Counsel, Hughes Corporation, to Col. Susan McNeill, DSMC.

<sup>41</sup>Letter dated October 15, 1992, from Derek J. Vander Schaaf to Col. Susan McNeill, DSMC. DOJ also supports this position. See Gerson Statement at 15.

<sup>43</sup>31 U.S.C. § 3730(d)(3).

Government's attention, which had the effect of increasing the Government's loss and his potential *qui tam* reward.<sup>44</sup>

### **Tightening Requirements On Information To Be Provided By Relators**

As noted above, the FCA requires a *qui tam* relator to provide to DOJ information supporting his or her complaint at the time the complaint is first filed with the Court. However, in actual practice, it appears that a number of relators have filed largely "boilerplate" complaints and have not been able to substantiate the allegations made in the complaint in the information provided to DOJ. In testimony to Congress, DOJ has stated:

An uncomfortable number of the *qui tam* suits filed present no evidence, no information based on personal knowledge, or are "kitchen sink" complaints containing every conceivable broad allegation without any specific evidence whatsoever. In these cases, where no new evidence is presented, none of the policy justifications for diverting large amounts of money that would otherwise go to the Treasury are present.<sup>45</sup>

### **Limiting Compensation To Relators**

DOJ has asked Congress to cap the compensation payable to a relator:

While we are fully aware that certain commendable persons risk their incomes and professional lives to bring fraud to our attention, we continue to believe that there is some absolute amount of recovery, be it \$1 million or 5 million, beyond which no additional people will be encouraged to come forward. As the universe of filed cases increases, such caps may be appropriate.

### **B. Relationship of Civil Fraud Actions to the Contract Disputes Act**

The Contract Disputes Act (CDA) was enacted November 1, 1978,<sup>46</sup> implementing recommendations made by the Commission on Government Procurement in December 1972. These recommendations were reflected in Senate Report 95-1118, 95th Cong., 2d Sess. (August 15, 1978), which accompanied the CDA. The Report described the Act's purpose as follows:<sup>47</sup>

The Contract Disputes Act of 1978 provides a fair, balanced, and comprehensive statutory system of legal and administrative

---

<sup>44</sup>Gerson Statement at 17-18.

<sup>45</sup>*Id.* at 18-19.

<sup>46</sup>Pub. L. 95-563.

<sup>47</sup>At 1; see also H.R. REP. NO. 1556, 95th Cong., 2d Sess. (9/8/78), which accompanied the CDA explained its purpose as follows (p. 5): "... to provide for a fair and balanced system of administrative and judicial procedures for the settlement of claims and disputes relating to Government contracts."

remedies in resolving Government contract claims. The act's provisions help to induce resolution of more contract disputes by negotiation prior to litigation; equalize the bargaining power of the parties when a dispute exists; provide alternate forums suitable to handle the different types of disputes; and ensure fair and equitable treatment to contractors and Government agencies.

For contractor claims against the Government, the CDA process is initiated by the filing of a written claim with the contracting officer<sup>48</sup> and a final decision on that claim. If the claim is not allowed, the contractor has a right to appeal the contracting officer's final decision to the Court of Federal Claims (Claims Court)<sup>49</sup> or a board of contract appeals<sup>50</sup> for a de novo determination. CDA § 605(a) concludes with the following sentence:

... This section shall not authorize any agency head to settle, compromise, pay or otherwise adjust any claim involving fraud.

This provision has been interpreted by some Government agencies to preclude final decisions by a contracting officer if fraud is suspected or charged. Many private sector sources, including the American Bar Association (ABA) and CODSIA have expressed concern about the impact on processes under the CDA<sup>51</sup> when fraud is suspected or alleged.

Under the CDA, boards of contract appeals and the Claims Court have primary and exclusive jurisdiction over appeals of final contracting officer decisions on contract claims, with further appeal possible to the United States Court of Appeals for the Federal Circuit. This structure was intended to provide uniform, fair, and comparatively prompt resolution of such disputes. On the other hand, the district courts have jurisdiction over civil and criminal fraud actions. The Claims Court may hear fraud allegations, but only as counterclaims brought by the United States against an action initiated by a contractor.

Information publicly available on recent FCA cases indicates that many of them center on disputed interpretations or applications of procurement laws, regulations, and contract provisions. But for the allegations of fraud, many of these cases would present contract disputes for which a board of contract appeals or the Claims Court would have exclusive jurisdiction under the CDA.

This creates a tension between the dispute rights of the contractor and the interest of the United States (or a relator) in prosecuting fraud. As stated in a letter from the General Counsel of Litton Industries, Inc.:

From a Government contractor's standpoint, one of the primary concerns I have had over the years is the apparent erosion of the

<sup>48</sup>41 U.S.C. § 605(c) contemplates that claims over \$50,000 will be certified.

<sup>49</sup>41 U.S.C. § 609(a) as amended to substitute the United States Claims Court for its predecessor, the United States Court of Claims.

<sup>50</sup>41 U.S.C. § 606.

<sup>51</sup>41 U.S.C. §§ 601 *et seq.*

effectiveness of the disputes mechanism provided for in Government contracts through the CDA. Under the present state of the law, a mere allegation by either the Government or its *qui tam* relator that the contract dispute involves fraud is enough to remove the dispute resolution from the contractually bargained for disputes resolution forum and place that dispute before a Federal District Court. This action is contrary to the expectation of the parties, which is that all contract disputes and all contract claims will be resolved through specialized fora.<sup>52</sup>

Two proposals for reconciling the tension between the CDA and the FCA were considered by the Panel:<sup>53</sup>

- **Permit transfer of cases from the boards of contract appeals to the claims court when fraud is alleged.** The Claims Court has jurisdiction over fraud counterclaims, while the boards of contract appeals do not. As a result, if fraud is suspected in a dispute pending in the Claims Court under the CDA, the allegations of fraud can be resolved by the Claims Court in a single proceeding. On the other hand, where fraud is suspected in a board proceeding, either that proceeding must be stayed pending resolution of the fraud issue in a district court or the fraud issue can be resolved in a three-step procedure. The board first renders judgment on the contract claim, the Government then refuses to pay any adverse judgment, and the contractor is forced to sue on the judgment in the Claims Court – at which point fraud counterclaims are alleged and resolved.<sup>54</sup> A number of commenters suggested that the CDA be amended to permit boards of contract appeals to transfer pending disputes to the Claims Court to allow all issues relating to the claim and to the alleged fraud to be resolved in one proceeding.
- **Permit the CDA process to go forward without a contracting officer's final decision if the contracting officer lacks authority to issue a decision because of a pending allegation of fraud.** On July 2, 1990, the ABA's Section of Public Contract Law wrote to the FAR Secretariat about concerns over "the jurisdictional overlap of the Contract

---

<sup>52</sup>Letter of September 23, 1992, from Norman L. Roberts to Robert B. Wallick, Steptoe & Johnson. A similar statement was made by the General Counsel of Hughes Corporation. See letter of September 24, 1992, from John J. Higgins to Col. Susan McNeill, DSMC.

<sup>53</sup>The Panel also considered the suggestion that the boards of contract appeals be authorized by statute to receive from the district courts and resolve questions concerning government contract law. Commenters suggested that situations arise in fraud actions in the district courts when the expertise of a board of contract appeals or of the Claims Court could materially advance the conclusion of the fraud action. For example, in *United States v. General Dynamics Corporation*, No. CR 85-1 123-FFF (C. D. Cal.), an issue arose as to the meaning of the contract document and the District Court attempted to refer questions concerning the meaning of that document to the ASBCA. The ASBCA, however, concluded it did not have authority under the CDA or under its charter to act on such a reference. See *Appeal of General Dynamics Corp.*, 87-1 BCA ¶ 19,607. Creation of a certified question procedure would appear to be possible without statutory amendment by changing the charter of a board. Following review, the Panel did not adopt the suggestion to create such jurisdiction by statute.

<sup>54</sup>In the Claims Court, the Government may also seek forfeiture of the contract claim under 28 U.S.C. § 2514

Disputes Act and the False Claims Act...,<sup>55</sup> explaining that it perceived a very disturbing trend.<sup>56</sup>

...when suspicions or allegations [of fraud] by the Government or a *qui tam* relator are grounded in disputed interpretations or applications of acquisition statutes, regulations, contract provisions, custom and practice or course of dealing between the contracting parties. Many of the contract disputes involving these issues which could be resolved under the CDA<sup>[57]</sup> are being framed as FCA issues and being decided by judges and juries in U.S. District Courts. The result will be a very damaging loss of predictability in the procurement programs<sup>[58]</sup> plus loss of the benefit of the expertise which exists in the CDA resolution and adjudication process.

On August 22, 1990, the Civil Division of DOJ responded to and sharply differed with that view. Many of these points were repeated in a letter to the Panel in which DOJ reiterated its opposition to any proposal which made stays mandatory rather than discretionary because this would result in "fragmented litigation over fraud and non-fraud contract disputes."<sup>59</sup> The DOJ argued for its own legislative proposal, which had the objective of consolidating fraud and non-fraud claims in a single forum. That proposal would:

(1) require mandatory stays of board proceedings during the pendency of a related fraud investigation upon application by the Attorney General; and (2) upon the Government's request, require the Claims Court to remove any contract dispute from the board to that Court so that the fraud and contract issues may be litigated in one forum.<sup>60</sup>

---

<sup>55</sup>The ABA's concerns were repeated in 1992 letters to the Panel, and are reflected in CODSIA's comments. During hearings on February 5 and 6, 1986 on False Claims Act Amendments before the Subcommittee on Administrative Law and Governmental Relations of the Committee on the Judiciary, House of Representatives, 99th Cong., 2nd Sess., the potential overlap between the CDA and the FCA was addressed in a discussion by Congressman Kindness and Asst. Atty General Willard, at 161-162.

<sup>56</sup>ABA letter, at 1-2.

<sup>57</sup>The ABA letter, in a footnote 1, explained at this point that "The Contract Disputes Act is a remedy available to prime contractors (and prime contractors acting for subcontractors). The False Claims Act may be invoked against persons with whom the government does not have privity of contract. In those situations, there would be no jurisdictional overlap between the two Acts."

<sup>58</sup>In a footnote 2 the ABA letter further explained that, "Often a *qui tam* action challenges an interpretation or practice that has been established for a considerable period and is continuing. Moreover, the same interpretation or practice may be broadly followed among other contractors. Loss of predictability -- and the uncertainties of a protracted *qui tam* litigation -- is harmful to the procurement process and its contractors under those circumstances."

<sup>59</sup>Letter from Stuart E. Schiffer, Deputy Assistant Attorney General, U.S. Dep't of Justice, to Donald M. Freedman, Executive Secretary, Acquisition Law Advisory Panel, September 25, 1992, at 3.

<sup>60</sup>*Id.*, at 4.

### C. The potential for excessive FCA penalties

Under 31 U.S.C. § 3729(a), a person who submits a false claim

... is liable to the United States Government for a civil penalty of not less than \$5,000 and not more than \$10,000, plus 3 times the amount of damages which the Government sustains because of the act of that person, except that if the court finds that-

(A) the person committing the violation of this subsection furnished officials of the United States responsible for investigating false claims violations with all information known to such person about the violation within 30 days...;

(B) such person fully cooperated...; and

(C) at the time such person furnished the United States with the information ..., no criminal prosecution, civil action, or administrative action had commenced,

the court may assess not less than 2 times the amount of damages. .

FCA plaintiffs frequently argue that a \$10,000 penalty is triggered by virtually every incorrect document made by a defendant, whether or not the document was ever submitted to the Government as part of a payment request -- for example: in the case of incorrect charging for direct labor costs, for each time card; or in the case of an incorrect overhead rate, for each invoice, billing, or proposal which incorporates the rate; or for an incorrect application of a specification requirement, to each and every internal or external document premised upon that interpretation. Such interpretations can potentially result in unconscionable penalty assessments -- in the hundreds of millions and even the billions of dollars. These penalties can be disproportionate to any possible harm involved and can threaten a contractor's survival.

#### 6.1.4. Recommendations and Justification

##### *Qui tam* Procedures

##### I

##### **Prohibit *Qui tam* Suits Based On Information Obtained by the Relator in the Course or Scope of Official Government Duties or Employment**

The Panel agrees with the concerns expressed by DOJ, the Inspector General of DOD, and industry that permitting *qui tam* suits by present or former Government employees undermines the proper administration of the law. Additionally, it may contribute to potential conflicts of interest between Government employees and the interest of a Government agency in carrying out its

programs and responsibilities. Accordingly, the Panel recommends an amendment to 31 U.S.C. § 3730(e) to add a new subsection (5), as follows:<sup>61</sup>

(5) No court shall have jurisdiction over an action under subsection (b) that is based, in whole or in part, upon information obtained in the performance of Federal Government employment.

## II

### Tighten The Prohibition Against Parasitic Suits

The Panel found persuasive the argument of DOJ and various industry commenters that *qui tam* suits should not be permitted where they are founded on information generated during the course of an ongoing Government audit or investigation. In such cases, the *qui tam* relator adds nothing of value to the enforcement of federal law and complicates the process of litigation. In addition, the Panel believes that relators claiming independent knowledge of events that have been the subject of an audit, investigation, hearing, litigation, or report, should be required to make full disclosure to the Government of substantially all information supporting a proposed *qui tam* action as a condition of permitting suit. This requirement, in substantially the same language as § 3730(b)(2), will ensure that the relator actually is an original source. Accordingly, the Panel recommends an amendment to 31 U.S.C. § 3730(e)(4) as follows:

(4)(A) No court shall have jurisdiction over an action under this section based upon (i) the ~~public~~-disclosure of allegations or transactions in a criminal, civil, or administrative hearing, in a congressional, administrative, or Government [*sic*] Accounting Office report, hearing, audit, or investigation, or from the news media, (ii) any document created by the federal Government, (iii) facts in the possession of the Department of Justice, or (iv) matters which are or have been the subject of any investigation or audit by or on behalf of the federal Government, unless the action is brought by the Attorney General or the person bringing the action is an original source of the information.

(B) For purposes of this paragraph, "original source" means an individual who has direct and independent knowledge of the information on which material allegations to be made in any action brought under this section are based and has voluntarily provided the substantially all evidence and information supporting such allegations to the Government before filing an action under this section which is based on such allegations ~~the information~~.

---

<sup>61</sup>The Department of Justice suggested that it might be desirable to provide an award "to encourage federal employees who learn of fraud in the course of their employment to live up to their responsibilities to report fraud". Gerson Statement at 11. The Panel concluded that this objective could be achieved using existing award systems.

### III

#### Prohibit *Qui tam* Actions Based On Voluntary Disclosures

The Panel believes that permitting *qui tam* actions to be based on information contained in a voluntary disclosure or information generated during the process of preparing such a disclosure should not be allowed as the basis for a *quit tam* action. Any other rule would seriously undermine the effectiveness of voluntary disclosure programs that have proven to be an effective tool for promoting contractor self-governance. Accordingly, the Panel recommends amending 31 U.S.C. § 3730(e) to add a new subsection (6), as follows:

(6) No court shall have jurisdiction over an action under subsection (b) of this section that is based in material part upon information obtained from or as a consequence of the preparation or submittal by a contractor for purposes of a voluntary disclosure under a Government voluntary disclosure program.

### IV

#### Limiting Compensation To Culpable Defendants

The FCA does not today permit a court to reduce the compensation due a relator who has played an important role in a fraud, but was not an originator of the fraud. The Panel believes that the Court should have discretion in setting fees to consider the culpability of the relator and reduce the fee if the court finds the relator to be seeking to profit by his or her own wrongdoing. Accordingly, the Panel recommends an amendment to 31 U.S.C. § 3730(d) by adding a new subsection (5), as follows:

(5) A court may reduce or eliminate the compensation which would otherwise be due a relator under this subsection (d) if the relator actively furthered the violations which are the subject of an action brought under subsection (b). A court may reduce or eliminate compensation which would otherwise be due a relator under this subsection (d) if the relator has failed promptly to bring violations to the Government's attention after the relator was aware of facts establishing such violations.

#### Other

The Panel does not believe that a case has been made for an absolute limit on the compensation due a relator. Under the FCA, the maximum amount that can be paid to a relator is 30% of the judgment.<sup>62</sup> While such sums may be large absolutely, they are not out of line with contingent fees typically charged in other complex cases, such as civil antitrust or security fraud actions. Moreover, as the DOJ's own statistics show, fees awarded to relators to date have been

<sup>62</sup>See 31 U.S.C. § 3730(d).

approximately 10% of amounts recovered. In the absence of repeated specific instances of abuse, no change seems warranted at this time.

Similarly, the Panel does not believe that statutory amendment to combat frivolous suits -- beyond that stated under Recommendation II above -- is required. Rule 9(b) of the Federal Rules of Civil Procedure requires allegations sounding in fraud to be stated with particularity. Where a "kitchen sink" complaint has been filed, it should be subject to dismissal under Rule 9. Similarly, DOJ has the authority to dismiss a frivolous action under 31 U.S.C. § 3730(c)(2)(A).<sup>63</sup> In addition, under the proposed amendment to § 3730(e)(4), a suit may also be dismissed if a relator has failed to substantiate that he or she is an "original source" by providing evidence and information supporting the material allegations of the proposed suit. If a complaint is "boilerplate" because it is in fact based only on the hope that an ongoing investigation will produce information from which the relator can profit, the proposed language should raise a bar.

### **Contract Disputes Act Amendments**

#### **V**

#### **Permit Disputes To Be Processed In The Absence Of A Contracting Officer's Final Decision Within The Discretion Of A Board Or The Claims Court**

Although the Panel heard conflicting views on whether boards of contract appeals should be allowed to go forward while allegations of fraud have been made, the Panel believes that a fundamental purpose of the CDA -- to provide a fair and balanced process for resolving disputes -- should not be overturned lightly.

First, the CDA dispute system is an integral part of every DOD contract. As discussed above, the CDA was intended to "equalize the bargaining power of the parties" to a Government contract and to "ensure fair and equitable treatment to contractors" as well as Government agencies.<sup>64</sup> Accordingly, absent compelling circumstances, contractors are entitled to the benefits of that Act. Second, like other citizens, the overwhelming majority of Government and contractor personnel and organizations are honest, competent, and well intentioned, and systems should not be designed on the presumption that contractors are otherwise. Third, the Panel was informed that one of the principal barriers to commercial-military integration is the fear among civilian companies of incurring enormous penalties -- or at least enormous attorneys fees -- for honest mistakes in performing a Government contract. Stripping companies of normal contractual remedies upon the hint of fraud would merely reinforce that fear. While suspicions of fraud may ultimately be cleared, that event may not occur until after a considerable passage of time, with consequent financial and other penalties to the contractor. On the other hand, the punishment of fraud is obviously important to the overall integrity of DOD procurement.

Under current law, when a matter is pending in a board of contract appeals (or the Claims Court) on appeal from a contracting officer's decision, the question of whether to proceed with

<sup>63</sup>See, e.g., *Julliano v. Federal Asset Disposition Ass'n*, 736 F. Supp. 348 (D.D.C. 1990).

<sup>64</sup>S. REP. NO. 118, 95th Cong., 2d Sess. 1 (1978).

the contract action is determined by the board (or the Court) after balancing the strength of the Government's (or relator's) fraud case, and any prejudice that may arise to the Government's criminal case through discovery in the board action, against the prejudice of delay to the contractor. The boards and the Court are capable of striking an appropriate balance between the need for effective fraud prosecution and the contractor's right to speedy dispute resolution: they should be trusted to achieve a fair and equitable result.<sup>65</sup>

Today, however, there is confusion as to whether a board or the Court may proceed with the processing of a claim when the contracting officer has refused to issue a final decision because of the pendency of an allegation of fraud. Even though CDA § 605(c) provides a statutory process for allowing a contractor to seek a final decision -- or to proceed without one when a decision is tardy or refused -- section 605(a) is interpreted by many contracting officers to preclude the rendering of a final decision where there are outstanding allegations of fraud and the Government has reportedly argued in some cases that such a refusal does not trip the provisions of § 605(c). The Panel believes that the CDA should be amended to clarify that the process for obtaining or bypassing the contracting officer's decision contained in CDA § 605(c) is available even when fraud is suspected or alleged. Therefore, the Panel recommends that § 605(c) be amended as follows:

(5) Any failure by the contracting officer to issue a decision on a contract claim within the period required, including refusal by the contracting officer to issue a decision on a claim because of a suspicion or allegation of fraud, will, notwithstanding the provisions of subsection (a), be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this chapter. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

## VI

### **Amend the CDA to Permit Transfer to the Claims Court and to Permit Claims to be Heard as Counterclaims in District Courts**

As discussed above, current law regarding the jurisdiction of the boards of contract appeals and the federal district courts offers no single forum which can resolve both contractor claims against the Government and fraud claims against the contractor when fraud is suspected in the claim itself or in the contract upon which the claim is founded. By contrast, when a contractor claim is pending in the Claims Court, that Court can resolve that claim and any related

---

<sup>65</sup>DOJ has commented negatively on the outcome of board consideration of its stay motions, but has not cited any support other than one decision of the Transportation Board of Contract Appeals, which does not appear to reflect the settled law in other boards or the Claims Court.

claims of fraud in the same proceeding. The Panel believes that coordination of the litigation of board cases and related fraud allegations -- which today can only be achieved through stays of one or the other proceeding -- should be facilitated by two procedural amendments to the CDA: first, the boards should be given authority to transfer a pending appeal to the Claims Court; and, second, the exclusive jurisdiction of the boards should be broadened to permit trial of a board matter as a counterclaim in a district court fraud action.

It is the Panel's belief that the first remedy should be available when there is a pending claim in a board and should be discretionary with the board. Since a transfer to the Claims Court would defeat the contractor's right to choose a forum to hear its claim, transfer should be used only when sought by the contractor or the board finds that the efficiency of a single proceeding in the Claims Court outweighs the contractor's interest in having the board decide the claim. Implementation of this recommendation requires adding a new subsection (j) to 41 U.S.C. § 607:

**(j) Transfer to the Court of Federal Claims**

In order to provide a complete remedy in a single forum, when a board is advised that a pending appeal may be tainted by fraud or that fraud may taint the contract under which a pending appeal is brought, upon the motion of either party, a board of contract appeals in its discretion may transfer an appeal to the United States Court of Federal Claims. All pleadings in the appeal shall be transferred to the Court of Federal Claims and shall be deemed to have been filed in that Court as of the date such pleadings were filed in the board. The Court of Federal Claims shall be bound by, and shall not reopen, any decision of the board rendered in the matter being transferred except for good cause shown.

The second remedy is to be used when a fraud claim is filed in a district court and the facts of that claim overlap substantially with the facts of a contractor's claim, so that efficiency would be served by a single trial of both matters. In such circumstances, the contractor should be allowed to file its claim as a counterclaim in the district court if a counterclaim is otherwise permissible under the Federal Rules of Civil Procedure. Implementation of this recommendation requires the following amendment to 41 U.S.C. § 606:

**[41 U.S.C. §] 606. Contractor's right of appeal to board of contract appeals**

**(a)** Within ninety days from the date of receipt of a contracting officer's decision under section 605 of this title, the contractor may appeal such decision to an agency board of contract appeals, as provided in section 607 of this title.

**(b)(1)** If an action for fraud or false claims has been filed against the contractor by the United States in a federal district court and a

claim asserted by the contractor under a contract would constitute a mandatory or permissive counterclaim in the district court, a contractor may, within ninety days from the date of receipt of a contracting officer's final decision under section 605, appeal such decision by bringing a counterclaim in the district court. If an appeal on such claim is already pending in a board of contract appeals, the contractor may within the time for filing counterclaims in the district court action withdraw its board action and refile its appeal as a counterclaim in the federal district court.

(2) The right of appeal created in this subsection is in addition to the right created in subsection (a).

(3) In the event that a contracting officer refuses to issue a final decision under section 605 because of the pendency of a fraud or false claims action or investigation, then within 90 days of such refusal, the contractor may proceed under paragraph (1) without obtaining such decision.

### **Excessive FCA Damages**

## **VII**

### **Amend the FCA to Avoid Unreasonable Penalties**

As discussed above, there is dispute as to what constitutes a "claim" for the purpose of assessing a penalty under the FCA. As the Supreme Court has written, "[t]he legislative history of the Act offers little guidance on how properly to determine the number of forfeitures." *United States v. Bornstein*, 423 U.S. 303, 309 (1976). While *Bornstein* equated the number of penalties with the number of prohibited acts committed by the defendant, which was less than the number of false documents submitted to the Government, it did not purport to finally resolve the definition of "claim." Moreover, the history of the 1986 amendments suggests that Congress intended to penalize each invoice submitted under a contract obtained by fraud and perhaps each false entry in each invoice.<sup>66</sup> Nonetheless, that history also shows that Congress' main concern was to ensure that there would be some substantial penalty for fraud even where there were no actual damages and that Congress never contemplated the situation in which truly ruinous damages would be imposed on a contractor who was also being taxed with significant treble damages.<sup>67</sup>

However a claim is defined, it is clear that the number of claims -- and hence the number of potential penalties -- bears no necessary relationship to the amount of damages suffered by the Government. This is particularly so in Government contracting. For example, when the basis of an FCA suit is an error in an overhead account, each invoice submitted by a contractor under every open contract can be classified as a "false claim," which the result is that potentially hundreds of contracts, thousands of claims, and millions of dollars may be in issue even though

<sup>66</sup>See S. REP. NO. 99-562, *supra* note 12, at 9-10, 1986 U.S.C.C.A.N. at 5274-75.

<sup>67</sup>See *id.* at 17, 1986 U.S.C.C.A.N. at 5282.

actual damages are far less. While the Supreme Court has ruled that Congress may create an action seeking damages totally unrelated to actual harm as a "civil" matter, it has also noted that there is a potential for great disproportionality between actual damages and a potential FCA judgment, a disparity which can in fact amount to criminal punishment.<sup>68</sup> See *United States v. Halper*, 490 U.S. 435, 446-51 (1989).<sup>69</sup>

While the United States should recover fully for any damages it may suffer because of a false claim, the treble damages provisions of the FCA are intended to ensure such recovery.<sup>70</sup> The penalty provisions are intended to deter fraudulent conduct, especially when actual damages would be nominal. Where actual damages are not nominal, the trebling of those damages deters as well as compensates, with the result that deterrence is multiplied without any consideration of the impact of such multiplied deterrence -- and the fear of potentially enormous financial risk -- on contractors who are essential to the industrial base. Based on evidence presented to the Panel, the Panel believes that the fear of ruinous liability for innocent errors or even culpable mistakes of a single or small group of employees is causing companies to leave (or consider leaving) defense contracting and is deterring successful commercial contractors from entering the defense market.

As discussed at length in Chapter 8 of this Report, deterrence of entry into the defense market is at cross-purposes with efforts within DOD to reduce the barriers to commercial-military integration in order to protect and foster an adequate industrial base during the current defense build-down. Because of this effect, and the fact that Congress in 1986 did not appear to foresee the potential for crushing liability created by the enhanced FCA penalty provisions, the Panel recommends an amendment to the FCA permitting a court to scale down civil penalties that are disproportionate or excessive. In this regard, the Panel also notes that the FCA has a higher penalty structure than that used in other enforcement regimes in which a high premium is placed on deterring wrongful conduct, such as securities fraud (single damages, no penalties), price-fixing (treble damages, no penalties), or racketeering (treble damages, no penalties). Why Government contractors should face stiffer penalties than those who fix prices or commit racketeering through murder and arson for profit is not explained in the FCA's legislative history.

In order to promote commercial-military integration, therefore, the Panel recommends that 31 U.S.C. § 3729(a) be amended to permit courts to limit the total penalties that may be assessed when the total authorized statutory recovery would be disproportionate to actual damages suffered by the Government,<sup>71</sup> by adding a new subparagraph, as follows:

---

<sup>68</sup> In extreme cases, FCA penalties might also violate the excessive fines clause of the Constitution. See generally Note *supra* note 2, at 1089-92.

<sup>69</sup> In *Halper*, actual damages were found by the district court to be \$585. The United States sought penalties of \$130,000. See 490 U.S. at 435. Today, the penalties in the *Halper* situation would be \$325,000 to \$650,000.

<sup>70</sup> See *United States v. Halper*, 490 U.S. 435, 444 (1989), citing *United States ex rel. Marcus v. Hess*, 317 U.S. 537, 551-52 (1943).

<sup>71</sup> The Panel intends that this proportionality rule apply only to the statutory penalties and not to a court's power to award double or treble actual damages.

**[31 U.S.C. §] 3729. False claims**

**(a) Liability for certain acts.--Any person who--**

(1) knowingly presents, or causes to be presented, to an officer or employee of the United States Government or a member of the Armed Forces of the United States a false or fraudulent claim for payment or approval;

(2) knowingly makes, uses, or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the Government;

(3) conspires to defraud the Government by getting a false or fraudulent claim allowed or paid;

\*\*\*

is liable to the United States Government for a civil penalty of not less than \$5,000 and not more than \$10,000, plus 3 times the amount of damages which the Government sustains because of the act of that person; provided, however, (i) a court may reduce the civil penalties authorized under this section if and to the extent that actual damages exceed a nominal amount and the court finds the aggregated amount of such penalties is disproportionate or excessive given the actual damages suffered by the United States or (ii) except that if the court finds that--

(A) the person committing the violation of this subsection furnished officials of the United States responsible for investigating false claims violations with all information known to such person about the violation within 30 days after the date on which the defendant first obtained the information;

(B) such person fully cooperated with any Government investigation of such violation; and

(C) at the time such person furnished the United States with the information about the violation, no criminal prosecution, civil action, or administrative action had commenced under this title with respect to such violation, and the person did not have actual knowledge of the existence of an investigation into such violation; the court may assess not less than 2 times the amount of damages which the Government sustains because of the act of the person.

A person violating this subsection shall also be liable to the United States Government for the costs of a civil action brought to recover any such penalty or damages.

**(b) Knowing and knowingly defined.-- \* \* \* \***

### 6.3.1.5 Relationship to Objectives

These recommendations are consistent with the Panel's objectives concerning acquisition laws which promote financial and ethical integrity in ways that are not unduly burdensome but which also permit sound procurement practices. They are also consistent with the Panel's objectives concerning the expeditious and fair resolution of contract disputes as well as those concerning the reduction of barriers to commercial-military integration.

### 6.3.1.6 Proposed Statute

#### [31 U.S.C. §] 3729. False claims

(a) **Liability for certain acts.**--Any person who [violates the Act] \*\*\* is liable to the United States Government for a civil penalty of not less than \$5,000 and not more than \$10,000, plus 3 times the amount of damages which the Government sustains because of the act of that person; provided, however, (i) a court may reduce the civil penalties authorized under this section if and to the extent that actual damages exceed a nominal amount and the court finds the aggregated amount of such penalties is disproportionate or excessive given the actual damages suffered by the United States or (ii) except that if the court finds that--

(A) the person committing the violation of this subsection furnished officials of the United States responsible for investigating false claims violations with all information known to such person about the violation within 30 days after the date on which the defendant first obtained the information;

(B) such person fully cooperated with any Government investigation of such violation; and

(C) at the time such person furnished the United States with the information about the violation, no criminal prosecution, civil action, or administrative action had commenced under this title with respect to such violation, and the person did not have actual knowledge of the existence of an investigation into such violation; the court may assess not less than 2 times the amount of damages which the Government sustains because of the act of the person.

A person violating this subsection shall also be liable to the United States Government for the costs of a civil action brought to recover any such penalty or damages.

(b) **Knowing and knowingly defined.**-- \* \* \* \*

#### [31 U.S.C. §] 3730. Civil actions for false claims

(a) **Responsibilities of the attorney general.**--\* \* \* .

(b) **Actions by private persons.**--\* \* \* .

(c) **Rights of the parties to *Qui tam* actions.**--\* \* \* .

(d) **Award to *Qui tam* plaintiff.**--(1) If the Government proceeds with an action brought by a person under subsection (b), such person shall, subject to the second sentence of this paragraph, receive at least 15 percent but not more than 25 percent of the proceeds of the action or settlement of the claim, depending upon the extent to which the person substantially

contributed to the prosecution of the action. Where the action is one which the court finds to be based primarily on disclosures of specific information (other than information provided by the person bringing the action) relating to allegations or transactions in a criminal, civil, or administrative hearing, in a congressional, administrative, or Government Accounting Office report, hearing, audit, or investigation, or from the news media, the court may award such sums as it considers appropriate, but in no case more than 10 percent of the proceeds, taking into account the significance of the information and the role of the person bringing the action in advancing the case to litigation. Any payment to a person under the first or second sentence of this paragraph shall be made from the proceeds. Any such person shall also receive an amount for reasonable expenses which the court finds to have been necessarily incurred, plus reasonable attorneys' fees and costs. All such expenses, fees, and costs shall be awarded against the defendant.

(2) If the Government does not proceed with an action under this section, the person bringing the action or settling the claim shall receive an amount which the court decides is reasonable for collecting the civil penalty and damages. The amount shall be not less than 25 percent and not more than 30 percent of the proceeds of the action or settlement and shall be paid out of such proceeds. Such person shall also receive an amount for reasonable expenses which the court finds to have been necessarily incurred, plus reasonable attorneys' fees and costs. All such expenses, fees, and costs shall be awarded against the defendant.

(3) Whether or not the Government proceeds with the action, if the court finds that the action was brought by a person who planned and initiated the violation of section 3729 upon which the action was brought, then the court may, to the extent the court considers appropriate, reduce the share of the proceeds of the action which the person would otherwise receive under paragraph (1) or (2) of this subsection, taking into account the role of that person in advancing the case to litigation and any relevant circumstances pertaining to the violation. If the person bringing the action is convicted of criminal conduct arising from his or her role in the violation of section 3729, that person shall be dismissed from the civil action and shall not receive any share of the proceeds of the action. Such dismissal shall not prejudice the right of the United States to continue the action, represented by the Department of Justice.

(4) If the Government does not proceed with the action and the person bringing the action conducts the action, the court may award to the defendant its reasonable attorneys' fees and expenses if the defendant prevails in the action and the court finds that the claim of the person bringing the action was clearly frivolous, clearly vexatious, or brought primarily for purposes of harassment.

(5) A court may reduce or eliminate the compensation which would otherwise be due a relator under this subsection (d) if the relator actively furthered the violations which are the subject of an action brought under subsection (b). A court may also reduce or eliminate compensation which would otherwise be due a relator under this subsection (d) if the relator has failed promptly to bring violations to the Government's attention after the relator was aware of facts establishing such violations.

**(e) Certain actions barred.--**(1) No court shall have jurisdiction over an action brought by a former or present member of the armed forces under subsection (b) of this section against a member of the armed forces arising out of such person's service in the armed forces.

(2)(A) No court shall have jurisdiction over an action brought under subsection (b) against a Member of Congress, a member of the judiciary, or a senior executive branch official if the

action is based on evidence or information known to the Government when the action was brought.

(B) For purposes of this paragraph, "senior executive branch official" means any officer or employee listed in section [sic] paragraphs (1) through (8) of section 101(f) of the Ethics in Government Act of 1978 (5 U.S.C.App.).

(3) In no event may a person bring an action under subsection (b) which is based upon allegations or transactions which are the subject of a civil suit or an administrative civil money penalty proceeding in which the Government is already a party.

(4)(A) No court shall have jurisdiction over an action under this section based upon (i) the public-disclosure of allegations or transactions in a criminal, civil, or administrative hearing, in a congressional, administrative, or Government Accounting Office report, hearing, audit, or investigation, or from the news media, (ii) any document created by the federal Government, (iii) facts in the possession of the Department of Justice; or (iv) matters which are or have been the subject of any investigation or audit by or on behalf of the federal Government, unless the action is brought by the Attorney General or the person bringing the action is an original source of the information.

(B) For purposes of this paragraph, "original source" means an individual who has direct and independent knowledge of the information on which material allegations to be made in any action brought under this section are based and has voluntarily provided the substantially all evidence and information supporting such allegations to the Government before filing an action under this section which is based on such allegations the information.

(5) No court shall have jurisdiction over an action under subsection (b) that is based, in whole or in part, upon information obtained in the performance of Federal Government employment.

(6) No court shall have jurisdiction over an action under subsection (b) of this section that is based in material part upon information obtained from or as a consequence of the preparation or submittal by a contractor for purposes of a voluntary disclosure under a Government voluntary disclosure program.

(f) Government not liable for certain expenses.--\* \* \*

(g) Fees and expenses to prevailing defendant.--\* \* \*

(h) \* \* \*

[41 U.S.C. §] 605. Decision by contracting officer --\* \* \*

(5) Any failure by the contracting officer to issue a decision on a contract claim within the period required, including refusal by the contracting officer to issue a decision on a claim because of a suspicion or allegation of fraud, will, notwithstanding the provisions of subsection (a), be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this chapter. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

**[41 U.S.C. §] 606. Contractor's right of appeal to board of contract appeals**

(a) Within ninety days from the date of receipt of a contracting officer's decision under section 605 of this title, the contractor may appeal such decision to an agency board of contract appeals, as provided in section 607 of this title.

(b)(1) If an action for fraud or false claims has been filed against the contractor by the United States in a federal district court and a claim asserted by the contractor under a contract would constitute a mandatory or permissive counterclaim in the district court, a contractor may within ninety days from the date of receipt of a contracting officer's final decision under section 605 appeal such decision by bringing a counterclaim in the district court. If an appeal on such claim is already pending in a board of contract appeals, the contractor may within the time for filing counterclaims in the district court action withdraw its board action and refile its appeal as a counterclaim in the federal district court.

(2) The right of appeal created in this subsection is in addition to the right created in subsection (a).

(3) In the event that a contracting officer refuses to issue a final decision under section 605 because of the pendency of a fraud or false claims action or investigation, then within 90 days of such refusal, the contractor may proceed under paragraph (1) without obtaining such decision.

**[41 U.S.C. § ] 607. Agency boards of contracts appeals**

**(a) Establishment; consultation; Tennessee Valley Authority**

\* \* \*

**(b) Appointment of members; chairman; compensation**

\* \* \*

**(c) Appeals; inter-agency arrangements**

\* \* \*

**(d) Jurisdiction**

Each agency board shall have jurisdiction to decide any appeal from a decision of a contracting officer (1) relative to a contract made by its agency, and (2) relative to a contract made by any other agency when such agency or the Administrator has designated the agency board to decide the appeal. In exercising this jurisdiction, the agency board is authorized to grant any relief that would be available to a litigant asserting a contract claim in the United States Claims Court.

**(e) Decisions**

\* \* \*

**(f) Accelerated appeal disposition**

\* \* \*

**(g) Review**

\* \* \*

**(h) Procedural guidelines**

\* \* \*

**(i) Proceeding when fraud is alleged**

If fraud is suspected or alleged in connection with a claim for which an appeal is pending before the United States Court of Federal Claims or board of contract appeals, the Court or board may in its discretion proceed with the processing of the claim even if the contracting officer refuses to render a final decision.

**(j) Transfer to the Court of Federal Claims**

In order to provide a complete remedy in a single forum, when a board is advised that a pending appeal may be tainted by fraud or that fraud may taint the contract under which a pending appeal is brought, upon the motion of either party, a board of contract appeals in its discretion may transfer an appeal to the United States Court of Federal Claims. All pleadings in the appeal shall be transferred to the Court of Federal Claims and shall be deemed to have been filed in that Court as of the date such pleadings were filed in the board. The Court of Federal Claims shall be bound by, and shall not reopen, any decision of the board rendered in the matter being transferred except for good cause shown.

## **6.3.2. 31 U.S.C. §§ 3801 - 12**

### **Administrative Remedies for False Claims and Statements**

#### **6.3.2.1. Summary of the Law**

The Program Fraud Civil Remedies Act of 1986 provides the United States with an administrative remedy for false claims and statements and with a process for the collection of penalties for fraud or false statements of \$150,000 or less.

Section 3802 establishes a civil penalty of not more than \$5,000 for each false claim, statement, or omission of material fact which would amount to a false claim or statement. In the case of false claims, that section also provides for an assessment of not more than twice the amount of the false claim.

Section 3803 sets up a three-part procedure of investigation, determination, and administrative hearing prior to a finding of liability. That section also provides that notice of the agency's intention to refer the allegation for hearing be given to the Attorney General and permits administrative review in accordance with the statute.

Section 3804 provides that the official investigating the allegations be vested with documentary subpoena power and that the "presiding" (hearing) officers have the power to subpoena testimony and documents. This section also gives district courts jurisdiction to issue an enforcement order for any subpoena, buttressed by the potential sanction of contempt of court.

Section 3805 provides for judicial review in accordance with the statute, and section 3806 sets out procedures for the collection of civil penalties and assessments.

Section 3808 provides a statute of limitations of six years after the claim or statement was made, or three years to begin enforcement action on a penalty.

#### **6.3.2.2. Background of the Law**

The Program Fraud Civil Remedies Act was established as a new chapter to Title 37 of the U.S. Code in 1986 through the Budget Reconciliation Act of that year.<sup>1</sup> The enunciated purpose of the statute was to provide an administrative remedy for Federal agencies experiencing such problems and to provide due process protections to those subject to such administrative remedies.<sup>2</sup>

---

<sup>1</sup>Pub. L. No. 99-509, § 6103, 100 Stat. 1934, (1986).

<sup>2</sup>*Id.*

### **6.3.2.3. Law in Practice**

This statute has been implemented in DOD Directive 5505.5, dated August 30, 1988, and through regulations of the various services.<sup>3</sup>

A September, 1991 GAO report studied the implementation of the Act in eight Federal agencies. The GAO found that as of September 30, 1990, seven of those agencies had referred a total of 41 cases to the Department of Justice for approval of administrative action.<sup>4</sup> Thirty-nine of these cases had been approved as of May 31, 1991, resulting in resolution in the total amount of \$327,604.<sup>5</sup> As of the date of the report, DOD had resolved only one case out of 105 reviewed and 15 referrals.<sup>6</sup> A recent inquiry to the DOD Inspector General's Office indicated that, as of December 21, 1992, no further DOD cases have been resolved.<sup>7</sup>

The GAO report provided a survey of reasons for what it perceived was a failure to use administrative remedies under the Act more frequently. Many of the responses referred to the cumbersome, time consuming and costly nature of the Act's procedures in relationship to the amount which could be recovered.<sup>8</sup>

### **6.3.2.4. Recommendation and Justification**

#### **No Action**

Because this statute was not implemented in all of the services until fairly recently, the Panel felt that there is insufficient experience with the entire process to be able to critically evaluate how it functions. There have been no hearings under the statute in DOD, and in only one case has DOD collected penalties. For those reasons, no action is recommended.

### **6.3.2.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement without being unduly burdensome.

---

<sup>3</sup>See, e.g., Air Force Regulation 123-2.

<sup>4</sup>PROGRAM FRAUD: IMPLEMENTATION OF THE PROGRAM FRAUD CIVIL REMEDIES ACT OF 1986, GAO/AFMD-91-73, Sept. 13, 1991.

<sup>5</sup>*Id.* at 6.

<sup>6</sup>*Id.*

<sup>7</sup>Telephone interview with David Stuart, Office of the DOD IG (December 21, 1992).

<sup>8</sup>PROGRAM FRAUD: IMPLEMENTATION OF THE PROGRAM FRAUD CIVIL REMEDIES ACT OF 1986, GAO/AFMD-91-73 18-19, Sept. 13, 1991.

### 6.3.3. 41 U.S.C. § 604

#### Fraudulent claims

##### 6.3.3.1. Summary of the Law

This statute is a section of the Contract Disputes Act.<sup>1</sup> It dictates that if it is determined that, due to a misrepresentation of fact or fraud, a contractor is unable to support any part of a claim, the contractor will be liable to the Government for an amount equal to that part which is unsupported in addition to all of the costs of reviewing that part of the claim. A contractor is liable under this section for six years from the misrepresentation of fact or fraud.

##### 6.3.3.2. Background of the Law

This section was made part of the Contract Disputes Act to discourage the practice of "horse-trading," whereby a claim is inflated and submitted as a negotiating tactic.<sup>2</sup> The statute was also meant to be separate from, and used in concert with, other remedies such as those provided by the False Claims Act.<sup>3</sup>

##### 6.3.3.3. Law in Practice

This statute has been implemented in FAR 33.209, which requires the contracting officer to refer evidence that any part of a claim is unsupported due to fraud to the agency official responsible for fraud investigations.

Questions have arisen whether the contracting officer has the authority to issue a final decision concerning a contractor's liability under this statute and whether the boards of contract appeals have jurisdiction over disputes concerning enforcement of this statute. While there have been differing board decisions on the issue, one of the most recent cases decided by the Department of Transportation Contract Appeals Board held that the legislative history indicated that the Congress did not intend the board to be totally devoid of jurisdiction in this area, and that although the board may not have jurisdiction to decide whether fraud occurred, it may have jurisdiction to consider issues that are related to, but are actually separate from, fraud issues pending in a concurrent FCA proceeding.<sup>4</sup> The effect of fraud proceedings on CDA jurisdiction is explored at greater length in the discussion of the FCA at Chapter 6.3.1. The Panel makes no recommendation to amend 41 U.S.C. § 604.

<sup>1</sup>Contract Disputes Act of 1978, Pub. L. No. 95-563, § 5, 92 Stat. 2384, (1978).

<sup>2</sup>S. REP. NO. 1118, 95th Cong. 2d Sess. 20 (1978).

<sup>3</sup>*Id.*

<sup>4</sup>See *TDC Management Corp.*, 90 BCA 22,627 (DOTBCA 1990).

#### **6.3.3.4. Recommendation and Justification**

##### **Retain**

This statute should be retained as it affords the Government an additional administrative remedy to recover the costs of unsupportable claims or portions of claims, as well as an avenue to recover the costs of their review.

#### **6.3.3.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement without being unduly burdensome.

## **6.4. Ethics**

### **6.4.0. Introduction**

Few topics have drawn more persistent attention during the past decade than the laws prescribing the ethical conduct of those engaged in acquisition. Defense contracting has long been prominent in public attention if only for its enormity. More recently conflicts of interest, of any sort and suspected at any level of American government, have come to merit headlines. Whenever these themes have crossed, the ethical conduct of defense procurement officials has become the lightning rod for extraordinary attention, frequently unwarranted suspicion, and a number of ill-starred efforts to enact corrective legislation.

The Panel's review of this topic is not original. It follows in the path of studies pursued in far greater detail by ethics commissions and procurement commissions over several decades; by a host of public and private organizations that contributed to the development of major ethics reform legislation enacted in 1962, 1978, and 1989; and by a long series of independent studies and congressional reviews.

The most recent comprehensive study was conducted by the President's Commission on Federal Ethics Law Reform, whose 1989 report<sup>1</sup> became the foundation for the Ethics Reform Act of the same year. That 1989 Act made a multitude of thoughtful changes to the principal body of federal ethics laws contained in 18 U.S.C. Sections 201-209, and has been applauded for harmonizing those sections into an effective and understandable set of rules. In passing the 1989 Act, however, Congress stopped short of adopting several recommendations that would have repealed a number of procurement-related ethics statutes. Instead, after a period of suspension that did not yield agreement on appropriate changes, those provisions have returned to effect and were a major focus of this Panel's consideration.

Every study of the federal ethics laws has concluded by acknowledging the futility of relying upon legal compulsion to promote ethical government. Ethics do not lend themselves to legislation because laws cannot begin to define the endless variations of fact and circumstance that separate proper from improper behavior. Ethics is fundamentally a code of conduct -- by definition, an ethos. It can be imbued by instruction and by example, but individual laws can at best function as occasional out-of-bounds flags; they cannot regulate the play.

Ethics laws have also proven to be extraordinarily difficult to write. As the Bar of the City of New York characterized the problem in its landmark 1960 report, most ethics laws tend to be anticipatory, and we have proven to be chronically inept at writing anticipatory laws.<sup>2</sup>

A law forbidding bank robbery, for example, is perfectly straightforward; it punishes precisely the act sought to be discouraged -- robbing banks. But it is an entirely different

---

<sup>1</sup>REPORT OF THE PRESIDENT'S COMMISSION ON FEDERAL ETHICS LAW REFORM, TO SERVE WITH HONOR, 1989.

<sup>2</sup>REPORT OF THE SPECIAL COMMISSION OF THE ASSOCIATION OF THE BAR OF THE CITY OF NEW YORK, CONFLICT OF INTEREST AND THE FEDERAL SERVICE, 1960.

challenge to draft clear and enforceable laws that will discourage persons from being tempted to rob banks, or, more difficult yet, from appearing to the public as if they might be tempted to rob them.

Yet that is precisely the indirection we apply in most of our contemporary ethics legislation: we identify suspicious persons and instruct them to stay away from banks. Unable to articulate precisely what mischief concerns us in the event a military officer takes a retirement job with a defense contractor, we simply forbid him from taking a job. Other officials, whom we distrust slightly less, we oblige to submit periodic reports of their whereabouts. In trying to incorporate specificity into two recent procurement ethics laws the result was hopelessly incomprehensible. Upon later acknowledging as much and failing to agree on anything clearer, the solution was further indirection by providing applicants a guaranteed interpretation of the law issued by a government lawyer.<sup>3</sup>

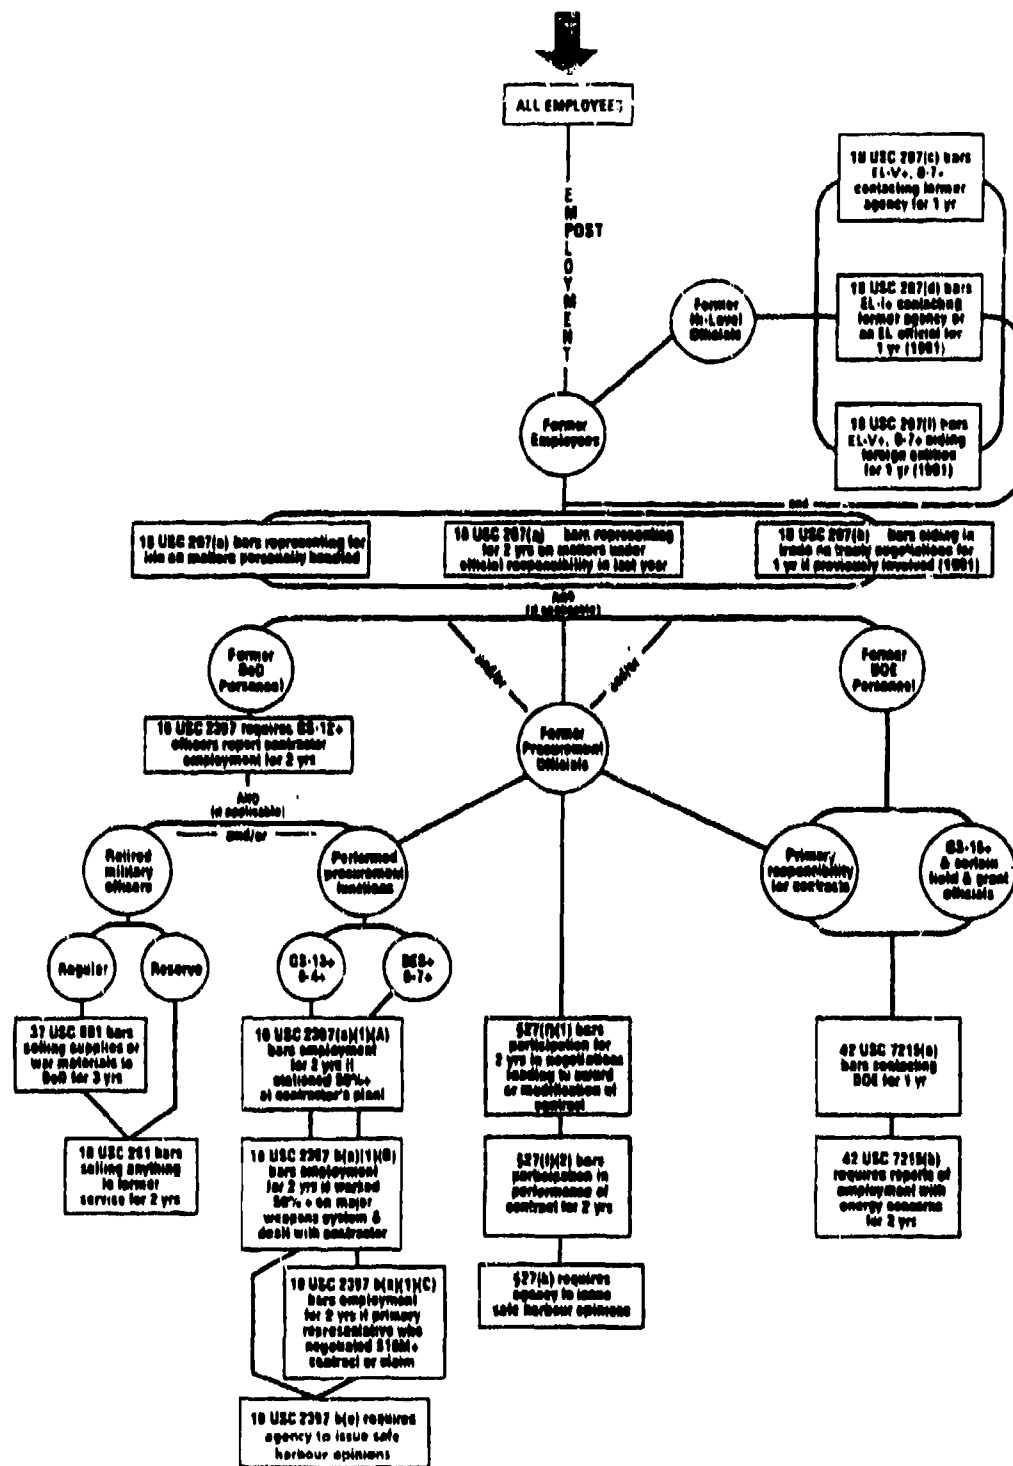

Predictably, the ethics laws are frequently responses to isolated problems. They may be enacted with less than perfect appreciation of their full effect and utility, and once enacted they are invariably difficult to repeal. Reproduced below are two charts depicting those applicable to defense acquisition. Some are laws of general application and others affect only persons engaged in acquisition, or defense acquisition, or who merely retired as military officers. These charts effectively illustrate the way piecemeal legislation has, with the very best of intentions, erected a complex pyramid of laws addressing the same or closely related conduct. They begin at the top with the ethics laws of general application and descend into progressively greater specificity and detail. As described by the Director of the Office of Government Ethics:

Little by little, rule by rule, we have addressed a problem here and a problem there with a quick statutory fix, stacking one on top of another until we have reached a point today that an employee who sincerely wants to do the right thing simply cannot understand what it is he has to do to comply. When we began to recognize that even sophisticated employees could not possibly cope, we actually did not then try to simplify the law. Instead what we ended up doing was enhancing the practice of the attorneys in the agencies. We gave confused employees statutory entitlements to safe harbor opinions to make sure they would not be fired, fined, or prosecuted in some way.<sup>4</sup>

---

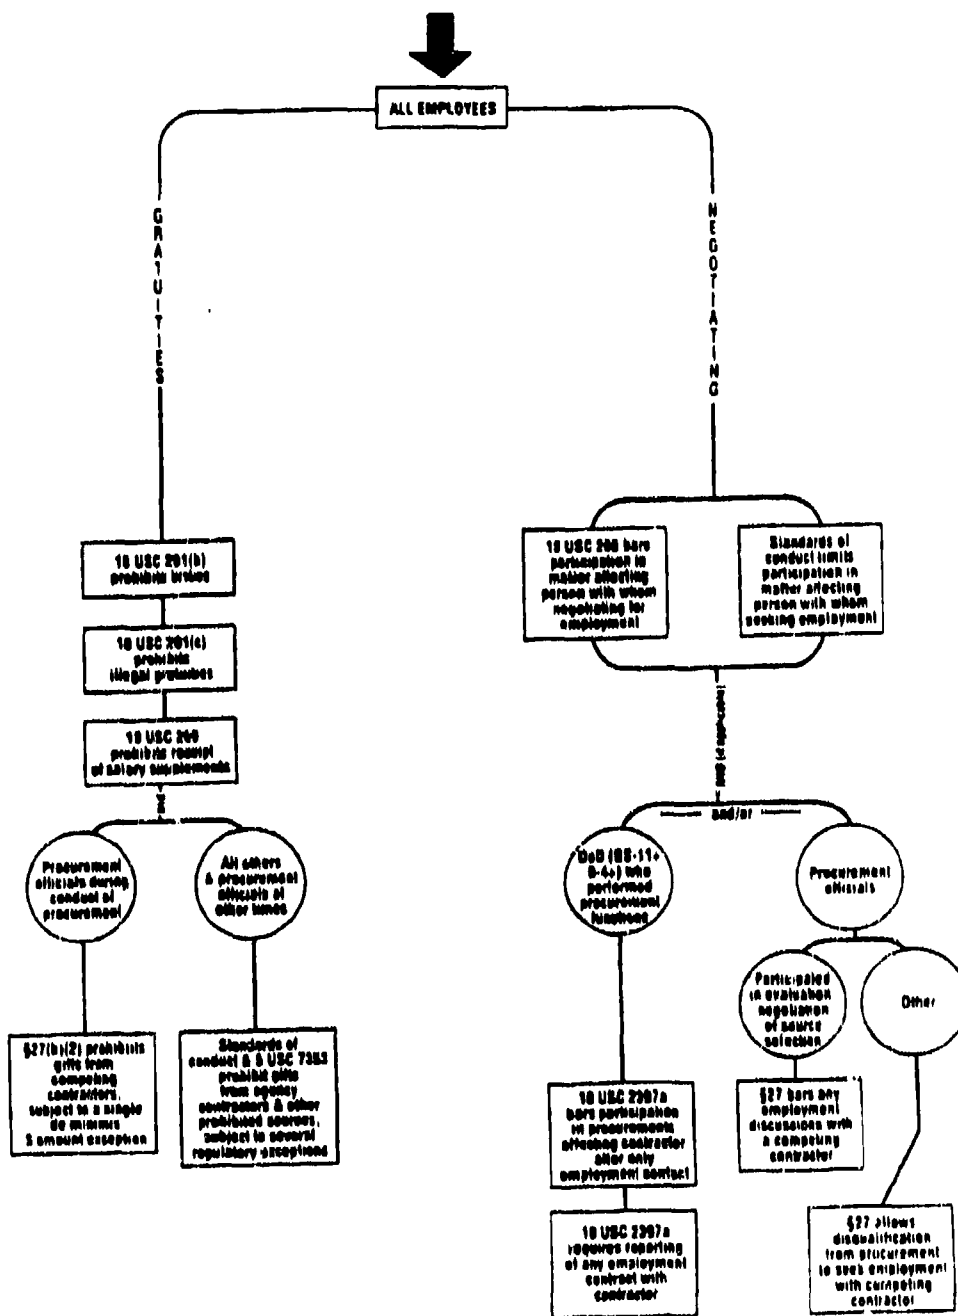

<sup>3</sup>These "safe harbor" opinions interpret provision of 10 U.S.C. § 2397b and 41 U.S.C. § 423.

<sup>4</sup>Testimony of Stephen D. Potts before the Investigations Subcommittee of the Committee on Armed Services, House of Representatives, Hearings on Revolving Door Issues and Post-Employment Restrictions, May 9, 1991, H.R. 102-32, 102d Congress, 1st Session.

SOURCE: OFFICE OF GOVERNMENT ETHICS

Fig. 6-A: Restrictions Governing Post-Government Employment

SOURCE: OFFICE OF GOVERNMENT ETHICS

FIG. 6-B: RESTRICTIONS GOVERNING GIFTS AND EMPLOYMENT DISCUSSIONS

Nearly all these laws overlap another in some particular, and whereas a degree of redundancy might otherwise be tolerable, the propriety of a given event becomes nearly impossible to measure when two laws apply competing tests to the same situation. Each of these laws, standing alone, serves a useful purpose, but all of them together, working just slightly at cross purposes, have generated an appreciable impediment to defense acquisition.

As with many of the procedures and requirements addressed in this report, industry and Government have come to tolerate these special ethics restrictions as another unavoidable cost of doing business with the Government, or of working for it. Thousands of legal opinions have been exchanged and tens of thousands of certifications have been executed and filed, the dollar costs of which will never be precisely measured.

But in many ways these laws all inflate the cost of Government. Some of them, like portions of the Office of Federal Procurement Policy Act, cripple the conduct of legitimate business with imprecise limitations on information exchange and high penalties for error. Some are identified as contributing to the steady worsening of Government recruitment that the Volcker Commission called the "quiet crisis."<sup>5</sup>

And most of these special-purpose restrictions are working the margins of enforcement. They apply to but a fraction of situations that are not already addressed by general-purpose statutes elsewhere. Yet in their earnest efforts to reach that final fraction and cure the abuse of the moment, they cast a net so wide that it snares and hobbles a larger population.<sup>6</sup> As characterized in a recent report by the National Academy of Sciences:

The recent efforts to create a scandal-proof government have gone so far that they, on balance, do more harm than good . . . . Some of these ethics reforms, especially recent attempts to purify the procurement process by imposing broad post-government employment restrictions, afford little ethical protection at very high cost -- a bad bargain for the government and a bad bargain for the public.<sup>7</sup>

In reviewing these laws the Panel has been sensitive not just to their direct and indirect effects on the acquisition process, but to the important role they play in maintaining the confidence in defense management that is so crucial to public support for all defense programs. Public perceptions of impropriety must be addressed just as surely as actual conflicts of interest.

The Panel has been equally impressed, however, by the unanimity of opinion that the present maze of pyramided laws has surpassed even the most conscientious efforts to understand them. The vast majority of government and industry employees want to follow the law -- and to do so to the letter -- but they are confronted with a labyrinth of restrictions so unclear, and bearing such catastrophic penalties, that the safest conduct is often to do nothing at all.

<sup>8</sup>*Hearing Before the Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, 102d Cong., 1st Sess. (1991).*

## **6.5. Gifts and Gratuities**

### **6.5.0. Introduction**

Defense procurement employees are subject to the following remarkable accumulation of laws and regulations on the acceptance of gifts:

- 18 U.S.C. § 201(b), the bribery statute, which forbids accepting something of value in return for an official act;
- 18 U.S.C. § 201(c), the criminal gratuities statute, which forbids accepting something of value because of official duties;
- 5 U.S.C. § 7353, the recently enacted civil gift statute, which forbids accepting something of value from specified sources seeking Government business;
- 41 U.S.C. §§ 423(a)(2) and (b)(2), which forbid gifts from competing contractors to procurement officials during the conduct of a procurement;
- 18 U.S.C. § 209, which forbids outside supplementation of salary for performing Government duties;
- 10 U.S.C. § 2207, which, through the gratuities clause, provides for contract termination and administrative penalties against contractors who extend gifts to officials; and
- 5 C.F.R. § 2635, the new standards of conduct regulation, whose gift rules apply to all executive branch employees.

As directed by executive order, the Office of Government Ethics (OGE) recently issued a single standards of conduct regulation applicable uniformly to every employee and military officer of the executive branch.<sup>1</sup> It addresses at length the acceptance of gifts and gratuities, constructs for the first time a comprehensive set of rules applicable equally to patent examiners and contract negotiators and, under OGE's broad regulatory charter, provides for consistent gift interpretations under 5 U.S.C. § 7353 and 18 U.S.C. § 201(c). Thus, by virtue of law and newly issued regulation, every executive branch employee except those in procurement, regardless of rank or responsibilities, will shortly be subject to the same set of understandable gift rules.

Those employees with procurement responsibilities face an additional restriction. 41 U.S.C. § 423(a)(2) forbids a competing contractor from offering, and subsection (b)(2) forbids a procurement official from accepting, anything of value during the conduct of a procurement. These portions of the procurement integrity amendments to the OFPP Act rely for their definitions on a unique set of terms prescribed by law and amplified in the Federal Acquisition

---

<sup>1</sup>Fed. Reg. Vol. 57, No. 153 of Friday, Aug. 7, 1992, to be codified at 5 C.F.R. § 2635.

Regulation.<sup>2</sup> "Procurement Officials" for these purposes are a small but variable subset of those involved in procurement; they acquire their special status and become subject to the restrictions of section 423 by performing any of several specified procurement duties within a calendar period that embraces the "conduct of a procurement."

Endeavoring to rationalize the rules then in effect, the FAR initially applied an agency's regular gift rules under section 423(b)(2), but by amendment in 1989, Congress rejected that approach and specified that there be only a "single uniform Government-wide exclusion at a specific dollar amount."<sup>3</sup> The FAR thereafter fixed that amount at \$10.

Under the uniform OGE regulations recently issued, all other executive branch employees and procurement officials will soon work under common rules recognizing that factors like personal and family relationships, awards, conferences, and professional gatherings realistically deserve special treatment. The new rules also discard pages of fine print exceptions in favor of a flat rule permitting *de minimis* gifts and defining *de minimis* as \$20, with a \$50 annual cap on gifts from any one source. On the other hand, for the periods they are also subject to section 423, some of these employees will be subject to the OGE rules plus the far narrower gift rules in the FAR that under no circumstances permit more than a \$10 gratuity during the conduct of a procurement.

The Panel believes the rules should be uniform. Heretofore, agencies had been free to set their own rules on the acceptance of gratuities, and the restrictions of section 423 appear to have been intended to bring a degree of consistency to widely varying agency standards. With the recent enactment of 5 U.S.C. § 7353 and the publication of the uniform OGE rules at 5 C.F.R. § 2635, that objective is achieved. Vested with the responsibility to make such a determination, OGE found no reason to treat procurement personnel under a special or more restrictive gift rule, and on that the Panel agrees.

Because of the confusion that will arise after the OGE rules take effect on February 3, 1993, the Panel recommends that sections 423(a)(2) and (b)(2) promptly be repealed. The Panel believes there remain more than sufficient incentives for contractor compliance with the OGE rules, including the suspension and debarment process; the procedures for contract termination and assessment of administrative penalties under 10 U.S.C. § 2207 and the Gratuities clause; and civil or criminal prosecution for illegal supplementation of salary under 18 U.S.C. § 209. With the additional effect of the criminal bribery and gratuities provisions at 18 U.S.C. § 201(b) and (c) and the gift statute at 5 U.S.C. § 7353, more than adequate protection would remain.

---

<sup>2</sup>48 C.F.R. 3.104.

## **6.5.1. 18 U.S.C. § 201**

### **Bribery of public officials and witnesses**

#### **6.5.1.1. Summary of the Law**

This statute contains both the criminal bribery provision and the criminal gratuities provision.

Section (b), the bribery statute, prohibits anyone from:

(1) corruptly giving or promising to give anything of value to a public official or a selected public official, or promising that official to give something of value to a third party with the intent to influence him to do any official act, to commit fraud on the United States, or to do or omit doing anything in violation of that person's lawful duty, and

(2) as a public official corruptly demanding, receiving, or accepting anything of value personally or for a third party in return for doing any official act, for committing fraud on the United States, or doing or omitting to do anything in violation of his lawful duty.

Section (c), the gratuities statute, prohibits anyone from:

(1) giving or promising to give anything of value to a public official or a selected public official for any act performed or to be performed by that official or,

(2) as a public official or former or selected public official seeking, receiving or agreeing to accept anything of value personally for any official act or for testimony as a witness (not to include reasonable compensation for time lost or standard expert witness fees).

The penalty for commission of these acts is imprisonment for not more than two years and/or a fine under Title 18.

#### **6.5.1.2. Background of the Law**

The bribery and gratuities statutes which existed before consolidation in the Bribery, Graft and Conflicts of Interest Act of October 23, 1962,<sup>1</sup> consisted of 13 sections which were applicable to various categories of Federal employees including Members of Congress, judges,

---

<sup>1</sup>Pub. L. No. 87-849, 76 Stat. 1119 (1962).

and other officials.<sup>2</sup> The aim of the 1962 consolidation was to bring these categories together under a single term "public official" which would include officers and employees of the three branches of Government.<sup>3</sup> The revision also introduced the concept of forbidding bribery for acts which would benefit a third party, and contained a prohibition for bribery for testimony at a proceeding or trial.<sup>4</sup>

The statute was amended in 1970 to add the District of Columbia Delegate to the definition of "public official,"<sup>5</sup> and in 1986<sup>6</sup> to conform the statute to clarifications made in the Bank Bribery Amendment of 1985.

### 6.5.1.3. Law in Practice

By the terms of subsection (b) of the statute, bribery is characterized by a corrupt intent. There must be an established expectation on the part of the offeror or solicitor of the bribe that it will bring about the official act that the offeror of the bribe desired.<sup>7</sup> The act of bribery must take place while one is, or has been selected to be, a public official,<sup>8</sup> and where there is an understanding that there is a *quid pro quo* for the bribe in the actions of the public official.<sup>9</sup> In contrast, the gratuities statute may be used in situations where proof of corrupt intent falls short or where there is no understanding or expectation of a specific *quid pro quo* on the part of both the offeror of the bribe and the public official.<sup>10</sup>

The provisions of 5 C.F.R. § 2635 subpart B, implement the statutory ban on accepting gratuities. Subpart B specifically states that unless a gift is accepted in return for being influenced to perform an official act, gifts accepted under the standards and exceptions enumerated in that subpart "shall not constitute an illegal gratuity otherwise prohibited by 18 U.S.C. § 201(c)(1)(B)."<sup>11</sup>

No comments were received concerning this statute and the Panel has not uncovered any problems which should be remedied through a statutory change.

---

<sup>10</sup>*Id.*

<sup>11</sup>5 C.F.R. § 2635.202.

#### **6.5.1.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 18 U.S.C. § 201 (b) and (c) be retained. These provisions are the foundation for most of the Federal standard against bribes and gratuities.

#### **6.5.1.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement without being unduly burdensome.

## 6.5.2. 18 U.S.C. § 202

### Definitions

#### 6.5.2.1. Summary of the Law

This section contains definitions applicable to various sections in Chapter 11, Title 18.

Subsection (a) defines a "special Government employee"<sup>1</sup> as an officer or employee of the executive or legislative branch who is retained, designated, appointed, or employed to perform with or without compensation, for not to exceed 130 days in any period of one year. A reserve officer of the armed forces or National Guard is a special Government employee while on active duty solely for training, but when voluntarily serving a period of extended active duty in excess of 130 days is an officer of the United States under sections 203, 205 through 209, and 218; however, if he is serving involuntarily he is a special Government employee. For the purposes of these sections, an enlisted member of the Armed Forces is not a special Government employee.

Subsection (b) defines "official responsibility"<sup>2</sup> as the direct administrative or operating authority, whether intermediate or final, and either exerciseable alone or with others, and either personally or through subordinates, to approve, disapprove, or otherwise direct Government action.

Subsection (c) excludes the President and Vice President of the United States, Members of Congress, and Federal judges from the terms "officer" and "employee."<sup>3</sup>

Subsections (d) defines "Member of Congress" and Subsection (e) specifies which entities are included in the "executive branch," the "judicial branch," and the "legislative branch."

#### 6.5.2.2. Background of the Law

The Bribery, Graft and Conflicts of Interest Act of October 23, 1962, consisted of 13 sections applicable to various categories of Federal employees, including Members of Congress, judges, and other officials.<sup>4</sup> The aim of the 1962 consolidation was to bring these categories together under common terminology that would include officers and employees of the three branches of Government.<sup>5</sup> Congress recognized that most of the conflict of interests laws which existed before the act were enacted in the 19th century when serving as a temporary or intermittent employee was rare and the conflict of interest laws were directed at regular Government employees.<sup>6</sup> However, Congress noted in enacting rules for intermittent

<sup>1</sup>The definition of "special Government employee" applies to §§ 203, 205, 208 and 209 of Title 18.

<sup>2</sup>The definition of "official responsibility" applies to §§ 205, and 207 of Title 18.

<sup>3</sup>The terms "officer" and "employee" apply to §§ 203, 205, 207 through 209, and 218 of Title 18.

<sup>4</sup>Pub. L. No. 87-849, 76 Stat. 1119 (1962).

<sup>5</sup>S. REP. NO. 2213, 87 Cong., 2d Sess., reprinted in 1962 U.S.C.C.A.N. 3852, 3856.

<sup>6</sup>*Id.* at 3854

Government employees that significant studies had pointed out that this group of prospective employees had been reluctant to serve because they would have to comply with the same, more restrictive, conflict of interest standards as long term employees.<sup>7</sup> The challenge was to find a way to facilitate the employment of intermittent employees, which would allow Congress to abandon the practice of granting ad hoc statutory exemptions, without relaxing ethical standards or allowing conflicts of interest to exist.<sup>8</sup> Thus, Congress, for the first time, comprehensively addressed the problem by creating a new group of temporary officials and employees who, based upon their limited number of days of Government service within a specific period, would be designated as "special Government employees," specifying standards that are less in some cases than regular employees.

The term "official responsibility" was defined in the original act.<sup>9</sup> The statute was amended in 1970 to add the District of Columbia Delegate to the definition of "public official,"<sup>10</sup> and in 1986, to conform the statute to clarifications made in the Bank Bribery Amendments Act of 1985.<sup>11</sup>

#### **6.5.2.3. Law in Practice**

The definition of "special Government employee" has been incorporated into the recently published Office of Government Ethics Standards of Ethical Conduct regulation in section 2635.102.<sup>12</sup> No comments were received concerning this statute and the Panel is aware of no problems that should be remedied through a statutory change.

#### **6.5.2.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 18 U.S.C. § 202 be retained. It provides definitions vital to the construction of the bribery, gratuities, and conflict of interest statutes.

#### **6.5.2.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement programs without being unduly burdensome.

### **6.5.3. 18 U.S.C. § 203**

## **Compensation to Members of Congress, Officers, and Others in Matters Affecting the Government**

### **6.5.3.1. Summary of the Law**

Section (a) of the statute prohibits officers and employees of the three branches of Government, as well as Members of Congress, Delegates, Resident Commissioners, and Federal Judges, from demanding, seeking, or agreeing to accept compensation for representational services in relation to any proceeding, application, request for a ruling or determination, contract claim, controversy, charge, accusation, or arrest in which the United States is a party or has a direct and substantial interest before any agency, department, court, officer, or military commission. Subsection (a)(2) prohibits anyone from knowingly giving, promising, or offering compensation to these persons for representational services. Subsections b(1) and (2) prohibit these activities relating to officers and employees of the District of Columbia. Subsection (c) provides that the prohibitions above shall apply to special Government employees only in relation to the particular matter in which the special Government employee participated personally and substantially, or which was pending in the department or agency in which the employee was serving, and shall not apply at all if the employee served no more than 60 days.

The penalty for commission of these acts is set out in section 216 of Title 18.

### **6.5.3.2. Background of the Law**

This provision was enacted as a part of the Bribery, Graft and Conflicts of Interest Act of October 23, 1962.<sup>1</sup> It replaced the former section 18 U.S.C. § 281 which had its origins in a statute which was a reaction to Civil War influence peddling scandals.<sup>2</sup> The legislative history of this very early ethics statute indicates that Congress was concerned with preventing Government officials from being paid to "advocate" before departments and bureaus of the Government.<sup>3</sup> The new section repeated the older section's prohibition on Government officials receiving compensation for influence peddling while in office but made a new exemption for special Government employees.<sup>4</sup>

Subsequent amendments expanded the coverage of section 203 to employees and officials of the District of Columbia Government<sup>5</sup> and added certain limited exceptions to the section's applicability.<sup>6</sup>

<sup>2</sup>Act of June 11, 1864, ch. 119, 13 Stat. 123.

<sup>3</sup>*United States v. Myers*, 692 F.2d 823, 854 (2nd Cir.1982).

<sup>4</sup>Pub. L. No. 87-849, § 203(c) 76 Stat. 1119 (1962).

<sup>5</sup>Pub. L. No. 99-646, § 47(a), 100 Stat. 366 (1986).

<sup>6</sup>Pub. L. No. 101-194, § 402(10), 103 Stat. 1748 (1989) added subsections(d) and (e). Subsection (d) exempts certain representations made on behalf of family members or to carry out the duties of an executor or guardian.

### 6.5.3.3. Law in Practice

Section 203 is distinguished from other statutes prohibiting public corruption and conflict of interests by its emphasis upon prohibiting receiving or giving compensation for "representational services." However, courts have differed in the breadth of their reading of the meaning of what constitutes representation *before* an agency. In *United States v. Evans*,<sup>7</sup> the Fifth Circuit Court of Appeals gave what is now section 203(a)(1) a broad reading, finding that a Department of Health Education and Welfare (HEW) student loan collection supervisor could be justly convicted of violating that section based upon evidence that the supervisor had received money from a student loan collection agency with which he dealt throughout his employment at HEW. The only evidence of representational activity was the defendant's attempt to facilitate the employment of the collection agency's managers at HEW. The court held that section 203 should be broadly construed to accomplish its legislative purpose which was to perpetuate the meaning of its predecessor statute.<sup>8</sup> The court also found that the gravamen of this offense is not an intent to be corrupted or influenced, but simply the acceptance of unauthorized compensation.<sup>9</sup> In *United States v. Myers*,<sup>10</sup> the Second Circuit Court of Appeals reversed the "ABSCAM" conviction of a former member of Congress under a more narrow reading of the section. The court found that what is now section 203(a)(1) should apply only to services involving an appearance before a Federal agency and not simply for the rendering of advice concerning agency proceedings, in this case, the coaching of an alien prior to his meeting with immigration officials.<sup>11</sup> That court did suggest, however, that as long as the services were performed before a Federal agency the receipt of compensation would be proscribed for informal as well as formal appearances before Government agencies.<sup>12</sup>

No comments were received concerning this statute, and the Panel is unaware of any special problems which should be remedied through a statutory change.

### 6.5.3.4. Recommendation and Justification

#### Retain

The Panel recommends that 18 U.S.C. § 203 be retained. Together with 18 U.S.C. § 205 and ethical principles prohibiting the use of public office for private gain, the statute protects against the misuse of official influence while in public office.

---

Subsection (c) exempts special Government employees in cases where they are acting for another person concerning a grant or a contract if the agency head concerned certifies that such action is required in the national interest. Subsection (f) was added by Pub. L. No. 101-280 § 5(b)(5), which exempts statements made as testimony under oath or statements required to be made under penalty of perjury.

<sup>8</sup>*Id.* at 480.

<sup>9</sup>*Id.* at 481.

<sup>10</sup>92 F.2 823 (2d Cir.1982).

<sup>11</sup>*Id.* at 857.

<sup>12</sup>*Id.* at 858.

#### **6.5.3.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement programs without being unduly burdensome.

## **6.5.4. 18 U.S.C. § 209**

### **Salary of Government officials**

#### **6.5.4.1. Summary of the Law**

This statute prohibits anyone, with the exception of special Government employees, from receiving any contribution or supplement to salary as compensation for services as an officer or employee of the executive branch, independent agency, or the District of Columbia from any source other than the United States, or a state, county, or municipality. The statute also makes it an offense for anyone to pay, make a contribution to, or supplement the salary of an officer or employee of the above entities. The statute includes several exceptions, including those for pensions, health plans, and other benefits from a former employer. The penalty for violation is imprisonment and/or a fine as set out in Title 18.

#### **6.5.4.2. Background of the Law**

Section 209(a) replaced and modified a similar statute which prohibited a Government employee from receiving salary in connection with Government service from a private source. It was also one of the reformed statutes which were contained in the Bribery, Graft and Conflicts of Interest Act of October 23, 1962.<sup>1</sup> The revised language which banned accepting salary "as compensation for" services clarified existing language which was too vague and did not express the congressional intent.<sup>2</sup>

The amendments since enactment have, for the most part, added additional exceptions to the prohibition against salary supplementation. A 1989 amendment addressed its penalties at 18 U.S.C. § 216.<sup>3</sup>

#### **6.5.4.3. Law in Practice**

At its essence, 18 U.S.C. § 209(a) prevents Government employees from serving two masters. The prohibition of this statute is against being compensated twice for the performance of the employee's official duties. Gifts given for purposes other than for the performance of official acts, compensation for outside employment, and pension benefits from a former employer are not within the ambit of this statute. The statute forbids remuneration with the intent to compensate the employee for the performance of official duties<sup>4</sup> while employed as a public official.<sup>5</sup> Special Government employees are exempted.

The Panel received no comments concerning this provision.

---

<sup>1</sup>Pub. L. No. 87-849 § 1(a), 76 Stat. 1119, 1125 (1962).

<sup>2</sup>S. REP. NO. 2213, 74 Cong. 2d Sess., reprinted in 1962 U.S.C.C.A.N 3852, 3863.

<sup>3</sup>Pub. L. No. 101-194, Title IV, § 406, 103 Stat. 1753 (1989).

<sup>5</sup>*U.S. v. Muntain*, 610 F.2d 1964 (D.C. Cir. 1979).

#### **6.5.4.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 18 U.S.C. § 209 be retained. Its limitations on the supplementation of Federal salaries are instrumental portions of the Government's ethics rules and principles.

#### **6.5.4.5. Relationship to Objectives**

This provision promotes the continued integrity of defense procurement programs without being unduly burdensome.

## **6.5.5. 5 U.S.C. § 7353**

### **Gifts to Federal Employees**

#### **6.5.5.1. Summary of the Law**

This statute prohibits members of Congress, and officers and employees of the executive, legislative, or judicial branches from soliciting or accepting anything of value from a person seeking official action from, doing business with, or conducting activities regulated by the individual's employer. The statute also prohibits soliciting or accepting anything from anyone whose interests may be "substantially affected by the performance or nonperformance of the individual's official duties." Under the statute, the "supervising ethics office" of each branch is authorized to issue implementing instructions.

#### **6.5.5.2. Background of the Law**

This statute was added to Title 5 in November, 1989, as section 303(a) of the Ethics Reform Act of 1989.<sup>1</sup> It was amended in 1990 to make minor technical corrections.<sup>2</sup> The statute is virtually identical to section 101(d) of Exec. Order No. 12674, issued in April, 1989, in its restriction of gifts from outside sources.

#### **6.5.5.3. Law in Practice**

This statute has been comprehensively implemented in the new Office of Government Ethics regulation, Standards of Ethical Conduct for Employees of the Executive Branch, 5 C.F.R. § 2635, subpart B.

No comments were received addressing this provision.

#### **6.5.5.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 5 U.S.C. § 7353 be retained. It provides part of the statutory framework of civil restrictions governing the acceptance or solicitation of gratuities in Federal employment and is an important factor in ensuring integrity in defense procurement. Retention is crucial to the Panel's recommendation elsewhere in this chapter that the parallel gift restrictions at 41 U.S.C. § 423 (a)(2) and (b)(2) can be repealed.

---

<sup>1</sup>Pub. L. No. 101-194, § 303(a), 103 Stat. 1746 (1989).

<sup>2</sup>Pub. L. No. 101-280, § 4(d), 104 Stat. 158 (1990).

#### **6.5.5.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement without being unduly burdensome.

## 6.5.6. 41 U.S.C. § 423(a)(2),(b)(2)

### Procurement integrity (Gratuities)

#### 6.5.6.1. Summary of the Law

Subsection (a)(2) prohibits a "competing contractor"<sup>1</sup> or its agents and employees, during a procurement, from knowingly offering gratuities or any thing of value to a "procurement official."<sup>2</sup> Subsection (b)(2) prohibits a procurement official, during the conduct of a procurement, from soliciting or accepting gratuities from a competing contractor. Section 423 also mandates in subsection (p) that implementing regulations define the term "thing of value" to include "a single uniform Government-wide exclusion at a specific minimal dollar amount."

#### 6.5.6.2. Background of the Law

These subsections were part of the 1988 Procurement Integrity amendments to the Office of Federal Procurement Policy reauthorization legislation. The legislative history on these two subsections is limited, but the report accompanying the House bill states that its goal was to "insist that all contracting persons conduct business in an 'arms length' fashion."<sup>3</sup> Furthermore, the report states this end would be achieved by "prohibiting contractors from offering Federal procurement officials jobs or other things of value during the course of a procurement." "It is hard for Government negotiators to remain independent," the report continues, "when they are being wined, dined and offered lucrative jobs by contractor personnel."<sup>4</sup>

#### 6.5.6.3. Law in Practice

These sections are implemented by FAR 3.104-3, 104-4, and 104-6, which for the most part restate the statute. "Gratuity" is defined in FAR 3.104-4(f)(1) as "any gift, favor, entertainment, or other item having monetary value." Services, conference fees, vendor promotional training, transportation, lodging and meals, discounts not available to the general public, and loans other than from a financial institution are defined as gratuities by this FAR section. Under the present FAR implementation, unsolicited items under \$10 in value are exempted from this definition.

---

<sup>1</sup>A competing contractor is defined in 423(p) as any entity that is, or is reasonably likely to become, a competitor for, or recipient of, a contract or subcontract under such procurement, or any person acting on its behalf.

<sup>2</sup>A procurement official is defined in 423(p) as any civilian or military official or employee of an agency who has participated personally and substantially in any of the following activities: (i) the drafting of specifications; (ii) review and approval of specifications; (iii) the preparation or issuance of a solicitation; (iv) the evaluation of bids or proposals; (v) the selection of sources; (vi) the review and approval of an award, modification, or extension; (vii) any other specific procurement actions as specified by regulation.

<sup>3</sup>H.R. REP. No. 911, 100th Cong., 2d Sess. 18 (1988).

<sup>4</sup>*Id.*

The difficulty with the gratuities provisions of section 423 is that they overlap with other statutes and will soon overlap with a broad executive branch regulation. As directed by the President in Executive Order 126734, the Office of Government Ethics (OGE) recently issued a single standards of conduct regulation applicable uniformly to every employee of the executive branch (57 Fed. Reg. 35006, Aug. 7, 1992, 5 C.F.R. § 2635). It addresses at length the acceptance of gifts and gratuities, constructs for the first time a comprehensive set of rules applicable equally to patent examiners and contract negotiators, and under OGE's broad regulatory charter provides for consistent gift interpretations under 5 U.S.C. § 7353 and 18 U.S.C. § 201(c). Under those uniform regulations, which will become effective on February 3, 1993, all other executive branch employees and most procurement personnel will soon work under common rules recognizing that factors like personal and family relationships, awards, conferences, and professional gatherings realistically deserve special treatment. The new OGE rules also discard pages of fine-print exceptions in favor of a flat rule defining de minimis as \$20, with a \$50 annual cap on gifts from any one source. On the other hand, for the period they are subject to section 423, some procurement employees will be subject to the OGE rules plus the narrower gift rules in the FAR that under no circumstances permit more than a \$10 gratuity during the conduct of a procurement.

The Panel believes the rules should be uniform. Previously, agencies had been free to set their own rules on the acceptance of gratuities, and the restrictions of section 423 appear to have been intended to bring a degree of consistency to widely varying agency standards. With the enactment of 5 U.S.C. § 7353 and the publication of the uniform OGE rules at 5 C.F.R. § 2635, that objective is achieved. Vested with the responsibility to make such a determination, OGE found no reason to treat procurement personnel under a special or more restrictive rule, and on that the Panel agrees. Because of the confusion that will arise after OGE rules take effect on February 3, 1993, the Panel recommends that sections 423(a)(2) and (b)(2) be repealed.

In commenting on the gratuities provisions of section 423, the Council of Defense and Space Industry Association also expressed the widely held belief that there are sufficient statutory curbs against improper gratuities:

The prohibitions against gratuities are overly stringent and redundant to 18 U.S.C. 201 or other statutes. Specifically, it has always been illegal to offer, give, request or accept a gratuity.<sup>5</sup>

The Panel believes there is sufficient law and regulation in the area of gratuities without section 423(a)(2) and (b)(2), and that repeal of those sections is necessary to achieve the end of a single Government-wide standard that will apply in all circumstances.

---

<sup>5</sup>Letter from the Council of Defense and Space Industry Associations (CODSIA) to Robert Wallick and Harvey Wilcox (August 18, 1992).

#### **6.5.6.4. Recommendation and Justification**

##### **Repeal**

Subsections 423(a)(2) and 423(b)(2) should be repealed because they are duplicative of other statutes and regulations that adequately regulate the same conduct. Effective February 3, 1993, executive branch employees will be subject to uniform rules pertaining to gratuities under OGE's new ethics regulation. If these subsections of section 423 are not repealed, procurement officials will be subject to the uniform OGE rules, to the different section 423 rules during the conduct of a procurement, and then again to the OGE rules. Perpetuation of the section 423 rules after February 3 will be confusing and extremely unfair to the persons affected. Such overlap cannot be justified as an ethics measure and will be most inefficient.

#### **6.5.6.5. Relationship to Objectives**

Repeal of these provisions would ensure uniform standards applicable to all Government officials, and, through clarity and simplicity, would promote the integrity of defense procurement.

## 6.5.7. 10 U.S.C. § 2207

### Expenditure of appropriations: limitation

#### 6.5.7.1. Summary of the Law

This statute prohibits money appropriated to DOD from being spent on a contract other than a contract for personal services, unless certain contractual provisions are included. These provisions give the United States the right to terminate a contract if it is determined that the contractor offered or gave a gratuity to obtain a contract or to receive favorable treatment. This law also permits the United States to collect exemplary damages in an amount at least three, but not more than ten, times the cost incurred by the contractor in giving gratuities.

#### 6.5.7.2. Background of the Law

This law was passed as part of the DOD Appropriation Act of 1955.<sup>1</sup> There was no mention of this provision in the Senate or House of Representatives Reports. The law was amended in 1962, but all changes were technical and did not affect the substance of the sections.<sup>2</sup>

#### 6.5.7.3. Law in Practice

This statute is generally referred to as the Gratuities Act. The substance of this law has been implemented by the contract clause at FAR 52.203-3<sup>3</sup>, entitled "Gratuities." The procedures for exercising the Government remedies under the clause are set forth in DFARS, Appendix D, which prescribes notice and hearing procedures that must be followed.<sup>4</sup> This statute and its parallel regulation were cited by the 10th Circuit in 1991, *Francis E. Heydt v. U.S.*, the case of a contract canceled by the Government following a determination that the contractor had paid a gratuity to receive the contract.<sup>5</sup>

The Department of Defense Inspector General (DODIG) cited the recent *Heydt* case as an example of the continued relevance of this statute.<sup>6</sup> It also stated that this statute is necessary to promote financial and ethical integrity in the defense procurement program.<sup>7</sup> The Council of

<sup>1</sup>Department of Defense Authorization Act of 1955, Pub. L. No. 83-458, § 719, 68 Stat. 353.

<sup>2</sup>Act of September 7, 1962, Pub. L. No. 83-458, § 207(a), 76 Stat. 520.

<sup>3</sup>48 C.F.R. § 52.203-3.

<sup>4</sup>48 C.F.R. § 271, Appendix D.

<sup>5</sup>In *Francis E. Heydt Co. v. United States et. al.*, 948 F.2d 672 (10th Cir. 1991), the plaintiff defense contractor supplied the Defense Personnel Support Center with night camouflage desert trousers. That agency discovered that the contractor had paid a gratuity to an agency official before accepting the final two shipments. Following the acceptance of the shipments, a notice of proposed debarment was sent to the contractor and the agency recommended termination of the contract under § 2207 and applicable FAR sections. The case was decided on procedural grounds unrelated to the contract termination issue.

<sup>6</sup>Letter from Derek J. VanderSchaaf, Deputy Inspector General, Department of Defense to Acquisition Law Task Force (July 1, 1992).

<sup>7</sup>*Id.*

Defense and Space Industry Associations (CODSIA) noted that this law conflicts with several others, including the bribery statute at 18 U.S.C. § 201, the Procurement Integrity Act, and the Anti-Kickback Act. CODSIA states that only DOD is subject to the exemplary damages provision addressed in FAR clause 52.203-3. and recommends repeal.<sup>8</sup> The Defense Contract Management District Northeast (DCMDN) of the Defense Logistics Agency recommends an amendment making the termination right of the Government exercisable regardless of the reason for the gratuity from the contractor.<sup>9</sup>

#### **6.5.7.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 10 U.S.C. § 2207 be retained notwithstanding that it is infrequently used and that its exemplary damages provision is unique. This provision offers an administrative alternative in many circumstances that might otherwise require resolution through criminal proceedings. Its requirement for an administrative hearing assures due process to the contractor and prudent application by the Government. Retention of this statute will promote the financial and ethical integrity of defense procurement.

Exemptions related to a recommended simplified acquisition threshold are discussed in detail in chapter 4.1.

#### **6.5.7.5. Relationship to Objectives**

This statute promotes the ethical integrity of defense procurement without being unduly burdensome.

---

<sup>8</sup>Letter from CODSIA to Gary Quigley and Jack Harding (Aug. 7, 1992).

<sup>9</sup> Letter from Bruce Krasker, Counsel, Defense Contract Management District Northeast, Defense Logistics Agency to Robert Burton, Office of General Counsel, Defense Logistics Agency (Aug.4, 1992)

## **6.6. Employment Discussions**

### **6.6.0. Introduction**

Largely unnoticed among more conspicuous ethics amendments made in 1962 was a modest but significant addition to 18 U.S.C. § 208(a), the basic provision that forbids every executive branch employee from taking official action in any matter in which the official has a financial interest. The amendment expanded that section to forbid taking official action affecting the financial interest of any person with whom an employee is "negotiating or has an arrangement concerning prospective employment." By careful formulation, the 1962 amendment perpetuated the tenet that Federal ethics laws resolve conflicts by restricting the employee's official duties, not his personal economic interests.<sup>1</sup>

The term "negotiating" thereafter was the topic of numerous interpretive opinions rendered by the Attorney General, and later by the Office of Government Ethics (OGE), both of which wrestled with the law's applicability to the grayer shades of negotiating, such as exploratory luncheon conversations about employment. But the law left no middle ground in enforcement: If disqualification from duties had been required by law, the Government's only remedy was criminal prosecution.

Those earlier uncertainties about the scope of section 208(a) appear to be fully resolved by the issuance of OGE's new standards of conduct regulation. An entire chapter of that regulation has for the first time given executive branch employees and military officers a comprehensive manual on the rules governing job seeking. Those include uniform requirements and procedures for employee disqualification that satisfy section 208(a) as well as all other ethical considerations.<sup>2</sup>

Years before that regulation was issued, however, public attention to the "revolving door" in the defense sector prompted congressional concern that section 208(a) might not foreclose a great many preliminary and potentially seductive job discussions during which the industry participants avoided outright "negotiations." In response, Congress enacted two additional restrictions.

The first of those was 10 U.S.C. § 2397a, passed as an amendment to the FY 1986 Defense Authorization Act to complement the reporting requirement at 10 U.S.C. § 2397 for defense employees moving between Government and industry jobs. Its stated purpose was to fill the voids left by 18 U.S.C. § 208(a) and to prescribe a "clear set of circumstances when disqualification is required" during job hunting.<sup>3</sup>

It did so by requiring GS-11s and O-4s (and above) who had performed any of several defined "procurement functions" involving a contractor either to terminate job discussions with that firm immediately when they are first broached, or formally to report the job discussions and

---

<sup>1</sup>Bayless Manning, FEDERAL CONFLICTS OF INTEREST LAW 109 (1964).

<sup>2</sup>Subpart F, 5 CFR 2635.601-606.

<sup>3</sup>S. REP. NO. 41, 99th Cong., 1st Sess. (1985).

to disqualify themselves from further official duties affecting that firm until the discussions terminate.

In large part, section 2397a was viewed at the time as merely codifying defense ethics practices already in use regarding official disqualifications required by 18 U.S.C. § 208(a). It was also perceived as having the virtue of establishing a procedure for imposing administrative penalties that might prove more useful than criminal enforcement under section 208. In practice, however, the elaborate mechanism for administrative penalties has not been used, and the 1989 Ethics Reform Act adopted an alternative structure of civil penalties to better assist in enforcing section 208 and other ethics portions of Title 18.<sup>4</sup> Under those amendments the Government may even sue in Federal court to enjoin improper conduct.

Further, the section 2397a requirement for employee disqualification missed the mark. Whereas it requires employee disqualification after defense contracts have been awarded, it imposes no such requirement while sources are actively being selected or contract prices are being negotiated. Because it has no specified termination, it potentially applies for years after the contract is closed or the employee's duties no longer involve contact with the contractor. By contrast, the new OGE regulations at 5 C.F.R. § 2635 require disqualification during all periods the employee is engaged in official duties potentially affecting the contractor, and they cease to apply when that period of potential conflict has concluded.

The second congressional attempt to fill perceived gaps in section 208 coverage came in 1988 as part of the procurement integrity amendments to the OFPP Act. Those restrictions, which appear in 41 U.S.C. § 423 (a)(1), (b)(1), and (c), apply throughout the executive branch of Government.

With consistent and nearly parallel objectives, section 423 was drafted as a stand-alone procurement ethics code, but as a consequence it also introduced a confusingly different set of standards and principles. The restrictions of section 423 are triggered by a two-phase test that requires the Government employee to have performed any of several specified procurement duties during a specified time frame between the initiation of a procurement and contract award. Upon meeting both tests, the employee becomes a "procurement official" and both he and competing contractors become subject to various restrictions and potentially severe penalties.

The section 423 restrictions on job seeking are unique because they invert the theory of both 10 U.S.C. § 2397a and the OGE regulations implementing section 208(a). Under the latter, a Government employee interested in job hunting must disqualify himself from ongoing official business with a contractor, but once isolated from the contractor's business he is permitted to explore outside employment opportunities because the public is protected from the opportunity for self-dealing.

With the addition of section 423, however, the employee may disqualify himself under the standard OGE procedures only before duties have made him a "procurement official." If the official acquired that status because of participating in the procurement during its preparation and

---

<sup>4</sup>Pub. L. No. 101-194, § 407, 103 Stat. 1753, codified at 18 U.S.C. § 216.

solicitation stages, the official must make written application to the activity head for permission to disqualify himself. Approval of the request is entirely discretionary, and under procedures prescribed in the FAR, it must balance factors such as the employee's importance to the timely conclusion of the procurement on schedule.<sup>5</sup>

On the other hand, if the employee is a "procurement official" because of participation in the source selection or negotiation stages of the procurement, then the employee is totally ineligible to be disqualified, must continue with his official duties through the remainder of the procurement, and must postpone all employment discussions with the contractor until the day following contract award.

These provisions illustrate the problems of statutory layering. Sections 2397 and 423 are each thoughtfully shaped patches for gaps perceived in a permanent provision of law, but by their individuality and detail they replicate so much of it that the effect has been to subject employees to three distinct sets of overlapping rules: one that applies permanently, one that applies occasionally, and one that may switch on and off. Each is triggered by different conduct, is defined in different terms, imposes a different restriction, and threatens a different penalty.

With the issuance of the OGE regulations at 5 C.F.R. § 2635, the Panel believes the negotiating restrictions of sections 2397a and 423 have lost their former utility. Through its authority to issue rules bearing administrative enforcement sanctions, OGE has effectively and, the Panel believes, more appropriately addressed the technical shortcomings of section 208(a) without formulating a separate set of overlapping, and occasionally competing, standards. Violations of section 208(a) now subject employees to civil penalties under section 216 as well as to criminal penalties, and in flagrant cases contractors can be prosecuted under the aiding and abetting provisions of 18 U.S.C. § 2.

Effective February 3, 1993, the OGE regulations will apply to all executive branch employees and military officers engaged in procurement. Beginning then, the chief substantive contributions of sections 2397a and 423 will be the individual formalities by which they require disqualification by Government employees. Government and industry comment on these provisions uniformly ranked clarity in the applicable rules as their foremost priority. Because the new uniform rules at 5 C.F.R. 2635 have been drafted to provide comprehensive executive branch treatment of this subject, the Panel believes that clarity and enforceability would best be achieved by repeal of sections 2397a and 423(a)(1), (b)(1), and (c).

---

<sup>5</sup>FAR 3.104-6.

## 6.6.1. 18 U.S.C. § 208

### Acts affecting a personal financial interest

#### 6.6.1.1. Summary of the Law

18 U.S.C. § 208 generally prohibits public officials from self-dealing while employed by the Government. It prohibits officers and employees of the executive branch from participating personally and substantially through decision, approval, disapproval, recommendation, advice, investigation, or otherwise in a proceeding, application, or request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter which, to their knowledge, affects their own financial interest or that of their spouses, minor children, general partners, or organizations in which they are serving or entities with which they are negotiating or have a future employment arrangement. Penalties are set forth in 18 U.S.C. § 216.

#### 6.6.1.2. Background of the Law

The original section 208 was modeled on a former section of Title 18 (18 U.S.C. § 434) which disqualified a Government employee who had an interest in the profits or contracts of a business entity from dealing with that entity. The genesis of section 434 (now section 208(a)) was an 1868 statute which applied to conflicts of interest involving "the transaction of business." A phrase taken from a New York Bar Association Model Code conflict of interest provision pertaining to transactions involving the Government was incorporated in a major revision of the Bribery, Graft and Conflicts of Interest Act of October 23, 1962<sup>1</sup>, the first comprehensive conflict of interest statute passed by Congress. The aim of that statute, as it applied to revision of the conflict of interest laws, was two-fold: to simplify and strengthen existing law, and to adapt the conflict of interest laws to satisfy Governmental requirements for part-time civil servants who had specialized technical and scientific expertise sometimes demanded by Government.<sup>2</sup> The new section not only prohibited participation in matters in which the official had a financial interest, but also prohibited his participation in matters in which an immediate family member, close organizational associate, or one with whom the official was negotiating or had an arrangement concerning prospective employment, had an interest.<sup>3</sup>

Recognizing that conflicts of interest may not only involve business interests and business transactions, but also "organizational" interests, Congress broadened the definition to encompass conflicts resulting from associations with universities, foundations, nonprofit research entities and other similar organizations.<sup>4</sup> Those 1962 amendments also added a provision authorizing *ad hoc* agency waiver of insignificant interests or otherwise in accordance with agency regulations.<sup>5</sup>

<sup>1</sup>Pub. L. No. 87-849, § 1(a) 76 Stat. 1119, 1124 (1962).

<sup>2</sup>S. REP. NO. 2213, 87 Cong. 2d Sess. (1962), *reprinted in* 1962 U.S.C.C.A.N. 3852, 3862.

<sup>3</sup>*Id.*

<sup>4</sup>*Id.*

<sup>5</sup>*Id.* at 3863.

Subsequent amendments made the section applicable to directors and employees of Federal Reserve Banks<sup>6</sup> and to employees of the District of Columbia Government.<sup>7</sup>

In March 1989, the President's Commission on Federal Ethics Law Reform made numerous significant recommendations, many of which were subsequently enacted in the Ethics Reform Act of 1989.<sup>8</sup> One of the provisions in the legislation clarified section 208's applicability to various disqualifying financial interests which had been troublesome, such as partnership interests. The amendments also restructured authorities and streamlined the procedure for granting waivers under certain circumstances, such as service on Federal advisory committees.<sup>9</sup> It further made the Office of Government Ethics (OGE), in consultation with the Attorney General, the agency responsible for issuing the executive branch-wide waivers contemplated by section 208(b)(2).

### 6.6.1.3. Law in Practice

OGE's Government-wide implementation of relevant portions of section 208 is contained in its recently-published regulation at 5 C.F.R. § 2635. That regulation has gone into detail concerning both disqualifying financial interests (subpart D) and employment negotiations (subpart F), and provides definitions for the significant terms contained within the statute as well as requirements and disqualification procedures satisfying section 208(a).

The Panel considered 18 U.S.C. § 208 chiefly for its role in the procurement process, and most especially for its effect on negotiations for future employment by procurement personnel. The statute has survived legal challenges that the terms "negotiating" and "arrangement for future employment" are impermissibly vague.<sup>10</sup> Nevertheless, concern in Congress that the full panoply of job seeking activity was not covered by the criminal statute has prompted the enactment of additional restrictions, such as 10 U.S.C. § 2397a and 41 U.S.C. § 423(a)(1) and (b)(1) which are addressed elsewhere. The implementation of section 208(a) in the new 5 C.F.R. 2635 regulations should satisfy those concerns. The new OGE guidance not only requires disqualification when an employee is "negotiating," as interpreted in the case law, but also following the dispatch of an unsolicited communication regarding possible employment, such as sending a resume, or making a response other than a rejection to an unsolicited job offer.<sup>11</sup>

No comments were received specifically addressing this provision.

<sup>11</sup>5 C.F.R. § 2635.603

#### **6.6.1.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 18 U.S.C. § 208 be retained without change. It provides the foundation for the basic rules and uniform regulations governing conflicting financial interests of Government employees.

#### **6.6.1.5. Relationship to Objectives**

This statute promotes the integrity of defense procurement programs without being unduly burdensome.

## **6.6.2. 10 U.S.C. § 2397a**

### **Requirements relating to private employment contacts between certain Department of Defense procurement officials and defense contractors**

#### **6.6.2.1. Summary of the Law**

This section mandates the reporting of "contacts" regarding future employment opportunities made by defense contractors to certain middle and senior level defense officials who have performed a procurement function on a contract awarded by DOD. The section also mandates that the defense official disqualify himself from all participation in the performance of a procurement function on that contractor's contracts if employment opportunities have not been rejected. Should the Secretary of Defense determine the official has failed to make the required report or has failed to disqualify himself in accordance with this section, the statute requires that the person not accept or continue employment with that contractor for 10 years from the date of termination of Government service. For violation of this provision, the Secretary of Defense may impose an administrative penalty of \$10,000 or less depending on the circumstances. The statute also provides that designated agency ethics official should be consulted and may issue written opinions concerning the necessity for disqualification. Further, the statute establishes a rebuttable presumption that failure of an official to disqualify himself from procurement functions is not a violation if the official received a written opinion that disqualification was unnecessary.

#### **6.6.2.2. Background of the Law**

Section 2397a was introduced in the 1986 DOD Authorization Act<sup>1</sup> in response to what Congress perceived to be increased public attention over the number of DOD civilian employees and military officers leaving DOD and going directly to work for major defense contractors whom they monitored while employed by the Government.<sup>2</sup> Congress added section 2397a at the same time it strengthened reporting requirements in section 2397. In consideration of this amendment, the Senate Armed Services Committee reviewed and heard testimony on various statutes that were concerned with regulating the "revolving door" including the military selling statutes and the criminal statutes 18 U.S.C. §§ 207 and 208.

The Committee concluded that the most relevant criminal statute, 18 U.S.C. § 208, did not squarely address its paramount concern -- preliminary employment discussions or "contacts" -- because it was aimed at employment contacts that rose to the level of negotiations over a particular job.<sup>3</sup> The Committee did not believe early employment contacts were addressed by section 208, nor that any other statute prohibited employees from seeking employment with contractors affected by their official duties. After considering several alternatives, including an

<sup>1</sup>Department of Defense Authorization Act, 1986, Pub. L. No. 99-145, Title XI § 923(a)(1), 99 Stat. 695 (1985)

<sup>2</sup>S. REP. NO. 41, 99th Cong. 1st Sess. 210 (1985).

<sup>3</sup>*Id.*

outright ban on employment for certain officials with certain contractors, the Committee compromised on section 2397a, which required that only those with personal and substantial participation in the performance of a procurement function report contacts or disqualify themselves from further participation in contract functions.<sup>4</sup>

Under the compromise, an initial contact did not have to be reported or acted upon if the employee terminated the contact immediately; but, if the employee pursued the employment discussions, he would have to disqualify himself. Disqualification was already a practice within DOD<sup>5</sup> and in codifying this process in section 2397a, Congress felt it was providing a "clear set of circumstances when disqualification is required."<sup>6</sup>

This section was suspended for one year from December 1, 1989,<sup>7</sup> and again from December 1, 1990 to May 31, 1991<sup>8</sup> to afford the Administration further opportunity to present its case for repeal. Failing agreement by the Congress and DOD, on amendment or repeal, it returned to effect.

### 6.6.2.3. Law in Practice

The expressed purpose of section 2397a was to fill voids left by 18 U.S.C. § 208(a) and to prescribe a "clear set of circumstances when disqualification is required" during job-hunting. It did so by requiring GS-11s and O-4s (and above) who had performed any of several defined "procurement functions" regarding a contractor either to terminate job discussions with that firm immediately when they are first broached, or formally to report the job discussions and to disqualify themselves from further official duties affecting that contractor until the discussions terminate.

In large part, section 2397a was initially viewed as merely codifying defense ethics practices already in use regarding official disqualifications required by 18 U.S.C. § 208(a). It was also perceived as having the virtue of establishing a procedure for imposing administrative penalties that might prove more useful than criminal enforcement under section 208.

In practice, however, its mechanism for administrative penalties has not been used, and its requirement for employee disqualification has not been effective. Whereas section 2397a requires employee disqualification after defense contracts have been awarded, it imposes no such requirement while sources are actively being selected or contract prices are being negotiated; and because it has no specified termination, it potentially applies for years after the contract is closed or the employee's duties no longer involve contact with the contractor. By contrast, the new Office of Government Ethics regulations at 5 C.F.R. § 2635 require disqualification during all

---

<sup>7</sup>Ethics Reform Act of 1989, Pub. L. No. 101-194, 103 Stat 1759 (1989).

<sup>8</sup>National Defense Authorization Act for 1991, Pub. L. No. 101-510, Div. A, Title VIII, § 815(a)(2), 104 Stat. 1485, 1597 (1990).

periods the employee is engaged in official duties potentially affecting the contractor, and they cease to apply when that period of potential conflict has concluded.

#### **6.6.2.4. Recommendations and Justification**

##### **Repeal**

With the issuance of the OGE regulations at 5 C.F.R. § 2635, the Panel believes the negotiating restrictions of section 2397a have lost their utility. Through its authority to issue rules bearing administrative enforcement sanctions, OGE has effectively and, the Panel believes, more appropriately, addressed the technical shortcomings of section 208(a) without formulating a separate set of overlapping standards. Violations of section 208(a) now subject employees to civil penalties under 18 U.S.C. § 216 as well as to criminal penalties. In flagrant cases contractors can be prosecuted under the aiding and abetting provisions of 18 U.S.C. § 2.

Effective February 3, 1993, the OGE regulations will apply to all executive branch employees engaged in procurement. Beginning then, the chief substantive contribution of section 2397a will be the formality by which it requires disqualification by Government employees. Government and industry comment on these provisions uniformly ranked clarity in the applicable rules as their foremost priority. Because the new uniform rules at 5 C.F.R. § 2635 have been drafted to provide comprehensive executive branch treatment of this subject, the Panel believes that clarity and enforceability would best be achieved by repeal of section 2397a.

#### **6.6.2.5. Relationship to Objectives**

Repeal of this statute would clarify existing rules and ensure uniform standards applicable to all Government employees, thereby promoting continued integrity of defense procurement programs.

### 6.6.3. 41 U.S.C. § 423 (a)(1), (b)(1), (c)

#### Procurement integrity (Employment discussions)

##### 6.6.3.1. Summary of the Law

Subsection (a)(1) prohibits a "competing contractor"<sup>1</sup> or its agents and employees from knowingly offering employment or business opportunities to "procurement officials" "during the conduct of a procurement."<sup>2</sup> Subsection (b)(1) prohibits "procurement officials" from soliciting or accepting employment or business opportunities from a "competing contractor" "during a procurement." Under (c), procurement officials may talk to a competing contractor concerning employment under conditions which would be prohibited by (b) if the head of the agency approves a written proposal from the employee for disqualification from the procurement while the employment possibility is still open. The head of the procuring activity may also determine the length of the recusal period, including a finding that recusal is necessary for a reasonable time after the discussions terminate. When a procurement official is offered employment during the procurement process, recusal is forbidden if the official has participated personally and substantially in bid or proposal evaluation, source selection, or negotiations.

##### 6.6.3.2. Background of the Law

These subsections were part of the 1988 Procurement Integrity amendments to the Office of Federal Procurement Policy (OFPP) reauthorization. The limited legislative history on these three subsections suggests their goal was to "insist that all contracting persons conduct business in an 'arms length' fashion."<sup>3</sup> "It is hard for Government negotiators to remain independent," the report continues, "when they are being wined, dined and offered lucrative jobs by contractor personnel."<sup>4</sup> The recusal provision, subsection (c), was added as an amendment to the OFPP Act at section 27.<sup>5</sup> This amendment, worked out by a conference agreement, added subsection (c) to "make it clear that the Act permits recusal of procurement officials in appropriate circumstances."<sup>6</sup> Congress was also concerned that regulations contain specific criteria relating the recusal request to the specific procurement situation and desired that such things as the timing

---

<sup>1</sup>A competing contractor as defined in section 423(p) means any entity that is, or is reasonably likely to become, a competitor for or recipient of a contract or subcontract under such procurement, or any person acting on its behalf.

<sup>2</sup>A procurement official is defined in section 423(p) as any civilian or military official or employee of an agency who has participated personally and substantially in any of the following activities: (i) the drafting of specifications; (ii) review and approval of specifications; (iii) the preparation or issuance of a solicitation; (iv) the evaluation of bids or proposals (v) the selection of sources; (vi) the review and approval of an award, modification, or extension; (vii) any other specific procurement actions as specified by regulation.

<sup>4</sup>*Id.*

<sup>5</sup>National Defense Authorization Act for 1990 and 1991, Pub. L. No. 101-189, Div. A, Title VIII, Part B, § 814(c), 103 Stat. 1352, 1495-1 (1989).

<sup>6</sup>H.R. CONF. REP. NO. 331, 101 Cong., 1st Sess. 605 (1989).

of the request and the degree to which the official was involved in key procurement actions be considered in the decision to disqualify.<sup>7</sup>

### 6.6.3.3. Law in Practice

These sections are implemented by FAR 3.104-3, 104-4, and 104-6.

The restrictions of section (b)(1) have created a confusing and burdensome overlap with other statutes and regulations. Two of those laws, 18 U.S.C. § 208 and 10 U.S.C. § 2397a, are primarily concerned with employment discussions. The first, 18 U.S.C. § 208, prohibits an officer or employee from participating personally and substantially "through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise" in a "contract, claim, controversy . . . or other particular matter in which . . . any person or organization with whom he is negotiating, or has an arrangement with concerning prospective employment, has a financial interest." If the official is prevented from participating in a particular matter he must, under the Office of Government Ethics (OGE) regulation implementing this provision of section 208, disqualify himself from "any matter which will have a direct and predictable effect on the financial interest of the prospective employer."<sup>8</sup> The regulation requires disqualification even when the employee's conduct falls short of actual negotiations, and proscribes involvement in particular contract matters even if an employee has merely sent out a mass mailing of resumes to several prospective employers, including the one which might be considered a competing contractor under section 423.

The second statute, 10 U.S.C. § 2397a, requires defense officials in mid to high level grades who have participated in a procurement function, including some functions regarded as contract administration duties, to promptly report to their supervisor any contact concerning future employment and to disqualify themselves from all participation in the performance of procurement functions related to that contractor. Essentially, each of these statutes addresses the same conduct.

Sections 423 (a)(1) and (b)(1) are the third and most narrow application of the same fundamental restriction. For defense personnel, these provisions appear to be subsumed by the other two statutes and their regulatory implementation. The section 423 restrictions on job-seeking are unique because they invert the theory of both 10 U.S.C. § 2397a and the OGE regulations implementing section 208(a). Under the latter, a Government employee interested in job-hunting must disqualify himself before he may explore outside employment opportunities. With the addition of section 423, however, the employee may disqualify himself under the standard OGE procedures only before duties have made him a "procurement official." If the employee acquired that status because of participation in the procurement during its preparation and solicitation stages, the employee must make written application to the activity head for permission to disqualify himself. Approval of the request is entirely discretionary, and under the procedures prescribed in FAR 3.104-6 it must balance factors like the employee's importance to the conclusion of the procurement on schedule.

---

<sup>7</sup>*Id.*

<sup>8</sup>Standards of Ethical Conduct for Employees of the Executive Branch, 5 C.F.R. § 2635.602 (1992).

On the other hand, if the employee is a "procurement official" because of participation in the source selection or negotiation stages of the procurement, then the employee is totally ineligible to be disqualified, must continue with official duties through the remainder of the procurement, and must simply postpone all employment discussions with the contractor until the day following contract award.

As the Council of Defense and Space Industry Associations stated in its formal comment upon the employment discussions issue, "The law should be modified to purge overlapping 'revolving door' laws. Current standards-of-conduct laws are too complex for those covered to understand."<sup>9</sup>

In addition to the civil penalties outlined in section 423 for paragraphs (a)(1) and (b)(1), 18 U.S.C. § 216 establishes civil penalties to accompany the criminal penalties for violation of section 208. This seems to make the civil penalties for violation of these subsections unnecessary. With regard to (a)(1), any contractor who offers employment to a Government employee working on a procurement affecting that contractor's interest may also be guilty of violating 18 U.S.C. § 201, which prohibits offering a bribe or an illegal gratuity.

#### **6.6.3.4. Recommendation and Justification**

##### **Repeal**

With the issuance of the OGE regulations implementing 18 U.S.C. § 208(a) at 5 C.F.R. § 2635, the Panel believes the procurement integrity restrictions have lost their necessity and former utility. The OGE rules will effectively and, the Panel believes, more appropriately address the technical shortcomings of section 208(a) without formulating a separate set of overlapping rules. Violations of Section 208(a) now subject employees to civil penalties under 18 U.S.C. § 216, as well as to criminal penalties and administrative sanctions.

The new OGE regulations will become effective February 3, 1993, after which the chief substantive contribution of sections 423 (a)(1) and (b)(1) will be the procedural requirements they prescribe for employee disqualification. Because the new OGE rules have been drafted to provide comprehensive and uniform treatment of this topic, the Panel believes that clarity and enforceability would best be promoted by repeal of these provisions as well as repeal of section 2397a.

#### **6.6.3.5. Relationship to Objectives**

Repeal of these provisions would clarify existing rules and ensure uniform standards applicable to all Government employees, thereby ensuring continued integrity in defense procurement programs.

---

<sup>9</sup>Letter from the Council of Defense and Space Industry Associations (CODSIA) to Robert Wallick and Harvey Wilcox (Aug. 18, 1992).

## **6.7. The Revolving Door**

### **6.7.0. Introduction**

The Panel undertook its consideration of the so-called "revolving door" laws with sensitivity that its charter to review laws inadvertently impeding the buyer-seller relationship did not so obviously embrace laws deliberately impeding the private employment of former procurement officials. The Panel pursued this topic only when it became clear that the piecemeal accretion of special prohibitions and penalties, albeit focused on private, post-Government conduct, may have generated such a degree of distraction, and such a mounting disincentive for capable persons to serve in responsible procurement positions, that review was imperative.

The Panel is aware of the enormous attention given to this topic in 1991 by several committees of the Congress, especially the Senate Committee on Governmental Affairs, the House Committee on Government Operations, and both committees on Armed Services.<sup>1</sup> Bills proposed by OFPP and OGE, and several alternatives that originated in those committees, shared a consensus that the subject has become overly complex but diverged irreconcilably in their approaches to a solution. The Panel urges Congress to renew this debate, although perhaps with a different approach.

The pyramid of post-employment laws facing departing defense employees has been addressed with increasing frequency<sup>2</sup> and is graphically portrayed in the chart at Fig. 6-B of the Ethics introduction.

Every executive branch employee is first subject to the lifetime representation restriction of 18 U.S.C. § 207(a)(1) as to any matter the employee handled personally, and to the two year representation restriction of section 207(a)(2) as to matters that were under the employee's responsibility during his final year of service. Those provisions address what in 1962 Congress viewed as the most pressing concerns: using Governmentally acquired knowledge against the Government, and using personal stature and contacts to open Government doors. Their remedy was to limit what the employee might do, but not where the employee might work.

Next, employees who during their final year participated in trade or treaty negotiations are barred by 18 U.S.C. § 207(b) for a year from assisting any other party in those proceedings. Officers and employees at the upper rates of Senior Executive Service (SES) pay are subject to two more restrictions: a one year ban imposed by section 207(f) on assisting any foreign entity before the Government, and a one year "cooling off period" imposed by section 207(c) on anything but purely personal or social contact with their former agencies.

---

<sup>1</sup>Hearing before the Subcommittee on Oversight of Government Management, Senate Committee on Governmental Affairs, February 26, 1991, S. Hrg. 102-59, 102d Congress, 1st Session; Hearing before the Investigations Subcommittee, House Committee on Armed Services, May 9, 1991, H.R. Hrg. 102-21, 102d Congress, 1st Session.  
<sup>2</sup>*Id.*; REPORT OF THE PRESIDENT'S COMMISSION ON FEDERAL ETHICS LAW REFORM, TO SERVE WITH HONOR 53-78 (1989); REPORT OF THE NATIONAL ACADEMY OF SCIENCES, SCIENCE AND TECHNOLOGY: LEADERSHIP IN AMERICAN GOVERNMENT, ENSURING THE BEST PRESIDENTIAL APPOINTMENTS 75-87, 1992.

Emitting yet an additional "cooling off" restriction applicable only to cabinet members, 18 U.S.C. § 207 thus imposes five basic post-employment restrictions upon all executive branch employees. Atop those, then, are the special purpose rules applicable only to defense or procurement personnel.

In nearly indecipherable terms, three of those restrictions are imposed by 10 U.S.C. § 2397b. In brief, the first reaches middle level employees who perform specified procurement duties on a major weapons system for more than half their working days during their final two years, and do so through contact with the contractor. The second applies to middle level employees who spend a majority of working days during their final two years performing the same types of procurement duties at a plant owned or operated by the contractor. The third addresses senior employees who in their last two years served as one of the Government's primary representatives in negotiating a \$10 million contract or claim with the contractor. Under section 2397b, these employees are forbidden from accepting compensated employment with the contractor for two years after separation.

Added to those eight rules are two imposed by the procurement integrity amendments at 41 U.S.C. § 423(f). Applying a different construction and definition of procurement duties and procurement official, section 423(f) becomes applicable when an employee's participation occurs during the conduct of a procurement; in that event he may not, for two years, assist in performing that contract or in negotiating changes to it.

Then, if the procurement official is a military officer, he is subject to two final restrictions. For two years 18 U.S.C. § 281 forbids him from selling "anything" to his former service, and for three years 37 U.S.C. § 801 forbids him from selling "supplies or war materials" to any DOD component. Thus in the officer's case, he must understand and comply carefully with 12 different restrictions on post-Government employment.

The Director of the Office of Government Ethics (OGE) has proposed repealing all seven of these special procurement related restrictions. He has testified that they are largely redundant of Government-wide restrictions already in place, and that the widespread confusion they have introduced is counterproductive to an effective executive branch ethics program.<sup>3</sup> Throughout Government these restrictions are counted high in the growing list of disincentives to Government service.<sup>4</sup>

There appears to be broad agreement that the two military selling statutes are relics of another era; 37 U.S.C. § 801 is a Korean War enactment and 18 U.S.C. § 281 originated during the Civil War. Both clearly have been superseded in purpose by the analogous provisions of section 207 that forbid any retirees, for specified periods of time, from making representations back to the Government on matters they had handled or that were under their supervision. Periodic recommendations for repeal traditionally meet no objection, but these laws remain on the books as minor hostages in the broader debate about simplifying the entire topic. The Panel

<sup>3</sup>Statement of Stephen D. Potts, presented to Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, Feb. 26, 1991, S.Hrg. 102-59, 102d Congress, 1st Session.

<sup>4</sup>REPORT OF THE NATIONAL ACADEMY OF SCIENCES 83-85.

agrees that 18 U.S.C. § 281 and 37 U.S.C. § 801 serve no useful purpose and that their repeal should proceed without relation to any other changes under consideration.

The five post-employment restrictions imposed by sections 2397b and 423(f), on the other hand, impose unique conditions that are not duplicated elsewhere. Proposals for their repeal have been greeted with little congressional enthusiasm because of concern that, while they may not be artful, they still serve a necessary function.

The three convoluted restrictions of section 2397b were enacted largely in response to public attention drawn by the press in the middle 1980s to the private employment of several defense officials, including the assistant secretary of a military service who accepted employment with a division of a major defense contractor shortly after handling a multimillion dollar dispute with another division of the same firm. This employment did not abridge the 18 U.S.C. § 207 rules against switching sides on particular matters, but the fact of his employment, like that of plant representatives and program managers, was perceived as inappropriate and as posing at least the appearance of a conflict.

For all its complexity, however, section 2397b reaches only a tiny percentage of procurement officials: those few who work at a contractor's plant, concentrate on a single weapons program, or handle a \$10 million dispute. The thousands of legal opinions issued to comply with this provision suggest the number to be about 2% of the population exploring employment, in which event it may be exceeded by the number of Government lawyers devoted to its enforcement.

Closely following the disclosures of Ill Wind, the two post employment restrictions imposed by section 423(f) seem to have been added to guard against the release of source selection and procurement-sensitive information, but in that they are not uniformly successful. By their breadth they also tend to foreclose the legitimate use of former employees' talent and expertise in areas of common interest. An engineer who had participated in formulating the specifications may be forbidden from designing production tooling at a time when the objectives of the Government and the contractor are aligned, and a logistician may be barred from assisting on a Government directed change as to which his earlier knowledge of the competition is valueless.

It is the Panel's opinion that neither section 2397b nor 423(f) merits the toll either exacts on Government efficiency. By their complexity both provisions command grossly disproportionate portions of Government and corporate administrative attention, and by their overreaching they have become disincentives to Government service. The Panel does not share the premise reflected by these restrictions that the potential for conflicts arising out of the award of contracts exceeds that arising in other executive endeavor, as in regulating banks or licensing drugs.

It is even less clear that this potential for conflict deserves blanket prohibitions on private employment that in the history of Federal ethics laws are unique for their severity. These provisions convey a damaging and unwarranted impression that procurement officials are among

the least worthy of public trust. It is the Panel's recommendation, therefore, that sections 2397b and 423(f) be repealed.

From the long record of congressional debate on these laws the Panel recognizes that there are many differing views on their merit. To the extent that they were initially enacted out of concern that through cordial treatment Government employees might curry favor with prospective private employers, the Panel believes those concerns are met by the comprehensive new OGE regulations under section 208(a).

The remaining thread of commonality between the two laws appears to be a concern that non-public information might be used to the Government's disadvantage through behind-the-scenes assistance that is not effectively restricted by the representation bar of section 207(a)(1). If that remains a concern, the Panel believes it would more fittingly be addressed in section 207, where it would join the main body of Federal post-employment restrictions and could draw from a common framework of terms and definitions.

Congress recently used this approach when it added section 207(b) to meet concerns about switching sides in trade or treaty negotiations, and from that pattern the Panel has drafted a procurement counterpart section 207(x) as a potential alternative to sections 2397b and 423(f). This new provision would apply to any employee who under section 207(a)(1) is already barred for life from representation back to the Government because of personal and substantial participation on a procurement; it would forbid that person from giving a private employer behind-the-scenes assistance on the strength of non-public information he had acquired about that procurement. If drafted without the over attention to minutiae that has crippled sections 2397b and 423(f), the Panel believes this proposal represents a model that could be refined to address the concerns those laws sought to correct.

## **6.7.1. 18 U.S.C. § 207**

### **Restrictions on former officers, employees, and elected officials of the executive and legislative branches**

#### **6.7.1.1. Summary of the Law**

This statute prohibits certain acts by former Government employees that constitute or might constitute the unfair use of prior Government employment. Sanctions provided in the law include prison terms, fines, and administrative remedies.

Section 18 U.S.C. § 207(a)(1) prohibits any person for life from representing anyone else before the Government on matters the he handled personally and substantially while a Government official.

Section 207(a)(2) prohibits any person for two years from representing anyone else before the Government on matters that had been under his official responsibility during the last year of Government service.

Other sections which may apply to DOD employees are 18 U.S.C. § 207(b), which prohibits anyone for one year from assisting others in trade or treaty negotiations the employee had been engaged in during his final year of Government service; 18 U.S.C. § 207(f), which for one year prohibits former senior officials from assisting foreign entities before the Government; and 18 U.S.C. § 207(c), which prohibits former senior officials for one year from making any communication or appearance before his former agency.

#### **6.7.1.2. Background of the Law**

Section 207 was part of the first comprehensive conflict of interest statute passed by Congress. Congress determined that a new statute was necessary because existing laws were confusing, inadequate, and had become a hindrance to the Government.<sup>1</sup> As enacted in 1962, section 207 replaced two earlier statutes that dealt with conflicts of interest. The first, 18 U.S.C. § 284, prohibited former Government employees, for a two-year period after termination of Government employment, from prosecuting a claim against the United States involving any subject matter with which the employee was connected during Government employment. The second, 5 U.S.C. § 99, prohibited a former employee of an executive department, for a two-year period, from prosecuting any claim pending in any department during the former employee's Government employment. Section 207 was intended to close the "revolving door" between Government service and private industry.

The Ethics In Government Act of 1978, Pub. L. No. 95-521, as amended by Pub. L. No. 96-28, strengthened the post-employment restrictions of section 207. The 1978 amendment

---

<sup>1</sup>S. REP. NO. 2213, 87th Cong., 2d Sess. (1962), *reprinted in* 1962 U.S.C.C.A.N. 3852, 3853.

added a one-year "cooling off" period during which a former senior Government official is prohibited from representing anyone other than the United States before an agency in which he had served during his final year on any matter pending before the agency. The amendment also extended to two years the prohibition against representing private parties on matters that had been under the former employee's official responsibility during his last year of Government service. The amendment maintained the lifetime ban that prohibits a former official from acting in matters in which the official had been personally and substantially involved at any time during Government service. General rulemaking, formulation of general policy or standards, administrative matters, and legislative activities are not covered by the ban.

The Act addressed a number of perceived deficiencies in the standards for present and former Government employees: (1) the failure of executive departments to tailor regulations to individual agency and employee responsibilities; (2) ineffective procedures to ensure collection, review, and control of financial disclosure statements; (3) ineffective and untimely resolution of conflict of interest issues; and (4) the lack of a centralized supervisory authority. It mandated the creation of an Office of Government Ethics (OGE) under the Office of Personnel Management, (OPM) charging OGE with developing rules and regulations for the executive branch, monitoring agency compliance, issuing advisory opinions, requiring agency corrective actions, and developing and recommending further rules and regulations to be promulgated by the President or OPM. Additionally, the 1978 Act established the mechanism for the appointment of independent counsels and established the requirement for public disclosure of the financial interests of senior Government officials.

The Ethics Reform Act of 1989, Pub. L. No. 101-194, made a number of additional changes, including extension of the post-employment "revolving door" restrictions of section 207 to the legislative branch and extending the authority of OGE to limit the one-year "no contact" ban on former Government officials to a separate statutory agency or bureau within a department or agency. The amendment made it clear that limitation does not apply to a former head of the designated agency or bureau or to any officer or employee whose official responsibilities included supervision of the designated agency or bureau.

### 6.7.1.3. Law in Practice

For the purposes of this review the Panel considered the most relevant subsections of section 207 to be subsections (a)(1) and (2). The basic prohibition in section 207(a) is on representational activities carried out "with the intent to influence."<sup>2</sup> "Representation" is broadly defined to include formal or informal appearances, and oral or written communications. The OGE regulation at 5 C.F.R. § 2637.201, implementing section 207 as in effect prior to its most recent amendments, defines representation as "acting as agent or attorney, or other representative in an appearance, or communication with intent to influence."<sup>3</sup> An appearance is said to occur when an individual is "physically present before the United States in either a formal or informal setting or conveys material to the United States in connection with a formal proceeding or application."<sup>4</sup> A

---

<sup>2</sup>18 U.S.C. § 207(a)(1).

<sup>3</sup>5 C.F.R. § 2637.201(b).

<sup>4</sup>*Id.* at 201(b)(3).

recent judicial interpretation of virtually the identical predecessor to section 207(a) held that a former employee's delivery of a bid package to his former agency did not constitute an "appearance" within the meaning of this restriction, and that the former employee did not deliver the bid with the intent to influence.<sup>5</sup> In an earlier case, on the other hand, a former employee's mere presence at a meeting related to tax cases, which had been within the employee's supervisory responsibility before retiring, constituted representation within the meaning of this restriction.<sup>6</sup>

The question deliberated by the Panel was whether this basic Government-wide ban on representational appearances or communications was alone sufficient to address concerns regarding the revolving door in the context of defense procurement. In arriving at its own recommendations to repeal a number of the defense-specific ethics laws reviewed by the Panel in this chapter, the President's Commission on Federal Ethics Law articulated several thoughtful tests:

Restrictions on the activities of former Government employees are intended to ensure the integrity of the Government's decision-making process, and thereby to protect the public interest. At the same time, post-employment statutes should not be unduly onerous so as to become a disincentive to Government service by qualified individuals. The Commission envisioned three specific functions that we believe should be served by the imposition of post-employment restrictions.

First, the restrictions should be fashioned in such a manner as to prohibit the use of improper influence by departed employees.

\* \* \*

A second related function of post-employment restrictions is the creation of a protective shield for sensitive Government information.

\* \* \*

Third, the post-employment restrictions may in some respects augment the restrictions on current employees in section 208 and help provide an additional protective function by discouraging current employees from letting thoughts of future employment possibilities shape their official conduct against Government interests while in office.<sup>7</sup>

---

<sup>5</sup>*Robert E. Derektor of Rhode Island, Inc. v. U.S.*, 762 F. Supp. 1019, 1099 (D.R.I. 1991).

<sup>6</sup>*U.S. v. Coleman*, 805 F.2d 474 (3rd Cir. 1986).

<sup>7</sup> TO SERVE WITH HONOR: REPORT OF THE PRESIDENT'S COMMISSION ON FEDERAL ETHICS LAW REFORM 53 (1989).

Applying similar standards, the Panel concluded that the Government-wide effect of section 207 was generally sufficient to protect against improper influence and to discourage temptations for Government employees to alter their conduct in a fashion that might further their prospects of future employment. Elsewhere in this report, however, the Panel has addressed the numerous additional restrictions imposed by federal law on the post-Government employment of employees and officials engaged in defense procurement. These include 18 U.S.C. § 281(a), 37 U.S.C. § 801, 10 U.S.C. § 2397b, and 41 U.S.C. § 423(f), all of which the Panel recommends be repealed as duplicative and, by their overlapping effect and inconsistent terminology, confusing even to those charged with their enforcement.

The Panel is fully aware, however, that concerns have been expressed that two of those provisions -- 10 U.S.C. § 2397b and 41 U.S.C. § 423(f) -- may constitute critical statutory protection against the improper use by a former Government employee of nonpublic Government information through later behind-the-scenes assistance to a defense contractor. Activity such as that is not proscribed by the representation limitations of section 207. To satisfy that concern, therefore, the Panel recommends that the repeal of sections 2397b and 423(f) be accompanied by enactment of a new "aiding and advising" restriction such as that reflected in the following draft. The Panel suggests that 18 U.S.C. § 207 is the appropriate location for such a new provision, which could address the offending conduct with specificity but entirely within the framework of existing section 207 restrictions and relying upon its established terms and definitions. A model for such a specially-tailored provision is section 207(b), added by Congress in 1989 to meet concerns about officials switching sides in on-going trade or treaty negotiations.

#### **6.7.1.4. Recommendation and Justification**

##### **Amend**

Elsewhere in this report, the Panel has recommended the repeal of 10 U.S.C. § 2397b and 41 U.S.C. § 423(f). Their repeal should be accompanied by enactment of an alternative restriction on the use of nonpublic procurement information by former procurement employees and officials, which the Panel recommends be incorporated as an amendment to 18 U.S.C. § 207. Such a provision would establish a one year "cooling off" period for former officers or employees of the executive branch during which they would be barred from representing, aiding, or advising others on the basis of non-public information gained through personal and substantial participation in a procurement during their last year of Government service. In that manner it would address public and Congressional concerns that non-public information might be used to the Government's disadvantage through "behind the scenes" communications and assistance from an employee who has participated personally and substantially in a procurement, but would do so without the degree of complexity and confusion presently introduced by 10 U.S.C. § 2397b and 41 U.S.C. § 423(f).

### 6.7.1.5. Relationship to Objectives

The proposed amendment to 18 U.S.C. § 207 would promote integrity in defense procurement by applying a standard framework of established terms and definitions that are familiar and more easily understood.

### 6.7.1.6. Proposed Statute

#### 18 U.S.C. §207(x) One-year restriction on certain procurement personnel

(1) Any person who is a former officer or employee of the executive branch of the United States (including any independent agency) and is subject to the restrictions contained in subsection (a)(1) by reason of personal and substantial participation in a procurement within the one-year period preceding the date on which his or her service with the United States terminated, and who had access to information concerning such procurement that is exempt from disclosure under section 552 of title 5, which is so designated by the appropriate department or agency, and which the person knew or should have known was so designated, shall not, on the basis of that information, knowingly represent, aid, or advise any other person (except the United States) concerning such procurement for a period of one year after his or her service or employment with the United States terminates. Any person who violates this subsection shall be punished as provided in section 216 of this title.

(2) The term "procurement" means the acquisition of property and services as defined at 41 U.S.C. § 403.

## 6.7.2. 18 U.S.C. § 281

### **Restriction on retired military officers regarding certain matters affecting the Government**

#### 6.7.2.1. Summary of the Law

Subsection (a) of this statute makes it unlawful for a period of two years after retirement for a former military officer to be compensated for representing any person in the sale of goods or services to the military service from which the officer retired. The statute also prohibits a officer for two years after retirement from prosecuting or assisting the prosecution of a claim to the officer's former service involving a matter with which the officer was directly connected while on active duty. The penalty for violating either provision is a fine<sup>1</sup> or imprisonment for not more than one year.

#### 6.7.2.2. Background of the Law

This section began as part of a law that made it a Federal offense for members of Congress and other Government officials to receive pay "in relation to any contract, claim or controversy in which the U.S. was a party."<sup>2</sup> The section was actually meant to exempt retired officers from the broader conflict of interest statute, with the proviso that the retired officers not be allowed to sell anything to the department from which they retired. In 1987, the permanent ban on selling to the retiree's own department was reduced to two years.<sup>3</sup>

This section was suspended for one year from December 1, 1989,<sup>4</sup> and again from December 1, 1990, to May 31, 1991,<sup>5</sup> to afford the Administration further opportunity to present its case for repeal. Failing agreement by the Congress and DOD on amendment or repeal, it returned to effect.

#### 6.7.2.3. Law in Practice

Although not specifically provided, this statute applies only to retired regular officers, none of whom have ever been successfully convicted of violating this section. Prior to its revision reducing the selling ban to two years, there was a reluctance to bring actions under this section because of concerns that it was unenforceable.<sup>6</sup> The 1987 amendments have lessened these

---

<sup>1</sup>The fine for violation of this statute is set out in Title 18.

<sup>2</sup>18 U.S.C. § 203, (1940 ed.).

<sup>3</sup>Department of Defense Authorization Act, 1988, Pub. L. No. 100-180, Div. A Title VIII, § 822(b)(1) 101 Stat. 1132 (1987).

<sup>4</sup>Ethics Reform Act of 1989, Pub. L. No. 101-194, 103 Stat. 1759 (1989).

<sup>5</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, Div. A, Title VIII, § 315(a)(2), 104 Stat. 1485, 1597 (1990).

<sup>6</sup>ABA MONOGRAPH, PERSONAL CONFLICTS OF INTEREST 101 (1990).

concerns, but to the knowledge of the Panel no successful prosecution has resulted since the law was amended.

The Section of Public Contract Law of the American Bar Association firmly expressed its position that this statute should be repealed, stating:

The 1987 changes to this provision, Pub. L. No. 100-180, 101 Stat. 1019 (1978), can only be classified as a mistake. When faced with the issue of "clarifying" or repealing this provision, Congress simply made the wrong choice. There is no justification for this additional restriction for retired military officers.<sup>7</sup>

It appears from the accompanying conference report of the committees on the judiciary that the conferees believed, notwithstanding their efforts to provide temporary corrections for this provision, that the Committees should undertake a comprehensive review of section 281 and related provisions at some future date.<sup>8</sup> The Panel suggests that it is time to review this statute again, with a view toward its prompt repeal.

#### **6.7.2.4. Recommendation and Justification**

##### **Repeal**

This statute raises the same concerns as 37 U.S.C. § 801 in that it singles out retired regular officers for treatment different from other separated and retired Government officials. As DOD urged to the committees in 1986, the purpose of the repeal would be "to treat retired regular officers on the same basis as former civilian employees, retired reserve officers, enlisted military members, and former military personnel (who have not retired)."<sup>9</sup> That rationale has not changed. In singling out only a small class of former officials to prevent them from selling to their former service, the statute is unduly burdensome. There are few other statutes which isolate former personnel of other executive agencies in such a way through similar restrictions. Furthermore, this statute overlaps the criminal revolving door statute, 18 U.S.C. § 207, which was amended by the 1989 Ethics Reform Act to become a single comprehensive post-employment statute applicable to former executive and legislative branch personnel. Section 207 establishes a lifetime bar to representation before a department or agency on the same contract. For these reasons, it is recommended that this statute, together with 37 U.S.C. § 801, be repealed. Repeal of this section would eliminate inequity and confusion in the standards which apply to Government officials who happen to be retired military officers.

---

<sup>7</sup>Letter from the Section of Public Contract Law, American Bar Association, signed by Karen Hastie Williams, Chair (Aug. 25, 1992).

<sup>8</sup>H.R. CONF. REP. NO.446, 100th Cong. 2d Sess. 665.(1986).

<sup>9</sup>*Id.*

#### **6.7.2.5. Relationship to Objectives**

Repeal of this statute would make the standards that apply to all former Government officials more equitable, and through increased clarity would ensure continued integrity of defense procurement programs.

### 6.7.3. 37 U.S.C. § 801

#### Restriction on payment to certain officers

##### 6.7.3.1. Summary of the Law

This section<sup>1</sup> provides that a retired regular officer may not be paid from any appropriation for three years after retirement, if he is selling for himself or others or is contracting or negotiating to sell supplies or war materials to DOD, the Coast Guard, the National Oceanic and Atmospheric Administration, or the Public Health Service.

##### 6.7.3.2. Background of the Law

This section was derived from a Navy pay statute,<sup>2</sup> and subsequently became part of the "Supplemental Appropriations Act, 1952."<sup>3</sup> It was re-enacted shortly thereafter as section 1309 of the Act of August 7, 1953,<sup>4</sup> and combined in 1962 with an 1896 provision which prohibited Navy officers from being compensated if employed by any person furnishing naval supplies or war materials to the United States.<sup>5</sup> Prior to its inclusion in Title 37, it was codified in Title 10.<sup>6</sup>

##### 6.7.3.3. Law in Practice

Under this statute, the Comptroller General and the Court of Claims have broadly interpreted selling to embrace a wide variety of activities, but the statute has been held to apply only to the sale of goods and not services.<sup>7</sup> Regulations which define selling for purposes of 37 U.S.C. § 801 are found in 32 C.F.R. § 40.7(c)(2).

##### 6.7.3.4. Recommendation and Justification

#### Repeal

This statute, along with 18 U.S.C. § 281, singles out retired regular officers for treatment different from other separated and retired Government officials. In doing so, it is unfairly burdensome on retired officers, and overlaps other statutes which encompass similar conduct.<sup>8</sup>

<sup>1</sup>Only section (b) of this statute remains active; section (a), which prohibited regular Navy and Marine officers from being paid by the Government if employed by a person furnishing naval supplies or war materials to the United States, was repealed by Pub L. No. 101-194, 103 Stat 1756 (1989).

<sup>2</sup>Act of July 22, 1935, ch. 402 § 9, 49 Stat. 490 (1935).

<sup>3</sup>Ch. 664, § 1309, 65 Stat. 757 (1951).

<sup>4</sup>67 Stat. 437 (1953).

<sup>5</sup>5 U.S.C. § 59c. The Navy version of this section had been codified in 10 U.S.C. § 6112(b) and was similar in application to 37 U.S.C. § 801(a), its repealed companion section, which prohibited regular Navy and Marine Corps officers from being employed by any person selling war materials to the United States.

<sup>6</sup>10 U.S.C. § 6112, 70A Stat. 381(1956).

<sup>7</sup>41 Comp. Gen. 677, (1962).

<sup>8</sup>18 U.S.C. §§ 207 (a)(1), (a)(2).

As the Ethics Officer for the Air Force Materiel Command commented, "A wide variety of individuals and agencies are involved in procurements, yet except for the case of 'particular matters' under 18 U.S.C. § 207 and specific contracts under 41 U.S.C. § 423, only retired military officers are prohibited from selling back to their agencies."<sup>9</sup>

#### **6.7.3.5. Relationship to Objectives**

Repeal of this statute would make the standards which should and must apply to all former Government officials more equitable and through increased clarity and simplicity, ensure continued ethical integrity of defense procurement programs.

---

<sup>9</sup>Letter from Major Edward E. Hunt, III, Director, Ethics and Fraud Remedies, Headquarters Air Force Materiel Command, Department of the Air Force (July 9, 1992) forwarded in a letter from Brigadier General James C. Roan, Jr., Staff Judge Advocate, Headquarters Air Force Materiel Command to the Acquisition Law Task Force (July 21, 1992).

#### 6.7.4. 10 U.S.C. § 2397

### Employees or former employees of defense contractors; reports

#### 6.7.4.1. Summary of the Law

This section establishes requirements for former middle and senior-level military and civilian employees of DOD to file reports if employed by, or if there are substantial changes in employment by, a major defense contractor at an annual salary of \$25,000 or more, within two years of leaving DOD. For violations of its provisions, this section also provides for a maximum administrative penalty of \$10,000 as determined by the Secretary of Defense.

#### 6.7.4.2. Background of the Law

This section was originally introduced by Senator William Proxmire in 1969 as part of the Senate version of the FY 1970 DOD Authorization Act.<sup>1</sup> Its purpose was to be a "sunshine" provision that would make information on the "revolving door" available to the public and to Congress. It was substantially amended in 1985 to increase the salary limit from \$15,000 to \$25,000, to reduce the number of reporting years from three to two, and to expand the content of the reports.<sup>2</sup> The 1985 amendment also required the former employee to report any disqualification required during Federal employment as a result of employment discussions with the current contractor employer.<sup>3</sup>

#### 6.7.4.3. Law in Practice

The statute is implemented by 32 C.F.R. § 40.12 (DOD Directive 5500.7, 8-1 through 8-5). Service-wide reports are collected by the Defense Data Management Center and forwarded to Congress. DOD indicates that because the reporting periods differ from those required by section 2397c, it has difficulty using these reports as an effective tool to detect violations of post-employment restrictions.<sup>4</sup> Furthermore, DOD reports there have been no administrative fines assessed under this statute.<sup>5</sup> Consideration given to repeal of section 2397 during action on the 1992 Defense Authorization Act failed when agreement could not be reached on amendments to the Procurement Integrity provisions of 41 U.S.C. § 423.<sup>6</sup>

In May 1991, the DOD Inspector General (DODIG) wrote to Senator Carl Levin, "[T]he reporting requirement imposed by 10 U.S.C. § 2397 does not accomplish the purposes suggested

<sup>1</sup>Amendment to S.2546, 91st Cong., 1st Sess. (1969), enacted in Pub. L. No. 91-121, 83 Stat.210 (1969).

<sup>2</sup>Department of Defense Authorization Act, FY86, Pub. L. No. 99-145, 99 Stat. 583, 693 (1985).

<sup>3</sup>§ 2397(b)(3)(I).

<sup>4</sup>Interview with Robert Stoss, DOD Standards of Conduct Office (Aug. 6, 1992).

<sup>5</sup>*Id.*

<sup>6</sup>65 C.F.R. 619 (Nov. 11, 1991).

by Congress when this statute was enacted. I urge you to repeal the statute, which will free investigative resources to concentrate on cases of significant merit."<sup>7</sup>

Most of the comments received concerning this section concurred with the Panel's proposal for its repeal because it, along with its companion sections, section 2397a, b, and c, contributed to a complicated and confused system of overlapping conflict of interest provisions.<sup>8</sup> The National Security Agency's Central Security Service stated, for example, the repeal of section 2397 would "alleviate stacking of employment search and post-employment limitations which have created a maze of confusing restrictions."<sup>9</sup>

#### **6.7.4.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this section. Because its requirements apply only to DOD personnel and not to officials of other Government agencies, these provisions run contrary to the objective of having uniform Government-wide ethics standards, including common post-employment standards. The statute does not appear to be an effective enforcement tool in detecting post-employment violations, and is a burden to DOD in its requirements to collect and maintain records.

#### **6.7.4.5. Relationship to Objectives**

Repeal of this statute would equalize the standards that apply to all former Government officials, and through increased clarity would ensure continued integrity of defense procurement programs.

## **6.7.5. 10 U.S.C. § 2397b**

### **Certain former Department of Defense procurement officials: limitations on employment**

#### **6.7.5.1. Summary of the Law**

This section provides that a defense official who has performed a procurement function:

(a) who is in the grade of GS-13 or O-4 pay equivalent or above, and who, on a majority of his working days during the two-year period ending on the date of separation from DOD, performed a procurement function at a site or plant that is contractor-owned or -operated and which was the principal location of that employee's performance; or

(b) who is in the same grade as in (a) and who, on a majority of his working days during the above two-year period, performed a procurement function related to a major defense system and, in so doing, participated personally and substantially and in a manner involving decision-making responsibilities with respect to a contract for that system through contact with the contractor; or

(c) who during the above two-year period as a Senior Executive Service member or an O-7 pay equivalent, or above, acted as the primary representative of the United States in negotiating a contract or an unresolved claim over \$10 million,

may not accept compensation from a contractor for two years from the date of separation from DOD service. Any person in the above categories who knowingly accepts compensation under the prescribed circumstances is subject to a civil fine of not more than \$250,000. In addition, any person who offers or pays such compensation and who knew or should have known that such action would violate this section is also subject to a civil fine of not more than \$500,000. The law also provides that affected persons may request an opinion from the "designated agency ethics official" of the DOD agency from which the official separated concerning the applicability of section 2397b. This opinion must be issued not later than 30 days after receipt of a request containing all relevant information. A favorable opinion based upon full disclosure of all relevant facts would create a conclusive presumption that the employee's acceptance of the compensation is not a violation of the restriction.

#### **6.7.5.2. Background of the Law**

Section 2397b was enacted together with section 2397c in the Joint Resolution Making Continuing Appropriations (1986) as part of a DOD procurement reform package that included

the introduction of the procurement executive concept, and whistle blower protection statutes for DOD and contractor employees.<sup>1</sup> The statute was thereafter re-enacted in the same form.<sup>2</sup> The ban on compensation was in part motivated by the "switching sides" of several prominent defense officials among whom was an assistant military service secretary who went to work for a major defense firm shortly after being involved in a multimillion dollar dispute with a separate division of the same company. Although in this case no law was violated, the perceived conflict of interest raised public concern.

Originally proposed for repeal as part of the Ethics Reform Act of 1989, this section was instead suspended for one year from December 1, 1989,<sup>3</sup> and again from December 1, 1990 to May 31, 1991<sup>4</sup> to afford the Administration further opportunity to present its case for repeal. Failing agreement by the Congress and DOD on amendment or repeal, it returned to effect.

### 6.7.5.3. Law in Practice

32 CFR § 40.14 implements this provision and closely follows its language. DOD reports thousands of opinions have been written under section (e)(1) by the various branches of DOD and the military services since this law went into effect.<sup>5</sup> However, to date, procedures have not been specifically established to levy fines, nor have fines been levied under the administrative payment provisions.<sup>6</sup>

A 1990 GAO report recognized that although procedures had been established to comply with the provisions of sections 2397b, few former DOD employees were limited by that section from defense contractor employment because they had not spent most of their working days with any one system or plant. The report also found that only five per cent of the ethics opinions written under this section concluded that the individuals concerned might be prohibited from accepting compensation from potential defense contractor employers.<sup>7</sup> It has been estimated, in fact, that section 2397b may apply to only 2% of DOD procurement personnel.<sup>8</sup>

In analyzing continuing need for this statute the Panel has concluded that the primary standard for post-employment restrictions should be 18 U.S.C. § 207, which makes employees subject to a lifetime ban on matters which were handled personally and a two year restriction on matters that were under an employee's official responsibility. Section 2397b is unique in Federal ethics legislation for the severity of the restrictions imposed. Rather than limiting post-

<sup>1</sup>By H.J. Res. 738, Pub. L. No. 99-500, 100 Stat 1783-156(1986).

<sup>2</sup> It was reenacted twice: Act of Nov. 14, 1986, Pub. L. 99-591, Title I, § 101(c), 100 Stat 3341-156, and by the Defense Authorization Act, Fy 1986, Pub. L. 99-661, Div. A, Title IX, Part C § 931(a)(1) 100 Stat. 3936,(1986). The Defense Corrections Act of 1987, 101 Stat. 275, provided that the three enactments would be codified only once.

<sup>3</sup>Ethics Reform Act of 1989, Pub. L. No. 101-194, 103 Stat 1759 (1989).

<sup>4</sup>National Defense Authorization Act, Fiscal Year 1991, Pub. L. No. 101-510, Div. A, Title VIII, § 815(a)(2), 104 Stat. 1597(1990).

<sup>5</sup>Interview with Robert Stoss, DOD Standards of Conduct Office, Aug. 6, 1992.

<sup>6</sup>*Id.*

<sup>7</sup>GAO REPORT NSIAD 90-103, DOD REVOLVING DOOR, (1990).

<sup>8</sup>SECTION BY SECTION ANALYSIS OF THE PROPOSED PROCUREMENT ETHICS REFORM ACT OF 1990 11 (May 9, 1990).

Government conduct, such as sales representation or consulting, it imposes an absolute bar on private employment with certain contractors as to whom the employee has had official responsibilities.

Elsewhere in this report, the Panel recommends repeal of 41 U.S.C. § 423(f). The Panel recommends repeal of section 2397b as well, and suggests that repeal be accompanied by enactment of an alternative restriction on the use of nonpublic procurement information by former procurement employees and officials. The Panel recommends incorporating such a restriction at 18 U.S.C. § 207, establishing a one year "cooling-off" period to prohibit former officers or employees of the executive branch from representing, aiding, or advising others on the basis of nonpublic information gained through personal and substantial participation in a procurement during the last year of Government service. Such an amendment would address public and congressional concerns that nonpublic information not be used to the Government's disadvantage through "behind-the-scenes" communications and assistance from an employee who has participated personally and substantially in a procurement, but without the complexity and confusion presently introduced by 10 U.S.C. § 2397b and 41 U.S.C. § 423(f).

#### **6.7.5.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of 10 U.S.C. § 2397b, together with repeal of 41 U.S.C. § 423(f), and the substitution instead of a new aiding or advising subsection as proposed in the analysis accompanying 18 U.S.C. § 207. Notwithstanding that section 2397b applies to but an extremely limited number of DOD personnel, it has generated thousands of requests for "safe harbor" opinions because most defense contractors decline to hire former DOD employees without having this opinion. DOD issued over 4,300 such opinions in just one 19-month period.<sup>9</sup> The resources expended in implementing this statute far outweigh its benefits, representing a heavy overhead burden that DOD must bear during a period of shrinking resources. Enactment of an alternate provision such as that proposed at 18 U.S.C. § 207 would more effectively and clearly address the principal objective being served by the present law.

#### **6.7.5.5. Relationship to Objectives**

Repeal of this statute would equalize the standards that should and must apply to all former Government officials and through increased clarity would ensure continued ethical integrity of defense procurement programs.

---

<sup>9</sup>*Id.* Furthermore, in only 4% of those opinions did DOD find that the law even potentially applied.

**6.7.6. 10 U.S.C. § 2397c**

**Defense contractors: requirements concerning former  
Department of Defense officials**

**6.7.6.1. Summary of the Law**

This section mandates that each DOD contract in excess of \$100,000 include a provision by which the contractor agrees not to compensate certain former defense officials in violation of section 2397b. Knowing violation of this contract provision would subject a contractor to liquidated damages of \$100,000 or three times the compensation paid to the former employee. Contractors having at least \$10 million in contracts with DOD are also required by this law to submit a report, on April 1, covering former DOD officers or employees who, within the previous calendar year, were paid by the contractor within two years of leaving DOD. Knowing failure to file this report subjects a person to an administrative penalty not to exceed \$10,000.

**6.7.6.2. Background of the Law**

This section and section 2397b were introduced in the Joint Resolution Making Continuing Appropriations (1986) as part of a DOD procurement reform package that included the introduction of the procurement executive concept, and whistle blower protection statutes for DOD and contractor employees.<sup>1</sup> The statute was re-enacted permanently in the Fiscal Year 1987 Defense Authorization Act in the same form.<sup>2</sup>

**6.7.6.3. Law in Practice**

This statute is implemented by 48 C.F.R. § 252.170-1 and 48 C.F.R. § 252.7002. Procedures for adjudicating administrative penalties under this statute are set out in 32 C.F.R. § 40.15. Under this statute, reports are collected and sent to the Defense Data Management Center for compilation and reporting to Congress.<sup>3</sup>

A February 1990 GAO report measured compliance with this section against a list of individuals meeting the statute's requirements who held security clearances and worked for DOD contractors.<sup>4</sup> The report found that only 60% of those with clearances who met the qualifications were reported by their employers within the two years before the study. GAO speculated this result may have been due in part to the recency of the requirement.<sup>5</sup>

---

<sup>1</sup>H.J. Res. 738, 99th Cong. Sess. Pub. L. No. 99-500, 100 Stat 1783-156(1986) as corrected by Act of November 14, 1986, Pub. L. No. 99-591, Title I, § 101(c), 100 Stat 3341-156.

<sup>2</sup>National Defense Authorization Act, Fiscal Year 1987, Pub. L. No. 99-661, Div. A, Title IX, Part C. § 931(a)(1) 100 Stat. 3936, (1986).

<sup>3</sup>Interview with Robert Stoss, DOD Standards of Conduct Office, Aug. 6, 1992.

<sup>4</sup>GAO REPORT NSIAD 90-103, DOD REVOLVING DOOR, Feb., 1990.

<sup>5</sup>*Id* at 4.

The provision has not been effective as an enforcement tool to identify those who may be violating post-employment restrictions. Reporting periods are not the same for the section 2397 and section 2397c reports, a problem which makes it difficult for DOD officials to correlate data in both reports to ensure that all employment subject to post-employment restrictions is being reported.<sup>6</sup> Furthermore, information provided in the section 2397c report is not specific enough concerning job responsibilities to be an effective tool for enforcement of violations of section 2397b(a)(1).<sup>7</sup> There have been no reported administrative penalties assessed under this provision.

The view of many in the DOD contractor community is that these reports are burdensome and of little utility.<sup>8</sup> About half of the contractors contacted in the GAO study responded that requiring more than one report on a covered former DOD employee was burdensome.<sup>9</sup> DOD responded in that report that many other companies, especially those with few managers and decentralized staffs, also found the requirement burdensome.<sup>10</sup> An additional difficulty cited in the report was that the April 1 reporting date required the employer to submit two or sometimes three reports to cover the required two year period.<sup>11</sup> More recently, corporate employers of military reservists called to active duty in the Persian Gulf were confronted with the anomalous obligation of being required to re-start the two-year reporting cycle when covered employees were released from active duty and returned to their civilian jobs.<sup>12</sup>

#### **6.7.6.4. Recommendation and Justification**

##### **Repeal**

As in the case of section 2397, actual practice under this statute indicates it is unduly burdensome and does not further its intended purpose. The Panel's recommendation for repeal is also consistent with its recommendation for repeal of section 2397b. Retention of the statute would not bring the Government closer to the goal of a Government-wide ethics standard, nor would it foster the Panel's goal of recommending simple, understandable, and effective legislation.

#### **6.7.6.5. Relationship to Objectives**

Repeal of this statute would equalize the standards which apply to all former Government officials, and through increased clarity would ensure continued integrity of defense procurement programs.

<sup>12</sup>Advisory memorandum from Terrence O'Donnell, DOD General Counsel, dated March 15, 1991.

## 6.7.7. 41 U.S.C. § 423

### Procurement integrity

#### (f) Restrictions resulting from procurement activities of procurement officials

##### 6.7.7.1. Summary of the Law

Subsection (f) of the 1988 procurement integrity amendments to the Office of Federal Procurement Policy (OFPP) Act (41 U.S.C. § 423(f)) added two additional "revolving door" restrictions to those already applicable to persons engaged in defense acquisition. For two years, subsection (f) prohibits a procurement official from leaving the Government and participating for a competing contractor in subsequent negotiations on that contract, or from participating in the performance of that contract. Those restrictions also apply to: first and second tier subcontractors in excess of \$100,000; subcontractors who significantly assisted the prime in negotiations of the prime contract; subcontractors personally directed to the prime contractor by the procurement official; and subcontractors reviewed or approved by the procurement official. Waivers may be granted by the President in certain limited circumstances.

##### 6.7.7.2. Background of the Law

Subsection (f) was originally section 27(e) of the 1988 amendments to the OFPP Act. It was amended and renumbered by Pub. L. No. 101-189<sup>1</sup> to codify its application to post-Government employment with subcontractors. Originally proposed for repeal as part of the Ethics Reform Act of 1989, this provision was suspended for one year from December 1, 1989,<sup>2</sup> and again from December 1, 1990 to May 31, 1991<sup>3</sup> to afford the Administration additional opportunity to present its case for repeal. Failing agreement on amendment or repeal, it then returned to effect. It is implemented at FAR 3.104-7.

##### 6.7.7.3. Law in Practice

There has been growing acknowledgment that the current pyramid of post-employment laws facing defense employees is complex and nearly impossible to understand.<sup>4</sup>

Every executive branch employee is first subject to the lifetime representation restriction of 18 U.S.C. § 207 (a)(1) as to any matter handled personally and substantially, and to the two-

<sup>1</sup>National Defense Authorization Act for 1990 and 1991, Pub. L. No. 101-189, Div. A, Title VIII, Part B, § 814(c), 103 Stat. 1495-1 (1989).

<sup>2</sup>Ethics Reform Act of 1989, Pub. L. No. 101-194, 103 Stat. 1759 (1989)

<sup>3</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, Div. A, Title VIII, § 815(a)(2), 104 Stat. 1597 (1990).

<sup>4</sup>*Hearings before Investigative Subcommittee of House Armed Services Committee on Revolving Door Issues and Post Employment Restriction, May 9, 1991: REPORT OF THE PRESIDENT'S COMMISSION OF FEDERAL ETHICS LAW REFORM 53-78 (1989)).*

year representation restriction of section 207 (a)(2) as to matters that were under the employee's official responsibility during his final year in office. Those restrictions address what in 1962 Congress believed were the two most serious concerns: using one's Governmentally acquired knowledge about an on-going case or proceeding against the Government, and using personal stature and contacts to open Government doors.

Next, employees who during their final year participated in trade or treaty negotiations are barred by 18 U.S.C. § 207 (b) for a year from assisting any other party in those proceedings. Officers and employees at the upper rates of SES pay are subject to two more restrictions: a one-year ban imposed by section 207 (f) on assisting any foreign entity before the Government, and a one-year "cooling-off period" imposed by section 207 (c) on anything but personal or social contact with their former agencies.

Omitting yet an additional "cooling-off" restriction applicable only to cabinet members, 18 U.S.C. § 207 thus imposes five basic post-employment restrictions upon executive branch employees. Atop those are the special-purpose rules applicable only to defense or procurement personnel, three of which are imposed by 10 U.S.C. § 2397b.

In brief, the first section 2397b restriction affects middle level employees who perform specified procurement duties on a major weapons system for more than half their working days during their final two years, and do so through contact with the contractor. The second applies to mid-level employees who spend a majority of working days during their final two years performing the same types of procurement duties at a plant owned or operated by the contractor. The third addresses senior employees who in their last two years served as one of the Government's primary representatives in negotiating a \$10 million contract or claim with the contractor. Under section 2397b all of these employees are forbidden from accepting compensated employment with the contractor for two years after separation.

If the procurement official is a military officer, he is subject to two additional restrictions. For two years after retirement 18 U.S.C. § 281 forbids him from selling "anything" to his former service, and for three years 37 U.S.C. § 801 forbids the former officer from selling "supplies or war materials" to any DOD component. In the officer's case, therefore, he must understand and comply carefully with 10 different restrictions on post-Government employment.

Then, atop those 10 restrictions were added the final two procurement integrity limitations imposed by section 423 (f). Applying still different standards and different definitions of procurement duties and procurement officials, the section 423 (f) restrictions become applicable when the employee's participation occurs during the conduct of a procurement. For two years after that Government participation, they forbid the employee from switching sides in negotiations on that contract, or even performing work under the contract.

It is the Panel's conclusion that section 423 (f), like 10 U.S.C. § 2397b, burdens the acquisition community with narrow rules whose complexity and confusion far exceed their benefit. Also like section 2397b, section 423 (f) is a burden less for the substance of the post employment restriction it imposes than for the time and effort required to interpret it. Untold

numbers of Government lawyers have been assured employment by the statutory requirement to issue "safe harbor" legal opinions interpreting sections 423(f) and 2397b, notwithstanding that many of these opinions are issued only because they have become routine employment credentials regardless of the employee's precise duties. Section 423 (f) is so imprecise that requesting a safe harbor opinion has proven to be a prudent measure for all employees whose duties related even obliquely to procurement.

Comments on this topic received by the Panel are consistent with those expressed by Government and industry representatives during congressional reconsideration of procurement-related ethics rules by the Senate Committee on Governmental Affairs in 1991: that those restrictions add little of substance to the basic set of Federal post-employment laws, but through their ambiguity and severity contribute significant disincentives to public service.<sup>5</sup>

#### **6.7.7.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that section 423 (f) be repealed. It is one of several specially-enacted ethics restrictions that the Office of Government Ethics has found by their complexity and confusion to be counterproductive to an effective executive branch ethics program.<sup>6</sup> Elsewhere in this report, the Panel has recommended repeal of 10 U.S.C. § 2397b. The Panel believes that the principal remaining function of these two provisions is to protect against the improper use of inside information acquired during the conduct of a procurement. It was the Panel's conclusion that such a limitation could be enacted far more effectively by an alternative provision such as we have suggested as an amendment to 18 U.S.C. § 207. The Panel's proposed amendment would establish a one year "cooling off" period to prohibit former officers and employees of the executive branch from representing, aiding, or advising others on the basis of non-public information gained through personal and substantial participation in a procurement during their last year of Government service. The Panel believes such a provision would effectively address public and congressional concerns regarding "behind-the-scenes" communications and assistance following Government service without introducing the complexity and confusion presently surrounding 10 U.S.C. § 2397b and 41 U.S.C. § 423 (f).

#### **6.7.7.5. Relationship to Objectives**

Repeal of this statute would allow the same standards that should and must apply to all former Government officials to be applied equally to "procurement officials" and would ensure, through increased clarity and simplicity, continued ethical integrity of defense procurement programs.

---

<sup>5</sup>*Procurement Integrity Act: Hearing before the Subcommittee on Oversight of Government Management, Senate Committee on Governmental Affairs, 102 Cong. 1st Sess. (1991) (Statements of Terrence O'Donnell, General Counsel, DOD, and Stuart J. Evans, Assistant Administrator, NASA).*

<sup>6</sup>Statement of Stephen D. Potts, presented to Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, February 26, 1991, S.Hrg. 102-59, 102d Congress, 1st Session.

## **6.8. Protection of Procurement Information**

### **6.8.0. Introduction**

At the heart of the procurement integrity amendments to the Office of Federal Procurement Policy (OFPP) Act are its post-III Wind restrictions on disclosure of proprietary or source selection information during the conduct of a procurement. As with the procurement integrity restrictions on gifts and job searches, these special rules protecting procurement-sensitive information apply only during the interval between the initiation of a procurement and the eventual award of a contract. During that period, section 423(a)(3) forbids a competing contractor to seek such information, subsection (b)(3) forbids a procurement official to disclose it, and subsection (d) forbids its release by any person, except as authorized by the contracting officer.

18 U.S.C. § 1905, the Trade Secrets Act, has long protected proprietary corporate information from unauthorized release by Government officials, but not all portions of a competitor's proposal are certain to qualify for its protection. Likewise, the FAR governs the release of certain information relating to competitors' proposals and the Government's internal evaluation. Additional uniform rules on the dissemination of acquisition information will soon be published pursuant to section 822 of the National Defense Authorization Act for FY 1991-1992. Until the enactment of the procurement integrity provisions in section 423, however, no single provision of Federal law broadly forbade the unauthorized release of all such information, or trafficking in such information once it had been released.

Despite its laudable objectives and purpose, however, no single portion of the procurement integrity amendments to Title 41 seems to have generated more uncertainty or anxiety in the procurement community. By virtue of their complexity and the severity of the penalties for noncompliance, the information disclosure restrictions have imposed what some have characterized as a "code of silence" on both Government and industry personnel during the course of a procurement, during which the former have often feared to offer and the latter feared to seek even the most routine information without specific authorization or, frequently, legal guidance.

As characterized by a senior NASA official, "if there is any doubt about whether a document or information should be discussed during a source selection, it does not get communicated."<sup>1</sup> To guard against the enormous penalties for error, some corporations and Government activities are said to have furnished their representatives with "Miranda cards" that coach them through a litany of preliminary questions each ought to ask the other before safely addressing the business at hand.

The law's complexity has been illustrated in numerous examples, such as the commercial firm in its first Government competition innocently inquiring whom its competition was, or the

---

<sup>1</sup>*Hearings before the Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, 102d Cong, 1st Sess. (1991), (statement of Stuart J. Evans, NASA Assistant Administrator for Procurement).*

frustration of applying the rule to a sole source negotiation. And after several years of trying, it is obvious that a "bright line" defining the commencement of a procurement is beyond reach. Millions of public notices cannot practicably be published announcing that date, yet without some such notice, Government personnel at a field purchasing activity cannot know that a purchase request has been drafted at headquarters, thereby triggering a new set of rules under section 423 applicable to its relations with potential competitors. Those competitors, at the same time, may be conducting other business with the field activity on similar procurements, exchanging related data and information, and they are even less able to know that a new procurement has started.

In addition to requirements for filing compliance certifications, the law also requires contracting officers to maintain a list of every person authorized in that procurement to have access to proprietary or source selection information. That list is required notwithstanding that access by many people is beyond the contracting officer's control, as when audits or investigations are performed, or when GAO protests are filed. A complete list is beyond reach and an incomplete list is of dubious value.

The Panel believes the information protection provisions of section 423 are potentially useful but require amendment. Protection is clearly important because unauthorized access to a competitor's bid or proposal information can jeopardize the integrity of the procurement process and deprive both Government and competitors of a fair competition. Just as clearly, however, that protection should not come at the expense of the regular discourse and routine exchange of information that is the essence of negotiated procurement. The public is not served by rules and penalties so threatening that paralysis begins to make the bargaining process of competitive negotiation take on the rigid formality of sealed bidding.

The underlying problem, in the Panel's view, is that the information protection restrictions of section 423 had to be artificially adapted to the procurement integrity lexicon of procurement officials, competing contractors, and conduct of a procurement. The Panel believes the same rules would be clearer, and far stronger, if they were drafted to address the character of the information to be protected rather than the status of the persons handling it.

In 1991 a substitute provision was proposed by OFPP and the Office of Government Ethics (OGE) and considered by the Senate together with several other alternatives to the current provisions of section 423.<sup>2</sup> Under this substitute, contractor bid or proposal information and source selection information would be protected from unauthorized disclosure until the relevant contract is awarded. The protected information would be defined with specificity and clarity, and trafficking would bear criminal, civil, and administrative penalties.

The Panel reviewed other possibilities, including the view expressed during congressional hearings that problems with the procurement integrity provisions could be cured by better

---

<sup>2</sup>The "Procurement Ethics Reform Act," S. 2775, submitted to the 101st Congress on June 20, 1990, and resubmitted to the 102d Congress on February 14, 1991, introduced as S. 458 on February 21, 1991.

implementing regulations.<sup>3</sup> With due respect for those views, the Panel disagrees. The stifling burden of the information protection provisions of section 423 comes from its overall and needless complexity, and it is the uncertainty caused by that complexity that has made its effect so chilling: Has a procurement started somewhere, or concluded? Has one become a procurement official? Is a firm a competing contractor on that procurement? Those are useless elements in a law whose objective is to forbid stealing and trading in inside information.

The Panel believes the alternative proposed by OFPP and OGE would satisfy the information protection objectives of procurement integrity but in far more understandable terms. The coverage is in some respects slightly broader, and it does not burden the procurement process with certification and record keeping requirements of questionable value. The Panel believes this bill is far superior to the current law and deserves thoughtful reconsideration by the Congress.

---

<sup>3</sup>*Hearings before the Senate Committee on Governmental Affairs, Subcommittee on Oversight of Government Management, 102d Cong, 1st Sess. (1991), (statement of Stuart J. Evans, NASA Assistant Administrator for Procurement).*

## **6.8.1. 18 U.S.C. § 1905**

### **Disclosure of confidential information generally**

#### **6.8.1.1. Summary of the Law**

The statute prohibits an officer or employee of the United States from unlawfully disclosing trade secrets or other confidential information provided to the Government. The statute imposes a maximum penalty of \$1,000 and one year imprisonment for violation.

#### **6.8.1.2. Background of the Law**

The present form of the statute has evolved from provisions in the Tariff Acts of 1894<sup>1</sup> and 1930<sup>2</sup> and the Revenue Act of 1926.<sup>3</sup> The last major revision occurred in 1948<sup>4</sup> with technical amendments in 1980.<sup>5</sup>

#### **6.8.1.3. Law in Practice**

The statute imposes criminal penalties for violation. In practice, it has effectively served to ensure those doing business with the Government that corporate proprietary information will not be disclosed or released to competitors. The Procurement Integrity Provisions, 41 U.S.C. § 423 *et seq.*, have added criminal, civil, and administrative penalties for the unlawful disclosure of source selection or proprietary information in connection with the award of a Government contract. These provisions are implemented in DFARS subpart 203. The Procurement Integrity Provisions do not conflict with 18 U.S.C. § 1905, although their restrictions overlap to a limited degree. Both provisions potentially prohibit a Government employee from unlawfully disclosing pricing information or other proprietary information during the source selection process.

#### **6.8.1.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this statute, which is one of the foundations of the Government's information protection authorities.

#### **6.8.1.5. Relationship to Objectives**

Retention of this statute will promote the integrity of the defense procurement system without being unduly burdensome.

**6.8.2. 41 U.S.C. § 423 (a)(3), (b)(3), (d)**

**Procurement integrity (Disclosure of information)**

**6.8.2.1. Summary of the Law**

Subsection (a)(3) prohibits a "competing contractor,"<sup>1</sup> its agents, or employees, from knowingly obtaining proprietary or source selection information from "procurement officials"<sup>2</sup> except as authorized, during a procurement. Subsection (b)(3) prohibits procurement officials from knowingly disclosing proprietary or source selection information, except as authorized, to a competing contractor during a procurement. Subsection (d) prohibits any person with authorized or unauthorized access to proprietary or source selection information during a procurement from knowingly disclosing such information, directly or indirectly, to those not authorized to receive it. "Proprietary information" is defined in subsection (p)(6) of section 423 as:

- (1) information contained in a bid or proposal;
- (2) cost or pricing data; or
- (3) any other information submitted to the Government by a contractor and designated as proprietary, in accordance with law or regulation, by the contractor, the head of the agency or the contracting officer.

"Source selection information" is defined in subsection (p)(7) as:

[I]nformation determined by the head of the agency or the contracting officer to be information --

(a) the disclosure of which, to a competing contractor, would jeopardize the integrity or successful completion of the procurement concerned; and

(b) which is required by statute, regulations, or order to be secured in a source selection file or other restricted facility to prevent such disclosure.

---

<sup>1</sup>A competing contractor is defined in section 423(p) means any entity that is, or is reasonably likely to become, a competitor for or recipient of a contract or subcontract under such procurement, or any person acting on its behalf.

<sup>2</sup>A procurement official is defined in section 423(p) as any civilian or military official or employee of an agency that has participated personally and substantially in any of the following activities: (i) the drafting of specifications; (ii) review and approval of specifications; (iii) the preparation or issuance of a solicitation; (iv) the evaluation of bids or proposals; (v) the selection of sources; (vi) the review and approval of an award, modification, or extension; (vii) any other specific procurement actions as specified by regulation.

### 6.8.2.2. Background of the Law

Subsections (a)(3), (b)(3) and (d) were a part of the section 27 procurement integrity amendments added by the 1988 reauthorization of the Office of Federal Procurement Policy<sup>3</sup> (OFPP). The original section corresponding to subsection (a)(3) contained a prohibition on disclosure of information which would give a competing contractor "an unfair competitive advantage . . . or would otherwise undermine or harm the Government's negotiating position with regard to the procurement concerned."<sup>4</sup> That provision was refined and supplanted by the definition of source selection information incorporated by the 1989 amendments.

### 6.8.2.3. Law in Practice

These sections are implemented by FAR 3.104-3, 3.104-4, and 3.104-5. FAR 3.104-5 contains a requirement that proprietary information be appropriately marked with a prescribed legend. The recently published Office of Government Ethics (OGE) Standards of Ethical Conduct Regulation, which implements Exec. Order No. 12674, also proscribes the release of "non-public" information, or allowing the use of non-public information to further a private interest, "whether through advice or recommendation or by knowing unauthorized disclosure."<sup>5</sup> That ethics regulation defines non-public information, in part, as "information which is designated confidential by an agency; or which has not actually been disseminated to the general public and is not authorized to be made available to the public on request."<sup>6</sup>

Comments from both Government and industry generally support a prohibition on the release of procurement information and the applications of firm sanctions.<sup>7</sup> One of the major problems noted with the current disclosure provisions, however, is that the period of prohibition on the release and the definition of protected information needs to be "clearly and tightly defined to avoid any chilling on normal interaction and discussion between Government employees and industry."<sup>8</sup> There was also a concern expressed that well-meaning or inadvertent disclosure not be subject to punishment and that information which should be disclosed at appropriate times and for appropriate purposes not be impeded.

The effect of the information protection portions of the procurement integrity amendments has obviously been to stiffen the working relationship of Government and industry personnel during the conduct of a procurement, and to impose what has been characterized as a "code of silence" under which the exchange of routine negotiating information may become a threatening

<sup>7</sup>Memorandum to the Members of the Flowdown and Cost and Pricing Data Task Forces from Debbie von Opstal (April 28, 1991) and letter from Major Edward E. Hunt III, Director, Ethics and Fraud Remedies, Headquarters Air Force Materiel Command, Department of the Air Force (July 9, 1992) forwarded in a letter from Brigadier General James C. Roan, Jr., Staff Judge Advocate, Headquarters Air Force Materiel Command to the Acquisition Law Task Force (July 21, 1992)( hereinafter, HQ AFMC letter of July 9, 1992).

<sup>8</sup>HQ AFMC letter of July 9, 1992.

concern to both parties.<sup>9</sup> Commenters offered illustrations of the high risks of innocent error such as inexperienced commercial firms making inquiries concerning the identities of their competition, of applying the rules to sole source negotiations, or the situation when one component of a military department initiates a procurement without another component's knowledge. Lists of persons authorized to have access to that information are required to be kept by the contracting officer, yet the contracting officer is not in a position to control all those whose duties may require access, such as auditors, and he cannot prevent the inadvertent disclosure of information by those who are beyond his control.

The Panel agrees that the information protection provisions of section 423 are potentially useful, but believes they require amendment to serve efficiently. Protection is clearly important because unauthorized access to a competitor's bid or proposal information or to source selection information can jeopardize the integrity of the procurement process and deprive both Government and competitors of a fair competition. Just as clearly, however, that protection should not come at the expense of the regular discourse and routine exchange of information that is the essence of negotiated procurement.

The underlying problem, in the Panel's view, is that the information protection restrictions of section 423 had to be artificially fitted around the other procurement integrity provisions and their unusual definitions of procurement officials, competing contractors, and conduct of a procurement. The Panel believes the same basic disclosure restrictions would be clearer, and far more effective, if they were drafted to address the nature of the information to be protected rather than the status of the persons handling it.

In 1991, a substitute provision was proposed jointly by OFPP and OGE and considered by the Senate among several other alternatives to the current provisions of section 423.<sup>10</sup> Under this substitute, contractor bid or proposal information, and source selection information, would be protected from unauthorized disclosure until the relevant contract is awarded. The protected information would be defined with specificity and clarity, and trafficking would bear criminal, civil, and administrative penalties.

The Panel believes this alternative would satisfy the information protection objectives of section 423 but in far more understandable terms. The coverage is in some respects even broader, yet it does not burden the procurement process with documentary requirements of doubtful value. Most especially, the clarity of the rules would not have the chilling effect generated by the many uncertainties of the current law.

#### 6.8.2.4. Recommendations and Justification

**Repeal 41 U.S.C. §§ 423(a)(3), (b)(3) and (d), and enact in their place Sec. 3. of the OFPP-OGE proposed legislation.**

The alternative set forth below was originally formulated by the Office of Federal Procurement Policy and the Office of Government Ethics, coordinated and concurred in throughout the executive branch, including the Department of Justice and the Inspectors General, and strongly supported by industry associations. It was drafted to focus on the information to be protected, rather than the status of persons who might disclose or obtain the information, or the particular stage of a procurement when the sensitive information might be generated. It would prohibit the knowing and willful pre-award disclosure of bid or proposal information and source selection information by anyone who, by reason of his office, employment or relationship with the Government, has access to such information. It would thus address the concerns expressed about the current law and not inhibit legitimate and productive exchanges of information during the procurement process.

The Section on Public Contract Law of the American Bar Association (ABA) stated that it believes that this proposal is "a significant step in the right direction."<sup>11</sup> The ABA suggested that it could be improved by deleting penalty provisions that duplicate those of criminal statutes and by formally designating the individuals covered by the statute. The Panel received similar comments from other sources, including a number of Government agencies, supporting adoption of this provision as an alternative to procurement integrity but offering minor suggestions and refinements to its terms.<sup>12</sup>

Rather than incorporate any of those changes at this time, the Panel has endorsed and recommends enactment of the OFPP-OGE bill in the form originally proposed and coordinated throughout Government and industry. It does so because that version is known and understood, and because the first step is obviously to reopen the debate on this topic. The Panel believes that the role and utility of these procurement integrity provisions deserve reconsideration by Congress, and urges adoption of the alternative drafted by OFPP and OGE.

<sup>11</sup>Letter from the Karen Hastie Williams, Chair, Section of Public Contract Law, American Bar Association to Colonel Susan McNeill (Aug. 25, 1992).

<sup>12</sup>See e.g. letter from Ira Kemp, Associate Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force (Acquisition)(Sept. 25, 1992), Letter from D. Evelyn Lyon Attorney, Office of the Associate General Counsel (Contracts), National Aeronautics and Space Administration to Donald M. Freedman, DOD Advisory Panel on Streamlining and Codifying Acquisition Law (Sept. 22, 1992), letter from R.N. Fielding, Legislative and Regulatory Counsel, National Security Agency, Central Security Service to Colonel Susan P. McNeill, Section 800 Advisory Panel (Oct. 1, 1992). *But see* letter from Paul C. Smith, Chief, Contract Law Division, Office of the Judge Advocate General (Sept. 2, 1992) (suggesting changes to wording in the proposed provision, but also expressing the belief that the substitute provision is unnecessary and duplicative of 18 U.S.C. §§ 371 and 641).

#### 6.8.2.5. Relationship to Objectives

Repeal of this statute and passage of the proposed alternative would remedy the weaknesses in the present statute and promote the same end with far greater clarity.

#### 6.8.2.6. Proposed Statute

##### **Disclosing and Obtaining Contractor Bid or Proposal Information or Source Selection Information.**

##### Sec. 27. Disclosing and obtaining contractor bid or proposal information or source selection information.

(a) A present or former officer or employee of the United States, or a person who is acting or has acted for, or on behalf of, or who is advising or has advised the United States with respect to a Federal agency procurement and who --

(1) by virtue of that office, employment, or relationship has or had access to contractor bid or proposal information or source selection information, and

(2) other than as provided by law, knowingly and willfully discloses that information before the award of a Federal agency procurement contract to which the information relates, is subject to the penalties and administrative actions set forth in subsection (d).

(b) Whoever, other than as provided by law, knowingly and willfully obtains contractor bid or proposal information or source selection information before the award of a Federal agency procurement contract to which the information relates is subject to the penalties and administrative actions set forth in subsection (d).

(c) Whoever, other than as provided by law, knowingly and willfully violates the terms of a protective order, issued by the Comptroller General or the board of contract appeals of the General Services Administration in connection with a protest against the award or proposed award of a Federal agency procurement contract, by disclosing or obtaining contractor bid or proposal information or source selection information is subject to the penalties and administrative actions set forth in subsection (d).

(d) The penalties and administrative actions for an offense under subsection (a), (b), or (c), are as follows:

##### (1) Criminal penalties.

(A) Whoever engages in the conduct constituting the offense shall be imprisoned for not more than one year or fined in the amount set forth in 18 U.S.C. § 3571, or both.

(B) Whoever engages in the conduct constituting the offense for the purpose of either --

(i) exchanging the information covered by subsections (a), (b), and (c), for anything of value, or

(ii) obtaining or giving anyone a competitive advantage in the award of a Federal agency procurement contract.

shall be imprisoned for not more than five years or fined in the amount set forth in 18 U.S.C. 3571, or both

(2) Civil penalties. The Attorney General may bring a civil action in the appropriate United States district court against any person who engages in conduct constituting an offense under subsection (a), (b), or (c). Upon proof of such conduct by a preponderance of the evidence, the person is subject to a civil penalty. An individual who engages in such conduct is subject to a civil penalty of not more than \$50,000 for each violation plus twice the amount of compensation which the individual received or offered for the prohibited conduct. An organization that engages in such conduct is subject to a civil penalty of not more than \$500,000 for each violation plus twice the amount of compensation which the organization received or offered for the prohibited conduct.

(3) Administrative actions. If a Federal agency receives information that a contractor or a person has engaged in conduct constituting an offense under subsection (a), (b), or (c), the Federal agency shall consider one or more of the following actions, as appropriate:

(A) Canceling the Federal agency procurement when a contract has not been awarded;

(B) Declaring void and rescinding a contract in relation to which there has been either--

(i) a conviction for an offense under subsection (a), (b), or (c), committed by the contractor or someone acting for the contractor, or

(ii) a determination by the head of the agency based upon clear and convincing evidence that the contractor or someone acting for the contractor has engaged in such conduct.

If such action is taken, the United States is entitled to recover in addition to any penalty prescribed by law, the amount expended under the contract;

(C) Initiating suspension or debarment proceedings for the protection of the Government in accordance with procedures in the Federal Acquisition Regulation. In this regard,

engaging in conduct constituting an offense under subsection (a), (b), or (c), affects the present responsibility of a Government contractor or subcontractor; or

(D) Initiating adverse personnel action, pursuant to the procedures in chapter 75 of title 5, United States Code, or other applicable law or regulation.

(e) For purposes of this section:

(1) The term "contracting officer" means a person who, by appointment in accordance with applicable regulations, has the authority to enter into a Federal agency procurement contract on behalf of the Government and to make determinations and findings with respect to such a contract.

(2) The term "contractor bid or proposal information" means the following information submitted to a Federal agency as part of, or in connection with, a bid or proposal to enter into a Federal agency procurement contract, if that information has not been previously made available to the public or disclosed publicly:

(A) Cost or pricing data;

(B) Indirect cost and direct labor rates;

(C) Proprietary information about manufacturing processes, operations, or techniques marked by the contractor in accordance with applicable law or regulation; or

(D) Information marked by the contractor as "contractor bid or proposal information," in accordance with applicable law or regulation.

(3) The term "Federal agency" has the meaning given that term in section 3 of the Federal Property and Administrative Services Act (40 U.S.C. 472).

(4) The term "Federal agency procurement" means the competitive acquisition by contract of supplies or services (including construction) from non-Federal sources by a Federal agency using appropriated funds.

(5) The term "protest" means a written objection by an interested party to the award or proposed award of a Federal agency procurement contract, pursuant to section 111 of the Federal Property and Administrative Services Act (40 U.S.C. 759) or subchapter V of chapter 35 of title 31, United States Code.

(6) The term "source selection information" means the following information prepared for use by a Federal agency for the purpose of evaluating a bid or proposal to enter into a Federal agency procurement contract, if that information has not been previously made available to the public or disclosed publicly:

(A) Bid prices submitted in response to a Federal agency solicitation for sealed bids or lists of those bid prices prior to public bid opening;

(B) Proposed costs or prices submitted in response to a Federal agency solicitation or lists of those proposed costs or prices;

(C) Source selection plans;

(D) Technical evaluation plans;

(E) Technical evaluations of proposals;

(F) Cost or price evaluations of proposals;

(G) Competitive range determinations which identify proposals that have a reasonable chance of being selected for award of a contract;

(H) Rankings of bids, proposals, or competitors;

(I) The reports and evaluations of source selection panels or boards or advisory councils; or

(J) Other information marked as "source selection information" based upon a case-by-case determination by the head of the agency, his designee, or the contracting officer that its disclosure would jeopardize the integrity or successful completion of the Federal agency procurement to which the information relates.

(f) No person may file a protest against the award or proposed award of a Federal agency procurement contract alleging an offense under subsection (a), (b), or (c), of this section, nor may the Comptroller General or the board of contract appeals of the General Services Administration consider such an allegation in deciding such a protest, unless that person reported information to the Federal agency responsible for the procurement that he believed constituted evidence of the offense no later than ten working days after he first discovered the possible offense.

(g) This section does not:

(1) Restrict the disclosure of information to or its receipt by any person or class of persons authorized, in accordance with applicable agency regulations or procedures, to receive that information;

(2) Restrict a contractor from disclosing its own bid or proposal information or the recipient from receiving that information;

(3) Restrict the disclosure or receipt of information relating to the Federal agency procurement after it has been canceled by the Federal agency prior to contract award unless the Federal agency plans on resuming the procurement;

(4) Authorize the withholding of information from nor restrict its receipt by the Congress, a committee or subcommittee thereof, the Comptroller General, a Federal agency, or an Inspector General of a Federal agency;

(5) Authorize the withholding of information from nor restrict its receipt by any board of contract appeals of a Federal agency or the Comptroller General in the course of a protest against the award or proposed award of a Federal agency procurement contract; or

(6) Limit the applicability of the requirements, sanctions, contract penalties, and remedies established under any other law or regulation.

(h) Government-wide regulations and guidelines deemed appropriate to carry out this Act shall be issued in the FAR by DOD, the General Services Administration, and the National Aeronautics and Space Administration, in coordination with the Federal Acquisition Regulatory Council. Proposed regulations and guidelines shall be issued within 120 days after the date of enactment. Implementing regulations and guidelines shall be issued within 180 days of enactment.

## **6.9. Certifications, Training, and Remedies**

### **6.9.0. Introduction**

This section includes the certification, training, and remedies portions of the procurement integrity amendments to the OFPP Act. Certification and training requirements of section 423 contribute little genuine substance, yet impose extraordinary demands on Government and contractor personnel and resources. The Panel recommends that they be repealed, together with the related provisions which establish contractual, administrative, and criminal penalties for violation of section 423.

The certification requirements at 423(e) prohibit award of a Federal contract or contract modification unless the contractor employee responsible for the bid or modification certifies that he has no information concerning possible violations of the major substantive sections of 423 which have been discussed in this chapter. The responsible contractor employee must, in the alternative, disclose any information he has concerning possible violations of those sections. Similar provisions also apply to Government contracting officers.

The certification requirements of section 423 impose a significant overhead burden in the daily conduct of defense contracting, and have been an issue of concern in Government and industry from their enactment. The education function performed by requiring certification has no doubt been successful, but the Panel questions whether their benefits outweigh the paperwork and record-keeping burdens they impose on both Government and industry, and whether the certification process may gradually be reduced to a meaningless routine that diminishes its original purpose.

Subsection (k) permits a procurement official or former procurement official to receive advice from his agency ethics officials regarding the propriety of conduct under the standards imposed by section 423, and subsection (l) mandates Government ethics training programs to educate procurement officials regarding section 423(b), (c), and (e), and requires certifications reciting familiarity with those provisions. The Panel has recommended that subsections (k) and (l) be repealed together with the underlying provisions (a), (b), (c), (d), and (f) of section 423, because they place an undue burden on industry and present and former Government procurement personnel.

Subsections (g), (h), and (j) establish contractual, administrative, and criminal penalties for violation of section 423. They recite the most common remedies -- contractual, administrative, civil, and criminal -- as well as adverse personnel actions for civilian Government employees. Subsection (m) provides for the use of any other remedy that exists under the law.

As the Panel has recommended the repeal of subsections 423(a), (b), (c), (d), and (f), it recommends that the corresponding remedies provisions be repealed. The Panel's recommended alternative legislation governing the protection of procurement sensitive information contains a separate penalty provision.

Section 218 of Title 18 also allows for an agency to void or rescind contracts and other transactions in accordance with regulations established under the President's authority. The Panel has recommended that this statute be retained.

## **6.9.1. 41 U.S.C. § 423**

### **Procurement integrity (e) Certification and enforcement matters**

#### **6.9.1.1. Summary of the Law**

For contract actions over \$100,000, subsection (e) prohibits a Federal agency from awarding a contract for property or services to a competing contractor or from agreeing to a modification or contract extension unless the contractor employee responsible for the bid or modification certifies that he has no information concerning possible violations of subsections (a), (b), (d), or (f) of section 423, or he discloses any information he has concerning possible violations of those sections. In addition, the responsible contractor employee must certify that each contractor employee who has participated personally and substantially in the procurement has certified that he is familiar with, and will comply with, the requirements of section 423(a) and will report any violation of that section. Subsection (e) requires that no contract award or agreement to any modification take place unless the contracting officer certifies to the head of the agency that the contracting officer has no information concerning violations of section 423 or certifies that all such information has been disclosed. Under this subsection, the head of the agency may request these certifications from the contractor or contracting officer at any time.

#### **6.9.1.2. Background of the Law**

Subsection (e) was part of the original section 27 amendments to the Office of Federal Procurement Policy Act, later amended by Pub. L. No. 101-189.<sup>1</sup> The contractor certification was intended to ensure that:

[W]hen an official or an employee of the winning contractor signs a contract, he or she will also be certifying to that company's compliance with the Act.<sup>2</sup>

#### **6.9.1.3. Law in Practice**

From the date of their enactment, the certification requirements of 41 U.S.C. § 423(e) have been questioned in Government and industry for their utility and cost. These certificates, which are in addition to those required of procurement officials under subsection 423(l), require an official of each competing contractor to vouch that the substantive provisions of section 423 have been honored or that possible violations have been reported. Thereafter, they require the contracting officer, before awarding the contract or executing the modification, to attest that he is

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1990 and 1991, Pub. L. No. 101-189, § 814(c), 103 Stat. 1495-1 (1989).

<sup>2</sup>H.R. REP. NO. 911, 100th Cong., 2d Sess. 23 (1988).

aware of no violations, or that all information regarding suspected violations has been duly reported.

The Panel received a number of comments on this provision. The Air Force Deputy Assistant Secretary for Contracting stated that "the certification requirements of the procurement integrity provisions have created a burdensome process for completion, review, and record keeping for both industry and Government."<sup>3</sup> The Center for Strategic and International Studies (CSIS) cited the requirement for certification as imposing a burdensome compliance obligation that is inconsistent with the goal of integration of DOD towards purchasing commercial items with simplified procedures. CSIS recommends, accordingly, that fixed price transactions for commercial items be exempted from subsection (e).<sup>4</sup> The Council of Defense and Space Industry Associations (CODSIA) has also expressed concern that the form and format of procurement integrity certifications have become a bid-responsiveness or offeror-responsibility issue.<sup>5</sup> CODSIA recommends that the failure to properly execute the certificate be treated as a minor informality if there is no showing of intent or willfulness, and recommends individual certifications be eliminated. Overall, CODSIA finds that the benefits from certification do not outweigh the burdensome paperwork and increased cost associated with implementation.<sup>6</sup>

In the event of a violation of one of the substantive provisions at 41 U.S.C. § 423(a), (b), (d), or (f), the availability to the Government of a subsection 423(e) certificate attesting otherwise would, depending upon the facts and evidence surrounding its execution, at best afford the Government a secondary or collateral tool for enforcement. The Panel has not been informed of any cases in which a certificate alone has been instrumental to the Government. And as suggested by the United States Attorney responsible for the "Ill Wind" prosecutions, the deliberate criminal conduct prevalent in those cases would not likely be deterred by the requirement to sign a certificate.<sup>7</sup>

The principal function served by the certificates under subsection 423(e) has been educational. They have required Government and contractor personnel alike to understand the substantive requirements of the law fully, and have impressed the gravity of the Government's resolve that its procurements be conducted with the highest ethical standards. In those respects the certification requirements have clearly been successful.

---

<sup>3</sup>Memorandum from Brigadier General Robert W. Drewes, Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force (Acquisition) to Major Soesbe, Acquisition Law Task Force (July 3, 1992).

<sup>4</sup>Letter from Debra van Opstal, Deputy Director, Science and Technology Program, Center for Strategic and International Studies to Robert D. Wallick (June 4, 1992).

<sup>5</sup>Letter from the Council of Defense and Space Industry Associations (CODSIA) to Robert Wallick and Harvey Wilcox (Aug. 18, 1992). Letter, from Jack Harding, Raytheon Company, to Robert D. Wallick, (June 19, 1992).

<sup>6</sup>CODSIA letter, Aug. 18, 1992.

<sup>7</sup>"It is naive to think that legislation is going to cure the conduct you had in Ill Wind. Certifications aren't going to change anything. Ill Wind was a classic instance of old-fashioned lying, cheating, stealing and robbing. Only by fundamentally changing the moral and ethical climate of our society will you ever reach that one per cent who were involved." Address by Henry E. Hudson, United States Attorney, Eastern District of Virginia, at the Attorney General's Defense Procurement Fraud Conference, Washington, D.C., May 24, 1990.

The question now arises whether their perpetuation merits their obvious burden to the acquisition process, and it is the Panel's view that they do not. Having successfully introduced the various procurement integrity restrictions to the contracting community, the certification requirements now risk declining into a routine exercise in administrative paperwork that diminishes their original purpose. By a variety of educational means employed by OFPP, DOD, GSA, the Department of Justice, and individual purchasing activities, those doing business with the Government are informed of current issues and of the Government's expectations regarding contract compliance. Relying upon avenues such as those would help to ensure that ethical compliance in defense procurement does not become trivialized by a gradual perception that the Government's standards can be fully satisfied by the periodic submission of another standard form.

#### **6.9.1.4. Recommendation and Justification**

##### **Repeal**

Elsewhere in the report the Panel has concluded that, to eliminate duplication and to promote clarity, subsections (a), (b), (d), and (f) of section 423 be repealed, in which event the certification requirements of subsection (e) would serve no further use. Fully apart from Congressional action on those recommendations, however, the Panel believes that subsection (e) places a substantial burden on both Government and industry personnel with little discernible return to the public. The process of execution, review, and retention of these certifications entails time and resources that can be applied better elsewhere. Accordingly, the Panel recommends that subsection (e) of section 423 be repealed.

#### **6.9.1.5. Relationship to Objectives**

Repeal of this statute would remove an undue burden on both Government and industry by eliminating its requirements to execute certifications that are making, at best, a marginal contribution to the integrity of defense procurement.

## **6.9.2. 41 U.S.C. § 423**

### **Procurement integrity**

#### **(g) Contractual penalties**

#### **(h) Administrative actions**

#### **(j) Criminal Penalties**

#### **(m) Remedies not exclusive**

### **6.9.2.1. Summary of the Law**

The subsections above establish contractual, administrative, and criminal penalties for violation of section 423. Contractual penalties include denial of payment or default termination but leave room for any other appropriate contractual action. Administrative penalties include voiding or rescinding the contract, default termination, sanctions, and the initiation of suspension or debarment proceedings. Federal civilian employees in violation of section 423 are subject to appropriate adverse personnel actions. Civil fines up to \$100,000, or up to \$1 million for competing contractors which are not individuals, may be levied for violations of subsections (a), (b), (d), and (f). Criminal penalties for receiving or disclosing proprietary or source selection information are imprisonment for not more than five years or a fine in accordance with Title 18. Subsection (m) provides for any other remedy for violation of this section existing in any other law.

### **6.9.2.2. Background of the Law**

The substance of these provisions was included in the original section 27 amendments made in 1988 to the Office of Federal Procurement Policy Act,<sup>1</sup> later amended with regard to the penalties prescribed for the disclosure of proprietary or source selection information.<sup>2</sup>

### **6.9.2.3. Law in Practice**

FAR 3.104-11 provides implementing instructions on processing violations of section 423. The contractual and administrative remedies set forth in subsections (g) and (h), such as cancellation of a solicitation or termination of a contract, are generally understood to be Government remedies that exist independently of section 423. Their recitation in this provision serves primarily to alert the contracting parties to their potential applicability in the event of a violation and not as enabling authority for their use. Subsection (j), by contrast, prescribes explicit civil and criminal penalties applicable to entities and individuals for violation of specified portions of section 423, and subsection (m) clarifies that the remedies prescribed are not exclusive of those available under other provisions of law.

<sup>1</sup>Office of Federal Procurement Policy Amendments of 1988, Pub. L. No. 100-629 § 6(a), 102 Stat. 4063(1988).

<sup>2</sup>National Defense Authorization Act for Fiscal Year 1990 and 1991, Pub. L. No. 101-189. Div. A, Title VIII § 819, 103 Stat. 1352, 1495.

For the reasons set forth in other sections of this chapter, the Panel has recommended that the substantive portions of section 423 to which these remedies apply either be repealed as duplicative of other authority or, in three cases, repealed and replaced with a different statute. It is the Panel's view, for example, that subsections 423(a)(2) and (b)(2) have effectively been superseded by the recent enactment of the civil gift statute at 5 U.S.C. § 7353 and the promulgation by the Office of Government Ethics (OGE) of uniform regulations at 5 C.F.R. 2635 interpreting that law and the criminal gratuities statute at 18 U.S.C. § 201(c). Those rules will apply uniformly throughout the executive branch and have, we believe, satisfied the primary objective of subsections 423(a)(2) and (b)(2).

Similarly, the Panel has recommended the repeal of subsections 423(a)(1), (b)(1), and (c), which deal with employment discussions between procurement officials and competing contractors. The recently-issued OGE regulations have for the first time comprehensively addressed this topic and effectively closed the gap that had been perceived in the interpretation of the basic Government-wide restriction at 18 U.S.C. § 208(a). In addition, civil penalties for violation of section 208 (a) were recently made available at 18 U.S.C. § 216.

The Panel has also recommended repeal of the "revolving door" restriction at subsection 423 (f). That provision has proven to be difficult to interpret and is to a great extent duplicative of other restrictions of law. One aspect of subsection 423(f) not squarely addressed by other authority is the additional protection it may afford the Government against the misuse of inside information by former procurement personnel through "behind-the-scenes" assistance to a contractor. The Panel believes that objective would be better met by enactment of a more direct and comprehensive restriction incorporated within the main body of post-employment restrictions at 18 U.S.C. § 207.

Finally, the Panel has recommended the repeal of subsections 423(a)(3), (b)(3), and (d), governing the unauthorized disclosure of sensitive procurement and source selection information. The Panel found that these provisions have an important role and function but that they suffer in clarity by virtue of being drafted to conform with portions of section 423 having other objectives. In that instance the Panel has recommended repeal and enactment of a stand-alone information protection provision bearing its own penalty provisions that largely replicate those contained in section 423.

#### **6.9.2.4. Recommendation and Justification**

##### **Repeal**

Each of the substantive restrictions of section 423 to which the remedies provisions apply has been recommended for repeal or, in three cases, for repeal and enactment of an alternative containing its own penalty provisions. In the event those recommendations of the Panel are adopted, subsections 423 (g), (h), (j), and (m) would serve no further purpose.

#### **6.9.2.5. Relationship to Objectives**

Repeal of these sections would make the standards which should and must apply to all present and former Government officials more equitable and would ensure, through increased clarity and simplicity, the continued ethical integrity of defense procurement programs.

### **6.9.3. 41 U.S.C. § 423**

#### **Procurement integrity**

##### **(k) Ethics advice**

##### **(l) Training**

#### **6.9.3.1. Summary of the Law**

Subsection (k) of section 423 provides for implementing regulations which would allow a procurement official or former procurement official to request and receive advice within 30 days from a designated agency ethics official regarding whether the official is or would be precluded by section 423 from a specific activity. This subsection requires the requesting official to furnish all information relevant to the determination. Subsection (l) requires the Federal agency head to establish a procurement ethics training program which, at a minimum, would provide explanations of subsection (b), (c), and (e), and which would require each procurement official to certify that he is familiar with those provisions, will not engage in conduct prohibited by those subsections, and will report any conduct that appears to violate subsection (a), (b), (d), or (f).

#### **6.9.3.2. Background of the Law**

Subsections (k) and (l) were 1989 amendments to the original 1988 section 27 amendments to the Office of Federal Procurement Policy (OFPP) Act.<sup>1</sup>

#### **6.9.3.3. Law in Practice**

FAR 3.104-8 and 3.104-12 implement subsections (k) and (l) respectively. These provisions reflect an effort, following many initial questions raised about the scope and applicability of portions of the procurement integrity amendments to the OFPP Act, to provide clarity and certainty to those subject to its restrictions and penalties. Subsection (l) requires procurement officials to certify that they are familiar with three key provisions of section 423 and that they will report suspected violations of four enumerated provisions. This is a "one-time" certification, which in DOD ordinarily follows a written indoctrination in the relevant provisions.

The "safe harbor" opinions required by subsection 423(k) are intended to afford procurement personnel with assurance regarding the applicability of the law's substantive provisions, including its "revolving door" provisions. Provided that the employee fully discloses relevant details in requesting such a determination, those opinions may be relied upon in the employee's future endeavors. Because most of them require close analysis of the applicable facts and circumstances, they demand individual preparation and the attention of experienced Government attorneys.

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1990 and 1991, Pub. L. No. 101-189 Div. A, Title VIII § 814, 103 Stat. 1352, 1495 (1989).

While DOD does not maintain running department-wide statistics on the numbers of opinions issued, their ready availability under the law and the sizable penalties for violations under section 423 apparently have prompted prospective employers to require them of former defense employees almost as a matter of course. While similar "safe harbor" opinions are also prescribed to interpret provisions of 10 U.S.C. § 2397, they are not available to interpret other post-employment statutes that also may apply to departing defense employees.

#### **6.9.3.4. Recommendation and Justification**

##### **Repeal**

The separate "training" requirement of subsection (l) is in addition to Government-wide ethics training requirements imposed by the Office of Government Ethics and as implemented in most agencies involves sending a summary of the relevant provisions of the law obtaining attestations that they have been understood. The employee's affirmative obligations to comply with the law and contribute to its enforcement are not dependent upon his written agreement to do so. The provision at subsection (k) requiring the issuance of "safe harbor" legal opinions is a costly and inefficient approach to curing the many substantive shortcomings of the Procurement Integrity amendments, all of which the Panel believes are better addressed by repeal. Subsections (k) and (l) should be repealed together with the corresponding provisions (a), (b), (d), (e), and (f) of section 423 because they impose an undue burden on industry and present and former Government procurement personnel.

As proposed in the other sections of this chapter, the chief substantive provisions of section 423 have been recommended for repeal or for repeal and substitution by alternative legislation. In the event those recommendations of the Panel are adopted, subsections 423(k) and (l) would serve no further purpose.

#### **6.9.3.5. Relationship to Objectives**

Repeal of this statute would make the standards that apply to all present and former Government officials more equitable and would ensure, through increased clarity and simplicity, the continued integrity of defense procurement.

#### 6.9.4. 18 U.S.C. § 218

### Voiding transactions in violation of chapter; recovery by the United States

#### 6.9.4.1. Summary of the Law

Section 218 permits the President of the United States, or an agency or department head, under regulations prescribed by the President, to void and rescind any of the transactions listed in the statute, including any contract in relation to which there has been a final conviction for any violation of Chapter 11 of Title 18 (18 U.S.C. § 201 *et seq.*). The statute also gives the Government the right, in addition to any other remedy prescribed by law, to recover the amount expended or the value of the thing delivered as a result of the transaction.

#### 6.9.4.2. Background of the Law

This statute was first enacted as a section of the Bribery, Graft and Conflicts of Interest Act of October 23, 1962.<sup>1</sup> It was intended to give the Government the statutory right to void and rescind contracts as well as to preserve any other legal remedies including the right of the Government to void contracts based upon the principles of equity enunciated in *United States v. Mississippi Valley Generating Co.*<sup>2</sup>

#### 6.9.4.3. Law in Practice

Section 218 was implemented by Exec. Order No. 12448,<sup>3</sup> which delegated to department and agency heads the authority to declare void and rescind the transactions enumerated in section 218. The Executive Order also gave agency and department heads the authority to issue regulations providing for written notice and an opportunity to submit information or have a hearing on the matter before issuance of a final written decision.

It is clear from the statute and its history that the Government may also exercise other remedies in law in conjunction with the statute, including common law recovery upon theories of breach of a fiduciary duty and constructive trust.<sup>4</sup> In line with this reasoning, at least one court has found that the essence of section 218 is not that the defendant received money in violation of a conflict of interest statute, but that the money was paid in breach of fiduciary duty to the Government, as evidenced by the violation of the conflict of interest statute.<sup>5</sup>

No comments were received concerning this statute, and the Panel has not uncovered any problems which should be remedied through a statutory change.

<sup>1</sup>Pub. L. No. 87-849, 76 Stat. 1119 (1962).

<sup>2</sup>364 U.S. 520 (1961).

<sup>3</sup>48 Fed. Reg. 51281, Nov. 4, 1983.

<sup>4</sup>*United States v. Eilberg*, 507 F. Supp. 267 (D.E.D.Pa. 1980).

<sup>5</sup>*United States v. Podell*, 436 F. Supp. 1039, 1041-2 (D.S.D.N.Y.1977).

#### **6.9.4.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that 18 U.S.C. § 218 be retained. It provides a statutory basis for rescinding transactions that violate bribery, gratuity, and conflict of interest laws.

#### **6.9.4.5. Relationship to Objectives**

This provision promotes the continued ethical integrity of defense procurement programs.

## **6.10. Procurement Policy**

### **6.10.0. Introduction**

Years of study and debate over the wisdom and need for centralized, Government-wide procurement policy and rulemaking concluded with the 1974 legislation creating the Office of Federal Procurement Policy (OFPP). Much of the impetus was a high-level study commissioned by the 91st Congress to recommend methods "to promote the economy, efficiency, and effectiveness" of executive branch procurement. Congress conceived of the OFPP as a source of central executive branch leadership, guidance, and direction for procurement policies and regulations guiding nearly one quarter of all Government spending.

When Congress created the OFPP it envisioned a small office of highly qualified experts, supplemented when necessary by the efforts of executive agency personnel. Their principal focus would be to seek savings and efficiencies through consolidation, simplification, and central direction of procurement policies and regulations, which had then become unwieldy and outdated. Since 1974 Congress has adjusted the authority of the OFPP Administrator to initiate directives and regulations, but it has attempted to maintain the thrust of OFPP's efforts to initiate procurement reform.

The OFPP Act contained fourteen sections, later amended to add provisions concerning procurement notice requirements, requirements for research into innovative procurement methods, and other reforms. The Office of Competition Advocate and provisions concerning rights in technical data were introduced in 1984, and rules for travel expenses of contractors were added in 1986. The Uniform Procurement System, the Federal Acquisition Regulatory Council, the Cost Accounting Standards Board, and the Advocate for Commercial Products were added by the 1988 Amendments, as was section 27, which set out extensive rules and procedures covering procurement integrity.

This subchapter addresses those sections of the OFPP Act bearing directly upon the authority of the Administrator; upon the policy, directive, and rulemaking functions of OFPP; and upon the operation of the Federal Acquisition Regulatory Council. Other portions of the report address those provisions of the Act which bear more directly on the functions discussed in those chapters, such as the Cost Accounting Standards Board and the Advocate for Commercial Products.

In its review of the provisions related to the duties and authority of the Administrator, the Panel concluded that OFPP has succeeded in serving the acquisition needs of DOD and that, overall, its rulemaking system has functioned well. The only changes recommended are to amend the Act's small purchase threshold and its definition of technical data, both of which are to conform its provisions with other recommendations made by the Panel.

## **6.10.1. 41 U.S.C. § 401**

### **Declaration of policy**

#### **6.10.1.1. Summary of the Law**

This initial section of the Office of Federal Procurement Policy (OFPP) Act articulates the policy of the United States to promote economy, efficiency, and effectiveness in the procurement of property and services in executive branch procurement by:

- promoting full and open competition;
- establishing policies, procedures, and practices which will provide the Government with property and services of the requisite quality, within the time needed, at the lowest reasonable cost;
- promoting the development of simplified uniform procurement processes;
- promoting the participation of small business concerns;
- supporting the continuing development of a competent, professional work force;
- eliminating fraud and waste in the procurement process;
- eliminating redundant administrative requirements placed on contractor and Federal procurement officials;
- promoting fair dealings and equitable relationships with the private sector;
- ensuring that payment is made in a timely manner and only for value received;
- requiring, to the extent practicable, the use of commercial products to meet the Government's needs;
- requiring that personal services are obtained in accordance with applicable personnel procedures and not by contract;
- ensuring the development of procurement policies that will accommodate emergencies and wartime as well as peacetime requirements; and

- promoting, whenever feasible, the use of specifications which describe needs in terms of functions to be performed or the performance required.

#### **6.10.1.2. Background of the Law**

The Office of Federal Procurement Policy Act was the culmination of a Federal procurement reform movement of the late 1960s and early 1970s. Public concern about the effectiveness and integrity in the Federal procurement system ultimately led to an extensive examination of that system by the Commission on Government Procurement established by Congress in November 1969. The Commission's findings and recommendations became the foundation for the Act's provisions. The central finding of the Commission was characterized by the Congress with the observation that "no one was in charge of a function which involves the expenditure of more than one-fourth of the budget."<sup>1</sup> Specifically, the Commission found flaws in the coordination of policies between executive branch agencies, a vacuum in policy leadership, and an outmoded and fragmented statutory base.<sup>2</sup> To remedy the problems perceived to be caused by a lack of centralized authority, the Commission's major recommendation was to establish the OFPP.<sup>3</sup>

This section and section 402, the declaration of congressional policy, express the guiding principles of the OFPP and a "conceptual framework for the conduct of Federal Procurement."<sup>4</sup> These sections remain almost unchanged from the original OFPP Act, except for the addition of three objectives to section 401. In 1983, the concept of promoting full and open competition was added; and the 1988 amendment added an objective to promote the use of commercial products "to the maximum extent practicable."<sup>5</sup> The 1988 amendment also added the objective of promoting procurement policies to accommodate emergencies and wartime needs.<sup>6</sup>

#### **6.10.1.3. Law in Practice**

This is not an executory provision of the Act but, like section 402, establishes the general policies and goals which should be carried out by the Administrator of OFPP. No comments have been received concerning this section.

#### **6.10.1.4. Recommendation and Justification**

##### **Retain**

---

<sup>1</sup>S. Rep. No. 692, 93th Cong., 2nd. Sess., *reprinted in* 1974 U.S. Code Cong. & Admin. News 4589, 4596.

<sup>2</sup>THE REPORT OF THE COMMISSION ON GOVERNMENT PROCUREMENT, Vol. I, at 8 (1972).

<sup>3</sup>*Id.*

<sup>4</sup>S. REP. NO. 692, 93th Cong., 2nd. Sess., *reprinted in* 1974 U.S.C.C.A.N. 4589, 4598.

<sup>5</sup>Pub. L. No. 96-83, § 2, 93 Stat. 648 (1983), Pub. L. No. 100-697, § 2, 102 Stat. 4055 (1988).

<sup>6</sup>Pub. L. No. 100-697, § 2, 102 Stat. 4055 (1988).

This statute sets forth the broad policies and goals of Federal executive branch procurement and is absolutely necessary in order to provide the OFPP Administrator and other executive agency heads with common Government-wide objectives.

#### **6.10.1.5. Relationship to Objectives**

This section states only the broad policy objectives to be achieved by executive agency procurement and leaves detailed implementation to regulation. It therefore promotes an important goal of the Panel.

## **6.10.2. 41 U.S.C. § 403**

### **Definitions**

#### **6.10.2.1. Summary of the Law**

This section lays out the significant terms used in the Office of Federal Procurement Policy (OFPP) Act including the terms: "executive agency," "procurement," "competitive procedures," "full and open competition," "responsible source," "major system," "item," "small purchase threshold," and "technical data."

#### **6.10.2.2. Background of the Law**

This section was part of the original OFPP Act and has been supplemented by the various amendments to that Act.<sup>1</sup>

#### **6.10.2.3. Law in Practice**

The Panel's review indicated that all of the definitions listed in this section were currently appropriate with the exception of the "small purchase threshold." The recommendation of the Panel as described in detail in Chapter 4 is that the term "simplified acquisition threshold" be substituted for "small purchase threshold".

#### **6.10.2.4. Recommendations and Justification**

##### **I**

**Amend Section 4(11) to substitute the term "simplified acquisition threshold" for "small purchase threshold" and to set the threshold at \$100,000 in lieu of the current threshold of \$25,000; provided that the new threshold remain subject to adjustment every five years beginning in 1995.**

##### **II**

**Amend Section 4(8) to change the definition of "technical data" to include computer data bases and manuals and other publications supporting computer programs.**

This provision sets forth basic definitions that apply to executive branch procurement and thus is essential to provide the Administrator and other executive agency heads with common Government-wide meaning of significant acquisition terms used throughout the Act. For the

---

<sup>1</sup>The Office of Federal Procurement Policy Act, Pub. L. No. 93-400, § 4, 88 Stat. 797 (1974).

reasons set forth in the analysis contained in Chapter 4 of this report, the Panel recommends that this section be amended to conform to the new definition which it recommends be substituted for the small purchase threshold. The simplified acquisition threshold will be defined as \$100,000.

Further, for the reasons set forth in the analysis of technical data contained in Chapter 5 of this report, the Panel recommends amending the Act's definition of technical data to conform with the related recommendations made in that chapter.

#### **6.10.2.5. Relationship to Objectives**

This section sets forth common definitions to be applied throughout the OFPP Act and promotes a Government-wide understanding of those significant terms.

#### **6.10.2.6. Proposed Statute**

(8) the term "technical data" means recorded information of a scientific or technical nature. It does not include computer programs but does include manuals, instructional materials and technical data formatted as a computer data base. ~~reordered information (regardless of the form or method of the recording) of a scientific or technical nature (including computer software documentation) relating to supplies procured by an agency.~~ Such term does not include computer software or financial, administrative, cost or pricing or management data or other information incidental to contract administration;

\* \* \*

(11) the term "simplified acquisition ~~small purchase~~ threshold" means \$100,000 ~~\$25,000~~, adjusted on October 1 of each year divisible by 5 to the amount equal to \$100,000 ~~\$25,000~~ in constant fiscal year 1990 dollars (rounded to the nearest \$1,000).

### 6.10.3. 41 U.S.C. § 405

#### Authority and functions of the Administrator

##### 6.10.3.1. Summary of the Law

This statutory provision sets out the role of the Administrator of the Office of Federal Procurement Policy (OFPP) in carrying out the policies and functions outlined in the OFPP Act. That role is to provide overall direction of procurement policy and leadership in the development of procurement systems in the executive agencies. The Administrator may prescribe Government-wide policies in carrying out the functions outlined in the Act with due regard for the programs of the executive agencies. The statutory provision also provides that the Act's policies be implemented in "a single Government-wide procurement regulation," the Federal Acquisition Regulation, which was to be followed in the procurement of property (other than real property), services and construction, repair, and maintenance. In instances where DOD, NASA, and GSA cannot agree on regulations, forms, and procedures, the Administrator shall, within statutory guidelines, prescribe Government-wide regulations, forms, and procedures for procurement of the above items. The law also sets out the functions of the Administrator and ways of carrying out those functions. This includes direction of the computer-based Federal Procurement Data System and the Federal Acquisition Institute. This provision also gives the Administrator a veto power, with the concurrence of the Director of the Office of Management and Budget (OMB), over any Government-wide procurement regulation issued by an executive agency, and limits the powers of the Administrator to those expressly assigned by statutory provision.

##### 6.10.3.2. Background of the Law

This provision was part of the original Office of Federal Procurement Policy Act<sup>1</sup> which, in section 6, called for centralization of authority in the OFPP Administrator. It was Congress' response to the Procurement Commission's recommendation to fill "the need for someone to be in charge."<sup>2</sup> The Administrator would have discretion to prescribe policies and regulations to the extent the Administrator felt necessary<sup>3</sup>, and this authority would be bridled by the requirement that he not authorize supply or procurement support to Federal grant holders or act contrary to state laws in providing Federal assistance to states.<sup>4</sup> Congress intended that OFPP's rulemaking authority concern the procurement aspects of regulations and wanted OFPP "to leave the operational, administrative, and technical phases to the procuring agencies as far as they d[id] not conflict with the goal of uniformity and consistency."<sup>5</sup> Congress gave OFPP extensive power to prescribe regulations which included cognizance over the procurement aspects of regulations of the Labor Department, the Small Business Administration, and the Environmental Protection

<sup>1</sup>Pub. L. No. 93-400, § 6, 88 Stat. 797 (1974).

<sup>2</sup>S. REP. NO. 692 (1974), 93 Cong., 2d Sess., *reprinted in* 1974 U.S.C.C.A.N. 4589, 4596.

<sup>3</sup>*Id.* at 4599.

<sup>4</sup>Pub. L. No. 93-400, § 6(b).

<sup>5</sup>S. REP. NO. 692, 93 Cong., 2d Sess., *reprinted in* 1974 U.S.C.C.A.N. 4589, 4600.

Agency.<sup>6</sup> It was sometimes difficult, however, for OFPP to determine the boundaries between procurement policy and agency operational and technical policy. One incident has specifically served to define OFPP's limitations with regard to its rulemaking authority in technical or operational areas. On that occasion the Air Force challenged one of the Secretary of Labor's determinations that certain statutory labor standards were applicable to a certain class of contracts.<sup>7</sup> The OFPP Administrator held that he had the final authority in all procurement-related matters including the coverage of contract labor standards. The Secretary of Labor contested this determination based on his understanding that OFPP's authority was limited to regulating how the procurement process implements Labor's socioeconomic decisions. In settlement of this controversy, the Attorney General ruled, in a 1979 opinion, that OFPP's regulatory authority did not extend to substantive determinations of certain labor statutes.<sup>8</sup>

As a result of Congress' perception that OFPP had gone beyond its authority on this and other occasions<sup>9</sup> and its perception that OFPP was spending far too much time on trivial matters instead of on broader procurement reform policy, the 1979 Reauthorization Act eliminated OFPP's power to promulgate procurement regulations and gave additional authority to OMB to rescind agency regulations which the Administrator determined to be inconsistent with the OFPP Act's procurement policy.<sup>10</sup> In 1983, however, Congress decided it needed to restore OFPP's power to prescribe regulations, procedures, and forms based, in part, upon a General Accounting Office conclusion that without strong OFPP leadership, the Federal Acquisition Regulation (FAR) system could crumble under the "proliferation of supplemental agency regulations."<sup>11</sup> Congress caveated that restoration of authority with language in section 405(b) that it was only to be used when DOD, GSA, and NASA failed to agree or issue Government-wide regulations, procedures, or forms in a timely manner.<sup>12</sup> Section 405 was also amended in 1983 to provide for the implementation of Government-wide procurement policy in the single system of Government-wide procurement regulations, designated as the Federal Acquisition Regulation in the 1988 amendments.

In response to continuing agency concerns questioning whether it was Congress' intent that OFPP should wait for DOD, NASA, and GSA to initiate policy or regulatory changes or take the initiative on its own, the 1988 Amendments further clarified the authority of the Administrator to initiate, as well as to direct policy, prescribe regulations, forms, and procedures.<sup>13</sup> The

---

<sup>6</sup>*Id.* at 4599

<sup>7</sup>H.R. REP. NO. 178, 96th Cong., 1st Sess., reprinted in 1979 U.S.C.C.A.N. 1492, 1496.

<sup>8</sup>43 Op. Atty. Gen. No. 14 (1979)

<sup>9</sup>Congress was also critical of OFPP regulations which empowered the Council on Wage and Price Stability to make contractors who would not comply with voluntary wage and price guidelines ineligible for Government contracts. H. R. REP. NO. 78, 96th Cong., 1st Sess., reprinted in the 1979 U.S.C.C.A.N. 1492, 1498.

<sup>10</sup>*Id.* at 1496-98.

<sup>11</sup>S. REP. NO. 424, p. 11, 100th Cong., 2d Sess., reprinted in 1988 U.S.C.C.A.N. 5687, 5697.

<sup>12</sup>Pub. L. No. 98-191, § 6(b) (1983). The 1983 amendments which restored the Administrator's regulatory power codified a response that Senator Cohen made to a question as to whether the Administrator could act unilaterally to issue regulations affecting DOD without consulting DOD. The response was that the Administrator's authority should be used whenever he "determines that DOD, NASA and GSA are unable to agree or fail to issue Government-wide regulations in a timely manner." Determining what constituted a "timely manner" would be left up to the Administrator.

<sup>13</sup>Pub. L. No. 100-697, § 3(a), 102 Stat. 4055 (1988).

remaining consideration regarding the Administrator's authority concerned his role in light of the 1983 creation of the position of the Under Secretary of Defense for Acquisition and how they would work together. It is clear from S. Rep. No.100-424 that, in giving the Administrator authority to initiate as well as direct procurement policy, it was Congress' intent that the Administrator should be "an active leader of Government-wide procurement reform and an effective manager of the FAR system," while not relieving the procuring agencies of their responsibility to make and implement improvements in the procurement process.<sup>14</sup>

Other reforms initiated in the various amendments to the OFPP Act created and implemented the computer based Federal Procurement Data system and centralized the Federal Acquisition Institute in the General Services Administration.<sup>15</sup>

#### **6.10.3.3. Law in Practice**

In providing that the policies and regulations prescribed by the Administrator "shall be followed by executive agencies," Congress intended that those policies and regulations have the same force and effect as statutes for which any violation would be subject to judicial challenge and review<sup>16</sup> and, although OFPP regulations may not be binding on a court, they would be persuasive evidence of the meaning of a statutory provision implemented through OFPP regulations.<sup>17</sup>

No comments or suggestions were received concerning this statutory provision and the Panel does not recommend any revisions.

#### **6.10.3.4. Recommendation and Justification**

##### **Retain**

This statutory provision should be retained as it sets out the functions and duties of the OFPP Administrator and provides a proper balance between the role of OFPP, DOD, and other executive agencies in the formation of procurement policy.

#### **6.10.3.5. Relationship to Objectives**

This statutory provision states the broad policy objectives and the fundamental requirements to be achieved by the OFPP Administrator without being unduly burdensome through overly detailed legislation.

#### **6.10.4. 41 U.S.C. § 405a**

### **Uniform Federal procurement regulations and procedures**

#### **6.10.4.1. Summary of the Law**

This section authorizes the Administrator of the Office of Federal Procurement Policy (OFPP) to issue a single, simplified, uniform Federal procurement regulation and to establish procedures for ensuring that all Federal agencies comply with its provisions. Under this section, the OFPP Administrator will, after consulting with the Small Business Administration, analyze the impact on small business concerns resulting from revised procurement regulations and incorporate simplified procedures for small business concerns into revised procurement regulations.

#### **6.10.4.2. Background of the Law**

This section was passed in the Small Business Investment Act of 1978, and there appears to be no detailed legislative history for the provision.<sup>1</sup>

#### **6.10.4.3. Law in Practice**

No comments were received concerning this statute, and the Panel is proposing no amendments to this section.

#### **6.10.4.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it ensures that small business concerns will be a part of the formulation of procurement policy.

#### **6.10.4.5. Relationship to Objectives**

This section provides for the implementation of broad policy objectives and fundamental requirements to be achieved through regulations and procedures rather than detailed legislation.

---

<sup>1</sup>Pub. L. No. 95-507, Title II, Ch. 3, § 222, 92 Stat. 1771 (1978).

## **6.10.5. 41 U.S.C. § 405b**

### **Consulting services**

#### **6.10.5.1. Summary of the Law**

This section requires the Office of Federal Procurement Policy (OFPP) to issue a policy under the Office of Procurement Policy Act concerning conflict of interest standards for consultant services. The statute further requires the OFPP to issue procedures for implementing that policy, including those concerning registration, certification, and enforcement. The regulations apply to consulting services for: (1) advisory assistance, (2) services related to support of bid and proposal preparation and submission for Federal contracts, and (3) other services related to Federal contracts which may be specified in regulations under the Act to the extent necessary to deal with conflicts of interests that could be harmful to the interests of the United States.

#### **6.10.5.2. Background of the Law**

This section became law under the 1989 Defense Appropriations Act<sup>1</sup> as a result of the Pryor-Levin Consultant Amendment (S. 11549) in the wake of the "Ill Wind" investigations. That amendment grew out of concern and from testimony of the Deputy DOD Inspector General (DODIG) that DOD did not know whether its consultants were convicted felons, worked for other DOD contractors, or represented foreign governments.<sup>2</sup>

#### **6.10.5.3. Law in Practice**

This section is implemented by OFPP Policy Letter 89-1, Conflict of Interest Policies Applicable to Consultants (1989), which requires contracting officers to take appropriate steps to identify and evaluate potential conflicts of interest that could be prejudicial to the interests of the United States. This section directs agencies to obtain from prime contractors certified information describing the nature and extent of any conflicts of interest concerning proposed awards, requiring that marketing consultants be identified. More specifically, in contracts over \$200,000, the statute requires any marketing consultant to execute a certificate that he has provided no unfair competitive advantage with respect to his services or that any competitive advantage has been disclosed to the prime contractor. In contracts over \$25,000, it requires contractors providing advisory and assistance services to execute a certificate that no actual or potential conflict of interest or unfair competitive advantage exists with respect to his services, or that any conflict of interest or competitive advantage has been disclosed to the prime contractor. The FAR implementation in Subpart 9.5 is substantially the same as that contained in the Policy Letter. No comments were received in reference to this statute.

<sup>1</sup>Pub. L. No. 100-463, Title VIII § 8141, 102 Stat. 2270-47.

<sup>2</sup>134 CONG. REC., S. 11547-11548 (daily ed. Aug. 11, 1988.)(statement of Sen. Pryor).

#### **6.10.5.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it satisfies a mandated requirement for conflict of interest standards applicable to consultant services. This need was recognized by Congress in the post-"Ill Wind" environment. This broad approach to requiring conflict of interest standards for consultants is not unduly burdensome.

#### **6.10.5.5. Relationship to Objectives**

This section promotes financial and ethical integrity of consultants by mandating the issuance of regulations and not through detailed statutes which might be unduly burdensome.

## **6.10.6. 41 U.S.C. § 406**

### **Administrative powers**

#### **6.10.6.1. Summary of the Law**

This section grants certain administrative powers to the Office of Federal Procurement Policy (OFPP) Administrator by requiring executive agencies to furnish OFPP with services, personnel, facilities, and access to records.

#### **6.10.6.2. Background of the Law**

When the OFPP was established in 1974, Congress intended that the office operate with a relatively small staff and rely on executive agency personnel to help perform its function. Section 406 gave the Administrator of OFPP power to supplement the OFPP staff with resources from other executive agencies.<sup>1</sup> The Governmental Affairs Committee of the Senate considered giving the Administration subpoena power, but felt OFPP had sufficient authority under the Act to execute its duties.<sup>2</sup> This section has remained unaltered since the introduction of the Act in 1974.

#### **6.10.6.3. Law in Practice**

No comments were received concerning this section, and the Panel recommends no amendments to this section.

#### **6.10.6.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it gives the Administrator of OFPP the authority to use the resources of the executive agencies, as needed.

#### **6.10.6.5. Relationship to Objectives**

This section sets out the powers of the Administrator of OFPP in broad objectives and fundamental requirements, reserving implementing methodology to regulations.

<sup>2</sup>*Id.*

## **6.10.7. 41 U.S.C. § 407**

### **Responsiveness to Congress**

#### **6.10.7.1. Summary of the Law**

This section provides that the Office of Federal Procurement Policy (OFPP) shall remain responsive to Congress by submitting annual reports on its major activities. In addition, OFPP is required to submit major policy matters to Congressional Committees 30 days prior to the effective date of any policy or regulation prescribed under section 405.

#### **6.10.7.2. Background of the Law**

This section was part of the original OFPP Act,<sup>1</sup> which was amended in 1979<sup>2</sup> and 1983.<sup>3</sup> The 1983 Amendments deleted the requirement for the OFPP Administrator to submit plans for a new uniform procurement system consistent with the plans that had been delivered to Congress in February, 1982.

#### **6.10.7.3. Law in Practice**

No comments were received concerning this statute, and the Panel recommends no amendments to this section.

#### **6.10.7.4. Recommendation and Justification**

##### **Retain**

This statute should be retained because it provides for full and open communication with Congress.

#### **6.10.7.5. Relationship to Objectives**

This section provides Congress information concerning the major activities of the OFPP.

---

<sup>2</sup>Office of Federal Procurement Policy Act Amendments of 1979, Pub. L. No. 96-83, § 5, 93 Stat. 651 (1979).

<sup>3</sup>Office of Federal Procurement Policy Act Amendments of 1983, Pub. L. No. 98-191, § 8(a), 97 Stat. 1331(1983).

## **6.10.8. 41 U.S.C. § 408**

### **Effect on existing laws**

#### **6.10.8.1. Summary of the Law**

This section states Congress' intention that the Office of Federal Procurement Policy (OFPP) have control over Government-wide integration and issuance of procurement policy, and states that any other procurement authority is subject to that conferred in 41 U.S.C. § 405.

#### **6.10.8.2. Background of the Law**

This section was part of the original OFPP Act.<sup>1</sup> From the history of the 1974 statute, the initial intent of Congress was that the authority to prescribe policy was "basic to the intent to make OFPP the controlling force for the Government-wide integration and issuance of procurement policy" and that it viewed executive agency authority as subject to that of OFPP.<sup>2</sup>

#### **6.10.8.3. Law in Practice**

No comments were received concerning this statute, and the Panel recommends no amendments to this section.

#### **6.10.8.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it supports the concept of centralized authority to issue policy and regulations which Congress gave to OFPP and reaffirmed in the 1983 amendments to the Act.

#### **6.10.8.5. Relationship to Objectives**

This section provides executive agencies, acting in accordance with other statutes, with notice of the limitations under the OFPP Act on their authority to publish policies, procedures, and regulations.

## **6.10.9. 41 U.S.C. § 409**

### **Effect on existing regulations**

#### **6.10.9.1. Summary of the Law**

This section provides that policies, regulations, or forms in effect prior to the Office of Federal Procurement Policy (OFPP) Act of 1983 remain in effect until repealed or otherwise amended.

#### **6.10.9.2. Background of the Law**

This section was originally enacted in 1974 when the first OFPP Act was passed.<sup>1</sup> It was amended in 1979 and 1983 to accommodate changes under the Federal Procurement Regulation until the Federal Acquisition Regulation went into effect.<sup>2</sup>

#### **6.10.9.3. Law in Practice**

There were no comments received concerning this section, and the Panel proposes no amendments to this section.

#### **6.10.9.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it provides the basis for an orderly transition from one set of procurement policies and regulations to another. Notwithstanding that the transition is complete, continuation of this provision lends a continuity of interpretation and certainty to issues arising for resolution under the former rules.

#### **6.10.9.5. Relationship to Objectives**

This section is in keeping with the objective that acquisition laws should identify broad policy objectives and the fundamental requirements to be achieved, leaving detailed implementing methodology to acquisition regulations.

---

<sup>1</sup>Pub. L. No. 93-400, § 10, 88 Stat. 799 (1974).

<sup>2</sup>Pub. L. No. 96-83, § 6, 93 Stat. 651 (1983).

## **6.10.10. 41 U.S.C. § 410**

### **Authorization of Appropriations**

#### **6.10.10.1. Summary of the Law**

This law authorizes the FY84 appropriation and succeeding appropriations for the Office of Federal Procurement Policy (OFPP).

#### **6.10.10.2. Background of the Law**

This law provides authorization for appropriation of funds for OFPP. The original section, in 1974, placed a limit on OFPP appropriations at \$2 million.<sup>1</sup> Funds for OFPP were authorized for five years, and Congress intended that subsequent authorization proposals be referred to the Government Operations Committee which would pass appropriations in accordance with the goal of promoting the economy, efficiency, and effectiveness of Government procurement.<sup>2</sup> As it presently stands, this statute provides a permanent authorization for OFPP appropriations.<sup>3</sup>

#### **6.10.10.3. Law in Practice**

No comments were received concerning this section.

#### **6.10.10.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this statute be retained as it is the foundation authorizing future appropriations for OFPP.

#### **6.10.10.5. Relationship to Objectives**

This section provides for the continued authorization of appropriations to carry out the policies and regulations of the OFPP.

## **6.10.11. 41 U.S.C. § 411**

### **Delegation of authority by Administrator**

#### **6.10.11.1. Summary of the Law**

This section describes the power of the Administrator of the Office of Federal Procurement Policy (OFPP) to delegate his authority to personnel within his office and within other executive agencies.

#### **6.10.11.2. Background of the Law**

This section was originally part of the first Office of Federal Procurement Policy Act<sup>1</sup> and was subsequently incorporated in successive amendments.<sup>2</sup> The 1979 amendment deleted references to the prohibition on the Administrator's delegation of authorities to conform to that amendment's overall limitation on the Administrator's powers. When the 1983 amendment restored the Administrator's powers to issue directives and regulations, it restored the ban on delegating the "authority to provide overall direction . . . and to prescribe policies and regulations to carry out such policy."<sup>3</sup>

#### **6.10.11.3. Law in Practice**

No comments were received concerning this section and the Panel proposes no changes to this section.

#### **6.10.11.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this section as a necessary requirement in order to carry out the policy of the Act.

#### **6.10.11.5. Relationship to Objectives**

This section provides for the effective and efficient implementation of OFPP policies and procedures.

---

<sup>1</sup>Pub. L. No. 93-400, § 12, 88 Stat. 799 (1974)

<sup>2</sup>Pub. L. No. 96-83, § 8, 97 Stat. 652 (1979) and Pub. L. No. 98-191, § 8, 97 Stat. 1331 (1983).

<sup>3</sup>*Id.* at § 8(c).

## **6.10.12. 41 U.S.C. § 412**

### **Access by Comptroller General to information; rulemaking procedure**

#### **6.10.12.1. Summary of the Law**

This section provides that the General Accounting Office will have access to the records of Office of Federal Procurement Policy (OFPP) and, more significantly, provides public access and input to OFPP policies and regulations through notice of public meetings. At least 10 days notice of formal meetings will be given to the public.

#### **6.10.12.2. Background of the Law**

This section was part of the OFPP Act which was enacted in 1974.<sup>1</sup> It was contained in subsequent versions of the OFPP Act.

This section requires the Administrator, with a notice of 10 days, to open to the public formal scheduled meetings to promulgate procurement policies and regulations, and gives the administrator authority to determine which regulations and policies are subject to this requirement.<sup>2</sup> Congress intended that the public notice requirement apply to "highly sensitive or significant issuances of the OFPP," keeping in mind its overall intent to give the "maximum practical public visibility to rulemaking activities."<sup>3</sup>

#### **6.10.12.3. Law in Practice**

FAR 1.503 provides that public meetings may be appropriate when a decision to revise FAR coverage is "likely to benefit from significant additional views and discussions." No comments were received concerning this section.

#### **6.10.12.4. Recommendation and Justification**

##### **Retain**

This section should be retained because it gives to the public and to Congress access to significant policy and regulatory decisions concerning the procurement functions of the executive agencies. It also gives the public an opportunity to express their views on major policy and regulatory implementation.

---

<sup>1</sup>Pub. L. No. 93-400, § 14, 88 Stat. 800 (1974).

<sup>3</sup>*Id.*

#### **6.10.12.5. Relationship to Objectives**

This section gives the Comptroller General needed access to books and records of the OFPP and ensures the public full and open access to formal OFPP meetings held for the purpose of developing procurement policies and regulations.

## **6.10.13. 41 U.S.C. § 414**

### **Executive agency responsibilities**

#### **6.10.13.1. Summary of the Law**

This section mandates executive agency participation in the Office of Federal Procurement Policy (OFPP) procurement reform efforts, including an increase in the use of full and open competition. It also provides for clear lines of authority, accountability, and responsibility for procurement decision-making within the executive agency by placing the procurement function at a sufficiently high level to provide direct access to its leadership. The section also provides for comparative equality between organizational counterparts by ensuring the appointment of a procurement executive who is responsible for the management and direction of the agency's procurement system and the development of a career management program.

#### **6.10.13.2. Background of the Law**

Executive Order No. 12352, issued in March, 1982, outlined four procurement reform goals to: (1) increase competition; (2) simplify the procurement process; (3) develop a professional work force with latitude to use business judgment and initiative; and (4) establish a system in each agency to manage procurement. These goals subsequently became the nucleus of the OFPP Act amendment initiatives to increase competition and to establish the senior procurement executive program. The OFPP Amendments of 1983 were also passed to remedy perceived slow and half-hearted implementation of OFPP policies and directives.<sup>1</sup>

#### **6.10.13.3. Law in Practice**

No comments have been received concerning this section and the Panel has no proposals for amending this section.

#### **6.10.13.4. Recommendation and Justification**

##### **Retain**

This statute codified several of the procurement reform initiatives which have streamlined and made today's executive agency more responsive to competition.

#### **6.10.13.5. Relationship to Objectives**

This statute has encouraged full and open access to the procurement system through mandating that executive agencies should promote use of full and open competition and a clear line of responsibility for procurement decision-making.

---

<sup>1</sup>Pub. L. No. 98-191, § 16, 97 Stat. 1331 (1983).

**6.10.14. 41 U.S.C. § 415**

**Studies and reports**

**6.10.14.1. Summary of the Law**

This section required the Office of Federal Procurement Policy (OFPP) Administrator to issue reports in 1984 relating to competition in subcontracts.

**6.10.14.2. Background of the Law**

This section was enacted as a 1983 Amendment to the Office of Procurement Policy Act.<sup>1</sup> The section required one-time studies concerning source selection methods, dollar values, and other factors concerning subcontracting.

**6.10.14.3. Law in Practice**

No comments were received concerning this section.

**6.10.14.4. Recommendation and Justification**

**Delete**

This section required one-time reports with a 1984 deadline. The statute has outlived its usefulness and should be deleted from Title 41.

**6.10.14.5. Relationship to Objectives**

Deletion of this provision satisfies the Panel's objective of streamlining the acquisition laws.

---

<sup>1</sup>Pub. L. No. 98-191, § 7, 97 Stat. 1330(1983).

## **6.10.15. 41 U.S.C. § 418b**

### **Publication of proposed regulations**

#### **6.10.15.1. Summary of the Law**

This section provides an opportunity for the public to comment on proposed procurement policy regulations, procedures, or forms having a significant effect beyond internal operating procedures, or a significant cost or administrative impact on contractors or offerors. The section requires that the implementation of issuances not be effective until 30 days after publication for public comment. The section also provides that the requirement may be waived based upon urgent and compelling circumstances.

#### **6.10.15.2. Background of the Law**

This section was introduced by an amendment to the Office of Federal Procurement Policy (OFPP) Act in 1984.<sup>1</sup> The purpose of this amendment was to allow an opportunity for potential problems with proposed procurement regulations to surface through public comment.

#### **6.10.15.3. Law in Practice**

This statute is implemented at FAR 1.501, which provides the public a minimum of 30 days, and normally at least 60 days, to comment on a proposed policy or procedure. FAR 1.502 allows consideration to be given to unsolicited recommendations for revisions which have been submitted in writing. A specific discussion of procedures concerning the issuance of agency regulations in accordance with this section is contained in FAR 1.301-1.304. No comments were received concerning this statute.

#### **6.10.15.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this section be retained. This provision, known as the "notice requirement," provides an opportunity for the public to comment on proposed regulations and does not unduly burden the process of generating procurement regulations.

#### **6.10.15.5. Relationship to Objectives**

This section ensures full and open public access to the procurement system through notice of, and opportunity to comment on, proposed procurement regulations.

---

<sup>1</sup>Pub. L. No. 98-400, § 22 (1984), Pub. L. No. 98-577, § 302(a), 98 Stat. 3076 (1984).

## Federal Acquisition Regulatory Council

### 6.10.16.1. Summary of the Law

This section established the Federal Acquisition Regulatory (FAR) Council, comprised of the Administrator of OFPP and representatives from DOD, NASA, and GSA, to assist in the direction and coordination of Government-wide procurement policy and regulatory activities. This section also provides for three executive agencies (DOD, NASA, and GSA) to jointly issue and maintain the FAR. Specifically, the Council will "manage, coordinate, control, and monitor" the maintenance of, and changes in, the FAR. It designates categories of individuals who may be picked to sit on the Council. Regulations issued by executive agencies are required to be limited to those essential to implement Government-wide directives within the agency or those required to satisfy specific and unique needs of the agency. The law also requires the Office of Federal Procurement Policy (OFPP), upon request of a person, to review procurement agency regulations for consistency with the FAR. This section also gives the OFPP Administrator authority to rescind executive agency regulations that are inconsistent with the FAR.

### 6.10.16.2. Background of the Law

Section 421 was added to the OFPP Act by the 1988 amendments to the Act.<sup>1</sup> The purpose of the Council is to assist in directing and coordinating the FAR. It provides a "structural mechanism" to allow the members to work together. The thrust of the congressional designation of membership is to place responsibility for regulatory policy at the "highest practicable level."<sup>2</sup> In limiting agency discretion to issue regulations, Congress' intent was to allow the Administrator, acting in concert with the other Council members, to address the problem of proliferating agency supplemental procurement regulation.<sup>3</sup>

### 6.10.16.3. Law in Practice

FAR 1.102 implements section 421 and provides, in accordance with the statute, for the tripartite management of the FAR. In practice, however, much of the effort in maintaining the FAR is accomplished jointly by the Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulations (DAR) Council, which are not statutory but are provided for in FAR 1.201-1. The DAR Council also maintains the Defense Acquisition Regulations System (DFARS) in accordance with DFARS 201.201-1(a). DOD Directive 5000.35 governs the composition and operation of the DAR Council. FAR 1.201-1 establishes a FAR Secretariat in GSA for administering the FAR.

---

<sup>1</sup>Pub. L. No. 100-679, § 4, 102, Stat. 4056.

<sup>2</sup>S. REP. NO. 424, 100th Cong., 2d Sess. 14 (1988).

<sup>3</sup>*Id.*

Some have questioned dividing the authority and responsibility of DOD, GSA, and NASA between two councils (i.e., the CAAC and the DAR Council) and suggest efficiencies might be achieved through a single council system. Others suggest that the two council system functions well in identifying and resolving differences in agency needs and viewpoints and should not be changed; that DOD and the civilian agencies have legitimate differences in facing different types of procurement; and that the public interest is not served by imposing an artificial uniformity on inherently dissimilar systems. Consequently, the Panel does not recommend the addition of a provision in the law to provide for a single operating council or any other changes with respect to issuing, maintaining, or overseeing acquisition regulations.

One commenter suggested naming the OFPP Administrator as the chairperson of the FAR Council. The Panel believes, however, that because of the broad authority of the Administrator this is not necessary.

#### **6.10.16.4. Recommendation and Justification**

##### **Retain**

This section should be retained as it furthers the orderly promulgation of procurement regulations in a fair and even-handed manner.

#### **6.10.16.5. Relationship to Objectives**

This section furthers the goal of providing for Government-wide consistency in procurement policies and regulations, except where there are unique agency needs.

## **6.11. Other Related Statutes**

### **6.11.0. Introduction**

This subchapter contains a variety of provisions that relate generally to standards of conduct required of public officials and Government contractors. It contains three recommendations to change existing statutes.

The first recommendation is to repeal the Byrd Amendment, 31 U.S.C. § 1352, which prohibits those who seek or receive Federal contracts from using appropriated funds to pay any person to lobby executive agencies or Congress in connection with the award of contracts. The Byrd Amendment has proven to be costly to implement, appears to have had no identifiable impact on lobbying, and from the information described in the accompanying analysis, appears to contribute little to either public knowledge or protection. Other authorities already provide adequate legal protection against lobbying with appropriated funds, and the Panel urges that DOD be relieved of the unproductive record keeping requirements imposed by this provision.

The Panel also recommends that 10 U.S.C. § 2409a be repealed immediately rather than be allowed to expire in 1994. That statute protects employees of defense contractors from retaliation for communicating with Government officials on improper or illegal activities. Section 2409a does not apply to contracts under \$500,000 or contracts in which the price is based solely upon established catalogue or market prices of commercial items. Section 2409 provides the DOD Inspector General with greater flexibility, and the procedures under section 2409a are unnecessarily cumbersome. Section 2409 is suspended while section 2409a is in effect and this has created an unfortunate gap in whistle blower coverage. As a result, no whistle blower coverage exists for contracts falling within the exceptions to section 2409a or for any contracts awarded prior to that date. For these reasons the Panel recommends immediate repeal of section 2409a.

Finally, the Panel recommends the repeal of 10 U.S.C. § 2408, which bars a person convicted of fraud or any felony from working on a defense contract or first tier subcontract for five years. Compliance with the provision has proven to require extensive record keeping that has yet to be fully reliable. It must, in addition, parallel the similar consolidated list maintained by GSA of suspended and debarred contractors. The Panel believes the primary objective of this law can be achieved through reliance on established suspension and debarment procedures without the administrative burdens imposed by this section.

The remainder of the statutes in this section are either recommended to be retained or, in one case, the Panel recommended no action because the statute did not primarily concern the acquisition process.

**6.11.1. 18 U.S.C. § 431**  
**Contracts by a Member of Congress**

**18 U.S.C. § 432**  
**Officer or employee contracting with Member of Congress**

**41 U.S.C. § 22**  
**Interest of Member of Congress**

**6.11.1.1. Summary of the Law**

Section 18 U.S.C. § 431 assesses a fine of not more than \$3,000 for any Member of Congress, Delegate, or Resident Commissioner who obtains for himself, or through an agent, a contract or agreement with the United States or any of its agencies. This section also requires that any contracts made in violation of this provision be voided and any monies paid the Member of Congress be repaid.

Section 18 U.S.C. § 432 assesses a fine of not more than \$3,000 for any officer or employee of the Government who enters into a contract with a Member of Congress, Delegate, or Resident Commissioner.

Section 41 U.S.C. § 22 requires that every contract of the United States contain an express condition that no member or delegate of Congress have a share in a Government contract or derive any benefit in such a contract. There are exceptions for contracts involving farm loans and other similar instruments.

**6.11.1.2. Background of the Law**

Section 431 is based on chapter 321 § 114 of the Act of March 4, 1909, 35 Stat. 1109, the former section 204. Section 432 is based on chapter 321 § 115 of the Act of March 4, 1909, 35 Stat. 1109, the former section 205. Both statutes appeared in the present form in the 1948 codification of the criminal statutes. The purpose of the statutes was to prevent temptations which might arise if Members of Congress could contract with Government agencies.<sup>1</sup>

Section 22 of Title 41 is based upon an 1808 statute, the Act of April 21, 1808, chapter 48, § 3, 2 Stat. 484. It took its present form in R.S. § 3741, February 27, 1877, chapter 69, 19 Stat. 249.

**6.11.1.3. Law in Practice**

---

<sup>1</sup>*United States v. Dietrich*, 126 F. 671 (C.C. Neb. 1904).

These statutes are implemented in the procurement process as a result of 41 U.S.C. § 22. The contract clause in FAR 52.222-4 implements the mandate of 41 U.S.C. § 22. At least one court has held that failure to place the clause in a contract does not render it invalid if there is no evidence showing that a member of Congress has an interest in the contract.<sup>2</sup>

There were no comments received concerning these statutes.

#### **6.11.1.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that these statutes be retained to maintain the appropriate balance between the public interest and the private interests of the members of Congress. These statutes have served an important function for many years and should be retained.

There is a detailed discussion of panel recommendations, at 4.1, to exempt certain actions from 41 U.S.C. § 22 as part of a simplified acquisition threshold.

#### **6.11.1.5. Relationship to Objectives**

This statute promotes the ethical integrity of defense procurement without being unduly burdensome.

---

<sup>2</sup>*United States v. Certain Land Situate in St. Charles County, Mo.*, 46 F. Supp. 921 (E.D.Mo.), reversed on other grounds, 324 U.S. 49, 89 L. Ed. 744, 65 S. Ct. 442 (1945).

## **6.11.2. 18 U.S.C. § 641**

### **Public money, property or records**

#### **6.11.2.1. Summary of the Law**

This statute makes it a crime to embezzle, steal, purloin, knowingly convert, sell, or dispose of without authority a record, voucher, money, property being made under Government contract, or other thing of value belonging to the United States or any of its agencies or departments. It is also a crime under this statute to receive, conceal, or retain with the intent to convert Government property knowing that the property has been stolen or converted. The penalty for commission of the offense is a fine of not more than \$10,000 or imprisonment for not more than 10 years or both if the value of the stolen or converted property exceeds \$100, and a fine of \$1,000 or imprisonment of not more than one year if the property value does not exceed that sum.

#### **6.11.2.2. Background of the Law**

This statutory provision is based upon two Civil War era statutes which were later consolidated with two other 19th century statutes in the Act of March 4, 1909, chapter 321 § 35, 35 Stat. 1096-8. It is, in effect, a consolidation of former sections 82, 87, 100, and 101 of Title 18.<sup>1</sup> The purpose of the current consolidated statute was "to collect from scattered sources crimes so kindred as to belong in one category."<sup>2</sup> The statute appeared in its present form in the 1948 codification of the criminal statutes.

#### **6.11.2.3. Law in Practice**

This statute is frequently used in procurement-related prosecutions. Most recently, it supported a number of convictions in "Operation Ill Wind" and has been used to prosecute recent similar cases involving the misappropriation of sensitive Government procurement planning information.<sup>3</sup> No comments were received concerning this statute.

#### **6.11.2.4. Recommendation and Justification**

##### **No Action**

The Panel makes no recommendation concerning this statute. Although it is used to enforce criminal penalties against those who commit procurement fraud, it is a statute of general

<sup>2</sup>*Morissette v. United States*, 342 U.S. 246, 96 L. Ed. 288, 72 S. Ct. 240(1952).

<sup>3</sup>*United States v. Zettl*, 835 F. 2d 1959 (4th Cir. 1987), *cert. denied*, 494 U.S. 1080, 108 L. Ed. 2nd 940, 110 S. Ct 1809 (1990).

application and not of primary relevance to the Panel's objectives to streamline the procedures governing defense acquisition.

**6.11.2.5. Relationship to Objectives**

This section promotes the ethical integrity of defense procurement without being unduly burdensome to the procurement process.

### 6.11.3. 31 U.S.C. § 1352

#### **Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions**

##### 6.11.3.1. Summary of the Law

The "Byrd Amendment," 31 U.S.C. § 1352, prohibits recipients and requesters of Federal contracts, grants, loans, or cooperative agreements from using appropriated funds to pay any person to influence or to attempt to influence executive or legislative decision-making in connection with the awarding of any Federal contract, grant, loan, or cooperative agreement. The act also requires requesters or recipients of Federal contracts, grants, loans, or cooperative agreements to report to the relevant agency certain lobbying activities paid for with non-appropriated funds. Further, agencies are required to report to the Congress semi-annually a compilation of such information. Fines for violation of the act's prohibitions and reporting requirements range from \$10,000 to \$100,000. The act requires the Office of Management and Budget (OMB) to issue uniform regulations.

The law applies to nonprofit entities, and state and local governments, as well as prime contractors and subcontractors.

##### 6.11.3.2. Background of the Law

At present, four principal disclosure laws govern lobbying in the Federal Government: the 1938 Foreign Agents Registration Act (governing foreign lobbying)<sup>1</sup>, the 1946 Federal Regulation of Lobbying Act (governing legislative lobbying),<sup>2</sup> two provisions of the Housing and Urban Development (HUD) Reform Act (applicable to lobbying the Department of Housing and Urban Development and the Farmers' Home Administration),<sup>3</sup> and the "Byrd Amendment" to the FY 1990 Department of the Interior Appropriations Act<sup>4</sup> (which governs lobbying the executive and legislative branches).

The Byrd Amendment and HUD disclosure provisions were enacted in response to disclosures in 1989 that senior HUD officials had awarded large discretionary grants to developers who had retained well-connected and favored consultants as lobbyists. The Byrd Amendment and HUD disclosure laws were intended to ensure the integrity of the process by which Government makes decisions on contracts, grants, loans, and cooperative agreements, and to restrain the exorbitant fees reportedly paid to some consultants and firms that sell their ability to gain access to decision makers. Congress intended the law to require full disclosure of lobbying activities financed with appropriated funds and to prevent even the appearance of

<sup>2</sup>2 U.S.C. §§ 261-270.

<sup>3</sup>42 U.S.C. § 35376 and 42 U.S.C. § 1490p.

<sup>4</sup>Department of the Interior and Related Agencies Act for FY 1990, § 319, Pub. L. No. 101-121 Title III § 319, 102 Stat. 750(1990), *codified at* 31 U.S.C. § 1352.

conflicts. It was viewed as part of a comprehensive and consistent legislative framework prohibiting the use of appropriated funds to influence congressional and executive department decision-making.

### 6.11.3.3. Law in Practice

As required by the statute, OMB issued guidance on the new statute in June, 1990. The regulations, found in FAR Subpart 3.8, define key terms, set forth the prohibitions of the act and policy guidance for certifications and disclosure requirements, exemptions process, processing suspected violations, solicitation and contract clauses, and civil penalties. Both the act and the regulations prohibit expenditures of appropriated funds for lobbying, and both require requesters and recipients of Federal contracts, grants, loans, or cooperative agreements to certify that no prohibited payments have been or will be made. Such certifications are required on Federal awards that exceed \$100,000 (\$150,000 for loans). Contractors are also required to disclose lobbying activities paid for with non-appropriated funds that would have been prohibited if paid for with appropriated funds.

The Byrd Amendment and HUD disclosure provisions cover lobbying on contracts, grants and loans, but not lobbying on executive branch actions such as licenses, policy-making, and regulations. As a consequence, it has been noted that some types of lobbying may require multiple disclosures under the various laws, while others may require no disclosure at all.<sup>5</sup> The Byrd Amendment, furthermore, applies only to conduct by outside lobbyists but not to activities performed by a firm's regular employees. It also applies only to efforts to influence specific awards of Federal assistance, but not to lobbying on agency programs or budgets. Lobbying on an awarded defense contract would require formal disclosure, therefore, but lobbying to obtain continued funding for a defense program might not.

A report by the DOD Inspector General, covering the period January, 1990, through March, 1991, found that only 10 lobbying disclosure forms were forwarded by DOD contractors to DOD for inclusion in DOD's semiannual report to Congress.<sup>6</sup> Contractor records generally lacked sufficient detail to determine whether the firms fully complied with the Act's disclosure requirement, or whether any prohibited activities occurred.<sup>7</sup> The IG Report recommended that OMB issue clarifying guidance, indicating that the shortcomings found in the course of the IG review were more the result of confusion and uncertainty about the application of the regulation than of unwillingness to cooperate.

In a statement presented to a subcommittee of the Senate Committee on Governmental Affairs, Senator Levin noted that under applicable FAR cost principles, six major defense contractors reported incurring total lobbying costs in excess of \$5 million in 1990; yet reports filed by their lobbyists for the same period, under the Lobbying Registration Act, accounted for

<sup>7</sup>*Id.* at 8.

only \$500,000, and the reports filed under the Byrd Amendment only one firm reported \$3,500.<sup>8</sup> There is considerable evidence that such extreme reporting disparities are proper reflections of the patchwork character of laws and their differing reporting requirements on the same lobbying activities. Senator Levin described the Byrd Amendment as a "phantom law" which results in no meaningful disclosure of lobbying activities.<sup>9</sup>

The Act and the regulations are complex and impose significant record-keeping and other reporting burdens on Government agencies and private industry. The act has been criticized as being costly to implement, confusing to comply with, and of limited value. DOD, for example, has estimated that the certification requirement is included in approximately 35,000 actions valued at about \$60 billion each year.<sup>10</sup> It is not clear that the act has had any significant impact on lobbying.

#### **6.11.3.4. Recommendation and Justification**

##### **Repeal**

The Byrd Amendment is costly to implement and appears to have had little identifiable impact on lobbying. The Panel is aware that the 102d Congress has recently reviewed the scope and effectiveness of the various lobbying provisions and that the 103d Congress can be expected to consider this topic further. Comments received by the Panel regarding the applicability of the Byrd Amendment to defense acquisitions uniformly suggest that it imposes a paperwork burden that does not contribute to the better management of defense programs.<sup>11</sup> The FAR cost principles implementing the requirements of 10 U.S.C. § 2324(e)(1)(B) make the cost of legislative lobbying unallowable, and in addition make unallowable the cost of seeking to influence the executive branch on any regulatory or contract matter. In the Panel's view, those protections against lobbying with appropriated funds satisfy the predominant concern in this area. The additional reporting requirements of the Byrd Amendment contribute little to either public knowledge or protection, and the Panel recommends that they be repealed.

#### **6.11.3.5. Relationship to Objectives**

Repeal of the Byrd Amendment would reduce costs and streamline the acquisition process by eliminating a record keeping burden on Government and industry.

#### **6.11.4. 10 U.S.C. § 2408**

### **Prohibition on persons convicted of defense-contract related felonies and related criminal penalty on defense contractors**

#### **6.11.4.1. Summary of the Law**

The section prohibits an individual who has been convicted of fraud or any felony in connection with a DOD contract from working on a defense contract or first tier subcontract, or serving as director for a defense contractor or first tier subcontractor, for a period of five years. Knowing violation of the restriction subjects a defense contractor or subcontractor to criminal penalties up to \$500,000.

Section 815 of the National Defense Authorization Act for Fiscal Year 1993<sup>1</sup> recently amended 10 U.S.C. § 2408 to require that the Attorney General establish a single point of contact from which defense contractors and subcontractors could obtain information concerning whether prospective employees had been convicted of a defense-related felony.

#### **6.11.4.2. Background of the Law**

This section was originally contained in the Defense Authorization Act for Fiscal Year 1987.<sup>2</sup> The Defense Authorization Act of 1989<sup>3</sup> increased the minimum period of disqualification from one to five years and expanded the list of disqualified activities.

#### **6.11.4.3. Law in Practice**

DFARS section 203.571 implements 10 U.S.C. § 2408 and requires the inclusion of the clause at DFARS section 252.203-7001 in all solicitations and contracts other than those using small purchase procedures.

With the cooperation of the Department of Justice, DOD compiles a list of those debarments resulting from convictions for defense procurement-related felonies and forwards that information to the General Services Administration (GSA). In 1992, GAO found that this list was not sufficiently comprehensive to aid in enforcement of section 2408 and, therefore, recommended that the Attorney General or the Secretary of Defense publish a monthly list of those convicted of a defense contract related felony whether or not they had been debarred.<sup>4</sup>

The Panel believes that the purpose of the suspension and debarment process is to determine the persons with whom DOD should not deal, and that process provides appropriate

<sup>1</sup>Pub. L. No. 102-487, 106 Stat. 2315-1454 (1992).

<sup>2</sup>Pub. L. No. 99-661, 100 Stat. 3941-42 (1986).

<sup>3</sup>Pub. L. No. 100-456, 102 Stat. 2023 (1988).

<sup>4</sup>MORE DATA NEEDED ON INDIVIDUALS CONVICTED OF PROCUREMENT-RELATED CRIMES, GAO/NSIAD 92-35 (1992).

oversight and sanctions to prevent such persons from being employed by defense contractors. The Panel does not support maintaining lists in addition to the GSA centralized list, and believes that the objectives of section 2408 can better be achieved through reliance on the debarment process without the attendant record-keeping that has proven to be cumbersome and less than fully reliable despite considerable administrative effort over several years.

#### **6.11.4.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this provision. The Panel believes the prohibition is overly broad and that agency suspension and debarment procedures can better achieve the objectives of the section.

#### **6.11.4.5. Relationship to Objectives**

Repeal of this section will streamline the body of DOD acquisition laws while promoting the ethical integrity of the Government procurement process.

## **6.11.5. 10 U.S.C. § 2409 - 10 U.S.C. § 2409a**

### **Protection of "Whistle Blowers"**

#### **6.11.5.1. Summary of the Law**

10 U.S.C. § 2409 protects employees of defense contractors against reprisals for disclosing substantial violations of law. It also requires the Inspector General of the Department of Defense (DODIG) to investigate and report to Congress on allegations of reprisals.

10 U.S.C. § 2409a protects employees of defense contractors from retaliation for communicating with Government officials about improper or illegal activities. The statute requires DOD to establish procedures to investigate complaints of reprisal. The provision applies to DOD contracts over \$500,000 but excludes contracts in which the price is based solely on established catalog or market prices of commercial items sold in substantial quantities to the general public.

#### **6.11.5.2. Background of the Law**

10 U.S.C. § 2409 was contained in the Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> 10 U.S.C. § 2409a was contained in the Defense Authorization Act for Fiscal Year 1991<sup>2</sup> and was enacted to give whistle blowers a greater remedy than that provided for in section 2409. Section 2409a allows the Secretary of Defense to apply for an enforcement order in the U.S. District Court for the district in which the violation occurred. Pub. L. No. 102-25 suspended 10 U.S.C. § 2409 while 10 U.S.C. § 2409a is in effect. Unless extended, 10 U.S.C. § 2409a will expire on November 5, 1994.

#### **6.11.5.3. Law in Practice**

Remedies for reprisals against employees of defense contractors created in either section are in addition to any remedies that the employee might have under applicable state law. The DODIG has responsibility to investigate reports of reprisals.

#### **6.11.5.4. Recommendations and Justification**

**Retain § 2409**  
**Repeal § 2409a**

The Panel recommends repeal of 10 U.S.C. § 2409a now rather than allowing it to expire on November 5, 1994.

---

<sup>1</sup>Pub. L. No. 99-662, 100 Stat. 3941-42 (1986).

<sup>2</sup>Pub. L. No. 101-510, 104 Stat. 1616 (1990).

10 U.S.C. § 2409 is in many respects broader in coverage than 10 U.S.C. § 2409a. Section 2409a does not apply to contracts under \$500,000 or contracts in which the price is based solely upon established catalog or market prices of commercial items. These exclusions have no relation to the purpose of the provision and, in the Panel's view, are illogical. Section 2409 also provides the DODIG with greater flexibility. The procedures under section 2409a are unnecessarily cumbersome.

Section 2409 was suspended while section 2409a is in effect.<sup>3</sup> This has created an unfortunate gap in whistle blower coverage. Section 2409a only applies to contracts awarded after October 7, 1991. As a result, no whistle blower coverage exists for contracts falling within the exceptions to section 2409a or for any contracts awarded prior to that date.

#### **6.11.5.5. Relationship to Objectives**

Repeal of section 2409a will streamline the body of DOD acquisition laws and promote a more effective protection for whistle blowers, thus promoting the integrity of the acquisition process.

---

<sup>3</sup>Act of April 6, 1991, Pub. L. No. 101-510, Title VIII, Subtitle D § 837(b), 104 Stat. 1616.

## 6.11.6. 18 U.S.C. § 874

### **Kickbacks from public works employees**

#### **6.11.6.1. Summary of the Law**

This statute prohibits anyone from inducing any person employed in construction or repair of a public work or building, or so employed as a result of work financed in whole or part by loans or grants from the United States, to give up any part of the compensation to which he is entitled, and establishes a fine of not more than \$5,000 or imprisonment for not more than five years or both.

#### **6.11.6.2. Background of the Law**

This section is based on a 1934 statute which was formerly codified as 40 U.S.C. § 276b and has not changed substantially since then.<sup>1</sup>

#### **6.11.6.3. Law in Practice**

This statute has been interpreted to be a protection of Federal wage standards on Federal and federally subsidized public works and construction projects.<sup>2</sup> It not only penalizes anyone who uses intimidation or threats to obtain a kickback because of their ability to hire or fire workers, but also punishes anyone seeking kickbacks who may be merely in a position to influence a hiring or firing decision.<sup>3</sup>

#### **6.11.6.4. Recommendation and Justification**

##### **Retain**

This statute should be retained as its primary purpose is to protect public works employees and construction workers from being subject to intimidation or threats of dismissal as a result of refusing to give kickbacks to contractors. This statute goes beyond the Anti-Kickback Act proscription against offering kickbacks as contained in 41 U.S.C. § 53 in that its impact is to protect the worker from threats and other intimidation.

#### **6.11.6.5. Relationship to Objectives**

This statute promotes the ethical integrity of defense procurement without being unduly burdensome.

---

<sup>1</sup>Act June 13, 1934, ch. 483, § 1, 48, Stat. 948 (1934).

<sup>3</sup>See *United States v. Price*, 224 F. 2d 604 (6th Cir. 1955), *cert. den.* 350 U.S. 876, 100 L. Ed. 774, 76 S. Ct. 121 (1955).

## **6.11.7. 41 U.S.C. §§ 51 - 58**

### **Anti-Kickback Act<sup>1</sup>**

#### **6.11.7.1. Summary of the Law**

The Anti-Kickback Act of 1986 prohibits any person from providing or soliciting a kickback, attempting these acts, or including the amount of any kickback in the contract price charged by a subcontractor to a prime contractor or a higher tier subcontractor or in the contract price charged by a prime contractor to the United States.<sup>2</sup> The criminal penalty for anyone who knowingly and willfully commits these offenses is imprisonment for not more than 10 years or a fine in accordance with Title 18, or both.<sup>3</sup>

The statute provides for a civil penalty of twice the amount of the kickback and not more than \$10,000 for each act in which a person knowingly provides or solicits a kickback.<sup>4</sup> The statute also provides the United States with a right of action in the amount of the kickback against the employer or prime contractor whose employee, subcontractor, or subcontractor employee commits a kickback offense, for six years after commission of the offense or six years after the United States first knew or should reasonably have known that the offense had occurred.<sup>5</sup>

Also under the statute, a contracting officer may offset the amount of any kickback against any money owed by the United States under the contract related to the kickback.<sup>6</sup> Prime contractors are also required to have kickback prevention and detection programs and are obligated to promptly report suspected incidents and cooperate in any Federal investigations of possible violations.<sup>7</sup> Evidence that a person has given information to the Government shall be favorable evidence of responsibility in the case of a suspension or debarment proceeding.<sup>8</sup> The General Accounting Office (GAO) and any agency inspector general shall have access to, inspect the facility of, or audit the books and records of any prime or subcontractor for the purpose of determining whether a violation has been committed on any agency prime contract.<sup>9</sup>

---

<sup>1</sup>This statute is different from the Copeland Anti-Kickback Act, 40 U.S.C. § 276c or the Federal Kickback Act, 18 U.S.C. § 874, formerly 40 U.S.C. § 276(b), discussed elsewhere in this report. The Copeland Act requires the Secretary of Labor, among other things, to issue regulations requiring contractor to furnish a weekly statement concerning wages paid each employee during the previous week. The statute also provides that penalties under the False Statements Act, 18 U.S.C. § 1001 shall apply to any such statement. The Federal Kickback Act discussed infra prohibits anyone from inducing a subcontractor or material man on a public works project financed by the Federal Government to give up any part of his compensation or face criminal penalties.

<sup>7</sup>41 U.S.C. § 57.

<sup>8</sup>41 U.S.C. § 57.

<sup>9</sup>41 U.S.C. § 58.

### **6.11.7.2. Background of the Law**

The forerunner of the 1986 Anti-Kickback Act was enacted in 1946 in the aftermath of World War II.<sup>10</sup> Based upon the findings of a 1943 GAO audit of cost-plus-fixed-fee contracts which revealed kickbacks, and the GAO recommendation that legislation be developed to combat that practice, the Senate Special Committee to Investigate the National Defense Program initiated a full-scale examination of the problem. The Committee discovered that gifts and gratuities of money, war bonds, and entertainment had been given to purchasing agents of certain prime contractors for inducing orders or as rewards for previously given orders.<sup>11</sup> In 1960, the Act was amended to apply to all negotiated contracts.<sup>12</sup> The 1986 Act, also known as the Anti-Kickback Enforcement Act, made substantial changes in the original statute. First, the 1986 amendment prohibited accepting kickbacks whereas the 1946 Act prohibited only their payment. The revised statute also included a provision to prohibit attempted kickbacks. The statute, as most recently amended, covers all contracts, rather than just negotiated contracts, and covers kickbacks intended to induce any favorable treatment in contracting, not just inducements for the award of subcontracts or orders. Criminal penalties were also increased from maximum imprisonment of 2 to 10 years for anyone who "knowingly" and, as a result of that amendment, "willfully" violates the statute. The maximum fine was increased from \$10,000 to \$250,000 for individuals and \$1 million for entities other than individuals. The 1986 amendment also created a cause of action for the United States in a civil suit against anyone violating the statute. Finally, the 1986 amendment placed new requirements on contractors in the detection and prevention of kickbacks.

### **6.11.7.3. Law in Practice**

This Act is implemented at FAR 3.502-1 and -3. Section 3.502-3 requires that the contract clause 52.203-7, "Anti-Kickback Procedures," be inserted in all solicitations. The clause, which is also required to be incorporated in all subcontracts, outlines the provisions of the Act, and requires that the contractor promptly report suspected kickback occurrences and cooperate fully with Federal agency investigations of suspected kickbacks. The clause also provides that the contracting officer may offset kickbacks against monies owed by the Government and directs that the prime contractor withhold monies owed due to kickbacks from a subcontractor.

### **6.11.7.4. Recommendation and Justification**

#### **Retain**

Retention of this statute is recommended as it serves as the foundation for Government action, both criminal and civil, against anyone accepting a kickback and anyone providing a kickback, other than in a public works or construction projects. Kickbacks in public works and construction projects are addressed by 18 U.S.C. § 874.

---

<sup>10</sup>Act of Mar. 8, 1946, ch. 80, 60 Stat. 37.

<sup>11</sup>H.R. REP. NO. 212, 79th Cong., 2d Sess. (1946).

<sup>12</sup>Act of Sep. 2, 1960, Pub. L. No. 86-695, 74 Stat. 740.

The Panel makes specific recommendations at 4.1 and 8.3, related to the act and its application to commercial items or a simplified acquisition threshold.

**6.11.7.5. Relationship to Objectives**

This statute promotes the ethical integrity of defense procurement without being unduly burdensome.

## 6.11.8. 5 U.S.C. Appendix 5 §§ 401 - 408

### Office of Government Ethics

#### 6.11.8.1. Summary of the Law

These provisions established the Office of Government Ethics (OGE) and made its director responsible for developing, in consultation with the Attorney General and the Office of Personnel Management, rules and regulations concerning conflicts of interest and ethics in the executive branch.<sup>1</sup> OGE is also responsible for monitoring and investigating compliance with the financial disclosure requirements by executive branch officials; for reviewing certain financial statements for possible conflict of interest law violations; for monitoring and investigating individual and agency compliance with additional financial reporting and internal review requirements; for interpreting rules and regulations governing conflict of interest and ethical problems and filing of financial statements; for consulting with Federal agencies concerning conflict of interest problems in individual cases; and for establishing a formal advisory opinion service.<sup>2</sup>

#### 6.11.8.2. Background of the Law

Prior to the establishment of OGE, standards of ethical conduct and financial disclosure requirements were established by a 1965 executive order, Exec. Order No. 11222, and Civil Service Commission implementing rules and regulations.<sup>3</sup> A 1976 General Accounting Office (GAO) study found several problems: that interpretation and implementation of standards of conduct regulations was inadequate; procedures to ensure collection, review and control of financial disclosure statements were lacking; and resolution of conflicts of interest was ineffective and untimely.<sup>4</sup> One of the primary findings of the GAO was that with no power to monitor compliance, investigate, or order remedial action, the Civil Service Commission lacked the "centralized supervisory authority" to enforce its implementation of Exec. Order No. 11222.<sup>5</sup> Accordingly, the Comptroller General recommended that an OGE be established.<sup>6</sup> The following year President Carter called upon Congress to implement the GAO's recommendation.<sup>7</sup> Congress did so in legislation which, in addition to correcting the deficiencies pointed out by GAO, authorized OGE to provide advisory opinions to agencies.<sup>8</sup>

The Ethics in Government Act Amendments which reauthorized OGE in 1988, gave OGE broader authority to recommend that agencies investigate and take disciplinary or corrective

<sup>7</sup>*Id.*

<sup>8</sup>*Id.* at 4247.

action to remedy a violation.<sup>9</sup> It also gave OGE the power to direct corrective action in the absence of appropriate agency action.<sup>10</sup>

### **6.11.8.3. Law in Practice**

Pursuing one of the 1989 recommendations of his Commission on Federal Ethics Law Reform, the President directed OGE to draft and promulgate uniform standards of conduct regulations for agencies within the executive branch. Published on August 7, 1992, OGE's Standards of Ethical Conduct for Employees of the Executive Branch<sup>11</sup> will take effect on February 3, 1993, and will impose the single executive branch-wide standard for ethics rules that the Commission recommended.

The President's Ethics Commission also noted that one of the functions of OGE was its advisory opinion service. Under a 1980 Memorandum of Understanding with the Department of Justice, an opinion on a significant matter of first impression or a matter otherwise touching upon criminal law violations must be coordinated with the Department of Justice.<sup>12</sup> The memorandum also provides that any person relying in good faith upon a formal advisory opinion of OGE shall not be subject to prosecution.<sup>13</sup> The Commission also noted that opinions regarding the informal resolution of agency cases may also confer a bar on prosecution.<sup>14</sup> Its collection of formal and informal opinions is published and provides a "common law" for the executive branch ethics program.<sup>15</sup>

No comments were received concerning this statutory provision, and the Panel is aware of no problems which should be remedied through a statutory change.

### **6.11.8.4. Recommendation and Justification**

#### **Retain**

The Panel recommends that 5 U.S.C. App. 5 §§ 401-408 be retained. The legislation establishing the OGE brought about strong centralized management and Government-wide uniformity of ethical standards throughout the executive branch, which clearly promotes Federal acquisition practices.

### **6.11.8.5. Relationship to Objectives**

<sup>15</sup>*Id.*

This statute as it exists promotes the continued ethical integrity of defense procurement programs.

## 6.11.9. 5 U.S.C. Appendix 6 §§ 101 - 111

### Financial Disclosure Requirements of Federal Personnel

#### 6.11.9.1. Summary of the Law

This statute sets out the detailed financial disclosure requirements for executive, legislative, and judicial branch officers and employees, including nominees for positions which require Senate confirmation, and special Government employees serving more than 60 days within a calendar year.<sup>1</sup> The Attorney General may file a civil action in the appropriate Federal district court against any individual who knowingly and willfully fails to file or report any required information or who files a false report. The penalty for violation is a fine of not more than \$5,000.<sup>2</sup> The statute requires that the financial disclosure reports of higher-level officials be made available to the public with the exception of those filed by persons in the intelligence agencies.<sup>3</sup> The use of the reports for commercial purposes or for any solicitation is prohibited.<sup>4</sup> The designated agency ethics official or Secretary is to provide for review of each disclosure report within 60 days after filing. If after review it is determined that the report submitted is not in compliance with applicable laws and regulations, the submitter shall be given an opportunity for personal consultation and notified of appropriate alternatives for resolving any conflict of interest, including divestiture, restitution, establishment of a blind trust, request for exemption, reassignment, or resignation.<sup>5</sup>

#### 6.11.9.2. Background of the Law

There has been concern since the late 1940s that Federal Government employees should have financial disclosure regulations to guide their conduct regarding outside financial interests.<sup>6</sup> In 1946, Senator Wayne Morse introduced a resolution which would have required Senators to file annual financial statements.<sup>7</sup> With the support of President Truman, he continued his efforts with the introduction of legislation to cover all Federal employees who earned over \$10,000.<sup>8</sup> That effort failed,<sup>9</sup> but it was a concept later pursued by Senator William Fulbright, Senator Paul Douglas, and President Kennedy.<sup>10</sup> Due to concern over the financial dealings of one of its members, Congress adopted rules requiring financial reporting in 1967.<sup>11</sup> By that date the executive branch had established a requirement for confidential financial disclosure as a result of

<sup>11</sup> *Id.*

Executive Order No. 11222, executed by President Johnson, and the judicial branch later established reporting through the U.S. Judicial Conference resolutions of 1969.<sup>12</sup>

Unevenness among the congressional, judicial, and executive branch disclosure rules prompted efforts throughout the mid-1970s to enact financial disclosure legislation for the three branches of Government. In 1976, a General Accounting Office report entitled *Action Needed to Make the Executive Branch Financial Disclosure System Effective* criticized the existing reporting system, finding the following discrepancies: the failure of the executive departments to tailor regulations to individual agency and employee responsibilities; ineffective procedures to ensure collection, review, and control of financial disclosure statements; ineffective and untimely resolution of conflicts of interest issues; and lack of a centralized supervisory authority.<sup>13</sup> That report helped to catalyze the enactment of new financial reporting requirements in the Ethics in Government Act of 1978, which included a separate title covering financial reporting for each of the three branches of Government. This separate treatment of the branches continued until the passage of the Ethics Reform Act of 1989, which introduced uniformity to the requirements for the three branches.<sup>14</sup>

### 6.11.9.3. Law in Practice

In 1989, the President's Commission on Federal Ethics Law Reform referred to financial disclosure as the "linchpin of the ethical enforcement system."<sup>15</sup> The Commission recommended that the system be continued, finding that "10 years of experience with the Ethics in Government Act requirements have demonstrated the value of public financial disclosure to the maintenance of public confidence of Government officials."<sup>16</sup> The Commission felt, however, that there should be more flexibility in the disclosure requirements than those laid out in the Ethics in Government Act,<sup>17</sup> and that there should be uniformly strong review processes in all three branches.<sup>18</sup> In addition, it recommended that the reporting thresholds be raised to adjust for inflation.<sup>19</sup>

The extensive amendments made by Congress in 1989 to address these and other concerns have been in effect only a short period of time. No comments were received concerning this statute, and the Panel is aware of no problems which should be remedied through statutory change.

### 6.11.9.4. Recommendation and Justification

## **Retain**

The Panel recommends that 5 U.S.C. App. 6 §§ 101-111 be retained as it is the foundation for Federal requirements for financial disclosure by Government officials.

### **6.11.9.5. Relationship to Objectives**

This statute, as it exists, promotes the continued ethical integrity of defense procurement programs.

## **6.11.10. 10 U.S.C. § 2393**

### **Prohibition against doing business with certain offerors or contractors**

#### **6.11.10.1. Summary of the Law**

This section prohibits the Secretary of a military department from soliciting an offer from, awarding a contract to, extending an existing contract with, or approving the award of a subcontract to an offeror or contractor known by the Secretary to have been debarred or suspended by another Federal agency unless the debarment or suspension has been terminated or the debarment or suspension period has expired. If the Secretary determines there is a compelling reason to solicit an offer from, award a contract to, extend a contract with, or approve a subcontract with such an entity, the Secretary shall send notice of the determination to the Administrator of the General Services Administration, who shall maintain the notice for public inspection. The statute requires the Secretary of Defense to issue regulations requiring that each DOD contractor have its subcontractors disclose, at the time of award of the subcontract (if above the small purchase threshold), whether or not it has been suspended or debarred by the Federal Government.

#### **6.11.10.2. Background of the Law**

This section was added to Title 10 in 1981 by the 1982 Defense Authorization Act.<sup>1</sup> Prior to passage of that Act, the Senate Subcommittee on Oversight of Government Management recommended in July of 1981, based in part on the findings of an interagency task force, that new debarment and suspension regulations be issued which would have Government-wide effect.<sup>2</sup>

The section was amended in 1987 when subsection (b) was added to require subcontractors to provide notice to their prime contractor of whether they had been suspended or debarred.<sup>3</sup>

#### **6.11.10.3. Law in Practice**

DFARS 209.405 satisfies the direction of the section to require disclosures by subcontractors as to whether they have been debarred.

---

<sup>1</sup>Pub. L. No. 97-86, Title IX, § 914(a), 95 Stat. 1124 (1981).

<sup>2</sup>Senate Subcommittee on Oversight of Government Management of the Committee of Government Affairs, 97 Cong., 1st Sess., Reform of Government-Wide Debarment and Suspension Procedures, at 18-19 (1981).

<sup>3</sup>Pub. L. No. 100-180 Div. A., Title XXI, § 1231(17), 101 Stat. 1161 (1987).

#### **6.11.10.4. Recommendations and Justification**

##### **Retain**

Although the practice of suspension and debarment in DOD precedes this statute, section 2393 addresses DOD debarment and suspension of contractors who have been debarred or suspended by other Federal agencies and promotes a coherent approach among DOD and other segments of the Government concerning debarred and suspended contractors.

Recommendations to exempt certain of these restrictions for commercial items is discussed at 8.3.

#### **6.11.10.5. Relationship to Objectives**

This statute promotes the ethical integrity of defense procurement without being unduly burdensome.

## **7. DEFENSE TRADE AND COOPERATION**

### **7.0 Introduction**

With the end of the Cold War, the integration of international and domestic economic security is emerging as a key issue to be considered as the U.S. restructures its defense establishment. Because of the need to focus on the economic aspects of American security, defense acquisition faces the twin challenges of reducing procurement expenditures while preserving a viable industrial and technology base. As discussed in Chapters 1 and 8 of this Report, reduction of defense expenditures and maintenance of the defense technology and industrial base will require greater use of commercial and nondevelopmental defense items, some of which will of necessity come from abroad. As further discussed in subchapter 7.2., collaborative sharing of research and development costs through international cooperative programs has long been a method for reducing U.S. research and development expenditures but will require the U.S. to acquire from its foreign partners. More recently, as addressed in subchapter 7.3., allied burdensharing is being emphasized by Congress as a way to cut the costs of international commitments of the United States. All of these developments suggest that in the future foreign-made defense items will of necessity be used in greater quantities by DOD. At the same time, national security will dictate that concern for foreign control or ownership of key U.S. industrial capacity be considered.

On the other hand, a robust industrial base is required to promote American technological competitiveness. Our declared National Security Strategy emphasizes the importance of domestic "surge capacity" in responding to a wide variety of crisis mobilization scenarios -- not unlike Operation Desert Shield. One way to promote the U.S. defense technology and industrial base in times of declining defense expenditures is to export defense items to our allies. These same industrial base problems are also faced by many of our allies around the world, particularly those in NATO, each of whom will presumably want to use exports to protect their industrial bases.

The countervailing concerns sketched above show that domestic source restrictions on DOD acquisitions cannot be considered in a vacuum, apart from laws, treaties, and regulations governing the sale of U.S. defense items abroad, the acquisition of companies by foreign entities, and the operation of international defense cooperation. Accordingly, the Panel decided that all of these concerns should be addressed in a comprehensive way in a new chapter within Title 10. This section of the Report discusses the structure of that new chapter.

One way to deal with the common pressures of reducing defense spending while promoting critical industrial base sectors is to broaden the pattern of international armaments cooperation. As succinctly stated by the Secretary of Defense in his 1992 Annual Report to the President and the Congress:

The Department of Defense considers international defense industrial cooperation to be a significant element of the U.S. acquisition process. By taking advantage of the growing

technological capabilities of our allies, we can make more efficient use of scarce defense resources.<sup>1</sup>

However, there are formidable obstacles to enhanced international defense trade and cooperation. Many are rooted in some of the most fundamental economic choices made by any state, beginning with the all-important questions of what to produce domestically and what to obtain by trade with foreign countries. In the past, domestic restrictions reflect both pragmatic industrial base concerns and varying degrees of both self-interest and applied patriotism. These concerns can be seen in the passage of legislation such as the Buy American Act, as well as the source restrictions and product preferences which have become a regular feature of recent defense annual appropriations and authorizations acts.

A further issue is the extent of industrial self-reliance needed to insure any nation's survival, either in wartime or in situations such as a blockade, embargo, or other logistical interruption. The United States, for example, has historically been unwilling to transfer to overseas suppliers its capacities for the forging and casting of large-bore cannon. More recently, American policy-makers have worried that our reliance on advanced weaponry might lead to a dangerous dependence on the foreign-produced microchips needed to produce these technologically advanced systems.

Although many western democracies emphasize the somewhat contradictory need to cut overall defense spending even while conserving national armaments industries, there is a growing recognition that defense production reflects the dynamics of an increasingly global marketplace. Military hardware is clearly affected by the same interdependence which leads to the production of a "domestic" automobile with a third or more of its parts and major components typically obtained from offshore suppliers. In addition to microchips, typical items obtained from foreign sources by U.S. defense manufacturers include electrical components, chemicals, fasteners, specialty metals, and various alloys. The fact that some or all of these items must be obtained through waivers of existing laws or regulations only underlines the tension between reality and current statutory policy.

Multinational corporations as well as regional consolidations (such as Europe in 1992) are also the harbingers of fundamental change in the global economy. To prosper -- or even to survive -- domestic concerns are increasingly pressed to compete in the international marketplace, often against foreign Government-owned competitors. Particularly for defense industries, that international marketplace not only demands efficiency but partnerships. These relationships can result equally from individual relationships concluded between international buyers and sellers or from international agreements arrived at between Governments. What is fundamental, however, is that these opportunities reflect the results of competition on a level playing field in defense trade -- that is, to weigh the ever-present preference for "Buy American" with the emergent need to be able to "Sell American."

In analyzing the legislative changes needed to help provide that level playing field in defense trade and cooperation, the Panel has concluded that:

---

<sup>1</sup>Dick Cheney, Secretary of Defense, Annual Report to the President and the Congress, February 1992, at p. 17.

- Department of Defense international defense acquisition policies should be consistent, on a reciprocal basis, with the defense acquisition and trade policies of United States allies.
- Department of Defense international defense acquisition policies on international and cooperative agreements should be consistent with the maintenance of strong domestic technology, industrial, and mobilization bases.
- Department of Defense international defense acquisition policies should be consistent with international operational agreements, allied logistics support and standardization, and export sales of defense items to foreign countries.

### 7.0.1. Background

After World War II, the requirement for international institutions to deal with monetary and trade issues led to the "Bretton Woods" accords,<sup>2</sup> and the establishment of such institutions as the International Monetary Fund (IMF),<sup>3</sup> the World Bank,<sup>4</sup> and the General Agreement on Tariffs and Trade (GATT).<sup>5</sup> These institutions have endured for almost a half century. The GATT has successfully regulated international trade in spite of the Cold War and its implications for East-West security. A key element in its success has been the delicate balance preserved between free trade and protectionism.

Under the general rubric of national security, government procurement was historically reserved from the purview of such agreements as the GATT.<sup>6</sup> National security and government procurement were inextricably linked and therefore excluded from international trade regulation. Since government procurement typically accounts for a substantial portion of the gross domestic product, its effect on a national trade balance can be significant; and of course, defense acquisition is an important segment of the general government procurement sector. Aware that procurement held such significance, the GATT multilateral trade negotiations ultimately produced the Agreement on Government Procurement contemporaneously with addressing the elimination of non-tariff barriers to trade.<sup>7</sup>

<sup>2</sup>Named after the agreements reached between the United States, the United Kingdom, and their World War II allies at Bretton Woods, New Hampshire, in July 1944.

<sup>3</sup>The IMF is not a bank but a membership association of countries which pay a subscription and agree to abide by a mutually advantageous code of conduct concerning international economic and monetary policy.

<sup>4</sup>The World Bank is a publicly owned financial intermediary which borrows commercially by selling bonds and lends to finance investment in developing countries.

<sup>5</sup>The GATT is an agreement among signatory countries whose general principles are: (a) trade without discrimination (most-favored-nation concept); (b) protection through tariffs (tariff schedules to minimize trade distortions); (c) a stable basis for trade (the generalized-system-of-preferences (GSP)); (d) promotion of fair competition (elimination of non-tariff barriers, subsidies, and dumping); (e) a general prohibition on quantitative and qualitative restrictions on imports (elimination of quotas except for balance-of-payments difficulties); and (f) an acceptable waiver procedure with provision for emergency actions (the "safeguard" rule).

<sup>6</sup>General Agreement on Tariffs and Trade, Article XXI.

<sup>7</sup>Tokyo Round of Multilateral Trade Negotiations (MTN), 1973 - 1979.

In the United States, the Trade Agreements Act of 1979 implemented the Agreement on Government Procurement.<sup>8</sup> For the first time, above a threshold agreed among the signatories to the Agreement,<sup>9</sup> Government agency procurement was covered by the principles of reciprocal free trade.<sup>10</sup> Not only was DOD included in agency coverage but specific classes and items of defense goods were included as well.<sup>11</sup>

Even with the advent of regional trade and economic blocs, such as the European Community (EC)<sup>12</sup> and the recently concluded North American Free Trade Agreement (NAFTA),<sup>13</sup> coverage of government procurement has been included within the articles of agreement. In the former, government procurement within the EC member countries is regulated through various Directives,<sup>14</sup> whereas in the latter, the government procurement regime is an integral part of the accord modeled after the U.S./Canada Free Trade Agreement provisions.<sup>15</sup>

Efforts at addressing international government procurement within the United Nations framework led to the promulgation of a draft model procurement law for guidance to developing countries.<sup>16</sup> The articles of the draft law on procurement generally address processes for general tendering and two-stage tendering, prequalification, solicitation, tender and tender securities, evaluation and comparison of tenders, contract acceptance, procurement by other means, request-for-proposals, request-for-quotations, competitive negotiation, single source procurement, and procurement review.

With the emergence of each of these agreements on government procurement, accompanied by draft general codes for developing countries' implementation, the level of international cooperation appears to be improving. One sector remains elusive in the drive toward a level playing field, however, and that is international defense trade and cooperation.

---

<sup>8</sup>19 U.S.C. § 2511 *et seq.*

<sup>9</sup>Originally established at 150,000 Special Drawing Rights (SDRs) and subsequently lowered to 130,000 SDRs (approximately \$141,000 U.S.).

<sup>10</sup>For agencies and goods covered, see Annexes to the Agreement.

<sup>11</sup>DFARS, Subpart 225.4.

<sup>12</sup>Treaty of Rome, March 25, 1957.

<sup>13</sup>Concluded December 17, 1992; provides for a threshold of \$50,000 for Federal Government entities/\$250,000 for Government enterprises and addresses among other subjects: national treatment and non-discrimination; rules of origin; denial of benefits; prohibition of offsets; technical specifications; tendering procedures; qualification of suppliers; bid challenge; provision of information; technical cooperation; joint programs for small business; and definitions.

<sup>14</sup>*E.g.* Works Directive; Supplies Directive; Utilities Directive; and draft Services Directive; above various thresholds, the Directive Articles are generally premised on: (1) open, restricted, and negotiated procedures in contract formation; (2) common rules in the technical field; (3) common rules on advertising and participation; and (4) criteria for qualitative selection and the award of contracts.

<sup>15</sup>In force since 1988, Part Three of the Agreement provides broadened Government procurement coverage, above a \$25,000 threshold, for GATT-eligible products with improved transparency and bid challenge procedures.

<sup>16</sup>See U.N. Commission on International Trade Law (UNCITRAL), A/CN.9/WG.V/WP.30, 9 May 1991.

## 7.0.2. Defense Trade and Cooperation

Other than the right of individual and collective self-defense assured under the United Nations Charter,<sup>17</sup> defense and security issues have generally been outside the scope of international economic and trade-related agreements.<sup>18</sup> European and North American defense and security issues were placed within the ambit of such institutions as the North Atlantic Treaty Organization (NATO),<sup>19</sup> the Western European Union (WEU),<sup>20</sup> and more recently the Conference on Security and Co-Operation in Europe (CSCE).<sup>21</sup>

During the period that international agreement on free trade in government procurement has been negotiated, the United States has been initiating discussion of an allied regime on defense trade and cooperation. Beginning in the 1970s with acquisition and logistic support projects within NATO,<sup>22</sup> the United States pursued defense procurement-related arrangements with its allies. On the basic premise of a "two-way street," principles of rationalization, standardization, and interoperability (RSI) with our NATO allies in defense acquisition were specifically enacted by statute in the United States.<sup>23</sup> The Office of Technology Assessment, in Figure 7A. below, depicts the value of reciprocal transatlantic defense trade during the years 1978-88.<sup>24</sup>

\* Example: In 1978, value of arms delivered from North America to NATO Europe was 6 times greater than from NATO Europe to U.S.  
**Figure 7A. - Transatlantic Defense Trade, by Value and Ratio, 1978-88**

<sup>17</sup>See Charter of the United Nations, Article 7.

<sup>18</sup>See, for example, NAFTA Article 1018: "Exceptions - 1. Nothing in this Chapter shall be construed to prevent a Party from taking any action or not disclosing any information which it considers necessary for the protection of its essential security interests relating to the procurement of arms, ammunition or war materials, or to procurement indispensable for national security or for national defense purposes."

<sup>19</sup>The North Atlantic Treaty, April 4, 1949.

<sup>20</sup>Brussels Treaty, March 17, 1948. (Following the collapse of the European Defense Community in 1954, the WEU was a political outgrowth of the Brussels Treaty Organization intended originally to integrate West Germany into the western defense structure).

<sup>21</sup>Conference on Security and Co-Operation in Europe: Final Act, August 1, 1975 (Helsinki).

<sup>22</sup>NATO Mutual Support Act of 1979, 10 U.S.C. § 2341 *et seq.*

<sup>23</sup>10 U.S.C. § 2457.

<sup>24</sup>U.S. Congress Office of Technology Assessment, Global Arms Trade, Commerce in Advanced Military Technology and Weapons, June 1991, at 49.

An integral component of the transatlantic defense trade included statutory authority in the U.S. for agreements on cooperative projects with NATO member countries, other major allies, and friendly foreign countries.<sup>25</sup> Then, through the negotiation of reciprocal bilateral procurement agreements with our allies in the 1980s,<sup>26</sup> the U.S. advanced not only international defense cooperation in research, development, production, and logistics support, but also promoted the concept of a more transparent system of international defense acquisition.<sup>27</sup>

International defense trade is always balanced against concerns of national sovereignty and security, as embodied in the procurement arena by the maintenance of an indigenous defense industrial base. In the U.S. particularly, preservation of the defense industrial base has been established by the Congress through legislative mandate.<sup>28</sup> Through agreements between the U.S. and Canada, a *de facto* North American defense industrial base has gradually arisen.<sup>29</sup> Indeed, recent legislation has codified the relationship by defining the national technology and industrial base as including the U.S. and Canada,<sup>30</sup> while defining a domestic source, for industrial preparedness purposes, as including production capability either in the U.S. or Canada.<sup>31</sup>

In Europe, concerns over the defense industrial base led to the establishment of the Independent European Programme Group (IEPG).<sup>32</sup> The Group has, for example, formed a cooperative research and development program called European Cooperation for the Long term in Defense (Euclid). Perhaps viewed as a regional counter-weight during healthy and competitive global economic times, the goal is a laudable one. But in a time of economic downturn, coupled with an overall lessening of global security tensions, the effect of continuing to insist on an indigenous defense industrial base must be offset by the reality that such policies can be devastating to national economies.

From the U.S. perspective, the Defense Policy Advisory Committee for Trade Policy Matters (DPACT)<sup>33</sup> has perceived European procurement practice, related to efforts such as Euclid, as a barrier to cooperative research and development with the United States. In addition, DPACT has provided specific recommendations on U.S. defense export policy, financial

<sup>28</sup>Currently Chapter 148, Title 10.

<sup>29</sup>Defense Development and Defense Production Sharing Arrangements (DD/DPSA), DOD Directive 2035.1; Industrial Preparedness Program, DFARS 225.870-2(b), DOD Directive 4005.3-M; inclusion of Canada for production planning purposes, DFARS 225.870-1.

<sup>30</sup>Defense Authorization Act of 1993, Pub. L. No. 102-484, §4203(a), 106 Stat. 2442.

<sup>31</sup>Defense Production Act Amendments of 1992, Pub. L. No. 102-558, 106 Stat. 4198.

<sup>32</sup>Comprised of the European members of NATO, the IEPG was formed to address harmonization of operational requirements, competition, open purchasing arrangements, cross-border defense trade, *juste retour*, technology transfer, and cooperation in research, development and technology. [Note: The IEPG was recently subsumed by the WEU organization, see note 19, *supra*.]

<sup>33</sup>Established by the Secretary of Defense and the United States Trade Representative pursuant to the authority delegated under Exec. Order No. 11846 of March 27, 1975, as an advisory committee established under section 1103 of the Trade Agreements Act of 1979.

competitiveness, research and development contracting, Government-industry relations, communication of planning information, and commercial products and value based acquisition. With these recommendations in mind, DPACT succinctly stated that:

Defense trade will take on added importance as U.S. defense budgets decline. Exports to friendly countries, consistent with U.S. national security and foreign policy objectives, help keep production lines open, lower costs to DOD and provide built-in surge capacity. Such exports also provide added security on a regional basis to complement U.S. commitments at a very low cost to the U.S.<sup>34</sup>

DPACT recently recommended, as well, that efforts in the Uruguay Round of multilateral trade negotiations to expand GATT coverage, to add new public sector coverage, and to include coverage for services, be vigorously pursued by the U.S. negotiators.<sup>35</sup> The recent breakthrough on agricultural subsidies has given added impetus to a successful conclusion of the Uruguay Round.

### **7.0.3. The International Defense Acquisition Challenge**

Despite the progress that has been achieved in the past few decades, much remains to be accomplished in the practice of international defense acquisition and trade. The Panel accumulated a considerable number of studies suggesting that coordination between defense trade and cooperation and the preservation of a viable national defense technology and industrial base is less than effective. As one study recently found:

In response to these changing demands, governments are cutting their defense spending, either canceling defense programs altogether or stretching them out and reducing the final purchases. The combination of lower production runs and increasingly challenging technological specifications inflates the final price tag of many programs, making them more vulnerable to cancellation. And industry is increasingly financially exposed at the front end of the development process.

Out of necessity, European companies continue to concentrate on exports, while U.S. companies have raised their share of global defense exports considerably over the last decade. This surge paralleled a growth in global defense expenditure, however, which cannot be taken for granted in the future. The global market has recently been a victim of overcapacity. Even the expected export boom following the Gulf War may be curtailed by international political initiatives on arms control and export

<sup>35</sup>DPACT, Year-End Review 1991, Feb. 28, 1992.

controls. Major importers are also seeking to develop indigenous capabilities that cut into the long-term viability of direct exports.<sup>36</sup>

In reducing the international defense acquisition market, significant international collaboration among industry will be inevitable. To illustrate the trend, according to the Office of Technology Assessment, Figure 7B. below charts recent defense acquisition teaming between U.S. and European industry:<sup>37</sup>

**Figure 7B. U.S.-European Defense Industrial Cooperative Agreements**

#### 7.0.4. General Recommendations

Three broad principles in international defense acquisition emerged from the Panel's Goals and Objectives and the various statutory analyses conducted in the area of defense trade and cooperation.

**Department of Defense international defense acquisition policies should be consistent, on a reciprocal basis, with the defense acquisition and trade policies of United States allies.**

Uniformity in requirements, coverage, general applicability, visibility, and transparency of the international defense acquisition system must be achieved on a reciprocal basis as reciprocity is the cornerstone of international law and policy. An example would be the recent initiative toward a NATO Code of Conduct in Defense Trade. With the downturn in global defense spending, the defense acquisition and trade policies of our allies must be consistent with U.S. policy if the alliances are to achieve the required economies of scale while preserving our collective defense industrial capabilities so vital to the maintenance of our mobilization and surge capacities. Elsewhere the Panel has recommended steps to permit better integration of defense and commercial requirements and sources. Military-commercial integration by itself, however,

<sup>36</sup>The Center for Strategic and International Studies, The Atlantic Partnership. An Industrial Perspective on Transatlantic Defense Cooperation, at pgs. 4-5 (May 1991).

<sup>37</sup>Note 24, *supra*, at pg. 25.

will not be a panacea for resolving all defense technology and industrial base problems.<sup>38</sup> Additionally, certain technologies may be so critical that it is essential to national security for such products to be developed and acquired only from United States sources. The Secretary should have the authority to restrict acquisitions to United States sources and control the foreign ownership of key defense industry sectors to ensure this country's continuing military strength. In the future, defense acquisition and trade policy will become two sides of the same coin.

**Department of Defense international defense acquisition policies on international and cooperative agreements should be consistent with the maintenance of strong domestic technology, industrial, and mobilization bases.**

As defense budgets shrink over the next decade, it will become increasingly difficult to maintain an adequate technology and industrial base with sufficient surge capacity for times of war. As with the successful joint military approach conceived by the Goldwater-Nichols Department of Defense Reorganization Act of 1986 and first tested in Operation Desert Storm,<sup>39</sup> DOD international defense acquisition policies on international and cooperative agreements should be consistent with the maintenance of a strong mobilization base. In the Defense Authorization Act of 1993, the Congress has enacted major new initiatives to foster and encourage the revitalization of a national defense technology and industrial base.<sup>40</sup> These initiatives were envisioned by the Panel to become fully coordinated with the implementation of this new Chapter on Defense Trade and Cooperation.

**Department of Defense international defense acquisition policies should be consistent with international operational agreements, allied logistics support and standardization, and export sales of defense items to foreign countries.**

Items acquired by DOD must often be the same as -- or function with -- articles acquired by our allies on the basis of rationalization, standardization, and interoperability. DOD should have additional statutory authority, for example, to encourage the purchase of NATO-standard items, which may or may not be available from U.S. sources, as well as to encourage increased allied burdensharing. Likewise where NATO-standard items are or could be available from U.S. sources, DOD needs authority to encourage their export, thus enhancing the competitiveness of our national defense technology and industrial base. DOD, unlike civilian agencies, develops unique products, systems, and components which are sold abroad under interagency scrutiny, sometimes with departmental security assistance. As the domestic requirement for new weapons

systems decreases, there may be an increasing opportunity to participate in defense cooperation projects. Selling U.S. defense products abroad not only permits the economic production of such products, while lowering the unit cost of items for U.S. forces, but will also enhance the national defense technology and industrial base. Similarly we can expect that our allies will be looking to foreign exports to solve their own industrial base problems. Since many foreign countries have policies inimical to competition, the Panel concluded that the Secretary should have the authority to coordinate defense cooperation with the buying and selling of products and services in order to negotiate effectively appropriate international agreements.

For these reasons, defense acquisition and trade policy will become more closely aligned in their import to DOD, as similarly the terms national and economic security have recently been recommended to become aligned in the national policy of the United States.<sup>41</sup>

#### 7.0.5. Overview of Chapter Recommendations

In addressing international acquisition law, the Panel set up an International Defense Acquisition Law Focus Group to aid in its deliberations.<sup>42</sup> Following extensive review of current practice and commentary on DOD issues and problems in international defense acquisition, the Focus Group prepared and presented a strawman draft consolidated chapter on defense trade and cooperation for the Panel's review. In brief, the Focus Group's Draft Chapter suggested consolidating the disparate statutes, from a collection of various titles in the U.S. Code, into a single new chapter in Title 10, including subsuming those sections of Title 22 dealing with Military Assistance and Foreign Military Sales.<sup>43</sup> The new chapter also includes those provisions presently contained in Chapter 138 of Title 10, addressing Cooperative Agreements with NATO Allies and Other Countries. The Focus Group suggested the creation of a Defense Trade and Cooperation Office within DOD to carry out defense trade and cooperation functions through a reorganized and renamed Defense Trade Assistance Agency.

Although the Panel recommends that a new Chapter in Title 10 on Defense Trade and Cooperation be established, time and resources did not permit consolidation into the draft presented here of those provisions in Title 22 concerning Military Assistance and Foreign Military Sales.<sup>44</sup> Given the importance of cooperative projects, foreign military sales, and technology

- § 2x22 *Offset policy; notification*. [Retain 10 U.S.C. § 2505]
- § 2x31 *Cooperative projects: allied countries*. [Amend and consolidate 10 U.S.C. §§ 2350a and 2350b]

---

<sup>45</sup>The Panel notes efforts begun in this area by The Atlantic Partnership, Study Proposal 1992-1993, Center for Strategic and International Studies, Washington, D.C.

- § 2x32 *Cooperative military airlift agreements: allied countries.* [Retain 10 U.S.C. § 2350c]
- § 2x33 *Cooperative logistic support agreements: NATO countries.* [Amend 10 U.S.C. § 2350d]
- § 2x34 *NATO AWACS project: authority of Secretary of Defense.* [Retain 10 U.S.C. § 2350e]

[Repeal 10 U.S.C. § 2350h, *Memorandums of Agreement: Department of Defense ombudsman for foreign signatories*; repeal 10 U.S.C. § 7344, *Suspension of construction in case of treaty*; no action 10 U.S.C. § 2061 through 2170, *Defense Production Act*].

### III

**Department of Defense international defense acquisition policies should be consistent with international operational agreements, allied logistics support and standardization, and export sales of defense items to foreign countries.**

#### SUBCHAPTER III. ACQUISITION, CROSS-SERVICING AGREEMENTS, AND STANDARDIZATION

- § 2x50 *Definitions.* [Consolidated subchapter definitions]
- § 2x51 *Authority to acquire logistic support, supplies, and services for elements of the armed forces deployed outside the United States.* [Retain 10 U.S.C. § 2341]
- § 2x52 *Cross-servicing agreements.* [Amend 10 U.S.C. § 2342]
- § 2x53 *Law applicable to acquisition and cross-servicing agreements.* [Amend 10 U.S.C. § 2343]
- § 2x54 *Methods of payment for acquisitions and transfers by the U.S.* [Retain 10 U.S.C. § 2344]
- § 2x55 *Liquidation of accrued credits and liabilities.* [Retain 10 U.S.C. § 2345]
- § 2x56 *Crediting of receipts* [Retain 10 U.S.C. § 2346]
- § 2x57 *Limitation on amounts that may be obligated or accrued by the United States.* [Amend 10 U.S.C. § 2347]
- § 2x58 *Inventories of supplies not to be increased.* [Retain 10 U.S.C. § 2348]
- § 2x59 *Procurement of communications support and related supplies and services.* [Amend 10 U.S.C. § 2350f]
- § 2x60 *Authority to accept use of direct payment, real property, services, and supplies from foreign countries in connection with mutual defense agreements and occupational arrangements.* [Amend 10 U.S.C. § 2350g]
- § 2x70 *Standardization of equipment with North Atlantic Treaty Organization members.* [Retain 10 U.S.C. § 2457]

[Repeal 22 U.S.C. § 2761(e), *Charges; reduction or waiver*; No action 22 U.S.C. § 2794(7), *Definitions; defense articles and defense services.*]1

## 7.1. Purchases of Foreign Goods by the Department of Defense

### 7.1.0. Introduction

Historically, the United States has given a preference to U.S. goods and services.<sup>1</sup> For many years, the statutory source of this preference has been the Buy American Act.<sup>2</sup> As implemented by Executive Orders<sup>3</sup> and the DOD balance of payments policy,<sup>4</sup> foreign source goods are excluded unless the price of equivalent U.S. goods exceeds the foreign price by 50% or more.<sup>5</sup> Today, however, the Buy American Act is frequently less relevant to defense acquisition because of:

- the proliferation of special purpose legislation applicable only to DOD which further restricts the acquisition of foreign source items for specific classes of products (e.g., busses, hand measuring tools);<sup>6</sup>
- memoranda of understanding and related international agreements between DOD and various nations which modify or eliminate Buy American restrictions;<sup>7</sup>
- the Trade Agreements Act of 1979,<sup>8</sup> and the Caribbean Basin Economic Recovery Act;<sup>9</sup> and
- implementation of other policies intended to protect the defense technology, industrial, and mobilization base.<sup>10</sup>

In addition, the application of the Buy American Act to specific goods and classes of goods can be arbitrary, unfathomable, and inconsistent with the purposes for which the Buy American Act was enacted.<sup>11</sup> Moreover, the rule-of-origin definition of a U.S. source product in

---

<sup>1</sup>Buy American restrictions have been traced back to 1844. See Gantt & Speck, Domestic v. Foreign Trade Problems in Federal Government Contracting: Buy American Act and Executive Order, 7 J. Pub. Law 378, 379 (1958).

<sup>2</sup>41 U.S.C. §§ 10a-10d.

<sup>3</sup>Current practice under the Buy American Act stems from the issuance of Exec. Order No. 10582 on December 17, 1957. That Executive Order has since been amended by Exec. Order Nos. 11051 (1962), 12148 (1979), and 12608 (1987).

<sup>4</sup>See generally DFARS subpart 25.3.

<sup>5</sup>FAR 25.105 and DFARS 225.105(1).

<sup>6</sup>E.g., 10 U.S.C. § 2507.

<sup>7</sup>See generally DFARS subpart 25.8. Countries with treaties or MOU's (21) include Belgium, Canada, Denmark, Egypt, Federal Republic of Germany, France, Greece, Israel, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey, and the United Kingdom. In addition, Australia, Sweden, and Switzerland enjoy special exemption from the Buy American Act and the balance of payments program. DFARS 225.872-1; and DOD Volume, Reciprocal Procurement Agreements, OUSDA/DDP-1992.

<sup>8</sup>19 U.S.C. §§ 2501 *et seq.*

<sup>9</sup>19 U.S.C. §§ 2701 *et seq.*

<sup>10</sup>DFARS subparts 208.72 and 225.71.

<sup>11</sup>See generally 2 Nash & Cibinic Report, No. 7, ¶ 39 (July 1988), commenting on *Orlite Engineering Co.*, B-229615, 88-1 CPD ¶ 300.

the Buy American Act (as implemented by Executive Order) is different from the definition in the Trade Agreements Act.<sup>12</sup>

#### 7.1.0.1. Product Preferences and Domestic Source Restrictions

Today, there is no coherent and consistent statutory approach to product preferences and source restrictions on defense acquisition. Chapter 148 of Title 10 currently contains some statutory guidance.<sup>13</sup> However, review of the DFARS Part 225 shows that a contracting officer, to determine applicable source restrictions, must look to at least the following disparate sources of law:

- Chapter 148, Title 10;
- The Trade Agreements Act, Title 19;
- The Buy American Act, Title 41;
- Military assistance and foreign military sales, Title 22;
- Various annual authorization and appropriations acts;
- International treaties; and
- Memoranda of understanding and related international agreements.

In addition, Congress has frequently added, but rarely subtracted, restrictions through the authorization and appropriation process, often with exceptions and conditions that are product unique and totally uncoordinated with similar exceptions in other statutes. As a result, a contracting officer must know not only the restrictions applicable to products like the product to be acquired, but must also determine whether a restriction is applicable to the specific appropriation to be used to fund the specific acquisition.

The Panel recommends that source restrictions applicable to DOD acquisition be restated in a comprehensive way. As the Secretary of Defense has found, the language of current source restrictions<sup>14</sup>

. . . is often confusing, causing administrative problems and difficulties in implementation. The wording of the restrictions does not follow a common format and rarely defines the product or industry precisely. Each restriction has distinct requirements,

---

<sup>12</sup>Under the Buy American Act and Exec. Order No. 10582, an article is considered a foreign end product if it is not produced in the United States, or if it is produced in the United States and 50 percent or more of the cost of its components originate from foreign sources. The Trade Agreements Act uses a "substantial transformation" method to determine country of origin. Under this approach, articles are considered the product of a particular country regardless of the cost of foreign components so long as those components are substantially transformed within that country into a new and different article of commerce with a name, character, or use distinct from that article form which it was transformed. *See generally* Office of Federal Procurement Policy, Report to Congress: Buy American Act—A Study of Alternatives to the Rule of Origin (December 1990).

<sup>13</sup>Chapter 148 was substantially modified by the Defense Authorization Act of 1993; with those sections concerning international agreements, offsets, and source restrictions were renumbered as §§ 2531-2534.

<sup>14</sup>Secretary of Defense, A Report to the United States Congress On The Impact of Buy American Restrictions Affecting Defense Procurement, Department of Defense (July 1989), at pg. 6.

exemptions, and waiver provisions and can be amended, extended, or terminated from year to year. . . . Many restrictions are rigid, being strong prohibitions against procuring from any foreign sources, with only limited exemptions or waiver provisions. In some cases, . . . restrictions are not waived for North Atlantic Treaty Organization (NATO) and other qualifying countries.

In addition, to the extent that the provisions permit waivers and exemptions, there is great disparity in the circumstances and procedures permitting waivers of a statutory prohibition on foreign sources.<sup>15</sup> Finally and most importantly, the Secretary has found that current restrictions do little to further the U.S. industrial base, but do much harm in delaying procurement actions, precluding DOD access to important new technologies, and generally raising the price DOD must pay for the goods and services it buys.<sup>16</sup>

The Panel further recommends that the restatement apply specifically to DOD and be placed in a new subchapter, itself part of a new, more general chapter in Title 10 on Defense Trade and Cooperation. A restatement applicable only to DOD is justified because the considerations applicable to source restrictions for defense products and services are unique from those applicable to most (perhaps all) civilian agencies.

#### **7.1.0.2. Restrictions on Foreign Contracting, Ownership, Control, and Influence**

The restrictions on foreign contracting, ownership, control, and influence are multidimensional. For example, in 10 U.S.C. § 2327, DOD may not contract with foreign entities owned or controlled by a foreign Government which supports international terrorism.<sup>17</sup> The restriction is implemented by FAR<sup>18</sup> and DFARS<sup>19</sup> regulations.

Section 5021 of the Omnibus Trade and Competitiveness Act of 1988 (as enacted, 50 U.S.C. App. 2170 (Exon-Florio Amendment)) entitles the President, in the interests of national security, to block or restructure a proposed merger, acquisition, or takeover of a U.S. company by a foreign entity.<sup>20</sup> The statute is premised on a procedure of voluntary notification in mergers, acquisitions, or takeovers involving prospective foreign ownership. Following passage of Exon-Florio, there have been several studies conducted by the General Accounting Office (GAO)

<sup>17</sup>For ownership or control of contractors or subcontractors by citizens or national of foreign countries with respect to construction services, see 10 U.S.C. § 10b-1.

<sup>18</sup>FAR Parts 209, 225, and 252.

<sup>19</sup>DFARS 209.104-1(g) and 225.000-71.

<sup>20</sup>See 31 C.F.R. Part 800; The Presidential review process entails: (1) the conduct of a confidential investigation by the Committee on Foreign Investment in the United States (CFIUS) [established by Exec. Order No. 11858]; (2) appropriate action by the President "to suspend or prohibit any acquisition, merger, or takeover;" (3) supported by findings based on "credible evidence" that "the foreign interest exercising control might take action that threatens to impair the national security" and that no other provision of law can adequately address the situation; and (4) after considering various enumerated factors relating to domestic industrial production.

concerning Federal data collection on foreign investment in the U.S.,<sup>21</sup> and the extent of foreign participation in the Strategic Defense Initiative Program.<sup>22</sup>

Testimony in 1990 concerning the implementation of Exon-Florio, however, revealed:<sup>23</sup>

... At the present time, notifications are coming in to CFIUS at the rate of 350 a year. Some 350 filings annually would represent, we estimate, around 50 percent of annual acquisitions valued at more than \$1 million. This is a fairly large proportion, though perhaps not inappropriately so in view of the interplay and dynamics of technology, the economy and defense.

To date, CFIUS has gone to the investigation stage seven times. In two of those cases, notification was withdrawn with CFIUS permission and one investigation is in progress. Four cases have reached the President's desk for decision. In only one of those cases has the President exercised his statutory authority to prohibit a foreign acquisition . . . .<sup>24</sup>

Related GAO testimony at the time, from the defense industrial security perspective,<sup>25</sup> highlighted procedural weaknesses in the practice of granting Special Security Agreements (SSAs).<sup>26</sup> These agreements were initiated in 1984 to permit U.S. firms that are foreign owned, controlled, or influenced (FOCI) to continue to work on classified defense contracts.<sup>27</sup> Under DOD policy, SSAs are limited to contracts whose classification level does not exceed the Secret level, provided the FOCI emanates from a country with which the U.S. has a bilateral industrial security arrangement.

<sup>24</sup>Divestment order of the China National Aero-Technology Import and Export Company's (CATIC) acquisition of MAMCO Manufacturing, Inc. (MAMCO), a U.S. company - February 1990.

<sup>25</sup>See Exec. Order No. 10865, 32 C.F.R. Part 155, and DOD Directive 5200 2-R.

<sup>26</sup>Statement for the Record, National Security and International Affairs Division, GAO, for the Committee on the Armed Services, House of Representatives, March 21, 1990. The procedural weaknesses noted included: (1) interim security arrangements prior to a formal SSA were deficient in that new contracts were awarded during the period and the period itself was extending up to a year or more; (2) incomplete or inadequate supporting justifications, pursuant to the Services implementing regulations, citing need for a product or service that is mission-critical, cannot be obtained in sufficient quantity from U.S.-owned sources, and involved a unique product or technology; (3) inadequate determinations that the risks of FOCI can be negated or reduced to an acceptable level; and (4) that DOD policies requiring outside directors of the FOCI firm to be DOD watchdogs were inadequately documented in practice.

<sup>27</sup>*Id.*, at pg. 1, it was noted that "In practice, under an SSA, the foreign firm is permitted to retain a minority position on the U.S. firm's board of directors."

Most recently, however, a major CFIUS investigation resulted in the withdrawal of a proposed sale of a U.S. firm to a foreign Government-owned firm. The proposed sale of the missiles division of the LTV Aerospace and Defense Company to the Thomson-CSF firm, which is 58% owned by the French Government, would have involved access to highly classified or "proscribed information."<sup>28</sup> The specter of a potentially blocked sale raised much international concern that was assuaged only by the voluntary withdrawal by Thomson-CSF from the proposed purchase.

Based on the LTV-Thomson scenario, and on the studies and testimony discussed above, the Defense Authorization Act of 1993 enacted new provisions to address this type of foreign investment.<sup>29</sup> Two of the provisions focus on entities controlled by foreign Governments and specifically prohibit: (1) the purchase, by an entity controlled by a foreign Government, of certain U.S. defense contractors that perform DOD or Department of Energy (DOE) national security contracts requiring access to proscribed information; and (2) the award of certain DOD/DOE national security contracts to an entity controlled by a foreign Government. The third provision directs DOD/DOE to develop a database helpful to CFIUS under section 721 of the Defense Production Act.

In comments to the Panel, the Navy expressed support for the new provisions because they strengthened the overall Exon-Florio regime and will provide CFIUS a more structured framework. The remaining deficiency in the process was cited as:

. . . the definition of a "control" transaction in Exon-Florio remains flawed (from a DOD perspective) since it permits far too many [true corporate] "control" transactions to proceed forward without scrutiny.<sup>30</sup>

While taking no position on the matter, the Panel hopes that further study will be done by others more experienced in matters concerning foreign contracting, ownership, control, and influence to develop a comprehensive regime that ensures coordination of policy on foreign control over U.S. defense contractors with defense trade and cooperation, since the multinational buying and selling of key defense industries can trump the best laid plans to create a reciprocal defense trading regime.

### **7.1.0.3. Overview of Subchapter Recommendations**

The remainder of this subchapter (Chapter 7.1.1. and following) discuss each codified section of law which relates to domestic source restrictions applicable to DOD procurement contracts, and gives the Panel's recommendations on both amendment and recodification. A draft

---

<sup>28</sup>Characterized by the DOD Acting General Counsel in Congressional testimony as "sensitive enough to generally prohibit foreign nationals and representatives of the foreign interest from having access to it". See S. Rep. No. 3114 at pg. 234.

<sup>29</sup>Pub. L. No. 102-484, §§ 835-8, 106 Stat. 2442.

<sup>30</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated 11 October 1992.

of the proposed subchapter on domestic source restrictions within the proposed Chapter on Defense Trade and Cooperation -- which sets out the law as amended and recodified -- can be found in subchapter 7.4. below. In addition, a discussion of product restrictions prevalent in defense appropriation and authorization acts over the past decade can be found in Appendix C of this Report. To the extent that such provisions have been codified, they are discussed below; the Panel has recommended that none of these provisions be retained except to the extent they have been codified. This section of the Report concludes with a section-by-section discussion of the proposed new subchapter, which highlights the source of each proposed section and summarizes amendments that have been made to existing laws.

#### **7.1.0.4. Section-by-Section Discussion**

##### **Section 2x10. Definitions**

This section prescribes a uniform set of definitions for use in describing source restrictions. The definitions in this section are taken from 10 U.S.C. § 2506 and 41 U.S.C. § 10c, with modifications. The most important modification is the definition of "American Goods." In the proposed subchapter, "American goods" are defined as:

- an end product that is wholly mined, produced, or manufactured in the United States; or
- an end product that is manufactured in the United States which includes components mined, produced, or manufactured outside the United States if such end product is substantially transformed within the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed.

This definition is taken from the Buy American Act, but has been modified to introduce the concept of substantial transformation, which is the test for country of origin found in the Trade Agreements Act.<sup>31</sup>

The Panel believes that the substantial transformation test is a more rational test to apply than the components test used under the Buy American Act -- at the very least, substantial transformation is capable of being verified without audit -- and for that reason alone, will streamline and unify the acquisition considerations applicable to foreign source products. Given the substantial "gaming" that is permitted by the current components test<sup>32</sup> and the extensive

---

<sup>31</sup>19 U.S.C. § 2518(b): "Rule of Origin.—An article is a product of a country or instrumentality only if (i) it is wholly the growth, product, or manufacture of that country or instrumentality, or (ii) in the case of an article which consists in whole or in part of materials from another country or instrumentality, it has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed."

<sup>32</sup>Under the Buy American Act and implementing Executive Orders, an end item is domestic if it meets the following three tests: (1) the process of manufacturing the end product must occur in the United States; (2) over 50% of the cost of components must be incurred for components manufactured in the United States; and (3) to constitute a domestic component, the process of manufacturing of the component must occur in the United States

DOD exemptions to the Buy American Act,<sup>33</sup> there is no reason to believe that abandonment of the components test will lower the average United States labor content of articles purchased by DOD. In addition, the substantial transformation test can probably be met by U.S. source commercial items (as defined in proposed 10 U.S.C. § 2302) whereas the component test has required significant changes in manufacturing or subcontracting methods, and thereby creates a potential barrier to civil-military integration.

A second important definition is that of "covered contract." The subchapter defines this term as:

a contract for property, other than real property and commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2, the total value of which exceeds the simplified acquisition threshold set out at 10 U.S.C. § 2302(4).<sup>34</sup>

In recommending a separate statute on commercial items, the Panel considered the effect of the integration of commercial items with defense trade and cooperation. The recommendation of the Panel was to subject the defense acquisition of commercial items to defense trade provisions, for to do otherwise would defeat the exercise of balancing defense trade and cooperation with the need to preserve a national defense technology and industrial base. Similarly, the treatment afforded the acquisition of commercial items in the recommended separate statute is cross-referenced in this Chapter. The function of this definition is intended to exempt simplified acquisition, commercial items, and commercial components from domestic product preferences and source restrictions.

### **Section 2x11. Policy on Purchases of Foreign Goods**

This section is taken from 10 U.S.C. § 2506, which states the factors to be considered in determining whether to purchase foreign source items. The current provisions of section 2506 are incomplete because national security, technology, industrial, and mobilization base considerations are left out. In addition, section 2506 fails to account for treaties and other international agreements. Paragraphs (a)(7), (a)(8), and (a)(9) have been added by the Panel to address these omissions. Comment from the Section of Public Contract Law of the American Bar Association indicated that:

The Section supports the Panel's proposed language in sections 2x11 and 2x12 of the draft text. We encourage the elimination of

---

but the component's components can come from anywhere. Thus, if 95% of the labor in components is United States labor, but the item is assembled in Mexico, the item does not qualify as a domestic end item under the Act. On the other hand, if the end item is manufactured in the United States from components assembled in the United States from 100% foreign sub-components, then the item qualifies as domestic. As these examples show, the amount of United States labor in a conforming end item may actually be less than in some non conforming end items. *See generally* 2 Nash & Cibinic Report, note 11, *supra*.

<sup>33</sup>Note 14, *supra*.

<sup>34</sup>The reference is to 10 U.S.C. § 2302, as modified by the Panel, and to new section 2xx2. *See* Chapters 1, 4, and 8 of this Report.

unnecessary buy-national requirements provided that the Secretary of Defense retains the authority to limit procurement of specific goods or services to domestic sources if he determines it would be in the national interest to do so.<sup>35</sup>

After considering the Buy American Act, domestic source restrictions, and product preferences, the Panel recognized the need for coordination with the defense technology and industrial base in its recommended paragraph (a)(7). The Panel also notes that the present day reality of a defense technology and industrial base involves a North American defense industrial base. As stated in the Defense Authorization Act of 1993, the national defense technology and industrial base is now defined as encompassing the United States and Canada.<sup>36</sup> For too long, DOD has wrestled with establishing a policy on the purchase of Canadian products as foreign goods, while concurrently seeking to preserve and enhance the North American defense industrial base. Hopefully, the proposed language will assist in rationalizing the policy toward Canadian goods.

Equally important in the international acquisition policy arena is the recommended addition of paragraph (a)(8). This paragraph requires DOD to coordinate, not only with obligations contained in international treaties and agreements, but also with the acquisition activities of our major allies, and reinforces the efforts currently underway to make international defense trade more visible, transparent, and reciprocal.<sup>37</sup> The Panel believes that linking the two policies in (a)(7) and (a)(8) within section 2x11 will enable DOD to jointly address the inter-relationship between defense trade and the national defense technology and industrial base as an international defense acquisition issue.

The addition of paragraph (a)(9) requires the Secretary of Defense to address national security concerns in purchasing foreign goods. With the addition of this subparagraph, the Panel recommends repeal of 10 U.S.C. § 2327 as duplicative and unnecessarily restrictive in focusing only on considerations of ownership by countries supporting terrorist activities.<sup>38</sup> Again, broad new provisions enacted by the Defense Authorization Act of 1993 mandate a national security reporting threshold of \$500,000 in the award of defense contracts to foreign owned and controlled companies, as well as prohibitions on the purchase of certain U.S. defense contractors by, or the award of national security contracts to, entities controlled by a foreign Government.<sup>39</sup> Section (a)(9) is intended to provide DOD with the broad authority to protect national security through source restrictions including those based on foreign control of U.S. sources (as well as purchases from foreign sources).

---

<sup>37</sup>See the discussion at section 7.2.0.1., *NATO Code of Conduct in Defense Trade*.

<sup>38</sup>See also note 30, *supra*.

<sup>39</sup>Pub. L. No. 102-484, §§ 835-8, 106 Stat. 2442.

The amended section also contains a new subsection (b) which replaces the existing reference to the Buy American Act with a reference to the new subchapter. The amended definition in subsection (c) is recommended for consolidation in new section 2x10, *Definitions*.

### **Section 2x12. Items Restricted to American Sources**

The Buy American Act has not been an impenetrable barrier to the acquisition of foreign source items since the Eisenhower Administration. There are, however, numerous absolute or nearly absolute prohibitions on the purchase of specific items from foreign sources. Some, but by no means all, of the absolute prohibitions are found in the current version of 10 U.S.C. § 2507. However, the important authority of the Secretary of Defense to restrict purchases to domestic sources to protect the defense technology and industrial base and further national security is nowhere expressly stated in the United States Code, but is found only by inference from exceptions to other than competitive procedures found in 10 U.S.C. §§ 2304(c)(3), (4), and (6).

The Panel recommends that the authority of the Secretary to restrict procurements to domestic sources be expressly granted by statute, and language enacting that regulation is found in subsection 2x12(a). In addition, the prohibition on the purchase of goods from countries that are in violation of the Agreement on Government Procurement, or which otherwise discriminate against U.S. products, currently found in 41 U.S.C. § 10b-1, is incorporated into subsection 2x12(b) with two exceptions: (1) commercial items and components are permitted to be acquired from any source; and (2) the restrictions in section 10b-1 are not applicable to contracts made under simplified acquisition procedures.<sup>40</sup> The Panel believes that these exceptions facilitate the acquisition of commercial products and ancillary commercial services while removing regulatory hurdles from -- and hence reduce the cost of -- the award of smaller contracts. The commercial item exception can be redressed in the overall GATT trade dispute settlement regime in any case; and as for the exception for simplified acquisition procedures, the Panel recommended \$100,000 threshold is still below the present GATT threshold of general applicability.

Finally, other than the recommended deletion of the expired restriction on carbonyl iron powders found in subsection (f), provisions for absolute restrictions currently found in 10 U.S.C. § 2507 were retained as subsections in section 2x12. In section 2x12, the existing statutory restriction on the transfer of large-caliber cannon technology presently found in 10 U.S.C. § 4542 and the restriction on construction or repair of vessels in foreign shipyards contained in 10 U.S.C. § 7309 were consolidated with the current statutory restrictions of 10 U.S.C. § 2507(a) through (e). The Panel recommended that the many other restrictions contained in annual authorization and appropriation acts, be repealed. As succinctly stated in the 1989 Secretary of Defense Report to Congress on the impact of domestic source restrictions:

... there are currently underway or in development many programs initiated by the Congress, DOD, the Services, other executive branch agencies, and U.S. industry to bolster the competitiveness of the U.S. industrial base. Now is the time to integrate and rationalize such initiatives into an overall strategy, rather than

---

<sup>40</sup>See discussion at Chapters 4 and 8.

proliferate new initiatives and continue old ones that have outlived their usefulness or proven counterproductive.

For all of these reasons, we therefore recommend a careful phasing out of most ad hoc buy American restrictions that have been enacted in annual DOD appropriations and authorization acts.<sup>41</sup>

Subsection 2x12(h) contains the Stratton Amendment, found in 10 U.S.C. § 4542, which prohibits the transfer of technical data packages for large-caliber cannon to foreign countries. As there are exceptions to the transfer prohibition, where coproduction or cooperative project agreements are in place, comment from the U.S. Army indicated that the provision was recommended for retention.<sup>42</sup> Other than amending the provision to be consistent with section 2x31 on cooperative project agreements, the provision was retained and consolidated in this section. Subsection 2x12(i) retains and consolidates the present restriction on the construction or repair of vessels in foreign shipyards contained in 10 U.S.C. § 7309.

Other than these two restrictions and those found in 10 U.S.C. § 2507, the Panel recommends that reliance for establishing domestic source restrictions and product preferences to protect the national defense technology and industrial base should reside, instead, within the primary authority of the Secretary of Defense.

#### **Section 2x13. Application of the Trade Agreements Act of 1979**

Subsection (a) of this section clarifies the relationship of the Trade Agreements Act of 1979, 19 U.S.C. §§ 2501 *et seq.*, to both the absolute restrictions stated in section 2x12, and to the Buy American Act, as that Act is restated for purposes of Title 10 in section 2x14.

Subsection (b) resolves a problem with spare parts acquisition under current law. The Trade Agreements Act permits the purchase of manufactured goods from designated countries which are made from components which may be foreign both to the country of origin and the United States. For example, a Japanese company may build a computer printer in Japan using components from Taiwan. Under the Act, the Japanese printer can be purchased as though it were a domestic item. However, spare parts for the printer, when bought separately from Taiwan, do not qualify for exemption from the Trade Agreements Act and may not qualify for regulatory exemption from the Buy American Act. The Council of Defense and Space Industry Associations commented on this problem as follows:

To impose "Buy American" requirements on the acquisition of spare parts when the original system was exempted from such requirements (whatever the reason) makes no economic sense and subjects the supplier to senseless hardship. Although DFARS

---

<sup>41</sup>Note 14, *supra*.

<sup>42</sup>Memorandum from Larry D. Anderson, LTC, JAGC, Legal Officer, U.S. Army Materiel Command, to William E. Mounis, DSMC CM-AL, dated 21 September 1992.

225.102(b)(iii)(B) contains a spare parts exception to "Buy American [Act]" for DOD procurements, the exception should be included in the statute in order to extend it to all federal procurements and to preserve this exception from regulatory changes. Also, to further Congress' current initiatives to remove barriers to the integration of the commercial and defense industrial bases, the exception should cover spare parts for commercial items.<sup>43</sup>

The Panel notes that there is currently no statutory or regulatory coverage exempting spare parts purchases from the Trade Agreements Act, although there must be such coverage if DOD's needs for spare and replacement parts are to be met. Given the proposed amendment of the Buy American Act to incorporate a substantial transformation test, the Panel believes there is no further need to treat spare parts for commercial items as a separate class, since spares for such items can be purchased under the spare parts exemptions provided by the Panel in sections 2x13 and 2x14.

#### **Section 2x14. Preference for American Goods**

This section implements the Buy American Act within Title 10. Since the term "American good" is defined in section 2x10, the language of 41 U.S.C. §§ 10a and 10b can be greatly simplified. Paragraphs 2x14(a)(1) and (a)(2) implement current exemptions from the provisions of the Buy American Act. The exemption set out in paragraph 2x14(a)(3) is a spare and replacement parts exemption similar to that found in subsection 2x13(b).

The proposed section also repeals the debarment provisions found in 41 U.S.C. § 10b(b) which provides for blacklisting Government contractors violating Buy American restrictions. These provisions, while seemingly absolute, have been interpreted to apply only where there is a knowing and willful violation of the Buy American Act.<sup>44</sup> Since regulatory suspension and debarment procedures are also triggered by a knowing and willful breach of contract, or a false representation,<sup>45</sup> there is no need to retain a stand-alone, statutory procedure.

#### **Section 2x15. Determination of Unreasonable Cost**

This section implements in statute the "unreasonable cost" concepts currently found in Executive Orders implementing the Buy American Act and in the FAR. The Panel has created a section setting forth these standards so that, for any future statutory source restrictions, this section can be used in place of ad hoc prohibitions or descriptions of unreasonable price.

Gen. 599 (1960) (debarment requires knowing violation of Act); *Harold P. Danz*, 42 Comp. Gen. 401 (1963) (debarment appropriate only where there is "some degree of culpability . . . , and not in cases of bona fide misunderstanding or inadvertence").

<sup>45</sup>FAR 9.406-2, 9.407-2.

**Repeal 10 U.S.C. § 2327. Contracts: Consideration of National Security Objectives**

The Panel has established a requirement for considering national security in its recommended new paragraph 2x11(a)(9), discussed above, which provides that national security objectives be considered in the award of DOD contracts for the purchase of foreign goods. The Panel recommends that new paragraph 2x11(a)(9), as supplemented by the provisions of the Defense Authorization Act of 1993 previously discussed, makes section 2327 redundant.

## **7.1.1. 41 U.S.C. §§ 10a through 10d; miscellaneous Public Laws**

### **Buy American Act Domestic Source Restrictions Domestic Product Preferences**

#### **7.1.1.1. Summary of the Law**

Sections 10a to 10d of Title 41 (The Buy American Act of 1933) implement a policy preference for goods produced or manufactured in the United States by affecting access of foreign made goods to the U.S. Government procurement market. The Act requires that domestic end products be procured for public use except where: (a) inconsistent with the public interest; (b) the cost is unreasonable; (c) they are procured for use outside the United States; or (d) they are not commercially available in the required quantity or quality within the United States.<sup>1</sup> The Act specifically applies to supplies and materials used in contracts for public works.<sup>2</sup>

To qualify as a domestic end product, under Executive Order, an unmanufactured product must have been mined or produced in the United States; or in the case of a manufactured product, the cost of its qualifying country and U.S. components must exceed 50 percent of the cost of all its components.<sup>3</sup> By adding a price differential to foreign product offers, the Act's provisions do not exclude such goods from the U.S. Government procurement market; but rather, only affect the evaluation of such goods in comparison to domestic end products.<sup>4</sup>

Over the years, various Defense Authorization and Appropriation Acts have placed "buy American" restrictions in Government procurement of specific products, effectively precluding some foreign sources.<sup>5</sup> Under delegated authority from the President, DOD imposes similar restrictions on certain items of defense equipment for mobilization purposes and to bolster the defense industrial base. As Canada participates with the United States in a North American Defense Industrial Preparedness Program, those restrictions are not applicable to Canada.<sup>6</sup>

#### **7.1.1.2. Background of the Law**

The Buy American Act was enacted during a period of economic depression and isolationism and was preceded by the Smoot-Hawley Tariff Act of 1930, which raised tariffs to the highest rates in U.S. history. The socioeconomic objective behind both statutes was a desire to increase domestic employment and to raise the incomes of U.S. manufacturers by encouraging

<sup>5</sup>DFARS subpart 225.70; and note 20 *infra*.

<sup>6</sup>DFARS subpart 225.71.

the use of domestic goods.<sup>7</sup> Other than an amendment exempting certain functions under the Foreign Assistance Act of 1961,<sup>8</sup> the Buy American Act has remained the standard-bearer for domestic preference legislation.

In the 1960s, however, under the aegis of "Buy American," DOD further strengthened domestic source preferences by placing a 50 percent balance of payments price differential on foreign goods.<sup>9</sup> Although established as an interim measure to stem the outflow of gold from the United States, the initiative has since provided the genesis for the DOD Balance of Payments Program.<sup>10</sup> Originally intended to apply only to those products procured by the United States for use outside the country, the price differential has since expanded to include the procurement of all foreign goods which result in dollars being expended abroad.

With the enactment of the Trade Agreements Act of 1979 (TAA), the President was permitted to waive Buy American Act provisions for certain designated countries based on adherence to the General Agreement on Tariffs and Trade (GATT) Agreement on Government Procurement.<sup>11</sup> The Agreement permits signatory countries to compete for U.S. Government procurement of eligible products without regard to Buy American Act provisions above a specified dollar threshold as set by the United States Trade Representative (USTR). Eligible products,<sup>12</sup> as well as Government agencies within each country covered by the TAA,<sup>13</sup> are set forth in Annexes to the TAA. Purchases under small business and socially disadvantaged business preference programs are exempt from TAA application.

The Buy American Act of 1988, part of the Omnibus Trade and Competitiveness Act of 1988,<sup>14</sup> now restricts the use of Presidential waiver authority in the procurement of goods or services of foreign origin under the TAA, specifically where: (a) a designated country is not in good standing under the Agreement; (b) a designated country maintains a significant and persistent pattern or practice of discrimination against U.S. products resulting in identifiable harm to U.S. businesses; or (c) procuring the services of any contractor or subcontractor from countries identified under (a) and (b).<sup>15</sup>

### 7.1.1.3. Law in Practice

The Buy American Act provides for a price differential of either 6 or 12 percent to be applied to foreign source products. In contrast, DOD places a price differential of 50 percent on

<sup>12</sup>DFARS 225.403-70.

<sup>13</sup>FAR 25.406.

<sup>14</sup>Pub. L. No. 100-418, 102 Stat. 1545.

<sup>15</sup>41 U.S.C. § 10b-1.

such goods.<sup>16</sup> Years of practice under the Buy American Act has resulted in repeated requests for authorized waivers to the price differential. For example, blanket waivers of Buy American are in place under reciprocal procurement memoranda of understanding designed to promote the concept of cooperation in NATO and allied defense procurement.<sup>17</sup> Although the Buy American Act excludes from its application the procurement of products for use outside the United States, DOD's Balance of Payments Program applies a price differential to all procurement of foreign supplies and services resulting in dollar expenditures outside the United States. As reported to Congress by the Secretary of Defense:

In order to maintain consistency in the application of its Balance of Payments program differential, DOD applies the Act differently by covering all purchases, even those for use outside the United States, rarely using the statutory exemption for such procurement. Thus, while implementation of the Buy American Act does not necessarily result in an outright prohibition on acquisition of foreign products, foreign sources (especially in non-designated countries) are often placed at a major competitive disadvantage, both at the prime contract level and as suppliers of components.<sup>18</sup>

Since the advent of the TAA, DOD's implementation of the Act has placed some domestically manufactured products at a competitive disadvantage under TAA rules of origin in the qualification of a product as a domestic end product. The TAA test is one of "substantial transformation," versus the Buy American Act's test of "50 percent of component cost," creating the anomaly of a U.S. domestic manufactured product being competitively disadvantaged under the latter application.<sup>19</sup>

The practice of legislating domestic source restrictions on Government procurement of designated products through annual Defense Authorization and Appropriations Acts, under the auspices of the Buy American Act, has over the years encompassed many different sectors and classes of products, such as: transportation by ocean vessels and by air carriers; food, clothing, fabrics, specialty metals, and hand or measuring tools; construction of major components of the hull and superstructure of naval vessels, and repair and maintenance of naval vessels; circuit breakers for naval vessels; multipassenger motor vehicles (buses) and administrative motor vehicles; R&D contracting; aircraft ejection seats and night vision devices; transfer of large-caliber cannon production technology; coal or coke; floating storage of petroleum; 120mm mortars and ammunition; Strategic Defense Initiative contracts; valves and machine tools, anchor and mooring chain; certain chemical weapons antidote; supercomputers; sonobuoys; ball bearings and roller bearings; and PAN carbon fibers. Furthermore, under authority of the National Security Act of

<sup>18</sup>Note 7, *supra*.

<sup>19</sup>Office of Federal Procurement Policy, Buy American Act: A Study of Alternatives to the Rule of Origin, Report to Congress (Dec. 1990).

1947<sup>20</sup> and the Defense Production Act of 1950,<sup>21</sup> the Secretary of Defense and the Services have placed similar restrictions on other sectors and classes of products.<sup>22</sup>

In response to a request in the 1989 Defense Authorization Act for a report on the impact of statutory Buy American restrictions affecting defense procurement, the Secretary of Defense formulated specific Buy American Act recommendations including: (a) abolish most Congressionally mandated restrictions; (b) avoid future use of Buy American restrictions; and (c) rely on the authority of the Office of Secretary of Defense.<sup>23</sup> However, as well as renewing previous Buy American source restrictions, legislation enacted since the DOD Report has continued the practice of placing new Buy American source restrictions on government procurement.<sup>24</sup>

#### 7.1.1.4. Recommendations and Justification

As stated above, the Panel's primary recommendation is that statutory domestic source restrictions applicable to DOD acquisition be reduced and restated in a more comprehensive way. To the extent that the provisions permit waiver and exemptions, there is great disparity in the circumstances permitting such waivers and the procedures for waiving a statutory prohibition on foreign sources.<sup>25</sup> Finally, the Secretary has found that the current restrictions do little to further the U.S. industrial base, but do much harm in delaying procurement actions, precluding DOD access to important new technologies, and generally raising the price DOD must pay for the goods and services it buys.<sup>26</sup> The Panel further recommends that the restatement apply specifically to DOD and be in a new subchapter of Title 10 as part of a more general chapter on Defense Trade and Cooperation. A subchapter applicable only to DOD is justified because the considerations applicable to source restrictions for defense products and services are different from those applicable to most (perhaps all) civilian agencies.

The text of the Panel's primary recommendation can be found in subchapter 7.4, which distributes portions of the Buy American Act into proposed sections 2x10 through 2x15, which also adds defense technology and industrial base and national security issues into the establishment of domestic source restrictions. If this consolidation were not done, then the following changes would need to be made to the Buy American Act itself:

**Amend section 10a and subsection 10b(a) by striking the phrase "substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States," and inserting the phrase "or substantially**

---

<sup>20</sup>50 U.S.C. § 404.

<sup>21</sup>50 U.S.C. App. 2061 *et seq.*

<sup>22</sup>DFARS Part 208.

<sup>23</sup>Note 12, *supra*, at 12-3.

<sup>24</sup>See Pub. L. No. 102-702, section 8027A, concerning contractor participation in the secondary Arab boycott of Israel; and the 1993 Defense Authorization Act, section 813, concerning procurement limitations on fuel cells.

<sup>25</sup>Note 7, *supra*.

<sup>26</sup>*Id.*, at pgs. 7-10.

**transformed" between the word "manufactured" and the phrase "in the United States."**

This change is necessary to conform the Buy American Act rule of origin determination to that in the TAA. Under the authority of the TAA and within its threshold, the United States designates those countries which provide reciprocity to U.S. producers in accordance with the requirements of the TAA, and for which domestic preference of the Buy American Act is waived. The TAA rule of origin requires a test of "substantial transformation" to determine the eligibility of foreign qualifying products. However, because the TAA does not modify the definition of "domestic end product" as contained in the Buy American Act, commercial products which are manufactured in the United States are being placed at a competitive disadvantage to certain foreign source products.<sup>27</sup>

The proposed amendment echoes the intent of the Office of Federal Procurement Policy's "Buy American Act Amendment of 1992" and Report by eliminating the application of the Buy American Act "50 percent component cost" rule in defining a domestic end product.

**Amend section 10b by deleting subsection (b); striking the phrase "blacklisting contractors violating requirements" in the section heading; and deleting subsection heading (a).**

The Panel recommends repeal of the debarment provisions found in subsection 10b(b). These provisions, while seemingly absolute, have been interpreted to apply only where there is a knowing and willful violation of the Buy American Act.<sup>28</sup> Since regulatory suspension and debarment procedures are also triggered by a knowing and willful breach of contract, or a false representation,<sup>29</sup> there is no need for a statutory procedure.<sup>30</sup>

**Amend section 10c by adding subsection "(d) The term 'substantially transformed' has the meaning given such term by section 2518(4)(B) of Title 19."**

---

<sup>27</sup>Office of Federal Procurement Policy, Statement in Explanation of The Buy American Act Amendment of 1992 (Proposed).

<sup>28</sup>See *Administrator, Veterans Administration*, 36 Comp. Gen. 718 (1957) (debarment requires "bad faith" use of foreign materials); *Secretary of the Army*, 39 Comp. Gen. 599 (1960) (debarment requires knowing violation of Act); *Harold P. Danz*, 42 Comp. Gen. 401 (1963) (debarment appropriate only where there is "some degree of culpability . . . , and not in cases of bona fide misunderstanding or inadvertence").

<sup>29</sup>FAR 9.406-2, 9.407-2.

<sup>30</sup>Note also the recently enacted 10 U.S.C. § 2410f, Debarment of persons convicted of fraudulent use of 'Made in America' labels, providing that:(a) If the Secretary of Defense determines that a person has been convicted of intentionally affixing a label bearing a 'Made in America' inscription to any product sold in or shipped to the United States that is not made in America, the Secretary shall determine, not later than 90 days after determining that the person has been so convicted, whether the person should be debarred from contracting with the Department of Defense. If the Secretary determines that the person should not be debarred, the Secretary shall submit to Congress a report on such determination not later than 30 days after the determination is made. (b) For purposes of this section, the term 'debar' has the meaning given that term by section 2393(c) of this title.

[Pub. L. No. 102-484, §834, 106 Stat. 2442.]

This amendment completes the first amendment stated above by adding a cross reference to the definition of "substantially transformed" in the TAA.

**Retain the following Congressionally mandated domestic source restrictions:**

- **Repair and Maintenance of Naval Vessels [Pub. L. No. 101-511, § 8043].**
- **Sonobuoys [Pub. L. No. 102-484, § 833].**

Consistent with Chapter 7.1.5, below, the consolidated subchapter on source restrictions codifies a number of provision which currently appear only in public laws.<sup>31</sup> The Panel recommended retention of the above restrictions because they were created or amended by Congress in the Defense Authorization Act for FY93 and appear to strike a balance among cost considerations, preservation of the defense industrial base, and the maintenance of operational flexibility.

**Repeal the following Congressionally mandated domestic source restrictions and product preferences:**

- **Jewel Bearings [Pub. L. No. 90-469 and 101-511, § 8121];**
- **Food, Clothing, Fabrics, Specialty Metals, and Hand or Measuring Tools [Pub. L. No. 97-377, § 723];**
- **Night Vision Devices [Pub. L. No. 101-511, § 8054];**
- **Floating Storage of Petroleum [Pub. L. No. 101-511, § 8020];**
- **Anchor and Mooring Chain [Pub. L. No. 100-202, § 8125, 101-165, § 9051, and 101-511, § 8041];**
- **PAN Carbon Fibers [Pub. L. No. 101-511, § 8048].**

Consistent with Chapter 7.1.5, below, the Panel recommended repeal of the above domestic source restrictions and product preferences enacted in annual authorization and appropriation acts as necessary to reinforce the United States' commitment to unrestrained global trade; unless Congress specifically enacts such restrictions or preferences in support of the national defense technology and industrial base by amending new section 2x12, *Items Restricted to American Sources*, in the recommended new chapter on Defense Trade and Cooperation in Title 10.

#### **Additional Streamlining Amendments**

**In subparagraph 10b-1(g)(2)(A) strike the phrase "after conducting one or more public hearings at which interested parties may present comments. Sections 556 and 557 of title 5,**

---

<sup>31</sup>The Panel has not codified the recent restriction on purchases of ball bearings and roller bearings contained in Pub. L. No. 102-484, § 832, 106 Stat. 2442. This provision is already in the DFARS and expires at the end of FY95.

**United States Code, shall not apply to the conduct of any such hearing."**

**In subparagraph 10b-1(g)(2)(B), after the words "and rules that" strike the phrase ", to the extent the Administrator considers appropriate and consistent with the applicability of such policy guidance to all services (other than construction services), is" and replace with the word "are."**

**Strike subparagraph 10b-1(g)(2)(C) in its entirety.**

**Strike subsection 10b-2(b) in its entirety, renumbering subsection (c) to "(b)."**

The above streamlining amendments reflect the deletion of statutory references to mandated Office of Federal Procurement Policy and Secretary of Defense Reports already completed and delivered, or due for delivery at the conclusion of this Panel's Report, to Congress.

#### **7.1.1.5. Relationship to Objectives**

Amendment of 41 U.S.C. §§ 10a through 10d, as recommended, would establish a balance between an efficient process, full and open access to the procurement system in international defense trade, while contemporaneously ensuring that the development and preservation of the national defense technology and industrial base is not inhibited.

#### **7.1.1.6. Proposed Statutes**

##### **Section 10a. American Materials Required For Public Use**

Notwithstanding any other provision of law, and unless the head of the Federal agency concerned shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured or substantially transformed in the United States ~~substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States,~~ shall be acquired for public use. This section shall not apply with respect to articles, materials, or supplies for use outside the United States, or of the articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they were manufactured are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

**Section 10b. Contracts for public works; specification for use of American materials; ~~blacklisting contractors violating requirements~~**

(a) Every contract for the construction, alteration, or repair of any public building or public work in the United States growing out of an appropriation heretofore made or hereafter to be made shall contain a provision that in the performance of the work of the contractor, subcontractors, material men, or suppliers, shall use only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured or substantially transformed in the United States ~~substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States~~ except as provided in section 10a of this title: *Provided, however,* that if the head of the Federal agency making the contract shall find that in respect to some particular articles, materials, or supplies it is impracticable to make such requirement or that it would unreasonably increase the cost, an exception shall be noted in the specifications as that particular article, material, or supply, and a public record made of the findings which justified the exception.

~~(b) If the head of a Federal Agency which has made any contract containing the provision required by subsection (a) of this section finds that in the performance of such contract there has been a failure to comply with such provisions, he shall make public his findings, including therein the name of the contractor obligated under such contract, and no other contract for the construction, alteration, or repair of any public building or public work in the United States or elsewhere shall be awarded to such contractor, subcontractors, material men, or suppliers with which such contractor is associated or affiliated, within a period of three years after such finding is made public.~~

**Sec. 10b-1. Prohibited procurement practices**

(a) Federal contracts for goods or services of foreign origin

A Federal agency shall not award any contract-- (1) for the procurement of an article, material, or supply mined, produced, or manufactured-- (A) in a signatory country that is considered to be a signatory not in good standing of the Agreement pursuant to section 2515(f)(3)(A) of title 19; or (B) in a foreign country whose government maintains, in government procurement, a significant and persistent pattern or practice of discrimination against United States products or services which results in identifiable harm to United States businesses, as identified by the President pursuant to section 2515(g)(1)(A) of Title 19; or (2) for the procurement of a service of any contractor or subcontractor that is a citizen or national of a foreign country identified by the President pursuant to section 2515(f)(3)(A) or 2515(g)(1)(A) of Title 19, or is owned or controlled directly or indirectly by citizens or nationals of such a foreign country.

(b) Exceptions to prohibition

The prohibition on procurement in subsection (a) of this section is subject to sections 2515(h) and 2515(j) of Title 19 and shall not apply—(1) with respect to services, articles, procured and used

outside the United States and its territories; (2) notwithstanding section 2515(g) of Title 19, to an eligible product of a country which is a signatory country unless that country is considered to be a signatory not in good standing pursuant to section 2515(f)(3)(A) of Title 19; or (3) notwithstanding section 2515(g) of Title 19, to a country that is a least developed country (as that term is defined in section 2518(6) of Title 19).

**(c) Authority of President or Federal agency heads to authorize contracts**

Notwithstanding subsection (a) of this section, the President or the head of a Federal agency may authorize the award of a contract or class of contracts if the President or the head of the Federal agency-- (1) determines that such action is necessary-- (A) in the public interest; (B) to avoid the restriction of competition in a manner which would limit the procurement in question to, or would establish a preference for, the services, articles, materials, or supplies of a single manufacturer or supplier; or (C) because there would be or are an insufficient number of potential or actual bidders to assure procurement of services, articles, materials, or supplies of requisite quality at competitive prices; and (2) notifies the Committee on Governmental Affairs of the Senate, as well as other appropriate Senate committees, and the appropriate committees of the House of Representatives, of such determination-- (A) not less than 30 days prior to the date of the award of the contract or the date of authorization of the award of a class of contracts; or (B) if the agency's need for the service, article, material, or supply is of such urgency that the United States would be seriously injured by delaying the award or authorization, not more than 90 days after the date of such award or authorization.

**(d) Limitation on authority of Federal agency heads to authorize contracts**

The authority of the head of a Federal agency under subsection (c) of this section shall not apply to contracts subject to memorandums of understanding entered into by the DOD (or any military department) and a representative of a foreign country (or agency or instrumentality thereof). In the case of any such contracts, any determinations and notice required by subsection (c) of this section shall be made by-- (1) the President, or (2) if delegated, by the Secretary of Defense or the Secretary of the Army, Navy, or Air Force, subject to review and policy guidance by the organization established under section 1872(a) of Title 19.

**(e) Non-delegability of agency heads' authority**

The authority of the head of a Federal agency under subsection (c) or (d) of this section may not be delegated.

**(f) Other authorities to bar procurement from nondesignated countries not affected**

Nothing in this section shall restrict the application of the prohibition under section 2512(a)(1) of Title 19.

**(g) Ownership or control of contractors or subcontractors by citizens or nationals of foreign countries**

(1) For purposes of this section with respect to construction services, a contractor or subcontractor is owned or controlled directly or indirectly by citizens or nationals of a foreign country if-- (A) 50 percent or more of the voting stock of the contractor or subcontractor is owned by one or more citizens or nationals of the foreign country; (B) the title to 50 percent or more of the stock of the contractor or subcontractor is held subject to trust or fiduciary obligations in favor of one or more citizens or nationals of the foreign country; (C) 50 percent or more of the voting stock of the contractor or subcontractor is vested in or exercisable on behalf of one or more citizens or nationals of the foreign country; (D) the case of a corporation-- (i) the number of its directors necessary to constitute a quorum are citizens or nationals of the foreign country; or (ii) the corporation is organized under the laws of the foreign country or any subdivision, territory, or possession thereof; or (E) in the case of a contractor or subcontractor who is a participant in a joint venture or a member of a partnership, any participant of the joint venture or partner meets any of the criteria in subparagraphs (A) through (D) of this paragraph.

~~(2)(A) For purposes of this section, except as provided in paragraph (1), a determination of whether a contractor or subcontractor is a citizen or national of a foreign country or is owned or controlled directly or indirectly by citizens or nationals of a foreign country shall be made in accordance with policy guidance prescribed by the Administrator for Federal Procurement Policy after conducting one or more public hearings at which interested parties may present comments. Sections 556 and 557 of title 5, United States Code, shall not apply to the conduct of any such hearing. (B) The Administrator shall include in the policy guidance prescribed under subparagraph (A) definitions, procedures, standards, and rules that, to the extent the Administrator considers appropriate and consistent with the applicability of such policy guidance to all services (other than construction services), is are the same as or similar to the definitions, procedures, standards, and rules that the Administrator has developed and issued for the administration of section 109 of the Treasury, Postal Service, and General Government Appropriations Act, 1988 (101 Stat. 1329-434). (C) The policy guidance required by subparagraph (A) shall be prescribed not later than 180 days after the date of enactment of this subsection. (3)(A) The Administrator for Federal Procurement Policy shall conduct an assessment of the current rules under this Act for making determinations of country of origin and alternatives to such rules. Such assessment shall identify and evaluate (i) reasonable alternatives to such rules of origin, including one or more alternative rules that require a determination on the basis of total cost, and (ii) the specific cost factors that should be included in determining total cost. (B) In conducting the analysis, the Administrator shall consult and seek comment from representatives of United States labor and business, other interested United States persons, and other Federal agencies. The Administrator shall hold public hearings for the purpose of obtaining such comment, and a transcript of such hearings shall be appended to the report required by subparagraph (C). (C) A report on the results of the analysis shall be submitted to the appropriate committees of the House of Representatives and to the Committee on Governmental Affairs and other appropriate committees of the Senate not later than 18 months after the date of enactment of this subsection. Such report shall include proposed policy guidance or any recommended legislative changes on the factors to be used in making determinations of country of origin.~~

(h) Definitions

As used in this section-- (1) the term "Agreement" means the Agreement on Government Procurement as defined in section 2518(1) of Title 19; (2) the term "signatory" means a party to the Agreement; and (3) the term "eligible product" has the meaning given such term by section 2518(4) of title 19.

### **Sec. 10b-2. Limitation on authority to waive Buy American Act requirement**

(a) Determination by the Secretary of Defense.--(1) If the Secretary of Defense, after consultation with the United States Trade Representative, determines that a foreign country which is party to an agreement described in paragraph (2) has violated the terms of the agreement by discriminating against certain types of products produced in the United States that are covered by the agreement, the Secretary of Defense shall rescind the Secretary's blanket waiver of the Buy American Act with respect to such types of products produced in that foreign country. (2) An agreement referred to in paragraph (1) is any reciprocal defense procurement memorandum of understanding between the United States and a foreign country pursuant to which the Secretary of Defense has prospectively waived the Buy American Act for certain products in that country. ~~(b) Report to Congress.--The Secretary of Defense shall submit to Congress a report on the amount of Department of Defense purchases from foreign entities in fiscal years 1992 and 1993. Such report shall separately indicate the dollar value of items for which the Buy American Act was waived pursuant to any agreement described in subsection (a)(2), the Trade Agreement Act of 1979 (19 U.S.C. 2501 et seq.), or any international agreement to which the United States is a party.~~ (c) (b) Buy American Act Defined.--For purposes of this section, the term "Buy American Act" means Title III of the Act entitled "An Act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes", approved March 3, 1933 (41 U.S.C. § 10a et seq.).

### **Section 10c.**

Definition of terms used in sections 10a to 10c

When used in sections 10a to 10c of this title--

(a) The term "United States," when used in a geographical sense, includes the United States and any place subject to the jurisdiction thereof;

(b) The terms "public use," "public work" shall mean use by, public building of, and public work of, the United States, the District of Columbia, Puerto Rico, American Samoa, the Canal Zone, and the Virgin Islands;

(c) The term "Federal agency" has the meaning given such term by section 472 of Title 40, which includes the Departments of the Army, Navy, and Air Force;

(d) The term "substantially transformed" has the meaning given such term by section 2518(4)(B) of Title 19.

## 7.1.2. 19 U.S.C. §§ 2501 through 2581

### Trade Agreements Act of 1979

#### 7.1.2.1. Summary of the Law

Section 2501 *et seq.* of Title 19, the Trade Agreements Act of 1979 (hereinafter TAA), implemented the results of the Tokyo Round of Multilateral Trade Negotiations.<sup>1</sup> Title III of the TAA codified into U.S. law the Agreement on Government Procurement concluded under auspices of the General Agreement on Tariffs and Trade (GATT).<sup>2</sup> Over a certain threshold established by the Government Procurement Agreement, the President is permitted to waive the application of the Buy American Act preference system<sup>3</sup> against particular products of designated countries.<sup>4</sup> Designated countries would be those signatory countries to the Agreement or those which provide reciprocal procurement benefits to the United States.<sup>5</sup>

Other provisions include waiver of discriminatory requirements with respect to purchases under the Agreement on Civil Aircraft,<sup>6</sup> the authority to expand coverage under the Agreement as a result of subsequent multilateral negotiation,<sup>7</sup> the requirement for monitoring and enforcement under the Agreement,<sup>8</sup> the requirement (since expired) to conduct labor surplus area studies,<sup>9</sup> treatment of Members of Congress acting as official advisors,<sup>10</sup> and a definitions section.<sup>11</sup>

Title IV of the TAA provides the statutory framework for implementing the GATT Agreement on Technical Barriers to Trade.<sup>12</sup> Many of the implementing statutes mirror customary U.S. standards activities already in practice; however, future standards-related

activities are permissible unless they create unnecessary obstacles to the international trade of the United States.<sup>13</sup>

### 7.1.2.2. Background of the Law

As a result of the Tokyo Round of multilateral negotiations to reduce trade barriers, the TAA opened U.S. Government procurement opportunities to nations who are signatories to the GATT Government Procurement Agreement. The principal objective of the Tokyo Round trade negotiation was the elimination, reduction, and harmonization of certain non-tariff barriers. The results of the Tokyo Round were enacted into U.S. law by the Trade Agreements Act of 1979.<sup>14</sup>

With respect to the Agreement on Government Procurement, statutory implementation was accomplished by Executive Order.<sup>15</sup> The provisions were amended by the Buy American Act of 1988 (BAA) which was a part of the Omnibus Trade and Competitiveness Act of 1988,<sup>16</sup> and modified the TAA authority to waive discriminatory practices by requiring the President to report annually to Congress on the extent to which foreign countries, whose products are acquired through U.S. Government procurement, maintain a significant and persistent pattern or practice of discrimination against U.S. products resulting in identifiable harm to U.S. businesses.<sup>17</sup> Under Title VII of the BAA Act, GATT dispute settlement procedures are then initiated against signatory countries so identified; and where discriminatory practices are not corrected within one-year, sanctions are imposed by revoking Buy American Act waivers previously afforded.

Provisions of the United States-Canada Free Trade Agreement and the United States-Israel Free Trade Area modify the definition of "eligible products" by lowering the threshold of applicability to \$25,000 and \$50,000, respectively.<sup>18</sup> The recently concluded North American Free Trade Agreement (NAFTA) will, if ratified by Congress, adopt a \$50,000 threshold.<sup>19</sup>

### 7.1.2.3. Law in Practice

The Trade Agreements Act of 1979 is implemented in FAR subpart 25.4 and DFARS subpart 225.4, with covered TAA end products specifically enumerated.<sup>20</sup>

The original intent of lowering nontariff barriers through the TAA has generally been achieved; however the overall value of expected coverage under the Government Procurement Code has not met expectations.<sup>21</sup> It was originally estimated that the TAA would result in over \$20 billion in foreign sales opportunity coverage, yet reality has indicated such coverage has not

<sup>16</sup>Pub. L. No. 100-418, §§7004, 7005(e), 102 Stat. 1545, 1553.

<sup>17</sup>19 U.S.C. § 2515(d).

<sup>18</sup>10 U.S.C. § 2518.

<sup>19</sup>See section 7.0.1., *supra*, note 13.

<sup>20</sup>DFARS 225.403-70.

<sup>21</sup>General Accounting Office, The International Agreement on Government Procurement: An Assessment of Its Commercial Value and U.S. Government Implementation (NSIAD-84-117), July 16, 1984.

been attained.<sup>22</sup> In recent Congressional testimony, an estimate has that currently only 7% of total world commerce is now covered by the provisions of the GATT Agreement.<sup>23</sup>

Efforts to correct these anomalies were proposed during the current Uruguay Round of multilateral negotiations and include expanding the agency and product coverage of the Agreement as well as lowering the threshold of coverage. However, in the interim, the Buy American Act of 1988 now restricts the use of Presidential waiver authority in the procurement of goods or services of foreign origin under the TAA, specifically where: (a) a designated country is not in good standing under the Agreement; (b) a designated country maintains a significant and persistent pattern or practice of discrimination against U.S. products resulting in identifiable harm to U.S. businesses; or (c) procuring the services of any contractor or subcontractor from countries identified under (a) and (b).<sup>24</sup>

As previously discussed, Title VII of the Act permits actions under the GATT Procurement Agreement dispute settlement provisions for foreign discrimination in government procurement. Such actions have been limited mainly by two factors: (a) that the U.S. Government has not had the expertise or adequate resources to obtain needed information on foreign procurement practices; and (b) that despite guarantees of confidentiality, U.S. companies do not complain out of fear of retaliation from foreign Governments.<sup>25</sup> Two discriminators have been identified under current Title VII review -- Norway, for discrimination in Code-covered procurement; and the European Community, for discrimination in non-Code-covered procurement.<sup>26</sup> Under the review, other countries whose Government procurement markets were of particular concern, and which warranted further provision of information by the United States Trade Representative concerning non-Code-coverage, included Australia, China, and Japan.

#### **7.1.2.4. Recommendations and Justification**

### **I**

#### **Retain Subchapter I - Government Procurement, sections 2511 through 2518; except for deletion of section 2516.**

Retention of subchapter I, Government Procurement, is recommended as it continues adequately to serve a valid defense acquisition purpose. As Title III of the TAA codified into U.S. law the Agreement on Government Procurement concluded under auspices of the GATT, any recommendations for statutory change would constitute a unilateral action on the part of the United States in contravention of the GATT regime. Anticipated changes in acquisition practice under the TAA, such as expanding coverage of agencies and products under the Agreement as

<sup>22</sup>In 1981 only \$4 billion coverage was documented, *supra*, note 8.

<sup>23</sup>Testimony of Pat Choate, Managing Director, Manufacturing Policy Project, on The State of the Economy and America's Global Competitive Position, before the Committee on Banking, Housing and Urban Affairs, United States Senate, July 23, 1992.

<sup>24</sup>41 U.S.C. § 10b-1.

<sup>25</sup>General Accounting Office, Executive Branch Identification of Discrimination in Foreign Government Procurement (T-NSIAD-90-35), May 1, 1990.

<sup>26</sup>Office of the United States Trade Representative, Title VII Report to Congress, Apr. 29, 1992.

well as lowering the threshold of coverage, will of necessity be dependent upon the outcome of the Uruguay Round multilateral trade negotiations.

Deletion of section 2516, Labor Surplus Area Studies, is warranted because the mandated one-time reporting requirement was submitted on July 1, 1981.

## II

**No action on sections 2501 through 2504; and subchapter II - Technical Barriers To Trade (Standards), sections 2531 through 2573.**

Although acquisition related, Titles I and IV of the TAA provided, respectively, the introductory statutory framework and the statutory implementation of the GATT Agreement on Technical Barriers to Trade (Standards) in subchapter II. The determination that these sections were predominately trade-law related, and not within the primary defense acquisition purview of the Panel's statutory mandate, resulted in the no action recommendation.

## III

**Section 2581 was determined not acquisition related.**

Section 2581, Auction of Import Licenses, is a trade-related statute having no direct relation to defense acquisition.

### **7.1.2.5. Relationship to Objectives**

Retention of subchapter I, Government Procurement, establishes a balance between an efficient process and full and open access to the procurement system in international defense trade. Although no Panel action was taken on subchapter II, Technical Barriers to Trade (Standards), the goal to reduce such acquisition-related barriers was based more in trade-law and not within the primary purview of the Panel's statutory mandate.

### **7.1.3. 19 U.S.C. §§ 2701 through 2706**

#### **Caribbean Basin Economic Recovery Act**

##### **7.1.3.1. Summary of the Law**

In conjunction with the Governments of Canada, Mexico, and Venezuela, the United States developed the Caribbean Basin Initiative program as a collaborative means to address the public and private sector economic crisis in the Caribbean. The linchpin of the program, under Title II of the Act,<sup>1</sup> granted the countries of the Caribbean Basin preferential trade access to the markets of the United States. Other measures in the Act, however, included investment incentives and financial assistance to the region.<sup>2</sup>

The Caribbean Basin Economic Recovery Act authorizes the President to proclaim duty-free treatment for all eligible articles from any beneficiary country.<sup>3</sup> Countries eligible for designation as beneficiary countries are enumerated in the statute, excepting communist countries and those countries which have seized ownership or control of property, or which repudiate contracts or intellectual property rights, owned by a U.S. citizen or corporation.<sup>4</sup> Eligible products include the growth, product, or manufacture of designated beneficiary countries under regulations prescribed by the Secretary of the Treasury,<sup>5</sup> generally excepting those textile and apparel articles, footwear, prepared tuna, petroleum products, watches and parts, sugar and beef products dealt with under the Harmonized Tariff Schedule of the United States.<sup>6</sup> With an effective date of August 5, 1983,<sup>7</sup> the balance of the Caribbean Basin Economic Recovery Act provided for annual reports or studies from the International Trade Commission<sup>8</sup> and the Secretary of Labor.<sup>9</sup>

##### **7.1.3.2. Background of the Law**

The United States developed this program in 1982 as a multilateral action program for the Caribbean Basin region which had been seriously affected as a region by the escalating cost of imported oil and declining prices for the major export goods. Venezuela and Mexico had already contributed significantly to the region through mechanisms such as a joint oil facility. Additionally, Canada had provided major foreign assistance to the region and already permitted duty-free entry on over ninety-eight percent of its imports from the Caribbean Basin.

---

<sup>1</sup>Pub. L. No. 98-67, 97 Stat. 384.

<sup>2</sup>*Id.*, see also H. Rept. 2769, §§ 201-3.

<sup>3</sup>19 U.S.C. § 2701.

<sup>4</sup>19 U.S.C. § 2702.

<sup>5</sup>19 U.S.C. § 2703.

<sup>6</sup>*Id.*, §§ (b) and (c).

<sup>7</sup>19 U.S.C. § 2706.

<sup>8</sup>19 U.S.C. § 2704.

<sup>9</sup>19 U.S.C. § 2705.

The centerpiece of the U.S. program was the offer of one-way free trade, under Title II of the Act, providing most-favorable and long term access to the domestic marketplace. While duty-free access provided significant potential stimulus for the Caribbean region, it alone constituted only three-tenths of one percent of total duty-free imports into the U.S. market. At the time, all imports from the Caribbean Basin constituted less than 4 percent of total U.S. imports and the United States enjoyed an overall trade surplus of almost \$3 billion, excluding petroleum and related products.

The legislative history of the Act indicated, as well, that passage of the Caribbean Basin Economic Recovery Act was meant to address U.S. export potential to the region:

Stability and economic development of the region, including through freer long term access to the U.S. market, are essential to maintenance and expansion of these U.S. export markets.<sup>10</sup>

Other than numerous amendments modifying provisions of the Harmonized Tariff Schedule of the United States to accommodate the determination of "eligible articles" under the Caribbean Basin initiative and miscellaneous amendments to conform with provisions of the Internal Revenue Code, the Act has remained essentially as enacted. The Act was recently reaffirmed in Congressional findings of August 20, 1990.<sup>11</sup>

#### **7.1.3.3. Law in Practice**

The Caribbean Basin Economic Recovery Act is implemented in defense acquisition generally the same as products acquired under provisions of the Trade Agreements Act.<sup>12</sup> Those Caribbean Basin end products specifically excepted under the statutory regime are highlighted, as well, in the enumeration of covered products.<sup>13</sup>

#### **7.1.3.4. Recommendations and Justification**

**No action on sections 2701 through 2706.**

Although the Caribbean Basin Economic Recovery Act applies to the procurement of defense goods, the Panel determined that a no action recommendation was warranted as these sections were predominately trade-law related and not within the primary defense acquisition purview of the Panel's statutory mandate.

#### **7.1.3.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

### **Limitation on use of funds; procurement of goods which are other than American goods**

#### **7.1.4.1. Summary of the Law**

Through the mechanism of limiting the use of appropriated funding, Congress made Buy American provisions specifically applicable to DOD by enacting this provision in the industrial base chapter of Title 10. Although not a strict limitation, the section provides that DOD appropriations may not be used to procure goods other than American unless consideration is given to bids from labor surplus areas and from small business or other domestic firms, any balance of payment impact, and shipping or other added costs.

#### **7.1.4.2. Background of the Law**

This section was originally enacted by the DOD Authorization Act for 1975<sup>2</sup> and added as section 2501 of Title 10 by the Codification of Military Laws Act of 1988.<sup>3</sup> The statute was renumbered to section 2506 as part of the extensive provisions on defense industrial base enacted by the DOD Authorization Act of 1989.<sup>4</sup> The section was renumbered as section 2533 by the Defense Authorization Act of 1993 and placed in the completely revised Chapter 148, renamed as "National Defense Technology and Industrial Base, Defense Reinvestment, and Defense Conversion."<sup>5</sup>

#### **7.1.4.3. Law in Practice**

Within DOD, this section is implemented by Part 225 of the Defense Federal Acquisition Regulation Supplement.<sup>6</sup>

<sup>5</sup>Note 1, *supra*.

<sup>6</sup>DFARS Subparts 225.1 through 225.3.

#### 7.1.4.4. Recommendations and Justification

##### I

**Amend section 2506 by striking the heading "Limitation on use of funds: procurement of goods which are other than American goods" and inserting in lieu thereof , "Policy on Purchases of Foreign Goods."**

**Amend subsection (a) by striking the reference to subsection (c); and amend by adding new paragraphs (a)(7), (a)(8), and (a)(9).**

The Panel recommends a new heading to section 2506 in order to focus on the intent of the provision which summarizes the policy on purchases of foreign goods by DOD. The new provision states the factors to be considered in determining whether to purchase foreign source items for DOD in light of current international regimes involving defense trade. The current statute is incomplete in leaving out industrial base, mobilization base, and national security considerations. In addition, the current statute fails to account for treaties and other international agreements. New paragraphs (a)(7), (a)(8), and (a)(9) have been added to fill these omissions.

##### II

**Amend subsection (b) by striking the reference to the Buy American Act; amend the definition in subsection (c) by striking the balance of paragraph (2) after the words "United States" and inserting in lieu thereof "if such end product is substantially transformed within the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed" and consolidate the amended definition into new section 2x10.**

The amended section also contains an amendment to subsection (b), replacing the existing inaccurate reference to the Buy American Act with a reference to the new subchapter. The amended definition in subsection (c) is recommended for consolidation in new section 2x10, *Definitions*.

Renumber as section 2x11 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with purchases of foreign goods by the DOD and the inter-relationship of these purchases on the defense industrial base, move to subchapter I, *Purchases of Foreign Goods By the Department of Defense*.

#### 7.1.4.5. Relationship to Objectives

Amendment of this statute clearly establishes a balance between an efficient process and the preservation of the national defense technology and industrial base, while ensuring the full and open access to the procurement system intrinsic to international defense trade and cooperation.

#### 7.1.4.6. Proposed Statute

**§ 2x11. ~~[2506/1533]. Limitation on use of funds; procurement of goods which are other than American goods~~ *Policy on Purchases of Foreign Goods***

(a) Funds appropriated to the Department of Defense may not be obligated under a covered contract for procurement of goods which are other than American goods ~~(as defined in subsection (e))~~ unless adequate consideration is given to the following:

(1) The bids or proposals of firms located in labor surplus areas in the United States (as designated by the Department of Labor) which have offered to furnish American goods.

(2) The bids or proposals of small business firms in the United States which have offered to furnish American goods.

(3) The bids or proposals of all other firms in the United States which have offered to furnish American goods.

(4) The United States balance of payments.

(5) The cost of shipping goods which are other than American goods.

(6) Any duty, tariff, or surcharge which may enter into the cost of using goods which are other than American goods.

(7) The need to protect the national defense technology and industrial base and the United States mobilization base.

(8) Coordination of acquisition activities of the Department of Defense with obligations contained in international treaties and with the acquisition activities of major United States allies.

(9) National security interests of the United States.

(b) Consideration of the matters referred to in paragraphs (1) through ~~(6)~~ (9) of subsection (a) shall be given ~~under regulations of the Secretary of Defense and subject to the determinations and exceptions contained in title III of the Act of March 3, 1933 (41 U.S.C. 10a, 10b), popularly known as the "Buy American Act", in the manner set out in this Subchapter.~~

## 7.1.5. 10 U.S.C. § 2507 renumbered as § 2534<sup>1</sup>

### Miscellaneous procurement limitations

#### 7.1.5.1. Summary of the Law

Prior to its recent amendment, section 2507 provided that: (a) only domestically-produced buses may be purchased for the armed forces; (b) DOD appropriations may not be used to buy chemical weapons antidotes in automatic injectors critical to DOD industrial preparedness unless the injectors are manufactured in the United States by firms in the industrial preparedness program; (c) no DOD funds may be used to buy manual typewriters with components manufactured in a Warsaw Pact country absent most-favored-nation status; (d) through 1996, DOD funds may not be used to buy specified valves and machines tools unless made in the United States or Canada; (e) through 1992, only domestically produced carbonyl iron powders may be used by DOD; and (f) naval air circuit breakers must be domestically produced.

#### 7.1.5.2. Background of the Law

The domestic restriction on the purchase of buses was originally enacted by the Defense Authorization Act for 1969.<sup>2</sup> The limitation was contained in the House version of the bill noting that in Vietnam, the Army and Air Force were then using almost exclusively foreign produced buses.<sup>3</sup> The committee stated that since activities in that area would likely continue for some time, DOD should ensure that preference be given to U.S. items whenever possible.

The chemical weapons antidote limitation was originally enacted by the Defense Authorization Act for 1988 and 1989.<sup>4</sup> The language was first introduced as part of the *en bloc* amendments to the House version of the bill; and was enacted to ensure a domestic producer of chemical weapons antidote under the industrial preparedness program.

The Warsaw Pact manual typewriter limitation was first enacted by the Defense Authorization Act of 1984.<sup>5</sup> The most-favored-nation exception was added by a floor amendment to the Senate version of the Defense Authorization Act for 1988.<sup>6</sup> Introduced by Senators Dixon and Simon, the limitation was intended to enable DOD to accept bids for less expensive but higher quality Polish-manufactured manual typewriters.<sup>7</sup> The restriction on Warsaw Pact typewriters was repealed by the Defense Authorization Act of 1993.<sup>8</sup>

<sup>1</sup>Section 2507 was amended and renumbered by Pub. L. No. 102-484, §§ 4201-4272, 106 Stat. 2442.

<sup>2</sup>Pub. L. No. 90-500, § 404.

<sup>3</sup>H. Conf. Rept. 1869.

<sup>4</sup>Pub. L. No. 100-180, 101 Stat. 1043.

<sup>5</sup>Pub. L. No. 97-295, 96 Stat. 1294.

<sup>6</sup>Pub. L. No. 100-180, 101 Stat. 1134.

<sup>7</sup>See Cong. Record, Sep. 17, 1987, at S. 12253.

<sup>8</sup>Pub. L. No. 102-484, § 831, 106 Stat. 2442.

The valve and machine tool restrictions, as well as the naval vessel air circuit breaker limitation, were added by the Defense Authorization Act for 1988.<sup>9</sup> In the case of valves, the restrictions pertained only to those used in piping for naval surface ships and submarines. However, in both valves and machine tools the restriction applied only to those manufactured in the United States or Canada.

The carbonyl iron powder limitation was added by the Defense Authorization Act for 1991.<sup>10</sup> The House Report noted, that outside of the Soviet Union, only two facilities produced this iron -- one in Germany and one at Redstone Arsenal in Huntsville, Alabama. The domestic restriction provision was intended to preserve the sole U.S. source at Huntsville.<sup>11</sup> The Defense Authorization Act for FY1992 and FY1993 amended the limitation by placing an expiration date for the limitation for January 1, 1993.<sup>12</sup>

The section was renumbered as section 2534 by the Defense Authorization Act of 1993 and placed in the completely revised Chapter 148, renamed "National Defense Technology and Industrial Base, Defense Reinvestment, and Defense Conversion."<sup>13</sup> The Act also amended section 2507 by adding two new restrictions that (a) DOD, for the next three years, purchase only domestically manufactured ball bearings or roller bearings,<sup>14</sup> and (b) DOD not procure sonobuoys from foreign countries that discriminate in their procurement against U.S. sonobuoy manufacturers.<sup>15</sup>

### 7.1.5.3. Law in Practice

The restrictions are implemented in DFARS subpart 225.7. The practice of legislating domestic source restrictions on government procurement of designated products through annual Defense Authorization and Appropriations Acts, under the auspices of the Buy American Act and this provision of Title 10, has over the years encompassed many different sectors and classes of products; such as: transportation by ocean vessels and by air carriers; food, clothing, fabrics, specialty metals, and hand or measuring tools; construction of major components of the hull and superstructure of naval vessels, and repair and maintenance of naval vessels; multipassenger motor vehicles (buses) and administrative motor vehicles; R&D contracting; aircraft ejection seats and night vision devices; transfer of large-caliber cannon production technology; coal or coke; floating storage of petroleum; 120mm mortars and ammunition; Strategic Defense Initiative contracts; valves and machine tools, anchor and mooring chain; certain chemical weapons antidote; supercomputers; ball bearings, roller bearings and PAN carbon fibers. Furthermore, under authority of the National Security Act of 1947<sup>16</sup> and the Defense Production Act of

<sup>15</sup>*Id.*, §833.

<sup>16</sup>50 U.S.C. § 404.

1950,<sup>17</sup> the Secretary of Defense and the Services have placed similar restrictions on other sectors and classes of products.<sup>18</sup>

In response to a request in the 1989 Defense Authorization Act<sup>19</sup> for a report on the impact of statutory Buy American restrictions affecting defense procurement, the Secretary of Defense formulated specific recommendations including: (a) abolish most Congressionally mandated restrictions; (b) avoid future use of Buy American restrictions; and (c) rely on the authority of the Office of Secretary of Defense.<sup>20</sup> However, as well as renewing previous Buy American source restrictions, legislation enacted since the DOD Report has continued the practice of providing new domestic source restrictions on government procurement.<sup>21</sup>

#### **7.1.5.4. Recommendations and Justification**

The Panel recommends that section 2507 be incorporated into its revised consolidated subchapter as section 2x12. In doing so, the Panel makes the following amendments to section 2507:

**Amend section 2507 by striking the heading "Miscellaneous procurement limitations" and inserting in lieu thereof, "Items restricted to American sources."**

**Amend section 2507 by deleting subsection (f).**

**Amend section 2507 by redesignating subsections (a) through (e) as subsections (c) through (g); and by adding new subsections (h) and (i).**

The Panel recommends that the authority of the Secretary to restrict procurements to domestic sources be expressly granted by statute, and language implementing that regulation is found in section 2x12(a). In addition, the prohibitions on the purchase of goods from countries that are in violation of the Agreement on Government Procurement, or which otherwise discriminate against United States products, currently found in 41 U.S.C. § 10b-1, are incorporated into section 2x12(b) with two exceptions: (1) commercial items and components are permitted to be acquired from any source; and (2) the restrictions in section 10b-1 are not applicable to contracts made under simplified acquisition procedures. The Panel believes that these exceptions from the international government procurement regime are helpful to facilitate the acquisition of commercial products and services while removing regulatory hurdles from -- and hence reduce the cost of -- the award of smaller contracts. The commercial item exception can be redressed in the overall GATT trade dispute settlement regime, in any case; and as for the

<sup>17</sup>50 U.S.C. App. § 2061 *et seq.*

<sup>18</sup>DFARS Part 208.

<sup>19</sup>Pub. L. No. 100-456, 102 Stat. 2014.

<sup>20</sup>Secretary of Defense, A Report to the United States Congress On The Impact of Buy American Restrictions Affecting Defense Procurement, Department of Defense (July 1989), at pgs. 12-13.

<sup>21</sup>E.g. Pub. L. No. 102-484, §§ 831 through 833.

exception for simplified acquisition procedures, the Panel recommended \$100,000 threshold is still below the present GATT threshold of general applicability.

Finally, other than the recommended deletion of the expired restriction on carbonyl iron powders found in subsection (f), provisions for absolute restrictions currently found in 10 U.S.C. § 2507 were retained along with those annual authorization and appropriation act restrictions framed as amendments to new section 2x12. In section 2x12, the existing statutory restriction on the transfer of large-caliber cannon technology presently found in 10 U.S.C. § 4542 and the restriction on construction or repair of vessels in foreign shipyards contained in 10 U.S.C. § 7309 were consolidated with the current statutory restrictions of 10 U.S.C. § 2507(a) through (e). The Panel recommended that the many other restrictions contained in annual authorization and appropriation acts be repealed. Instead of restrictions provided in annual authorization and appropriation acts, the Panel recommends that primary reliance for domestic source restrictions to protect the defense industrial base should be placed within the authority of the Secretary of Defense.

The only source restrictions consolidated in this section were the Panel's recommended subsections (h) and (i). Subsection (h) contains the Stratton Amendment prohibition, found in 10 U.S.C. § 4542, on the transfer by arsenals to foreign countries of technical data packages for large-caliber cannon. As there are exceptions to the transfer prohibition, where coproduction or cooperative project agreements are in place, comment from the U.S. Army indicated that the provision was recommended for retention.<sup>22</sup> Other than amending the provision to be consistent with section 2x31 on cooperative project agreements, the provision was retained and consolidated in this section. Subsection (i) retains and consolidates the present restriction on the construction or repair of vessels in foreign shipyards contained in 10 U.S.C. § 7309.

Renumber as section 2x12 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with restrictions to American sources by DOD and the interrelationship of these restrictions to the defense industrial base, move to Subchapter I, *Purchases of Foreign Goods By the Department of Defense*.

#### **7.1.5.5. Relationship to Objectives**

Amendment of this statute clearly establishes a balance between an efficient process, the preservation of the national defense technology, and industrial base, while ensuring full and open access to procurement systems intrinsic to international defense trade and cooperation.

<sup>22</sup>Memorandum from Larry D. Anderson, LTC, JAGC, Legal Advisor, U.S. Army Materiel Command, to William E. Mounts, DSMC CM-AL, dated 21 September 1992.

#### 7.1.5.6. Proposed Statute

#### §2x12. [2507/2534] Miscellaneous procurement limitations Items Restricted to American Sources

(a) AUTHORITY OF THE SECRETARY.—The Secretary of Defense is hereby authorized to require the Department to acquire only American goods and related American services for specific items as the Secretary may find necessary to protect the United States national defense technology and industrial base, or the United States mobilization base, or to further national security.

(b) RESTRICTIONS ON ACQUISITION OF GOODS FROM COUNTRIES WHICH DISCRIMINATE AGAINST AMERICAN GOODS AND RELATED AMERICAN SERVICES.—Section 10b-1 of Title 41 shall apply to the Department of Defense except that section shall have no application to the acquisition of commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2 or to contracts the value of which is below the simplified acquisition threshold as defined in 10 U.S.C. § 2302(4).

(c) BUSES.--Funds appropriated for use by the armed forces are available to acquire a multipassenger motor vehicle (bus) only if the vehicle is manufactured in the United States. However, the Secretary of Defense may prescribe regulations authorizing the acquisition of a multipassenger motor vehicle (bus) not manufactured in the United States, but only to ensure that compliance with this subsection will not result in an uneconomical procurement action or adversely affect the national interest.

(d) CHEMICAL WEAPONS ANTIDOTE MANUFACTURED OVERSEAS.--Funds appropriated to the Department of Defense may not be used for the procurement of chemical weapons antidote contained in automatic injectors (or for the procurement of the components for such injectors) determined to be critical under the Industrial Preparedness Planning Program of the Department of Defense unless-

(1) such injector or component is manufactured in the United States by a company which is an existing producer under the industrial preparedness program at the time the contract is awarded and which

(A) has received all required regulatory approvals; and

(B) has the plant, equipment, and personnel to perform the contract in existence in the United States at the time the contract is awarded; or

(2) the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, determines that such procurement from a source in addition to a source described in paragraph (1) is critical to the national security.

**(e) VALVES AND MACHINE TOOLS .--**

**(1) Effective through fiscal year 1996, funds appropriated or otherwise made available to the Department of Defense may not be used to enter into a contract for the procurement of items described in paragraph (2) that are not manufactured in the United States or Canada.**

**(2) Items covered by paragraph (1) are the following:**

**(A) Powered and nonpowered valves in Federal Supply Classes 4810 and 4820 used in piping for naval surface ships and submarines.**

**(B) Machine tools in the Federal Supply Classes for metal-working machinery numbered 3405, 3408, 3410 through 3419, 3426, 3433, 3438, 3441 through 3443, 3445, 3446, 3448, 3449, 3460, and 3461.**

**(3) Contracts covered by paragraph (1) include the following:**

**(A) Contracts for the procurement of items described in paragraph (2) for use in any property under the control of the Department of Defense, including government-owned, contractor-operated facilities.**

**(B) Contracts entered into by contractors on behalf of the Department of Defense for the procurement of items described in paragraph (2) for the purposes of providing the items to other contractors as Government-furnished equipment.**

**(4) In any case in which a contract subject to the requirement of paragraph (1) includes the procurement of more than one Federal Supply Class of machine tools or machine tools and accessories described in paragraph (2), each supply class shall be evaluated separately for purposes of determining whether the limitation in this subsection applies.**

**(5) The Secretary of Defense may waive the requirement of paragraph (1) with respect to the procurement of an item if the Secretary determines that any of the following apply with respect to that item:**

**(A) The restriction would cause unreasonable costs or delays to be incurred.**

**(B) United States producers of the item would not be jeopardized by competition from a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.**

**(C) Satisfactory quality items manufactured in the United States or Canada are not available.**

(D) The restriction would impede cooperative programs entered into between the Department of Defense and a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.

(E) The procurement is for an amount less than \$25,000 and simplified small purchase procedures are being used.

(F) The restriction would result in the existence of only one United States or Canadian source for the item.

~~(F) CARBONYL IRON POWDERS .--~~

~~----- (1) Until January 1, 1993, the Secretary of Defense shall require that only domestically manufactured carbonyl iron powders may be used in a system or item procured by or provided to the Department of Defense.~~

~~----- (2) The Secretary of Defense may waive the restriction required by paragraph (1) if the Secretary certifies that such a restriction is not in the national interest.~~

~~----- (3) In this subsection:~~

~~----- (A) The term "domestically manufactured" means manufactured in a facility located in the United States or Canada.~~

~~----- (B) The term "carbonyl iron powders" means powders or particles produced from the thermal decomposition of iron penta carbonyl.~~

~~(f)(g) AIR CIRCUIT BREAKERS .--~~

(1) The Secretary of Defense may not procure air circuit breakers for naval vessels unless-

(A) the air circuit breakers are produced or manufactured in the United States; and

(B) substantially all of the components of the air circuit breakers are produced or manufactured in the United States.

(2) For purposes of paragraph (1)(B), substantially all of the components of air circuit breakers shall be considered to be produced or manufactured in the United States if the aggregate cost of the components produced or manufactured in the United States exceeds the aggregate cost of the components produced or manufactured outside the United States.

(3) Paragraph (1) does not prevent the procurement of spares and repair parts needed to support air circuit breakers produced or manufactured outside the United States.

(4) The Secretary of Defense may waive the limitation in paragraph (1) on a case-by-case basis with respect to any procurement if the Secretary determines that carrying out a proposed procurement in accordance with the limitation in that case--

(A) is not in the national security interests of the United States;

(B) will have an adverse effect on a United States company; or

(C) will result in procurement from a United States company that, with respect to the sale of air circuit breakers, fails to comply with applicable Government procurement regulations or the antitrust laws of the United States.

(5) Whenever the Secretary proposes to grant a waiver under paragraph (4), the Secretary shall submit a notice of the proposed waiver, together with a statement of the reasons for the proposed waiver, to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives. The waiver may then be granted only after the end of the 30-day period beginning on the date on which the notice is received by those committees.

~~(g)~~ SONOBUOYS - (1) The Secretary of Defense may not procure a sonobuoy manufactured in a foreign country if United States firms that manufacture sonobuoys are not permitted to compete on an equal basis with foreign manufacturing firms for the sale of sonobuoys in that foreign country.

(2) The Secretary may waive the limitation in paragraph (1) with respect to a particular procurement of sonobuoys if the Secretary determines that such procurement is in the national security interests of the United States.

(3) In this subsection, the term 'United States firm' has the meaning given such term in section ~~2x20(10) 2532(d)(1)~~ of this title.

(h) SEC. 4542. TECHNICAL DATA PACKAGES FOR LARGE-CALIBER CANNON; PROHIBITION ON TRANSFERS TO FOREIGN COUNTRIES; EXCEPTION

~~(1)~~ (a) General rule

Funds appropriated to the Department of Defense may not be used-- ~~(1)~~ (A) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or ~~(2)~~ (B) to assist a foreign country in producing such a defense item.

(2) ~~(b)~~ Exception

The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in ~~subsection (a) paragraph (1)~~ if-- ~~(1)~~ (A) the transfer or provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State); ~~(2)~~ (B) the

Secretary of the Army determines that such action-- (A) (i) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and (B) (ii) would not transfer technology (including production techniques) considered unique to the arsenal concerned, except as provided in ~~subsection (e) paragraph (5)~~, and ~~(3) (C)~~ the Secretary of Defense enters into an agreement with the country concerned described in ~~subsection (e) or (d) paragraph (3) or (4)~~.

(3) ~~(e)~~ Coproduction agreements

An agreement under this ~~subsection~~ paragraph shall be in the form of a Government-to-Government Memorandum of Understanding and shall include provisions that-- ~~(1) (A)~~ prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; ~~(2) (B)~~ require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned; ~~(3) (C)~~ subject to such exceptions as may be approved under ~~subsection (f) paragraph (6)~~, prohibit transfer by the participating foreign country to a third party or country of-- ~~(A) (i)~~ any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and ~~(B) (ii)~~ any defense article produced by the participating foreign country under the agreement; and ~~(4) (D)~~ require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

(4) ~~(d)~~ Cooperative project agreements

An agreement under this ~~subsection~~ paragraph is a cooperative project agreement under ~~section 2x31 of this chapter 27 of the Arms Export Control Act (22 U.S.C. 2767)~~ which shall include provisions that-- ~~(1) (A)~~ for development phases describe the technical data to be transferred and for the production phase prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; ~~(2) (B)~~ require that at least the United States production of the defense item to which the technical data package or assistance relates be carried out by the arsenal concerned; and ~~(3) (C)~~ require the Secretary of Defense to monitor compliance with the agreement.

(5) ~~(e)~~ Licensing fees and royalties

The limitation in ~~subsection (b)(2)(B) paragraph (2)(B)(ii)~~ shall not apply if the technology (or production technique) transferred is subject to nonexclusive license and payment of any negotiated licensing fee or royalty that reflects the cost of development, implementation, and prove-out of the technology or production technique. Any negotiated license fee or royalty shall be placed in the operating fund of the arsenal concerned for the purpose of capital investment and technology development at that arsenal.

(6) ~~(f)~~ Transfers to third parties

A transfer described in ~~subsection (e)(3) paragraph (3)(C)~~ may be made if-- ~~(1) (A)~~ the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program or a cooperative project in which the United States and the participating foreign country were partners; or ~~(2) (B)~~ the President-- ~~(A) (i)~~ complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. 2753(d)) with respect to such transfer; and ~~(B) (ii)~~ certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large-caliber cannon.

(7) ~~(g)~~ Notice and reports to Congress: ~~(1) (A)~~ The Secretary of the Army shall submit to Congress a notice of each agreement entered into under this subsection. ~~(2) (B)~~ The Secretary shall submit to Congress a semi-annual report on the operation of this section and of agreements entered into under this subsection.

(8) ~~(h)~~ Arsenal defined

In this subsection, the term "arsenal" means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon.

~~(i) SEC. 7309. RESTRICTIONS ON CONSTRUCTION OR REPAIR OF VESSELS IN FOREIGN SHIPYARDS.~~

~~(1) (a)~~ Except as provided in ~~subsection (b) paragraph (2)~~, no vessel to be constructed for any of the armed forces, and no major component of the hull or superstructure of any such vessel, may be constructed in a foreign shipyard.

~~(2) (b)~~ The President may authorize exceptions to the prohibition in ~~subsection (a) paragraph (1)~~ when he determines that it is in the national security interest of the United States to do so. The President shall transmit notice to Congress of any such determination, and no contract may be made pursuant to the exception authorized until the end of the 30-day period beginning on the date the notice of such determination is received by Congress.

~~(3)(A)-(e)(1)~~ A naval vessel (or any other vessel under the jurisdiction of the Secretary of the Navy) the homeport of which is in the United States may not be overhauled, repaired, or maintained in a shipyard outside the United States.

~~(B) (2) SubParagraph (A) (1)~~ does not apply in the case of voyage repairs.

~~(4) (d)~~ An inflatable boat or rigid inflatable boat, as defined by the Secretary of the Navy, is not a vessel for the purpose of the restriction in ~~subsection (a) paragraph (1)~~.

**(5) (e) In the case of a naval vessel the homeport of which is not in the United States (or a territory of the United States), the Secretary of the Navy may not during the 15-month period preceding the planned reassignment of the vessel to a homeport in the United States (or a territory of the United States) begin any work for the overhaul, repair, or maintenance of the vessel that is scheduled to be for a period of more than six months.**

## 7.1.6. 10 U.S.C. § 4542

### **Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception**

#### 7.1.6.1. Summary of the Law

This statute provides that funds appropriated to DOD may not be used either to (1) transfer to a foreign country a technical data package for a defense item manufactured or developed in an arsenal; or (2) assist a foreign country in producing such a defense item.<sup>1</sup> The Secretary of the Army may, however, use funds appropriated to DOD to transfer a technical data package or to provide assistance if (1) the transfer or provision of assistance is to a friendly foreign country; (2) the Secretary of the Army determines that such action would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and (3) the Secretary of Defense enters into either a coproduction or cooperative project agreement.<sup>2</sup> A coproduction agreement must be in the form of a Government-to-Government Memorandum of Understanding. An agreement under section 4542(d) is considered a cooperative project agreement under section 27 of the Arms Export Control Act.

#### 7.1.6.2. Background of the Law

The provision was originally enacted by the Defense Authorization Act of 1987.<sup>3</sup> The Defense Authorization Act of 1990<sup>4</sup> amended the provision by adding the exception for cooperative project agreements and, rather than limiting transfers only to NATO and major non-NATO allies, by opening transfers up to "friendly foreign countries".

#### 7.1.6.3. Law in Practice

The actual practice of this statute centers around restricting the transfer to foreign Governments of technical data concerning the activities of the U.S. Army Watervliet Arsenal (WVA), the single U.S. Government-owned, Government-operated plant manufacturing large-caliber cannon. As a result of recent modernization projects, the U.S. Army now possesses a state-of-the-art gun tube manufacturing facility capable of meeting both the Army's peacetime requirements and a large portion of its projected wartime requirements.<sup>5</sup> The section is intended to protect this indigenous capability.

<sup>1</sup>10 U.S.C. § 4542(a).

<sup>2</sup>10 U.S.C. § 4542(b).

<sup>3</sup>Pub. L. No. 99-500; with omissions corrected by Pub. L. No. 99-591, 100 Stat. 3341-107; and Pub. L. No. 99-661, 100 Stat. 3968.

<sup>4</sup>Pub. L. No. 101-189, 103 Stat. 1489.

<sup>5</sup>Secretary of Defense, A Report to the United States Congress On The Impact of Buy American Restrictions Affecting Defense Procurement, Department of Defense (July 1989) at A-95.

The initial impact of the restriction was to restrict the transfer of technical data packages in projects involving cannon or gun technology as between the United States and its allied countries. Even with the additions of exceptions to the prohibition for coproduction and cooperative agreements, however, the provision has still had:

... a number of clearly documented adverse impacts:

- It disturbs our allies, who point out that the supposed exception for friendly foreign countries means little, because of the requirement that any transfer (1) clearly benefit the preservation of the U.S. production base and (2) not involve technology 'considered unique' to WVA.
- While protecting some current U.S. technology, it has also resulted in our being denied access to foreign technology from which we could benefit.
- It has disrupted cooperative armaments efforts, contrary to the will of the Congress and to DOD policy directed at reciprocity and working with allies.

Accommodating it has created administrative burdens and caused the expenditure of considerable effort in attempts to meet commitments and to implement important initiatives while still remaining in compliance with the law. . . .<sup>6</sup>

#### 7.1.6.4. Recommendations and Justification

##### I

Amend Section 4542(d) by striking in the introductory sentence the phrase "27 of the Arms Export Control Act (22 U.S.C. § 2767)" and inserting in lieu thereof "2x31 of this chapter"; and insert the word "shall" after the word "which" and before the amended word "include."

Under provisions of 10 U.S.C. § 2350a and by Executive Order, the Secretary of Defense has been delegated the authority to engage in cooperative research and development projects and reporting requirements under section 27 of the Arms Export Control Act. This amendment statutorily recognizes the existing delegation, as presently reflected in new section 2x31; and, consistent with the proposed Panel consolidation of sections 2350a and 2350b, obviates further need for the referral to section 27 of the Arms Export Control Act.

---

<sup>6</sup>*Id.*, at A102-3.

## II

### Consolidate section 4542 as new subsection 2x12(i).

Despite the number of adverse impacts encountered with this section, a comment from the U.S. Army indicated that the provision, with its exceptions where coproduction or cooperative project agreements are in place, was recommended for retention.<sup>7</sup> The Panel concurred and felt that this section was one of the restrictions which would be recommended for consolidation into new section 2x12, *Items Restricted to American Sources*.

Other than amending the provision to be consistent with new section 2x31 on cooperative project agreements, the Panel recommended amending and consolidating section 4542 into new section 2x12, *Items Restricted to American Sources*.

#### 7.1.6.5. Relationship to Objectives

Amendment and consolidation of this statute establishes a balance between an efficient process and preservation of the national defense technology and industrial base, while ensuring full and open access to the procurement system intrinsic to international defense trade and cooperation.

#### 7.1.6.6. Proposed Statute

#### **§2x12. ~~[2507] Miscellaneous procurement limitations~~ Items Restricted to American Sources**

**(a) AUTHORITY OF THE SECRETARY.**—The Secretary of Defense may acquire only American goods and related American services for specific items as the Secretary may find necessary to protect the United States defense technology and industrial base, or the United States mobilization base, or to further national security.

**(b) RESTRICTIONS ON ACQUISITION OF GOODS FROM COUNTRIES WHICH DISCRIMINATE AGAINST AMERICAN GOODS AND RELATED AMERICAN SERVICES.**—Section 10b-1 of Title 41 shall apply to the Department of Defense except that section shall have no application to the acquisition of commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2 or to contracts the value of which is below the simplified acquisition threshold as defined in 10 U.S.C. § 2302(4).

\* \* \*

\* \* \*

\* \* \*

**(i) ~~SEC. 4542. TECHNICAL DATA PACKAGES FOR LARGE-CALIBER CANNON; PROHIBITION ON TRANSFERS TO FOREIGN COUNTRIES; EXCEPTION~~**

**(1) (a) General rule**

---

<sup>7</sup>Memorandum from Larry D. Anderson, LTC, JAGC, Legal Advisor, U.S. Army Materiel Command, to William E. Mounts, DSMC CM-AL, dated 21 September 1992.

Funds appropriated to the Department of Defense may not be used-- (1) (A) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or (2) (B) to assist a foreign country in producing such a defense item.

(2) (b) Exception

The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in ~~subsection (a) paragraph (1)~~ if-- (1) (A) the transfer or provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State); (2) (B) the Secretary of the Army determines that such action-- (A) (i) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and (B) (ii) would not transfer technology (including production techniques) considered unique to the arsenal concerned, except as provided in ~~subsection (e) paragraph (5)~~, and (3) (C) the Secretary of Defense enters into an agreement with the country concerned described in ~~subsection (e) or (d) paragraph (3) or (4)~~.

(3) (e) Coproduction agreements

An agreement under this ~~subsection~~ paragraph shall be in the form of a Government-to-Government Memorandum of Understanding and shall include provisions that-- (1) (A) prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; (2) (B) require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned; (3) (C) subject to such exceptions as may be approved under ~~subsection (f) paragraph (6)~~, prohibit transfer by the participating foreign country to a third party or country of-- (A) (i) any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and (B) (ii) any defense article produced by the participating foreign country under the agreement; and (4) (D) require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

(4) (d) Cooperative project agreements

An agreement under this ~~subsection~~ paragraph is a cooperative project agreement under section 2x31 of this chapter 27 of the Arms Export Control Act (22 U.S.C. 2767) which shall include provisions that-- (1) (A) for development phases describe the technical data to be transferred and for the production phase prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; (2) (B) require that at least the United States production of the defense item to which the technical data package or assistance relates be carried out by the arsenal concerned; and (3) (C) require the Secretary of Defense to monitor compliance with the agreement.

**(5) (e) Licensing fees and royalties**

The limitation in ~~subsection (b)(2)(B)~~ paragraph (2)(B)(ii) shall not apply if the technology (or production technique) transferred is subject to nonexclusive license and payment of any negotiated licensing fee or royalty that reflects the cost of development, implementation, and prove-out of the technology or production technique. Any negotiated license fee or royalty shall be placed in the operating fund of the arsenal concerned for the purpose of capital investment and technology development at that arsenal.

**(6) (f) Transfers to third parties**

A transfer described in ~~subsection (e)(3)~~ paragraph (3)(C) may be made if-- (1) (A) the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program or a cooperative project in which the United States and the participating foreign country were partners; or (2) (B) the President-- (A) (i) complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. 2753(d)) with respect to such transfer; and (B) (ii) certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large-caliber cannon.

(7) (g) Notice and reports to Congress: (1) (A) The Secretary of the Army shall submit to Congress a notice of each agreement entered into under this subsection. (2) (B) The Secretary shall submit to Congress a semi-annual report on the operation of this section and of agreements entered into under this subsection.

**(8) (h) Arsenal defined**

In this subsection, the term "arsenal" means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon.

## 7.1.7. 10 U.S.C. § 7309

### **Restrictions on construction or repair of vessels in foreign shipyards**

#### 7.1.7.1. Summary of the Law

This section prohibits major construction, repair, overhaul, or maintenance of naval vessels in foreign shipyards if those vessels are home ported in the United States. This statute prohibits U.S. vessels from steaming to foreign shipyards for major repairs or construction; however, it does allow "voyage repairs" so that ships are not required to return to their home port if repairs are needed while at sea. Inflatable boats are not considered vessels under this statute.

#### 7.1.7.2. Background of the Law

This section was originally enacted in 1982 as part of the nation's build-up to a 600 ship Navy.<sup>1</sup> It was amended in 1988 when "Restrictions" and "or repair" were added to its statutory purview.<sup>2</sup> The Defense Authorization Act of 1993 added an annual reporting requirement by the Secretary of Defense,<sup>3</sup> as well as a further limitation on overseas ship repairs for vessels homeported in the U.S.<sup>4</sup>

#### 7.1.7.3. Law in Practice

The purpose of this section is to strike a balance between possible cost savings in foreign shipyards and preservation of the domestic defense industrial base. At the same time it also seeks to maintain operational flexibility by allowing "voyage repairs" and excluding inflatable boats from coverage. Congress vigorously monitors compliance with this law to make sure that only bona fide "voyage repairs" are made in foreign shipyards. The Supportability, Maintenance and Modernization Division, Office of the Deputy Chief of Naval Operations (Logistics) recommends retention of this law to ensure the continued viability of U.S. shipyards. It also supports retention of the exemption for "voyage repairs" so that individual ships and battle groups are not forced to return to their home port for repairs during combat or other naval operations.<sup>5</sup>

<sup>2</sup>Pub. L. No. 100-456, 102 Stat. 2054.

<sup>3</sup>Pub. L. No. 102-484, § 1015, 106 Stat. 2442.

<sup>4</sup>*Id.*, at § 1012.

<sup>5</sup>Information received from CAPT Trytten, USN, of the Supportability, Maintenance and Modernization Division, Office of the Deputy Chief of Naval Operations (Logistics), verbally to B. Capshaw, Esq., Acquisition Law Task Force, on May 26, and Dec. 7, 1992.

#### 7.1.7.4. Recommendation and Justification

**Consolidate section 7309 into new subsection 2x12(j).**

The Panel recommended this section be retained because it strikes an effective balance among cost considerations, preservation of the defense industrial base, and the maintenance of operational flexibility. The Panel believed that this section was one of the restrictions which would be recommended to be consolidated into new section 2x12, *Items Restricted to American Sources*.<sup>6</sup>

#### 7.1.7.5. Relationship to Objectives

Retention and consolidation of this statute clearly establishes a balance between an efficient process and preservation of the national defense technology and industrial base, while ensuring full and open access to the procurement system intrinsic to international defense trade and cooperation.

#### 7.1.7.6. Proposed Statute

**~~§2x12. [2507]-Miscellaneous procurement limitations~~ Items Restricted to American Sources**

(a) AUTHORITY OF THE SECRETARY.—The Secretary of Defense may acquire only American goods and related American services for specific items as the Secretary may find necessary to protect the United States defense technology and industrial base, or the United States mobilization base, or to further national security.

(b) RESTRICTIONS ON ACQUISITION OF GOODS FROM COUNTRIES WHICH DISCRIMINATE AGAINST AMERICAN GOODS AND RELATED AMERICAN SERVICES.—Section 10b-1 of Title 41 shall apply to the Department of Defense except that section shall have no application to the acquisition of commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2 or to contracts the value of which is below the simplified acquisition threshold as defined in 10 U.S.C. § 2302(4).

\* \* \*

\* \* \*

\* \* \*

(j) SEC. 7309. RESTRICTIONS ON CONSTRUCTION OR REPAIR OF VESSELS IN FOREIGN SHIPYARDS.

(1) ~~(a)~~ Except as provided in subsection (b) paragraph (2), no vessel to be constructed for any of the armed forces, and no major component of the hull or superstructure of any such vessel, may be constructed in a foreign shipyard.

<sup>6</sup>Letter from John J. Stocker, President, Shipbuilders Council of America, to Admiral Vincent, dated December 8, 1992, stated: "With respect to the proposed changes to 10 U.S.C. § 7309, that I understand would retain the essence of the statute, but would consolidate it under an omnibus Defense Trade Chapter, we have serious concerns that such a consolidation may simply be a prelude to the next phase in a continuous trend to ignore or circumvent the statutory requirements of 10 U.S.C. § 7309. . ."

(2) (b) The President may authorize exceptions to the prohibition in ~~subsection (a) paragraph (1)~~ when he determines that it is in the national security interest of the United States to do so. The President shall transmit notice to Congress of any such determination, and no contract may be made pursuant to the exception authorized until the end of the 30-day period beginning on the date the notice of such determination is received by Congress.

(3) ~~(A) (e) (1)~~ A naval vessel (or any other vessel under the jurisdiction of the Secretary of the Navy) the homeport of which is in the United States may not be overhauled, repaired, or maintained in a shipyard outside the United States.

(B) ~~(2)~~ Subparagraph (A) ~~(1)~~ does not apply in the case of voyage repairs.

(4) ~~(d)~~ An inflatable boat or rigid inflatable boat, as defined by the Secretary of the Navy, is not a vessel for the purpose of the restriction in ~~subsection (a) paragraph (1)~~.

(5) ~~(e)~~ In the case of a naval vessel the homeport of which is not in the United States (or a territory of the United States), the Secretary of the Navy may not during the 15-month period preceding the planned reassignment of the vessel to a homeport in the United States (or a territory of the United States) begin any work for the overhaul, repair, or maintenance of the vessel that is scheduled to be for a period of more than six months.

## **7.1.8. 10 U.S.C. § 2631 and 46 U.S.C. App. § 1241**

### **Cargo Preference Act of 1904 Cargo Preference Act of 1954**

#### **7.1.8.1. Summary of the Law**

Provisions of 10 U.S.C. § 2631 restrict the ocean transportation of supplies bought for the Services to U.S. vessels provided the freight charges are not excessive or otherwise unreasonable. Although provisions of 46 U.S.C. App. 1241, concerning the transportation of Government personnel and certain cargoes, apply to DOD, the implementation of 10 U.S.C. § 2631 is much stricter, making the application of Title 46 provisions moot.

#### **7.1.8.2. Background of the Law**

The Cargo Preference Act of 1904<sup>1</sup> was revised by the enactment of this section primarily by substituting the word "supplies" for the words "coal, provisions, fodder, or supplies of any description," among other substitutions.<sup>2</sup> Although the Cargo Preference Act of 1954<sup>3</sup> is applicable to DOD as well, the scope of coverage under this section exceeds the 1954 Act's requirements.

#### **7.1.8.3. Law in Practice**

Authority under the Cargo Preference Act of 1904 has been delegated by the President to the Secretary of Defense<sup>4</sup> and is implemented within DOD by regulation.<sup>5</sup> There has been recent controversy over the DOD implementing clause which defines "supplies" and "subcontractor," for purposes of the Cargo Preference Act, as including in the former, not only end items but components as well, and in the latter, at any level below the prime contractor.<sup>6</sup> The DOD definition is based on a Department of Justice Memorandum which argued that the statutory language "bought for the [Services]" was controlling regardless of "the status of title of supplies at intermediate steps in the contracting process . . ." <sup>7</sup> A recent decision by the United States Court of Appeals for the Federal Circuit, however, casts some doubt on the inclusion of components in the DOD definition.<sup>8</sup>

<sup>1</sup>Apr. 28, 1904, ch. 1766, 33 Stat. 518.

<sup>2</sup>Aug. 10, 1956, ch. 1041, 70A Stat. 146.

<sup>3</sup>Aug. 26, 1954, ch. 936, 68 Stat. 832; *see also* 46 U.S.C. App. § 1241 - Transportation in American vessels of Government personnel and certain cargoes

<sup>4</sup>Memorandum of the President of the United States, Aug. 7, 1985, 50 F.R. 36565.

<sup>5</sup>DFARS Subpart 247.5.

<sup>6</sup>DFARS 252.247-7023.

<sup>7</sup>Memorandum of Assistant Attorney General Charles Cooper, Office of Legal Counsel, Department of Justice, Feb. 2, 1988.

<sup>8</sup>*Craft Machine Works, Inc. v. U.S.*, 926 F.2d 1110 (U.S.C.A. Fed. Cir., 1991) - reversed a U.S. Claims Court decision which had held that the contract's Cargo Preference Clause required transportation of completed cranes and components on U.S.-flag vessels.

Comment provided through the American Bar Association, Section of International Law, maintained that:

The application of this clause could require, for example, a prime contractor providing commercial automobiles to DOD to flow-down the CPA Clause to a supplier of radios for the automobiles, who, in turn, would be required to flow-down the Clause to the supplier of the radio components. The contract administration burden, alone, could be significant, outweighing any perceptible benefit to DOD to having the commercial components shipped on U.S. vessels.<sup>9</sup>

#### **7.1.8.4. Recommendation and Justification**

**Create exemptions to 10 U.S.C. § 2631 and 46 U.S.C. App. § 1241 for commercial items and simplified acquisitions.**

These statutes are predominately transportation-related and outside of the primary area of the Panel's interest. On the other hand, as stated to the American Bar Association for presentation to the Panel, if these statutes apply beyond final shipment of products to the Government, then they potentially create a substantial impediment to the acquisition of commercial items, whose components will often be on American soil before a contract is received that would attempt retroactively to restrict their transportation to U.S. vessels. Moreover, the Panel believes that it is unduly burdensome to require the administration of this statute for contracts smaller than the simplified acquisition threshold. Accordingly, the Panel recommends in Chapters 4 and 8 that commercial item and simplified acquisitions be exempt from these acts.

#### **7.1.8.5. Relationship to Objectives**

The Panel believes that this section has a tangential relationship to DOD acquisition, and by providing an exemption for commercial items and simplified acquisition, the conduct of DOD acquisition will be streamlined.

---

<sup>9</sup>Letter from Kathleen Troy and Matthew McGrath, Co-Chairs, International Procurement Committee, American Bar Association, Section of International Law, to William E. Mounts, Defense Systems Management College, dated November 16, 1992, enclosing for submission to the Acquisition Law Advisory Panel a letter from Thomas M. Duffy, Corporate Counsel, Fujitsu America, Inc., dated October 20, 1992, concerning comment on the Cargo Preference Act.

## 7.1.9. 10 U.S.C. § 2327

### **Contracts: consideration of national security objectives**

#### **7.1.9.1. Summary of the Law**

This section requires a firm submitting a proposal to disclose any significant interest in the firm owned or controlled, directly or indirectly, by a foreign Government that has provided support for acts of international terrorism. Heads of agencies are precluded from entering into contracts greater than \$100,000 with firms disclosing such ownership or control except when the Secretary of Defense determines such action to be inconsistent with the national security objectives of the United States and subsequently reports that determination to Congress.

#### **7.1.9.2. Background of the Law**

Congress enacted this provision in 1986 because of a conflict between U.S. defense contracting procedures and foreign policy objectives.<sup>1</sup> The actual occurrence giving rise to the statute involved an Italian firm, partially owned by the Libyan Government, ending up as low bidder on a Government defense contract. Award of the contract to the Italian firm, when the Libyan Government was engaged in international terrorist activities against the U.S., was perceived as "inimical to U.S. foreign policy or national security."<sup>2</sup>

#### **7.1.9.3. Law in Practice**

Within DOD, this statutory section is implemented by regulation.<sup>3</sup> Similar provisions were enacted by the Defense Authorization Act of 1993 requiring that: (1) all defense contracts awarded to entities of foreign countries, involving access to a prescribed category of information, be reported to Congress; (2) the purchase of certain U.S. defense contractors by an entity controlled by a foreign Government be prohibited; and (3) the award of certain DOD and Energy Department national security contracts to companies owned by an entity controlled by a foreign Government be similarly prohibited.<sup>4</sup>

#### **7.1.9.4. Recommendations and Justification**

##### **Repeal section 2327.**

The Panel has established an analogous requirement for considering national security in its recommended new section 2x11(a)(9), which provides that national security objectives be considered in the award of DOD contracts for the purchase of foreign goods. The Panel

<sup>1</sup> Added by identical amendments, Pub. L. No. 99-500, 99-591, 99-661, 100 Stat. 1783-164, 3341-164, 3944.

<sup>2</sup> Conf. Rep. 99-661, pg. 270.

<sup>3</sup> DFARS 209.104-1(g) and 225.000-71.

<sup>4</sup> Pub. L. No. 102-484, §§ 835-8, 106 Stat. 2442.

recommends that the new section 2x11(a)(9), as supplemented by the provisions of the Defense Authorization Act of 1993, makes section 2327 redundant.

**7.1.9.5. Relationship to Objectives**

Repeal of this section furthers the Panel objective of streamlining the DOD acquisition laws.

## 7.2. INTERNATIONAL AND COOPERATIVE AGREEMENTS

### 7.2.0. Introduction

The only current procurement authority for the implementation of international and cooperative agreements is the statutory international agreements exception from the requirement, under the Competition in Contracting Act of 1984 (CICA),<sup>1</sup> to utilize other than competitive procedures in the award of U.S. Government contracts.<sup>2</sup> This exception for international agreements is qualified by the recent requirement that before it can be used, an appropriate justification and approval be secured from the competition advocate of the procuring activity concerned.<sup>3</sup>

Title 10 authorities for the implementation of international defense and cooperative agreements are presently contained in Chapters 138<sup>4</sup> and 148.<sup>5</sup> Chapter 138 addresses acquisition, cross-servicing, and cooperative agreements. By DOD Directive, the negotiation and conclusion of these agreements, on behalf of the department or Service concerned, is coordinated and approved between the Under Secretaries of Defense for Acquisition and Policy.<sup>6</sup> Chapter 148, on the other hand, is primarily concerned with the effects of international and cooperative agreements on the U.S. defense industrial base. The Defense Authorization Act of 1993 has completely rewritten this chapter placing responsibility for defense industrial base policies with a new National Defense Technology and Industrial Base Council.<sup>7</sup> The provisions relating to international agreements, offset policy and notification, and domestic source restrictions were, however, retained, renumbered, and placed in a new subchapter entitled "Miscellaneous Technology Base Policies and Programs."<sup>8</sup>

The impact of international cooperation with our allies and defense trade generally has been extensively studied and reported. For example, a recent General Accounting Office report on international procurement agreements pointed up the status of defense trade between the United States and the European allies.<sup>9</sup> Figure 7C., below,

. . . shows the annual U.S. procurements from the thirteen European NATO countries increased from about \$1 billion to approximately \$2.4 billion between the fiscal years 1983 and 1987.

<sup>9</sup>General Accounting Office, Report to Congressional Committees, International Procurement, NATO Allies' Implementation of Reciprocal Defense Agreements, GAO/NSIAD-92-126, March 1992

This figure declined to less than \$2 billion in fiscal year 1988 but rose to a new high of \$2.5 billion in fiscal year 1989.<sup>10</sup>

**Fig. 7C. US and European NATO Countries' Defense Trade Procurement Dollar Flows**

NOTE: European NATO countries' procurements reflect defense ministries' purchases.

The Report concluded that DOD had not adequately addressed recent initiatives in international agreements intended to promote fair treatment in international defense acquisition practice. DOD had also failed to assist U.S. contractors seeking defense business opportunities in Europe. The recently proposed NATO Code of Conduct in Defense Trade would address many of these concerns.

#### 7.2.0.1. NATO Code of Conduct in Defense Trade

Preceding the advent of the Trade Agreements Act of 1979, a whole body of defense trade practice evolved in domestic U.S. acquisition practice under bilateral reciprocal defense procurement agreements.<sup>11</sup> In a speech by former U.S. Ambassador to NATO William H. Taft IV,<sup>12</sup> the issue of a multilateral "Defense GATT" type arrangement for international defense trade was first raised and set the stage for serious discussion of the issue in NATO. The call resulted in the formation of a Defense Trade Study Group whose report led to the proposed Code of Conduct for Defense Trade in NATO.<sup>13</sup> The Code is meant to provide a moral and political commitment to improve the conditions of defense trade. The Code contains an Implementation

<sup>10</sup>*Id.*, at pg. 16

<sup>11</sup>The reciprocal procurement agreements generally address the bilateral removal of barriers to competition, the provision of requirements information, quality assurance, auditing, technology transfer, and methods for addressing potential contract disputes.

<sup>12</sup>Ambassador William H. Taft IV, "The Future of Defense and Industrial Cooperation in NATO", Speech, German Strategy Forum and the Institute for Policy Analysis, Bonn, GE, March 15, 1990.

<sup>13</sup>NATO Code of Conduct in Defense Trade (Draft), July 29, 1992.

Plan for reducing and eliminating barriers to defense trade and transfer of technology, while concurrently instituting transparent and non-discriminatory government defense procurement practices.

Other than basic research, the Code will cover research, development, and production, including in-service support and off-the-shelf contracting.<sup>14</sup> Particular defense procurement practices and procedures deemed essential in the Code include: the non-discriminatory treatment of suppliers within the market; qualification of suppliers; publication of and non-discriminatory access to bidding opportunities; bid solicitation; solicitation/tender evaluation criteria; contractor debrief and dispute settlement procedures; contract auditing procedures; quality control and quality assurance practices and procedures; protection of classified information and data; and intra-alliance technology transfer.<sup>15</sup>

#### **7.2.0.2. Effect of International Cooperative Agreements on the Defense Technology and Industrial Base**

As the world gets closer to addressing the need for a "defense GATT" type multilateral agreement, the effect of such an agreement on our national defense technology and industrial base must be addressed. Chapter 148 of Title 10 currently addresses the process for intra-agency review and coordination of international agreements with respect to the impact of such agreements on the U.S. defense technology and industrial base.<sup>16</sup> Mindful of the extensive revision to the statutes governing the industrial base by the Defense Authorization Act of 1993, the Panel's recommendation is that the National Defense Technology and Industrial Base Council consider fully coordinating their activities with the implementation of the new Chapter on Defense Trade and Cooperation.<sup>17</sup>

It is worthy of note here that the national defense technology and industrial base has now been defined by statute as including both the United States and Canada.<sup>18</sup> Panel deliberations pointed up not only the evolution of a North American defense industrial base, but also the special procurement relationship established by the U.S./Canada Free Trade Agreement of 1988, along with the recently concluded North American Free Trade Agreement. With regard to the latter, a recent report of the Office of Technology Assessment on the defense industrial base<sup>19</sup> highlighted the important defense trade relationship between the United States and Canada. As can be seen from Figure 7D., below,<sup>20</sup> the net defense trade balance between the United States and Canada remains a positive one in favor of the United States.

The special relationship with Canada magnifies the importance of coordinating North American defense technology and industrial base issues with those involving regional and global defense trade and cooperation.

### 7.2.0.3. Overview of Subchapter Recommendations

The Panel has recommended changes to current authorities to increase the flexibility of the Secretary of Defense to enter into cooperative programs. In giving the Secretary authority in this area in the past, the Congress has restricted such flexibility by application of Chapter 137 of Title 10 and of the Arms Export Control Act. In order to better take advantage of cooperative program opportunities, the Secretary of Defense should have the flexibility to better adapt to the acquisition practices, rules, and procedures of our international partners and not have to treat our partners, who contribute a significant portion of a cooperative program costs, as customers pursuant to the sales procedures and rules of the Arms Export Control Act.

A section-by-section summary analysis of subchapter II recommendations follows:

#### Section 2x20. Definitions

In consolidating and reordering the sections concerning international and cooperative agreements, previously resident in disparate chapters of Title 10, various definitions applicable to the subchapter on international and cooperative agreements were consolidated in this section. Consistent with the recommended treatment afforded the various sections by the Panel, the definition of "cooperative research and development project," presently in 10 U.S.C. § 2350a, was deleted. The broader definition of "cooperative project" contained in 10 U.S.C. § 2350i was substituted instead.

Consistent with the consolidation of sections 2350a and 2350b into new section 2x21, the resulting subchapter definition now encompasses cooperative research, development, testing,

evaluation, production, and in-service support, and modifications to existing military equipment to meet U.S. military requirements. As well, the definition of "major ally of the United States" now includes member nations, NATO, and its subsidiary bodies.

A definition for the term "friendly foreign countries" was added. The term was derived from the definition afforded the term in 10 U.S.C. § 4542, which is now consolidated in new section 2x12.

#### **Section 2x21. Defense memoranda of understanding and related international agreements**

This section implements the policies currently found in 10 U.S.C. § 2504 taking into account certain considerations when making and implementing these international agreements, providing for intra-agency review of these agreements, and limiting the entry into such agreements when they would have a significant adverse effect on U.S. industry. The Panel recommended that the term "memorandum of understanding" currently used in section 2504 be expanded to the term "international agreement." The consolidated section 2x21 would thus encompass the Secretary's limitations on entering into such agreements, accompanied by the statutory treatment required of foreign contributions for cooperative projects, as presently contained in 10 U.S.C. § 2350i.

Included within the general framework of authorized international agreements are the reciprocal procurement MOUs that have been negotiated over the years between DOD and twenty-one separate countries. These agreements, previously published as Appendix T to the Defense Federal Acquisition Regulation Supplement, are now collectively maintained in a separate DOD volume.<sup>21</sup>

#### **Section 2x22. Offset policy; notification**

This section remains unchanged from the existing language of 10 U.S.C. § 2505. The Panel recommends retaining the required notification threshold of \$50 million contained in this section despite the recently enacted Defense Production Act Amendments of 1992,<sup>22</sup> which now provide for (1) an annual report on the impact of offsets prepared by the Secretary of Commerce; (2) a notice requirement for U.S. firms entering into a contract for the sale of a weapons system or defense-related item to a foreign country or firm if subject to an offset agreement exceeding \$5 million in value; and (3) consideration of the findings and recommendations in the Secretary of Commerce's annual report during bilateral and multilateral negotiations to minimize the effects of offsets.

#### **Section 2x31. Cooperative projects: allied countries**

The Panel recommendation was to consolidate 10 U.S.C. §§ 2350a and 2350b by creating a new section 2x31 addressing cooperative projects. Retention of the authority given SECDEF under section 2350a, other than the constraint that all U.S. funds be spent in the United States,

<sup>21</sup>Director of Defense Procurement, Reciprocal Procurement Agreements, Department of Defense, 1992.

<sup>22</sup>Pub. L. No. 102-558, 106 Stat. 4198.

combined with the flexibility to waive those provisions of U.S. acquisition law which may impede the successful execution of international cooperative projects, currently extended under section 2350b, provides for a balanced statute which encourages cooperative projects to improve conventional defense capabilities. The consolidation removes the current anomaly in the implementation of sections 2350a and 2350b where cooperative partners contributing equitably to a cooperative project are treated as though they were customers under a foreign military sales case.

Consolidating 10 U.S.C. § 2350b into the new section 2x31 retains the prohibition on the use of military or economic assistance grants or loans for the purpose of satisfying a foreign country's contribution to a cooperative project. The consolidation continues the general applicability of Chapter 137 of Title 10 to cooperative projects, while vesting in the Secretary the ability to waive those provisions necessary to the successful negotiation, conclusion, and execution of cooperative project.

The remaining portion of section 2350b, concerning delegation by the President to the Secretary of Defense of authority to conduct cooperative projects, was deleted in the consolidation by the Panel, as such authority has previously been delegated by Executive Order.<sup>23</sup>

#### **Section 2x32. Cooperative military airlift agreements: allied countries**

This section retains the language of 10 U.S.C. § 2350c; as well as the amendment contained in the Defense Authorization Act of 1993,<sup>24</sup> extending (1) the period for liquidation of accrued credits and liabilities from three months to twelve months consistent with the period provided for in section 2x55, below; and (2) specific country coverage to include agreements with Japan and the Republic of Korea.

#### **Section 2x33. Cooperative logistic support agreements: NATO countries**

This section would amend 10 U.S.C. § 2350d, with respect to Weapons System Partnership Agreements, by deleting subsections (d) and (e) dealing with the applicability of Chapter 137 and the Arms Export Control Act, respectively. These provisions defeated the very purpose for which the statute was originally enacted -- to increase flexibility in contracting under cooperative logistics support agreements with our allies -- and also make the section internally inconsistent, i.e. the authority provided by paragraphs (a), (b), and (c) are abrogated by the restrictions of paragraphs (d) and (e). As well, the applicability of Chapter 137 and the Arms Export Control Act were previously deleted in the recommended treatment afforded cooperative project agreements by the new requirements contained in consolidated sections 2x21 and 2x31, above.

---

<sup>23</sup>Exec. Order No. 11958, Jan. 18, 1977, as amended by Exec. Order No. 12118, Feb. 6, 1979; Exec. Order No. 12163, Sept. 29, 1979; Exec. Order No. 12210, Apr. 16, 1980; Exec. Order No. 12321, Sept. 14, 1981; Exec. Order No. 12365, May 24, 1982; Exec. Order No. 12423, May 26, 1983; Exec. Order No. 12560, May 24, 1986.

<sup>24</sup>Pub. L. No. 102-484, § 1311, 106 Stat. 2442.

**Section 2x34. NATO Airborne Warning and Control System (AWACS) program:  
authority of Secretary of Defense**

This section retains the authority of the Secretary to waive specified procurement practices, contained in 10 U.S.C. § 2350e, NATO AWACS Program, through its recently extended expiration date of September 30, 1993.

**Repeal 10 U.S.C. § 2350h. Memorandums of agreement: Department of Defense  
ombudsman for foreign signatories**

As the role of ombudsman constitutes additional duty for the office concerned, discussions with the DOD Director of Foreign Contracting revealed little or no substantive use made of the services of the ombudsman by foreign governments. Other than a perception by the Israeli Government of a lack of DOD attention to the interests of foreign countries, there appears neither an interest by other Governments in establishing a reciprocal function, nor a wide-spread problem requiring a DOD office of ombudsman for foreign signatories. In times of constrained resources, the Panel did not believe it was appropriate to continue to use DOD funds to unilaterally assist foreign officials to aid their national contractors to compete with U.S. contractors.

## 7.2.1. 10 U.S.C. § 2504 renumbered as § 2531<sup>1</sup>

### Defense memoranda of understanding and related agreements

#### 7.2.1.1. Summary of the Law

This section provides that, in the negotiation or implementation of any memorandum of understanding between the Secretary of Defense, on behalf of the United States, and any foreign countries related to defense research, development, or production, the Secretary of Defense must consider the effect of the agreement on the U.S. defense industrial base and solicit comments from the Secretary of Commerce regarding the commercial effects of such an agreement. The Secretary of Commerce may seek interagency review and recommend to the President the renegotiation of existing agreements if there is a belief that the agreement might adversely effect the international competitiveness of U.S. industry. Such agreements may not be entered into if the President determines that the agreement has unacceptable adverse effects on U.S. industry.

#### 7.2.1.2. Background of the Law

This section was originally enacted by the DOD Authorization Act for 1989<sup>2</sup>, and has the same initial legislative history as section 2501. Initially, the section contained language generally requiring consultation with the Secretary of Commerce on such agreements. Subsequent amendment by the DOD Authorization Act for 1990 and 1991<sup>3</sup> specified greater detail in the role of the Secretary of Commerce in international armaments cooperation agreements, requiring that the Secretary of Defense consider the effects of such agreements on the U.S. defense industrial base.

The DOD Authorization Act for 1991<sup>4</sup> extended the application of this section to include reciprocal defense procurement agreements as international agreements which also must be reviewed by the Secretary of Commerce. The section was renumbered by the Defense Authorization Act of 1993 and placed in the completely revised Chapter 148, renamed "National Defense Technology and Industrial Base, Defense Reinvestment, and Defense Conversion."<sup>5</sup>

#### 7.2.1.3. Law in Practice

Within DOD, this section is implemented by Part 225 of the Defense Federal Acquisition Regulation Supplement<sup>6</sup> and DOD Directive 5530.3.<sup>7</sup> The latter requires an extensive and convoluted process for requesting authority to negotiate or conclude international agreements.

<sup>3</sup>Pub. L. No. 101-189, § 815(a); 103 Stat. 1352, 1500.

<sup>4</sup>Pub. L. No. 101-510, § 1453; 104 Stat. 1485, 1694.

<sup>5</sup>Note 1, *supra*.

<sup>6</sup>DFARS Subparts 225.1 through 225.3.

<sup>7</sup>DOD Directive 5530.3, International Agreements, June 11, 1987.

#### 7.2.1.4. Recommendations and Justification

The Panel has recommended retaining section 2504 as section 2x21 of its proposed statute. As consolidated, the following changes have been made to section 2504:

##### I

Amend section 2504 by replacing "memorandum of understanding" with the phrase "agreement" throughout.

Amend section 2504 throughout by inserting the adjective "international" before the word "agreement."

The Panel recommends that the term "international agreement" replace the term "memorandum of understanding" in section 2504 as the latter is merely a type of international agreement; for included within the general framework of authorized MOUs are the reciprocal procurement MOUs that have been negotiated over the years between DOD and twenty-one separate countries. These agreements previously published as Appendix T to the Defense Acquisition Regulation Supplement are now collectively maintained in a separate DOD volume.<sup>8</sup> It would seem that Congress intended to cover the broader scope of international agreements if the intra-agency review function is to have its full effect.<sup>9</sup> Continued use of the term "memorandum of understanding," therefore, generates confusion as to the coverage intended by the statute.

##### II

Amend section 2504 throughout, in the phrase "research, development, or production", by striking the word "or" and by adding the term ", or logistic support" after the word "production."

For purposes of new subchapter II, *International and Cooperative Agreements*, the term "cooperative project" is now defined in section 2x20. The recommended amendment achieves consistency with section 2x20, because not only does the term as now defined include in-service support, but also included would be new section 2x33<sup>10</sup> which specifically addresses *Cooperative Logistic Support Agreements*.

---

<sup>8</sup>Director of Defense Procurement, *Reciprocal Procurement Agreements*, Department of Defense, 1992.

<sup>9</sup>However, international agreements does not include agreements such as Letters of Offer and Acceptance (LOAs) entered into during cases established under foreign military sales (FMS) practice, DOD Directive 5530.3, June 11, 1987. Note: Letters from John A. Richards, Deputy Assistant Secretary for Industrial Resource Administration, Department of Commerce, Bureau of Export Administration, dated August 27, and November 9, 1992 requested that LOAs be included within the definition of international agreements.

<sup>10</sup>Currently 10 U.S.C. § 2350d.

### 7.2.1.5. Relationship to Objectives

Amendment of this statute helps to establish a balance between an efficient process, the preservation of the national defense technology and industrial base, while ensuring full and open access to procurement systems intrinsic to international defense trade and cooperation.

### 7.2.1.6. Proposed Statute

#### §2x21. [2504/2531]. Defense memoranda of understanding and related international agreements

(a) CONSIDERATIONS IN MAKING AND IMPLEMENTING ~~MOUS AND RELATED INTERNATIONAL AGREEMENTS.~~--In the negotiation, renegotiation, and implementation of any existing or proposed international agreement, including a memorandum of understanding, ~~or any existing or proposed agreement related to a memorandum of understanding~~, between the Secretary of Defense, acting on behalf of the United States, and one or more foreign countries (or any instrumentality of a foreign country) relating to research, development, ~~or production, or logistics support~~ of defense equipment, or to the reciprocal procurement of defense items, the Secretary of Defense shall--

(1) consider the effects of such existing or proposed ~~memorandum of understanding or related international agreement~~ international agreement on the national defense technology and industrial base of the United States; and

(2) regularly solicit and consider comments and recommendations from the Secretary of Commerce with respect to the commercial implications of such ~~memorandum of understanding or related international agreement~~ international agreement and the potential effects of such ~~memorandum of understanding or related international agreement~~ international agreement on the international competitive position of United States industry.

(b) INTER-AGENCY REVIEW OF EFFECTS ON UNITED STATES INDUSTRY.--Whenever the Secretary of Commerce has reason to believe that an existing or proposed ~~memorandum of understanding or related international agreement~~ international agreement has, or threatens to have, a significant adverse effect on the international competitive position of United States industry, the Secretary may request an inter-agency review of the ~~memorandum of understanding or related international agreement~~ international agreement. If, as a result of the review, the Secretary determines that the commercial interests of the United States are not being served or would not be served by adhering to the terms of such existing ~~memorandum or related international agreement~~ international agreement or agreeing to such proposed ~~memorandum or related international agreement~~ international agreement, as the case may be, the Secretary shall recommend to the President the renegotiation of the existing ~~memorandum or related international agreement~~ international agreement or any modification to the proposed ~~memorandum of understanding or related international agreement~~ international agreement that he considers necessary to ensure an appropriate balance of interests.

(c) LIMITATION ON ENTERING INTO ~~MOUs AND RELATED~~ INTERNATIONAL AGREEMENTS.--~~An memorandum of understanding or related international~~ agreement referred to in subsection (a) may not be entered into or implemented if the President, taking into consideration the results of the interagency review, determines that such ~~memorandum of understanding or related international~~ agreement has or is likely to have a significant adverse effect on United States industry that outweighs the benefits of entering into or implementing such ~~memorandum of international~~ agreement.

## **7.2.2. 10 U.S.C. § 2505 renumbered as § 2532<sup>1</sup>**

### **Offset policy; notification**

#### **7.2.2.1. Summary of the Law**

This section provides that the President shall establish a comprehensive policy regarding defense-related offset agreements in contracts for the sale of U.S. defense items. The policy must address technology transfer issues, and issues regarding the implementation and effect of such agreements on the defense industrial base.<sup>2</sup>

Specifically, the section prohibits memoranda of understanding that would transfer U.S. defense technology pursuant to an offset where the implementation of such an agreement would adversely affect the U.S. defense industrial base and result in a substantial domestic financial loss. An exception is provided where such agreements would strengthen U.S. national security.<sup>3</sup>

The section further provides that a U.S. firm may protest to the Secretary of Defense a required technology transfer on the grounds that it would adversely affect the U.S. defense industrial base and result in significant financial loss. Finally, the section requires notification to the Secretary of Defense of proposed international sales with offset arrangements exceeding \$50,000,000; and provides definitions of "United States firm" and "foreign firm."

#### **7.2.2.2. Background of the Law**

This section was originally enacted by the DOD Authorization Act for 1989<sup>4</sup> as part of extensive provisions relating to the defense industrial base. The Senate version of that bill originally assigned these responsibilities jointly to the Secretaries of Defense, Commerce, State, and Treasury, and the U.S. Trade Representative.<sup>5</sup> In conference, the House receded with an amendment assigning them to the President, after consultation with the enumerated officials.<sup>6</sup> The conferees noted that the reporting requirements were not intended to duplicate, but rather incorporate, information already provided by other reporting requirements, such as those contained in the Defense Production Act.<sup>7</sup>

<sup>1</sup>Pub. L. No. 102-484, § 4202(a), 106 Stat. 2315, 2659.

<sup>2</sup>10 U.S.C. § 2505(a).

<sup>3</sup>10 U.S.C. § 2505(b). *See also* DFARS 225-7307, Implementation of offset arrangements negotiated pursuant to foreign military sales agreements.

<sup>4</sup>Pub. L. No. 100-456, 102 Stat. 2014.

<sup>5</sup>S. Rep. No. 100-326, 100th Congress, 2nd Sess. 106.

<sup>6</sup>H. Rept. 100-989, 100th Congress, 2nd Sess. 430.

<sup>7</sup>50 U.S.C. App. § 2099: *as amended* by the Defense Production Act Amendments of 1992, Pub. L. No. 102-558, 106 Stat. 4198, which now provide for (1) an annual report on the impact of offsets prepared by the Secretary of Commerce; (2) a notice requirement for U.S. firms entering into a contract for the sale of a weapons system or defense-related item to a foreign country or firm if subject to an offset agreement exceeding \$5 million in value; and (3) consideration of the findings and recommendations of the annual report during bilateral and multilateral negotiations to minimize the effects of offsets.

The section was renumbered by the Defense Authorization Act of 1993 and placed in the completely revised Chapter 148, renamed "National Defense Technology and Industrial Base, Defense Reinvestment, and Defense Conversion."<sup>8</sup>

### **7.2.2.3. Law in Practice**

Pursuant to the reporting provisions of the statute, as implemented by Executive Order, the responsibility for submission of annual reports on the impact of offsets has been delegated to the Director of the Office of Management and Budget.<sup>9</sup> Although only two such reports had been submitted by 1990, deficiencies at the time included a failure to address technology transfer and the effect of offsets on specific subsectors of the domestic economy.<sup>10</sup>

The 1991 Report does not correct these deficiencies; however, the Report does indicate that progress toward minimizing the effects of offsets was being made internationally.<sup>11</sup> The report noted that, within DOD, the issue of offsets was being pursued in the negotiation and re-negotiation of cooperative agreements and bilateral reciprocal procurement memoranda of understanding. Also noted was the North Atlantic Treaty Organization's Working Group on Defense Trade whose efforts have resulted in a draft NATO Code of Conduct in Defense Trade calling for the elimination of offsets.

### **7.2.2.4. Recommendations and Justification**

#### **Retain section 2505.**

The Panel recommended that section 2505 be retained as sections 2x20 (definitions) and 2x22 of the Panel's consolidated chapter on defense trade and cooperation, as it continues to adequately serve a valid defense acquisition purpose by requiring an analysis by the Secretary of Defense of the impact of offsets on the defense industrial base.

### **7.2.2.5. Relationship to Objectives**

Retention of this statute helps to establish a balance between an efficient process and the preservation of the national defense technology and industrial base, while ensuring full and open access to procurement systems intrinsic to international defense trade and cooperation.

<sup>11</sup>Office of Management and Budget, Negotiations Concerning Offsets in Military Exports, June 21, 1991.

## **7.2.2.6. Proposed Statute**

### **§ 2x22. [2505/2532]. Offset policy; notification**

(a) **ESTABLISHMENT OF OFFSET POLICY.**--The President shall establish, consistent with the requirements of this section, a comprehensive policy with respect to contractual offset arrangements in connection with the purchase of defense equipment or supplies which addresses the following:

(1) Transfer of technology in connection with offset arrangements.

(2) Application of offset arrangements, including cases in which United States funds are used to finance the purchase by a foreign government.

(3) Effects of offset arrangements on specific subsectors of the industrial base of the United States and for preventing or ameliorating any serious adverse effects on such subsectors.

(b) **TECHNOLOGY TRANSFER.**--(1) No official of the United States may enter into a memorandum of understanding or other agreement with a foreign government that would require the transfer of United States defense technology to a foreign country or a foreign firm in connection with a contract that is subject to an offset arrangement if the implementation of such memorandum or agreement would significantly and adversely affect the defense industrial base of the United States and would result in a substantial financial loss to a United States firm.

(2) Paragraph (1) shall not apply in the case of a memorandum of understanding or agreement described in paragraph (1) if the Secretary of Defense, in consultation with the Secretary of Commerce and the Secretary of State, determines that a transfer of United States defense technology pursuant to such understanding or agreement will result in strengthening the national security of the United States and so certifies to Congress.

(3) If a United States firm is required under the terms of a memorandum of understanding, or other agreement entered into by the United States with a foreign country, to transfer defense technology to a foreign country, the United States firm may protest the determination to the Secretary of Defense on the grounds that the transfer of such technology would adversely affect the defense industrial base of the United States and would result in substantial financial loss to the protesting firm. The Secretary of Defense, in consultation with the Secretary of Commerce and the Secretary of State, shall make the final determination of the validity of the protesting firm's claim.

(c) **NOTIFICATION REGARDING OFFSETS.**--If at any time a United States firm enters into a contract for the sale of a weapon system or defense-related item to a foreign country or foreign firm and such contract is subject to an offset arrangement exceeding \$50,000,000 in value, such firm shall notify the Secretary of Defense of the proposed sale. Notification shall be made under this subsection in accordance with regulations prescribed by the Secretary of Defense in consultation with the Secretary of Commerce.

### **7.2.3. 10 U.S.C. § 2350a**

#### **Cooperative research and development projects: allied countries**

##### **7.2.3.1. Summary of the Law**

The Secretary of Defense is permitted to enter into memoranda of agreement or other international agreements with major allied countries of the United States for conducting research and development projects involving defense equipment and munitions as long as the cost arrangements of the project are equitably shared. In such cooperative projects, U.S. funds may not be used to procure foreign equipment or services nor may the allied contribution be derived from U.S. military or economic assistance grants, loans, or other funding. The statute also provides authority for side-by-side testing of allied and U.S. conventional defense equipment, munitions, and technologies by the Deputy Director, Defense Research and Engineering (Test and Evaluation) in satisfaction of U.S. military requirements thereby encouraging our major allies to establish reciprocal programs.

In order to ensure that opportunities for cooperative research and development are adequately considered at an early stage in the acquisition process, the statute requires DOD to prepare an arms cooperation opportunities document (previously referred to as CODS; now a part of the integrated program summary report) for project review by the Defense Acquisition Board. The Undersecretary of Defense (Acquisition) ensures that the arms cooperation document is an integral part of the project's Mission Needs Statement.

Provision is made for both the Secretaries of Defense and State to jointly submit designation, and the criteria for designation, of major non-NATO allies for purposes of entering into cooperative research and development programs.

##### **7.2.3.2. Background of the Law**

Although originally established as the NATO Cooperative Research and Development Program,<sup>1</sup> this statutory section was added to Chapter 138 of Title 10 by section 931 (a)(2) of the Defense Authorization Act of 1990-1991.<sup>2</sup> It consolidated two previously existing statutes concerning, respectively, NATO and non-NATO cooperative programs and the two previous program elements entitled "Foreign Weapons Evaluation" and "NATO Cooperative Development Testing." Section 1053 of the Defense Authorization Act of 1992-1993 subsequently amended the statute by inserting language to provide for cooperative and side-by-side testing projects with other friendly foreign countries as well as major allies of the United States.<sup>3</sup> Section 843 of the Defense Authorization Act of 1993 amended subsection (c) by adding authority for the equitable sharing of the costs of claims.<sup>4</sup>

<sup>1</sup>Pub. L. No. 99-145, 99 Stat. 741.

<sup>2</sup>Pub. L. No. 101-189, § 931(a)(2), 103 Stat. 1352, 1531.

<sup>3</sup>Pub. L. No. 102-190, § 1053, 105 Stat. 1290, 1471.

<sup>4</sup>Pub. L. No. 102-484, § 843, 106 Stat. 2315, 2468.

The objective of this statute was to encourage cooperative research and development projects for conventional defense capabilities among both NATO and non-NATO allies, and subsequently expanded to include friendly foreign countries.<sup>5</sup> In addition to NATO allies, such friendly foreign countries presently include Australia, Egypt, Israel, Japan, and the Republic of Korea.<sup>6</sup> The rationale was that through such cooperative projects duplication of effort would be avoided, resulting in lower unit costs through an equitable sharing of the research and development. Where cooperative research and development projects were accompanied by larger joint production quantities, the supporting rationale was that each participant's overall defense budget would be enhanced.

### **7.2.3.3. Law in Practice**

This section is implemented by DOD Directive<sup>7</sup> and DFARS subpart 225.8.

For many years DOD and the Services relied upon statutory research and development authorities of the Secretary of Defense<sup>8</sup> and the military departments<sup>9</sup> along with the constitutional powers of the President to enter into cooperative R&D agreements with other Governments. Section 2350a(a) clearly provides authority that DOD formerly inferred from these authorities; however, use of this authority is subject to certain restrictions which have not applied to the previously inferred authority.

Cooperative research and development is an important segment of the defense acquisition process. The criteria DOD utilizes in approving cooperative research and development projects include: (a) improve current U.S. defense posture and capabilities; (b) secure follow-on support from within the Service or Agency; (c) demonstrate equity in funding with the allied participant(s) in a memorandum of understanding; and (d) address satisfactorily technology transfer and defense industrial base considerations to ensure sufficient benefits accrue to the U.S. defense industrial and technology base.<sup>10</sup>

While section 2350a specifically authorizes cooperative research and development projects that improve conventional defense capabilities, there are restrictions on the procurement of equipment and services under this authority which are not contained in section 2350b. In order to assure substantial participation in these projects, the restrictions are that funds made available for any authorized project may not be used to procure equipment or services from any foreign Government, research organization, or other foreign entity and that military or economic assistance grants, loans, or other funds may not constitute the allies' contribution to the project.

<sup>7</sup>DOD Directive 3100.3, Cooperation with Allies in Research and Development of Defense Equipment.

<sup>8</sup>10 U.S.C. § 2358.

<sup>9</sup>10 U.S.C. §§ 4503, 7203, and 9503.

<sup>10</sup>Note 6, *supra*, at pgs. 5-6.

A consolidation of the two statutes must, of necessity, address the retention of these restrictions.<sup>11</sup>

#### **7.2.3.4. Recommendations and Justification**

### **I**

**Amend section 2350a throughout by striking the phrases "research and development" and "R&D" after the word "cooperative" and before the word "project;" and by striking subclause (h)(i)(1).**

By Executive Order, and under provision of section 2350b,<sup>12</sup> the Secretary of Defense has been delegated the authority to engage in joint production projects under section 27 of the Arms Export Control Act. This amendment would statutorily recognize the existing delegation and, consistent with the proposed Panel consolidation of sections 2350a and 2350b, as recommended below, obviate further need for the duplicative referrals to section 27 of the Arms Export Control Act.

For purposes of new subchapter II, *International and Cooperative Agreements*, the term "cooperative project" is now defined in section 2x20 using the definition presently contained in 10 U.S.C. § 2350i(e). The Panel recommended striking subparagraph (h)(i)(1) of section 2350a as redundant.

### **II**

**Amend subsection (d) by striking in the heading the phrase "Restrictions on procurement of " and inserting in lieu thereof the phrase "Acquisition of defense"; and by striking paragraph (1).**

Although the United States has entered into numerous cooperative R&D projects with its allies under both the inherent authority cited above and section 27 of the Arms Export Control Act, the process has not been an easy one. To a greater degree than its allies, the United States must operate under a number of restrictions [e.g. Arms Export Control Act, the Competition in Contracting Act, the "Buy U.S." provision of section 2350a(d), among others] that make reaching agreement with our allies difficult. The United States must insist that such restrictions be incorporated into any agreement and are complied with, while our partners point out that they are sovereign nations providing an equitable share of the cost of the project. As such, our allies often object to our restrictions and, in fact, insist on such offsetting principles as work share corresponding to cost share -- meaning work in their countries corresponding to their funding contribution. In the past DOD has overcome such obstacles by applying pressure to our partners

---

<sup>11</sup>Memorandum from Larry D. Anderson, LTC, JAGC, Legal Officer, U.S. Army Materiel Command, to William E. Mounts, DSMC CM-AI, dated 1 September 1992.

<sup>12</sup>See analysis for 10 U.S.C. § 2350b, section 7.2.4. of this Chapter.

and insisting that the prime contractor be charged with dividing the work by applying evaluation criteria to score how well the competing prime contractors complied with this requirement.

In those cases funded under section 2350a and its predecessor provisions, the United States must ensure that all funding goes to U.S. sources and in-house effort. This reduces U.S. flexibility in negotiating international R&D projects, especially in those situations where the U.S. equitable share may be greater than those of our allied partners. In the past, as well, when the U.S. enjoyed a dominant role, pressure could be applied to our allies to get them to accept our restrictions. In the future, however, this is most likely not going to be the case, and to the extent that greater use is to be made of cooperative projects, the U.S. requires the flexibility to accommodate the valid concerns and requirements of our partners. Accordingly, the Panel recommends the repeal of paragraph 2350a(d)(1).

### III

#### **Consolidate sections 2350a and 2350b as new section 2x31**

The Panel recommends the consolidation of sections 2350a with section 2350b, as new section 2x31, *Cooperative Projects: Allied Countries*. This consolidation would provide complete authority and flexibility to the Secretary of Defense to conduct cooperative projects in Title 10 without the need for reference to section 27 of the Arms Export Control Act. The authority to conduct cooperative production projects is added to the authority to conduct cooperative research and development projects, now in section 2350a, combined with the flexibility to waive those provisions of U.S. law which may impede the successful execution of international cooperative projects, as well as other authorities now in section 2350b.

Conducting cooperative programs solely under the auspices of section 27 of the Arms Export Control Act ties such projects to that Act and its procedures and sales philosophies, with the unfortunate result that our partners who jointly fund a cooperative project are often placed in the position of customers rather than partners. Cooperative project authority outside the Arms Export Control Act will allow DOD to execute cooperative projects outside the foreign military sales structure.

While the Panel cannot point to an instance where a cooperative project could not be concluded because of current restrictions and foreign military sales procedures, there are numerous instances where our major allies have complained bitterly about the application of U.S. rules and foreign military sales procedures to jointly funded cooperative projects.<sup>13</sup> To the extent that DOD is to emphasize cooperative projects in the future, and to the extent that the United States may no longer be able to impose its requirements as the dominant partner, DOD should be given greater flexibility to accommodate the requirements of our partners.

---

<sup>13</sup> Anecdotal reference related by Anthony Gamboa, Panel member, concerning his personal experiences during international cooperative project negotiations on the Multiple Launch Rocket System (MLRS), between France, Germany, the United Kingdom, and the United States, and on Autonomous Guided Munitions, between several NATO member nations, and the experience of the Army in negotiating the Future Tank Main Armament Agreement with France, Germany, and the United Kingdom.

#### IV

### **Consolidate definitions contained in clause 2350a(i) into new section 2x20.**

In an effort to streamline and consolidate international defense acquisition statutes into a new Chapter 1XX, *Defense Trade and Cooperation*, all definitions relative to subchapter II, *International and Cooperative Agreements*, have been relocated to an introductory new section 2x20, *Definitions*.

#### **7.2.3.5. Relationship to Objectives**

Amendment and consolidation of these sections would establish a balance between an efficient process with full and open access to the procurement system in international defense cooperative projects.

#### **7.2.3.6. Proposed Statute**

~~§2x31 Sec. 2350a, 2350b.~~ **Cooperative research and development projects: allied countries**

##### **(a) Authority to engage in cooperative R&D projects**

The Secretary of Defense may enter into a memorandum of understanding (or other formal agreement) with one or more major allies of the United States for the purpose of conducting cooperative ~~research and development~~ projects on defense equipment and munitions.

##### **(b) Requirement that projects improve conventional defense capabilities**

(1) The Secretary of Defense may not enter into a memorandum of understanding (or other formal agreement) to conduct a cooperative ~~research and development~~ project under this section unless the Secretary determines that the proposed project will improve, through the application of emerging technology, the conventional defense capabilities of NATO or the common conventional defense capabilities of the United States and its major non-NATO allies.

(2) The authority of the Secretary to make a determination under paragraph (1) may only be delegated to the Deputy Secretary of Defense or the Under Secretary of Defense for Acquisition.

##### **(c) Cost sharing**

Each cooperative ~~research and development~~ project entered into under this section shall require sharing of the costs of the project (including the costs of claims) between the participants on an equitable basis.

(d) ~~Restrictions on procurement of~~ Acquisition of defense equipment and services

~~(1) In order to assure substantial participation on the part of the major allies of the United States in cooperative research and development projects, funds made available for such projects may not be used to procure equipment or services from any foreign government, foreign research organization, or other foreign entity.~~

(1)(2) A major ally of the United States may not use any military or economic assistance grant, loan, or other funds provided by the United States for the purpose of making that ally's contribution to a cooperative ~~research and development~~ program entered into with the United States under this section.

(2)(A) Except as provided in ~~subsection (e) subparagraph (C)~~, chapter 137 of this title shall apply to ~~such contracts (referred to in paragraph (1)) entered into~~ contracts for the acquisition of defense equipment and services by the Secretary of Defense. Except to the extent waived under ~~subsection (e) subparagraph (C) of this subsection~~ or some other provision of law, all other provisions of law relating to procurement, if otherwise applicable, shall apply to such contracts entered into by the Secretary of Defense.

~~(B) (b)~~ When contracting or incurring obligations ~~under section 27(d) of the Arms Export Control Act~~ for cooperative projects, the Secretary of Defense may require subcontracts to be awarded to particular subcontractors in furtherance of the cooperative project.

~~(C) (e)~~ (1) Subject to paragraph (2), when entering into contracts or incurring obligations ~~under section 27(d) of the Arms Export Control Act~~ outside the United States, the Secretary of Defense may waive with respect to any such contract or subcontract the application of any provision of law, other than a provision of the Arms Export Control Act or section 2304 of this title, that specifically--

(i) ~~(A)~~ prescribe procedures to be followed in the formation of contracts;

(ii) ~~(B)~~ prescribe terms and conditions to be included in contracts;

(iii) ~~(C)~~ prescribe requirements for or preferences to be given to goods grown, produced, or manufactured in the United States or in United States Government-owned facilities or for services to be performed in the United States; or

(iv) ~~(D)~~ prescribe requirements regulating the performance of contracts.

(2) A waiver may not be made under paragraph (1) unless the Secretary determines that the waiver is necessary to ensure that the cooperative project will significantly further standardization, rationalization, and interoperability.

(3) The authority of the Secretary to make waivers under this subsection may be delegated only to the Deputy Secretary of Defense or the Acquisition Executive designated for the Office of the Secretary of Defense.

~~(D)(e)~~(1) In carrying out a cooperative project under ~~section 27 of the Arms Export Control Act~~, the Secretary of Defense may agree that a participant (other than the United States) may make a contract for requirements of the United States under the project if the Secretary determines that such a contract will significantly further standardization, rationalization, and interoperability. Except to the extent waived under this section or under any other provision of law, the Secretary shall ensure that such contract will be made on a competitive basis and that United States sources will not be precluded from competing under the contract.

(2) If a participant (other than the United States) in a cooperative project makes a contract on behalf of such project to meet the requirements of the United States, the contract may permit the contracting party to follow its own procedures relating to contracting.

~~(e)(f)~~ In carrying out a cooperative project, the Secretary of Defense may also agree to the disposal of property that is jointly acquired by the members of the project without regard to any laws of the United States applicable to the disposal of property owned by the United States. Disposal of such property may include a transfer of the interest of the United States in such property to one of the other governments participating in the cooperative agreement or the sale of such property. Payment for the transfer or sale of any interest of the United States in any such property shall be made in accordance with the terms of the cooperative agreement.

~~(f)(g)~~ Nothing in this section shall be construed as authorizing--

(1) the Secretary of Defense to waive any of the financial management responsibilities administered by the Secretary of the Treasury; or

(2) to waive the cargo preference laws of the United States, including section 2631 of this title and section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. App. 1241(b)).

~~(g)(e)~~ Cooperative opportunities document

(1)(A) In order to ensure that opportunities to conduct cooperative ~~research and development~~ projects are considered at an early point during the formal development review process of the DOD in connection with any planned project of the Department, the Under Secretary of Defense for Acquisition shall prepare an arms cooperation opportunities document with respect to that project for review by the Defense Acquisition Board at formal meetings of the Board.

(B) The Under Secretary shall also prepare an arms cooperation opportunities document for review of each new project for which a document known as a Mission Need Statement is prepared.

(2) An arms cooperation opportunities document referred to in paragraph (1) shall include the following:

(A) A statement indicating whether or not a project similar to the one under consideration by the Department of Defense is in development or production by one or more of the major allies of the United States.

(B) If a project similar to the one under consideration by the Department of Defense is in development or production by one or more major allies of the United States, an assessment by the Under Secretary of Defense for Acquisition as to whether that project could satisfy, or could be modified in scope so as to satisfy, the military requirements of the project of the United States under consideration by the Department of Defense.

(C) An assessment of the advantages and disadvantages with regard to program timing, developmental and life cycle costs, technology sharing, and Rationalization, Standardization, and Interoperability (RSI) of seeking to structure a cooperative development program with one or more major allies of the United States.

(D) The recommendation of the Under Secretary as to whether the Department of Defense should explore the feasibility and desirability of a cooperative development program with one or more major allies of the United States.

**(h)(~~F~~) Reports to Congress**

(1) Not later than March 1 of each year, the Under Secretary of Defense for Acquisition shall submit to the Speaker of the House of Representatives and the Committees on Armed Services and Appropriations of the Senate a report on cooperative ~~research and development~~ projects under this section. Each such report shall include--

(A) a description of the status, funding, and schedule of existing projects carried out under this section for which memoranda of understanding (or other formal agreements) have been entered into; and

(B) a description of the purpose, funding, and schedule of any new projects proposed to be carried out under this section (including those projects for which memoranda of understanding (or other formal agreements) have not yet been entered into) for which funds have been included in the budget submitted to Congress pursuant to section 1105 of Title 31 for the fiscal year following the fiscal year in which the report is submitted.

(2) The Secretary of Defense and the Secretary of State, whenever they consider such action to be warranted, shall jointly submit to the Committees on Armed Services and Foreign Relations of the Senate and to the Committees on Armed Services and Foreign Affairs of the House of Representatives a report--

(A) enumerating those countries to be added to or deleted from the existing designation of countries designated as major non-NATO allies for purposes of this section; and

(B) specifying the criteria used in determining the eligibility of a country to be designated as a major non-NATO ally for purposes of this section.

~~(3)(A)(d)(1)~~ (1) The Secretary of Defense shall notify the Congress each time he requires that a prime contract be awarded to a particular prime contractor or that a subcontract be awarded to a particular subcontractor to comply with a cooperative agreement. The Secretary shall include in each such notice the reason for exercising his authority to designate a particular contractor or subcontractor, as the case may be.

~~(B)(2)~~ (2) The Secretary shall also notify the Congress each time he exercises a waiver under subsection (c) and shall include in such notice the particular provision or provisions of law that were waived.

~~(i)(g)~~ Side-by-side testing

(1) It is the sense of Congress--

(A) that the Secretary of Defense should test conventional defense equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries to determine the ability of such equipment, munitions, and technologies to satisfy United States military requirements or to correct operational deficiencies; and

(B) that while the testing of nondevelopmental items and items in the late state of the development process are preferred, the testing of equipment, munitions, and technologies may be conducted to determine procurement alternatives.

(2) The Secretary of Defense may acquire equipment, munitions, and technologies of the type described in paragraph (1) for the purpose of conducting the testing described in that paragraph.

(3) The Deputy Director, Defense Research and Engineering (Test and Evaluation) shall notify the Speaker of the House of Representatives and the Committees on Armed Services and on Appropriations of the Senate of the Deputy Director's intent to obligate funds made available to carry out this subsection not less than 30 days before such funds are obligated.

(4) The Secretary of Defense shall submit to Congress each year, not later than March 1, a report containing information on--

(A) the equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries that were evaluated under this subsection during the previous fiscal year;

(B) the obligation of any funds under this subsection during the previous fiscal year; and

(C) the equipment, munitions, and technologies that were tested under this subsection and procured during the previous fiscal year.

~~(j)(h)~~ Secretary to encourage similar programs

The Secretary of Defense shall encourage major allies of the United States to establish programs similar to the one provided for in this section.

~~(i) Definitions--In this section:~~

~~(1) The term "cooperative research and development project" means a project involving joint participation by the United States and one or more major allies of the United States under a memorandum of understanding (or other formal agreement) to carry out a joint research and development program--~~

~~(A) to develop new conventional defense equipment and munitions; or~~

~~(B) to modify existing military equipment to meet United States military requirements.~~

[Consolidate into new section 2x20.]

(2) The term "major ally of the United States" means--

(A) a member nation of the North Atlantic Treaty Organization (other than the United States); or

(B) a major non-NATO ally.

(3) The term "major non-NATO ally" means a country (other than a member nation of the North Atlantic Treaty Organization) that is designated as a major non-NATO ally for purposes of this section by the Secretary of Defense with the concurrence of the Secretary of State.

## **7.2.4. 10 U.S.C. § 2350b**

### **Cooperative projects under Arms Export Control Act: acquisition of defense equipment**

#### **7.2.4.1. Summary of the Law**

As delegated by the President<sup>1</sup>, the Secretary of Defense (SECDEF) is authorized to administer cooperative projects carried out under the auspices of the Arms Export Control Act.<sup>2</sup> The authority to administer contracts and obligations incurred in such projects is to be generally covered by Chapter 137 of Title 10 except where SECDEF, in furtherance of rationalization, standardization, and interoperability (RSI), specifically waives: (a) procedures to be followed in the formation of contracts; (b) terms and conditions to be included in contracts; (c) requirements for domestic source restrictions or product/services preferences; or (d) requirements for regulating the performance of contracts.

SECDEF is further permitted to allow a participant in a cooperative project to contract for U.S. requirements if a determination is made that the contract will significantly further RSI. However, if such a contract is contemplated, it must be made on a competitive basis and U.S. sources are not to be precluded from competing under the contract unless a waiver has been granted by SECDEF. As an alternative, the participant is also permitted to follow its own procedures relating to contracting. Provision in the statute is made for the disposal of property which is jointly acquired under the project, including transfer or sale of the U.S. interest to the other participants, without regard to U.S. laws normally applicable to the disposal of U.S. property.

The only limitations imposed on SECDEF's procurement waiver authority in cooperative projects are: (1) those financial management responsibilities administered by the Secretary of the Treasury; and (2) the cargo preference laws of the United States.

#### **7.2.4.2. Background of the Law**

The original section was added to Chapter 138 of Title 10 as the "NATO cooperative projects" provision by section 1102(b)(1) of the Defense Authorization Act of 1986.<sup>3</sup> Then sections 1103(b)(1) and (2)(A) of the Defense Procurement Improvement Act of 1986<sup>4</sup> amended the provisions of section 27 of the Arms Export Control Act to extend authority for NATO cooperative projects to projects with other friendly countries, and was originally codified as the "Non-NATO cooperative projects" provision limited in scope to Australia, Israel, Japan, and the

<sup>1</sup>Exec. Order No. 11958, Jan. 18, 1977, *as amended* by Exec. Order No. 12118, Feb. 6, 1979; Exec. Order No. 12163, Sept. 29, 1979; Exec. Order No. 12210, Apr. 16, 1980; Exec. Order No. 12321, Sept. 14, 1981; Exec. Order No. 12365, May 24, 1982; Exec. Order No. 12423, May 26, 1983; Exec. Order No. 12560, May 24, 1986.

<sup>2</sup>22 U.S.C. § 2767(d).

<sup>3</sup>Pub. L. No. 99-145, 99 Stat. 710.

<sup>4</sup>Pub. L. No. 99-661, 100 Stat. 3963, 3993.

Republic of Korea. Subsequent amendment by section 931 of the Defense Authorization Act of 1990-1991<sup>5</sup> merged two existing program element provisions into a single section of Title 10,<sup>6</sup> while renumbering this section as 2350b, and adapting the section heading to its current title.

#### **7.2.4.3. Law in Practice**

Implementation of cooperative agreements by the SECDEF under DFARS Subpart 225.8 and provisions of section 27 of the Arms Export Control Act specifically permit: (a) the use of cooperative participant requirements that subcontracts be awarded to particular subcontractors; (b) agreement that disposal of jointly acquired property be accomplished without regard to standard U.S. property disposal laws; and (c) waiver of the applicability of certain acquisition laws during the conduct of the cooperative project. In the latter regard, specific authority is granted to waive procedures in the formation of contracts, contract terms and conditions, domestic source restrictions, domestic product preferences, and requirements regulating the performance of contracts.<sup>7</sup> A comment from the U.S. Navy requested that the waiver authority under section 2350b should be extended to cooperative projects conducted under the authority of section 2350a.<sup>8</sup>

As well, section 2350b specifically authorizes cooperative research and development projects, while delegated the SECDEF authority under section 27 of the Arms Export Control Act recognizes the additional grant to enter into joint production projects. It has always been a legislative anomaly that the SECDEF was directly authorized to conduct cooperative research and development projects under provisions of section 2350a; but for the SECDEF to engage in joint production projects, resort had to be made to delegated 2350b authority derived from section 27 of the Arms Export Control Act.

#### **7.2.4.4. Recommendations and Justification**

##### **I**

**Amend section 2350b by striking paragraph (a)(1) and paragraph (d)(3); and in paragraph (a)(2), by striking the phrase "such contracts (referred to in paragraph (1)) entered into" and inserting in lieu thereof the phrase "contracts for the acquisition of defense;" and by redesignating paragraph (a)(2) as paragraph (2); and by striking throughout the phrase "under section 27(d) of the Arms Export Control Act."**

By Executive Order, the Secretary of Defense has been delegated the authority to engage in cooperative research and development projects and fulfill the reporting requirements under

<sup>5</sup>Pub. L. No. 101-189, 103 Stat. 1352, 1531.

<sup>6</sup>10 U.S.C. § 2350a.

<sup>7</sup>10 U.S.C. § 2350b(c)(1).

<sup>8</sup>Memorandum for the Executive Secretary, DOD Advisory Panel on Streamlining and Codifying Law, from Victoria M. Herman, Assistant Counsel, Navy International Programs Office, dated 17 September 1992.

section 27 of the Arms Export Control Act. This amendment would statutorily recognize the existing delegation; and, consistent with the proposed Panel consolidation of sections 2350a and 2350b recommended below, obviate further need for the duplicative referral to section 27(d) of the Arms Export Control Act.

## II

### **Consolidate sections 2350a and 2350b as new section 2x31.**

The Panel recommends the consolidation of sections 2350a with section 2350b, as new section 2x31, *Cooperative Projects: Allied Countries*. This consolidation would provide complete authority and flexibility to the Secretary of Defense to conduct cooperative projects in Title 10 without the need for reference to section 27 of the Arms Export Control Act. The authority to conduct cooperative production projects is added to the authority to conduct cooperative research and development projects, now in section 2350a, combined with the flexibility to waive those provisions of U.S. law which may impede the successful execution of international cooperative projects, as well as other authorities now in section 2350b.

Conducting cooperative programs solely under the auspices of section 27 of the Arms Export Control Act ties such projects to that Act and its procedures and sales philosophies, with the unfortunate result that our partners who jointly fund a cooperative project are often placed in the position of customers rather than partners. Cooperative project authority outside the Arms Export Control Act will allow DOD to execute cooperative projects outside the foreign military sales structure.

While the Panel cannot point to an instance where a cooperative project could not be concluded because of current restrictions and foreign military sales procedures, there are numerous instances where our major allies have complained bitterly about the application of U.S. rules and foreign military sales procedures to jointly funded cooperative projects.<sup>9</sup> To the extent that DOD is to emphasize cooperative projects in the future, and to the extent that the United States may no longer be able to impose its requirements as the dominant partner, DOD must be given greater flexibility to accommodate the requirements of our partners.

#### **7.2.4.5. Relationship to Objectives**

Amendment and consolidation of this statute would establish a balance between an efficient process with full and open access to the procurement system in international defense cooperative projects.

---

<sup>9</sup>Note 13, *supra*, section 7.2.3. of this Report.

#### 7.2.4.6. Proposed Statute

#### ~~§2351~~ ~~Sec. 2350a./2350b.~~ Cooperative research and development projects: allied countries

##### (a) Authority to engage in cooperative R&D projects

The Secretary of Defense may enter into a memorandum of understanding (or other formal agreement) with one or more major allies of the United States for the purpose of conducting cooperative research and development projects on defense equipment and munitions.

##### (b) Requirement that projects improve conventional defense capabilities

(1) The Secretary of Defense may not enter into a memorandum of understanding (or other formal agreement) to conduct a cooperative research and development project under this section unless the Secretary determines that the proposed project will improve, through the application of emerging technology, the conventional defense capabilities of NATO or the common conventional defense capabilities of the United States and its major non-NATO allies.

(2) The authority of the Secretary to make a determination under paragraph (1) may only be delegated to the Deputy Secretary of Defense or the Under Secretary of Defense for Acquisition.

##### (c) Cost sharing

Each cooperative research and development project entered into under this section shall require sharing of the costs of the project (including the costs of claims) between the participants on an equitable basis.

##### (d) ~~Restrictions on procurement of~~ Acquisition of defense equipment and services

~~(1) In order to assure substantial participation on the part of the major allies of the United States in cooperative research and development projects, funds made available for such projects may not be used to procure equipment or services from any foreign government, foreign research organization, or other foreign entity.~~

(1)(2) A major ally of the United States may not use any military or economic assistance grant, loan, or other funds provided by the United States for the purpose of making that ally's contribution to a cooperative research and development program entered into with the United States under this section.

(2)(A) Except as provided in subsection (e) subparagraph (C), chapter 137 of this title shall apply to ~~such contracts (referred to in paragraph (1)) entered into~~ contracts for the acquisition of defense equipment and services by the Secretary of Defense. Except to the extent waived under ~~subsection (e) subparagraph (C) of this subsection~~ or some other provision of law,

all other provisions of law relating to procurement, if otherwise applicable, shall apply to such contracts entered into by the Secretary of Defense.

~~(B)~~ ~~(b)~~ When contracting or incurring obligations ~~under section 27(d) of the Arms Export Control Act~~ for cooperative projects, the Secretary of Defense may require subcontracts to be awarded to particular subcontractors in furtherance of the cooperative project.

~~(C)~~ ~~(c)~~ (1) Subject to paragraph (2), when entering into contracts or incurring obligations ~~under section 27(d) of the Arms Export Control Act~~ outside the United States, the Secretary of Defense may waive with respect to any such contract or subcontract the application of any provision of law, other than a provision of the Arms Export Control Act or section 2304 of this title, that specifically--

(i) ~~(A)~~ prescribe procedures to be followed in the formation of contracts;

(ii) ~~(B)~~ prescribe terms and conditions to be included in contracts;

(iii) ~~(C)~~ prescribe requirements for or preferences to be given to goods grown, produced, or manufactured in the United States or in United States Government-owned facilities or for services to be performed in the United States; or

(iv) ~~(D)~~ prescribe requirements regulating the performance of contracts.

(2) A waiver may not be made under paragraph (1) unless the Secretary determines that the waiver is necessary to ensure that the cooperative project will significantly further standardization, rationalization, and interoperability.

(3) The authority of the Secretary to make waivers under this subsection may be delegated only to the Deputy Secretary of Defense or the Acquisition Executive designated for the Office of the Secretary of Defense.

~~(D)~~~~(e)~~(1) In carrying out a cooperative project ~~under section 27 of the Arms Export Control Act~~, the Secretary of Defense may agree that a participant (other than the United States) may make a contract for requirements of the United States under the project if the Secretary determines that such a contract will significantly further standardization, rationalization, and interoperability. Except to the extent waived under this section or under any other provision of law, the Secretary shall ensure that such contract will be made on a competitive basis and that United States sources will not be precluded from competing under the contract.

(2) If a participant (other than the United States) in a cooperative project makes a contract on behalf of such project to meet the requirements of the United States, the contract may permit the contracting party to follow its own procedures relating to contracting.

~~(e)~~~~(f)~~ In carrying out a cooperative project, the Secretary of Defense may also agree to the disposal of property that is jointly acquired by the members of the project without regard to any

laws of the United States applicable to the disposal of property owned by the United States. Disposal of such property may include a transfer of the interest of the United States in such property to one of the other governments participating in the cooperative agreement or the sale of such property. Payment for the transfer or sale of any interest of the United States in any such property shall be made in accordance with the terms of the cooperative agreement.

~~(f)~~(e) Nothing in this section shall be construed as authorizing--

(1) the Secretary of Defense to waive any of the financial management responsibilities administered by the Secretary of the Treasury; or

(2) to waive the cargo preference laws of the United States, including section 2631 of this title and section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. App. 1241(b)).

~~(g)~~(e) Cooperative opportunities document

(1)(A) In order to ensure that opportunities to conduct cooperative ~~research and development~~ projects are considered at an early point during the formal development review process of the Department of Defense in connection with any planned project of the Department, the Under Secretary of Defense for Acquisition shall prepare an arms cooperation opportunities document with respect to that project for review by the Defense Acquisition Board at formal meetings of the Board.

(B) The Under Secretary shall also prepare an arms cooperation opportunities document for review of each new project for which a document known as a Mission Need Statement is prepared.

(2) An arms cooperation opportunities document referred to in paragraph (1) shall include the following:

(A) A statement indicating whether or not a project similar to the one under consideration by the Department of Defense is in development or production by one or more of the major allies of the United States.

(B) If a project similar to the one under consideration by the Department of Defense is in development or production by one or more major allies of the United States, an assessment by the Under Secretary of Defense for Acquisition as to whether that project could satisfy, or could be modified in scope so as to satisfy, the military requirements of the project of the United States under consideration by the Department of Defense.

(C) An assessment of the advantages and disadvantages with regard to program timing, developmental and life cycle costs, technology sharing, and Rationalization, Standardization, and Interoperability (RSI) of seeking to structure a cooperative development program with one or more major allies of the United States.

(D) The recommendation of the Under Secretary as to whether the Department of Defense should explore the feasibility and desirability of a cooperative development program with one or more major allies of the United States.

~~(h)(f)~~ Reports to Congress

(1) Not later than March 1 of each year, the Under Secretary of Defense for Acquisition shall submit to the Speaker of the House of Representatives and the Committees on Armed Services and Appropriations of the Senate a report on cooperative ~~research and development~~ projects under this section. Each such report shall include--

(A) a description of the status, funding, and schedule of existing projects carried out under this section for which memoranda of understanding (or other formal agreements) have been entered into; and

(B) a description of the purpose, funding, and schedule of any new projects proposed to be carried out under this section (including those projects for which memoranda of understanding (or other formal agreements) have not yet been entered into) for which funds have been included in the budget submitted to Congress pursuant to section 1105 of Title 31 for the fiscal year following the fiscal year in which the report is submitted.

(2) The Secretary of Defense and the Secretary of State, whenever they consider such action to be warranted, shall jointly submit to the Committees on Armed Services and Foreign Relations of the Senate and to the Committees on Armed Services and Foreign Affairs of the House of Representatives a report--

(A) enumerating those countries to be added to or deleted from the existing designation of countries designated as major non-NATO allies for purposes of this section; and

(B) specifying the criteria used in determining the eligibility of a country to be designated as a major non-NATO ally for purposes of this section.

~~(3)(A)(4)(1)~~ The Secretary of Defense shall notify the Congress each time he requires that a prime contract be awarded to a particular prime contractor or that a subcontract to be awarded to a particular subcontractor to comply with a cooperative agreement. The Secretary shall include in each such notice the reason for exercising his authority to designate a particular contractor or subcontractor, as the case may be.

~~(B)(2)~~ The Secretary shall also notify the Congress each time he exercises a waiver under subsection (c) and shall include in such notice the particular provision or provisions of law that were waived.

~~(i)(g)~~ Side-by-side testing

(1) It is the sense of Congress --

(A) that the Secretary of Defense should test conventional defense equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries to determine the ability of such equipment, munitions, and technologies to satisfy United States military requirements or to correct operational deficiencies; and

(B) that while the testing of nondevelopmental items and items in the late state of the development process are preferred, the testing of equipment, munitions, and technologies may be conducted to determine procurement alternatives.

(2) The Secretary of Defense may acquire equipment, munitions, and technologies of the type described in paragraph (1) for the purpose of conducting the testing described in that paragraph.

(3) The Deputy Director, Defense Research and Engineering (Test and Evaluation) shall notify the Speaker of the House of Representatives and the Committees on Armed Services and on Appropriations of the Senate of the Deputy Director's intent to obligate funds made available to carry out this subsection not less than 30 days before such funds are obligated.

(4) The Secretary of Defense shall submit to Congress each year, not later than March 1, a report containing information on--

(A) the equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries that were evaluated under this subsection during the previous fiscal year;

(B) the obligation of any funds under this subsection during the previous fiscal year; and

(C) the equipment, munitions, and technologies that were tested under this subsection and procured during the previous fiscal year.

~~(j)~~ Secretary to encourage similar programs

The Secretary of Defense shall encourage major allies of the United States to establish programs similar to the one provided for in this section.

## **7.2.5. 10 U.S.C. § 2350i**

### **Foreign contributions for cooperative projects**

#### **7.2.5.1. Summary of the Law**

In cooperative projects where the United States participates on a cost-sharing basis, foreign country or NATO project contributions may be credited to appropriations available to the appropriate military department as determined by the Secretary of Defense. The use to which these credits may be applied by the appropriate military departments, including refunds to the other participants in the cooperative project, is expressly set forth in the statute.

#### **7.2.5.2. Background of the Law**

The provision was added to Chapter 138 of Title 10 as a part of the Defense Appropriations Act of 1992-1993.<sup>1</sup> The authority granted under this section facilitates the efficient conduct of cooperative projects. The cognizant official may now credit the contribution of the foreign partner(s) to the proper U.S. appropriation and these funds can then be obligated and expended in execution of the cooperative project.

#### **7.2.5.3. Law in Practice**

Prior to passage of this very recent provision, the practice within DOD was to credit contributions from foreign participants in a cooperative project to the U.S. Treasury under miscellaneous receipts provisions; alternatively, DOD sought special enabling legislation to reprogram such receipts.<sup>2</sup> Former practice also required the use of inventive procurements, such as establishing trust accounts in the name of the U.S. contracting officer, to allow for the use of a foreign Government's contribution. By providing authority to directly credit foreign cost-sharing contributions to the respective military department sponsor, the current statute enhances fiscal control over cooperative projects within DOD.

#### **7.2.5.4. Recommendations and Justification**

##### **I**

#### **Retain and consolidate section 2350i in new section 2x21.**

By retaining and consolidating the amended provision as paragraph (c) of new section 2x21, *Defense Memoranda of Understanding and Related International Agreements*, the statutory authority contained in this provision will continue to facilitate the deposit of foreign government contributions in cooperative projects to the applicable DOD appropriation account.

<sup>1</sup>Pub. L. No. 102-190, §1047, 105 Stat. 1290, 1467.

<sup>2</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated 12 September 1992.

**II**  
**Consolidate definitions contained in subsection 2350i(c) into  
new section 2x20**

In an effort to streamline and consolidate international defense acquisition statutes into a new Chapter 1XX, *Defense Trade and Cooperation*, all definitions relative to subchapter II, *International and Cooperative Agreements*, have been relocated to an introductory new section 2x20, *Definitions*.

**7.2.5.5. Relationship to Objectives**

Retention and consolidation of this statute streamlines the conduct of international cooperative projects while promoting and encouraging financial integrity with sound and efficient procurement practices.

**7.2.5.6. Proposed Statute**

**§ 2x21(d) ~~Sec. 2350i~~ Foreign contributions for cooperative projects**

(1) ~~(a)~~ **Crediting of Contributions.**--Whenever the United States participates in a cooperative project with a friendly foreign country or the North Atlantic Treaty Organization (NATO) on a cost-sharing basis, any contribution received by the United States from that foreign country or NATO to meet its share of the costs of the project may be credited to appropriations available to an appropriate military department or another appropriate organization within the DOD, as determined by the Secretary of Defense.

(2) ~~(b)~~ **Use of Amounts Credited.**--The amount of a contribution credited pursuant to subsection (a) to an appropriation account in connection with a cooperative project referred to in that subsection shall be available only for payment of the share of the project expenses allocated to the foreign country or NATO making the contribution. Payments for which such amount is available include the following:

(a) ~~(1)~~ **Payments to contractors and other suppliers (including the Department of Defense and other participants acting as suppliers) for necessary articles and services.**

(b) ~~(2)~~ **Payments for any damages and costs resulting from the performance or cancellation of any contract or other obligation.**

(c) ~~(3)~~ **Payments or reimbursements of other program expenses, including program office overhead and administrative costs.**

(d) ~~(4)~~ **Refunds to other participants.**

## 7.2.6. 10 U.S.C. § 2350c

### Cooperative military airlift agreements: allied countries

#### 7.2.6.1. Summary of the Law

If funds have been appropriated, and after consultation with the Secretary of State (SECSTATE), the Secretary of Defense (SECDEF) may enter into cooperative airlift agreements with any allied government in return for the reciprocal transportation of personnel and cargo of the military forces of the United States on military aircraft of the allied country. The cooperative military airlift agreement must, under the agreement: provide for liquidating the accrued credits and liabilities every three months; secure the same rate of transportation reimbursement for each party; and ensure that transportation costs of defense articles purchased by an allied country under the Arms Export Control Act or by direct commercial sale, are reimbursed at a rate equal to the full cost of transportation. Peacetime restrictions on cooperative military airlift agreements include consideration of the military airlift capacity of both the sending and receiving countries.

In addition to subchapter I, *Acquisition and Cross-Servicing Agreements*, Chapter 138, Title 10, SECDEF may enter into military airlift agreements only under authority of this section. The term allied countries is defined in this section to include members of NATO, Australia, New Zealand, and any other country designated by SECDEF with the concurrence of SECSTATE. Cooperative military airlift agreements with NATO subsidiary bodies, however, are not required to be reciprocal.

#### 7.2.6.2. Background of the Law

This provision was added to Chapter 138 of Title 10 by section 1125(a) of the Defense Authorization Act of 1983<sup>1</sup> and has had several subsequent conforming amendments since its enactment.<sup>2</sup> However, section 1311 of Title 44 of the Defense Authorization Act of 1993<sup>3</sup> amended the provision to address liquidation of credits by direct payment and expansion of country coverage under the statute bringing it into conformity with the similar liquidation provisions contained in 10 U.S.C. § 2345.

#### 7.2.6.3. Law in Practice

The statute is implemented by the U.S. Transportation Command (USTRANSCOM), a unified command; and, other than its limited statutory country coverage, appears to have successfully fulfilled its legislative intent. The statute is the primary authority for engaging in cooperative military airlift in support of global U.S. operational requirements. USTRANSCOM,

<sup>1</sup>Pub. L. No. 97-252, § 1125(a), 96 Stat. 718, 757.

<sup>2</sup>Pub. L. No. 99-145, § 1304(b), 99 Stat. 742; Pub. L. No. 100-26, § 7(k)(2), 101 Stat. 284; Pub. L. No. 101-189, § 931 (b)(2), 103 Stat. 1352, 1534-35.

<sup>3</sup>Pub. L. No. 102-484, § 1311, 106 Stat. 2315, 2547.

through its Air Mobility Command component, enters into cooperative military airlift agreements with eligible countries to facilitate the reciprocal use of airlift assets on a space-available basis.

#### **7.2.6.4. Recommendation and Justification**

##### **Retain Section 2350c.**

As this section continues to serve a valid purpose and was only recently amended by Title 13 of the Defense Authorization Act of 1993, the Panel recommends retention.

Re-number as section 2x32 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with cooperative military airlift agreements, move to subchapter II, *Defense Trade and Cooperative Agreements*.

#### **7.2.6.5. Relationship to Objectives**

Retention of section 2350c, as amended by the Defense Authorization Act of 1993, promotes and encourages sound and efficient procurement practices.

#### **7.2.6.6. Proposed Statute**

##### **§ 2x32 Sec. ~~2350c~~. Cooperative military airlift agreements: allied countries**

(a) Subject to the availability of appropriations, and after consultation with the Secretary of State, the Secretary of Defense may enter into cooperative military airlift agreements with the government of any allied country for the transportation of the personnel and cargo of the military forces of that country on aircraft operated by or for the military forces of the United States in return for the reciprocal transportation of the personnel and cargo of the military forces of the United States on aircraft operated by or for the military forces of that allied country. Any such agreement shall include the following terms:

(1) The rate of reimbursement for transportation provided shall be the same for each party and shall be not less than the rate charged to military forces of the United States, as determined by the Secretary of Defense under section 2208(h) of this title.

(2) Credits and liabilities accrued as a result of providing or receiving transportation shall be liquidated not less often than once every 3 months by direct payment to the country that has provided the greater amount of transportation as agreed upon by the parties. Liquidation shall be either by direct payment to the country that has provided the greater amount of transportation or by the providing of in-kind transportation services to that country. The liquidation shall occur on a regular basis, but not less often than once every 12 months.

(3) During peacetime, the only military airlift capacity that may be used to provide transportation is that capacity that (A) is not needed to meet the transportation requirements of

the military forces of the country providing the transportation, and (B) was not created solely to accommodate the requirements of the military forces of the country receiving the transportation.

(4) Defense articles purchased by an allied country from the United States under the Arms Export Control Act (22 U.S.C. § 2751 et seq.) or from a commercial source under the export controls of the Arms Export Control Act may not be transported (for the purpose of delivery incident to the purchase of the defense articles) to the purchasing allied country on aircraft operated by or for the military forces of the United States except at a rate of reimbursement that is equal to the full cost of transportation of the defense articles, as required by section 21(a)(3) of the Arms Export Control Act (22 U.S.C. § 2761(a)(3)).

(b) Subject to the availability of appropriations, and after consultation with the Secretary of State, the Secretary of Defense may enter into nonreciprocal military airlift agreements with North Atlantic Treaty Organization subsidiary bodies for the transportation of the personnel and cargo of such subsidiary bodies on aircraft operated by or for the military forces of the United States. Any such agreement shall be subject to such terms as the Secretary of Defense considers appropriate.

(c) Any amount received by the United States as a result of an agreement entered into under this section shall be credited to applicable appropriations, accounts, and funds of the Department of Defense.

(d) Notwithstanding subchapter III I, the Secretary of Defense may enter into military airlift agreements with allied countries only under the authority of this section.

## Cooperative logistic support agreements: NATO countries

### 7.2.7.1. Summary of the Law

Within NATO, the Secretary of Defense may enter into Weapons System Partnership Agreements with one or more Governments participating in NATO Maintenance and Supply Organization (NAMSO). The agreement may provide for the transfer of logistics support, supplies, and services by the United States to NAMSO, or the acquisition of these items from NAMSO. Joint management and administrative expenses under such an agreement must be shared equitably.

The provisions of Chapter 137 of Title 10 apply to the acquisition of logistic support under a Weapon System Partnership Agreement. As well, the Arms Export Control Act applies to any transfer of defense articles or services under such an agreement. The Secretary of Defense's authority under this section is in addition to the authorities contained in subchapter I of Title 10, Chapter 138.

### 7.2.7.2. Background of the Law

This provision was originally established pursuant to section 1102 of the Defense Authorization Act of 1987.<sup>1</sup> Subsequent amendments of the section by sections 931(c) and 938(c) of the Defense Authorization Act of 1990-1991<sup>2</sup> added, for clarification purposes, the application of Chapter 137 to a Weapons System Partnership Agreements, in addition to the requisite Arms Export Control Act determinations in transfers of defense articles and services. Section 843 of the Defense Authorization Act of 1993 amended subsection (c) by adding authority for the equitable sharing of the costs of claims.<sup>3</sup>

### 7.2.7.3. Law in Practice

In practice, the statute provides authority for the Secretary of Defense to enter into Weapon System Partnership Agreements with NATO countries in furtherance of rationality, standardization, and interoperability (RSI) and is implemented by DOD Directive.<sup>4</sup> While RSI is the predominant goal of NATO cooperative logistic support agreements, many European companies have established a production or logistic support base from the U.S. technology data packages destined for NATO logistics planning. While that may enhance the NATO industrial mobilization base, the Department of Commerce was concerned that not enough attention was directed toward ensuring that reciprocal international competitiveness be maintained as well. Their comments specifically reflected that,

<sup>1</sup>Pub. L. No. 99-661, § 1102, 100 Stat. 3816, 3961.

<sup>2</sup>Pub. L. No. 101-189, § 931(c) and § 938(c), 103 Stat. 1352, 1534, 1539.

<sup>3</sup>Pub. L. No. 102-484, § 843, 106 Stat. 2442.

<sup>4</sup>DOD Directive 2000.8 (February 12, 1981).

. . . as future procurements of new weapon systems decline, upgrades and modifications will become more important and competitive than before. Many of the U.S. developed systems that are future candidates for upgrade are now in production by NATO/European consortiums. These consortiums may develop the capability to compete with U.S. firms on these upgrades worldwide as a result of cooperative logistics agreements.<sup>5</sup>

#### **7.2.7.4. Recommendations and Justification**

### **I**

#### **Amend section 2350d by striking subsections (d) and (e).**

NAMSO is a NATO body established to provide logistics support for the forces of member nations. Nations desiring to avail themselves of logistics support for their weapons systems must execute a Weapons System Partnership Agreement under NATO procedures. Prior to enactment of this statutory procedure, the United States was unable to participate in these agreements because the authority for pre-funding required by NAMSO was unavailable and because of the strictures present in the application of Chapter 137 and the Arms Export Control Act to purchases from NAMSO. Accordingly, the original authority to enter into Weapons System Partnership Agreements made no reference to the applicability of Chapter 137 and the Arms Export Control Act; and under this framework, the United States could successfully enter these agreements. The addition of subsections (d) and (e) for clarification purposes was counter-productive because the paragraphs serve to defeat the very purpose for which the statute was originally enacted. They also make the section internally inconsistent, because the authorities provided by subsections (a), (b), and (c) are abrogated by the restrictions of subsections (d) and (e). The Panel therefore recommends that subsections (d) and (e) be deleted.

Re-number as section 2x33 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with cooperative logistic support agreements, move to subchapter II, *International and Cooperative Agreements*.

### **II**

#### **Consolidate definitions contained in subsection 2350d(c) into new section 2x20.**

In an effort to streamline and consolidate international defense acquisition statutes into a new Chapter 1XX, *Defense Trade and Cooperation*, all definitions relative to subchapter II, *International and Cooperative Agreements*, have been relocated to an introductory new section 2x20, *Definitions*.

---

<sup>5</sup>Letter from John A. Richards, Deputy Assistant Secretary for Industrial Resource Administration, Department of Commerce, Bureau of Export Administration, dated August 27, 1992

### **7.2.7.5. Relationship to Objectives**

Amendment of this statute would establish a balance between an efficient process and full and open access to the procurement system in international defense cooperative logistic support agreements.

### **7.2.7.6. Proposed Statute**

#### **§ 2x33 ~~Sec. 2350d.~~ Cooperative logistic support agreements: NATO countries**

##### **(a) General authority**

(1) The Secretary of Defense may enter into bilateral or multilateral agreements known as Weapon System Partnership Agreements with one or more governments of other member countries of NATO participating in the operation of the NATO Maintenance and Supply Organization. Any such agreement shall be for the purpose of providing cooperative logistics support for the armed forces of the countries which are parties to the agreement. Any such agreement--

(A) shall be entered into pursuant to the terms of the charter of the NATO Maintenance and Supply Organization; and

(B) shall provide for the common logistic support of a specific weapon system common to the participating countries.

##### **(2) Such an agreement may provide for--**

(A) the transfer of logistics support, supplies, and services by the United States to the NATO Maintenance and Supply Organization; and

(B) the acquisition of logistics support, supplies, and services by the United States from that Organization.

##### **(b) Authority of Secretary**

Under the terms of a Weapon System Partnership Agreement, the Secretary of Defense--

(1) may agree that the NATO Maintenance and Supply Organization may enter into contracts for supply and acquisition of logistics support in Europe for requirements of the United States, to the extent the Secretary determines that the procedures of such Organization governing such supply and acquisition are appropriate; and

(2) may share the costs of set-up charges of facilities for use by the NATO Maintenance and Supply Organization to provide cooperative logistics support and in the costs of establishing a revolving fund for initial acquisition and replenishment of supply stocks to be used by the NATO Maintenance and Supply Organization to provide cooperative logistics support.

(c) Sharing of administrative expenses

Each Weapon System Partnership Agreement shall provide for joint management by the participating countries and for the equitable sharing of the administrative costs and costs of claims incident to the agreement.

~~(d) Application of Chapter 137~~

~~Except as otherwise provided in this section, the provisions of chapter 137 of this title apply to a contract entered into by the Secretary of Defense for the acquisition of logistics support under a Weapon System Partnership Agreement.~~

~~(e) Application of Arms Export Control Act~~

~~Any transfer of defense articles or defense services to a member country of the North Atlantic Treaty Organization or to the NATO Maintenance and Supply Organization for the purposes of a Weapon System Partnership Agreement shall be carried out in accordance with this chapter and the Arms Export Control Act (22 U.S.C. 2751 et seq.).~~

(d)(f) Supplemental authority

The authority of the Secretary of Defense under this section is in addition to the authority of the Secretary under subchapter I and any other provision of law.

## **7.2.8. 10 U.S.C. § 2350e**

### **NATO Airborne Warning and Control system (AWACS) program: authority of Secretary of Defense**

#### **7.2.8.1. Summary of the Law**

In conjunction with the execution of the AWACS Memorandum of Understanding, the Secretary of Defense (SECDEF) may waive reimbursement for the cost of auditing, quality assurance, codification, inspection, contract administration, acceptance testing, certification services, planning, programming, and management services. In addition, SECDEF has the authority to waive any administrative services surcharge otherwise chargeable; and may assume contingent liability for (a) program losses resulting from the gross negligence of any contracting officer of the United States; (b) identifiable taxes, customs duties, and other charges levied within the United States on the program; and (c) the United States' share of the unfunded termination liability. Contract authority under this section is limited to program funds appropriated for a particular fiscal year.

#### **7.2.8.2. Background of the Law**

The AWACS provision was enacted as section 932 of the Defense Authorization Act of 1990/1991<sup>1</sup> and originally was due to expire on September 30, 1991. The section has been subsequently amended to provide for a new expiration of September 30, 1993.<sup>2</sup> The statute was enacted in order to provide requisite authority for the U.S. Air Force, in acting as agent for NATO, to employ U.S. Government acquisition practices.

#### **7.2.8.3. Law in Practice**

By providing the requisite authority for the U.S. Air Force to act in the capacity as executive agent for NATO Airborne Early Warning and Control Programme Management Organization (NAPMO), the statute was a required tenet to the successful execution of the NATO AWACS modernization program. The program began with the award of a contract to upgrade the computer configuration of the NATO E-3 aircraft fleet. An addendum to the AWACS Memorandum of Understanding, as executed between the Parties and providing for the further modernization of the AWACS to enable NATO to maintain commonality with the U.S. fleet of AWACS, necessitates the continued retention of the statutory authority provided the Secretary of Defense by this section.<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 101-189, § 932(a)(1), 103 Stat. 1352, 1536-37.

<sup>2</sup>Pub. L. No. 102-190, §1051, 105 Stat. 1290, 1470.

<sup>3</sup>Fax Message from Kannan Ganesan to Judy Morehouse, Boeing Defense & Space Group, dated 9/29/92.

#### **7.2.8.4. Recommendation and Justification**

##### **Retain section 2350e.**

The authority provided the Secretary of Defense by the statute exemplifies the requirement for program specific waiver flexibility fundamental to the successful execution of a multilateral collaborative project and, therefore, the Panel recommends its retention.

Renumber as section 2x34 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with a specific cooperative project agreement, move to subchapter II, Defense Trade and Cooperative Agreements.

#### **7.2.8.5. Relationship to Objectives**

Retention of this statute establishes a balance between an efficient process and full and open access to the procurement system in an international collaborative project.

#### **7.2.8.6. Proposed Statute**

**§ 2x34 Sec. ~~2350e~~. NATO Airborne Warning and Control System (AWACS) program: authority of Secretary of Defense**

##### **(a) Authority Under AWACS program**

The Secretary of Defense, in carrying out an AWACS memorandum of understanding, may do the following:

(1) Waive reimbursement for the cost of the following functions performed by personnel other than personnel employed in the United States Air Force Airborne Warning and Control System (AWACS) program office:

- (A) Auditing.
- (B) Quality assurance.
- (C) Codification.
- (D) Inspection.
- (E) Contract administration.
- (F) Acceptance testing.
- (G) Certification services.
- (H) Planning, programming, and management services.

(2) Waive any surcharge for administrative services otherwise chargeable.

(3) In connection with that Program, assume contingent liability for --

(A) program losses resulting from the gross negligence of any contracting officer of the United States;

(B) identifiable taxes, customs duties, and other charges levied within the United States on the program; and

(C) the United States share of the unfunded termination liability.

**(b) Contract authority limitation**

Authority under this section to enter into contracts shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

**(c) Definition**

In this section, the term "AWACS memorandum of understanding" means--

(1) the Multilateral Memorandum of Understanding Between the North Atlantic Treaty Organization (NATO) Ministers of Defense on the NATO E-3A Cooperative Programme, signed by the Secretary of Defense on December 6, 1978;

(2) the Memorandum of Understanding for Operations and Support of the NATO Airborne Early Warning and Control Force, signed by the United States Ambassador to NATO on September 26, 1984;

(3) the Addendum to the Multilateral Memorandum of Understanding Between the North Atlantic Treaty Organization (NATO) Ministers of Defense on the NATO E-3A Cooperative Programme (dated December 6, 1978) relating to the modernization of the NATO Airborne Early Warning and Control (NAEW&C) System, dated December 7, 1990; and

(4) any other follow-on support agreement for the NATO E-3A Cooperative Programme.

**(d) Expiration**

The authority provided by this section expires on September 30, 1993.

## **7.2.9. 10 U.S.C. § 2350h**

### **Memorandums of agreement: Department of Defense ombudsman for foreign signatories**

#### **7.2.9.1. Summary of the Law**

The Secretary of Defense is required to designate an official<sup>1</sup> to act as the DOD ombudsman, on behalf of foreign Governments who are parties to memoranda of agreement with the United States, concerning acquisition issues under the jurisdiction of the Secretary of Defense.

#### **7.2.9.2. Background of the Law**

This provision was added to Chapter 138 of Title 10 by section 1452(a)(1) of the Defense Authorization Act of 1991<sup>2</sup> in order to address periodic and frequent problems involving foreign contractors attempting to perform work for DOD. At the initiative of the Israeli Government, the statute was meant to obviate bureaucratic delays and demands that often had the practical effect of eliminating a foreign contractor from a competition. Since such actions effectively resulted in erecting non-tariff barriers to international defense trade, the ombudsman was intended to help foreign officials in aiding their contractors to meet the procedures and requirements of the U.S. defense contracting system.

#### **7.2.9.3. Law in Practice**

The office of ombudsman for foreign signatories was established for the benefit of foreign countries doing business with the DOD and does not appear to enhance domestic defense acquisition procedures. The statutory designation of an ombudsman, other than unilaterally trouble-shooting the implementation of reciprocal procurement agreements, generally serves no other purpose than a collateral, additional duty. In fact, our allies have not reciprocally appointed similar ombudsmen in their respective countries pursuant to these procurement agreements apparently rationalizing that U.S. industry does not need them.<sup>3</sup> Although U.S. Government acquisition laws and regulations provide an unparalleled freedom of access and information to foreign governments and their industry, many of these same foreign Governments do not reciprocate in kind, thus leaving U.S. industry at a competitive disadvantage internationally.

---

<sup>1</sup>Deputy Director, Foreign Contracting, Office of Director of Defense Procurement.

<sup>2</sup>Pub. L. No. 101-510, § 1452(a)(1), 104 Stat. 1485, 1693-94.

<sup>3</sup>Letter from John A. Richards, Deputy Assistant Secretary for Industrial Resource Administration, Department of Commerce, Bureau of Export Administration, dated August 27, 1992

#### **7.2.9.4. Recommendation and Justification**

##### **Repeal section 2350h.**

As the role of ombudsman constitutes additional duty for the office concerned, discussions with the DOD Director of Foreign Contracting revealed little or no substantive use by foreign Governments of the services of the ombudsman. Other than a perception by a foreign government of a lack of DOD attention to the interests of foreign countries, there appears neither an interest by other governments in such a function, nor a wide-spread problem requiring an office of ombudsman for foreign signatories. In times of constrained resources, the Panel did not believe it was appropriate to continue to use DOD funds to unilaterally assist foreign officials to aid their national contractors to compete with U.S. contractors.

#### **7.2.9.5. Relationship to Objectives**

Repeal of this section streamlines the defense acquisition process particularly in times of constrained resources.

## **7.2.10. 10 U.S.C. § 7344**

### **Suspension of construction in case of treaty**

#### **7.2.10.1. Summary of the Law**

This section allows the President to suspend authorized naval aircraft construction in the event of a treaty for the limitation of naval arms.

#### **7.2.10.2. Background of the Law**

This section was originally passed in 1938<sup>1</sup> and codified in 1956. It was passed as a response to the expiration of the Washington Treaty of 1922 and the London Treaty of 1930 limiting naval arms. Congress sought to give the President explicit power to conclude a quick treaty with the rearming nation of Japan.<sup>2</sup>

#### **7.2.10.3. Law in Practice**

According to comment from the Naval Air Systems Command, this section is completely outdated and has never been used.<sup>3</sup>

#### **7.2.10.4. Recommendation and Justification**

##### **Repeal section 7344.**

The Naval Air Systems Command stated that this section is a historical anachronism and should be deleted; and that to their knowledge it has never been cited, used, or referred to, and is of no utility or relevance today.<sup>4</sup> As this section addresses the President's treaty authority which is already provided for in the U.S. Constitution,<sup>5</sup> there would appear to be no need for codification of this power under Title 10. The DOD General Counsel's Office concurred with the comment of the Naval Air Systems Command;<sup>6</sup> and the Panel therefore recommended repeal of this section.

#### **7.2.10.5. Relationship to Objectives**

Repeal of this provision will streamline the body of defense acquisition laws.

---

<sup>6</sup>Information received from John McNeil, Esq., DOD Office of General Counsel (International), verbally to B. Capshaw, Esq., Acquisition Law Task Force, on March 3, 1992.

## **7.2.11. 50 U.S.C. App. §§ 2061 through 2170**

### **Defense Production Act of 1950**

#### **7.2.11.i. Summary of the Law**

As originally enacted, the Defense Production Act of 1950 (DPA) contained seven titles:

- Title I: Priorities and Allocations
- Title II: Authority to Requisition
- Title III: Expansion of Productive Capacity
- Title IV: Price and Wage Stabilization
- Title V: Settlement of Labor Disputes
- Title VI: Control of Consumer and Real Estate Credit
- Title VII: General Provisions.

Titles IV and V were terminated on April 30, 1953; and Titles II and VI were terminated on June 30 of the same year. The remaining titles still in effect are I, III, and VII.

#### **Title I: Priorities and Allocations**

Title I empowers the President to demand and receive priority handling of U.S. Government purchase orders for defense related products and materials. This requires (1) contracts or orders involving certain defense energy programs be accepted and carried out on a priority status over all other contracts or orders; and (2) allocation of materials and facilities be done in such a way as to promote approved programs.

The Office of Industrial Mobilization within the Department of Commerce has the responsibility for developing, coordinating, and administering a system of priorities to execute the Title I provisions for industrial items. To accomplish this, a Defense Materials System (DMS) and Defense Priorities System (DPS) have been established.

The DMS and DPS are complementary programs designed to expand quickly in the event of a national emergency. DMS is a specialized program limited to four materials (copper, aluminum, steel, and nickel alloys), while DPS is a general priority program relating to a wide variety of undesignated products and materials. Priority ratings are designated either DO or DX. All DO orders have priority over unrated orders. DX rated orders receive the highest priority and take precedence over DO orders and unrated orders.

A company which receives a rated order must adjust its operations to fill that order by its required delivery date. All rated orders must be accepted and criminal penalties may be imposed if a company willfully violates the provisions of the DPA.

### **Title III: Expansion of Productive Capacity and Supply**

This Title empowers the President to expand industrial capacity to meet present and future defense requirements. Specifically this Title provides for:

- (1) guaranteeing private sector loans to expedite production and deliveries or services;
- (2) directing government loans to private business for expansion of capacity, the development technological processes, or the production of essential materials;
- (3) purchasing or committing to purchase metals, minerals, and other materials for government use or resale to encourage exploration, development, and mining of key minerals and metals;
- (4) authorizing installation of additional equipment, facilities, processes, or improvements to plants, factories, and other facilities, both government and commercial.

The President has delegated responsibility to the Department of Interior for programs for all non-fuel minerals which gives that department authority over mines, refineries, and other areas of production.

### **Title VII: General Provisions**

This Title contains several provisions for industrial preparedness under the DPA.

#### Voluntary Agreements:

Under Title VII, the President or his representatives may enter into voluntary agreements with business and industry leaders to expand the nations industrial output. Under this Title any consultations and agreements among contractors are immune from antitrust violations.

#### National Defense Executive Reserve (NDER):

The NDER is composed of individuals with considerable executive experience who undergo special training in order to fill important federal functions in the event of an increased threat to our national security. These executives would be part of emergency agencies with authority to manage defense needs under crisis conditions. Membership in the NDER is limited to 3 year terms and is voluntary.

#### Cost Accounting Standards Board (CAS):

The current CAS board was established as part of the Office of Federal Procurement Policy Act Amendments of 1988.<sup>1</sup> The Board has the authority to promulgate cost accounting standards to be used by all executive agencies, contractors and subcontractors in procurement

---

<sup>1</sup>Pub. L. No. 100-679, §5(a), 102 Stat. 4063.

contracts as well as regulations necessary to implement those standards. The Board is also required to make an annual report to Congress and to receive appropriations necessary for its operation.

#### Joint Committee on Defense Production:

Between 1950 and 1977 this committee held hearings and prepared studies on defense preparedness. Based upon its recommendations in the mid-1970s, the Federal Emergency Management Agency was created. However, the Joint Committee was discontinued in 1977.

Sections within the DPA applicable to defense trade and cooperation are 10 U.S.C. § 2099, *Annual Report on Impact of Offsets*, and 10 U.S.C. § 2170, *Authority to Review Certain Mergers, Acquisitions, and Takeovers*, also known as the Exon-Florio Amendment.

#### **7.2.11.2. Background of the Law**

In July of 1950, President Harry S. Truman called upon Congress to enact legislation to handle the economic mobilization problems created by the Korean War. The President recommended that the changes allow for expanded military requirements while also taking care of civilian needs.

Bills were introduced and passed in both the House and Senate. The differences were resolved in conference and the Defense Production Act of 1950 was signed into law on September 8, 1950.<sup>2</sup> As originally enacted, the DPA provided for virtually all mobilization measures taken during the Korean War. The various functions and responsibilities for implementing the DPA were assigned to various government agencies.

The DPA expired on October 20, 1990, however, "DOD was able to obtain needed supplies from contractors on a voluntary basis during Operation Desert Storm notwithstanding the lapse of the DPA."<sup>3</sup> An executive order was signed by the President on January 8, 1991, and gave limited emergency authority to obtain prompt delivery of products to meet DOD needs during the gap between lapse and renewal of the Act.

A short term extension of the DPA was signed into law of August 17, 1991, and expired on September 30, 1991.<sup>4</sup> Another extension ended in March 1992. The DPA was again reinstated and finally signed into law on October 28, 1992; making the DPA retroactive during the time of its lapse.<sup>5</sup> Changes made to the DPA were an effort to bring this Cold War legislation into the post Cold War era. Congressman Tom Carper of Delaware spoke about the changes to the DPA during floor discussion on October 5, 1992.

---

<sup>2</sup>50 U.S.C. App. §§ 2061 through 2170.

<sup>3</sup>H. Rept. 208, 102nd Cong., (1st Sess., 1991).

<sup>4</sup>H. Rept. 1028, 102nd Cong., (2nd Sess. 1992).

<sup>5</sup>H. R. Conf. Rept. 1028, 102nd Cong., (2nd Sess., 1992).

First, recognize the need to transition our defense industrial base into a competitive civilian industry by promoting the production of dual-use technologies;

Second, ensure reliable supplies of critical technology items and components;

Third, prohibit anyone who is found to have fraudulently used "made in America" labels on products from getting contracts under the Defense Production Act . . . ;

Fourth, provide for a top-to-bottom review of Federal programs to ensure they are all geared toward the preservation of this Nation's defense industrial base; and

Fifth, require the President to conduct a review of foreign efforts to undermine U.S. technological leadership through coordinated acquisitions of U.S. technology firms or industrial espionage.

In addition, the new DPA requires that all projects receiving DPA assistance be tested for production if the producer so requests, thus strengthening the link between assistance and marketplace performance. It also sets up an information system to perform production analysis and identify potential problems, such as dependence on foreign sources.<sup>6</sup>

Congressman Carper went on to express the view that the re-authorized DPA "is a real step forward in our efforts to shore up U.S. competitiveness in industry and to ensure that our industrial base is capable of providing essential materials to ensure our national security both in peacetime and emergency. The bill has been years in the works, and has improved with age."

Specifically with regard to reporting on the impact of offsets, section 2099 now provides for (1) an annual report on the impact of offsets prepared by the Secretary of Commerce; (2) a notice requirement for U.S. firms entering into a contract for the sale of a weapons system or defense-related item to a foreign country or firm if subject to an offset agreement exceeding \$5 million in value; and (3) consideration of the findings and recommendations of the annual report during bilateral and multilateral negotiations to minimize the effects of offsets.<sup>7</sup>

Section 5021 of the Omnibus Trade and Competitiveness Act of 1988 enacted 50 U.S.C. App. 2170 (Exon-Florio Amendment) which entitles the President, in the interests of national security, to block or restructure a proposed merger, acquisition, or takeover of a U.S. company by a foreign entity.<sup>8</sup> The statute is premised on a procedure of voluntary notification in mergers,

---

<sup>6</sup>Congress authorized \$10 million for this information system.

<sup>7</sup>Defense Production Act Amendments of 1992, Pub. L. No. 102-558, 106 Stat. 4198.

<sup>8</sup>31 C.F.R. Part 800; The Presidential review process entails: (1) the conduct of a confidential investigation by the Committee on Foreign Investment in the United States (CFIUS) [established by Exec. Order No. 11858]; (2) appropriate action by the President "to suspend or prohibit any acquisition, merger, or takeover"; (3) supported by

acquisitions, or takeovers involving prospective foreign ownership. Following passage of Exon-Florio, there have been several studies conducted by the General Accounting Office (GAO) concerning federal data collection on foreign investment in the United States,<sup>9</sup> and the extent of foreign participation in the Strategic Defense Initiative Program.<sup>10</sup>

### 7.2.11.3. Law in Practice

Title I, the DPS/DMS program, is widely used in acquisition of items for the use of DOD. The majority of contracts are rated DO, with a much smaller percentage rated DX, the highest status which requires Presidential approval. The priority and allocation system, in addition to its regular use, continues to serve as an "insurance policy" in the event that the outbreak requires expeditious delivery of needed material.

The programs that constitute Title III, which establish domestic production capacity for materials considered essential for national security, are considered a key element of the defense drawdown. The provisions of Title III will be instrumental in restarting needed production capacity or maintaining it in the event of war.

The miscellaneous programs that constitute Title VII operate with varying degrees of effect on DOD. Several, most notably section 111, interact with the other titles. Section 111 gives authority for appropriations to be used for Title III.

Specifically concerning the implementation of Exon-Florio, however, testimony in 1990 revealed:<sup>11</sup>

. . . At the present time, notifications are coming in to CFIUS at the rate of 350 a year. Some 350 filings annually would represent, we estimate, around 50 percent of annual acquisitions valued at more than \$1 million. This is a fairly large proportion, though perhaps not inappropriately so in view of the interplay and dynamics of technology, the economy and defense.

To date, CFIUS has gone to the investigation stage seven times. In two of those cases, notification was withdrawn with CFIUS permission and one investigation is in progress. Four cases have reached the President's desk for decision. In only one of those

---

findings based on "credible evidence" that "the foreign interest exercising control might take action that threatens to impair the national security" and that no other provision of law can adequately address the situation; and (4) after considering various enumerated factors relating to domestic industrial production.

<sup>10</sup>General Accounting Office, Strategic Defense Initiative Program, Extent of Foreign Participation GAO/NSIAD 90-2, February 1990.

<sup>11</sup>Testimony of the Honorable Charles H. Dallars, Assistant Secretary of the Treasury for International Affairs, before the Subcommittee on Commerce, Consumer Protection, and Competitiveness of the Committee on Energy and Commerce, U.S. Senate, Mar. 13, 1990.

cases has the President exercised his statutory authority to prohibit a foreign acquisition . . . <sup>12</sup>

Related GAO testimony at the time, from the defense industrial security perspective,<sup>13</sup> highlighted procedural weaknesses in the practice of granting Special Security Agreements (SSAs).<sup>14</sup> These agreements were initiated in 1984 to permit U.S. firms that are foreign owned, controlled, or influenced (FOCI) to continue to work on classified defense contracts.<sup>15</sup> Under DOD policy SSAs are limited to contracts whose classification level does not exceed the Secret level, provided the FOCI emanates from a country with which the United States has a bilateral industrial security arrangement.

Most recently, however, a major CFIUS investigation resulted in a proposed sale of a U.S. firm to a foreign Government-owned firm being withdrawn. The proposed sale of the missiles division of the LTV Aerospace and Defense Company to the Thomson-CSF firm, which is 58% owned by the French Government, would have involved access to highly classified or "proscribed information."<sup>16</sup> The specter of a potentially blocked sale raised much international concern that was assuaged only by the voluntary withdrawal by Thomson-CSF from the proposed purchase.

Based on the LTV-Thomson scenario, and on the studies and testimony discussed above, the Defense Authorization Act of 1993 enacted new provisions to address this type of foreign investment in the future.<sup>17</sup> Two of the provisions focus on entities controlled by foreign governments and specifically prohibit: (1) the purchase, by an entity controlled by a foreign government, of certain U.S. defense contractors that perform DOD or Department of Energy (DOE) national security contracts requiring access to proscribed information; and (2) the award of certain DOD/DOE national security contracts to an entity controlled by a foreign Government. The third provision directs DOD/DOE to develop a database helpful to CFIUS under section 721 of the Defense Production Act.

---

<sup>12</sup>The one Presidential prohibition was the divestment order issued in the China National Aero-Technology Import and Export Company's (CATIC) acquisition of MAMCO Manufacturing, Inc. (MAMCO), a U.S. company - February 1990.

<sup>13</sup>Exec. Order No. 10865, 32 C.F.R. Part 155, and DOD Directive 5200.2-R.

<sup>14</sup>Statement for the Record, National Security and International Affairs Division, GAO, for the Committee on the Armed Services, House of Representatives, March 21, 1990. The procedural weaknesses noted included: (1) interim security arrangements prior to a formal SSA were deficient in that new contracts were awarded during the period and the period itself was extending up to a year or more; (2) incomplete or inadequate supporting justifications, pursuant to the Services implementing regulations, citing need for a product or service that is mission-critical, cannot be obtained in sufficient quantity from U.S.-owned sources, and involved a unique product or technology; (3) inadequate determinations that the risks of FOCI can be negated or reduced to an acceptable level; and (4) that DOD policies requiring outside directors of the FOCI firm to be DOD watchdogs were inadequately documented in practice.

<sup>15</sup>*Id.*, at pg. 1, it was noted that "In practice, under an SSA, the foreign firm is permitted to retain a minority position on the U.S. firm's board of directors."

<sup>16</sup>Characterized by the DOD Acting General Counsel in Congressional testimony as "sensitive enough to generally prohibit foreign nationals and representatives of the foreign interest from having access to it". S. Rep. No. 3114 at pg. 234.

<sup>17</sup>Pub. L. No. 102-484, §§ 835-838, 106 Stat. 2315, 2461-66.

In comments to the Panel, the Navy expressed support for the new provisions because they strengthened the overall Exon-Florio regime and will provide CFIUS a more structured framework.<sup>18</sup> The remaining deficiency in the process was cited as:

... the definition of a "control" transaction in Exon-Florio remains flawed (from a DOD perspective) since it permits far too many [true corporate] "control" transactions to proceed forward without scrutiny.

#### **7.2.11.4. Recommendation and Justification**

##### **No action on sections 2061 through 2170.**

Although these sections apply to the procurement of defense goods and services, the determination was made that this section was predominately production planning related and, therefore, not within the primary defense acquisition purview of the Panel's statutory mandate. The current DPA program was only signed into law on October 28, 1992. While the reach of the DPA was expanded with this latest authorization, it is still far too early to identify the possible effects, both positive and negative, to the DOD procurement system. Thus, while the DPA is a significant statute, it has very recently received full consideration by the Congress.

#### **7.2.11.5. Relationship to Objectives**

The Panel believes that while this section has a tangential relationship to DOD acquisition, action on this statute would not further the objectives of the Panel.

---

<sup>18</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated 11 October 1992.

## **7.3. Acquisition, Cross-Servicing Agreements, and Standardization**

### **7.3.0. Introduction**

The genesis for the present subchapter I, *Acquisition and Cross-Servicing Agreements*, of Chapter 138 of Title 10 was the North Atlantic Treaty Organization Mutual Support Act of 1979 (NMSA),<sup>1</sup> enacted to simplify the interchange of logistic support, supplies, and services between the United States, the NATO countries, and NATO subsidiary bodies, thus contributing to the readiness of U.S. and allied armed forces deployed in Europe and adjacent waters.

Prior to the enactment of NMSA, contracting for logistic support and services in Europe had to be implemented using highly formalized procedures involving either government-to-government contract actions or the processing of Foreign Military Sales cases under the Arms Export Control Act. As these Government-to-Government requests for logistic support grew in number, the need for international agreements to control these arrangements, instead of contracts, also increased. In passing NMSA, Congress provided the authority for DOD to enter into these agreements to assuage the sovereignty concerns of our NATO Allies while concurrently meeting the needs of U.S. forces in Europe.

Currently, Chapter 138 of Title 10 places acquisition and cross-servicing agreements in subchapter I; however, the Panel recommended grouping all provisions concerning international agreements related to operational logistics and support together with the provision concerning NATO rationality, standardization, and interoperability (RSI) under a consolidated new subchapter III. While retaining the general acquisition and cross-servicing statutes, the new subchapter brings in provisions concerning the procurement of communications support and services; as well as the authority to accept direct payment, property, supplies, and services in connection with mutual support and occupational agreements, presently located in subchapter II of Title 10.

#### **7.3.0.1. Operational and Burdensharing Agreements**

Recent legislation has addressed increased allied burdensharing of operational and logistics support pursuant to mutual defense agreements and occupational arrangements. In order to accommodate direct payment or burdensharing contributions from foreign countries, and the use of real property, services, and supplies currently permitted by statute, the Panel recommended amendment of 10 U.S.C. § 2350g and relocation to this new subchapter. The amended section would provide needed flexibility to the Secretary of Defense in the administration and execution of mutual defense agreements and occupational arrangements, in addition to the authority to go beyond international courtesies and outside cross-servicing arrangements for needed logistic support, joint or bilateral exercises outside the area of the host-nation country and for increased allied burdensharing.

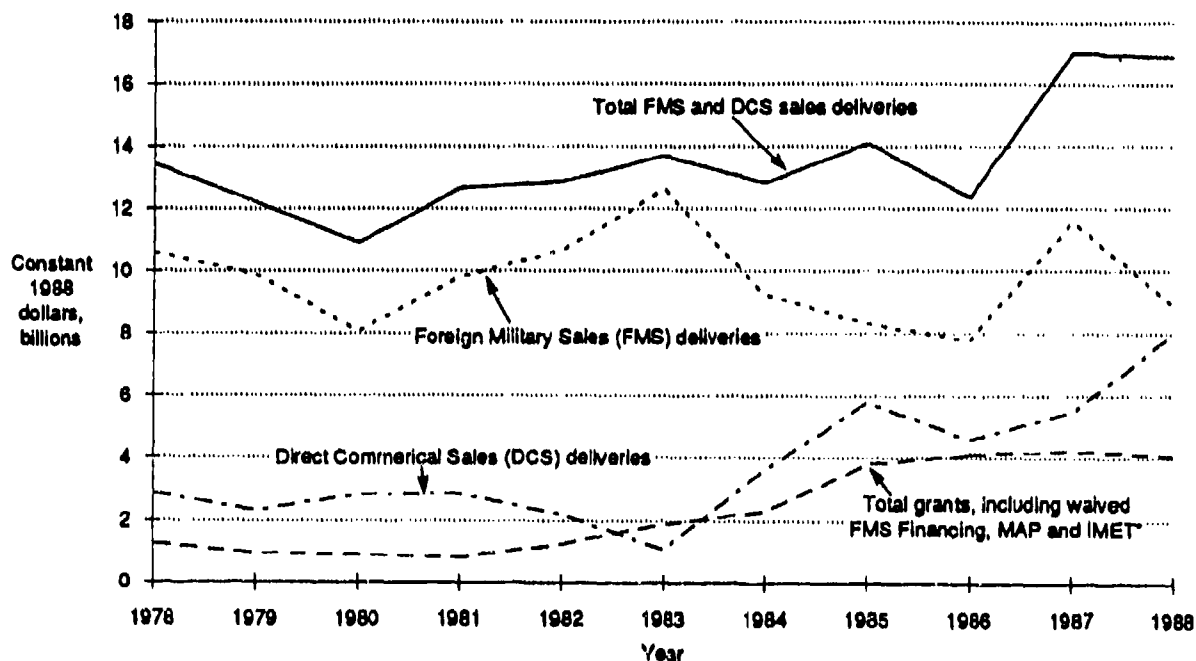

---

<sup>1</sup>Pub. L. No. 96-323, § 2(a), 94 Stat. 1016.

The Panel also recommends amending and relocating 10 U.S.C. § 2350f to this subchapter. Since its enactment, there has been confusion with regard to the legality of temporary connections in the course of joint operational exercises or to meet emergent operational requirements. The statute would seem to require an international agreement to make use of this authority; and as Congressional intent does not appear to contemplate an international agreement for every conceivable temporary connection, the Panel recommended amendment of this section to provide for the equivalent exchange of communications support during such contingencies.

### 7.3.0.2. Export Sales of Defense Items

Although the Panel deferred generally on conducting an in-depth analysis of the relationship between international defense acquisition, military assistance, and foreign military sales, the impact of the statistics on the U.S. acquisition process could not be avoided. As recently concluded in a report of the Office of Technology Assessment<sup>2</sup> - "A distinctly economic component has entered U.S. international military sales policies in recent years." That finding is readily apparent when U.S. Government and commercial sales deliveries for the years 1978-88 are depicted, as indicated in Figure 7E. below.<sup>3</sup>

\* Waived FMS Financing credits + Military Assistance Program (MAP) + International Military Education and Training program (IMET)

Fig. 7E. U.S. Government and Commercial Sales Deliveries of U.S. Military Equipment, and U.S. Military Grants, 1978-88

SOURCE: U.S. Department of Defense, Defense Security Assistance Agency, "Fiscal Year Series", September 30, 1989, pg. 2.

The report went on to argue that issues and options facing the U.S. Congress included reform of the arms transfer process, the future of global arms trade, transferring defense

<sup>2</sup>Congress of the United States Office of Technology Assessment, Global Arms Trade, Commerce in Advanced Military Technology and Weapons, June 1991.

<sup>3</sup>*Id.*, at pg. 12.

technology to developing nations, collaboration with Western Europe, and defense industrial collaboration with Japan. Much has been written on the problem of divorcing security assistance and foreign military sales from the foreign policy of the United States.<sup>4</sup> However, as noted elsewhere in this chapter, general trade policy and international defense acquisition are indelibly interrelated.

The Panel did address two sections of Title 22 which pointed up the relationship between general trade policy and international defense acquisition. Initially, in Chapter 5 above, section 22 U.S.C. § 2761(e) on non-recurring recoupment charges was recommended for repeal consistent with current U.S. Government policy. U.S. industry will be better able to be competitive in international defense export sales by no longer being required to recoup non-recurring charges.

Secondly, at the request of the Council of Defense and Space Industry Associations,<sup>5</sup> the Panel considered a proposed amendment to the definition for "defense articles and defense services" presently contained in 22 U.S.C. § 2794(7). The proposal would attempt to resolve the present dilemma with regard to commodity jurisdiction between the various government agencies concerning commercial export. Although the Panel recommended no action on the proposal, the issue of rationalizing exports controls is meritorious and deserving of attention by others more experienced in the matter and directly affected by the present commodity jurisdictional dilemma.

### **7.3.0.3. Overview of Subchapter Recommendations**

The Panel consolidated into a new subchapter those statutory provisions regarding acquisition and cross-servicing agreements with provisions concerning operational and burdensharing agreements, and NATO standardization. The new subchapter provides for uniformity in the treatment of similarly defined classes of agreements related to allied operations, logistics support, and standardization.

A section-by-section summary analysis of the recommendations for subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*, follows:

#### **Section 2x50. Definitions**

In reordering the sections concerning operational international agreements, previously resident in different chapters and subchapters of Title 10, various definitions applicable to the new subchapter were consolidated in this section. Consistent with the recommended treatment afforded new section 2x57, below, the definition for "contingency operation" has been added and appropriately referenced to the definition as presently contained in 10 U.S.C. § 101(47).

---

<sup>4</sup>Note 2, *supra*.

<sup>5</sup>Letter from the Council of Defense and Space Industry Associations, to Donald M. Freedman, Executive Secretary, DoD Advisory Panel, dated October 14, 1992

**Section 2x51. Authority to acquire logistic support, supplies, and services for elements of the armed forces deployed outside the United States**

This section remains unchanged from the existing language of 10 U.S.C. § 2341 as amended by the Defense Authorization Act of 1993.

**Section 2x52. Cross-servicing agreements**

This section amended 10 U.S.C. § 2342 only to delete the requirement for consultation with the Secretary of State as redundant of the omnibus requirement for prior consultation on international agreements mandated by the Case-Zablocki Act.<sup>6</sup>

**Section 2x53. Law applicable to acquisition and cross-servicing agreements**

The Panel recommends elimination of the statutory requirement of 10 U.S.C. § 2343 that mandates the application of domestic procurement procedures to NATO Mutual Support Act (NMSA) activities. Rather than a rigid application of Chapter 137 provisions to NMSA activities, the Panel proposes instead application of the standard of "prudent procurement practices" as presently utilized in the DOD Directive on NMSA.<sup>7</sup>

**Section 2x54. Methods of payment for acquisitions and transfers by the U.S.**

**Section 2x55. Liquidation of accrued credits and liabilities**

**Section 2x56. Crediting of receipts**

These sections remain unchanged from the existing language of 10 U.S.C. §§ 2344, 2345, and 2346.

**Section 2x57. Limitation on amounts that may be obligated or accrued by the United States**

In order to provide for a waiver of the limitations on accrual of reimbursable liabilities, as presently contained in 10 U.S.C. § 2347 (as amended by the Defense Authorization Act of 1993), to accommodate cases involving contingency operations, the Panel recommends an amendment to provide the Secretary of Defense such waiver authority for a maximum of a 180 days.

**Section 2x58. Inventories of supplies not to be increased**

This section remains unchanged from the existing language of 10 U.S.C. § 2348.

---

<sup>6</sup>5 U.S.C. § 112b.

<sup>7</sup>DOD Directive 2010.9, Sep. 30, 1988.

**Section 2x59. Procurement of communications support and related supplies and services**

Currently 10 U.S.C. § 2350f resides in subchapter II, *Cooperative Agreements*, of Chapter 138. Since the subject matter of the statute relates to the procurement of communications support, supplies, and services, the Panel recommends that the section more appropriately belongs in new subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

The Panel further recommended amendment of 10 U.S.C. § 2350f by adding a provision for the temporary furnishing or receiving of equivalent communications support and services to meet the requirements of joint operational exercises or to meet emergent operational requirements. As section 2350f was concerned with the procurement of communications and services, it was appropriately relocated to subchapter III as new section 2x59.

**Section 2x60. Authority to accept direct payment or contribution, use of real property, services, and supplies from foreign countries in connection with mutual defense agreements and occupational arrangements**

As with 10 U.S.C. § 2350f, above, section 2350g presently is contained in subchapter II, *Cooperative Agreements*, of Chapter 138. Since the subject matter of the statute relates to mutual defense agreements and occupational arrangements, the Panel recommends that the section more appropriately belongs in the new subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

In order to accommodate direct payment or contributions from foreign countries and to facilitate increased allied burdensharing, as well as the use of real property, services and supplies currently permitted by statute, the Panel recommended amendment by adding new paragraph (a)(3). The amended section would provide needed flexibility to the Secretary of Defense in the administration and execution of mutual defense agreements and occupational arrangements, as well as authority to go beyond international courtesies and outside cross-servicing arrangements for needed logistic support and increased allied burdensharing.

Furthermore, by adding new subsection (b) as an amendment to section 2350g, the Panel recommended permitting the acceptance of increased allied burdensharing contributions for joint or bilateral exercises outside the present limitation to the area of the host-nation country.

**Section 2x70. Standardization of equipment with North Atlantic Treaty Organization members**

Although the Panel entertained deleting much of the reporting requirements presently contained in this statute, comments received suggested retaining the section as presently structured. With the importance of encouraging NATO rationalization, standardization, and interoperability (RSI) in today's declining global defense economic environment, the Panel recommended retaining new section 2x70 unchanged from the existing language of 10 U.S.C. § 2457.

**Repeal of 22 U.S.C. § 2761(e). Charges; reduction or waiver**

The Panel recommended repeal of the statutory recoupment provisions in the Arms Export Control Act. The President has already revoked all regulatory implementation of various administrative provisions.<sup>8</sup>

---

<sup>8</sup>See Chapter 5 of this Report.

### **7.3.1. 10 U.S.C. §§ 2341 through 2350**

## **Acquisition and Cross-Servicing Agreements, Subchapter I, Cooperative Agreements With NATO Allies And Other Countries**

### **7.3.1.1. Summary of the Law**

Chapter 138, subchapter I, "Acquisition and Cross-Servicing Agreements," permits the Secretary of Defense (SECDEF) to acquire logistic support, supplies, and services for elements of the armed forces deployed outside the United States.<sup>1</sup> The SECDEF may also establish cross-servicing agreements, or the reciprocal provision of logistic support, supplies and services, with any member of NATO, NATO subsidiary body, or certain designated non-NATO countries.<sup>2</sup> Although certain procurement provisions of the United States Code are not applicable to such agreements,<sup>3</sup> the SECDEF must establish reciprocal pricing and reimbursement procedures with provisions,<sup>4</sup> mandating dollar limits on amounts of credits and liabilities and on amounts that would be obligated or accrued by the United States.<sup>5</sup> As a result of these cross-servicing activities, DOD is prohibited from increasing inventories and supplies of U.S. forces in Europe.<sup>6</sup>

### **7.3.1.2. Background of the Law**

The genesis for Chapter 138, subchapter I, was the North Atlantic Treaty Organization Mutual Support Act of 1979 (NMSA)<sup>7</sup> enacted to simplify the interchange of logistic support, supplies, and services between the United States, the NATO countries, and NATO subsidiary bodies, thus contributing to the readiness of U.S. and allied armed forces deployed in Europe and adjacent waters.

Prior to the enactment of NMSA, contracting for logistic support and services in Europe had to be implemented using highly formalized procedures involving either Government-to-Government contract actions or the processing of Foreign Military Sales cases under the Arms Export Control Act. As these Government-to-Government requests for logistic support grew, the need also increased for a general international agreement on logistics rather than relying on contract-by-contract arrangements. In passing NMSA, Congress provided the authority for DOD to enter into these agreements to assuage the sovereignty concerns of our NATO Allies while concurrently meeting the needs of U.S. forces in Europe.

<sup>4</sup>10 U.S.C. § 2344. Methods of payment for acquisitions and transfers by the United States.

<sup>5</sup>10 U.S.C. § 2345. Liquidation of accrued credits and liabilities; 10 U.S.C. § 2346. Crediting of receipts; 10 U.S.C. § 2347. Limitation on amounts that may be obligated or accrued by the United States.

<sup>6</sup>10 U.S.C. § 2348. Inventories of supplies not to be increased.

<sup>7</sup>Pub. L. No. 96-323, § 2(a), 94 Stat. 1016.

Section 1312 of the Defense Authorization Act of 1993<sup>8</sup> amended the statute by removing the geographical limitation to Europe and adjacent waters.

### 7.3.1.3. Law in Practice

Under the provisions of subchapter I, "Acquisition and Cross-Servicing Agreements," simplification of the interchange of logistic support, supplies, and services was supposed to result in a more flexible use of United States procurement procedures with regard to NATO. DOD was authorized to enter into host nation support agreements and, after consultation with the Department of State, to execute cross-servicing agreements with our allies for the reciprocal provision of logistic support. Commentary on the enactment of NMSA reported that:

In passing NMSA, Congress clearly authorized DOD to create a separate, two-tracked system for acquiring and transferring routine logistic support for European based forces. Congress envisioned that this would be a system parallel to, yet working in tandem with, existing formalized procurement and transfer procedures.<sup>9</sup>

DOD implemented NMSA through DOD Directive 2010.9,<sup>10</sup> which did not fully reflect the authority and flexibility granted by the statute. It consequently drew criticism because it continued to encumber operational logistics by applying the overly restrictive provisions of domestic procurement regulations.<sup>11</sup> Comments from the Services indicated that the burdensome nature of DOD's application of domestic procurement procedures to NMSA activities continues to cause concern, creating unnecessary and burdensome procedures. The U.S. Army highlighted Operation Desert Shield/Operation Desert Storm experiences as reflective of the concerns;<sup>12</sup> and as further reflected in a comment from the U.S. Navy:

Focusing again on the history of the Act discloses that Congress was responding to complaints from NATO Countries (The Netherlands in particular) that our pre-NMSA use of rigid procedures for acquisition (commercial contracts) and sales (FMS) was unwarranted given the routine nature of the transactions. Congress was also responding to the need for field commanders to be able to logistically "forage" or "exchange" to meet emergent

<sup>12</sup>Memorandum for DOD Advisory Panel on Streamlining and Codifying Acquisition Law (CM-AL) from Thomas J. Duffy, LTC, JA, Chief, Logistics & Contract Law Team, Army Judge Advocate General, Contract Law Division, dated 15 September 1992 - highlighting the potential problem in deployment and provisioning in the build-up phase of a contingency operation; and Memorandum from Larry D. Anderson, LTC, JAGC, Legal Officer, U.S. Army Materiel Command, to William E. Mounts, DSMC CM-AL, dated 31 August 1992.

- highlighting the difficulty of lease/loan receipt of major end-items of allied equipment (resort to third party leasing procedures under authority of 22 U.S.C. § 2796 were apparently less than effective).

requirements.<sup>13</sup> Given this history, a return to the concept that ACCS [acquisition and cross-servicing] agreements, or their implementing agreements, must meet contracting requirements takes us full circle to the situation in 1979.<sup>14</sup>

#### **7.3.1.4. Recommendations and Justification**

### **I**

**Retain sections 2341,<sup>15</sup> 2344, 2345, 2346, and 2348.**

Retention of these sections of the Subchapter provides the bulwark of authority for meeting the continuing requirement of reciprocal NATO logistics acquisition and cross-servicing agreements for sustained U.S. operational readiness in Europe and elsewhere.

Re-number as sections 2x51, 2x54, 2x55, 2x56, and 2x58, respectively, of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as these sections are concerned with operational logistic support agreements, move to subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

### **II**

**Amend paragraph 2342(a)(1) by striking the phrase "and after consultation with the Secretary of State."**

The requirement for consultation with the Secretary of State is redundant. Prior consultation on international agreements is already mandated by the Case-Zablocki Act.<sup>16</sup>

Re-number as section 2x52 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with operational logistics support agreements, move to subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

---

<sup>13</sup>Note 9, *supra*, at 227.

<sup>14</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated 29 August 1992.

<sup>15</sup>As amended, see note 8, *supra*.

<sup>16</sup>5 U.S.C. § 112b.

### III

Amend subsection 2343(a) by striking the phrase "chapter 137 of this title and the provisions of this subchapter" after the words "made in accordance with"; and substituting the phrase "prudent procurement practices" in lieu thereof.

Conforming amendments to subsection 2343 (a): strike the references to old sections "2341" and "2342" and insert in lieu thereof, respectively, references to new sections "2x51" and "2x52."

Conforming amendments to subsection 2343(b): strike the phrase , " 2304(a), 2306(a), 2306(b), 2306(e), 2306a, and 2313" and insert in lieu thereof "and chapter 137"; insert the phrase "s 3709, 3735, and" between the words "section" and "3741"; insert the phrase "'5, 13, and" between the words "U.S.C." and "22"; and strike the references to old sections "2341" and "2342" and insert in lieu thereof, respectively, references to new sections "2x51" and "2x52."

Amendment of subsection 2343(a), as recommended, will eliminate the statutory "Chapter 137 clause" which mandates the application of domestic procurement procedures to NMSA activities. Instead, the amendment provides that "prudent procurement practices," as presently set forth in the relevant DOD Directive,<sup>17</sup> be applied to the complete range of NMSA activities authorized under this Subchapter. Originally DOD sought the NMSA authority to have the ability to interchange logistics support with its allies in a quick, simplified manner without hindrance from domestic procurement procedures. Application of Chapter 137 to NMSA activities is counter-productive to this purpose. The provisions of Chapter 137 do not lend themselves to an efficient interchange of logistics support with the forces of other governments and with NATO subsidiary organizations.

The conforming amendments to subsections 2343(a) and (b) provide exceptions to the application of U.S. laws concerning engaging in NMSA-related activities. However, by making Chapter 137 generally non-applicable to NMSA activities, the provisions of 10 U.S.C. § 2314 must be re-introduced to this subchapter. Section 2314 mandates that certain Title 41 provisions, concerning advertisement of solicitations<sup>18</sup> and contract term limitation,<sup>19</sup> do not apply to the DOD, the Services, the Coast Guard, and the National Aeronautics and Space Administration.

Re-number as section 2x53 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with operational logistics support agreements, move to Subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

---

<sup>17</sup>Note 10, *supra*, § 6.b.

<sup>18</sup>41 U.S.C. § 5.

<sup>19</sup>41 U.S.C. § 13.

#### IV

**Amend section 2347<sup>20</sup> by adding a new paragraph "(c) When the Secretary of Defense certifies that the armed forces of the United States are, or imminently shall become, involved in a contingency operation, the restrictions set forth in subsections (a) and (b) above are waived for a period not to exceed 180 days."**

**Amend section 2350 by adding the definition "contingency operation has the same meaning provided such term in section 631 of the FY92/93 Defense Authorization Act (P.L. 102-190) (10 U.S.C. § 101(47))."**

The recommended amendments would correct deficiencies in subchapter I which were highlighted by recent experience in Operation Desert Shield/Operation Desert Storm,<sup>21</sup> and would provide statutory coverage for "contingency operations," the definition of which is currently found in 10 U.S.C. § 101(47). As stated in comments received from the U.S. Army:

Since future US involvement in contingency/combat operations may involve cooperative efforts with other nations, to include NATO allies, consideration should be given to including language which would encompass the deployment and build-up phases of any future operation within the waiver found in the statute.<sup>22</sup>

Renumber as sections 2x57 and 2x50, respectively, of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as these sections are concerned with operational logistics support agreements, move to subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

#### **7.3.1.5. Relationship to Objectives**

Amendment and retention of the sections in this subchapter establishes a balance between an efficient process and full and open access to the international logistics procurement process, while not inhibiting the development and preservation of an industrial base.

---

<sup>20</sup>As amended; see note 8, *supra*.

<sup>21</sup>Note 12, *supra*.

<sup>22</sup>Memorandum for DOD Advisory Panel on Streamlining and Codifying Acquisition Law (CM-AL), ATTN: William E. Mounts, from Thomas J. Duffy, LTC, JA, Chief, Logistics & Contract Law Team, Army Judge Advocate General, Contract Law Division, dated 15 September 1992, at pg. 2.

### 7.3.1.6. Proposed Statutes

#### **§ 2x52 ~~Sec. 2342~~. Cross-servicing agreements**

(a)(1) Subject to section ~~2343~~ 2x53 of this title and to the availability of appropriations, ~~and after consultation with the Secretary of State,~~ the Secretary of Defense may enter into an agreement described in paragraph (2) with --

(A) the government of a North Atlantic Treaty Organization country;

(B) a subsidiary body of the North Atlantic Treaty Organization; or

(C) the government of a country not a member of the North Atlantic Treaty Organization but which is designated by the Secretary of Defense, subject to the limitations prescribed in subsection (b), as a government with which the Secretary may enter into agreements under this section.

(2) An agreement referred to in paragraph (1) is an agreement under which the United States agrees to provide logistic support, supplies, and services to military forces of a country or subsidiary body referred to in paragraph (1) in return for the reciprocal provisions of logistic support, supplies, and services by such government or subsidiary body to elements of the armed forces.

(b) The Secretary of Defense may not designate a country for an agreement under this section --

(1) unless the Secretary, after consultation with the Secretary of State, determines that the designation of such country for such purpose is in the interest of the national security of the United States; and

(2) in the case of a country which is not a member of the North Atlantic Treaty Organization, notifies the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives at least 30 days before the date on which such country is designated by the Secretary under subsection (a).

(c) The Secretary of Defense may not use the authority of this subchapter to procure from any foreign government as a routine or normal source any goods or services reasonably available from United States commercial sources.

(d) The Secretary shall prescribe regulations to ensure that contracts entered into under this subchapter are free from self-dealing, bribery, and conflict of interests.

**§ 2x53 ~~Sec. 2343.~~ Law applicable to acquisition and cross-servicing agreements**

(a) Except as provided in subsection (b), acquisition of logistic support, supplies, and services under section ~~2341~~ 2x51 of this title and agreements entered into under section ~~2342~~ 2x52 of this title shall be made in accordance with ~~chapter 137 of this title and the provisions of this subchapter~~ prudent procurement practices.

(b) Sections ~~2207, 2304(a), 2306(a), 2306(b), 2306(c), 2306a, and 2313~~ and chapter 137 of this title and sections 3709, 3735, and 3741 of the Revised Statutes (41 U.S.C. § 5, 13, and 22) shall not apply to acquisitions made under the authority of section ~~2341~~ 2x51 of this title or to agreements entered into under section ~~2342~~ 2x52 of this title.

**§ 2x57 ~~Sec. 2347.~~ Limitation on amounts that may be obligated or accrued by the United States**

(a)(1) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable liabilities that the United States may accrue under this subchapter (before the computation of offsetting balances) with other member countries of the North Atlantic Treaty Organization and subsidiary bodies of the North Atlantic Treaty Organization may not exceed \$150,000,000 in any fiscal year, and of such amount not more than \$25,000,000 in liabilities may be accrued for the acquisition of supplies (other than petroleum, oils, and lubricants).

(2) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable liabilities that the United States may accrue under this subchapter (before the computation of offsetting balances) with a country which is not a member of the North Atlantic Treaty Organization, but with which the United States has one or more acquisition or cross-servicing agreements, may not exceed \$10,000,000 in any fiscal year, and of such amount not more than \$2,500,000 in liabilities may be accrued for the acquisition of supplies (other than petroleum, oils, and lubricants). The \$10,000,000 limitation specified in this paragraph is in addition to the limitation specified in paragraph (1).

(b)(1) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable credits that the United States may accrue under this subchapter (before the computation of offsetting balances) with other member countries of the North Atlantic Treaty Organization and subsidiary bodies of the North Atlantic Treaty Organization may not exceed \$100,000,000 in any fiscal year.

(2) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable credits that the United States may accrue under this subchapter (before the computation of offsetting balances) with a country which is not a member of the North Atlantic Treaty Organization, but with which the United States has one or more acquisition and cross-servicing agreements may not exceed \$10,000,000 in any fiscal year. Such limitation specified in this paragraph is in addition to the limitation specified in paragraph (1).

(c) When the Secretary of Defense certifies that the armed forces of the United States are, or imminently shall become, involved in a contingency operation, the restrictions set forth in subsections (a) and (b) above are waived for a period not to exceed 180 days.

**§2x50 ~~Sec. 2350~~. Definitions**

~~In this subchapter:~~

(1) ~~The term~~ "logistic support, supplies, and services" means food, billeting, transportation, petroleum, oils, lubricants, clothing, communications services, medical services, ammunition, base operations support (and construction incident to base operations support), storage services, use of facilities, training services, spare parts and components, repair and maintenance services, and port services.

(2) ~~The term~~ "North Atlantic Treaty Organization subsidiary bodies" means--

(A) any organization within the meaning of the term "subsidiary bodies" in article I of the multilateral treaty on the Status of the North Atlantic Treaty Organization, National Representatives and International Staff, signed at Ottawa on September 20, 1951 (TIAS 2992; 5 UST 1087); and

(B) any international military headquarters or organization to which the Protocol on the Status of International Military Headquarters Set Up Pursuant to the North Atlantic Treaty, signed at Paris on August 28, 1952 (TIAS 2978; 5 UST 870), applies.

(3) ~~The term~~ "military region" means the geographical area of responsibility assigned to the commander of a unified combatant command (excluding Europe and adjacent waters).

(4) "contingency operation" has the same meaning provided such term in section 631 of the FY92/93 Defense Authorization Act (Pub. L. No. 102-190) (10 U.S.C. § 101(47)).

## **7.3.2. 10 U.S.C. § 2350f**

### **Procurement of communications support and related supplies and services**

#### **7.3.2.1. Summary of the Law**

The Secretary of Defense is given the authority to enter into reciprocal agreements with allied countries or international organizations for the provision of communications support and related supplies and services. Any such agreement must not exceed five years duration and the approval of the Secretary of State is required. Liquidation of credits and liabilities under these agreements must be by direct payment of the party concerned at such times as mutually agreed, but no later than thirty days after the term of the agreement; and an annual reconciliation among the parties is required.

#### **7.3.2.2. Background of the Law**

The provision was added to Chapter 138 of Title 10 by section 1005(a) of the Defense Authorization Act of 1985.<sup>1</sup> Amendments to the provision by section 933(a) of the Defense Authorization Act of 1990-1991<sup>2</sup> made certain changes in the applicability and administration of the authority of SECDEF to enter into bilateral agreements with allies or NATO for the equivalent exchange of communications supplies and services.

#### **7.3.2.3. Law in Practice**

The statute gives DOD flexibility in meeting its requirements for global communications support by exchanging excess capacity in U.S. systems for reciprocal access to foreign communications systems. According to a comment from the U.S. Navy, the system is used extensively within DOD to build redundancy and depth into its baseline and tactical networks at a substantial resource savings.<sup>3</sup> This is particularly apparent in agreements concerning the configuration management of DOD owned and leased satellite and telecommunications systems where, under the provisions of this section, common technical, software, and procedural standards and formats for interconnections can be established.<sup>4</sup>

Guidance for the provision of communications equipment and services to foreign users is set forth in a DOD Memorandum requiring an international agreement for the equivalent

---

<sup>2</sup>Pub. L. No. 101-189, § 933(a)-(d), 103 Stat. 1352, 1537-38.

<sup>3</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated September 8, 1992.

<sup>4</sup>*Id.*, at pg. 2.

exchange of communications support.<sup>5</sup> With the approval of the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence, however, an exception from this formality is provided "In the case of foreign access that is necessitated by a multilateral or bilateral operational requirement, an agreement may be established which permits an allocation of the full costs of maintaining the interconnection between the United States and foreign users."

#### **7.3.2.4. Recommendations and Justification**

### **I**

#### **Amend subsection 2350f(a) by adding a new paragraph (2).**

Amend subsection (a) of the statute by adding paragraph (2), concerning the temporary furnishing or receiving of equivalent communications support and services to meet the requirements of joint operational exercises or to meet emergent operational requirements, which generally are classified. However, the requirement to provide temporary connection, between the U.S. and foreign users, can best be illustrated by our on-going multilateral international counter-drug operations.

Since the enactment of this statutory provision, however, there has been confusion with regard to the legality of temporary connections in the course of combined exercises or to meet emergent operational requirements. The statute appears to require an international agreement to make use of this authority. As Congressional intent does not appear to contemplate an international agreement for every conceivable temporary connection, the Panel believed that a valid requirement exists for the equivalent exchange of communications support during such contingencies, as reflected in the DOD Memorandum discussed above, and the U.S. Navy comment.<sup>6</sup>

Renumber as section 2x59 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with the procurement of communications support and services, move to subchapter III, *Acquisition, Cross Servicing-Agreements, and Standardization*.

### **II**

#### **Consolidate definitions contained in subsection 2350f(d) into new section 2x50.**

In an effort to streamline and consolidate international defense acquisition statutes into a new Chapter 1XX, *Defense Trade and Cooperation*, all definitions relative to subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*, have been relocated to an introductory new section 2x50, *Definitions*.

---

<sup>5</sup>Memorandum for Secretaries of the Military Departments, Chairman of the Joint Chiefs of Staff, Directors of the Defense Agencies, from the Assistant Secretary of Defense for Command, Control, Communications and Intelligence, Feb. 28, 1992.

<sup>6</sup>Note 3, *supra*, at pg. 3.

### 7.3.2.5. Relationship to Objectives

Amendment of the statute as recommended would encourage the exercise of sound judgment on the part of acquisition personnel while concurrently fostering sound and efficient procurement practices in a simple and understandable fashion.

### 7.3.2.6. Proposed Statute

#### **§ 2359 - ~~Sec. 2350f~~. Procurement of communications support and related supplies and services**

(a)(1) As an alternative means of obtaining communications support and related supplies and services, the Secretary of Defense, subject to the approval of the Secretary of State, may enter into a bilateral arrangement with any allied country or allied international organization or may enter into a multilateral arrangement with allied countries and allied international organizations, under which, in return for being provided communications support and related supplies and services, the United States would agree to provide to the allied country or countries or allied international organization or allied international organizations, as the case may be, or may enter into a multilateral arrangement with allied countries and allied international organizations, equivalent value of communications support and related supplies and services. The term of an arrangement entered into under this subsection may not exceed five years.

(2) Nothing in paragraph (1) shall limit the authority of the Secretary of Defense, in the absence of a formal agreement, to temporarily furnish or receive communications support and related supplies from an allied country to meet emergent operational requirements of both countries or incident to an exercise, provided that such periods of interconnection or access, as applicable, do not exceed 90 days and the exchanges can be conducted on conditions of reciprocity. If the interconnection is maintained for joint or multilateral defense purposes, then the costs of maintaining such circuits may be allocated among the various users.

(b)(1) Any arrangement entered into under this section shall require that any accrued credits and liabilities resulting from an unequal exchange of communications support and related supplies and services during the term of such arrangement would be liquidated by direct payment to the party having provided the greater amount of communications support and related supplies and services. Liquidations may be made at such times as the parties in an arrangement may agree upon, but in no case may final liquidation in the case of an arrangement be made later than 30 days after the end of the term for which the arrangement was entered into.

(2) Parties to an arrangement entered into under this section shall annually reconcile accrued credits and liabilities accruing under such agreement. Any liability of the United States resulting from a reconciliation shall be charged against the applicable appropriation available to the DOD (at the time of the reconciliation) for obligation for communications support and related supplies and services.

(3) Payments received by the United States shall be credited to the appropriation from which such communications support and related supplies and services have been provided.

(c) The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives.

### 7.3.3. 10 U.S.C. § 2350g

#### **Authority to accept use of real property, services, and supplies from foreign countries in connection with mutual defense agreements and occupational arrangements**

##### 7.3.3.1. Summary of the Law

In accordance with mutual defense agreements and occupational arrangements, the Secretary of Defense is authorized to accept real property, or the use thereof, supplies, and services from a foreign country for the support of any element of the U.S. armed forces. The acceptance of services furnished as reciprocal international courtesies or as services customarily made available without charge are included in this authority. The Secretary of Defense requires no specific authorization from Congress to invoke this authority; however general program limitations or prohibitions may not be contravened through the use of this authority. The Secretary must provide Congress a quarterly report on the use of this authority in accepting property or services having an aggregate value exceeding \$1,000,000, with a General Accounting Office audit required annually.

##### 7.3.3.2. Background of the Law

The provision was added as part of the Defense Authorization Act of 1991,<sup>1</sup> as necessary legislation in support of Operation Desert Shield/Desert Storm. The provision has not been subsequently amended. In enacting this provision, it was the sense of Congress that there should be increased burdensharing, with our allies taking the primary responsibility in providing for their own territorial defense, assisted by limited U.S. forces forward deployed for regional and global security.<sup>2</sup> One comment indicated that Congress intended for:

. . . U.S. basing costs to include[d] foreign national costs, civilian employee costs, real estate maintenance, construction, tolls, taxes, rents, utilities and environmental restoration should be provided by the host nation or alliance . . .<sup>3</sup>

Since Operation Desert Shield/Desert Storm, however, allied burdensharing by direct cash contribution has been the focus of the recent enactment of specific provisions to address such burdensharing. The Defense Authorization Act of 1992 and 1993<sup>4</sup> provided authority for the United States to accept cash burdensharing contributions from Japan and the Republic of Korea.

<sup>1</sup>Pub. L. No. 101-510, § 1451(b), 104 Stat. 1485, 1692-93.

<sup>2</sup>*Id.*, § 1455.

<sup>3</sup>Memorandum for DOD Advisory Panel on Streamlining and Codifying Acquisition Law (CM-AL)/Mr. Mounts, from Thomas J. Duffy, LTC, JA, Chief, Logistics & Contract Law Team, Army Judge Advocate General, Contract Law Division, dated November 4, 1992.

<sup>4</sup>Pub. L. No. 102-190, §§ 1045, 105 Stat. 1290, 1465-66.

Similarly, the Defense Authorization Act of 1993<sup>5</sup> has provided authority for cash burdensharing contributions from Kuwait while concurrently directing that host-nation support agreements be revised generally:

Each defense cost-sharing agreement entered into . . . shall provide that the nation agrees to share equitably with the United States, through cash compensation or in-kind contributions . . . the costs to the United States that arise solely from the implementation of the provisions of the bilateral or multilateral defense agreement with that nation.<sup>6</sup>

#### **7.3.3.3. Law in Practice**

In practice, the statute provides the Secretary of Defense authority for actions under mutual defense agreements and occupational arrangements which might otherwise contravene domestic legislation and sensibilities concerning the acceptance, on behalf of the United States, of gratuities from a foreign country. Other authorized acceptance procedures include those services furnished as reciprocal international courtesies, or furnished as services customarily made available by a foreign country. As reflected by the U.S. Navy:

This provision codifies the longstanding principle of 'reciprocal international courtesies' which enables DOD to accept the use of real property or routine services upon conditions or reciprocity. 10 U.S.C. § 7227 is one corollary provision which enables DOD to transfer routine services, section 2350g, as it is supplemented by 10 U.S.C. § 2608(d), puts to rest questions about DOD's authority to accept in-kind contributions for defense uses.<sup>7</sup>

#### **7.3.3.4. Recommendation and Justification**

**Amend section 2350g by adding new paragraph (a)(3) and new subsection (b).**

Under provisions of this section, however, further authority is required to accept direct burdensharing payment or contribution from our allies for the stationing of U.S. forces in foreign countries pursuant to a mutual defense agreement or occupational arrangement. Additionally, similar authority is needed to accommodate special warfare operational agreements entered into pursuant to mutual defense agreements or occupational arrangements.<sup>8</sup> While such provision facilitates force deployment overseas by maximizing the use of host-nation support, authority

<sup>5</sup>Pub. L. No. 102-484, § 1305, 106 Stat. 2315, 2546-47.

<sup>6</sup>Pub. L. No. 102-190, § 1046(3), 105 Stat. 1290, 1466.

<sup>7</sup>Memorandum from Mark E. Rosen, CDR, JAGC, Office of the Navy Judge Advocate General, International Law Division, to Donald Freedman, Executive Secretary, Acquisition Law Panel, dated 12 September 1992.

<sup>8</sup>Memoranda for DOD Advisory Panel on Streamlining and Codifying Acquisition Law (CM-AL)/Mr. Mounts, from Thomas J. Duffy, LTC, JA, Chief, Logistics & Contract Law Team, Army Judge Advocate General, Contract Law Division, dated September 15, 1992 and November 4, 1992.

needs to be broadened to include the acceptance of direct payment, services, and supplies incident to joint or bilateral exercises which may or may not take place operationally within the geographic limits of the host-nation.<sup>9</sup>

In order to accommodate direct payment or burdensharing contributions from foreign countries, as well as the use of real property, services, and supplies currently permitted by statute, the Panel recommends amendment of the statute by adding new paragraph (a)(3). The amended section would provide needed flexibility to SECDEF in the administration and execution of mutual defense agreements and occupational arrangements, as well as authority to go beyond international courtesies and outside cross-servicing arrangements for needed logistic support and increased allied burdensharing. By adding new subsection (b) as an additional amendment to section 2350g, the Panel recommendation also would authorize the acceptance of increased allied burdensharing contributions for joint or bilateral exercises outside the area of the host-nation country.

Re-number as section 2x60 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with operational and mutual defense agreements, move to subchapter III, *Acquisition, Cross-Servicing Agreements, and Standardization*.

#### **7.3.3.5. Relationship to Objectives**

Amendment of this section promotes financial integrity and allied burdensharing; and, while not unduly burdensome in the exercise of sound judgment on the part of acquisition personnel, also encourages sound and efficient procurement practices in a simple, understandable fashion.

#### **7.3.3.6. Proposed Statute**

**§ 2x60--Sec. 2350g. Authority to accept direct payment or contribution, use of real property, services, and supplies from foreign countries in connection with mutual defense agreements and occupational arrangements**

(a) Authority To Accept.--The Secretary of Defense may accept from a foreign country, for the support of any element of the armed forces in an area of that country--

(1) real property or the use of real property and services and supplies for the United States or for the use of the United States in accordance with a mutual defense agreement or occupational arrangement;

(2) services furnished as reciprocal international courtesies or as services customarily made available without charge; and

(3) direct payment or contribution. Any such direct payment or contribution received by the United States from a foreign country in accordance with a mutual defense agreement or

---

<sup>9</sup>Note 7, *supra*.

occupational arrangement accepted in a fiscal year shall be credited to appropriations of the Department of Defense that are available for that fiscal year for the purposes for which the contributions are made. The contributions so credited shall be --

(A) merged with the appropriations to which they are credited; and

(B) available for the same time period as those appropriations.

(b) The limitation upon the authority of the Secretary of Defense to accept direct payment or contribution, the use of real property, services and supplies, from foreign countries in connection with mutual defense agreements or occupational arrangements while in an area of that country, shall not apply in the case of joint or bilateral exercises involving the United States and the providing nation.

~~(b)(c)~~ Quarterly Reports.--(1) Not later than 30 days after the end of each quarter of each fiscal year, the Secretary of Defense shall submit to Congress a report on property, services, and supplies accepted by the Secretary under this section during the preceding quarter. The Secretary shall include in each such report a description of all property, services, and supplies having a value of more than \$1,000,000.

(2) In computing the value of any property, services, and supplies referred to in paragraph (1), the Secretary shall aggregate the value of--

(A) similar items of property, services, and supplies accepted by the Secretary during the quarter concerned; and

(B) components which, if assembled, would comprise all or a substantial part of an item of equipment or a facility.

~~(e)(d)~~ Authority to Use Property, Services, and Supplies.--Property, services, or supplies referred to in subsection (a) may be used by the Secretary of Defense without specific authorization, except that such property, services, and supplies may not be used in connection with any program, project, or activity if the use of such property, services, or supplies would result in the violation of any prohibition or limitation otherwise applicable to that program, project, or activity.

~~(d)(e)~~ Annual Audit by GAO.--The Comptroller General of the United States shall conduct an annual audit of property, services, and supplies accepted by the Secretary of Defense under this section and shall submit a copy of the results of each such audit to Congress.

#### **7.3.4. 10 U.S.C. § 2457**

### **Standardization of equipment with North Atlantic Treaty Organization members**

#### **7.3.4.1. Summary of the Law**

This statute codifies the policy for mandating equipment standardization and joint doctrine with the members of NATO, or at least interoperability with their equipment, for those weapon systems, ammunition, and fuel procured for the use of U.S. armed forces stationed in Europe under the auspices of NATO. Consideration of cost, function, quality, and availability of equipment was added as a requirement in defense procurement procedures, thereby joining the tests of rationalization, standardization, and interoperability (RSI). By relying on licensing and coproduction cooperative agreements, the statute contemplates increased survivability, in time of war, of the NATO armaments production base through dispersal of manufacturing facilities.

To encourage the Governments of Europe to operate in a more unified way, the concept of a "two-way street" between Europe and North America in cooperative defense procurement was introduced. The Secretary of Defense was mandated to prepare an annual NATO Report to Congress (now biennial) providing an assessment and evaluation concerning actual and potential areas for cooperative agreements, including identification of major new systems and research and development in compliance with NATO policy concerning cooperation. The Secretary of Defense (SECDEF) is permitted under the statute to acquire equipment manufactured outside the United States in furtherance of this policy.

#### **7.3.4.2. Background of the Law**

Section 302(c) of the Defense Authorization Act of 1975<sup>1</sup> provided the original discussion of NATO standardization by requiring a semi-annual report from DOD. The Culver-Nunn Amendment, part of the Defense Authorization Act of 1976,<sup>2</sup> added the concepts of cooperative research, development, licensed, and coproduction, support, and logistics to the discussion. When finally enacted by Congress in the Defense Authorization Act of 1983,<sup>3</sup> the statute concurrently authorized SECDEF, pursuant to the cooperative NATO policy, to procure equipment manufactured outside the United States by determining, that for purposes of the "Buy American" Act, the acquisition of equipment manufactured in the United States would be inconsistent with the public interest.

<sup>2</sup>Pub. L. No. 94-361, §§ 802-3, 90 Stat. 923, 930-31.

<sup>3</sup>Pub. L. No. 97-295, § 1(30)(A), 96 Stat. 1294.

#### 7.3.4.3. Law in Practice

NATO standardization is implemented by DOD Directive<sup>4</sup> and in its most recent annual report,<sup>5</sup> DOD recognized that smaller NATO forces in the 1990s would likely lead to more multinational military operations. Standardization of equipment within these organizations will consequently become more important, not only for interoperability but also for logistic support.<sup>6</sup> However, some concerns are evident:

In theory, NATO headquarters should serve as the locus of cooperation to ensure that the forces of member countries are appropriately equipped, including standardization and interoperability of weapons systems, ... has been only marginally successful in obtaining compliance. The chief reason is that the Allies have been reluctant to have an overly effective standardization program, which they fear would be based on generally cheaper and more effective U.S. weapons systems.<sup>7</sup>

#### 7.3.4.4. Recommendation and Justification

##### **Retain section 2457.**

Because the Congressional policy statement in support of RSI and follow-on logistic support within the NATO structure serves a useful purpose, the Panel recommends its retention.

Re-number as section 2x70 of the new Chapter 1XX, *Defense Trade and Cooperation*; and, as this section is concerned with operational and logistic support agreements, move to subchapter III, Acquisition and Cross-Servicing Agreements.

#### 7.3.4.5. Relationship to Objectives

Retention of this statute concerning international logistics and standardization, establishes a balance between an efficient process, full and open access to the procurement process, while not inhibiting the development and preservation of a national defense technology and industrial base.

#### **7.3.4.6. Proposed Statute**

##### **§ 2x70 Sec. 2457. Standardization of equipment with North Atlantic Treaty Organization members**

(a) It is the policy of the United States to standardize equipment, including weapons systems, ammunition, and fuel, procured for the use of the armed forces of the United States stationed in Europe under the North Atlantic Treaty or at least to make that equipment interoperable with equipment of other members of the North Atlantic Treaty Organization. To carry out this policy, the Secretary of Defense shall --

(1) assess the costs and possible loss of non-nuclear combat effectiveness of the military forces of the members of the Organization caused by the failure of the members to standardize equipment;

(2) maintain a list of actions to be taken, including an evaluation of the priority and effect of the action, to standardize equipment that may improve the overall non-nuclear defense capability of the Organization or save resources for the Organization; and

(3) initiate and carry out, to the maximum extent feasible, procurement procedures to acquire standardized or interoperable equipment, considering the cost, function, quality, and availability of the equipment.

(b) Progress in realizing the objectives of standardization and interoperability would be enhanced by expanded inter-Allied procurement of arms and equipment within the North Atlantic Treaty Organization. Expanded inter-Allied procurement would be made easier by greater reliance on licensing and coproduction cooperative agreements among the signatories of the North Atlantic Treaty. If constructed to preserve the efficiencies associated with economies of scale, the agreements could minimize potential economic hardship to parties to the agreements and increase the survivability, in time of war, of the North Atlantic Alliance's armaments production base by dispersing manufacturing facilities. In conjunction with other members of the Organization and to the maximum extent feasible, the Secretary shall--

(1) identify areas in which those cooperative agreements may be made with members of the Alliance; and

(2) negotiate those agreements.

(c)(1) It is the sense of Congress that weapons systems being developed wholly or primarily for employment in the North Atlantic Treaty Organization theater should conform to a common Organization requirement in order to proceed toward joint doctrine and planning and to facilitate maximum feasible standardization and interoperability of equipment, and that a common Organization requirement should be understood to include a common definition of the military threat to the members of the Organization.

(2) It is further the sense of Congress that standardization of weapons and equipment within the Organization on the basis of a "two-way street" concept of cooperation in defense procurement between Europe and North America can only work in a realistic sense if the European nations operate on a united and collective basis. Therefore, the governments of Europe are encouraged to accelerate their present efforts to achieve European armaments collaboration among all European members of the Organization.

(d) Before February 1, 1989, and biennially thereafter, the Secretary shall submit a report to Congress that includes --

(1) each specific assessment and evaluation made and the results of each assessment and evaluation, and the results achieved with the members of the North Atlantic Treaty Organization, under subsections (a)(1) and (2) and (b);

(2) procurement action initiated on each new major system not complying with the policy of subsection (a);

(3) procurement action initiated on each new major system that is not standardized or interoperable with equipment of other members of the Organization, including a description of the system chosen and the reason for choosing that system;

(4) the identity of --

(A) each program of research and development for the armed forces of the United States stationed in Europe that supports, conforms, or both, to common Organization requirements of developing weapon systems for use by the Organization, including a common definition of the military threat to the Organization; and

(B) the common requirements of the Organization to which those programs conform or which they support;

(5) action of the Alliance toward common Organization requirements if none exist;

(6) efforts to establish a regular procedure and mechanism in the Organization to determine common military requirements;

(7) a description of each existing and planned program of the DOD that supports the development or procurement of a weapon system or other military equipment originally developed or procured by members of the Organization other than the United States and for which funds have been authorized to be appropriated for the fiscal year in which the report is submitted, including a summary listing of the amount of funds--

(A) appropriated for those programs for the fiscal year in which the report is submitted; and

(B) requested, or proposed to be requested, for those programs for each of the 2 fiscal years following the fiscal year for which the report is submitted; and

(8) a description of each weapon system or other military equipment originally developed or procured in the United States and that is being developed or procured by members of the Organization other than the United States during the fiscal year for which the report is submitted.

(e) If the Secretary decides that procurement of equipment manufactured outside the United States is necessary to carry out the policy of subsection (a), the Secretary may determine under section 2 of title III of the Act of March 3, 1933 (41 U.S.C. § 10a), that acquiring that equipment manufactured in the United States is inconsistent with the public interest.

(f) The Secretary shall submit the results of each assessment and evaluation made under subsection (a)(1) and (2) to the appropriate North Atlantic Treaty Organization body to become an integral part of the overall Organization review of force goals and development of force plans.

### **7.3.5. 22 U.S.C. § 2794(7)**

#### **Definitions; defense articles and defense services**

##### **7.3.5.1. Summary of the Law**

Provisions of Title 22 and the Arms Export Control Act authorize military sales and assistance by the United States of defense articles and services to eligible foreign countries solely for the purposes of internal security, legitimate self-defense, civic action or regional, collective arrangements consistent with the United Nations Charter. Authorized sales can also derive from a United Nations' request to restore international peace and security or to enable less-developed foreign countries, friendly to the United States, to engage in activities helpful to their economic and social development.

Sales under the Arms Export Control Act must also, however: (a) strengthen the security of the United States and promote world peace; (b) restrict the transfer of any defense articles or services to third parties; (c) ensure that the security of the defense articles and services is maintained; and (d) be made only to eligible foreign countries or international organizations.

For purposes of Chapter 39 of the Arms Export and Control Act, the term "defense articles and defense services" means those commercial exports that are subject to 22 U.S.C. § 2778, Control of Arms Exports and Imports, and designated as part of the United States Munitions List.

##### **7.3.5.2. Background of the Law**

The provisions of the Foreign Assistance Act of 1961<sup>1</sup> superseded the military assistance provisions of the Mutual Defense Assistance Act of 1949<sup>2</sup> and the Mutual Security Act of 1951<sup>3</sup> in reaffirming the policy of the United States "to furnish to such countries cooperative military assistance of a kind and in an amount reasonably designed to help them provide for their own security against such aggression and for the security of international organizations of which they may be members."

The Foreign Military Sales Act of 1968<sup>4</sup> consolidated and revised all legislation dealing with military sales, whether for cash or on credit terms, to foreign countries by the United States. In Chapter 3, the Act also established some basic military export controls dealing with aggregate fiscal and geographic regional ceilings. Subsequent amendments in 1970 emphasized international cooperation for the maintenance of peace and security while placing additional restrictions on the military aid and sales programs. The Foreign Military Sales and Assistance Act of 1973 introduced the concepts of international narcotics control and international military education and

<sup>1</sup>Pub. L. No. 87-195, pt. II, 75 Stat. 424.

<sup>2</sup>Pub. L. No. 81-329, 63 Stat. 714.

<sup>3</sup>Pub. L. No. 82-165, 65 Stat. 373.

<sup>4</sup>Pub. L. No. 90-629, 82 Stat. 1320.

training (IMET) and, in conjunction with military assistance to Indochina, established an "armaments, munitions and war material" listing.

The International Security Assistance and Arms Export Control Act of 1976-1977<sup>5</sup> radically changed the landscape of military assistance and sales. The Act achieved the following general objectives: (1) shifting the focus of United States arms sales policy from selling to controlling arms sales and exports; (2) providing Congress and the public with additional information about Government arms sales actions; (3) reducing military grant assistance programs and costs; (4) coupling human rights and anti-discrimination considerations with the furnishing of security assistance; (5) differentiating between defense articles and services.

The International Security Assistance Act of 1978<sup>6</sup> created the economic support fund (ESF) and the international peacekeeping programs account (PKO) and set forth ten arms sales principles to encourage multilateral arms export restraint. The International Security and Development Cooperation Act of 1981<sup>7</sup> addressed nonrecurring research and development costs and Foreign military sales (FMS) administrative charges.

### 7.3.5.3. Law in Practice

Subchapter II of Chapter 32, Military Assistance and Sales, involve both Government-to-Government sales as well as direct commercial sales to foreign purchasers. While the rules and procedures differ for each type of sale, the same U.S. Government statutes and policies are reflected in the regulations governing each type of transaction.<sup>8</sup>

At the end of FY89, the Military Assistance Program (MAP) was formally integrated into the Foreign Military Financing Program. (FMFP). At that time, all funding for MAP grants was terminated and any foreign military sales (FMS) transaction that involved credit of any type was then processed under the FMFP.<sup>9</sup>

With regard to Chapter 39, the Arms Export Control Act, the issue concerning export control and licensing would seem to be resolution of commodity jurisdiction disputes between the Arms Export Control Act and the Export Administration Act.<sup>10</sup>

There are two basic problems associated with commodity jurisdiction. First the statutes and implementing regulations of the Arms Export Control Act (AECA) and the Export Administration Act (EAA) do not provide clear guidance as to which commodities are controlled by one act versus the other. This results in frequent

<sup>5</sup>Pub. L. No. 94-329, 90 Stat. 734.

<sup>6</sup>Pub. L. No. 95-384, 92 Stat. 739.

<sup>7</sup>Pub. L. No. 97-113, 94 Stat. 3132.

<sup>8</sup>DOD 5105.38-M, Security Assistance Management Manual (SAMM), 1988.

<sup>9</sup>Memorandum for Department of Defense Advisory Panel on Streamlining and Codifying Acquisition Law, from Paul C. Smith, COL, JA, Chief, Contract Law Division, Office of the Army Judge Advocate General, dated September 21, 1992.

<sup>10</sup>50 U.S.C. App. 2401 *et seq.*

commodity jurisdiction disputes. Second, the EAA imposes an obligation to coordinate its controls with those under the AECA, but no similar obligation is imposed by the AECA. The practical effect of this asymmetry is that Commerce, which has primary authority in administering the EAA, defers to the decisions of the State Department, which has been designated primary responsibility for administering the AECA. As a consequence, there is a strong bias in favor of placing controversial items on the munitions list.<sup>11</sup>

#### **7.3.5.4. Recommendation and Justification**

##### **No action on section 2794(7).**

The Panel received comment from the Council of Defense and Space Industry Associations highlighting the need for guidance to industry as to what is controlled for export licensing purposes by the State Department under the Munitions Control List,<sup>12</sup> but took no action on section 2794(7). Although the section applies to the procurement of commercial defense goods and services, the determination was made that this section was predominately export control related and, therefore, not within the primary defense acquisition purview of the Panel's statutory mandate.

#### **7.3.5.5. Relationship to Objectives**

The Panel believes that while this section has a tangential relationship to DOD acquisition, action on this statute would not further the objectives of the Panel.

---

<sup>11</sup>Response to Congressional Request for Definition of a Defense Article, Attachment to Letter, from the Council of Defense and Space Industry Associations (CODSIA), to Donald M. Freedman, Executive Secretary, DoD Advisory Panel on Streamlining and Codifying Acquisition Law, dated October 14, 1992.

<sup>12</sup>*Id.*, Letter from CODSIA recommended that because the regulations implementing the Munitions Control List and the Export Administration Regulations often overlap and are confusing,, by addressing commodity jurisdiction, a new definition for defense articles and services would hopefully bring consistency to the process of export licensing and control.

## **7.4. Proposed Defense Trade and Cooperation Code**

### **TITLE 10** **CHAPTER 1XX. DEFENSE TRADE AND COOPERATION**

#### ***§2x00. Short Title***

*This chapter shall be known as the Defense Trade and Cooperation Act of 1993.*

#### **SUBCHAPTER I** **PURCHASES OF FOREIGN GOODS BY THE DEPARTMENT OF DEFENSE**

#### ***§2x10. Definitions***

*(a) As used in this subchapter, the following are defined terms—*

*(1) In this section, "American goods" means--*

*(A) an end product that is mined, produced, or manufactured in the United States;*

*or*

*(B) an end product that is manufactured in the United States but which includes components mined, produced, or manufactured outside the United States if such end product is substantially transformed within the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed.*

*(2) "goods which are other than American goods" means an end product not meeting the requirements of subsection (a)(1).*

*(3) "unreasonable cost" is defined in 10 U.S.C. § 2x17.*

*(4) "covered contract" means a contract for property, other than real property and commercial items and components as defined in 10 U.S.C. §§ 2302 (5) and 2xx2, the total value of which exceeds the simplified acquisition threshold set out at 10 U.S.C. § 2302(4).*

*(5) "United States", when used in a geographical sense, includes the United States and any place subject to the jurisdiction thereof;*

*(6) "public use", "public building", and "public work" shall mean use by, public building of, and public work of, the United States, the District of Columbia, Puerto Rico, American Samoa, the Canal Zone, and the Virgin Islands.*

**§ 2x11. Policy on Purchases of Foreign Goods**

(a) Funds appropriated to the Department of Defense may not be obligated under a covered contract for procurement of goods which are other than American goods unless adequate consideration is given to the following:

(1) The bids or proposals of firms located in labor surplus areas in the United States (as designated by the Department of Labor) which have offered to furnish American goods.

(2) The bids or proposals of small business firms in the United States which have offered to furnish American goods.

(3) The bids or proposals of all other firms in the United States which have offered to furnish American goods.

(4) The United States balance of payments.

(5) The cost of shipping goods which are other than American goods.

(6) Any duty, tariff, or surcharge which may enter into the cost of using goods which are other than American goods.

(7) *The need to protect the United States national defense technology and industrial base and mobilization base.*

(8) *Coordination of acquisition activities of the Department with obligations contained in international treaties and with the acquisition activities of major United States allies (as in section 2x20(7) of this chapter).*

(9) *National security interests of the United States.*

(b) Consideration of the matters referred to in paragraphs (1) through (9) of subsection (a) shall be given *in the manner set out in this Subchapter.*

**§ 2x12. Items Restricted to American Sources**

(a) *AUTHORITY OF THE SECRETARY.—The Secretary of Defense is hereby authorized to require the Department to acquire only American goods and related American services for specific items as the Secretary may find necessary to protect the United States national defense technology and industrial base, or the United States mobilization base, or to further national security.*

(b) *RESTRICTIONS ON ACQUISITION OF GOODS FROM COUNTRIES WHICH DISCRIMINATE AGAINST AMERICAN GOODS AND RELATED AMERICAN SERVICES.—Section 10b-1 of Title 41 shall apply to the Department of Defense except that section shall have no application to the acquisition of commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2 or to contracts*

*the value of which is below the simplified acquisition threshold as defined in 10 U.S.C. § 2302(4).*

**(c) BUSES.--**Funds appropriated for use by the armed forces are available to acquire a multipassenger motor vehicle (bus) only if the vehicle is manufactured in the United States. However, the Secretary of Defense may prescribe regulations authorizing the acquisition of a multipassenger motor vehicle (bus) not manufactured in the United States, but only to ensure that compliance with this subsection will not result in an uneconomical procurement action or adversely affect the national interest.

**(d) CHEMICAL WEAPONS ANTIDOTE MANUFACTURED OVERSEAS.--**Funds appropriated to the Department of Defense may not be used for the procurement of chemical weapons antidote contained in automatic injectors (or for the procurement of the components for such injectors) determined to be critical under the Industrial Preparedness Planning Program of the Department of Defense unless-

(1) such injector or component is manufactured in the United States by a company which is an existing producer under the industrial preparedness program at the time the contract is awarded and which

(A) has received all required regulatory approvals; and

(B) has the plant, equipment, and personnel to perform the contract in existence in the United States at the time the contract is awarded; or

(2) the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, determines that such procurement from a source in addition to a source described in paragraph (1) is critical to the national security.

**(e) VALVES AND MACHINE TOOLS .--**

(1) Effective through fiscal year 1996, funds appropriated or otherwise made available to the Department of Defense may not be used to enter into a contract for the procurement of items described in paragraph (2) that are not manufactured in the United States or Canada.

(2) Items covered by paragraph (1) are the following:

(A) Powered and non-powered valves in Federal Supply Classes 4810 and 4820 used in piping for naval surface ships and submarines.

(B) Machine tools in the Federal Supply Classes for metal-working machinery numbered 3405, 3408, 3410 through 3419, 3426, 3433, 3438, 3441 through 3443, 3445, 3446, 3448, 3449, 3460, and 3461.

(3) Contracts covered by paragraph (1) include the following:

(A) Contracts for the procurement of items described in paragraph (2) for use in any property under the control of the Department of Defense, including government-owned, contractor-operated facilities.

(B) Contracts entered into by contractors on behalf of the Department of Defense for the procurement of items described in paragraph (2) for the purposes of providing the items to other contractors as Government-furnished equipment.

(4) In any case in which a contract subject to the requirement of paragraph (1) includes the procurement of more than one Federal Supply Class of machine tools or machine tools and accessories described in paragraph (2), each supply class shall be evaluated separately for purposes of determining whether the limitation in this subsection applies.

(5) The Secretary of Defense may waive the requirement of paragraph (1) with respect to the procurement of an item if the Secretary determines that any of the following apply with respect to that item:

(A) The restriction would cause unreasonable costs or delays to be incurred.

(B) United States producers of the item would not be jeopardized by competition from a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.

(C) Satisfactory quality items manufactured in the United States or Canada are not available.

(D) The restriction would impede cooperative programs entered into between the Department of Defense and a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.

(E) The procurement is for an amount less than \$25,000 and simplified small purchase procedures are being used.

(F) The restriction would result in the existence of only one United States or Canadian source for the item.

(f) AIR CIRCUIT BREAKERS .--

(1) The Secretary of Defense may not procure air circuit breakers for naval vessels unless-

(A) the air circuit breakers are produced or manufactured in the United States; and

(B) substantially all of the components of the air circuit breakers are produced or manufactured in the United States.

(2) For purposes of paragraph (1)(B), substantially all of the components of air circuit breakers shall be considered to be produced or manufactured in the United States if the aggregate cost of the components produced or manufactured in the United States exceeds the aggregate cost of the components produced or manufactured outside the United States.

(3) Paragraph (1) does not prevent the procurement of spares and repair parts needed to support air circuit breakers produced or manufactured outside the United States.

(4) The Secretary of Defense may waive the limitation in paragraph (1) on a case-by-case basis with respect to any procurement if the Secretary determines that carrying out a proposed procurement in accordance with the limitation in that case--

(A) is not in the national security interests of the United States;

(B) will have an adverse effect on a United States company; or

(C) will result in procurement from a United States company that, with respect to the sale of air circuit breakers, fails to comply with applicable Government procurement regulations or the antitrust laws of the United States.

(5) Whenever the Secretary proposes to grant a waiver under paragraph (4), the Secretary shall submit a notice of the proposed waiver, together with a statement of the reasons for the proposed waiver, to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives. The waiver may then be granted only after the end of the 30-day period beginning on the date on which the notice is received by those committees.

(g) SONOBUOYS - (1) The Secretary of Defense may not procure a sonobuoy manufactured in a foreign country if United States firms that manufacture sonobuoys are not permitted to compete on an equal basis with foreign manufacturing firms for the sale of sonobuoys in that foreign country.

(2) The Secretary may waive the limitation in paragraph (1) with respect to a particular procurement of sonobuoys if the Secretary determines that such procurement is in the national security interests of the United States.

(3) In this subsection, the term 'United States firm' has the meaning given such term in section 2x20(10) of this title.

*(h) TECHNICAL DATA PACKAGES FOR LARGE-CALIBER CANNON: PROHIBITION ON TRANSFERS TO FOREIGN COUNTRIES; EXCEPTION*

**(1) General rule**

Funds appropriated to the Department of Defense may not be used-- (A) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or (B) to assist a foreign country in producing such a defense item.

**(2) Exception**

The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in *paragraph (1)* if-- (A) the transfer or provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State); (B) the Secretary of the Army determines that such action-- (i) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and (ii) would not transfer technology (including production techniques) considered unique to the arsenal concerned, except as provided in *paragraph (5)*; and (C) the Secretary of Defense enters into an agreement with the country concerned described in *paragraph (3)* or (4).

**(3) Coproduction agreements**

An agreement under this *paragraph* shall be in the form of a Government-to- Government Memorandum of Understanding and shall include provisions that-- (A) prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; (B) require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned; (C) subject to such exceptions as may be approved under *paragraph (6)*, prohibit transfer by the participating foreign country to a third party or country of-- (i) any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and (ii) any defense article produced by the participating foreign country under the agreement; and (D) require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

**(4) Cooperative project agreements**

An agreement under this *paragraph* is a cooperative project agreement under section 2x31 of this chapter which shall include provisions that-- (A) for development phases describe the technical data to be transferred and for the production phase prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement; (B) require that at least the United States production of the defense item to which the technical data package or assistance relates be carried out by the arsenal concerned; and (C) require the Secretary of Defense to monitor compliance with the agreement.

**(5) Licensing fees and royalties**

The limitation in *paragraph (2)(B)(ii)* shall not apply if the technology (or production technique) transferred is subject to nonexclusive license and payment of any negotiated licensing fee or royalty that reflects the cost of development, implementation, and prove-out of the technology or production technique. Any negotiated license fee or royalty shall be placed in the operating fund of the arsenal concerned for the purpose of capital investment and technology development at that arsenal.

**(6) Transfers to third parties**

A transfer described in *paragraph (3)(C)* may be made if-- (A) the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program or a cooperative project in which the United States and the participating foreign country were partners; or (B) the President-- (i) complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. 2753(d)) with respect to such transfer; and (ii) certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large-caliber cannon.

**(7) Notice and reports to Congress:** (A) The Secretary of the Army shall submit to Congress a notice of each agreement entered into under this *subsection*. (B) The Secretary shall submit to Congress a semi-annual report on the operation of this *subsection* and of agreements entered into under this section.

**(8) Arsenal defined**

In this *subsection*, the term "arsenal" means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon.

**(i) RESTRICTIONS ON CONSTRUCTION OR REPAIR OF VESSELS IN FOREIGN SHIPYARDS.**

(1) Except as provided in *paragraph (2)*, no vessel to be constructed for any of the armed forces, and no major component of the hull or superstructure of any such vessel, may be constructed in a foreign shipyard.

(2) The President may authorize exceptions to the prohibition in *paragraph (1)* when he determines that it is in the national security interest of the United States to do so. The President shall transmit notice to Congress of any such determination, and no contract may be made pursuant to the exception authorized until the end of the 30-day period beginning on the date the notice of such determination is received by Congress.

(3)(A) A naval vessel (or any other vessel under the jurisdiction of the Secretary of the Navy) the homeport of which is in the United States may not be overhauled, repaired, or maintained in a shipyard outside the United States.

(B) *Subparagraph (A)* does not apply in the case of voyage repairs.

(4) An inflatable boat or rigid inflatable boat, as defined by the Secretary of the Navy, is not a vessel for the purpose of the restriction in *paragraph (1)*.

(5) In the case of a naval vessel the homeport of which is not in the United States (or a territory of the United States), the Secretary of the Navy may not during the 15-month period preceding the planned reassignment of the vessel to a homeport in the United States (or a territory of the United States) begin any work for the overhaul, repair, or maintenance of the vessel that is scheduled to be for a period of more than six months.

**§2x13. *Application of the Trade Agreements Act.***

(a) *Except as set forth in section 2x11 of this subchapter and in subparagraph (b) of this section, the Trade Agreements Act (19 U.S.C. § 2501 et seq.) shall apply, subject to its terms, to Department of Defense covered contracts.*

(b) *The Trade Agreements Act shall not apply to the acquisition of spare or replacement parts for end products meeting the requirements of the Trade Agreements Act when such acquisitions are restricted to the original source of such end product or to the original manufacturer of the part, or when no domestic or designated country source is available for such parts. The Secretary of Defense shall issue regulations implementing this subsection.*

**§2x14. *Preference for American Goods***

(a) GENERAL.—Except as set out in this Chapter, and unless the Secretary or the Secretaries of the military departments shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only American goods shall be acquired for public use under any covered contract. This section shall not apply—

(1) with respect to articles, materials, or supplies acquired for use outside the United States, or

(2) if American goods of sufficient quality are not reasonably available in commercial quantities,

(3) to the acquisition of spare or replacement parts for an end product meeting the requirements of this subsection when such acquisitions are restricted to the original source of such end product or to the original manufacturer of the part, or when no domestic or designated country source is available for such parts. The Secretary of Defense shall issue regulations implementing this subsection.

(b) **CONTRACTS FOR PUBLIC WORKS; SPECIFICATION FOR USE OF AMERICAN MATERIALS.**—Every contract for the construction, alteration, or repair of any public building or public work in the United States shall contain a provision that in the performance of the work the contractor, subcontractors, material men, or suppliers, shall use only *American goods*; provided, however, that if the head of the Federal agency making the contract shall find that in respect to some particular articles, materials, or supplies it is impracticable to make such requirement or that it would unreasonably increase the cost, an exception shall be noted in the specifications as to that particular article, material, or supply, and a public record made of the findings which justified the exception. *This section shall not apply if American goods of sufficient quality are not reasonably available in commercial quantities.*

**§2x15. Determination of Unreasonable Cost**

*The cost of American goods is unreasonable as compared to the cost of goods which are other than American goods if the cost of such American goods exceeds the cost of goods which are other than American goods by a percentage to be determined by the Secretary of Defense. The percentage determined under this section shall not be less than the percentage set from time to time by Executive Orders implementing the Buy American Act (41 U.S.C. § 10a - 10d).*

## SUBCHAPTER II

### INTERNATIONAL AND COOPERATIVE AGREEMENTS

#### §2x20. Definitions

(a) *As used in this subchapter, the following are defined terms—*

(1) "allied country" means any of the following:

(A) A country that is a member of the North Atlantic Treaty Organization.

(B) Australia, New Zealand, Japan, and the Republic of Korea.

(C) Any other country designated as an allied country for the purposes of this section by the Secretary of Defense with the concurrence of the Secretary of State.

(2) "cooperative project" means a jointly managed arrangement, described in a written agreement entered into by the participants, that--

(A) is undertaken by the participants in order to improve the conventional defense capabilities of the participants; and

(B) provides for--

(i) one or more participants (other than the United States) to share with the United States the cost of research and development, testing, evaluation, or joint production (including follow-on support) of defense articles;

(ii) the United States and another participant concurrently to produce in the United States and the country of such other participant a defense article jointly developed in a cooperative project described in clause (i); or

(iii) *modifying existing military equipment to meet United States military requirements; or*

(iv) the United States to procure a defense article or a defense service from another participant in the cooperative project.

(3) "defense article" has the meaning given such term in section 47(3) of the Arms Export Control Act (22 U.S.C. § 2794(3)).

(4) "defense service" has the meaning given such term in section 47(4) of the Arms Export Control Act (22 U.S.C. § 2794(4)).

(5) "foreign firm" means a business entity other than a United States firm.

(6) "*friendly foreign country*" means any country designated as a friendly foreign country for purposes of this Subchapter by the Secretary of Defense in consultation with the Secretary of State.

(7) "major ally of the United States" means--

(A) a member nation of the North Atlantic Treaty Organization (other than the United States) and North Atlantic Treaty Organization subsidiary bodies; or

(B) a major non-NATO ally.

(8) "major non-NATO ally" means a country (other than a member nation of the North Atlantic Treaty Organization) that is designated as a major non-NATO ally for purposes of this section by the Secretary of Defense with the concurrence of the Secretary of State.

(9) "North Atlantic Treaty Organization subsidiary bodies" has the meaning given to it by section 2x50 of this title.

(10) "United States firm" means a business entity that performs substantially all of its manufacturing, production, and research and development activities in the United States.

#### **§2x21. Defense international agreements**

(a) CONSIDERATIONS IN MAKING AND IMPLEMENTING *INTERNATIONAL AGREEMENTS*.--In the negotiation, renegotiation, and implementation of any existing or proposed memorandum of understanding, between the Secretary of Defense, acting on behalf of the United States, and one or more foreign countries (or any instrumentality of a foreign country) relating to research, development, or production, or *logistics support* of defense equipment, or to the reciprocal procurement of defense items, the Secretary of Defense shall--

(1) consider the effects of such existing or proposed *international* agreement on the national defense technology and industrial base of the United States; and

(2) regularly solicit and consider comments and recommendations from the Secretary of Commerce with respect to the commercial implications of such *international* agreement and the potential effects of such *international* agreement on the international competitive position of United States industry.

(b) INTER-AGENCY REVIEW OF EFFECTS ON UNITED STATES INDUSTRY.-- Whenever the Secretary of Commerce has reason to believe that an existing or proposed *international* agreement has, or threatens to have, a significant adverse effect on the international competitive position of United States industry, the Secretary may request an inter-agency review of the *international* agreement. If, as a result of the review, the Secretary determines that the commercial interests of the United

States are not being served or would not be served by adhering to the terms of such existing *international* agreement or agreeing to such proposed *international* agreement, as the case may be, the Secretary shall recommend to the President the renegotiation of the existing *international* agreement or any modification to the proposed *international* agreement that he considers necessary to ensure an appropriate balance of interests.

(c) LIMITATION ON ENTERING INTO *INTERNATIONAL* AGREEMENTS.-- *An international* agreement referred to in subsection (a) may not be entered into or implemented if the President, taking into consideration the results of the interagency review, determines that such *international* agreement has or is likely to have a significant adverse effect on United States industry that outweighs the benefits of entering into or implementing such *international* agreement.

(d) FOREIGN CONTRIBUTIONS FOR COOPERATIVE PROJECTS

Crediting of Contributions.-- Whenever the United States participates in a cooperative project with a friendly foreign country or NATO on a cost-sharing basis, any contribution received by the United States from that foreign country or NATO to meet its share of the costs of the project may be credited to appropriations available to an appropriate military department or another appropriate organization within the Department of Defense, as determined by the Secretary of Defense.

Use of Amounts Credited.-- The amount of a contribution credited pursuant to subsection (a) to an appropriation account in connection with a cooperative project referred to in that subsection shall be available only for payment of the share of the project expenses allocated to the foreign country or NATO making the contribution. Payments for which such amount is available include the following:

Payments to contractors and other suppliers (including the Department of Defense and other participants acting as suppliers) for necessary articles and services.

Payments for any damages and costs resulting from the performance or cancellation of any contract or other obligation.

Payments or reimbursements of other program expenses, including program office overhead and administrative costs.

Refunds to other participants.

**§2x22. Offset policy; notification**

(a) ESTABLISHMENT OF OFFSET POLICY.-- The President shall establish, consistent with the requirements of this section, a comprehensive policy with respect to contractual offset arrangements in connection with the purchase of defense equipment or supplies which addresses the following:

(1) Transfer of technology in connection with offset arrangements.

(2) Application of offset arrangements, including cases in which United States funds are used to finance the purchase by a foreign government.

(3) Effects of offset arrangements on specific subsectors of the industrial base of the United States and for preventing or ameliorating any serious adverse effects on such subsectors.

(b) TECHNOLOGY TRANSFER.-- (1) No official of the United States may enter into a memorandum of understanding or other agreement with a foreign government that would require the transfer of United States defense technology to a foreign country or a foreign firm in connection with a contract that is subject to an offset arrangement if the implementation of such memorandum or agreement would significantly and adversely affect the defense industrial base of the United States and would result in a substantial financial loss to a United States firm.

(2) Paragraph (1) shall not apply in the case of a memorandum of understanding or agreement described in paragraph (1) if the Secretary of Defense, in consultation with the Secretary of Commerce and the Secretary of State, determines that a transfer of United States defense technology pursuant to such understanding or agreement will result in strengthening the national security of the United States and so certifies to Congress.

(3) If a United States firm is required under the terms of a memorandum of understanding, or other agreement entered into by the United States with a foreign country, to transfer defense technology to a foreign country, the United States firm may protest the determination to the Secretary of Defense on the grounds that the transfer of such technology would adversely affect the defense industrial base of the United States and would result in substantial financial loss to the protesting firm. The Secretary of Defense, in consultation with the Secretary of Commerce and the Secretary of State, shall make the final determination of the validity of the protesting firm's claim.

(c) NOTIFICATION REGARDING OFFSETS.-- If at any time a United States firm enters into a contract for the sale of a weapon system or defense-related item to a foreign country or foreign firm and such contract is subject to an offset arrangement exceeding \$50,000,000 in value, such firm shall notify the Secretary of Defense of the proposed sale. Notification shall be made under this subsection in accordance with regulations prescribed by the Secretary of Defense in consultation with the Secretary of Commerce.

### **§2x31. Cooperative projects: allied countries**

(a) Authority to engage in cooperative projects

The Secretary of Defense may enter into a memorandum of understanding (or other formal agreement) with one or more major allies of the United States for the purpose of conducting cooperative projects on defense equipment and munitions.

(b) Requirement that projects improve conventional defense capabilities

(1) The Secretary of Defense may not enter into a memorandum of understanding (or other formal agreement) to conduct a cooperative project under this section unless the Secretary determines that the proposed project will improve, through the application of emerging technology, the conventional defense capabilities of NATO or the common conventional defense capabilities of the United States and its major non-NATO allies.

(2) The authority of the Secretary to make a determination under paragraph (1) may only be delegated to the Deputy Secretary of Defense or the Under Secretary of Defense for Acquisition.

(c) Cost sharing

Each cooperative project entered into under this section shall require sharing of the costs of the project (including the costs of claims) between the participants on an equitable basis.

(d) *Acquisition of defense equipment and services*

(1) A major ally of the United States may not use any military or economic assistance grant, loan, or other funds provided by the United States for the purpose of making that ally's contribution to a cooperative ~~research and development~~ program entered into with the United States under this section.

(2)(A) Except as provided in *subparagraph (C)*, chapter 137 of this title shall apply to *contracts for the acquisition of defense equipment and services* by the Secretary of Defense. Except to the extent waived under *subparagraph (C) of this subsection* or some other provision of law, all other provisions of law relating to procurement, if otherwise applicable, shall apply to such contracts entered into by the Secretary of Defense.

(B) When contracting or incurring obligations for cooperative projects, the Secretary of Defense may require subcontracts to be awarded to particular subcontractors in furtherance of the cooperative project.

(C)(1) Subject to paragraph (2), when entering into contracts or incurring obligations outside the United States, the Secretary of Defense may waive with respect to any such contract or subcontract the application of any provision of law, other than a provision of the Arms Export Control Act or section 2304 of this title, that specifically-

- (i) prescribe procedures to be followed in the formation of contracts;
- (ii) prescribe terms and conditions to be included in contracts;

*(iii)* prescribe requirements for or preferences to be given to goods grown, produced, or manufactured in the United States or in United States Government-owned facilities or for services to be performed in the United States; or

*(iv)* prescribe requirements regulating the performance of contracts.

(2) A waiver may not be made under paragraph (1) unless the Secretary determines that the waiver is necessary to ensure that the cooperative project will significantly further standardization, rationalization, and interoperability.

(3) The authority of the Secretary to make waivers under this subsection may be delegated only to the Deputy Secretary of Defense or the Acquisition Executive designated for the Office of the Secretary of Defense.

*(D)*(1) In carrying out a cooperative project, the Secretary of Defense may agree that a participant (other than the United States) may make a contract for requirements of the United States under the project if the Secretary determines that such a contract will significantly further standardization, rationalization, and interoperability. Except to the extent waived under this section or under any other provision of law, the Secretary shall ensure that such contract will be made on a competitive basis and that United States sources will not be precluded from competing under the contract.

(2) If a participant (other than the United States) in a cooperative project makes a contract on behalf of such project to meet the requirements of the United States, the contract may permit the contracting party to follow its own procedures relating to contracting.

*(e)* In carrying out a cooperative project, the Secretary of Defense may also agree to the disposal of property that is jointly acquired by the members of the project without regard to any laws of the United States applicable to the disposal of property owned by the United States. Disposal of such property may include a transfer of the interest of the United States in such property to one of the other governments participating in the cooperative agreement or the sale of such property. Payment for the transfer or sale of any interest of the United States in any such property shall be made in accordance with the terms of the cooperative agreement.

*(f)* Nothing in this section shall be construed as authorizing--

(1) the Secretary of Defense to waive any of the financial management responsibilities administered by the Secretary of the Treasury; or

(2) to waive the cargo preference laws of the United States, including section 2631 of this title and section 901(b) of the Merchant Marine Act, 1936 (46 U.S.C. App. 1241(b)).

*(g)* Cooperative opportunities document

(1)(A) In order to ensure that opportunities to conduct cooperative projects are considered at an early point during the formal development review process of the Department of Defense in connection with any planned project of the Department, the Under Secretary of Defense for Acquisition shall prepare an arms cooperation opportunities document with respect to that project for review by the Defense Acquisition Board at formal meetings of the Board.

(B) The Under Secretary shall also prepare an arms cooperation opportunities document for review of each new project for which a document known as a Mission Need Statement is prepared.

(2) An arms cooperation opportunities document referred to in paragraph (1) shall include the following:

(A) A statement indicating whether or not a project similar to the one under consideration by the Department of Defense is in development or production by one or more of the major allies of the United States.

(B) If a project similar to the one under consideration by the Department of Defense is in development or production by one or more major allies of the United States, an assessment by the Under Secretary of Defense for Acquisition as to whether that project could satisfy, or could be modified in scope so as to satisfy, the military requirements of the project of the United States under consideration by the Department of Defense.

(C) An assessment of the advantages and disadvantages with regard to program timing, developmental and life cycle costs, technology sharing, and Rationalization, Standardization, and Interoperability (RSI) of seeking to structure a cooperative development program with one or more major allies of the United States.

(D) The recommendation of the Under Secretary as to whether the Department of Defense should explore the feasibility and desirability of a cooperative development program with one or more major allies of the United States.

*(h)* Reports to Congress

(1) Not later than March 1 of each year, the Under Secretary of Defense for Acquisition shall submit to the Speaker of the House of Representatives and the Committees on Armed Services and Appropriations of the Senate a report on cooperative projects under this section. Each such report shall include--

(A) a description of the status, funding, and schedule of existing projects carried out under this section for which memoranda of understanding (or other formal agreements) have been entered into; and

(B) a description of the purpose, funding, and schedule of any new projects proposed to be carried out under this section (including those projects for which memoranda of understanding (or other formal agreements) have not yet been entered into) for which funds have been included in the budget submitted to Congress pursuant to section 1105 of Title 31 for the fiscal year following the fiscal year in which the report is submitted.

(2) The Secretary of Defense and the Secretary of State, whenever they consider such action to be warranted, shall jointly submit to the Committees on Armed Services and Foreign Relations of the Senate and to the Committees on Armed Services and Foreign Affairs of the House of Representatives a report--

(A) enumerating those countries to be added to or deleted from the existing designation of countries designated as major non-NATO allies for purposes of this section; and

(B) specifying the criteria used in determining the eligibility of a country to be designated as a major non-NATO ally for purposes of this section.

(3)(A) The Secretary of Defense shall notify the Congress each time he requires that a prime contract be awarded to a particular prime contractor or that a subcontract to be awarded to a particular subcontractor to comply with a cooperative agreement. The Secretary shall include in each such notice the reason for exercising his authority to designate a particular contractor or subcontractor, as the case may be.

(B) The Secretary shall also notify the Congress each time he exercises a waiver under subsection (d)(2)(c) and shall include in such notice the particular provision or provisions of law that were waived.

(i) Side-by-side testing

(1) It is the sense of Congress--

(A) that the Secretary of Defense should test conventional defense equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries to determine the ability of such equipment, munitions, and technologies to satisfy United States military requirements or to correct operational deficiencies; and

(B) that while the testing of nondevelopmental items and items in the late state of the development process are preferred, the testing of equipment, munitions, and technologies may be conducted to determine procurement alternatives.

(2) The Secretary of Defense may acquire equipment, munitions, and technologies of the type described in paragraph (1) for the purpose of conducting the testing described in that paragraph.

(3) The Deputy Director, Defense Research and Engineering (Test and Evaluation) shall notify the Speaker of the House of Representatives and the Committees on Armed Services and on Appropriations of the Senate of the Deputy Director's intent to obligate funds made available to carry out this subsection not less than 30 days before such funds are obligated.

(4) The Secretary of Defense shall submit to Congress each year, not later than March 1, a report containing information on--

(A) the equipment, munitions, and technologies manufactured and developed by major allies of the United States and other friendly foreign countries that were evaluated under this subsection during the previous fiscal year;

(B) the obligation of any funds under this subsection during the previous fiscal year; and

(C) the equipment, munitions, and technologies that were tested under this subsection and procured during the previous fiscal year.

(j) Secretary to encourage similar programs

The Secretary of Defense shall encourage major allies of the United States to establish programs similar to the one provided for in this section.

#### **§2x32. Cooperative military airlift agreements: allied countries**

(a) Subject to the availability of appropriations, and after consultation with the Secretary of State, the Secretary of Defense may enter into cooperative military airlift agreements with the government of any allied country for the transportation of the personnel and cargo of the military forces of that country on aircraft operated by or for the military forces of the United States in return for the reciprocal transportation of the personnel and cargo of the military forces of the United States on aircraft operated by or for the military forces of that allied country. Any such agreement shall include the following terms:

(1) The rate of reimbursement for transportation provided shall be the same for each party and shall be not less than the rate charged to military forces of the United States, as determined by the Secretary of Defense under section 2208(h) of this title.

(2) Credits and liabilities accrued as a result of providing or receiving transportation shall be liquidated as agreed upon by the parties. Liquidation shall be either by direct payment to the country that has provided the greater amount of transportation or by the providing of in-kind transportation services to that country. The liquidation shall occur on a regular basis, but not less often than once every 12 months.

(3) During peacetime, the only military airlift capacity that may be used to provide transportation is that capacity that (A) is not needed to meet the transportation requirements of

the military forces of the country providing the transportation, and (B) was not created solely to accommodate the requirements of the military forces of the country receiving the transportation.

(4) Defense articles purchased by an allied country from the United States under the Arms Export Control Act (22 U.S.C. § 2751 et seq.) or from a commercial source under the export controls of the Arms Export Control Act may not be transported (for the purpose of delivery incident to the purchase of the defense articles) to the purchasing allied country on aircraft operated by or for the military forces of the United States except at a rate of reimbursement that is equal to the full cost of transportation of the defense articles, as required by section 21(a)(3) of the Arms Export Control Act (22 U.S.C. § 2761(a)(3)).

(b) Subject to the availability of appropriations, and after consultation with the Secretary of State, the Secretary of Defense may enter into nonreciprocal military airlift agreements with North Atlantic Treaty Organization subsidiary bodies for the transportation of the personnel and cargo of such subsidiary bodies on aircraft operated by or for the military forces of the United States. Any such agreement shall be subject to such terms as the Secretary of Defense considers appropriate.

(c) Any amount received by the United States as a result of an agreement entered into under this section shall be credited to applicable appropriations, accounts, and funds of the Department of Defense.

(d) Notwithstanding subchapter *III*, the Secretary of Defense may enter into military airlift agreements with allied countries only under the authority of this section.

### **§2x33. Cooperative logistic support agreements: NATO countries**

#### **(a) General authority**

(1) The Secretary of Defense may enter into bilateral or multilateral agreements known as Weapon System Partnership Agreements with one or more governments of other member countries of the North Atlantic Treaty Organization (NATO) participating in the operation of the NATO Maintenance and Supply Organization. Any such agreement shall be for the purpose of providing cooperative logistics support for the armed forces of the countries which are parties to the agreement. Any such agreement--

(A) shall be entered into pursuant to the terms of the charter of the NATO Maintenance and Supply Organization; and

(B) shall provide for the common logistic support of a specific weapon system common to the participating countries.

(2) Such an agreement may provide for--

(A) the transfer of logistics support, supplies, and services by the United States to the NATO Maintenance and Supply Organization; and

(B) the acquisition of logistics support, supplies, and services by the United States from that Organization.

(b) Authority of Secretary: Under the terms of a Weapon System Partnership Agreement, the Secretary of Defense --

(1) may agree that the NATO Maintenance and Supply Organization may enter into contracts for supply and acquisition of logistics support in Europe for requirements of the United States, to the extent the Secretary determines that the procedures of such Organization governing such supply and acquisition are appropriate; and

(2) may share the costs of set-up charges of facilities for use by the NATO Maintenance and Supply Organization to provide cooperative logistics support and in the costs of establishing a revolving fund for initial acquisition and replenishment of supply stocks to be used by the NATO Maintenance and Supply Organization to provide cooperative logistics support.

(c) Sharing of administrative expenses

Each Weapon System Partnership Agreement shall provide for joint management by the participating countries and for the equitable sharing of the administrative costs and costs of claims incident to the agreement.

(d) Supplemental authority

The authority of the Secretary of Defense under this section is in addition to the authority of the Secretary under subchapter *III* and any other provision of law.

**§ 2x34 NATO Airborne Warning and Control System (AWACS) program: authority of Secretary of Defense**

(a) Authority Under AWACS program

The Secretary of Defense, in carrying out an AWACS memorandum of understanding, may do the following:

(1) Waive reimbursement for the cost of the following functions performed by personnel other than personnel employed in the United States Air Force Airborne Warning and Control System (AWACS) program office:

- (A) Auditing.
- (B) Quality assurance.
- (C) Codification.

- (D) Inspection.
- (E) Contract administration.
- (F) Acceptance testing.
- (G) Certification services.
- (H) Planning, programming, and management services.

(2) Waive any surcharge for administrative services otherwise chargeable.

(3) In connection with that Program, assume contingent liability for--

(A) program losses resulting from the gross negligence of any contracting officer of the United States;

(B) identifiable taxes, customs duties, and other charges levied within the United States on the program; and

(C) the United States share of the unfunded termination liability.

(b) Contract authority limitation

Authority under this section to enter into contracts shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

(c) Definition

In this section, the term "AWACS memorandum of understanding" means--

(1) the Multilateral Memorandum of Understanding Between the North Atlantic Treaty Organization (NATO) Ministers of Defense on the NATO E-3A Cooperative Programme, signed by the Secretary of Defense on December 6, 1978;

(2) the Memorandum of Understanding for Operations and Support of the NATO Airborne Early Warning and Control Force, signed by the United States Ambassador to NATO on September 26, 1984;

(3) the Addendum to the Multilateral Memorandum of Understanding Between the North Atlantic Treaty Organization (NATO) Ministers of Defense on the NATO E-3A Cooperative Programme (dated December 6, 1978) relating to the modernization of the NATO Airborne Early Warning and Control (NAEW&C) System, dated December 7, 1990; and

(4) any other follow-on support agreement for the NATO E-3A Cooperative Programme.

(d) Expiration

The authority provided by this section expires on September 30, 1993.

### SUBCHAPTER III

#### ACQUISITION, CROSS-SERVICING AGREEMENTS, AND STANDARDIZATION

##### *§2x50. Definitions*

*(a) As used in this subchapter, the following are defined terms--*

(1) "allied country" means --

(A) a country that is a member of the North Atlantic Treaty Organization;

(B) Australia, New Zealand, Japan, or the Republic of Korea; or this

(C) any other country designated as an allied country by the Secretary of Defense with the concurrence of the Secretary of State.

(2) "allied international organization" means the North Atlantic Treaty Organization (NATO) or any other international organization designated as an allied international organization by the Secretary of Defense with the concurrence of the Secretary of State.

(3) "*contingency operation*" has the same meaning provided such term in section 631 of the FY92/93 Defense Authorization Act (P.L. 102-190) (10 U.S.C. § 101(47)).

(4) "logistic support, supplies, and services" means food, billeting, transportation, petroleum, oils, lubricants, clothing, communications services, medical services, ammunition, base operations support (and construction incident to base operations support), storage services, use of facilities, training services, spare parts and components, repair and maintenance services, and port services.

(5) "military region" means the geographical area of responsibility assigned to the commander of a unified combatant command (excluding Europe and adjacent waters).

(6) "North Atlantic Treaty Organization subsidiary bodies" means--

(A) any organization within the meaning of the term "subsidiary bodies" in article 1 of the multilateral treaty on the Status of the North Atlantic Treaty Organization, National Representatives and International Staff, signed at Ottawa on September 20, 1951 (TIAS 2992; 5 UST 1087); and

(B) any international military headquarters or organization to which the Protocol on the Status of International Military Headquarters Set Up Pursuant to the North Atlantic Treaty, signed at Paris on August 28, 1952 (TIAS 2978; 5 UST 870), applies.

**§2x51. Authority to acquire logistic support, supplies, and services for elements of the armed forces deployed outside the United States**

Subject to section 2x53 of this title and subject to the availability of appropriations, the Secretary of Defense may--

(1) acquire from the Governments of North Atlantic Treaty Organization countries and from North Atlantic Treaty Organization subsidiary bodies logistic support, supplies, and services for elements of the armed forces deployed in Europe and adjacent waters; and

(2) acquire from any government not a member of the North Atlantic Treaty Organization in which elements of the armed forces are deployed (or are to be deployed) logistic support, supplies, and services for elements of the armed forces deployed (or to be deployed) in such country or in the military region in which such country is located if that country--

(A) has a defense alliance with the United States;

(B) permits the stationing of members of the armed forces in such country or the homeporting of naval vessels of the United States in such country;

(C) has agreed to preposition materiel of the United States in such country; or

(D) serves as the host country to military exercises which include elements of the armed forces or permits other military operations by the armed forces in such country.

**§2x52. Cross-servicing agreements**

(a)(1) Subject to section 2x53 of this title and to the availability of appropriations, the Secretary of Defense may enter into an agreement described in paragraph (2) with--

(A) the government of a North Atlantic Treaty Organization country;

(B) a subsidiary body of the North Atlantic Treaty Organization; or

(C) the government of a country not a member of the North Atlantic Treaty Organization but which is designated by the Secretary of Defense, subject to the limitations prescribed in subsection (b), as a government with which the Secretary may enter into agreements under this section.

(2) An agreement referred to in paragraph (1) is an agreement under which the United States agrees to provide logistic support, supplies, and services to military forces of a country or subsidiary body referred to in paragraph (1) in return for the reciprocal provisions of logistic support, supplies, and services by such government or subsidiary body to elements of the armed forces.

(b) The Secretary of Defense may not designate a country for an agreement under this section--

(1) unless the Secretary, after consultation with the Secretary of State, determines that the designation of such country for such purpose is in the interest of the national security of the United States; and

(2) in the case of a country which is not a member of the North Atlantic Treaty Organization, notifies the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives at least 30 days before the date on which such country is designated by the Secretary under subsection (a).

(c) The Secretary of Defense may not use the authority of this subchapter to procure from any foreign government as a routine or normal source any goods or services reasonably available from United States commercial sources.

(d) The Secretary shall prescribe regulations to ensure that contracts entered into under this subchapter are free from self-dealing, bribery, and conflict of interests.

**§2x53. Law applicable to acquisition and cross-servicing agreements**

(a) Except as provided in subsection (b), acquisition of logistic support, supplies, and services under section 2x51 of this title and agreements entered into under section 2x52 of this title shall be made in accordance with *prudent procurement practices*.

(b) Sections 2207 and chapter 137 of this title and sections 3709, 3735, and 3741 of the Revised Statutes (41 U.S.C. §§ 5, 13, and 22) shall not apply to acquisitions made under the authority of section 2x51 of this title or to agreements entered into under section 2x52 of this title.

**§2x54. Methods of payment for acquisitions and transfers by the United States**

(a) Logistics support, supplies, and services may be acquired or transferred by the United States under the authority of this subchapter on a reimbursement basis or by replacement-in-kind or exchange of supplies or services of an equal value.

(b)(1) In entering into agreements with the Government of another North Atlantic Treaty Organization country or other foreign country for the acquisition or transfer of logistic support, supplies, and services on a reimbursement basis, the Secretary of Defense shall negotiate for adoption of the following pricing principles for reciprocal application:

(A) The price charged by a supplying country for logistics support, supplies, and services specifically procured by the supplying country from its contractors for a recipient country shall be no less favorable than the price for identical items or services charged by such contractors to the armed forces of the supplying country, taking into account price differentials due to

delivery schedules, points of delivery, and other similar considerations.

(B) The price charged a recipient country for supplies furnished by a supplying country from its inventory, and the price charged a recipient country for logistics support and services furnished by the officers, employees, or governmental agencies of a supplying country, shall be the same as the price charged for identical supplies, support, or services acquired by an armed force of the supplying country from such governmental sources.

(2) To the extent that the Secretary of Defense is unable to obtain mutual acceptance by the other country involved of the reciprocal pricing principles for reimbursable transactions set forth in paragraph (1)--

(A) the United States may not acquire from such country any logistic support, supply, or service not governed by such reciprocal pricing principles unless the United States forces commander acquiring such support, supply, or service determines (after price analysis) that the price thereof is fair and reasonable; and

(B) transfers by the United States to such country under this subchapter of any logistic support, supply, or service that is not governed by such reciprocal pricing principles shall be subject to the pricing provisions of the Arms Export Control Act (22 U.S.C. § 2751 et seq.).

(3) To the extent that indirect costs (including charges for plant and production equipment), administrative surcharges, and contract administration costs with respect to any North Atlantic Treaty Organization country or other foreign country are not waived by operation of the reciprocal pricing principles of paragraph (1), the Secretary of Defense may, on a reciprocal basis, agree to waive such costs.

(4) The pricing principles set forth in paragraph (2) and the waiver authority provided in paragraph (3) shall also apply to agreements with North Atlantic Treaty Organization subsidiary bodies under this subchapter.

(c) In acquiring or transferring logistics support, supplies, or services under the authority of this subchapter by exchange of supplies or services, the Secretary of Defense may not agree to or carry out the following:

(1) Transfers in exchange for property the acquisition of which by the Department of Defense is prohibited by law.

(2) Transfers of source, byproduct, or special nuclear materials or any other material, article, data, or thing of value the transfer of which is subject to the Atomic Energy Act of 1954 (42 U.S.C. § 2011 et seq.).

(3) Transfers of chemical munitions.

## **§2x55. Liquidation of accrued credits and liabilities**

(a) Credits and liabilities of the United States accrued as a result of acquisitions and transfers of logistic support, supplies, and services under the authority of this subchapter shall be liquidated not less often than once every three months by direct payment to the entity supplying such support, supplies, or services by the entity receiving such support, supplies, or services.

(b) Payment-in-kind or exchange entitlements accrued as a result of acquisitions and transfers of logistic support, supplies, and services under authority of this subchapter shall be satisfied within 12 months after the date of the delivery of the logistic support, supplies, or services.

## **§2x56. Crediting of receipts**

Any receipt of the United States as a result of an agreement entered into under this subchapter shall be credited to applicable appropriations, accounts, and funds of the Department of Defense.

## **§2x57. Limitation on amounts that may be obligated or accrued by the United States**

(a)(1) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable liabilities that the United States may accrue under this subchapter (before the computation of offsetting balances) with other member countries of the North Atlantic Treaty Organization and subsidiary bodies of the North Atlantic Treaty Organization may not exceed \$150,000,000 in any fiscal year, and of such amount not more than \$25,000,000 in liabilities may be accrued for the acquisition of supplies (other than petroleum, oils, and lubricants).

(2) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable liabilities that the United States may accrue under this subchapter (before the computation of offsetting balances) with a country which is not a member of the North Atlantic Treaty Organization, but with which the United States has one or more acquisition or cross-servicing agreements, may not exceed \$10,000,000 in any fiscal year, and of such amount not more than \$2,500,000 in liabilities may be accrued for the acquisition of supplies (other than petroleum, oils, and lubricants). The \$10,000,000 limitation specified in this paragraph is in addition to the limitation specified in paragraph (1).

(b)(1) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable credits that the United States may accrue under this subchapter (before the computation of offsetting balances) with other member countries of the North Atlantic Treaty Organization and subsidiary bodies of the North Atlantic Treaty Organization may not exceed \$100,000,000 in any fiscal year.

(2) Except during a period of active hostilities involving the armed forces, the total amount of reimbursable credits that the United States may accrue under this subchapter (before the computation of offsetting balances) with a country which is not a member of the North Atlantic Treaty Organization, but with which the United States has one or more acquisition and

cross-servicing agreements may not exceed \$10,000,000 in any fiscal year. Such limitation specified in this paragraph is in addition to the limitation specified in paragraph (1).

*(c) When the Secretary of Defense certifies that the armed forces of the United States are, or imminently shall become, involved in a contingency operation, the restrictions set forth in subsections (a) and (b) above are waived for a period not to exceed 180 days.*

#### **§2x58. Inventories of supplies not to be increased**

Inventories of supplies for elements of the armed forces may not be increased for the purpose of transferring supplies under the authority of this subchapter.

#### **§2x59. Procurement of communications support and related supplies and services**

**(a)(1)** As an alternative means of obtaining communications support and related supplies and services, the Secretary of Defense, subject to the approval of the Secretary of State, may enter into a bilateral arrangement with any allied country or allied international organization or may enter into a multilateral arrangement with allied countries and allied international organizations, under which, in return for being provided communications support and related supplies and services, the United States would agree to provide to the allied country or countries or allied international organization or allied international organizations, as the case may be, or may enter into a multilateral arrangement with allied countries and allied international organizations, equivalent value of communications support and related supplies and services. The term of an arrangement entered into under this subsection may not exceed five years.

*(2) Nothing in paragraph (1) shall limit the authority of the Secretary of Defense to temporarily furnish or receive communications support and related supplies, in the absence of a formal agreement, to an allied country to meet emergent operational requirements of both countries or incident to an exercise, provided that such periods of interconnection or access, as applicable, do not exceed 90 days and the exchanges can be conducted on conditions of reciprocity. If the interconnection is maintained for joint or multilateral defense purposes, then the costs of maintaining such circuits may be allocated among the various users.*

**(b)(1)** Any arrangement entered into under this section shall require that any accrued credits and liabilities resulting from an unequal exchange of communications support and related supplies and services during the term of such arrangement would be liquidated by direct payment to the party having provided the greater amount of communications support and related supplies and services. Liquidations may be made at such times as the parties in an arrangement may agree upon, but in no case may final liquidation in the case of an arrangement be made later than 30 days after the end of the term for which the arrangement was entered into.

**(2)** Parties to an arrangement entered into under this section shall annually reconcile accrued credits and liabilities accruing under such agreement. Any liability of the United States resulting from a reconciliation shall be charged against the applicable appropriation available to the Department of Defense (at the time of the reconciliation) for obligation for communications

support and related supplies and services.

(3) Payments received by the United States shall be credited to the appropriation from which such communications support and related supplies and services have been provided.

(c) The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives copies of all documents evidencing an arrangement entered into under subsection (a) not later than 45 days after entering into such an arrangement.

**§2x60. Authority to accept *direct payment or contribution*, use of real property, services, and supplies from foreign countries in connection with mutual defense agreements and occupational arrangements**

(a) Authority To Accept.--The Secretary of Defense may accept from a foreign country, for the support of any element of the armed forces in an area of that country--

(1) real property or the use of real property and services and supplies for the United States or for the use of the United States in accordance with a mutual defense agreement or occupational arrangement;

(2) services furnished as reciprocal international courtesies or as services customarily made available without charge; and

(3) *direct payment or contribution. Any such direct payment or contribution received by the United States from a foreign country in accordance with a mutual defense agreement or occupational arrangement accepted in a fiscal year shall be credited to appropriations of the Department of Defense that are available for that fiscal year for the purposes for which the contributions are made. The contributions so credited shall be--*

*(A) merged with the appropriations to which they are credited; and*

*(B) available for the same time period as those appropriations.*

*(b) The limitation upon the authority of the Secretary of Defense to accept direct payment or contribution, the use of real property, services and supplies, from foreign countries in connection with mutual defense agreements or occupational arrangements while in an area of that country, shall not apply in the case of joint or bilateral exercises involving the United States and the providing nation.*

(c) Quarterly Reports.--(1) Not later than 30 days after the end of each quarter of each fiscal year, the Secretary of Defense shall submit to Congress a report on property, services, and supplies accepted by the Secretary under this section during the preceding quarter. The Secretary shall include in each such report a description of all property, services, and supplies having a value of more than \$1,000,000.

(2) In computing the value of any property, services, and supplies referred to in paragraph (1), the Secretary shall aggregate the value of--

(A) similar items of property, services, and supplies accepted by the Secretary during the quarter concerned; and

(B) components which, if assembled, would comprise all or a substantial part of an item of equipment or a facility.

**(d) Authority to Use Property, Services, and Supplies.--**Property, services, or supplies referred to in subsection (a) may be used by the Secretary of Defense without specific authorization, except that such property, services, and supplies may not be used in connection with any program, project, or activity if the use of such property, services, or supplies would result in the violation of any prohibition or limitation otherwise applicable to that program, project, or activity.

**(e) Annual Audit by GAO.--**The Comptroller General of the United States shall conduct an annual audit of property, services, and supplies accepted by the Secretary of Defense under this section and shall submit a copy of the results of each such audit to Congress.

#### **§2x70. Standardization of equipment with North Atlantic Treaty Organization members**

**(a)** It is the policy of the United States to standardize equipment, including weapons systems, ammunition, and fuel, procured for the use of the armed forces of the United States stationed in Europe under the North Atlantic Treaty or at least to make that equipment interoperable with equipment of other members of the North Atlantic Treaty Organization. To carry out this policy, the Secretary of Defense shall--

(1) assess the costs and possible loss of non-nuclear combat effectiveness of the military forces of the members of the Organization caused by the failure of the members to standardize equipment;

(2) maintain a list of actions to be taken, including an evaluation of the priority and effect of the action, to standardize equipment that may improve the overall non-nuclear defense capability of the Organization or save resources for the Organization; and

(3) initiate and carry out, to the maximum extent feasible, procurement procedures to acquire standardized or interoperable equipment, considering the cost, function, quality, and availability of the equipment.

**(b)** Progress in realizing the objectives of standardization and interoperability would be enhanced by expanded inter-Allied procurement of arms and equipment within the North Atlantic Treaty Organization. Expanded inter-Allied procurement would be made easier by greater reliance on licensing and coproduction cooperative agreements among the signatories of the North Atlantic Treaty. If constructed to preserve the efficiencies associated with economies of scale, the agreements could minimize potential economic hardship to parties to the agreements and increase

the survivability, in time of war, of the North Atlantic Alliance's armaments production base by dispersing manufacturing facilities. In conjunction with other members of the Organization and to the maximum extent feasible, the Secretary shall--

(1) identify areas in which those cooperative agreements may be made with members of the Alliance; and

(2) negotiate those agreements.

(c)(1) It is the sense of Congress that weapons systems being developed wholly or primarily for employment in the North Atlantic Treaty Organization theater should conform to a common Organization requirement in order to proceed toward joint doctrine and planning and to facilitate maximum feasible standardization and interoperability of equipment, and that a common Organization requirement should be understood to include a common definition of the military threat to the members of the Organization.

(2) It is further the sense of Congress that standardization of weapons and equipment within the Organization on the basis of a "two-way street" concept of cooperation in defense procurement between Europe and North America can only work in a realistic sense if the European nations operate on a united and collective basis. Therefore, the governments of Europe are encouraged to accelerate their present efforts to achieve European armaments collaboration among all European members of the Organization.

(d) Before February 1, 1989, and biennially thereafter, the Secretary shall submit a report to Congress that includes--

(1) each specific assessment and evaluation made and the results of each assessment and evaluation, and the results achieved with the members of the North Atlantic Treaty Organization, under subsections (a)(1) and (2) and (b);

(2) procurement action initiated on each new major system not complying with the policy of subsection (a);

(3) procurement action initiated on each new major system that is not standardized or interoperable with equipment of other members of the Organization, including a description of the system chosen and the reason for choosing that system;

(4) the identity of--

(A) each program of research and development for the armed forces of the United States stationed in Europe that supports, conforms, or both, to common Organization requirements of developing weapon systems for use by the Organization, including a common definition of the military threat to the Organization; and

(B) the common requirements of the Organization to which those programs conform or which they support;

(5) action of the Alliance toward common Organization requirements if none exist;

(6) efforts to establish a regular procedure and mechanism in the Organization to determine common military requirements;

(7) a description of each existing and planned program of the Department of Defense that supports the development or procurement of a weapon system or other military equipment originally developed or procured by members of the Organization other than the United States and for which funds have been authorized to be appropriated for the fiscal year in which the report is submitted, including a summary listing of the amount of funds--

(A) appropriated for those programs for the fiscal year in which the report is submitted; and

(B) requested, or proposed to be requested, for those programs for each of the two fiscal years following the fiscal year for which the report is submitted; and

(8) a description of each weapon system or other military equipment originally developed or procured in the United States and that is being developed or procured by members of the Organization other than the United States during the fiscal year for which the report is submitted.

(e) If the Secretary decides that procurement of equipment manufactured outside the United States is necessary to carry out the policy of subsection (a), the Secretary may determine under section 2 of title III of the Act of March 3, 1933 (41 U.S.C. § 10a), that acquiring that equipment manufactured in the United States is inconsistent with the public interest.

(f) The Secretary shall submit the results of each assessment and evaluation made under subsection (a)(1) and (2) to the appropriate North Atlantic Treaty Organization body to become an integral part of the overall Organization review of force goals and development of force plans.

## 8. COMMERCIAL ITEMS

### 8.0. Introduction

The Panel proposes a comprehensive new approach to address the acquisition of commercial items both as end items and as components in defense-unique products. In so doing, the Panel has drawn on legislative initiatives over the past decade (as well as on DFARS Part 211) and has attempted to incorporate the language and concepts of those laws. Existing law has not, however, been successful in achieving the benefits of commercial-military integration and has not resulted in broad use of commercial items in DOD systems. The reasons for this are complex. While opposition to commercial items within the defense procurement community has been cited as a factor,<sup>1</sup> recent congressional<sup>2</sup> and Government studies,<sup>3</sup> expert commentary,<sup>4</sup> and testimony before the Panel identified procurement statutes (and implementing regulations) themselves as a major barrier to greater use of commercial items. As discussed in detail below, the Panel has responded by proposing:

- Stronger policy language in favor of the use of commercial and nondevelopmental items in 10 U.S.C. § 2301;
- A new definition of commercial items in 10 U.S.C. § 2302;
- An expanded exemption for "adequate price competition" in the Truth in Negotiation Act, 10 U.S.C. § 2306a, which applies to commercial items, and relief from inappropriate requirements for cost or pricing data when a contract for commercial items or services, awarded competitively, is modified (See Chapter 1.3 of this Report).
- New exemptions to technical data requirements in commercial item acquisitions in 10 U.S.C. § 2320;
- A new structure for "Buy American" restrictions in a proposed new chapter on Defense Trade and Cooperation (*see* Chapter 7 of this report); and
- A new subchapter for commercial item acquisitions which creates a new rule structure and provides for exemptions from statutes that create barriers to the use of commercial items, and includes provisions on pricing, documentation, and audit rights tailored for commercial item acquisitions.

<sup>4</sup>*Center for Strategic and International Studies, Integrating Commercial and Military Technologies for National Strength* 15 (March 1991) [hereafter "CSIS Study"].

Unlike other chapters in this Report, this chapter does not address specific, pre-existing law, but sets out an analysis cutting across much of the work discussed in detail in other chapters. Because of its unique subject matter, this chapter first discusses the history of attempts to improve defense use of commercial items and then the rationale for each section of proposed legislation, some of which is also discussed in other chapters. For convenience of the reader, the text of all proposed provisions is set out in one place in subchapter 8.4.

## 8.1. Background

The idea that DOD could benefit from broader use of commercial items has been advanced for at least 20 years. In 1972, for example, the Commission on Government Procurement urged that commercial products replace Government-designed items to avoid the high cost of developing unique products.<sup>5</sup> Six years later DOD implemented its Acquisition and Distribution of Commercial Products (ADCOP)<sup>6</sup> program which sought to facilitate the acquisition of commercial products by eliminating Government specifications and contract clauses that did not reflect commercial practices. At the same time, various elements within DOD began assessing how commercial and foreign subsystems and components might be used in weapons systems.

Congressional direction to acquire commercial products dates to at least 1984, when the Competition in Contracting Act (CICA) was enacted. CICA requires Federal agencies to "promote the use of commercial products whenever practicable."<sup>7</sup> CICA also provides a statutory basis for multiple award schedule contracting, which has become a primary method for Government purchase of commercial products.<sup>8</sup> In addition, in the Defense Procurement Reform Act of 1984, Congress mandated that DOD use "standard or commercial parts" when developing or acquiring defense-specific products "whenever such use is technically acceptable and cost effective."<sup>9</sup>

In June 1986, the President's Blue Ribbon Commission on Defense Management (the Packard Commission) again emphasized the benefits to DOD of using commercial items: lower costs and shorter lead times in fielding new products and systems. The Commission urged DOD to adopt the policy that:

... DOD should make greater use of components, systems, and services available "off-the-shelf." It should develop new or custom-made items only when it has been established that those readily available are clearly inadequate to meet military requirements.<sup>10</sup>

---

<sup>5</sup> Report of the Commission on Government Procurement, part D (1972).

<sup>6</sup> Acquisition and Distribution of Commercial Products Program; see DOD Directive 5000.37 (September 29, 1978). To implement ADCOP, DOD attempted to establish qualified commercial products lists. This aspect of ADCOP was blocked by Congress because it would have precluded small businesses that sold only to DOD from continuing to sell their products as commercial products. See generally W.T. Kirby, *Expanding the Use of Commercial Products and "Commercial-Style" Acquisition Techniques in Defense Procurement: A Proposed Legal Framework in President's Blue Ribbon Commission on Defense Management, Final Report: A Quest for Excellence*, App. H, at 87-88 (1986).

<sup>7</sup> 10 U.S.C. § 2301(b)(6).

<sup>8</sup> 10 U.S.C. § 2302(2)(c).

<sup>9</sup> Pub. L. No. 98-525, § 1202, 98 Stat. 2588 (1984). Section 1216 of this law added 10 U.S.C. § 2323, which required that spare parts be purchased at a price no more than the lowest price allowed to commercial customers. Section 2323 did not prove to be necessary or cost-effective and was repealed by the Defense Authorization Act of 1991, Pub. L. No. 101-510, § 804, 104 Stat. 1485, 1591 (1990).

<sup>10</sup> *President's Blue Ribbon Commission on Defense Management, Final Report: A Quest for Excellence* 60 (1986) [hereafter "the Packard Commission Report"].

As the Commission explained:

No matter how DOD improves its organization or procedures, the defense acquisition system is unlikely to manufacture products as cheaply as the commercial marketplace. DOD cannot duplicate the economies of scale possible in products serving a mass market, nor the power of the free market system to select and perpetuate the most innovative and efficient producers . . .

A case in point is the integrated circuit . . . This year [1986] DOD will buy almost \$2 billion worth of microchips, most of them manufactured to military specifications. The unit cost of a military microchip typically is three to ten times that of its commercial counterpart. This is a result of the extensive testing and documentation DOD requires and of smaller production runs . . . Moreover, the process of procuring microchips made to military specification involves substantial delay. As a consequence, military microchips typically lag a generation (three to five years) behind commercial microchips.<sup>11</sup>

Later in 1986, Congress added section 2325 to Title 10, which mandated that DOD use "nondevelopmental items" where such items would meet DOD's needs.<sup>12</sup> Nondevelopmental items were defined to include "any item of supply that is available in the commercial marketplace."<sup>13</sup> In addition, section 2325 required DOD to define its requirements so that they could be met through the use of nondevelopmental items and to undertake market research to determine "whether nondevelopmental items are available or could be modified to meet agency needs" prior to developing a DOD-unique product requirement.<sup>14</sup> The purpose of this legislation was to break DOD's "long-standing bias to use military specifications."<sup>15</sup>

In 1989, Congress directed DOD to issue streamlined regulations governing commercial products and to rescind conflicting and inconsistent regulations.<sup>16</sup> In addition, Congress directed DOD to design and implement a "simplified uniform contract" for commercial items<sup>17</sup> and

---

<sup>11</sup>*Id.* at 60-62.

<sup>12</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 907, 100 Stat. 3816, 3917 (1986), adding 10 U.S.C. § 2325.

<sup>13</sup>10 U.S.C. § 2325(d)(1).

<sup>14</sup>10 U.S.C. § 2325(a)(2), (a)(4).

<sup>15</sup>S. Rep. No. 99-331, *supra* note 1, at 265.

<sup>16</sup>National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 824(b)(1), 103 Stat. 1352, 1505 (1989).

<sup>17</sup>*Id.* §§ 824(b)(2), 824(b)(3). After hearing comments from many industry and Government sources, the Panel concluded that the concept of a "simplified uniform contract" is not a good one for a number of reasons. First, and perhaps foremost, a uniform contract imposed by regulation is highly likely to contain some clauses that some commercial contractors simply will not accept. Accordingly, the uniform contract can itself become a source of exclusion. Second, it is simply impossible to imagine what a uniform contract for all industries would look like. A uniform contract for data processing equipment, for example, would need clauses implementing Government and industry data processing standards, but these would be woefully out of place in a contract for ketchup. The Panel

prescribed that inspection and warranty clauses be consistent with commercial practices.<sup>18</sup> In addition, the Secretary was directed to revise regulations implementing the catalog and market price exemption to the Truth in Negotiation Act (TINA)<sup>19</sup> to facilitate the purchase of nondevelopmental and modified nondevelopmental items without a requirement for the submission of cost or pricing data.<sup>20</sup> Finally, in 1991, Congress directed DOD, prior to making a contract for DOD-unique items, to conduct market research to determine the availability and suitability of nondevelopmental items to meet DOD's needs.<sup>21</sup>

This legislation has resulted in Parts 210 and 211 of the Defense Acquisition Regulation Supplement. However, even the "simplified" contract described in DFARS Part 211 mandates the use of over 100 clauses as opposed to the handful of terms and conditions typically found in commercial items contracts.

Finally, the National Defense Authorization Act for Fiscal Year 1993 mandates the modification of DOD acquisition policy to encourage integration of the civilian and military industrial base:

It is the policy of Congress that the United States attain the national technology and industrial base objectives set forth in [10 U.S.C. § 2501(a)] through acquisition policy reforms that have the following objectives: . . .

(2) Reducing the reliance of the Department of Defense on technology and industrial base sectors that are economically dependent on Department of Defense business.

(3) Reducing Federal Government barriers to the use of commercial products, processes and standards.<sup>22</sup>

While the course set by Congress since 1984 is plain, none of the legislation passed to date has actually caused or permitted commercial items to be procured in abundance by DOD. The reasons for the shortfall of commercial items purchases include:

- Legislation has not created a uniform definition for commercial items. Instead, various, conflicting definitions have been implemented in regulation.<sup>23</sup>

---

recommends as an alternative approach a set or sets of uniform terms and conditions, which is the approach adopted by commercial companies when they purchase supplies. As recognized in, for example, the Uniform Commercial Code, such terms and conditions are matters to be bargained over, not unilaterally imposed. The Panel has implemented a similar approach in section 2xx1 of its proposed statute.

<sup>18</sup>*Id.* §§ 804(b)(4), 804(b)(5). The Panel has implemented these provisions in section 2xx1 of its proposed statute.

<sup>19</sup>10 U.S.C. § 2306a(b)(1)(B).

<sup>20</sup>Pub. L. No. 101-189, *supra* note 16, § 824(b)(6).

<sup>21</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 814, 104 Stat. 1485, 1595 (1990), *amending* 10 U.S.C. § 2325(a).

<sup>22</sup>Pub. L. No. 102-484, § 4211, 106 Stat. 2315, 2662 (1992), *enacting* 10 U.S.C. § 2501(c).

- Legislation has not amended the Truth In Negotiation Act (10 U.S.C. § 2306a), and as a result has left intact a statute which greatly impedes commercial buying.
- Legislation has not created exemptions from socioeconomic laws, trade restrictions, and Executive Orders and implementing regulations, or from procurement integrity, costing, audit, and other requirements, all of which require a commercial company to fundamentally alter the way it conducts business.
- Congress has consistently faulted DOD's practices and regulations for constricting the flow of commercial products, while often failing to recognize the effect of ever-increasing legislation that has placed special burdens on companies solely because they contract with the Federal Government.

Recent studies of DOD acquisition practices have uniformly concluded that the myriad of Federal laws and regulations applicable only to Federal -- and particularly DOD -- contractors has created a significant barrier to the entry of commercial firms into Federal contracting. A 1990 report on 20 case studies of how commercial companies sell to the Federal Government reached the following conclusions:

In general, the greater the commercial sales base [a company has], the more likely [a company] will either separate [its] commercial and military operations *or abstain from military business*. Companies such as IBM, Motorola, Boeing, Hewlett-Packard, Digital Equipment Corporation (DEC), and Intel fall into this category. For these firms, overall corporate compliance with Government procurement regulations for what constitutes only a small portion of their total sales bases could force them to

- implement extremely elaborate and expensive cost accounting systems and staff;
- make radical revisions to commercial procurement practices and long-term supplier relationships;
- release highly confidential information to competitors;
- make changes in the transportation of goods and materials;

---

<sup>23</sup>For example, FAR 11.001 defines a "commercial product" to be a "product . . . sold or traded to the general public in the course of normal business operations at prices based on established catalog or market prices." FAR 15.804-3(c)(3) contains a similar definition, but drops the requirement for "established catalog or market prices." Neither FAR definition includes modified commercial items, although the concept of modification is added (but handled differently) in FAR 11.001 under "commercial-type product" and in DFARS 211.7001(a). Only the DFARS definition includes goods not yet sold to the general public, *see* DFARS 211.7001, while the DFARS definition of nondevelopmental item also includes a "previously developed item of supply" built to a Government specification. *See* DFARS 210.001.

- overturn existing compensation and fringe benefit practices;
- revise production techniques to accommodate specialized process specifications and/or quality assurance and inspection provisions, including serial number tracking rather than Total Quality Management (TQM) techniques;
- risk closure of the entire facility in the event of reporting errors or other perceived legal or regulatory abuses.<sup>24</sup>

In the past, the minimal use of commercial items by DOD has often been attributed to DOD's reluctance to use the tools available to it. Now, in the aftermath of the expansion during the 1980's of laws applicable only to Federal contractors, the barriers to greater use of commercial items are primarily the statutes which require Government contractors to adopt unique, expensive business practices on pain of extraordinary civil and criminal penalties. Over and over again, the Panel heard testimony that mandatory, Government-unique business methods and systems in four areas create the greatest barriers: accounting systems; specifications and standards; rights in technical data; and Government-specific statutes that mandate fundamental changes in business practices.

### **Accounting Systems**

One of the most expensive and disruptive requirements involves mandatory adherence to cost principles and accounting standards enumerated in statute,<sup>25</sup> in the FAR,<sup>26</sup> and by the Cost Accounting Standards Board (CASB).<sup>27</sup> Where the Government contracts on a "cost plus" or complex incentive basis, there is a bona fide need for a uniform, specialized accounting system which protects the Government from the imposition of unreasonable charges. Indeed, this unique system of regulation arose precisely because Generally Accepted Accounting Principles (GAAP) have little to say about recording, reporting, and allocating costs actually incurred. Therein lies the problem: Companies that do not sell to the Federal Government keep their books in accordance with GAAP and, if required to meet Government cost accounting requirements, would have to implement a completely separate accounting system at great expense.

---

<sup>24</sup>CSIS Study at 15. A 1990 workshop at DSMC on "Why Firms are Leaving the Defense Market" confirms the CSIS conclusions. Industry participants in the study identified 34 major reasons why firms had left or were planning to leave the defense market. Among these reasons were: criminalization of the procurement process; audit procedures inconsistent with those typically used by industry; inappropriate overlays of defense-unique requirements on commercial products; inappropriate application of regulations, specifications, and standards; excessive costs of doing business with DOD; technical data rights; proliferation of regulations; and unnecessary calls for cost or pricing data.

<sup>25</sup>10 U.S.C. § 2324.

<sup>26</sup>FAR Part 31.

<sup>27</sup>41 U.S.C. § 422; 48 C.F.R. Part 99.

A sidebar in the 1991 industrial base study of the Office of Technology Assessment (OTA) summarizes the problem:

### **How Government Auditing Requirements Isolate the Defense Industry**

Government-imposed accounting practice tends to isolate the defense industry from the rest of the economy . . . With few exceptions, companies that do both military and commercial work set up special Government-products divisions to do the defense work, even when the military and civilian technology is similar enough that economies of scale would accrue by keeping production under one roof. . . .

The combination of accounting practice and Government access forces companies to separate Government and commercial work, for several reasons. First, Government accounting practice does not conform to modern commercial standards of accounting. . . . In general, Government contracts require far greater detail in allocating costs than do commercial management information systems, and errors in accounting on Government contracts can bring criminal charges against business executives, causing them to devote inordinate amounts of effort to matters of no commercial consequence. Commercial firms cannot achieve consistency by adopting Government standards because the added cost of Government accounting procedures must be borne ultimately by the customers, placing the firm at a commercial price disadvantage relative to firms that do no Government work. . . .

Firms must not only collect cost information but open their books to U.S. Government auditors . . . The only exception to the auditing requirement is when contracts are awarded strictly on the basis of price. This exception actually undermines efforts to award contracts based on best value rather than lowest cost.

. . . If a company thoroughly integrated its civil and military production, then virtually no company information would be excluded from such Government audits. In the end, most companies choose to set up a separate Government-products division rather than try to untangle overhead and other charges between commercial and Government work or to allow Government inspectors access to their commercial books.<sup>28</sup>

---

<sup>28</sup>U.S. Congress, Office of Technology Assessment, *Redesigning Defense: Planning the Transition to the Future U.S. Defense Industrial Base 66* (July 1991).

## **Specifications and Standards**

The specification and standard problem -- over specification and detail enforced by large numbers of auditors and inspectors -- arises without clear delineation from statutes, regulations, good intentions, practice, and habit. For example, it is easy to mock DOD's procrustean specification for a fruitcake, but one must recall that DOD wrote this specification because it could not otherwise have made a purchase while complying with CICA's requirement for "full and open competition."<sup>29</sup> The problem for commercial companies, as with Government-unique accounting principles, is that compliance with Government standards often requires a departure from commercial practices, not to mention the company's own processes which have led to commercially successful products. To the extent that DOD standards are out of date or out of touch with commercial practice, the cost of compliance increases.

## **Rights in Technical Data**

Commercial vendors fiercely protect proprietary information. Under current statutes and regulations, DOD is allowed to obtain a substantial portion of the very technical know-how and proprietary data that is the life blood of modern enterprise. Increasingly, commercial companies will not sell their best technologies to DOD because they simply will not put their proprietary data at risk.

## **Socioeconomic Legislation**

A buyer in the commercial marketplace seldom if ever insists that a seller change its hiring, promotion, compensation, benefits, subcontracting, or transportation practices as a condition of making a sale. But the Federal Government does this as a matter of course in almost every contract it awards. The problem is not that any particular requirement is so onerous as to dissuade companies from dealing with the Federal Government; but when a combination of frequently changing requirements are levied on contractors -- some inconsistent with others, most requiring audit and the generation of reports, and all inconsistent with commercial practice -- the burden on commercial companies is very great. A comment received from a contracts manager at Data General Corporation<sup>30</sup> summarizes the barriers perceived by commercial companies when they attempt to provide products to the Federal Government:

First -- My corporation is a commercial firm selling commercial products and services using any reasonable definition of commerciality. The critical point to note is that the products we sell have been conceived; engineered; parts, components and sub-

---

<sup>29</sup>10 U.S.C. § 2305. By contrast, consumers need no specification for fruitcake because they are not required by law to have standards for the responsiveness of items they purchase. One comment has suggested that DOD's preference for detailed specifications arises from the need to retain quality in a system which demands that all sellers be allowed to bid under an objective standard of responsiveness and that award go to the lowest price. See generally W.T. Kirby, *supra* note 6, at 82-86.

<sup>30</sup>Letter dated July 1, 1992, from Arthur S. Dandenau, Data General Corporation, to Donald L. Freedman, Executive Secretary.

assemblies have been procured; manufactured, tested and, in instances, are "in the box" before we sell to any customers. Therefore, a significant number of regularly used Government clauses . . . cannot factually apply to the Government's purchase of such products. A customer cannot expect to buy such products receiving our standard prices and getting immediate or very quick shipment, and yet attempt to direct where we purchase aluminum ingots, jeweled bearings, miniature bearings, or the sources of supply to be used for its Contract . . . [S]uch purchases do not and cannot result in our having a subcontract plan . . . because the materials we need were already sourced and procured well before the Government order.

Second -- My corporation has and will continue to comply with Federal and State laws of a socioeconomic nature . . . However, I see no appropriate reason why Government contracts have to make the obligations of such laws also appear as contract clauses. This increases the paperwork, administration expenses, and risks involved in bidding and performing Government contracts . . .

Third -- . . . I suggest that when any law or regulation is being reviewed, . . . the appropriate questions should be:

(1) Is it one that is normally needed or imposed in commercial transactions? If not, there is a high degree of probability that the requirement will eliminate some bidders and/or increase the costs of the procurement to the contractor and, subsequently, to the Government; and

(2) Is the regulation practical and appropriate when it is attempted to be applied to the purchase of products which are "off-the-shelf" or in a state that requires minor additional work prior to shipment?

In summary, the history of commercial product acquisition efforts is one of good intentions that have failed to bear fruit because none of the efforts to date have created a complete, systematic statutory and regulatory structure for buying commercial products. Instead, statutes and regulations designed for buying Government-unique products -- and perhaps unobjectionable for this purpose -- have been allowed to remain as barriers. For reasons stated in the following sections, the "build-down" of DOD requires that Congress make a complete and systematic revision of existing law to remove significant statutory barriers that today make commercial buying extremely difficult.

## **8.2. The DOD Acquisition Challenge in a Time of Build-Down**

Now that the defense build-up of the 1980s has turned into the build-down of the 1990s, defense procurement policy must be reshaped to ensure the long-term goal of retaining an adequate defense technical and industrial base. Declining purchases of defense-unique products mean higher units costs, declining profits, and exit of capacity from defense-specific industries. At the same time, the high cost of doing business with the Government is causing companies to leave or never to enter the defense market.<sup>31</sup>

In the absence of deliberate policies, the DTIB [defense technical and industrial base] is likely to converge toward an arsenal structure as current procurement laws impede civil-military integration and reduced levels of production eliminate competition.<sup>32</sup>

In this environment, continued reliance by DOD on defense-unique products can only mean higher costs and loss of industrial base for DOD. One of the principal solutions for this dilemma is to encourage DOD agencies to use commercial products to the maximum extent possible. This approach promises:

- Lower prices through greater competition;
- Lower prices through lower costs typically associated with high volume commercial production;
- A broader industrial base, because the base is maintained not just by DOD, but by the national economy as a whole;
- Increased surge capacity, because DOD needs can be met by diverting supplies that would ordinarily go to the civilian market, rather than by building or rehabilitating defense plants to build defense-unique products;
- Increased access to cutting edge technologies, which are increasingly emerging earlier in the commercial marketplace than in defense industries.

Moreover, even if DOD spending and the defense technical and industrial base were not declining, greater use of commercial items would still make sense for two reasons. First, commercial items tend to be much less expensive than their defense-unique counterparts. Second, commercial items are increasingly more technically advanced than defense-unique products,

---

<sup>31</sup>*See, e.g.,* Office of Technology Assessment, *Redesigning Defense*, *supra* note 28, at 16: The current procurement process discourages many qualified firms from bidding on defense contracts because of the large amounts of paperwork involved and military specifications that are often excessively demanding.

<sup>32</sup>*Id.* at 10.

primarily because the pace of introduction of new commercial items generally exceeds that of the fielding of new military products.<sup>33</sup>

While cost comparisons are extremely difficult, as the Panel's own work has confirmed, there is a consensus among recent studies that current procurement policies drive the overhead required in the defense industry far above that which is required in commercial companies. For example, the Office of Technology Assessment reports studies showing that the entire regulatory regime adds 10 to 50% to the cost of doing business with the Government, an amount equal to tens of *billions* of dollars annually.<sup>34</sup> The Center for Strategic and International Studies (CSIS) reported on a case study of a company which performed both military and civilian contracts, and concluded that the military division of the company had higher product costs because the number of administrative personnel in the military division was eight times higher per dollar of sales and twice as high as a percentage of total personnel as the commercial division.<sup>35</sup>

Personnel in Military vs. Commercial Divisions	Number			Number Per Billion	
	Commercial	Military	Total	Commercial	Military
Annual Sales (\$ Billions)	\$10	\$4	\$14		
Administrative Personnel	3,842	9,979	13,821	384	2,495
Engineering	7,557	13,605	21,162	756	3,401
Manufacturing	25,548	18,306	43,854	2,555	4,577
Quality Control	2,835	2,583	5,418	284	640
Facilities	2,177	3,038	5,215	218	760
Logistics	1,896	1,399	3,095	170	350
Computing	1,211	5,425	6,636	121	1,358
Other	170	629	799	17	157
<b>Total</b>	<b>45,036</b>	<b>54,984</b>	<b>100,000</b>	<b>4,504</b>	<b>13,741</b>
<b>Ratio of Admn. to Total Employment</b>	<b>9%</b>	<b>18%</b>	<b>14%</b>		

CSIS also found that at Pratt & Whitney, 52 people were employed solely to accommodate Government auditors' requests for reports, at a total cost to the Government of \$13 million annually (for Government and contractor personnel).<sup>36</sup> Similarly, General Electric reported that it required two full time employees to handle the administrative load created by each Government representative assigned to its engine programs, for a total administrative cost to GE of \$3 million per year.<sup>37</sup>

A study performed by the American Defense Preparedness Association (ADPA) for the Panel found similar results. Specifically, in November 1991, the Panel asked ADPA to perform a study to determine whether the costs of producing a military product were higher than the costs

<sup>33</sup>Jacques S. Gansler testified before the Panel in January 1992 and summarized a number of studies of the "cycle time" necessary to develop new products. He noted the Defense Science Board Streamlining Task Force study of November 1990 which found that average "cycle time" for new DOD-unique products is 17.2 years versus 7.9 years for civilian products. Other data showed cycle times from 1.5 to 4 times longer for military variants of commercial electronics items.

<sup>34</sup>U.S. Congress, Office of Technology Assessment, *Holding the Edge*, supra note 3.

<sup>35</sup>CSIS Study at 24.

<sup>36</sup>*Id.* at 19.

<sup>37</sup>*Id.* at 19-20.

of producing an equivalent commercial product and to see whether it was possible to attribute cost differences to specific areas of legislation or regulation. George K. Krikorian of the DSMC faculty was tasked to do the study, which was carried out with the assistance of the American Defense Preparedness Association (ADPA). Twelve companies that do both Government and commercial business were interviewed and provided data.<sup>38</sup> Mr. Krikorian found: "the Department of Defense pays a premium from 30 to 50% more for products than the same or similar items sold to a commercial enterprise. In some cases, the costs may be 100% higher." The companies responding to the report found it difficult to relate added costs to specific statutes or regulations, but were able to estimate the increase in cost to DOD by functional area as follows:

Operation	Added Cost (% increase in cost)
Purchasing, subcontracting, subcontract administration	5-19%
Manufacturing, production, assembly labor ("touch labor")	2-8%
Testing, inspection, and quality assurance	10-13%
Contract and financial administration; compliance, and oversight	6-17%

Mr. Krikorian's study, like the CSIS study, found that a great deal of the cost increase was in the area of administration. For example, one of the study participants reported the following "head count" ratios between its Government and commercial divisions:<sup>39</sup>

Operation	Ratio of Military:Commercial
Business Center; Contract Compliance	5:1
Accounting, Compliance	5:1
Auditing	13:1
Purchasing and Subcontracting Administration	3:1
Legal Counsel	2:1
Overall Ratio	5:1

Materials costs were another area where Government regulations increased costs without a concomitant benefit. One respondent stated:

The cost category that differs most between Government and commercial contracts is material. Our experience indicates that in both arenas, material is becoming a larger percentage of the product cost than it has been in the past . . . Government contract practices have not kept up with those in the commercial sector. The once

<sup>38</sup>The study was performed between March and May 1992. Twelve companies eventually participated in the study and were drawn from a wide spectrum of industry, including aircraft engines, radar systems, satellites, avionics, and communications. All were corporate members of ADPA.

<sup>39</sup>These figures were confirmed by another participant in the study that reported a 42% cost premium for the military version of an avionics product when compared to a civilian product of similar functionality. One-third of the 42% cost increase related to regulatory compliance. The military division producing this product had 3.8 times as many finance personnel and 9.1 times as many contract administration personnel as the civilian division (normalized for revenue).

effective Government practices now seem to be driving their material cost above those in the commercial arena.

\* \* \* \* \*

Specific data indicates that when integrated circuits of comparable performance (Mil-Spec ceramic compared to commercial ceramic) are used, a potential reduction of 60% (nominal) can be achieved . . . . When factored in with all the other material used in the make-up of a product, the total material cost could be reduced by as much as 35% . . . . Material costs on a program run 55% of the total, so the impact to the program could result in a reduction of 19.2%. With the material content increasing, this category could have even more significance with time.

The Krikorian study found other inefficiencies in the military divisions of the companies studied. These included interference with the long-term supplier and subcontractor alliances which the commercial divisions typically used to reduce cost, improve quality, and remove administrative difficulties. In addition, Government regulation and oversight frequently created delays, rescheduling, and rework. Finally, military quality requirements were inconsistent with current "best practices" in Total Quality Management (TQM).<sup>40</sup>

The second reason for "buying commercial" is to gain access to modern technology. In many fields, DOD is no longer the primary technology driver in the U.S. economy. The Krikorian and CSIS studies found, for example, that all of the industrial firms surveyed had established separate divisions to perform DOD work because the costs imposed by DOD regulations would otherwise have jeopardized their commercial business. As a result, research and development efforts were not performed in the same organization. Whenever research and development conducted by each division had "spin-offs" for the other, it was usually the commercial division that created new technologies which were then transferred to the military division.<sup>41</sup>

While there are many reasons why DOD should buy commercial products and components, it is also evident to the Panel that there are many legitimate reasons why DOD cannot purchase commercial items to the same degree and in precisely the same way as commercial companies. These include:

- Some items simply do not have commercial counterparts, such as nuclear submarines, fighter aircraft, and tanks.
- DOD, like any large organization, must have some uniformity and consistency in the equipment it uses to reduce training and fielding costs.<sup>42</sup>

---

<sup>40</sup>Paper presented by Mr. Krikorian to the June 3, 1992 meeting of the Panel, at 3-4.

<sup>41</sup>*Id.* at 2-3.

<sup>42</sup>Uniformity and consistency do not, however, rule out the use of modified commercial products. For example, in the recent Navy Lapheld II procurement, the Navy specified a keyboard layout that all vendors had to meet and

- DOD has far flung contracting activities that must operate with some sort of central guidance and uniform procedures.
- DOD must field systems worldwide and maintain logistics systems that support such fielding.
- DOD must be able to obtain maintenance and repair services in remote and often dangerous locations.
- DOD generally keeps products in the field longer than the commercial sector, which may create unique requirements for spare parts and warranties.
- DOD's systems in some cases require greater performance or reliability in more adverse conditions than those in the commercial market.
- DOD must have access to products in time of war, when foreign supplies may be unavailable.
- DOD may require a level of secrecy about its requirements and acquisition programs that is inconsistent with commercial buying practices.
- DOD must ensure the existence of an adequate defense technology and industrial base.

Because of these factors, flexibility must be given to DOD to determine whether it is in the best interest of national defense to buy commercial items in a specific instance, even though it is abundantly clear that commercial items should be more frequently used as end items and components. The Panel has decided to provide this flexibility by recommending regulations to determine how to purchase supplies when commercial items will meet DOD's needs rather than attempting to define those circumstances in statute.

---

permitted limited engineering modifications to commercial products to permit these products to be modified to have the required keyboard.

### **8.3. Panel Recommendations**

The commercial item statute proposed by the Panel consists of a new, core subchapter to be added to chapter 137 of Title 10 of the United States Code, plus specific amendments to other existing sections of Title 10. The new and amended provisions are intended to work together as a single piece of legislation. Nonetheless, the Panel felt that rational codification required some portions of the legislation, such as rights in technical data and "buy American" preferences, to be implemented by amendments to existing chapters dealing with those topics.

#### **8.3.1. Definition of Commercial Items: 10 U.S.C. § 2302**

The Panel spent a great deal of time drafting a commercial item definition. An ad hoc committee of the Panel<sup>43</sup> was appointed to review existing commercial items definitions and to review suggestions from DOD, other Government agencies, CSIS, the public, and industry groups, including the American Bar Association, the Council of Defense and Space Industry Associations (CODSIA), the Electronic Industries Association (EIA), and the Integrated Dual-Use Commercial Companies. The ad hoc committee met frequently over a six month period and circulated numerous drafts of proposed definitions for comment. In addition, the Panel itself debated the definition for several months and held a number of open discussion sessions which were attended by spokespersons for many interested segments of the public, as well as by representatives of various Government agencies (both within and outside DOD). The definition adopted by the Panel, which has been placed as an addition to the general definitions found in 10 U.S.C. § 2302, is as follows:

(5) The term "commercial item" means

(A) property, other than real property, which: (i) is sold or licensed to the general public for other than Government purposes; (ii) has not been sold or licensed to the general public, but is developed or is being developed primarily for use for other than Government purposes; or (iii) is comprised of a combination of commercial items, or of services and commercial items, of the type customarily combined and sold in combination to the general public;

(B) The term "commercial item" also includes services used to support items described in subparagraph (A), such as installation, maintenance, repair and training services, whether such services are procured with the commercial item or under a separate contract; provided such services are or will be offered contemporaneously to the general public under similar terms and conditions and the Government and commercial services are or will be provided by the same workforce, plant, or equipment;

---

<sup>43</sup>Messrs. Madden, Peters, and Quigley.

(C) With respect to a specific solicitation, an item meeting the criteria set forth in subparagraphs (A) or (B) if unmodified will be deemed to be a commercial item when modified for sale to the Government if the modifications required to meet Government requirements (i) are modifications of the type customarily provided in the commercial marketplace or (ii) would not significantly alter the inherent nongovernmental function or purpose of the item in order to meet the requirements or specifications of the procuring agency;

(D) An item meeting the criteria set forth in subparagraphs (A), (B), or (C) need not be deemed other than "commercial" merely because sales of such item to the general public for other than Governmental use are a small portion of total sales of that item; and

(E) An item may be considered to meet the criteria in subparagraph (A) even though it is produced in response to a Government drawing or specification; provided, that the item is purchased from a company or business unit which ordinarily uses customer drawings or specifications to produce similar items for the general public using the same workforce, plant, or equipment.

In crafting the commercial item definition, the Panel made a number of important choices which are discussed immediately below.

#### **8.3.1.1. Single Definition versus Multiple Definitions**

The Panel determined that ease of administration required a single definition for commercial items to be used uniformly throughout DOD. From the outset, the Panel believed that a primary purpose of defining a commercial item was to be able to exempt items so defined from the reach of those statutes and implementing regulations which have created barriers to the acquisition of commercial items. This focus was different from the focus of those who had drafted earlier statutory and regulatory definitions of commercial items since those definitions had attempted to solve different problems such as ensuring a reasonable price, ensuring a quality product, or reducing the risk of new technology.<sup>44</sup> Once the Panel had defined the universe of items which should be acquired with a minimum of regulation unique to Government contractors, the Panel went on to deal specifically with pricing (in proposed section 2xx5) and quality (in proposed section 2xx4) rather than attempting to load these functions into the definition.<sup>45</sup>

---

<sup>44</sup>See generally W.T. Kirby & J. L. Ursini, *Commercial Products Procurement*, 91-3 BRIEFING PAPERS 1, 3-4 (1991).

<sup>45</sup>The Panel did not attempt to provide a legislative solution for the risk inherent in purchasing a new product that has neither been tested in the commercial marketplace nor tested in the manner of items developed specifically for DOD. However, the Secretary has been given authority in proposed section 2xx1 to deal with this risk by regulation.

### 8.3.1.2. Property versus Services

After surveying the statutory barriers to broader use of commercial items, the Panel reached the conclusion that statutes primarily create barriers to the acquisition of manufactured products. In general, statutes create barriers because they disrupt established manufacturing methods, sources of supply, and personnel practices. For example, commercial companies generally try to establish long-term supplier and subcontractor relationships, and often have a supplier and subcontractor base in place well before the first unit of a commercial item is manufactured. As a result, the requirement that Government contractors establish subcontracting plans cannot be implemented at all with respect to shipments from inventory and can be implemented only with great difficulty and disruption in order to fulfill a specific DOD contract. Similarly, Government quality assurance requirements are frequently inconsistent with commercial quality assurance methods that will also be in place at the outset of the manufacture of a commercial product.

By contrast, these statutes do not create the same type of barriers to the acquisition of commercial services. With some exceptions,<sup>46</sup> companies that sell commercial services to DOD appear to be able to comply with statutes governing service contractors, such as the Service Contract Act<sup>47</sup> and the Vietnam Era Veterans Readjustment Act,<sup>48</sup> with less disruption to existing practices. Moreover, smaller companies, which may have the greatest difficulty in complying with unique statutory requirements, should become largely exempt from such statutes under the Panel's proposed simplified acquisition threshold amendments.<sup>49</sup> In some areas in which service providers may be equally affected with commercial manufacturers (e.g., TINA), the Panel has recommended amendments to specific statutes that give some relief to both commercial manufacturers and service providers. The Panel concluded that it did not have sufficient information to recommend exempting "pure" service contractors from additional Government-specific statutes and regulations. However, the Panel believes that further study of this issue could show a need for broader relief for service contractors.

### 8.3.1.3. Ancillary Services

Although the Panel decided to cover primarily "property" within the commercial item definition, it also decided that some types of services ancillary to the acquisition of property also had to be included within the definition of a commercial item to avoid creating barriers to the acquisition of the commercial items themselves. Industry groups advised the Panel that commercial products are typically installed, maintained, and repaired by workers in commercial companies whose business practices will not comply with contract-specific statutory and regulatory restrictions. A similar argument was made for training services, which would use the same material, instructors, and classrooms regardless of whether a product is sold to the Government or sold commercially. Again, the argument was made that it made no sense -- and

---

<sup>46</sup>For example, the Panel was told by a supplier of data network services that it faced many of the same hurdles as manufacturers.

<sup>47</sup>41 U.S.C. §§ 351-358.

<sup>48</sup>38 U.S.C. § 4212.

<sup>49</sup>See Chapter 4 of this Report.

indeed created a barrier to acquisition of commercial items themselves -- to require a commercial company to change its classrooms or its sources of repair parts, or to comply with the Service Contract Act, as a condition of accepting a Government contract for the performance of what would otherwise be a service provided to the general public.

The Panel accepted this argument, but imposed the additional requirement that to enjoy commercial item status, such ancillary services had to be offered contemporaneously to the general public under similar terms and conditions -- so that the "Government and commercial services are or will be provided by the same workforce, plant, or equipment."<sup>50</sup> The Panel used these phrases to ensure that the Government is receiving essentially the same thing that is being provided to the general public. On the other hand, the Panel was aware that, because of factors such as security clearances, different workers may provide the Government service from those who provide the service to the public. The use of the term "workforce" was not intended to permit a contractor to use separated facilities or an entirely different workforce since: (1) the purpose of the commercial item statute is to permit integration of commercial and military workforces, plants, and equipment; and (2) the integration requirement ensures that DOD gains the benefits of competition on quality and price inherent in the commercial marketplace. Similar concerns caused the Panel to require that the service be offered "contemporaneously" to DOD and the general public. Again, this does not mean that the service must be offered to both DOD and the general public at the same moment in time, since DOD should be able to be the first purchaser of a new commercial item if it chooses to be. But there must be some reasonable expectation that the service provided to DOD will also be provided to the general public. A gap of a few months might be reasonable, but a gap of several years between the date the service is offered to DOD and the date it is offered to the general public would not be.

#### **8.3.1.4. Modified Products**

Past practice has limited commercial acquisition to "off-the-shelf" items or "minor modifications" of off-the-shelf items. It was the Panel's conclusion that such a narrow policy on modifications does not recognize current commercial reality. Today, a commercial buyer can often buy a modified commercial product from a commercial vendor if the cost of the modification is not great compared to the cost of the commercial item or to the value of the contract. Because DOD will often be a "large buyer" and will often have somewhat unique needs, DOD should have the same flexibility as a commercial company to obtain modifications that would be available to, for example, a Fortune 100 company. Accordingly, the Panel has recommended the addition of section 2302(5)(C) which permits the acquisition of a modified item as a commercial item if the unmodified item would itself meet the criteria for commercial item status and the modification "(i) is of the type customarily provided in the commercial marketplace" and "(ii) would not significantly alter the inherent nongovernmental function or purpose of the item in order to meet the requirements or specifications of the procuring agency."

---

<sup>50</sup>See proposed 10 U.S.C. § 2302(4)(B).

### **8.3.1.5. New Products; Combinations of Products; Products Sold In Small Quantities to the General Public**

The Panel extended the concept of "commercial item" to new products<sup>51</sup> and to products sold in small quantities to the general public<sup>52</sup> in order to ensure that the Government is not foreclosed from buying "cutting edge" technology simply because it is an early, major buyer of that technology. The purpose of this provision is to encourage the acquisition of new technology from the commercial sector rather than "growing it in-house." Moreover, given the long lead-times frequently faced in the Government procurement cycle, it will often be essential to make purchases at the cutting edge of technology in order to ensure that an item is still current technology by the time it is fielded.

In addition, the Panel expressly defined a system made out of a combination of commercial items as a commercial item so long as the combination was of the sort that would be made for a nongovernmental buyer. The purpose of this provision was to allow DOD to contract for systems, such as personal computer systems, which typically are sold commercially as systems even though products from various vendors may be assembled or integrated by yet another vendor before the sale takes place. The Panel's definition covers combinations of commercial items even if the precise system being ordered by DOD had not been assembled before and sold commercially.

Finally, the Panel wanted to be clear that DOD is not to be precluded from buying an item as a commercial product simply because some arbitrary percentage of sales has not been made to the general public.<sup>53</sup> So long as the contracting officer can determine that an item is designed for general nongovernmental use and can determine that the price for that item is reasonable, an item can be purchased as a commercial item. In this regard, the proposed section on the pricing of commercial items (section 2xx5) provides a mechanism for determining price reasonableness even where an item does not meet the requirements for "established market or catalog price" under current statutes and regulations.

### **8.3.1.6. Items Produced by "Dual-Use" Manufacturers**

As the defense budget shrinks from its 1986 high, it is clear that DOD demand alone will be inadequate to sustain the current size and surge capacity of today's defense-unique industrial base.<sup>54</sup> If, therefore, there is to be an adequate industrial base, DOD must be able to draw on both defense-unique and commercial companies for the products it needs. Recently enacted section 2501(c) of Title 10 puts the matter succinctly:

---

<sup>51</sup>See proposed 10 U.S.C. § 2302(4)(A)(ii).

<sup>52</sup>See proposed 10 U.S.C. § 2302(4)(D).

<sup>53</sup>In recommending the adoption of 10 U.S.C. § 2302(4)(D), the Panel rejected the percentage of sales tests currently used for the catalog pricing exemption under TINA as tests relevant to commercial item acquisition policy.

<sup>54</sup>See, e.g., *Future of the Defense Industrial Base*, *supra* note 2, at 1-2.

(c) CIVIL-MILITARY INTEGRATION POLICY. -- It is the policy of Congress that the United States attain the national technology and industrial base objectives set forth in subsection [2501](a) through acquisition policy reforms that have the following objectives . . .

(3) Reducing Federal Government barriers to the use of commercial products, *processes*, and standards. (emphasis added).<sup>55</sup>

As a first step toward integration, the Panel recommends a proposed section 10 U.S.C. § 2302(5)(E), which is intended to remove barriers to the use of commercial processes, such as the manufacture of paint or castings, which frequently are used not to produce a product to the manufacturer's specifications but to the specifications of the buyer. Because the end item produced by such a process is generally not intended to be sold to the general public -- and is not a modification of something sold to the general public -- but to be used by the purchaser as a part of a larger item, such items were not otherwise described by the commercial item definition. Nonetheless, the Panel felt that the same concern for removing barriers to commercial-military integration -- which justified removing barriers to the acquisition of commercial items -- also required regulatory and statutory relief to a supplier of commercial processes to nongovernmental buyers. Otherwise, a commercial manufacturer would frequently be required as a condition of accepting a Government order to change its fundamental manner of doing business when the need is for greater development of flexible manufacturing in integrated facilities.<sup>56</sup> However, the Panel believes that regulatory relief should be granted only when the process and item being offered to DOD is in fact made in the same plant and with essentially the same equipment and workforce as an item made for a nongovernment buyer. Otherwise, the effect of including suppliers of processes could have the unintended consequence of deregulating defense-unique business units within companies which provided similar commercial items out of commercial business units. Since the point of integration is to have defense items manufactured in facilities that are sustained by the general public, the Panel felt strongly that regulatory relief should be targeted at true dual-use facilities.

#### 8.3.1.7. Existing Sources; Nondevelopmental Items

While the Panel's emphasis has been on promoting the use of commercial products both as end items and as components, it recognizes that widespread use of commercial items will create a transition problem for businesses that are today supplying the DOD-unique products that will be supplanted by commercial items. Accordingly, the Panel has provided that nondevelopmental items and existing sources of supply will ordinarily be permitted to compete for DOD's procurement dollars on an equal footing with commercial replacements. In addition, the Panel has specifically provided that current policy on set-asides for small, minority, and small disadvantaged businesses will not be disturbed by the new statute.<sup>57</sup> As a result, small businesses which today

<sup>55</sup>Added by Pub. L. No. 102-484, § 4211, *supra* note 22.

<sup>56</sup>See, for example, 10 U.S.C. §§ 2511, 2512, *added by* Pub. L. No. 102-484, *supra* note 22.

<sup>57</sup>See proposed section 2xx3. Elsewhere the Panel has recommended raising the existing small purchase threshold to a new "simplified acquisition threshold" of \$100,000 and provided that all procurements under this amount will

supply many defense-unique articles for which there are commercial equivalents should continue to have a market for their products.<sup>58</sup>

### 8.3.1.8. Commercial Companies

The Panel was urged by CSIS and industry groups to attempt to develop a statutory structure for a "commercial company" -- to be defined generally as a company or business unit most of whose business was not with the Federal Government. This concept has great appeal since, as CSIS has found, statutes governing Government contractors as such will create the greatest barriers to commercial-military integration when applied to companies that have shaped their procedures, processes, vendor base, and personnel policies for the commercial marketplace. Thus, exemptions to such statutes could be more readily tailored when applied on a company-by-company basis than on a contract-by-contract basis. However, when the Panel circulated a draft commercial company statute, it was met with enormous opposition as being both over- and under-inclusive. In addition, a number of smaller vendors argued that they would not be eligible for commercial company status while larger competitors would be eligible, which would give the smaller companies a great cost disadvantage in competing against larger competitors for Government business. The Panel made a number of efforts (aided by CSIS and CODSIA) to develop a definition of commercial company that was less problematic. Unfortunately, as the deadline for this Report was reached, no satisfactory substitute language had been found. Thus, while the Panel has not adopted a "commercial company" concept in its recommendations, it is not because the Panel rejected the concept, but only because reduction of the concept to statutory language proved to be more difficult and time-consuming than originally hoped. Given the importance to the defense industrial base of flexible and dual-use manufacturing processes and plants, the Panel hopes that further work will be done by others to determine whether additional statutory authority is needed to remove barriers to purchasing the product of such processes and plants.

---

be reserved for small business under the existing "rule of two." See Chapter 4 of this Report; 15 U.S.C. § 644(j); FAR 13.105. As a result, small businesses furnishing Government-unique products will be sheltered from competitive pressure until they can move into commercial markets.

<sup>58</sup>In the past, Congress has objected to regulatory changes that would replace existing small business sources with commercial companies. See generally Kirby, *supra* note 6, at 87-88. Indeed, the Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, which directed the Secretary to increase the use of commercial items, was accompanied by a report which

caution[ed] DOD that in implementing the [commercial items] demonstration program, it should encourage the participation of those firms that have previously been supplying DOD with military uniforms and items of individual clothing in accordance with existing military specifications. Specifically, DOD may not apply any "commerciality" requirement with respect to the eligibility of an offeror or to the product being offered.

H. Conf. Rep. No. 101-331, 101st Cong., 1st Sess. 613 (1989). The Panel's recommended approach will allow existing suppliers to compete against new suppliers of commercial items.

### 8.3.2. Policy: 10 U.S.C. § 2301

The policy on acquisition of commercial items is stated in two places, 10 U.S.C. § 2301 and a new section 2xx1. Since 1984, CICA has provided in section 2301 that it is the policy of Congress that DOD must "promote the use of commercial products whenever practicable."<sup>59</sup> However, as more specifically discussed in Chapter 1.1.1 of this Report, the Panel determined that the policy statement in CICA needed to be amended to reflect more accurately the policies needed to guide defense procurement in the post-Cold War era of fiscal restraint. This was accomplished in three ways. First, to promote commercial-military integration, an amendment to section 2301 was recommended to emphasize that commercial items shall be used by DOD whenever practicable, both as end items and as components.<sup>60</sup> Second, to cut the costs of defense-unique procurement, when commercial items are not available or do not meet DOD's requirements, the Panel has recommended requiring DOD to use suitable nondevelopmental items prior to developing unique defense goods.<sup>61</sup> Finally, the Panel has become aware of instances in which the FAR and DFARS needlessly inhibit the acquisition of commercial items. Accordingly, the Panel has amended section 2301(b)(5) to prohibit regulations which needlessly interfere with the acquisition of commercial and nondevelopmental items.

### 8.3.3. Procurement Planning: 10 U.S.C. § 2325

Section 2325 in Title 10 requires DOD to develop its acquisition requirements to ensure the maximum use of commercial and nondevelopmental items.<sup>62</sup> The Panel has recommended moving the definition of nondevelopmental item from this section to 10 U.S.C. § 2302(6) and has suggested minor amendments to the remainder of this section to reflect its recommendations on commercial items. As amended, section 2325 will require DOD to:

- Define its requirements so that commercial and other nondevelopmental items may be procured to fulfill those requirements; and
- Prior to acquiring a defense-unique item, to perform market research to determine whether commercial or nondevelopmental items, or modified commercial or nondevelopmental items, can be used in place of a defense-unique item.

Since under both section 2325 and under proposed section 2xx1, commercial and nondevelopmental items are required to be used only "to the maximum extent practicable," it is obviously essential that DOD's requirements not be drawn in such a way that only defense-unique products can meet those requirements. The declining defense budget, the cost and industrial base advantages of commercial items, thoughtful and innovative regulatory

---

<sup>59</sup>10 U.S.C. § 2301(b)(6). This policy is implemented in DOD Directive 5000.1, C.1.c.

<sup>60</sup>See §§ 2301(a)(2), 2301(b)(5).

<sup>61</sup>See §§ 2301(a)(3), 2301(b)(b), 2301(b)(6).

<sup>62</sup>Nondevelopmental items are defined in section 2325(d) to include "any item of supply that is available in the commercial marketplace." The Panel has recommended minor modifications to section 2325 to reflect the commercial item amendments proposed here.

implementation, and the training mandated by section 824(d) of Public Law Number 101-189, should ensure good faith compliance with section 2325.

### **8.3.4. Regulations: Proposed Section 2xx1**

The proposed new Chapter of Title 10 implements the general guidance of section 2301 with directions to the Secretary of Defense to issue regulations governing the procurement of three types of items: commercial end items; commercial components; and nondevelopmental items. Specifically, proposed section 2xx1 states:

#### **SECTION 2XX1. POLICY**

(a) **REQUIRED USE OF COMMERCIAL ITEMS.** – In accordance with the policies stated in section 2301, whenever commercial items will satisfy the needs of the Department of Defense, the Department

(1) shall purchase commercial items using those practices prescribed in this subchapter and in regulations issued hereunder and

(2) shall by regulation require prime contractors, and subcontractors at all levels, that furnish other than commercial items, to incorporate commercial items as components to the maximum extent practicable.

(b) **REGULATIONS; UNIFORM TERMS AND CONDITIONS.**

(1) **END ITEMS.** – The Secretary of Defense shall promulgate regulations implementing this subchapter, which shall contain a set or sets of uniform terms and conditions to be included in contracts for the acquisition of commercial end items. Such uniform terms and conditions shall be modeled to the maximum extent practicable on commercial terms and conditions and shall include only those contract clauses, including clauses requiring terms and conditions to be flowed down to subcontractors, that are---

(A) required to implement provisions of law applicable to commercial item acquisitions;

(B) essential for the protection of the Federal Government's interest in an acquisition; or

(C) determined by the Secretary to be consistent with standard commercial practice.

The regulations to be issued hereunder shall also establish standards and procedures for waiving such uniform terms or conditions, other

than those required by statute, as may be useful to the acquisition of commercial items in a particular procurement or class of procurements.

(2) COMPONENTS. - The Secretary of Defense shall issue regulations implementing the preference for commercial components set out in section 2301(b)(5). Such regulations shall provide that prime contractors and subcontractors furnishing other than commercial items as end items or components may not require suppliers furnishing commercial items as components to comply with any clause, term or condition except those---

(A) required to implement provisions of law applicable to subcontractors furnishing commercial items;

(B) essential for the protection of the prime contractor or higher tier subcontractor in a particular acquisition; or

(C) determined to be consistent with standard commercial practice.

(c) EXISTING OR PRIOR SOURCES; NONDEVELOPMENTAL ITEMS. -

(1) The Secretary of Defense, the Secretary of a military department or the head of a defense agency may determine that it is in the Government's interests to permit existing or prior sources or suppliers of nondevelopmental items to participate in a competition for a commercial item when a nondevelopmental item or an item furnished by an existing or prior source will compete with a commercial item under the same terms, conditions, and evaluation and award criteria.

(2) Nondevelopmental items or items furnished by an existing or prior source which must be modified to meet the requirements of a solicitation for commercial items may be offered under such a solicitation, but only when the modifications are

(A) necessary to comply with the Government's solicitation requirements and

(B) do not alter the function or essential physical characteristics of the items to be supplied.

(3) The policies, procedures, solicitation provisions and contract clauses applicable to commercial items under this

subchapter shall also apply to nondevelopmental items and items furnished by an existing or prior source which are permitted to participate in a competition conducted under this title.

#### **8.3.4.1. End Items**

With respect to end items, section 2xx1(a) implements the general policy of section 2301 by mandating that DOD acquire commercial end items "whenever commercial items will satisfy the needs of DOD."<sup>63</sup> The Panel intends by this that commercial items should become the norm, not the exception, for end items other than those unique to DOD's war-fighting role. This will require agencies to perform market research, to look diligently for commercial items in the early stages of the procurement process, and to use commercial items, including modified commercial items when these will meet the minimum needs of the agency. In determining the needs of DOD, the Panel intends that DOD have the latitude to select a defense-unique acquisition plan when required by, for example, industrial base or security concerns. However, the authority to reject commercial items on public interest or national defense grounds should be exercised very sparingly and at a level above that of the contracting officer. The Panel also intends that DOD will use its waiver authority to remove from standard contract terms and conditions any clause that unreasonably restricts competition by putting significant burdens on a substantial number of suppliers of a commercial item.

The Secretary of Defense is required by section 2xx1(b)(1) to promulgate regulations implementing the end item provisions of the new chapter. While the details of these regulations are largely left to the Secretary of Defense,<sup>64</sup> section 2xx1(b)(1) requires the Secretary of Defense to draft uniform terms and conditions for various types of procurements and to establish an administrative structure under which standard terms and conditions could be varied if authorized by appropriate authority. The Panel has recommended this structure for two reasons.

First, DOD must have some means to control the actions of far-flung contracting activities. The only practical way to achieve this control is for DOD to mandate standard terms and conditions that are to be used in the ordinary course of business. Most large commercial companies similarly rely on standardized terms and conditions -- often written in very small type on the reverse of purchase order forms -- to control the actions of individual contracting officials and to implement routine elements of a transaction, such as billing, payment, inspection and acceptance, shipping, and packaging.

---

<sup>63</sup>"In accordance with the policies stated in section 2301, whenever commercial items will satisfy the needs of the DOD, the Department (1) shall purchase commercial items using those practices prescribed in this subchapter and in regulations issued hereunder and (2) shall by regulation require prime contractors, and subcontractors at all levels, that furnish other than commercial items, to incorporate commercial items as components to the maximum extent practicable."

<sup>64</sup>Section 2xx1 restricts the terms and conditions that may be implemented to those strictly necessary to comply with statutes and the needs of DOD, plus clauses consistent with commercial practice. The Panel did not take a position on the use of qualified products lists or qualified source lists, although both have been urged by commentators. See, e.g., W.T. Kirby, *supra* note 6, at 89-91. The use of such lists is left to the discretion of DOD, subject to the requirements of 10 U.S.C. § 2319 (see Chapter 1.2.6. of this Report).

Second, DOD must have the flexibility at an appropriate level of authority to modify or waive standard terms and conditions if the need for, or value of, a commercial item outweighs the benefit of trading on the standard DOD form. The principal problem DOD faces today in buying commercial items and in attracting commercial companies as sellers is DOD's inability to waive terms and conditions imposed by statute, Executive Order, or regulation. The Panel has recommended exemption of commercial item acquisitions from many of the statutes that today impede the acquisition of commercial items, and application of the principles stated in proposed section 2xx1 should similarly remove many regulatory barriers. This does not mean, however, as some industry comments have suggested, that DOD must never ask for a term or condition that falls outside current commercial custom. Successful commercial buyers ask for unique terms and conditions all the time. Whether they get such terms and conditions depends on how much the seller wants the business and how costly it will be for the seller to comply with a unique request. This, in turn, will depend on how different that unique request is from those which are customary in the industry.

Today, DOD is in the unhappy position of asking (as required by statute) for any number of unique terms and conditions that are extremely expensive for commercial sellers to implement, while at the same time being constrained by statutory competition requirements from offering sustained purchases of an item from one particular source. This is a "lose-lose" situation for commercial sellers. Nonetheless, it was apparent from industry comments that some commercial sellers would be prepared to accept some Government-specific terms and conditions on some orders, and that the willingness (or ability) of sellers to comply with Government-specific terms and conditions will differ by industry, by company, and by the size of the order. Accordingly, the Panel found no reason to absolutely prohibit DOD from negotiating for unique terms and conditions if an appropriate level of contracting authority thought this should be done.

In summary, DOD must be willing and able to bargain in the commercial marketplace if it is to be able to rely successfully on commercial items: but it must have one or more sets of standard terms and conditions in order to start the process. Hopefully, by using various sets of terms and conditions, making class waivers as authorized by section 2xx1(b), and by taking advantage of the statutory exemptions created in section 2xx3, DOD will be able to buy in the commercial marketplace on its standard terms and conditions in the majority of cases.

#### **8.3.4.2. Components**

The Secretary's authority to issue regulations implementing the use of commercial items as component parts is established by section 2xx1(b)(2). While the Panel felt that manufacturers of commercial components should be as free as possible from Government regulation inconsistent with commercial practices, it also recognized that prime contractors supplying Government-unique items will have good reason to want to flow down some Government-unique clauses to subcontractors. For example, if the prime contractor must accept a Government-unique warranty, the prime contractor will doubtless want equivalent warranty protection from its suppliers regardless of whether they supply defense-unique or commercial parts. Similarly, a prime contractor may want a commercial vendor who uses a unique part to substitute a commercial component in order to provide more sources for spare parts. Accordingly, the Panel did not

foreclose some regulation of commercial component manufacturers. On the other hand, suppliers of Government-unique products should not be allowed to pass down willy-nilly all contract clauses they must accept. Accordingly, the Secretary is given authority in section 2xx1(b)(2) to regulate the flow down of Government-unique clauses to vendors of commercial components. How this should be done will depend heavily on the nature of the end items being procured, and has been left to the Secretary to determine. The Panel urges the Secretary in using this authority to extend to its vendors of Government-unique items relief from flow down obligations of the same general nature that section 2xx1(b)(1) and section 2xx3(a) have extended to the Secretary himself.<sup>65</sup>

#### **8.3.4.3. Existing or Prior Sources; Nondevelopmental Items**

The Panel has recommended permitting products produced by existing or prior sources<sup>66</sup> and nondevelopmental items<sup>67</sup> to compete with commercial products under the same terms and conditions applicable to commercial items.<sup>68</sup> The reasons for this are two-fold.

First, with respect to existing sources, the Panel was told that, because of the use of Government specifications in the past, DOD's current sources for many items that have commercial equivalents are Government specialty companies, many of them small businesses. No purpose would be served by excluding products made by these companies from commercial item acquisitions since these products have been previously accepted by DOD. In addition, to avoid placing these companies at a competitive disadvantage, the Panel felt that they should be exempt from statutes and regulations to the same extent as their commercial competitors.

Second, nondevelopmental items, even if Government-unique, are in existence and available, and may well provide viable alternatives to commercial items. Again, the Panel could see no reason for DOD to cut itself off from an available source of supply simply because commercial items may theoretically be less expensive and technically superior to some equivalent Government-unique items. To avoid an unfair cost advantage, nondevelopmental items offered in competition with commercial items will be exempt from statutes and regulations to the same extent.

#### **8.3.5. Precedence: Exemptions; Relation to Other Laws**

Section 2xx3 of the proposed chapter exempts procurements of commercial items from those statutes which appeared to the Panel, after review of recent industrial base literature and lengthy discussions with industry and Government representatives, to create barriers to the use of

---

<sup>65</sup>For example, the Secretary should consider allowing prime contractors to use the procedures and criteria established in section 2xx5 to establish the reasonableness of the price of commercial components and, if this were done, should give the prime contractor equivalent relief from TINA, 10 U.S.C. § 2306a.

<sup>66</sup>Existing or prior sources are defined in section 2xx2(e) as "a business entity that is furnishing or has previously furnished items to the Government, including items supplied in accordance with Government-unique product descriptions, drawings, or specifications."

<sup>67</sup>"Nondevelopmental item" has the meaning prescribed in proposed 10 U.S.C. § 2302(7).

<sup>68</sup>See generally proposed section 2xx1(c).

commercial items. In addition, it establishes a rule of construction intended to prevent inadvertent repeal and defines the relationship of commercial item acquisition to simplified acquisition procedures and set-asides.

#### **8.3.5.1. Exemptions**

Many commentators suggested to the Panel that the best method for facilitating the acquisition of commercial items was to exempt commercial acquisitions from all laws, other than laws requiring full and open competition, that are not generally applicable to United States companies. Typical of the statutory language proposed is the following:

(a) EXEMPTIONS FROM PRESENT LAW.--Procurements of commercial items shall be conducted pursuant to Section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. 403(6)) and shall be exempt from any other requirements of law not specifically reserved in this subchapter, unless the same requirements are equally applicable to business entities which are not under contract to the Federal Government.

While the Panel used this concept as one guide to identify statutory barriers to the use of commercial items, it did not (as discussed in Chapter 8.3.4 and generally throughout Chapter 4) believe it was necessary or appropriate for DOD to give up all contract-unique socioeconomic, ethics, and regulatory policies as a condition of obtaining commercial items. Accordingly, the Panel used as additional criteria for exemptions such considerations as (i) whether compliance with a statute was practical if a commercial item was purchased out of inventory; (ii) whether compliance would disrupt sources of supply, personnel practices, and business methods that would typically be in place in a company which served primarily the commercial market; and (iii) whether compliance with a contract-unique requirement would impose substantial expense on a "typical" commercial company.

In fashioning exemptions, the Panel is not recommending the abandonment of policies underlying laws to which exemptions have been recommended. However, many of the policies required to be implemented in contracts today -- such as nondiscrimination, equal employment, fair employment, and wage, hour, and workplace safety standards -- are also implemented in statutes of general applicability. As a result, the Panel believes the costs of contractual implementation -- and the benefits of avoiding contractual implementation -- exceed the marginal benefit to be gained by added unique contract clauses on top of existing general statutory applications of the policy. Alternatively, there may be ways to tailor the statutory implementation of policies to avoid substantial impacts on commercial operations. As discussed in Chapter 6, for example, a broad range of statutes prohibit improper activity by anyone who does business with the Government. As presently drafted, these statutes require contractual implementation which conflicts with commercial practice. While the Panel is recommending exemption from such laws, *as currently drafted*, the Panel is *not* recommending exemption from the amended statutes proposed in Chapter 6 which implement the same policies in a manner that commercial vendors can accept.

In summary, the Panel attempted to draw a balance between the goals established by Congress for acquiring commercial products and the goals established by laws which impose contract-unique requirements. While the Panel recognizes that this balance is somewhat arbitrary and might be drawn differently by others, what is presented here is a consensus reached after months of public discussion and debate and very hard study by all of the Panel members.

The Panel took three different approaches to the implementation of exemptions. First, as discussed in this Chapter, the Panel drafted a new commercial items subchapter for Title 10, which contains provisions which replace or supplement existing law. For example, section 2xx5 contains pricing and audit provisions that supplement the Truth in Negotiation Act,<sup>69</sup> and replace audit and access to records statutes.<sup>70</sup> Second, the Panel drafted exempting language for insertion in appropriate sections of individual statutes. Examples of this are provisions dealing with rights in technical data<sup>71</sup> and the Buy American Act,<sup>72</sup> in both of which a simple exemption was not an appropriate solution. Third, the Panel implemented the remaining exemptions in proposed section 2xx3(a), which is set out below. Table 1, which follows the text of section 2xx3, summarizes the reasons for each exemption contained in section 2xx3(a). Table II below identifies those statutes (falling into the first and second categories discussed above) for which exemption or amendments would be required if the recommendations of this Panel are not accepted.<sup>73</sup>

---

<sup>69</sup>10 U.S.C. § 2306a.

<sup>70</sup>10 U.S.C. § 2313.

<sup>71</sup>10 U.S.C. §§ 2320-21.

<sup>72</sup>41 U.S.C. §§ 10a-10d.

<sup>73</sup>While the Panel's charter is to examine statutes, in the process of examining statutory barriers to commercial items, the Panel identified regulations and Executive Orders that also require amendment if barriers to commercial-military integration are to be removed. Specifically, FAR 52.225-10, which requires vendors to avoid payment of duties on items destined for the Government, should be amended to contain a commercial item exemption since a commercial vendor will usually not know at the time of import to whom an item will be sold. Similarly, Executive Order 11246 and implementing regulations (FAR 52.222-21 through 28) require that clauses be inserted in all Government contracts which require sellers to have affirmative action programs and which require pre-award on-site equal opportunity clearance. While the Executive Order permits exemptions to be made by regulation, none have been made, even though the antidiscrimination requirements of the Executive Order are also enforced by Title VII of the Civil Rights Act of 1964, a statute applicable to all employers regardless of Government contractor status. This strict application of the Executive Order prevents, for example, use of credit cards for small purchases, since there is no contract in a credit card purchase in which the required clauses can be written down. Executive Order 10582 and subsequent amending Orders implement a components test under the Buy American Act, which is also used for the DOD Balance of Payment program. Such component tests may needlessly exclude commercial items substantially transformed in the United States. Elsewhere (see Chapter 7) the Panel has recommended that a substantial transformation test be used for determining whether an item is "American." The same test should be used in regulations. Finally, the Defense Production Act and Defense Priority Rating System, 50 U.S.C. App. 2061-69, has been implemented by regulations imposing flow down that may disrupt established subcontractor systems. The regulations should be modified to delete the flow down requirement when commercial items are being acquired. In addition, 50 U.S.C. 2071(b) provides: "The powers granted in this section shall not be used to control the general distribution of any material in the civilian market unless the President finds: (1) such material is a scarce and critical material essential to the national defense . . ." This finding has not been made to support the regulations.

**§ 2xx3. Precedence; Relations to other Laws**

(a) EXEMPTIONS FROM PRESENT LAW.—Procurements of commercial items shall not be subject to the following laws:

- 10 U.S.C. § 2393
- 10 U.S.C. § 2402
- 10 U.S.C. § 2408
- 10 U.S.C. § 2507
- 10 U.S.C. § 2631
- 15 U.S.C. §§ 637(d)(4), 637(d)(5), 637(d)(6)
- 15 U.S.C. §§ 644(d), 644(e), 644(f)
- 29 U.S.C. § 793
- 31 U.S.C. § 1352 note
- 38 U.S.C. § 4212
- 41 U.S.C. §§ 51-58
- 41 U.S.C. § 701
- 46 U.S.C. App. § 1241(b)

As stated above, the purpose of exempting procurements of commercial items from the statutes listed above is to eliminate the barrier to entry of commercial items. The Panel recognizes that the Secretary may wish to retain in regulations some of the statutory requirements to which exemptions are made by section 2xx3(a). Nothing in this section precludes that. Indeed, the Secretary has been given authority by proposed section 2xx1(b)(1) to seek to impose on commercial contractors those Government-unique requirements that the Secretary finds to be important and cost-justified in specific procurements or classes of procurements. Without the exemptions conferred in section 2xx3(a), however, the Secretary would be without authority to waive statutorily mandated requirements in the manner contemplated by section 2xx1(b). Moreover, the exemption created in section 2xx3(a) does not relieve a contractor that has already contractually committed a business unit to abide by the statutes listed in section 2xx3(a) as a result of contracts for Government-unique items.

Table I, set out immediately below, lists each statutory provision for which the Panel has recommended an exemption in § 2xx3(a) and the regulations that today implement each provision, and summarizes the Panel's reasons for recommending an exemption for commercial items.

TABLE I<sup>74</sup>

Statute	Regulations Based on Statute	Flow down	Description of Regulations	Reasons for Commercial Item Exemption	Ch
10 U.S.C. § 2393	52.209-5 and -6	Yes to first tier	Prohibits prime contractor from using debarred or suspended subcontractors.	Prohibition on doing business with debarred or suspended prime contractors is not a problem. A commercial seller will often have established its sources of supply or subcontractors prior to sale to the Government. Therefore, exemption from subcontractor approval provisions is required.	6.11
10 U.S.C. § 2402	52.203-6	Yes	Prohibits primes from entering into any agreement with subcontractor which prevents subcontractor from selling any item or process directly to U.S.	The flow down is not consistent with commercial practices, in which subcontractor system will be established before a contract is awarded. If U.S. needs direct purchase of subcontracted items, let it negotiate for them. The Panel's primary recommendation is that this statute be repealed.	3.9
10 U.S.C. § 2408	252.203-7001	Yes to first tier	Prohibition of employment of persons convicted of fraud.	Commercial sellers should be able to utilize their established employees in performing Government contracts. There is no reason to burden commercial sellers with need to screen employees when they get an occasional Government contract.	6.4
10 U.S.C. § 2507	DFARS Part 225	No	Section 2507 contains specific U.S. source restrictions applicable to the acquisition of identified products.	To the extent that this section requires sellers of commercial items to vary the source of components, it interferes with the ability of DOD to buy those items. The Panel has recommended a complete revision of this section, which would include a repeal of most restrictions currently contained in section 2507. However, an exemption is required from the remaining restrictions.	7.1
10 U.S.C. § 2631	252.247-7022, -7023, -7024	Yes--regs seem to flow down; statute does not	Requires transportation of items by sea in U.S. Flag vessels.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts.	7.1

<sup>74</sup>The Panel made great efforts to identify every statute that might create a barrier to commercial items. As explained in Appendix D to this Report, a master list of such statutes was compiled from a number of DOD and industry sources which was then culled to create the table set out here. While an exhaustive effort has been made to identify relevant statutes, it is possible a relevant statute has been missed. The statutes reviewed by the Panel are set out in Appendix D.

15 U.S.C. § 637(d)	52.219-8; -9; -16; 19.705; 19.708; 226.7; 252.211.-7003; -7020	Yes	Subcontracting with small and small disadvantaged businesses; small business subcontracting plans; liquidated damages. Section 637(d) requires that small businesses be given the "maximum practicable opportunity" to participate in Government contracts as subcontractors and mandates that the clause set out in section 637(d)(3) be placed in all contracts other than small purchase contracts, personal service contracts, and contracts to be performed outside of the U.S. Section 637(d)(4) mandates the negotiation of a small and minority subcontracting plan in all negotiated procurements in excess of \$500,000. Adherence to the plan is policed by liquidated damages. There is no exemption for contracts for commercial items.	There is no problem with the policy prescribed by section 637(d)(3). In negotiated procurements of commercial items, the subcontracting plan mandated by section 637(d)(4) may well conflict with the established subcontracting arrangements of the commercial supplier and is obviously impractical when goods are sold to the Government from inventory. While section 647(d)(4)(B)(iv) limits use of the clause to situations "which offer subcontracting possibilities," comments received from industry indicate that this exception is not being properly applied to exempt even shipments of commercial items from inventory. For the same reason, commercial item contracts should be exempt from section 637(d)(5), which essentially extends the requirements in section 637(d)(4) to contracts awarded through competition, and section 637(d)(6) which contains the clauses implementing section 637(d)(5). The Panel recommends, therefore, express exemption to sections 637(d)(4), 637(d)(5), and 637(d)(6) for commercial item contracts.	4.3
15 U.S.C. §§ 644(d), (e), and (f)	52.220-3; -4	Yes	Preference for labor surplus area contracting. Requires U.S. to give priority to small and labor surplus area contractors. Subcontracting plan required for negotiated contracts over \$500,000.	The regulations create a subcontracting obligation that is inconsistent with normal commercial practices, in which subcontracts are arranged well in advance of shipments. The regulations do not contain any exemption for commercial items. While the regulations do not appear to be required by 15 U.S.C. § 644, the regulation writers seem to think otherwise. To avoid any doubt, therefore, an exemption is granted.	4.3
29 U.S.C. § 793	52.222-36	Yes	Rehabilitation Act of 1973; requires affirmative action to employ and advance handicapped individuals. Act applies to companies with 50 or more employees or annual U.S. contracts of \$50,000 or more.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts. Especially since discrimination against the handicapped is prohibited for all employers under Americans with Disabilities Act, there should be an exemption for commercial items.	4.2
31 U.S.C. § 1352 note	52.203-11; -12	Yes	Byrd Amendment.	Probably does not apply to commercial suppliers with respect to contracts for commercial supplies, but should be exempted for clarity.	6.11
38 U.S.C. § 4212	52.222-3.	Yes	Affirmative action for disabled and Vietnam Era Veterans.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts. In addition, this statute has a sunset provision and will no longer be a requirement after 1994.	4.2

41 U.S.C. §§ 51-58	52.203-7	Yes	Anti-Kickback Act; prohibits payments from any subcontractor to any prime or any employee of the prime; violation voids contract.	While many companies may prohibit some forms of payments by subcontractors to employees, commercial practice typically permits some forms of gratuities (such as meals or entertainment) that will be prohibited by this law. Accordingly, it constitutes too much of a burden for commercial seller to "police" existing supplier networks to ensure compliance for occasional Government contracts.	6.11
41 U.S.C. § 701	52.223-5; -6	Yes	Drug Free Workplace certifications. This section requires employers to establish drug-free awareness programs and to report any convictions by their employees for drug-related offenses.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts.	4.2
46 U.S.C. App. 1241(b)	52.247-64	Not in statute; flow down in regs.	Preference for U.S. Flag Vessels; requires 50% or more of gross tonnage of materials and equipment procured under Government contracts be transported in U.S. Flag vessels.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts.	7.1

Table II (below) identifies those statutes which the Panel has recommended for amendment or repeal, or for which substitute language has been proposed in the Panel's commercial item subchapter. If the Panel's recommendations with respect to the commercial item subchapter or statutes listed in Table II are not adopted, the exemptions or amendments would be needed to the statutes listed in Table II to remove barriers to commercial items.

TABLE II

Current Statute	Regulations Based On Statute	Flow down	Description of Regulations	Comments	Ch
10 U.S.C. §2306a	252.211-7010-7011; 52.215-22; 52.215-23	Yes	Truth in Negotiation Act ("TINA"); Price reduction for defective cost or pricing data—contract modifications ; audit of cost or pricing data	Proposed 2xx5 provides an additional source of authority for pricing purchases of commercial items. Even as amended by the Panel, section 2306a is not adequate to provide a complete solution for commercial items. If the Panel's proposed section 2xx5 is not adopted, some other comprehensive amendment to §2306a as currently drafted will be required since there is little doubt that the provisions of §2306a create the single greatest impediment to the purchase of commercial items.	1.3
10 U.S.C. §2313	52.215-1; 52.215-2	Yes	Examination of books and records of contractor by DOD.	Proposed section 2xx5(d) is intended to provide the Government's exclusive audit right under a contract. See the discussion of section 2xx5(d) for the rationale	2.3
10 U.S.C. § 2313(b)	252.211-7011	Yes	This section requires contractor to permit GAO audit of any books, documents, papers, or records of contractor or subcontractor relating to a negotiated contract.	Proposed section 2xx5(d) is intended to provide the Government's exclusive audit right under a contract. See the discussion of section 2xx5(d) for the rationale.	2.3
10 U.S.C. § 2320-21	252.211-7015 through 7017	Yes	Rights in technical data and computer software.	The requirements of these statutes are inconsistent with normal commercial practices on data rights. The Panel has proposed specific amendments to section 2320 (which have the effect of modifying the coverage of section 2321 as well) to deal with this problem. If these amendments are not adopted, then exemption will be required.	5.1
10 U.S.C. § 2324	252.231-7001	No	Allowable costs under defense contracts; prescribes costs that may be incurred in overhead pools; Penalties for unallowable costs.	The Panel has recommended that the detailed provisions on cost allowability contained in this section be repealed since they have been implemented in regulation for many years. If this course is adopted, there is no need for an exemption. In addition, because the Panel has recommended that commercial items be purchased solely under fixed price contracts, this section will have little or no applicability to commercial items as proposed. Should flexibly priced contracts be used to purchase commercial items, commercial sellers might have to be exempted from the detailed cost principles contained in this section because it would require changes to a commercial seller's established accounting system.	2.2

10 U.S.C. § 2384	Part 217.7300	No	Requires seller to mark supplies with name of seller, national stock number, and contractor part number; if seller is not the manufacturer, statute requires item to be marked with name of actual manufacturer. There is an exemption for commercial items purchased competitively or at an established catalog or market price.	Section 2384(b) contains an exemption for items sold under the market or catalog price exemption in TINA. This is not broad enough to accommodate all commercial items, so that an exemption to section 2384(b) is required to implement the Panel's commercial item approach and such an amendment has been recommended by the Panel. If 2384 (b) is amended as proposed, then there is no need for an exemption.	1.6
10 U.S.C. § 2397	252.203-7000		Prohibition on Compensation to Former DOD Employees	The Panel has recommended repeal. Reports intended to identify employees switching sides between DOD and major defense firms; useless paperwork burden in commercial context.	6.7
10 U.S.C. § 2397a	252.203-7000		Prohibition on Compensation to Former DOD Employees	The Panel has recommended repeal. Restrictions on job negotiations with defense contractors; duplication of other law and would unnecessarily burden commercial practices.	6.6
10 U.S.C. § 2397b	252.203-7000		Prohibition on Compensation to Former DOD Employees.	The Panel has recommended repeal. Forbids plant representatives and senior defense negotiators from working for major defense firms; cost of screening for occasional retirees would far exceed return for commercial sellers.	6.7
10 U.S.C. § 2397c	252.203-7000		Prohibition on Compensation to Former DOD Employees	The Panel has recommended repeal. Reports and penalties for the foregoing 2397 restrictions would have no independent purpose.	6.7
10 U.S.C. § 2406	252.215-7001	No	Contractor records; requires contractor to permit access to records relating to cost or pricing data under covered contracts, which are major weapons systems contracts where 10 U.S.C. § 2306a is applicable.	The Panel has proposed that section 2406 be repealed as part of consolidating all audit statutes into a revised version of 10 U.S.C. § 2313. If the Panel's proposal is not adopted, then an exemption would be required for commercial items.	2.3
10 U.S.C. § 2506	25.1 and 25.2	Yes	DOD variant of Buy American Act using component test to identify "American" product.	Application of current component-oriented Buy American Act restrictions to commercial buying may irrationally exclude items DOD wants to procure. If Buy American Act is modified as the Panel has recommended to include "substantial transformation" test, then should not be a problem.	7.1
41 U.S.C. §§ 10a-10d	25.1 and 25.2	Yes	Buy American Act	Applications of current component-oriented Buy American Act restrictions to commercial buying may irrationally exclude items DOD wants to procure. If Executive Order implementing Buy American Act is modified to include "substantial transformation" test or if Panel substitute is adopted, then should not be a problem.	7.1

41 U.S.C. § 422	52.230; 3-4	Yes	Cost Accounting Standards (CAS); Cost Accounting Standards Board (CASB).	Statute establishes Cost Accounting Standards Board and provides broad authority to the Board to promulgate regulations. 41 U.S.C. § 422(f)(2) exempts contracts and subcontracts based on established catalog or market prices (as defined in TTNA) from CAS coverage. This exemption should be broadened to include commercial items as defined in proposed section 2302. In addition, section 422(k) should be changed to clarify that it has no application to contracts for commercial items even though such items may be made by a company that must comply with CAS because it furnishes CAS-covered items as well as commercial items. The Panel has recommended that the CASB make modifications through its rule making functions since it has authority to create classes of exemptions. See generally Chapter 2, subchapter 2.4. If the CASB does not take such action, then an exemption would be required.	2.4
41 U.S.C. § 423	52.203-8;-9;-10	No	Procurement Integrity Act -- Requirement for certificate of procurement integrity.	The certifications required by this section cannot be imposed without a major administrative burden of tracking all procurement integrity restrictions, which are totally inconsistent with commercial practices and should not apply. The Panel has recommended as its primary recommendation that this statute be repealed and replaced by totally new language and that its fundamental prohibition on the improper use of private information be incorporated in this section and in 18 U.S.C. § 207. If that proposal is adopted, there would be no need for an exemption from either the new section 423 or the proposed section 207	6.9

### 8.3.5.2. Rules of Construction

A rule of construction is established by section 2xx3(b) to prevent inadvertent repeal of portions of the commercial acquisition statutes by subsequent legislation:

(b) PRINCIPLE OF CONSTRUCTION WITH FUTURE LAWS. -- The provisions of this subchapter are intended to be an integrated whole. Accordingly, to prevent inadvertent amendment or repeal of a portion of this subchapter and notwithstanding any other provision of law hereafter enacted, this subchapter and the sections of the United States Code expressly referenced in this subchapter shall not be held to have been amended unless a law specifically refers to and amends this subchapter or the sections of the United States Code expressly referenced herein.

Congress will pass socioeconomic and acquisition legislation for years to come, and there is little doubt that legislative draftsmen will fail to remember in all cases to consider the impact of

such legislation on commercial item acquisition. Accordingly, to prevent a build-up of further barriers to commercial item acquisition, no legislation passed after the date of passage of the proposed commercial item legislation should apply to the acquisition of commercial items unless specific consideration is given to the impact of that legislation on commercial item acquisition. Thus, section 2xx3(b) provides that unless subsequent legislation specifically refers to or amends the proposed commercial item subchapter or one of the statutes incorporated by reference into it, the courts shall not construe the commercial items statute to have been amended. The proposed language is modeled on 25 U.S.C. § 2511(d).

#### **8.3.5.3. Set-Asides and Simplified Purchase Procedures**

Section 2xx3 provides that commercial-style practices take precedence over conflicting simplified procedures established under 10 U.S.C. § 2304(g) and that nothing in the commercial item chapter will prevent set-asides under, for example, 15 U.S.C. § 644(j) (small-business small-purchase preference) or the minority small business program administered under section 8(a) of the Small Business Act

(c) **RELATION TO SIMPLIFIED PROCEDURES.** – When commercial items are being procured, the provisions of this subchapter, and regulations issued hereunder, shall take precedence over any conflicting regulations issued pursuant to section 2304(g); provided, however, that nothing in this section shall affect the set-aside for small businesses established by 15 U.S.C. § 644(j).

(d) **SET-ASIDES PRESERVED.** – Nothing in this subchapter shall prevent the Secretary of Defense from restricting the award of prime contracts for commercial items to any source as may from time to time be prescribed or permitted by law.

On the first point, the Panel believes that commercial vendors should not have to face inconsistent sets of regulations. On the other hand, neither vendors nor DOD should be burdened with more procedures than would otherwise be required to make a small purchase. Accordingly, the Panel recommends that simplified purchase procedures be available for making commercial purchases so long as those procedures do not increase barriers to the use of commercial products. On the second point, while set-asides may reduce the opportunity for sales of commercial items, they do not create a barrier to the acquisition of commercial products acquired through other means and, if otherwise appropriate and authorized by statute, contracts for commercial items should be set aside for small, minority, and small disadvantaged businesses in accordance with present practice. The Secretary has authority under existing law and under section 2xx1(b) to establish regulations governing set-asides for commercial items to the extent that the law otherwise permits.

### **8.3.6. Specific Acquisition Procedures and Restrictions**

Specific acquisition procedures and restrictions are set out in a proposed section 2xx4, as follows:

#### **§ 2XX4. SPECIFIC ACQUISITION PROCEDURES AND RESTRICTIONS**

(a) **RESTRICTION TO FIRM, FIXED PRICE CONTRACTS.** – Except where commercial items are to be provided as a portion of a contract which also provides for the delivery of other than commercial items, only firm, fixed price contracts or fixed price contracts with economic price adjustment provisions shall be used to acquire commercial end items under this subchapter.

(b) **ECONOMIC PRICE ADJUSTMENT.** – Solicitations for commercial end items shall not require contract performance for a term longer than customary industry practice for the product to be acquired unless a contract provides for economic price adjustment.

(c) **PRODUCT DESCRIPTIONS.** – Commercial items shall be acquired using product descriptions as prescribed in section 2325 of this title. Notwithstanding the foregoing, nondevelopmental items and items supplied by an existing or prior source that are built to specific Government designs, military standards, or military specifications may be accepted where such items otherwise meet the requirements of a solicitation.

(d) **CONTRACT QUALITY REQUIREMENTS.** –

(1) To the maximum extent practical, regulations issued under this subchapter shall permit contractors providing commercial items to use their existing quality assurance systems and quality programs.

(2) To the maximum extent practical, regulations issued under this subchapter shall prohibit Government inspection or test of commercial items prior to tender of those items by the contractor for acceptance by the Government.

(e) **RIGHTS IN TECHNICAL DATA.** – Rights in technical data for commercial end items and components shall be acquired only as specified in section 2320.

(f) **DEFENSE TRADE RESTRICTIONS.** – Acquisition of commercial items from foreign sources shall be governed by Chapter 1XX of this Title.

In fashioning section 2xx4, the Panel drew on prior legislation, DFARS Part 211, its own research, and discussions with and comments from industry six specific restrictions on the form of regulations to be issued under proposed section 2xx1. These restrictions and their source in prior law (if any) are as follows:

Restriction	Source
1. Restriction to firm, fixed price contracts <sup>75</sup>	DFARS 211.7004-1(b)
2. Economic Price Adjustment	DFARS 211.7004-1(c)
3. Use of Product Descriptions	10 U.S.C. § 2325(a); DFARS 211.7004-1(d)
4. Restriction on quality assurance and inspection requirements	Public Law Number 101-189, § 824(b)(5); DFARS 211.7004-1(e), (f)
5. Rights in Technical Data	DFARS 211.7004-1(h)
6. Defense Trade Restrictions	DFARS Part 225

Rights in technical data applicable to commercial item procurements were developed by the Panel as part of its general recommendations on data rights, and are discussed in Chapter 5 of this Report. Defense trade restrictions were similarly the subject of the Panel's comprehensive revision of existing "Buy American" restrictions, which resulted in a proposed new chapter in Title 10 applicable to defense trade and cooperation.<sup>76</sup>

### 8.3.7. Pricing of Commercial Item Contracts; Audit; Remedies

The Panel was told repeatedly that companies which primarily sell to the commercial marketplace do not have accounting systems that will permit them to supply cost or pricing data as required by the Truth in Negotiation Act (10 U.S.C. § 2306a). Testimony received by the Panel and studies by, among others, the Office of Technology Assessment and CSIS, have found that because of the high cost of implementing a Government-specific accounting system, commercial companies will often forego doing business with DOD rather than implement a cost accounting system that would permit them to comply with TINA. Thus, if DOD is to be able to acquire commercial items for which there is not adequate price competition as that concept is currently defined in TINA and implementing regulations -- such as a modified commercial item or cutting-edge technology protected from direct competition by patent, copyright, or trade secret -- appropriate relief from TINA had to be found.

The Panel has recommended in Chapter 1.3 of this Report amendments to 10 U.S.C. § 2306a that (1) expand and clarify the exemption for adequate price competition when applied to

<sup>75</sup>One commentator noted that commercial items are sometimes delivered under contracts calling for a mix of commercial and defense-unique items. In this situation, proposed section 2xx4 (a) would lift the restriction to firm-fixed price contracts.

<sup>76</sup>See Chapter 7 of this Report.

items purchased from a business unit which produces the same or similar items for the commercial market using the same or similar production processes and (2) exempt certain contract modifications to contracts awarded under the expanded definition of adequate price competition and under catalog or market pricing. If adopted, these amendments will reduce, but not eliminate, the TINA-related impediments to purchases of commercial items. Therefore, the Panel believes that additional authority to require and use "documentation" -- a defined term that stops short of cost or pricing data -- to support price analysis for commercial items, including modifications to such items and modification to commercial item contracts, is necessary. Section 2xx5 of the proposed commercial item subchapter, discussed below, provides such authority and an appropriate exemption from TINA.

### **8.3.8. Pricing**

The Panel has proposed that pricing of commercial item contracts be made in accordance with a new section 2xx5(a), which provides as follows:

**(a) REQUIREMENT FOR DETERMINATION OF PRICE REASONABLENESS. --**

(1) When a procurement for a commercial item has been conducted under full and open competition as defined in section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. § 403(6)), or when the price agreed upon is based on established catalog or market prices of commercial items sold in substantial quantities to the general public, the contracting officer may presume that the price contained in the most advantageous evaluated offer (price and all other factors considered) received in response to a solicitation, or a price based on established catalog or market prices, is fair and reasonable unless the contracting officer has information that the price is not fair and reasonable. Prior to the award of a contract where price is based on catalog or market prices, the contracting officer shall make reasonable efforts to establish the currency and accuracy of such prices.

(2) When subsection (1) is not applicable, or for contract modifications, or when pricing a modification to a commercial item, the contracting officer shall use price analysis relying, if needed, on documentation submitted under subsection (b), to determine that the price is fair and reasonable.

(3) When the contracting officer is able to make a determination of price reasonableness under this section, the acquisition will be exempt from section 2306a of this Title.

The Panel believes that most commercial item acquisitions can be conducted through competition as defined in 10 U.S.C. §§ 2302 and 2304 and in section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. § 403(6)) or on the basis of established catalog or market prices as defined in FAR 15.804-3(c). In these cases, the proposed subsection provides that the contracting officer may presume that the price in the most advantageous offer,<sup>77</sup> or a price based on established catalog or market prices, is fair and reasonable absent information to the contrary. The proposed section does, however, require the contracting officer to perform some "due diligence" prior to award when the price is based on catalog or market prices.

Where competition or established catalog or market prices are not available, subsection 2xx5(a)(2) mandates that the contracting officer use price analysis to determine the reasonableness of a price. This provision recognizes the practical fact that most, if not all, companies selling commercial items will not have accounting systems that can produce data adequate for cost analysis or "cost or pricing data" as currently defined. The Panel also recognizes that there may be unusual circumstances in which the reasonableness of a proposed price cannot be established through price analysis as contemplated in section 2xx5. If this occurs, then under section 2xx5(a)(3), the provisions of TINA again apply to the acquisition. If at that point a contractor can meet whatever requirements TINA places on the acquisition -- possibly including certified cost or pricing data -- the transaction can go forward. The Panel emphasizes that under the combined authorities of the proposed section 2xx5 and TINA, a contract will not be awarded unless the Government can establish the reasonableness of the contract price by some reliable method, or an exemption is available.

### **8.3.9. Government's Right to Documentation**

As stated above, in what should be the majority of cases, there will be no need for the contracting officer to perform price analysis under section 2xx5(a)(2). However, in those cases in which price analysis is required, the best source of pricing information may well be from an offeror. Proposed subsection 2xx5(b) provides that the contracting officer can ask for such information to assist in making a price reasonableness determination:

#### **(b) GOVERNMENT'S RIGHT TO REQUIRE DOCUMENTATION. --**

(1) The contracting officer may require the offeror to supply documentation relevant to the determinations to be made under subsection (a)(2). All documentation received from an offeror, if not otherwise in the public domain and if requested by the offeror and marked as confidential, shall be treated by the Government as

---

<sup>77</sup>The price contained in the most advantageous offer is not necessarily the lowest price offered. Where a contracting officer in a competitive procurement has selected an offer with a price higher than the lowest offered, the contracting officer has necessarily compared the winning offer to the offer with the lowest price and has found that the extra cost is justified under the announced source selection criteria. In such circumstances, there is no apparent need for further price analysis to establish the reasonableness of the price in the winning offer, and the offer can be accepted.

confidential and exempt from disclosure to the extent permitted by the Freedom of Information Act.

(2) The rights conferred by this subsection do not include the right to require cost or pricing data as defined in section 2306a of this title, or the equivalent.

The Panel has intentionally referred to the information to be supplied by an offeror as "documentation" and not "data" to emphasize that subsection 2xx5(b) does *not* authorize the contracting officer to ask for cost or pricing data as defined in 10 U.S.C. § 2306a and its implementing regulations. What is intended is that the contracting officer can ask for information that an offeror may have on hand as part of its ordinary commercial operations. After discussions with industry, the Panel concluded that most vendors of commercial items can provide some form of documentation that would materially assist a contracting officer in determining that a price is reasonable using price analysis. The type of documentation will probably differ from contract to contract, from industry to industry, and from contractor to contractor. For example, a contractor might be able to give examples of recent sale prices, even though such prices would fall short of meeting the TINA exemption for established catalog or market prices.<sup>78</sup> Alternatively, a contractor might be able to demonstrate an established market price for a commercial item and provide that information along with an engineering estimate of the cost of modifying the item.

On the other hand, industry was adamant that it was frequently difficult, particularly in a large or far-flung organization, for an offeror to have sufficient information to be able to certify that documentation supplied was in fact representative of all sales by the offeror or that the price offered was the lowest offered to any commercial customer for sales on similar terms and conditions. The Panel believes that industry is correct on this point, and has expressly refrained from requiring any representation of any kind that documentation furnished is complete or that a price offered to the Government is the lowest offered to any other customer. Again, if an offeror is not willing to provide, or cannot provide, a sufficient basis for a determination of price reasonableness, and the contracting officer cannot find other information supporting a conclusion that a price is reasonable, the Government's remedy is to proceed under TINA or walk away from the transaction.

### **8.3.10. Government's Remedy for Inaccurate Documentation**

For the sake of parallel treatment to 10 U.S.C. § 2306a, the Panel has recommended a new subsection 2xx5(c), which creates a contract remedy applicable when an offeror "knowingly or negligently" provides inaccurate documentation:

(c) GOVERNMENT'S REMEDY FOR INACCURATE DOCUMENTATION. –  
When documentation is submitted pursuant to subsection (b), the Government shall be entitled to a reduction in price, and the return of any overpayment, with interest thereon, if an offeror knowingly

---

<sup>78</sup>See 10 U.S.C. § 2306a(b)(1)(B).

or negligently submits materially inaccurate or misleading documentation in support of a contract or modification, the contracting officer relies on such documentation in reaching a determination that a price is reasonable, and because of such reliance the price significantly exceeds that which would otherwise have been accepted. For purposes of applying this subsection, a contracting officer will be rebuttably presumed to have relied upon all material documentation supplied by an offeror.

This remedy is not intended to replace existing contract fraud remedies or criminal penalties for false claims and false statements.<sup>79</sup> Instead, it is provided because the Government should have no less a remedy than a private buyer when a contract price is based on fraud or negligent misrepresentation and in recognition of the fact that circumstances may make a contractual remedy more appropriate and useful than the full panoply of sanctions for fraud.<sup>80</sup>

### **8.3.11. Government's Right to Audit**

In order to make effective the Government's right to receive a price reduction for inaccurate documentation, the Panel has provided in subsection 2xx5(d) for access to the offeror's books and records in those situations in which documentation has been provided:

(d) GOVERNMENT'S RIGHT TO AUDIT. --The United States shall have the right to audit all documentation provided by an offeror under subsection (b) and all books and records of the offeror directly relating to such documentation; provided however, that if the offeror has made no representation as to the completeness of the documentation supplied, the United States shall have no right to audit for completeness. The audit right created by this section shall expire one year after the date of award of the contract or the date of the modification of a contract with respect to which documentation was provided. When contract price is established under section 2xx5 of this Title, the Government shall have no audit rights other than those set out in this subsection.

This subsection is intended to replace all other existing audit rights (including those in 10 U.S.C. §§ 2306a and 2313).<sup>81</sup> The Panel received testimony from industry that vendors of commercial items will not ordinarily for their own purposes retain the sort of documentation to be supplied under proposed subsection 2xx5(b) for any great length of time. Indeed, industry argued

<sup>79</sup>*E.g.*, 18 U.S.C. §§ 287 and 1001 and the Civil False Claims Act, 32 U.S.C. § 3279.

<sup>80</sup>GAO commented that the Panel should extend the right to renegotiate contract price to circumstances in which documentation is inaccurate through no fault of the offeror. The Panel rejected this suggestion as (a) inconsistent with private commercial law and (b) inconsistent with the thrust of the Panel's purpose of fostering civil-military integration by facilitating transactions based on existing commercial practices in which price-related data is not collected for the purpose of certifying accuracy to the Government. The massive criminal sanctions applicable to offerors should ensure reasonable care in making documentation submissions, and GAO has pointed to no documented need for strict civil liability to ensure that pricing is fair and reasonable.

<sup>81</sup>The Panel has recommended consolidating the audit rights currently found in 10 U.S.C. §§ 2306a, 2313, and 2406 into a consolidated, amended § 2313. See Chapter 2.3 of this Report.

that any audit right should terminate with award of a contract. On the other hand, the Defense Contract Audit Agency (DCAA) and GAO both commented that it would not be practical to audit a reasonable number of commercial item contracts if the audit right expired with award. GAO suggested that audit should be available up to three years after award or one year after final payment. The Panel believes that one year after award is a reasonable compromise between the needs of DOD and current industry practice, especially since the number of commercial item contracts awarded annually under subsection 2xx5(a)(2) should be small. Moreover, in many commercial items contracts, the period for audit permitted by subsection 2xx5(d) may not be very different from GAO's suggestion of one year after final payment. Absent a compelling demonstration by DCAA or GAO that audit resources cannot be made available within a year after award, the period available for audit should not be extended.

## **8.4. Proposed Statutory Provisions on Commercial Items**

### **8.4.1. Proposed Amendments to 10 U.S.C. § 2301**

It is therefore the policy of the Congress that –

\* \* \* \* \*

(2) to the maximum extent practicable, the Department of Defense shall acquire commercial items to meet its needs and shall require prime contractors and subcontractors, at all levels, which furnish other than commercial items, to incorporate to the maximum extent practicable commercial items as components of items being supplied to the Department;

(3) when commercial items and components are not available, practicable or cost effective, the Department shall acquire, and shall require prime contractors and subcontractors to incorporate, other nondevelopmental items and components to the maximum extent practicable;

\* \* \* \* \*

(8) the head of an agency shall use advance procurement planning and market research and state contract requirements in such a manner as is necessary to:

(i) obtain full and open competition with due regard to the nature of the property or services to be acquired;

(ii) facilitate the acquisition by the agency and its contractors of commercial items at or based on commercial market prices;

(iii) facilitate the acquisition by the agency and its contractors of nondevelopmental items in accordance with the requirements of this chapter; and

(iv) facilitate agency access to commercial technologies and the skills available in the commercial market place to develop new technologies.

(b) Further, it is the policy of Congress that procurement policies and procedures for the agencies named in section 2303 of this title shall in accordance with the requirements of this title--

\* \* \* \* \*

(5) promote the acquisition and use of commercial items and of other nondevelopmental items both as end items and components by

(i) encouraging contracting officers to exercise sound judgment in purchasing and facilitating the purchase by contractors of commercial items at or based on commercial market prices, without requiring contractors to incur additional costs;

(ii) avoiding the imposition of arbitrary restrictions or tests not required by law on the purchasing or pricing of commercial items; and

(6) promote the acquisition and use of commercial items and of other nondevelopmental items by requiring descriptions of agency requirements, whenever practicable, in terms of functions to be performed or performance required.

#### **8.4.2. Proposed Amendments to 10 U.S.C. § 2302**

In this chapter: . . .

(5) The term "commercial item" means --

(A) property, other than real property, which --

(i) is sold or licensed to the general public for other than Government purposes;

(ii) has not been sold or licensed to the general public, but is developed or is being developed primarily for use for other than Government purposes; or

(iii) is comprised of a combination of commercial items, or of services and commercial items, of the type customarily combined and sold in combination to the public;

(B) The term "commercial item" also includes services used to support items described in subparagraph (A), such as installation, maintenance, repair and training services, whether such services are procured with the commercial item or under a separate contract; provided such services are or will be offered contemporaneously to the general public under similar terms and conditions; and the Government and commercial services are or will be provided by the same workforce, plant, or equipment;

(C) With respect to a specific solicitation, an item meeting the criteria set forth in subparagraphs (A) and (B) if unmodified will be deemed to be a commercial item when modified for sale to the Government if the modifications required to meet Government requirements (i) are modifications of the type customarily provided in the commercial marketplace or (ii) would not significantly alter the inherent nongovernmental function or purpose of the item in order to meet the requirements or specifications of the procuring agency;

(D) An item meeting the criteria set forth in subparagraphs (A), (B), or (C) need not be deemed other than "commercial" merely because sales of such item to the general public for other than governmental use are a small portion of total sales of that item; and

(E) An item may be considered to meet the criteria in subparagraph (A) even though it is produced in response to a Government drawing or specification; provided, that the item is purchased from a company or business unit which ordinarily uses customer drawings or

specifications to produce similar items for the general public using the same workforce, plant, or equipment.

#### **8.4.3. Proposed Amendments to 10 U.S.C. § 2320(a)(3)**

(3) . . . the Secretary of Defense shall prescribe regulations for contracts for commercial items or components, where technical data is specified to be delivered by a contractor or subcontractor, which prohibit the Government from obtaining unlimited rights to technical data; provided, however, that unlimited rights may be obtained when necessary to the extent specified in paragraphs (a)(2)(C) and (D).

#### **8.4.4. Proposed Amendments to 10 U.S.C. § 2325**

The Secretary of Defense shall ensure that, to the maximum extent practicable--

(1) requirements of the Department of Defense with respect to a procurement of supplies are stated in terms of--

(A) functions to be performed;

(B) performance required; or

(C) essential physical characteristics;

(2) such requirements are defined so that commercial or nondevelopmental items may be procured to fulfill such requirements;

(3) such requirements are fulfilled through the procurement of commercial or nondevelopmental items; and

(4) prior to developing new specifications, the Department conducts market research to determine whether commercial or nondevelopmental items are available or could be modified to meet agency needs.

## **8.4.5. Proposed Amendments relating to Defense Trade and Cooperation**

### **§2x10. Definitions**

(a) As used in this subchapter, the following are defined terms—

(1) In this section, "American goods" means--

(A) an end product that is mined, produced, or manufactured in the United States;  
or

(B) an end product that is manufactured in the United States but which includes components mined, produced, or manufactured outside the United States if such end product is substantially transformed within the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed.

(2) "goods which are other than American goods" means an end product not meeting the requirements of subsection (a)(1).

### **§ 2x11. Policy on Purchases of Foreign Goods**

(a) Funds appropriated to the Department of Defense may not be obligated under a covered contract for procurement of goods which are other than American goods unless adequate consideration is given to the following: . . .

(3) The bids or proposals of all other firms in the United States which have offered to furnish American goods.

(4) The United States balance of payments.

(5) The cost of shipping goods which are other than American goods.

(6) Any duty, tariff, or surcharge which may enter into the cost of using goods which are other than American goods.

\* \* \* \* \*

(b) Consideration of the matters referred to in paragraphs (1) through (9) of subsection (a) shall be given in the manner set out in this Subchapter.

**§ 2x12. Items Restricted to American Sources**

(a) **AUTHORITY OF THE SECRETARY.** – The Secretary of Defense is hereby authorized to require the Department to acquire only American goods and related American services for specific items as the Secretary may find necessary to protect the United States national defense technology and industrial base or the United States mobilization base, or to further national security. The President may restrict or condition the authority granted by this subsection by Executive Order.

(b) **RESTRICTIONS ON ACQUISITION OF GOODS FROM COUNTRIES WHICH DISCRIMINATE AGAINST AMERICAN GOODS AND RELATED AMERICAN SERVICES.** – Section 10b-1 of Title 41 shall apply to the Department of Defense except that section shall have no application to the acquisition of commercial items and components as defined in 10 U.S.C. §§ 2302(5) and 2xx2 or to contracts the value of which is below the simplified acquisition threshold defined in 10 U.S.C. § 2302(7).

## **8.4.6. Proposed New Subchapter to Title 10**

### **§ 2XX1. POLICY**

**(a) REQUIRED USE OF COMMERCIAL ITEMS.** – In accordance with the policies stated in section 2301, whenever commercial items will satisfy the needs of the Department of Defense, the Department

(1) shall purchase commercial items using those practices prescribed in this subchapter and in regulations issued hereunder and

(2) shall by regulation require prime contractors, and subcontractors at all levels, that furnish other than commercial items, to incorporate commercial items as components to the maximum extent practicable.

**(b) REGULATIONS; UNIFORM TERMS AND CONDITIONS.**

(1) **END ITEMS.** – The Secretary of Defense shall promulgate regulations implementing this subchapter, which shall contain a set or sets of uniform terms and conditions to be included in contracts for the acquisition of commercial end items. Such uniform terms and conditions shall be modeled to the maximum extent practicable on commercial terms and conditions and shall include only those contract clauses, including clauses requiring terms and conditions to be flowed down to subcontractors, that are–

(A) required to implement provisions of law applicable to commercial item acquisitions;

(B) essential for the protection of the Federal Government's interest in an acquisition; or

(C) determined by the Secretary to be consistent with standard commercial practice.

The regulations to be issued hereunder shall also establish standards and procedures for waiving such uniform terms or conditions, other than those required by statute, as may be useful to the acquisition of commercial items in a particular procurement or class of procurements.

(2) **COMPONENTS.** – The Secretary of Defense shall issue regulations implementing the preference for commercial components set out in section 2301(b)(5). Such regulations shall provide that prime contractors and subcontractors furnishing other than commercial items as end items or components may not require suppliers furnishing commercial items as components to comply with any clause, term or condition except those–

(A) required to implement provisions of law applicable to subcontractors furnishing commercial items;

(B) essential for the protection of the prime contractor or higher tier subcontractor in a particular acquisition; or

(C) determined to be consistent with standard commercial practice.

**(c) EXISTING OR PRIOR SOURCES; NONDEVELOPMENTAL ITEMS. -**

(1) The Secretary of Defense, the Secretary of a military department or the head of a defense agency may determine that it is in the Government's interests to permit existing or prior sources or suppliers of nondevelopmental items to participate in a competition for a commercial item when a nondevelopmental item or an item furnished by an existing or prior source will compete with a commercial item under the same terms, conditions and evaluation and award criteria.

(2) Nondevelopmental items or items furnished by an existing or prior source which must be modified to meet the requirements of a solicitation for commercial items may be offered under such a solicitation, but only when the modifications are (A) necessary to comply with the Government's solicitation requirements and (B) do not alter the function or essential physical characteristics of the items to be supplied.

(3) The policies, procedures, solicitation provisions and contract clauses applicable to commercial items under this subchapter shall also apply to nondevelopmental items and items furnished by an existing or prior source which are permitted to participate in a competition conducted under this title.

**§ 2XX2. DEFINITIONS**

As used in this subchapter-

(a) "Commercial item" has the meaning prescribed in section 2302(5).

(b) "Component" means any item supplied to the Government as part of an end item or of another component.

(c) "Existing or prior source" means a business entity that is furnishing or has previously furnished items to the Government, including items supplied in accordance with Government-unique product descriptions, drawings, or specifications.

(d) "Nondevelopmental item" has the meaning prescribed in section 2302(6).

### **§ 2XX3. PRECEDENCE; RELATIONS TO OTHER LAWS**

(a) **EXEMPTIONS FROM PRESENT LAW.**—Procurements of commercial items shall not be subject to the following laws:

10 U.S.C. § 2393  
10 U.S.C. § 2402  
10 U.S.C. § 2408  
10 U.S.C. § 2507  
10 U.S.C. § 2631  
15 U.S.C. §§ 637(d)(4), 637(d)(5), 637(d)(6)  
15 U.S.C. §§ 644(d), 644(e), 644(f)  
29 U.S.C. § 793  
31 U.S.C. § 1352 note  
38 U.S.C. § 4212  
41 U.S.C. §§ 51-58  
41 U.S.C. § 701  
46 U.S.C. App. § 1241(b)

(b) **PRINCIPLE OF CONSTRUCTION WITH FUTURE LAWS.** – The provisions of this subchapter are intended to be an integrated whole. Accordingly, to prevent inadvertent amendment or repeal of a portion of this subchapter and notwithstanding any other provision of law hereafter enacted, this subchapter and the sections of the United States Code expressly referenced in this subchapter shall not be held to have been amended unless a law specifically refers to and amends this subchapter or the sections of the United States Code expressly referenced herein.

(c) **RELATION TO SIMPLIFIED PROCEDURES.** – When commercial items are being procured, the provisions of this subchapter, and regulations issued hereunder, shall take precedence over regulations issued pursuant to section 2304(g); provided, however, that nothing in this section shall affect the set-aside for small businesses established by 15 U.S.C. § 644(j).

(d) **SET-ASIDES PRESERVED.** – Nothing in this subchapter shall prevent the Secretary of Defense from restricting the award of prime contracts for commercial items to any source as may from time to time be prescribed or permitted by law.

### **§ 2XX4. SPECIFIC ACQUISITION PROCEDURES AND RESTRICTIONS**

(a) **RESTRICTION TO FIRM, FIXED PRICE CONTRACTS.** – Except where commercial items are to be provided as a portion of a contract which also provides for the delivery of other than commercial items, only firm, fixed price contracts or fixed price contracts with economic price adjustment provisions shall be used to acquire commercial end items under this subchapter.

(b) **ECONOMIC PRICE ADJUSTMENT.** – Solicitations for commercial end items shall not require contract performance for a term longer than customary industry practice for the product to be acquired unless a contract provides for economic price adjustment.

(c) **PRODUCT DESCRIPTIONS.** – Commercial items shall be acquired using product descriptions as prescribed in section 2325 of this title. Notwithstanding the foregoing, nondevelopmental items and items supplied by an existing or prior source that are built to specific Government designs, military standards, or military specifications may be accepted where such items otherwise meet the requirements of a solicitation.

(d) **CONTRACT QUALITY REQUIREMENTS.** –

(1) To the maximum extent practical, regulations issued under this subchapter shall permit contractors providing commercial items to use their existing quality assurance systems and quality programs.

(2) To the maximum extent practical, regulations issued under this subchapter shall prohibit Government inspection or test of commercial items prior to tender of those items by the contractor for acceptance by the Government.

(e) **RIGHTS IN TECHNICAL DATA.** – Rights in technical data for commercial end items and components shall be acquired only as specified in section 2320.

(f) **DEFENSE TRADE RESTRICTIONS.** – Acquisition of commercial items from foreign sources shall be governed by Chapter 1XX of this Title.

#### **§ 2XX5. PRICING; DOCUMENTATION; AUDIT**

(a) **REQUIREMENT FOR DETERMINATION OF PRICE REASONABLENESS.** --

(1) When a procurement for a commercial item has been conducted under full and open competition as defined in section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. § 403(6)), or when the price agreed upon is based on established catalog or market prices of commercial items sold in substantial quantities to the general public, the contracting officer may presume that the price contained in the most advantageous evaluated offer (price and all other factors considered) received in response to a solicitation, or a price based on established catalog or market prices, is fair and reasonable unless the contracting officer has information that the price is not fair and reasonable. Prior to the award of a contract where price is based on catalog or market prices, the contracting officer shall make reasonable efforts to establish the currency and accuracy of such prices.

(2) When subsection (1) is not applicable, or for contract modifications, or when pricing a modification to a commercial item, the contracting officer shall use price analysis relying, if needed, on documentation submitted under subsection (b), to determine that the price is fair and reasonable.

(3) When the contracting officer is able to make a determination of price reasonableness under this section, the acquisition will be exempt from section 2306a of this Title.

**(b) GOVERNMENT'S RIGHT TO REQUIRE DOCUMENTATION. —**

(1) The contracting officer may require the offeror to supply documentation relevant to the determinations to be made under subsection (a)(2). All documentation received from an offeror, if not otherwise in the public domain and if requested by the offeror and marked as confidential, shall be treated by the Government as confidential and exempt from disclosure to the extent permitted by the Freedom of Information Act.

(2) The rights conferred by this subsection do not include the right to require cost or pricing data as defined in section 2306a of this title, or the equivalent.

**(c) GOVERNMENT'S REMEDY FOR INACCURATE DOCUMENTATION. —** When documentation is submitted pursuant to subsection (b), the Government shall be entitled to a reduction in price, and the return of any overpayment, with interest thereon, if an offeror knowingly or negligently submits materially inaccurate or misleading documentation in support of a contract or modification, the contracting officer relies on such documentation in reaching a determination that a price is reasonable, and because of such reliance the price significantly exceeds that which would otherwise have been accepted. For purposes of applying this subsection, a contracting officer will be rebuttably presumed to have relied upon all material documentation supplied by an offeror.

**(d) GOVERNMENT'S RIGHT TO AUDIT. —** The United States shall have the right to audit all documentation provided by an offeror under subsection (b) and all books and records of the offeror directly relating to such documentation; provided however, that if the offeror has made no representation as to the completeness of the documentation supplied, the United States shall have no right to audit for completeness. The audit right created by this section shall expire one year after the date of award of the contract or the date of the modification of a contract with respect to which documentation was provided. When contract price is established under section 2xx5 of this Title, the Government shall have no audit rights other than those set out in this subsection.

## APPENDIX B

### Tracking System for Regulatory Implementation of Statutes

**The FAR System should cite the statutes which they implement; and**

**The FAR System should contain an index showing where each statute is implemented in the regulations.**

In preparing this Report, and in particular the sections titled, "Law in Practice," the Panel and staff found it difficult and time consuming to trace where and how the various statutes were implemented in the FAR and DFARS. No comprehensive tool exists to aid this process. The methodology generally employed was a manual and computer-assisted search of the regulations, sometimes supplemented by telephone calls to acquisition personnel who had expertise with certain issues and most likely would know if and where regulatory coverage of those issues existed. Undoubtedly, acquisition personnel in Government and industry alike must resort to similar tactics when endeavoring to ensure compliance with particular laws. Such methodologies consume far too many scarce resources in our increasingly competitive business environment; moreover, they are highly susceptible to error. Where the FAR and DFARS cited the statutes which they implemented, the task was markedly easier.

The Panel recommends adding two tools to the FAR system to alleviate the problem just described. First, the regulations should, to the maximum extent practicable, contain a citation to the statute or statutes which the regulations are implementing. The Panel is aware of, and applauds, the recent initiative to make such citations in the DFARS, and that there are currently significant citations in the FAR; however, the Panel believes that this discipline should be applied throughout the entire FAR system. This tool will facilitate tracing regulations back to their statutory sources.

The second tool will aid tracing statutes down to the implementing regulations. The FAR should contain a cross-referencing index which lists, in the order of increasing title and section numbers all of the significant statutes which impact federal procurement. The index would indicate which regulations implemented those statutes. Sufficient statutory authority exists at 41 U.S.C. § 421 for the Federal Acquisition Regulatory Council to make the necessary changes to the regulations.

The Panel recognizes that it will take considerable effort to conform the existing regulations to the Panel's recommendation. For that reason, the initial effort should be prospective. However, the task will be aided by the correlation of statutes and regulations in the "Law in Practice" sections of this Report. Because the Report will never be more helpful to the creation of the two tools than now, the Panel recommends that efforts to implement these tools begin immediately.

The effort to maintain the two tools once the regulations are conformed will be *de minimus*. This would not have been true a decade ago, prior to the widespread use of microcomputers. However, today's technology will make it a simple matter to reference the law in the implementing regulation and to modify the index when a law affecting procurement is passed.

This recommendation is consistent with the Panel's charter: an index and reference in the regulations will aid future streamlining efforts. For example, when a statute is repealed, recodified, or amended, the needed regulatory change will be easily identified and accommodated. In addition, where a regulation implements more than one statute, printing this fact in the regulation may prompt inquiry into whether the statutes should be consolidated or otherwise amended to avoid unnecessary duplication.

This proposed recommendation is also consistent with two of the Panel's objectives. Placing an index in the regulations and identifying the correlation between regulations and the statutes they implement will help educate all Government and industry personnel engaged in the acquisition process and thereby encourage their exercise of sound judgment. It will also reduce the burden on all Government and industry acquisition personnel in verifying that all relevant statutes and regulations are complied with.

## APPENDIX C

### DOMESTIC SOURCE RESTRICTIONS AND PRODUCT PREFERENCES

#### C.1. Introduction

A working group of the Panel was assigned to review all domestic source restrictions. Since such restrictions have historically been placed in provisions of annual appropriations and authorization acts, the past 15 years of defense authorization and appropriation acts were reviewed for provisions that might contain source restrictions and product preferences. In addition, the Panel reviewed an exhaustive report issued by the Secretary of Defense to the Congress in 1989 concerning "The Impact of Buy American Restrictions Affecting Defense Procurement." The Report contained a compilation of domestic source restrictions accompanied by case studies of both Congressionally and DOD mandated restrictions.

Ultimately the Panel decided to recommend that no source restriction be retained except those that had been codified into various titles of the United States Code because, among other things, the Panel recommends that source restrictions be accomplished by DOD regulation and not by statute. See proposed section 2x12 in Chapter 7.4 of this Report. As a result of this decision, the Panel also opted to remove the legislative background discussion for most source restrictions to this Appendix, since this material was no longer of major importance to Chapter 7, but might be of historical significance to others interested in the history of DOD acquisition statutes. The next section (C.2) is the legislative background discussion; while Section C.3 is a summary table of the Congressionally Mandated Domestic Source Restrictions. These two sections are derivatives of the 1989 SECDEF report and a compilation of the work of the Panel staff. The material presented here is current through the passage of Public Law 102-484, the National Defense Authorization Act for Fiscal Year 1993.

## **C.2. Legislative Background of Congressionally Mandated Domestic Source Restrictions**

### **120MM MORTARS AND AMMUNITION Legislative Background**

#### **99th Congress**

December 19, 1985: President Reagan signed Pub. L. No. 99-190, the FY86 Department of Defense Appropriations Act, containing the following section:

Sec. 8095. None of the funds in this Act may be obligated for procurement of 120mm mortars or 120mm mortar ammunition manufactured outside of the United States: Provided, That this limitation shall not apply to procurement of such mortars or ammunition required for testing, evaluation, type classification or equipping the Army's Ninth Infantry Division (Motorized).

July 2, 1986: President Reagan signed Pub. L. No. 99-349, the Urgent Supplemental Appropriations Act, 1986, containing the following provision:

**SEC. 5. REVISION OF CERTAIN PROVISIONS OF PUBLIC LAW 99-190.**

(c) 120mm Mortar - Of the funds appropriated in the Department of Defense Appropriations Act 1986, for procurement of the 120mm mortar, obligations, and expenditures may be incurred only in accordance with the requirements set forth in House Report 99-235 and section 8095 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190).

The same language appearing in Pub. L. No. 99-190, Sec. 8095 appeared in Pub. L. No. 99-591, the FY87 DOD Appropriations Act, signed October 30, 1986.

#### **100th Congress**

December 22, 1987: President Reagan signed Pub. L. No. 100-202, FY88 Department of Defense Appropriations Act, with the following section:

Sec. 8077. None of the funds appropriated in this Act to the Department of the Army may be obligated for procurement of 120mm mortars or 120mm mortar ammunition manufactured outside of the United States: Provided, That this limitation shall

not apply to procurement of such mortars or ammunition required for testing, evaluation, type classification or equipping the Army's Ninth Infantry Division (Motorized).

The same language appearing in Pub. L. No. 100-202, section 8077 appeared in Pub. L. No. 100-463, section 8064, the FY89 DOD Appropriations Act, signed October 1, 1988.

## **SDI CONTRACTS** Legislative Background

### **99th Congress**

December 19, 1985: President Reagan signed Pub. L. No. 99-190, the FY86 Department of Defense Appropriations Act, containing the following section:

Sec. 8108. No funds appropriated under this Act for the Strategic Defense Initiative Program shall be earmarked by any agency of the United States Government or any contractor exclusively for contracts with non-United States contractors, subcontractors, or vendors, or exclusively for consortia containing non-United States contractors, subcontractors, vendors, prior to source selection in order to meet a specific quota or allocation of funds to any allied nation. Furthermore, it is the sense of the Congress that, whenever possible, the Secretary of Defense and others should attempt to award Strategic Defense Initiative contracts to United States contractors, subcontractors, and vendors unless such awards would degrade the likely results obtained from such contracts: Provided, That allied nations should be encouraged to participate in the Strategic Defense Initiative research effort on a competitive basis and be awarded contracts on the basis of technical merit.

The same language appearing in Pub. L. No. 99-190, appeared in Pub. L. No. 99-591, the FY87 DOD Appropriations Act, section 9088, signed October 30, 1986. However, the provision was not in either the FY88 or FY89 DOD Appropriations Acts.

### **100th Congress**

December 4, 1987: President Reagan signed Pub. L. No. 100-180, the FY88 and 89 National Defense Authorization Acts containing the following section:

SEC. 222. PROHIBITION OF CERTAIN CONTRACTS  
WITH FOREIGN ENTITIES.

(a) SDI contracts With Foreign Entities-Funds appropriated to or for the use of the Department of Defense may not be used for the purpose of entering into or carrying out any contract with a foreign government or a foreign firm if the contract provides for the conduct of research, development, testing, or evaluation in connection with the Strategic Defense Initiative program.

(b) Temporary Suspension of Prohibition Upon Certification of the Secretary of Defense.--The prohibition in subsection (a) shall not apply to a contract in any fiscal year if the Secretary of Defense certifies to Congress in writing at any time during such fiscal year that the research, development, testing, or evaluation to be performed under such contract cannot be competently performed by a United States firm at a price equal to or less than the price at which the research, development, test, or evaluation would be performed by a foreign firm.

(c) Exceptions for Certain Contracts-The prohibition in subsection (a) shall not apply to a contract awarded to a foreign government or foreign firm if--

(1) the contract is to be performed within the United States;

(2) the contract is exclusively for research, development, test, or evaluation in connection with antitactical ballistic missile systems; or

(3) that foreign government or foreign firm agrees to share a substantial portion of the total contract cost.

(d) Definitions.-- In this section:

(1) The term "foreign firm" means a business entity owned or controlled by one or more foreign nationals or a business entity in which more than 50 percent of the stock is owned or controlled by one or more foreign nationals.

(2) The term "United States firm" means a business entity other than a foreign firm.

(e) Transition.-- The prohibition in subsection (a) shall not apply to a contract entered into before the date of the enactment of this Act.

## **REPAIR AND MAINTENANCE OF NAVAL VESSELS**

### **Legislative Background**

**99th Congress**

October 30, 1986: President Reagan signed Pub. L. No. 99-591, the FY87 Department of Defense Appropriations Act, containing the following section:

Sec. 9101. No naval or any vessel owned and operated by the Department of Defense home ported in the United States may be overhauled, repaired, or maintained in a foreign owned and operated shipyard located outside the United States, except for voyage repairs.

The same language in Pub. L. No. 99-591, section 9101, is contained in every DOD Appropriations Act through FY89.

### **100th Congress**

September 29, 1988: President Reagan signed Pub. L. No. 100-456, the FY89 National Defense Authorization Act, containing the following section:

#### **SEC. 1224. LIMITATION ON REPAIR OF NAVAL VESSELS IN FOREIGN SHIPYARDS**

(a) In General. - Section 7309 of title 10, United States Code, is amended by adding at the end of the following new subsection:

"(c)(1) A naval vessel (or any other vessel under the jurisdiction of the Secretary of the Navy) the home port of which is in the United States may not be overhauled, repaired, or maintained in a shipyard outside the United States.

"(2) Paragraph (1) does not apply in the case of the voyage repairs."

(b) Clerical Amendments. - (1) The heading of that section is amended to read as follows:

"Sec. 7309. Restrictions on construction or repair of vessels in foreign shipyards."

(2) The item relating to such section in the table of sections at the beginning of chapter 633 of such title is amended to read as follows:

"7309. Restrictions on construction or repair of vessels in foreign shipyards."

(c) Effective Date. - Subsection (c) of section 7309 of title 10, United States Code, as added by subsection (a), shall apply with respect to any contract for overhaul, repair, or maintenance of a vessel that is entered into after the end of the 30-day period beginning on the date of the enactment of this Act.

### **101st Congress**

Pub. L. No. 101-511 - Nov. 5, 1990

Sec. 8043: None of the funds available to the Department of the Navy, may be used to enter into any contract for the overhaul, repair, or maintenance of any naval vessel home ported on the West Coast of the United States which includes charges for interport differential as an evaluation factor for award.

## **102d Congress**

Pub. L. No. 102-484 – Oct. 22, 1992

Sec. 1012: Section 7309 of Title 10, United States Code, is amended by adding at the end the following new subsection:

(e) In the case of a naval vessel the homeport of which is not in the United States (or a territory of the United States), the Secretary of the Navy may not during the 15-month period preceding the planned reassignment of the vessel to a homeport in the United States (or a territory of the United States) begin any work for the overhaul, repair, or maintenance of the vessel that is scheduled to be for a period of more than six months.

## **VALVES AND MACHINE TOOLS**

### **Legislative Background**

## **99th Congress**

October 30, 1986: President Reagan signed Pub. L. No. 99-591, the FY87 Department of Defense Appropriations Act, containing the following section:

Sec. 9188.(a) None of the funds made available by this Act to the Department of Defense may be used to procure the Federal Supply Classes of machine tools set forth in subsection (b) of this section, for use in any government-owned facility or property under control of the Department of Defense, which machine tools were not manufactured in the United States or Canada.

(b) The procurement restrictions contained in subsection (a) shall apply to Federal Supply Classes of metal working machinery in categories numbers 3408, 3410-3419, 3426, 3433, 3441-3443, 3446, 3448, 3449, 3460, and 3461.

(c) When adequate domestic supplies of the classifications of machine tools identified in subsection (b) are not available to meeting Department of Defense requirements on a timely basis, the procurement restrictions contained in subsection (a) may be waived on a case by case basis by the Secretary of the Service Branch responsible for the procurement.

(d) Subsection (a) shall not apply to contracts which are binding as of the date of enactment of this Act.

### **100th Congress**

The same provision in Pub. L. No. 99-591 was also contained in Pub. L. No. 100-202, the FY88 DOD Appropriations Act, section 8085, signed December 22, 1987.

September 28, 1988: President Reagan signed Pub. L. No. 100-456, the National Defense Authorization Act, containing the following section:

#### **SEC. 822. SOURCE FOR PROCUREMENT OF CERTAIN VALVES AND MACHINE TOOLS**

Section 2507 of title 10, United States Code, as redesigned by section 821, is amended by adding at the end the following new subsection:

"(d) Valves and Machine Tools.

(1) During fiscal years 1989, 1990, and 1991, funds appropriated or otherwise made available to the Department of Defense may not be used to enter into a contract for the procurement of items described in paragraph (2) that are not manufactured in the United States or Canada.

"(2) Items covered by paragraph (1) are the following:

"(A) Powered and non-powered valves in Federal Supply Classes 4810 and 4820 used in piping for naval surface ships and submarines.

"(B) MACHINE TOOLS IN THE FEDERAL SUPPLY CLASSES for metal-working machinery numbered 3405, 3408, 3410 through 3419, 3426, 3433, 3438, 3441 through 3443, 3446, 3448, 3460, and 3461.

"(3) The Secretary of Defense may waive the requirement of paragraph (1) with respect to the procurement of an item if the Secretary determines that any of the following apply with respect to that item:

"(A) The restriction would cause unreasonable costs or delays to be incurred.

"(B) United States producers of the item would not be jeopardized by competition from a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.

"(C) Satisfactory quality items manufactured in the United States or Canada are not available.

"(D) The restriction would impede cooperative programs entered into between the Department of Defense and a foreign country and that country does not discriminate against defense items produced in the United States to a greater degree than the United States discriminates against defense items produced in that country.

"(E) The procurement is for an amount less than \$25,000 and simplified small purchase procedures are being used

"(F) The restriction would result in the existence of only one United States or Canadian source for the item.

"(4) The provisions of this section may be renewed with respect to any item by the Secretary of Defense at the end of fiscal year 1991 for an additional two fiscal years if the Secretary determines that a continued restriction on that item is in the national security interest."

October 1, 1988: President Reagan signed Pub. L. No. 100-463, the FY89 Department of Defense Appropriations Act containing the following section:

Sec. 8069. (a) None of the funds made available by this Act to the Department of Defense may be used to procure the Federal Supply Classes of machine tools set forth in subsection (b) if this section, for use in any government-owned facility or property under control of the Department of Defense, which machine tools were not manufactured in the United States or Canada.

(b) The procurement restrictions contained in subsection (a) shall apply to Federal Supply Classes of metal working machinery in categories numbered 3405, 3408, 3410-3419, 3426, 3433, 3438, 3441-3443, 3445, 3446, 3448, 3449, 3460, and 3461.

(c) When adequate domestic supplies of the classifications of machine tools identified in subsection (b) are not available to meet Department of Defense requirements on a timely basis, the procurement restrictions contained in subsection (a) may be waived on a case by case basis by the Secretary of the Service Branch responsible for the procurement.

(d) Subsection (a) shall not apply to contracts which are binding as of the date of enactment of this Act.

Supporting Materials:

H.R. Rep. No. 100-753, pp. 103-04.

102nd Congress

Pub. L. No. 102-190, §834

(a) EXTENSION THROUGH FISCAL YEAR 1996. Section 2507(d) of title 10, United States Code is amended in paragraph (1) by striking out "During fiscal years 1989, 1990, and 1991," and inserting in lieu thereof "Effective through fiscal year 1996,".

(b) APPLICABILITY. Such section is further amended

(1) by striking out paragraph (4);

(2) by redesignating paragraph (3) as paragraph (5); and

(3) by inserting the following new paragraphs after paragraph (2):

"(3) Contracts covered by paragraph (1) include the following:

"(A) Contracts for the procurement of items described in paragraph (2) for use in any property under the control of the Department of Defense, including government-owned, contractor-operated facilities.

"(B) Contracts entered into by contractors on behalf of the Department of Defense for the procurement of items described in paragraph (2) for the purposes of providing the items to other contractors as Government-furnished equipment.

"(4) In any case in which a contract subject to the requirement of paragraph (1) includes the procurement of more than one Federal Supply Class of machine tools of machine tools and accessories described in paragraph (2), each supply class shall be evaluated separately for purposes of determining whether the limitation in this subsection applies."

## **AIR CIRCUIT BREAKERS**

### **Legislative Background**

#### **100th Congress**

September 28, 1988: President Reagan signed Pub. L. No. 100-456, the National Defense Authorization Act, containing the following section:

Section 2507 of title 10, United States Code, as redesigned by section 821, is amended by adding at the end the following new subsection:

"(f) AIR CIRCUIT BREAKERS .--

(1) The Secretary of Defense may not procure air circuit breakers for naval vessels unless--

(A) the air circuit breakers are produced or manufactured in the United States; and

(B) substantially all of the components of the air circuit breakers are produced or manufactured in the United States.

(2) For purposes of paragraph (1)(B), substantially all of the components of air circuit breakers shall be considered to be

produced or manufactured in the United States if the aggregate cost of the components produced or manufactured in the United States exceeds the aggregate cost of the components produced or manufactured outside the United States.

(3) Paragraph (1) does not prevent the procurement of spares and repair parts needed to support air circuit breakers produced or manufactured outside the United States.

(4) The Secretary of Defense may waive the limitation in paragraph (1) on a case-by- case basis with respect to any procurement if the Secretary determines that carrying out a proposed procurement in accordance with the limitation in that case--

(A) is not in the national security interests of the United States;

(B) will have an adverse effect on a United States company; or

(C) will result in procurement from a United States company that, with respect to the sale of air circuit breakers, fails to comply with applicable Government procurement regulations or the antitrust laws of the United States.

(5) Whenever the Secretary proposes to grant a waiver under paragraph (4), the Secretary shall submit a notice of the proposed waiver, together with a statement of the reasons for the proposed waiver, to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives. The waiver may then be granted only after the end of the 30-day period beginning on the date on which the notice is received by those committees."

## **ANCHOR AND MOORING CHAIN**

### **Legislative Background**

#### **100th Congress**

December 22, 1987: President Reagan signed Pub. L. No. 100-202, FY88 Department of Defense Appropriations Act, with the following section:

Sec. 8125.(a) None of the funds available to the Department of Defense may be used for procurement of welded shipboard anchor chain and mooring chain (of all types four or less inches in diameter) manufactured outside of the United States or Canada.

(b) When adequate domestic supplies of welded shipboard anchor chain and mooring chair (of all types four or less inches in diameter) are not available to meet Department of Defense requirements on a

timely basis, the procurement restrictions contained in subsection (a) may be waived on a case-by-case basis by the Secretary of the Service responsible for the procurement.

October 1, 1988: President Reagan signed Pub. L. No. 100-463, the FY89 Department of Defense Appropriations Act containing the following section:

Sec. 8089. None of the funds in this Act may be available for the purchase by the Department of Defense (and its departments and agencies) of welded shipboard anchor and mooring chain 4 inches in diameter and under manufactured outside the United States.

### **101st Congress**

Pub. L. No. 101-165, § 9051

Pub. L. No. 101-511 – Nov. 5, 1990

Sec. 8041. None of the funds in this Act may be available for the purchase by the Department of Defense (and its departments and agencies) of welded shipboard anchor and mooring chain 4 inches in diameter and under unless the anchor and mooring chain are manufactured in the United States from components which are substantially manufactured in the United States: Provided, That for the purpose of this section manufactured will include cutting, heat treating, quality control, testing of chain and welding (including the forging and shot blasting process): Provided further, That for the purpose of this section substantially all of the components of anchor and mooring chain shall be considered to be produced or manufactured in the United States exceeds the aggregate cost of the components produced or manufactured outside the United States: Provided further, That when adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis, the Secretary of the service responsible for the procurement may waive this restriction on a case-by-case basis by certifying in writing to the Committees on Appropriations that such an acquisition must be made in order to acquire capability for national security purposes.

### **CERTAIN CHEMICAL WEAPONS ANTIDOTE** Legislative Background

### **100th Congress**

December 4, 1987: President Reagan signed Pub. L. No. 100-180, the FY88 and 89 National Defense Authorization Act, containing the following section:

**SEC. 124. LIMITATION ON PROCUREMENT OF CERTAIN  
CHEMICAL WEAPONS ANTIDOTE**

(a) Limitation. -- Section 2400 of title 10, United States Code, is amended--

(1) by inserting "(a) Buses.-- "before "Funds appropriated";  
and

(2) by adding at the end the following:

"(b) Chemical Weapons Antidote Manufactured Overseas.--Funds appropriated to the Department of Defense may not be used for the procurement of chemical weapons antidote contained in automatic injectors (or for the procurement of the components for such injectors) determined to be critical under the Industrial Preparedness Planning Program of the Department of Defense unless--

"(1) such injector or component is manufactured in the United States by a company which is an existing producer under the industrial preparedness program at the time the contract is awarded and which--

"(A) has received all required regulatory approvals;  
and

"(B) has the plant, equipment, and personnel to perform the contract in existence in the United States at the time the contract is awarded; or

"(2) the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, determines that such procurement from a source in addition to a source described in paragraph (1) is critical to the national security."

**SUPERCOMPUTERS  
Legislative Background**

**100th Congress**

December 22, 1987: President Reagan signed Pub. L. No. 100-202, FY88 Department of Defense Appropriations Act, with the following section:

Sec. 8112. Funds appropriated or made available in this Act shall be obligated and expended to continue to fully utilize the facilities at the United States Army Engineer's Waterways Experiment Station, including the continued availability of the supercomputer capability and the planned upgrade of this capability: Provided, That none of the funds in this Act may be

used to purchase any supercomputer which is not manufactured in the United States, unless the Secretary of Defense certifies to the Armed Service and Appropriations Committees of Congress that such an acquisition must be made in order to acquire capability for national security purposes that is not available from United States manufacturers.

October 1, 1988: President Reagan signed Pub. L. No. 100-463, the FY89 Department of Defense Appropriations Act containing the following section:

Sec. 8082. Funds appropriated or made available in this Act shall be obligated and expended to continue to fully utilize the facilities at the United States Army Engineer's Waterways Experiment Station, including the continued availability of the supercomputer capability and the planned upgrade of this capability: Provided, That none of the funds in this Act may be used to purchase any supercomputer which is not manufactured in the United States, unless the Secretary of Defense certifies to the Armed Services and Appropriations Committees of Congress that such an acquisition must be made in order to acquire capability for national security purposes that is not available from the United States manufacturers: Provided further, That of the funds appropriated for "Other Procurement Army" for fiscal year 1988, those funds provided for a supercomputer may only be obligated to purchase a system to be installed at a competitively selected independent academic institution: Provided further, That of the funds appropriated for "Other Procurement Army" in fiscal year 1989, \$27,400,000 shall be obligated to purchase a supercomputer system to be installed at the United States Army Engineer's Waterways Experiment Station.

August 23, 1988: President Reagan signed Pub. L. No. 100-418, the Omnibus Trade and Competitiveness Act of 1988, containing the following section:

**SEC. 1307. SUPERCOMPUTER TRADE DISPUTE.**

(a) Findings.-- The Congress finds that --

(1) United States manufacturers of supercomputers have encountered significant obstacles in selling supercomputers in Japan, particularly to government agencies and universities;

(2) Japanese government procurement policies and pricing practices have denied United States manufacturers access to the Japanese supercomputer market;

(3) it has been reported that officials of the Ministry of International Trade and Industry of Japan have told United States

Government officials that Japanese government agencies and universities do not intend to purchase supercomputers from United States manufacturers, or take steps to improve access for United States manufacturers;

(4) the United States Government in August 1987 signed an agreement with the Government of Japan establishing procedures for the procurement of United States supercomputer by the Government of Japan;

(5) concern remains as to implementation of the procurement agreement with the Government of Japan;

(6) there have been allegations that Japanese manufacturers of supercomputers have been offering supercomputers at drastically discounted prices in the markets of the United States, Japan, and other countries;

(7) deep price discounting raises the concern that Japan's large-scale vertically integrated manufacturers of supercomputers have targeted the supercomputer industry with the objective of eventual domination of the global computer market ; and

(8) the supercomputer industry plays a central role in the technological competitiveness and national security of the United States.

(b) Sense of Congress.--It is the sense of the Congress that the United States Trade Representative and other appropriate officials of the United States Government should --

(1) give the highest priority to concluding and enforcing agreements with the Government of Japan which achieve improved market access for United States manufacturers of supercomputers and end day predatory pricing activities of Japanese companies in the United States, Japan, and other countries; and

(2) continue to monitor the efforts of United States manufacturers of supercomputers to gain access to the Japanese market, recognizing that the Government of Japan may continue to manipulate the government procurement process to maintain the market dominance of Japanese manufacturers.

## **PAN CARBON FIBERS**

### **Legislative Background**

#### **100th Congress**

December 22, 1987: President Reagan signed Pub. L. No. 100-202, the FY88 DOD Appropriations Act, containing the following section:

Sec. 8088. The Secretary of Defense shall take such action as necessary to assure that a minimum of 50 percent of the polyacrylonitrile (PAN) carbon fiber requirement be procured from domestic sources by 1992: Provided, That the annual goals to achieve this requirement be as follows: 15 percent of the total DOD requirement by 1988; 15 percent of the total DOD requirement by 1989; 20 percent of the total DOD requirement by 1990; 25 percent of the total DOD requirement by 1991; and 50 percent of the total DOD requirement by 1992.

**Supporting Materials:**

Senate Report Number 100-235, p. 344.

The same language appearing in Pub. L. No. 100-202 also appears in Pub. L. No. 100-463, the FY89 DOD Appropriations Act, section 8133, signed October 1, 1988.

**101st Congress**

Pub. L. No. 101-511 – Nov. 5, 1990

Sec. 8048. The Secretary of Defense shall take such action as necessary to assure that a minimum of 50 percent of the polyacrylonitrile (PAN) carbon fiber requirement be procured from domestic sources by 1992; Provided, That the annual goals to achieve this requirement be as follows: 15 percent of the total DOD requirement by 1988; 15 percent of the total DOD requirement by 1989; 20 percent of the total DOD requirement by 1990; 25 percent of the total DOD requirement by 1991; and 50 percent of the total DOD requirement by 1992.

**NIGHT VISION IMAGE INTENSIFIER DEVICES**

**Legislative Background**

**101st Congress**

Pub. L. No. 101-165

Sec. 8054. None of the funds appropriated in this Act may be available for offshore procurement of second or third generation night vision image intensifier tubes and devices: Provided, That when adequate domestic supplies are not available to meet Department of Defense requirements on a timely basis, the Secretary of the service responsible for the procurement may waive this restriction on a case-by-case basis by certifying in writing to the

Committees on Appropriations that such an acquisition must be made in order to acquire capability for national security purposes.

## **TRANSPORTATION BY OCEAN VESSELS**

### **Legislative Background**

#### **58th Congress**

April 28, 1904: President Roosevelt signed S. 2263 (ch. 1766, 22 Stat. 518), an act requiring the employment of U.S. vessels for public purposes (Cargo Preference Act of 1904), containing the following :

The vessels of the United States, or belonging to the United States, and no others, shall be employed in the transportation by sea of coal, provisions, fodder, or supplies of any description, purchased pursuant to law, for the use of the Army or Navy unless the President shall find that the rates of freight charges by said vessels are excessive and unreasonable in which case contracts shall be made under the law as it now exists: Provided, That no greater charges be made by such vessels for transportation of like goods for private parties or companies.

#### **Supporting Materials**

House Report Number 1893, 58th Cong, 2d Sess.

Senate Report Number 182, 58th Cong, 2d Sess.

#### **73rd Congress**

March 26, 1934: President Roosevelt signed House Joint Resolution Number 207 (ch 90, 48 Stat. 500), requiring that Government financed exporting of products be shipped in U.S. Vessels, containing the following:

That it is the sense if the Congress that in loans made under the Reconstruction Finance Corporation or any other instrumentality of the Government to foster the exporting of agricultural or other products, provision shall be made that such products shall be carried exclusively in vessels of the United States, unless, as to any of all of such products, the Shipping Board Bureau, after investigation, shall certify to the Reconstruction Finance Corporation or any other instrumentality of the Government that vessels of the United States are not available in sufficient numbers, or in sufficient tonnage capacity, or on necessary sailing schedule, or at reasonable rates.

#### **74th Congress**

June 29, 1936: President Roosevelt signed H.R. 8555 (ch. 858, 49 Stat. 1985), the Merchant Marine Act of 1936, containing the following provisions:

SEC. 204, (a) All the functions, powers, and duties vested in the former United States Shipping Board by the Shipping Act, 1916, the Merchant Marine Act, 1920, the Merchant Marine Act, 1928, the Intercoastal Shipping Act, 1933, are hereby transferred to the United States Maritime Commission.

SEC 90f. Any officer or employee of the United States traveling on official business overseas or to or from any of the possessions of the United States shall travel and transport his personal effects on ships registered under the laws of the United States where such ships are available unless the necessity of the mission requires the use of a ship under a foreign flag: Provided, That the Comptroller General of the United States shall not credit any allowance for travel or shipping expenses incurred on a foreign ship in the absence of satisfactory proof of the necessity therefor.

### 83rd Congress

August 26, 1954: President Eisenhower signed S. 3233 (ch. 936, 68 Stat. 832), amending the Merchant Marine Act of 1936, containing the following:

That section 901 of the Merchant Marine Act, 1936, as amended is hereby amended by inserting "(a)" after "SEC. 901." and by adding at the end of the section the following new subsection:

"(b) whenever the United States shall procure, contract for, or otherwise obtain for its own account, or shall furnish or for the account of any foreign nation without provision for reimbursement, any equipment, materials, or commodities, within or without the United States, or shall advance funds or credits or guarantee the convertibility of foreign currencies in connection with such furnishing of such equipment, materials, or commodities, the appropriate agency or agencies shall take such steps as may be necessary and practicable to assure that at least 50 per centum of the gross tonnage of such equipment, materials, or commodities (computed separately for dry bulk carriers, dry cargo liners, and tankers), which may be transported on ocean vessels shall be transported on privately owned United States-flag commercial vessels, to the extent such vessels are available at fair and reasonable rates for United States-flag commercial vessels, in such manner as will insure a fair and reasonable participation of United States-flag commercial vessels in such cargoes by geographical

areas; Provided, That the provisions of this subsection may be waived whenever the Congress by concurrent resolution or otherwise, or the President of the United States or the Secretary of Defense declares that an emergency exists justifying a temporary waiver of section 901(b) and so notifies the appropriate agency or agencies; And provided further, That the provisions of this subsection shall not apply to cargoes carried in the vessels of the Panama Canal Company. Nothing herein shall repeal or otherwise modify the provisions of Public Resolution Numbered 17, Seventy-third Congress (48 Stat. 500) as amended."

#### **84th Congress**

May 28, 1956: President Eisenhower signed S. 2286 (ch 325, 70 Stat. 187,) amending the Merchant Marine Act of 1936, containing the following:

That section 901 of the Merchant Marine Act of 1936, as amended, is amended by adding at the end thereof an new subsection as follows:

"(c) That notwithstanding any other provision of law, privately owned American shipping services may be utilized for the transportation of motor vehicles owned by Government personnel whenever transportation of such vehicles at Government Expense is otherwise authorized by law."

August 10, 1956: President Eisenhower signed a recodification of Title 10 U.S.C. (ch. 1041, '70A Stat. 146), containing the following section codifying the Cargo Preference Act of 1904 (see above):

Sec. 2631. Supplies: preference to United States vessels

Only vessels of the United States or belonging to the United States may be used on the transportation by sea of supplies bought for the Army, Navy, Air Force, or Marine Corps. However, if the President finds that the freight charged by those vessels is excessive or otherwise unreasonable, contracts for transportation may be made as otherwise provided by law. Charges made for the transportation of those supplies by those vessels may not be higher than the charges made by transporting like goods for private persons.

#### **Supporting Materials**

For an explanation of the charges from the 1904 Act, see Explanatory Notes listed after 10 U.S.C. § 2631.

#### **85th Congress**

April 29, 1957: President Eisenhower transmitted Reorganization Plan No. 1 of 1957 to Congress abolishing the Reconstruction Finance Corporation (RFC). See 46 U.S.C. § 1241-1 and Codification notes following the section for the effect the abolition of the RFC had on the Act of March 26, 1934 (see above).

### **87th Congress**

September 21, 1961: President Kennedy signed Pub. L. No. 87-266 amending the Merchant Marine Act of 1936, containing the following:

That section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241) is hereby amended by inserting at the end thereof the following: "For purposes of this section, the term 'privately owned United States-flag commercial vessels' shall not be deemed to include any vessel which, subsequent to the date of enactment of this amendment shall have been either (a) built outside the United States, (b) rebuilt outside of the United States, or (c) documented under any foreign registry, until such vessel shall have been documented under the laws of the United States for a period of three years: Provided, however, That the provisions of this amendment shall not apply where, (1) prior to the enactment of this amendment, the owner of a vessel, or contractor for the purchase of a vessel, originally constructed in the United States and rebuilt abroad or contracted to be rebuilt abroad, has notified the Maritime Administration in writing of its intent to document such vessel under United States registry, and such vessel is so documented on its first arrival at a United States port not later than one year subsequent to the date of the enactment of this amendment; or (2) where prior to the enactment of this amendment, the owner of a vessel under United States registry has made a contract for the rebuilding abroad of such vessel and has notified the Maritime Administration of such contract, and such rebuilding is completed and such vessel is thereafter documented under United States registry on its arrival at a United States port not later than one year subsequent to the date of the enactment of this amendment."

### **91st Congress**

October 21, 1970: President Nixon signed Pub. L. No. 91-469, amending the Merchant Marine Act of 1936, containing the following section:

SEC 27. Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. § 1241) is amended as follows:  
(a) By redesignating subsection (b) as (b)(1).

(b) By striking the words "section 901 (b) "in redesignated subsection (b)(1) and inserting in lieu thereof the words "section 901 (b)(1)".

(c) By adding a new subsection (b)(2) to read as follows:

"(2) Every department or agency having responsibility under this subsection shall administer its programs with respect to this subsection under regulations issued by the Secretary of Commerce. The Secretary of Commerce shall review such administration and shall annually report to the Congress with respect thereto.

### **97th Congress**

August 6, 1981: President Reagan signed Pub. L. No. 97-31, revising laws pertaining to the Maritime Administration substituting the Secretary of Transportation for the Secretary of Commerce in section 901(b) of the Merchant Marine Act of 1936, and substituting the Secretary of Transportation for the Maritime Commission in the Act of March 26, 1934 (46 U.S.C. § 1241-1).

### **Non-legislative Changes**

August 7, 1985: President Reagan signed a memorandum delegating to the Secretary of Defense functions vested in the President under the Cargo preference Act of 1904.

## **FOOD, CLOTHING, FABRICS, SPECIALTY METALS, AND HAND OR MEASURING TOOLS**

### **Legislative Background**

### **77th Congress**

April 5, 1941: President Roosevelt signed Pub. L. No. 29, 77th Cong, 1st Sess. (55 Stat. 123, ch 41), the FY41 Fifth Supplemental National Defense Appropriations Act, contained the following provision under the "Quartermaster Corps" title in the section on "Clothing and Equipage, Army":

Provided further, That no part of this or any other appropriation contained in this Act shall be available for the procurement of any article of food or clothing not grown or produced in the United States or its possessions, except to the extent that the head of the department concerned shall determine that articles of food or clothing grown or produced in the United States or its possessions cannot be procured of satisfactory quality and in sufficient quantities and at reasonable prices as and when needed, and except procurements by vessels in foreign waters and by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto.

June 30, 1941: President Roosevelt signed Pub. L. No. 139, 77th Cong, 1st Sess. (55 Stat. 366, ch. 262), the FY42 Military Appropriations Act contained a section under the "Quartermaster Corps on Subsistence of the Army", which included:

The same provision can be found in Pub. L. No. 649, 77th Cong, 2d Sess. (62 Stat. 647), the FY43 Military Appropriation Act.

#### **80th Congress**

June 24, 1948: President Truman signed Pub. L. No. 766, 80th Cong, 2d Sess. (62 Stat. 647), the FY49 Military Functions Appropriations Act, containing the following provisions under the section on "Subsistence of the Army".

Provided further, That no part of this or any other appropriation contained in this Act shall be available for the procurement of any article of food or clothing not grown or produced in the United States or its possessions, except to the extent that the Secretary of the Army shall determine that articles of food or clothing grown or produced in the United States or its possessions cannot be procured of satisfactory quality and in sufficient quantities and at reasonable prices as and when needed, and except procurements by vessels in foreign waters and by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for personnel attached thereto.

#### **81st Congress**

Both the FY50 and FY51 Appropriations Acts contained the same provisions as in Pub. L. No. 766, 80th Cong, 2d Sess. (62 Stat. 647), in the Section on Substance of the Army.

#### **82d Congress**

October 18, 1951: President Truman signed Pub. L. No. 179, 82d Cong, 1st Sess (65 Stat. 423, ch. 512), the FY52 DOD Appropriations Act, containing the following provisions in the "Subsistence of the Army" section.

Provided further, That no part of this or any other appropriation contained in this Act shall be available for the procurement of any article of food or clothing not grown or produced in the United States or its possessions except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing grown or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements by vessels in foreign waters and emergency

procurements or procurements of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions.

July 10, 1952: President Truman signed Pub. L. No. 488, 82d Cong., 2d Sess. (66 Stat. 517, ch. 630), the FY53 DOD Appropriations Act, containing the following provisions in the "Maintenance and Operations of the Army" section:

Provided, That no part of this or any other appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements by vessels in foreign waters and emergency procurements or procurement of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for personnel attached thereto: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions

### **83rd Congress**

August 1, 1953: President Eisenhower signed Pub. L. No. 179, 83rd Cong., 1st Sess. (67 Stat. 336, ch. 305), the FY54 DOD Appropriations Act, containing the following section:

SEC. 644. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton or wool (whether in the form of fiber or yarn or contained in fabrics materials, or manufacture articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton or wool grown, reprocessed, reused or produced in the United States or its possessions cannot be procured as and when needed at United

States market prices and except procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

The same language appearing in Pub. L. No. 639, 84th Cong., 2d Sess., section 626 appeared in Pub. L. No. 458, 83rd Cong., 2d Sess. (68 Sta. 337, ch. 432), the FY55 DOD Appropriations Act, Sec. 733, signed June 30, 1954.

#### **84th Congress**

July 13, 1955: President Eisenhower signed Pub. L. No. 157, 84th Cong., 1st Sess. (69 Stat. 301), the FY56 DOD Appropriations Act, containing the following section:

SEC. 630. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth (subject to the same conditions as apply to other commodities in this paragraph) or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurement outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the continental United States, except the territories of Hawaii and Alaska for the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used or the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

## **85th Congress**

The same language appearing in Pub. L. No. 639, 84th Cong., 2d Sess., section 626 appeared in the following laws:

Pub. L. No. 85-117, section 25, FY58 DOD Appropriations Act, signed August 2, 1957.

Pub. L. No. 85-724, section 625, FY59 DOD Appropriations Act, signed August 22, 1958.

## **86th Congress**

**August 1959:** President Eisenhower signed Pub. L. No. 86-166, the FY60 DOD Appropriations Act, containing the following section:

**SEC. 523.** No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

**July 7, 1960:** President Eisenhower signed Pub. L. No. 86-601, the FY61 DOD Appropriations Act containing the following section:

**SEC. 623.** No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that

satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

The same language appearing in Pub. L. No. 90-96, section 623 appeared in Pub. L. No. 90-580, the FY69 DOD Appropriations Act, section 523, signed October 17, 1968.

#### **87th Congress**

The same language appearing in Pub. L. No. 86-601, section 523 appeared in Pub. L. No. 87-144, section 623, FY62 DOD Appropriations Act signed August 17, 1961.

August 9, 1962: President Kennedy signed Pub. L. No. 87-577, the FY63 DOD Appropriations Act, containing the following section:

SEC. 523. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by

establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

### **94th Congress**

February 9, 1976: President Ford signed Pub. L. No. 94-212, the FY76 DOD Appropriations Act containing the following section:

SEC. 723. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk or woven silk blend, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign

waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

September 22, 1976: President Ford signed Pub. L. No. 94-419, the FY77 DOD Appropriations Act, containing the following section:

SEC. 723. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

## 95th Congress

September 21, 1977: President Carter signed Pub. L. No. 95-111, the FY78 DOD Appropriations Act, containing the following section:

**SEC. 823.** No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 814 of the Department of Defense Appropriations Authorization Act, 1976: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used or the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further,

That none of the funds appropriated in this Act shall be used except that so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

The same language appearing in Pub. L. No. 95-111, section 823 appeared in Pub. L. No. 95-457, the FY79 DOD Appropriations Act, section 824, signed October 13, 1978.

#### **96th Congress**

The same language appearing in Pub. L. No. 95-111, section 823 appeared in Pub. L. No. 96-154, the FY80 DOD Appropriations Act, section 724, signed December 21, 1979.

December 15, 1980: President Carter signed Pub. L. No. 96-527, the FY81 DOD Appropriations Act, containing the following section:

**SEC. 724.** No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States Government or United States firms under approved programs serving defense requirements or where such procurement

is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 814 of the Department of Defense Appropriations Authorization Act, 1976: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations, other than certain contracts not involving fuel made on a test basis by the Defense Logistics Agency with a cumulative value not to exceed \$3,400,000,000, as may be determined by the Secretary of Defense pursuant to existing laws and regulations as not to be inappropriate therefor by reason of national security consideration: Provided further, That the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards of such contracts will be made at a reasonable price and that no award shall be made for such contracts if the price differential exceed 5 per centum: Provided further, That none of the funds appropriated in this Act shall be used except that so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

### **97th Congress**

December 29, 1981: President Reagan signed Pub. L. No. 97-114, the FY82 DOD Appropriation Act, containing the following section:

SEC. 723. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool, or specialty metals including stainless steel flatware, grown,

reprocessed, reused, or produced in the United States or its possession cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States of the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its Possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations other than certain contracts not involving fuel made on a test basis by the Defense logistics Agency with a cumulative value not to exceed \$5,000,000,000, as may be determined by the Secretary of Defense pursuant to existing laws and regulations as not to be inappropriate therefor by reason of national security considerations: Provided further, That the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards of such contracts will be made at a reasonable price and that no award shall be made for such contracts if the price differential exceed 5 per centum: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

December 21, 1982: President Reagan signed Pub. L. No 97-377, the FY83 DOD Appropriations Act, containing the following section:

SEC. 723. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and

when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of foreign produced specialty metals used in the production of manufacture of weapons or weapon systems made outside the United States, except those specialty metals which contain nickel from Cuba, or the procurement of chemical warfare protective clothing produced outside the United States, if such procurement is necessary to comply with agreements with foreign governments: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations other than certain contracts not involving fuel made on a test basis by the Defense Logistics Agency with a cumulative value not to exceed \$4,000,000,000, as may be determined by the Secretary of Defense pursuant to existing laws and regulations as not to be inappropriate therefor by reason of national security considerations: Provided further, That the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards of such contracts will be made at a reasonable price and that no award shall be made for such contracts if the price differential exceed 2.2 per centum: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

## **98th Congress**

December, 1983: President Reagan signed Pub. L. No. 98-212, the FY84 DOD Appropriations containing the following section:

SEC. 721A. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed,

reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations other than certain contracts not involving fuel made on a test basis by the Defense Logistics Agency with a cumulative value not to exceed \$4,000,000,000, as may be determined by the Secretary of Defense pursuant to existing laws and regulations as not to be inappropriate therefor by reason of national security considerations: Provided further, That the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards of such contracts will be made at a reasonable price and that no award shall be made for such contracts of the price differential exceed 2.2 per centum: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a

formally advertised competitive bid basis to the lowest responsible bidder.

The same language appearing in Pub. L. No. 98-212, section 721A appeared in Pub. L. No. 98-473, the FY 85 DOD Appropriations Act, section 8019, signed October 12, 1984.

### **99th Congress**

December 19, 1985: President Reagan signed Pub. L. No. 99-190, the FY86 Department of Defense Appropriations Act containing the following section:

**SEC. 8016.** No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10,

United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

October 30, 1986: President Reagan signed into Pub. L. No. 99-591, the FY87 Department of Defense Appropriations Act, containing the following section:

SEC. 9011. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments

comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

## **100th Congress**

**December 22, 1987: President Reagan signed Pub. L. No. 100-202, FY88 Department of Defense Appropriations Act, with the following section:**

**SEC. 8011. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000 shall be available for the procurement of any article of food, clothing, tents, tarpaulins, covers, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles or items of food, individual equipment, tents, tarpaulins, covers, or clothing or any form of cotton, or other natural fiber products, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement**

is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts will be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

October 1, 1988: President Reagan signed Pub. L. No. 100-463, the FY89 Department of Defense Appropriations Act containing the following section:

**SEC. 8010.** No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$25,000 shall be available for the procurement of any article of food, clothing, tents, tarpaulins, covers, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles or items of food, individual equipment, tents, tarpaulins, covers, or clothing or any form of cotton, or other natural fiber products, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, wool, or specialty metals including stainless steel flatware, grown, reprocess, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or

procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts will be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

**CONSTRUCTION OF MAJOR COMPONENTS OF THE HULL AND  
SUPERSTRUCTURE OF NAVAL VESSELS**  
Legislative Background

**88th Congress**

August 19, 1964: President Johnson signed Pub. L. No. 88-446, the FY65 DOD Appropriations Act containing the following provision in the "Shipbuilding and Conversions, Navy" sections:

Provided, That none of the funds herein provided for the construction or conversion of any navel vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel.

**89th Congress**

The same provisions Pub. L. No. 88-446 was also contained in Pub. L. No. 89-213, the FY66 DOD Appropriations Act signed September 29, 1965.

The same provisions in Pub. L. No. 88-446 was also contained in Pub. L. No. 89-687, the FY67 DOD Appropriations Act, signed October 15, 1966.

### **90th Congress**

September 29, 1967: President Johnson signed Pub. L. No. 90-96, the FY68 DOD Appropriations Act, containing the following provision in the "Shipbuilding and Conversion, Navy" section:

Provided, That none of the funds herein provided for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel: Provided further, That none of the funds therein provided shall be used for the construction of any naval vessel in foreign shipyards.

The same provision in Pub. L. No. 90-96 was also contained in every DOD Appropriations Act through FY89.

### **97th Congress**

September 8, 1982: President Reagan signed Pub. L. No. 97-252, the 1983 DOD Authorization Act containing the following section:

SEC. 1127 (a). Chapter 633 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"7309. Restriction on construction of naval vessels in foreign shipyards

"(a) Except as provided in subsection (b), no naval vessel, and no major component of the hull or superstructure of a naval vessel, may be constructed in a foreign shipyard.

"(b) The President may authorize exceptions to the prohibition in subsection (a) when he determines that it is in the national security interest of the United States to do so. The President shall transmit notice to Congress of any such determination, and no contract may be made pursuant to the exception authorized until the end of the 30-day period beginning on the date such determination is received by Congress . . ."

"(b) The table of sections at the beginning to such chapter is amended by adding at the end thereof the following new item:

"7309. Restriction on construction of naval vessels in foreign shipyards."

### **98th Congress**

October 12 1984: President Reagan signed Pub. L. No. 98-473, the FY85 DOD Appropriations Act, containing the following section:

SEC. 8095. Section 7309(a) of title 10, United States Code, is amended-

(1) by inserting "and no vessel of any other military department," after "no naval vessel"; and

(2) by striking out "a naval" and inserting in lieu thereof "any such".

### 99th Congress

November 8, 1985: President Reagan signed Pub. L. No. 99-145, the 1986 DOD Authorization Act, containing the following section:

SEC. 1303 GENERAL CLERICAL AMENDMENTS

(a) Amendment to Title 10.--Title 10, United States Code, is amended as follows:

(A) The heading of section 7309 is amended by striking out the fifth word.

(B) The item relating to that section in the table of section at the beginning of chapter 633 is amended by striking out the fifth word.

### 100th Congress

December 4, 1987: President Reagan signed Pub. L. No. 100-180, FY88 and 89 National Defense Authorization Act, containing the following section:

SEC. 1103. DOMESTIC CONSTRUCTION OF CERTAIN VESSELS

Section 7309(a) of title 10 United States Code, is amended by striking out "no naval vessel, and no vessel of any other military department," and inserting in lieu thereof "no vessel to be constructed for any of the armed forces."

September 28, 1988: President Reagan signed Pub. L. No. 100-448, the Coast Guard Authorization Act of 1988, containing the following section:

"Sec. 665. Restriction on construction of vessels in foreign shipyards

"(a) Except as provided in subsection (b), no Coast Guard vessel, and no major component of the hull or superstructure of a Coast Guard vessel, may be constructed in a foreign shipyard.

"(b) The President may authorize exception to the prohibition in subsection (a) when the President determines that it is in the nations security interest of the United States to do so. The President shall transmit notice to Congress of any such determination, and no contract may be made pursuant to the exception authorized until the end of the 30-day period beginning on the date the notice of such determination is received by Congress."

(b) Conforming Amendment-- The analysis of chapter 17 of title 14, United States Code, is amended by adding at the end the following:  
"665. Restriction on construction of vessels in foreign shipyards."

### **MULTIPASSENGER MOTOR VEHICLES (BUSES)** Legislative Background

#### **90th Congress**

September 20, 1968: President Johnson signed Pub. L. No. 90-500, FY Military Procurement Authorizations, containing the following section:

SEC. 404. No funds authorized for appropriation for the use of the Armed Forces of the United States under the provisions of this Act or the provisions of any other law shall be available for the purchase, lease, rental, or other acquisition of multipassenger motor vehicles (buses) other than multipassenger motor vehicles (buses) manufactured in the United States, except as may be authorized by regulations promulgated by the Secretary of Defense solely to insure that compliance with this prohibition will not result in either an uneconomical procurement action or one which would adversely affect the national interests of the United States.

#### **97th Congress**

October 12, 1982: President Reagan signed Pub. L. No. 97-295, making technical amendments to Titles 10, 14, 37, and 38 of the U.S. Code, which repealed section 404 of Pub. L. No. 90-500 which had been codified as a note to 10 U.S.C § 2303, and inserted a new section to Title 10 of the U.S. Code:

"Sec. 2400. Limitation on procurement of buses

"Funds appropriated for use by the armed forces are available to acquire a multipassenger motor vehicle (bus) only if the vehicle is manufactured in the United States. However, the Secretary of Defense may prescribe regulations authorizing the

acquisition of a multipassenger motor vehicle (bus) not manufactured in the United States, but only to ensure that compliance with this section will not result in an uneconomical procurement action or adversely affect the national interest."

**Supporting Materials:**

See the Historical and Revision Notes listed under 10 U.S.C. § 2400 for an explanation of the changes from Pub. L. No. 90-500, section 404.

**100th Congress**

December 4, 1987: President Reagan signed Pub. L. No. 100-180, the FY88 and 89 National Defense Authorization Act, changing the heading of 10 U.S.C. § 2400 to "Miscellaneous procurement limitations," necessitated by the addition of a section on restriction on chemical weapons antidote procurement.

**R&D CONTRACTING**  
Legislative Background

**92d Congress**

October 26, 1972: President Nixon signed Pub. L. No. 92-570, the FY73 DOD Appropriations Act containing the following section:

SEC. 744. None of the funds appropriated by this or any other act shall be available for entering into any contract or agreement with any foreign corporation, organization, person, or other entity for the performance of research and development in connection with any weapon system or other military equipment for the Department of Defense when there is a United States corporation, organization, person, or other entity equally competent to carry out such research and willing to do so at a lower cost.

**Supporting Materials:**

Vol. 118, Congressional Record, pp. 33033-34 (Sept. 30, 1972), Statement by Sen. Bayh upon offering the amendment on the floor of the Senate.

**TRANSPORTATION BY AIR CARRIERS**  
Legislative Background

**93rd Congress**

January 3, 1975: President Ford signed Pub. L. No. 93-623m the International Air Transportation Fair Competitive Practices Act of 1974, containing the following section:

SEC. 5. (a) TITLE XI of the Federal Aviation Act of 1958 (49 U.S.C. § 1501 and the following) is amended by adding at the end thereof the following new section:

**"TRANSPORTATION OF GOVERNMENT-FINANCED  
PASSENGERS AND PROPERTY"**

"SEC. 1117. Whenever any executive department of other agency or instrumentality of the United States shall procure, contract for, or otherwise obtain for its own account or in furtherance of the purposes or pursuant to the terms of any contract agreement, or other special arrangement made or entered into under which payment is made by the United States or payment is made from funds appropriated, owned, controlled, granted, or conditionally granted or unitized by or otherwise established for the account of the United States, or shall furnish to or for the account of any foreign nation, or any international agency, or other organization, of whatever nationality, without provisions for reimbursement, any transportation of persons (and their personal effects) or property by air between a place in the United States and a place in the United States and a place outside thereof or between two places both of which are outside the United States, the appropriate agency or agencies shall take such steps as may be necessary to assure that such transportation is provided by air carriers holding certificates under section 401 of this Act to the extent authorized by such certificates or by regulations of exemption of the Civil Aeronautics Board and to the extent service by such carriers is available. The Comptroller General of the United States shall disallow any expenditure from appropriated funds for payment for such personnel or cargo transportation on an air carrier not holding a certificate under section 401 of this Act in the absence of satisfactory proof of the necessity therefor. Nothing in this section shall prevent the application to such traffic of the anti discrimination provisions of this Act."

Supporting Material:

House Report Number 93-1475, as reprinted in the 1974 USCCAN, p.7466.

**96th Congress**

February 15, 1980: President Carter signed Pub. L. No. 96-192, the International Air Transportation Competition Act of 1979, containing the following section:

SEC. 21. Section 1117 of the Federal Aviation Act of 1958 (49 U.S.C. § 1617) is amended to read as follows:

**"Transportation of Government-Financed Passengers and Property**

**"Transportation Between the United States and a Place Outside Thereof**

**"Sec. 1117. (a) Except as provided in subsection (c) of this section, whenever any executive department or other agency or instrumentality of the United States shall procure, contract for, or otherwise obtain for its own account or in furtherance of the purposes or pursuant to the terms of any contract agreement, or other special arrangement made or entered into under which payment is made by the United States or payment is made from funds appropriated, owned, controlled, granted, or conditionally granted or unitized by or otherwise established for the account of the United States, or shall furnish to or for the account of any foreign nation, or any international agency, or other organization, of whatever nationality, without provisions for reimbursement, any transportation of persons (and their personal effects) or property by air between a place in the United States and a place outside therefor, the appropriate agency or agencies shall take such steps as may be necessary to assure that such transportation is provided by air carriers holding certificates under section 401 of this Act to the extent authorized by such certificates or by regulations or exemption of the Civil Aeronautics Board and to the extent service by such carriers is available.**

**"Transportation Between Two places Outside The United States**

**"(b) except as provided in subsection (c) of this section, whenever persons (and their personal effects) or property described in subsection (a) of this section are transported by air between two places both of which are outside the United States, the appropriate agency or agencies shall take such steps as may be necessary to assure that such transportation is provided by air carriers holding certificates under section 401 of this Act to the extent authorized by such certificates or by regulations or exemption of the Civil Aeronautics Board and to the extent service by such carriers is available.**

**"Transportation Pursuant to Bilateral Agreement**

"(c) Nothing in this section shall preclude the transportation of persons (and their personal effects) or property by foreign air carriers if such transportation is provided for under their terms of a bilateral or multilateral air transport agreement between the United States and a foreign government or governments and if such agreement (1) is consistent with the goals for international aviation policy set forth in section 1102(b) of this Act and (2) provides for the exchange of rights or benefits of similar magnitude.

**"Disallowance of Improper Expenditure by Comptroller General**

"(d) The Comptroller General of the United States shall disallow any expenditure from appropriated funds for payment for personnel or cargo transportation in violation of this section in the absence of satisfactory proof of the necessity therefor. Nothing in this section shall prevent the application to such traffic of the anti discrimination provisions of this Act."

**Supporting Materials:**

Senate Report Number 96-329, pp. 12, 23.

House Report Number 96-717 (Conference Report), pp. 20-21.

**ADMINISTRATIVE MOTOR VEHICLES**  
**Legislative Background**

**97th Congress**

December 29, 1981: President Reagan signed Pub. L. No. 97-114, the FY82 DOD Appropriations Act, containing the following section:

SEC 783. None of the funds available in this Act shall be used by the Secretary of a military department to make a contract for the purchase of administrative motor vehicles that are manufactured outside the United States or Canada unless the contractor was selected through competitive bidding without a differential in favor of foreign manufacturers: Provided, That this section does not apply to contracts for amounts less than \$50,000, nor to existing contracts.

**Supporting Materials:**

House Report Number 97-333, p.289.  
Senate Report Number 97-273, p. 128.

September 8, 1982: President Reagan signed Pub. L. No. 97-252, the FY83 DOD Authorization Act, containing the following section:

**Purchase of Foreign-Made Administrative Motor Vehicles**

SEC. 1126. (a) The Secretary of a military department may, after the date of the enactment of this Act, enter into contracts for the purchase of administrative motor vehicles without regard to section 783 of Pub. L. No. 97-114.

(b) None of the funds appropriated pursuant to authorizations in this Act may be used by the Secretary of a military department to make a contract or agreement for the purchase of administrative motor vehicles that are manufactured outside the United States or Canada unless the contractor was selected through competitive bidding without a differential in favor of foreign manufacturers. This subsection does not apply to contracts for amounts less than \$50,000 or any contract or agreement in effect on the date of the enactment of this Act with the Federal Republic of Germany, the United Kingdom, or Italy, so long as the vehicles procured under such contract or agreement are standardized or interoperable with the vehicles of the host country.

**Supporting Materials:**

Senate Report Number 97-330, pp. 148-49.

House Report Number 97-749 (Conference Report), pp. 180-81.

**100th Congress**

December 4, 1987: President Reagan signed Pub. L. No. 100-180, the FY88 and 89 National Defense Authorization Act, containing the following section:

**Part B – Other Acquisition Matters**

**SEC. 823. RESTRICTION ON PURCHASE OF FOREIGN-  
MADE ADMINISTRATIVE MOTOR VEHICLES**

(a) Vehicles for Use Inside the United States.- Neither the Secretary of Defense nor the Secretary of a military department may enter into a contract during the period beginning on the date of the enactment of this Act and ending on September 30, 1989, for the procurement of administrative motor vehicles that are manufactured in a country other than the United States or Canada and are for use inside the United States unless the type of motor

vehicle proposed to be procured is not available in sufficient and reasonably available quantities and satisfactory quality from a manufacturer in the United States or Canada

(b) Vehicle for Use Overseas.— (1) Neither the Secretary of Defense nor the Secretary of a military department may enter into a contract during the period beginning on the date of enactment of this Act and ending on September 30, 1989, for the procurement of administrative motor vehicles that are manufactured in a country other than the United States or Canada and are for use outside the United States (other than motor vehicles intended for use in security, intelligence, and criminal investigative operations) unless firms which manufacture similar vehicles in the United States or Canada are afforded a fair opportunity to compete for the contract.

(2) In awarding any contract subject to paragraph (1), the Secretary of Defense or the Secretary of the military department concerned may take into consideration the cost and availability of maintenance and other logistic services and supplies required for the operation of such vehicles.

(c) Exceptions.--This section shall not apply to the procurement of administrative motor vehicles in the case of a contract--

- (1) for an amount less than \$50,000; or
- (2) that is specifically authorized by law.

(d) Applicability.— (1) Except as provided in paragraph (2)(B), subsection (b) shall not apply in the case of a contract authorized or required to be entered into as provided under the terms of a country-to-country agreement for the support of United States Armed Forces in Europe if the agreement is in existence on the date of the enactment of this Act.

(2)(A) After the date of the enactment of this Act, the Secretary of Defense may not enter into a country-to-country agreement for the support of United States Armed Forces in Europe that is consistent with the limitations on the procurement of administrative motor vehicles under this section applicable during the period beginning on the date of the enactment of this Act and ending on September 30, 1989.

(B) If an agreement described in paragraph (1) is renewed or extended after the date of the enactment of this Act, the Secretary shall ensure that such agreement, as renewed or extended, is not inconsistent with the limitation on the procurement of administrative motor vehicles under this section applicable during the period beginning on the date for the enactment of this Act and ending on September 30, 1989.

**AIRCRAFT EJECTION SEATS**  
**Legislative Background**

**97th Congress**

December 21, 1982: President Reagan signed Pub. L. No. 97-377, the FY83 Department of Defense Appropriations Act containing a provision in the "Aircraft Procurement Navy" section relating to ejection seats in F/A-18 aircraft:

Provided, That none of the funds appropriated or made available pursuant to this paragraph for the F/A 18 aircraft program may be obligated or expended until the Secretary of the Navy submits to the Committees of Appropriations of the House of Representatives and the Senate a certified plan to incorporate a United States manufactured ejection seat system in F/A-18 aircraft purchased with fiscal year 1983 and future funds.

Pub. L. No. 99-190, section 8057, FY86 Department of Defense Appropriations Act, signed Dec. 19, 1985.

Pub. L. No. 99-591, section 9052d, FY87 Department of Defense Appropriations Act, signed Oct. 30, 1986.

**100th Congress**

The same language appearing in Pub. L. No. 98-473, section 8074 appeared in the following laws:

Pub. L. No. 100-202, section 8054, FY88 Department of Defense Appropriations Act, signed Dec. 22, 1987.

Pub. L. No. 100-463, section 8044, FY89 Department of Defense Appropriations Act, signed Oct. 1, 1988.

Note: No supporting Congressional materials were available for the 99th or 100th Congress.

**TRANSFER OF LARGE-CALIBER CANNON PRODUCTION TECHNOLOGY**  
Legislative Background

## 97th Congress

December 29, 1981: President Reagan signed Pub. L. No. 97-114, the FY82 DOD Appropriations Act, containing the following section:

Sec. 782.(a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant manufacturing large-caliber cannons to any foreign government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated, defense plant manufacturing large caliber cannons.

### Supporting Materials:

House Report Number 97-33, p. 289.

House Report Number 97-410 (Conference Report), p. 55.

## 98th Congress

December 8, 1983: President Reagan signed Pub. L. No. 98-212, the FY84 DOD Appropriations Act, containing the following section:

Sec. 765. (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) No funds appropriate by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant manufacturing large caliber cannons to any foreign government nor for assisting any such government, not for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated, defense plant manufacturing large caliber cannons.

(c) None of the funds in this Act shall be used, in any way, directly or indirectly, to sell or otherwise provide the AN/SQR-19 Towed Array Sonar to any foreign country, directly or indirectly, including any administrative and military and civilian personnel costs in

connection with the arrangement of the sale of the AN/SQR-19 Towed Array Sonar to any foreign country.

**Note:** Subsection (c) was repealed by Pub. L. No. 98-396, the FY84 Second Supplemental Appropriations Act, signed August 22, 1984.

**October 12, 1984:** President Reagan signed Pub. L. No. 98-473, the FY85 DOD Appropriations Act, containing the following section:

**SEC. 8057.** (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant manufacturing large caliber cannons to any foreign government, not for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated defense plant manufacturing large caliber cannons.

#### **99th Congress**

**December 19, 1985:** President Reagan signed Pub. L. No. 99-190, the FY87 DOD Appropriations Act, containing the following section:

**SEC. 8041.** (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant manufacturing large caliber cannons to any foreign government, nor for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated, defense plant manufacturing large caliber cannons.

**October 30, 1986:** President Reagan signed Pub. L. No. 99-591, the FY86 DOD Appropriations Act, containing the following section:

Sec. 9036. (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) Technical Data Packages for Production of Large-Caliber Cannon.- (1) Chapter 433 of Title 10, United States Code, is amended by adding at the end the following new section:

"Sec. 4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception

"(a) General Rule.- Funds appropriated to the Department of Defense may not be used-

"(1) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or

"(2) to assist a foreign country in producing such a defense item.

"(b) Exception.- The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in section (a) if -

"(1) the transfer of provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State);

"(2) the Secretary of the Army determines that such action-

"(A) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and

"(B) would not transfer technology (including production techniques) considered unique to the arsenal concerned; and

"(3) the Secretary of Defense enters into an agreement with the country concerned described in subsection (c).

"(c) Coproduction Agreements.- An agreement under this subsection shall be in the form of a Government-to-Government Memorandum of Understanding and shall include provisions that -

"(1) prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement;

"(2) require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned;

"(3) subject to such exceptions as may be approved under subsection(d), prohibit transfer by the participating foreign country to a third party or country of --

"(A) any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and

"(B) any defense article produced by the participating foreign country under the agreement; and

"(4) require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

"(d) Transfers to Third Parties.--A transfer described in subsection (b)(3) may be made if--

"(1) the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program in which the United States and the participating foreign country were partner; or

"(2) the President--

"(A) complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. § 2753 (d)) with respect to such transfer; and

"(B) certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large caliber cannon.

"(e) Notice and Reports to Congress.--(1) The Secretary of the Army shall submit to Congress a notice of each agreement entered into under this section.

"(2) The Secretary shall submit to congress a semiannual report on the operation of this section and of agreements entered into under this section.

"(f) Arsenal Defined.--In this section, the term 'arsenal' means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon."

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception."

(c) Effective Date.-- Section 4542 of title, 10, United States Code, as added by subsection (b), shall apply with respect to funds appropriated for fiscal years after fiscal year 1986.

November 14, 1986: President Reagan signed Pub. L. No. 99-661, the FY87 DOD Authorization Act containing the following section;

**SEC. 1203 LIMITATION ON TRANSFER OF CERTAIN  
TECHNICAL DATA PACKAGES**

(a) Technical Data Packages for production of Large-Caliber Cannon.- (1) Chapter 433 of Title 10, United States Code, is amended by adding at the end the following new section:

Sec. 9036. (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) Technical Data Packages for Production of Large-Caliber Cannon.- (1) Chapter 433 of Title 10, United States Code, is amended by adding at the end the following new section:

"Sec. 4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception

"(a) General Rule.--Funds appropriated to the Department of Defense may not be used-

"(1) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or

"(2) to assist a foreign country in producing such a defense item.

"(b) Exception.- The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in section (a) if -

"(1) the transfer of provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State);

"(2) the Secretary of the Army determines that such action-

"(A) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and

"(B) would not transfer technology (including production techniques) considered unique to the arsenal concerned; and

"(3) the Secretary of Defense enters into an agreement with the country concerned described in subsection (c).

"(c) Coproduction Agreements.-- An agreement under this subsection shall be in the form of a Government-to-Government Memorandum of Understanding and shall include provisions that -

"(1) prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement;

"(2) require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned;

"(3) subject to such exceptions as may be approved under subsection(d), prohibit transfer by the participating foreign country to a third party or country of –

"(A) any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and

"(B) any defense article produced by the participating foreign country under the agreement; and

"(4) require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

"(d) Transfers to Third Parties.– A transfer described in subsection (b)(3) may be made if–

"(1) the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program in which the United States and the participating foreign country were partner; or

"(2) the President--

"(A) complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. § 2753 (d)) with respect to such transfer; and

"(B) certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large caliber cannon.

"(e) Notice and Reports to Congress.– (1) The Secretary of the Army shall submit to Congress a notice of each agreement entered into under this section.

"(2) The Secretary shall submit to congress a semiannual report on the operation of this section and of agreements entered into under this section.

"(f) Arsenal Defined.--In this section, the term 'arsenal' means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon."

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception."

(c) Effective Date.– Section 4542 of Title 10, United States Code, as added by subsection (b), shall apply with respect to funds appropriated for fiscal years after fiscal year 1986.

## **100th Congress**

December 22, 1987: President Reagan signed Pub. L. No. 100-202, the FY88 DOD Appropriations Act, containing the following section:

SEC. 8036. None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

The same section contained in Pub. L. No. 100-202 is also contained in Pub. L. No. 100-463, the FY89 DOD Appropriations Act, section 8034, signed October 1, 1988.

### **102nd Congress**

Pub. L. No. 102-190, §1086

(a) EXTENSION OF EXCEPTION TO ALL FRIENDLY FOREIGN COUNTRIES. Subsection (b)(1) of section 4542 of title 10, United States Code, is amended by striking out "member nation" and all that follows through "major non-NATO ally" and inserting in lieu thereof "friendly foreign country".

(b) CROSS-REFERENCE CORRECTIONS. Such section is further amended

(1) in subsection (c)(3), by striking out "subsection (d)" and inserting in lieu thereof "subsection (f)"; and

(2) in subsection (f), by striking out "subsection (b)(3)" and inserting in lieu thereof "subsection (c)(3)".

### **COAL OR COKE** Legislative Background

December 21, 1982 : President Reagan signed Pub. L. No. 97-377, the FY83 DOD Appropriations Act, containing the following section:

Sec. 778. None of the funds available to the Department of Defense during the current fiscal year shall be used by the Secretary of a military department to purchase coal or coke from foreign nations for use at United States defense facilities in Europe when coal from the United States is available.

The same provisions in Pub. L. No. 97-377 has also been contained in every DOD Appropriations Act through FY89.

### **FLOATING STORAGE OF PETROLEUM** Legislative Background

**98th Congress**

August 22, 1984: President Reagan signed Pub. L. No. 98-396, the FY84 Second Supplemental appropriations Act, containing the following section:

**CHAPTER III  
DEPARTMENT OF DEFENSE - MILITARY**

**General Provisions**

None of the funds available to the Department of Defense may be used for the floating storage of petroleum product except in vessels of or belonging to the United States.

**101st Congress**

Pub. L. No. 101-511 - Nov. 5, 1990

Sec. 8020. None of the funds available to the Department of Defense may be used for the floating storage of petroleum or petroleum products except in vessels of or belonging to the United States.

The same provision has appeared in every DOD Appropriations Act from FY85 through FY92.

**CARBONYL IRON POWDERS  
Legislative Background**

**101st Congress**

Pub. L. No. 101-511, §835 Nov. 5, 1990

(a) LIMITATION. Section 2507 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(e) CARBONYL IRON POWDERS.(1) The Secretary of Defense shall require that only domestically manufactured carbonyl iron powders may be used in a system or item procured by or provided to the Department of Defense.

"(2) The Secretary of Defense may waive the restriction required by paragraph (1) if the Secretary certifies that such a restriction is not in the national interest.

"(3) After September 30, 1994, the Secretary may terminate the restriction required under paragraph (1) if the Secretary determines that continuing the restriction is not in the national interest.

"(4) In this subsection:

"(A) The term 'domestically manufactured' means manufactured in a facility located in the United States or Canada by an entity more than 50 percent of which is owned or controlled by citizens of the United States or Canada.

"(B) The term 'carbonyl iron powders' means powders or particles produced from the thermal decomposition of iron penta carbonyl."

(b) EFFECTIVE DATE. Section 2507(e) of title 10, United States Code, as added by subsection (a), shall apply with respect to systems or items procured by or provided to the Department of Defense after the date of the enactment of this Act.

## **102nd Congress**

Pub. L. No. 102-190, §835

Section 2507(e) of title 10, United States Code, is amended

(1) in paragraph (1), by striking out "The Secretary" and inserting in lieu thereof "Until January 1, 1993, the Secretary";

(2) by striking out paragraph (3);

(3) in paragraph (4)(A), by striking out "by an entity" and all that follows and inserting in lieu thereof a period; and

(4) by redesignating paragraph (4) as paragraph (3).

### **BALL BEARINGS AND ROLLER BEARINGS**

## **102nd Congress**

October 22, 1993: President George Bush signed Pub. L. No. 102-484, the Defense Authorization Act of 1993 with the following section.

Sec. 833. During fiscal years 1993, 1994, and 1995, the Secretary of Defense may not procure ball bearings or roller bearings other than in accordance with subpart 225.71 of part 225 of the Defense Federal Acquisition Regulation Supplement, as in effect on the date of the enactment of this Act.

### **RESTRICTION ON PURCHASE OF SONOBUOYS**

## **102nd Congress**

October 22, 1993: President George Bush signed Pub. L. No. 102-484, the Defense Authorization Act of 1993 with the following section

(a) In general.-- Section 2534 of title 10, United States Code, as redesignated by section 4202(a) and as amended by section 831, is further amended by adding at the end the following new subsection:  
"(f) SONOBUOYS - (1)The Secretary of Defense may not procure a sonobuoy manufactured in a foreign country if united States firms that manufacture sonobuoys are not permitted to compete on an equal basis with foreign manufacturing firms for the sale of sonobuoys in that foreign country.

"(2) The Secretary may waive the limitation in paragraph (1) with respect to a particular procurement of sonobuoys if the Secretary determines that such procurement is in the national security interests of the United States.

"(3) In this subsection, the term 'United States firm' has the meaning given such term in section 2532(d)(1) of this title."

(b) Effective Date.-- Subsection (f) if section 2534 of Title 10 United States Code, as added by subsection (a), shall apply with respect to solicitations for contracts issued after the expiration of the 120 day period beginning on the date of the enactment of this Act.

### C.3. Table of Congressionally Mandated Domestic Source Restrictions

CONGRESSIONALLY MANDATED DOMESTIC SOURCE RESTRICTIONS				
Restrictions/Preference Comments	Amendments/Changes	Nature of Restriction	Exemptions/Waivers	OSD Comments
Transportation by ocean Vessels: 33 Stat. 518 (Cargo Preference Act of 1904) (1904-Present) 10 USC 2631 (See also 46 USC App. 1241)	1961-Definition of privately owned U.S.-flag commercial vessels added.	Precludes transport of Army, Navy, Air Force, or merchant marine supplies by other than U.S. vessels	None stated. Presidential waiver based on unreasonable costs. (In 1985, Presidential waiver authority was delegated to the Secretary of Defense (SecDef).)	The restriction has not been evaluated to determine its impact on DoD and U.S. industry.
Food and clothing: (Berry Amendment) PL77-29 (1941) Fabrics PL82-488 (1952)  Specialty metals: PL92-570 (1972)  Hand/measuring tools: PL97-377 (1982-Present)	1952-Fabrics added. 1972-Specialty metals added. 1976-Stainless steel flatware added by PL94-212; threshold established at \$10,000 by PL94-419. 1977-Waiver authority added for specialty metals and chemical warfare protective clothing. 1982-Hand/measuring tools added. 1988-Threshold increased to \$25,000 by PL100-463.	Restricts DoD procurements to U.S. sources; \$25,000 threshold.	SecDef may waive on the basis of a determination that satisfactory quality and quantity are not available in the United States. Small purchases under \$25,000; Items for use outside the U.S.; domestic non-availability; specialty metals and chemical warfare protective clothing purchases when necessary to comply with international agreements and approved defense programs, or to promote RSI with NATO and Israel.	In cases where DoD demand is a very small part of industry shipments, broadly based restrictions do not protect either total U.S. industry or specific DoD items.
Construction of major components of the hull and super-structure of naval vessels; (Burns-Tollefson Amendment) PL88-446 (1964-Present)	1982-Waiver authority added by PL97-252. 1987-Revised by PL100-180 to include all DoD vessels, not just naval vessels. 1988-Coast Guard vessels added to restriction by PL100-448.	Restricts construction of vessels for any of the Armed Forces or Coast Guard to domestic shipyards.	None stated. President may authorize exceptions for national security purposes with notice to Congress.	Consideration has not been given to exempting non-critical vessels.
Carbonyl iron powders: 10 USC 2507(e) [Restriction expires after Jan. 1, 1993]	None.	Restricts DoD Procurement to U.S. sources.	SecDef may waive if the restriction is not in the national interest.	See DFARS 225.7014.
Ball bearing and roller bearings: PL102-484, § 832	None.	During FY93-95 SecDef must provide ball and roller bearings in accordance with DFARS SubPart 225.21	See DFARS exceptions for small purchase and commercial products.	No comment.
Sonobuoys: PL102-484, § 833 10 USC 2507(g)	None.	Restricts sonobuoy procurement from foreign countries which discriminate against U.S. sonobuoy manufacturers.	SecDef may waive if in national security interests.	No comment.

## CONGRESSIONALLY MANDATED DOMESTIC SOURCE RESTRICTIONS

Restrictions/Preference Comments	Amendments/Changes	Nature of Restriction	Exemptions/Waivers	OSD Comments
Multipassenger motor vehicles (buses); PL 90-500 (1968-Present) 10 USC 250(a)	None.	Prohibits purchasing, leasing, rental or other procurement of foreign buses.	None stated. (See comments.) SecDef is authorized by regulation exceptions to ensure purchases do not result in uneconomical procurement that adversely effect U.S. national interests.	The DFARS authorizes the head of the contracting activity (HCA) to make "exceptions" for urgent requirements for periods not to exceed time required for procurement or delivery of U.S. buses; when necessary to meet special but nonrecurring requirements; when foreign buses are available at no direct or indirect procurement cost to the United States.
R&D contracting: (Bayh Amendment) PL 92-570 (1972-Present)	None.	Prohibits contracting with foreign sources for R&D in connection with weapon systems and military equipment when a U.S. source is equally competent and can offer lower prices.	None Stated. No stated waiver authority.	When a U.S. and foreign source are considered equally competent the contracting officer must determine which source will provide required services at the lower estimated cost. This is tantamount to full and open competition.
Transportation by air carriers; PL 93-623 (1975-Present)	1980-Exemption provided under bilateral or multilateral air transport agreements with foreign governments if the agreement (1) is consistent with international aviation policy and (2) provides for exchange of similar rights and benefits.	Prohibits overseas transportation of Government-financed passengers and cargo by other than U.S. air carriers.	Restriction does not apply if U.S. carriers are not available. (Also see changes.)	The restriction has not been evaluated to determine its impact on DoD and U.S. industry.
Administrative motor vehicles; PL 97-114 (1981-1989)	1982-Added exemption for agreements with FRG, UK and Italy if vehicles procured are standardized or interoperable with those of host country. 1987-Added distinctions for vehicles used in U.S. and overseas and provided a termination date of 30 September 1989.	Restricts procurement of vehicles to U.S. and Canada unless contractor selected through competitive bidding; reciprocal access/opportunity to compete are required for vehicles used overseas.	1. Contracts less than \$50,000; 2. Contracts specifically authorized by law; 3. Vehicles used overseas for security, intelligence, and criminal investigative operations. SecDef and Service Secretaries may waive restriction if required vehicles are not available in sufficient quantity/satisfactory quality from the U.S. or Canada.	The restriction does not apply to prior contracts under agreements to support U.S. forces in Europe, but the SecDef may not enter into, renew, or extend such agreements during the restricted period unless the agreements include this restriction.

## CONGRESSIONALLY MANDATED DOMESTIC SOURCE RESTRICTIONS

Restrictions/Preference Comments	Amendments/Changes	Nature of Restriction	Exemptions/Waivers	OSD Comments
Aircraft ejection seats: PL 97-377 (1982-1989)	Original restriction suspended F/A-18 program unless U.S. seats were installed. In FY84, PL 98-212 substituted a reciprocity restriction applicable to all U.S. seat procurements.	Restricts DoD procurement to U.S. and foreign sources whose governments provide reciprocal market access to U.S. firms.	Restriction does not apply to foreign countries that permit U.S. firms access to their seat procurements. Since FY85, restriction applies only to ejection seats installed in U.S. produced aircraft. No stated waiver authority.	Original restriction was inspired by cost of UK seat for F/A-18 compared to U.S. candidate seat and concern about U.S. industry/jobs.
Large-caliber cannon production technology: (Stratton Amendment) PL97-114 PL99-661 (1982-Present) 10 USC 4542	1986-For fiscal year after FY86, exemptions were allowed (as stated) that were not included in the original restriction. 1990-transfers to "friendly foreign countries" permitted.	Precludes transfer to a foreign country of technical data for a defense item manufactured in a U.S. arsenal or assistance to a foreign country in producing such items.	Transfer to friendly countries permitted if the technology is not unique, if transfer preserves production base of the U.S. arsenal, and if SecDef enters into a coproduction MOU circumscribing third-country transfers. Any third-country transfers are subject to Presidential certification of compliance with the Arms Export Control Act and beneficial impact on U.S. production base for cannon. No stated waiver authority. Secretary of the Army determines exemptions on a case-by-case basis with strict requirements to report to the Congress.	The restriction is controversial because it affects international armaments cooperation programs.
Coal or coke: (for use at DoD facilities in Europe) PL97-377 (1982-Present)	None.	Prohibits purchases of coal from non-U.S. suppliers.	Restriction does not apply if U.S. coal or coke are not available. No stated waiver authority.	The restriction has caused concern in the U.S. about high overseas shipping costs and in foreign countries about U.S. "dirty coal."
Air Circuit Breakers: (for naval vessels) 10 USC 2507(f)	None.	50% components test for U.S. manufacture.	Exemption for spares and repair parts.	No comment.
Floating storage of petroleum: PL 98-396 (1984-Present)	None.	Restricts floating storage of petroleum except in U.S. vessels.	None stated. No stated waiver authority.	The restriction has not been evaluated to determine its impact on DoD and U.S. industry.

## CONGRESSIONALLY MANDATED DOMESTIC SOURCE RESTRICTIONS

Restrictions/Preference Comments	Amendments/Changes	Nature of Restriction	Exemptions/Waivers	OSD Comments
120mm mortars and 120mm mortar ammunition: PL99-190 (1985-Present)	None.	Restricts DoD procurement to U.S. sources.	Not applicable for mortars or ammunition required for testing and evaluation, type classification, or equipping the Army's Ninth Infantry Division (Motorized). No stated waiver authority.	The restriction duplicates the provisions of the Arsenal Act of 1950, as amended, which requires the Secretary of the Army to purchase supplies from U.S. arsenals.
RDT&E contracts for the SDI program: PL 100-180 (1985-Present)	None.	Restricts SDI RDT&E to U.S. sources.	Exempts foreign contracts performed in the U.S. and contracts for antiballistic missile systems, or contracts where foreign government/firm shares substantial costs. SecDef may suspend temporarily if he certifies to Congress that no U.S. firm can perform such RDT&E at equal or less cost.	DFARS permits head of contracting activity certification that RDT&E cannot be competitively performed by a U.S. firm at a price equal to or less than that of a foreign firm.
Repair and maintenance of naval vessels: PL99-591 (1986-Present) 10 USC 7309	1993-PL102-484, § 1012, provides that U.S. homeported vessels may not engage in foreign repairs during 15 months prior to return to U.S.	Prohibits overhaul, repair, and maintenance of U.S. homeported naval vessels in foreign-owned shipyards.	Waiver authority for voyage repairs and exemption for inflatable boats.	Other alternatives, including an industry action plan and incentives for modernization and restructuring have not been considered.
Machine tools: (Mattingly Amendment) PL 99-591 (1986-87) PL 100-202 (1987-88) PL 100-463 (1988-91)  (See also certain values and machine tools below).	1988-For FY89 (PL100-463), the restriction was expanded to include 24 machine tool FSCs.	Restricts DOD procurement of selected machine tools in 24 Federal Supply Classes (FSCs) to U.S. and Canadian manufacturers and applies to machine tools for use in DOD-owned or controlled facilities.	None stated. May be waived on case-by-case basis by Service Secretary if adequate domestic supply of machine tools is not available to meet DOD needs on a timely basis.	DOD's share of U.S. market is limited (about 10%). A "Domestic Action Plan" to revitalize U.S. machine tool industry, by direction of the President, has been implemented by the Department of Commerce with DOD input.
Anchor chain and mooring chain: PL101-511 (1987-Present) PL100-463 (for FY89)	PL100-202 restricted purchases to domestic (U.S. and Canadian) suppliers; OSD-imposed restriction DFARS Subpart 225.7.	Restricts DoD procurement to U.S. sources only.(See changes.)	None stated. Service Secretary responsible for procurement may waive if DoD requirements cannot be met on a timely basis from U.S. sources.	The restriction has caused a Canadian manufacturer to open a plant in the United States, and triggered protests by reciprocal MOU countries, since mooring chain is not a mobilization item.

## CONGRESSIONALLY MANDATED DOMESTIC SOURCE RESTRICTIONS

Restrictions/Preference Comments	Amendments/Changes	Nature of Restriction	Exemptions/Waivers	OSD Comments
Certain chemical weapons antidote: PL 100-180 (1987-Present) 10 USC 2597(b)	None.	Restricts DOD procurement of antidote in automatic injectors (and components) to U.S. companies that are DOD Industrial Preparedness Planning (IPP) producers (and other conditions).	None stated. May be waived if the SecDef through the Under Secretary of Defense for Acquisition, determines that an additional source is critical to U.S. national security.	To avoid the restriction, a Dutch firm has begun production of injectors and antidotes in the United States.
Supercomputers: PL 100-202 (1987)	FY88 funds may be obligated only for system competitively selected for sources. Installations at academic institutions.	Restricts Army procurement to U.S.	None stated. May be waived if SecDef certifies to Congress that foreign acquisition is necessary to acquire capability not available from U.S. manufacturers.	No comment.
PAN carbon fibers: PL 100-202 (1987-Present)	None.	Requires that 50% of DOD requirements be procured from domestic sources by 1992.	No stated exemptions or waiver authority.	Annual goals to achieve requirements are: 15% of total DOD requirements by 1988-89, 20% by 1990, 25% by 1991, and 50% by 1992.
Certain valves and machine tools: PL 100-456 (1988-Present) 10 USC 2507(d)	None.	Restricts DOD procurement of certain valves (2 FSCs) and machine tools (24 FSCs) to U.S. and Canadian manufacturers. Renewed effective through FY96.	None stated. May be waived by SecDef under any of six circumstances: unreasonable cost or delay; U.S. producers not jeopardized by foreign country and that country provides reciprocal access; satisfactory quality items are not available from U.S. or Canadian sources; restriction impedes cooperative programs with a foreign country and that country provides reciprocal access; procurement is less than \$25,000 and small purchase procedures are used; or restriction would result in a sole source for the item in the U.S. or Canada.	The FY89 DOD Appropriations Act (PL100-463) continued the machine tool restriction of the FY87 and FY88 appropriations acts (PL99-591 and PL 100-202), and expanded the restriction by adding three new FSC codes to correspond to the FY89 Authorization Act (PL 100-456), but did not alter the waiver authority. Therefore the two current statutory restrictions (PL 100-456 and PL 100-463) are not in full agreement.
Night vision image intensifier tubes and devices: PL 101-165	None.	Restricts DOD Procurement of 2nd and 3rd generation night vision devices unless manufactured in U.S. or Canada.	Exception where: (a) inadequate domestic supplies are available to meet DOD requirement on a timely basis; and (b) a certification to Congress of such an acquisition for national security purposes.	No comment.

## APPENDIX D

### STATUTORY EXEMPTIONS FOR COMMERCIAL ITEM CONTRACTS

In the early stages of drafting the proposed commercial item statute discussed in Chapter 8 of this Report, the Panel became aware of general complaints that existing statutes and regulations hindered the acquisition of commercial items because they imposed requirements on vendors of those items that were inconsistent with typical commercial practice and could not be implemented for Government contracts at all or only at a cost disproportionately greater than the profits to be made. In response to these complaints, the Panel's commercial items working group contacted DOD and industry for specific examples of statutes or regulations which should be modified to facilitate commercial item acquisition. Ultimately, the Panel obtained a number of lists of regulations, statutes, and Executive Orders, from which it created the omnibus table set out in this Appendix. Much of this material had been gathered by DOD and industry at the time of the Defense Management Review or at the time DFARS Part 211 was being debated. In general, the lists focused on regulations rather than statutes. Supporting materials related to each statute and Executive Order in the table -- including the statute itself, related regulations, and any recent commentary -- were collected and placed by the staff into a five-volume compendium.

The omnibus table was then distributed to each Working Group. The Working Group to which a statute had been assigned for general analysis was asked to review the statute with specific reference to whether or not the statute placed a burden on the acquisition of commercial items sufficient to justify an exemption for commercial item contracts. If a Working Group recommended an exemption, that recommendation was taken to the Panel as a whole for decision. A reduced table was prepared, which was reviewed during the final drafting of the Report for consistency with the Panel's other recommendations. The Panel's recommendations on exemptions were also circulated to interested parties for comment and were debated at a number of Panel meetings at which the public was invited to participate in the discussions. The table set out in Chapter 8 of the Report contains the Panel's final recommendations on statutory exemptions required to remove burdens to the acquisition of commercial items. So that others may make their own judgment about statutes for which an exemption may be required, the Panel is publishing in this Appendix the omnibus table from which its analysis began.

In addition, in the course of reviewing the omnibus table, it became apparent that a statute itself might not require an exemption, but that regulations based on the statute did not adequately account for commercial item contracts. Certain Executive Orders were also identified as imposing significant burdens. Because the mandate of the Panel is to review statutes, not regulations or Executive Orders, the final table in Chapter 8 is limited to *statutes* for which an exemption is required. So that the Panel's work will not be lost, the omnibus table set out below includes regulations and Executive Orders that were identified to the Panel as barriers to commercial item acquisitions. The Panel has taken no position on whether the regulations or Executive Orders should be revised.

**Omnibus Table Of Laws, Regulations And Executive Orders  
Identified As Potential Barriers To Commercial Item Acquisition**

Statute	Regulations Based on Statute	Description of Statutes and Regulations	Reasons for Commercial Item Exemption
10 U.S.C. § 2207	52.203-3	Prohibition on gratuities. Requires clause permitting termination of contract obtained through bribe, gift, or gratuity; provides for exemplary damages in an amount equal to 3 to 10 times actual damages.	None. Termination provision is similar to common law remedy; exemplary damages seem extreme, but punitive damages in similar amounts might be available at common law.
10 U.S.C. § 2301 note	252.219-7001	Small business set-asides.	None. Set-asides at the prime contractor level are not a problem for commercial contracting.
10 U.S.C. § 2306a	252.211-7010 -7011; 52.215-22; 52.215-23	Truth in Negotiation Act (TINA); Price reduction for defective cost and pricing data - contract modifications; audit of cost or pricing data.	Proposed 2xx5 provides an additional source of authority for pricing purchases of commercial items. Even as amended by the Panel, section 2306a is not adequate to provide a complete solution for commercial items. If the Panel's proposed section 2xx5 is not adopted, some other comprehensive amendment to §2306a as currently drafted will be required since there is little doubt that the provisions of §2306a create the single greatest impediment to the purchase of commercial items.
10 U.S.C. § 2307(e)	252.232-7006	Permits contracting officer to reduce or suspend advance and progress payments upon suspicion of fraud.	None.
10 U.S.C. § 2313	52.215-1; 52.215-2	Examination of books and records of contractor by DOD.	Proposed section 2xx5(d) is intended to provide the Government's exclusive audit right under a contract. See the discussion of section 2xx5(d) in Chapter 8 for the rationale.

10 U.S.C. § 2320-2321	252.211-7015 through -7017	Rights in technical data and computer software; validation of proprietary data restrictions.	The requirements of this statute are inconsistent with normal commercial practices on data rights. The Panel has proposed specific amendments to section 2320 to deal with this problem.
10 U.S.C. § 2323		Set-asides for section 1207 entities.	None. Set-asides at the prime contractor level do not create any problem.
10 U.S.C. § 2324	252.231-7001	Allowable costs under defense contracts; prescribes costs that may be incurred in overhead pools; Penalties for unallowable costs.	The Panel has recommended that the detailed provisions on cost allowability contained in this section be repealed since they have been implemented in regulation for many years. If this course is adopted, there is no need for an exemption. In addition, because the Panel has recommended that commercial items be purchased solely under fixed price contracts, this section will have little or no applicability to commercial items as proposed. Should flexibly priced contracts be used to purchase commercial items, commercial sellers might have to be exempted from the detailed cost principles contained in this section because it would require changes to a commercial seller's established accounting system.
10 U.S.C. § 2327	252.209-7001	Requires prime to make disclosure of ownership or control by a foreign government that supports terrorism; prohibits prime contracts with companies owned or controlled by such governments.	None. The Panel did, however, recommend repeal of this provision. See generally Chapter 7 of the Report.
10 U.S.C. § 2384(b)	Part 217.7300	Requires seller to mark supplies with name of seller, National Stock Number, and contractor part number; if seller is not the manufacturer, statute requires item to be marked with name of actual manufacturer. There is an exemption for commercial items purchased competitively or at an established catalog or market price.	Section 2384(b) contains an exemption for items sold under the market or catalog price exemption in TINA. This is not broad enough to accommodate all commercial items, so that an exemption in section 2384(b) is required to implement the Panel's commercial item approach and such an amendment has been recommended by the Panel. If 2384(b) is amended as proposed then there is no need for an exemption.
10 U.S.C. § 2393	52.209-5, -6	Prohibits prime contractor from using debarred or suspended subcontractors.	Prohibition on doing business with debarred or suspended prime contractors does not create a problem. A commercial seller will often have established its sources of supply and subcontractors prior to sale to the Government. Therefore, exemption from subcontractor approval provisions is required.

10 U.S.C. § 2397	252.203-7000	Prohibition on Compensation to Former DOD Employees.	The Panel has recommended repeal. Reports intended to identify employees switching sides between DOD and major defense firms; useless paperwork burden in commercial context.
10 U.S.C. § 2397a	252.203-7000	Prohibition on Compensation to Former DOD Employees.	The Panel has recommended repeal. Restrictions on job negotiations with defense contractors; duplication of other law and would unnecessarily burden commercial practices.
10 U.S.C. § 2397b	252.203-7000	Prohibition on Compensation to Former DOD Employees.	The Panel has recommended repeal. Forbids plant representatives and senior defense negotiators from working for major defense firms; cost of screening for occasional retirees would far exceed return for commercial sellers.
10 U.S.C. § 2397c	252.203-7000	Prohibition on Compensation to Former DOD Employees.	The Panel has recommended repeal. Reports and penalties for the foregoing section 2397 restrictions would have no independent purpose.
10 U.S.C. § 2402	52.203-6	Prohibits primes from entering into any agreement with subcontractor which prevents subcontractor from selling any item or process directly to U.S.	The flow-down is not consistent with commercial practices, in which subcontractor system will be established before a contract is awarded. If U.S. needs direct purchase of subcontracted items, let it negotiate for them. The Panel's primary recommendation is that this statute be repealed.
10 U.S.C. § 2403	252.246-7001	Major Weapons Systems; Warranty of Data; requires primes to warrant that system will work as required and be free from defects.	Probably not relevant to commercial item contracts.
10 U.S.C. § 2406	252.215-7001	Contractor records; requires contractor to permit access to records relating to cost and pricing data under covered contracts, which are major weapons systems contracts where 10 U.S.C. § 2306a is applicable.	The Panel has proposed that section 2406 be repealed as part of consolidating all audit statutes into a revised version of 10 U.S.C. § 2313. If the Panel's proposal is not adopted then an exemption would be required for commercial items.
10 U.S.C. § 2408	252.203-7001	Prohibition of employment of persons convicted of fraud.	Commercial sellers should be able to utilize their established employees in performing Government contracts. There is no reason to burden commercial sellers with need to screen employees when they get an occasional Government contract.

10 U.S.C. § 2409a	252.203-7003	Prohibition against retaliation against employee who discloses U.S. information evidencing a violation of law; applies to contracts over \$500,000; commercial item contracts awarded without cost and pricing data are exempt.	None. The common law of most jurisdictions makes such retaliation a tort.
10 U.S.C. § 2410	252.233-7000	Certification of claims and requests for adjustments.	None.
10 U.S.C. § 2410b		Requires SECDEF to regulate contractor inventory accounting systems.	None. The statute itself creates no problems since it only authorizes regulations; regulations must deal sensibly with vendors of commercial items.
10 U.S.C. § 2416	252.205-7000	Requires contractors to provide DOD names of persons performing subcontracting, with address and phone number.	None.
10 U.S.C. § 2506	25.1 and 25.2	DOD variant of Buy American Act using component test to identify "American" product.	Application of current component-oriented Buy American Act restrictions to commercial buying may irrationally exclude items DOD wants to procure. If Buy American Act is modified as the Panel has recommended to include "substantial transformation" test, then should not be a problem. <i>See generally</i> Chapter 7 of the Report.
10 U.S.C. § 2507	DFARS Part 225	Section 2507 contains specific U.S. source restrictions applicable to the acquisition of identified products.	To the extent that this section requires sellers of commercial items to vary the source of components, it interferes with the ability of DOD to buy those items. The Panel has recommended a complete revision of this section, which would include a repeal of most restrictions currently contained in section 2507. However, an exemption is required from the remaining restrictions. <i>See generally</i> Chapter 7 of the Report.
10 U.S.C. § 2631	252.247-7022, -7023, -7024	Requires transportation of items by sea in U.S. flag vessels.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts.
12 U.S.C. § 2779	252.225-7027	Limitation on fees and sales commissions in sales to foreign governments.	None.

15 U.S.C. § 637(d)	52.219-8; -9; -16; 19.705; 19.708; 226.7; 252.211 -7003; -7020	Subcontracting with small and small disadvantaged businesses; small business subcontracting plans; liquidated damages. Section 637(d) requires that small businesses be given "maximum practicable opportunity" to participate in Government contracts as subcontractors and mandates that the clause set out in section 637(d)(3) be placed in all contracts other than small purchase contracts, personal service contracts, and contracts to be performed outside of the U. S. Section 637(d)(4) mandates the negotiation of a small and minority subcontracting plan in all negotiated procurements in excess of \$500,000. Adherence to the plan is policed by liquidated damages. There is no exemption for contracts for commercial items.	There is no problem with the policy prescribed by section 637(d)(3). In negotiated procurements of commercial items, the subcontracting plan mandated by section 637(d)(4) may well conflict with established subcontracting arrangements of the commercial supplier and is obviously impractical when goods are sold to the Government from inventory. While section 647(d)(4)(B)(iv) limits use of the clause to situations "which offer subcontracting possibilities," comments received from industry indicate that this exception is not being properly applied to exempt even shipments of commercial items from inventory. For the same reason, commercial item contracts should be exempt from section 637(d)(5), which extends the requirements in section 637(d)(4) to contracts awarded through competition, and section 637(d)(6) which contains the clauses implementing section 637(d)(5). The Panel recommends, therefore, express exemptions to sections 637(d)(4), 637(d)(5), and 637(d)(6) for commercial item contracts.
15 U.S.C. § 644(d), (e), and (f)	52.220-3; -4	Preference for labor surplus area contracting. Requires U.S. to give priority to small and labor surplus area contractors. Subcontracting plan required for negotiated contracts over \$500,000.	The regulations create a subcontracting obligation that is inconsistent with normal commercial practices, in which subcontracts are arranged well in advance of shipments. The regulations do not contain any exemption for commercial items. While the regulations do not appear to be required by 15 U.S.C. § 644, the regulation writers seem to think otherwise. To avoid any doubt, therefore, an exemption is granted.
18 U.S.C. § 431	52.203-1	Prohibits contracts with Members of Congress. Any contract violating this clause is null and void.	None.
18 U.S.C. § 432	52.203-1	Punishes any official who knowingly enters into a U.S. contract with Members of Congress.	None.
18 U.S.C. § 1905	52.215-12	Prohibits U.S. from disclosing trade secret information.	None.

19 U.S.C. § 1202	52.225-10	Duty-Free entry.	The statute does not create a problem. The regulations are intended to ensure that the Government does not pay duties on goods being furnished under Government contracts. Since the essence of a commercial item is that it is built without regard to the ultimate purchaser, a vendor of a commercial item will not be able to determine when it is necessary to obtain a duty-free certificate. The regulations should be amended to exempt commercial items.
19 U.S.C. § 1309	52.225-10	Duty-Free entry.	The statute does not create a problem. Implementing regulations are intended to ensure that the Government does not pay duties on goods being furnished under Government contracts. Since the essence of a commercial item is that it is built without regard to the ultimate purchaser, a vendor of a commercial item will not be able to determine when it is necessary to obtain a duty-free certificate. The regulations should be amended to exempt commercial items.
19 U.S.C. § 2501 et seq.	252.225-7006, -7007	Trade Agreements Act of 1979; DOD Balance of Payment Program.	The Trade Agreements Act does not create burden for items substantially transformed in U.S. Balance of Payments program using component test for origin and should be revised to use substantial transformation test. <i>See generally</i> Chapter 7 of the Report.
19 U.S.C. § 2701 et seq.	52.225-10	President may grant duty-free entry status.	The statute does not create a problem. Implementing regulations are intended to ensure that the Government does not pay duties on goods being furnished under Government contracts. Since the essence of a commercial item is that it is built without regard to the ultimate purchaser, a vendor of a commercial item will not be able to determine when it is necessary to obtain a duty-free certificate. The regulations should be amended to exempt commercial items. <i>See generally</i> Chapter 7 of the Report.
22 U.S.C. § 2370	52.225-11	Restrictions on certain foreign purchases. Permits embargo of Cuba.	None.
22 U.S.C. § 2755	252.225-7028	Prohibits sales to countries that discriminate on the basis of race, religion, national origin, or sex.	None.

26 U.S.C. § 6050M	52.204-3	Taxpayer identification. Requires contractors to furnish Taxpayer Identification Number (TIN).	None. Might be a problem if regulations require reporting of TIN of subcontractors.
28 U.S.C. § 1498; 35 U.S.C. § 283	27.203; 52.227-1	Patent infringement; sole remedy against U.S.; injunctive relief prohibited.	The Panel has recommended modifying section 1498 to permit DOD to withhold consent to patent infringement in commercial item acquisitions, but also recommended that section 283 be modified to preclude injunctive relief against performance of a Government contract even if consent is withheld.
29 U.S.C. § 793	52.222-36	Rehabilitation Act of 1973; requires affirmative action for employment and advancement of handicapped individuals. Act applies to companies with 50 or more employees or annual U.S. contracts of \$50,000 or more.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts. Especially since discrimination against the handicapped is prohibited for all employers under Americans with Disabilities Act, there should be an exemption for commercial items.
31 U.S.C. § 203	52.232-23	Assignment of Claims Act; prohibits assignment of contract claims except to bona fide financial institution.	This should not be a problem, since most commercial financing could be arranged through an eligible financial institution with, if necessary, escrow arrangements.
31 U.S.C. § 1352 note	52.203-11; -12	Byrd Amendment.	Probably does not apply to commercial suppliers with respect to contracts for commercial supplies, but should be exempted for clarity.
31 U.S.C. § 3726	252.242-7002; 52.232-33	Submission of commercial freight bills for audit; Assignment of claims.	None. Applies only to transportation performed at Government expense by carriers or freight forwarders.
31 U.S.C. § 3901	252.211-7001	Prompt payment act.	None.
33 U.S.C. § 1368		Clean Water Act; prohibition against manufacturing products in debarred facility.	None. Facility is debarred only so long as it is out of compliance with Clean Water Act. Commercial vendors should know whether any of their facilities are debarred and whether commercial items were manufactured in those facilities.
35 U.S.C. §§ 181-88	52.227-10	Patent secrecy order.	Statute applies whether or not a Government contract is being performed; regulations tie to Government contracts. Since this applies regardless of contract, it can be applied to commercial items.

38 U.S.C. § 4212	52.222-35	Affirmative action for disabled and VietNam Era Veterans.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts. In addition, this statute has a sunset provision and will no longer be a requirement after 1994.
40 U.S.C. § 327-333	52.222-4	Contract work hours and safety standards act. Requires 40 hour work week and 1.5 time for overtime.	Should not be a problem because requirements are essentially the same as those under the Fair Labor Standards Act, which applies to all U.S. companies.
41 U.S.C. §§ 10a-10d	25.1 and 25.2	Buy-American Act.	Application of current component-oriented Buy American Act restrictions to commercial items may irrationally exclude items DOD wants to procure. If Executive Order implementing Buy American Act is modified to include "substantial transformation" test, or if Panel substitute is adopted, then should not be a problem. See extensive discussion in Chapter 7 of the Report.
41 U.S.C. § 22	52.203-1	Members of Congress are not to share in any Government contract.	None.
41 U.S.C. § 34-45	52.222-19	Walsh-Healey Public Contracts Act of 1936.	None. Panel recommends that this Act be repealed because it no longer serves a purpose.
41 U.S.C. §§ 51-58	52.203-7	Anti-Kickback Act; prohibits payments to any prime or any employee of the prime; from any subcontractor; violation voids contract.	While many companies may prohibit some forms of payments by subcontractors to employees, commercial practice typically permits some forms of gratuities (such as meals or entertainment) that will be prohibited by this law. Accordingly, it constitutes too much of a burden for commercial seller to "police" existing supplier networks to ensure compliance for occasional Government contracts.
41 U.S.C. § 405	52.204-4	Contractor Establishment Code.	None.

41 U.S.C. § 422	52.230-3; -4	Cost Accounting Standards (CAS); Cost Accounting Standards Board (CASB).	Statute establishes Cost Accounting Standards Board and provides broad authority to Board to promulgate regulations. 41 U.S.C. § 422(f)(2) exempts contracts and subcontracts based on established catalog or market prices (as defined in TINA) from CAS coverage. This exemption should be broadened to include commercial items as defined in proposed section 2302. In addition, section 422(k) should be changed to clarify that it has no application to contracts for commercial items even though such items may be made by a company that must comply with CAS because it furnishes CAS-covered items as well as commercial items. The Panel has recommended that the CASB make these modifications through its rule making function, since it has authority to create classes of exemptions. <i>See generally</i> Chapter 2, subchapter 2.4. If the CASB does not take such action, then an exemption would be required.
41 U.S.C. § 423	52.203-8; -9; -10	Procurement Integrity Act -- Requirement for certificate of procurement integrity.	The certification required by this section cannot be imposed without a major administrative burden of tracking all procurement integrity restrictions, which are totally inconsistent with commercial practices and should not apply. The Panel has recommended as its primary recommendation that this statute be repealed and replaced by totally new language and that its fundamental prohibition on the improper use of private information be incorporated in this section and in 18 U.S.C. § 207. If that proposal is adopted, there would be no need for an exemption from either the new section 423 or the proposed section 207.
41 U.S.C. § 601-13	52.233-1; -17	Disputes; interest.	None. The disputes procedure is not very different from commercial alternative dispute resolution clauses.

41 U.S.C. § 701	52.223-5; -6	Drug Free Workplace certifications. This section requires employers to establish drug-free awareness programs and to report any convictions by their employees for drug-related offenses.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts.
42 U.S.C. § 7606		Clean Air Act.	None. Facility is debarred only so long as it is out of compliance with Clean Air Act. Commercial vendors should know whether any of their facilities are debarred and whether commercial items were manufactured in those facilities.
46 U.S.C. App. 1241(b)	52.247-64	Preference for U.S. flag vessels; requires 50% or more of gross tonnage of materials and equipment procured under Government contracts be transported in U.S. flag vessels.	Commercial sellers should be able to utilize their established facilities, technology, supplier networks, processes, employees and other commercial business procedures in performing Government contracts. <i>See generally</i> Chapter 7 of the Report.
49 U.S.C. § 1517	47.401; -405; 52.247-63(e) (flow-down)	Fly America Act.	None. Applies only to flights paid for by U.S., so no interference with ordinary transportation methods used by seller except for final transportation to Government.
50 U.S.C. App. 2061-2170	52.212-7; -8	Defense Production Act; Defense Priority Rating System; Exon-Florio Amendment.	The statute does not create a problem, but the flow-down requirements in the regulations may disrupt established subcontractor systems. The regulations should be modified to delete the flow-down requirement when commercial items are being acquired. In addition, 50 U.S.C. § 2071(b) states: "The powers granted in this section shall not be used to control the general distribution of any material in the civilian market unless the President finds (1) such material is a scarce and critical material essential to the national defense . . ." This finding has not been made to support the regulations. <i>See generally</i> Chapter 7 of the Report.
EO 10865; EO 10909	52.204-2	Safeguarding of classified information.	None.
EO 11246	52.222-21; -22; -24, -28	Certification of non-segregated facilities; Previous contract compliance reports; Pre-Award on-site equal opportunity compliance review; Equal opportunity pre-award clearance of subcontracts.	None.

EO 11738	52.223-1	Clean Air and Water Certification.	None.
EO 11755	52.222-3	Convict labor.	None.
EO 11758	52.222-37	Employment reports on special disabled.	None.
EO 12138	252.211-7020; 52.219-13	Business type -- Commercial Items; utilization of women-owned small business.	None.

## APPENDIX E

### OTHER ACQUISITION STATUTES

#### E.1. Introduction

As indicated in the Approach section of the introduction, the Panel identified for review over 889 acquisition-related statutory provisions with a goal to minimize the possibility of missing any important statutory provisions. As a result of this thorough search, the Panel identified many statutory provisions that were only marginally related to the acquisition process. Subsequently, the Panel decided that action on these statutory provisions would not specifically promote the objectives Congress set forth in its tasking to the Panel. Typically, these provisions did not directly impact the buyer-seller relationship in the context of DOD procurement. Consequently, the number of statutory provisions the Panel reviewed in depth was less than the total number originally identified. Those statutory provisions considered outside the scope of the Panel's charter and not subjected to a detailed review are listed in this Appendix for information. They fell into two main categories: (1) Statutes Marginally Affecting The Buyer-Seller Relationship, and (2) Parallel Statutory Provisions.

#### E.2. Statutes Marginally Affecting The Buyer-Seller Relationship

The charter of the Panel under Pub. L. No. 101-510 directed that DOD acquisition laws be reviewed and recommendations be made to eliminate or amend any such laws that are adversely impacting the establishment and administration of effective and efficient buyer-seller relationships. In selecting the laws for review, the Panel determined that certain laws, originally selected for review, did not directly impact the buyer-seller relationship. Accordingly, the Panel decided not to review these laws in detail. Statutory provisions that fell into these categories included (a) those that dealt with the structure of DOD organizational components, (b) those that addressed acquisition corps issues, including training, (c) those that were related to commissary matters, and (d) statutes that involved non-appropriated activities. In addition, statutes that dealt with traditional supply type issues, such as cataloging, standardization, transportation, distribution, and storage also were not reviewed. These statutory provisions are listed below by their code citations and short titles for informational purposes only.

7 U.S.C. § 2131	Congressional statement of policy
10 U.S.C. § 131	Office of the Secretary of Defense

10 U.S.C. § 132	Deputy Secretary of Defense
10 U.S.C. § 133	Under Secretary of Defense for Acquisition
10 U.S.C. § 133a	Deputy Under Secretary of Defense for Acquisition
10 U.S.C. § 134	Under Secretary of Defense for Policy
10 U.S.C. § 135	Director of Defense Research and Engineering
10 U.S.C. § 136	Assistant Secretaries of Defense
10 U.S.C. § 137	Comptroller
10 U.S.C. § 138	Director of Operational Test and Evaluation
10 U.S.C. § 139	General Counsel
10 U.S.C. § 140	Inspector General
10 U.S.C. § 141	Assistant to the Secretary of Defense for Atomic Energy
10 U.S.C. § 1621	Definitions
10 U.S.C. § 1623	Education, training, and experience requirements: general and flag officers
10 U.S.C. § 1624	Training program: Quality assurance personnel
10 U.S.C. § 1701	Management policies
10 U.S.C. § 1702	Under Secretary of Defense for Acquisition: authorities and responsibilities
10 U.S.C. § 1703	Director of Acquisition Education, Training, and Career Development
10 U.S.C. § 1704	Service acquisition executives: authorities and responsibilities
10 U.S.C. § 1705	Directors of Acquisition Career Management in the military department
10 U.S.C. § 1706	Acquisition career program boards
10 U.S.C. § 1707	Personnel in the Office of the SECDEF and in the Defense Agencies
10 U.S.C. § 1721	Designation of acquisition positions
10 U.S.C. § 1722	Career development
10 U.S.C. § 1723	General education, training, and experience requirements
10 U.S.C. § 1724	Contracting positions: qualification requirements
10 U.S.C. § 1725	Office of Personnel Management approval
10 U.S.C. § 1731	Acquisition Corps: in general
10 U.S.C. § 1732	Selection criteria and procedures
10 U.S.C. § 1733	Critical acquisition positions
10 U.S.C. § 1734	Career development
10 U.S.C. § 1735	Education, training, and experience requirements for critical acquisition positions
10 U.S.C. § 1736	Applicability
10 U.S.C. § 1737	Definitions and general provisions
10 U.S.C. § 1741	Policies and programs: establishment and implementation
10 U.S.C. § 1742	Intern Program
10 U.S.C. § 1743	Cooperative education program
10 U.S.C. § 1744	Scholarship program
10 U.S.C. § 1745	Additional education and training programs available to acquisition personnel
10 U.S.C. § 1746	Defense acquisition university structure
10 U.S.C. § 1761	Management information system
10 U.S.C. § 1762	Report to Secretary of Defense
10 U.S.C. § 1763	Reassignment of authority

10 U.S.C. § 1764	Authority to establish different minimum experience requirements
10 U.S.C. § 2390	Prohibition on the sale of certain defense articles from the stocks of the Department of Defense
10 U.S.C. § 2391	Military base reuse studies and community planning assistance
10 U.S.C. § 2396	Advances for pmts for compliance with foreign laws, rent in foreign countries, tuition and pay for supplies of armed forces of friendly foreign countries
10 U.S.C. § 2451	Defense supply management
10 U.S.C. § 2452	Duties of Secretary of Defense
10 U.S.C. § 2452N	Duties of Secretary of Defense
10 U.S.C. § 2453	Supply catalog: distribution and use
10 U.S.C. § 2454	Supply catalog: new or obsolete items
10 U.S.C. § 2456	Coordination with General Services Administration
10 U.S.C. § 2458	Inventory management policies
10 U.S.C. § 2482	Commissary stores: private operation
10 U.S.C. § 2484	Commissary stores: expenses
10 U.S.C. § 2485	Donation of unmarketable food: Commissary stores and other activities
10 U.S.C. § 2486	Commissary stores: merchandise that may be sold; uniform surcharges & pricing
10 U.S.C. § 2487	Commissary stores: limitation on release of sales information
10 U.S.C. § 2488	Nonappropriated fund instrumentalities: purchase of alcoholic beverages
10 U.S.C. § 2489	Overseas package stores: treatment of United States wines
10 U.S.C. § 2631	Supplies: preference to United States vessels
10 U.S.C. § 4536	Equipment: post bakeries, schools, kitchens, and mess halls
10 U.S.C. § 7211	Attendance at meetings of technical, professional, or scientific organizations
10 U.S.C. § 7291	Classification
10 U.S.C. § 7291N	Depot level maintenance of ships home ported in Japan (Pub. L. No. 101-189, S.1614)
10 U.S.C. § 7297	Changing category or type: limitation
10 U.S.C. § 7523	Tolls and fares: payment or reimbursement
10 U.S.C. § 7524	Marine mammals: use for national defense purposes
10 U.S.C. § 9511	Definitions
10 U.S.C. § 9536	Equipment: bakeries, schools, kitchens, and mess halls
17 U.S.C. § 101	Subject matter & scope of copyright
17 U.S.C. § 102	Subject matter of copyright: In general
17 U.S.C. § 103	Subject matter of copyright: Compilations and derivative works
17 U.S.C. § 104	Subject matter of copyright; national origin
17 U.S.C. § 106	Exclusive rights in copyrighted works
17 U.S.C. § 107	Limitations on exclusive rights: fair use
17 U.S.C. § 108	Limitations on exclusive rights: Reproduction by libraries and archives
17 U.S.C. § 109	Limitations on exclusive rights: Effect of transfer of particular copy or phonorecord
17 U.S.C. § 110	Limitations on exclusive rights: Exemption of certain performances and displays

17 U.S.C. § 111	Limitations on exclusive rights: Secondary transmissions
17 U.S.C. § 112	Limitations on exclusive rights: Ephemeral recordings
17 U.S.C. § 113	Scope of exclusive rights in pictorial, graphic, and sculptural works
17 U.S.C. § 114	Scope of exclusive rights in sound recordings
17 U.S.C. § 115	Scope of exclusive rights in nondramatic musical works: Compulsory license for making and distributing phonorecords
17 U.S.C. § 116	Scope of exclusive rights in nondramatic musical works: Compulsory license for public performances by means of coin-operated phonorecords players
17 U.S.C. § 116A	Negotiated licenses for public performances by means of coin-operated phonorecord players
17 U.S.C. § 117	Scope of exclusive rights: Use in conjunction with computers and similar information systems
17 U.S.C. § 118	Scope of exclusive rights: Use of certain works in connection with noncommercial broadcasting
17 U.S.C. § 119	Limitations on exclusive rights: Secondary transmissions of superstations and network stations for private home viewing
17 U.S.C. § 201	Ownership of copyright
17 U.S.C. § 202	Ownership of copyright as distinct from ownership of material object
17 U.S.C. § 203	Termination of transfers and licenses granted by the author
17 U.S.C. § 204	Execution of transfers of copyright ownership
17 U.S.C. § 205	Recordation of transfers and other documents
17 U.S.C. § 301	Preemption with respect to other laws
17 U.S.C. § 302	Duration of copyright: Works created on or after January 1, 1978
17 U.S.C. § 303	Duration of copyright: Works created but not published or copyrighted before January 1, 1978
17 U.S.C. § 304	Duration of copyright: Subsisting copyrights
17 U.S.C. § 305	Duration of copyright: Terminal date
17 U.S.C. § 401	Notice of copyright: Visually perceptible copies
17 U.S.C. § 402	Notice of copyright: Phonorecords of sound recordings
17 U.S.C. § 403	Notice of copyright: Publications incorporating United States Government works
17 U.S.C. § 404	Notice of copyright: Contributions to collective works
17 U.S.C. § 405	Notice of copyright: Omission of notice on certain copies and phonorecords
17 U.S.C. § 406	Notice of copyright: Error in name or date on certain copies and phonorecords
17 U.S.C. § 407	Deposit of copies or phonorecords for Library of Congress
17 U.S.C. § 408	Copyright registration in general
17 U.S.C. § 409	Application for copyright registration
17 U.S.C. § 410	Registration of claim and issuance of certificate
17 U.S.C. § 411	Registration and infringement actions
17 U.S.C. § 412	Registration as prerequisite to certain remedies for infringement
17 U.S.C. § 501	Infringement of copyright
17 U.S.C. § 502	Remedies for infringement: Injunctions

17 U.S.C. § 503	Remedies for infringement: Impounding and disposition of infringing articles
17 U.S.C. § 504	Remedies for infringement: Damage and profits
17 U.S.C. § 505	Remedies for infringement: Costs and attorney's fees
17 U.S.C. § 506	Criminal offenses
17 U.S.C. § 507	Limitations on actions
17 U.S.C. § 508	Notification of filing and determination of actions
17 U.S.C. § 509	Seizure and forfeiture
17 U.S.C. § 510	Remedies for alteration of programming by cable systems
17 U.S.C. § 601	Manufacture, importation, and public distribution of certain copies
17 U.S.C. § 602	Infringing importation of copies or photorecords
17 U.S.C. § 603	Importation prohibitions: Enforcement and disposition of excluded articles
17 U.S.C. § 701	The Copyright Office: General responsibilities and organization
17 U.S.C. § 702	Copyright Office regulations
17 U.S.C. § 703	Effective date of actions in Copyright Office
17 U.S.C. § 704	Retention and disposition of articles deposited in Copyright Office
17 U.S.C. § 705	Copyright Office records: Preparation, maintenance, public inspection, and searching
17 U.S.C. § 706	Copies of Copyright Office records
17 U.S.C. § 707	Copyright Office forms and publications
17 U.S.C. § 708	Copyright Office fees
17 U.S.C. § 709	Delay in delivery caused by disruption of postal or other services
17 U.S.C. § 710	Reproductions for use of the blind and physically handicapped: Voluntary licensing forms and procedures
17 U.S.C. § 801	Copyright Royalty Tribunal: establishment and purpose
17 U.S.C. § 802	Membership of the Tribunal
17 U.S.C. § 803	Procedures of the Tribunal
17 U.S.C. § 804	Institution and conclusion of proceedings
17 U.S.C. § 805	Staff of the Tribunal
17 U.S.C. § 806	Administrative support of the Tribunal
17 U.S.C. § 807	Deduction of costs of proceedings
17 U.S.C. § 808	Reports
17 U.S.C. § 809	Effective date of final determinations
17 U.S.C. § 810	Judicial review
17 U.S.C. § 901	Definitions
17 U.S.C. § 902	Subject matter of protection
17 U.S.C. § 903	Ownership, transfer, licensing and recordation
17 U.S.C. § 904	Duration of protection
17 U.S.C. § 905	Exclusive rights in mask works
17 U.S.C. § 906	Limitations on exclusive rights: reverse engineering; first sale
17 U.S.C. § 907	Limitations on exclusive rights: innocent infringement
17 U.S.C. § 908	Registration of claims of protection
17 U.S.C. § 909	Mask work notice
17 U.S.C. § 910	Enforcement of exclusive rights
17 U.S.C. § 911	Civil actions

17 U.S.C. § 912	Relation to other laws
17 U.S.C. § 913	Transitional provisions
17 U.S.C. § 914	International transitional provisions
18 U.S.C. § 2	Principals
18 U.S.C. § 3	Accessory after the fact
18 U.S.C. § 4	Misprision of felony
18 U.S.C. § 792	Harboring or concealing persons
18 U.S.C. § 793	Gathering, transmitting, or losing defense information
18 U.S.C. § 798	Disclosure of classified information
19 U.S.C. § 1202	Revised tariff schedules
19 U.S.C. § 1309	Supplies for certain vessels and aircraft
19 U.S.C. § 2112	Nontariff
19 U.S.C. § 2242	Identification of countries that deny adequate protection, or market access for intellectual property rights
22 U.S.C. § 2354	Procurement
26 U.S.C. § 6050A	Reporting requirements of certain fishing boat operators
28 U.S.C. § 1499	Liquidated damages withheld Contract Work Hours and Safety Standards Act
28 U.S.C. § 2671	Definitions
28 U.S.C. § 2672	Administrative adjustment of claims
28 U.S.C. § 2673	Reports to Congress
28 U.S.C. § 2674	Liability of United States
28 U.S.C. § 2675	Disposition by federal agency as prerequisite; evidence
28 U.S.C. § 2676	Judgment as bar
28 U.S.C. § 2677	Compromise
28 U.S.C. § 2678	Attorney fees; penalty
28 U.S.C. § 2679	Exclusiveness of remedy
28 U.S.C. § 2680	Exceptions
31 U.S.C. § 101	Agency
31 U.S.C. § 102	Executive agency
31 U.S.C. § 103	United States
31 U.S.C. § 1342	Limitation on voluntary services
31 U.S.C. § 1350	Criminal penalty
31 U.S.C. § 1351	Reports on violations
31 U.S.C. § 3501	Definition
31 U.S.C. § 3726	Payment for transportation
33 U.S.C. § 410	Exception to floating loose timber, sack rafts, etc.; violations of regulations; penalty
33 U.S.C. § 901	Short title
33 U.S.C. § 941	Safety rules and regulations
40 U.S.C. § 327	"Secretary" defined
40 U.S.C. § 328	Forty hour week; overtime compensation; contractual conditions; liability of employees for violation; withholding funds to satisfy liabilities of employers
40 U.S.C. § 329	Contracts subject to this subchapter; workers covered; exceptions

40 U.S.C. § 330	Report of violations & withholding of funds for unpaid wages & liquidated damages
40 U.S.C. § 331	Limitations, variations, tolerances, and exemptions
40 U.S.C. § 332	Violations; penalties
40 U.S.C. § 333	Health and safety standards in building trades and construction industry
40 U.S.C. § 474, 481, and 487	Federal Property and Administrative Services Act of 1949
40 U.S.C. § 471	Congressional declaration of policy
40 U.S.C. § 751	General services administration
40 U.S.C. § 757	Information Technology Fund
41 U.S.C. § 5	Advertisements for proposals and contracts for supplies or services for Government departments; application to Government sales and contracts to sell and to Government corporations
41 U.S.C. § 5a	Definitions
41 U.S.C. § 13	Contracts limited to one year
41 U.S.C. § 14	Restriction on purchases of land
41 U.S.C. § 20a	Exemption of contracts concerning national-forest lands
41 U.S.C. § 20b	Exemption of leases, contracts, etc., concerning use of lands or waters under jurisdiction of Department of Interior
41 U.S.C. § 259	Definitions
41 U.S.C. § 260	Laws not applicable to contracts
41 U.S.C. § 402	Congressional findings and purpose
41 U.S.C. § 404	Establishment of Office of Federal Procurement Policy; appointment of administrator
41 U.S.C. § 414a	Personnel evaluation
41 U.S.C. § 424	Advocate for the acquisition of commercial products
42 U.S.C. § 1651	Compensation authorized
42 U.S.C. § 2000d	Prohibition against exclusion from participation in, denial of benefits of, and discrimination under federally assisted programs on grounds of race, color, national origin
42 U.S.C. § 2457	Property rights in inventions
42 U.S.C. § 5908	Patents and inventions
42 U.S.C. § 6686	Critical Technologies Institute
42 U.S.C. § 7401	Congressional finding and declaration of purpose
44 U.S.C. § 3901	Purpose and establishment of the Office of Inspector General
44 U.S.C. § 3902	Appointment of IG; supervision; removal
44 U.S.C. § 3903	Duties, responsibilities, authority and reports
47 U.S.C. § 305	Government owned stations
49 U.S.C. § 10701a	Standards for rates for rail carriers
49 U.S.C. § 10702	Authority for carriers to establish rates, classifications, rules, and practices
49 U.S.C. § 10721	Government traffic
49 U.S.C. § 10921	Requirement for certificate, permit or licenses
49 U.S.C. § 11707	Liability of common carriers under receipts and bill of lading

 Pub. L. No. 101-511 § 8087 Cost studies

### E.3 Parallel Statutory Provisions

The chart below lists the statutory provisions in Title 41 that have a parallel reference in Title 10. The Panel did not review these Title 41 statutory provisions but did recommend certain changes to their parallel statutes in Title 10. Congress originally structured these statutory provisions in Title 41 and Title 10 to create parallelism in civilian agency and DOD procurement. The Panel did not make any decisions on the merits of maintaining parallelism. The Title 41 statutory provisions are listed below for information purposes. It is suggested that the Congressional committees responsible for the oversight of federal procurement government wide should review these Title 41 statutory provisions and determine if similar changes to those recommended in Title 10 should also be made in Title 41.

<u>Title 41</u>	<u>Parallel statute in Title 10</u>
41 U.S.C. § 251	10 U.S.C. § 2301
41 U.S.C. § 252a	10 U.S.C. § 2303(a)
41 U.S.C. § 253	10 U.S.C. § 2304
41 U.S.C. § 253a	10 U.S.C. § 2305(a)
41 U.S.C. § 253b	10 U.S.C. § 2305(b)
41 U.S.C. § 253c	10 U.S.C. § 2319
