## **FOREWORD**

In section 800 of Public Law Number 101-510 (the National Defense Authorization Act for Fiscal Year 1991), Congress directed the Department of Defense to establish the "DOD Advisory Panel on Streamlining and Codifying Acquisition Laws." In accordance with this directive, the Under Secretary of Defense for Acquisition selected the Panel of recognized experts in acquisition law and procurement policy whose Report follows here.

As contemplated by the Congress in its direction that the Panel represent a balance from the public and private sectors, its members brought both diversity and a wealth of experience to this study. While the Panel members share common responsibility for the views and recommendations which follow, it is unrealistic – given their individual perspectives – to expect complete unanimity in analyzing more than 600 statutes. The many statements made on behalf of the Panel throughout the Report reflect a majority view. The Panel's recommendations, as well as the Report as a whole, do not represent official positions of either the Department of Defense or the United States Government.

Readers are cautioned that the terms "statute," "law," "code," or "provisions" are freely used throughout the report in ways which may not reflect the narrowest legal interpretation. Similarly, pronouns such as "he" or "she," unless used in a specific personal reference, are not intended to convey any connotation of gender.

## ACKNOWLEDGMENTS

This project could not have been done without the extraordinary efforts of the highly professional Task Force formed under the sponsorship of the Defense Systems Management College, which provided direct support to the Panel members as well as administrative support for the study as a whole. The following Defense Department activities contributed to this effort by providing members of their staffs to the Task Force: the offices of the Air Force Judge Advocate General, Headquarters, Air Force Materiel Command, Army Judge Advocate General, Army Materiel Command Headquarters, Army Materiel Command (U.S. Army Communications Electronics Command), Assistant Secretary of the Air Force (Acquisition), Assistant Secretary of the Navy (Research, Development & Acquisition), Office of General Counsel (Defense Logistics Agency) and the Office of Naval Research. On occasion, this Task Force worked around the clock to prepare statutory analyses in time for Panel meetings. They deserve particular credit for their hard work in helping the Panel members draft, assemble, and edit this Report. This monumental effort came from a joint military and civilian team of dedicated people who had never met nor worked together prior to the establishment of the Panel.

Throughout its deliberations, the Panel endeavored to establish a dialogue between its members, the acquisition community, and the general public. A large number of industry associations, Government agencies, public interest groups, and private citizens came forward to offer their thoughts, their expertise, and, in many cases, significant amounts of their time. We must also recognize the excellent support that the Panel received from throughout the Department of Defense, particularly from the Military Services and the Defense agencies. The Panel would like to take this opportunity to thank everyone who participated in this process, because their varied perspectives and generous support were essential to our work.

While the inputs which resulted from this process were invaluable, the analyses and recommendations presented in the following Report are the sole responsibility of the Panel.

## **PANEL MEMBERS**

**Pete Bryan**  
Director, Contract Policy & Administration  
Office of the Secretary of Defense

**Allan Burman**  
Administrator for Federal Procurement Policy

**Anthony Gamboa**  
Deputy General Counsel  
Department of the Army

**Jack Harding**  
Vice President, Contracts, Raytheon Corporation

**LeRoy Haugh**  
Vice President, Procurement & Finance  
Aerospace Industries Association

**Thomas J. Madden**  
Partner, Venable, Baetjer, Howard and Civiletti

**Ralph Nash, Jr.**  
Professor of Law  
George Washington University

**F. Whitten Peters**  
Partner, Williams and Connolly

**Gary Quigley**  
Deputy General Counsel  
Defense Logistics Agency

**Major General John D. Slinkard, USAF**  
Deputy Chief of Staff for Contracting  
Headquarters, Air Force Materiel Command

**Rear Admiral W. L. Vincent, USN**  
Commandant  
Defense Systems Management College

**Robert D. Wallick**  
Partner, Steptoe & Johnson

**Harvey Wilcox**  
Deputy General Counsel  
Department of the Navy

## TASK FORCE

### Executive Secretary

Donald M. Freedman (DSMC)

### Task Force Directors

C. Kenneth Allard, LTC(P), USA (DSMC)

Thomas J. Dolan, Jr. (ONR)

Susan P. McNeill, Col, USAF

### Task Force Members

JoAnne L. Barreca (DLA)

Benjamin B. C. Capshaw, LCDR, USNR (DSMC)

James Cohen, Lt Col, USAF

Stuart A. Hazlett (SAF-AQC)

Barry Kline (AMC)

C. Jean Kopala, Maj, USAF (DSMC)

William E. Mounts (Contract Counsel)

Karen O'Brien, CPT, USA (DSMC)

Michael J. Renner, Lt Col, USAF

Michael Rose, Lt Col, USAFR

Diane M. Sidebottom (DLA)

James Wayne Skinner (NAVSUP)

Jack L. Soesbe, MAJ, USA (DSMC)

Theresa M. Squillacote (DSMC)

Jerry Stahl (AMC)

Donald J. Suda (DLA)

Bruce N. Warner (DSMC)

### Administrative Staff

Laura J. Neal (DSMC)

Linda L. Snellings (DSMC)

Megan A. Weaver (DSMC)

# "STREAMLINING DEFENSE ACQUISITION LAW"

## REPORT OF THE ADVISORY PANEL ON STREAMLINING AND CODIFYING ACQUISITION LAWS

### INTRODUCTION

#### A. Background

Hundreds of individual laws create the underpinnings of the defense acquisition system. Large and small, significant and trivial, new and old, these laws emanate from the fundamental Constitutional responsibility of the Congress "To raise and support Armies (and) . . . To provide and maintain a Navy."<sup>1</sup> Expanded many times by regulations, by supplements to regulations, by directives, and by established practice, these laws have been interpreted and applied by various courts, boards of contract appeals, and the General Accounting Office. Separately and together, they govern the way tens of thousands of Government workers buy -- and hundreds of thousands of Americans manufacture, perform, and sell -- the millions of items and services required by a modern fighting force -- literally everything from desert camouflage uniforms to precision-guided munitions.

With the passage of the National Defense Authorization Act for FY91, Congress declared that the time had come to start the process of rationalizing, codifying, and streamlining this body of laws. Section 800 of that Act directed the official responsible for administering acquisition law and regulation -- the Under Secretary of Defense for Acquisition -- to appoint an advisory panel of Government and civilian experts. Under the leadership of the Commandant of the Defense Systems Management College,<sup>2</sup> this panel was to review all laws affecting DOD procurement, "with a view toward streamlining the defense acquisition process," and to issue a report for transmission by the Secretary of Defense to the Congress in January 1993. The report was to be a practical plan of action for moving from present law to an understandable code containing specific recommendations to Congress: to eliminate any laws "unnecessary for the establishment of buyer and seller relationships in procurement;" to ensure the "continuing financial and ethical integrity" of defense procurement programs; and to "protect the best interests of

---

<sup>1</sup>U.S. CONST. art I, § 8.

<sup>2</sup>The Defense Systems Management College is a DOD educational institution which has, since 1971, trained program managers and program executives from the uniformed services, defense industry, and all branches of the Federal Government.

the Department of Defense." Finally, the panel was asked to "prepare a proposed code of relevant acquisition laws."<sup>3</sup>

Maintaining a fair, efficient, and open system of defense procurement has been a fundamental public policy since the earliest days of the Republic, as well as a specific congressional goal since DOD was created by the National Security Act of 1947. In the decades that followed, six major executive branch commissions separately examined the perennial problem of defense management. In addition to serving as benchmarks for reform, these commissions also resulted in some significant improvements. The recommendations of the 1972 Commission on Government Procurement concerning the need for a uniform procurement system "led to the establishment of the Office of Federal Procurement Policy and the development of the Federal Acquisition Regulations." <sup>4</sup> In 1986, a new wave of change resulted in the passage of the Goldwater-Nichols Act -- a landmark law that resolved entrenched issues of defense structure and command authority -- as well as the creation of yet another commission -- the President's Blue Ribbon Commission on Defense Management headed by David Packard.<sup>5</sup>

The Packard Commission provided a comprehensive analysis of the major problem areas affecting defense management, and it also made a specific recommendation to recodify the Federal laws governing procurement:

. . . the legal regime for defense acquisition is today impossibly cumbersome. . . . At operating levels within DOD, it is now virtually impossible to assimilate new legislative or regulatory refinements promptly or effectively. For these reasons, we recommend that Congress work with the Administration to recodify Federal laws governing procurement into a single, consistent, and greatly simplified procurement statute.<sup>6</sup>

Although the Packard Commission's recommendations attracted wide public attention, they nevertheless failed to prompt the sweeping legislative changes that many had thought possible in the aftermath of the Goldwater-Nichols reforms. A 1988 congressional report noted that the Packard Commission's status as the sixth major study of defense acquisition over four decades meant that it was merely the latest to address continuing problem areas in defense procurement. As House Armed Services Committee Chairman Les Aspin stated in his foreword to the report, "Perhaps the next executive commission on acquisition should be created, not to propose the reforms, but to

<sup>6</sup>*A Quest for Excellence: Final Report by the President's Commission on Defense Management* 55 (June 1986).

implement them."<sup>7</sup> In June 1989, Secretary of Defense Dick Cheney set forth just such a plan in his Defense Management Review (DMR), an ambitious effort not only to implement the recommendations of the Packard Commission, but to provide a framework for continuing improvements in Pentagon acquisition practices.<sup>8</sup>

One of the Packard Commission's findings, endorsed by the DMR, was the need for broad changes in the acquisition statutes:

With the enactment of additional major legislation since 1986, when the Packard Commission finished its work, there is increased urgency to addressing the body of procurement law in its totality – in order to simplify, and clarify the framework under which DOD and other departments operate, and more broadly . . . to make the acquisition process fundamentally more effective.<sup>9</sup>

The DMR subsequently provided a benchmark for a number of important acquisition initiatives: the identification of almost 400 acquisition directives for cancellation or consolidation; the streamlining of the Defense Federal Acquisition Regulation Supplement to a document less than half the size of its predecessor; and, in response to a DMR White Paper, congressional action to cancel 30% of the recurring reports that it had originally required for oversight purposes.<sup>10</sup>

This executive-legislative branch partnership was implicitly recognized by the Senate in approving the legislation which authorized the formation of the "Advisory Panel on Streamlining and Codification of the Acquisition Laws:"

The Packard Commission and Secretary Cheney's Defense Management Review represent the most recent efforts to promote efficiency in Government procurement practices. The purpose of this Advisory Panel will not be to plow the same ground as previous studies; rather, it will be to take the general principles set forth in these studies and prepare a pragmatic, workable set of recommended changes to the acquisition laws.<sup>11</sup>

## **B. Strategic Changes**

The authorization of the Panel took place in the midst of fundamental changes in the international security environment, highlighted by the unification of Germany, the transformation of Eastern Europe, and the break-up of the Soviet Union. Before the Panel could even begin its deliberations, however, the United States found itself at war in the Persian Gulf, the results of Operation Desert Storm providing another clear demonstration that procurement decisions made in peacetime have life-or-death consequences in combat. Those lessons were still being absorbed when the failed coup d'état of August 1991 heralded the end of Soviet communism, the collapse of the Soviet Union, and the emergence of the new Commonwealth of Independent States. The United States thus emerged victorious from a short, hot war and a much longer Cold War -- all in the space of six months.

These strategic changes had profound implications for the American defense establishment. Not only could U.S. military forces be reduced, but the money spent on defense could be redirected toward other national priorities. Those changes in turn had equally profound implications for the Panel. The dramatic reductions in defense spending were sufficient by themselves to create a presumption that the acquisition system of the future would demand better management by fewer people of far fewer tax dollars. "Better" in this case was synonymous with the simpler, more flexible, and more responsive procedures needed to match the sweeping personnel reductions and management realignments that had become the order of the day. Under the blueprint established by the DMR, for example, cost reductions of more than \$70 billion between 1990 and 1997 had to come as the result of "improved business practices . . . not from program or force level cuts."<sup>12</sup> In its review, therefore, the Panel had a clear obligation to seek out legislative reforms which would enable both Government and industry to operate more efficiently with reduced budgets.

Other major influences upon the Panel's deliberations were the changes occurring in the defense industrial base. Operation Desert Storm demonstrated that an industrial base built around the global requirements of the Cold War had the capacity to respond to the demands of a regional conflict. However, as a study by the Air Force Association noted, this industrial base,

. . . no longer exists. Even as the nation watched the war on television, the companies that produced the impressive weapons were releasing workers, closing plants, and searching for nondefense business.<sup>13</sup>

This exodus from the defense marketplace was not solely due to the downturn in defense spending:

---

<sup>12</sup>U.S. Dep't of Defense, *Implementation of the Secretary of Defense's Defense Management Report to the President: Progress Report 19* (1992).

<sup>13</sup>Air Force Ass'n., Arlington, VA, *Lifeline Adrift: The Defense Industrial Base in the 1990's* (1991).

Firms, particularly subcontractors and suppliers of system components, are moving from defense to the commercial market, where the profits are better and where business is conducted in a more stable, less adversarial manner.<sup>14</sup>

Two congressional studies completed in the aftermath of the Gulf War simultaneously praised the performance of U.S. weapons systems while citing the burden of regulatory controls imposed through the DOD acquisition system as an important factor in the decline of the industrial base.<sup>15</sup>

While the Panel's charter called for legislative rather than regulatory reform, there is an important linkage, often missed in public and congressional criticism of DOD contracting methods: many of the regulations which impose the most burdensome controls are specifically mandated by statute.<sup>16</sup> With widespread public perceptions that the term "Government procurement" is synonymous with "scandal," the stakes have never been higher for DOD administrators understandably determined to avoid the appearance of wrongdoing or, worse yet, any controversy suggesting the need for still more legislation. Risk aversion leads in turn to a search for safety through the ever tightening knot of restrictive rule making and detailed regulations. This "missing link" between law and regulation overlooked by so many analysts was addressed in a study specially prepared in 1992 for the Panel by the American Defense Preparedness Association. It found that acquisition laws represented the apex of a "cascading pyramid" of restrictive regulations, overly detailed military specifications, and common procurement practices that typically added 30-50% to the costs of doing business with the Department of Defense.<sup>17</sup>

Although these costs have customarily been measured in both time and money, they also burden technological innovation. Ironically, it is technological sophistication which has characterized American weapons development for more than a generation, and is an essential component of our continued military superiority. It is also important to remember that these laws are part of a system that has been successfully applied for almost a half century to procure the weapons and materiel used by American armed forces in actual combat in Korea, Vietnam, and the Persian Gulf, as well as a host of Cold War

Comm. on Armed Services, 102d Cong., 2d Sess., *Future of the Defense Industrial Base, Report of the Structure of US Defense Industrial Base Panel* (Comm. Print 1992).

<sup>16</sup>One notable exception to the usual "missing link" between law and regulation was provided by the report of a 1992 congressional panel studying the industrial base which charged that "Defense Department provisions requiring compliance with Government Cost Accounting Standards and the Truth in Negotiations Act are serious impediments to commercial companies wishing to sell to the department." H.R. Comm. on Armed Services, 102d Cong., 2d Sess., *Future of the Defense Industrial Base, Report of the Structure of US Defense Industrial Base Panel* 13 (Comm. Print 1992).

confrontations. By the early 1990s, however, this record of success could not completely offset a growing concern among lawmakers and procurement experts who worried about the system's ability to respond to future scientific challenges. For one thing, the procurement process typically operated at a pace which was far slower than the technological developments it sought to capture. Worse yet, it imposed bureaucratic requirements which were so unique and intrusive (e.g., cost accounting standards) that many contractors totally separated their Government and commercial production facilities. These barriers not only added to the costs of doing business with the Government, but they also "walled off" the rapid advances being made in commercial research and development from easy exploitation and use in military systems.

A particularly vivid example of this barrier occurred during the Gulf War. According to a story cited by Donald A. Hicks, a former Under Secretary of Defense for Research and Engineering, the U.S. Army placed an emergency order for 6,000 commercial radio receivers, waiving all military requirements and specifications. Because of the urgency of preparations for war -- as well as the ever present threat of second-guessing once that urgency had faded -- no responsible procurement official could be found who would waive the requirement for the company to certify that the Army was being offered the lowest available price. Since the radio was widely marketed and any misstatement might constitute a felony, no company official would make this certification. The impasse was resolved only when the Japanese Government bought the radios without a price certification, donated them to the U.S. Army, and credited the purchase against Japan's financial contribution to Operation Desert Storm.<sup>18</sup>

The Gulf War demonstrated the devastating tactical effect of sophisticated weaponry of all kinds, particularly when precision munitions were coupled with advanced command and control systems. If these developments truly represent what DOD referred to as a "military technological revolution," then the innovations needed to hone the American combat edge will increasingly depend on developments in the commercial sector.<sup>19</sup> A number of public and private studies have documented the need for more effective integration of commercial and military technology. These analyses have pointed out that this linkage is not only needed to ensure a stable, viable defense industrial base as Government spending is reduced, but is equally important to ensure a wartime surge capability as traditional defense plants are eliminated. Recognizing this trend, Congress has given clear guidance in a series of defense authorization bills that it too is concerned with this objective. Unfortunately, this guidance has not reduced the barriers to commercial access. The impediments to civilian-military integration, therefore, became a topic of continuing interest to the Panel, typifying in many ways the overriding need to streamline the defense procurement laws in a new era of fiscal austerity and great strategic uncertainty.<sup>20</sup>

### C. Goals & Objectives

At the first meeting of the Panel, the members established the basic framework for the conduct of this study. As a result of that discussion, they agreed that their congressional charter (Public Law 101-510, section 800) provided the following goals for their efforts:

- **Streamline the defense acquisition process and prepare a proposed code of relevant acquisition laws.**
- **Eliminate acquisition laws that are unnecessary for the establishment and administration of the buyer and seller relationships in procurement.**
- **Ensure the continuing financial and ethical integrity of defense procurement programs.**
- **Protect the best interests of DOD.**

During several of its initial meetings, the Panel heard testimony from a wide variety of experts representing Government, the military, and industry. Noted defense analyst Dr. Jacques S. Gansler spoke of the need for closer integration of commercial and military technologies, while Senator William Roth was equally forthright in urging the members to propose dramatic changes in the laws governing the procurement process. In his presentation to the Panel, Senator Jeff Bingaman also acknowledged that many acquisition laws enacted in the 1980s had been passed without careful consideration for their impact on the existing framework. Because Congress was clearly concerned with its ultimate accountability for the procurement system, he pointed out, a comprehensive revamping of the system of acquisition laws was now in order. General officers from the military services, as well as senior civilian executives representing such key procurement elements as the Defense Logistics Agency, were also invited to testify as the Panel sought to identify the most critical problem areas. Industry groups, such as the Council of Defense and Space Industry Associations, the American Bar Association, and the U.S. Chamber of Commerce, were also contacted during this phase of the review.

Although individual perspectives varied, there was surprising agreement on the burden placed upon the acquisition community by the increasingly complex web of procurement laws. Many of these viewpoints were summarized in a timely article by Professor William E. Kovacic of George Mason University:

---

the Center for Strategic and International Studies, *Deterrence in Decay: The Future of the U.S. Industrial Base* Washington, DC (May 1989) and *Integrating Commercial and Military Technologies for National Strength: An Agenda for Change*, Washington, DC (March 1991). For a DOD perspective, see Robert B. Costello, *Bolstering Defense Industrial Competitiveness*. Report by the Under Secretary of Defense (Acquisition) to the Secretary of Defense (July 1988).

The perceived imperative to embrace immediate statutory cures for apparent (procurement) deficiencies in the 1980s inspired several enactments of sweeping scope and questionable draftsmanship. . . . Once adopted, such enactments typically resist subsequent retrenchment, as any suggested ex post weakening of requirements usually is successfully attacked by advocates of the original legislation as an unwarranted dilution of congressional efforts to discourage fraud and otherwise improve procurement performance. There is, in effect, an upward statutory ratchet in procurement regulation that ensures that regulatory commands become ever more restrictive.<sup>21</sup>

In the early months of the Panel's activities, its members sought to amplify their original goals and to identify more specific criteria to guide their recommendations for statutory change. The key to this effort was a broadly based pattern of outreach activities, all aimed at ensuring a review process that was open to the widest possible variety of public access and comments. Monthly Panel meetings, held in several locations at Fort Belvoir, Virginia and the District of Columbia, were regularly advertised in the Federal Register and became the venue for both formal presentations and more informal consultations between the concerned public and the members. Federal Register announcements and widely distributed letters were also used as a means of soliciting public comments in the principal functional areas selected for review. Panel members and their staffs routinely provided briefings on their work to both the executive and legislative branches as well as to a wide variety of public interest and industry groups. Through these individual and collective efforts, the Panel was able to establish from its inception a remarkably free-ranging dialogue with both the acquisition community and the general public.

One of the first concrete results of that dialogue was the Panel's agreement on the 10 objectives that would help to guide its review:

(1) Acquisition laws should identify the broad policy objectives and the fundamental requirements to be achieved. Detailed implementing methodology should be reserved to the acquisition regulations.

(2) Acquisition laws should promote financial and ethical integrity in ways that are:

(a) simple and understandable;

(b) not unduly burdensome; and

---

<sup>21</sup>William E. Kovacic, *Regulatory Controls as Barriers to Entry in Government Procurement*, 25 POLICY SCIENCES 31 (1992).

**(c) encourage sound and efficient procurement practices.**

**(3) Acquisition laws should establish a balance between an efficient process and**

**(a) full and open access to the procurement system; and**

**(b) socioeconomic policies.**

**(4) Acquisition laws should, without alteration of commercial accounting or business practices, facilitate:**

**(a) Government access to commercial technologies; and**

**(b) Government access to the skills available in the commercial market place to develop new technologies.**

**(5) Acquisition laws should, without requiring contractors to incur additional costs, facilitate the purchase by DOD or its contractors of commercial or modified commercial products and services at or based on commercial market prices.**

**(6) Acquisition laws should enable companies (contractors or subcontractors) to integrate the production of both commercial and Government-unique products in a single business unit without altering their commercial accounting or business practices.**

**(7) Acquisition laws should promote the development and preservation of an industrial base and commercial access to Government developed technologies**

**(8) Acquisition laws should provide the means for expeditious and fair resolution of procurement disputes through uniform interpretation of laws and implementing regulations.**

**(9) Acquisition laws should encourage the exercise of sound judgment on the part of acquisition personnel.**

**(10) Acquisition laws should, when generating reporting requirements, permit as much as possible the use of data that already exists and is already collected without imposing additional administrative burdens.**

#### **D. Approaches**

Before these goals and objectives could be applied to the task of streamlining, it was necessary to define the universe of laws affecting defense acquisition. The last attempt to compile these laws had occurred in the early 1970s, when the Commission on

Government Procurement identified over 4,000 statutes (Public Laws and U.S. Code sections) thought applicable to the procurement process.<sup>22</sup> In addition to being outdated, however, the criteria used in making those judgments could not be readily determined or easily applied. More helpful was the biennial report prepared by the House Armed Services Committee, LAWS RELATING TO FEDERAL PROCUREMENT.<sup>23</sup> The statutes identified there were correlated with a key word search on acquisition related terms contained in a FAR/DFARS data base.<sup>24</sup> Fiscal laws accompanying acquisition related statutes were also included in this initial compilation, as well as various executive orders. Throughout their search, the researchers routinely included any laws of possible applicability in order to minimize the risk of overlooking any pertinent statute.

From these sources, the Panel initially identified 889 provisions of law that appeared to have some relationship to DOD acquisition. In reviewing this list, however, the Panel soon decided that some of these statutes did not warrant further consideration. Laws relating to basic DOD organizational structure, the operation of the defense commissary system and nonappropriated fund activities, as well as traditional supply functions were determined to have only a minimal impact on the buyer-seller relationship which was the main focus of the Panel's efforts. Fiscal laws were similarly excluded from more detailed review because the Panel decided that they affected defense budgeting more than defense acquisition. Recently passed legislation dealing with the acquisition work force, although considered both relevant and important, was not considered because it was still in the implementation process. The provisions of the public contract statutes in Title 41 of the U.S. Code were generally excluded from review in favor of a tighter focus on their parallel provisions in Title 10, the primary reference for DOD.<sup>25</sup> Several exceptions to this rule included the Office of Federal Procurement Policy Act and certain other provisions of Title 41 which have a direct impact upon DOD acquisition. Following this initial winnowing process, the Panel continued to filter out laws when subsequent review revealed them to be of only marginal importance to its declared objectives.

Even after this screening, the Panel was left with a universe of over 600 DOD-related procurement laws that it was required to review in line with its congressional charter. Those numbers highlighted the importance of approaching defense acquisition as a system. Defined doctrinally, the defense acquisition system is "a single uniform system whereby all equipment, facilities, and services are planned, developed, acquired, maintained, and disposed of within the Department of Defense."<sup>26</sup> The requirement to think systemically, combined with the need to divide the labor of reviewing so many

<sup>23</sup>H.R. Comm. on Armed Services, 102d Cong., 1st Sess., *Laws relating to Federal Procurement As Amended Through April 6, 1991* (Comm. Print 1991).

<sup>24</sup> The data base used was originally compiled by the Logistics Management Institute for the DMR and reported as *Regulatory Relief: Simplifying and Eliminating Contract Clauses*, Report PL903R1 Prepared for the Defense Management Review Regulatory Relief Task Force, Bethesda, MD (Nov. 1989).

<sup>25</sup>A list of the statutes considered but excluded from further review is at Appendix E of this Report.

<sup>26</sup>U.S. Dep't of Defense, Defense Systems Management College, *Introduction to Defense Acquisition Management*, 1 (Ft. Belvoir, VA, 1989)

statutes, led the Panel to establish working groups covering six major functional areas: contract formation; contract administration; service-specific and major systems statutes; socioeconomic requirements, small business, and simplified acquisition; standards of conduct; and intellectual property. In addition, two ad hoc working groups addressed commercial procurement and international defense cooperation.

The functional working groups each consisted of two Panel members, one from the public sector and one from the private sector. They quickly became the focal points for research and analysis in these functional areas, reviewing the laws assigned to them and preparing recommendations for decision by the Panel as a whole. In reviewing the major statutes, the working groups typically began the process with a legislative history and a literature search. Building upon the wide public contacts that had already been established, comments were solicited from the acquisition community and other interested parties, often through the use of Federal Register notices or questionnaires. Minutes of Panel meetings, legislative abstracts, and various position papers were also distributed through the extensive mailing and telefax lists that were eventually developed by each working group and the Panel as a whole. Specific inputs were also obtained from departmental staffs, trade associations, and Governmental agencies with particular expertise, such as the Air Force Contract Law Center. Where appropriate, public meetings on issues being examined by the working groups were also held to ensure that a wide range of opinions was considered. Similarly, when specific issues were scheduled for discussion at Panel meetings, interested groups from both the public and private sectors were routinely invited to speak.<sup>27</sup> These inputs eventually became a kind of dialogue between the Panel, the acquisition community, and the general public that was important in framing recommendations. The tentative decisions reached throughout this process were then reviewed *in toto* by the Panel at the conclusion of its deliberations. This "last look" was intended to ensure that the individual decisions made over many months were consistent with one another -- and with the Panel's goals and objectives.

## **E. Overview of Conclusions and Recommendations**

The Panel's review of the major functional areas it chose for this study produced specific recommendations to retain, amend, or repeal individual statutes.<sup>28</sup> In a number of other instances, the Panel recommended the consolidation of several statutes or even the

---

<sup>27</sup>Examples included: the National Association of Minority Business when the Small Business Act was under discussion; the Management Reviews Division of the General Services Administration during discussion of the Brooks Act; an industry coalition, the Integrated Dual-Use Commercial Companies, during several discussions of commercial products and services; and the General Accounting Office during discussions of protests.

<sup>28</sup>In those cases where an amendment (including recodifications) was recommended, the analysis of that statute contains a subsection entitled "Proposed Statute". This subsection contains or references the current statutory language together with the proposed changes highlighted by underlining (for additions) or strikeouts (for deletions).

creation of new laws. The principal conclusions reached in each of these areas are highlighted here:

**Contract Formation:** The 80 statutes in this area include the fundamental statutes that require and implement the policy of full and open competition on which the DOD procurement system is based. These laws cover the critical path of procurement, including publicizing requirements, competing or justifying the absence of competition, soliciting offers, evaluating bids or proposals, and pricing and awarding contracts. The Panel analyzed alternatives to the policy of full and open competition, and concluded that this standard should be retained. It also concluded that the competitive statutes continue to provide a sound framework for conducting the DOD procurement process in an open, fair, and ethical manner -- while still meeting mission requirements.

The Panel has proposed changes to the baseline statement of congressional procurement policy in 10 U.S.C. § 2301 and the accompanying definitions in section 2302. These changes stress the need for an appropriate balance between an efficient procurement system, full and open access to that system, and sound implementation of socioeconomic policies. They also stress a clear priority for meeting DOD requirements through the procurement of commercial or other nondevelopmental items, both as end items and as components. A significant change to section 2304 recommends deletion of the authority for master agreements for advisory and assistance services as well as the substitution of a new rule structure for contracts that do not procure or specify a firm quantity of supplies or services and involve delivery or task orders. The Panel also made two important recommendations for amendment of 41 U.S.C. § 416, "Procurement Notices." The first would allow exemption of commercial items from the minimum statutory time periods that offerors have to submit bids or proposals after publication in the Commerce Business Daily by permitting the Administrator for Federal Procurement Policy to issue more flexible rules prescribing appropriate time periods. The second seeks to improve the use of automated means of providing notice for purchases made under the Panel's recommended "simplified acquisition threshold." The Administrator for Federal Procurement Policy would be required here as well to issue rules for notice procedures through the use of automated means, taking into account the costs and availability of these means to potential offerors, especially small businesses.

The Panel also made two important recommendations to modify the Truth in Negotiations Act (10 U.S.C. § 2306a). The first is to stabilize the threshold for cost or pricing data at \$500,000. The second is to utilize more effectively the forces of the commercial market place by expanding and clarifying the use of the exception for adequate price competition. The new wording would allow a broadened exemption from cost or pricing data requirements if: (1) a product or service is purchased from a company or business unit which produces the same or similar products for the commercial market; (2) the company uses the same or similar production processes for the commercial market; and (3) the price is fair and reasonable.

In the area of procurement protests, the Panel has recommended amendments to a number of statutes in order to promote efficiency, improve information flow, encourage the filing and settlement of protests with procuring agencies, and speed the resolution of protests under the current system administered by the General Accounting Office (GAO) and the General Services Administration Board of Contract Appeals (GSBCA). The Panel also recommends that Congress consolidate into a single judicial forum the current bid protest jurisdiction of the Court of Federal Claims and the District Courts. A further recommendation is that Congress consider and further study whether competition policy might be better served through the resolution of protests by a single agency located within the executive branch whose powers would be comparable to those exercised by the four existing forums. With proper authority, this single forum might provide more uniform and cost-effective treatment of protests. It could also provide two different methods for consideration of protests: first, a procedure similar to the relatively inexpensive and expeditious one now provided by the GAO; and second, a procedure which would be similar to the adjudicatory process provided by the GSBCA. The GSBCA-type procedure would be available for all types of procurements over \$100,000, if elected by the protester.

**Contract Administration:** The major task in this area involved bringing some order to the 107 statutes which affect the basic business relationship between DOD and its contractors. The extensive duplications and repetitions throughout the U.S. Code suggested the need to focus on seven key areas: payment; cost principles; audit and access to records; cost accounting standards; administration of contract provisions; claims and disputes; and extraordinary contractual relief. Many of the Panel's recommendations in these areas involve merging duplicative code sections into a single major statute in order to clarify and simplify its requirements. The proposed statute on contract payment (10 U.S.C. § 2307), for example, will consolidate similar provisions from three other statutes. Such clarifications also permit the elimination of statutory detail more appropriately covered by regulation. That objective underlies the Panel's recommendation on 10 U.S.C. § 2324 (cost principles) which would retain only those provisions delineating that law's basic policy and penalty provisions – and eliminating the excessive detail found in this statute today. The Panel's review in this area also concentrated on removing obstacles to the participation of small business and commercial entities in general. One example is the law (41 U.S.C. § 422) establishing the Cost Accounting Standards Board, which promulgates criteria for allocating costs and therefore affects financial reimbursements under Government contracts. Although this statute is recommended for retention, the Panel urged the Board to waive or modify cost accounting standards for most transactions involving commercial entities. A related area involves claims certification requirements, a problem which has caused seemingly endless litigation at the Court of Federal Claims and boards of contract appeals. In conjunction with the recent changes in the Defense Authorization Act for FY93 and its anticipated regulatory implementation, the Panel's recommendations should help to achieve a simplified, unified set of certification requirements. All of these recommendations are consistent with one of the Panel's key objectives for streamlined acquisition laws: statutes should identify broad policy objectives and fundamental requirements while leaving matters of implementation to be covered by regulations.

**Service-Specific and Major Systems Statutes:** The 220 statutes falling under this heading highlight the difficulty of reducing the defense procurement code from its present condition to a more workable instrument. The consolidations recommended as a result of the Panel's review of this area are intended to streamline a process which has often been made needlessly complex by obsolete or overlapping statutes. These recommendations affect the following major procurement functions:

- Modifications are suggested to the reporting requirements concerning major defense programs (such as Selected Acquisition Reports and Unit Cost Reports) mandated by several different statutes. Those recommendations reflect the need for a common baseline for both executive management and legislative oversight.
- Four major testing laws are recommended for consolidation into a single streamlined statute which retains existing fundamental policies but provides greater flexibility.
- Similar recommendations for consolidation are submitted for numerous service-specific chapters within Title 10, both to eliminate obsolete authorities -- some dating from before World War II -- and to provide a common framework for those authorities which are still necessary.
- Changes are suggested to a number of fuel and energy-related statutes detailing the procurement authority exercised by the DOD in order to enhance their coherence and efficiency.
- The numerous provisions affecting DOD commercial and industrial activities were recommended for consolidation into three distinct statutes setting forth clearer guidelines for A-76 contracting and core defense logistics functions.
- The Brooks Act was closely studied to determine its impact upon DOD's authority to procure automatic data processing equipment (ADPE). While the Panel presents no formal recommendations on this issue, it suggests that Congress consider modifying the oversight authority of the General Services Administration in order to permit DOD to exercise greater internal responsibility in ADPE procurements below a designated threshold.

The specific solutions suggested by the Panel in each of the areas affecting major systems and the procurement authorities of the uniformed services reflect its objectives concerning the basic attributes of acquisition laws: that they should identify broad policy objectives and fundamental requirements; that they should encourage the exercise of sound judgment by procurement personnel; and that reporting requirements generated in law should insofar as possible not impose additional administrative burdens. Taken together, these recommendations represent an essential step in rationalizing a body of law which is at present too large, too diffuse, and far too complex.

**Socioeconomic Laws, Small Business, and Simplified Acquisition Threshold:** In assessing the 114 laws that impose various socioeconomic requirements upon the acquisition process, the Panel determined that the overriding need in this area was to establish uniform thresholds and criteria for applying socioeconomic laws to DOD procurements. The principal recommendation in this area concerns the adoption of a "simplified acquisition threshold" that would exempt DOD contracts below \$100,000 from most socioeconomic requirements and corresponding contract clauses. The exemption from these contract clauses would permit the use of expedited procurement procedures for contracts at or below the \$100,000 level, reducing paperwork and overhead costs for both the Government and its suppliers. The new threshold would streamline over 50% of all DOD contract actions above \$25,000, while affecting only 5% of all contract dollars, thus paving the way for more effective management of DOD's increasingly limited manpower resources.<sup>29</sup> Perhaps most significant, however, is the recommendation that procurements in this range be reserved under most conditions for small businesses. The primary rationale for this recommendation is that smaller contracts provide the best opportunities for small businesses, especially those which are both small and disadvantaged. The Panel's recommendations are also linked to the gradually increased use of electronic contracting and advertising methods, not only to improve the efficiency of the acquisition process, but also to provide better notification of procurement opportunities. Equally important, these recommendations take place within a context that reaffirms and is intended to improve DOD's capability to support the small business and minority contracting goals established by the Congress. The combination of simpler procedures with wider public notice also provides stronger incentives for small businesses of all kinds to compete for Government contracts. Finally, the Panel recommends that Congress adopt a consolidated chapter in Title 10 which clarifies and streamlines the labor, environmental, small business, and minority contracting requirements applicable to DOD. These recommendations promote several of the Panel's key objectives: that acquisition laws should establish a balance between an efficient process and socioeconomic policies; and that acquisition laws should, without requiring contractors to incur additional costs, facilitate the purchase by DOD or its contractors of commercial products and services based on commercial market prices. Because Government and business have a common interest in reducing overhead, the Panel's intent is to maintain the socioeconomic balance while streamlining its statutory requirements.

**Standards of Conduct:** The 119 statutes falling within this field reflect the fundamental importance of ethics and integrity in the defense acquisition process -- as well as the fact that this issue has frequently received congressional attention. Consequently, the Panel was more concerned with the consolidation of existing ethical requirements, rather than the addition of new ones. Particular attention was given to those statutes covering post-employment restrictions of Government personnel, the operation of the rule making process affecting Government procurement, contractor certifications, and false claims. The Panel's recommendations consistently aim at eliminating the duplication of related requirements and the pyramiding of penalties that occur frequently throughout the

---

<sup>29</sup>This discussion is presented more fully in Chapters 4.0 and 4.1 of this report.

current code. Those recommendations also address various administrative procedures -- often mandated by statute -- which add both confusion and cost, but do not demonstrably promote integrity. Those recommendations are consistent with one of the Panel's main objectives: that acquisition laws should promote financial and ethical integrity in ways that are simple, understandable, not unduly burdensome, and which encourage sound and efficient procurement practices. The amendments and other clarifications recommended here are especially important in view of the personal and institutional stakes that are always present in matters relating to procurement integrity.

**Intellectual Property:** The Panel examined seven key areas in this fast developing field: patent infringement; secrecy; university research patents; recoupment; copyrights; technology transfer; and technical data. Its findings reflect the fact that modern technology is heavily dependent upon proprietary invention and entrepreneurial innovation: to have access to this technology, the Government must respect these market-driven norms. Accordingly, the Panel recommends:

- Statutory changes which allow the Secretary to utilize technical data rights policies that provide protection for commercially valuable technology;
- Amendment of the Bayh-Dole Act to encourage the prompt filing of patent applications by inventors working on federally sponsored research;
- The elimination of mandatory Government recoupment of non-recurring costs in defense products being offered through the foreign military sales program;
- New limitations on the imposition and duration of secrecy orders applied to certain inventions by Title 35 of the U.S. Code; and
- Enhancements to the Federal Government's authority to secure copyright protection for computer programs developed under Government auspices.

These recommendations specifically implement the Panel's objectives of integrating civilian and military procurement. More importantly, however, they also reflect the urgency expressed in Congress and the acquisition community that procurement efficiency in high technology is essential for the competitiveness and development of the national industrial base.

**Commercial Procurement:** The centerpiece of the Panel's effort to promote more effective integration between the military and civilian markets is a consolidated new subchapter on commercial procurement which is recommended for inclusion in Title 10. The draft statute, which is closely coordinated with the changes being recommended to the Truth in Negotiations and Competition in Contracting Acts, states that commercial items are to be used whenever they will satisfy the requirements of DOD. This policy statement is reinforced by broader definitions of such key terms as "commercial item" and "component" and is implemented with due regard to nondevelopmental items and existing

sources of supply. However, the most important part of the new statute may be the list of related laws which it specifically exempts from any DOD contract for the purchase of a commercial item. Simply stated, any commercial item meeting the definition of that term would be exempt from statutory contract requirements listed in the law. Another significant feature of the draft statute is its reliance on commercial standards and practices, such as established catalogues or prevailing market prices, in determining if the cost of a commercial product is reasonable. These practices are also reflected in a limitation on the Government's rights to audit or to require additional documentation beyond prevailing market practices. The Panel's overall thrust is to make DOD's buying processes conform more closely to the norms of the commercial marketplace. Those changes are intended not only to fulfill the Panel's objectives regarding commercial-military integration, but also to apply long standing and repeated congressional guidance on this subject as well.

**Defense Trade and Cooperation:** The Panel reviewed this functional area because of a conviction that international considerations will play an increasingly important role in the defense acquisition system. Recognizing the importance of a team approach, Secretary of Defense Dick Cheney has repeatedly advocated greater cooperation between the NATO allies in all phases of the procurement process, particularly in research and development.<sup>30</sup> In examining those statutes which affect DOD's ability to play a constructive role in defense trade, the Panel found that there were almost as many legislative barriers to cooperation in the international arena as there were to military-civilian cooperation on the domestic scene. In addition to the Buy American Act, there were numerous product and source restrictions on the books, barriers that were continued or augmented with the passage of each appropriations or authorization act.<sup>31</sup> The Panel determined that its advice in this area would be guided by three principles.

First, DOD acquisition policy should be consistent and reciprocal with the acquisition and trade policies of its allies. DOD should have, for example, the statutory authority to purchase NATO-standard items -- which may or may not be available from American sources. The Panel's principal recommendations on the Buy American Act -- to substitute the "substantial transformation" test of the Trade Agreements Act for the current "component test" -- are intended to foster the use of American commercial items, as well as to adjust the critical balance between flexibility and reciprocity. Second, DOD's acquisition policy should be consistent with the promotion of a strong U.S. defense technology, industrial, and mobilization base. Because military-commercial integration is not the solution to all problems, DOD must have the ability to restrict acquisitions to domestic sources when it is in the nation's interest. The Panel's recommendations on 10 U.S.C. § 2504 will ensure that future agreements concluded between the United States and foreign Governments will be coordinated with defense industrial base requirements. Third, DOD acquisition policy must be coordinated with international operational agreements, allied logistics support, standardization, and sales of U.S. equipment to foreign countries. Because foreign military sales are an important factor in maintaining the

<sup>31</sup>U.S. Office of the Secretary of Defense, *The Impact of Buy American Restrictions Affecting Defense Procurement: Report to the Congress*, 18-22, Table 3.1 (July 1989).

American defense industrial base, DOD should have the authority to coordinate the buying and selling of products and services in order to negotiate with our allies and other foreign countries. The repeal of recoupment for non-recurring research and development costs contained in the Panel's review of 10 U.S.C. § 2761 is an example of the flexibility needed in this area.

In summary, while civilian-military integration, like charity, begins at home, promoting and developing the U.S. defense industrial base also means adjusting to the twin realities of competition and cooperation in the global defense marketplace.

#### **F. Constraints**

It will ultimately be for the Congress to decide how well the Panel's recommendations met its declared objectives as well as the goals suggested by the original mandate. However, in assessing those results, both Congress and the general public should be aware of the constraints which affected the Panel's work.

The key constraint was time, especially when measured against the magnitude of the task. The 16 months between the convening of the Panel and the printing of this Report obviously constrained the process of considering the 889 statutes comprising the universe of acquisition laws -- a number so high that it surprised even veteran observers of these matters. While an extension of the statutory deadline of January 15, 1993 could have been justified, the Panel members strongly believed that it was more important to place their recommendations squarely on the agenda of a new Administration and a new Congress. Inevitably, priorities were set in order to bring the greatest analytical attention to the most obvious and best understood problems, especially in those areas that offered the greatest prospects for improvement. In addition to focusing on the most relevant acquisition laws, the Panel necessarily excluded regulations, executive orders, and most case law from the study. However, the most significant effects imposed by the time constraint may have come when the Panel chose to recommend a law's retention or to exclude it from more detailed consideration, either because the evidence for change was ambiguous or because it was impossible to obtain additional data without the expenditure of far greater resources than the Panel had at its disposal. The Panel is, therefore, recommending the retention of more laws than might otherwise have been identified for amendment or repeal. It is important to note that these recommendations are made on the basis of the "best evidence" available to the Panel at the time of its decision.

The second constraint reflects a general concern about the numbers of laws considered during this review, as well as their placement within the U.S. Code. Many of the statutes affecting defense procurement arise from titles of the Code beyond Title 10, often reflecting the divergent interests and agendas of many different congressional committees and subcommittees. The organization of the Code also reflects multiple functions which may apply in different ways to different agencies of the Government. The recognition of those realities affected one of the Panel's original goals, which was to "prepare a proposed code of relevant acquisition laws." Early in its deliberations, the

Panel decided that this goal did not imply the creation of a "model code" for DOD procurement to be located at a single point within the body of Title 10 -- primarily because the administrative tidiness of such a compilation would be less helpful than the jurisdictional questions that would inevitably be raised. Equally important was the need to assemble and review the array of procurement laws before creating a "model code" in Title 10 or anywhere else. Consequently, though it has recommended the consolidation of certain laws and chapters in several of the areas noted above, the statutes which the Panel has assembled, reviewed, and presented in the following pages represent its best judgments on the core functions of the defense procurement process. Should those recommendations be enacted, therefore, a new code of relevant acquisition laws will have been created.

There can be no doubt, however, that the task of codification will require a great deal of leadership and teamwork in the new Congress. A recent study by the Business Executives for National Security, for example, is merely the latest to note that no fewer than 107 congressional committees and subcommittees exercise some degree of Pentagon oversight: "The result is massive jurisdictional confusion."<sup>32</sup> But without better coordination, defense procurement law will remain complex, confused, and often chaotic. The evidence accumulated during this review also suggests that an ancillary result of jurisdictional confusion is the proliferation of laws which can impose burdensome and often conflicting requirements. While the Panel is particularly appreciative of the strong congressional support for its efforts, it respectfully suggests that the enactment of the reforms recommended here will not achieve a lasting effect unless Congress also gives continued attention to its responsibility for maintaining a disciplined and coherent legal structure.

The final point of this introduction may not be so much a constraint as a caveat. The work of this Panel represents its best efforts to provide a common baseline for those who seek to improve defense acquisition laws as well as the policies which implement them. In each of the areas they reviewed, however, the Panel members were struck by the magnitude of the task which future reformers will face in making comprehensive legislative changes. There is also no question that these recommendations are best thought of as a "first cut" at a large problem, and certainly not as an ideal solution to it. Moreover, the Panel recognizes the importance of seeking Government-wide consistency in procurement matters and hopes that its recommendations can serve as the baseline for parallel changes in the legislative underpinnings of civilian agency acquisition. While these findings do not fully achieve the Packard Commission's ultimate goal of providing a "single, consistent, and greatly simplified procurement statute,"<sup>33</sup> they clearly carry out the will of Congress by translating those general principles into a "pragmatic, workable set of recommended changes to the acquisition laws."<sup>34</sup> It is therefore our sincere hope that the changes charted in the following pages will make a substantial and lasting contribution to

the development of a more efficient defense procurement system, one that is capable of meeting any future challenge to American national security.

# 1. CONTRACT FORMATION

## 1.0. Introduction

This chapter sets forth the Panel's analyses and recommendations on procurement policy and on the implementation of the most fundamental of these policies -- full and open competition. The laws which are addressed here apply primarily to matters arising before award of a DOD contract. The Panel divided the laws under this chapter into the following major categories:

- Congressional procurement policy, definitions, and applicability
- Competitive statutes
- Truth in Negotiations Act
- Research and development
- Procurement protests
- Other related statutes.

Congress directed the Panel to determine if the DOD acquisition process could be streamlined by changing or eliminating acquisition laws. The Panel was asked to recommend the repeal or amendment of laws which are "unnecessary for the establishment and administration of the buyer and seller relationships in procurement," while at the same time ensuring "the continuing financial and ethical integrity of defense procurement programs."<sup>1</sup> The Panel was also to consider "the best interests" of DOD.<sup>2</sup>

The Panel examined 80 contract formation laws and found, with few exceptions, that these laws were necessary for the establishment of the buyer-seller relationship. Accordingly, the Panel has recommended the retention of the vast majority of these laws, including those laws which implement the full and open competition mandates of the Competition in Contracting Act of 1984 (CICA).<sup>3</sup> At the same time, the Panel has recommended numerous amendments which it believes will improve and strengthen these laws.<sup>4</sup>

### **1.0.1. Competition as a National Policy**

Competition has been the foundation for the buyer-seller relationship in Government contract laws from the earliest days of the United States. In 1809, for example, Congress enacted

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 800, 104 Stat. 1485, 1587 (1990).

<sup>2</sup>*Id.*

<sup>3</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, Title VIII, 98 Stat. 1175.

<sup>4</sup>The Panel has recommended amending 43% of the laws addressed in this chapter.

a law to provide that "all purchases and contracts for supplies and services shall be made by open purchase or by previously advertising for proposals."<sup>5</sup> This policy was reinforced and strengthened by numerous other laws in the ensuing years.<sup>6</sup>

The role of competition in the buyer-seller relationship was recognized by the Supreme Court in 1925 in *United States v. Purcell Envelope*.<sup>7</sup> In *Purcell*, the Court addressed a sealed bid procurement, the primary method for obtaining competition at that time, and observed that "the procedure for advertising for bids "gives the Government --

. . . the benefit of the competition and each bidder is given the chance of a bargain. It is a provision therefore in the interest of both Government and bidder necessarily giving rights to both and placing obligations on both."<sup>8</sup>

More recently, in response to concerns that competition had become the exception and not the rule in Government contracts, the Congress established full and open competition as the guiding principle for all Government acquisitions. The Conference Report on the Competition in Contracting Act of 1984 explained this principle as follows:

The conference substitute uses "full and open" competition as the required standard for awarding contracts in order to emphasize that all responsible sources are permitted to submit bids and proposals for a proposed procurement. The conferees strongly believe that the procurement process should be open to all capable contractors who want to do business with the Government.<sup>9</sup>

The Report of the House Government Operations Committee on CICA provided further support for competition stating:

The Committee has long held the belief that any effort to reform Government procurement practices must start with a firm commitment to increase the use of competition in the Federal marketplace. Competition not only provides substantially reduced costs, but also ensures that new and innovative products are made available to the Government on a timely basis and that all interested offerors have an opportunity to sell to the Federal Government.<sup>10</sup>

---

<sup>5</sup>2 Stat. 536.

<sup>6</sup>See generally John Cibinic, Jr. and Ralph C. Nash, Jr., *FORMATION OF GOVERNMENT CONTRACTS* 216 (2d ed. 1986).

<sup>7</sup>249 U.S. 313 (1919).

<sup>8</sup>*Id.* at 318-319.

<sup>9</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1442 (1984).

<sup>10</sup>H.R. REP. NO. 1157, 98th Cong., 2d Sess. 11 (1984).

The competition policy underlies all of the Panel's recommendations on contract formation. The Panel believes that its recommendations will improve and strengthen the competition process and enable DOD to gain a fuller measure of the benefits of competition.

### **1.0.2. Objectives**

The following objectives established by the Panel are of primary importance in this Contract Formation Chapter:

- Acquisition laws should identify the broad policy objectives and the fundamental requirements to be achieved. Detailed implementing methodology should be reserved to the acquisition regulations.
- Acquisition laws should establish a balance between an efficient process and
  - full and open access to the procurement system; and
  - socioeconomic policies.
- Acquisition laws should, without requiring contractors to incur additional costs, facilitate the purchase by DOD or its contractors of commercial or modified-commercial products and services at or based on commercial market prices.
- Acquisition laws should provide the means for expeditious and fair resolution of procurement disputes through uniform interpretation of laws and implementing regulations.
- Acquisition laws should encourage the exercise of sound judgment on the part of acquisition personnel.

### **1.0.3. Acquisition of Commercial Products and Services**

In 1986, Congress established a preference for nondevelopmental items, including "any item of supply that is available in the commercial marketplace."<sup>11</sup> The Panel believes this preference has increased in importance because of the reduction in available funding for DOD programs. When Congress established this preference, it did not amend many of the basic competition statutes. After review of these statutes and DOD's efforts to implement this preference, the Panel believes that significant changes should be made to DOD contract formation laws. Accordingly, many of the Panel's recommendations in this and other chapters are directed to removing barriers to the competitive acquisition of commercial products and services.

---

<sup>11</sup> 10 U.S.C. § 2325(d)(1), added by the National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3816 (1986) (*identical legislation omitted*).

## **1.0.4. Panel Recommendations**

The Panel's recommendations on specific areas of contract formation are briefly summarized as follows:

### **1.0.4.1. Congressional Procurement Policy, Definitions, and Applicability**

In its proposed changes, the Panel has sought to provide a clear recognition in the Statement of Congressional Policy of the need for an optimum balance between efficiency, full and open access to the procurement system, and sound implementation of socioeconomic policies. It also has recommended clear policies on preferences for commercial and nondevelopmental items, appropriate allocation of risk, and fair and expeditious resolution of protests and disputes through uniform interpretation of laws and regulations. The Panel has also recommended a new definition of "commercial item" and refinement of the definition of "nondevelopmental item."

### **1.0.4.2. Competitive Statutes**

There are 14 statutes, codified in Titles 10, 40, and 41, which, together with the procurement protest system, provide the fundamental framework for the system of competitive procurement in DOD.

Four of the competitive statutes are on the critical path of every procurement. They are: (1) 10 U.S.C. § 2304, "Contracts: competition requirements;" (2) 10 U.S.C. § 2305, "Competition: planning, solicitation, evaluation, and award procedures;" (3) 10 U.S.C. § 2306, "Kinds of contracts;" and (4) 41 U.S.C. § 416, "Procurement notice." Taken together, these four statutes tell when to compete, how to compete, and what kinds of contracts may be used. The fundamental conclusion of the Panel is that these four statutes, including the fundamental requirement for full and open competition, continue to provide a sound framework for conducting the DOD procurement process in an open, fair, and ethical manner, while meeting mission requirements.

The Panel's major substantive recommendation for amendment of 10 U.S.C. § 2304 is to delete the authority and rule structure for master agreements for advisory and assistance services, section 2304(j), and substitute a completely new authority. This new authority would set forth in the law the recognition of the legitimate need for contracts that do not procure or specify a firm quantity of supplies or services, the legitimate use of proper delivery or task orders under such contracts, and the criteria that such contracts must meet in order for the delivery or task orders issued under them to be exempt from the notice requirements of 41 U.S.C. § 416 (synopsis or posting requirements) and from separate competition or approval of a justification under 10 U.S.C. § 2304(f).

Three of the Panel's four recommended amendments to 10 U.S.C. § 2305 are an integral part of implementing the Panel's recommended improvements to the protest process. The first of these is to amend section 2305 to require regulations which address the debriefing of unsuccessful offerors. The fundamental purpose for this recommended change is to eliminate needless protests.

The Panel believes a timely and meaningful debriefing to an offeror which is not awarded the contract might well provide the unsuccessful offeror with sufficient information to conclude that a protest should not be filed. The proposed amendment would require regulations to accomplish three things. First, the regulations would establish the criteria for determining whether a debriefing is required. Second, the regulations must provide that any required debriefing be conducted to the maximum extent practicable within 15 calendar days after award. Third, the regulations must provide that the debriefing address the strengths and weaknesses of the unsuccessful proposal. A second recommended amendment to section 2305 should also help eliminate needless protests. The Panel has recommended requiring contracting activities to establish, and provide access to, a protest file. Such a file may prevent unnecessary multiple protests on the same proposed contract award since all bidders would have access to the same information that the protester receives. The Panel has also recommended that the agency head be granted the authority to pay bid and proposal costs or attorney fees associated with a protest which the agency believes has merit. Such an explicit grant of authority will encourage more settlements at the agency level of meritorious protests.

The Panel's major recommendation for amendment of 10 U.S.C. § 2306 is to delete the requirement that the head of the agency approve the use of a cost-reimbursement or incentive contract. This determination is often a superfluous justification of a contract type which has already been completely evaluated by the acquisition strategy panel, through approval of the acquisition plan by the Senior Procurement Executive, or by the Under Secretary of Defense (Acquisition) review. Moreover, this determination will be unnecessary if regulations properly implement the Panel's recommended statement of defense procurement policy which, among other things, provides for the appropriate allocation of risk between the Government and the contractor.

Of the five recommended amendments to 41 U.S.C. § 416, two are of particular significance. The Panel concluded the statutory minimum time periods that offerors have to prepare their bids or proposals after notice is published in the Commerce Business Daily may be excessive when the product sought is a commercial item. The proposed amendment exempts commercial items from the existing time periods and directs the Administrator for Federal Procurement Policy to issue rules published in the FAR which prescribe the appropriate time periods.

The Panel has also recommended amendments to section 416 that seek to improve the use of automated means of providing notice for purchases under the Panel's recommended "simplified acquisition threshold" of \$100,000. The Administrator for Federal Procurement Policy would be required to issue rules to accomplish notice through automated means and to take the costs and availability of automated means to offerors, including small businesses, into account. In addition, agencies would be permitted to fulfill or supplement posting requirements through automated means, subject to the Administrator's rules.

#### **1.0.4.3. Truth In Negotiations Act**

The Truth in Negotiations Act (TINA), 10 U.S.C. § 2306a, is an important statute that clearly impacts the critical path of many large-dollar contracts awarded without price competition

and the critical path of many significant contractual modifications. Because of TINA's impacts on the accounting, auditing, and negotiation processes, the Panel solicited comments from a wide range of Government and private sector entities on possible amendments to TINA.

After consideration of comments, analysis of the law, and full consideration of the many related presentations concerning this law, as well as the overall subject of procurement of commercial items, the Panel concluded that the threshold for application of the statute should be stabilized at \$500,000, that the statute should be amended to facilitate acquisition of commercial items and leading edge technology, and that certain conforming language changes should be made for internal consistency and consistency with Panel recommendations elsewhere in this Report.

#### **1.0.4.4. Research and Development**

There are 19 statutes, assigned by the Panel to the Contract Formation Working Group, that provide the general statutory framework for research and development. The Panel concluded that most of these statutes are necessary, are serving their intended purposes, and are not causing significant problems in the acquisition of research and development.

The Panel's most important recommendation on these research and development statutes is to amend 10 U.S.C. § 2358, "Research projects," to clarify that advanced, as well as basic and applied, research and development should be included in the scope of authority granted in the statute and that these authorities should be clearly provided to both the Secretary of Defense and the Secretaries of the military departments. Implementation of this recommendation will make 10 U.S.C. § 2358 the fundamental statute providing authority for performing research and development projects.

#### **1.0.4.5. Procurement Protests**

The Panel recognizes the important role of bid protests in assuring full and open competition and has therefore made recommendations to increase the efficiency and effectiveness of the existing protest remedies. The Panel's recommendations propose specific changes to the current bid protest system, which reinforce the continuing congressional support for GAO and GSBCA resolution of protests and make the current process more efficient.

The Panel believes that the 1982 creation of the U.S. Claims Court, now the Court of Federal Claims, with its grant of bid protest jurisdiction and the interpretation of this jurisdiction by various Federal courts of appeals, has created confusion and unnecessarily impeded the fast, expeditious, and efficient resolution of judicial bid protests. There continue to be significant differences in judicial interpretation of the pre-award bid protest jurisdiction of the Federal district courts and the U.S. Court of Federal Claims. In addition, this pre-award protest jurisdiction of the Court of Federal Claims has been narrowly interpreted. Accordingly, the Panel recommends that Congress consolidate the current bid protest jurisdiction of the Court of Federal Claims and the Federal district courts into a single forum, the U.S. Court of Federal Claims. In conjunction, the Panel also recommends that the jurisdiction of the U.S. Court of Federal Claims be expanded

to include all pre-award and post-award protests that can now be considered by the GAO and GSBICA.

The Panel also proposes that Congress consider whether protests need to be decided by four different forums in three different branches of the Government. The Panel, therefore, recommends that Congress further consider and study whether competition policy might be better served through resolution of protests by a single independent agency located within the executive branch, with powers comparable to those exercised by the existing four forums. With proper authority, this single forum might provide more uniform and cost effective treatment of protests. This agency could provide two different procedures for consideration of protests. The first procedure would be similar to the relatively inexpensive and expeditious procedure now provided by the GAO. The second procedure would be similar to the adjudicatory procedure provided by the GSBICA. The GSBICA-type procedure would be available for all types of procurements over \$100,000, if elected by the protester.

#### **1.0.4.6. Other Related Statutes**

The Panel analyzed 12 codified sections and two uncodified sections of public law which are related to contract formation but which do not readily fit within the theme or subject of the five other subdivisions of this chapter. Three of the more significant Panel recommendations are summarized below.

First, the Panel has recommended repealing 10 U.S.C. § 2308, "Assignment and delegations of procurement functions and responsibilities," and incorporating its substance into 10 U.S.C. § 2311, "Delegation." While both sections address delegations, the former is primarily focused on delegating functions and assigning responsibilities to facilitate joint procurement between two or more agencies, whereas the latter sets out general delegation authority.

Second, the Panel has recommended amending 10 U.S.C. § 2310, "Determinations and decisions," to more clearly distinguish the allowable class justifications and approvals for less than full and open competition made under 10 U.S.C. § 2304 from the prohibited class determinations and decisions made under that section. The Panel has also recommended deleting subsection (b) from section 2310 since the requirements of this subsection are adequately covered in other laws and are properly implemented in the regulations.

Third, the Panel has also proposed making two changes to 10 U.S.C. § 2326, "Unfinalized contractual actions." The first would remove limitations prior to finalization that are stated in terms of expenditures and rely instead on limitations stated in terms of obligations. This recognizes that the Government does not have immediate visibility and control of contractor expenditures, but does control expenditures by limiting the Government's liability to the amount obligated. The second recommended change would allow the head of the agency to waive the percentage limitations on obligations if waiver is necessary in support of a statutorily defined contingency operation or is otherwise in the best interests of the United States. The Panel believes contractors should not unreasonably be discouraged from contracting to meet such an

urgent requirement solely because the time to award a definitive contract that complies with applicable laws and regulations may exceed the time to physically deliver or perform.

## **1.1. Chapter 137, Congressional Policy, Definitions, and Applicability**

### **1.1.0. Introduction**

In this subchapter, the Panel presents its analyses and recommendations on the first three sections of Title 10, Chapter 137, that provide a foundation of congressional defense procurement policy, define terms with broad application in the Chapter, and state the agencies to which the Chapter applies.

As set forth in the analysis of section 2301, "Congressional defense procurement policy," the Panel has devoted substantial time and effort to developing objectives for use in analyzing acquisition laws. The Panel has incorporated some of these objectives, as appropriate, in policy form, melding them with the existing statements of congressional policy in a manner that it believes preserves congressional intent and priorities.

In its proposed changes, the Panel has sought to provide a clear recognition of the need for an optimum balance between efficiency, full and open access to the procurement system, and sound implementation of socioeconomic policies. It also has recommended clear policies on preferences for commercial and nondevelopmental items, appropriate allocation of risk, and fair and expeditious resolution of protests and disputes through uniform interpretation of laws and regulations.

In section 2302, "Definitions," the Panel has recommended a new definition of "commercial item" and the relocation and refinement of the definition of "nondevelopmental item" from section 2325(d). Greater reliance on, and consistency with, 41 U.S.C. § 403 has been recommended, and an increase in the authority to procure outside the United States in support of contingency operations, as defined in section 101(47) of Title 10, has been proposed.

More detailed analyses and recommendations for these three sections are contained within this subchapter.

## 1.1.1. 10 U.S.C. § 2301

### Congressional defense procurement policy

#### 1.1.1.1. Summary of the Law

The statute states congressional policy for defense procurement.<sup>1</sup> With respect to DOD procurement, it is congressional policy that DOD: (1) obtain property and services through the use of full and open competitive procedures; (2) use any type of contract except cost-plus-a-percentage-of-cost contracts that will promote the interests of the Government; (3) use incentives that will improve contractor productivity, capital investment, and advanced technology; (4) acquire economic lot quantities whenever feasible; (5) use advance procurement planning and market research and prepare contract specifications in a manner that will obtain full and open competition; (6) develop a procurement career management program; and, (7) in sealed bid acquisition procedures, preclude evaluation of option prices unless there is a reasonable likelihood that the options will be exercised.<sup>2</sup>

In addition, the statute stipulates that the procurement policies and procedures of DOD, the National Aeronautics and Space Administration (NASA), and the Coast Guard shall (1) promote full and open competition; (2) support agency requirements during wartime, national emergency, and peacetime; (3) promote procurement system responsiveness; (4) maintain an essential defense industrial base; (5) provide incentives to contractors in ways that will reduce Government procurement costs; (6) promote the acquisition of commercial products whenever practicable; and (7) require that agency requirements be stated as functional or performance requirements whenever feasible.<sup>3</sup> The statute also stipulates that a fair proportion of contracts be placed with small business concerns.<sup>4</sup>

#### 1.1.1.2. Background of the Law

The Armed Services Procurement Act of 1947 had a limited declared policy. Specifically, it was that "a fair proportion of the total purchases and contracts for supplies and services for the Government shall be placed with small business concerns."<sup>5</sup> The general 1956 Armed Services codification reaffirmed this policy.<sup>6</sup>

This policy was first expanded upon in 1981 in the defense authorization act for 1992. That act listed three goals: to ensure national defense preparedness, to conserve fiscal resources,

---

<sup>1</sup>10 U.S.C. § 2301(a).

<sup>2</sup>*Id.* 41 U.S.C. § 253f imposes a requirement on executive agencies other than those covered by this statute to procure supplies in economic order quantities.

<sup>3</sup>10 U.S.C. § 2301(b).

<sup>4</sup>10 U.S.C. § 2301(c). 41 U.S.C. § 252(b) makes a similar policy statement applicable to executive agencies other than those covered by this statute.

<sup>5</sup>Armed Services Procurement Act of 1947, Pub. L. No. 80-413, ch. 65, § 2(b), 62 Stat. 21 (1948).

<sup>6</sup>Pub. L. No. 84-1028, ch. 1041, 70A Stat. 127 (1956).

and to enhance defense production capability. To further these goals, Congress found that it was in the best interests of DOD to acquire property and services in the most timely, economic, and efficient manner.<sup>7</sup> Based upon these goals, Congress made three policy declarations. The first was that DOD can use any kind of contract (including multiyear), other than cost-plus-percentage-of-cost; second, contracts should, when practicable, provide for purchase of property in times and quantities which result in reduced Government costs and provide incentives for improving productivity through investments in capital facilities, equipment, and advanced technologies; finally, purchases for weapons systems support should be made in a manner to achieve economic lot purchases and efficient production rates.<sup>8</sup> The provision regarding small business concerns was retained.

The 1984 advent of the Competition in Contracting Act (CICA)<sup>9</sup> provided the last major revision to this section. The basic pre-CICA text was retained, but reorganized. In addition, the amendments added congressional policy statements on use of full and open competition, use of advance procurement planning and market research, and the development and maintenance of a procurement career management program.<sup>10</sup> Finally, guidance on affected agencies' regulations in this area were listed.<sup>11</sup> The small business provisions, although moved to a new subsection (c), remained unchanged.

The legislative history accompanying CICA clearly states that the provisions of the Armed Services Procurement Act are identical to those of the Federal Property and Administrative Services Act (41 U.S.C. § 251 *et seq.*). The conceptual objective was to establish an "absolute preference for competition and, practically, to provide more flexibility in contracting." This preference for competition dates back to 1809.<sup>12</sup>

The last amendment was in 1986. It added a new subsection (a)(7) dealing with the evaluation of options in sealed bid procedures.<sup>13</sup>

### 1.1.1.3. Law in Practice

This statute encompasses broad policy statements. For a discussion as to how those policies are being carried out, refer to the analyses of the following statutes:

10 U.S.C. § 2304, Contracts: competition requirements;<sup>14</sup>

10 U.S.C. § 2305, Contracts: planning, solicitation, evaluation and award procedures;<sup>15</sup>

10 U.S.C. § 2306, Kinds of contracts;<sup>16</sup>

---

<sup>7</sup>Department of Defense Authorization Act, 1982, Pub. L. No. 97-86, § 909, 95 Stat. 1118 (1981).

<sup>15</sup>See Chapter 1.2.2 of this Report.

- 10 U.S.C. § 2317, Encouragement of competition and cost savings;<sup>17</sup>  
10 U.S.C. § 2318, Advocates for competition;<sup>18</sup> and  
10 U.S.C. § 2319, Encouragement of new competitors.<sup>19</sup>

#### **1.1.1.4. Recommendations and Justification**

The Panel sought comments from the private sector and Government entities on this section as part of its work on competitive statutes related to or amended by the Competition in Contracting Act (CICA); however, the Panel's recommended amendments to section 2301 are mainly a result of the Panel's own extensive discussions in seeking a consensus on a set of objectives to serve as a framework for the Panel's review of acquisition laws. Presentations received, and other factors influencing the Panel's development of its 10 objectives that acquisition laws should meet, are discussed in the introduction to the Panel's Report.

Once those 10 objectives were set, the analysis of section 2301 by the Contract Formation Working Group revealed that the statement of congressional defense procurement policy in this section represents the optimum means of conveying those objectives to the degree appropriate in broad policy form. The Panel's analysis of many statutes, congressional reports, and other available information, including the policy statements already included in section 2301, caused the Panel to conclude that there is, at least at the broad policy level, congruence between the Panel's objectives and those of the Congress. Accordingly, the Panel makes the following recommendation:

**Amend section 2301 to incorporate in policy form appropriate objectives developed by the Panel and integrate them with existing congressional defense procurement policy.**

In the congressional findings as stated in subsection (a), the term "enhance defense production capability" has been deleted. In its place, a more comprehensive phrase has been substituted. This phrase, ". . . enhance science and technology, research and development and production capability; provide for continued development and preservation of an efficient and responsive defense industrial base; and ensure the financial and ethical integrity of defense procurement programs," emphasizes the many goals that defense procurement must pursue as it moves into the next century. That there are significant and important restraints upon this is recognized by the declaration that DOD acquisition be done "consistent with achieving an optimum balance among efficient processes, full and open access to the procurement system and sound implementation of socioeconomic policies." The Panel believes that it is both accurate and useful to recognize in congressional policy that there are trade-offs and compromises required between worthwhile objectives.

---

<sup>16</sup>See Chapter 1.2.3 of this Report.

<sup>17</sup>See Chapter 1.2.4 of this Report.

<sup>18</sup>See Chapter 1.2.5 of this Report.

<sup>19</sup>See Chapter 1.2.6 of this Report.

Subsections (a)(2) and (a)(3) are recommended to be added as clear statements of what the Panel believes to be current congressional policy on preference for commercial and nondevelopmental items. The order, as well as the specific wording of paragraph (3), makes the priority between commercial items and other nondevelopmental items clear.

Subsection (a)(4) (renumbered from (a)(2)) adds an important statement regarding risk allocation. The concept of risk allocation has grown in importance as the complexity of the weapons systems acquisition process has increased. Both Government and industry need to work together to ensure appropriate risk allocation between the Government and the contractor, whether it be through contract type, indemnification provisions, or other contractual terms.

Subsection (a)(5) (renumbered from (a)(3)) expands the language to include investment in "flexible manufacturing processes" and "dual-use" technologies. These are important for the future health of the defense industrial base.

Subsection (a)(7) (added) recognizes that the fair and expeditious processing of protests and disputes is essential to the health of the acquisition system, and the ability to rely on precedent and uniform interpretation of laws and regulations is essential to the process. The Panel believes this is a concern of the Congress and is a proper subject for a clear policy statement.

Subsection (a)(8) (renumbered from (a)(5)) retains the intent of the previous policy, but substitutes "state contract requirements" for "prepare contract specifications." The Panel believes that the word "specification" connotes a detailed or "how to" approach, whereas the intent of the Congress expressed, for example in section 2325, is to state requirements in terms of functions to be performed, performance required, or essential physical characteristics. Subparagraphs (B), (C), and (D) are added to embed in the statement of requirements the broad policies previously discussed.

Subsection (a)(9) (renumbered from subsection (a)(6)) reflects the addition of the Defense Acquisition Workforce Improvement Act and its broader application to all acquisition professionals.

The existent subsection (a)(7) was deleted. This subsection is more directive and procedural in nature, as opposed to broad policy. As such, this provision was included in a proposed amendment to 10 U.S.C. § 2305.<sup>20</sup>

Subsection (b) provides congressional policies for agency regulations.<sup>21</sup> It also expands the coverage to include all of Title 10 as opposed to chapter 137 as is in the current version. A significant change is the inclusion of references to Title 41 sections 401, 418b, and 421. The concept of complying with the promotion of "full and open competition" has been expanded upon by reference to the need to "promote and implement" all of the congressional policies contained in

---

<sup>20</sup>See Recommendation and Justification No. IV in Chapter 1.2.2 of this Report.

<sup>21</sup>In this instance it is those agencies listed in 10 U.S.C. § 2303.

41 U.S.C. § 401.<sup>22</sup> To recognize the applicable statutory requirements, specific mention was made of the requirement to comply with 41 U.S.C. §§ 418b and 421 dealing with publication of proposed regulations and the Federal Acquisition Regulation.

Subsection (b)(3) has been renumbered (b)(4) and reorganized to include language reflecting the need to provide incentives to contractors to lower costs of property and services to be acquired. A previous subsection (b)(5) reflecting this concept has been deleted. While this is an important concept, the Panel believes that it more easily fits within this subsection as opposed to being "stand-alone."

A prior subsection (b)(4) was deleted. This was not out of any shrinking of importance; rather, this concept received tremendous emphasis in subsection (a) and is embodied in subsection (b)(2).

Subsections (b)(5) (added) and (b)(6) (renumbered from (b)(7)) discuss commercial and nondevelopmental items. Specific guidance is given regarding encouraging contracting officer discretion to exercise sound judgment in purchasing commercial items without requiring contractors to incur additional costs, avoiding arbitrary tests for purchase of commercial items, and re-emphasizing the need to describe requirements in terms of function or performance.

Subsection (c), dealing with the placement of contracts with small business concerns, is left unchanged.

Note: The latest defense authorization act amended section 2301 by adding subsection (d).<sup>23</sup> This addition does not alter the Panel's above recommendation to incorporate the goals and objectives of Congressional procurement policy within section 2301. Although this addition was not codified as of the date this Report went to press, the Panel has incorporated the change in its proposed statute as if it already had been codified as section 2301(d).

#### **1.1.1.5. Relationship to Objectives**

In general, the Panel believes that these recommendations significantly clarify policies and emphasize concerns which will continue to be the driving factors in DOD acquisition into the next century. They will provide an important policy basis for many of the Panel's specific recommendations on other statutes.

---

<sup>22</sup>This is known as the Office of Federal Procurement Policy Act Amendments of 1983, Pub. L. No. 98-191, 97 Stat. 1325.

<sup>23</sup>National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 808(a), 106 Stat. 2315, 2249 (1992).

### 1.1.1.6. Proposed Statute

#### 10 U.S.C. § 2301. Congressional defense procurement policy

(a) The Congress finds that in order to ensure national defense preparedness; conserve fiscal resources; ~~and enhance defense production capability~~ enhance science and technology, research and development and production capability; provide for continued development and preservation of an efficient and responsive defense industrial base; and ensure the financial and ethical integrity of defense procurement programs. it is in the interest of the United States that property and services be acquired for the Department of Defense in the most timely, economic, and efficient manner consistent with achieving an optimum balance among efficient processes, full and open access to the procurement system and sound implementation of socioeconomic policies. It is therefore the policy of Congress that--

(1) full and open competitive procedures shall be used by the Department of Defense in accordance with the requirements of this chapter;

(2) to the maximum extent practicable, the Department of Defense shall acquire commercial items to meet its needs and shall require prime contractors and subcontractors, at all levels, which furnish other than commercial items, to incorporate to the maximum extent practicable commercial items as components of items being supplied to the Department;

(3) when commercial items and components are not available, practicable or cost effective, the Department shall acquire, and shall require prime contractors and subcontractors to incorporate, other nondevelopmental items and components to the maximum extent practicable;

(2)(4) services and property (including weapon systems and associated items) property and services for the Department of Defense may be acquired by any kind of contract, other than cost-plus-a-percentage-of-cost contracts, but including multiyear contracts, that will promote the interest of the United States and will provide for appropriate allocation of risk between the Government and the contractor with due regard to the nature of the property or services to be acquired;

(3)(5) contracts, when appropriate, provide incentives to contractors to improve productivity through investment in capital facilities, equipment, flexible manufacturing processes, and advanced and dual-use technology;

~~(4)~~(6) contracts for advance procurement of components, parts, and materials necessary for manufacture or for logistics support of a weapon system should, if ~~feasible and practicable~~, be entered into in a manner to achieve economic-lot purchases and more efficient production rates;

(7) procurement protests and disputes be fairly and expeditiously resolved through uniform interpretation of relevant laws and regulations;

~~(5)~~(8) the head of an agency shall use advance procurement planning and market research and prepare state contract specifications requirements in such a manner as is necessary to

(A) obtain full and open competition with due regard to the nature of the property or services to be acquired;

(B) facilitate the acquisition by the agency and its contractors of commercial items at or based on commercial market prices;

(C) facilitate the acquisition by the agency and its contractors of nondevelopmental items in accordance with the requirements of this chapter; and

(D) facilitate agency access to commercial technologies and the skills available in the commercial market place to develop new technologies; and

~~(6)~~(9) the head of an agency ~~encourage the~~ shall development and maintenance of a ~~procurement~~ maintain an acquisition career management program to ensure a professional ~~procurement acquisition~~ work force in accordance with the requirements of Chapter 87; and

~~(7) the head of an agency, in issuing a solicitation for a contract to be awarded using sealed bid procedures, not include in such solicitation a clause providing for the evaluation of prices under the contract for options to purchase additional supplies or services under the contract unless the head of the agency has determined that there is a reasonable likelihood that the options will be exercised.~~

(b) Further, it is the policy of Congress that procurement policies and procedures for the agencies named in section 2303 of this title shall in accordance with the requirements of this title chapter--

(1) promote full and open competition be issued in accordance with and conform to the requirements of 41 U.S.C. §§ 418b and 421;

(2) promote and implement the Congressional policies in subsection (a) of this section and 41 U.S.C. § 401;

~~(2)(3)~~ be implemented to support the requirements of such agencies in time of war or national emergency as well as in peacetime;

~~(3)(4)~~ promote responsiveness of the procurement system to agency needs by -- ~~simplifying and streamlining procurement processes;~~

(i) simplifying and streamlining procurement processes; and

(ii) providing incentives to encourage contractors to take actions and make recommendations that would reduce the costs of property or services to be acquired;

~~(4) promote the attainment and maintenance of essential capability in the defense industrial base and the capability of the United States for industrial mobilization;~~

~~(5) provide incentives to encourage contractors to take actions and make recommendations that would reduce the costs to the United States relating to the purchase or use of property or services to be acquired under contracts;~~

~~(6) promote the use of commercial products whenever practicable; and~~

(5) promote the acquisition and use of commercial items and of other nondevelopmental items both as end items and as components by --

(i) encouraging contracting officers to exercise sound judgment in purchasing and facilitating the purchase by contractors of commercial items at or based on commercial market prices, without requiring contractors to incur additional costs;

(ii) avoiding the imposition of arbitrary restrictions or tests not required by law on the purchase or pricing of commercial items; and

~~(7)(6)~~ promote the acquisition and use of commercial items and of other nondevelopmental items by require requiring descriptions of agency requirements, whenever practicable, in terms of functions to be performed or performance required.

(c) Further, it is the policy of Congress that a fair proportion of the purchases and contracts entered into under this chapter be placed with small business concerns.

(d) It is also the policy of Congress that qualified nonprofit agencies for the blind or severely handicapped (as defined in section 2410(b) of this title) shall be afforded the maximum practicable opportunity to provide approved commodities and services (as defined in such section) as subcontractors and suppliers under contracts awarded by the Department of Defense.

## 1.1.2. 10 U.S.C. § 2302

### Definitions

#### 1.1.2.1. Summary of the Law

The statute provides definitions of terms applicable to procurement by DOD, the National Aeronautics and Space Administration (NASA), and the Coast Guard. It defines the following terms: head of an agency, competitive procedures, full and open competition, responsible source, technical data, major system, Federal Acquisition Regulation and small purchase threshold.<sup>1</sup>

#### 1.1.2.2. Background of the Law

The Competition in Contracting Act of 1984 (CICA) effectively replaced the text of this statute.<sup>2</sup> Prior to the enactment of CICA, the statute defined the terms "head of an agency," "negotiate" and "formal advertising."<sup>3</sup> CICA made minor changes in the first definition, deleted the latter two definitions and added definitions for the terms "competitive procedures," "full and open competition," and "responsible source."

Before CICA, an agency required specific authority to enter into a contract using negotiated rather than formal advertising procedures. Prior legislation did not recognize that negotiated procurements could also ensure competition in the acquisition of property and services. However, the majority of Government procurement funds were expended through negotiated procurements. Congress found that in many cases the authority for using negotiated procurements was abused to justify inappropriate sole-source acquisitions.<sup>4</sup>

Through CICA, Congress attempted to curtail inappropriate sole-source acquisitions and to provide agencies broader discretion in the use of legitimate negotiated procurements as a means for obtaining competition in the acquisition of property and services. The emphasis was to shift the statutory framework from justifying the use of negotiation to justifying the use of noncompetitive negotiations.<sup>5</sup> Consequently, it amended this statute to delete the terms "negotiate" and "formal advertising" and substitute definitions for the terms "competitive procedures," "full and open competition," and "responsible source."<sup>6</sup>

After passage of CICA, Congress added the terms "technical data," "major system," "Federal Acquisition Regulation," and "small purchase threshold" to the list of definitions.<sup>7</sup>

### 1.1.2.3. Law in Practice

The FAR incorporates these definitions in FAR Parts 1, 2, 6, 13, 27, and 34.

### 1.1.2.4. Recommendations and Justification

The Panel sought comments from industry and Government agencies concerning the statute and determined that it still fulfills a valid need. The Panel considers it useful to have a single location for definitions with broad applicability throughout Title 10. The Panel does recommend that the section be restructured and certain new definitions be added.

#### I

**Delete definitions at sections 2302(4) and (5) and move terms to section 2302(3); add other terms to section 2302(3).**

Restructuring is recommended to maximize uniformity between the definitions in this section and those in 41 U.S.C. § 403. Presently, "full and open competition" and "responsible source" are defined by reference to 41 U.S.C. § 403. To that list would be added "technical data" and "major system," both currently defined separately in 10 U.S.C. § 2302, but having the same definition in 41 U.S.C. § 403. Also, the Panel recommends that the terms "procurement," "procurement system," and "standards," which are defined at 41 U.S.C. § 403, be added to the list.

#### II

**Delete section 2302(7) and relocate to section 2302(4). Change "small purchase threshold," to "simplified acquisition threshold," reference 41 U.S.C. § 403(11) at section 2302(4) and add language concerning "contingency operation."**

A subparagraph concerning "simplified acquisition threshold" was added to indicate that the term has the meaning given that term in section 4(11) of the Office of Federal Procurement Policy Act (41 U.S.C. § 403(11)).<sup>8</sup> Also, the Panel recommends including an amended alternate threshold for contracts awarded and performed or purchases to be made outside the United States in support of a "contingency operation" from the present level of \$100,000 to two times the "simplified acquisition threshold." An amendment to section 101(47) by the National Defense Authorization Act for Fiscal Years 1992 and 1993, defines "contingency operation" as a military operation that:

(A) is designated by the Secretary of Defense as an operation in which members of the armed forces are or may become involved in

---

Years 1990 and 1991, Pub. L. No. 101-189, § 853(b)(1), 103 Stat. 1352, 1518 (1989). Persian Gulf Conflict Supplemental Authorization and Personnel Benefits Act of 1991, Pub. L. No. 102-25, § 701(d), 105 Stat. 75, 113.  
<sup>8</sup>See the analysis at Chapter 4.1 of this Report.

military actions, operations, or hostilities against an enemy of the United States or against an opposing military force; or

(B) results in the call or order to, or retention on, active duty of members of the uniformed services under section 672(a), 673, 673b, 673c, 688, 3500, or 8500 of this title, chapter 15 of this title, or any other provision of law during a national emergency declared by the President or Congress.<sup>9</sup>

The Panel recognized that the level of purchases to be permitted in support of contingency operations using simplified acquisition procedures is a matter for judgment by the Congress, based upon perceived needs. The Panel noted that in its previous action, the Congress authorized \$100,000, an amount four times the current small purchase threshold. The Panel's judgment was that the amount should be stated in terms of a multiple of the simplified acquisition threshold to be set forth in 41 U.S.C. § 403(11) and that if the Congress enacts the Panel's recommended threshold of \$100,000, some latitude above that should be provided for overseas procurements in support of contingency operations. The Panel's consensus was that two times the recommended threshold, which would be \$200,000 at enactment, represents a reasonable threshold.

### III

#### **Add definition of "commercial items" to section 2302(5).**

The Panel recommends including within this section its proposed definition of commercial items. As discussed in detail in Chapter 8 of this Report, the Panel spent a large amount of its time and effort developing and refining this definition. The Panel discussed this definition, as it was being developed, at many of its meetings and received many oral and written comments and suggestions. The Panel believes this definition will support the objectives of the Congress, as well as the Panel, to facilitate the efficient and economical procurement of commercial items, while helping to ensure that only those items to which commercial market forces and methods actually apply are included in the definition.

Placement of this new definition in section 2302(5) gives it prominence in the statute and permits appropriate reference throughout Title 10 to reduce redundancy and avoid the insertion in other sections of varying definitions or undefined terms.

### IV

**Amend section 2302(6) by incorporating the definition of "nondevelopmental item" currently at section 2325(d) and amend the definition for clarity and simplicity.**

---

<sup>9</sup>Pub. L. No. 102-190 § 631, 105 Stat. 1290, 1380 (1991).

The Panel recommends including the definition of nondevelopmental item in this section because it should be given prominence in this title, will be easier to refer to in other sections, and should be collocated with the definition of commercial item.

## V

### **Retain the term "full and open competition."**

The Panel considered amending this statute and 10 U.S.C. § 2304 to provide a definition for the term "adequate and effective competition" and the conditions under which such competition could be used. The Panel perceived situations in which the responses received to a solicitation did not warrant the expense the Government incurred in preparing, reproducing, and distributing solicitation documents. However, the Panel concluded after extensive discussion that retreat from the "full and open competition" standard was neither warranted nor wise.

The Panel was particularly mindful of concerns expressed by Congress when it enacted CICA. When Congressman Brooks introduced CICA before the House of Representatives in 1984, he expressed the following opinion:

Rather than address [the problems of increased costs resulting from limited competition], DOD has consistently attempted to expand the definition of competition to include procurements which severely limit competition or which eliminate it completely. In this regard, DOD asserts that sufficient competition exists as long as just two vendors are involved in the procurement. However, as long as a single qualified vendor is prohibited from competing, the Department will not be getting its money's worth.<sup>10</sup>

The Senate version of CICA used "effective" competition as the standard for awarding federal contracts. The House and Senate conference committee, however, substituted the "full and open" competition standard, stating,

In Government contracting, **effective competition** is a marketplace condition which results when two or more contractors, acting independently of each other and of the Government, submit bids or proposals in an attempt to secure Government business. . . . The conference substitute uses **"full and open" competition** as the required standard for awarding contracts in order to emphasize that all responsible sources are permitted to submit bids or proposals for a proposed procurement. The conferees strongly believe that the procurement process should be open to all capable contractors who want to do business with the Government. The conferees do not intend, however, to change the long-standing practice in which

---

<sup>10</sup>130 Cong. Rec. H6011 (daily ed. Mar. 20, 1984) (remarks of Rep. Brooks).

contractor responsibility is determined by the agency after offers are received.<sup>11</sup>

In commenting on a policy letter issued by the Office of Federal Procurement Policy (OFPP) in 1984, Congress also said,

. . . [T]his regulation fails to define competition. In fact the regulations do not even refer to the term "full and open competition" even though OFPP's authorization legislation establishes this as national policy.

The FAR states that **sufficient competition** is achieved as long as offers are received from at least two independent sources that are capable of satisfying the requirements of the agencies. Thus, the standard for competition is not whether an agency has opened up a procurement to all qualified sources, but whether it received at least two bids. In the Committee's view, an acquisition is hardly competitive when it is limited to just two independent sources, since additional bidders are often available to meet a government requirement. Using the traditional view, an agency may select two of its vendors and then assert that a "**reasonable degree of competition**" has been achieved. The Committee believes that full and open competition exists only when all qualified vendors are allowed to compete in an agency acquisition.<sup>12</sup>

In addition to consideration of the congressional concerns, clearly expressed above, the Panel concluded, based upon its own knowledge and experience, that there would be great difficulties involved in precisely defining "adequate and effective competition," as well as significant possible unintended consequences of the adoption of that standard. The Panel also noted that as the technology of electronic data interchange (EDI) permits greater use of electronic commerce, the costs of preparing and publicizing solicitations are likely to decrease.

#### **1.1.2.5. Relationship to Objectives**

These recommendations support several of the Panel's goals and objectives, including the goal to streamline the body of defense acquisition laws and the objectives to encourage the exercise of sound judgment on the part of acquisition personnel, to facilitate the purchase by DOD or its contractors of commercial or modified commercial products and services at or based on commercial market prices, and promote development and preservation of the defense industrial base.

### 1.1.2.6. Proposed Statute

#### 10 U.S.C. § 2302. Definitions

In this chapter:

(1) The term "head of an agency" means the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, the Secretary of Transportation, and the Administrator of the National Aeronautics and Space Administration.

(2) The term "competitive procedures" means procedures under which the head of an agency enters into a contract pursuant to full and open competition. Such term also includes--

(A) procurement of architectural or engineering services conducted in accordance with title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 541 et seq.);

(B) the competitive selection for award of basic research proposals resulting from a general solicitation and the peer review or scientific review (as appropriate) of such proposals;

(C) the procedures established by the Administrator of General Services for the multiple award schedule program of the General Services Administration if--

(i) participation in the program has been open to all responsible sources;  
and

(ii) orders and contracts under such program result in the lowest overall cost alternative to meet the needs of the United States;

(D) procurements conducted in furtherance of section 15 of the Small Business Act (15 U.S.C. 644) as long as all responsible business concerns that are entitled to submit offers for such procurement are permitted to compete; and

(E) a competitive selection of research proposals resulting from a general solicitation and peer review or scientific review (as appropriate) solicited pursuant to section 9 of the Small Business Act (15 U.S.C. 638).

(3) The terms "procurement," "procurement system," "standards," "full and open competition," ~~and~~ "responsible source," "technical data," and "major system" have the same meanings provided such terms in 41 U.S.C. § 403 (Office of the Federal Procurement Policy Act), section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. 403).

(4) The term "simplified acquisition threshold" has the meaning provided that term in section 4(11) of the Office of Federal Procurement Policy Act (41 U.S.C. § 403(11)) except that, in the case of any contract to be awarded and performed, or purchase to be made, outside the

United States in support of a contingency operation, as defined in section 101(47) of this title, the term means an amount equal to two times the amount specified in 41 U.S.C. § 403(11).

(5) The term "commercial item" means --

(A) property, other than real property, which --

(i) is sold or licensed to the general public for other than government purposes;

(ii) has not been sold or licensed to the general public, but is developed or is being developed primarily for use for other than government purposes; or

(iii) is comprised of a combination of commercial items, or of services and commercial items, of the type customarily combined and sold in combination to the general public;

(B) The term "commercial item" also includes services used to support items described in subparagraph (A), such as installation, maintenance, repair and training services, whether such services are procured with the commercial item or under a separate contract; provided such services are or will be offered contemporaneously to the general public under similar terms and conditions and the government and commercial services are or will be provided by the same workforce, plant, or equipment;

(C) With respect to a specific solicitation, an item meeting the criteria set forth in subparagraphs (A) or (B) if unmodified will be deemed to be a commercial item when modified for sale to the government if the modifications required to meet government requirements (i) are modifications of the type customarily provided in the commercial marketplace or (ii) would not significantly alter the inherent nongovernmental function or purpose of the item in order to meet the requirements or specifications of the procuring agency;

(D) An item meeting the criteria set forth in subparagraphs (A), (B), or (C), need not be deemed other than "commercial" merely because sales of such item to the general public for other than governmental use are a small portion of total sales of that item; and

(E) An item may be considered to meet the criteria in subparagraph (A) even though it is produced in response to a Government drawing or specification; provided, that the item is purchased from a company or business unit which ordinarily uses customer drawings or specifications to produce similar items for the general public using the same workforce, plant, or equipment.

(6) The term "nondevelopmental item" means --

(A) any commercial item; any item of supply that is available in the commercial marketplace;

(B) any previously developed item of supply that is in use by a department or agency of the United States, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;

(C) any item of supply described in subparagraph (A) or (B) that requires only minor modification in order to meet the requirements of the procuring agency; or

(D) any item of supply that is currently being produced that does not meet the requirements of subparagraph (A), (B), or (C) solely because the item -

(i) is not yet in use; or

(ii) is not yet available in the commercial marketplace.

~~(4) The term "technical data" means recorded information (regardless of the form or method of the recording) of a scientific or technical nature (including computer software documentation) relating to supplies procured by an agency. Such term does not include computer software or financial, administrative, cost or pricing, or management data or other information incidental to contract administration.~~

~~(5) The term "major system" means a combination of elements that will function together to produce the capabilities required to fulfill a mission need. The elements may include hardware, equipment, software or any combination thereof, but excludes construction or other improvements to real property. A system shall be considered a major system if (A) the Department of Defense is responsible for the system and the total expenditures for research, development, test, and evaluation for the system are estimated to be more than \$75,000,000 (based on fiscal year 1980 constant dollars) or the eventual total expenditure for procurement of more than \$300,000,000 (based on fiscal year 1980 constant dollars); (B) a civilian agency is responsible for the system and total expenditures for the system are estimated to exceed \$750,000 (based on fiscal year 1980 constant dollars) or the dollar threshold for a "major system" established by the agency pursuant to Office of Management and Budget (OMB) Circular A-109, entitled "Major Systems Acquisitions," whichever is greater; or (C) the system is designated a "major system" by the head of the agency responsible for the system.~~

~~(6)(7) The term "Federal Acquisition Regulation" means the Federal Acquisition Regulation issued pursuant to section 25(c)(1) of the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)(1)).~~

~~(7) The term "small purchase threshold" has the meaning given that term in section 4(11) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(11)), except that, in the case of any contract to be awarded and performed, or purchase to be made, outside the United States in support of a contingency operation, the term means \$100,000.~~

### **1.1.3. 10 U.S.C. § 2303**

#### **Applicability of chapter**

##### **1.1.3.1. Summary of the Law**

This statute identifies the agencies and types of procurements to which Chapter 137 of Title 10 applies.<sup>1</sup> Chapter 137 applies to the appropriated fund procurement of all services and property, except land, by DOD, the military departments, the Coast Guard, and the National Aeronautics and Space Administration (NASA).<sup>2</sup>

##### **1.1.3.2. Background of the Law**

This statute originated in sections 2(a) and 9 of the Armed Services Procurement Act of 1947.<sup>3</sup> Subsequent amendments have clarified the agencies named therein<sup>4</sup> and deleted the original section 9 provision which specified that the term "supplies" meant all property except land, but did include buildings.<sup>5</sup>

##### **1.1.3.3. Law in Practice**

The provisions of Chapter 137 are implemented throughout various parts of the FAR and DFARS.

##### **1.1.3.4. Recommendation and Justification**

#### **Retain**

The Panel recommends retaining this statute as presently written. The Panel sought comments from industry and Government agencies concerning the statute and determined that it still fulfills a valid need. No issues were identified warranting amendment.

---

<sup>1</sup>10 U.S.C. § 2301 *et seq.*

<sup>2</sup>41 U.S.C. § 252 prescribes procurement laws applicable to executive agencies other than those named by this section.

<sup>3</sup>Armed Services Procurement Act of 1947, Pub. L. No. 80-413, §§ 2(a), (9), 62 Stat. 20, 24 (1948). This statute was initially codified at 41 U.S.C. §§ 151 and 158 and subsequently recodified at 10 U.S.C. § 2303 by Pub. L. No. 85-1028, ch. 1041, 70A Stat. 128 (1956).

<sup>5</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2722(b), 98 Stat. 1187.

### **1.1.3.5. Relationship to Objectives**

This statute, which defines the applicability of other procurement laws, provides a streamlining function and is essential to an understandable and coherent statutory procurement scheme.

## **1.2. Competitive Statutes**

### **1.2.0. Introduction**

There are 14 statutes, codified in Titles 10, 40, or 41, presented and analyzed in this subchapter. These statutes, together with the procurement protest system, presented in detail separately in Chapter 1.5, provide the fundamental framework for the system of competitive procurement in DOD. When applied in conjunction with the Truth in Negotiations Act (TINA) at 10 U.S.C. § 2306a, these statutes also provide the fundamental framework for sole-source or limited-source negotiations under exceptions to the general requirement for full and open competition, including the methods for selection and award of architect-engineering services.

Four of these statutes are on the critical path of every procurement. Section 2304 of Title 10, "Contracts: competition requirements," provides the fundamental requirement for full and open competition, as well as the exceptions and the methods for justifying these exceptions. It also provides the statutory basis for inclusion in the regulations of simplified procedures for small purchases. Section 416 of Title 41, "Procurement notice," prescribes the public notice requirements for procurements to ensure prospective offerors are aware of solicitations to be issued and awards made. Section 2305 of Title 10, "Competition: planning, solicitation, evaluation, and award procedures," prescribes these processes, both for sealed bids and competitive proposals. Section 2306 of Title 10, "Kinds of contracts," provides broad latitude for the kinds of contracts that may be used, prescribes requirements for use of multiyear contracts, places limitations on fees in cost type contracts, and prohibits cost-plus-a-percentage-of-costs contracts. Taken together then, these four statutes tell when to compete, how to compete, and what kinds of contracts may be used.

The Contract Formation Working Group solicited comments on these and other competition related statutes in February 1992<sup>1</sup> and again in June 1992.<sup>2</sup> After analyzing the responses and the supporting rationale, the Panel concluded that a series of specific recommended amendments would improve clarity, facilitate processes, and implement broader recommendations of the Panel presented elsewhere in this Report; however, the fundamental conclusion of the Panel is that these four statutes, including the fundamental requirement for full and open competition,<sup>3</sup> continue to provide a sound framework for conducting the DOD procurement process in an open, fair, and ethical manner, while meeting mission requirements.

The most important recommendations on these four statutes are summarized here. This summary will be followed by discussions of selected recommendations on the other competitive statutes included in this subchapter.

---

<sup>1</sup>Memorandum from Contract Formation Working Group signed by Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Advisory Panel on Streamlining and Codifying Acquisition Laws, Defense Systems Management College to Distribution (Industry and Government) (Feb. 11, 1992).

<sup>2</sup>Memorandum from Contract Formation Working Group signed by Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Advisory Panel on Streamlining and Codifying Acquisition Laws, Defense Systems Management College to Distribution (Industry and Government) (June 8, 1992).

<sup>3</sup>See Chapter 1.2.1 of this Report for analysis of 10 U.S.C. § 2304.

The Panel has made recommendations for 10 amendments to section 2304, "Contracts: competition requirements." All but one of these are procedural or are necessary to implement in section 2304 other recommendations of the Panel. These include amendment of section 2304(g) to provide for simplified procedures in the Federal Acquisition Regulation (FAR) for purchases of property or services with a value not in excess of the new "simplified acquisition threshold," initially \$100,000, recommended by the Panel in Chapter 4.1.

The Panel's major substantive recommendation for amendment of section 2304 is to delete the authority and rule structure for master agreements for advisory and assistance services, currently at section 2304(j), and substitute a completely new section 2304(j). This new section would set forth in law the recognition of the legitimate need for contracts that do not procure or specify a firm quantity of supplies or services, the legitimate use of proper delivery or task orders under such contracts, and the criteria that such contracts must meet in order for the delivery or task orders issued under them to be exempt from the notice requirements of 41 U.S.C. § 416 (synopsis or posting requirements) and from separate competition or approval of a justification under section 2304(f).

The Panel requested and received comments on the current provision for master agreements in subsection (j). Several commenters cited the limited utility of the master agreements as presently prescribed in section 2304(j). While the Panel was considering these and other comments and considering possible amendments to section 2304(j), the Panel was contacted by the Director of Defense Procurement (DDP), who expressed her concern about the abuse of indefinite quantity and task order contracts, including those for other supplies and services, as well as those for advisory and assistance services. She cited repeated audit and IG criticism of the award and administration of such contracts, as well as identification of specific problems by the OSD procurement staff. She requested that the Panel consider and make appropriate legislative recommendations in its deliberations, but did not recommend specific proposals.

Problems cited by the DDP are also known to some of the Panel members, both Government and private sector. In the Panel's several discussions of these issues, the Panel generally considered that properly awarded indefinite quantity contracts, and other contracts involving delivery or task orders, are within the competition requirements of section 2304, if the various requirements of Chapter 137 of Title 10 and 41 U.S.C. § 416 are complied with.

The Panel believes that it is important that DOD continue to be permitted by law and regulation to award contracts for supplies or services in which the detailed requirements, timing of work, and definite dollar value cannot be reasonably known when the basic contract is awarded. Without such ability, many legitimate requirements and tasks would be unnecessarily delayed or result in attempts by requirements personnel and contracting officers to justify sole-source contracting actions, including inappropriate use of undefinitized contractual actions.

Since the master agreement authority of section 2304(j) is limited to advisory and assistance services and includes many restrictions on award, duration, and competition of individual task orders, the Panel does not believe that it represents an effective solution to the overall problem. The Panel is aware that this authority was requested by DOD, and believes that

it was a sincere, but not entirely successful, attempt to address one very important portion of a larger problem. Therefore, the Panel recommends amendment of section 2304(j) by deletion of the current master agreement authority, as amended by section 2331(c) and the National Defense Authorization Act for Fiscal Year 1993, and substitution of an entirely new subsection (j).

The recommended section 2304(j)(1) provides the basic recognition and description of the contracts involved, including those awarded using competitive procedures and those awarded using less than full and open competition after approval of a justification under an exception. The recommended section 2304(j)(2) exempts from the notice (synopsis) requirements of the relevant laws, and from the requirement to compete or obtain an approved justification under subsection (f), only delivery or task orders under contracts that comply with the statutory and regulatory requirements that follow in paragraphs (3), (4), and (5) of subsection (j).

The recommended section 2304(j)(3) provides for appropriate standards for notice (synopsis); a definite contract period and a maximum value; reasonable description of the general scope, nature, complexity, and purposes of the supplies or services; meaningful evaluation criteria, properly applied; and, if more than one contract is awarded, a clear method of competing or allocating delivery or task orders among contracts.

The recommended section 2304(j)(4) squarely addresses the issue by prohibiting in law the expansion of the contract scope or period by delivery or task order. It also clearly requires any modification to the basic contract that significantly expands the scope, contract period, or maximum value of the contract to be competed or justified under section 2304. The providing of notice (synopsis) helps ensure that potential competitors will be aware of such proposed expansion and have the opportunity to object. Section 2304(j)(5) requires the Secretary of Defense to issue implementing regulations and provide for audit and oversight.

The Panel believes that this statutory rule structure will meet the legitimate needs for having contracts in place to responsively provide supplies or perform services when the quantities, timing, and exact nature are not known in advance. As important, it will prevent the improper use of such contracts to avoid competing new or expanded requirements when competition is appropriate, or ensure proper approval of the justification when it is not. Adoption of this recommendation will help to ensure the continuing financial and ethical integrity of defense procurement, help to establish a balance between efficient processes and full and open access to the procurement system, and permit the exercise of sound judgment by acquisition personnel within appropriate statutory limits.

The Panel has recommended four amendments to section 2305, "Competition: planning, solicitation, evaluation, and award procedures." One of these is a relocation of procedural material from section 2301(a)(7). The others are an integral part of implementing the Panel's recommended improvements in the protest process, discussed more fully in Chapter 1.5. The first of these is to amend section 2305(b)(4)(B) to require regulations which address the debriefing of unsuccessful offerors.

The fundamental purpose for this recommended change is to eliminate needless protests. As this Report explains more fully in the analysis of 31 U.S.C. § 3553, it is a commonly accepted belief that a number of protests would not have been filed if a meaningful debriefing had been provided in a timely manner to the protesters. A timely and meaningful debriefing to an offeror which is not awarded the contract award might well provide the unsuccessful offeror with sufficient information to conclude that a protest should not be filed. The statute as presently written requires an agency to promptly notify unsuccessful offerors of the rejection of their proposals but does not require a debriefing. FAR 15.1003 does require debriefings. The Panel believes timely and meaningful debriefings should be a statutory requirement, but the detailed requirements of a debriefing should be left to the regulations.<sup>4</sup>

The proposed amendment would require the regulations to accomplish three things. First, the regulations would establish the criteria for determining whether a debriefing is required. Not all procurement actions should entitle unsuccessful offerors to a debriefing, particularly those below the simplified acquisition threshold and those actions which do not involve significant judgments about factors other than price. Second, the regulations must provide that any required debriefing be conducted to the maximum extent practicable within 15 calendar days after award. The sooner a debriefing is conducted, the more likely it is to prevent an unnecessary protest. Finally, the regulations must provide that the debriefing address the strengths and weaknesses of the unsuccessful proposal. A debriefing which contains such information, in contrast to a debriefing which focuses exclusively on how a bidder might improve its next proposal, will more likely avoid unnecessary protests.

The second recommendation is to amend section 2305(b) to require contracting activities to establish, and provide access to, a protest file. Closely related to the preceding recommendation, the purpose of this recommended statutory addition is to prevent unnecessary multiple protests on the same proposed contract award. In the pre-award situation, bidders not filing a protest may believe they are at a disadvantage if they do not receive the same information that the protester receives. Therefore, they may feel compelled to intervene in the original protest by filing their own protest, since the delay in waiting to obtain the information through a Freedom of Information Act request might prejudice their interests. Requiring such a file to be established once one protest is lodged would not unduly burden a contracting activity since the information which the file would contain would necessarily be collected to respond to the protest.

The third recommendation is to amend section 2305(b) by granting to the agency head the same authority the Comptroller General has when the agency determines a solicitation, proposed award, or award does not comply with a statute or regulation. Currently, it is not clear that an agency can pay bid and proposal costs or attorneys fees associated with a protest which the agency believes has merit. The Panel believes that such an explicit grant of authority will encourage more agency settlements of protests.

The Panel has recommended four amendments to section 2306, "Kinds of contracts." Three of these are procedural or needed to implement other Panel recommendations. The major

---

<sup>4</sup>See Chapter 1.2.2 of this Report for analysis of 10 U.S.C. § 2305.

recommendation is to amend section 2306 by deleting subsection (c). Section 2306(c) requires approval by the head of an agency before use of a cost-reimbursement or incentive contract is allowed. However, Congress has for the last four years raised the approval level to the Under Secretary of Defense for Acquisition for fixed-price contracts in excess of \$10 million for the development of a major system or subsystem.

The agency head determination required by section 2306(c), which is delegable pursuant to section 2311, often becomes a superfluous justification of a contract type which has already been completely evaluated by the acquisition strategy panel, through approval of the acquisition plan by the Senior Procurement Executive, or by the Under Secretary of Defense (Acquisition) review. Moreover, the section 2306(c) determination and approval restrictions in the appropriations acts will be unnecessary if the Panel's recommended statement of defense procurement policy is properly implemented by regulations. The recommended policy, which is expressed at section 2301(a)(4), states that property and services for DOD may be acquired by any kind of contract, other than cost-plus-a-percentage-of-cost contracts, but including multiyear contracts, that will promote the interest of the United States and will provide for appropriate allocation of risk between the Government and the contractor with due regard to the nature of the property or services to be acquired.

This policy seeks to ensure agencies select the appropriate type of contract by requiring them to focus on the nature of property or services to be acquired and the proper allocation of risk between parties. The methodology for implementing this policy, including the prescription of approval requirements by the milestone decision authority, or other officials, should be left entirely to the regulations. The Panel considers selection of contract type to be an integral part of the acquisition strategy and planning process.

The Panel has recommended five amendments to 41 U.S.C. § 416, "Procurement notice," and provided one recommendation for future consideration by the Congress. One recommendation is to harmonize the dollar threshold for posting notices at the contracting office at \$10,000 for both DOD and the civilian agencies. Another is to increase flexibility when setting deadlines for submission of offers for commercial products.

Section 416(a)(3) establishes minimum time periods that offerors have to prepare their bids or proposals after notice is published in the Commerce Business Daily. The Panel believes the time periods may be excessive when the product sought is a commercial item. For example, a supplier may already have an existing catalog which describes the item and shows the market price of a commercial item when the notice is published, and therefore does not need the usual 30 days to submit a bid. The rigidity of the present law precludes setting a shorter time for the submission of bids and proposals and thus builds unnecessary delay and attendant costs into the acquisition process. The proposed section 416(a)(4) exempts commercial items from the statutory time constraints described above and directs the Administrator for Federal Procurement Policy to issue rules published in the FAR which prescribe the appropriate time periods.

The Panel has recommended amendments that seek to improve the use of automated means of providing notice for purchases under the Panel's recommended "simplified acquisition

threshold" of \$100,000. A new section 416(e) would be added to require the Administrator for Federal Procurement Policy to issue rules to accomplish notice through automated means and to take the costs and availability of automated means to offerors, including small businesses, into account. An amendment to section 416(a)(1)(B) would permit agencies to fulfill or supplement posting requirements through automated means, subject to the Administrator's rules.

Because of the Panel's recommendation in Chapter 4.1 of this Report to raise the simplified acquisition threshold (currently termed "small purchase threshold") to \$100,000 from \$25,000, fewer procurement actions will require publication in the Commerce Business Daily. To prevent any potential adverse impact on competition from such decreased notice, section 416(e) requires the Administrator for Federal Procurement Policy to issue regulations which will ensure there is adequate notification of actions below the threshold.

The use of automated systems is a rapidly changing technology which can and does facilitate the rapid, widespread, and efficient dissemination of information. This technology should, therefore, be used to the maximum extent practicable to satisfy the notice requirement of this statute. However, the Panel does not at this time advocate use of automated systems in lieu of publication in the Commerce Business Daily for actions over the simplified acquisition threshold because the Commerce Business Daily is at present the only standardized, uniform repository of such procurement information. As the technology evolves and experience is gained, the Panel recommends that Congress consider alternative publication methods above the simplified acquisition threshold and, when appropriate, authorize the issuance of new uniform and Government-wide regulations.

The Panel has recommended retention of both 41 U.S.C. § 418 and 10 U.S.C. § 2318, both entitled, "Advocates for Competition," but with obsolete material in section 2318(c) to be repealed.

The Panel solicited comments on section 418. The possibility of combining sections 2318 and 418 was considered, but commenters varied in their responses and the Panel concluded that no clear improvement would result. One comment received recommended that the entire area of the need for single issue advocates be examined, questioning whether they have served their purpose and their affordability, including their staffs, in a declining budget environment.

The Panel considered in its discussions whether competition is sufficiently institutionalized in DOD to permit the elimination of competition advocates. The Panel concluded that in an environment of decreasing budgets, fewer new programs, and greater reliance on upgrade and modifications of existing systems, it may be very difficult to maintain current levels of competition or improve them further. For that reason, and in light of their expanded role as advocates for commercial and nondevelopmental items, the Panel concluded that both the competition advocates and sections 2318 and 418 should be retained.

The Panel has recommended moving the definition of nondevelopmental items from 10 U.S.C. § 2325(d) to 10 U.S.C. § 2302(6). Other proposed amendments to section 2325 focus

this statute on product descriptions to promote the use of both commercial and nondevelopmental items.

Section 2317 of Title 10, "Encouragement of Competition and Cost Saving," requires the Secretary of Defense to establish procedures to ensure that personnel appraisal systems of DOD give appropriate recognition to efforts to increase competition and achieve cost savings in areas related to contracts. The Air Force stated that the Competition Advocate General of the Air Force does not believe this requirement is necessary to ensure a successful competition program, and recommended repeal. Another commenter stated, "There is a question as to the need for this provision in light of the passage of the Defense Workforce Improvement Act subsequent to CICA, and the creation of the acquisition corps."

The Panel recognizes that efforts to increase competition and achieve cost savings are important in the work of many DOD personnel. There are many laws, regulations, processes, and reviews which support competition and cost savings. This section does not add meaningful or unique requirements to the inherent responsibilities of agency heads to provide appropriate systems of performance appraisal for agency personnel. Therefore, the Panel considers section 2317 to be an unnecessary congressional requirement placed on a traditional management prerogative and has recommended repeal of this section.

The Panel has recommended amendment of 40 U.S.C. § 541(3)(C) to delete the word "may" as a possible means of resolving ongoing disagreements about how the regulators are to interpret the definition of architectural and engineering services. A detailed analysis and rationale are included in this subchapter.

More detailed analyses of the recommendations summarized above, as well as analyses of the other competitive statutes, are included in this subchapter.

## 1.2.1. 10 U.S.C. § 2304

### Contracts: competition requirements

#### 1.2.1.1. Summary of the Law

This statute requires, with certain exceptions, the head of an agency to obtain full and open competition using competitive procedures when conducting a procurement for property or services. The agency head is to use the competitive procedure, or combination of competitive procedures, best suited to the circumstances.<sup>1</sup>

The statute provides that agencies may either solicit sealed bids or competitive proposals. Sealed bidding procedures must be used if: (1) there is adequate time for soliciting, submitting, and evaluating bids; (2) award will be only on the basis of price or price-related factors; (3) discussions with offerors concerning their bids will not be necessary; and (4) there is a reasonable expectation that more than one bid will be received.<sup>2</sup>

The statute permits the head of an agency to use competitive procedures, but to exclude a particular source in order to establish or maintain an alternate source(s), after determining that doing so: (1) would increase or maintain competition and result in lower overall costs for current or future procurements; (2) would be in the interests of national defense in having a facility or source available in case of national emergency or industrial mobilization; or (3) would be in the interest of national defense in establishing or maintaining an essential engineering, research, or development capability of an educational or other nonprofit institution or a federally funded research and development center (FFRDC).<sup>3</sup>

Agencies may also use competitive procedures that exclude sources other than small business concerns under 15 U.S.C. §§ 638 or 644 or exclude concerns other than small business concerns, historically Black colleges and universities, and minority institutions in furtherance of section 1207 of the National Defense Authorization Act of 1987. Justification and approval is not required under section 2304(f)(1) for such procurements.<sup>4</sup>

Although the statute mandates the use of competitive procedures, an agency may use other than competitive procedures only when the procurement falls within any of the following seven exceptions:<sup>5</sup>

(1) the property or services are available from only one source or a limited number of sources;<sup>6</sup>

<sup>4</sup> *Id.*

<sup>5</sup> 10 U.S.C. § 2304(c).

**Preceding Page Blank**

(2) there is an unusual and compelling urgency in which the Government would be seriously injured unless the number of sources were limited;<sup>7</sup>

(3) it is necessary to award the contract to a particular source(s) to establish or maintain a facility or supplier in the event of national emergency or industrial mobilization or an essential engineering, research or development capability to be provided by an educational or other nonprofit institution or a FFRDC;

(4) an international agreement between the U.S. and a foreign government or international organization requires the use of noncompetitive procedures, or it is required by written directions of a foreign government paying for the procurement;

(5) a statute authorizes or requires procurement from a specific source or the acquisition is for a brand name commercial item for resale;

(6) disclosure of agency needs would compromise national security unless the number of sources were limited;<sup>8</sup> or

(7) the agency head determines that the use of other than competitive procedures is in the public interest.<sup>9</sup>

An agency may not award a contract under exceptions (1), (2), (3), or (6) above using other than competitive procedures unless the appropriate officials justify and approve the use of such procedures.<sup>10</sup> However, the justification and approval for a procurement under the unusual

---

<sup>6</sup>An unsolicited research proposal offering a unique or innovative capability that is not the subject of a pending procurement is considered as a procurement available from only one source. In addition, a follow-on contract for continued development or production of a major system or highly specialized equipment or services may be considered as available from only one source. See 10 U.S.C. § 2304(d)(1).

<sup>7</sup>Under this exception, the agency must request offers from as many sources as practicable. 10 U.S.C. § 2304(c).

<sup>8</sup>Under this exception, the agency must request offers from as many sources as practicable. 10 U.S.C. § 2304(c).

<sup>9</sup>The agency head may not delegate this authority. 10 U.S.C. § 2304(d)(2). Under this exception the agency head must notify Congress in writing at least 30 days before the award of the contract. 10 U.S.C. § 2304(c)(7)(B).

<sup>10</sup>10 U.S.C. § 2304(f)(1). The contracting officer prepares the justification. The approval authority depends on the contemplated dollar amount of the contract as follows:

For amounts exceeding	Up to	The approval authority is
\$100,000	\$1 million	The procuring activity's competition advocate.
\$1 million	\$10 million	The head of the procuring activity or delegate.
\$10 million	\$50 million	The agency's senior procurement executive or delegate pursuant to 10 U.S.C. § 2304(f)(6)(B).
\$50 million		The agency's senior procurement executive.

and compelling urgency exception may be made after the contract is awarded.<sup>11</sup> An agency may not contract using other than competitive procedures because it failed to conduct advance planning for the procurement or because of concerns related to funds availability.<sup>12</sup> The statute describes the minimum information required in any justification for the use of other than competitive procedures.<sup>13</sup> It also requires that any notice required by 41 U.S.C. § 416 (synopsis in the Commerce Business Daily or posting requirement) has been published and all responses considered.<sup>14</sup>

The statute also specifies the grade levels of officials to whom the authorities of the head of the contracting activity, senior procurement executive, or the Under Secretary of Defense for Acquisition may delegate authority to approve justifications. To promote efficiency and economy, the statute permits regulations to provide for special simplified procedures for purchases of property and services below the small purchase threshold.<sup>15</sup>

The statute requires the Secretary of Defense to prescribe regulations governing price negotiations for supplies to be acquired using other than competitive procedures.<sup>16</sup> The regulations must specify the incurred overhead a contractor can allocate to the contract and require the contractor to identify supplies it did not manufacture or to which it did not contribute significant value.<sup>17</sup> The regulations do not apply to an item for which the price is based on established catalog or market prices of commercial items sold in substantial quantities to the general public.<sup>18</sup>

The statute also authorizes the Secretary of Defense to enter into master agreements under which task orders may be issued for specific advisory or assistance services.<sup>19</sup> A master agreement may not exceed a two-year period.<sup>20</sup> Any such agreement must be with at least three sources that submitted offers for the master agreement under competitive procurement procedures.<sup>21</sup> The total value of task orders issued under master agreements by a contracting activity during a fiscal year may not exceed 30% of the value of all contracts for advisory and assistance services awarded by the contracting activity in fiscal year 1989.<sup>22</sup>

---

In the case of a DOD procurement exceeding \$50 million, the Under Secretary of Defense for Acquisition, acting as the senior DOD procurement executive, may delegate approval authority pursuant to 10 U.S.C. § 2304(f)(5)(C).

<sup>11</sup> 10 U.S.C. § 2304(f)(2).

<sup>12</sup> 10 U.S.C. § 2304(f)(5).

<sup>13</sup> 10 U.S.C. § 2304(f)(3).

<sup>14</sup> 10 U.S.C. § 2304(f)(1)(C).

<sup>15</sup> 10 U.S.C. § 2304(g).

<sup>16</sup> 10 U.S.C. § 2304(i).

<sup>17</sup> *Id.*

<sup>18</sup> *Id.*

<sup>19</sup> 10 U.S.C. § 2304(j).

<sup>20</sup> *Id.*

<sup>21</sup> *Id.*

<sup>22</sup> *Id.* at (j)(4). However, as noted in Chapter 1.6.6 of this Report, 10 U.S.C. § 2331(c) allows the Secretary of Defense to raise the 30% limitation to 50%. Such waiver becomes effective 60 days after notice of the waiver is published in the Federal Register.

### 1.2.1.2. Background of the Law

The original law regarding the method of soliciting offers was passed in 1861 and required the use of advertising.<sup>23</sup> After many exceptions to the statutory requirement for advertising were passed, the Armed Services Procurement Act of 1947 (ASPA)<sup>24</sup> was enacted to "make uniform all the laws and rules covering purchase procedures for the armed services and [repeal] many obsolete and diverse laws."<sup>25</sup> The ASPA included, among other things, a statutory preference for the use of formal advertising rather than negotiation procedures.<sup>26</sup> Contracts could only be negotiated if the requirements for one of 17 exceptions were satisfied.

The Competition in Contracting Act of 1984 (CICA) replaced the text of section 2304.<sup>27</sup> CICA mandates the use of competitive procurement procedures unless an exception applies. Congress intended this law to help ensure the Government obtains the advantages of competitive procurement: lower procurement costs, reduced cost growth on major system acquisitions, technical innovation, enhanced mobilization capability and industry responsiveness, and assurance that contracts are awarded based on merit rather than favoritism.<sup>28</sup>

In enacting CICA, Congress also wanted to correct problems it perceived in the Government procurement process. Congress believed the existing laws were inadequate because they neither recognized negotiation as a legitimate procurement procedure nor adequately restricted the use of noncompetitive negotiation.<sup>29</sup> Congress also wanted to curtail poor agency procurement practices: inappropriate sole-source contract awards, the use of noncompetitive procedures in order to obligate appropriations before the end of the fiscal year, the use of overly restrictive specifications limiting opportunities for legitimate competition, and agency bias toward only certain sources. In addition, Congress wanted to instill greater discipline in the procurement process by requiring advance procurement planning and market research.<sup>30</sup>

CICA incorporated the terms "sealed bid" and "competitive proposal" into the statute in lieu of the pre-CICA terminology, "formal advertising" and "negotiation." Changing this terminology was done to eliminate the competitive and noncompetitive connotations associated, respectively, with the former terms.<sup>31</sup> As originally proposed, CICA would have provided only the first six exceptions to the requirement for using competitive procedures. The conference

committee added the seventh exception to allow the head of an agency, on a non-delegable basis, to determine when the public interest required the use of other than competitive procedures.<sup>32</sup>

In 1984 and in 1989, Congress made clarifying amendments to subsection (b)(2) of the statute concerning the restriction of solicitations in order to further promote small business concerns and small, disadvantaged business concerns.<sup>33</sup>

In 1986, Congress revised subsection (d)(1) concerning unsolicited proposals and follow-on contracts to its present text.<sup>34</sup> The purpose was to clarify the test for awarding a contract for an unsolicited proposal on a noncompetitive basis and to ensure follow-on contracts for services were dealt with in the same manner as follow-on contracts for products.<sup>35</sup>

Congress twice amended subsections (f)(1) and (f)(6) of the statute to revise and clarify who can approve the use of other than competitive procedures and to whom such authority can be delegated. The 1988 amendments clarified the approval authorities for agencies within DOD other than the military departments.<sup>36</sup> The following year, Congress changed the approval levels and delegation authorities to those presently depicted in the statute in order to promote administrative efficiency.<sup>37</sup>

Congress also amended subsection (f)(2) on two occasions to clarify when a justification and approval for the use of other than competitive procedures is not required. It first amended the subsection in 1985 to reflect that a justification and approval is not required for the acquisition of a brand name commercial item for authorized resale, such as items acquired for sale in commissaries.<sup>38</sup> The 1989 amendments added a subsection (f)(2)(E) to reduce the paperwork burden on acquisition managers when the procurement is directed by a foreign source.<sup>39</sup>

In 1990, subsection (g) was amended by substituting the term "small purchase threshold" for the dollar amount of \$25,000 that had previously been specified to govern the application of simplified procedures for small purchases.<sup>40</sup>

Congress added subsection (i) in 1986.<sup>41</sup> This subsection, which requires the Secretary of Defense to prescribe regulations governing price negotiations for supplies to be acquired using other than competitive procedures, was added to curb what Congress perceived were outrageous overhead costs that were passed to DOD on such common items of supply as hammers. It was also intended to identify opportunities for breakout purchases by DOD of supplies manufactured by subcontractors but sold through prime contractors. Congress provided that the regulations do not apply to an item for which the price is based upon the established catalog or market price of commercial items sold in substantial quantities to the general public because the marketplace determines the price of such an item.<sup>42</sup>

Congress added subsection (j), which concerns the use of master agreements, in 1989.<sup>43</sup> DOD requested the authority to enter into such agreements in order to facilitate its acquisition of needed study, advisory and assistance services on a timely basis.<sup>44</sup> Congress agreed that streamlined procedures were desirable but also was adamant that any new procedures should ensure adequate competition and prevent conflicts of interests by firms that provide consulting services to the Government. Consequently, the authority to use master agreements was granted only on a test basis to last three years once appropriate regulations were promulgated.<sup>45</sup> Nevertheless, Congress viewed this test program "as an important step in the development of improved policies and procedures in the acquisition of advisory and assistance services, including professional and technical services."<sup>46</sup> The recent extension of the test program through the end of fiscal year 1994<sup>47</sup> was made after DOD advised Congress that the test program had facilitated the acquisition of advisory and assistance services using competitive procurement procedures.<sup>48</sup>

Congress has also included in recent defense appropriations acts a recurring provision which has impacted this statute but which has not been codified.<sup>49</sup> For the last several years, Congress has precluded agencies from entering into a contract for studies, analyses, or consulting services on the basis of an unsolicited proposal if there has been no competition, unless the head of the activity responsible for the procurement determines that: (1) only one source is qualified; (2) the purpose of the contract is to explore an unsolicited proposal which offers significant

scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source; or (3) the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to ensure that a new product or idea of a specific concern is given financial support. In addition, this restriction does not apply to contracts of less than \$25,000, to contracts related to improvements of equipment that is in development or production, or to contracts determined by a qualifying official to be in the interest of the national defense.

#### **1.2.1.3. Law in Practice**

FAR Part 6, as supplemented by DFARS Part 206, implements the statute's requirements for full and open competition and the authorized exceptions thereto. FAR Part 13, as supplemented by DFARS Part 213, implements the provisions concerning small purchases. FAR Subparts 15.8 and 15.9 and corresponding DFARS subparts prescribe regulations for the price negotiation of other than competitive procurements. DFARS 237.270 implements provisions concerning DOD master agreements.

FAR Subpart 15.5, which addresses unsolicited proposals, implements the requirements of the uncodified appropriations act provisions described in the Background of the Law section above. The FAR restrictions on the acceptance of unsolicited proposals are more sweeping than those in the statute since they apply to all types of contracts, not just to those for studies, analyses, or consulting services. Because the regulations adequately implement the statutory provisions and have been published for quite some time, the Panel believes the continued insertion of the referenced provision in future appropriations acts is unnecessary.

#### **1.2.1.4. Recommendations and Justification**

The Panel requested comments on section 2304, as well as other CICA-related sections by letter in February 1992. Based upon discussions and its own analysis, the Contract Formation Working Group raised a variety of potential issues to stimulate comment, but stated it was equally interested in other issues commenters might wish to raise.<sup>50</sup> After analyzing the responses, including the reasoning and support for positions taken, the Working Group concluded that section 2304, while lengthy and complex, is a fundamentally sound statute that requires full and open competition, but also provides appropriate exceptions that adequately cover the range of legitimate needs to procure using less than full and open competition. The Panel considered recommending a change to "adequate and effective competition" and definition of that term in section 2302, but for reasons set forth in detail in Chapter 1.1, the Panel concluded that such a change would create great difficulties in precise definition, could result in adverse unintended consequences, and would not be acceptable to the Congress.

In a second request for comments, the Working Group conveyed the Panel's intent to recommend only modest amendments concerning approving authorities and again requested

---

<sup>50</sup>Letter from Maj Gen John D. Slinkard, USAF and Thomas J. Madden to Distribution (industry and Government) (Feb. 11, 1992).

comments on master agreements.<sup>51</sup> As reflected in the recommendations that follow, most proposed amendments are either procedural or are needed to conform to the Panel's recommendations on other statutes. The major exception is the recommended amendment of section 2304(j) by repeal of the existing language and substitution of new language of general applicability to the award and administration of contracts under which delivery or task orders will be issued.

## I

**Amend section 2304(a)(1)(A) by deleting "modifications to regulations promulgated pursuant to section 2752 of the Competition in Contracting Act of 1984 (41 U.S.C. 403 note)" and substituting "the Federal Acquisition Regulation."**

The amendments required by section 2752 of CICA are in the Federal Acquisition Regulation. It is well known and understood by that name, and its issuance and maintenance are controlled by 41 U.S.C. § 421.

## II

**Amend section 2304(b) and (d) by adding new paragraphs which specifically prohibit the agency head from making the required determinations for a class of purchases or contracts.**

The addition of these two paragraphs is necessary to conform to the Panel's recommendation in Chapter 1.6.2 of this Report to clarify which determinations may, and may not be, made for a class of purchases or contracts. Chapter 1.6.2 explains the rationale for this recommendation and the corresponding amendment to 10 U.S.C. § 2310(a).

## III

**Amend section 2304(f)(1)(A) by deleting the words "for the contract."**

While the contracting officer justifying the use of other than competitive procedures would normally be the contracting officer "for the contract," there are some circumstances, including a class justification and approval, in which it may not be the same individual.

## IV

**Amend section 2304(f)(1)(B)(i) by adding after "(without further delegation)" the words "or by an official described in clauses (ii) through (iv) below."**

---

<sup>51</sup>Letter from Maj Gen John D. Slinkard, USAF and Thomas J. Madden to Distribution (Industry and Government) (June 8, 1992).

This change would recognize that it may be appropriate in some circumstances for a higher-level official that already has authority to approve actions over \$1,000,000 to approve an action between \$100,000 and \$1 million. For example, in a highly classified special access program, one would not clear and access the procuring activity competition advocate solely for the purpose of approving the justification.

## V

**Amend section 2304(f)(1)(B)(ii) and (f)(6)(A) to delete "head of the [a] procuring activity" and substitute "head of the [a] contracting activity."**

The Panel has recommended this change for consistency, both here and elsewhere, to reflect current usage and to be consistent with the FAR.

## VI

**Amend section 2304(g)(1) by deleting "the regulations modified in accordance with section 2752 of the Competition in Contracting Act of 1984 (41 U.S.C. § 403 note)" and substituting "the Federal Acquisition Regulation" and by deleting the word "small" before "purchases of property and services" and adding thereafter "with a value not in excess of the simplified acquisition threshold."**

This recommendation deletes words no longer current, as in recommendation I above, and specifies the FAR as the source of simplified procedures for purchases of supplies and services below the new simplified acquisition threshold recommended by the Panel in Chapter 4.1. This recommendation assumes that the Panel's recommended change to 41 U.S.C. § 403(11) will be enacted and will apply throughout the Government. If the threshold applied only in DOD, the recommended wording would be as follows:

(g)(1) In order to promote efficiency and economy in contracting and to avoid unnecessary burdens for agencies and contractors, the Secretary of Defense shall provide through the Federal Acquisition Regulation and the Defense Federal Acquisition Regulation Supplement the regulations modified in accordance with section 2752 of the Competition in Contracting Act of 1984 (41 U.S.C. 403 note) shall provide for special simplified procedures for small purchases of property and services with a value not in excess of the simplified acquisition threshold.

## VII

**Amend section 2304(g) by deleting paragraph (2), renumbering paragraphs (3) and (4), and changing therein "small purchase threshold" to "simplified acquisition threshold" and small purchase procedures to "simplified procedures."**

This recommendation is for consistency.

## VIII

**Amend section 2304(h) by deleting subsection (h)(1) and (2) and by incorporating the words in subsection (h)(2) within the basic subsection (h).**

This is consistent with the Panel's recommendation in Chapter 4.2 on the "Walsh-Healey Act" (41 U.S.C. §§ 35-45).

## IX

**Amend subsection (i)(3) by deleting the current wording and substituting "(3) Such regulations shall not apply to a commercial item, as defined in section 2302(5) of this title or to another item included in a contract or subcontract for which the price is based on established catalog or market prices of commercial items sold in substantial quantities to the general public."**

Commercial items as defined in the Panel's definition recommended for inclusion in section 2302(5) can and should be totally exempted from the requirements of paragraph (2)(A) and (B). DOD should not prescribe the allocation of overhead in a commercial entity's accounting system, nor should there be a need to examine the value added by the contractor, since commercial market forces would limit inappropriate markups. The second portion of the wording preserves the original intent of the Congress and recognizes that there may be some items that are not within the definition for which the price is based on catalog or market prices of commercial items.

## X

**Amend subsection (j) by deleting the entire subsection, including language currently included in section 2331(c), and substituting an entirely new subsection (j) that prescribes requirements for contracts that do not procure or specify a firm quantity of supplies or services and provide for obtaining supplies or services by issuance of delivery orders or task orders.**

The panel requested and received comments on the current provision for master agreements in subsection (j). The requests for comments focused on whether the test period for master agreements should be extended and whether master agreements, now limited in duration to two years, should be extended and be required to be competed every three years.<sup>52</sup> Most commenters mildly supported extending the test period and more strongly supported the need to permit master agreements to last up to five years.<sup>53</sup> Several commenters cited the limited utility of the master agreements as presently prescribed in section 2304(j).

The Air Force commenter stated:

We see no reason to extend the test period for master agreements. The Air Force has not been able to determine an effective use of this provision nor any suitable acquisition candidates. Further, we are not convinced master agreements are necessary, since pre-existing authority already permits contracting techniques similar to master agreements.<sup>54</sup>

The Army commenter stated:

I believe that Sec. 2304(j) should be rewritten. It is unnecessarily complex, and therefore buying activities have not made as good a use of master agreements as had been hoped.<sup>55</sup>

The Council of Defense and Space Industry Associations (CODSIA) stated in part:

These agreements are very time-consuming and expensive to negotiate. Under the current law, with only two years between contracts, advisory and assistance services contractors often find themselves in perpetual contract negotiations. As an additional consideration, if a decision to enter into a master agreement with fewer than three sources is made, it must be supported with a written determination which stipulates that no other qualified sources for the required services are available.

The requirement to have at least three contractors sign a master agreement should be deleted. It is no less an efficient method of procuring the needed services when there are only one or two

<sup>55</sup>Memorandum from Department of the Army signed by Joseph Varaday Jr., Dir. of Procurement Policy, to Maj Gen John D. Slinkard, USAF, and Thomas J. Madden, Advisory Panel on Streamlining and Codifying Acquisition Law, Defense Systems Management College (Feb. 27, 1992).

contractors available to perform the service. There is no logical reason to restrict the availability of this type of agreement to only situations where at least three suitable contractors can be found.

Revise the last phrase in (j)(2) deleting the words in brackets to read "considering only [cost or price and other] the factors included in the request for offers." This will eliminate any confusion arising from the use of the word "only" before a combination of factors to be considered.<sup>56</sup>

While the Panel was considering these and other comments and considering possible amendments to section 2304(j), the Panel was contacted by the Director of Defense Procurement (DDP), who expressed her concern about the abuse of indefinite quantity and task order contracts, including those for other supplies and services, as well as those for advisory and assistance services. She cited repeated audit and IG criticism of the award and administration of such contracts,<sup>57</sup> as well as identification of specific problems by the OSD procurement staff. She requested that the Panel consider any appropriate legislative recommendations in its deliberations, but did not recommend specific proposals.

Problems cited by the DDP are also known to some of the Panel members, both Government and private sector. In the Panel's several discussions of the issues, the Panel generally considered that properly awarded indefinite quantity and other contracts involving delivery orders or task orders are within the competition requirements of section 2304 if the various requirements of Chapter 137 of Title 10 and 41 U.S.C. § 416 are complied with.<sup>58</sup>

The Panel generally considers that the problems, and valid criticism, stem from the difficulty in writing an adequate statement of work for the basic contract, failure to adequately evaluate proposals using valid criteria, or most often and most importantly, issuance of delivery or task orders beyond the originally contemplated scope and value of the contract without recompetition or approval of the required justification under section 2304(f). The Panel is aware that in some instances, the ultimate value of delivery or task orders greatly exceeded the estimated amount of work originally competed, or included work not fairly included in the work competed.

The Panel believes that it is important that DOD continue to be permitted by law and regulation to award contracts for supplies or services in which the detailed requirements, timing of work, and definite dollar value cannot be reasonably be known when the basic contract is awarded. Without such ability, many legitimate requirements and tasks would be unnecessarily

---

<sup>56</sup>Letter from CODSIA signed by Don Fuqua, President, AIA, John J. Stocker, President, Shipbuilders Council of America, James R. Hogg, President, NSIA, and Dan C. Heinemeier, Vice President, EIA, to Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Advisory Panel on Streamlining and Codifying Acquisition Law, Defense Systems Management College (Mar. 12, 1992).

<sup>57</sup>See e.g., DODIG Report No. 91-041, February 1, 1991, *Contract Advisory and Assistance Service Contracts*, and DODIG Report No. 93-023, November 13, 1992, *Time-and-Materials Billings on Air Force Contract F33600-86-D-0295*.

<sup>58</sup>See generally *Astronautics Corp. of America*, Comp. Gen. B-242782, 91-1 CPD ¶ 531; and *Stanford Telecommunications, Inc.*, Comp. Gen. B-241449, 90-2 CPD ¶ 475.

delayed or result in attempts by requirements personnel and contracting officers to justify sole-source contracting actions, including inappropriate use of undefinitized contractual actions.<sup>59</sup>

Since the master agreement authority of section 2304(j) is limited to advisory and assistance services and includes many restrictions on award, duration, and competition of individual task orders, the Panel does not believe that it represents an effective solution to the overall problem. The Panel is aware that this authority was requested by DOD, and believes that it was a sincere, but not entirely successful, attempt to address one very important portion of a larger problem. Therefore, the Panel recommends amendment of section 2304(j) by deletion of the current master agreement authority, as amended by section 2331(c) and the National Defense Authorization Act for Fiscal Year 1993.<sup>60</sup>

The Panel recommends a new section 2304(j) set forth in full in the proposed amended statute included in this analysis, which would set forth in law the recognition of the legitimate need for contracts that do not procure or specify a firm quantity of supplies or services, the legitimate use of proper delivery orders or task orders under such contracts, and the criteria that such contracts must meet in order for the delivery or task orders issued under them to be exempt from the notice requirements of 41 U.S.C. § 416 and from separate competition or approval of a justification under section 2304(f).

The recommended section 2304(j)(1) is set forth in full below. It provides the basic recognition and description of the contracts involved, including those awarded using competitive procedures and those awarded using less than full and open competition after approval of a justification under an exception.

(j)(1) When a contract is awarded using competitive procedures as defined in section 2302(2) of this title, or under an exception

---

<sup>59</sup>The Panel's view that such contracts should be permitted to continue is echoed by a comment received. The corporate counsel for Science Applications International Corporation (SAIC) stated:

Finally, noncompeting delivery orders, [which comply with the law described above], are not only permissible but practical. It is recognized by everyone that competing delivery orders on an indefinite quantity contract, when not required to do so, are clearly duplicative and render the original competition meaningless. In trying to ascertain how much delay could reasonably be anticipated by competing delivery orders, we quite naturally looked in-house at our own experience and discovered that we, in fact, have one indefinite contract that does compete delivery orders and that it takes a minimum of five months to compete each delivery order. Our experience in similar contracts where delivery orders are not competed shows that the average lead-time is two weeks for issuance of delivery orders. We doubt that such a time gap is fully responsive to the DOD's needs in most instances.

Letter from SAIC signed by Barry Shillito to Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Advisory Panel on Streamlining and Codifying Acquisition Law, Defense Systems Management College (Nov. 2, 1992).

<sup>60</sup>National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 816, 106 Stat. 2315, 2454 (1992).

permitted by subsection (c) of this section, properly approved in compliance with subsection (f) of this section, but does not procure or specify a firm quantity of supplies or services (other than any minimum or maximum quantity), such contract for supplies or services may provide for the issuance of delivery orders or task orders during the specified term of the contract.

The recommended section 2304(j)(2) is set forth in full below. It exempts from the notice (synopsis) requirements of the relevant laws and from the requirement to compete or obtain an approved justification under subsection (f) *only* delivery orders or task orders under contracts that comply with the statutory and regulatory requirements that follow in paragraphs (3), (4), and (5).

(2) Provided that a contract described in paragraph (1) complies with the requirements of paragraphs (3) and (4) and with regulations issued pursuant to paragraph(5), the delivery orders or task orders issued under such contract shall not --

(A) require separate notice under section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416) and section 8(e) of the Small Business Act (15 U.S.C. § 637(e)); or

(B) require separate competition or justification under this section.

The recommended section 2304(j)(3) is set forth in full below. It provides for appropriate standards for notice (synopsis); a definite contract period and a maximum value; reasonable description of the general scope, nature, complexity, and purposes of the supplies or services; meaningful evaluation criteria, properly applied; and, if more than one contract is awarded, a clear method of competing or allocating delivery or task orders among contracts.

(3) Contracts to which the provisions of paragraph (2) apply shall --

(A) be awarded as a result of a solicitation for which the notice required by sections 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416) and 8(e) of the Small Business Act (15 U.S.C. § 637(e)) reasonably and fairly describes the general scope, magnitude, and duration of the proposed contract in a manner that would reasonably permit a potential offeror to decide whether to request the solicitation and consider submitting an offer;

(B) specify in the solicitation and contract the period of the contract, including the number and period of any options.

and the maximum quantity or dollar value of supplies or services to be procured under the contract;

(C) both in the solicitation and contract, reasonably describe in the statement of work, specifications, or other description, the general scope, nature, complexity, and purposes of the supplies or services to be procured under the contract;

(D) be awarded as a result of a solicitation which specifies, and an evaluation of proposals that properly applies, evaluation criteria which include estimated or firm costs, prices, or rates and other evaluation criteria directly relating to the offeror's ability to provide the supplies or services at the level of quality required; and,

(E) if the contract is one of multiple contracts awarded from the same competitive solicitation for the same or similar supplies or services, specify, both in the solicitation and contract, the manner in which individual delivery orders or task orders will be negotiated and either competed among or allocated among the multiple contracts.

The recommended section 2304(j)(4) is set forth in full below. It squarely addresses the issue by prohibiting in law the expansion of the contract scope or period by delivery or task order. It also clearly requires any modification to the basic contract that significantly expands the scope, contract period or maximum value of the contract to be competed or justified under section 2304. The providing of notice (synopsis) helps ensure that potential competitors will be aware of such proposed expansion and have the opportunity to object.

(4) Significant increases in the scope, period, or maximum value of the contracts described in paragraph (3) shall be made only by modification to the basic contract or contracts, and not by delivery orders or task orders, and shall be accomplished by competitive procedures or properly justified as exceptions under this section, including the providing of notice under 41 U.S.C. § 416 and 15 U.S.C. § 637(e).

Section 2304(j)(5) requires the Secretary of Defense to issue implementing regulations and provide for audit and oversight.

The Panel believes that this statutory rule structure will meet the legitimate needs for having contracts in place to responsively provide supplies or perform services when the quantities, timing, and exact nature are not known in advance. As important, it will prevent the improper use of such contracts to avoid competing new or expanded requirements when competition is appropriate, or ensure proper approval of the justification when it is not.

### 1.2.1.5. Relationship to Objectives

Recommendations I through IX will help to simplify and clarify acquisition laws and implement other Panel recommendations in this complex, but fundamentally sound statute. Adoption of recommendation X will help to ensure the continuing financial and ethical integrity of defense procurement, help to establish a balance between efficient processes and full and open access to the procurement system, and permit the exercise of sound judgment by acquisition personnel within appropriate statutory limits.

### 1.2.1.6. Proposed Statute

#### 10 U.S.C. § 2304. Contracts: competition requirements

(a)(1) Except as provided in subsections (b), (c), and (g) and except in the case of procurement procedures otherwise expressly authorized by statute, the head of an agency in conducting a procurement for property or services--

(A) shall obtain full and open competition through the use of competitive procedures in accordance with the requirements of this chapter and the Federal Acquisition Regulation ~~modifications to regulations promulgated pursuant to section 2752 of the Competition in Contracting Act of 1984 (41 U.S.C. 403 note); and~~

(B) shall use the competitive procedure or combination of competitive procedures that is best suited under the circumstances of the procurement.

(2) In determining the competitive procedure appropriate under the circumstances, the head of an agency--

(A) shall solicit sealed bids if--

- (i) time permits the solicitation, submission, and evaluation of sealed bids;
  - (ii) the award will be made on the basis of price and other price-related factors;
  - (iii) it is not necessary to conduct discussions with the responding sources about their bids; and
  - (iv) there is a reasonable expectation of receiving more than one sealed bid;
- and

(B) shall request competitive proposals if sealed bids are not appropriate under clause (A).

(b)(1) The head of an agency may provide for the procurement of property or services covered by this chapter using competitive procedures but excluding a particular source in order to establish or maintain an alternative source or sources of supply for that property or service if the head of the agency determines that to do so--

(A) would increase or maintain competition and would likely result in reduced overall costs for such procurement, or for any anticipated procurement, of property or services;

(B) would be in the interest of national defense in having a facility (or a producer, manufacturer, or other supplier) available for furnishing the property or service in case of a national emergency or industrial mobilization; or

(C) would be in the interest of national defense in establishing or maintaining an essential engineering, research, or development capability to be provided by an educational or other nonprofit institution or a federally funded research and development center.

(2) The determination required of an agency head in paragraph (1) shall not be made for a class of purchases or contracts.

~~(2)(3) The head of an agency may provide for the procurement of property or services covered by this section using competitive procedures, but excluding concerns other than small business concerns in furtherance of sections 9 and 15 of the Small Business Act (15 U.S.C. 638, 644) and concerns other than small business concerns, historically Black colleges and universities, and minority institutions in furtherance of section 2323 of this title, 1207 of the National Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note).<sup>61</sup>~~

~~(3)(4) A contract awarded pursuant to the competitive procedures referred to in paragraphs (1) and (2) shall not be subject to the justification and approval required by subsection (f)(1).~~

(c) The head of an agency may use procedures other than competitive procedures only when--

(1) the property or services needed by the agency are available from only one responsible source or only from a limited number of responsible sources and no other type of property or services will satisfy the needs of the agency;

(2) the agency's need for the property or services is of such an unusual and compelling urgency that the United States would be seriously injured unless the agency is permitted to limit the number of sources from which it solicits bids or proposals;

(3) it is necessary to award the contract to a particular source or sources in order (A) to maintain a facility, producer, manufacturer, or other supplier available for furnishing property or services in case of a national emergency or to achieve industrial mobilization, or (B) to establish

<sup>61</sup>The indicated section (1207) has been codified by the National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 801, 106 Stat. 2315, 2442 (1992).

or maintain an essential engineering, research, or development capability to be provided by an educational or other nonprofit institution or a federally funded research and development center;

(4) the terms of an international agreement or a treaty between the United States and a foreign government or international organization, or the written directions of a foreign government reimbursing the agency for the cost of the procurement of the property or services for such government, have the effect of requiring the use of procedures other than competitive procedures;

(5) a statute expressly authorizes or requires that the procurement be made through another agency or from a specified source, or the agency's need is for a brand-name commercial item for authorized resale;

(6) the disclosure of the agency's needs would compromise the national security unless the agency is permitted to limit the number of sources from which it solicits bids or proposals; or

(7) the head of the agency--

(A) determines that it is necessary in the public interest to use procedures other than competitive procedures in the particular procurement concerned, and

(B) notifies the Congress in writing of such determination not less than 30 days before the award of the contract.

(d)(1) For the purposes of applying subsection (c)(1)--

(A) in the case of a contract for property or services to be awarded on the basis of acceptance of an unsolicited research proposal, the property or services shall be considered to be available from only one source if the source has submitted an unsolicited research proposal that demonstrates a concept--

(i) that is unique and innovative or, in the case of a service, for which the source demonstrates a unique capability of the source to provide the service; and

(ii) the substance of which is not otherwise available to the United States, and does not resemble the substance of a pending competitive procurement; and

(B) in the case of a follow-on contract for the continued development or production of a major system or highly specialized equipment, or the continued provision of highly specialized services, such property or services may be deemed to be available only from the original source and may be procured through procedures other than competitive procedures when it is likely that award to a source other than the original source would result in--

(i) substantial duplication of cost to the United States which is not expected to be recovered through competition; or

(ii) unacceptable delays in fulfilling the agency's needs.

(2) The authority of the head of an agency under subsection (c)(7) may not be delegated.

(3) The determination required of an agency head in subsection (c)(7) shall not be made for a class of purchases or contracts.

(e) The head of an agency using procedures other than competitive procedures to procure property or services by reason of the application of subsection (c)(2) or (c)(6) shall request offers from as many potential sources as is practicable under the circumstances.

(f)(1) Except as provided in paragraph (2), the head of an agency may not award a contract using procedures other than competitive procedures unless--

(A) the contracting officer ~~for the contract~~ justifies the use of such procedures in writing and certifies the accuracy and completeness of the justification;

(B) the justification is approved--

(i) in the case of a contract for an amount exceeding \$100,000 (but equal to or less than \$1,000,000), by the competition advocate for the procuring activity (without further delegation) or by an official described in clauses (ii) through (iv) below;

(ii) in the case of a contract for an amount exceeding \$1,000,000 (but equal to or less than \$10,000,000), by the head of the ~~procuring contracting~~ activity (or the head of the ~~procuring contracting~~ activity's delegate designated pursuant to paragraph (6)(A));

(iii) in the case of a contract for an amount exceeding \$10,000,000 (but equal to or less than \$50,000,000), by the senior procurement executive of the agency designated pursuant to section 16(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 414(3)) or the senior procurement executive's delegate designated pursuant to paragraph (6)(B), or in the case of the Under Secretary of Defense for Acquisition, acting in his capacity as the senior procurement executive for the Department of Defense, the Under Secretary's delegate designated pursuant to paragraph (6)(C); or

(iv) in the case of a contract for an amount exceeding \$50,000,000, by the senior procurement executive of the agency designated pursuant to section 15(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 414(3)) (without further delegation) or in the case of the Under Secretary of Defense for Acquisition, acting in his capacity as the senior procurement executive for the Department of Defense, the Under Secretary's delegate designated pursuant to paragraph (6)(C); and

(C) any required notice has been published with respect to such contract pursuant to section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. 416) and all bids or proposals received in response to that notice have been considered by the head of the agency.

(2) In the case of a procurement permitted by subsection (c)(2), the justification and approval required by paragraph (1) may be made after the contract is awarded. The justification and approval required by paragraph (1) is not required--

(A) when a statute expressly requires that the procurement be made from a specified source;

(B) when the agency's need is for a brand-name commercial item for authorized resale;

(C) in the case of a procurement permitted by subsection (c)(7);

(D) in the case of a procurement conducted under (i) the Act of June 25, 1938 (41 U.S.C. 46 et seq.), popularly referred to as the Wagner-O'Day Act, or (ii) section 8(a) of the Small Business Act (15 U.S.C. 637(a)); or

(E) in the case of a procurement permitted by subsection (c)(4), but only if the head of the contracting activity prepares a document in connection with such procurement that describes the terms of an agreement or treaty, or the written directions, referred to in that subsection that have the effect of requiring the use of procedures other than competitive procedures and such document is approved by the competition advocate for the procuring activity.

(3) The justification required by paragraph (1)(A) shall include--

(A) a description of the agency's needs;

(B) an identification of the statutory exception from the requirement to use competitive procedures and a demonstration, based on the proposed contractor's qualifications or the nature of the procurement, of the reasons for using that exception;

(C) a determination that the anticipated cost will be fair and reasonable;

(D) a description of the market survey conducted or a statement of the reasons a market survey was not conducted;

(E) a listing of the sources, if any, that expressed in writing an interest in the procurement; and

(F) a statement of the actions, if any, the agency may take to remove or overcome any barrier to competition before a subsequent procurement for such needs.

(4) The justification required by paragraph (1)(A) and any related information, and any document prepared pursuant to paragraph (2)(E), shall be made available for inspection by the public consistent with the provisions of section 552 of title 5.

(5) In no case may the head of an agency--

(A) enter into a contract for property or services using procedures other than competitive procedures on the basis of the lack of advance planning or concerns related to the amount of funds available to the agency for procurement functions; or

(B) procure property or services from another agency unless such other agency complies fully with the requirements of this chapter in its procurement of such property or services.

The restriction contained in clause (B) is in addition to, and not in lieu of, any other restriction provided by law.

(6)(A) The authority of the head of a procuring contracting activity under paragraph (1)(B)(ii) may be delegated only to an officer or employee who--

(i) if a member of the armed forces, is a general or flag officer; or

(ii) if a civilian, is serving in a position with a grade under the General Schedule (or any other schedule for civilian officers or employees) that is comparable to or higher than the grade of brigadier general or rear admiral (lower half).

(B) The authority of the senior procurement executive under paragraph (1)(B)(iii) may be delegated only to an officer or employee within the senior procurement executive's organization who--

(i) if a member of the armed forces, is a general or flag officer; or

(ii) if a civilian, is serving in a position in grade GS-16 or above (or in a comparable or higher position under any other schedule for civilian officers or employees).

(C) The authority of the Under Secretary of Defense for Acquisition under paragraph (1)(B)(iv) may be delegated only to--

(i) an Assistant Secretary of Defense; or

(ii) with respect to the element of the Department of Defense (as specified in section 111(b) of this title), other than a military department, carrying out the procurement action concerned, an officer or employee serving in or assigned or detailed to that element who--

(I) if a member of the armed forces, is serving in a grade above brigadier general or rear admiral (lower half); or

(II) if a civilian, is serving in a position with a grade under the General Schedule (or any other schedule for civilian officers or employees) that is comparable to or higher than the grade of major general or rear admiral.

(g)(1) In order to promote efficiency and economy in contracting and to avoid unnecessary burdens for agencies and contractors, the Federal Acquisition Regulation the regulations modified in accordance with section 2752 of the Competition in Contracting Act of 1984 (41 U.S.C. 403 note) shall provide for special simplified procedures for small purchases of property and services with a value not in excess of the simplified acquisition threshold.

~~(2) For the purposes of this subsection, a small purchase is a purchase or contract for an amount which does not exceed the small purchase threshold.~~

~~(3)(2) A proposed purchase or contract for an amount above the small purchase simplified acquisition threshold may not be divided into several purchases or contracts for lesser amounts in order to use the small purchase simplified procedures required by paragraph (1).~~

~~(4)(3) In using small purchase simplified procedures, the head of an agency shall promote competition to the maximum extent practicable.~~

(h) For the purposes of ~~the following laws~~ the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes", approved March 3, 1931 (commonly referred to as the "Davis-Bacon Act") (40 U.S.C. 276a-276a-5), purchases or contracts awarded after using procedures other than sealed-bid procedures shall be treated as if they were made with sealed-bid procedures:

~~(1) The Act entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes", approved June 30, 1936 (commonly referred to as the "Walsh-Healey Act") (41 U.S.C. 35-45).~~

~~(2) The Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes", approved March 3, 1931 (commonly referred to as the "Davis-Bacon Act") (40 U.S.C. 276a-276a-5).~~

(i)(1) The Secretary of Defense shall prescribe by regulation the manner in which the Department of Defense negotiates prices for supplies to be obtained through the use of procedures other than competitive procedures, as defined in section 2302(2) of this title.

(2) The regulations required by paragraph (1) shall--

(A) specify the incurred overhead a contractor may appropriately allocate to supplies referred to in that paragraph; and

(B) require the contractor to identify those supplies which it did not manufacture or to which it did not contribute significant value.

~~(3) Such regulations shall not apply to an item of supply included in a contract or subcontract for which the price is based on established catalog or market prices of commercial items sold in substantial quantities to the general public.~~

(3) Such regulations shall not apply to a commercial item, as defined in section 2302(5) of this title, or to an item other than a commercial item included in a contract or subcontract for which the price is based on established catalogue or market prices of commercial items sold in substantial quantities to the general public.

(j)(1) When a contract is awarded using competitive procedures as defined in section 2302(2) of this title or under an exception permitted by subsection (c) of this section, properly approved in compliance with subsection (f) of this section, but does not procure or specify a firm quantity of supplies or services (other than any minimum or maximum quantity), such contract for supplies or services may provide for the issuance of delivery orders or task orders during the specified term of the contract.

(2) Provided that a contract described in paragraph (1) complies with the requirements of paragraphs (3) and (4) and with regulations issued pursuant to paragraph (5), the delivery orders or task orders issued under such contract shall not - -

(A) require separate notice under section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416) and section 8(e) of the Small Business Act (15 U.S.C. § 637(e)); or

(B) require separate competition or justification under this section.

(3) Contracts to which the provisions of paragraph (2) apply shall - -

(A) be awarded as a result of a solicitation for which the notice required by sections 18 of the Office of Federal Procurement Policy Act (41 U.S.C. § 416) and 8(e) of the Small Business Act (15 U.S.C. § 637(e)) reasonably and fairly describes the general scope, magnitude, and duration of the proposed contract in a manner that would reasonably permit a potential offeror to decide whether to request the solicitation and consider submitting an offer;

(B) specify in the solicitation and contract the period of the contract, including the number and period of any options, and the maximum quantity or dollar value of supplies or services to be procured under the contract;

(C) both in the solicitation and contract, reasonably describe in the statement of work, specifications, or other description, the general scope, nature, complexity, and purposes of the supplies or services to be procured under the contract;

(D) be awarded as a result of a solicitation which specifies, and an evaluation of proposals that properly applies, evaluation criteria which include estimated or firm costs, prices, or rates and other evaluation criteria directly relating to the offeror's ability to provide the supplies or services at the level of quality required; and,

(E) if the contract is one of multiple contracts awarded from the same competitive solicitation for the same or similar supplies or services, specify, both in the solicitation and contract, the manner in which individual delivery orders or task orders will be negotiated and either competed among or allocated among the multiple contracts.

(4) Significant increases in the scope, period, or maximum value of the contracts described in paragraph (3) shall be made only by modification to the basic contract or contracts, and not by delivery orders or task orders, and shall be accomplished by competitive procedures or properly justified as exceptions under this section, including the providing of notice under 41 U.S.C. § 416 and 15 U.S.C. § 637(e).

(5) The Secretary of Defense shall issue regulations to implement this paragraph (i) and provide for appropriate audit and oversight.

~~(j)(1) The Secretary of Defense may enter into agreements (known as "master agreements") with responsible sources under which the Secretary may issue orders for the performance of specific advisory and assistance services. Any such agreement shall specify terms and conditions for the subsequent procurement of advisory and assistance services from the sources. The period covered by any such agreement may not exceed two years. Any such agreement may only be entered into using procedures that, in the case of the award of a contract, would be competitive procedures. Any such agreement shall be entered into with at least three of the sources that submit offers for the master agreement.~~

~~(2) Following the establishment of sources for advisory and assistance services through the use of a master agreement described in paragraph (1), the Secretary of Defense (A) may request offers from all sources with master agreements for the services for which offers are being requested if the contracting officer determines that there is a reasonable expectation that offers will be obtained from at least two sources, and (B) may issue orders (known as "task orders") pursuant to the request for offers to such sources for the performance of specific advisory and assistance services, subject to the requirements of this subsection. Any such request for offers shall contain a statement of work clearly specifying all tasks to be performed under the order. Upon evaluation of an offer or offers resulting from a request, the task order shall be issued to the source submitting the offer that the Secretary of Defense determines to be the most advantageous to the United States, considering only cost or price and other factors included in the request for offers.~~

~~(3)(A) The requirements for the giving of notice of certain solicitations that are prescribed in section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. 416) and section 8(e) of the Small Business Act (15 U.S.C. 637(e)) shall apply to solicitations for offers for a master agreement under this subsection in the same manner and to the same extent as those requirements~~

apply to solicitations for proposals for a contract for services for a price expected to exceed the small purchase threshold.

~~(B) Such requirements for the giving of notice shall not apply to the issuance of orders under a master agreement entered into pursuant to the procedures established under this section, except that the Secretary of Defense shall furnish for publication by the Secretary of Commerce a notice announcing the order.~~

~~(4) The total value of task orders issued under master agreements by any contracting activity in a fiscal year may not exceed the amount equal to 30 percent of the value of all contracts for advisory and assistance services awarded by that contracting activity during fiscal year 1989.~~

~~(5) The authority provided by this subsection to enter into master agreements shall terminate at the end of the three-year period beginning on the date on which final regulations prescribed to carry out this subsection take effect.~~

## 1.2.2. 10 U.S.C. § 2305

### Competition: planning, solicitation, evaluation and award procedures

#### 1.2.2.1. Summary of the Law

This statute requires agencies to conduct advance procurement planning and market research, and to develop contract specifications which are not unnecessarily restrictive, in order to obtain full and open competition.<sup>1</sup> It requires solicitations for sealed bids and competitive proposals to state the evaluation factors for contract award and the relative weights of those factors.<sup>2</sup> Offers, whether sealed bids or competitive proposals, may be evaluated only against the stated factors.<sup>3</sup>

Solicitations for sealed bids must state the time and place of bid opening and that bids will be evaluated without discussions with the bidders.<sup>4</sup> Solicitations for competitive proposals must state the time and place for proposal submission and whether the agency intends to hold discussions with offerors as part of the proposal evaluation process.<sup>5</sup> If discussions are held, they must be held with all responsible offerors within the competitive range.<sup>6</sup>

An agency must award a contract with reasonable promptness after the evaluation of sealed bids or competitive proposals to that responsible offeror whose bid or proposal is most advantageous to the Government consistent with the evaluation factors for award.<sup>7</sup> However, an agency may reject all bids or proposals received in response to a solicitation if the head of the agency determines that such action is in the public interest.<sup>8</sup> Unsuccessful offerors must be promptly notified after their proposals are rejected.<sup>9</sup>

Before entering contracts for supplies, DOD agencies must review the existing DOD supply system and standard Government supply contracts for item availability and cost when determining the most advantageous source.<sup>10</sup> DOD agencies must also review the procurement history of the item and ensure there is an adequate description of the item to be procured.<sup>11</sup>

The statute imposes special requirements concerning the development and production of major systems by DOD. With respect to the development of a major system, a DOD agency must consider including in the solicitation a requirement that offerors: (1) propose subsystems and components that are currently available in the Government's supply system or commercially available from more than one source, or (2) propose subsystems and components that the Government will be able to acquire competitively in the future.<sup>12</sup>

With respect to the production of a major system, a DOD agency must consider including in the solicitation a requirement that offerors: (1) propose Government acquisition of technical data rights enabling future competitive reprourement of subsystems and components and the cost of such acquisition, or (2) propose qualifying or developing multiple sources of supply for subsystems or components.<sup>13</sup>

A DOD agency may not require an offeror to provide a proposal which would enable the Government to later acquire competitively a subsystem or component developed exclusively at private expense unless the head of the agency determines that: (1) the original supplier will be unable to meet delivery requirements, or (2) the original supplier is unable to satisfy mobilization requirements.<sup>14</sup>

### 1.2.2.2. Background of the Law

This statute originated in the Armed Services Procurement Act of 1947.<sup>15</sup> After two minor amendments,<sup>16</sup> the Competition in Contracting Act of 1984 (CICA) contained provisions which rewrote the entire text of this statute.<sup>17</sup> Through this statute, Congress attempted to address two of the problems that were the genesis of CICA: overly restrictive specifications limiting competition and the lack of acquisition planning and market research.<sup>18</sup> The evaluation and award procedures for sealed bids and competitive proposals are almost the same as those that had been required for formal advertising and negotiation prior to CICA. However, CICA clarified that agencies evaluate sealed bids and competitive proposals solely on factors specified in the solicitation.<sup>19</sup>

Subsections (c) and (d) of this statute, which concern review of existing inventories and contracts and preparation of solicitations for development and production of major systems,

<sup>12</sup>10 U.S.C. § 2305(d)(1).

<sup>13</sup>10 U.S.C. § 2305(d)(2).

<sup>14</sup>10 U.S.C. § 2305(d)(4)(A).

<sup>15</sup>Armed Services Procurement Act of 1947, Pub. L. No. 80-413, § 2(d), 3, 62 Stat. 20, 22 (1948). It was initially codified at 41 U.S.C. §§ 151(d) and 152 and subsequently recodified at 10 U.S.C. § 2305 by Pub. L. No. 84-1028, ch. 1041, § 1, 70A Stat. 130 (1956).

<sup>16</sup>Act of Sept. 20, 1958, Pub. L. No. 85-861, § 1(44), 72 Stat. 1457; Act of Mar. 16, 1968, Pub. L. No. 90-268, § 3, 82 Stat. 49.

<sup>17</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2723, 98 Stat. 1175, 1191-92. CICA also imposed the same requirements on executive agencies other than those covered by this statute. See 41 U.S.C. §§ 253a, 253b; Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2711, 98 Stat. 1175, 1178-81.

<sup>18</sup>See the analysis of 10 U.S.C. § 2304 in Chapter 1.2.1 of this Report.

<sup>19</sup>H.R. REP. NO. 861, 98th Cong., 2d Sess. 1429, 1432 (1984).

respectively, did not stem from CICA. Instead, Congress added subsections (c) and (d)(1)-(3) through the Defense Procurement Reform Act of 1984 to impose better asset accountability practices on DOD and to control the cost to the Government of spare parts for major systems.<sup>20</sup> Subsequently in 1988, Congress added subsection (d)(4) regarding the future competition of items developed at private expense. This addition was aimed at ensuring that DOD balanced the need for the future cost-effective acquisition of spares against industry's incentive to undertake private development.<sup>21</sup>

In 1986, Congress amended the requirement for written notice of contract award in subsection (b)(4) to eliminate the requirement when a procurement is for perishable subsistence items.<sup>22</sup> In the same law, Congress added subsection (a)(3), which requires in a solicitation for competitive proposals, disclosure of the relative weight assigned to evaluation factors, including an offeror's capabilities and past performance.<sup>23</sup> The rationale for this amendment was to ensure that quality of service was appropriately evaluated in relation to cost and price factors in the acquisition of sophisticated professional and technical services.<sup>24</sup>

Congress amended subsections (a)(2) and (b)(4) in 1990 to reflect their present text concerning contract award without discussions after seeking competitive proposals.<sup>25</sup> CICA, as interpreted by the GAO, required an award without discussions to be made to the offeror proposing the lowest overall cost despite the technical superiority of another offeror.<sup>26</sup> However, there are significant reasons for permitting award without discussion to an offeror proposing other than lowest overall cost: technical capability, reduced acquisition lead time, reduced risk of wrongful disclosure of source selection information, improved pricing of initial proposals and reduced bid and proposal costs.<sup>27</sup> Consequently, Congress wanted to enable DOD to make such awards when doing so would be in the best interest of the Government considering overall cost, technical capability and risk.<sup>28</sup>

### 1.2.2.3. Law in Practice

FAR Part 14 prescribes regulations for contracting by sealed bid procedures, including the solicitation and evaluation of bids, the award of contracts in response thereto, and notification to unsuccessful offerors. The FAR is supplemented by DFARS 214.404-1 and 214.406-3, which

<sup>20</sup>National Defense Authorization Act, 1985, Pub. L. No. 98-525, § 1213, 98 Stat. 2492, 2591 (1984); H.R. CONF. REP. NO. 1080, 98th Cong., 2d Sess. 317-18 (1984).

<sup>21</sup>National Defense Authorization Act, Fiscal Year 1989, Pub. L. No. 100-456, § 806, 102 Stat. 2010 (1988); S. REP. NO. 326, 100th Cong., 2d Sess. 105 (1988).

<sup>22</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 313(b), 100 Stat. 3816, 3853 (1986) (*identical legislation omitted*).

<sup>23</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 924, 100 Stat. 3816, 3932-33 (1986) (*identical legislation omitted*).

<sup>24</sup>S. REP. NO. 331, 99th Cong., 2d Sess. 266-67 (1986).

<sup>25</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 802, 104 Stat. 1485, 1588 (1990).

<sup>26</sup>H.R. REP. NO. 665, 101st Cong., 2d Sess. 299, 300 (1990).

<sup>27</sup>*Id.* at 301-02.

<sup>28</sup>*Id.* at 301. *See also* S. REP. NO. 384, 101st Cong., 2d Sess. 191-92 (1990). Other minor amendments made by the above cited public laws are not addressed in this summary.

address cancellation of invitations after opening and mistakes in bids, respectively. Regulations for contracting by negotiation are contained in FAR Part 15. These regulations cover the solicitation and evaluation of proposals, the award of contracts in response thereto, and notification and debriefing of unsuccessful offerors. DFARS supplementation is at Subparts 215.4, 215.6 and 215.10.

FAR Subpart 7.1, as supplemented by DFARS Subpart 207.1, implements the statutory requirements for acquisition planning. The requirement in section 2305(d)(4)(A) that the agency head make a determination before requiring a proposal which would enable the Government to later acquire competitively a subsystem or component developed exclusively at private expense is implemented at DFARS 227.403-71(b)(3).

#### **1.2.2.4. Recommendations and Justification**

### **I**

#### **Amend section 2305(b)(4)(B) to require regulations which address the debriefing of unsuccessful offerors.**

The fundamental purpose for this recommended change is to eliminate needless protests. As this Report explains more fully in the analysis of 31 U.S.C. § 3553, it is a commonly accepted belief that a number of protests would not have been filed if a meaningful debriefing had been provided in a timely manner to the protesters. A timely and meaningful debriefing to an offeror which is not awarded the contract might well provide the unsuccessful offeror with sufficient information to conclude that a protest should not be filed.

The statute as presently written requires an agency to promptly notify unsuccessful offerors of the rejection of their proposals but does not require a debriefing. FAR 15.1003 does require debriefings. The Panel believes timely and meaningful debriefings should be a requirement. The Section of Public Contract Law of the American Bar Association concurs.<sup>29</sup> The DOD Inspector General suggested that rules on notifying and debriefing unsuccessful offerors should be addressed in the FAR rather than in legislation.<sup>30</sup> The Panel believes that the detailed requirements of a debriefing should be left to the regulations,<sup>31</sup> but that the statute should articulate the broad policy objective to be attained.

The proposed amendment would require the regulations to accomplish three things. First, the regulations would establish the criteria for determining whether a debriefing is required. Not all procurement actions should entitle unsuccessful offerors to a debriefing, particularly those

---

<sup>29</sup>Section of Public Contract Law, ABA, comments on S. 1958, Federal Property and Administrative Services Act of 1992, before the Committee on Governmental Affairs, United States Senate (June 11, 1992).

<sup>30</sup>Letter from DOD Inspector General to Stuart A. Hazlett, DSMC (July 14, 1992).

<sup>31</sup>The Panel believes the amount of detail which would have been statutorily required in a debriefing, had a recent bill passed, is excessive. See H.R. 3161, 102d Cong., 1st Sess. § 403 (1991).

below the simplified acquisition threshold<sup>32</sup> and those actions which do not involve significant judgments about factors other than price. Second, the regulations must provide that any required debriefing be conducted to the maximum extent practicable within 15 calendar days after award. The sooner a debriefing is conducted, the more likely it is to prevent an unnecessary protest. Finally, the regulations must provide that the debriefing address the strengths and weaknesses of the unsuccessful proposal. A debriefing which contains such information, in contrast to a debriefing which focuses exclusively on how a bidder might improve its next proposal, will more likely avoid unnecessary protests.

## II

**Amend section 2305(b) to require contracting activities to establish, and provide access to, a protest file.**

Closely related to the preceding recommendation, the purpose of this recommended statutory addition is to prevent unnecessary multiple protests on the same proposed contract award. In the pre-award situation, bidders not filing a protest may believe they are at a disadvantage if they do not receive the same information that the protester receives. Therefore, they may feel compelled to intervene in the original protest by filing their own protest, since the delay in waiting to obtain the information through a Freedom of Information Act request might prejudice their interests. Requiring such a file to be established once one protest is lodged would not unduly burden a contracting activity since the information which the file would contain would necessarily be collected to respond to the protest.

## III

**Amend section 2305(b) by granting to the head of an agency the authority to take certain remedial action if an award or proposed award does not comply with a statute or regulation.**

As stated in Chapter 1.5.0 of this Report, one impediment to the early resolution and settlement of protests is the perceived inability of a contracting agency to completely resolve and settle a protest by the payment of bid and proposal costs and legal fees. This recommended amendment will remove this impediment by clearly granting to the agency head the authority to pay such expenses for meritorious protests. Early settlement of protests at the agency level will avoid unnecessary administrative and legal expenses.

## IV

**Amend section 2305(a)(2) by replacing "small purchases" with "purchases below the simplified acquisition threshold."**

---

<sup>32</sup>The Panel has recommended in Chapter 4.1 of this Report that the term, "small purchase threshold," be changed to "simplified acquisition threshold" and the corresponding dollar amount be raised to \$100,000.

This amendment is necessary to conform to the Panel's recommendation made elsewhere in this Report.<sup>33</sup>

V

**Amend section 2305(a) to incorporate the provision currently found at section 2301(a)(7).**

The provision currently located at section 2301(a)(7) is more of a procedural directive than a policy statement of general applicability. This provision, like the existing provisions of section 2305(a), is concerned with what should properly be included in a solicitation. Therefore, the Panel recommends moving this provision to section 2305(a).

**1.2.2.5. Relationship to Objectives**

The recommended amendments will streamline the acquisition process by preventing a number of unnecessary protests and by encouraging the settlement of protests at the agency level. Such amendments will enhance the expeditious and fair resolution of procurement disputes through uniform interpretation of laws and implementing regulations. The proposed changes identify the fundamental objectives to be achieved while at the same time specifically leave the detailed implementation to the regulations.

**1.2.2.6. Proposed Statute**

**10 U.S.C. § 2305. Contracts: planning, solicitation, evaluation, and award procedures**

(a)(1)(A) In preparing for the procurement of property or services, the head of an agency shall--

(i) specify the agency's needs and solicit bids or proposals in a manner designed to achieve full and open competition for the procurement;

(ii) use advance procurement planning and market research; and

(iii) develop specifications in such manner as is necessary to obtain full and open competition with due regard to the nature of the property or services to be acquired.

(B) Each solicitation under this chapter shall include specifications which--

(i) consistent with the provisions of this chapter, permit full and open competition; and

(ii) include restrictive provisions or conditions only to the extent necessary to satisfy the needs of the agency or as authorized by law.

---

<sup>33</sup>*Id.*

(C) For the purposes of subparagraphs (A) and (B), the type of specification included in a solicitation shall depend on the nature of the needs of the agency and the market available to satisfy such needs. Subject to such needs, specifications may be stated in terms of--

(i) function, so that a variety of products or services may qualify;

(ii) performance, including specifications of the range of acceptable characteristics or of the minimum acceptable standards; or

(iii) design requirements.

(2) In addition to the specifications described in paragraph (1), a solicitation for sealed bids or competitive proposals (other than for ~~small~~ purchases below the simplified acquisition threshold) shall at a minimum include--

(A) a statement of--

(i) all significant factors (and significant subfactors) which the head of the agency reasonably expects to consider in evaluating sealed bids (including price) or competitive proposals (including cost or price, cost- or price-related factors, and noncost- or nonprice-related factors); and

(ii) the relative importance assigned to each of those factors (and subfactors); and

(B)(i) in the case of sealed bids--

(I) a statement that sealed bids will be evaluated without discussions with the bidders; and

(II) the time and place for the opening of the sealed bids; or

(ii) in the case of competitive proposals--

(I) a statement that the proposals are intended to be evaluated with, and award made after, discussions with the offerors, or a statement that the proposals are intended to be evaluated, and award made, without discussions with the offerors (other than discussions conducted for the purpose of minor clarification), unless discussions are determined to be necessary; and

(II) the time and place for submission of proposals.

(3) The head of an agency, in issuing a solicitation for a contract to be awarded using sealed bid procedures, shall not include in such solicitation a clause providing for the evaluation of prices under the contract for options to purchase additional supplies or services under the contract

unless the head of the agency has determined that there is a reasonable likelihood that the options will be exercised.

(3)(4) In prescribing the evaluation factors to be included in each solicitation for competitive proposals, the head of an agency shall clearly establish the relative importance assigned to the evaluation factors and subfactors, including the quality of the product or services to be provided (including technical capability, management capability, and prior experience of the offeror).

(b)(1) The head of an agency shall evaluate sealed bids and competitive proposals and make an award based solely on the factors specified in the solicitation.

(2) All sealed bids or competitive proposals received in response to a solicitation may be rejected if the head of the agency determines that such action is in the public interest.

(3) Sealed bids shall be opened publicly at the time and place stated in the solicitation. The head of the agency shall evaluate the bids in accordance with paragraph (1) without discussions with the bidders and, except as provided in paragraph (2), shall award a contract with reasonable promptness to the responsible bidder whose bid conforms to the solicitation and is most advantageous to the United States, considering only price and the other price-related factors included in the solicitation. The award of a contract shall be made by transmitting written notice of the award to the successful bidder.

(4)(A) The head of an agency shall evaluate competitive proposals in accordance with paragraph (1) and may award a contract--

(i) after discussions with the offerors, provided that written or oral discussions have been conducted with all responsible offerors who submit proposals within the competitive range; or

(ii) based on the proposals received, without discussions with the offerors (other than discussions conducted for the purpose of minor clarification) provided that the solicitation included a statement that proposals are intended to be evaluated, and award made, without discussions, unless discussions are determined to be necessary.

(B) Except as provided in paragraph (2), the head of the agency shall award a contract with reasonable promptness to the responsible source whose proposal is most advantageous to the United States, considering only cost or price and the other factors included in the solicitation. The head of the agency shall award the contract by transmitting written notice of the award to such source and shall promptly notify all other offerors of the rejection of their proposals. The regulations implementing this chapter shall- -

(i) establish the criteria for determining whether an unsuccessful offeror is entitled to a debriefing;

(ii) provide that any required debriefing shall be conducted to the maximum extent practicable within 15 calendar days after the date of award; and

(iii) provide that any required debriefing contain information on the strengths and weaknesses of that offeror's proposal.

(C) Subparagraph (B) does not apply with respect to the award of a contract for the acquisition of perishable subsistence items.

(5) Where a protest is filed pursuant to the procedures in 31 U.S.C. § 3551 et seq. and where an actual or prospective offeror so requests, a file of the protest shall be established by the contracting activity and reasonable access shall be provided to actual or prospective offerors. This file should contain such information as would ordinarily be releasable under the Freedom of Information Act.

(6) If a protest is filed and if the head of the agency determines that a solicitation, proposed award, or award does not comply with a statute or regulation, the head of the agency may take any action which the agency is authorized to take under 31 U.S.C. § 3554 (b)(1)(A)-(F).

~~(5)~~(7) If the head of an agency considers that a bid or proposal evidences a violation of the antitrust laws, he shall refer the bid or proposal to the Attorney General or appropriate action.

(c) The Secretary of Defense shall ensure that before a contract for the delivery of supplies to the Department of Defense is entered into--

(1) when the appropriate officials of the Department are making an assessment of the most advantageous source for acquisition of the supplies (considering quality, price, delivery, and other factors), there is a review of the availability and cost of each item of supply--

(A) through the supply system of the Department of Defense; and

(B) under standard Government supply contracts, if the item is in a category of supplies defined under regulations of the Secretary of Defense as being potentially available under a standard Government supply contract; and

(2) there is a review of both the procurement history of the item and a description of the item, including, when necessary for an adequate description of the item, a picture, drawing, diagram, or other graphic representation of the item.

(d)(1)(A) The Secretary of Defense shall ensure that, in preparing a solicitation for the award of a development contract for a major system, the head of an agency consider requiring in the solicitation that an offeror include in its offer proposals described in subparagraph (B). In determining whether to require such proposals, the head of the agency shall give due consideration to the purposes for which the system is being procured and the technology

necessary to meet the system's required capabilities. If such proposals are required, the head of the agency shall consider them in evaluating the offeror's price.

(B) Proposals referred to in the first sentence of subparagraph (A) are the following:

(i) Proposals to incorporate in the design of the major system items which are currently available within the supply system of the Federal agency responsible for the major system, available elsewhere in the national supply system, or commercially available from more than one source.

(ii) With respect to items that are likely to be required in substantial quantities during the system's service life, proposals to incorporate in the design of the major system items which the United States will be able to acquire competitively in the future.

(2)(A) The Secretary of Defense shall ensure that, in preparing a solicitation for the award of a production contract for a major system, the head of an agency consider requiring in the solicitation that an offeror include in its offer proposals described in subparagraph (B). In determining whether to require such proposals, the head of the agency shall give due consideration to the purposes for which the system is being procured and the technology necessary to meet the system's required capabilities. If such proposals are required, the head of the agency shall consider them in evaluating the offeror's price.

(B) Proposals referred to in the first sentence of subparagraph (A) are proposals identifying opportunities to ensure that the United States will be able to obtain on a competitive basis items procured in connection with the system that are likely to be reprocured in substantial quantities during the service life of the system. Proposals submitted in response to such requirement may include the following:

(i) Proposals to provide to the United States the right to use technical data to be provided under the contract for competitive reprocurement of the item, together with the cost to the United States, if any, of acquiring such technical data and the right to use such data.

(ii) Proposals for the qualification or development of multiple sources of supply for the item.

(3) If the head of an agency is making a noncompetitive award of a development contract or a production contract for a major system, the factors specified in paragraphs (1) and (2) to be considered in evaluating an offer for a contract may be considered as objectives in negotiating the contract to be awarded. Such objectives may not impair the rights of prospective contractors or subcontractors otherwise provided by law.

(4)(A) Whenever the head of an agency requires that proposals described in paragraph (1)(B) or (2)(B) be submitted by an offeror in its offer, the offeror shall not be required to provide a proposal that enables the United States to acquire competitively in the future an identical item if

the item was developed exclusively at private expense unless the head of the agency determines that--

(i) the original supplier of such item will be unable to satisfy program schedule or delivery requirements; or

(ii) proposals by the original supplier of such item to meet the mobilization requirements are insufficient to meet the agency's mobilization needs.

(B) In considering offers in response to a solicitation requiring proposals described in paragraph (1)(B) or (2)(B), the head of an agency shall base any evaluation of items developed exclusively at private expense on an analysis of the total value, in terms of innovative design, life-cycle costs, and other pertinent factors, of incorporating such items in the system.

## **1.2.3. 10 U.S.C. § 2306**

### **Kinds of contracts**

#### **1.2.3.1. Summary of the Law**

This statute prohibits the use of cost-plus-a-percentage-of-cost contracts but authorizes an agency to use any other kind of contract that will promote the best interests of the Government when using other than sealed bid procedures.<sup>1</sup> Cost reimbursement and incentive contracts must be approved by the head of the agency.<sup>2</sup> With limited exceptions, all contracts issued under other than sealed bid procedures must contain a contractor warranty against the payment of any fee contingent on the securing of contract award.<sup>3</sup>

This law also establishes fee limitations for cost-plus-a-fixed-fee contracts.<sup>4</sup> The fee for such a contract for experimental, developmental or research work may not exceed 15% of the estimated cost of the contract, exclusive of the fee. The fee, plus costs, on such a contract for architectural or engineering services for a public work or utility, together may not exceed 6% of the estimated cost (exclusive of fees) of the public work or utility contract. On any other cost-plus-a-fixed-fee contract, the fee may not exceed 10% of the estimated contract cost exclusive of fee.

Cost and cost-plus-a-fixed-fee contracts must require the contractor to notify the agency before the contractor enters into any cost-plus-a-fixed-fee subcontract, or fixed-price subcontract or purchase order which exceeds the small purchase threshold or 5% of the estimated cost of the prime contract.<sup>5</sup>

Two subsections of this statute address multiyear contracting. First, the head of an agency is authorized to enter into contracts not exceeding five years for the operation, maintenance and support of facilities, the maintenance or modification of highly complex military equipment, specialized training and base services. For each such contract, the agency head must determine, among other things, that the contract will encourage effective competition and promote economies of scale. A cancellation or termination fee must be paid if funds are not available to continue such a contract into a subsequent fiscal year.<sup>6</sup>

Second, this law contains extensive provisions relating to the use of multiyear contracts not exceeding five program years for the procurement of property, including weapon systems and items and services associated with weapon systems.<sup>7</sup> The head of an agency other than the Coast

Guard or NASA may use such a contract if he finds that certain statutory criteria are met. Again, a cancellation or termination fee must be paid if funds are not available to continue such a contract into a subsequent fiscal year. The agency head must notify Congress before entering into such a contract if the termination or cancellation clause sets forth a ceiling in excess of \$100 million. The Secretary of Defense is required to prescribe regulations which will promote the efficient use of multiyear contracting, broaden the defense industrial base, and not curtail possible competition for items to be delivered under such a contract.

Finally, additional provisions apply to the use of such multiyear contracts if Congress has specifically authorized the use of multiyear contracting authority for a defense acquisition program. Agencies may not use the authority of section 2306(h) to enter such multiyear contracts when Congress has so acted unless program support costs are fully funded and production will be at not less than economic rates. Second, if Congress specifically authorizes the use of multiyear contracting for a defense procurement program but grants such authority contingent upon the achievement of cost savings, and the cost savings cannot be met, the President may request relief from the specified cost savings.<sup>8</sup>

### 1.2.3.2. Background of the Law

This statute originated in section 4 of the Armed Service Procurement Act of 1947.<sup>9</sup> It was first amended in 1962 by the Truth in Negotiations Act which established the requirement for certified cost or pricing data.<sup>10</sup> Those provisions of the statute pertaining to cost or pricing data were recodified at 10 U.S.C. § 2306a in 1986.<sup>11</sup>

Other than amendments pertaining to cost or pricing data, almost all revisions to the statute have involved multiyear contracting. In 1968, Congress added subsection (g) to the statute concerning certain contracts exceeding one year.<sup>12</sup> The subsection was added to authorize DOD to take advantage of economies of scale possible with longer term contracts, but it limited such authority to contracts outside the 48 contiguous states and the District of Columbia.<sup>13</sup> At that time, DOD did not convincingly demonstrate to Congress that greater benefits would accrue to the Government than could be obtained on a year-to-year competitive basis within the boundary of the 48 contiguous states.<sup>14</sup>

Congress reassessed its position regarding multiyear contracts in 1981. In that year, it removed the geographical limitation in subsection (g) and added paragraphs (h)(1)-(8).<sup>15</sup>

---

<sup>8</sup>*Id.*

<sup>9</sup>Armed Services Procurement Act of 1947, Pub. L. No. 80-413, § 4 62 Stat. 20, 22, 23 (1948). The statute was initially codified at 41 U.S.C. § 153 and subsequently recodified at 10 U.S.C. § 2306 by Pub. L. No. 84-1028, ch. 1041, 70A Stat. 130 (1956).

<sup>10</sup>Act of Sept. 10, 1962, Pub. L. No. 87-653, 76 Stat. 528 (1962).

<sup>11</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 952, 100 Stat. 3816, 3945 (1986) (*identical legislation omitted*).

<sup>12</sup>Act of July 5, 1968, Pub. L. No. 90-378, § 1, 82 Stat. 289.

<sup>13</sup>H.R. REP. NO. 1315, 90th Cong., 2d Sess. 1 (1968).

<sup>14</sup>*Id.* at 2.

<sup>15</sup>Department of Defense Authorization Act, 1982, Pub. L. No. 97-86, § 909(b), 95 Stat. 1099, 1118-20 (1981).

Although recognizing that multiyear contracts pose certain disadvantages, Congress authorized DOD to enter such contracts on a selective basis in an attempt to control weapon system costs and to provide defense contractors an incentive to invest in new technology, facilities and equipment.<sup>16</sup>

In 1989, Congress added paragraphs (h)(9), (h)(10) and (h)(11) to codify conditions and limitations for multiyear contracting that had been imposed previously on an annual basis.<sup>17</sup> One such condition required a multiyear contract to achieve a 10% cost savings. In 1990, Congress eliminated the percentage savings requirement because it was too rigid.<sup>18</sup>

Congress has also included in recent defense appropriations acts two recurring sections which have impacted this statute, but which have not been codified. For the last four years, one section has raised the approval level for the use of certain contract types. Congress has precluded DOD from using a fixed price contract in excess of \$10 million for the development of a major system or subsystem unless approved by the Under Secretary of Defense for Acquisition.<sup>19</sup>

The other section, also included for at least the past four years, places additional restrictions on the use of multiyear contracts. Congress must be notified before: (1) the award of any multiyear contract that provides for economic order quantity purchases in excess of \$20 million in any year; (2) the award of a contract for advance procurement leading to a multiyear contract that provides for economic order quantity purchases in excess of \$20 million in any year; (3) the award of a multiyear contract that includes an unfunded contingent liability in excess of \$20 million; and (4) the termination of a multiyear contract. Additionally, a multiyear contract may not be entered into if it exceeds \$500 million for any system or component thereof, unless specifically provided for in a DOD appropriation act, or without conducting a present value analysis.<sup>20</sup>

### 1.2.3.3. Law in Practice

FAR Part 16 and DFARS Part 216 implement statutory requirements concerning types of contracts. FAR Subpart 3.4 and DFARS Subpart 203.4 prescribe regulations concerning contingent fees. FAR Subpart 15.9 and DFARS Subpart 215.9 prescribe fee limitations for

<sup>17</sup>National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 805(a), 103 Stat. 1352, 1488 (1989). H.R. REP. NO. 331, 101st Cong., 1st Sess. 450, 451 (1989).

<sup>18</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 808, 104 Stat. 1485, 1593 (1990). H.R. REP. NO. 923, 101st Cong., 2d Sess. 623 (1990).

<sup>19</sup>Department of Defense Appropriations Act, 1993, Pub. L. No. 102-396, § 9037, 106 Stat. 1876 (1992); Department of Defense Appropriations Act, 1992, Pub. L. No. 102-172, § 8037, 105 Stat. 1150, 1179-80 (1991); Department of Defense Appropriations Act, 1991, Pub. L. No. 101-511, § 8038, 104 Stat. 1856, 1882-83 (1990); Department of Defense Appropriations Act, 1990, Pub. L. No. 101-165, § 9048, 103 Stat. 1139 (1989) (*none codified*).

<sup>20</sup>Department of Defense Appropriations Act, 1993, Pub. L. No. 102-396, § 9013, 106 Stat. 1876 (1992); Department of Defense Appropriations Act, 1992, Pub. L. No. 102-172, § 8013, 105 Stat. 1150 (1991); Department of Defense Appropriations Act, 1991, Pub. L. No. 101-511, § 8014, 104 Stat. 1856 (1990); Department of Defense Appropriations Act, 1990, Pub. L. No. 101-165, § 9021, 103 Stat. 1112 (1989) (*none codified*).

certain kinds of contracts specified in the statute. FAR 44.201-2 implements the statutory requirement that prime contractors under cost reimbursement contracts notify the procuring agency before entering into cost reimbursement and certain fixed price subcontracts. FAR Subpart 17.1 and DFARS Subpart 217.1 address multiyear contracting.

#### 1.2.3.4. Recommendations and Justification

### I

#### Delete section 2306(c).

Section 2306(c) requires approval by the head of an agency before use of a cost reimbursement or incentive contract is allowed. However, as discussed above, Congress has for the last four years raised the approval level to the Under Secretary of Defense for Acquisition for fixed price contracts in excess of \$10 million for the development of a major system or subsystem.

One Government comment recommended repealing section 2306(c)<sup>21</sup> but another thought the statute should remain unchanged.<sup>22</sup> An industry comment opined that the section could be repealed, but only if all of the authorization and appropriation limitations on fixed price development contracts were consolidated into one section.<sup>23</sup> The latter comment also stated the additional limitations in the appropriations acts should remain a part of defense acquisition law.

The Panel recommends that section 2306(c) be repealed and that the recent approval restrictions in the appropriations acts not remain a part of defense acquisition law. The agency head determination required by section 2306(c), which is delegable pursuant to section 2311, often becomes a superfluous justification of a contract type which has already been completely evaluated by the acquisition strategy panel, through approval of the acquisition plan by the Senior Procurement Executive, or by an Under Secretary of Defense (Acquisition) review. Moreover, the section 2306(c) determination and the approval restrictions in the appropriations acts will be unnecessary if the Panel's recommended statement of defense procurement policy is properly implemented by regulations. The recommended policy, which is expressed at section 2301(a)(4), states that:

Property and services for the Department may be acquired by any kind of contract, other than cost-plus-a-percentage-of-cost contracts, but including multiyear contracts, that will promote the interest of the United States and will provide for appropriate allocation of risk between the Government and the contractor with due regard to the nature of the property or services to be acquired.<sup>24</sup>

<sup>21</sup>Letter from SAF/AQC to Maj Gen J. D. Slinkard and T. J. Madden (July 15, 1992).

<sup>22</sup>Letter from DOD Inspector General to Stuart A. Hazlett (July 1, 1992).

<sup>23</sup>Letter from D. Fuqua, J. R. Hogg, D. C. Heinemeier, and J. J. Stocker to Maj Gen J. D. Slinkard and T. J. Madden (July 10, 1992) (commenting on CICA issues).

<sup>24</sup>Emphasis added.

This policy seeks to ensure agencies select the appropriate type of contract by requiring them to focus on the nature of property or services to be acquired and the proper allocation of risk between the parties. The methodology for implementing this policy, including the prescription of approval requirements by the milestone decision authority, or other officials, should be left entirely to the regulations. The Panel considers selection of contract type to be an integral part of the acquisition strategy and planning process.

## II

**Amend section 2306(d) to delete 6% fee limit.**

This amendment should be made to parallel the Panel's recommended repeal of 10 U.S.C. §§ 4540, 7212, and 9540, which would delete the fee limits for architectural and engineering services.<sup>25</sup>

## III

**Amend section 2306(e)(2) by replacing "small purchase threshold" with "simplified acquisition threshold."**

This amendment is necessary to conform to the Panel's recommended change to 41 U.S.C. § 403(11), which would establish a simplified acquisition threshold of \$100,000.

## IV

**Delete section 2306(f).**

The Panel believes it is no longer necessary to signal where the Truth in Negotiations Act is codified.

## V

**Retain section 2306(g) and (h), which concern multiyear contracting.**

The Panel twice solicited comments on this statute, but received no substantive comments regarding the multiyear contracting provisions. The Panel recognizes that in the present environment, which is marked by uncertainties regarding the threats to national defense, future defense budgets, and the status of weapons systems acquisition, the utility of multiyear contracting is reduced. Nevertheless, the Panel believes the provisions now codified represent a reasonable framework for multiyear contracting. Consequently, these two subsections should be retained.

---

<sup>25</sup>See Chapter 3.3.11 of this Report for analysis of 10 U.S.C. §§ 4540, 9540, and 7212 and the rationale for deleting the fee provisions.

### 1.2.3.5. Relationship to Objectives

The Panel believes adoption of the proposed changes will serve the best interests of the DOD, further streamline the acquisition process, and encourage the exercise of sound judgment by acquisition personnel. Also, the law, as amended, would identify broad policy objectives and the fundamental requirements to be achieved, while leaving the detailed implementing methodology to the acquisition regulations.

### 1.2.3.6. Proposed Statute

#### 10 U.S.C. § 2306. Kinds of contracts

(a) The cost-plus-a-percentage-of-cost system of contracting may not be used. Subject to the limitation in the preceding sentence, the other provisions of this section, and other applicable provisions of law, the head of an agency, in awarding contracts under this chapter after using procedures other than sealed-bid procedures, may enter into any kind of contract that he considers will promote the best interests of the United States.

(b) Each contract awarded under this chapter after using procedures other than sealed-bid procedures shall contain a warranty, determined to be suitable by the head of the agency, that the contractor has employed or retained no person or selling agency to solicit or obtain the contract under an understanding or agreement for a commission, percentage, brokerage, or contingent fee, except a bona fide employee or established commercial or selling agency maintained by him to obtain business. If a contractor breaks such a warranty the United States may annul the contract without liability or may deduct the commission, percentage, brokerage, or contingent fee from the contract price or consideration.

~~(c) No cost contract, cost-plus-a-fixed-fee contract, or incentive contract may be made under this chapter unless the head of the agency determines that such a contract is likely to be less costly to the United States than any other kind of contract or that it is impracticable to obtain property or services of the kind or quality required except under such a contract.~~

~~(d)(c) The fee for performing a cost-plus-a-fixed-fee contract for experimental, developmental, or research work may not be more than 15 percent of the estimated cost of the contract, not including the fee. The fee for performing a cost-plus-a-fixed-fee contract for architectural or engineering services for a public work or utility plus the cost of those services to the contractor may not be more than 6 percent of the estimated cost of that work or project, not including fees. The fee for performing any other cost-plus-a-fixed-fee contract may not be more than 10 percent of the estimated cost of the contract, not including the fee. Determinations under this subsection of the estimated costs of a contract or project shall be made by the head of the agency at the time the contract is made.~~

~~(e)(d) Each cost contract and each cost-plus-a-fixed-fee contract shall provide for notice to the agency by the contractor before the making, under the prime contract, of--~~

(1) a cost-plus-a-fixed-fee subcontract; or

(2) a fixed-price subcontract or purchase order involving more than the greater of (A) the ~~small purchase simplified acquisition~~ threshold, or (B) 5 percent of the estimated cost of the prime contract.

~~(f) So-called "truth-in-negotiations" provisions relating to cost or pricing data to be submitted by certain contractors and subcontractors are provided in section 2306a of this title.~~

~~(g)~~(e)(1) The head of an agency may enter into contracts for periods of not more than five years for the following types of services (and items of supply related to such services) for which funds would otherwise be available for obligation only within the fiscal year for which appropriated--

(A) operation, maintenance, and support of facilities and installations;

(B) maintenance or modification of aircraft, ships, vehicles, and other highly complex military equipment;

(C) specialized training necessitating high quality instructor skills (for example, pilot and aircrew members; foreign language training); and

(D) base services (for example, ground maintenance; in-plane refueling; bus transportation; refuse collection and disposal); whenever he finds that--

(i) there will be a continuing requirement for the services consonant with current plans for the proposed contract period;

(ii) the furnishing of such services will require a substantial initial investment in plant or equipment, or the incurrence of substantial contingent liabilities for the assembly, training, or transportation of a specialized work force; and

(iii) the use of such a contract will promote the best interests of the United States by encouraging effective competition and promoting economies in operation.

(2) In entering into such contracts, the head of the agency shall be guided by the following principles:

(A) The portion of the cost of any plant or equipment amortized as a cost of contract performance should not exceed the ratio between the period of contract performance and the anticipated useful commercial life of such plant or equipment. Useful commercial life, for this purpose, means the commercial utility of the facilities rather than the physical life thereof, with due consideration given to such factors as location of facilities, specialized nature thereof, and obsolescence.

(B) Consideration shall be given to the desirability of obtaining an option to renew the contract for a reasonable period not to exceed three years, at prices not to include charges for plant, equipment and other nonrecurring costs, already amortized.

(C) Consideration shall be given to the desirability of reserving in the agency the right, upon payment of the unamortized portion of the cost of the plant or equipment, to take title thereto under appropriate circumstances.

(3) In the event funds are not made available for the continuation of such a contract into a subsequent fiscal year, the contract shall be canceled or terminated, and the costs of cancellation or termination may be paid from--

(A) appropriations originally available for the performance of the contract concerned;

(B) appropriations currently available for procurement of the type of services concerned, and not otherwise obligated; or

(C) funds appropriated for those payments.

(h)(1) To the extent that funds are otherwise available for obligation, the head of an agency may make multiyear contracts for the purchase of property, including weapon systems and items and services associated with weapon systems (or the logistics support thereof), whenever he finds--

(A) that the use of such a contract will promote the national security of the United States and will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts;

(B) that the minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities;

(C) that there is a reasonable expectation that throughout the contemplated contract period the Department of Defense will request funding for the contract at the level required to avoid contract cancellation;

(D) that there is a stable design for the property to be acquired and that the technical risks associated with such property are not excessive; and

(E) that the estimates of both the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.

**(2)(A)** The Secretary of Defense shall prescribe defense acquisition regulations to promote the use of multiyear contracting as authorized by paragraph (1) in a manner that will allow the most efficient use of multiyear contracting.

**(B)** Such regulations may provide for cancellation provisions in such multiyear contracts to the extent that such provisions are necessary and in the best interests of the United States. Such cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract.

**(C)** In order to broaden the defense industrial base, such regulations shall provide that, to the extent practicable--

**(i)** multiyear contracting under paragraph (1) shall be used in such a manner as to seek, retain, and promote the use under such contracts of companies that are subcontractors, vendors, or suppliers; and

**(ii)** upon accrual of any payment or other benefit under such a multiyear contract to any subcontractor, vendor, or supplier company participating in such contract, such payment or benefit shall be delivered to such company in the most expeditious manner practicable.

**(D)** Such regulations shall also provide that, to the extent practicable, the administration of this subsection, and of the regulations prescribed under this subsection, shall not be carried out in a manner to preclude or curtail the existing ability of agencies in the Department of Defense to--

**(i)** provide for competition in the production of items to be delivered under such a contract; or

**(ii)** provide for termination of a prime contract the performance of which is deficient with respect to cost, quality, or schedule.

**(3)** Before any contract described in paragraph (1) that contains a clause setting forth a cancellation ceiling in excess of \$100,000,000 may be awarded, the head of the agency concerned shall give written notification of the proposed contract and of the proposed cancellation ceiling for that contract to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, and such contract may not then be awarded until the end of a period of 30 days beginning on the date of such notification.

**(4)** Contracts made under this subsection may be used for the advance procurement of components, parts, and materials necessary to the manufacture of a weapon system, and contracts may be made under this subsection for such advance procurement, if feasible and practical, in order to achieve economic-lot purchases and more efficient production rates.

(5) In the event funds are not made available for the continuation of a contract made under this subsection into a subsequent fiscal year, the contract shall be canceled or terminated, and the costs of cancellation or termination may be paid from--

(A) appropriations originally available for the performance of the contract concerned;

(B) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or

(C) funds appropriated for those payments.

(6) This subsection does not apply to contracts for the purchase of property to which section 111 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 759) applies.

(7) This subsection does not apply to the Coast Guard or the National Aeronautics and Space Administration.

(8) For the purposes of this subsection, a multiyear contract is a contract for the purchase of property or services for more than one, but not more than five, program years. Such a contract may provide that performance under the contract during the second and subsequent years of the contract is contingent upon the appropriation of funds and (if it does so provide) may provide for a cancellation payment to be made to the contractor if such appropriations are not made.

(9) A multiyear contract may not be entered into for any fiscal year under this subsection for a defense acquisition program that has been specifically authorized by law to be carried out using multiyear contract authority unless each of the following conditions is satisfied:

(A) The Secretary of Defense certifies to Congress that the current five-year defense program fully funds the support costs associated with the multiyear program.

(B) The proposed multiyear contract provides for production at not less than minimum economic rates given the existing tooling and facilities.

(10) The Secretary of Defense may instruct the Secretary of the military department concerned to incorporate into a proposed multiyear contract negotiated priced options for varying the quantities of end items to be procured over the period of the contract.

(11) If for any fiscal year a multiyear contract to be entered into under this subsection is authorized by law for a particular procurement program and that authorization is subject to certain conditions established by law (including a condition as to cost savings to be achieved under the multiyear contract in comparison to specified other contracts) and if it appears (after negotiations with contractors) that such savings cannot be achieved, but that substantial savings could nevertheless be achieved through the use of a multiyear contract rather than specified other

contracts, the President may submit to Congress a request for relief from the specified cost savings that must be achieved through multiyear contracting for that program. Any such request by the President shall include details about the request for a multiyear contract, including details about the negotiated contract terms and conditions.

## **1.2.4. 10 U.S.C. § 2317**

### **Encouragement of competition and cost savings**

#### **1.2.4.1. Summary of the Law**

This section requires the Secretary of Defense to establish procedures to ensure that personnel appraisal systems of DOD give appropriate recognition to efforts to increase competition and achieve cost savings in areas related to contracts.

#### **1.2.4.2. Background of the Law**

This statute was enacted in 1984 by Pub. L. No. 98-525,<sup>1</sup> and has not been amended.

#### **1.2.4.3. Law in Practice**

The Panel was unable to identify specific policy or regulatory implementation of section 2317 at the OSD level. In response to the Panel's request for information on whether appropriate procedures have been implemented, the Air Force stated that it complied with this statute after passage in 1984 and reiterated the requirement as a mandatory appraisal factor in model performance standards issued in 1987.<sup>2</sup>

#### **1.2.4.4. Recommendation and Justification**

##### **Repeal**

The Panel requested comments on section 2317, as well as other statutes related to the Competition in Contracting Act (CICA). In addition to the Air Force comment cited above, the Air Force stated that the Competition Advocate General of the Air Force does not believe this factor is necessary to ensure a successful competition program, and recommended repeal.<sup>3</sup> Another commenter stated, "There is a question as to the need for this provision in light of the passage of the Defense Workforce Improvement Act subsequent to CICA, and the creation of the acquisition corps."<sup>4</sup>

The Panel recognizes that efforts to increase competition and achieve cost savings are important in the work of many DOD personnel. There are many laws, regulations, processes, and

---

<sup>1</sup>Department of Defense Authorization Act, 1985, Pub. L. No. 98-525, § 1215, 98 Stat. 2492, 2592 (1984).

<sup>2</sup>Memorandum from SAF/AQC signed by Ira L. Kemp, Associate Deputy, to Working Group 2, Advisory Panel on Streamlining and Codifying Acquisition Law, Defense Systems Management College (July 15, 1992).

<sup>3</sup>*Id.*

<sup>4</sup>Letter from Council of Defense and Space Industry Associations (CODSIA) signed by Don Fuqua, President, AIA, Dan C. Heinemeier, Vice President, EIA, James R. Hogg, President, NSIA, and John J. Stocker, President, Shipbuilders Council of America, to Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Department of Defense Advisory Panel on Streamlining and Codifying Acquisition Law (July 10, 1992).

reviews which support competition and cost savings. This section does not add meaningful or unique requirements to the inherent responsibilities of agency heads to provide appropriate systems of performance appraisal for agency personnel. Therefore, the Panel considers section 2317 to be an unnecessary Congressional requirement placed on a traditional management prerogative.

#### **1.2.4.5. Relationship to Objectives**

Repeal would support the Panel's goal of streamlining acquisition laws and its objective of encouraging the exercise of sound judgment on the part of acquisition personnel.

## **1.2.5. 10 U.S.C. § 2318**

### **Advocates for competition**

#### **1.2.5.1. Summary of the Law**

This section requires the Secretary of Defense to designate a competition advocate for the Defense Logistics Agency, with the same responsibilities and functions as those designated pursuant to 41 U.S.C. § 418. In addition, it specifies that competition advocates of the agencies named in section 2303(a)<sup>1</sup> shall be a general or flag officer, or a GS-16 or above. Advocates are designated to serve for a minimum of two years.

Advocates for competition of DOD agencies must transmit to the Secretary of Defense, for inclusion in the Secretary's report to Congress required by section 23 of the Office of Federal Procurement Policy Act (41 U.S.C. § 419), an annual report describing their activities. This report is to be included in the form in which it was submitted to the Secretary.

#### **1.2.5.2. Background of the Law**

This statute was added by Pub. L. No. 98-525 in 1984<sup>2</sup> and was amended in 1987<sup>3</sup> and 1991.<sup>4</sup> The legislative history indicates that the general/flag officer level was a compromise, and originally the Senate wanted a major general or rear admiral. Section 2318(c) specifies reporting requirements to Congress based upon 41 U.S.C. § 419, which expired in 1990.<sup>5</sup>

#### **1.2.5.3. Law in Practice**

The requirement to designate agency and procuring activity competition advocates, as well as their duties and responsibilities under 41 U.S.C. § 418, is implemented in FAR Subpart 6.5. This subpart is not supplemented by the DFARS; however, the duties and responsibilities are the same under section 2318. By memorandum, the Deputy Secretary of Defense recently directed that competition advocates within DOD, designated under section 2318 or 41 U.S.C. § 418, shall also perform similar duties and responsibilities for commercial and non-developmental item advocacy.<sup>6</sup>

---

<sup>1</sup>See Chapter 1.1.3 of this Report for analysis of 10 U.S.C. § 2303.

<sup>2</sup>Department of Defense Authorization Act, 1985, Pub. L. No. 98-525, § 1216(a), 98 Stat. 2492, 2593 (1984).

<sup>3</sup>Defense Technical Corrections Act of 1987, Pub. L. No. 100-26, § 7(d)(4), 101 Stat. 273, 281.

<sup>4</sup>Persian Gulf Conflict Supplemental Authorization and Personnel Benefits Act of 1991, Pub. L. No. 102-25, § 701(f)(1), 105 Stat. 75, 115 (1991).

<sup>5</sup>See Chapter 1.2.11 of this Report for analysis of 41 U.S.C. § 419.

<sup>6</sup>Memorandum from Honorable Donald J. Atwood Jr., Deputy Secretary of Defense to DOD agencies (April 24, 1992).

#### **1.2.5.4. Recommendations and Justification**

##### **I**

#### **Retain section 2318(a) and (b).**

The Panel solicited comments on combining section 2318 with 41 U.S.C. § 418. Comments were divided, but the Defense Logistics Agency expressed concern that its ability to designate a competition advocate at other than a flag level or equivalent would need to be preserved.<sup>7</sup> The Panel believes that the designation of military or civilian grade requirements for agency competition advocates within DOD should remain in a DOD specific statute under the purview of the committees on Armed Services.

##### **II**

#### **Amend section 2318 by repealing subsection 2318(c).**

The Panel believes the requirement for each competition advocate of a DOD agency to report to Congress, as part of an annual report by the Secretary of Defense, has clearly served its purpose, and the Panel has recommended deletion of 41 U.S.C. § 419, since its requirements expired in 1990.<sup>8</sup> The requirements for reporting to the agency senior procurement executive, included in 41 U.S.C. § 418(b)(3) and (4) and implemented in FAR Subpart 6.5, provide both the duty to report to an appropriate executive level and ample opportunity to bring barriers or problems to the attention of senior management.

#### **1.2.5.5. Relationship to Objectives**

Recommendation II supports the Panel's goal of simplifying and streamlining the body of acquisition law.

#### **1.2.5.6. Proposed Statute**

##### **10 U.S.C. § 2318. Advocates for competition**

(a)(1) In addition to the advocates for competition established or designated pursuant to section 20(a) of the Office of Federal Procurement Policy Act (41 U.S.C. § 418(a)), the Secretary of Defense shall designate an officer or employee of the Defense Logistics Agency to serve as the advocate for competition of the agency.

(2) The advocate for competition of the Defense Logistics Agency shall carry out the responsibilities and functions provided for in sections 20(b) and 20(c) of the Office of Federal Procurement Policy Act (41 U.S.C. § 418(b), (c)).

---

<sup>7</sup>Memorandum from DLA signed by Jill E. Pettibone, Acting Chief, Plans, Policies, and Systems Division, Contract Management to Stuart A. Hazlett, Defense Systems Management College (July 2, 1992).

<sup>8</sup>See Chapter 1.2.11 of this Report for analysis of 41 U.S.C. § 419.

(b) Each advocate for competition of an agency named in section 2303(a) of this title shall be a general or flag officer if a member of the armed forces or a grade GS-16 or above under the General Schedule (or in a comparable or higher position under another schedule), if a civilian employee and shall be designated to serve for a minimum of two years.

~~(e) Each advocate for competition of an agency of the Department of Defense shall transmit to the Secretary of Defense a report describing his activities during the preceding year. The report of each advocate for competition shall be included in the annual report of the Secretary of Defense required by section 23 of the Office of Federal Procurement Policy Act (41 U.S.C. 419), in the form in which it was submitted to the Secretary.~~

## 1.2.6. 10 U.S.C. § 2319

### Encouragement of new competitors

#### 1.2.6.1. Summary of the Law

This statute seeks to encourage competition by placing certain restrictions on an agency's ability to impose qualification requirements.<sup>1</sup> A "qualification requirement" is a "requirement for testing or other quality assurance demonstration that must be completed by an offeror before award of a contract."<sup>2</sup> The statute requires agencies to justify in writing any qualification requirements and to estimate the costs of satisfying those requirements. Agencies must provide written notice of precontract qualification requirements to potential offerors upon request and provide them, upon request and on a reimbursable basis, an opportunity to demonstrate their abilities to meet the standards specified for qualification. Agencies must promptly notify potential offerors seeking qualification whether qualification is attained and, if not, explain why it was not attained.<sup>3</sup> These requirements also apply before any qualified products list, bidders list, or manufacturers list may be enforced.<sup>4</sup>

The requirements for notice to, and demonstration by, potential offerors may be waived for two years provided it is unreasonable for the agency to specify qualification standards a potential offeror must demonstrate, and provided the agency competition advocate has reviewed a determination to that effect. Such waiver authority does not apply to qualified product lists.<sup>5</sup>

An offeror normally may not be denied the opportunity to compete if it can demonstrate it meets the standards for qualification before the date of contract award.<sup>6</sup> However, an agency is not required to delay a procurement to allow a potential offeror to demonstrate its ability to meet qualification standards.<sup>7</sup>

An agency is required to solicit additional sources to qualify for anticipated future requirements if there are less than two qualified sources.<sup>8</sup> An agency must also re-evaluate and revalidate the need for a qualification requirement within seven years after its establishment.<sup>9</sup>

---

<sup>1</sup>41 U.S.C. § 253c imposes the same requirements as 10 U.S.C. § 2319 on executive agencies other than those covered by this statute.

<sup>2</sup>10 U.S.C. § 2319(a).

<sup>3</sup>10 U.S.C. § 2319(b).

<sup>4</sup>10 U.S.C. § 2319(c)(6).

<sup>5</sup>10 U.S.C. § 2319(c)(2).

<sup>6</sup>10 U.S.C. § 2319(c)(3).

<sup>7</sup>10 U.S.C. § 2319(c)(5).

<sup>8</sup>10 U.S.C. § 2319(d).

<sup>9</sup>10 U.S.C. § 2319(e).

**Preceding Page Blank**

### **1.2.6.2. Background of the Law**

Congress added this statute in 1984 because it believed qualification requirements, particularly those which required a demonstration prior to award, were sometimes being used inappropriately to restrict competition. In drafting this law, Congress attempted to balance its desire for greater competition for Government contracts with legitimate concerns for product quality, reliability, and maintainability.<sup>10</sup> In 1987, minor technical changes were made to this law.<sup>11</sup>

### **1.2.6.3. Law in Practice**

FAR Subpart 9.2 and DFARS § 209.202 implement this statute.

### **1.2.6.4. Recommendation and Justification**

#### **Retain**

The Panel recommends retaining this statute as presently written. The Panel believes that it still fulfills a valid need. The Panel sought comments from industry and Government agencies and identified no issues warranting amendment.<sup>12</sup>

### **1.2.6.5. Relationship to Objectives**

This statute encourages full and open access to the procurement system without unduly burdening the process. It also outlines broad policy objectives while leaving detailed implementing methodology to the acquisition regulations.

<sup>12</sup>Letter from SAF/AQC to Working Group 2 (July 15, 1992) (recommended allowing competition advocates to exempt particular procurements from this statute to alleviate administrative burdens of the qualification process).

## 1.2.7. 10 U.S.C. § 2325

### Preference for nondevelopmental items

#### 1.2.7.1. Summary of the Law

This law establishes a preference for nondevelopmental items (NDIs) in DOD. The law requires the Secretary of Defense to ensure that DOD defines and fulfills its requirements for the procurement of supplies through NDIs to the maximum extent practicable. This means a new item should only be developed if no acceptable item is already available in the marketplace. To ensure this preference, requirements must be stated in terms of performance, functional, or essential physical characteristics rather than in detailed design terms. In addition, market research is required prior to developing new specifications to determine whether agency needs can be met with existing or modified NDIs.

The statute defines a nondevelopmental item as any item of supply: (1) available in the commercial marketplace; (2) previously developed that is in use by a department or agency of the United States, a state or local Government or a foreign Government with which the United States has a mutual defense cooperation agreement; (3) described in (1) or (2) above which requires only minor modification to meet the procuring agency's requirements; or (4) currently being produced that does not meet the above requirements solely because it is not yet in use, or is not yet available in the commercial marketplace.

#### 1.2.7.2. Background of the Law

Congress enacted this law in 1986<sup>1</sup> in response to the Packard Commission Report, *A Formula for Action*, which recommended that DOD make greater use of components, systems, and services available in the marketplace.<sup>2</sup> Congress intended this provision to reverse the long standing bias to use detailed military specifications by establishing a preference for the procurement of nondevelopmental items.<sup>3</sup> As recently stated by the Comptroller General,

The fundamental purpose of the statutory NDI preference is to preclude the unnecessary development of unique military specifications and the anticipated higher cost of acquiring from private industry items manufactured to those specifications rather than items the private sector otherwise could provide. In other words, if DOD can satisfy its needs with commercially available

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3816, 3917 (1986) (*identical legislation omitted*).

<sup>2</sup>S. REP. NO. 331, 99th Cong. 2d Sess. 265 (1986). There had been previous reports which also advocated more Government reliance on commercial products, such as the 1972 Report of the Commission on Government Procurement and the 1982 report issued by the Office of Management and Budget, *Proposal for a Uniform Federal Procurement System*.

<sup>3</sup>S. REP. NO. 331, 99th Cong. 2d Sess. 265 (1986).

items or with such items with only minor modification to them, DOD is to acquire such products instead of products manufactured to its unique requirements.<sup>4</sup>

Congress intended the definition of NDIs to be broader than the term "off-the-shelf" in that NDIs include "commercial products and products in use by other federal agencies that may require minor modification to meet the identified need."<sup>5</sup> By including in the definition items currently being produced but not yet in use or not yet available in the commercial marketplace, Congress intended to ensure that "newly developed products would be able to compete on an equal basis with products already in the marketplace."<sup>6</sup>

The law also required the Secretary of Defense to submit a report to Congress within one year of the statute's enactment (1) identifying actions taken, including training and regulatory changes, to implement the statute, (2) identifying impediments to NDI acquisition, and (3) recommending any further legislation to promote acquisition of NDIs.<sup>7</sup> Furthermore, the law directed the GAO to conduct an independent evaluation. DOD submitted its report in 1987<sup>8</sup> and the GAO submitted its report in 1989.<sup>9</sup> The GAO report discusses nine impediments to the acquisition of NDIs and commercial items.

In 1989, Congress passed another provision which impacted the acquisition of NDIs and commercial items, but did not amend section 2325.<sup>10</sup> Concerned by testimony presented by the GAO and DOD Inspector General that DOD had been "unacceptably slow" in eliminating barriers to the increased use of NDIs,<sup>11</sup> Congress directed the Secretary of Defense to take several actions. The Secretary was directed to issue regulations which would address impediments to the acquisition of commercial items. These would include: (1) developing a simplified uniform contract for the acquisition of commercial items which would eliminate or modify burdensome and unnecessary clauses; (2) limiting the clauses required for inclusion in subcontracts under such contracts, (3) developing a streamlined inspection clause that would take advantage of alternative approaches to quality assurance, such as greater reliance on commercial warranties and awarding to contractors with proven records of quality performance; and (4) revising the regulations which require certified cost or pricing data to ensure such data is required for commercial items only when necessary.

The Secretary was also directed to (1) enhance the training for acquisition personnel in the acquisition of NDIs and commercial items, (2) study the impediments to the acquisition of NDIs and develop a plan to address such impediments, and (3) establish a 3-year demonstration

<sup>9</sup>U.S. GAO, *Nondevelopmental Items*, GAO/NSIAD-89-51 (1989).

<sup>10</sup>National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 824, 103 Stat. 1352, 1504 (1989) (*not codified*).

<sup>11</sup>S. REP. NO. 81, 101st Cong., 1st Sess. 194 (1989); H.R. CONF. REP. NO. 331, 101st Cong., 1st Sess. 612 (1989).

program for the procurement of items of clothing using solicitation techniques similar to those used in the commercial sector.

The following year, the Senate considered a Defense Department proposal to waive virtually all statutes governing the acquisition process for commercial items. Although the Senate was unwilling to grant "unbridled discretion to waive all current laws" before the 1989 amendments had been fully implemented, it did approve a bill which would codify certain portions of the 1989 amendments, require DOD to prescribe streamlined procedures for the acquisition of commercial products, and would establish test programs for the use of commercial bidders lists and the award of contracts for commercial products without discussions.<sup>12</sup>

The House agreed with the Senate that the 1989 reforms should be implemented before embarking on major new legislative initiatives and, in keeping with that philosophy, would not agree to the proposed Senate bill.<sup>13</sup> The resulting compromise amended the statute in 1990 by simply adding paragraph (4) to section 2325(a).<sup>14</sup> This provision requires market research prior to the development of new specifications in order to determine whether NDIs are available or could be modified.

### 1.2.7.3. Law in Practice

DFARS 210.001 reiterates the statutory definition of NDIs and, through a brief policy statement, DFARS 210.002-70 paraphrases the statute's objective of fulfilling requirements for supply items through the procurement of NDIs to the maximum extent practicable. DFARS 207.105(b)(6) requires that written acquisition plans for systems entering development include a description of the market research efforts planned or undertaken to identify NDIs. DFARS Subpart 211.70, titled "Contracting for Commercial Items," implements the requirements levied by Congress in 1989 upon the Secretary of Defense.

The Comptroller General has issued several decisions which interpret this statute. Among the decisions, one states that, for purposes of the definition, an item is "available" so long as it is available by the date of award rather than at some earlier date.<sup>15</sup> Another states that the statutory preference is only a preference and does not require any particular procurement to be for NDIs,<sup>16</sup> and a third condones a procurement limited to NDIs only.<sup>17</sup>

<sup>15</sup>*Motorola, Inc.*, Comp. Gen. B-247913.2, Oct. 13, 1992.

<sup>16</sup>*See Harris Corp.*, Comp. Gen. B-235126, 89-2 CPD ¶ 113.

<sup>17</sup>*See Astron*, Comp. Gen. B-236922.2, 90-1 CPD ¶ 441.

#### **1.2.7.4. Recommendations and Justification**

##### **I**

**Amend section 2325 to ensure product descriptions promote the use of both commercial and nondevelopmental items.**

The Panel's recommended change to section 2301 states that it is Congressional policy that DOD shall, to the maximum extent practicable, (1) acquire commercial items, and require prime contractors and subcontractors to maximize the use of commercial items as components when the end item is not a commercial item, and (2) acquire, and require prime contractors and subcontractors to incorporate, nondevelopmental items and components when commercial items are not available, practicable or cost effective. These clearly stated preferences for commercial and nondevelopmental items in section 2301 mean that the word "preference" may be deleted from this section's title and from section 2325(a) as unnecessary redundancies, and that this statute should be focused on product descriptions.

The Panel also recommends amending subsection (a) by clarifying that requirements should be defined in terms that permit fulfillment by the purchase of commercial items, as well as nondevelopmental items. The addition of "commercial items" to this subsection, along with the deletion of the word "preference," necessitates a change to the title of this section to reflect that the amended section addresses product descriptions.

##### **II**

**Delete section 2325(b) and (c).**

Subsection (b) should be deleted because the Secretary of Defense should have the discretion as to how best to carry out this section. Subsection (c) should be deleted because the Secretary of Defense already has sufficient authority to prescribe necessary regulations.

##### **III**

**Delete section 2325(d) and move the definition to section 2302.**

The term "nondevelopmental item" is used not only in section 2325 but in other sections of this title as well. Therefore, the definition of the term should be moved to section 2302, which is the section for definitions of general applicability.

#### **1.2.7.5. Relationship to Objectives**

The amendments to the title and subsection (a), as well as the relocation of subsection (d) to section 2302, help to make the law more simple and understandable as well as to encourage Government access to commercial items. The deletion of subsections (b) and (c) ensure that section 2325 contains only the broad policy objectives and fundamental requirements to be

achieved and leaves the implementing methodology to the regulations prescribed by the Secretary of Defense.

#### 1.2.7.6. Proposed Statute

10 U.S.C. § 2325. ~~Preference for~~ Commercial and nondevelopmental items; product descriptions

~~(a) Preference.~~ The Secretary of Defense shall ensure that, to the maximum extent practicable --

(1) requirements of the Department of Defense with respect to a procurement of supplies are stated in terms of --

(A) functions to be performed;

(B) performance required; or

(C) essential physical characteristics;

(2) such requirements are defined so that commercial or nondevelopmental items may be procured to fulfill such requirements;

(3) such requirements are fulfilled through the procurement of commercial or nondevelopmental items; and

(4) prior to developing new specifications, the Department conducts market research to determine whether commercial or nondevelopmental items are available or could be modified to meet agency needs.

~~(b) Implementation.~~ ~~The Secretary of Defense shall carry out this section through the Under Secretary of Defense for Acquisition, who shall have responsibility for its effective implementation.~~

~~(c) Regulations.~~ ~~The Secretary of Defense shall prescribe regulations to carry out this section.~~

~~(d) Definition.~~ ~~In this section, the term "nondevelopmental item" means--~~

~~(1) any item of supply that is available in the commercial marketplace;~~

~~(2) any previously developed item of supply that is in use by a department or agency of the United States, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;~~

~~(3) any item of supply described in paragraph (1) or (2) that requires only minor modification in order to meet the requirements of the procuring agency; or~~

~~(4) any item of supply that is currently being produced that does not meet the requirements of paragraph (1), (2), or (3) solely because the item~~  
~~(A) is not yet in use; or~~

## **1.2.8. 40 U.S.C. §§ 541 - 544**

### **Brooks Architect-Engineers Act**

#### **1.2.8.1. Summary of the Law**

The Brooks Architect-Engineers Act, more commonly called the Brooks Act, sets the statutory framework for the procurement of architectural and engineering services by the Government.<sup>1</sup> The Act requires the agency head to conduct discussions with architectural and engineering firms regarding a project and then select, in order of preference, no less than three of the firms deemed to be the "most highly qualified" to provide the required services. The Act then requires the agency head to negotiate a contract for such services with the firm deemed most qualified at a compensation rate that is "fair and reasonable" to the Government. If accord cannot be reached with the most qualified firm, negotiations commence with the second most qualified firm. If accord again cannot be reached, additional firms are selected in order of their qualifications for negotiations and negotiations continue independently and in series until a contract is consummated.

#### **1.2.8.2. Background of the Law**

The Brooks Act amended the Federal Property and Administrative Services Act of 1949 (FPASA). The Brooks Act, passed in 1972, provides for the selection of Federal architectural and engineering services under a specified, qualifications-based source selection procedure. The purpose of the Act was to cast in statutory form the system Government agencies had used for more than 30 years to procure architectural and engineering services. It also responded to a request from the Comptroller General that Congress clarify by legislation the procedure for securing such services.<sup>2</sup>

In 1988, Congress again amended the FPASA by changing the definition of architectural and engineering services.<sup>3</sup> For purposes of the Brooks Act, the term includes research, planning, development, design, construction, alteration, or repair of real property, and other services justifiably performed, including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals, and other related services.

<sup>1</sup> Act of Oct. 27, 1972, Pub. L. No. 92-582, 86 Stat. 1278.

<sup>2</sup> S. REP. No. 1219, 92d Cong., 2d Sess. 6 (1972).

<sup>3</sup> Public Buildings Amendments of 1988, Pub. L. No. 100-679, § 8, 102 Stat. 4049, 4068; Business Opportunity Development Reform Act of 1988, Pub. L. No. 100-656, § 742, 102 Stat. 3853, 3897.

### 1.2.8.3. Law in Practice

The Brooks Act procedures apply to civilian and military agencies of the Government. FAR Subpart 36.6 and DFARS Subpart 236.6 prescribe policies and procedures applicable to the acquisition of architect-engineer services.

### 1.2.8.4. Recommendation and Justification

#### Amend section 541(3)(C) by striking the word "may."

The Panel received comments from three sources. One set of comments suggested combining sections 541, 543, and 544 of Title 40 into one section since they all deal with architectural and engineering contracts, and further pointed out that a DOD audit found that discussions with three firms were not always performed and doubted whether current annual statements of qualifications and performance data were evaluated.<sup>4</sup> Both of the other comments indicated there was some confusion over the existing definition of architectural and engineering services, particularly whether environmental restoration services were included in the definition.<sup>5</sup>

In addition to these comments, the Defense Acquisition Regulatory (DAR) Council currently has an open case.<sup>6</sup> All but one issue appear to be of strictly regulatory concern. However, one issue involves the interpretation of the statutory definition of architectural and engineering services. In implementing the 1988 change to the statutory definition of architectural and engineering services, FAR 36.601-4(a)(3) was promulgated to provide guidance on the application of the statutory definition. The FAR provision states that contracting officers should consider services subject to Brooks Act procedures when the services are "of an architectural or engineering nature or services incidental thereto . . . that logically or justifiably require performance by registered architects or engineers or their employees." (Emphasis added.) In contrast to this guidance, the pertinent language in the statutory definition states that services are subject to Brooks Act procedures when the services are "of an architectural or engineering nature, or incidental services, which members of the architectural and engineering professions (and individuals in their employ) may logically or justifiably perform . . . ." (Emphasis added.)

The issue at the DAR Council seems to be over the meaning of the word "may" in the statutory definition. Apparently, some in DOD believe that the word "may" injects ambiguity into the definition such that it might be construed more broadly than Congress intended. DOD is concerned that some might construe the words "may logically or justifiably perform" as sweeping in almost any services that architectural and engineering firms become interested in performing, even though other entities which are not registered architectural or engineering firms could perform the services. Such a broad interpretation would reduce competition and cause more services to fall under Brooks Act procedures. DOD believes the proper reading is that the definition lists a number of services usually performed by registered architects and engineers and

<sup>4</sup>Letter from the DOD Inspector General to Stuart A. Hazlett (Oct. 6, 1992).

<sup>5</sup>Letter from the U.S. Army Corps of Engineers General Counsel to Stuart A. Hazlett (Oct. 8, 1992); Letter from HQ USAF/AQC to Stuart A. Hazlett (Oct. 8, 1992).

<sup>6</sup>DAR Case No. 91-73, A-E Services, Technical Clarifications.

that therefore the definition should have more clearly said something like, ". . . other professional services of an architectural or engineering nature, or incidental services, which . . . [A/Es] would normally or typically perform, including . . ."

An industry group submitted a letter to the Office of Federal Procurement Policy stating that the FAR language departs from the Congressional intent: whereas the statutory definition is broad, the regulatory guidance is narrow. OFPP agrees with the industry group and recommends that the FAR guidance be changed to mirror the statutory definition. OFPP is not convinced that the existing statutory definition is ambiguous; therefore, it does not agree with the position of the Director of Defense Procurement that the existing definition might lead to the use of Brooks Act procedures for "any and all acquisitions which could logically or justifiably be performed by members of the architectural and engineering profession." Furthermore, OFPP believes the guidance in FAR 36.601-4(a)(3), which restricts Brooks Act applicability to those services which "require" performance by registered architects or engineers, contravenes the intent of the 1988 amendments.<sup>7</sup>

As the DAR Case points out, the legislative history and several Comptroller General decisions are inconclusive on this issue. However, the legislative history and Comptroller General decisions do establish certain facts. The statutory language "may logically or justifiably perform," was included in the 1972 amendments and was not changed by the 1988 amendments. The 1988 amendments were merely to clarify the 1972 definition and were not intended to narrow or expand its scope.<sup>8</sup> The Senate and House reports accompanying the 1972 amendments state that "[t]he purpose of this definition is to encompass all of the services which architects and engineers might logically or justifiably perform."<sup>9</sup> The Comptroller General decisions reveal no evidence of anyone asserting the very broad interpretation of the definition feared by DOD.

Based on the preceding evidence, it appears the guidance in FAR 36.601-4(a)(3), which restricts application of Brooks Act procedures to services which logically or justifiably "require" performance by registered architects or engineers or their employees, is more restrictive than contemplated by the statute. However, because this regulatory "fix" is too restrictive does not mean some sort of "fix" is not needed. Although the broad definitional interpretation feared by DOD has not yet been the subject of a Comptroller General decision, the DAR Case record contains comments from industry groups which urge an expansive interpretation of the definition.<sup>10</sup> The recommended amendment to the existing definition could prevent an unintended expansion of the scope of the Brooks Act.

Oct. 20, 1988) (remarks of Rep. Brooks) ("The definition . . . is not an expansion of previous law, but a clarification of the definition").

<sup>9</sup>S. REP. NO. 1219, 92d Cong., 2d Sess. 7 (1972); H.R. REP. NO. 1188, 92d Cong., 2d Sess. 9 (1972).

<sup>10</sup>See e.g., DAR Case No. 91-73, comments 89-25-185 and 89-25-187.

### **1.2.8.5. Relationship to Objectives**

This legislation identifies the broad policy objectives and the fundamental requirements to be achieved, but leaves the detailed implementing methodology to the acquisition regulations. The recommended change will clarify the intended scope of the Brooks Act, thereby precluding restricted competition for services which can be obtained from non-registered architectural and engineering firms.

### **1.2.8.6. Proposed Statute**

#### **40 U.S.C. § 541. Definitions**

As used in this title --

(1) The term "firm" means any individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the professions of architecture or engineering.

(2) The term "agency head" means the Secretary, Administrator, or head of a department, agency, or bureau of the Federal Government.

(3) The term "architectural and engineering services" means --

(A) professional services of an architectural or engineering nature, as defined by State law, if applicable, which are required to be performed or approved by a person licensed, registered, or certified to provide such services as described in this paragraph;

(B) professional services of an architectural or engineering nature performed by contract that are associated with research, planning, development, design, construction, alteration, or repair of real property; and

(C) such other professional services of an architectural or engineering nature, or incidental services, which members of the architectural and engineering professions (and individuals in their employ) may logically or justifiably perform, including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals, and other related services.

## **1.2.9. 41 U.S.C. § 416**

### **Procurement Notice**

#### **1.2.9.1. Summary of the Law**

This statute sets forth the requirements for executive agencies to publish notice of their intent to solicit bids or proposals and to publish notice of contract awards.<sup>1</sup> When agencies intend to solicit bids or proposals or to place orders for a price expected to exceed the small purchase threshold, they must publish a notice in the Commerce Business Daily. The notice must precede the solicitation by at least 15 days. In addition, it must not set a deadline for the submission of most bids and proposals that is less than 30 days after the solicitation is issued. The deadline for research and development bids and proposals must not be less than 45 days and the deadline for orders must not be less than 30 days after the notice is published.

The statute mandates what provisions the notice must contain, chief of which are an accurate description of the property or services needed that is complete enough to assist a prospective contractor to make an informed business decision as to whether to seek a copy of the solicitation, and, second, the name, business address, and telephone number of the contracting officer. The notice must also state where any technical data necessary to respond to the solicitation may be obtained, whether there are any qualification requirements, that the agency will consider all offers or quotations from responsible sources, and the justification for using other than competitive procedures (if appropriate) and the identity of the intended source.

Notification in the Commerce Business Daily generally is not required if the procurement falls within any one of five of the seven exceptions to full and open competition described at 10 U.S.C. § 2304(c) or if the agency head, after consultation with the Administrator for Federal Procurement Policy and the Administrator of the Small Business Administration, determines notice is inappropriate. In contrast, notification generally is required even if only one or a limited number of sources are available and 10 U.S.C. § 2304(c)(1) is cited. Notification is also required when 10 U.S.C. § 2304(c)(6) is cited, provided notification does not compromise the national security.

If the expected price of the bid or proposal or order to be placed is less than the small purchase threshold, agencies are not required to publish notice in the Commerce Business Daily. However, whenever the expected price is between \$5000 and the small purchase threshold for a defense agency procurement, and, whenever the expected price is between \$10,000 and the small purchase threshold for a civilian agency threshold, notice of the intent to solicit bids or proposals must be posted in a public place at the contract office for not less than ten days. This requirement does not apply to the placement of orders. The constraints on imposing deadlines for the submission of bids and proposals and the necessary contents of the notice are the same for both

---

<sup>1</sup>The provisions of this statute are duplicated at 15 U.S.C. § 637(e). The Panel recommends the same amendments be made to both statutes.

posted notices and published notices. Exemptions from the requirement to post a notice are far fewer than for published notices.

Where a contract award or placement of order exceeds the small purchase threshold and is likely to generate a subcontract, agencies must publish notice of such action in the Commerce Business Daily. The statute does not specify how soon after award or placement of the order that the notice must be published.

### 1.2.9.2. Background of the Law

This provision was added as part of the Competition in Contracting Act of 1984.<sup>2</sup> Senator William Cohen, a cosponsor of this legislation, wrote that procurement notice is an integral part of the affirmative effort required of all agencies to obtain effective competition. The notice requirement was intended to remedy two problems identified by Senator Carl Levin. These were that contract descriptions in the Commerce Business Daily were frequently insufficient for businesses to adequately prepare a response, and, second, the period of time for competitive responses was too short. These problems often precluded small companies from competing for Government contracts.<sup>3</sup>

The Senator also explained that the notice provision would act as a double-check for potential competition before a sole-source award is made. "The objective is to alert contractors, who may be capable of meeting the agency's needs but would have otherwise not known of the contract, to submit offers. In this manner, the legislation further safeguards against sole-source contracts when competition is available."<sup>4</sup>

In 1986, two amendments were made to this law. The notice thresholds were raised from \$10,000 to \$25,000 and the provision which requires posting of the notice at the contracting office issuing the solicitation was added.<sup>5</sup> Furthermore, a new notice requirement was added: when the price was expected to exceed \$10,000 and there was not a reasonable expectation that at least two offers would be received from responsive and responsible offerors, a notice was required to be published in the Commerce Business Daily.<sup>6</sup> The notice threshold was raised in order to save administrative lead time, since 98 percent of all contract actions in DOD were small purchases; the posting requirement was added to incorporate the existing FAR and DFARS provisions.<sup>7</sup>

The most recent amendments were made in 1990.<sup>8</sup> The notice thresholds were changed from the specific dollar amount of \$25,000 to the term, "small purchase threshold." In addition,

<sup>8</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 806(d), 104 Stat. 1485, 1592-93 (1990).

Congress repealed the 1986 notice requirement for actions where the price was expected to exceed \$10,000 and there was no reasonable expectation of receiving two offers.

### **1.2.9.3. Law in Practice**

This statute is implemented at FAR Part 5 and DFARS Subparts 205.2 and 205.3. Although the statute does not require a posted notice at the contracting office prior to placing an order under a basic agreement, basic ordering agreement, or similar arrangement, FAR 5.101 does impose this requirement to the same extent posting is required for bid and proposal solicitations.

### **1.2.9.4. Recommendations and Justification**

#### **I**

**Amend section 416 by replacing "small purchase threshold" with "simplified acquisition threshold."**

This amendment is necessary to conform to the Panel's recommended change to 41 U.S.C. § 403(11), which would establish a simplified acquisition threshold of \$100,000.

#### **II**

**Amend section 416(a)(1)(B) to harmonize DOD and civilian agency thresholds.**

Section 416(a)(1)(B) currently treats defense agencies differently than it treats civilian agencies. The former are required to post a notice at the contracting office when the expected price is between \$5,000 and the small purchase threshold. In contrast, the latter are required to post a notice at the contracting office when the expected price is between \$10,000 and the small purchase threshold. This amendment reconciles the two thresholds at \$10,000. The Panel perceives no reason to continue the present disparity and believes a uniform threshold will simplify the process for all those involved.

#### **III**

**The Panel recommends that Congress consider alternative publication methods for actions above the simplified acquisition threshold.**

The use of automated systems is a rapidly changing technology which can and does facilitate the rapid, widespread, and efficient dissemination of information. This technology should therefore be used to the maximum extent practicable to satisfy the notice requirements of this statute. However, the Panel does not at this time advocate the use of automated systems in lieu of publication in the Commerce Business Daily for actions over the simplified acquisition threshold because the Commerce Business Daily is at present the only standardized, uniform

repository of such procurement information. As the technology evolves and experience is gained under recommendation IV below, the Panel recommends that Congress consider alternative publication methods above the simplified acquisition threshold and, when appropriate, authorize the issuance of new uniform and Government-wide regulations.

#### IV

**Allow the use of automated systems for actions under the simplified acquisition threshold: add section 416(e) and amend section 416(a)(1)(B).**

Because of the Panel's recommendation elsewhere<sup>9</sup> to raise the simplified acquisition threshold (currently termed "small purchase threshold") to \$100,000 from \$25,000, fewer procurement actions will require publication in the Commerce Business Daily. To prevent any potential adverse impact on competition from such decreased notice,<sup>10</sup> section 416(e) requires the Administrator for Federal Procurement Policy to issue regulations which will ensure there is adequate notification of actions below the threshold.

The Panel believes such notification is best achieved through automated means, which, as stated in the preceding recommendation, facilitate the rapid, widespread, and efficient dissemination of information. In developing the regulations, the Administrator must take into account the costs and availability of automated means to offerors, with appropriate consideration of small businesses. Such consideration addresses a present deficiency in using automated means described in the preceding recommendation. This new provision gives the Administrator the flexibility to adapt the rules as the technology and business environment change.

Section 416(e)(1)(A), together with the proposed addition to section 416(a)(1)(B), address the use of automated means for satisfying or supplementing the requirement to post an intention to solicit a bid or proposal at the contracting office. Section 416(e)(1)(B) corrects a gap in the existing statute. Presently, the law does not require the posting of an intent to place an order; however, FAR 5.101 does impose this requirement for certain orders. Although section 416(e)(1)(B) does not require physical posting of an intent to place an order, it does require the regulations to ensure sufficient notice is given and allows such notice to be given solely through automated means if the Administrator determines doing so is appropriate.

#### V

**Add section 416(a)(1)(D) to generally require automated means for transmitting solicitation and award notices for publication in the Commerce Business Daily.**

Some procurement offices currently use automated means to transmit the statutorily required notices for publication in the Commerce Business Daily. Transmission by such means

---

<sup>9</sup>See Chapter 4.1 of this Report.

<sup>10</sup>See S. REP. NO. 523, 98th Cong., 2d Sess. 34-36 (1984).

reduces costs and the number of days needed in the contract award process. The Panel recommends requiring the agencies to use such transmission means to the maximum extent practicable in order to achieve savings in cost and time.

## VI

### **Add section 416(a)(4) to increase flexibility when setting deadlines for submission of offers for commercial items.**

Section 416(a)(3) establishes minimum time periods that offerors have to prepare their bids or proposals after notice is published in the Commerce Business Daily. The Panel believes the time periods may be excessive when the product sought is a commercial item. For example, a supplier may already have an existing catalog which describes the item and shows the market price of a commercial item when the notice is published, and therefore does not need the usual 30 days to submit a bid. The rigidity of the present law precludes setting a shorter time for the submission of bids and proposals and thus builds unnecessary delay and attendant costs into the acquisition process. The proposed section 416(a)(4) exempts commercial items from the statutory time constraints described above and directs the Administrator for Federal Procurement Policy to issue rules published in the FAR which prescribe the appropriate time periods.

#### **1.2.9.5. Relationship to Objectives**

The Panel recommends six changes to this law. Collectively, the amendments simplify the acquisition process, leave detailed implementing methodology to the regulations, which can adapt to meet expected changes in technology and the business environment, encourage faster and more widespread dissemination of information and thereby promote greater access to the procurement system, save time and money, and facilitate Government access to commercial items.

#### **1.2.9.6. Proposed Statute**

##### **41 U.S.C. § 416. Procurement notice**

(a)(1) Except as provided in subsection (c) --

(A) an executive agency intending to --

(i) solicit bids or proposals for a contract for property or services for a price expected to exceed the ~~small-purchase~~ simplified acquisition threshold; or

(ii) place an order, expected to exceed the ~~small-purchase~~ simplified acquisition threshold, under a basic agreement, basic ordering agreement, or similar arrangement, shall furnish for publication by the Secretary of Commerce a notice described in subsection (b);

(B) an executive agency intending to solicit bids or proposals for a contract for property or services with an estimated price of \$10,000 or more but not exceeding the simplified acquisition threshold --

(i) shall post, for a period of not less than ten days, in a public place at the contracting office issuing the solicitation a notice of solicitation described in subsection ~~(f)~~ (b);

(ii) may fulfill or supplement the requirement in (i) through the use of automated systems, such as systems that provide remote access to such information through the use of electronic data interchange, to the extent permitted by regulations published in the Federal Acquisition Regulation under the authority of the Administrator for Federal Procurement Policy set forth in subsection (e).

~~(i) in the case of an executive agency other than the Department of Defense, if a contract is for a price expected to exceed \$10,000, but not to exceed the small purchase threshold; and~~

~~(ii) in the case of the Department of Defense, if the contract is for a price expected to exceed \$5,000, but not to exceed the small purchase threshold; and~~

(C) an executive agency awarding a contract for property or services for a price exceeding the ~~small purchase~~ simplified acquisition threshold, or placing an order referred to in clause (A)(ii) exceeding the ~~small purchase~~ simplified acquisition threshold, shall furnish for publication by the Secretary of Commerce a notice announcing the award or order if there is likely to be any subcontract under such contract or order; and

(D) executive agencies shall, to the maximum extent practicable, transmit the notices required by subparagraphs (A) and (C) for publication in the Commerce Business Daily through automated means.

(2) The Secretary of Commerce shall publish promptly in the Commerce Business Daily each notice required by paragraph (1).

(3) Whenever an executive agency is required by paragraph (1)(A) to furnish a notice to the Secretary of Commerce, such executive agency may not --

(A) issue the solicitation earlier than 15 days after the date on which the notice is published by the Secretary of Commerce; or

(B) establish a deadline for the submission of all bids or proposals in response to the notice required by paragraph (1)(A) that --

(i) in the case of an order under a basic agreement, basic ordering agreement, or similar arrangement, is earlier than the date 30 days after the date the notice required by paragraph (1)(A)(ii) is published;

(ii) in the case of a solicitation for research and development, is earlier than the date 45 days after the date the notice required by paragraph (1)(A)(i) is published; or

(iii) in any other case, is earlier than the date 30 days after the date the solicitation is issued.

(4) The requirements of paragraph (3)(B) do not apply to contracts for the purchase of commercial items made in accordance with section XXXX of this title. For such contracts, the Administrator for Federal Procurement Policy shall issue rules published in the Federal Acquisition Regulation which prescribe appropriate limits on any deadline established for the submission of all bids or proposals in response to the notice required by paragraph (a)(1).

(b) Each notice of solicitation required by subparagraph (A) or (B) of subsection (a)(1) shall include --

(1) an accurate description of the property or services to be contracted for, which description (A) shall not be unnecessarily restrictive of competition, and (B) shall include, as appropriate, the agency nomenclature, National Stock Number or other part number, and a brief description of the item's form, fit, or function, physical dimensions, predominant material of manufacture, or similar information that will assist a prospective contractor to make an informed business judgment as to whether a copy of the solicitation should be requested;

(2) provisions that --

(A) state whether the technical data required to respond to the solicitation will not be furnished as part of such solicitation, and identify the source in the Government, if any, from which the technical data may be obtained; and

(B) state whether an offeror, its product, or service must meet a qualification requirement in order to be eligible for award, and if so, identify the office from which the qualification requirement may be obtained;

(3) the name, business address, and telephone number of the contracting officer;

(4) a statement that all responsible sources may submit a bid, proposal, or quotation (as appropriate) which shall be considered by the agency; and

(5) in the case of a procurement using procedures other than competitive procedures, a statement of the reason justifying the use of such procedures and the identity of the intended source.

(c)(1) A notice is not required under subsection (a)(1) if --

(A) the notice would disclose the executive agency's needs and the disclosure of such needs would compromise the national security;

(B) the proposed procurement would result from acceptance of --

(i) any unsolicited proposal that demonstrates a unique and innovative research concept and the publication of any notice of such unsolicited research proposal would disclose the originality of thought or innovativeness of the proposal or would disclose proprietary information associated with the proposal; or

(ii) a proposal submitted under section 9 of the Small Business Act;

(C) the procurement is made against an order placed under a requirements contract;

(D) the procurement is made for perishable subsistence supplies; or

(E) the procurement is for utility services, other than telecommunication services, and only one source is available.

(2) The requirements of subsection (a)(1)(A) do not apply to any procurement under conditions described in paragraph (2), (3), (4), (5), or (7) of section 303(c) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c)) or paragraph (2), (3), (4), (5), or (7) of section 2304(c) of title 10, United States Code.

(3) The requirements of subsection (a)(1)(A) shall not apply in the case of any procurement for which the head of the executive agency makes a determination in writing, after consultation with the Administrator for Federal Procurement Policy and the Administrator of the Small Business Administration, that it is not appropriate or reasonable to publish a notice before issuing a solicitation.

(d) An executive agency shall make available to any business concern, or the authorized representative of such concern, the complete solicitation package for any on-going procurement announced pursuant to a notice under subsection (a). An executive agency may require the payment of a fee, not exceeding the actual cost of duplication, for a copy of such package.

(e)(1) The Administrator for Federal Procurement Policy shall issue such rules as may be required

=

(A) to accomplish notice requirements through the use of automated means (e.g., electronic data interchange, bulletin boards) in lieu of, or in addition to, the requirements set forth in paragraph (a)(1)(B); and

(B) to ensure that an executive agency provides sufficient notice whenever the agency intends to place an order, expected to exceed \$10,000 but not expected to exceed the

simplified acquisition threshold, under a basic agreement, basic ordering agreement, or similar agreement.

(2) Such rules shall take into account the costs and availability of automated means to offerors, including small businesses. Such rules shall be published for public comment in accordance with the requirements of section 22 of this title.

## **1.2.10. 41 U.S.C. § 418**

### **Advocates for competition**

#### **1.2.10.1. Summary of the Law**

Section 418(a)(1) establishes the position of competition advocate, a senior level position, in each executive agency. This requires competition advocates for the Army, Navy, and Air Force. Section 2318(a) of Title 10 requires a competition advocate for the Defense Logistics Agency.<sup>1</sup>

Section 418(a)(2) directs the head of each agency to appoint an advocate for competition for the executive agency and for each procuring activity within the agency. The competition advocate must be someone different from the person holding the position of senior procurement executive. The competition advocate may not be assigned duties inconsistent with the advocate position and must be provided the staff or assistance necessary to perform those duties and responsibilities (e.g., access to persons experienced in contract administration, engineering, technical operations, financial management, etc.).

The agency competition advocate's responsibilities under section 418(b) are:

- challenging barriers to full and open competition in the procurement of property or services by the agency;
- reviewing the procurement activities of the executive agency;
- reporting to the senior procurement executive regarding opportunities and barriers to full and open competition and any condition that unnecessarily restricts competition;
- annual reporting to senior procurement executive on the advocate's actions under this section, new initiatives required to increase competition, and remaining barriers to full and open competition;
- making recommendations to the senior procurement executive as to plans for increasing competition on a fiscal year basis;
- making recommendations to the senior procurement executive as to a system of personal and organizational accountability for competition, such as incentives to program managers, contracting officers, and others to promote competition in contracting; and

---

<sup>1</sup>See Chapter 1.2.5 of this Report for analysis of 10 U.S.C. § 2318.

**Preceding Page Blank**

- describing other ways in which the executive agency has emphasized competition in programs for procurement training and research.

Section 418(c) charges the competition advocate for each procuring activity with responsibility for challenging barriers to, and promoting, full and open competition in the procuring activity, such as unnecessarily detailed specifications and restrictive statements of need.

#### **1.2.10.2. Background of the Law**

Section 418 of Title 41 was added to the Office of Federal Procurement Policy Act in 1984 by the Competition in Contracting Act of 1984 (CICA).<sup>2</sup>

Senator William Cohen, supported by the Senate Armed Services Committee, strongly recommended the adoption of a provision establishing an advocate for competition in the procuring agencies. Writing in the *Public Contract Law Journal*,<sup>3</sup> the Senator stated that, without an advocate for competition, there was no clear responsibility and accountability for competition in Government contracting. To support his position, Senator Cohen relied upon a GAO finding that contracting officers often acquiesce to the sole-source procurement requests of headquarters, technical personnel, and end-users. The advocate was needed to ensure proper implementation of CICA, which requires that agencies make an affirmative effort to obtain competition. The original proposal to establish an advocate for competition was made in 1981 by Senator David Pryor. The Senate version would have established a single advocate for competition in each agency. The conference substitute, and the statute as enacted, required the establishment of an additional advocate for competition in each procuring activity.

#### **1.2.10.3. Law in Practice**

This statute is implemented by FAR Subpart 6.5. Under this regulatory guidance, the services and the Defense Logistics Agency have developed competition advocate programs. Due to the success of these programs in challenging the barriers to competition, a recent bill proposed that the advocate for competition for each procuring activity also become the advocate for nondevelopmental items.<sup>4</sup> The Deputy Secretary of Defense has directed the Secretaries of the military departments, the Director of Defense Logistics Agency, and other appropriate components to ensure that advocates for competition in DOD perform a similar role for commercial and nondevelopmental items.<sup>5</sup>

<sup>4</sup>H.R. 3161, 102d Cong., 1st Sess. § 113 (1991).

<sup>5</sup>Memorandum from Honorable Donald J. Atwood Jr., Deputy Secretary of Defense to DOD agencies (Apr. 24, 1992).

#### **1.2.10.4. Recommendation and Justification**

##### **Retain**

The Panel solicited comments on section 418, as well as other CICA-related statutes. The possibility of combining 10 U.S.C. § 2318 with section 418 was considered, but commenters varied in their responses and the Panel concluded that no clear improvement would result.<sup>6</sup>

One comment recommended that the entire area of the need for single-issue advocates be examined, questioning whether such advocates have served their purpose and whether they and their staffs are affordable in a declining budget environment.<sup>7</sup>

The Panel considered in its discussions whether competition is sufficiently institutionalized in DOD to permit the elimination of competition advocates. The Panel concluded that in an environment of decreasing budgets, fewer new programs, and greater reliance on upgrades and modifications of existing systems, it may be very difficult to maintain current levels of competition or improve them further. For that reason, and in light of their expanded role as advocates for commercial and nondevelopmental items, the Panel concluded that both the competition advocate position and section 418 should be retained.

#### **1.2.10.5. Relationship to Objectives**

This statute establishes and identifies the broad policy objectives and the fundamental requirements to be achieved by the advocate for competition. It also supports the Panel's objective to establish a balance between efficient processes, full and open access to the procurement system, and sound implementation of socioeconomic policies.

<sup>6</sup>See Chapter 1.2.5 of this Report for analysis of 10 U.S.C. § 2318.

<sup>7</sup>Letter from Council of Defense and Space Industry Associations (CODSIA) signed by Don Fuqua, President, AIA, Dan C. Heinomeier, Vice President, EIA, James R. Hogg, President, NSIA, and John J. Stocker, President, Shipbuilders Council of America, to Maj Gen John D. Slinkard, USAF and Thomas J. Madden, Department of Defense Advisory Panel on Streamlining and Codifying Acquisition Law (July 10, 1992).

## **1.2.11. 41 U.S.C. § 419**

### **Annual report on competition**

#### **1.2.11.1. Summary of the Law**

This law requires that the head of each executive agency issue an annual report to Congress on the agency's use of competition in contracting. The report includes the following:

(1) a specific description of all actions that the head of the executive agency intends to take during the current fiscal year to:

(a) increase competition for contracts with the executive agency on the basis of cost and other significant factors;

(b) reduce the number and dollar value of noncompetitive contracts entered into by the executive agency; and

(2) a summary of the activities and accomplishments of the advocate for competition of the executive agency during the preceding fiscal year.

#### **1.2.11.2. Background of the Law**

This statute was added to the Office of Federal Procurement Policy Act in 1984 by the Competition in Contracting Act of 1984 (CICA).<sup>1</sup>

#### **1.2.11.3. Law in Practice**

The reports due to Congress under this statute were required for a five-year period beginning in 1986 and ending in 1990.

#### **1.2.11.4. Recommendation and Justification**

##### **Delete**

This statute should be deleted from Title 41 because its provisions expired in 1990 and the requirements of this section are covered in 41 U.S.C. § 418. Specifically, section 418 provides that the competition advocate must make an annual report to the senior procurement executive on new initiatives to increase competition and to remove remaining barriers to full and open competition. The section also provides that the competition advocate must make plans for increasing competition on a fiscal year basis.

---

<sup>1</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2732(a), 98 Stat. 484, 1197.

#### **1.2.11.5. Relationship to Objectives**

The requirements of this statute are covered elsewhere in the U.S. Code. Therefore, deletion would streamline the body of defense related acquisition laws.

## **1.3. Truth In Negotiations Act**

### **1.3.0. Introduction**

Section 2306a, "Cost or pricing data: truth in negotiations," often referred to as "TINA," is considered by the Panel to be an important statute that clearly impacts the critical path of many large-dollar contracts awarded without price competition and the critical path of many significant contractual modifications. The Panel had expected TINA to be a statute on which it would receive substantial and controversial recommendations for amendment. This expectation was based on the law's long history since enactment in 1962; its significant impacts on accounting, auditing, and negotiation processes; its central role in regulatory guidance for submission and support of contractor proposals;<sup>1</sup> the special emphasis on tracking, resolution, and disposition of defective pricing cases by audit and contracting activities;<sup>2</sup> the rights conferred on the Government for price reductions, including interest and, in certain cases, penalties for defective data;<sup>3</sup> and the collective experience of the Panel which indicated that TINA has been a subject of continuing discussion and controversy over many years.

Because of this expectation, the Contract Formation Working Group focused on TINA first, solicited in writing comments from a wide range of Government and private sector entities, and it conducted a public meeting in December 1991. In its formal request for comments issued in late December 1991,<sup>4</sup> the working group identified twelve issues on the basis of its own analyses and informal comments it had received. These issues ranged from the possible need to revisit the definition of "cost or pricing data," through such issues as greater specificity on what constitutes proper submission or identification of such data, to whether the requirement for certification of such data should be retained. Commentators were also invited to comment on any other TINA issues.

Most private sector commenters, including the American Bar Association Section of Public Contract Law<sup>5</sup> and the Council of Defense and Space Industry Associations (CODSIA)<sup>6</sup> advocated very limited changes to address specific issues or recommended against any attempt to change the TINA statute at this time. Both private sector and Government commenters, in general, believed most of the issues either did not require change or that needed changes could be handled by regulation. For example, the Department of Defense Inspector General (DODIG)

---

<sup>1</sup>48 C.F.R. § 15.804.

<sup>2</sup>Letter from DODIG to Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition) (Jan. 14, 1992) states, "Over the last five years, the DCAA has performed 12,118 defective pricing audits and in 4,463 found defective pricing totaling about \$4.5 billion. For defective pricing audits settled during the last 5 years, the Government has recouped over \$700 million."

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Air Force Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition) to Distribution (Industry and Government) (Dec. 22, 1991).

<sup>5</sup>Letter from ABA Section of Public Contract Law signed by John S. Pachter, Chair, to DOD Advisory Panel on Streamlining and Codifying Acquisition Laws, Defense Systems Management College (Re: Recommended Changes to the Truth in Negotiations Act) (Apr. 8, 1992).

<sup>6</sup>Letter from CODSIA signed by D. Fuqua, J.R. Iverson, K. McLennan, D.C. Heinemeier, J.R. Hogg, and J.J. Stocker to Stuart A. Hazlett (Jan. 16, 1992).

stated, "We do not believe additional changes are needed to the TINA."<sup>7</sup> Exceptions to this general pattern were comments from the Defense Contract Audit Agency<sup>8</sup> and the Air Force Contract Law Center.<sup>9</sup> These commenters raised various issues concerning definitions, timing of submissions, burden of proof, defenses, etc., but the consensus of most other commenters and the judgment of the Panel was that the need for such amendments was not clearly established and that the resulting risks of unintended consequences and new controversy were not warranted.

As set forth in the detailed analysis and recommendations included in this subchapter, there was a focus by several public and private sector commenters on the need to amend TINA, or its regulatory implementation, in order to better facilitate the procurement of commercial items and make it easier for the Government to buy from commercial entities. Commercial company accounting systems do not normally produce the detailed cost and pricing data required under TINA and do not segregate or record costs according to Government cost principles. These issues were expanded upon and discussed in detail during Panel meetings, including several presentations by CODSIA representatives and other interested parties.

As the Panel evolved its concepts of recommending a statutory definition of "commercial item" for inclusion in 10 U.S.C. § 2302(5) and of a separate subchapter of Title 10 covering procurement of commercial items, including end items and components, it frequently revisited proposed changes to TINA in order to ensure appropriate interaction and consistency. The Panel's effort to define, and improve opportunities to procure, commercial items, set forth in detail in Chapter 8 of this Report, represented the single area to which the Panel devoted the most time and effort. After consideration of comments, analysis of the law, and full consideration of the many related presentations concerning TINA and the overall subject of procurement of commercial items, the Panel concluded that the threshold for application of the statute should be stabilized at \$500,000.<sup>10</sup> Furthermore, the Panel concluded that the statute should be amended to facilitate acquisition of commercial items,<sup>11</sup> and that certain conforming language changes should be made for internal consistency and consistency with Panel recommendations elsewhere in its Report.<sup>12</sup>

The three most significant of the Panel's six recommended amendments to the statute are summarized here (recommendations I, III, and IV):

---

<sup>7</sup>See note 2, *supra*.

<sup>8</sup>Memorandum from DCAA signed by Roy C. Heldemann, Assistant Director for Operations to Maj Gen John D. Slinkard, USAF, Deputy Assistant Secretary (contracting), Assistant Secretary (Acquisition) (Jan. 10, 1992).

<sup>9</sup>Memorandum from HQ Air Force Contract Law Center to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (Dec. 10, 1991).

<sup>10</sup>See Recommendation and Justification No. I in Chapter 1.3.1 of this Report.

<sup>11</sup>*Id.* at No. III and IV.

<sup>12</sup>*Id.* at No. II, V, and VI.

## I

**Maintain the dollar threshold for application of the statute constant at \$500,000 by eliminating all words in the statute that refer to the threshold reverting to \$100,000 after December 31, 1995, and repeal section 803 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. No. 101-510), as amended.**

Over the past decade, the threshold for applying TINA to DOD, NASA, and Coast Guard contracts has fluctuated between \$100,000 and \$500,000. This recommendation would provide consistency. It also takes into account inflation since the passage of TINA in 1962. To stabilize the threshold at \$500,000 would maintain the threshold at the general level that applied when the statute was originally passed. Based on inflation, the \$100,000 figure in 1962 equates to \$520,000 in 1992 dollars, and \$100,000 in 1992 equates to \$19,162 in 1962 dollars.<sup>13</sup> Stability will assist in containing costs to the Government because both Government and industry will know the threshold and plan their surveillance or accounting systems accordingly.

Although there may be cases of defective pricing on contracts below \$500,000, the recommended increased threshold will appropriately balance the risk to the Government of defective pricing against the administrative costs of auditing and pursuing alleged defective pricing cases on such contracts. In addition, the Government will still have the discretion to require submission of cost or pricing data below the recommended threshold when it has reason to believe such action is necessary to protect its interests.

The Panel recognizes the continuing need for appropriate review by the DODIG of the effectiveness of TINA, as implemented in the regulations and in practice. However, the Panel believes that the specific requirements of Pub. L. No. 101-510, as amended, which calls for a review and report on the threshold change, would be inconsistent with the Panel's recommendation for stability and predictability in the threshold.

## III

**Add a specific exception in subsection (b)(2) for modifications to contracts or subcontracts for commercial items or services when the modification exceeds the threshold, but does not change the commercial item or service to a non-commercial item or service or the modification is issued solely to purchase a commercial item or service.**

In the course of its extensive discussions of the differences between the accounting systems used by Government contractors and those used by commercial companies, and of changes which would promote greater use of commercial items or services, the Panel concluded

---

<sup>13</sup>See FY92 President's Budget, Part 7, Historical Tables, at 17 (composite deflator: 5.2).

that there is a legitimate concern by commercial companies about the application of TINA to modifications. If a commercial company, whose accounting system will not produce the cost or pricing data required by TINA, wins a large contract for a commercial item or service under adequate price competition, it may become subject to submission of certified cost or pricing data if a modification in excess of the threshold is needed, but the price of the modification, itself, is not based on adequate price competition.

The Panel recognized that a broad exemption for all modifications to contracts and subcontracts for commercial items or services could be subject to abuse. Therefore, the Panel sought to limit the recommended exemption to only those circumstances under which the contracting officer should be able to determine the reasonableness of the price of the modification by price analysis and comparison to the price(s) under the basic contract. The Panel used the term "need not be applied," to provide appropriate latitude for judgment in applying the exception by the regulators and contracting officers.

#### IV

**Expand and clarify the exception for adequate price competition as stated in subsection (b) by adding a new subsection (b)(3).**

This amendment would remove unnecessary impediments to the use of commercial items and leading edge technology. Congress has noted that the exceptions to the requirement for cost or pricing data have not enabled DOD greater access to commercial items.<sup>14</sup>

Concern over the effect on commercial items emanates in part from Congress' stated preference for the use of such items and its repeated guidance to remove regulatory impediments.<sup>15</sup> Besides Congress, other Government agencies have expressed concern about the ability of DOD to acquire commercial items efficiently.<sup>16</sup>

Government sentiment is also shared by the private sector. Although the Council of Defense and Space Industry Associations (CODSIA), in general, opposed changing the statute, it said:

It is unlikely DOD will be able to achieve the objective of increasing its acquisition of commercial products until such time as it treats

---

<sup>14</sup>S. REP. NO. 81, 101st Cong., 1st Sess. 196 (1989).

<sup>15</sup>See 10 U.S.C. § 2301(b)(6); National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 824, 103 Stat. 1352, 1504-07 (1989).

<sup>16</sup>Memorandum from Dept. of the Navy, Office of the Assistant Secretary (Research, Development, and Acquisition) signed by E.G. Cammack, Director of Procurement Policy to Department of the Air Force Deputy Assistant Secretary (Contracting) (Subj.: Request for Comment on the Truth in Negotiation Act (TINA), 10 U.S.C. § 2306A) (Jan. 14, 1992).

such acquisitions as exempt from the requirements for cost or pricing data.<sup>17</sup>

The American Bar Association, Section of Public Contract Law, also considered that changes to TINA should be limited to those absolutely necessary to effectuate pressing priorities and that such changes should be spare, simple, and easily understood. However, the Section also stated:

While acquisition of commercial products could be substantially encouraged by appropriate changes to the procurement regulations without changes to the statute, it is our view that these changes will not be made unless they are encouraged or, in some cases, mandated by the statute.<sup>18</sup>

The language in subsection (b)(3) of the proposed statute will enhance the Government's access to items and technology developed in commercial markets by clarifying and expanding the exemption for adequate price competition. Specifically, by permitting the contracting officer to consider the same or similar items produced under the same or similar production processes as the contractor's commercial items, proper consideration will be given to the actual operation of market forces in the determination of a fair and reasonable price. The same rationale (i.e., the actual operation of market forces) is the basis for the established catalog or market price exception.

The proposed amendment links the adequate price competition exemption more directly to the use of market research techniques. Market research can be used by the Government for the acquisition of commercial items, including items that must be modified to meet the Government's needs, as well as the prices of such items and the terms and conditions under which commercial sales are made for these items.

Where the Government can be assured that it will receive a fair and reasonable price for an item, a procurement can be exempted from TINA.<sup>19</sup> The proposed amendment specifically provides that a procurement can be exempted from TINA under the adequate price competition exemption if: (1) the price is fair and reasonable, and (2) the item is to be purchased from a company or business unit that produces the same or similar item for the commercial market using the same or similar commercial production processes as those used to produce the offered item for the Government.

By use of the term "same or similar item," the proposed amendment recognizes the dynamics of the marketplace where commercial items are frequently undergoing changes: (1) to

---

<sup>17</sup>Letter from CODSIA signed by D. Fuqua, J.R. Iverson, K. McLennan, D.C. Heinemeier, J.R. Hogg, and J.J. Stocker to Stuart A. Hazlett (commenting on TINA issues) (Jan. 16, 1992).

<sup>18</sup>Memorandum from ABA Section of Public Contract Law signed by John S. Pachter, Chair, to DOD Advisory Panel on Streamlining and Codifying Acquisition Laws, Defense Systems Management College (Re: Recommended Changes to the Truth in Negotiations Act) (Apr. 8, 1992).

<sup>19</sup>See e.g., National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 803, 104 Stat. 1485, 1589 (1990), as amended by Persian Gulf Conflict Supplemental Authorization and Personnel Benefits Act of 1991, Pub. L. No. 102-25, § 704(a)(4), 105 Stat. 75, 118-20.

meet customer-specific needs; (2) to use new technologies; and (3) to incorporate so-called planned product improvements. The concept of exempting procurements from TINA based on an offer of a fair and reasonable price for "similar" items was first introduced in the National Defense Authorization Act for Fiscal Year 1991, section 803, as amended by Pub. L. No. 102-25, § 704(a)(4). In that Act, the exemption was limited to procurements under \$500,000. This proposal differs from current regulatory implementation. Current law has been interpreted to limit the adequate price competition exemption to those procurements where there is actual price competition or there is price analysis comparing prices for "the same or substantially the same items."<sup>20</sup>

As proposed, similar items may, in appropriate circumstances, include: (1) items within a defined family of products or a product line where the products share essential functional characteristics or incorporate preplanned product improvements;<sup>21</sup> (2) products that require modifications "in order to meet the requirements of the procuring agency;"<sup>22</sup> and (3) items in current production but "not yet available in the commercial market."<sup>23</sup>

The proposed amendment provides for the consideration of several different factors in determining if an item meets the proposed criteria for the adequate price competition exemption and is offered at a fair and reasonable price. Under the proposed amendment, consideration may be given to the prices of alternate items that perform the same or similar functions. This would allow the Government to compare, for example, the prices of items manufactured with new technologies or processes to items manufactured with older technologies or processes. Consideration may also be given to the prices at which the offeror has previously sold the same or similar items. Consideration may also be given to the existing commercial practices of contractors and subcontractors. Under this last consideration, where a subcontract price is established through the use of existing vendor business relationships and pricing methodologies regularly used for commercial production, this factor may support a determination of a fair and reasonable price.

Although there may be some potential for abuse of the discretion afforded the Government by this recommendation, the increased ability to attract commercial suppliers to the defense industrial base and to benefit from the efficiencies of the commercial marketplace, outweigh what the Panel believes to be an acceptable risk. Proper management of this risk will require better training of contracting and requirements personnel in market research and price analysis techniques, as well as meaningful, thoughtful, and innovative regulatory implementation.

The Panel believes that amendment of section 2306a to implement the three recommendations just highlighted, as well as the three additional recommendations also discussed in the attached analysis, will support several of the Panel's objectives. These include: facilitating the purchase by DOD or its contractors of commercial or modified commercial items and services at or based on commercial market prices; enabling companies (contractors and subcontractors) to

integrate the production of both commercial and defense-peculiar products in a single business unit without altering their accounting or management procedures; and facilitating Government access to commercial technologies and skills available in the commercial marketplace to develop new technologies.

### **1.3.1. 10 U.S.C. § 2306a**

#### **Cost or pricing data: truth in negotiations**

##### **1.3.1.1. Summary of the Law**

The Truth in Negotiations Act (TINA) applies to negotiated contracts awarded by the Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the Coast Guard. It requires prime contractors to submit cost or pricing data to the Government before the award of any negotiated contract or the pricing of any contract modification expected to exceed \$500,000. Subcontractors must submit cost or pricing data to the prime contractor before the award of a subcontract or subcontract modification expected to exceed \$500,000. The Government may require the submission of cost or pricing data for contracts, subcontracts, and modifications below the \$500,000 threshold if it believes the data is necessary to determine price reasonableness. The statute stipulates that the current \$500,000 threshold will be reduced to \$100,000 for contracts or subcontracts awarded, or modifications made, after December 31, 1995.

Contractors and subcontractors must certify that the data submitted is current, accurate, and complete. The statute defines cost or pricing data as all facts that, as of the date of agreement on price, a prudent buyer or seller would reasonably expect to significantly affect price negotiations. Such data does not include information that is judgmental, but does include facts from which a judgment was derived.

There are four exceptions to the requirement for the submission of cost or pricing data. A contractor or subcontractor is not required to submit such data if the price agreed upon is based on: (1) adequate price competition; (2) established catalog or market prices of commercial items sold in substantial quantities to the general public; (3) prices set by law or regulation; or (4) in an exceptional case, when a determination and justification is made by the head of the agency.

"Defective cost or pricing data" is defined as data that was inaccurate, incomplete, or noncurrent as of the date of agreement on price or other date mutually agreed to by the parties. The statute requires applicable contracts to include a provision for the adjustment of the contract price that excludes any significant amount by which the price was increased because the contractor or subcontractor submitted defective cost or pricing data. The statute also sets forth detailed criteria for contractor defenses against price adjustments and when offsets are permitted against such adjustments.

##### **1.3.1.2. Background of the Law**

Congress enacted the statute in 1962 to place Government negotiators on an equal footing with contractors by requiring contractors to submit current, accurate, and complete cost or

pricing data on negotiated acquisitions prior to contract award.<sup>1</sup> As stated at FAR 15.804-1, cost or pricing data "ultimately enable the Government and the contractor to negotiate fair and reasonable prices."

The House Armed Services Committee (HASC) initiated the legislation in 1960 when it proposed a bill imposing a truth-telling obligation on contractors under incentive-priced contracts with DOD. The HASC and the General Accounting Office maintained that contractors had received windfall profits on such contracts.<sup>2</sup> Subsequently, the Senate Armed Services Committee generalized the application of the proposed legislation to all negotiated contracts exceeding \$100,000 to avoid excessive profits due to a lack of current, accurate, and complete cost data.<sup>3</sup>

The original \$100,000 threshold was based on an Armed Services Procurement Regulation (ASPR).<sup>4</sup> In 1981, Congress raised the threshold to \$500,000 to provide administrative relief to the procurement process and realize cost savings.<sup>5</sup> However, in 1984 Congress reduced it to \$100,000 to maintain consistency with the threshold used by civilian agencies and because of abuses in the pricing of spare parts.<sup>6</sup> In December 1990, Congress again raised the threshold to \$500,000 because of DOD and industry testimony that cost or pricing data requirements discouraged small and mid-sized firms from participating in defense procurement.<sup>7</sup> Because of evidence of defective pricing on contracts between \$100,000 and \$500,000, Congress directed the DOD Inspector General (DODIG) to review the effect of the increased threshold after three years and report its findings to Congress.<sup>8</sup> In addition, Congress stipulated that the threshold revert to \$100,000 at the end of 1995.<sup>9</sup>

Originally, the statute did not define the term "cost or pricing data." In 1986, Congress provided a statutory definition in an attempt to settle arguments concerning the extent of data to

<sup>9</sup>*Id.*

be disclosed.<sup>10</sup> The statutory definition was similar to that in the FAR.<sup>11</sup> In 1987, Congress revised the definition to its present form to more closely parallel the regulatory definition and to clarify the distinction between factual and judgmental information.<sup>12</sup>

In 1986, Congress granted to contractors a statutory right to offset against an amount that the Government is entitled to recover for the submission of defective cost or pricing data.<sup>13</sup> Prior to this statutory recognition, a contractor's right of offset was grounded only in case law.<sup>14</sup> The legislative history emphasizes that the statutory provision corrected the manner in which courts had applied the offset principle. Congress wanted to ensure that an offset could only be taken when the contractor understated factual data (versus judgmental data) and the understatement was not intentional.<sup>15</sup>

### 1.3.1.3. Law in Practice

The statute is implemented at FAR Subpart 15.8 and the corresponding DFARS Subpart. FAR § 15.801 defines cost or pricing data consistently with the statutory definition and includes a number of examples that comprise such data. FAR § 15.804-8 implements the statutory requirement that applicable contracts include a provision for the adjustment of the contract price to exclude any significant amount by which the price was increased because the contractor or subcontractor submitted defective cost or pricing data.<sup>16</sup> FAR § 15.804-3 implements the four exemptions from the requirement for cost or pricing data.

With respect to the exemptions, FAR 15.804-3 defines the terms "adequate price competition," "established catalog or market prices," and "prices set by law or regulation." It also defines "commercial item" to include supplies or services regularly used for other than Government purposes and sold or traded to the general public in the course of normal business operations. DFARS 215.804-3(b) further clarifies "adequate price competition." According to FAR 15.804-3(b), the contracting officer determines if adequate price competition exists to grant an exemption to the cost or pricing data requirement.

<sup>12</sup>National Defense Authorization Act for Fiscal Years 1988 and 1989, Pub. L. No. 100-180, § 804, 101 Stat. 1019, 1125 (1987); H.R. CONF. REP. NO. 446, 100th Cong., 1st Sess. 636, 657 (1987); See also, C.A. Preston, *The Truth in Negotiations Act: Is a New Definition of "Cost or Pricing Data" Necessary?*, 34 Fed. B. News & J. 450, 451 (1987).

<sup>13</sup>10 U.S.C. § 2306a(d)(4); National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 952, 100 Stat. 3816, 3945 (1986) (*identical legislation omitted*).

<sup>14</sup>The seminal case is *Cutler-Hammer, Inc., v. United States*, 416 F.2d 1306, 189 Ct. Cl. 76 (1969).

<sup>15</sup>S. REP. NO. 23, 99th Cong., 2d Sess. 267 (1986) (correcting the misapplication of the principle in *United States v. Rogerson Aircraft Controls*, 785 F.2d 296 (1986)).

<sup>16</sup>48 C.F.R. § 15.804-8. The FAR prescribes six different clauses: FAR § 52.215-22, Price Reduction for Defective Cost or Pricing Data; FAR § 52.215-23, Price Reduction for Defective Cost or Pricing Data - Modifications; FAR § 52.215-24, Subcontractor Cost or Pricing Data; FAR § 52.215-25, Subcontractor Cost or Pricing Data - Modifications; FAR § 52.215-27, Termination of Defined Benefit Pension Plans; and FAR § 52.215-39, Reversion or Adjustment of Plans for Post retirement Benefits Other than Pensions.

FAR 15.804-3(f) provides that a contractor which requests an exemption based on established catalog or market prices must substantiate its entitlement to the exemption. It does so by submitting a Standard Form (SF) 1412, "Claim for Exemption from Submission of Certified Cost or Pricing Data," to the contracting officer. The SF 1412 lists three categories of sales related to the established catalog price of a commercial item: (1) sales to the Government or to contractors for Government use; (2) sales at catalog price to the general public; and (3) sales to the general public at other than catalog price. As a guideline, the FAR specifies that the latter two categories combined should exceed 35 percent of a contractor's total sales for a contractor to be considered for the exemption. In addition, the FAR states that the second category should be at least 55 percent of sales comprising both the second and third categories of contractor sales for the exemption to apply.

FAR 15.804-7 implements the statutory provisions dealing with defective pricing and offsets. It also implements the statutory provisions for interest and penalties on certain Government overpayments.

#### **1.3.1.4. Recommendations and Justification**

The Panel sought and received comments concerning TINA early in its deliberations. In general, respondents expressed no desire to amend it significantly.<sup>17</sup> In addition, the Contract Formation Working Group of the Panel conducted a public meeting on December 5, 1991 to receive the views of both private sector and Government personnel, and both the Working Group and the Panel interacted frequently with interested parties during formal Panel meetings and in less formal contacts. As the Panel evolved its concepts of a statutory definition of "commercial item" recommended by the Panel for inclusion in 10 U.S.C. § 2302(5) and of a separate subchapter covering procurement of commercial items, it was necessary to revisit proposed changes to TINA in order to ensure appropriate interaction and consistency. After consideration of comments, analysis of the law, and full consideration of the many presentations and discussions concerning TINA, the Panel concluded that the threshold for application of the statute should be stabilized, that the statute should be amended to facilitate the acquisition of commercial items, and that certain conforming language changes should be made.

#### **I**

**Maintain the dollar threshold for application of the statute constant at \$500,000 by eliminating all words in the statute that refer to the threshold reverting to \$100,000 after December 31, 1995, and repeal section 803 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101-510), as amended.**

Over the past decade, the threshold for applying TINA to DOD, NASA, and Coast Guard contracts has fluctuated between \$100,000 and \$500,000.<sup>18</sup> This recommendation would provide

<sup>17</sup>See e.g., notes 25-28, *infra*.

<sup>18</sup>See text at notes 4-9, *supra*.

consistency. It also takes into account inflation since the passage of TINA in 1962. To stabilize the threshold at \$500,000 would maintain the threshold at the general level that applied when the statute was originally passed. Based on inflation, the \$100,000 figure in 1962 equates to \$520,000 in 1992 dollars, and \$100,000 in 1992 equates to \$19,162 in 1962 dollars.<sup>19</sup> Stability will assist in containing costs to the Government because both Government and industry will know the threshold and plan their surveillance or accounting systems accordingly.

Although there may be cases of defective pricing on contracts below \$500,000, the recommended increased threshold will appropriately balance the risk to the Government of defective pricing against the administrative costs of auditing and pursuing alleged defective pricing cases on such contracts. In addition, the Government will still have the discretion to require submission of cost or pricing data below the recommended threshold when it has reason to believe such action is necessary to protect its interests.

The Panel recognizes the continuing need for appropriate review by the DODIG of the effectiveness of TINA, as implemented in the regulations and in practice. However, the Panel believes that the specific requirements of Pub. L. No. 101-510, as amended, which calls for a review and report on the threshold change, would be inconsistent with the Panel's recommendation for stability and predictability in the threshold. The requirements of paragraph (c) for the issuance of regulations for below threshold procurements have been accomplished.<sup>20</sup> Such regulations should be maintained or revised on the basis of experience as a continuing inherent responsibility of the FAR Council.

## II

**Amend subsection (b)(1)(A)(ii) by adding the phrase, "or of services regularly used for other than Government purposes" after the words "established catalog or market prices of commercial items."**

The Panel has recommended that a statutory definition of "commercial item" applicable throughout Title 10 be added to 10 U.S.C. § 2302(5). The Panel devoted extensive time and effort to crafting this definition, taking into account its recommended use in a separate subchapter on commercial items recommended in Chapter 8 of this Report and its impact on socioeconomic provisions and other statutory requirements.

In developing its definition, the Panel carefully considered the degree to which commercial services should be included in the commercial item definition, and conducted extensive discussions both within the Panel and with private sector companies and associations. The Panel concluded that a relatively narrow scope of services should be included in the definition of commercial item, but recognized that there may be other services which, for pricing purposes, are substantially the same as those provided to the general public by commercial business entities.

---

<sup>19</sup>See FY92 President's Budget, Part 7, Historical Tables, at 17 (composite deflator: 5.2).

<sup>20</sup>Federal Acquisition Circular No. 90-10 (Dec. 30, 1991).

In the absence of a statutory definition of the term "commercial item," FAR 15.804-3(c)(3) has used the term and included within its meaning supplies or services regularly used for other than Government purposes and sold or traded to the general public in the course of normal business operations. The Panel has recommended that a definition of "commercial item" be added to section 2302 of this title.<sup>21</sup> Because the proposed statutory definition does not encompass all of the services included within the term as used in the FAR, the proposed definition, standing alone, might be interpreted as narrowing the exception in section 2306a(b)(1)(B) by excluding some services for which the exception is now available. The recommended change to subsection (b)(1)(B)<sup>22</sup> will retain the current application of the exception and avoid any unintended consequence of the recommended statutory commercial item definition.

### III

**Add a specific exception in subsection (b)(2) for modifications to contracts or subcontracts for commercial items or services when the modification exceeds the threshold, but does not change the commercial item or service to a non-commercial item or service or the modification is issued solely to purchase a commercial item or service.**

In the course of its extensive discussions of the differences between the accounting systems used by Government contractors and those used by commercial companies, and of changes which would promote greater use of commercial items or services, the Panel concluded that there is a legitimate concern by commercial companies about the application of TINA to modifications. If a commercial company, whose accounting system will not produce the cost or pricing data required by TINA, wins a large contract for a commercial item or service under adequate price competition, it may become subject to submission of certified cost or pricing data if a modification in excess of the threshold is needed, but the price of the modification, itself, is not based on adequate price competition.

The Panel recognized that a broad exemption for all modifications to contracts and subcontracts for commercial items or services could be subject to abuse. Therefore, the Panel sought to limit the recommended exemption to only those circumstances under which the contracting officer should be able to determine the reasonableness of the price of the modification by price analysis and comparison to the price(s) under the basic contract. The Panel used the term "need not be applied," rather than "shall not" both for consistency with the wording of the basic exemptions in subsection (b)(1) and to provide appropriate latitude for judgment in applying the exception by the regulators and contracting officers.

---

<sup>21</sup>See Chapter 1.1.2 of this Report.

<sup>22</sup>The recommended change appears at subsection (b)(1)(A)(ii) of the proposed statute due to the renumbering caused by Panel recommendation III.

#### IV

**Expand and clarify the exception for adequate price competition as stated in subsection (b) by adding a new subsection (b)(3).**

This amendment would remove unnecessary impediments to the use of commercial items and leading edge technology. Congress has noted that the exceptions to the requirement for cost or pricing data have not enabled DOD greater access to commercial items. For example, the Senate Armed Services Committee stated in its report on the National Defense Authorization Act for FY90 and 91:

The Truth in Negotiations Act provides that a contractor need not provide the Government certified cost or pricing data where the contract price is based upon established catalog or market prices of commercial items sold in substantial quantities to the general public. However, the committee understands that the regulations interpreting this exception create a rigid test for commerciality which in many cases creates an impediment to the purchase of commercial products.

In particular, existing regulations establish percentage tests for sale to the general public and sales at catalog prices that many commercial products cannot meet. In addition, substantial questions have been raised about the applicability of the regulations to new commercial products, old commercial products, modified commercial products, and spare parts for commercial products.<sup>23</sup>

Concern over the effect on commercial items emanates in part from Congress' stated preference for the use of such items and its repeated guidance to remove regulatory impediments.<sup>24</sup> Besides Congress, other Government agencies have expressed concern about the ability of DOD to acquire commercial items efficiently. The Department of the Navy stated:

While the Act provides for an exemption of established catalog or market prices of commercial items sold in substantial quantities to the general public, it permits no other commercial item exemptions. If the Government wants to benefit from commercial prices it must accept commercial risks. There are circumstances, such as new commercial products, that would be likely candidates for an exemption.<sup>25</sup>

---

<sup>23</sup>S. REP. NO. 81, 101st Cong., 1st Sess. 196 (1989).

<sup>24</sup>See 10 U.S.C. § 2301(b)(6); National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 824, 103 Stat. 1352, 1504-07 (1989).

<sup>25</sup>Memorandum from Dept. of the Navy, Office of the Assistant Secretary (Research, Development, and Acquisition) signed by E.G. Cammack, Director of Procurement to Department of the Air Force Deputy Assistant

Government sentiment is also shared by the private sector. Although the Council of Defense and Space Industry Associations (CODSIA), in general, opposed changing the statute, it said:

It is unlikely DOD will be able to achieve the objective of increasing its acquisition of commercial products until such time as it treats such acquisitions as exempt from the requirements for cost or pricing data.<sup>26</sup>

The Integrated Dual-Use Commercial Companies added:

The accounting man hours needed to provide cost or pricing data ... goes (sic) far beyond that which is necessary to do business in the commercial world market.<sup>27</sup>

The American Bar Association, Section of Public Contract Law, also considered that changes to TINA should be limited to those absolutely necessary to effectuate pressing priorities and that such changes should be spare, simple, and easily understood. However, the Section also stated:

While acquisition of commercial products could be substantially encouraged by appropriate changes to the procurement regulations without changes to the statute, it is our view that these changes will not be made unless they are encouraged or, in some cases, mandated by the statute.<sup>28</sup>

The language in subsection (b) of the proposed statute will enhance the Government's access to items and technology developed in commercial markets by clarifying and expanding the exemption for adequate price competition. Specifically, by permitting the contracting officer to consider the same or similar items produced under the same or similar production processes as the contractor's commercial items, proper consideration will be given to the actual operation of market forces in the determination of a fair and reasonable price. The same rationale (i.e., the actual operation of market forces) is the basis for the established catalog or market price exception.

The proposed amendment links the adequate price competition exemption more directly to the use of market research techniques. Market research can be used by the Government for the acquisition of commercial items, including items that must be modified to meet the Government's

<sup>26</sup>Letter from CODSIA signed by D. Fuqua, J.R. Iverson, K. McLennan, D.C. Heinemeier, J.R. Hogg, and J.J. Stocker to Stuart A. Hazlett (commenting on TINA issues) (Jan. 16, 1992).

<sup>27</sup>Letter from IDCC signed by G.B. Barthold and R.G. Spreng to Maj Gen John D. Slinkard, USAF (discussing differences in commercial and government procurement systems) (Feb. 13, 1992).

<sup>28</sup>Memorandum from ABA Section of Public Contract Law signed by John S. Pachter, Chair, to DOD Advisory Panel on Streamlining and Codifying Acquisition Laws, Defense Systems Management College (Re: Recommended Changes to the Truth in Negotiations Act) (Apr. 8, 1992).

needs, as well as the prices of such items and the terms and conditions under which commercial sales are made for these items.

Where the Government can be assured that it will receive a fair and reasonable price for an item, a procurement can be exempted from TINA.<sup>29</sup> The proposed amendment specifically provides that a procurement can be exempted from TINA under the adequate price competition exemption if: (1) the price is fair and reasonable, and (2) the item is to be purchased from a company or business unit that produces the same or similar item for the commercial market using the same or similar commercial production processes used to produce the offered item for the Government.

By use of the term "same or similar item," the proposed amendment recognizes the dynamics of the marketplace where commercial items are frequently undergoing changes: (1) to meet customer-specific needs; (2) to use new technologies; and (3) to incorporate so-called planned product improvements. The concept of exempting procurements from TINA based on an offer of a fair and reasonable price for "similar" items was first introduced in the National Defense Authorization Act for Fiscal Year 1991, section 803, as amended by Pub. L. No. 102-25, § 704(a)(4). In that Act, the exemption was limited to procurements under \$500,000. This proposal differs from current regulatory implementation. Current law has been interpreted to limit the adequate price competition exemption to those procurements where there is actual price competition or there is price analysis comparing prices for "the same or substantially the same items."<sup>30</sup>

As proposed, similar items may, in appropriate circumstances, include: (1) items within a defined family of products or a product line where the products share essential functional characteristics or incorporate preplanned product improvements;<sup>31</sup> (2) products that require modifications "in order to meet the requirements of the procuring agency;"<sup>32</sup> and (3) items in current production but "not yet available in the commercial market."<sup>33</sup>

The proposed amendment provides for the consideration of several different factors in determining if an item that meets the proposed criteria for the adequate price competition exemption is offered at a fair and reasonable price. Under the proposed amendment, consideration may be given to the prices of alternate items that perform the same or similar functions. This would allow the Government to compare, for example, the prices of items manufactured with new technologies or processes to items manufactured with older technologies or processes. Consideration may also be given to the prices at which the offeror has previously sold the same or similar items. This consideration could have several facets. It could allow consideration of prices of previous sales even if the previous sales: (1) were insubstantial; (2)

---

<sup>29</sup>See e.g., National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 803, 104 Stat. 1485, 1589 (1990), as amended by the Persian Gulf Conflict Supplemental Authorization and Personnel Benefits Act of 1991, Pub. L. No. 102-25 § 704(a)(4), 105 Stat. 75, 118-20.

<sup>30</sup>48 C.F.R. § 15.803-3(b).

<sup>31</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 824, 104 Stat. 1485, 1603-04 (1990).

<sup>32</sup>10 U.S.C. § 2325 (definition of nondevelopmental item).

<sup>33</sup>*Id.*

were not based on established catalog or market prices; (3) were only for similar items; or (4) were for commercial items that are no longer sold to the public. Consideration may also be given to the existing commercial practices of contractors and subcontractors. Under this last consideration, where a subcontract price is established through the use of existing vendor business relationships and pricing methodologies regularly used for commercial production, this factor may support a determination of a fair and reasonable price.

Although there may be some potential for abuse of the discretion afforded the Government by this recommendation, the increased ability to attract commercial suppliers to the defense industrial base and to benefit from the efficiencies of the commercial marketplace, outweigh what the Panel believes to be an acceptable risk. Proper management of this risk will require better training of contracting and requirements personnel in market research and price analysis techniques, as well as meaningful, thoughtful, and innovative regulatory implementation.

## V

**Insert the words "or another date agreed upon between the parties pursuant to subsection (d)(1)(B)," within subsections (d)(4)(A)(ii), (d)(4)(B)(ii), and (g).**

Language referring to timeliness elsewhere in the statute (i.e., (d)(4)(A)(ii), (d)(4)(B)(ii) and (g)) is not consistent with the definition of defective data in subsection (d)(1)(B). The proposed change provides clarity and consistency throughout the entire statute.

## VI

**Amend subsection (f) to delete detailed prescription of the right to examine contractor records under this section and to provide appropriate reference to a consolidated audit section 10 U.S.C. § 2313.**

As described in detail in Chapter 2.3 of this Report, the Panel has recommended consolidation of all audit and access to records provisions in an amended 10 U.S.C. § 2313. This recommendation provides an appropriate conforming amendment to subsection (g) of this section to eliminate redundancy, while providing appropriate clear reference to section 2313.

### **1.3.1.5. Relationship to Objectives**

These recommendations support several of the Panel's objectives. These include: facilitating the purchase by DOD or its contractors of commercial or modified commercial items and services at or based on commercial market prices; enabling companies (contractors and subcontractors) to integrate the production of both commercial and defense-peculiar products in a single business unit without altering their accounting or management procedures; and facilitating Government access to commercial technologies and skills available in the commercial marketplace to develop new technologies.

### **1.3.1.6. Proposed Statute**

#### **10 U.S.C. § 2306a. Cost or pricing data: truth in negotiations**

##### **(a) Required Cost or Pricing Data and Certification.**

(1) The head of an agency shall require offerors, contractors, and subcontractors to make cost or pricing data available as follows:

(A) An offeror for a prime contract under this chapter to be entered into using procedures other than sealed-bid procedures shall be required to submit cost or pricing data before the award of a contract if:

(i) in the case of a prime contract entered into after December 5, 1990, the price of the contract to the United States is expected to exceed \$500,000; and

(ii) in the case of a prime contract entered into on or before December 5, 1990, and ~~before January 1, 1996~~, the price of the contract to the United States is expected to exceed \$100,000.

(B) The contractor for a prime contract under this chapter shall be required to submit cost or pricing data before the pricing of a change or modification to the contract if:

(i) in the case of a change or modification made to a prime contract referred to in subparagraph (A)(i), the price adjustment is expected to exceed \$500,000;

(ii) in the case of a change or modification made after December 5, 1991, to a prime contract that was entered into on or before December 5, 1990, and that has been modified pursuant to paragraph (6), the price adjustment is expected to exceed \$500,000; and

(iii) in the case of a change or modification not covered by clause (i) or (ii), the price adjustment is expected to exceed \$100,000.

(C) An offeror for a subcontract (at any tier) of a contract under this chapter shall be required to submit cost or pricing data before the award of the subcontract if the prime contractor and each higher-tier subcontractor have been required to make available cost or pricing data under this section and

(i) in the case of a subcontract under a prime contract referred to in subparagraph (A)(i), the price of the subcontract is expected to exceed \$500,000;

(ii) in the case of a subcontract entered into after December 5, 1991, under a prime contract that was entered into on or before December 5, 1990, and that has been modified pursuant to paragraph (6), the price of the subcontract is expected to exceed \$500,000; and

(iii) in the case of a subcontract not covered by clause (i) or (ii), the price of the subcontract is expected to exceed \$100,000.

(D) The subcontractor for a subcontract covered by subparagraph (C) shall be required to submit cost or pricing data before the pricing of a change or modification to the subcontract if:

(i) in the case of a change or modification to a subcontract referred to in subparagraph (C)(i) or (C)(ii), the price adjustment is expected to exceed \$500,000; and

(ii) in the case of a change or modification to a subcontract referred to in subparagraph (C)(iii), the price adjustment is expected to exceed \$100,000.

(2) A person required, as an offeror, contractor, or subcontractor, to submit cost or pricing data under paragraph (1) (or required by the head of the agency concerned to submit such data under subsection (c)) shall be required to certify that, to the best of the person's knowledge and belief, the cost or pricing data submitted are accurate, complete, and current.

(3) Cost or pricing data required to be submitted under paragraph (1) (or under subsection (c)), and a certification required to be submitted under paragraph (2), shall be submitted:

(A) in the case of a submission by a prime contractor (or an offeror for a prime contract), to the contracting officer for the contract (or to a designated representative of the contracting officer); or

(B) in the case of a submission by a subcontractor (or an offeror for a subcontract), to the prime contractor.

(4) Except as provided under subsection (b), this section applies to contracts entered into by the head of an agency on behalf of a foreign government.

(5) For purposes of paragraph (1)(C), a contractor or subcontractor granted a waiver under subsection (b)(2) shall be considered as having been required to make available cost or pricing data under this section.

(6)(A) Upon the request of a contractor that was required to submit cost or pricing data under paragraph (1) in connection with a prime contract entered into on or before December 5, 1990, the head of the agency that entered into such contract shall modify the contract to reflect subparagraphs (B)(ii) and (C)(ii) of paragraph (1). All such modifications shall be made without requiring consideration.

(B) The head of an agency is not required to modify a contract under subparagraph (A) if that head of an agency determines that the submission of cost or pricing data with respect to that contract should be required under subsection (c).

(b) Exceptions. (1) This section need not be applied to a contract or subcontract --

~~(1)(A)~~ for which the price agreed upon is based on-

~~(A)(i)~~ adequate price competition;

~~(B)(ii)~~ established catalog or market prices of commercial items, or of services regularly used for other than Government purposes, sold in substantial quantities to the general public; or

~~(C)(iii)~~ prices set by law or regulation; or

~~(2)(B)~~ in an exceptional case when the head of the agency determines that the requirements of this section may be waived and states in writing his reasons for such determination.

(2) This section need not be applied to a modification - -

(A) to a contract or subcontract which is exempt from this section based upon paragraph (1)(A)(i) or (1)(A)(ii) provided that the contract or subcontract being modified is for a commercial item or service and the modification does not change the commercial item or service to a non-commercial item or service; or

(B) if the sole purpose of the modification is to purchase a commercial item or service.

(3) In determining the applicability of the exception in paragraph (1)(A)(i) above, to a contract or subcontract, the price for an item may be considered as based on adequate price competition if the item is purchased from a company or business unit which produces the same or similar items for the commercial market using the same or similar production processes and the price is fair and reasonable. In this case, a determination of fair and reasonable price may take into consideration (A) the price(s) of alternative items that perform the same or similar function(s), (B) the prices at which the offeror has previously sold the same or similar items or (C) in the case of a subcontract, if the prime contractor or higher tier subcontractor consistently applies established subcontractor or vendor business relationships and pricing methodologies regularly used for its commercial production.

(c) Authority To Require Cost or Pricing Data. When cost or pricing data are not required to be submitted by subsection (a), such data may nevertheless be required to be submitted by the head of the agency if the head of the agency determines that such data are necessary for the evaluation by the agency of the reasonableness of the price of the contract or subcontract. In any case in which the head of the agency requires such data to be submitted under this subsection, the head of the agency shall document in writing the reasons for such requirement.

(d) Price Reductions for Defective Cost or Pricing Data. (1)(A) A prime contract (or change or modification to a prime contract) under which a certificate under subsection (a)(2) is required shall contain a provision that the price of the contract to the United States, including profit or fee, shall be adjusted to exclude any significant amount by which it may be determined by the head of the agency that such price was increased because the contractor (or any subcontractor required to make available such a certificate) submitted defective cost or pricing data.

(B) For the purposes of this section, defective cost or pricing data are cost or pricing data which, as of the date of agreement on the price of the contract (or another date agreed upon between the parties), were inaccurate, incomplete, or noncurrent. If for purposes of the preceding sentence the parties agree upon a date other than the date of agreement on the price of the contract, the date agreed upon by the parties shall be as close to the date of agreement on the price of the contract as is practicable.

(2) In determining for purposes of a contract price adjustment under a contract provision required by paragraph (1) whether, and to what extent, a contract price was increased because the contractor (or a subcontractor) submitted defective cost or pricing data, it shall be a defense that the United States did not rely on the defective data submitted by the contractor or subcontractor.

(3) It is not a defense to an adjustment of the price of a contract under a contract provision required by paragraph (1) that-

(A) the price of the contract would not have been modified even if accurate, complete, and current cost or pricing data had been submitted by the contractor or subcontractor because the contractor or subcontractor-

(i) was the sole source of the property or services procured; or

(ii) otherwise was in a superior bargaining position with respect to the property or services procured;

(B) the contracting officer should have known that the cost and pricing data in issue were defective even though the contractor or subcontractor took no affirmative action to bring the character of the data to the attention of the contracting officer;

(C) the contract was based on an agreement between the contractor and the United States about the total cost of the contract and there was no agreement about the cost of each item procured under such contract; or

(D) the prime contractor or subcontractor did not submit a certification of cost and pricing data relating to the contract as required under subsection (a)(2).

(4)(A) A contractor shall be allowed to offset an amount against the amount of a contract price adjustment under a contract provision required by paragraph (1) if-

(i) the contractor certifies to the contracting officer (or to a designated representative of the contracting officer) that, to the best of the contractor's knowledge and belief, the contractor is entitled to the offset; and

(ii) the contractor proves that the cost or pricing data were available before the date of agreement on the price of the contract (or price of the modification) (or another date agreed upon between the parties pursuant to paragraph (1)(B)) and that the data were not submitted as specified in subsection (a)(3) before such date.

(B) A contractor shall not be allowed to offset an amount otherwise authorized to be offset under subparagraph (A) if-

(i) the certification under subsection (a)(2) with respect to the cost or pricing data involved was known to be false when signed; or

(ii) the United States proves that, had the cost or pricing data referred to in subparagraph (A)(ii) been submitted to the United States before the date of agreement on the price of the contract (or price of the modification) (or another date agreed upon between the parties pursuant to paragraph (1)(B)), the submission of such cost or pricing data would not have resulted in an increase in that price in the amount to be offset.

(e) Interest and Penalties for Certain Overpayments. (1) If the United States makes an overpayment to a contractor under a contract with the Department of Defense subject to this section and the overpayment was due to the submission by the contractor of defective cost or pricing data, the contractor shall be liable to the United States-

(A) for interest on the amount of such overpayment, to be computed-

(i) for the period beginning on the date the overpayment was made to the contractor and ending on the date the contractor repays the amount of such overpayment to the United States; and

(ii) at the current rate prescribed by the Secretary of the Treasury under section 6621 of the Internal Revenue Code of 1986; and

(B) if the submission of such defective data was a knowing submission, for an additional amount equal to the amount of the overpayment.

(2) Any liability under this subsection of a contractor that submits cost or pricing data but refuses to submit the certification required by subsection (a)(2) with respect to the cost or pricing data shall not be affected by the refusal to submit such certification.

(f) Right of United States To Examine Contractor Records. For the purpose of evaluating the accuracy, completeness, and currency of cost or pricing data required to be submitted by this section, the head of the agency shall have the audit rights provided by subsection (a)(2) of section

~~2313 of this title. (1) For the purpose of evaluating the accuracy, completeness, and currency of cost or pricing data required to be submitted by this section with respect to a contract or subcontract, the head of the agency, acting through any authorized representative of the head of the agency who is an employee of the United States or a member of the armed forces, shall have the right to examine all records of the contractor or subcontractor related to~~

~~(A) the proposal for the contract or subcontract;~~

~~(B) the discussions conducted on the proposal;~~

~~(C) pricing of the contract or subcontract; or~~

~~(D) performance of the contract or subcontract.~~

~~(2) The right of the head of an agency under paragraph (1) shall expire three years after final payment under the contract or subcontract.~~

~~(3) In this subsection, the term "records" includes books, documents, and other data.~~

(g) Cost or Pricing Data Defined. In this section, the term "cost or pricing data" means all facts that, as of the date of agreement on the price of a contract (or the price of a contract modification) or another date agreed upon between the parties pursuant to subsection (d) (1) (B), a prudent buyer or seller would reasonably expect to affect price negotiations significantly. Such terms does not include information that is judgmental, but does include the factual information from which a judgment was derived.

~~Section 803 of the National Defense Authorization Act for Fiscal Year 1991 (P.L. 101-510; 104 Stat. 1589), as amended by sec. 704(a)(4) of P.L. 102-25 and by section 804(e)(2) of P.L. 102-190, provides:~~

#### ~~SEC. 803. CERTIFIED COST OR PRICING DATA THRESHOLD~~

~~(a) Increase in Threshold for Certified Cost or Pricing Data. (1) [amended section 2306a(a)(1)]~~

~~(b) Review by Inspector General of the Department of Defense. (1) After the increase in the threshold for submission of cost or pricing data under section 2306a(a) of title 10, United States Code (as amended by subsection (a)) has been in effect for three years, the Inspector General of the Department of Defense shall conduct a review of the effects of the increase in the threshold.~~

~~(2) The review shall address whether increasing the threshold has improved the acquisition process in terms of reduced paperwork, financial or other savings to the government, an increase in the number of contractors participating in the defense contracting process, and the adequacy of information available to contracting officers in cases in which certified cost or pricing data are not required under section 2306a.~~

~~(3) The Inspector General of the Department of Defense shall submit to the Secretary of Defense a report on the review conducted under paragraph (1). The Secretary of Defense shall submit such report to Congress, along with such comments as the Secretary considers appropriate, upon completion of the report (and comments) but not later than the date on which the President submits the budget to Congress pursuant to section 1105 of title 31, United States Code, for fiscal year 1996.~~

~~(e) Regulations for Below-Threshold Procurements. (1) The Secretary of Defense shall prescribe regulations identifying the type of procurements for which contracting officers should consider requiring the submission of certified cost or pricing data under section 2306a(e) of title 10, United States Code.~~

~~(2) The Secretary also shall prescribe regulations concerning the types of information that offerors must submit for a contracting officer to consider in determining whether the price of a procurement to the Government is fair and reasonable when certified cost or pricing data are not required to be submitted under section 2306a of such title because the price of the procurement to the United States is not expected to exceed \$500,000. Such information, at a minimum, shall include appropriate information on the prices at which such offeror has previously sold the same or similar products.~~

~~(3) The regulations required under this subsection shall be prescribed not later than six months after [November 5, 1990].~~

~~(d) Documentation of Submissions Under Section 2306a(e). [amends section 2306a(e)].~~

## **1.4. Research And Development**

### **1.4.0. Introduction**

The nineteen statutes analyzed in this subchapter provide the general statutory framework for research and development. All but four service-specific statutes, sections 4503 (Army), 9503 (Air Force), 7303 (Navy), and 7522 (Navy) are currently included in Chapter 139 of Title 10, Research and Development. Certain sections of Chapter 139 were considered to be more closely related to the responsibilities of other working groups and are included in other chapters of this Report.<sup>1</sup> There are clearly many other statutes in Title 10, such as those in Chapter 144, Major Defense Acquisition Programs, as well as statutes of general applicability to all procurements that impact the research and development process. These are analyzed and reported by the Panel under their appropriate chapter headings.

The Panel solicited in writing comments from a wide array of Government and private sector entities, conducted its own analyses, and discussed specific issues with appropriate research and development management and contracting personnel. In general, the Panel concluded that most of these statutes are necessary, are serving their intended purposes, and are not causing significant problems in the acquisition of research and development. However, the Panel did identify opportunities to improve consistency and clarity within and between statutes, and recommended for repeal two statutes that are specific to individual services. Another service-specific statute should be refocused in its remaining purpose, the international exchange of scientific personnel, and amended to apply throughout DOD.<sup>2</sup>

The Panel's most important recommendation on these research and development statutes is to significantly amend section 2358, "Research projects," to clarify that advanced, as well as basic and applied, research and development should be included in the scope of authority granted in the statute and that these authorities should be clearly provided to both the Secretary of Defense and the Secretaries of the military departments. Implementation of this recommendation will make section 2358 the fundamental statute providing authority for performing research and development projects. Implementation will also permit the Panel's recommended repeal of sections 4503 and 9503, both titled "Research and development programs," which are service-specific statutes that grant broad authority to the secretaries of the Army and Air Force, respectively. As part of this overall recommendation to clarify and consolidate, the Panel has recommended rewording section 2358(b) to ensure that the public works responsibilities of the Army Corps of Engineers are included within the statute's requirement that a research project or study have a potential relationship to a military function or operation.

---

<sup>1</sup>See Chapter 3.2 of this Report, Testing (Streamlined statute & Individual amendments), for sections 2362 and 2366 concerning testing of wheeled or tracked armored vehicles and survivability and lethality testing; and Chapter 2.1, Contract Payment, for section 2355 on vouchering; and Chapter 3.9 of this Report, Miscellaneous, for section 2369 on product evaluation.

<sup>2</sup>See Chapter 3.3 of this Report for analysis and recommendations to amend and redesignate section 7203, "Scientific investigations and research."

The Panel has made a closely related recommendation to amend section 2371, "Advanced research projects: cooperative agreements and other transactions," to delete "advanced research projects" from the title and delete subsection (a), which provides authority to the Secretary of Defense (to be exercised through DARPA) and to the Secretaries of the military departments. This authority would be redundant with section 2358 when amended as recommended by the Panel. The net effect is to amend section 2371 to focus its necessary and very useful provisions more clearly on the use of cooperative agreements and other transactions for research and development.

The Panel recommends making two amendments to section 2356, "Contracts and delegations." First, the Secretary of a military department would be permitted to delegate the authorities in that section to a Deputy Assistant Secretary, in addition to the officials already listed. Second, subsection (b) would be deleted since it is redundant with general authorities in Chapter 137, including authorities to delegate.

As part of its recommendations to simplify and clarify, the Panel also recommends changing section 2364, "Coordination and communication of defense research activities," to delete specific references to, and definitions of, acquisition program milestones. Such deletion will not alter one of the section's purposes: namely, ensuring that the latest technology position papers and assessments are considered in acquisition program decisions.

The Panel recommends retention of two research and development statutes that Congress has recently amended. Section 2352, "Contracts: notice to Congress required for contracts performed over a period exceeding ten years," was changed in 1991 and, in the view of the Panel, provides an appropriate balance between the potential need for long-term contracts and Congressional oversight to prevent abuse. Section 2372, "Independent research and development and bid and proposal costs: payments to contractors," was fundamentally changed in 1991 to provide for full allowability of independent research and development (IR&D)/bid and proposal (B&P) costs, after a three-year transition period, provided those costs are allocable and reasonable and not otherwise unallowable by law or regulation. The Panel believes that this statute, now being implemented in its transition period, represents a reasoned and enlightened balance between the need of the Government to control costs and its need to support new technology and the industrial base.

When the Panel initially analyzed section 2365, "Competitive prototype strategy requirement: major defense programs," the section was no longer in effect because its sunset date of September 30, 1991, had passed. The Panel's clear consensus was that it should be deleted from the code and not reinstated, even though the Panel was aware that Congress was considering reinstating or amending the statute. The Panel reasoned that the specific requirement for competitive prototyping, with exceptions requiring written Congressional notification, was redundant with normal Congressional oversight and constituted a requirement for a single preferred approach outside the planning context of the overall acquisition strategy of a major weapons system program. The Panel believed, and still believes, that in an environment of reduced budgets, fewer new start programs, and greater reliance on modifications and upgrades

of existing systems, it is unlikely that competitive prototyping will be affordable as the legislated norm.

During the Panel's deliberations, the 1993 defense authorization act was passed,<sup>3</sup> in which section 2365 was repealed and replaced by section 2438, "Major programs: competitive prototyping." Because of the change in location and its close relationship to section 2439, "Major programs: competitive alternative sources," the Panel's analyses and recommendations to repeal the new section 2438 are presented in Chapter 3.1, Major Systems.

The Panel recommends retaining or making minor amendments to the balance of the statutes under research and development except in two cases. For these two laws, the Panel recommends "no action" because they are not primarily about the acquisition process. A separate analysis of each of these sections, along with detailed analyses of those sections specifically discussed in the narrative above, is included in this subchapter.

<sup>3</sup>National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 821, 106 Stat. 2315, 2459-60 (1992).

## **1.4.1. 10 U.S.C. § 2351**

### **Availability of appropriations**

#### **1.4.1.1. Summary of the Law**

This law provides that funds appropriated to DOD for research and development (R&D) are available for obligation for a period of two consecutive years. The law also delineates purposes for which R&D funds may be available. These are for (1) acquisition or construction by, or furnishing to, a contractor of research, developmental, or test facilities and equipment determined to be necessary for the performance of the contract, and (2) purposes related to R&D for which Congress has made specific appropriations for DOD.

#### **1.4.1.2. Background of the Law**

This provision was originally enacted in 1982 and codified at 10 U.S.C. § 2361.<sup>1</sup> It was redesignated 10 U.S.C. § 2351 in 1988 when the provisions found at 10 U.S.C. § 2351(b) were added.<sup>2</sup> A previous 10 U.S.C. § 2351, entitled "Policy, plans and coordination," establishing the responsibilities of the Secretary of Defense in the R&D area, had been repealed in 1958.<sup>3</sup> There does not appear to be a specific reason that two years was chosen for the length of this appropriation.

#### **1.4.1.3. Law in Practice**

The law provides that money appropriated for R&D during one fiscal year is available for obligation during that fiscal year and the following fiscal year. Money appropriated for R&D in FY92, for example, is available for obligation during both FY92 and FY93 and may be obligated against requirements that arise in either FY92 or FY93.

The effect of the two-year life of the money is that longer term R&D efforts may be funded with an appropriation over a two-year period incrementally. Under current statutes, R&D funds continue in an expired status for five years after their availability for obligation ends.<sup>4</sup>

#### **1.4.1.4. Recommendation and Justification**

##### **Retain**

Requests for comments produced two suggestions. The first was that although the two-year period for obligation is reasonable, the period for expenditure of these funds should be

---

<sup>2</sup> Codification of Military Laws Act of 1988, Pub. L. No. 100-370, § 1(g)(1), 102 Stat. 840, 846.

<sup>3</sup> Department of Defense Reorganization Act of 1958, Pub. L. No. 85-599, § 3(d), 72 Stat. 514, 516.

<sup>4</sup> 31 U.S.C. § 1552(a).

increased to ten years after the obligation authority ceases. Currently, the expenditure period is limited by 31 U.S.C. § 1552a to five years after the availability for obligation ends. The belief was that such a time frame would more easily accommodate close-out of R&D contracts, which may run for up to 10 years.<sup>5</sup>

While an extended period for expenditure of properly obligated funds is a suggestion with merit, there is no compelling justification to rewrite this statute to achieve that goal. Instead, the overall funds availability issue needs to be addressed. The Panel has done so in Chapter 3.8.16 of this Report.

The second suggestion focused on making R&D funds available for obligation for three years, so as to be consistent with the availability for obligation of production funds.<sup>6</sup> The Panel believes the differences between incremental funding for R&D contracting and full funding for production are sufficient to warrant the existing difference in obligation periods.

#### **1.4.1.5. Relationship to Objectives**

The statute is consistent with the Panel's objectives of promoting financial integrity in ways that are simple and understandable, and in identifying fundamental requirements without including detailed implementing methodology.

## **1.4.2. 10 U.S.C. § 2352**

### **Contracts: notice to Congress required for contracts performed over period exceeding ten years**

#### **1.4.2.1. Summary of the Law**

This statute establishes a requirement for the military department concerned to notify Congress whenever a research and development (R&D) contract is expected, at the time of award, or as the result of a modification, to be performed over a period exceeding ten years from the date of initial contract award, or performance of the contract exceeds ten years and no notice has been previously provided to Congress. To meet the notice requirement, the military department must identify the contract, state the date of initial award, and state the period of time over which performance is expected. Notice is required to be submitted not later than 30 days after award or modification of a contract for which period of performance is expected to exceed ten years, or the date upon which contract performance exceeds ten years for all other contracts.

#### **1.4.2.2. Background of the Law**

In 1991, the text of the prior 10 U.S.C. § 2352 was completely replaced by the current language.<sup>1</sup> Under the prior section 2352, military departments were authorized to enter into five-year R&D contracts with provision for an extension of up to five years.<sup>2</sup> This legislation came about as a result of a recognition that R&D contracting was a long term activity, and the ability to enter into longer term agreements was advantageous to both the Government and the contractor. The current change came about as the Administration sought relief from Congress as two Air Force R&D contracts, for the B-2 and C-17 aircraft, approached the 10-year limit.<sup>3</sup> Coupled with this was the apparent acceptance that adherence to the prior statutory scheme would not only defeat the purposes of long term R&D contracting but could also increase costs through termination expenses. A further concern was the difficulty associated with the transfer of complex R&D efforts from an expiring contract to a new contract late in the performance period.

#### **1.4.2.3. Law in Practice**

As the current text of this section is new,<sup>4</sup> there is no empirical data to judge its impact or effectiveness. By eliminating a maximum time period for R&D contracting, appropriate discretion is provided officials to take advantage of opportunities for complex R&D efforts. This discretion

<sup>1</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 803, 105 Stat. 1290, 1415 (1991).

<sup>2</sup>Act of July 16, 1952, Pub. L. No. 82-557 § 3, 66 Stat. 687, 723 (1952). Codified by Act of Aug. 10, 1956, Pub. L. No. 84-1028, § 1, 70A Stat. 134, 725.

<sup>3</sup>56 Fed. Cont. Rep. 321 (1991).

<sup>4</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 803, was effective Oct. 31, 1991.

is not unfettered, however, as the notification provision, authorization and appropriation process, and regulatory restraints will combine to provide oversight to prevent abuse.

#### **1.4.2.4. Recommendation and Justification**

##### **Retain**

One recommendation was received. That recommendation would permit modifications which "consist solely of new procurement," supported by J&As, not to trigger the notification requirement unless the performance period of the new work exceeds ten years.<sup>5</sup> The Panel believes a modification involving significant new work which could be characterized as "new procurement" should normally be a separate procurement and not a modification. Even where a modification is appropriate, the Panel believes there is no compelling reason not to make the required notification.

#### **1.4.2.5. Relationship to Objectives**

Retention of the current statute is appropriate because it identifies the fundamental requirements to be achieved and does not include detailed implementing requirements.

---

<sup>5</sup>Letter from Headquarters Air Force Systems Command, signed by Anthony J. Perfilio, Command Counsel, to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (May 27, 1992).

### **1.4.3. 10 U.S.C. § 2353**

#### **Contracts: acquisition, construction, or furnishing of test facilities and equipment**

##### **1.4.3.1. Summary of the Law**

This statute permits a contract for research and development to include provisions for either the construction by, or furnishing to, the contractor of research, developmental, or test facilities and equipment determined to be necessary for the performance of the contract. Such facilities, equipment, and housing may be lent or leased to the contractor (with or without reimbursement) or sold to the contractor at fair market value. This provision does not authorize new construction or improvements having general utility.<sup>1</sup>

The provision precludes installation or construction of facilities, not readily removable or separable without unreasonable expense or loss of value, on property not owned by the United States unless one of three conditions is met. These conditions are that the contract contain: (1) a provision for reimbursing the United States for fair market value of the facility at the time of contract completion or termination, or reasonably thereafter; (2) a provision stating that the United States has an option to acquire the underlying land; or (3) alternative provisions determined to be adequate by the Secretary concerned to protect the interests of the United States.<sup>2</sup>

Except as otherwise provided by law with respect to property acquired by the contractor, proceeds from sales or reimbursements under this section will be deposited into the Treasury as miscellaneous receipts.<sup>3</sup>

##### **1.4.3.2. Background of the Law**

This section originated in 1952.<sup>4</sup> The basis for the statute was wartime experience which indicated that contractors often required special facilities for contract performance. Options were to either have the contractors build the facility and include the costs in the contract, or to have the Government acquire or build a facility and retain rights to it after contract completion. The latter was chosen.<sup>5</sup>

---

<sup>1</sup>10 U.S.C. § 2353(a).

<sup>2</sup>10 U.S.C. § 2353(b).

<sup>3</sup>10 U.S.C. § 2353(c).

<sup>4</sup>Act of July 16, 1952, Pub. L. No. 82-557, 66 Stat. 687.

<sup>5</sup>S. REP. NO. 936, 82d Cong., 1st Sess. 3, 4 (1951).

The section was recodified at its current location without substantive change in 1956.<sup>6</sup> A note to this section permitted appropriations for research and development to be used for the purposes of this section.<sup>7</sup> That was repealed and the authority restated in 10 U.S.C. § 2351(b).<sup>8</sup>

#### **1.4.3.3. Law in Practice**

FAR Part 36 deals with construction contracts. FAR 45.309 appears to implement this statute insofar as utilization of Government property is concerned. There is no required clause nor any reference to the lease or sale provisions of this statute in the FAR. The DFARS does not contain supplemental coverage.

Implementation of this statute permits that which might otherwise be military construction, and funded as such, to be accomplished using research and development funds. This authority carries with it the proviso that the facility in question must be in direct support of a research and development program and is not a general utility facility. This provides great leeway in the construction of R&D facilities. Congressional notification is required.<sup>9</sup>

#### **1.4.3.4. Recommendation and Justification**

##### **Retain**

Three responses were received on this provision, all of which addressed the issue of where the proceeds from sales or reimbursements should go. One suggested that they be credited to the appropriation of the year originally charged.<sup>10</sup> A second suggested that such monies be used to further similar research,<sup>11</sup> and the third suggested no change.<sup>12</sup>

The first suggestion was not adopted for two reasons. First, with limited access to funds for either obligation or expenditure,<sup>13</sup> it is unlikely that the funds could be used as the suggestion intended. Second, it would be hard, if not impossible, to track funds to specific contractual efforts, some of which may be closed at the time of the sale or reimbursement. The second suggestion, for further research, may have merit but is beyond the scope of the Panel's effort.

Others may wish to consider the sponsorship of legislation to create a special account for research whose funds could come from these activities.

#### **1.4.3.5. Relationship to Objectives**

This statute supports the Panel's objectives associated with promoting financial integrity and identifying broad policy objectives, while reserving the implementing methodology to the regulations.

#### 1.4.4. 10 U.S.C. § 2354

### **Contracts: indemnification provisions**

#### 1.4.4.1. Summary of the Law

This statute provides that the Secretary of a military department may approve in contracts for research or development, or both, provisions to indemnify contractors for claims by third parties, or loss and damage to contractor property, that arise out of direct contract performance and which are not compensated by insurance or otherwise. For the purpose of the statute, the claims involved are those for death, bodily injury, or loss or damage to property from a risk the contract has defined as unusually hazardous. Similarly, any loss or damage to contractor property must also result from a risk which the contract has defined as unusually hazardous.

The statute requires that contracts which contain indemnification provisions must provide for notice to the United States and that the United States have control or assistance in defense of any suit or claim (at the Government's election). Payment cannot be made unless the Secretary or a designee certifies the amount as just and reasonable. Such payments may be made from one of three sources: funds obligated for the contract's performance, otherwise unobligated research and development funds, or funds specifically appropriated for the payments.

#### 1.4.4.2. Background of the Law

This section originated in 1952.<sup>1</sup> The basis for the statute was a belief that contractors would be reluctant to undertake research or development contracts involving extremely hazardous new developments without securing adequate protection in the event of liability claims. There was, and continues to be, no capacity to include a reserve in the contract price. Additionally, there was the perception that the cost of insurance would be prohibitive. As a result, indemnification was developed as the solution.<sup>2</sup> The section was recodified at its current location without substantive change in 1956.<sup>3</sup>

This statute preceded 50 U.S.C. § 1431, *et seq.*<sup>4</sup> and its implementing Executive Order No. 10789.<sup>5</sup>

#### 1.4.4.3. Law in Practice

DFARS 235.070 provides regulatory implementation of 10 U.S.C. § 2354. These provisions account for situations where indemnification is predicated upon either 10 U.S.C. §

<sup>1</sup>Act of July 16, 1952, Pub. L. No. 82-557, § 5, 66 Stat. 687, 726.

<sup>2</sup>S. REP. No. 936, 82d Cong., 1st Sess. 4 (1951).

<sup>3</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1028, ch. 1041, 70A Stat. 134.

<sup>4</sup>Act of Aug. 28, 1958, Pub. L. No. 85-804, § 1, 72 Stat. 972. See Chapter 2.7 of this Report for analysis of indemnification under 50 U.S.C. § 1431, *et seq.*

<sup>5</sup>Exec. Order No. 10789, as amended on Nov. 14, 1958.

2354 alone or in combination with indemnification under Pub. L. No. 85-804 (50 U.S.C. § 1431 *et seq.*).<sup>6</sup> There are two separate clauses for use in instances where indemnification provisions are appropriate. DFARS 252.235-7000 is applicable to fixed price contracts, while 252.235-7001 applies to cost reimbursement contracts.<sup>7</sup>

The clauses are identical except as follows. The fixed price clause has a provision requiring the contractor to purchase insurance, and, in the event the cost of such insurance is higher than the cost of the insurance the contractor had in effect on the date of the contract, the Government will reimburse the difference.<sup>8</sup> The cost reimbursement clause contains one provision making the Limitation of Funds clause inapplicable to these obligations<sup>9</sup> and another provision specifying that claim, loss, or damage must have occurred during the period of contract performance or be the result of contract performance.<sup>10</sup>

#### **1.4.4.4. Recommendation and Justification**

##### **Retain**

The Panel received no comments suggesting a revision to this statute. The Panel believes the purpose of the statute remains valid, that the statute is working as intended, and therefore recommends no change.

Any changes to this statute which reduced the Government's ability to indemnify contractors would likely increase costs of R&D, as contractors would be forced to either seek out insurers willing to cover the risks, or become self-insurers with large reserves. Either of these would cause R&D, particularly in the areas of propellants and nuclear research, to become prohibitively expensive or impossible to accomplish.

#### **1.4.2.5. Relationship to Objectives**

This statute meets the Panel's objectives of promoting development of the industrial base, encouraging the exercise of sound judgment by acquisition personnel, and promoting balance between an efficient process and full and open access to the procurement system.

---

<sup>10</sup>DFARS 252.235-7001(h).

## 1.4.5. 10 U.S.C. § 2356

### Contracts: delegations

#### 1.4.5.1. Summary of the Law

This statute provides specific authority for the Secretary of a military department to delegate authority under 10 U.S.C. §§ 1584, "Employment of non-citizens," 2353, "Contracts: acquisition, construction, or furnishing of test facilities and equipment," 2354, "Contracts: indemnification provisions," or 2355, "Contracts: vouchering procedures," to the Under Secretary, Assistant Secretary, or the chief and one assistant to the chief of any technical service, bureau, or office within his department. This authority does not extend to the delegation of approval authority for alternative provisions under 10 U.S.C. § 2353(b)(3). The statute permits further delegations of the authority to negotiate and administer R&D contracts. Negotiation is defined as "make without a solicitation for sealed bids" as used in Title 10, Chapter 137.<sup>1</sup>

#### 1.4.5.2. Background of the Law

This section was enacted as part of an omnibus R&D statute entitled, "Army, Navy and Air Force Departments--Research and Development."<sup>2</sup> Delegation authority previously existed, including specific delegation authority in the areas of extending R&D contracting and creating advisory committees and panels.<sup>3</sup> It was thought that such delegations were normal and considered essential to achieving necessary facility and flexibility of operation.<sup>4</sup>

The statute is substantially the same as the original. However, the current language in subsection (b) dealing with "solicitation for sealed bids" brings prior language into conformity with Title 10, Chapter 137.<sup>5</sup> In addition, although the original statute did not define "negotiate" as does the current version, such a definition had its origins in the 1956 codification.<sup>6</sup>

#### 1.4.5.3. Law in Practice

Delegation of authority is addressed elsewhere in Title 10. Specifically, 10 U.S.C. § 2311 provides for delegation from the head of an agency to another officer or official any power under "this chapter" (10 U.S.C. § 2301 *et seq.*).<sup>7</sup>

These authorities do not overlap. The delegation authority in 10 U.S.C. § 2356(a) deals with policy matters, such as to whom authority to permit indemnification provisions may be

<sup>1</sup>Chapter 137 is "Procurement Generally."

<sup>2</sup>Act of July, 16, 1952, Pub. L. No. 82-557, ch. 882, § 7, 1952 U.S.C.C.A.N. (66 Stat.) 687, 688.

<sup>3</sup>The authority regarding facilities was somewhat narrower than current.

<sup>4</sup>S. REP. NO. 936, 82d Cong., 1st Sess. 5 (1951).

<sup>5</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2727(d), 98 Stat. 1175, 1195.

<sup>6</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1058, 70A Stat. 134, 135.

<sup>7</sup>Reference is to chapter 137 of Title 10. The authority under 10 U.S.C. § 2304(c)(7) is not delegable.

delegated. This contrasts with the general delegation authority in 10 U.S.C. § 2311, which permits delegation of appropriate authority for formation of contracts, including those for R&D.<sup>8</sup>

#### **1.4.5.4. Recommendations and Justification**

##### **I**

**Amend subsection (a) to permit the Secretary of the military department to delegate the authorities in this section to a Deputy Assistant Secretary of the department.**

This recommendation would expand the number of positions to which these powers may be delegated. This would expand the authority of the Deputy Assistant Secretaries and thus provide for decision making at a lower level, contributing to streamlining and efficiency.

##### **II**

**Delete reference to 10 U.S.C. § 2355 in subsection (a).**

This provides conformity with the Panel's recommendation at Chapter 2.1.2 of this Report to delete that section of Title 10.

##### **III**

**Delete subsection (b).**

Subsection (b) of the statute does not appear to provide additional, useful authority, and is confusing. The specific authority to administer and negotiate contracts conveys upon a group of people authority which they would otherwise have inherent in their position (vis-a-vis administration) or is not necessary (vis-a-vis "negotiate"). The "power" identified in subsection (b) has been superseded by the Competition in Contracting Act (CICA).<sup>9</sup> The reference to the power to negotiate contracts is unnecessary and confusing because it is a carryover from the pre-CICA situation, where contracts were to be awarded using formal advertising procedures unless negotiation could be justified.

#### **1.4.5.5. Relationship to Objectives**

These changes increase authority at lower levels and eliminate unnecessary and duplicative authorities, thereby increasing efficiency and streamlining.

---

<sup>8</sup>The FAR and DFARS cover various delegations; for example, full and open competition is covered in FAR Part 6 and DFARS Part 206. See Chapter 1.6.1 of this Report for analysis of section 2311.

<sup>9</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2723, 98 Stat. 1175.

#### 1.4.5.6. Proposed Statute

##### 10 U.S.C. § 2356. Contracts: delegations

(a) The Secretary of a military department may delegate any authority under section 1584, 2353, ~~or 2354, or 2355~~ of this title to-

~~(1)(a)~~ the Under Secretary of his department;

~~(2)(b)~~ an Assistant Secretary of his department; or

~~(3)(c)~~ a Deputy Assistant Secretary of his department; or

(d) the chief, and one assistant to the chief, of any technical service, bureau, or office.

However, the authority of the Secretary under section 2353(b)(3) of this title may not be delegated to a person described in clause ~~(3)~~ (d) of this subsection.

~~(b) Subject to other provisions of law, the power to negotiate and administer contracts for research or development, or both, may be further delegated. In this section, the term "negotiate" means make without a solicitation for sealed bids under chapter 137 of this title.~~

## 1.4.6. 10 U.S.C. § 2358

### Research projects

#### 1.4.6.1. Summary of the Law

This section permits the Secretary of Defense, subject to the approval of the President, to engage in basic and applied research projects necessary to DOD responsibilities in the field of basic and applied research and development and which relate to weapon systems and other military needs. Such projects may be through contracts or grants to: educational or research institutions, private businesses, other United States agencies, one or more of the military departments, or DOD employees or consultants. No funds appropriated to DOD may be used to fund a research project or study unless that project has a "potential relationship to a military function or operation."

#### 1.4.6.2. Background of the Law

This section, minus the grant authority and funding limitation, was originally included in the DOD Reorganization Act of 1958.<sup>1</sup> The Supplemental Military Construction Act of 1958 provided for a limited grant authority.<sup>2</sup> The legislative history makes reference to this provision and expands upon the authority in the interest of giving the Secretary of Defense "as great freedom as possible in this area."

Because the Federal Grant and Cooperative Agreement Act of 1977<sup>3</sup> repealed the broad grant authority provided in 42 U.S.C. § 1891, doubt was generated as to the extent to which DOD could use grants for basic and applied research.<sup>4</sup> To dispel this doubt, Congress decided to specifically authorize use of grants and did so in 1981.<sup>5</sup> According to the committee report,

[t]he committee view[ed] grants as an important means of funding research activities with educational or research institutions, private businesses [sic] and individual researchers and believe[d] that this authority should be clearly available to the Department of Defense. . . . [T]his section would authorize the use of grants in addition to contracts, thereby providing clear statutory authorization for grants.<sup>6</sup>

---

<sup>1</sup>Department of Defense Reorganization Act of 1958, Pub. L. No. 85-599, § 9(a), 72 Stat. 514. See H.R. REP. NO. 1765, 85th Cong., 2d Sess. 20 (1958). This section was recodified as 10 U.S.C. § 2358 in 1962. Act of Sep. 7, 1962, Pub. L. No. 87-651, § 208(a), 76 Stat. 506, 523.

<sup>2</sup>Pub. L. No. 85-325, § 7, 72 Stat. 11.

<sup>3</sup>Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224, 92 Stat. 3 (1978).

<sup>4</sup>H.R. REP. NO. 71 (III), 97th Cong., 1st Sess. 14 (1981).

<sup>5</sup>Department of Defense Authorization Act, 1982, Pub. L. No. 97-86, § 910, 95 Stat. 1084, 1120 (1981).

<sup>6</sup>See note 4, *supra*.

The funding restriction contained in subsection (b) was added in 1988.<sup>7</sup>

#### **1.4.6.3. Law in Practice**

Research and development contracts are covered under FAR Part 35. Basic and applied research are defined in the FAR, as is development. The concept of "advanced research" is not statutorily defined.<sup>8</sup> The FAR recognizes that R&D contracts are directed toward work or methods which cannot be precisely defined in advance. A goal of contracting in this area is to provide an environment where work can be done with flexibility and minimum administrative burden.<sup>9</sup> Contracts should be used when the end product is of direct benefit to the Federal Government; grants should be used when the transaction is to support or stimulate R&D for another public purpose.<sup>10</sup> A series of DOD Directives governs the formation and administration of grants.<sup>11</sup>

#### **1.4.6.4. Recommendations and Justification**

##### **I**

**Amend subsection (a) to include authority to engage in advanced research.**

##### **II**

**Amend subsection (a) to eliminate the language, "subject to approval by the President."**

##### **III**

**Amend subsection (a)(1) to include the ability to use cooperative agreements or other transactions for research and development projects.**

##### **IV**

**Amend the section to give specific statutory authority to the Secretaries of the military departments to engage in research and development projects.**

---

<sup>7</sup>Codification of Military Laws Act of 1988, Pub. L. No. 100-370, § 1(g)(3), 102 Stat. 840, 847. This superseded Pub. L. No. 91-441, § 204, 84 Stat. 905, 908 (1970), which contained similar provisions and appeared as a note to this section. This provision of Pub. L. No. 91-441 was repealed by Pub. L. No. 101-510, § 624(b), 104 Stat. 1485, 1604 (1990).

<sup>8</sup>The reference in 10 U.S.C. § 2371 is without further definition. DFARS Part 235.001 discusses advanced development.

<sup>9</sup>48 C.F.R. § 35.002.

<sup>10</sup>*Id.* at section 35.003.

<sup>11</sup>See generally DOD Directives 3210.1, .2, and .6.

One comment pointed out that advanced research was covered by another statute, 10 U.S.C. § 2371; that this statute did not specifically authorize use of contracts and grants; and that cooperative agreements were not authorized under 10 U.S.C. § 2358, but were authorized under 10 U.S.C. § 2371.<sup>12</sup> Another comment indicated concern over the limitation on delegation authority through the statute's language, "subject to the approval of the President."<sup>13</sup> Both of these comments are meritorious and the Panel recommends revisions to the statute accordingly.

Adoption of the first comment would expand the ability to accomplish advanced research by clearly providing authority for use of contracts and grants as vehicles to obtain advanced research. Additionally, it would permit the use of cooperative agreements and other transactions as vehicles for basic, advanced, and applied research. The authority for cooperative agreements and other transactions is presently found in 10 U.S.C. § 2371.<sup>14</sup> The cooperative agreements referenced are those in 31 U.S.C. § 6305. The term "other transactions" is not defined in section 2371. However, it appears to permit certain consortium type agreements, which do not have a specific statutory authority elsewhere.

The Army was concerned with the words "subject to the approval of the President" in section 2358(a). These words invoke the limitation in 3 U.S.C. § 301 on delegation authority. Thus, these words limit delegation of function to those officials whose appointments are subject to the "advice and consent" of the Senate. The Army stated this limitation places an inordinate burden on what is really a rather pedestrian authority to conduct research.<sup>15</sup> Deleting this language would expand the ability of the Secretary of Defense to delegate authority, thus further meeting the goals of streamlining and improving efficiency.

While elimination of the language, "subject to the approval of the President," would maximize efficiency, the granting of specific concurrent authority to the Secretaries of the military departments would eliminate any issue regarding their authority in this area. Further, such a specific grant would clearly eliminate the need for the present service-specific research and development statutes.<sup>16</sup>

The Panel also recommends deleting the word "assigned" in subsection (a). This language, without definition, is not meaningful. The provisions of 10 U.S.C. § 2364, "Coordination and communication of defense research," would ensure minimal duplication of efforts between the services.

---

<sup>12</sup>Letter from HQ Air Force Systems Command/JA signed by Anthony J. Perfilio, Command Counsel, to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (May 29, 1992).

<sup>13</sup>Memorandum from Department of the Army signed by Joseph Varady, Director for Procurement Policy and Anthony H. Gamboa, Deputy General Counsel (Acquisition) to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (June 25, 1992).

<sup>14</sup>In Chapter 1.4.13 of this Report, the Panel is recommending that 10 U.S.C. § 2371 become a "process only" statute. That is, it will not provide authority to conduct research, but solely deal with the processes involved in the utilization of cooperative agreements and other transactions.

<sup>15</sup>See note 13, *supra*.

<sup>16</sup>These are 10 U.S.C. § 4503 (Army), 10 U.S.C. § 7203 (Navy), and 10 U.S.C. § 9503 (Air Force).

**Amend subsection (b) to expand the range of research and development projects available to include those which are of "potential interest to the Department of Defense or to the military department concerned."**

When the Panel initially considered repealing 10 U.S.C. § 4503 because it appeared duplicative of section 2358, it invited comment. In response, a memorandum from the Army Corps of Engineers Chief Counsel indicated there was difference between the two sections. The memorandum stated that the authority in section 2358 to engage in research projects is limited to those that relate to weapons and other military needs, whereas section 4503 permits the Corps to conduct R&D in support of public works efforts, which are part of the mission of the Army, but which relate to neither weapons nor military needs. Because repeal of section 4503 might be construed as removing the Corps' authority to continue civil works R&D, the memorandum recommended providing for such authority in section 2358 if section 4503 were repealed.<sup>17</sup>

The Corps' authority to carry out its public works responsibilities may be gleaned from language in 10 U.S.C. § 4503 permitting research and development "relating to the Army." While there is no clearly comparable language in the current 10 U.S.C. § 2358, the latter does not prohibit such efforts and would seem to be broad enough to cover such actions. Nevertheless, because the Panel is recommending repeal of section 4503,<sup>18</sup> it also recommends amending section 2358 to ensure that the Corps of Engineers may continue to perform research and development programs associated with its public works responsibilities. The recommended amendment to section 2358, which would permit research and development which is of "potential interest to [DOD] or to the military department concerned," is specifically intended to ensure that the Corps' capabilities in this area are not diminished.

#### **1.4.6.5. Relationship to Objectives**

The Panel's recommendations will streamline and consolidate authority for advanced research and clarify and permit appropriate judgment on methods for accomplishing R&D activities. This will result in increased efficiencies and provide policies and fundamental requirements, but leave detailed implementing methodology to the regulations.

---

<sup>17</sup>Memorandum from Department of the Army Corps of Engineers signed by Kathryn Kurke, Assistant Chief Counsel for Research and Development to Lt Col James S. Cohen, USAF, Acquisition Law Task Force, Defense Systems Management College (Aug. 12, 1992).

<sup>18</sup>See Chapter 1.4.15 of this Report for analysis of section 4503. See also Chapter 1.4.18 of this Report, where the Panel is recommending repeal of 10 U.S.C. § 9503.

#### 1.4.6.6. Proposed Statute

#### 10 U.S.C. § 2358. Research projects

(a) In general, ~~Subject to approval by the President, †The Secretary of Defense, and the Secretaries of the military departments~~ may engage in basic, advanced, and applied research and development projects that are necessary to the responsibilities of the Department of Defense or the military department concerned in the field of basic, advanced, and applied research and development and that relate to weapons systems and other military needs or are of potential interest to the Department of Defense or the military department concerned. ~~Subject to approval by the President, †The Secretary concerned~~ may perform assigned research and development projects

(1) by contract ~~with~~, cooperative agreement, or other transaction with, or by grant to, educational or research institutions, private businesses, or other agencies of the United States;

(2) through one or more of the military departments; or

(3) by using employees and consultants of the Department of Defense.

(b) Requirement of Potential Military Relationship Interest.--Funds appropriated to the Department of Defense and to the military departments may not be used to finance any research project or study unless the project or study has is, in the opinion of the Secretary of Defense or the Secretary of the military department concerned, ~~a potential relationship to a military function or operation~~ of potential interest to the Department of Defense or to the military department concerned.

## 1.4.7. 10 U.S.C. § 2360

### Research and development laboratories: contracts for services of university students

#### 1.4.7.1. Summary of the Law

The statute permits the Secretary of Defense to hire students to provide technical support at defense research and development laboratories. Such contracts may be directly with the students or with nonprofit organizations employing such students. Students are considered employees for the purposes of compensation for work injuries (5 U.S.C. § 8101 *et seq.*) and tort claims (28 U.S.C. § 2671 *et seq.*). DOD was required to formulate regulations defining specific terms.

#### 1.4.7.2. Background of the Law

The statute was part of the 1982 DOD Authorization Act.<sup>1</sup> The legislative history indicates a recognition of the "cost effectiveness of allowing college level students to provide short term technical support to Government research and development laboratories."<sup>2</sup> The history also indicates that such contracts are only for technical services and are to be used only when it can be demonstrated to be cost effective.<sup>3</sup> Because students are not counted against civilian end-strength ceilings, the provision was passed with the understanding that such student service contract arrangements would not be used to circumvent these ceilings or increase the civilian workforce.<sup>4</sup>

#### 1.4.7.3. Law in Practice

DFARS subpart 237.73 implements this statute. It defines "institution of higher learning," "nonprofit organization," "students," and "technical support."<sup>5</sup> It cites this statute and 10 U.S.C. § 2304(a)(i) (*s/c*) as authority for these contracts.<sup>6</sup>

---

<sup>1</sup>Department of Defense Authorization Act, 1982, Pub. L. No. 97-86, § 603, 95 Stat. 1099, 1110 (1981).

<sup>2</sup>H.R. REP. NO. 71 (III), 97th Cong., 1st Sess. 12 (1981).

<sup>3</sup>H.R. CONF. REP. NO. 311, 97th Cong., 1st Sess. 116 (1981).

<sup>4</sup>*Id.*

<sup>5</sup>DFARS 237.7301(a)-(d). The statute required that the regulations include the first three of these terms but did not specify the last.

<sup>6</sup>DFARS 237.7302. This was originally set forth in DAC 84-10. It is intended to reflect that less than full and open competition is appropriate. The reference should read "(a)(1)" rather than "(a)(i)."

#### **1.4.7.4. Recommendation and Justification**

##### **Retain**

One comment was received. It suggested that this authority, currently with the Secretary of Defense, might be given directly to the military departments.<sup>7</sup> The Panel declined to adopt this suggestion because the program is apparently working as intended.

#### **1.4.7.5. Relationship to Objectives**

The statute as written contributes to DOD efficiency and effectiveness. It permits utilization of students for important research that increases the cost effectiveness of certain types of research, while at the same time providing opportunities for students. The statute identifies the fundamental requirements to be achieved while leaving the detailed implementing methodology to the regulations.

<sup>7</sup>Memorandum from Systems and Logistics Contracting, Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), signed by Lt Col Moxon, USAF to Stuart A. Hazlett, Defense Systems Management College (May 29, 1992).

## **1.4.8. 10 U.S.C. § 2361**

### **Award of grants and contracts to colleges and universities: requirement of competition**

#### **1.4.8.1. Summary of the Law**

This statute prohibits the Secretary of Defense from awarding grants and contracts to colleges and universities for research and development, or for the construction of any research or other facility, unless competitive procedures are used. Specifically, contracts must be awarded in accordance with 10 U.S.C. § 2304, excluding that statute's subsection (c)(5). If those conditions are not met, grants and contracts may be awarded only if the Secretary has notified Congress of intent to award and has waited 180 days. The statute requires an annual report to Congress on the use of competitive procedures for the award of research and development contracts, and the award of construction contracts, to colleges and universities.

This statute contains a rule of construction. Another law may not be construed as modifying or superseding section 2361 unless the other statute specifically refers to section 2361, states that it is intended to modify section 2361 and states that the grant to the named college or university is being awarded in contravention of section 2361.

#### **1.4.8.2. Background of the Law**

This statute was enacted in 1988.<sup>1</sup> The statute was a response to a strong congressional belief that "ear-marking" of research funds for particular colleges and universities was not an acceptable practice because it was considered as having an adverse effect on research. Congress determined that competition in the award process would lead to geographical diversity and promote creative, energetic basic research.<sup>2</sup> As enacted, the statutory mandate to award such grants or contracts using competitive procedures was absolute -- an award could not be made pursuant to one of the seven exceptions to full and open competition provided for in 10 U.S.C. § 2304(c).

The statute was substantially amended in 1989.<sup>3</sup> Congress added the provisions which (1) allow grants or contracts to be awarded using one of the exceptions in section 2304(c) (except for the exception at subsection (c)(5) of that section); (2) require identification of the college or university involved if one of the exceptions to full and open competition is invoked; and (3) require notice and waiting if other than competitive procedures are contemplated. Congress decided to allow grants or contracts to be awarded using one of the exceptions in section 2304(c) because it recognized that circumstances might exist where doing so was in the best interests of

<sup>1</sup>National Defense Authorization Act, Fiscal Year 1989, Pub. L. No. 100-456, § 220(a), 102 Stat. 1941 (1988).

<sup>2</sup>H.R. CONF. REP. NO. 989, 100th Cong., 2d Sess. 217 (1988).

<sup>3</sup>National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, § 252, 103 Stat. 1352, 1404 (1989).

the Government.<sup>4</sup> An additional amendment in 1990 changed the frequency of the reports to Congress from a semiannual to annual basis.<sup>5</sup>

#### **1.4.8.3. Law in Practice**

The law may create administrative burdens; however, there is no indication that any additional administrative requirements are overly burdensome or that the purpose of the law is contrary to the best interests of the DOD acquisition system.

Often, competition in this area is achieved through use of Broad Agency Announcements.<sup>6</sup> These general announcements detail the agency's research interests, specify criteria for selection of proposals, and solicit offerors.

The 1993 Defense Appropriations Act provides an example of this law in practice. In that act, Congress stated that the funds appropriated elsewhere in the act for contracts or grants to specific colleges and universities were made available without regard to, and, to the extent necessary, in contravention of, 10 U.S.C. § 2361.<sup>7</sup>

#### **1.4.8.4. Recommendation and Justification**

**Retain, but delete subsection (c) when it expires.**

One comment recommended repealing this statute.<sup>8</sup> The stated basis for this recommendation was that the law arbitrarily discriminates against colleges and universities as a category of nonprofit/not-for-profit entities, in terms of their access to DOD contracts and grants for R&D, and that the statute puts an undue burden on DOD to enforce congressional legislative discipline. There was further concern that the law conflicts with CICA. Specifically, it was felt that 10 U.S.C. § 2304(c) permits awards to universities and nonprofit entities, and that the term "competitive procedures," while defined for contracts with reference to CICA, is not so defined regarding grants.

The law protects DOD from external pressures to provide research and development contracts to specific colleges and universities. As such, it is an important tool in the integrity of the R&D contracting process insofar as colleges and universities are involved.

The Panel believes this law is not creating difficulties for colleges and universities or the Government. Retention or repeal of the statute would be a function of weighing the potential

administrative burden and the corresponding effects of its elimination against clear congressional intent in this area. On balance, there is no compelling reason to amend or repeal this statute.

The report required under subsection (c) has a sunset provision.<sup>9</sup> Unless data gathered through the current reporting cycles indicates the existence of a problem in sole-source awards to specific colleges and universities, this provision should be deleted upon its expiration.

The Panel recommends no other changes.

#### **1.4.8.5. Relationship to Objectives**

The statute, as written, protects the integrity of the DOD acquisition process and should be retained. Deletion of the reporting requirement upon expiration will streamline this section.

---

<sup>9</sup>No report has to be filed for any period beginning after Dec. 31, 1993.

## **1.4.9. 10 U.S.C. § 2364**

### **Coordination and communication of defense research activities**

#### **1.4.9.1. Summary of the Law**

This section provides that the Secretary of Defense will "promote, monitor, and evaluate" programs for communication and exchange of technical data among and between DOD activities. It requires that defense research facilities be assigned broad mission requirements; appropriate personnel be utilized as consultants on system standardization; facility managers be given broad latitude to choose R&D projects; technology position papers prepared by these facilities be available to combatant commands and contractors who submit bids and proposals for DOD contracts; and that any position paper prepared on a technological issue relating to a major weapon system, as well as technological assessments made regarding a component, be part of the record considered when milestone 0, I, and II decisions are made. The statute defines the following terms: "defense research facility," "milestone 0 decision," "milestone I decision," and "milestone II decision."

#### **1.4.9.2. Background of the Law**

This law was enacted in 1986<sup>1</sup> in order to strengthen coordination among DOD research facilities and other DOD organizations.<sup>2</sup> There were specific statutory findings indicating that centralized coordination and dissemination of technological data were necessary. Two reasons were given: ensuring all DOD personnel were informed about emerging technologies, and avoiding cost duplication of research staffs and projects.<sup>3</sup>

#### **1.4.9.3. Law in Practice**

This statute is not directly related to Government contracting. It establishes a data point of reference for use by decision makers at various milestones that directly relate to contract formation.

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 234(c), 100 Stat. 3816, 3848 (1986).

<sup>2</sup>*Id.* at section 234(a).

<sup>3</sup>*Id.* at section 234(b).

#### **1.4.9.4. Recommendations and Justification**

**Amend by deleting specific references to, and definitions of, Milestones 0, I, and II from the statute.**

The statute provides that data be part of the record prior to decisions at milestones 0, I, and II, and it defines these points. There is no doubt that decision makers should have access to critical information regarding technologies at all phases of the acquisition cycle. However, over time, terms such as milestones 0, I, and II, with specific definitions, can lose effectiveness due to changes in the acquisition process, particularly when decision points are changed either as to time or event. Continuation of this terminology may result in the anomalous situation where data is not provided at the necessary time due to alterations in the acquisition processes. Currently, DOD Directives provide definitions of milestones 0, I, and II that are not the same as those in the statute.

The Panel recommends retaining this important concept, but changing the language to ensure that the information is provided in a timely manner, whatever the critical phase points are called. This would be accomplished by replacing the references to, and definitions of, the milestones 0, I, and II decisions with "acquisition program decisions."

A recommendation was received to expressly authorize laboratories to enter into R&D agreements with other Government laboratories.<sup>4</sup> This recommendation is not necessary, as the authority to enter into such agreements already exists.<sup>5</sup>

#### **1.4.9.5. Relationship to Objectives**

The proposed change would further the Panel's objective of ensuring that acquisition laws provide the broad policy framework but leave the specific implementing methodologies to the regulations.

#### **1.4.9.6. Proposed Statute**

##### **10 U.S.C. § 2364: Coordination and communication of defense research activities**

(a) Coordination of Department of Defense Technological Data. The Secretary of Defense shall promote, monitor, and evaluate programs for the communication and exchange of technological data --

(1) among the Defense research facilities, combatant commands, and other organizations that are involved in developing for the Department of Defense the technological requirements for new items for use by combat forces; and

---

<sup>4</sup>Letter from HQ Air Force Systems Command/JA signed by Anthony J. Perfilio, Command Counsel, to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (May 29, 1992).

<sup>5</sup>10 U.S.C. § 2358 authorizes the research projects to be done "through one or more" military departments. Section 2358 is analyzed at Chapter 1.4.6 of this Report.

(2) among Defense research facilities and other offices, agencies, and bureaus in the Department that are engaged in related technological matters.

(b) Functions of Defense Research Facilities. The Secretary of Defense shall ensure, to the maximum extent practicable --

(1) that Defense research facilities are assigned broad mission requirements rather than specific hardware needs;

(2) that appropriate personnel of such facilities are assigned to serve as consultants on component and support system standardization;

(3) that the managers of such facilities have broad latitude to choose research and development projects;

(4) that technology position papers prepared by Defense research facilities are readily available to all combatant commands and to contractors who submit bids or proposals for Department of Defense contracts; and

(5) that, in order to promote increased consideration of technological issues early in the development process, any position paper prepared by a Defense research facility on a technological issue relating to a major weapon system, and any technological assessment made by such facility in the case of such component, is made a part of the records considered for the purpose of making ~~milestone 0, milestone I, and milestone II~~ acquisition program decisions.

(c) Definitions. In this section:

(1) The term "Defense research facility" means a Department of Defense facility which performs or contracts for the performance of--

(A) basic research; or

(B) applied research known as exploratory development.

~~—— (2) The term "milestone 0 decision" means the decision made within the Department of Defense that there is a mission need for a new major weapons system and that research and development is to begin to meet such need.~~

~~—— (3) The term "milestone I decision" means the decision by an appropriate official of the Department of Defense selecting a new major weapon system concept and a program for demonstration and validation of such concept.~~

~~—— (4) The term "milestone II decision" means the decision by an appropriate official of the Department of Defense approving the full-scale development of a new major weapon system.~~

(2) The term "acquisition program decisions" has the meaning given to it by the regulations promulgated by the Secretary of Defense.

## **1.4.10. 10 U.S.C. § 2367**

### **Use of federally funded research and development centers**

#### **1.4.10.1. Summary of the Law**

This statute establishes parameters for DOD utilization of federally funded research and development centers (FFRDC). With the exception of "applied scientific research," no work may be placed in an FFRDC unless such work is within the general scope of effort as established in its sponsoring agreement with DOD. In an effort to limit the creation of new FFRDCs, Congress specified that no money may be obligated or expended from DOD appropriated funds for any FFRDC not in existence prior to June 2, 1986, without first filing a report with Congress as to the FFRDC's "purpose, mission, and general scope" and then waiting 60 days. The Secretary of Defense is required to submit, as part of the annual budget submission, the amount of man-years of effort proposed to be funded for each FFRDC. Finally, a report is required to be filed with Congress not later than January 1st of the next fiscal year detailing actual obligations and man-years of effort expended at each FFRDC during the previous year.

#### **1.4.10.2. Background of the Law**

FFRDCs have been a part of the Government since the end of the Second World War. However, this section was not enacted until recently.<sup>1</sup> Congress placed these statutory restrictions on FFRDCs because it was concerned that agencies had tasked FFRDCs to do work that was not within the scope of the FFRDCs' mission and that could have been performed by various private sector sources. Moreover, Congress was concerned about the lack of oversight, given the growth in the amount of work performed by the FFRDCs.<sup>2</sup>

#### **1.4.10.3. Law in Practice**

Since their inception, FFRDCs have engendered considerable controversy regarding potentially unfair competition with industry sources capable of doing the same, or similar, work. FAR 5.017 describes the special relationship FFRDCs have with the Government. The 1992 DOD Appropriations Act reduced FFRDC funding by 4% from FY91 and imposed certain prohibitions on expenditure of funds where members of FFRDC Boards of Directors or Trustees are also members of the Boards of Directors or Trustees of a profit making company that has contracts with DOD. Exceptions to this are for the Software Engineering Institute and certain classified activities by the Institute for Defense Analyses.<sup>3</sup>

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, § 912(a), 100 Stat. 3816, 3925 (1096) (*identical legislation omitted*).

<sup>2</sup>S. REP. NO. 718, 99th Cong., 2d Sess. 267 (1986).

<sup>3</sup>Department of Defense Appropriations Act, 1992, Pub. L. No. 102-172, § 8107, 105 Stat. 1150, 1199 (1991).

#### **1.4.10.4. Recommendation and Justification**

##### **No Action**

The Panel recommends no action on this statute, since it is primarily about the creation and management of FFRDCs, rather than acquisition *per se*.

#### **1.4.10.5. Relationship to Objectives**

The Panel considers that action on this statute would not specifically promote its objectives.

## **1.4.11. 10 U.S.C. § 2368**

### **Critical technologies research**

#### **1.4.11.1. Summary of the Law**

This section provided that the Secretary of Defense could contract with three specific entities for studies in fields of R&D essential to development of critical technologies. Such agreements could be entered into only after consultation with the Director, Office of Science and Technology Policy. There was an annual statutory ceiling of \$500,000 for studies conducted under this section.

#### **1.4.11.2. Background of the Law**

As enacted in 1988, this section called for development of a critical technology plan. The plan was required to contain, among other things, lists of critical technologies, milestone goals, and comparisons with the Soviet Union and other countries.<sup>1</sup> The text of the section was completely replaced the following year.<sup>2</sup> The substituted provision authorized the Secretary of Defense to enter into agreements in furtherance of the technologies outlined in the Report of the Critical Technologies Panel in accordance with the National Science and Technology Policy, Organization and Priorities Act of 1976 (42 U.S.C. § 6683).

This section was repealed by section 821 of the 1992-93 Defense Authorization Act. That Act provided in section 821 for cooperative arrangements with non-profit organizations to establish offices overseas to monitor and assess foreign critical technology, in section 822 for the President to develop a critical technology strategy, and in section 823 for the establishment of a Federally funded Critical Technologies Institute.<sup>3</sup>

#### **1.4.11.3. Law in Practice**

The section has been repealed.

#### **1.4.11.4. Recommendation and Justification**

##### **No Action**

Because this section was repealed after inception of this Panel, no action is required.

---

<sup>1</sup>National Defense Authorization Act, Fiscal Year 1989, Pub. L. No. 100-456, § 823, 102 Stat. 1918, 2018 (1988).

<sup>3</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 821(c)(1), 105 Stat. 1290, 1431 (1991).

**1.4.11.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

## 1.4.12. 10 U.S.C. § 2370

### Biological Defense Research Program

#### 1.4.12.1. Summary of the Law

This statute mandates that the Secretary of Defense submit an annual report, in both classified and unclassified versions, on all research, development, test, and evaluation (RDT&E) conducted by DOD during the preceding fiscal year for purposes of biological defense. This report, to be submitted in conjunction with the annual budget, is required to include a description of agents or toxins used for the purposes of biological defense research during the covered fiscal year, in addition to biological agents and toxins not previously listed in Center for Disease Control publications. The list should include a description of biological properties of each agent, location of and amount spent at each facility, statement of biosafety level at each facility, and a statement of coordination with local health, fire, and police officials for provisions of emergency support services. The terms "biosafety level" and "biological defense research facility" are defined by the statute.

#### 1.4.12.2. Background of the Law

The statute, enacted in 1990,<sup>1</sup> stems from concerns over the amount of information available to local public health and safety officials in the event of the accidental release of biological agents.<sup>2</sup> The required report assures disclosure through notification (10 U.S.C. § 2370(b)(5)).<sup>3</sup> A Senate amendment, based upon a proposed Army regulation, to delete the notification requirement was withdrawn, as conferees were concerned that coordination with local officials be formalized as expeditiously as possible.<sup>4</sup>

#### 1.4.12.3. Law in Practice

The Army is responsible for preparing this report. Originally, there was concern with security considerations stemming from the ability of foreign governments to glean intelligence data from the unclassified version. The world situation has lessened this concern.

#### 1.4.12.4. Recommendation and Justification

##### No Action

The Panel believes this statute is not directly related to acquisition and it therefore makes no recommendations concerning this statute.

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 241(a), 104 Stat. 1485, 1516 (1990).

<sup>4</sup>H.R. CONF. REP. NO. 923, 101st Cong., 2d Sess. 561 (1990).

**1.4.12.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

## 1.4.13. 10 U.S.C. § 2371

### **Advanced research projects: cooperative agreements and other transactions**

#### 1.4.13.1. Summary of the Law

This statute currently provides the vehicle for doing advanced research, both through the Defense Advanced Research Projects Agency (DARPA)<sup>1</sup> and the military departments, using cooperative agreements and other transactions. The statute consists of provisions establishing the authority of DOD to receive payments under this statute, utilization of funds received under this statute, and reporting requirements. The statute also requires the Secretary of Defense to ensure that (1) to the maximum extent practicable, the research conducted pursuant to a cooperative agreement or other transaction under this section does not duplicate other research being conducted by DOD; (2) to the extent practicable, the funds provided by the Government under this section do not exceed the total amount provided by other parties to the cooperative agreement or other transaction; and (3) this section is used only when the use of standard contracts or grants is not feasible or appropriate.

#### 1.4.13.2. Background of the Law

This statute was enacted as part of the National Defense Authorization Act for Fiscal Years 1990 and 1991.<sup>2</sup> The reason for adding this provision is explained in the Senate committee report as follows:

The committee recognizes that maturation of many technologies funded by [DARPA] have significant commercial application. The committee applauds the efforts of DARPA in this area and supports a broadening of this effort. Current law does not authorize DARPA to enter into "cooperative agreements" or "other transactions" as distinct from "grants" or "contracts." Additionally, current law does not allow for any proceeds of such arrangements to be applied to a fund for the development of other advanced technologies. Accordingly, [this] [sic] section clearly establishes the legal authority of DARPA to enter into cooperative agreements and other transactions. In granting the authority to enter into "other transactions," the committee enjoins the Department to utilize this unique authority only in those instances in which traditional authorities are clearly not appropriate. The legislation would also permit DARPA to recoup the fruits of such arrangements when there is a "dual use" potential for commercial application, for

---

<sup>1</sup>DARPA "is [DOD's] corporate research organization, chartered with pursuing imaginative and innovative ideas leading to systems with significant military utility." S. REP. NO. 81, 101st Cong., 1st Sess. 126 (1989).

<sup>2</sup>Pub. L. No. 101-189, § 251(a)(1), 103 Stat. 1352, 1403 (1989).

reinvestment in the development of other technologies with the potential for military utility.<sup>3</sup>

Although the Senate version would have established the authority contained in this section on a one-year trial basis, the law as passed extended the trial period to two years.<sup>4</sup> Recently, the authority in this statute was made permanent.<sup>5</sup>

The 1992 Appropriations Act restricted agreements under the statute during FY92 to only those made by DARPA.<sup>6</sup>

#### **1.4.13.3. Law in Practice**

Although not specifically defined in this section, the term "cooperative agreement" has a similar meaning to that in 31 U.S.C. § 6305.<sup>7</sup> That statute articulates that a cooperative agreement "is to transfer a thing of value to the state, local government, or other recipient to carry out a public purpose of support or stimulation authorized by a law of the United States instead of acquiring (by purchase, lease, or barter) property or services for the direct benefit or use of the United States Government."

The FAR does not apply to cooperative agreements.<sup>8</sup>

#### **1.4.13.4. Recommendation and Justification**

**Amend section 2371 so that it contains only statutory provisions dealing with the utilization of cooperative agreements and other transactions.**

This amendment would specify the requirements of cooperative agreements and other transactions in this section. It would delete the limitation of authority for using these cooperative agreements and other transactions only for advanced research projects. Authority for advanced research, currently found in 10 U.S.C. § 2371, has been recommended for transfer to 10 U.S.C. § 2358.<sup>9</sup> The result would be that cooperative agreements and other transactions would now be available for use in basic, advanced, and applied research and development. The proposed amendment would separate the authority for performing research and development from the mechanics of how research and development would be accomplished.

<sup>6</sup>Department of Defense Appropriations Act, 1992, Pub. L. No. 102-172, § 8113, 105 Stat. 1150, 1202 (1991) (*not codified*).

<sup>7</sup>Act of Sept. 13, 1982, Pub. L. No. 97-258, 96 Stat. 877. These are different from CRDAs under 15 U.S.C. § 3710a.

<sup>8</sup>48 C.F.R. § 1.103. See the definition of "acquisition" in FAR 2.101, which references the term "contract."

<sup>9</sup>See Chapter 1.4.6 of this Report for analysis for section 2358.

#### 1.4.13.5. Relationship to Objectives

This amendment would streamline acquisition of all phases of research and development by clearly differentiating authorities. It would also support the Panel's objectives of facilitating Government access to commercial technologies and skills, as well as facilitating commercial market access to Government developed technologies.

#### 1.4.13.6. Proposed Statute

10 U.S.C. § 2371. ~~Advanced research projects;~~ Cooperative agreements and other transactions

~~(a) The Secretary of Defense, in carrying out advanced research projects through the Defense Advanced Research Projects Agency, and the Secretary of each military department, in carrying out advanced research projects, may enter into cooperative agreements and other transactions with any person, any agency or instrumentality of the United States, any unit of State or local government, any educational institution, and any other entity.~~

~~— (b)(a)(1)~~ Cooperative agreements and other transactions entered into under ~~subsection (a) section 2358 of this title~~ may include a clause that requires a person or other entity to make payments to the Department of Defense (or any other department or agency of the Federal Government) as a condition for receiving support under the agreement or other transaction.

(2) The amount of any payment received by the Federal Government pursuant to a requirement imposed under paragraph (1) may be credited, to the extent authorized by the Secretary of Defense, to the appropriate account established under ~~subsection (e) (d)~~. Amounts so credited shall be merged with other funds in the account and shall be available for the same purposes and the same period for which other funds in such account are available.

~~(e)(b)~~ The authority provided under subsection (a) may be exercised without regard to section 3324 of title 31.

~~(d)(c)~~ The Secretary of Defense shall ensure that--

(1) to the maximum extent practicable, a cooperative agreement or other transaction under this section does not provide for research and development that duplicates research and development being conducted under existing programs carried out by the Department of Defense;

(2) to the extent the Secretary determines practicable, the funds provided by the Government under the cooperative agreement or other transaction do not exceed the total amount provided by other parties to the cooperative agreement or other transaction; and

(3) the authority under this section is used only when the use of standard contracts or grants is not feasible or appropriate.

~~(e)~~ (d) There is hereby established on the books of the Treasury separate accounts for each of the military departments and the Defense Advanced Research Projects Agency for support of ~~advanced-research and development~~ projects provided for in cooperative agreements and other transactions entered into under section 2358 of title 10. Funds in those accounts shall be available for the payment of such support.

~~(f)~~ (e) Not later than 60 days after the end of each fiscal year, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a report on all cooperative agreements and other transactions (other than contracts and grants) entered into under this section during such fiscal year. The report shall contain, with respect to each such cooperative agreement and transaction, the following:

(1) A general description of the cooperative agreement or other transaction (as the case may be), including the technologies for which ~~advanced-research and development~~ is ~~are~~ provided for under such agreement or transaction.

(2) The potential military and, if any, commercial utility of such technologies.

(3) The reasons for not using a contract or grant to provide support for such ~~advanced research and development~~.

(4) The amount of the payments, if any, referred to in subsection ~~(b)~~ (a) that were received by the Federal Government in connection with such cooperative agreement or other transaction during the fiscal year covered by the report.

(5) The amount of the payments reported under paragraph (4), if any, that were credited to each account established under subsection ~~(e)~~ (d).

## **1.4.14. 10 U.S.C. § 2372**

### **Independent research and development and bid and proposal costs: payments to contractors**

#### **1.4.14.1. Summary of the Law**

This section requires the Secretary of Defense to prescribe regulations governing the payment of independent research and development (IR&D) and bid and proposal (B&P) expenses incurred by contractors. Such IR&D/B&P costs are allowable on covered contracts to the extent that they are allocable, reasonable, and not otherwise unallowable by law or FAR. Among specific controls the statute imposes are ones that restrict allowability to IR&D/B&P costs of "potential interest" to DOD and a limitation on the amount which may be paid annually for FYs 93-95 to major contractors.

#### **1.4.14.2. Background of the Law**

This section was originally enacted in 1990.<sup>1</sup> With the passage of this section, Congress instituted an expansion of the types of research and development that a company could consider for recovery under IR&D as being of "potential interest" to the Department of Defense. Congress did so because it was concerned that the anticipated reduction in defense procurement spending in the coming years might well have an adverse impact on the defense industry's IR&D program.<sup>2</sup>

Soon thereafter, the section was amended.<sup>3</sup> Differences between the original enactment and the amended version include the use of the terms "major contractor," "covered contract," and "covered contractor;" the inclusion of a specific formula by which the maximum reimbursable amount may be determined; elimination of advance agreements; and encouragement of enabling superior weapon systems performance and reducing acquisition and life cycle costs.

The legislative history accompanying the amendments notes that numerous industrial associations provided Congress with information addressing industry concerns about the IR&D program. Those concerns included efficiency and degree of independence, as well as the future of the program itself in light of a declining defense budget. The legislative history also indicates that Congress intended to enhance the IR&D program through simplification, including eliminating reviews and gradings by Government officials and removing arbitrary ceilings for R&D recovery. This would allow the degree of reasonableness to prevail in contract negotiations for recovery of both IR&D and bid and proposal costs.<sup>4</sup>

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 824, 104 Stat. 1485, 1603 (1990), repealing The Military Procurement Act of 1971, Pub. L. No. 91-441, § 203, 84 Stat. 905, 906-08 (1970).

<sup>2</sup>H.R. CONF. REP. NO. 923, 101st Cong., 2d Sess. 627 (1990).

<sup>3</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 802(a)(1), (e), 105 Stat. 1290, 1412, 1414 (1991).

<sup>4</sup>H.R. REP. NO. 60, 102d Cong., 1st Sess. 181, 182 (1991).

The utilization of ceilings for FYs 93-95 was representative of a concern over potential increased expenditures in the defense arena. Provisions were included to prescribe the maximum reimbursement limitation for major contractors during this period. Such contractors are allowed to recover up to 105% of the preceding year's allowable costs. Additionally, provisions were included which would allow for greater reimbursement in specified situations.<sup>5</sup>

#### **1.4.14.3. Law in Practice**

This section has been implemented at FAR 31.205-18 and 42.102 and DFARS 225.7303-2, 231.205-18, 242.302, 242.771, and 242.10.

#### **1.4.14.4. Recommendation and Justification**

##### **Retain**

Only one recommendation was received on this statute. It recommended eliminating the detailed procedures from the statutory scheme.<sup>6</sup> While the detailed procedures present in this statute should be the exception, rather than the rule, this recommendation appears to be premature. The Panel believes this statute addresses significant and previously controversial issues in the area of IR&D/B&P costs, and represents a reasoned and enlightened balance between the Government's need to control costs and the need to support new technology and the industrial base.

#### **1.4.14.5. Relationship to Objectives**

This section helps streamline the acquisition process and recognizes costs essential to support of the defense industrial base.

---

<sup>5</sup>H.R. CONF. REP. NO. 311, 102d Cong., 1st Sess. 568 (1991).

<sup>6</sup>Memorandum from DCAA signed by Michael J. Thibault, Assistant Director for Policy and Plans, to Contract Formation Working Group, Advisory Panel on Streamlining and Codifying Acquisition Law, Defense Systems Management College (June 1, 1992).

## **1.4.15. 10 U.S.C. § 4503**

### **Research and development programs**

#### **1.4.15.1. Summary of the Law**

This section gives the Secretary of the Army authority to conduct and participate in research and development programs. There is a prohibition on using the authority in this section for the development of prototype aircraft intended primarily for civilian use.

#### **1.4.15.2. Background of the Law**

This section had its origins in the Army and Air Force Authorization Act of 1949. The Secretary of the Army was specifically authorized to "conduct, engage, and participate in research and development programs related to Army activities." Further, the Secretary was authorized to procure or contract for facilities, equipment, services and supplies as needed.<sup>1</sup> The restriction on using funds for prototype aircraft intended primarily for commercial use was DOD-wide.<sup>2</sup> These provisions were codified in their present form by the 1956 reorganization amendments.<sup>3</sup>

#### **1.4.15.3. Law in Practice**

Acquisition of research and development is implemented in FAR Part 35 and DFARS Part 235.

#### **1.4.15.4. Recommendation and Justification**

##### **Repeal**

When the Panel initially considered repealing 10 U.S.C. § 4503 because it appeared duplicative of section 2358, it invited comment. In response, a memorandum from the Army Corps of Engineers Chief Counsel indicated there was difference between the two sections. The memorandum stated that the authority in section 2358 to engage in research projects is limited to those that relate to weapons and other military needs, whereas section 4503 permits the Corps to conduct R&D in support of public works efforts, which are part of the mission of the Army but which neither relate to weapons nor to military needs. Because repeal of section 4503 might be construed as removing the Corps' authority to continue civil works R&D, the memorandum recommended providing for such authority in section 2358 if section 4503 were repealed.<sup>4</sup>

<sup>1</sup>Army and Air Force Authorization Act of 1949, Pub. L. No. 81-604, § 104, 1950 U.S.C.C.A.N. (64 Stat.) 325, 327-28.

<sup>2</sup>*Id.* at § 304.

<sup>3</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1028, 70A Stat. 134.

<sup>4</sup>Memorandum from Department of the Army Corps of Engineers signed by Kathryn Kurke, Assistant Chief Counsel for Research and Development, to Lt Col James S. Cohen, USAF, Acquisition Law Task Force, Defense Systems Management College (Aug. 12, 1992).

The Corps' authority to carry out its public works responsibilities may be gleaned from language in 10 U.S.C. § 4503 permitting research and development "relating to the Army." While there is no clearly comparable language in the current 10 U.S.C. § 2358, the latter does not prohibit such efforts and would seem to be broad enough to cover such actions. Nevertheless, because the Panel is recommending repeal of section 4503, it also recommends amending section 2358 to ensure that the Corps of Engineers may continue to perform research and development programs associated with its public works responsibilities. The recommended amendment to section 2358, which would permit research and development which is of "potential interest to [DOD] or to the military department concerned," is specifically intended to ensure that the Corps' capabilities in this area are not diminished.<sup>5</sup>

#### **1.4.14.5. Relationship to Objectives**

Repeal would streamline the acquisition process by elimination of a duplicative statute.

---

<sup>5</sup>See Chapter 1.4.6 of this Report for analysis of section 2358. See also Chapter 1.4.18 of this Report, where the Panel is recommending repeal of 10 U.S.C. § 9503.

## **1.4.16. 10 U.S.C. § 7303**

### **Model Basin; investigation of hull designs**

#### **1.4.16.1. Summary of the Law**

This statute provides that the Department of Navy, through an unspecified office or agency, shall conduct tests at the David W. Taylor Model Basin (DTMB) regarding shapes and forms of vessels and aircraft, and other investigations associated with design problems. The statute also provides for experiments to be conducted for private persons. Data from such experiments is required to be kept confidential. Government use of data is permitted consistent with United States patent laws.

#### **1.4.16.2. Background of the Law**

The present statute traces its origins to a 1936 authorization for construction of a model basin.<sup>1</sup> The major provisions of the current statute were included in the original. The present version represents a 1956 recodification<sup>2</sup> with a 1966 amendment which increased discretion within the Department of Navy as to which organization the facility would fall under.<sup>3</sup>

#### **1.4.16.3. Law in Practice**

The statute is the authority for operations at DTMB. Discussion with DTMB's General Counsel indicated the statute is essential for operations.

#### **1.4.16.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention. The statute is currently an effective tool in the operation of the facility. Repeal of the statute would require a new statutory scheme to ensure operations could continue.

#### **1.4.16.5. Relationship to Objectives**

Retention of this statute meets the Panel's objectives by identifying the broad policy objectives and the fundamental requirements to be achieved under the law, but leaves detailed implementing methodology to the acquisition regulations.

<sup>2</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1028, ch. 1041, 70A Stat. 451.

<sup>3</sup>Act of Nov. 2, 1966, Pub. L. No. 89-718, § 41, 80 Stat. 1115, 1120.

## **1.4.17. 10 U.S.C. § 7522**

### **Contracts for research**

#### **1.4.17.1. Summary of the Law**

This law permits the Secretary of the Navy or the Secretary's delegates, in particular the Chief of Naval Research and the chiefs of the bureaus, to make, without advertising, contracts, amendments, or modifications of contracts for services and materials necessary to conduct research or make or secure reports, tests, models, or apparatus. These types of contracts are not subject to the requirements of 31 U.S.C. § 3324 relating to advance, partial, progress, or other payments, and no bond is necessary. This law also specifically prohibits the use of the cost-plus-a-percentage-of-cost type contracting for research contracts.

#### **1.4.17.2. Background of the Law**

This statute was originally passed in 1946.<sup>1</sup> During World War II, the War Powers Act enabled the Navy to relax the peacetime constraints on research contracts it had previously followed. This statute provided for, in peacetime, the Naval Research Laboratory and Naval Research Development Board, which had been established during the war.<sup>2</sup> These two bodies performed so effectively during the war that Congress decided to continue their operations during peacetime through the newly created Office of Naval Research.<sup>3</sup> This statute was codified in 1956,<sup>4</sup> and subsequent amendments have been technical without any substantive alterations.

#### **1.4.17.3. Law in Practice**

The subject of Research and Development contracting is addressed at FAR Subpart 35 and DFARS Subpart 235, both entitled "Research and Development Contracting."

#### **1.4.17.4. Recommendation and Justification**

**Repeal subsection (b) of 10 U.S.C. § 7522 and merge into 10 U.S.C. § 2307 as a subsection.**

As stated in Chapter 2.1.1 of this Report, the Panel is recommending that all statutes within Title 10 relating to contract payment and financing should be consolidated within a single comprehensive statute. The Panel recommends that subsection (b) of section 7522 dealing with payments of research and development contracts be repealed and merged into the revised version of 10 U.S.C. § 2307, "Contract financing," as a subsection. This single statute will centralize all

---

<sup>1</sup>Act of Aug. 1, 1946, ch. 727, § 6, 60 Stat. 779, 780.

<sup>2</sup>S. REP. NO. 1628, 79th Cong., 2d Sess. 3 (1946).

<sup>3</sup>*Id.*

<sup>4</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1028, ch. 1041, 70A Stat. 464.

pertinent requirements regarding Title 10 contract financing, while eliminating duplication within the U.S. Code. The Panel recommends that the remaining two subsections of 10 U.S.C. § 7522 be retained in their current form and location.<sup>5</sup>

#### **1.4.17.5. Relationship to Objectives**

This recommendation satisfies the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It eliminates the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law.

#### **1.4.17.6. Proposed Statute**

##### **10 U.S.C. § 7522. Contracts for research**

(a) The Secretary of the Navy and, by direction of the Secretary, the Chief of Naval Research and the chiefs of bureaus may, without advertising, make contracts or amendments or modifications of contracts for services and materials necessary to conduct research and to make or secure reports, tests, models, or apparatus. A contractor supplying such services or materials need not be required to furnish a bond.

~~(b) Subsections (a) and (b) of section 3324 of title 31 do not apply to advance, progress, or other payments made with respect to a contract under this section.~~

(eb) This section does not authorize the use of the cost-plus-a-percentage-of-cost system of contracting.

---

<sup>5</sup>The Panel received one comment which pointed out differences in scope between section 7522(a) and 10 U.S.C. § 2358. Letter from the Office of the Chief of Naval Research, signed by William Garvert, to Stuart A. Hazlett, Acquisition Law Task Force, Defense Systems Management College (Dec. 17, 1992).

## **1.4.18. 10 U.S.C. § 9503**

### **Research and development Programs**

#### **1.4.18.1. Summary of the Law**

This statute gives the Secretary of the Air Force authority to conduct and participate in research and development programs. There is a prohibition on using the authority in this section for the development of prototype aircraft intended primarily for civilian use.

#### **1.4.18.2. Background of the Law**

This statute had its origins in the Army and Air Force Authorization Act of 1949. The Secretary of the Air Force was specifically authorized to "conduct, engage, and participate in research and development programs related to Air Force activities." Further, the Secretary was authorized to procure or contract for facilities, equipment, services, and supplies as needed.<sup>1</sup> The restriction on utilizing funds for prototype aircraft intended primarily for commercial use was DOD-wide.<sup>2</sup> These provisions were codified in present form by the 1956 reorganization amendments.<sup>3</sup>

#### **1.4.18.3. Law in Practice**

The acquisition of research and development is implemented in FAR Part 35 and DFARS Part 235.

#### **1.4.18.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute. Authority to conduct these activities is present in 10 U.S.C. § 2358.<sup>4</sup>

#### **1.4.18.5. Relationship to Objectives**

Repeal will streamline the acquisition process by elimination of a duplicative statute.

## 1.5. Procurement Protests

### 1.5.0. Introduction

Congress admonished the Panel to limit the statutory provisions which govern DOD procurements to those provisions which are "necessary to . . . protect . . . fundamental governmental policies."<sup>1</sup> Competition is one of those fundamental governmental policies, and Congress in 1984 emphasized its belief that protests are "necessary" to protect competition.<sup>2</sup> Indeed, restrictions on competition have been the subject of protests for over 60 years.<sup>3</sup>

Congress has repeatedly expanded and strengthened the bid protest system over the past ten years. In 1982, the Federal Courts Improvement Act (FCIA) gave the Court of Federal Claims the power to grant equitable relief in bid protest actions filed before contract award.<sup>4</sup> The Competition in Contracting Act (CICA) codified and strengthened the General Accounting Office (GAO) Procurement Protest System in 1984<sup>5</sup> and created a bid protest remedy for acquisitions of automatic data processing equipment (ADPE) in the General Services Board of Contract Appeals (GSBCA).<sup>6</sup> In 1986, the Paperwork Reduction Reauthorization Act expanded and strengthened the GSBCA bid protest remedy.<sup>7</sup> As a consequence, parties who object to an agency procurement action can now file a protest in four different forums external to the contracting agency: the GAO, the GSBCA, the Court of Federal Claims or a district court.<sup>8</sup>

The Panel recognizes the important role of protests in assuring full and open competition and therefore has made recommendations to increase the efficiency and effectiveness of the existing protest remedies. The Panel's recommendations propose specific changes to the current bid protest system. The recommendations reinforce the continuing congressional support for GAO and GSBCA protests.<sup>9</sup> However, the Panel believes that the 1982 creation of the Claims Court, with its grant of bid protest jurisdiction and the interpretation of this jurisdiction by various courts of appeals, has created confusion and unnecessarily impeded the expeditious and efficient resolution of judicial bid protests. Accordingly, the Panel recommends that Congress consolidate,

<sup>8</sup>District courts have authority, pursuant to the Administrative Procedures Act, 5 U.S.C. §§ 551-559, 701-706, 3105, 3344, to review post-award, and, in some circuits, pre-award challenges brought by disappointed bidders. *See Scanwell Laboratories, Inc. v. Shaffer*, 424 F.2d 859 (D.C. Cir. 1970); *Cubic Corporation v. Cheney*, 914 F.2d 1501 (D.C. Cir. 1990).

<sup>9</sup>Paperwork Reduction Reauthorization Act of 1986, Pub. L. No. 99-500, § 831, 1986 U.S.C.C.A.N. (100 Stat.) 1783.

into a single judicial forum, the current bid protest jurisdiction of the Court of Federal Claims and the district courts.

The Panel also proposes that Congress consider whether protests need to be decided by four different forums in three different branches of the Government. The Panel therefore recommends that Congress consider whether the competition policy would be better served through nonjudicial resolution of protests by a single independent agency, located within the executive branch, with powers comparable to those exercised by the existing four forums. With proper authority, this exclusive administrative forum could provide more uniform and cost effective treatment of protests. This agency could provide two different procedures for consideration of protests. The first procedure would be similar to the relatively inexpensive and expeditious procedure now provided by the GAO. The second procedure would be similar to the adjudicatory procedure provided by the GSBCA. However, the GSBCA-type procedure would not be limited, as it is now limited, to protests regarding the award of automatic data processing equipment and services. Rather, the GSBCA-type procedure would be available for all types of procurements.

The Panel believes that its recommendations for changes to the statutory charters of the existing bid protest forums are well supported and can lead to immediate improvements. Accordingly, the Panel recommends that they be given priority over its recommendation for congressional consideration of an exclusive bid protest forum. Because the latter recommendation will require careful analysis and will likely be the subject of considerable debate, the Panel recognizes that it may be some years before this concept will be ready for formal legislative action.

The recommendations in this Report deal primarily with protests which are not filed with a contracting agency because the Panel found no reason to change these informal agency protest procedures. The Panel did ask for comments on whether protesters should be required to file a protest with an agency before filing a protest with the GAO, the GSBCA, or the courts. There was virtually no support for this idea. Comments from both Government and private sector parties indicated that protesters should be free to choose between filing with an agency or using an external forum and that agencies should be free to keep the agency protest process as informal, inexpensive, and flexible as possible.

The discussion that follows gives a brief history of the bid protest process and highlights key Panel recommendations.

#### **1.5.0.1. Development Of A Formal Bid Protest System**

In the 1920s the GAO became the first forum, outside the contracting agency, to consider protests to award of contracts.<sup>10</sup> Initially, the Comptroller General considered protests under its authority to settle the accounts of the executive branch agency and to render advance decisions on payment questions submitted by federal disbursing and certifying officers or heads of Federal

---

<sup>10</sup>Comp. Gen. Dec. A-10024 (Aug. 19, 1925).

agencies.<sup>11</sup> By 1984, when Congress gave the GAO express authority to consider protests, the GAO was receiving more than 2,000 protests a year.<sup>12</sup>

In 1956, the Court of Claims became the first court to consider bid protests when in *Heyer Products v. United States*,<sup>13</sup> it ruled that a disappointed offeror, whose offer was improperly rejected by an agency, was entitled to recover monetary damages as measured by bid and proposal costs. Compared to the GAO, the Court of Claims considered relatively few bid protest decisions before it received authority in 1982 to enjoin contract awards during protest resolution.

In 1970, in *Scamwell Laboratories, Inc. v. Schaffer*,<sup>14</sup> a case of first impression, the Court of Appeals for the District of Columbia Circuit ruled that district courts had jurisdiction under the Administrative Procedure Act (APA) to consider protests of contract awards.<sup>15</sup> Under the APA, a district court has authority to hold unlawful and set aside agency actions, findings, and conclusions found to be "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law[.]"<sup>16</sup> In the ensuing years, the other 11 regional courts of appeals also have held that, based on the APA, the district courts in their circuits had this authority to consider bid protests.<sup>17</sup>

In 1984, Congress enacted the Competition in Contracting Act (CICA), which effected sweeping changes in virtually all aspects of federal procurement law. These changes required that bidders or offerors on Government contracts be given an opportunity for full and open competition. The House Conference Report on CICA explained as follows:

The conference substitute uses "full and open" competition as the required standard for awarding contracts in order to emphasize that all responsible sources are permitted to submit bids and proposals for proposed procurements. The conferees strongly believe that the procurement process should be open to all capable contractors who want to do business with the Government.<sup>18</sup>

In providing the GAO and the GSBICA with statutory authority to conduct bid protests, the CICA conferees recognized the vital role of protests in assuring full and open competition, stating that:

The conferees believe that a strong enforcement mechanism is necessary to insure the mandate for competition is enforced and that vendors wrongly excluded from competing for government contracts receive equitable relief. To accomplish this, the conference added a new subchapter to Chapter 35 of Title 31 United States

Code, which codifies and strengthens the bid protests function currently in operation at the General Accounting Office (GAO).<sup>19</sup>

Today, the vast majority of external protests are filed with the GSBGA or the GAO. The following chart displays the number of protests in the various forums for the period 1988-91.

#### BID PROTESTS FILED IN THE VARIOUS FORUMS<sup>20</sup>

YEAR	GAO	GSBGA	COURT OF FEDERAL CLAIMS
1988	2633	215	8
1989	2673	283	23
1990	2489	268	19
1991	2887	250	17

#### 1.5.0.2. GAO Protests<sup>21</sup>

At the GAO, protests are resolved through written decisions, initiated by a letter outlining the basis of the protest.<sup>22</sup> The GAO will consider protests which object to the terms of a solicitation, a proposed award or award of a contract,<sup>23</sup> and must generally decide protests within 90 working days.<sup>24</sup> The GAO bases its decision on the written agency report submitted in response to the protest and the protester's written comments to the agency report.<sup>25</sup> In order to develop a full record on the protested action, a protester may request the agency to submit to the GAO additional agency records with the agency report.<sup>26</sup> Where appropriate, the GAO may conduct hearings and receive sworn testimony on contested issues of fact.<sup>27</sup> Hearings are the exception rather than the rule under the GAO procedure.

<sup>19</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1435 (1984), *reprinted in* 1984 U.S.C.C.A.N. 1445, 2123. A similar rationale was provided in support of the new GSBGA protest procedures. H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1430 (1984), *reprinted in* 1984 U.S.C.C.A.N. 1445, 2118.

<sup>20</sup>These figures are based upon inquiries to the various administrative offices of the forums. No agency collects statistics on protests filed in the federal district courts. However, David M. Cohen, Branch Director of the Commercial Litigation Branch in the Civil Division of the United States Department of Justice, has advised the Panel that his Branch reviews the "vast majority of district court protests" and the number reviewed each year is "far fewer than 100."

<sup>21</sup>The GAO protest procedures are set out in detail in the GAO bid protest regulations, 4 C.F.R. Part 21.

<sup>22</sup>4 C.F.R. § 21.1.

<sup>23</sup>*Id.*

<sup>24</sup>31 U.S.C. § 3554.

<sup>25</sup>4 C.F.R. § 21.3.

<sup>26</sup>*Id.*

<sup>27</sup>4 C.F.R. § 21.5.

If the agency action is found to be in violation of law or regulation, the GAO may grant the protest and may recommend that the agency cancel the solicitation, award a contract to another bidder, cancel an award, or take other such appropriate action. Additionally, the GAO may award bid and proposal costs or legal fees incurred during the protest.

If a protest is filed with the GAO before contract award or if the agency is notified by the GAO of a protest within 10 calendar days after contract award, agencies must ordinarily suspend contract award or stop work on awarded contracts.<sup>28</sup> Only under special circumstances can agencies allow award to be made or performance to continue.

### 1.5.0.3. GSBCA<sup>29</sup>

The Administrator of the General Services Administration coordinates the procurement of automatic data processing equipment and services by Federal agencies, including a portion of DOD procurements.<sup>30</sup> In furtherance of this authority, the Administrator either procures the ADPE or issues a delegation of procurement authority (DPA) to authorize the purchase of ADPE by an agency.<sup>31</sup> The actual procurements are conducted by the agencies under their procurement statutes. The GSBCA bid protest authority is limited to those ADPE procurements for which a DPA is necessary.<sup>32</sup>

The GSBCA conducts a formal adjudicatory-type procedure. Protests filed with the GSBCA must be resolved to the maximum extent possible within 45 working days.<sup>33</sup> The GSBCA procedure typically begins with an initial conference.<sup>34</sup> At that time, an administrative judge establishes a process for conducting discovery and may establish a limitation on the amount of discovery. The judge also establishes a time period for completion of discovery and for filing of dispositive motions.

If a protest is filed before contract award or within 10 days of contract award, the GSBCA holds a hearing to determine whether to suspend the agency DPA.<sup>35</sup> If the DPA is suspended, agencies are precluded from making award of a contract where the protest is filed before award or from allowing continuance of performance of the contract in those cases where the protest is filed after award.<sup>36</sup>

---

<sup>28</sup>31 U.S.C. § 3553.

<sup>29</sup>The GSBCA bid protests are governed by the GSBCA Rules of Procedure. 48 C.F.R. §§ 6100-6199.

<sup>30</sup>Under the "Warner Amendment," the jurisdiction of the GSA over ADPE does not extend to DOD ADPE if the function, operation, or use of the ADPE involves intelligence activities or the command and control of military forces, or is equipment which is an integral part of a weapon or weapons system, or is critical to the direct fulfillment of military or intelligence missions. Department of Defense Authorization Act of 1982, Pub. L. No. 97-86, § 908(a)(1), 1982 U.S.C.C.A.N. (95 Stat.) 1117, 40 U.S.C. § 759(a)(3).

<sup>31</sup>*Id.*

<sup>32</sup>*Id.*

<sup>33</sup>*Id.*

<sup>34</sup>48 C.F.R. § 6101.10.

<sup>35</sup>48 C.F.R. § 6101.19.

<sup>36</sup>40 U.S.C. § 759(f)

Under the GSBICA's procedures, agencies are required to file the "Rule 4 File" with the GSBICA and provide copies to the parties.<sup>37</sup> This Rule 4 File constitutes the record of the agency decision forming the basis of the protest. If they so desire, protesters may seek to supplement that record.

At the conclusion of discovery, and well before the end of the 45 working day period for a decision, the GSBICA may conduct an evidentiary hearing on the protest. The typical hearing is completed in less than three days. Following the hearing and receipt of briefs from the parties, the GSBICA issues its final decision. Decisions of the GSBICA may be appealed as a matter of right to the Court of Appeals for the Federal Circuit by either the Government or any interested party.<sup>38</sup>

#### **1.5.0.4. Judicial Procedures<sup>39</sup>**

Protests filed in the district courts or the Court of Federal Claims proceed in a manner similar to those filed before the GSBICA. Parties filing protests in the courts file a complaint generally seeking both a declaratory judgment that an agency action was improper and a temporary restraining order or preliminary injunction to stop the agency from proceeding with award or performance of a contract.<sup>40</sup> Before any hearing is held, the courts will often allow limited discovery.

No prescribed time periods exist for resolution of bid protests filed in the courts, and there are no prescribed rules for issuance of decisions. Protests are often disposed of by the grant or denial of a preliminary injunction. In many cases, this grant or denial is not accompanied by a formal decision.

Upon appeal of either party, decisions of the district courts may be reviewed as a matter of right to one of the twelve regional courts of appeals.<sup>41</sup> Decisions of the Court of Federal Claims are reviewed on appeal by the Court of Appeals for the Federal Circuit.<sup>42</sup>

#### **1.5.0.5. Basis Of Recommendations**

The Panel adopted the following four principles to provide guidance in formulating its recommendations for changes to the bid protest system:

- Disappointed bidders and offerors should have reasonable access to the reasons for adverse agency actions.

---

<sup>37</sup>48 C.F.R. § 6101.4.

<sup>38</sup>40 U.S.C. § 759(e)(6)(A).

<sup>39</sup>The 1991 *Report of the American Bar Association Public Contract Law Section Bid Protest Committee Courts Subcommittee Project* [hereinafter *ABA Courts Subcommittee Project*] contains a thorough discussion of the bid protest procedures in Federal courts.

<sup>40</sup>See e.g., 28 U.S.C. § 1491(a)(3).

<sup>41</sup>28 U.S.C. § 1291.

<sup>42</sup>28 U.S.C. § 1295(a)(3).

- Contracting officers, like other Government officials, are entitled to a presumption of regularity for their actions.
- Protests should be resolved in a fair, expeditious, and efficient manner.
- Overlapping, duplicative, and conflicting protest procedures should be eliminated.

Based on the above guidance, the Panel has made a series of recommendations to the existing bid protest system which offer some immediate benefits:

- Precipitous protests can be avoided;
- Greater uniformity in both decisions and practice can be gained among the bid protest forums; and
- The bid protest system will become more efficient and thereby save resources for protesters, intervenors, and agencies.

Moreover, the Panel has recommended that Congress consider a more far-reaching reform of replacing the four existing bid protest forums with an exclusive bid protest forum in the executive branch. The Panel fully recognizes that it would be premature to implement this far-reaching reform without considerably more analysis and debate. Regardless of whether Congress eventually finds merit to an exclusive bid protest forum, the Panel believes consideration should be given to the immediate improvements recommended by this Report.

#### **1.5.0.6. Disappointed Offerors Should Have Reasonable Access To The Reasons For Adverse Agency Action**

Frequently, a disappointed offeror can obtain complete and timely information on the reasons for an agency's rejection of its offer only by filing a protest. Providing offerors with more complete and timely information on the reasons for an agency's adverse action would eliminate one of the reasons that cause contractors to file protests.<sup>43</sup> This would in turn shorten the procurement cycle, save time, and reduce needless expense. To make this requirement meaningful, the period of suspension should be extended to accommodate the debriefing. For this reason and for other reasons explained in its detailed proposal, the Panel recommends that:

- Offerors be given timely and complete debriefings which provide meaningful information on the strengths and weaknesses of their proposals.
- After contract award, agencies must ordinarily suspend contract performance whenever a protest is filed within ten days of contract award or within three calendar days after the date set by an agency for any requested and required debriefing.

---

<sup>43</sup>In *The Protest Experience Under the Competition in Contracting Act* (1989), the Bid Protest Committee of the American Bar Association, Section of Public Contract Law documented the commonly-held belief that some protests would not have been filed if a meaningful debriefing had been available.

The Panel recognizes the effectiveness of protective orders in GAO protests. The use of protective orders was recently instituted through the unilateral actions of the GAO. Protective orders permit interested parties to review competition-sensitive and proprietary information which they otherwise could not review. This practice allows for a more comprehensive examination of the facts with a more equitable decision. The Panel believes that the authority for this useful tool should be made permanent. Accordingly, the Panel recommends that:

- The Comptroller General should be given express authority to use protective orders to provide access to competition-sensitive or proprietary information to attorneys and technical consultants of the interested parties.

#### **1.5.0.7. Contracting Officers, Like Other Government Officials, Are Entitled To A Presumption Of Regularity For Their Actions**

It is a well-established principle of administrative law that "in the absence of clear evidence to the contrary, courts presume that [Government officials] have properly discharged their official duties."<sup>44</sup> Sound public policy reasons support the presumption of regularity, including the need to allow for the reasonable exercise of discretion by Government officials. In approving the Federal Courts Improvement Act of 1982 (FCIA), the Senate recognized this policy's application to protests:

... [S]ection 133 gives the new Claims Court the power to grant declaratory judgments and give equitable relief in contract actions prior to award. Since the funds which the Government utilizes to purchase goods and services are derived solely from public sources, the public possesses a strong interest in the ability of the Government to fulfill its requirements in these areas at the lowest possible cost. Accordingly, in the vast majority of circumstances, the Government must be permitted to exercise its right to conduct business with those suppliers it selects and to do so in an expeditious manner.<sup>45</sup>

The Panel believes that this presumption should continue and that matters which are entrusted to agency discretion should be upheld in a protest if the Government is able to provide a reasonable basis for its actions.

The Government does not have unfettered discretion to conduct business with the suppliers it chooses. It must comply with the laws and regulations governing the Federal procurement process. Indeed, the legislation authorizing the GAO and the GSBGA protest procedures specifically instructs that relief can be granted where the agency action violates law or regulation.

---

<sup>44</sup>*United States v. Chemical Foundation, Inc.* 272 U.S. 1, 14-15 (1926).

<sup>45</sup>S. REP. NO. 275, 97th Cong., 2d Sess. 23 (1982), reprinted in 1982 U.S.C.C.A.N. 11, 32-33.

The need to adhere to these laws and regulations is grounded in sound public policy. As the Court of Appeals for the Eleventh Circuit has stated, "the public and . . . bidders have a strong interest in certainty in the bidding process . . . . To achieve this certainty, strict adherence to the procedures for bidding is necessary."<sup>46</sup> A logical corollary to this principle is the need for consistency among the various protest forums as to how a protest is reviewed. A single standard of review for all protest forums will result in increased consistency and greater certainty in result, will reduce forum shopping, and will enhance the perception that the protest system is fair. Accordingly, the Panel recommends:

- The establishment of a single standard of review for agency actions that authorizes the courts, like the GAO and the GSBICA, to set aside agency action which violates procurement law or regulation. On matters committed to agency discretion, the agency should be required to establish a reasonable basis for its actions.

As an additional enhancement of the bid protest system's integrity, the Panel recognizes a need to provide for a penalty for those who bring a protest knowing it is baseless or, after having discovered that fact, continue the protest. While the Panel believes that this situation is relatively uncommon, the very presence of this penalty will deter frivolous protests and will add to the overall perception that the entire process is fair and even-handed. Accordingly, the Panel recommends that:

- Where the GAO, the GSBICA, or a court expressly finds that a protest is frivolous or not filed or pursued in good faith, the Government should be entitled to recover its costs in defending against the protest.

#### **1.5.0.8. Protests Should Be Resolved In A Fair, Expeditious And Efficient Manner**

Although protests further the Government policy of competition, protests also delay the procurement of services and supplies necessary for efficient and effective Government operation. It is essential, therefore, that protests be both fairly and expeditiously resolved. In enacting the Competition in Contracting Act (CICA), Congress recognized this principle and required the GAO and the GSBICA by statute to resolve protests expeditiously.<sup>47</sup> The courts should be similarly obligated. Accordingly, the Panel recommends that:

- The Courts, like the GAO and the GSBICA, should be directed by statute to resolve protests expeditiously.

The Panel also believes that any impediment to early resolution and settlement of a protest where appropriate should be removed. One impediment is the perceived inability of a contracting agency to completely resolve and settle a protest by the payment of bid and proposal costs and legal fees. Currently, if an agency determines that there is merit to a protest, the agency can take action to resolve the protest, but some believe it is not clear that an agency can pay bid and proposal costs, attorneys fees, or consultant and expert witness fees associated with the protest.

<sup>46</sup>*Choctaw Manufacturing Co., Inc. v. United States*, 761 F.2d 609, 619 n.17 (11th Cir. 1985).

<sup>47</sup>31 U.S.C. § 3555; 40 U.S.C. § 759(f).

With an express grant of authority to pay such expenses for meritorious protests, the agencies may completely resolve and settle such protests at any stage of the protest and avoid unnecessary administrative and legal expenses. Accordingly, the Panel recommends that:

- Agencies should be given express authority to pay bid and proposal costs, attorney fees, and consultant or expert witness fees in order to settle meritorious protests.

The Panel has also identified several changes to the procedures of the two administrative protest forums. These changes are intended to streamline the protest process, encourage use of express protest procedures, and institute provisions to use electronic filings to speed the processing of protests. Accordingly, the Panel recommends that:

- Whenever possible, amended protests should be resolved within the statutory time period established for resolution of initial protests.
- The GAO should have the authority to resolve protests under an express option which, like GSBCA protests, require the GAO to render a decision within 65 calendar days.
- The GAO and the GSBCA should issue procedures which allow for electronic filing of protest documents.
- The GAO and the GSBCA should use the term "calendar day" and not "working day" to specify when statutory deadlines should be met.

#### **1.5.0.9. Overlapping, Duplicative, And Conflicting Protest Procedures Should Be Eliminated**

The existence of four protest forums has naturally resulted in inefficiencies. The Panel, in its recommendations discussed below, offers for consideration and further study an alternative which would eliminate these overlaps and inefficiencies. However, the Panel specifically has addressed less fundamental changes to the existing system.

The most glaring inefficiency in the current system arises out of the confusing jurisdictional problems created by the Federal Courts Improvement Act of 1982 (FCIA). Recognizing the pervasive nature of the problems with the current system, a committee of the Section of Public Contract Law of the American Bar Association has noted that "as we enter the third decade of bid protest jurisdiction in the Federal courts, jurisdictional problems continue to permeate the process."<sup>48</sup> These problems are reflected in a host of Federal court decisions which seek to determine if the district courts or the Court of Federal Claims has jurisdiction over a particular protest.

FCIA created two fundamental jurisdictional problems. The first problem stems from the FCIA amendments to the Tucker Act where Congress directed that the Court of Federal Claims

---

<sup>48</sup>ABA Courts Subcommittee Project, *supra* note 39, at 1.

had "exclusive jurisdiction" to consider pre-award protests.<sup>49</sup> In the past 10 years at least five regional courts of appeals have addressed this problem. Two of the circuit courts found that the district courts in their circuits were divested of pre-award jurisdiction by FCIA and one suggested as much.<sup>50</sup> Conversely, two circuit courts have held that, notwithstanding FCIA, the district courts in their circuits retained pre-award protest jurisdiction.<sup>51</sup>

The second jurisdictional problem arises out of the Court of Appeals for the Federal Circuit's ruling that the bid protest jurisdiction of the Court of Federal Claims is limited to protests filed by parties submitting bids or proposals.<sup>52</sup> As a result of this ruling, numerous decisions have been issued holding that the Court of Federal Claims had no jurisdiction to hear all the types of protests routinely considered by the GAO and the GSBICA. These types of protests include those filed before bids or proposals are submitted, which allege that a solicitation unduly restricts competition.<sup>53</sup>

The congressional intent for the expeditious and inexpensive resolution of protests is not being served where the parties must first litigate problematic jurisdictional issues before the merits of the protest can be decided:

If there is a less profitable expenditure of the time and resources of federal courts and federal litigants than resolving a threshold issue of which particular federal court should have jurisdiction, it does not readily come to mind.<sup>54</sup>

The Panel agrees.

The Panel has thoroughly considered the problems resulting from the existence of two judicial protest forums and has concluded that this dual authority should be consolidated into one forum. The Panel has identified no substantive justification for having two forums with the same jurisdiction, as some have recommended. Splitting the jurisdiction between the two courts based upon whether the protest was brought before or after award is not justified because it creates numerous interpretation problems and adds potential delays to the speedy resolution of protests. The system of dual forums also invites forum shopping and engenders a lack of uniform precedent and practice. Accordingly, the Panel recommends:

- There should be only one judicial system for consideration of bid protests and that forum should have jurisdiction to consider all protests which can now be considered by the district courts and by the Court of Federal Claims.

---

<sup>49</sup>28 U.S.C. § 1491(a)(3).

<sup>50</sup>*Cubic Corporation v. Cheney*, 914 F.2d 1501 (D.C. Cir. 1990), discusses the cases decided by the respective circuits regarding whether 28 U.S.C. § 1491(a)(3) divests district courts of pre-award protest jurisdiction.

<sup>51</sup>*Id.*

<sup>52</sup>*United States v. Grimberg*, 702 F.2d 1362 (Fed. Cir. 1983).

<sup>53</sup>*ABA Courts Subcommittee Project*, *supra* note 39, at 26-34.

<sup>54</sup>*Sharp v. Weinberger*, 798 F.2d 1521, 1522 (D.C. Cir. 1986) (observation made by Justice Antonin Scalia in a case involving a conflict in the jurisdiction of the district courts and the Court of Federal Claims).

In choosing the appropriate forum for the judicial protest authority, the Panel considered the need to provide a knowledgeable entity that would be reasonably available to protesters and which could handle the number of protests that have been historically brought in the courts. For numerous reasons, the Panel concluded that the Court of Federal Claims was best suited for this responsibility. In its discussion of 28 U.S.C. § 1491 at Chapter 1.5.8 of this Report, the Panel discusses in detail its rationale for recommending that the Court of Federal Claims serve as the single judicial forum. Among the reasons is the fact that divergent opinions can occur in the hundreds of district courts and in the twelve regional federal circuits undermining the essential need for uniform and predictable guidance for DOD on procurement laws and regulations. Moreover, in complex protests, the Government, protester, and other interested parties are located in diverse parts of the country, and the Court of Federal Claims is the only court with nation-wide jurisdiction. The judges on the Court of Federal Claims are also far more experienced in Government contract issues than the district court judges. The former are authorized to, and do, conduct hearings around the country, and therefore can be available to protesters outside Washington, D.C. Appropriate changes to the statutory jurisdiction of the Court of Federal Claims can eliminate any possible restrictions on the ability of the court to provide complete relief to disappointed bidders. Finally, there are unresolved standing to sue questions,<sup>55</sup> as well as jurisdictional issues,<sup>56</sup> which arise out of the fundamental differences between statutory bases for protest jurisdiction in the district courts and the Court of Federal Claims. Accordingly, the Panel recommends that:

- The Court of Federal Claims should be the single judicial forum with jurisdiction to consider all protests that can presently be considered by any district court or by the Court of Federal Claims.
- The Court of Federal Claims should be authorized to set aside agency actions in protests that establish that the agency has violated procurement law or regulation; it should be authorized to provide relief comparable to that provided by the GAO and the GSBCA. The authority of the GAO, the GSBCA and the courts should be parallel where possible.

#### **1.5.0.10. Exclusive Bid Protest Forum**

If a disappointed offeror in New England believes that a DOD administrative agency improperly rejected its offer of automatic data processing equipment, the offeror can protest a proposed contract award at the GAO, the GSBCA, the Court of Federal Claims, or the local district court. In "shopping" for the right forum to file the protest, the offeror must weigh carefully a myriad of factors. The following chart illustrates some of these factors.

---

<sup>55</sup>Those circuit courts of appeal that have considered whether protesters have standing to sue have developed varying tests in making this determination. See *ABA Courts Subcommittee Project, supra*, note 39 at 6-20.

<sup>56</sup>In *Bowen v. Massachusetts*, 487 U.S. 879 (1988), for example, the Supreme Court suggested that suits which can be brought in the district courts for declaratory and injunctive relief do not seek monetary damages and cannot therefore be brought in the U.S. Court of Federal Claims. In contrast, a suit by a disappointed bidder for bid and proposal costs seeks monetary damages and cannot ordinarily be brought in the district court. See *Fairview Township v. United States Environmental Protection Agency*, 773 F.2d 517 (3rd Cir. 1985); *Heyer Products v. United States*, 135 Ct. Cl. 63, 140 F. Supp. 409 (1956).

## A COMPARISON OF PROTEST FORUMS

Forum	GAO	GSBCA	Federal District Courts	U.S. Court of Federal Claims
<b>Speediness</b>	Decisions generally issued within 90 working days	Decisions generally issued within 45 working days	No time limit	No time limit
<b>Suspension/Injunction</b>	Suspension of contract award or performance available	Suspension of contract award or performance available	Injunctive relief to suspend award or performance available	Injunctive relief to suspend award or performance available
<b>Discovery</b>	Document production only	Depositions, document production, interrogatories and admissions	Depositions, document production, interrogatories and admissions	Depositions, document production, interrogatories and admissions
<b>Protective Orders</b>	Available	Available	Available	Available
<b>Subpoena Authority</b>	None	Available	Available	Available
<b>Sanctions/Contempt Authority</b>	Available on a limited basis	Available on a limited basis	Available	Available
<b>Hearings</b>	Hearings available, but infrequently granted	Trial-like hearings available	Trials are available	Trials are available
<b>Jurisdiction</b>	Procurements by the Government and for the Government	Procurements of Automatic Data Processing Equipment and related services; certain military ADPE exempted	Post-award jurisdiction is established; courts are split as to pre-award jurisdiction	Pre-award jurisdiction only
<b>Recovery of B&amp;P Costs, Attorney Fees and related costs of protests</b>	Available to prevailing protester (but currently under judicial review)	Available	B&P cost recovery cannot exceed \$10,000*	B&P costs can be recovered*
<b>Expense/Cost</b>	Generally less expensive than other forums	Generally more expensive than GAO	Generally more expensive than GAO	Generally more expensive than GAO

\* Recovery of attorneys fees might be available under the Equal Access to Justice Act. See generally the discussion of 31 U.S.C. § 3554 at Chapter 1.5.5 of this Report, commencing at note 22.

After extensive analysis and discussion, the Panel has discerned no compelling rationale for four independent bid protest forums. There is no sound public policy reason for the forum shopping which the current system engenders. In addition, in the eight years since the four forums have been available, an increasing divergence has occurred in decisions on some fundamental issues ranging from jurisdiction to timeliness. Inefficiencies and delays inevitably result from this divergence, as the Government is required to reconcile conflicting interpretations and to adopt policies and practices which respond to these conflicting interpretations.<sup>57</sup> Substantial differences also exist in the practices and procedures of the various forums which lead

<sup>57</sup>"Uniformity and predictability" are essential attributes of every legal system. *Moragne v. States Marine Lines, Inc.*, 398 U.S. 375, 403 (1970).

to further inefficiencies.<sup>58</sup> Moreover, it simply takes more time for all parties to become familiar with these different practices and procedures. This extra time results in increased costs for all Federal procurements which are subject to protests.

The fact that the GAO is the busiest bid protest forum and is located in the legislative branch leads to further problems. For example, shortly after the Competition in Contracting Act (CICA) was passed in 1984, the Department of Justice argued that Congress violated the constitutional separation of powers doctrine by giving the GAO, a legislative branch agency, the power to control and direct day-to-day executive branch procurement actions. This cast into doubt the ability of the GAO to fully implement its protest authority. It was only after the Court of Appeals for the Third Circuit in 1986 issued its decision in *Ameron, Inc. v. United States Army Corps of Engineers*<sup>59</sup> that the Justice Department decided to let the issue lie. The two-year delay in resolution of this issue, however, increased the financial and administrative burden of resolving protests not only in the contract involved in the *Ameron* case, but also in other contracts. More recently, the Government has questioned the authority of the GAO to direct payment by executive branch agencies of attorney's fees in cases where a protest is sustained.<sup>60</sup>

At the GSBICA, issues of statutory interpretation have also contributed to delays in the resolution of protests and have thereby added costs and inefficiencies to the procurements which were the subject of these protests.<sup>61</sup> These problems arise out of decisions dealing with two provisions of the Brooks Act: (1) whether the protest involves the procurement of ADPE as defined in the Act, and (2) whether a protester is an "interested party" as defined in the Act.<sup>62</sup> In numerous cases, protests have been filed at the GSBICA in reliance on a reasonable interpretation of the Brooks Act or on the decisions of the GSBICA, only to have the Court of Appeals for the Federal Circuit find that the GSBICA does not, in fact, have jurisdiction over these protests.<sup>63</sup> Ambiguities in the GSBICA's authority and the resulting uncertainties and delays create burdens both for the Government and for protesters. The Government must pay added costs and suffer unnecessary delays, and contractors electing to file with the GSBICA (in reliance on prior GSBICA precedent) may end up with no effective resolution of their protests and no additional recourse if

---

<sup>58</sup>The divergent practices of the federal courts on discovery issues is one of the many problems engendered by the different procedures in the different forums. As the ABA noted in its analysis of judicial bid protests, "the absence of reported precedent contributes to a surprising lack of uniformity in discovery practice." *ABA Courts Subcommittee Project, supra* note 39, at 43. There are also substantial differences in practices between the GAO and GSBICA on similar procedures, such as discovery.

<sup>59</sup>809 F.2d 979 (3d Cir. 1986), cert. granted, 485 U.S. 958, cert. dismissed, 488 U.S. 918 (1988).

<sup>60</sup>*United States v. Instruments S.A., Inc.*, No. 91-1574 (D.D.C. Nov. 13, 1992) (granting motion to dismiss for lack of jurisdiction).

<sup>61</sup>In 1986, Congress overruled the Federal Circuit's holding in *Electronic Data Systems Federal Corp. v. General Services Board of Contract Appeals*, 792 F.2d 1569 (Fed. Cir. 1986), which had held that the GSBICA did not have jurisdiction to decide whether a procurement should have been conducted under the Brooks Act. Paperwork Reduction Reauthorization Act of 1986, Pub. L. No. 99-500, § 824, 1986 U.S.C.A.N. (100 Stat.) 1783-344. Congress also directed the Federal Circuit to interpret broadly the GSBICA's jurisdiction. *SMS Data Products Group, Inc. v. United States*, 853 F.2d 1547, 1555 (Fed. Cir. 1988).

<sup>62</sup>*MCI Telecommunications Corp. v. United States*, 878 F.2d 362 (Fed. Cir. 1989).

<sup>63</sup>See e.g., *U.S. West Communications Services, Inc. v. United States*, 940 F.2d 622 (Fed. Cir. 1991). In the last two years, the number of jurisdictional problems confronted by the Court of Appeals for the Federal Circuit have decreased as the court's interpretations of the Brooks Act have stabilized.

the Court of Appeals for the Federal Circuit later rules that the GSBICA lacked jurisdiction to hear the case.<sup>64</sup>

Jurisdictional problems in interpreting the protest authority of the courts have resulted in the innumerable delays and inefficiencies described earlier. These problems led one commentator to observe in 1987 that the judicial protest system is in "chaos."<sup>65</sup>

The Panel believes that the problems created by the availability of four protest forums unduly and unnecessarily burdens the procurement system. Therefore, the Panel believes that Congress should give serious consideration to changing the existing procurement protest system. Accordingly, the Panel recommends that:

- An analysis be made as to whether the federal acquisition process can be better served by an exclusive bid protest forum within the executive branch rather than the four existing bid protest forums.

Under the Panel's alternative, protesters could choose between two procedures: (1) a simplified procedure for protest resolution, similar to that now available at the GAO, and (2) a formal adjudicatory-type proceeding, similar to what is now available from the GSBICA. Contracts under \$100,000 would be awarded under simplified acquisition procedures, recommended at Chapter 4.1 of this Report, and protests for such contracts would be considered under the simplified protest procedure. Protests for larger contracts could be considered under either procedure. Decisions of the exclusive bid protest forum could be appealed by the head of the Federal agency concerned or any interested party to the Court of Appeals for the Federal Circuit.

Protests for all types of procurements, which can now be heard by either the GAO or the GSBICA, could be considered by the exclusive forum under the adjudicatory-type proceeding. This recommendation would thus expand the types of contracts for which adjudicatory-type hearings would be provided and would include all Federal agency procurements. The Panel believes this expansion is warranted by the congressional endorsement of the use of adjudicatory proceedings for bid protests. The Panel further believes that there is simply no justification for distinguishing between ADPE-type contracts and other types of contracts in determining whether or not to grant an adjudicatory proceeding. It is the opinion of the Panel that this adjudicatory proceeding would serve as a meaningful replacement for the judicial protest procedures of the district courts and the Court of Federal Claims.

The Panel recognizes that there are certain disadvantages to this recommendation. For example, the GAO and the GSBICA provide well-defined procedures for resolving protests and have the strong support of Congress. The Panel's recommendation would replace these

---

<sup>64</sup>See *United Telephone of Northwest*, Comp. Gen. B-246977, 92-1 CPD ¶ 374, *aff'd on reconsideration*, 1992 WL 172782 (July 14, 1992).

<sup>65</sup>Villet, *supra* note 17, at 184. Mr. Villet argued that only Congress can resolve the chaos. No changes have been made in the bid protest statutes since this article was written.

procedures with a new and untried procedure that could lead to unintended problems.<sup>66</sup> Therefore, care must be taken to preserve the expertise, resources, and precedents of the GAO and the GSBICA. One way to accomplish this would be to transfer personnel and resources from the GAO and the GSBICA to the new executive agency.<sup>67</sup>

The Panel also recognizes that adjudicatory-type proceedings for all contracts impose additional burdens on Federal agencies and on contractors. The Panel, therefore, believes that the adjudicatory-type proceeding should be coupled with a uniform standard of review, common sense protest procedures and strict time limits similar to those adopted by GSBICA.

In conclusion, the Panel recommends the concept of an exclusive bid protest forum to Congress as one which is worthy of consideration and further study. The Panel has not attempted to fully evaluate or resolve the many problems associated with adoption and implementation of this recommendation and believes that this task can be better accomplished by further examination.

---

<sup>66</sup>The Computer and Business Equipment Manufacturers Association (CBEMA) expressed its concerns as follows: "[T]he alternative proposal to establish a single new forum within the executive branch is premature. Overall, the current protest process works." CBEMA favors implementing improvements to the current process, such as those which we have suggested herein, and allowing sufficient time to evaluate fully their efforts on the process before considering the establishment of a new net forum. Letter from John L. Pickitt, CBEMA President to Maj Gen John D. Slinkard, USAF and Mr. Thomas J. Madden (Oct. 20, 1992).

<sup>67</sup>The transfer of resources from the GSBICA must be done in a manner that enables the GSBICA to preserve its ability to deal with contract claims within its jurisdiction under the Contract Disputes Act.

## 1.5.1. 5 U.S.C. §§ 701 - 706

### Administrative Procedure Act

#### 1.5.1.1. Summary of the Laws

The provisions of 5 U.S.C. §§ 701-706 constitute the Judicial Review Chapter of the Administrative Procedure Act (APA).<sup>1</sup> The APA embodies a "comprehensive regulatory scheme, governing such aspects of agency action as investigations, adjudications, rule making, licensing, and open meeting and disclosure requirements, as well as providing for judicial review of administrative proceedings."<sup>2</sup> A simplistic reading of Chapter 7 of the APA suggests that agency actions regarding the award of contracts can be held unlawful and set aside if such actions are arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law.<sup>3</sup> However, as indicated in the discussion of 28 U.S.C. § 1491 at Chapter 1.5.8 of this Report, there can be significant problems to obtaining a judicial forum to apply the APA.

Examining each section individually, section 701 provides definitions and addresses the application of Chapter 7 of the APA. For example, "agency" is broadly defined to include almost all of the executive branch.<sup>4</sup> There are two noteworthy exceptions to the application of the chapter. The first exception applies to statutes that preclude judicial review.<sup>5</sup> The second exception applies to agency action that is "committed to agency discretion by law."<sup>6</sup>

Section 702 provides that a person who suffers legal wrong because of agency action or is adversely affected or aggrieved by agency action may seek judicial review of such action.<sup>7</sup> Hence, section 702 creates a legal right of action.

Section 703 specifies the form and venue of proceeding. Absent a special statutory review proceeding in a court specified by statute, declaratory judgments, writs of prohibitory or mandatory injunction, and habeas corpus are mentioned as applicable forms of legal action.<sup>8</sup> Where a court is not specified by statute, such an action can proceed "in a court of competent jurisdiction."<sup>9</sup> Under section 704, agency actions made reviewable by statute and final agency actions are subject to judicial review.<sup>10</sup>

---

<sup>1</sup> 5 U.S.C. §§ 551-559, 701-706, 3105, 3344.

<sup>2</sup> Fed Proc, L Ed § 2:1.

<sup>3</sup> 5 U.S.C. § 706(2)(A).

<sup>4</sup> 5 U.S.C. § 701(b)(1)(A)-(H).

<sup>5</sup> 5 U.S.C. § 701(a)(1).

<sup>6</sup> 5 U.S.C. § 701(a)(2).

<sup>7</sup> 5 U.S.C. § 702.

<sup>8</sup> 5 U.S.C. § 703.

<sup>9</sup> 5 U.S.C. § 703.

<sup>10</sup> 5 U.S.C. § 704.

Section 705 authorizes an agency, as well as a court, to "postpone the effective date of action" pending judicial review.<sup>11</sup> Section 706 addresses the scope of judicial review. In particular, the reviewing court shall hold unlawful and set aside any agency actions, findings, and conclusions which are "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law."<sup>12</sup>

### 1.5.1.2. Background of the Laws

Congress originally enacted the terms that presently comprise 5 U.S.C. §§ 701-706 as part of the Administrative Procedure Act of 1946. The provisions were initially codified as part of 5 U.S.C. § 1009.<sup>13</sup> In 1966, Congress recodified such provisions in Chapter 7 of Title 5 to more efficiently organize statutes related to Government employees, the organization and power of Federal agencies, and administrative procedures.<sup>14</sup> In 1976, Congress amended the statute to eliminate the defense of sovereign immunity in Federal court actions for specific relief claiming unlawful action by a Federal agency, officer, or employee.<sup>15</sup> The statute also was amended to permit a plaintiff in an action for nonstatutory review of administrative action to name the United States, the agency, or the appropriate officer as defendant.<sup>16</sup> The amendment was designed to overcome technical problems in pleadings.<sup>17</sup>

### 1.5.1.3. Laws in Practice

Prior to 1970, district courts were precluded from hearing cases concerning the bidding phase of a procurement. In a landmark decision, *Perkins v. Lukens Steel*, the Supreme Court held that prospective bidders lacked standing because the applicable procurement laws protected the Government and not potential offerors.<sup>18</sup> The *Lukens Steel* decision dominated the Federal procurement community for 30 years.

In 1970, the Court of Appeals for the District of Columbia Circuit decided *Scanwell Laboratories, Inc. v. Shaffer*, reflecting a major change in law.<sup>19</sup> The decision recognized that, based upon the APA, an unsuccessful offeror on a Federal Aviation Administration solicitation had standing to bring a declaratory judgment action to determine the validity of a contract award. In reaching this decision, the court observed:

<sup>16</sup>*Id.*

<sup>17</sup>See Richard H. Fallon, Jr., *Claims Court at the Crossroads*, 40 CATH. U. L. REV. 517 (1991); David M. Cohen, *Claims for Money in the Claims Court*, 40 CATH. U. L. REV. 533 (1991).

<sup>18</sup>310 U.S. 113, 125-128 (1940).

<sup>19</sup>424 F.2d 859 (D.C. Cir. 1970).

The public interest in preventing the granting of contracts through arbitrary or capricious action can properly be vindicated through a suit brought by one who suffers injury as a result of the illegal activity, but the suit itself is brought in the public interest by one acting essentially as a "private attorney general."<sup>20</sup>

After *Scanwell* first allowed a disappointed offeror access to the district courts, the courts defined limits on its application. In the following year, the Court of Appeals for the District of Columbia Circuit announced that "courts should not overturn any procurement determination unless the aggrieved bidder demonstrates that there was no rational basis for the agency's decision."<sup>21</sup> Furthermore, although *Scanwell* is widely accepted by other courts of appeals, doubts have arisen as to whether the standing issue can withstand scrutiny under developments in the law of standing since *Scanwell* was decided.<sup>22</sup>

As *Scanwell* lawsuits became more frequent, a district court occasionally would enjoin contract award or performance while seeking an advisory opinion from the Comptroller General. In *Wheelabrator Corp. v. Chafee*, the Court of Appeals for the District of Columbia Circuit acknowledged that a "felicitous blending of remedies" occurs when a district court works with the GAO for a "mutual reinforcement of forums."<sup>23</sup> For the disappointed bidder, this "felicitous blending of remedies" was often unsatisfactory unless the district court permitted discovery. Moreover, unlike the automatic suspension under the Competition in Contracting Act (CICA) for timely GAO and GSBCA protests, a preliminary injunction from a district court invokes a four-pronged test that considers: (1) the probability of success on the merits; (2) the alleged irreparable injury; (3) the public interest; and (4) the relative balance of harms.<sup>24</sup> In actual practice, "the truth of the matter is that *Scanwell* suits are frequently unsuccessful in obtaining injunctions."<sup>25</sup>

In addition to the problems previously identified, the ability of disappointed offerors to obtain relief under the APA has been curtailed by statutes that limit the jurisdiction of district courts. For example, the term "exclusive jurisdiction" in the Federal Courts Improvement Act of 1982 (FCIA)<sup>26</sup> has resulted in the Fourth and Ninth Circuits holding that district courts do not have *Scanwell* jurisdiction before contract award and the First and Third Circuits holding that district courts do have *Scanwell* jurisdiction before award.<sup>27</sup>

<sup>25</sup>Donald P. Arnavas and Peter S. Latham, *Implied Government Duties*, BRIEFING PAPERS NO. 83-8 (August 1983), at 7.

<sup>26</sup>28 U.S.C. § 1491(a)(3).

<sup>27</sup>*Cubic Corporation v. Cheney*, 914 F.2d 1501 (D.C. Cir. 1990). For an analysis of each circuit, see Frederick W. Claybrook, Jr., *The Federal Courts Improvement Act Needs Improvement: A Renewed Call for Its Amendment*, 21 PUB. CONT. L.J. 1 (1992).

Another significant limitation is found at 28 U.S.C. § 1346, the Little Tucker Act. This statute prohibits district courts from taking jurisdiction where the United States is the defendant in a civil action exceeding \$10,000 that involves an express or implied contract or involves liquidated or unliquidated damages in cases not sounding in tort which are subject to sections 8(g)(1) and 10(a)(1) of the Contract Disputes Act.<sup>28</sup> If the dispute is not a suit for money damages, so that it can be heard in district court under 5 U.S.C. § 702, then it apparently cannot be heard in the Court of Federal Claims. The distinction between the Court of Federal Claims and district court jurisdiction often is unclear. A Supreme Court decision, *Bowen v. Massachusetts*,<sup>29</sup> is illustrative of the jurisdictional problems caused by the APA and 28 U.S.C. § 1346.

*Bowen* involved the administration of the Medicaid program. In *Bowen*, the Secretary of Health and Human Services (HHS) disallowed Massachusetts' claim to funding for certain rehabilitative services. The state brought suit for declaratory and injunctive relief in district court. HHS countered that the suit was for money damages because the state intended to secure payment from the U.S. Treasury; therefore, the action had to be brought in the Court of Federal Claims.

The Supreme Court upheld the jurisdiction of the district court,<sup>30</sup> however, the holding is unclear. The Court concluded that the state was not seeking "money damages" even though the effect of injunctive relief would be to require payment by the U.S. Treasury.<sup>31</sup> The Court suggested that money due under a grant program does not constitute money damages because money damages are compensation for injury while money due under a grant program does not provide compensation for injury.<sup>32</sup>

For disappointed bidders, *Bowen* presents the potential for future controversy. By upholding the district court jurisdiction in *Bowen*, the Supreme Court recognized that a suit for the payment of money can be brought in district court where the suit seeks declaratory and injunctive relief rather than money damages. In addition, the Supreme Court suggested, but did not hold, that suits that can be brought in district court under 5 U.S.C. § 702 could not be brought in the Court of Federal Claims because such suits do not seek "damages," but rather seek money to which the plaintiff has a legal right. In contrast, if a disappointed bidder seeks only monetary damages, *i.e.*, bid and proposal costs, then the disappointed bidder ordinarily cannot invoke district court jurisdiction.<sup>33</sup>

---

<sup>28</sup>28 U.S.C. § 1346(a)(2). The jurisdiction granted by this statute has been the subject of a number of Federal court cases. While some courts have concluded that the district courts have no jurisdiction over suits against the United States founded on contracts with the United States, other courts have argued that questions brought under the Contract Disputes Act involve statutory claims within the jurisdiction of the district courts. See *Mark Dunning Industries, Inc. v. Cheney*, 934 F.2d 266, 269 (11th Cir. 1991).

<sup>29</sup>487 U.S. 879 (1988).

<sup>30</sup>*Id.* at 912.

<sup>31</sup>*Id.* at 893.

<sup>32</sup>*Id.* at 893-901.

<sup>33</sup>See *Fairview Township v. United States Environmental Protection Agency*, 773 F.2d 517 (3rd Cir. 1985); *Heyer Products v. United States* 135 Ct. Cl. 63, 140 F. Supp. 409 (1956).

In summary, with respect to the application of the APA to the pre-contract award process, the following observation aptly describes the law in practice:

In an orderly environment, an entity injured by Government action, even in a commercial context, might learn of the path to equitable relief (if any) through modest inquiry. Unfortunately, the Government contracts market place is far from orderly in this respect; the path to equitable relief is often obscured by elusive notions of jurisdiction.<sup>34</sup>

#### **1.5.1.4. Recommendation and Justification**

##### **Retain**

The Panel sought comments from industry and Government agencies concerning the application of 5 U.S.C. §§ 701-706 to the review of contract award actions in district courts. The comments were helpful in focusing upon the utility of this portion of the APA; however, no issues were identified that warrant amendments to the APA. The relative ability of the district courts to review contract award actions under 5 U.S.C. §§ 701-706 and of the U.S. Court of Federal Claims to review contract award actions under 28 U.S.C. § 1491 has engendered much needless litigation. The Panel believes that much of the confusion described in the previous paragraphs will be eliminated by amending 28 U.S.C. § 1491.

#### **1.5.1.5. Relationship to Objective**

Sections 701-706 are consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. These statutes are consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

## 1.5.2. 31 U.S.C. § 3551

### Definitions

#### 1.5.2.1. Summary of the Law

This is the first of five sections of Title 31 that appear as Subchapter V of Title 31 and are collectively entitled "Procurement Protest System." This section defines the term "protest" as "a written objection by an interested party to a solicitation by a Federal agency for bids or proposals for an [sic] proposed contract for the procurement of property or services or a written objection by an interested party to a proposed award or the award of such a contract."<sup>1</sup> This section also defines "interested party" to mean "with respect to a contract or proposed contract . . . an actual or prospective bidder or offeror whose direct economic interest would be affected by the award of the contract or by failure to award the contract."<sup>2</sup> Finally, this section defines "Federal agency" and gives it the same meaning that is used in the Federal Property and Administrative Services Act.<sup>3</sup>

#### 1.5.2.2. Background of the Law

The Procurement Protest System provisions of Title 31 were enacted in 1984 to provide express statutory authority for the GAO protest procedure.<sup>4</sup> In providing this express authority, the Conference Committee stated that this new authority "codifies and strengthens the bid protest function currently in operation at the General Accounting Office."<sup>5</sup>

#### 1.5.2.3. Law in Practice

The definitions that appear in 31 U.S.C. § 3551 are further explained in the GAO Bid Protest Regulations, 4 C.F.R. Part 21, and have been subject to numerous Comptroller General decisions. The decisions of the GAO have adequately defined instances where there is uncertainty regarding the definitions in section 3551. The term "protest," for example, has been interpreted by the GAO to mean a written objection to a solicitation issued by a Federal agency as well as to a solicitation issued by a contractor, such as a managing and operating contractor, acting on behalf of Federal agencies.<sup>6</sup> Similarly, the GAO lacked jurisdiction over a procurement by the Resolution Trust Corporation because it was a mixed-ownership corporation rather than a Federal agency.<sup>7</sup>

---

<sup>1</sup>31 U.S.C. § 3551(1).

<sup>2</sup>31 U.S.C. § 3551(2).

<sup>3</sup>40 U.S.C. § 472.

<sup>4</sup>The Procurement Protest System provisions were enacted as part of the Competition in Contracting Act of 1984 (CICA) and CICA was in turn a part of the Deficit Reduction Act of 1984, Pub. L. No. 98-369, 1984 U.S.C.C.A.N. (98 Stat.) 494.

<sup>5</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1435 (1984), reprinted in 1984 U.S.C.C.A.N. 1445, 2123.

<sup>6</sup>*Rohde and Schwartz--Polarad, Inc.*, Comp. Gen. B-219108.2, 85-2 CPD ¶ 33.

<sup>7</sup>*Kennan Auction Company*, Comp. Gen. B-248965, 92-1 CPD ¶ 503.

Where an award has been made, the GAO Bid Protest Regulations limit the definition of "interested party" for the purpose of participating in a protest to an awardee.<sup>8</sup> Where the protest challenges the terms of a solicitation, only those parties eligible to bid are interested parties.<sup>9</sup> The GAO does not regard entities such as associations, labor unions, or prospective suppliers to prime contractors to be interested parties.<sup>10</sup>

#### **1.5.2.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retaining 31 U.S.C. § 3551 as presently written. The Panel sought comments from industry and Government agencies concerning the statute and determined that it fills a valid need, and no issues were identified which warranted an amendment. The existing body of Comptroller General decisions has adequately resolved any confusion regarding the statutory definitions of protest, interested party, and Federal agency.

#### **1.5.2.5. Relationship to Objectives**

The statute is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

### 1.5.3. 31 U.S.C. § 3552

#### Protest by interested parties concerning procurement actions

##### 1.5.3.1. Summary of the Law

This section of the Procurement Protest System provisions of Title 31 provides that the Comptroller General shall consider properly filed and authorized protests concerning alleged violations of procurement statutes or regulations. This section further provides that an interested party who has filed a protest with the GSBICA may not file a protest with respect to that same matter with the GAO.

##### 1.5.3.2. Background of the Law

Refer to the analysis of 31 U.S.C. § 3551 at Chapter 1.5.2 of this Report.

##### 1.5.3.3. Law In Practice

The basic authority for the Comptroller General to decide protests is provided by this section. The Comptroller General is given the authority to consider a protest that alleges a "violation of a procurement statute or regulation."<sup>1</sup> This authority is similar to the authority given to the GSBICA to consider protests under the Brooks Act.<sup>2</sup>

In actual practice, the Comptroller General looks beyond statutes and regulations to examine whether an agency's actions are "reasonable." For example, the agency's evaluation of a protester's technical proposal must be fair, reasonable, and in accordance with the evaluation criteria.<sup>3</sup> Similarly, an agency's evaluation of a cost proposal must be reasonable.<sup>4</sup> Likewise, if a specification is alleged to be ambiguous, the Comptroller General will examine whether the agency's interpretation is reasonable.<sup>5</sup>

The GAO Bid Protest Regulations provide, among other things, that the GAO may summarily dismiss protests which fail to comply with any of the bid protest regulations.<sup>6</sup> They also provide that the GAO will summarily dismiss protests which on their face do not state a valid basis for protest.<sup>7</sup> In a presentation to the Panel, representatives of the GAO indicated that about

<sup>6</sup>4 C.F.R. § 21.1(f).

<sup>7</sup>4 C.F.R. § 21.3(m).

50% of all protests are summarily dismissed.<sup>8</sup>

If a protest is filed before the GSBICA, the GAO will not consider a protest involving that procurement, even if from another party, while the protest is pending before the GSBICA.<sup>9</sup>

#### **1.5.3.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retaining 31 U.S.C. § 3552 as presently written. The Panel sought comments from industry and Government agencies concerning the statute and determined it fulfills a valid need, and no issues were identified warranting amendment.

#### **1.5.3.5. Relationship to Objectives**

The statute is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

<sup>9</sup>GAO Office of General Counsel, BID PROTESTS AT GAO: A DESCRIPTIVE GUIDE 9 (4th ed. 1991).

#### 1.5.4. 31 U.S.C. § 3553

### Review of protests; effect on contracts pending decision

#### 1.5.4.1. Summary of the Law

This section of the Procurement Protest System provisions of Title 31 establishes the procedures for agency submission of reports on protests. It also provides for suspension of contract award or performance.

A Federal agency must submit a detailed report to the Comptroller General under this section unless the protest has been dismissed as frivolous or because it fails on its face to state a valid basis for protest. Furthermore, the section establishes deadlines for the submission of these agency reports. Finally, the section requires each Federal agency to provide to an interested party any document which is relevant to a protested procurement action, including the agency report, provided that release of the document would not give the party a competitive advantage.

When a protest has been filed prior to the award of any procurement, the contract may not be awarded while the protest is pending unless the head of the procuring activity responsible for the award of the contract makes written findings that urgent and compelling circumstances significantly affecting the interests of the United States will not permit waiting for a decision from the Comptroller General, and the Comptroller General is so advised.

Where the Comptroller General has notified the agency of a protest within 10 calendar days of the date of contract award, the agency must immediately direct the contractor to suspend performance under the contract.<sup>1</sup> It is insufficient that the protester notified the agency within 10 calendar days; the notice must come from the GAO.<sup>2</sup> Performance of the contract may not be resumed during the pendency of the protest unless the head of the procuring activity responsible for the contract award authorizes performance of the contract. This can occur when the head of the procuring activity makes a written finding that: (1) performance of the contract is in the best interest of the United States, or (2) urgent and compelling circumstances significantly affecting the interests of the United States will not permit waiting for the decision of the Comptroller General. The GAO will not review an agency's decision to authorize contract performance despite the pendency of a protest.<sup>3</sup>

#### 1.5.4.2. Background of the Law

This section made two fundamental changes in the manner in which the GAO treated protests prior to 1984. First, the section requires Federal agencies to provide interested parties

---

<sup>1</sup>The ten days are measured in calendar days and not working days. *Survival Technology, Inc. v. Marsh*, 719 F. Supp. 18 (D.D.C. 1989).

<sup>2</sup>*Motorola, Inc.*, Comp. Gen. B-235599, 89-2 CPD ¶ 252 n.2.

<sup>3</sup>*Corbin Superior Composites, Inc.*, Comp. Gen. B-236777.2, 90-1 CPD ¶ 2.

with copies of documents which are relevant to a protest, provided that release of such documents would not give the party an unfair competitive advantage. This requirement greatly expanded protesters' access to the agency record. Second, the section requires agencies to delay contract award or suspend contract performance pending the resolution of protests. Prior to the enactment of these changes, agencies frequently awarded contracts or allowed contract performance to continue despite the pendency of a protest.

#### 1.5.4.3. Law in Practice

This section, like other sections of the Procurement Protest System, is implemented through the GAO Bid Protest Regulations<sup>4</sup> and through provisions of Part 33 of the FAR.<sup>5</sup> The GAO Bid Protest Regulations and the FAR specify the contents of the agency report and establish procedures for the release of documents by agencies to interested parties.

The GAO Bid Protest Regulations provide that documents which would give an interested party a competitive advantage may be released to certain counsel for the interested party or to independent experts under a protective order.<sup>6</sup> If an agency refuses to release documents to interested parties, the GAO may draw an adverse inference or impose sanctions, such as not allowing an agency to respond to a particular ground for protest.<sup>7</sup>

The Bid Protest Regulations also provide procedures for notification to the GAO when a contract award has been made after a protest has been filed or when performance is allowed to continue.<sup>8</sup> In August 1992, representatives of the GAO told the Panel that in the past year only eight contracts were awarded after a protest was filed with the GAO.<sup>9</sup> For post-award protests, Government agencies determined in 175 cases to allow performance to continue after a protest was filed within 10 calendar days of contract award.<sup>10</sup>

In its initial implementation of 31 U.S.C. § 3553, the GAO provided interested parties with modest access to relevant agency records and provided only informal conferences to review disputed issues.<sup>11</sup> Under rules issued in 1991, the GAO greatly expanded this access by allowing the use of protective orders to provide interested parties with access to a broad range of agency documents. Under the new rules, the GAO may also conduct a formal hearing and take testimony from agency officials and witnesses who are testifying on behalf of a protester or as experts on procurement matters.<sup>12</sup>

#### 1.5.4.4. Recommendations and Justification

##### Amend

The Panel received relatively few comments concerning 31 U.S.C. § 3553. In general, the respondents expressed no desire to significantly amend this section. After consideration of comments and analysis of the law, the Panel believes it is appropriate to make changes to assure more expeditious and efficient resolution of protests, to modify provisions that have led to confusion on the meaning of this section, and to address debriefings.

##### I

**The Procurement Protest System provisions of Title 31 should use consistent terminology for the time in which statutory action must be taken by using the term "calendar days."**

Various provisions of 31 U.S.C. §§ 3553 and 3554 use the terms "working days" and "day" or "days" to specify when certain actions must be taken. Similar usage occurs in 40 U.S.C. § 759 with respect to protests filed at the GSBICA. There is no statutory definition of these terms in Titles 31 and 40. Titles 31 and 40 do not provide an express provision for computing time periods. The GAO Bid Protest Regulations and the GSBICA rules provide some guidance on this topic.

This difference in use of terminology has led to confusion, to numerous decisions which seek to define and apply these terms, and to conflict between the GAO protest decisions and the decisions of the GSBICA on similar provisions. The GAO General Counsel observed that every year, GAO spends time:

[D]ocumenting decisions on whether a snow day on Thursday was a calendar day or actually a working day. The San Diego protester actually has trouble understanding this act of nature.<sup>13</sup>

The use of calendar days is well accepted in law and the Panel believes that this is an appropriate terminology.

##### II

**The provision of 31 U.S.C. § 3553 which requires suspension of contract performance when a protest is filed within 10 days of contract award should be modified to also require an agency to suspend contract performance if a protest is filed within 3 calendar days after the date set by an agency for any requested and required debriefing.**

---

<sup>13</sup>Minutes of the August 13, 1992 meeting of the Panel.

Where a Federal agency receives notice of a protest after a contract has been awarded, the Panel believes that 31 U.S.C. § 3553 should be modified to provide that the agency must suspend contract performance if a protest is filed within 10 calendar days of the date of the contract award or within 3 calendar days from the date set by an agency for any requested and required debriefing of an unsuccessful offeror, whichever is later. In another section of this Report, the Panel is recommending changes to 10 U.S.C. § 2305 to require regulations to provide more meaningful and timely debriefings and to specify when debriefings are required to be offered. These changes would be made in regulations also providing that the debriefing explain the strengths and weaknesses of the offeror's proposal.<sup>14</sup>

In its 1989 Report on Bid Protests, the American Bar Association Section of Public Contract Law listed the results of a survey conducted of protesters and attorneys who represented protesters.<sup>15</sup> These results documented the commonly accepted belief that a number of protests are filed before debriefings on information and belief that the agency improperly conducted the acquisition. A protest might not have been filed if a meaningful debriefing had been provided in a timely manner. The proposed change is intended to eliminate such needless protests.<sup>16</sup>

The Panel believes that there is a simple rationale for this change. The proposed changes address one of the fundamental principles the Panel adopted for making changes to existing protest statutes, *i.e.*, by providing offerors access to nonprivileged information on agency decisions, needless protests can be avoided. This change will require agencies to provide timely and meaningful debriefings. It should be noted that the Commission of Government Procurement, after observing that inadequate debriefings led to unnecessary protests, made a recommendation in 1972 that meaningful debriefings be offered to disappointed parties, and this recommendation has not yet been fully adopted.<sup>17</sup>

The change which the Panel recommends provides that the period for suspension ends three days after an unsuccessful offeror has been given an opportunity to attend a debriefing. The Panel chose the date an unsuccessful offeror has been given an opportunity to attend a debriefing because an offeror should not be able to extend the opportunity to suspend performance by delaying the conducting of the debriefing to the detriment of the agency, the awardee, or other unsuccessful offerors. The Panel believes that regulations on debriefing should specify how the offer of a debriefing would be made and how notice of that offer can be given. This could be accomplished in a variety of ways including the use of a provision in a solicitation which specifies when and how debriefing will be conducted.

---

<sup>14</sup>See Chapter 1.2.2 of this Report.

<sup>15</sup>*The Protest Experience under the Competition in Contracting Act*, Bid Protest Committee, American Bar Association, Section of Public Contract Law (1989).

<sup>16</sup>No comments were received that were adverse to this proposed change. The Computer and Communications Industry Association (CCIA), the Council of Defense and Space Industry Associations (CODSIA), and the Computer and Business Equipment Manufacturers Association (CBEMA) approved of the recommendation. See letter from Stephanie Biddle, CCIA President, to Mr. Thomas J. Madden (Nov. 19, 1992); letter from CODSIA Panel Members to Rear Admiral Vincent (Dec. 1, 1992) and letter from John Pickett, CBEMA President, to Maj Gen John D. Slinkard, USAF and Mr. Thomas J. Madden (Oct. 20, 1992).

<sup>17</sup>Commission on Government Procurement, Part G, ch. 3, p. 45 (1972).

The Panel recognizes that an unsuccessful offeror must rapidly prepare a protest to comply with the three-day deadline. Conversely, the Panel appreciates the disruptive impact to agencies when protests are unduly extended. The Panel struck a balance of three days. Congress might determine that a different period of time is appropriate.

There are many innovative approaches to debriefing which can be used to implement the Panel's recommendation and which are now being used by DOD agencies. For example, the Defense Intelligence Agency has held a group debriefing in which all offerors were invited to come, shortly after the contract award, to learn of the agency's rationale for selecting the successful offeror. In conjunction with that group debriefing, offerors were provided an opportunity immediately after the group debriefing for individual debriefings.<sup>18</sup> This procedure can readily assure that all required debriefings are accomplished within 10 calendar days of contract award and would not lead to any change in the required period of time under current law for filing protests in order to invoke the suspension provisions of 31 U.S.C. § 3553.

When the agency suspends contract performance after award, the agency will ordinarily issue a stop work order. The Panel appreciates that stop work orders pursuant to FAR 52.233-3 can be expensive to both the agency and the contractor. Accordingly, nothing in these recommendations should preclude an agency from offering debriefings within 10 days of contract award.

### III

**The terminology in 31 U.S.C. §§ 3553 and 3554, which specifies that certain actions should be taken by the head of the procuring activity, should be changed to require such actions to be taken by the head of the contracting activity.**

Sections 3553 and 3554 of 31 U.S.C. establish obligations for the head of a procuring activity. For example, 31 U.S.C. § 3553 states that the head of the procuring activity may make written findings that would authorize the performance of a contract when a protest is filed within 10 calendar days of award. It further provides that the head of the procuring activity may not delegate this responsibility.

Unfortunately, no definition is provided for the term "head of the procuring activity," and this has led to confusion, delay, and unnecessary expenditure of legal resources in determining congressional intent. The FAR uses and defines the term "head of the contracting activity" in stating who has responsibility for significant procurement decisions.<sup>19</sup> The Panel believes that this term is well understood and recommends that the Procurement Protest System provisions of Title

---

<sup>18</sup>This information was provided by Mr. Robert Beery, an attorney for the Defense Intelligence Agency.

<sup>19</sup>In the FAR, 48 C.F.R. § 2.101, the head of the contracting activity is defined as "the official who has overall responsibility for managing the contracting activity." The contracting activity is defined as "an element of an agency designated by the agency head and delegated broad authority regarding acquisition functions."

31 be modified to substitute the term "head of the contracting activity" for "head of the procuring activity."

#### IV

**The Comptroller General should be given express authority to issue protective orders to allow attorneys and technical consultants for interested parties access to competition-sensitive or proprietary information.**

The GAO Bid Protest Regulations were amended in 1991 to authorize the GAO to issue protective orders which allow access by certain counsel for interested parties and expert witnesses to information in the procurement file where unrestricted release of this information might give an interested party a competitive advantage in a procurement.<sup>20</sup> The GAO Bid Protest Regulations provide detailed guidance on when protective orders can be issued and who can access information under the protective orders.<sup>21</sup>

Some Federal agencies have asserted that because the Comptroller General does not have express authority to issue protective orders, release of information to interested parties under protective orders would violate the Trade Secrets Act, 18 U.S.C. § 1905. This provision of law makes it a crime for Federal agencies to release trade secrets of a private party. These agencies have also argued that release of competition-sensitive information could violate the Procurement Integrity Act, 40 U.S.C. § 423, and other provisions of law applicable to protection of sensitive information.

During a presentation to the Panel, GAO representatives identified the lack of authority to issue protective orders as a problem. When asked if statutory authority to issue protective orders would be helpful, the GAO General Counsel responded affirmatively.<sup>22</sup> Accordingly, the Panel recommends that the Comptroller General be given express statutory authority to issue protective orders. The recommended provision is modeled, in part, on Rule 26(c) of the Federal Rules of Civil Procedure.<sup>23</sup>

The recommended provision provides that, notwithstanding any other provision of law, the Comptroller General can issue an appropriate protective order allowing access to documents or information, including Federal agency documents, under restricted terms and conditions. The recommended provision also expressly provides that procurement-sensitive trade secrets, proprietary or confidential business records, or similar information can be provided under a protective order with restrictions on disclosure. Finally, the provision provides that a protective order can be issued for any hearing to be conducted by the GAO so as to assure that only those persons who have agreed to the terms of the protective order may participate in a hearing.

---

<sup>20</sup>4 C.F.R. § 21.3(d).

<sup>21</sup>*Id.*

<sup>22</sup>Minutes of the August 13, 1992 meeting of the Panel.

<sup>23</sup>Fed. R. Civ. P. 26(c).

The Panel intends that the phrase "notwithstanding any other provision of law" would be given its normal usage and, as used in the recommendation, would mean that the authority to issue protective orders would supersede all applicable existing laws, such as the provisions of 18 U.S.C. § 1905.<sup>24</sup>

The Panel recognizes that some sanctions are necessary if a protective order is violated. The GAO rules provide that any "violation of the terms of a protective order may result in the imposition of such sanctions as the General Accounting Office deems appropriate, including but not limited to referral of a possible violation to appropriate bar associations or other disciplinary bodies, and restricting the practice of counsel before the General Accounting Office."<sup>25</sup> However, there is a basis for concern that technical consultants could willfully violate a protective order without being properly disciplined. The Panel has addressed this concern in a proposed revision to 41 U.S.C. § 423.<sup>26</sup>

#### **1.5.4.5. Relationship to Objectives**

Adoption of these recommendations is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

#### **1.5.4.6. Proposed Statute**

##### **31 U.S.C. § 3553. Review of protests; effect on contracts pending decision**

(a) Under procedures prescribed under section 3555 of this title, the Comptroller General shall decide a protest submitted to the Comptroller General by an interested party.

(b)(1) Within one ~~working~~ calendar day ~~from the date~~ of the receipt of a protest, the Comptroller General shall notify the Federal agency involved of the protest.

(2) Except as provided in paragraph (3) of this subsection, a Federal agency receiving a notice of a protested procurement under paragraph (1) of this subsection shall submit to the Comptroller General a complete report (including all relevant documents) on the protested procurement --

(A) within ~~25-working~~ 35 calendar days from the date of the agency's receipt of that notice;

<sup>24</sup>See *Liberty Maritime Corp. v. U.S.*, 1990 U.S. Dist. LEXIS 20046, at 17-18 (D.D.C. Feb. 6, 1990) (mem.), *aff'd*, 928 F.2d 413 (D.C. Cir. 1991).

<sup>25</sup>4 C.F.R. § 21.3(d)(5).

<sup>26</sup>See Chapter 6.2 of this Report.

(B) if the Comptroller General, upon a showing by the Federal agency, determines (and states the reasons in writing) that the specific circumstances of the protest require a longer period, within the longer period determined by the Comptroller General; or

(C) in a case determined by the Comptroller General to be suitable for the express option under section 3554(a)(2) of this title, within ~~20 working~~ 25 calendar days from the date of the Federal agency's receipt of that determination.

(3) A Federal agency need not submit a report to the Comptroller General pursuant to paragraph (2) of this subsection if the agency is sooner notified by the Comptroller General that the protest concerned has been dismissed under section 3554(a)(3) of this title.

(c)(1) Except as provided in paragraph (2) of this subsection, a contract may not be awarded in any procurement after the Federal agency has received notice of a protest with respect to such procurement from the Comptroller General and while the protest is pending.

(2) The head of the ~~procuring~~ contracting activity responsible for award of a contract may authorize the award of the contract (notwithstanding a protest of which the Federal agency has notice under this section) --

(A) upon a written finding that urgent and compelling circumstances which significantly affect interests of the United States will not permit waiting for the decision of the Comptroller General under this subchapter; and

(B) after the Comptroller General is notified of that finding.

(3) A finding may not be made under paragraph (2)(A) of this subsection unless the award of the contract is otherwise likely to occur within 30 calendar days from the date of the finding thereafter.

(d)(1) If a Federal agency receives notice of a protest under this section after the contract has been awarded but (A) within 10 calendar days of the date of the contract award or (B) within 3 calendar days from the debriefing date offered to an unsuccessful offeror for any requested and required debriefing, whichever is later, the Federal agency (except as provided under paragraph (2)) shall, upon receipt of that notice, immediately direct the contractor to cease performance under the contract and to suspend any related activities that may result in additional obligations being incurred by the United States under that contract. Performance of the contract may not be resumed while the protest is pending.

(2) The head of the ~~procuring~~ contracting activity responsible for award of a contract may authorize the performance of the contract (notwithstanding a protest of which the Federal agency has notice under this section)--

(A) upon a written finding --

(i) that performance of the contract is in the best interests of the United States; or

(ii) that urgent and compelling circumstances that significantly affect interests of the United States will not permit waiting for the decision of the Comptroller General concerning the protest; and

(B) after the Comptroller General is notified of that finding.

(e) The authority of the head of the ~~procuring~~ contracting activity to make findings and to authorize the award and the performance of contract under subsections (c) and (d) of this section may not be delegated.

(f) Within such deadlines as the Comptroller General prescribes, upon request each Federal agency shall provide to an interested party any document relevant to a protested procurement action (including the report required by subsection (b)(2) of this section) that would not give that party a competitive advantage and that the party is otherwise authorized by law to receive; provided, however, that the Comptroller General, under the procedures established pursuant to 31 U.S.C. § 3555, may make an appropriate protective order specifying that notwithstanding any other provision of law (1) access to documents or information, including any Federal agency documents or information, may be had on specific terms and conditions, (2) procurement sensitive, trade secret or other proprietary and confidential research, development, or commercial information not be disclosed or be disclosed only in a designated way, and (3) any hearing be conducted with no one present except persons designated by the Comptroller General.

## **1.5.5. 31 U.S.C. § 3554**

### **Decisions on protests**

#### **1.5.5.1. Summary of the Law**

This section of the Procurement Protest System provisions of Title 31 establishes the process and timing by which protests that are filed with the GAO are resolved. This section also requires the Comptroller General to recommend certain enumerated actions if the Comptroller General determines that a solicitation, a proposed award, or an actual award violates a procurement statute or regulation. The recommended actions could include terminating a contract and recompeting the acquisition. Where a protest is sustained, the Comptroller General may declare that an interested party is entitled to the costs of filing and pursuing the protest, including reasonable attorneys fees and bid or proposal preparation costs.

The guiding principle for resolution of GAO bid protests is set forth in the opening paragraph of this section which states that "[t]o the maximum extent practicable, the Comptroller General shall provide for the inexpensive and expeditious resolution of protests under this subchapter."<sup>1</sup> In furtherance of this principle, this section requires the Comptroller General to issue a final decision concerning protests within 90 working days after the protest is submitted to the Comptroller General.<sup>2</sup> This section also requires the Comptroller General to establish an express option for deciding protests which the Comptroller General determines suitable for resolution within 45 calendar days from the date the protest is submitted.<sup>3</sup>

#### **1.5.5.2. Background of the Law**

Refer to analyses of 31 U.S.C. §§ 3551, 3552, and 3553 at Chapters 1.5.2, 1.5.3, and 1.5.4, respectively, of this Report.

#### **1.5.5.3. Law in Practice**

In discussions with the Panel, representatives of the GAO stated that the GAO currently averages 48 calendar days for deciding all protests.<sup>4</sup> The time period for resolving an initial protest may be reset whenever an amendment raising a material new ground for protest is filed. According to the GAO representatives, the express option procedure had only been determined suitable for 10 protests since 1987.<sup>5</sup>

---

<sup>1</sup>31 U.S.C. § 3554(a)(1).

<sup>2</sup>*Id.* ("[T]he Comptroller General shall issue a final decision concerning a protest within 90 working days from the date the protest is submitted to the Comptroller General.").

<sup>3</sup>31 U.S.C. § 3554(a)(2).

<sup>4</sup>Minutes of the August 13, 1992 meeting of the Panel.

<sup>5</sup>*Id.*

When the Comptroller General reviews a protest and determines that an agency's actions do not comply with a procurement statute or regulation, the Comptroller General recommends that the Federal agency take certain enumerated actions, including opening the procurement for further competition or issuing a new solicitation. In practice, Federal agencies follow the recommendations of the GAO and rarely depart from these recommendations.<sup>6</sup>

The authority of the Comptroller General to make such recommendations was the subject of litigation shortly after the enactment of the Competition in Contracting Act (CICA). In *Ameron v. United States Army Corps of Engineers*,<sup>7</sup> the court ruled that the Procurement Protest System provisions of Title 31 are constitutional.<sup>8</sup>

The Comptroller General is also authorized to declare that an interested party is entitled to the costs of filing and pursuing a protest, including reasonable attorneys' fees. Such costs must be paid by the contracting agency. The authority of the Comptroller General to make such recommendations has been the subject of pending litigation.<sup>9</sup> In *U.S. v. Instruments S.A., Inc.*, the Department of Justice argued that Congress violated the constitutional separation of powers doctrine when it authorized the GAO, a legislative branch agency, to declare that an executive branch agency must pay such costs.<sup>10</sup>

#### 1.5.5.4. Recommendations and Justification

##### Amend

The Panel sought comments from Government and private sector entities concerning 31 U.S.C. § 3554. In general, respondents expressed no desire to fundamentally change this section. After consideration of comments and analysis of the law, the Panel believed that certain changes should be made to improve the efficiency and effectiveness of the GAO bid protest process with respect to the decision process set forth in 31 U.S.C. § 3554.

##### I

**The period for considering protests under the express option alternative of 31 U.S.C. § 3554 should be expanded from 45 calendar days to 65 calendar days after the date the protest is submitted.**

The Comptroller General is required to provide "for the inexpensive and expeditious resolution of protests" under the Procurement Protest Systems provisions of Title 31.<sup>11</sup> The

<sup>6</sup>In its January 31, 1989 Bid Protest Report, for example, the GAO stated that "there are no reportable FY 1988 cases where our recommendations were not followed." GAO Report B-158766 (Jan. 31, 1989).

<sup>7</sup>809 F.2d 979 (3d Cir. 1986), cert. granted, 485 U.S. 958, cert. dismissed, 488 U.S. 918 (1988).

<sup>8</sup>*Id.* at 989-99.

<sup>9</sup>*United States v. Instruments, S.A., Inc.*, No. 91-1574 (D.D.C., Nov. 13, 1992) (granting motion to dismiss for lack of jurisdiction).

<sup>10</sup>*Id.*

<sup>11</sup>31 U.S.C. § 3554(a)(1).

Comptroller General is directed to establish an express option for deciding those protests which are suitable for resolution within 45 calendar days from the date the protest is submitted. The Panel believes it is in the best interest of DOD to have efficient, expeditious resolution of bid protests and strongly supports the use of the express option.

The Panel originally sought comments from industry on a change to the express option provision which would have required that the express option be used in every case in which the head of the contracting activity determined to proceed with award or performance of the contract even though a protest may have been filed before award or within 10 calendar days of contract award. As noted earlier, 31 U.S.C. § 3553 requires suspension of award or performance unless the head of the procuring activity makes certain findings. Numerous Government and private sector respondents objected to this use of the express option.<sup>12</sup>

While supporting expeditious resolution of protests, Government representatives were concerned that the burden imposed on the agencies to assist the GAO in resolving protests in 45 calendar days would cause agencies to suspend contract performance even though it was in the best interest of the United States to allow contract performance to continue, or even though there were urgent and compelling circumstances to allow performance to continue. The Panel was persuaded by these comments not to make the use of the express option mandatory in these circumstances.

At the August 13, 1992, Panel meeting, GAO representatives indicated that the GAO was open to suggestions for changes to expedite the protest process and minimize transaction costs. The GAO representatives cautioned against reducing the overall period of time for resolving protests from the current 90-day working period.<sup>13</sup> They indicated that the 90-day working period serves several important purposes. First, they indicated that the GAO currently averages 48 calendar days for deciding all protests. They then stated that the 90-day working period allows GAO to manage variations in its workload. This is valuable because the GAO workload varies seasonally, and there are more protests filed around the end of the fiscal year as the Government is making final decisions on many contract awards. The 90-day working period gives the GAO sufficient flexibility to decide those protests. The 90-day working period also, according to the GAO, provides time for the Government and protesters to take the actions needed to resolve a protest, including preparation and delivery of documents and agency reports, as well as for discussions leading to the release of documents under protective orders. The GAO cautioned that reducing the current 90-day working period could force GAO to use more formal, judicial types of methods for resolution of issues. They indicated it could require more extensive use of discovery techniques, such as depositions and interrogatories, and might require the use of hearings in every case in order to get the issues resolved as quickly as possible. There was also

<sup>12</sup>See memorandum to John S. Pachter, Chair, American Bar Association, Section of Public Contract Law from Bid Protest Committee (Aug. 4, 1992) [hereinafter ABA Comments]; letter from Col Smith, Chief of Army Contract Law Division, to Mr. Stuart A. Hazlett (July 10, 1992); letter from Edward Saul, Deputy Counsel, Naval Air Systems Command, to Mr. Donald Freedman (July 10, 1992).

<sup>13</sup>Minutes of the August 13, 1992 Panel meeting.

support for the GAO's concern in comments prepared for submission to the Panel by the American Bar Association Section of Public Contract Law.<sup>14</sup>

The representatives of the GAO indicated that the express option as currently established is of little utility in expeditiously resolving protests. According to these representatives, only 10 protests have been decided by the express option since 1987.<sup>15</sup> However, since 1987, approximately 400 requests were received for resolution of protests under the express option.<sup>16</sup> In response to a question from the Panel, the GAO representatives indicated that it was likely that more protests could be decided under the express option if the time period were extended.

The Panel determined that it was appropriate to recommend extension of the period for resolution of protests under the express option to 65 calendar days. This is similar to the period of time that is imposed on the resolution of bid protests by the GSBCA under the Brooks Act.<sup>17</sup> While the Brooks Act procedures impose significant burdens on agencies to gather the record and defend protests in a 60-65 calendar day period, the agencies have adjusted to the GSBCA procedures and now routinely and capably defend protests before the GSBCA within 60-65 days.

The Panel believes that if agencies can resolve protests within 60-65 days before the GSBCA with its discovery and adjudicatory procedures, agencies should be able to resolve many more protests than are currently resolved under the 45 calendar day express option within the recommended 65 calendar day period. This is particularly true in light of the fact that the GAO bid protest procedures impose far fewer burdens on agencies than those imposed by the GSBCA.

The recommended change in time for the express option relieves part of the express option burden on agencies by recommending that 31 U.S.C. § 3553(b)(2) be changed to provide that agency reports be due in 25 calendar days.

## II

**31 U.S.C. § 3554 should be amended to provide to the maximum extent practicable that amendments which add new grounds of protest should be resolved within the same time period established for resolution of the initial protest. The Comptroller General should be authorized to resolve amended protests through the use of the express option if the amended protest cannot be resolved within the time period established for resolution of the initial protest.**

---

<sup>14</sup>ABA Comments, *supra* note 12.

<sup>15</sup>Minutes of the August 13, 1992 Panel Meeting.

<sup>16</sup>*Id.*

<sup>17</sup>The GSBCA must now decide its protests in 45 working days. *See* 40 U.S.C. § 759(f)(4)(B). The Panel has recommended that working days be changed to calendar days and has rounded the 45 working-day period up to 65 days.

Under current procedures, protesters usually receive the agency report within 25 working days after filing the initial protest. The agency report typically includes numerous documents, including documents provided in response to the document requests filed by protesters. A review of the agency report and the document request response may lead to the filing of new grounds of protest and new document requests. When new grounds of protest are filed at this stage, or at any stage during the protest, and the new basis of protest requires a new report from the agency, the GAO generally treats the amended protest as though it were a new protest and starts the clock running for decision of the protest from the date of the filing of the amended protest. While this practice is understandable, it can lead to protests which extend for months beyond the 90 calendar day period which began at the filing of the initial protest. This can add to the delays and burdens imposed on Government agencies and offerors alike.

The Panel believes that amendments adding new grounds of protest should be resolved to the maximum extent practicable within the time limits for resolution of the initial protest. Accordingly, the Panel recommends additional language to 31 U.S.C. § 3554 which will address this issue. The Panel also recommends that the Comptroller General be given authority to resolve an amended protest which cannot be resolved within the original time limit through use of the express option. This change could shorten considerably the period for resolution of protests.<sup>18</sup>

### III

**Where the Comptroller General expressly finds that a protest or a portion of a protest is frivolous or has not been brought or pursued in good faith, the interested party who is responsible for pursuing such a matter should pay the costs of the Government to defend its action.**

Bid protests are an essential feature of the statutory scheme for assuring full and open competition for Government contracts. However, protests can impose substantial costs and administrative burdens on the Government as well as on prospective or actual recipients of contract awards. Accordingly, the Panel believes that the protest process should help ensure that only meritorious protests are filed or pursued.

After considerable debate, discussion, and consideration of public comments, the Panel concluded that sanctions should be imposed on parties who file frivolous protests or who do not file or pursue protests in good faith. Under the Panel's recommendations, Congress should enact legislation to provide that interested parties would be liable to the United States for payment of the cost of defending protests or issues in protests which are frivolous or have not been brought or pursued in good faith. Only those interested parties who file or pursue such protests would be liable for payment of Government costs.

---

<sup>18</sup>The only comment made on this proposed recommendation came from the Computer and Business Equipment Manufacturers Association (CBEMA). That organization perceived the recommendation to be "reasonable and could further increase the efficiency of the protest process without diminishing its efficacy." Letter from Mr. John Pickett, CBEMA President, to Maj Gen John D. Slinkard, USAF, and Mr. Thomas J. Madden (Oct. 20, 1992).

The Panel's recommendations provide that there would be no liability where special circumstances make payment unjust. There should also be no liability where a protester or interested party promptly withdraws its protest or a portion of its protest after receiving information which shows that the protest or an issue in the protest is in fact frivolous or can no longer be brought in good faith.

The Panel recognizes that there are significant definitional problems which must be resolved before this legislation can be fully implemented. Accordingly, in 31 U.S.C. § 3555, the Panel has recommended that regulations be issued to address: (1) the calculation and proof of Government costs including specific elements of Government costs which can be recovered; (2) the special circumstances that would make payment unjust; (3) the factual circumstances which would constitute prompt withdrawal of a protest or a protest issue to avoid the imposition of fees; and (4) the definition of what constitutes a frivolous protest or a protest not brought or pursued in good faith.

The rationale for the imposition of such costs includes the following considerations:

- Some protests are simply frivolous or are not filed in good faith. In addition, protests are sometimes pursued even after it becomes readily apparent that the protest is frivolous or does not state valid grounds for protest. Such actions are particularly objectionable when an incumbent contractor seeks to benefit from extended contract performance to the detriment of the awardee.<sup>19</sup>
- Congress intended to discourage frivolous or bad faith protests when it enacted CICA. The Comptroller General, for example, was authorized to dismiss protests at any time under 31 U.S.C. § 3554(a)(3) because it was "the intent of the conferees [on CICA] to keep proper contract awards or due performance of contracts from being interrupted by technicalities which interested parties in bad faith might otherwise attempt to exploit."<sup>20</sup>
- Imposition of monetary sanctions for frivolous protests or protests not brought or pursued in good faith should streamline the acquisition process by discouraging such protests.

The thrust of this recommendation is directed at those protests which add cost and burden to the protest process. It is not directed at the many protests which are summarily dismissed by the GAO at the beginning of the protest process. During a presentation to the Panel, for example, the General Counsel of the GAO indicated that of the approximately 3,000 protests which are filed each year, about half are summarily dismissed by GAO under its current regulations.<sup>21</sup> These regulations, based on 31 U.S.C. § 3554(a)(3), allow dismissal of protests which fail to

---

<sup>19</sup>This practice apparently has been observed by the Air Force Contract Law Center. Letter from Brig Gen Roan, USAF, to Mr. Stuart A. Hazlett (May 15, 1992).

<sup>20</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1436-37 (1984), *reprinted in* 1984 U.S.C.A.N. 1445, 2124-25.

<sup>21</sup>Minutes of the August 13, 1992 Panel meeting.

comply with any of the requirements of the Bid Protest Regulations or which do not on their face state valid grounds for protest.<sup>22</sup>

The Panel has no estimate of the number of protests to which these provisions would apply and believes that the GAO, through the regulatory process, will be better able to define and limit its recommendations to assuring that the fee sanctions are imposed only in those cases which impose unnecessary costs on the procurement system or create an unfair competitive advantage for the party pursuing a frivolous protest or a protest not brought in good faith.

The Panel's original proposal would have imposed the fee sanction in those cases where the protest or an issue in the protest was not substantially justified. The Panel chose to seek public comments on this standard because it had been used in other fee-shifting statutes, including the Equal Access to Justice Act (EAJA)<sup>23</sup> and the provision of Title 10 dealing with validation to proprietary data restrictions which allows the Government to recover its costs of establishing that a private party's assertion of proprietary rights in technical data was not "substantially justified."<sup>24</sup> However, the Panel was persuaded after receiving comments from the Section of Public Contract Law of the American Bar Association, and others, that the use of this standard could impose an unwarranted barrier to the filing of bid protests.<sup>25</sup> There are, for example, many decisions involving EAJA which indicate that the "substantially justified" standard could result in the imposition of fees in cases where an unsuccessful protester had an arguably meritorious protest. These decisions suggest that the "substantially justified" term is subject to broad interpretation.<sup>26</sup>

The Panel decided to limit the imposition of fees to those protests where the Comptroller General makes an express finding that a protest is frivolous or not brought in good faith. By requiring an express finding by the Comptroller General, this provision should avoid the type of needless litigation that can occur in EAJA cases where the issues of payment of attorneys fees are routinely litigated at the end of a case. It is the Panel's expectation that the finding of the Comptroller General would be made as part of the protest decision. The only issue to be disputed would be the actual costs to be paid to the Government.<sup>27</sup>

---

<sup>22</sup>4 C.F.R. §§ 21.1(f), 21.3(m).

<sup>23</sup>Pub. L. No. 96-481, 1980 U.S.C.C.A.N. (94 Stat.) 2325, amended by Equal Access to Justice Act, Extension and Amendment, Pub. L. No. 99-80, 1985 U.S.C.C.A.N. (99 Stat.) 183. EAJA amends 5 U.S.C. § 504, Cost and Fees of Parties (awarded by an agency in agency action), and 28 U.S.C. § 412, Costs and Fees (awarded by courts in judicial actions). Under EAJA, the Government must pay fees, in certain classes of cases, where its position is "not substantially justified."

<sup>24</sup>10 U.S.C. § 2321.

<sup>25</sup>ABA Comments, *supra* note 12. Informal research has shown that there are almost 400 published decisions where the substantially justified test has been litigated. Out of the 35 reported decisions in the first nine months of 1992 where a party argued that the Government's position was not substantially justified, in only seven of those cases was the Government's position upheld. Letter from Deneen J. Melander to Mr. Thomas J. Madden (Dec. 18, 1992).

<sup>26</sup>See e.g., *Jean v. Nelson*, 863 F.2d 759, 767 (11th Cir. 1988); see Donald J. Kinlin, *Equal Access to Justice Act*, 16 PUB. CONT. L.J. 266, 273-276 (Aug. 1986), which contains a detailed discussion of the EAJA "substantially justified" test, noting that the "test has been interpreted many ways." *Id.* at 273.

<sup>27</sup>There are a number of ways in which the United States could recoup its costs from the protester. If the protester has an existing contract with the United States, FAR Subpart 32.6 suggests the agency can set off the costs against that contract. [The Panel expresses no opinion whether such a setoff would violate the Debt Collection Act of 1982.

In choosing to limit the sanction to frivolous protests or protests that are not in good faith, the Panel has looked to several sources, including the provisions of the Rule 11 of the Federal Rules of Civil Procedure.<sup>28</sup> This rule allows the imposition of sanctions on parties who bring litigation which is frivolous or is not pursued in good faith. Rule 11 provides, among other things, that a person signing a document which is filed in court certifies that they have:

Read the pleading, motion, or other paper; that to the best of the signer's knowledge, information, and belief formed after reasonable inquiry it is well grounded in fact and is warranted by existing law or a good faith argument for extension, modification, or reversal of existing law, and that it is not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless increase in the cost of litigation.<sup>29</sup>

The body of case law interpreting Rule 11 should provide some guidance to the regulation writers. Rule 11 decisions recognize, for example, that special circumstances, such as *pro se* matters, may not justify fee-shifting.<sup>30</sup> The standard for determining if a "reasonable inquiry" has been made must, of course, be far less restrictive in bid protests than in other matters to which Rule 11 applies because of the need to file bid protests expeditiously and because of the public policy interests in full and open competition. The Panel recognizes that any use of Rule 11 as a model should be tempered by the concerns raised by the Section of Public Contract Law of the American Bar Association. Specifically, the Section noted that bid protests are characterized by short time frames and an inability to conduct the fullest measure of due diligence, similar to that which can be conducted in a civil proceeding between private parties, because of the procuring agency's control of many of the facts.

In determining the type of fees for which the Government could seek payment, the Panel believes reference can be made to the various Federal fee-shifting statutes including 28 U.S.C. § 2412(d)(2)(A).

The Panel considered and rejected recommendations from Government agencies which would have created a so-called "English Rule" for fee-shifting (i.e., a rule that the losing party pays the fees of the party who prevails). Some Government agencies, for example, argued that since protesters or interested parties who prevail on protest matters are sometimes entitled to recover their attorneys' fees, the Government should be entitled to recover its attorneys' fees if the Government prevails in a protest. The Panel believes that this would unduly restrict the filing of protests and would be inconsistent with the concept that protesters are acting as private attorneys

---

*See generally* Thomas P. Barletta, Contract Debts, BRIEFING PAPERS NO. 92-8 (July 1992).] Under 28 U.S.C. § 2461, the United States could file a civil action to recover its costs.

<sup>28</sup>Fed. R. Civ. P. 11.

<sup>29</sup>*Id.*

<sup>30</sup>Fed. R. Civ. P. 11 (as amended Feb. 1, 1991) advisory committee's note on 1983 amendments.

general in filing bid protests with Government agencies.<sup>31</sup> As private attorneys general, protesters are seeking to ensure that the requirements of full and open competition are met. The Panel feels that its proposal is an adequate counterbalance to the current fee-shifting provisions of Title 31.

#### IV

**Where the Comptroller General determines that an interested party is entitled to the cost of filing and pursuing the protest, the Comptroller General may declare the interested party is entitled to consultant and expert witness fees.**

The recovery of protest costs, including consultant and expert witness fees, advances the purposes of CICA. Such recovery is necessary "to relieve parties with valid claims of the burden of vindicating the public interests which Congress seeks to promote."<sup>32</sup> Recently, the GSBCA deviated from its past precedent of awarding consultant and expert witness fees.<sup>33</sup> Although the GAO has not re-examined its position on consultant and expert witness fees, the Panel has concerns that the GAO will follow the lead of the GSBCA. Recovery of these fees is appropriate for reasons stated by the GAO.<sup>34</sup> Accordingly, the Panel recommends that Congress clarify section 3554 to assure that consultant and expert witness fees may be paid to an interested party.

##### 1.5.5.5. Relationship to Objectives

The statute, as amended, is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute, as amended, is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

##### 1.5.5.6. Proposed Statute

##### **31 U.S.C. § 3554. Decisions on protests**

(a)(1) To the maximum extent practicable, the Comptroller General shall provide for the inexpensive and expeditious resolution of protests under this subchapter. Except as provided under paragraph (2) of this subsection, the Comptroller General shall issue a final decision concerning a protest within ~~90~~ working 125 calendar days from the date the protest is submitted to the Comptroller General.

<sup>31</sup>See e.g., *Armour of America, Inc.--Claims for Costs*, Comp. Gen. B-237690.2, 92-1 CPD ¶ 257 ("In essence, entitlement to bid protest costs relieves a protester of the financial demands of acting as a private attorney general where it brings to light an agency's failure to conduct a procurement in accordance with law and regulation.").

<sup>32</sup>*Hydro Research Science, Inc.--Claim for Costs*, Comp. Gen. L-228501.3, 89-1 CPD ¶ 572 (quoting *Computer Lines*, GSBCA No. 8334-C, 86-2 BCA ¶ 19,403).

<sup>33</sup>See *Sterling Federal System, Inc. v. National Aeronautics and Space Administration*, GSBCA No. 10000-C, 92-3 BCA ¶ 25,118.

<sup>34</sup>See *Armour of America, Inc.--Claims for Costs*, Comp. Gen. B-237690.2, 92-1 CPD ¶ 257.

(2) The Comptroller General shall, by regulation prescribed pursuant to section 3555 of this title, establish an express option deciding those protests which the Comptroller General determines suitable for resolution within 45 65 calendar days from the date the protest is submitted.

(3) Amendments which add new grounds of protest should be resolved, to the maximum extent practicable, within the time limits established under paragraph (1) of this subsection for the initial protest. If amended protests cannot be resolved within such time limit, the Comptroller General may resolve the amended protest through the express option under paragraph (2) of this subsection.

~~(3)~~(4) The Comptroller General may dismiss a protest that the Comptroller General determines is frivolous or which, on its face, does not state a valid basis for protest.

(b)(1) With respect to a solicitation for a contract, or a proposed award or the award of a contract, protested under this subchapter, the Comptroller General may determine whether the solicitation, proposed award, or award complies with statute and regulation. If the Comptroller General determines that the solicitation, proposed award, or award does not comply with a statute or regulation, the Comptroller General shall recommend that the Federal agency --

(A) refrain from exercising any of its options under the contract;

(B) recompete the contract immediately;

(C) issue a new solicitation;

(D) award a contract consistent with the requirements of such statute and regulation;

(E) implement any combination of recommendations under clauses (A), (B), (C), and (D), or

(F) implement such other recommendations as the Comptroller General determines to be necessary in order to promote compliance with procurement statutes and regulations.

(2) If the head of the ~~procuring~~ contracting activity responsible for a contract makes a finding under section 3553(d)(2)(A)(i) of this title, the Comptroller General shall make recommendations under this subsection without regard to any cost or disruption from terminating, recompeting, or reawarding the contract.

(c)(1) If the Comptroller General determines that a solicitation for a contract or a proposed award or the award of a contract does not comply with a statute or regulation, the Comptroller General may declare an appropriate interested party to be entitled to the costs of --

(A) filing and pursuing the protest, including reasonable attorneys' fees (and consultant and expert witness fees); and

(B) bid and proposal preparation.

(2) Monetary awards to which a party is declared to be entitled under paragraph (1) of this subsection shall be paid promptly by the Federal agency concerned out of funds available to or for the use of the Federal agency for the procurement of property and services.

(d) Each decision of the Comptroller General under this subchapter shall be signed by the Comptroller General or a designee for that purpose. A copy of the decision shall be made available to the interested parties, the head of the procuring contracting activity responsible for the solicitation, proposed award, or award of the contract, and the senior procurement executive of the Federal agency involved.

(e)(1) The head of the procuring contracting activity responsible for the solicitation, proposed award, or award of the contract shall report to the Comptroller General, if the Federal agency has not fully implemented these recommendations within 60 calendar days of receipt of the Comptroller General's recommendations under subsection (b) of this section.

(2) Not later than January 31 of each year, the Comptroller General shall transmit to Congress a report describing each instance in which a Federal agency did not fully implement the Comptroller General's recommendations during the preceding fiscal year. The report shall also describe each instance where a final decision was not rendered within 125 calendar days.

(f) If the Comptroller General expressly finds that a protest or a portion of a protest is frivolous or has not been brought or pursued in good faith, the protester or other interested party, who joins the protest, shall be liable to the United States for payment of all or that portion of the United States costs, for which such a finding is made, of reviewing the protest including the fees and other expenses (as defined in section 2412(d)(2)(A) of title 28) incurred by the United States in defending the protest, unless (1) special circumstances would make such payment unjust, or (2) the protester obtains documents or other information for the first time, after the protest is filed with the Comptroller General, which establishes that the protest or a portion is frivolous or has not been brought in good faith and the protester then promptly withdraws the protest or portion of the protest.

## **1.5.6. 31 U.S.C. § 3555**

### **Regulations; authority of Comptroller General to verify assertions**

#### **1.5.6.1. Summary of the Law**

This section of the Procurement Protest System provisions of Title 31 authorizes the Comptroller General to issue regulations. In issuing regulations, the Comptroller General is directed to prescribe procedures for the "expeditious decision of protests."<sup>1</sup> Section 3555 also states that the regulations shall provide that the protest process may not be delayed by the failure of a party to make a filing within the time provided.<sup>2</sup> The Comptroller General is given authority to verify any assertions made by parties in protests filed under the Procurement Protest System provisions.<sup>3</sup>

#### **1.5.6.2. Background of the Law**

Refer to the analysis of 31 U.S.C. § 3551 at Chapter 1.5.2 of this Report.

#### **1.5.6.3. Law in Practice**

In 1985, the Comptroller General issued regulations implementing the Procurement Protest System provisions of Title 31.<sup>4</sup> The regulations were further revised in 1988 and in 1991.<sup>5</sup> The regulations appear in Title 4 of the Code of Federal Regulations.

Consistent with the section 3555 requirement for timely filing of protests and expeditious decisions, the GAO has promulgated two basic rules. The first rule is that protests based upon apparent improprieties in a solicitation must be filed prior to bid opening or prior to the time set for receipt of initial proposals.<sup>6</sup> The second rule is that, except in circumstances addressed in the first rule, protests must be filed within 10 working days after the basis of protest is known or should have been known, whichever is earlier.<sup>7</sup>

#### **1.5.6.4. Recommendations and Justification**

##### **Amend**

The Panel sought comments from the Government and industry concerning 31 U.S.C. § 3555. In general, respondents expressed their support for the GAO Bid Protest Regulations and

---

<sup>1</sup>31 U.S.C. § 3555(a).

<sup>2</sup>*Id.*

<sup>3</sup>31 U.S.C. § 3555(b).

<sup>4</sup>4 C.F.R. Part 21 (1985).

<sup>5</sup>4 C.F.R. Part 21 (1988); 4 C.F.R. Part 21 (1991).

<sup>6</sup>4 C.F.R. § 21.2(a)(1).

<sup>7</sup>4 C.F.R. § 21.2(a)(2).

expressed no desire to significantly amend the law. After consideration of comments, and in light of its recommendations to amend 31 U.S.C. §§ 3553 and 3554, the Panel recommends that regulations be issued in three specific areas.

## I

### **Regulations should be issued for computation of periods of time prescribed or allowed by the Procurement Protest System provisions of Title 31.**

The Panel recommends that the GAO Bid Protest Regulations provide detailed guidance for computing the periods of time specified by the Procurement Protest System provisions of Title 31. The Panel's recommendations for change to 31 U.S.C. § 3555 provide a method for computing days based on calendar days, and reference should be made to the discussion of that section for the particular language which deals with computation of time periods. The recommended changes to 31 U.S.C. § 3555 for computing periods of time are derived from Rule 6 of the Federal Rules of Civil Procedure.<sup>8</sup> The recommended changes provide, for example, that if the last day of the calendar period falls on a Saturday, Sunday, or legal holiday, then the next day on which the GAO would be open for business would be the day on which a required GAO filing must be completed. This change could avoid the confusion that has occurred in computing time periods and that has led to a number of protest decisions which seek to define and explain the time period for which certain actions must be taken.

## II

### **Regulations should be issued to implement the Panel's recommendation for payment of the costs of frivolous protests or protests not filed in good faith.**

The Panel recommends that regulations address implementation of the payment of costs where a frivolous protest is filed or where a protest is not filed in good faith. Reference should be made to the discussion of this topic under 31 U.S.C. § 3554 found at Chapter 1.5.5 of this Report.

## III

### **Regulations should be issued for electronic filing and dissemination of protest documents.**

The Panel recommends that the GAO issue regulations which would allow for electronic filing of all or part of the agency report or any other documents now required to be filed with the GAO. The regulations should take into account the ability of both interested parties and the

---

<sup>8</sup>Fed. R. Civ. P. 6 (as amended Feb. 1, 1991).

Government to achieve electronic access to such filings.

The rationale of this change is threefold. First, it can speed up the protest process and reduce costs of duplicating and preparing material. Second, it is consistent with current Government practices of allowing contractors to submit proposals on electronic media. Third, it is consistent with modern litigation and administrative practices followed by many Federal courts and agencies to allow or even require the filing of pleadings, motions, and agency record documents in both hard copy and electronic media.

The suggestion for allowing electronic filing was made to one of the Panel members by the General Counsel of a large systems integration company. In discussions with industry and Government representatives, it was determined that electronic filing of all or portions of the agency report is now feasible and practical. Over time, this change could result in considerable costs savings. Because electronic filing may not be feasible or desirable in all circumstances, the regulations, as recommended by the Panel, should simply provide for or authorize electronic filing. The regulation should not mandate electronic filings in all cases.

#### **1.5.6.5. Relationship to Objectives**

The statute, as amended, is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. Also, as amended, it is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

#### **1.5.6.6. Proposed Statute**

##### **31 U.S.C. § 3555. Regulations; authority of Comptroller General to verify assertions**

(a) ~~Not later than January 15, 1985,~~ The Comptroller General shall prescribe such procedures as may be necessary to the expeditious decision of protests under this subchapter, including procedures for accelerated resolution of protests under the express option authorized by section 3554(a)(2) of this title. Such procedures shall provide that the protest process may not be delayed by the failure of a party to make a filing within the time provided for the filing.

(b) In computing any period of time prescribed or allowed by this subchapter, the procedures shall provide that the day of the act, event, or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, or, when the act to be done is the filing of a paper at the General Accounting Office or a Federal agency, a day on which weather or other conditions have made the General Accounting Office or Federal agency inaccessible, in which event the period runs until the end of the next day which is not one of the previously mentioned days.

(c) The procedures may provide for electronic filing and dissemination of documents and information required under this subchapter and in so providing shall consider the ability of all

parties to achieve electronic access to such documents and records.

(d) The procedures shall address the implementation of the provisions for payment of costs under section 3554(f) including the composition, proof and calculation of such costs, the special circumstances that make such payment unjust and what constitutes prompt withdrawal of the protest.

(b)(e) The Comptroller General may use any authority available under Chapter 7 of this title and this chapter to verify assertions made by parties in protests under this subchapter.

## **1.5.7. 31 U.S.C. § 3556**

### **Nonexclusivity of remedies; matters included in agency record**

#### **1.5.7.1. Summary of the Law**

The statute provides that the Comptroller General's jurisdiction over protests is not exclusive and that an interested party may file a procurement protest with the contracting agency, a district court, or the Court of Federal Claims. Agency reports submitted in response to a procurement protest filed with the General Accounting Office (GAO) are part of the agency record which is subject to judicial review.<sup>1</sup>

#### **1.5.7.2. Background of the Law**

Congress added this statute as part of the Competition in Contracting Act of 1984 (CICA). It did so to clarify that 31 U.S.C. §§ 3551-6, regarding procurement protests, did not alter "the current rights of any person to seek administrative or judicial review of any alleged violation of a procurement statute or regulation."<sup>2</sup>

#### **1.5.7.3. Law in Practice**

The statute is implemented by GAO Bid Protest Regulations.<sup>3</sup> See discussion in 31 U.S.C. §§ 3551-5.

#### **1.5.7.4. Recommendation and Justification**

##### **Amend**

The Panel recommends retaining this statute as modified. The Panel sought comments from the private sector and Government agencies concerning the statute and determined that it still fulfills a valid need. Consistent with the Panel's recommendation to discontinue *Scanwell* jurisdiction in district courts, reference to "a district court of the United States" is deleted.<sup>4</sup>

#### **1.5.7.5. Relationship to Objectives**

Adoption of this recommendation is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute, as amended, is consistent with the Panel's objective that acquisition laws should provide

---

<sup>1</sup>31 U.S.C. § 3556.

<sup>2</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1437 (1984), reprinted in 1984 U.S.C.C.A.N. 1445, 2125.

<sup>3</sup>4 C.F.R. Part 21.

<sup>4</sup>See Chapter 1.5.8 of this Report for discussion of 28 U.S.C. § 1491 concerning *Scanwell* jurisdiction.

the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

#### **1.5.7.6. Proposed Statute**

##### **31 U.S.C. § 3556. Nonexclusivity of remedies; matters included in agency record**

This subchapter does not give the Comptroller General exclusive jurisdiction over protests, and nothing contained in this subchapter shall affect the right of any interested party to file a protest with the contracting agency or to file an action in ~~a district court of the United States~~ or the United States Claims Court of Federal Claims. In any such action based on a procurement or proposed procurement with respect to which a protest has been filed under this subchapter, the reports required by sections 3553(b)(2) and 3554(e)(1) of this title with respect to such procurement or proposed procurement and any decision or recommendation of the Comptroller General under this subchapter with respect to such procurement or proposed procurement shall be considered to be part of the agency record subject to review.

**1.5.8. 28 U.S.C. § 1491**

**Claims against the United States generally; actions involving  
Tennessee Valley Authority**

**1.5.8.1. Summary of the Law**

This section, commonly referenced as the Tucker Act, gives the Court of Federal Claims jurisdiction to consider claims against the United States for monetary damages which are based on an "express or implied contract."<sup>1</sup> In bid protest actions, the contract on which the Tucker Act claim is based is the "implied contract" that the contract bid will be "fairly and honestly considered."<sup>2</sup> The Court's jurisdiction over contract claims extends to any contract of the United States, except those issued by the Tennessee Valley Authority.<sup>3</sup>

**1.5.8.2. Background of the Law**

The Claims Court was established on October 1, 1982, by the Federal Courts Improvement Act of 1982 (FCIA) and was given the trial court responsibilities of the former Court of Claims.<sup>4</sup> Prior to enactment of FCIA, the Court of Claims could only grant monetary relief, such as bid and proposal costs, to disappointed bidders for Federal contracts.<sup>5</sup> FCIA gave the Court of Federal Claims the "exclusive jurisdiction" to provide equitable relief, including the power to enjoin contract award in protests filed before contract award.<sup>6</sup>

Prior to the enactment of FCIA, the district courts were the only Federal courts which provided equitable relief in bid protests. The consideration of such protests began in 1970 when the Court of Appeals for the District of Columbia Circuit held in *Scanwell Laboratories, Inc. v. Schaffer* that the district courts had this authority.<sup>7</sup> Even though the jurisdiction of the Court of Federal Claims over pre-award protests was stated to be "exclusive" in FCIA, the legislative history of FCIA suggests that Congress intended to retain concurrent jurisdiction over pre-award contracts in the district courts. The Senate Report on FCIA for example, contains the following statement:

By conferring jurisdiction upon the Claims Court to award injunctive relief in the pre-award stage of the procurement process,

---

<sup>1</sup>28 U.S.C. § 1491(a)(1). The Claims Court was renamed the Court of Federal Claims by the Federal Courts Administration Act of 1992, Pub. L. No. 102-572, § 902, 1992 U.S.C.C.A.N. (106 Stat.) 4506.

<sup>2</sup>28 U.S.C. § 1491(a)(1); *United States v. Grimberg*, 702 F.2d 1362, 1368 n.11 (Fed. Cir. 1983).

<sup>3</sup>28 U.S.C. § 1491(a)(1), (b).

<sup>4</sup>Pub. L. No. 97-164, 1982 U.S.C.C.A.N. (96 Stat.) 25.

<sup>5</sup>See, e.g., *Heyer Products Co. v. United States*, 135 Ct. Cl. 63, 140 F. Supp. 409 (1956).

<sup>6</sup>28 U.S.C. § 1491(a)(3).

<sup>7</sup>424 F.2d 859 (D.C. Cir. 1970). *Scanwell* has been effectively adopted by all of the circuit courts of appeal. Jeffrey M. Villet, *Equitable Jurisdiction in Government Contract "Bid Protest" Cases: Discerning the Boundaries of Equity*, 17 PUB. CONT. L.J. 152 (1987); see discussion of 5 U.S.C. §§ 701-706 at Chapter 1.5.1 of this Report.

the Committee does not intend to alter the current state of the substantive law in this area. Specifically, the Scanwell Doctrine as enunciated by the D.C. Circuit Court of Appeals in 1970 is left intact [sic].<sup>8</sup>

### 1.5.8.3. Law in Practice

Over the past 10 years, protests in the Court of Federal Claims have been enmeshed in an endless web of jurisdictional issues. Scores of decisions have been written in an unsuccessful effort to untangle these issues. These decisions have delayed, disrupted, and increased the costs of procurements which have been the subject of these protests.<sup>9</sup> In a 1987 article, one practitioner thought the judicial bid protest system had reached the point where it was "chaos."<sup>10</sup> By 1988, the number of bid protests filed in the Court of Federal Claims had dropped to eight from a high of 69 cases in 1983, the first year after the enactment of FCIA.<sup>11</sup> In FY88, by contrast, 2,633 protests were filed with the GAO.<sup>12</sup>

There are two dominant issues which create these jurisdictional problems. The first deals with whether the Court of Federal Claims has exclusive jurisdiction over pre-award bid protests or whether its pre-award jurisdiction is concurrent with the district courts. The second dominant issue is whether the Court of Federal Claims has jurisdiction over the type of agency wrongdoing for which the GAO and the GSBICA customarily grant relief.

The first dominant issue is intertwined in the language of the Senate Report that is quoted above. That language has led to substantial litigation as the courts have attempted to define what, if any, significance to place on congressional intent. This has created unresolved conflicts between the courts in different parts of the country on whether the Court of Federal Claims is the exclusive judicial forum to consider pre-award bid protests. The problems with the pre-award jurisdiction issues were highlighted in the decision of the Court of Appeals for the District of Columbia in *Cubic Corporation v. Cheney*.<sup>13</sup> The opinion described the confusion among the courts as follows:

[Intervenor] argues that the Federal Courts Improvement Act of 1982 vested the Claims Court with exclusive jurisdiction over pre-award challenges to procurement decisions, and that the district court was therefore without jurisdiction over this cause of action. The 1982 statute provides that "before the contract is awarded, the [Claims Court] shall have exclusive jurisdiction to grant declaratory judgments and such equitable and extraordinary relief as it deems

<sup>8</sup>S. REP. NO. 275, 97th Cong., 2d Sess. 23 (1982), reprinted in 1982 U.S.C.C.A.N. 11, 33.

<sup>9</sup>The delays, disruptions, and costs are compounded when the Government and other interested parties must wait not only for a decision of a district court, but also, as often happens, for a decision of a circuit court of appeals.

<sup>10</sup>Villet, *supra* note 7, at 184.

<sup>11</sup>*American Bar Association, Public Contract Law Section Bid Protest Committee Courts Subcommittee Project* (1991) [hereinafter *Courts Subcommittee Project*].

<sup>12</sup>This figure was provided by the GAO. See also chart accompanying note 20 at Chapter 1.5.0 of this Report.

<sup>13</sup>914 F.2d 1501 (D.C. Cir. 1990).

proper, including but not limited to injunctive relief." (28 U.S.C. § 1491(a)(3)).

Of those courts of appeals that have confronted the issue, two have held that jurisdiction over pre-award challenges is exclusive in the Claims Court, see *J.P. Francis & Assocs., Inc. v. United States*, 902 F.2d 740 (9th Cir. 1990); *Rex Systems, Inc. v. Holiday*, 814 F.2d 994, 997-98 (4th Cir. 1987); two have said as much in dicta, see *F. Alderete General Contractors, Inc. v. United States*, 715 F.2d 1476, 1478 (Fed. Cir. 1983); *B.K. Instrument, Inc. v. United States*, 715 F.2d 713, 721 n.4 (2d Cir. 1983), and two have found concurrent jurisdiction in the district courts, see *Ulstein Maritime, Ltd. v. United States*, 833 F.2d 1052, 1057-58 (1st Cir. 1987) (district courts have "concurrent power to award injunctive relief in pre-award contract cases"); *Coco Bros. v. Pierce*, 741 F.2d 675, 677-79 (3d Cir. 1984) ("A superficial reading of the language in section 1491(a)(3) leads one to a result never intended by Congress"); see also *United States v. John C. Grimberg Co.*, 702 F.2d 1362, 1374-75 (Fed. Cir. 1983) (dictum that Senate and House Reports indicate that jurisdiction "is exclusive only of contract boards").<sup>14</sup>

As indicated by the above language, the law concerning the jurisdiction of district courts on pre-award challenges is at a disjunction.

The second dominant issue concerns whether the Court of Federal Claims has subject matter jurisdiction to consider the types of agency wrongdoing for which the GSBCA and the GAO customarily grant relief. Shortly after FCIA was passed, the Court of Appeals for the Federal Circuit ruled that Congress did not intend to change the legal basis for seeking consideration of bid protests in the Court of Federal Claims. This legal basis is the alleged breach of the Government's implied-in-fact contract to fairly and honestly consider bids or proposals which are received in response to a solicitation.<sup>15</sup>

The Court of Federal Claims jurisdiction is severely limited by the need to find that the Government breached this implied contract. Since the implied contract only arises when bids or proposals are submitted, numerous protests which are considered today by other bid protest forums will not be heard by the Court of Federal Claims.<sup>16</sup>

In a series of decisions, the Court of Appeals for the Federal Circuit and the Court of Federal Claims have ruled that protests will not be considered if: (1) they allege deficiencies in the

---

<sup>14</sup>*Id.* at 1503.

<sup>15</sup>*United States v. Grimberg*, 702 F.2d 1362, 1367-68 (Fed. Cir. 1983); *Heyer Products Co. v. United States*, 135 Ct. Cl. 63, 140 F. Supp 409 (1956); *Ingersoll-Rand Co. v. United States*, 2 Cl. Ct. 373 (1983).

<sup>16</sup>*Ingersoll-Rand Co. v. United States*, 2 Cl. Ct. 373, 376 (1983).

solicitation prior to the required submission of bids;<sup>17</sup> (2) they allege general deficiencies in competition which apply equally to all offerors;<sup>18</sup> or (3) they are filed by certain nonbidders.<sup>19</sup> However, the Court of Federal Claims will consider protests to sole-source or noncompetitive awards where no solicitation is issued.<sup>20</sup>

In addition to the two dominant issues already discussed, there are three potentially troublesome issues that can impact the law in practice. The first of these potentially troublesome issues is that the Government can cogently argue that a district court lacks authority to grant an unsuccessful offeror his bid and proposal fees in excess of \$10,000.<sup>21</sup> The second issue is that a potential offeror may not have standing to challenge the agency's conduct.<sup>22</sup> Finally, although it has yet to be a serious obstacle, unsuccessful offerors must be prepared to establish that they have suffered "an injury in fact."<sup>23</sup>

The previous discussion provides a brief summary of how 28 U.S.C. § 1491 has evolved in practice. In one study, the American Bar Association Section of Public Contract Law made the following observation:

The 1980s witnessed a dramatic evolution of the protest as a remedy for complaints for disappointed bidders in Federal procurements. The Federal Courts Improvement Act of 1982 and the Competition in Contracting Act of 1984 (CICA) created new courts, a unique forum to resolve Automatic Data Processing Equipment (ADPE) for procurement protests, stay provisions, statutory authority for the General Accounting Office (GAO) to resolve bid protests, and new procedural rules and practices with the GAO. These developments produced increased confusion over disappointment with protests in the courts. As we enter the third

---

<sup>18</sup>See Frederick W. Claybrook, Jr., *The Federal Courts Improvement Act Needs Improvement: A Renewed Call for its Amendment*, 21 PUB. CONT. L.J. 1, 18 (1992).

<sup>19</sup>*Howard v. United States*, 21 Cl. Ct. 475, 478 (1990). For a more detailed discussion of this topic see generally, Villet, *supra* note 7, and *Courts Subcommittee Project*, *supra* note 11.

<sup>20</sup>See *Western Pioneer, Inc. v. United States*, 8 Cl. Ct. 291 (1985) (implied contract only arises out of agency obligation to consider responses to published notice of intent to make a noncompetitive award).

<sup>21</sup>*Fairview Township v. United States Environmental Protection Agency*, 773 F.2d 517 (3rd Cir. 1985) (action challenging denial of a Federal grant contract found to be a monetary claim within exclusive jurisdiction of Claims Court); see discussion of 5 U.S.C. §§ 701-706, *supra*, at Chapter 1.5.1 of this Report.

<sup>22</sup>In *Control Data Corp. v. Baldrige*, 655 F.2d 283 (D.C. Cir. 1981), *cert. denied*, 454 U.S. 881, potential bidders lacked standing to enjoin the Government from promulgating standards for specifications to be used in computer acquisitions. The potential bidders did not fall within the zone of interests to be protected by the statute under which the standards were promulgated. See also *Cincinnati Electronics Corp. v. Kleppe*, 509 F.2d 1080 (6th Cir. 1975), where the court found that a party had standing to bring a cause of action based on denial of a contract where the statute authorizing the procurement indicated a congressional intent to bring the protester within the "zone of interests" to be protected.

<sup>23</sup>For a discussion of the different tests used by the various circuits, see Kannan, *supra* note 21, at 421-39.

decade of bid protest jurisdiction in the Federal courts, jurisdictional problems continue to permeate the process.<sup>24</sup>

#### **1.5.8.4. Recommendations and Justification**

The Panel sought comments from Government and the private sector concerning the bid protest jurisdiction of the Federal courts. In general, respondents expressed little desire for significant amendments to the bid protest jurisdiction of the courts. However, after consideration of comments and analysis of the law, the Panel believes that a significant change should be made in the jurisdiction of the Federal courts to consider bid protests.

### **I**

**There should be only one judicial system for consideration of all bid protests and that forum should have jurisdiction to consider all bid protests which can now be considered by the district courts and by the Court of Federal Claims.**

The Panel recognizes that Congress has determined on at least two occasions in the past 10 years that it is appropriate to have a bid protest remedy available in the Federal courts. The Panel, therefore, does not propose to change that determination in its basic recommendations. The Panel believes, however, that there is simply no justification for the jurisdictional confusion created by the availability of two separate judicial systems for consideration of bid protests. There is no need for separate and overlapping bodies of legal precedent on protests<sup>25</sup> and for separate procedures for processing protests.<sup>26</sup> The disputes arising out of such differences unnecessarily delay the resolution of protests and only add confusion and costs to the procurement process. They do not further the goals of full and open competition and efficient procurement. Accordingly, the Panel believes that the best solution to the jurisdictional problem created by the availability of two separate judicial systems is to place all of the jurisdiction of both systems into a single system.

### **II**

**The Court of Federal Claims should be the single judicial forum with jurisdiction to consider all bid protests that can now be considered by any of the district courts or by the Court of Federal Claims.**

---

<sup>24</sup>*Courts Subcommittee Project, supra* note 11, at 1.

<sup>25</sup>Each of the 12 circuits, for example, has adopted a slightly different test for determining if a protester has standing to bring an action. *See Kannan, supra* note 21, at 21-39. While this has not been a significant problem, it highlights the potential for conflicts.

<sup>26</sup>The procedures for discovery, for example, vary from district court to district court, leading to hundreds of different rules. *See Courts Subcommittee Project, supra* note 11, at 43, noting "a surprising lack of uniformity in [discovery] practice."

After extensive discussion and analysis, the Panel believes that the single court to initially consider bid protests should be the Court of Federal Claims. The rationale for this is straightforward.

(1) Only the Court of Federal Claims can effectively serve as the unified judicial forum. Under current law, the jurisdictional issues that arise out of multiple judicial forums create delays, disruptions, and inefficiencies that are inconsistent with streamlining the congressional requirement for expeditious resolution of protests and for streamlining DOD procurements. If the single judicial forum system were the district courts and the regional courts of appeal or if the district courts had concurrent jurisdiction with the Court of Federal Claims, as discussed above, there would still be a potential for jurisdictional problems for the protesters who used the district courts. These jurisdictional problems arise, in part, out of the congressional designation of the Court of Federal Claims as the exclusive forum for claims against the United States, including claims for bid and proposal costs, whereas the Administrative Procedure Act provides that the district courts have jurisdiction to grant declaratory and injunctive relief in bid protest actions.<sup>27</sup>

(2) If the over 500 district courts and 12 regional circuit courts continue to consider bid protests, the potential abounds for conflicting decisions on fundamental procurement issues. This problem was highlighted by two law professors who wrote on another topic that "divergence among the Circuits on so many issues undermines the uniformity and predictability of trials in the Federal Circuits."<sup>28</sup> The Supreme Court has noted that "uniformity and predictability" are fundamental requirements for any legal system and has identified three distinct benefits to uniformity and predictability:

- To enable the parties to plan their affairs by providing a clear guide for their conduct;
- To eliminate the need "to relitigate every relevant proposition in every case," and
- To maintain "public faith in the judiciary as a source of impersonal and reasoned judgments."<sup>29</sup>

The existing system for judicial bid protests lacks these benefits. A single forum at the Court of Federal Claims would make these benefits achievable.

(3) The current system encourages protesters to engage in forum shopping in an effort to select the court in pre-award or post-award cases that would best serve the protester's interests.

---

<sup>27</sup>For further discussion of this problem, see the analysis of 5 U.S.C. §§ 701-706 at Chapter 1.5.1 of this Report.

<sup>28</sup>Edward R. Becker and Aviva Overstein, *Is the Evidence All In?*, 78 A.B.A. J. 82 (Oct. 1992). The divergence discussed in this article was on evidentiary issues. The lack of uniformity on evidentiary decisions in the Federal circuits arises, in part, because, as in Government contract cases, only the Supreme Court can resolve the conflicts in circuit court cases, and "the Supreme Court rarely grants certiorari on evidentiary issues." *Id.* at 85. See *supra*, note 26.

<sup>29</sup>*South Corporation v. United States*, 690 F.2d 1368, 1370 (Fed. Cir. 1983) (quoting *Moragne v. States Marine Lines, Inc.* 398 U.S. 375, 403 (1970), in support of decision of Court of Appeals for the Federal Circuit to adopt the precedent of the United States Court of Claims).

(4) The Court of Federal Claims has substantially more Government contract expertise than the district courts. The Court of Federal Claims has jurisdiction over major Contract Disputes Act cases and, over the years, has considered many more Federal contract cases than have been considered in all the 500 district courts.<sup>30</sup>

(5) The Court of Federal Claims can hold hearings throughout the United States. The Court of Federal Claims is authorized by the law to hold court proceedings anywhere in the United States (including territories and possessions) and even in foreign countries in order to minimize inconvenience and expense to litigants, and thus can hold hearings where the majority of the witnesses are located.<sup>31</sup>

(6) Appeals from the Court of Federal Claims are taken to a single court of appeals: the Court of Appeals for the Federal Circuit. Uniformity is better assured with exclusive jurisdiction in the Court of Federal Claims because, unlike the district courts with their 12 separate circuit courts of appeals, there is only one appellate court that considers appeals for the Court of Federal Claims. In addition, this court of appeals has Government contract law expertise that is based on reviews of appeals of decisions of the Court of Federal Claims and agency boards of contract appeals under the Contract Disputes Act.<sup>32</sup>

(7) The Court of Federal Claims can give more priority to bid protest cases. Federal law requiring speedy trial of criminal cases mandates a higher priority on resolution of these cases in district courts.<sup>33</sup> This generally delays the resolution of civil cases and makes it difficult to obtain speedy resolution of bid protests in district courts.

(8) The Government can be more effectively represented in the Court of Federal Claims. The Government position in Court of Federal Claims cases is now defended by lawyers from the Department of Justice Civil Division in Washington. These attorneys already have Government contract law expertise from defending cases in the Court of Federal Claims. By contrast, Scanwell-type actions in a district court are often defended by an Assistant United States Attorney with comparably less Government contract expertise.

(9) The Court of Federal Claims is the only court with national jurisdiction. The district courts have jurisdiction only within the state or region of the state in which the district is established.<sup>34</sup> By contrast, the Court of Federal Claims enjoys nationwide jurisdiction.<sup>35</sup> The Court of Federal Claims can therefore issue subpoenas for witnesses and document production anywhere in the United States.<sup>36</sup> Because a district court's territorial jurisdiction is limited,

---

<sup>30</sup>41 U.S.C. § 609(a)(1). The district courts currently have jurisdiction over contract cases involving \$10,000 or less under the Little Tucker Act, 28 U.S.C. § 1346(a)(2).

<sup>31</sup>See 28 U.S.C. § 1295(a)(3)-(4).

<sup>32</sup>*Id.*

<sup>33</sup>Speedy Trial Act of 1974, Pub. L. No. 93-619, 1975 U.S.C.C.A.N. (88 Stat.) 2076 (amended 1979).

<sup>34</sup>In some states, such as Maryland, there is a single Federal district court whose jurisdiction is limited to the boundaries of that state. In other states, such as California, there are two or more Federal district courts in the state.

<sup>35</sup>*Courts Subcommittee Project, supra* note 11, at 42.

<sup>36</sup>*Id.*

protesters may have difficulty obtaining personal jurisdiction over necessary parties,<sup>37</sup> and this can be a difficult problem where the protester challenges an award to a contractor who does not reside or do business in the Federal court where the Government agency is located. There are no venue problems for the Court of Federal Claims because its jurisdiction is national.

(10) The United States Court of Federal Claims can now offer monetary or nonmonetary relief in protests which fall within its jurisdiction.<sup>38</sup>

The American Bar Association Section of Public Contract Law opposes abolition of *Scarwell* jurisdiction in the district courts.<sup>39</sup> It lists the following reasons in support of its opposition:

- The Court of Federal Claims is not an effective protest forum because the Court of Federal Claims and the Federal Circuit have restricted the grant of jurisdiction provided to hear protest cases in the Federal Courts Improvement Act of 1982. Furthermore, the Court of Federal Claims has no procedures for expeditious resolution of bid protest cases.
- Restricting access to the Court of Federal Claims would restrict the ability of companies and individuals outside the Washington, D.C. area to use their local district courts.

The first concern will be resolved by the Panel's recommendation that the jurisdiction of the Court of Federal Claims be expanded "to render judgment on an action by an interested party objecting to a solicitation by a Federal agency for bids or proposals for a proposed contract or to a proposed award or the award of such a contract." With this new jurisdiction, the Court of Federal Claims will be able to consider every category of bid protest previously considered by district courts.

The American Bar Association concern arises out of existing Court of Federal Claims and the Court of Appeals for the Federal Circuit decisions. The Panel is proposing specific legislation to overturn the previous decisions that concern the American Bar Association. The net result of the new legislation is that the Court of Federal Claims will have subject matter jurisdiction to consider the types of agency wrongdoing for which the GSBICA and the GAO customarily grant relief.

The Panel believes there is a valid basis for the American Bar Association's other concern, (i.e., the need for interested protesters to utilize Washington, D.C. counsel in protests to the Court of Federal Claims). The Court is in Washington, D.C., and the presence of local counsel is beneficial because of the need for rapid and frequent involvement with the Court on protest

<sup>38</sup>See *Fairview Township v. United States Environmental Protection Agency*, 773 F.2d 517 (3rd Cir. 1985); *Heyer Products v. United States*, 135 Ct. Cl. 63, 140 F. Supp. 409 (1956).

<sup>39</sup>Letter from Karen Hastie Williams, Chair, Section of Public Contract Law of the American Bar Association, to Panel (Dec. 4, 1992).

matters. The Panel does not believe that the inconvenience and possible additional expense of retaining counsel in Washington outweigh the ten enumerated advantages to the Panel's recommendations. In addition, the Court of Federal Claims has a statutory mandate to mitigate such concerns. The Court's enabling legislation states:

The times and places of the sessions of the Claims Court shall be prescribed with a view to securing reasonable opportunity to citizens to appear before the Claims Court with as little inconvenience and expense to citizens as practicable.<sup>40</sup>

Furthermore, the use of telefax machines and telephone conferences can also mitigate against some of the possible expense and inconvenience. Moreover, as a practical matter, Congress was well aware that the vast number of protests would be filed in Washington, D.C. when in 1984 it chose a Washington, D.C. forum, the GSBICA, to hear ADPE protests and codified the GAO protest system. Finally, the district courts are not always located in cities adjacent to the affected Government agency or the interested parties' principal places of business. Therefore, some travel and inconvenience is usually necessary for litigation in any forum.

### III

**The Court of Federal Claims should have jurisdiction to consider all protests which allege violations of procurement law or regulation; it should be authorized to provide relief comparable to that provided by the GAO and the GSBICA.**

In expanding the jurisdiction of the Court of Federal Claims to consider bid protests under the Federal Courts Improvement Act of 1982 (FCIA), Congress intended to establish the Court as a viable alternative to the bid protest remedy then available at GAO. In enacting the Competition in Contracting Act (CICA), for example, the conferees characterized judicial protests as "alternative remedies."<sup>41</sup> The conferees stated that the Procurement Protest System of Title 31, which granted bid protest authority by statute to the GAO, "does not alter the current rights of any person to seek . . . judicial review of any alleged violation of a procurement statute or regulation."<sup>42</sup>

If the Court of Federal Claims is to serve as an effective alternative bid protest forum, its jurisdiction and authority to provide relief must be expanded.<sup>43</sup> Its jurisdiction should, as much as possible, parallel that of the GAO and the GSBICA in order to avoid both the forum shopping and type of confusion that has occurred in the past. Additionally, the court should have a common standard of review with the GAO and GSBICA.

<sup>40</sup>28 U.S.C. § 173.

<sup>41</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1437 (1984), *reprinted in* 1984 U.S.C.C.A.N. 1445, 2125.

<sup>42</sup>*Id.*

<sup>43</sup>The Court of Federal Claims, like other Federal courts, has limited resources. If the court's jurisdiction were expanded, its personnel, funding, and other resources would also need to be increased.

Accordingly, the Panel recommends that the Court of Federal Claims' charter be legislatively changed to accomplish the following principles:

- The statute should provide the Court with jurisdiction to consider all bid protest matters that can now be considered by the district courts and the Court of Federal Claims, including all matters that can be considered by the GAO and the GSBCA.
- The statute should provide that the Court, like the GAO and the GSBCA, is authorized to find improper any agency action which violates a procurement law or regulation.
- The statute should provide that the record before the agency may be supplemented by evidence which relates to the validity of the action at the time it was taken. This will make clear that the Court of Federal Claims can hold evidentiary hearings on bid protest matters.
- The statute should be amended to provide that only interested parties, as defined by the Competition in Contracting Act (CICA), can file protests.<sup>44</sup>
- The statute should provide that if the protester prevails in an action, the Court can grant relief similar to that which the GAO and the GSBCA can provide, including attorneys fees and costs.
- The statute should be amended to provide for expeditious resolution of protests.<sup>45</sup>

The Panel also recommends that an interested party should pay the costs incurred by the Government to defend a protest which is frivolous or not brought and pursued in good faith. Further discussion of the Panel's rationale can be found in Chapters 1.5.5 and 1.5.9 of this Report.

The Panel recognizes the inherent problems associated with changes in the jurisdictional statute for any court. Language changing jurisdictional statutes must be carefully considered and evaluated in order to avoid creating unintended consequences or further problems. Accordingly, the language that follows is offered simply as a model. The Panel recognizes that further discussion and research is appropriate and encourages Congress to do so in its consideration of this legislation.

The recommendation that follows hopefully achieves the six principles set out above.

#### **1.5.8.5. Relationship to Objectives**

This statute, as amended, simplifies the confusing process of pursuing bid protests in Federal court. The proposed change maintains a balance between an efficient process and full and

<sup>44</sup>40 U.S.C. § 759(f)(9)(B) and 31 U.S.C. § 3551(2).

<sup>45</sup>Both the GAO and the GSBCA under 31 U.S.C. §§ 3551-56 and 40 U.S.C. § 759, respectively, are directed to conduct expeditious protests.

open access to the procurement system. Finally, the Court of Federal Claims will provide a means for expeditious and fair resolution of procurement disputes through uniform interpretation of laws and implementing regulations.

#### 1.5.8.6. Proposed Statute

**28 U.S.C. § 1491. Claims against United States generally; bid protests; actions involving Tennessee Valley Authority**

**(a)(1) Claims against the United States.** The United States Court of Federal Claims shall have jurisdiction to render judgment upon any claim against the United States founded either upon the Constitution, or any Act of Congress or any regulation of an executive department, or upon any express or implied contract with the United States, or for liquidated or unliquidated damages in cases not sounding in tort. For the purpose of this paragraph, an express or implied contract with the Army and Air Force Exchange Service, Navy Exchanges, Marine Corps Exchanges, Coast Guard Exchanges, or Exchange Councils of the National Aeronautics and Space Administration shall be considered an express or implied contract with the United States.

**(b)(2) Remedy and Relief.** To provide an entire remedy and to complete the relief afforded by the judgment, the court may, as an incident of and collateral to any such judgment, issue orders directing restoration to office or position, placement in appropriate duty or retirement status, and correction of applicable records, and such orders may be issued to any appropriate official of the United States. In any case within its jurisdiction, the court shall have the power to remand appropriate matters to any administrative or executive body or official with such direction as it may deem proper and just. The Court of Federal Claims shall have jurisdiction to render judgment upon any claim by or against, or dispute with, a contractor arising under section 10(a)(1) of the Contract Disputes Act of 1978 [41 U.S.C. § 609(a)(1)], including a dispute concerning termination of a contract, rights in tangible or intangible property, compliance with cost accounting standards, and other nonmonetary disputes on which a decision of the contracting officer has been issued under section 6 of that Act.

~~(3) To afford complete relief on any contract claim brought before the contract is awarded, the court shall have exclusive jurisdiction to grant declaratory judgments and such equitable and extraordinary relief as it deems proper, including but not limited to injunctive relief. In exercising this jurisdiction, the court shall give due regard to the interests of national defense and national security.~~

**(c) Bid Protests.** The United States Court of Federal Claims shall have exclusive judicial jurisdiction to render judgment on an action by an interested party objecting to a solicitation by a Federal agency for bids or proposals for a proposed contract or to a proposed award or the award of a contract. The court shall have jurisdiction to entertain an action of this nature whether suit is instituted before or after the contract is awarded. To afford relief in such an action, the court may award such relief as it deems proper, including declaratory and injunctive relief. In exercising this jurisdiction, the court shall give due regard to the interests of national defense and national

security and the need for expeditious resolution of the action. The district courts shall have no jurisdiction to entertain any such action.

The court shall set aside an agency action if it finds the action violates a statute or regulation. Wherever it makes such a determination, it may, in accordance with section 1304 of Title 31, United States Code, further declare an appropriate interested party entitled to the costs of filing and pursuing the protest, including reasonable attorney's fees, and consultant and expert witness fees, and bid and proposal preparation expenses. The record before the agency at the time of the agency action may be supplemented by evidence which relates to the validity of the agency action at the time the action was taken.

The term "interested party" shall have the meaning given in 31 U.S.C. § 3551.

If the court expressly finds that a protest or a portion of a protest is frivolous or has not been brought or pursued in good faith, the protester or other interested party, who joins the protest, shall be liable to the United States for payment of all or that portion of the United States costs, for which such a finding is made, of reviewing the protest including the fees and other expenses (as defined in section 2412 (d)(2)(A) of title 28) incurred by the United States in defending the protest, unless

(1) special circumstances would make such payment unjust or

(2) the protester obtains documents or other information after the protest is filed with the court, which establishes that the protest or a portion of the protest is frivolous or has not been brought in good faith, and the protester then promptly withdraws the protest or portion of the protest.

(b)(d) Tennessee Valley Authority. Nothing herein shall be construed to give the United States Court of Federal Claims jurisdiction of any civil action within the exclusive jurisdiction of the Court of International Trade, or of any action against, or founded on provisions of the Tennessee Valley Authority act of 1933 with respect to actions by or against the Authority.

1.5.9. 40 U.S.C. § 759

**The Brooks Act; procurement, maintenance, operation, and utilization of automatic data processing equipment**

1.5.9.1. Summary of the Law

This statute authorizes the Administrator of the General Services Administration (GSA) to coordinate and provide for the purchase, lease, and maintenance of automatic data processing equipment (ADPE) for Federal agencies.<sup>1</sup> The statute broadly defines ADPE to include computers, ancillary equipment, software, firmware, and services including support services.<sup>2</sup> The Administrator's authority is exercised by either the GSA performing the acquisition or through the issuance of delegations of procurement authority (DPAs) to Federal agencies.<sup>3</sup> The GSBICA is authorized under this section to consider bid protests to ADPE procurements.<sup>4</sup> The definition of "protest" is identical to that found in the GAO protest statute.<sup>5</sup> The definition of the "interested" parties who can file a protest or participate in a protest at the GSBICA is also identical to that found in the GAO protest statute.<sup>6</sup> Additionally, the statute provides that where a protest to a proposed procurement is filed with the GSBICA, a protest may not be filed with the GAO with respect to that procurement.<sup>7</sup>

DOD procurements of ADPE are subject to protest before the GSBICA if DOD's authority for the acquisition stems from section 759. If requested by a protester, the GSBICA must hold a hearing to determine whether to suspend the procurement authority of the DOD agency where the protest is filed prior to an award or within 10 calendar days of award.<sup>8</sup> The DPA must be suspended unless the DOD agency establishes that urgent and compelling circumstances which significantly affect interests of the United States will not permit waiting for a decision of the Board.<sup>9</sup>

The GSBICA is authorized to conduct adjudicatory proceedings and receive testimony from Government and non-Government witnesses. The GSBICA is also authorized to allow such discovery as may be required for the expeditious, fair, and reasonable resolution of the protest.

The GSBICA may suspend, revoke, or revise a DPA if the GSBICA makes a determination that a challenged agency action violates a statute, regulation, or the terms of the DPA.<sup>10</sup> If the

Board makes such a determination, it is also authorized to declare that an interested party is entitled to the cost of filing and pursuing the protest, including reasonable attorneys fees and bid and proposal preparation costs.<sup>11</sup> The Board is required to issue a final decision within 45 working days after the protest is filed unless the Board's chairman determines that specific and unique circumstances require a longer period.<sup>12</sup>

An appeal as a matter of right may be taken from final decisions of the GSBICA to the Court of Appeals for the Federal Circuit.<sup>13</sup>

#### 1.5.9.2. Background of the Law

Congress enacted the Brooks Act in 1965 to authorize the GSA to provide a central point for the procurement of data processing services and equipment.<sup>14</sup> The Act was amended several times in the ensuing years to clarify the authority of the Administrator of the GSA and to better define the types of data processing equipment for which a delegation of procurement authority was necessary. In 1982, for example, the Act was amended by the "Warner Amendment" to exclude a large class of DOD procurements from the GSA's authority.<sup>15</sup> The Warner Amendment exempted DOD procurements of ADPE or services where the function, operation, or use of such equipment: (1) involves intelligence activity, (2) involves cryptologic activities relating to the national security, (3) involves command or control of military forces, (4) is an integral part of a weapons system, or (5) is otherwise critical to the direct fulfillment of military or intelligence missions. ADPE used by DOD for routine administrative and business applications is not exempt from GSA authority.<sup>16</sup>

In 1984, the Brooks Act was amended by the Competition in Contracting Act (CICA) to give the GSBICA jurisdiction over bid protests.<sup>17</sup> The 1984 legislation originated in the House Committee on Government Operations, chaired by Congressman Brooks. The Committee Report stated that the GSBICA was given protest authority because "[t]he Committee believes that a new forum is needed to provide a fair, equitable, and timely remedy in this [ADPE] area."<sup>18</sup> The conferees on CICA stated that they were empowering the GSBICA as "a unique and innovative method of handling protests of a highly technical and complex nature."<sup>19</sup> Originally the GSBICA's bid protest jurisdiction was to be a three-year experiment; however, the jurisdiction was made permanent in 1986.<sup>20</sup>

### 1.5.9.3. Law In Practice

In 1985, the GSBICA issued formal Rules of Procedure. These procedures govern the filing of pleadings, the conduct of discovery, and the presentation of evidence at GSBICA hearings.<sup>21</sup> A GSBICA protest typically begins with a prehearing conference where the Board establishes a tentative schedule and limits on discovery.<sup>22</sup> The Board may authorize the taking of depositions of Government and protester witnesses, the submission and answering of requests for document production and interrogatories, as well as admissions of fact.<sup>23</sup> Protective orders are frequently issued to protect documents and testimony. The Board conducts evidentiary hearings in a manner similar to proceedings in Federal courts where cases are tried before judges. The Board also considers requests for motions of dismissal and for summary judgment prior to trial.<sup>24</sup>

In GSBICA proceedings, "the protester has the burden of establishing its case by the preponderance of the evidence."<sup>25</sup> On matters committed to agency discretion, the GSBICA requires the protester to show that the agency's decision lacked a reasonable basis. As stated by the GSBICA:

The law vests considerable discretion in the conduct of technical evaluations. Such evaluations will not be overturned unless the protester has demonstrated that the SSAC's technical evaluation was unreasonable [citations omitted].<sup>26</sup>

The GSBICA has consistently taken the position that "our task is not to decide whether the agency's behavior was ideal -- only whether it was legally correct."<sup>27</sup>

Moreover, the GSBICA has taken a reasonable approach towards the section 759 prohibition of an agency violating a law. The mere violation of a regulation by an agency will not result in the GSBICA sustaining a protest unless it has a significant effect on the procurement.<sup>28</sup>

Because the Board strives to issue final decisions within 45 working days, GSBICA protests are notorious for being arduous work for all the parties.

Cir. 1992), where the Board stated as follows: "Any good lawyer can pick lint off any Government procurement, pundits say. We will not set aside an award, even if violations of law are found, unless those violations have some significance."

#### 1.5.9.4. Recommendations and Justification

##### Amend

The Panel sought comments from the Government and industry concerning the procurement protest provisions of the Brooks Act. In general, respondents in the Government expressed a desire to render GSBICA protests less burdensome to the agencies. Respondents from the private sector generally opposed such amendments. After consideration of comments and analysis of the law, the Panel believed it was appropriate to recommend certain amendments to the Brooks Act. Accordingly, many of the changes that the Panel has recommended to the Procurement Protest System provisions of Title 31 for GAO protests are recommended for the Brooks Act as well.

##### I

**Establish a consistent use of terminology for the time in which statutory action must be taken by using the term "calendar days" in lieu of "working days."**

The term "working days" is used to specify when a decision of the GSBICA must be rendered. In other instances, the statute uses the term "days" to specify when action might be taken. This difference in terminology has led to some confusion and has resulted in conflicting opinions between GAO and GSBICA on interpretation of similar provisions in their respective acts.<sup>29</sup> The use of calendar days in Federal law is well accepted and understood, and the Panel believes that this usage is the more appropriate terminology. The Panel has recommended an amendment to provide a definition of calendar days. This definition is similar to that now used by the GSBICA in its Rules of Procedure.<sup>30</sup> The amendment recommended by the Panel is derived from Rule 6 of the Federal Rules of Civil Procedure.<sup>31</sup> It provides, for example, that if the last day of the calendar for taking an action falls on a Saturday, Sunday, or legal holiday, then the next day in which the Federal agency would be open for business would be the day in which the action must be completed.

##### II

**The provision of 40 U.S.C. § 759(f)(2) which requires suspension of the contract performance when a protest is filed within 10 days of contract award should be modified to also require an agency to suspend contract performance if a protest is filed within 3 calendar days after the date set by an agency for any requested and required debriefing.**

<sup>30</sup>GSBICA Rule 2(c), 48 C.F.R. § 6101.2(c).

<sup>31</sup>Fed. R. Civ. P. 6.

The Panel recommends that when a protest is filed within 10 calendar days of the date of the contract award, or within 3 calendar days from the date set by an agency for any requested and required debriefing of an unsuccessful offeror, whichever is later, a suspension hearing must be held if requested by an interested party. The Panel, in Chapter 1.2.2 of this Report, is recommending changes to 10 U.S.C. § 2305 to: (1) establish the criteria for determining whether an unsuccessful offeror is entitled to a debriefing; (2) provide that any requested debriefing be conducted to the maximum extent practicable within 15 calendar days after contract award; and (3) provide that the debriefing contain information on the strengths and weaknesses of the offeror's proposal. Reference should also be made to the discussion of 31 U.S.C. § 3553 for further explanation of this change.<sup>32</sup>

### III

**The Brooks Act should be amended to provide that, to the maximum extent practicable, amendments which add new grounds of protest should be resolved within the same time period established for resolution of the initial protest.**

The Brooks Act requires the GSBCA to expeditiously resolve protests, and the GSBCA has an excellent record in meeting its statutory deadline. Amendments to protests can extend the statutory period for resolving protests. The Panel believes its recommendation will further the congressional objective by encouraging expeditious resolution of amended protests.

### IV

**Rules should be issued to allow for electronic filing and dissemination of protest documents.**

The Panel recommends that the GSBCA issue rules which would allow for electronic filing of all or part of the agency report or any other documents now required to be filed with the GSBCA. The regulations should take into account the ability of both interested parties and the Government to achieve electronic access to such filings.

The rationale for this change is threefold. First, it can expedite the protest process and reduce costs of duplicating and preparing material. Second, it is consistent with current Government practices of allowing contractors to submit proposals on electronic media. Third, it is consistent with modern litigation and administrative practices followed by many Federal courts and agencies to allow or even require the filing of pleadings, motions, and agency record documents in both hard copy and electronic media.

The suggestion for allowing electronic filing was made to one of the Panel members by the General Counsel of a large systems integration company. In discussions with industry and Government representatives, it was determined that electronic filing of all or portions of the

---

<sup>32</sup>See Chapter 1.5.4 of this Report.

agency report is now feasible and practical. Over time, this change could result in considerable cost savings. Because electronic filing may not be feasible or desirable in all circumstances, the regulations as recommended by the Panel should simply provide for or authorize electronic filing. The regulation should not mandate electronic filings in all cases.

## V

**Where the GSBCA expressly finds that a protest or a portion of a protest is frivolous or has not been brought or pursued in good faith, the interested party who is responsible for pursuing such a matter should pay the costs of the Government to defend its action.**

Bid protests are an essential feature of the statutory scheme for assuring full and open competition for Government contracts. However, protests can impose substantial costs and administrative burdens on the Government as well as on prospective or actual recipients of contract awards. Accordingly, the Panel believes that the protest process should help assure that only meritorious protests are filed or pursued.

After considerable debate, discussion, and consideration of public comments, the Panel determined that sanctions should be imposed on parties who file frivolous protests or who do not file protests in good faith. Under the Panel's recommendations, Congress should enact legislation to provide that interested parties would be liable to the United States for payment of the cost of defending GSBCA protests or issues in GSBCA protests which are frivolous or have not been brought or pursued in good faith.<sup>33</sup> Only those interested parties who file or pursue such protests would be liable for payment of Government costs. The thrust of this recommendation is directed at those protests which add cost and burden to the protest process.<sup>34</sup> It is not directed at the many protests which are summarily dismissed.

The Panel's recommendations provide that there would be no liability where special circumstances make payment unjust or where a protester or interested party promptly withdraws its protest, or a portion of its protest, after receiving information which shows that the protest, or an issue in the protest, is in fact frivolous or can no longer be brought or pursued in good faith.

The Panel recognizes that there are significant definitional problems which must be resolved before this legislation can be fully implemented. Accordingly, the Panel has recommended that regulations or rules be issued to address: (1) the calculation and proof of Government costs including specific elements of Government costs which can be recovered; (2) the special circumstances that would make payment unjust; (3) the factual circumstances which would constitute prompt withdrawal of a protest or a protest issue to avoid the imposition of fees;

---

<sup>33</sup>Although the GSBCA does have the authority to dismiss frivolous protests, it does not have the authority to dismiss protests brought in bad faith. *VION Corp. v. United States*, 906 F.2d 1564, 1567 (Fed. Cir. 1990).

<sup>34</sup>One Government attorney commented "We believe that some protesters have misused the GSBCA forum for the sole purpose of engaging in discovery . . . Although this conduct is unethical, we believe it has occurred." Letter from Mr. Richard Couch, HQ AMC to Mr. Anthony Gamboa, Army Deputy General Counsel (Apr. 29, 1992).

and (4) the definition of what constitutes a frivolous protest or a protest not brought or pursued in good faith. There are several models that can be used as guides for the regulation criteria including Rule 11 of Federal Rules of Civil Procedure which allows Federal courts to impose sanctions on those who file frivolous or bad faith lawsuits. The Panel recognizes that any use of Rule 11 as a model should be tempered by the concerns of the Section of Public Contract Law of the American Bar Association. Specifically, the Section noted that bid protests are characterized by short time frames and an inability to conduct the fullest measure of due diligence, similar to that which can be conducted in a civil action between private parties, because of the procuring agency's control of many of the facts.<sup>35</sup>

The rationale for the imposition of such costs is discussed in more detail under the discussion of 31 U.S.C. § 3554 at Chapter 1.5.5 of this Report and includes the following considerations:

- Protests are sometimes filed which are frivolous or are not filed in good faith and protests are sometimes pursued after it first becomes readily apparent that the protest is frivolous or does not state valid grounds for protest.
- Congress intended to discourage frivolous or bad faith protests when it enacted the Competition in Contracting Act (CICA). The Comptroller General, for example, was authorized to dismiss protests at any time under 31 U.S.C. § 3554(a)(3) because it was "the intent of the conferees [on CICA] to keep proper contract awards or due performance of contracts from being interrupted by technicalities which interested parties in bad faith might otherwise attempt to exploit."<sup>36</sup>
- Imposition of monetary sanctions for frivolous protests or protests not brought or pursued in good faith should streamline the acquisition process by discouraging such protests.

## VI

**Where the GSBCA determines that an interested party is entitled to the cost of filing and pursuing the protest, the GSBCA may declare the interested party is entitled to consultant and expert witness fees.**

The recovery of protest costs, including expert witness fees, advances the purposes of the Competition in Contracting Act (CICA). Such recovery is necessary "to relieve parties with valid claims of the burden of vindicating the public interest which Congress seeks to promote." Recently the GSBCA deviated from its past precedent of awarding consulting and expert witness fees in *Sterling Federal Systems, Inc. v. National Aeronautics and Space Administration*.<sup>37</sup> This

<sup>35</sup>Letter from Karen Hastie Williams, Chair, Public Contract Law Section of the American Bar Association to Rear Admiral Vincent (Dec. 4, 1992).

<sup>36</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1436-37 (1984), reprinted in 1984 U.S.C.C.A.N. 1445, ¶124-25.

<sup>37</sup>GSBCA No. 10000-C, 92-3 BCA ¶ 25,118.

recommendation would legislatively overrule the *Sterling* decision to the extent that *Sterling* addressed consultant and expert witness fees. Because protective orders prevent technical employees of a protester gaining access to proprietary information of other offerors, as well as procurement sensitive information, protesters must make extensive use of consultants and expert witnesses if they are to prevail. Unless protesters can recover the fees of consultants and expert witnesses, the CICA protest system is harmed because protesters will have less incentive to pursue this remedy where even a successful protest can result in a significant unreimbursable expense.

#### **1.5.9.5. Relationship to Objectives**

The statute, as amended, is consistent with the Panel's objective of maintaining a balance between an efficient process and full and open access to the procurement system. This statute, as amended, is consistent with the Panel's objective that acquisition laws should provide the means for expeditious and fair resolution of protests through uniform interpretation of laws and implementing regulations.

#### **1.5.9.6. Proposed Statute**

##### **40 U.S.C. § 759. Procurement, maintenance, operation, and utilization of automatic data processing equipment**

(a) Authority of Administrator to coordinate and provide for purchase, lease and maintenance of equipment by Federal agencies.

(1) The Administrator is authorized and directed to coordinate and provide for the economic and efficient purchase, lease, and maintenance of automatic data processing equipment by Federal agencies.

(2)(A) For purposes of this section, the term "automatic data processing equipment" means any equipment or interconnected system or subsystems of equipment that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching interchange, transmission, or reception, of data or information --

(i) by a Federal agency, or

(ii) under a contract with a Federal agency which --

(I) requires the use of such equipment, or

(II) requires the performance of a service or the furnishing of a product which is performed or produced making significant use of such equipment.

(B) Such term includes --

- (i) computers;
- (ii) ancillary equipment;
- (iii) software, firmware, and similar procedures;
- (iv) services, including support services; and
- (v) related resources as defined by regulations issued by the Administrator for General Services.

(3) This section does not apply to --

(A) automatic data processing equipment acquired by a Federal contractor which is incidental to the performance of a Federal contract;

(B) radar, sonar, radio, or television equipment;

(C) the procurement by the Department of Defense of automatic data processing equipment or services if the function, operation, or use of which --

(i) involves intelligence activities;

(ii) involves cryptologic activities related to national security;

(iii) involves the command and control of military forces;

(iv) involves equipment which is an integral part of a weapon or weapons system; or

(v) is critical to the direct fulfillment of military or intelligence missions, provided that this exclusion shall not include automatic data processing equipment used for routine administrative and business applications such as payroll, finance, logistics, and personnel management; or

(D) The procurement of automatic data processing equipment or services by the Central Intelligence Agency.

(b) Procurement, maintenance, and repair of equipment; transfer between agencies; joint utilization; establishment and operation of equipment pools and data processing centers; delegation of Administrator's authority.

(1) Automatic data processing equipment suitable for efficient and effective use by Federal agencies shall be provided by the Administrator through purchase, lease, transfer of equipment from other Federal agencies, or otherwise, and the Administrator is authorized and directed to

provide by contract or otherwise for the maintenance and repair of such equipment. In carrying out his responsibilities under this section the Administrator is authorized to transfer automatic data processing equipment between Federal agencies, to provide for joint utilization of such equipment by two or more Federal agencies, and to establish and operate equipment pools and data processing centers for the use of two or more such agencies when necessary for its most efficient and effective utilization.

(2) The Administrator may delegate to one or more Federal agencies authority to operate automatic data processing equipment pools and automatic data processing centers, and to lease, purchase, or maintain individual automatic data processing systems or specific units of equipment, including such equipment used in automatic data processing pools and automatic data processing centers, when such action is determined by the Administrator to be necessary for the economy and efficiency of operations, or when such action is essential to national defense or national security. The Administrator may delegate to one or more Federal agencies authority to lease, purchase, or maintain automatic data processing equipment to the extent to which he determines such action to be necessary and desirable to allow for the orderly implementation of a program for the utilization of such equipment.

(3) If the Administrator finds that a senior official of an agency designated pursuant to section 3506(b) of title 44, United States Code, is sufficiently independent of program responsibility and has sufficient experience, resources, and ability to carry out fairly and effectively procurements under this section, the Administrator may delegate to such official the authority to lease, purchase, or maintain automatic data processing equipment pursuant to paragraph (2) of this subsection, except that any such delegation shall not relieve the Administrator of the responsibilities assigned to the Administrator under this section. A delegation by the Administrator under this subsection shall not preclude the Administrator from reviewing individual procurement requests if the Administrator determines that circumstances warrant such a review. The Administrator shall retain authority to revoke such delegations, both in general and with regard to any specific matter. In acting for the Administrator, any official to whom approval authority has been delegated under this subsection shall comply fully with the rules and regulations promulgated by the Administrator.

(c) Inapplicability of other inconsistent provisions of law. The provision following paragraph (4) in section 201(a) of this Act and the provisions of section 602(d) of this Act shall have no application in the administration of this section. No other provision of this Act or any other Act which is inconsistent with the provisions of this section shall be applicable in the administration of this section.

(d) Standards and guidelines for Federal computer systems; promulgations, disapproval, or modification, etc.

(1) The Secretary of Commerce shall, on the basis of standards and guidelines developed by the National Bureau of Standards pursuant to section 20(a)(2) and (3) of the National Bureau of Standards Act, promulgate standards and guidelines pertaining to Federal computer systems, making such standards compulsory and binding to the extent to which the Secretary determines

necessary to improve the efficiency of operation or security and privacy of Federal computer systems. The President may disapprove or modify such standards and guidelines if he determines such action to be in the public interest. The President's authority to disapprove or modify such standards and guidelines may not be delegated. Notice of such disapproval or modification shall be submitted promptly to the Committee on Government Operations of the House of Representatives and the Committee on Governmental Affairs of the Senate and shall be published promptly in the Federal Register. Upon receiving notice of such disapproval or modification, the Secretary of Commerce shall immediately rescind or modify such standards or guidelines as directed by the President.

(2) The head of a Federal agency may employ standards for the cost-effective security and privacy of sensitive information in a Federal computer system within or under the supervision of that agency that are more stringent than the standards promulgated by the Secretary of Commerce, if such standards contain, at a minimum, the provisions of those applicable standards made compulsory and binding by the Secretary of Commerce.

(3) The standards determined to be compulsory and binding may be waived by the Secretary of Commerce in writing upon a determination that compliance would adversely affect the accomplishment of the mission of an operator of a Federal computer system, or cause a major adverse financial impact on the operator which is not offset by Government-wide savings. The Secretary may delegate to the head of one or more Federal agencies authority to waive such standards to the extent to which the Secretary determines such action to be necessary and desirable to allow for timely and effective implementation of Federal computer systems standards. The head of such agency may redelegate such authority only to a senior official designated pursuant to section 3506(b) of title 44. Notice of each such waiver and delegation shall be transmitted promptly to the Committee on Government Operations of the House of Representatives and the Committee on Governmental Affairs of the Senate and shall be published promptly in the Federal Register.

(4) The Administrator shall revise the Federal information resources management regulations (41 C.F.R. ch. 201) to be consistent with the standards and guidelines promulgated by the Secretary of Commerce under this subsection.

(5) As used in this subsection, the terms "Federal computer system" and "operator of a Federal computer system" have the meaning given in section 20(d) of the National Bureau of Standards Act.

(e) Limitations on authority of Administrator and Secretary of Commerce; notice and review of Administrator's determinations. The authority conferred upon the Administrator and the Secretary of Commerce by this section shall be exercised subject to direction by the President and to fiscal and policy control exercised by the Office of Management and Budget. Authority so conferred upon the Administrator shall not be so construed as to impair or interfere with the determination by agencies of their individual automatic data processing equipment requirements, including the development of specifications for and the selection of the types and configurations of equipment needed. The Administrator shall not interfere with, or attempt to control in any

way, the use made of automatic data processing equipment or components thereof by any agency. The Administrator shall provide adequate notice to all agencies and other users concerned with respect to each proposed determination whether or not the automatic data processing equipment will be provided by the Administrator or whether or not the authority to lease, purchase, or maintain the equipment will be delegated. If the Administrator denies an agency procurement request such denial shall be subject to review and decision by the Director of the Office of Management and Budget, unless the President otherwise directs. Such review and decision shall be made only on the basis of a written appeal, and such written appeal, together with any written communications to the Administrator or any officer or employee of the Office of Management and Budget concerning such denial shall be made available to the public.

(f) Automated data processing dispute resolution.

(1) Upon request of an interested party in connection with any procurement which is subject to this section (including procurements subject to delegation of procurement authority), the board of contract appeals of the General Services Administration (hereafter in this subsection referred to as the "board"), shall review any decision by a contracting officer alleged to violate a statute or regulation. Such review shall be conducted under the standard applicable to review of contracting officer final decisions by boards of contract appeals. The authority of the board to conduct such review shall include the authority to determine whether any procurement is subject to this section and the authority to review regulations to determine their consistency with applicable statutes. A proceeding, decision, or order of the board pursuant to this subsection shall not be subject to interlocutory appeal or review. An interested party who has filed a protest under subsection V of chapter 35 of title 31, United States Code, with respect to a procurement or proposed procurement may not file a protest with respect to that procurement or proposed procurement under this subsection.

(2)(A) When a protest under this subsection is filed before the award of a contract in a protested procurement, the board, at the request of an interested party and within 10 calendar days of the filing of the protest, shall hold a hearing to determine whether the board should suspend the procurement authority of the Administrator or the Administrator's delegation of procurement authority for the protested procurement on an interim basis until the board can decide the protest.

(B) The board shall suspend the procurement authority of the Administrator or the Administrator's delegation of procurement authority unless the Federal agency concerned establishes that--

(i) absent action by the board, contract award is likely to occur within 30 calendar days of the hearing; and

(ii) urgent and compelling circumstances which significantly affect interests of the United States will not permit waiting for the decision of the board.

(3)(A) If the board receives notice of a protest under this subsection after the contract has been awarded but (A) within 10 calendar days of the date of the contract award or (B) within 3 calendar days from the debriefing date offered to an unsuccessful offeror for any requested and required debriefing, whichever is later, the board shall, at the request of an interested party and within 10 calendar days after the date of the filing of the protest, hold a hearing to determine whether the board should suspend the procurement authority of the Administrator or the Administrator's delegation of procurement authority for the challenged procurement on an interim basis until the board can decide the protest.

(B) The board shall suspend the procurement authority of the Administrator or the Administrator's delegation of procurement authority to acquire any goods or services under the contract which are not previously delivered and accepted unless the Federal agency concerned establishes that urgent and compelling circumstances which significantly affect interests of the United States will not permit waiting for the decision of the board.

(4)(A) The board shall conduct proceedings and allow such discovery as may be required for the expeditious, fair, and reasonable resolution of the protest.

(B) Subject to any deadlines imposed by section 9(a) of the Contract Disputes Act of 1978 (41 U.S.C. § 608(a)), the board shall give priority to protests filed under this subsection. The board shall issue its final decision within ~~45~~ 65 calendar days after the date of the filing of the protest, unless the board's chairman determines that the specific and unique circumstances of the protest require a longer period, in which case the board shall issue such decision within the longer period determined by the chairman. Amendments which add new grounds of protest should be resolved to the maximum extent practicable, within the time limits established for resolution of the initial protest.

(C) The board may dismiss a protest the board determines is frivolous or which, on its face, does not state a valid basis for protest.

(5)(A) In making a decision on the merits of protests brought under this section, the board shall accord due weight to the policies of this section and the goals of economic and efficient procurement set forth in this section. The board may consider any decision, determination, opinion, or statement made by the Director of the Office of Management and Budget or any officer of any other Federal agency regarding applicability of this section to a particular procurement, and may request the advice of the Director or such officer with regard to such applicability, but shall not be bound by any such decision, determination, opinion, or statement when determining whether a procurement is subject to this section.

(B) If the board determines that a challenged agency action violates a statute or regulation or the conditions of any delegation of procurement authority issued pursuant to this section, the board may suspend, revoke, or revise the procurement authority of the Administrator or the Administrator's delegation of procurement authority applicable to the challenged procurement.

(C) Whenever the board makes such a determination, it may, in accordance with section 1304 of title 31, United States Code, further declare an appropriate interested party to be entitled to the costs of--

(i) filing and pursuing the protest, including reasonable attorney's fees and consultant and expert witness fees, and

(ii) bid and proposal preparation.

(6)(A) The final decision of the board may be appealed by the head of the Federal agency concerned and by any interested party, including interested parties who intervene in any protest filed under this subsection, as set forth in the Contract Disputes Act of 1978 (41 U.S.C. § 601 et seq.).

(B) If the board revokes, suspends, or revises the procurement authority of the Administrator or the Administrator's delegation of procurement authority after the contract award, the affected contract shall be presumed valid as to all goods or services delivered and accepted under the contract before the suspension, revocation, or revision of such procurement authority or delegation.

(C) Nothing contained in this subsection shall affect the board's power to order any additional relief which it is authorized to provide under any statute or regulation. However, the procedures set forth in this subsection shall only apply to procurements conducted under the authority contained in this section. In addition, nothing contained in this subsection shall affect the right of any interested party to file a protest with the contracting agency or to file an action in ~~a district court of the United States or the United States Claims Court of Federal Claims.~~

(8)(A) In computing any period of time prescribed or allowed by this subchapter, the procedures shall provide that the day of the act, event, or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, or, when the act to be done is the filing of a paper at the board, a day on which weather or other conditions have made the board inaccessible, in which event the period runs until the end of the next day which is not one of the previously mentioned days. Not later than January 15, 1985, the board shall adopt and issue such rules and procedures as may be necessary to the expeditious disposition of protests filed under the authority of this subsection. The procedures may provide for electronic filing and dissemination of documents and information required under this subchapter and in so providing shall consider the ability of all parties to achieve electronic access to such documents and records.

(B) If the board expressly finds that a protest or a portion of a protest is frivolous or has not been brought or pursued in good faith, the protester or other interested party, who joins the protest, shall be liable to the United States for payment of all or that portion of the United States costs, for which such a finding is made, of reviewing the protest including the fees and other expenses (as defined in section 2412(d)(2)(A) of title 28) incurred by the United States in defending the protest, unless (1) special circumstances would make such payment unjust, or (2)

the protester obtains documents or other information after the protest is filed with the board, which establishes that the protest or a portion of the protest is frivolous or has not been brought in good faith, and the protester then promptly withdraws the protest or portion of the protest.

(9) For the purposes of this subsection --

(A) the term "protest" means a written objection by an interested party to a solicitation by a Federal agency for bids or proposals for a proposed contract for the procurement of property or services or a written objection to a proposed award or the award of such a contract; and

(B) the term "interested party" means, with respect to a contract or proposed contract described in subparagraph (A), an actual or prospective bidder or offeror whose direct economic interest would be affected by the award of the contract or by failure to award the contract.

(g) Procurement from sole source or by specific make and model. The justification and approvals required by section 303(f)(1) of this Act shall apply in the case of any procurement under this section for which the minimum needs are so restrictive that only one manufacturer is capable of satisfying such needs. Such procurement includes either a sole source procurement or a procurement by specific make and model. Such justification and approval shall be required notwithstanding that more than one bid or offer is made or that the procurement obtains price competition and such procurement shall be treated as a procurement using procedures other than competitive procedures for purposes of section 19(b) of the Office of Federal Procurement Policy Act.

## **1.6. Other Related Statutes**

### **1.6.0. Introduction**

This subchapter includes the Panel's analyses of ten statutes codified in Title 10 and two statutes codified in Title 41, as well as two uncodified sections of the National Defense Authorization Act for Fiscal Years 1990 and 1991.<sup>1</sup> These statutes are included in the Contract Formation Chapter as generally related to contracting authorities and delegations, contractual terms and conditions, or limitations on contracting. They are grouped here as "other related statutes," since they do not readily fit within the theme or subject of other subchapters.

Each analysis is intended to be complete on its own. For convenience, the more significant amendments recommended by the Panel are summarized briefly in this introduction.

The Panel has recommended repealing section 2308, "Assignment and delegations of procurement functions and responsibilities," and combining it with section 2311, "Delegation," into an amended section 2311. Section 2308, which primarily is focused on delegating functions and assigning responsibilities to facilitate joint procurement between two or more agencies, becomes subsection (b), while the general delegation authority of section 2311 is in a modified subsection (a). Subsection (c) has been shown to reflect the recent requirement for regulations on participation in joint programs added by the National Defense Authorization Act for Fiscal Year 1993.<sup>2</sup> However, the Panel recommends it be repealed once the regulations are issued by the Secretary of Defense.

The Panel has recommended amendment of section 2310, "Determinations and decisions," to allow determinations and decision to be made for a class of purchases or contracts, "except when expressly prohibited under this title." A detailed explanation of the reasoning is included in the analysis, but the effect is to provide these prohibitions in the statutes involved and to more clearly distinguish class justifications under section 2304 from the agency head determinations and decisions in section 2304 covered by section 2310. The Panel recommends further amendment of section 2310 by deleting subsection (b), since the requirements of subsection (b) are adequately covered in other laws and are properly implemented at the appropriate places in the FAR and DFARS.

The Panel has recommended amendment of section 2326, "Undefined contractual actions: restrictions," to remove limitations prior to definitization that are stated in terms of expenditures and rely instead on limitations stated in terms of obligations. This recognizes that the Government does not have immediate visibility and control of contractor expenditures, but does control expenditures by limiting the Government's liability to the amount obligated. A further amendment is recommended to allow waiver by the head of the agency of the percentage limitations on obligations of 50 percent (75 percent if a qualifying proposal is timely submitted) prior to definitization, if such waiver is necessary in support of a contingency operation as defined

---

<sup>1</sup>Pub. L. No. 101-189, §§ 821 and 822, 103 Stat. 1503 (1989).

<sup>2</sup>Pub. L. No. 102-484, § 820, 106 Stat. 2315, 2459-60 (1992).

in 10 U.S.C. § 101(47)<sup>3</sup> or is otherwise in the best interests of the United States. There are circumstances in which contractors can and should meet an urgent requirement within days. The Panel believes contractors should not unreasonably be discouraged from doing so because the time to award a definitive contract which complies with applicable laws and regulations may exceed the time to physically deliver or perform.

The Panel has recommended repeal of section 2329, "Production special tooling and production special test equipment: contract terms and conditions." This section requires regulations to implement complex and detailed requirements concerning payment for, and amortization of, the cost of production special tooling and test equipment. The Panel considers that this section was an appropriate Congressional response to a particular set of circumstances in which there was controversy and a lack of uniform DOD-wide policy. There have been significant changes in both the circumstances and in the statutory role of the Director of Defense Procurement in approving regulations and clauses that impact contractors' costs and risks.<sup>4</sup> The Panel believes that this subject can again be handled in the regulations, without statutory coverage, with the assurance that uniform and equitable policies will apply throughout DOD.

The Panel has recommended retaining section 2331, "Contracts for professional and technical services," which requires regulations to deal with the controversial subject of "uncompensated overtime." However, the Panel has recommended that subsection (c), waiver of task order limitation, be recodified at section 2304(j) since it applies to master agreements covered there.<sup>5</sup>

The other codified sections included in this subchapter are recommended for retention or minor amendments to implement fully other Panel recommendations. The two uncodified sections require specific regulations to be issued. The Panel recommends repeal of Pub. L. No. 101-189 § 821, "Requirement for certificate of independent price determination in certain department of defense contract solicitations," because the regulatory change has been made. The Panel recommends retention of section 822, "Uniform rules on dissemination of acquisition information," until the final rule is issued. If the final rule is satisfactory, this section should be repealed.

A separate analysis of each of the statutes, in appropriate level of detail, is included in this subchapter.

## **1.6.1. 10 U.S.C. §§ 2308 and 2311**

### **Assignment and delegation of procurement functions and responsibilities**

#### **Delegation**

##### **1.6.1.1. Summary of the Laws**

Although sections 2308 and 2311 both address the ability of an agency head to delegate authority, their focus is different. Section 2308 permits the heads of agencies named in section 2303 (i.e., DOD, the military departments, the Coast Guard, and NASA) to delegate their procurement functions and responsibilities within their own agency or to an official of another agency if the other agency head agrees. The ability to delegate such authority to an official of another agency permits one agency to procure supplies and services for another. This law also authorizes joint procurement activities between these agencies. Section 2308 authority to delegate is subject to the limitation on delegation authority set forth in section 2311.

Section 2311 is a provision of general applicability. This section permits the head of an agency to delegate within that agency any power under Chapter 137 of Title 10 except the authority to determine when the use of other than competitive procedures is in the public interest.<sup>1</sup>

##### **1.6.1.2. Background of the Laws**

Section 2308 was originally enacted by the Armed Services Procurement Act (ASPA) of 1947.<sup>2</sup> By expressly authorizing the delegation of procurement authority to an official of another agency, Congress sought to facilitate the procurement of supplies and services by each agency for others and the joint procurement of supplies and services.<sup>3</sup>

Section 2308 remained substantively unchanged until recently. The National Defense Authorization Act for Fiscal Year 1993 directs the Secretary of Defense to prescribe regulations which require approval of the Under Secretary of Defense for Acquisition before a military service terminates or substantially reduces its participation in a joint acquisition.<sup>4</sup> According to the Senate report, the termination or substantial amendment of the partner relationship of a joint program requires formal oversight. When a joint program must be fiscally maintained by a single

<sup>1</sup>See 10 U.S.C. § 2304(c)(7), (d)(2).

<sup>2</sup>Pub. L. No. 80-413, § 10, 62 Stat. 20, 25 (1948). The statute was initially codified at 41 U.S.C. § 159 and subsequently recodified at 10 U.S.C. § 2308 by Pub. L. No. 84-1028, ch. 1041, 70A Stat. 131 (1956).

<sup>3</sup>S. REP. NO. 571, 80th Cong., 1st Sess. 21 (1947).

<sup>4</sup>Pub. L. No. 102-484, § 820, 106 Stat. 2315, 2458-59 (1992).

service after the other service partners withdraw support, negative program results occur, including higher production costs from the sudden quantity cuts.<sup>5</sup>

Section 2311, like section 2308, originated in the ASPA.<sup>6</sup> As enacted, the agency head was authorized to delegate all powers granted by the Act except for the power to make certain enumerated determinations and decisions. The agency head was precluded from delegating authority to make certain determinations and decisions which pertained to advance payments or to using one of five exceptions to the mandatory method of contracting using formal advertising procedures. The limitation on delegating the authority to make determinations and decisions to allow advance payments was repealed in 1958.<sup>7</sup>

The Competition in Contracting Act of 1984 (CICA) abolished the statutory preference for obtaining supplies and services through formal advertising rather than through negotiations, and the corresponding need for the agency head to make the determinations and decisions necessary to use negotiation rather than formal advertising procedures. Consequently, these limitations were repealed. In their place, the current language was added which points out that section 2304(d)(2) does not allow delegation.<sup>8</sup>

### **1.6.1.3. Laws in Practice**

FAR 1.601 states that the agency head may delegate authority to the heads of contracting activities. DFARS 202.101 defines "contracting activity" and lists for convenience the contracting activities established by the military services and defense agencies. Further delegations are covered in the corresponding military service and defense agency supplements to the FAR. DFARS Subpart 208.70 addresses joint and coordinated acquisitions within DOD, and Subpart 208.71 addresses NASA acquisitions. FAR 6.302-7(c)(1) implements the prohibition stated in section 2304(d)(2) against delegating certain authority.

### **1.6.1.4. Recommendations and Justification**

#### **I**

#### **Repeal section 2308 and move to section 2311.**

The Panel recommends consolidating sections 2308 and 2311 into a single statute. This is accomplished by repealing section 2308 in its entirety and moving the substance of the statute to section 2311, entitled "Delegation." Both sections address the topic of delegation. Consolidation is a natural and logical step towards streamlining acquisition laws.

<sup>5</sup>S. REP. NO. 352, 102d Cong., 2d Sess. 238-39 (1992).

<sup>6</sup>Pub. L. No. 80-413, § 7, 62 Stat. 20, 23, 24 (1948). The statute was initially codified at 41 U.S.C. § 156 and subsequently recodified at 10 U.S.C. § 2308 by Pub. L. No. 84-1028, ch. 1041, 70A Stat. 132 (1956).

<sup>7</sup>Small Business Concerns - Opportunities to Obtain Government Purchases and Contracts, Pub. L. No. 85-800, § 11, 72 Stat. 967 (1958).

<sup>8</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2726, 98 Stat. 494, 1194. CICA rendered moot several intervening amendments. Several months after the passage of CICA, an additional paragraph was added to § 2311 but was repealed within two weeks.

The amendment made to section 2308 by the National Defense Authorization Act for FY93 does not alter the Panel's recommendation to consolidate the two statutes.<sup>9</sup> Upon consolidation, the new provision should be codified in section 2311 as new subsection (c). The Panel notes that the recent amendment requires that the regulations be prescribed by early 1993. The Panel recommends that this new subsection be repealed once regulations have been promulgated which fully implement the statutory requirement.

## II

**Amend what is presently section 2308 by changing the words of limitation on the authority to delegate and assign functions by deleting the words, "Subject to section 2311 of this title."**

The quoted words of limitation launch a trail that begins in section 2308 and leads first to section 2311 and then to section 2304(d)(2) in order to learn what specific authority may not be delegated. The trail is unnecessary. Section 2308 states a general grant of authority whereas section 2304(d)(2) is a specific limitation on that authority. As recently reaffirmed by the Supreme Court, it is a "commonplace of statutory construction" that specific statutory language governs more general statutory language.<sup>10</sup> Thus, deletion of these words will not affect the existing statutory scheme. The Panel recommends deletion in order to streamline and simplify the laws.

## III

**Amend section 2311 by changing the words of limitation on the authority to delegate from, "Except as provided in section 2304(d)(2) of this title," to, "Unless expressly prohibited under this title."**

Section 2311 allows the head of the agency to delegate any power under Chapter 137 of Title 10 "except as provided in section 2304(d)(2) of this title." In turn, section 2304(d)(2) explicitly states that the agency head may not delegate the authority to determine that it is necessary in the public interest to use procedures for entering into a contract other than competitive procedures. The Panel recommends making this change for two reasons. First, it is logical and necessary to have this limitation of authority stated in section 2304 because it is that section which acquisition personnel will look at when they need to use other than competitive procedures for awarding a contract. This limitation is clearly stated in FAR 6.302-7(c)(1). Stating the limitation again in section 2311 is redundant. Second, if Congress places an additional limitation on the agency head's authority to delegate, section 2311 could mislead acquisition personnel into thinking the section 2304(d)(2) limitation was the only limitation, if section 2311 were not amended to reflect the additional limitation. The Panel's recommended language will render such potential amendments to section 2311 unnecessary.

---

<sup>9</sup>See note 4, *supra*.

<sup>10</sup>*Morales v. Trans World Airlines, Inc.*, \_\_\_ U.S. \_\_\_, 112 S.Ct. 2031 (1992.)

### 1.6.1.5. Relationship to Objectives

These recommendations are consistent with the Panel's statutory mandate to review acquisition laws applicable to DOD with a view towards streamlining defense acquisition laws. Consolidating these two statutes into a single law will promote more simple and understandable acquisition laws. Further simplification and streamlining will be achieved by deleting the unnecessary words of limitation in section 2308 and by changing the redundant words of limitation in section 2311. The substance of the two laws identify the fundamental requirements without mandating unnecessary implementing methodology and should thus be retained.

### 1.6.1.6. Proposed Statute

#### 10 U.S.C. § 2311. Delegation

~~(a) Except as provided in section 2304(d)(2) of this title, Unless expressly prohibited under this title, the head of an agency may delegate, subject to his direction, to any other officer or official of that agency, any power under this chapter.~~

~~(b)<sup>11</sup> To facilitate the procurement of property and services covered by this chapter by each agency named in section 2303 of this title for any other agency, and to facilitate joint procurement by those agencies --~~

~~(1) the head of an agency may, within his agency, delegate functions and assign responsibilities relating to procurement;~~

~~(2) the heads of two or more agencies may by agreement delegate procurement functions and assign procurement responsibilities from one agency to another of those agencies or to an officer or civilian employee of another of those agencies; and~~

~~(3) the heads of two or more agencies may create joint or combined offices to exercise procurement functions and responsibilities.~~

~~(c) REGULATIONS REQUIRED--(1) The Secretary of Defense shall prescribe regulations that prohibit each military department participating in a joint acquisition program approved by the Under Secretary of Defense for Acquisition from terminating or substantially reducing its participation in such program without the approval of the Under Secretary.~~

~~(2) The regulations shall include the following provisions:~~

~~(A) A requirement that, before any such termination or substantial reduction in participation is approved, the proposed termination or reduction be reviewed by the Joint Requirements Oversight Council of the Department of Defense.~~

<sup>11</sup>Subsection (b) is identical to the present section 2308, except that the words, "Subject to section 2311 of this title," have been deleted.

(B) A provision that authorizes the Under Secretary of Defense for Acquisition to require a military department approved for termination or substantial reduction in participation in a joint acquisition program to continue to provide some or all of the funding necessary for the acquisition program to be continued in an efficient manner.

## 1.6.2. 10 U.S.C. § 2310

### Determinations and decisions

#### 1.6.2.1. Summary of the Law

Subsection (a) of this statute authorizes the head of an agency to make determinations and decisions required by Chapter 137 of Title 10 on the basis of an individual purchase or contract or a class of purchases or contracts. However, determinations and decisions required under 10 U.S.C. §§ 2304 or 2305 may only be made on an individual purchase or contract basis. All determinations and decisions are final.

Subsection (b) provides that determinations and decisions required by 10 U.S.C. §§ 2306(c), 2306(g)(1), 2307(c), or 2313(c) must be based on written findings clearly substantiating the determination or decision. These four sections, respectively, concern decisions to use cost reimbursement or incentive contracts, to use multiyear contracts, to provide advance payments and to waive the authority of the Comptroller General to examine the books and records of foreign contractors and subcontractors. Findings under these four sections are final. An agency must retain such findings for six years and submit copies of each finding to the General Accounting Office with the contract to which it applies.

#### 1.6.2.2. Background of the Law

This statute was enacted by the Armed Services Procurement Act of 1947.<sup>1</sup> After giving "careful consideration to the troublesome question of the finality of agency determinations and decisions," the Senate concluded agency head decisions and determinations made in good faith should be final and not invalidated or challenged by a court or the Comptroller General, absent a question of legality or evidence of abuse of discretion.<sup>2</sup> Furthermore, the legislation was intended to clearly allow determinations to be made both for individual transactions and for classes of purchases or contracts.<sup>3</sup>

Until the passage of the Competition in Contracting Act of 1984 (CICA), the substance of this statute remained relatively unchanged.<sup>4</sup> CICA substantially revised the law to conform to the amendments CICA made to 10 U.S.C. §§ 2304 and 2305.<sup>5</sup> Subsection (a) was changed to prevent an agency head from making determinations and decisions under sections 2304 or 2305 for a class of purchases or contracts. Subsection (b) reduced the number of determinations and

<sup>2</sup>S. REP. NO. 571, 80th Cong., 1st Sess. 19, 20 (1947).

<sup>3</sup>*Id.* at 20 ("For example, a determination that particular equipment is 'technical equipment' and that standardization or interchangeability of parts will justify purchase by negotiation should only have to be made by the agency head once, and not repeated for each individual purchase").

<sup>4</sup>Pub. L. No. 98-369, § 2725, 98 Stat. 494, 1193 (1984).

<sup>5</sup>See S. REP. NO. 50, 98th Cong., 1st Sess. 36 (1983).

decisions which specifically required written findings. This reduction reflected CICA's abolishment of the statutory preference for using formal advertising rather than negotiations for procuring supplies and services.

### **1.6.2.3. Law in Practice**

FAR Subpart 1.7 prescribes general policies and procedures for the use of determinations and findings. Section 2310(a) is implemented in the following manner:

- FAR 1.703 addresses class determinations in general.
- The agency head determination required by section 2304(b)(1) to exclude a particular source is implemented at FAR 6.202(b)(1). This FAR provision states that such a determination may not be made on a class basis. FAR 6.302-7(c) implements the other agency head determination required by section 2304, that at subsection (c)(7)(A). The FAR states that this determination, to use other than competitive procedures when it is in the public interest, may not be made on a class basis.
- The requirement in 10 U.S.C. § 2305(b)(2) that the agency head make a determination before rejecting all sealed bids or proposals is implemented at FAR 14.404-1 (sealed bids) and FAR 15.608(b) (proposals). The requirement in 10 U.S.C. § 2305(d)(4)(A), that the agency head make a determination before requiring a proposal which would enable the Government to later acquire competitively a subsystem or component developed exclusively at private expense, is implemented at DFARS 227.403-71(b)(3). As discussed in the Recommendations and Justification section below, the regulations do not state that determinations and decisions pursuant to section 2305 cannot be made on a class basis.

Section 2310(b) is implemented in the following manner:

- The requirement in § 2310(b) that determinations or decisions be based upon written findings which include sufficient supporting facts and circumstances is reiterated at FAR 1.701 and 1.704.
- FAR 16.301-3 and the corresponding DFARS provision prescribe requirements for determinations and findings for the use of cost reimbursement contracts, while FAR 16.403 addresses determinations and findings for the use of incentive contracts. Only the DFARS covers determinations for the use of multiyear contracts, and it does so at DFARS 217.103-1(b)(iii).
- The statutory requirement concerning advance payment decisions is implemented at FAR 32.402 and 32.410, as well as at DFARS 232.410. A decision to waive Comptroller General authority to examine the books and records of foreign contractors and subcontractors must comply with the provisions at FAR 25.901.

- The requirement that the agency keep findings available for at least six years after the date of the determination or decision is implemented by the general requirements at FAR 4.805 and DFARS 204.805, which govern the disposal of the contract file.

#### **1.6.2.4. Recommendations and Justification**

### **I**

**Amend section 2310(a) to allow determinations and decisions for a class of purchases or contracts "except when expressly prohibited under this title."**

The words, "except for determinations and decisions under section 2304 or 2305 of this title," should be deleted and replaced with, "except when expressly prohibited under this title." The Panel recommends this change for two reasons. First, it is logical and necessary to have words which prohibit the taking of some action located in the statute which addresses that action rather than in a different law. This is because acquisition personnel will look for guidance to the statute which governs their intended action. However, the present statutory scheme does not do this. Nowhere in sections 2304 or 2305 is it stated that a particular agency head determination or decision cannot be made for a class of purchases or contracts. The restrictive language should be inserted in the appropriate place in section 2304 and deleted from section 2310 because retention therein would be redundant.<sup>6</sup> As explained below, the Panel does not believe it is necessary to put such words in section 2305.

Such words are not necessary to be placed in section 2305 because the Panel conceives of no circumstances under which either of the two determinations required to be made by an agency head in this section would, or could, be made on a class basis. It is meaningless to say an agency head cannot determine for a class of purchases or contracts that "[a]ll sealed bids or competitive proposals received in response to a solicitation [should] be rejected."<sup>7</sup> By definition, this is a decision made on a single solicitation and rejecting "all" offers affects the entire class of offers. Furthermore, it is completely unnecessary to say an agency head cannot make the determination called for at section 2305(d)(4)(A) on a class basis because that section calls for a determination as to each original supplier of an item regarding the award of a single development or production contract for a major system. By definition, it would be impossible to make such a determination on a class basis. The FAR correctly omits any statement that such determinations cannot be made on a class basis. The Panel's recommendation to delete the references to section 2305 in section 2310 will remove the existing ambiguity and streamline the law.

The second reason for this recommended change is that the present failure to specify in section 2304 which agency head determinations and decisions cannot be made on a class basis has caused some uncertainty as to whether a justification and approval (J&A) as specified at section 2304(f)(1) can be made on a class basis. The Panel is aware of correspondence from several members of Congress, sent to the heads of the Defense Acquisition Regulations Council and the

---

<sup>6</sup>See Chapter 1.2.1 of this Report for the Panel's recommended change to section 2304.

<sup>7</sup>10 U.S.C. § 2305(b)(2).

Civilian Agency Acquisition Council soon after the passage of CICA, which stated the members did not believe CICA allowed class J&As. The Councils responded that they believed the FAR implementation of CICA was correct. FAR 6.303-1(c) permitted, and still permits, justifications and approvals to be made on a class basis, except those to support the award of a contract under FAR 6.302-7 (which implements section 2304(c)(7)).<sup>8</sup>

The Panel believes the FAR correctly implements section 2310. This section only requires a determination by the agency head in two situations. A determination is required to exclude a particular source from a procurement (section 2304(b)(1)) and to use other than competitive procedures when doing so is necessary in the public interest (section 2304(c)(7)). The FAR, at 6.302-7(c) and 6.202(b)(1), respectively, explicitly prohibit agency heads from making class determinations in such instances.

In contrast, J&As are not actions which require a determination by an agency head. According to section 2304(f)(1), a justification is an action taken by a contracting officer, and an approval is an action taken by a specified person which varies according to the amount of the intended contract award. Moreover, as stated previously in the Background of the Law section, the terms "determination" and "decision" have been terms of art since passage of the ASPA. The term "J&A" is the product of CICA. Clearly, determinations and decisions are distinguishable and not interchangeable with the term "J&A."

The legislative history is not entirely dispositive of this issue. One passage in the conference report casts doubt on whether class J&As are allowed. The committee stated that "[a]ll determinations and decisions required for use of the exceptions to competitive procedures provided in this substitute [provision] are to be made on a case-by-case basis. Broad categories or classes of products and services cannot be exempt from competitive procedures."<sup>9</sup> Although the language speaks in terms of "determinations and decisions" rather than J&As, and therefore should not be a source of doubt, the statement is made under the heading, "Justification and Approval Procedures."<sup>10</sup>

In contrast, the conference report also contains language which supports the conclusion that certain J&As may be made on a class basis. Immediately after discussing the first six exceptions to the mandatory use of competitive procedures, the committee stated:

[T]he conference substitute includes a seventh exception which allows the head of an agency, on a non-delegable basis, to determine when it is necessary in the public interest to use procedures other than competitive procedures for a *particular*

---

<sup>8</sup>Letter from the Defense Acquisition Regulations Council Deputy Director to Stuart A. Hazlett (Oct. 16, 1992), (containing correspondence including a letter from the Hons. Jack Brooks, William S. Cohen, Frank Horton and Carl Levin (Dec. 12, 1984), and a letter from the Deputy Assistant Secretary of Defense for Procurement, *et. al.*, to the Hon. Jack Brooks (Aug. 16, 1985).

<sup>9</sup>H.R. CONF. REP. NO. 861, 98th Cong., 2d Sess. 1427 (1984).

<sup>10</sup>*Id.* at 1426.

*procurement*. This waiver is to be exercised, if at all, on a case-by-case basis, rather than for a class of procurements.<sup>11</sup>

By limiting the ban on class J&As to the seventh exception, Congress evidently considered, and by implication approved, the use of class J&As for the other six exceptions. This legislative history is properly reflected in the statutory wording of section 2304(c). Subsection (c)(7) limits the use of this exemption to "the *particular procurement* concerned." (Emphasis added.) The words, "particular procurement," are not used in conjunction with any of the other six exceptions.

Finally, even if the original FAR implementation were a matter of controversy, the passage of time has established its validity. Since Congress obviously knew of the FAR implementation, and did not require a change by legislation, the appropriate inference is that the regulations are correct. Despite this consensus by the Panel that the FAR is correct, the recommended statutory change should be made to remove any lingering cloud of doubt as to the legality of class J&As.

Class J&As have a legitimate role in the acquisition scheme when they are limited in scope and the contract actions are closely related. The FAR provides for such limitations at FAR 6.303-1(c), which states that whenever a J&A is made on a class basis,

The contracting officer must ensure that each contract action taken pursuant to the authority of the class justification and approval is within the scope of the class justification and approval and shall document the contract file for each contract action accordingly.

The FAR and DFARS contain other appropriate controls as well. Contract awards over \$5 million which result from the J&A process must be publicly announced to the same extent as awards which result from full and open competition. FAR 5.303 makes no distinction. Public notice of the award should encourage acquisition personnel in the J&A process to ensure the contract is within the scope of the class justification in order to avoid protests based upon that issue. Furthermore, FAR 6.304 requires the approval level for a class J&A to be determined by the estimated total value of the class. This means as more contracts are grouped under one class, and the estimated value of the class increases, greater levels of scrutiny are required before the class justification may be approved. In short, sufficient regulatory controls presently exist to ensure the continued proper use of class J&As.

## II

### Delete section 2310(b).

The Panel recommends deleting subsection (b). The Panel agrees with three commenters that this law essentially repeats the requirements already stated within the particular statutes

---

<sup>11</sup>*Id.* at 1425 (emphasis added).

which paragraph (b) references.<sup>12</sup> One commenter saw no need to amend the statute.<sup>13</sup> It is logical and necessary to state these requirements in the four specific statutes, because it is those sections which acquisition personnel will look at when they need to make a determination and decision required by one of those laws. In addition, as the preceding Law in Practice section indicates, existing regulations adequately address the requirements of these four statutes. Stating the requirements again in section 2310(b) is redundant.<sup>14</sup>

A concern was voiced by one Panel member that the deletion of subsection (b) might be misinterpreted by some to mean that a determination or decision made pursuant to subsection (a) by the designee of an agency head would not be final. It was therefore initially proposed to insert the words, "or designee" in subsection (a) after the words, "head of an agency" to clearly indicate that such determinations and decisions are final. However, upon further consideration, the Panel decided such modification to subsection (a) is unnecessary. The Panel definitely does not intend the deletion of subsection (b) to alter the existing state of the law regarding subsection (a), and does not believe that it will.

#### **1.6.2.5. Relationship to Objectives**

These recommendations are consistent with the Panel's statutory mandate to review acquisition laws applicable to DOD with a view toward streamlining the defense acquisition laws. Deleting section (b) of this statute eliminates the duplication of requirements currently present in other statutes and in current regulations. Deleting the references to sections 2304 and 2305 in section (a) of this statute, and placing the specific prohibitions against class determinations in section 2304, removes ambiguity from all three statutes.

#### **1.6.2.6. Proposed Statute**

##### **10 U.S.C. § 2310. Determinations and decisions**

(a) Determinations and decisions required to be made under this chapter by the head of an agency may be made for an individual purchase or contract or, ~~except for determinations and decisions under section 2304 or 2305 of this title,~~ for a class of purchases or contracts except when expressly prohibited under this title. Such a determination or decision are final, ~~including a determination or decision under section 2304 or 2305 of this title, is final.~~

~~(b) Each determination or decision under section 2306(e), 2306(g)(1), 2307(e), or 2313(e) of this title shall be based on a written finding by the person making the determination or decision, which finding shall set out facts and circumstances that—~~

<sup>12</sup>Letter from Defense Contract Management Command (DLA) Plans, Policies, and Systems Division to Stuart A. Hazlett (July 2, 1992); Letter from Council of Defense and Space Industry Associations to Maj Gen John D. Slinkard and Thomas J. Madden (July 15, 1992); Letter from SAF/AQC to Working Group 2 (July 15, 1992).

<sup>13</sup>Letter from DOD Inspector General to Stuart A. Hazlett (Oct. 6, 1992).

<sup>14</sup>Continued reference in § 2310(b) to § 2306(c) would be meaningless if the Panel's recommendation at Chapter 1.2.3 of this Report to delete § 2306(c) is adopted.

~~(1) clearly indicate why the type of contract selected under section 2306(e) of this title is likely to be less costly than any other type or that it is impracticable to obtain property or services of the kind or quality required except under such a contract;~~

~~(2) support the findings required by section 2306(g)(1) of this title;~~

~~(3) clearly indicate why advance payments under section 2307(e) of this title would be in the public interest; or~~

~~(4) clearly indicate why the application of section 2313(b) of this title to a contract or subcontract with a foreign contractor or foreign subcontractor would not be in the public interest.~~

~~Such a finding is final and shall be kept available in the agency for at least six years after the date of the determination or decision. A copy of the finding shall be submitted to the General Accounting Office with each contract to which it applies.~~

### **1.6.3. 10 U.S.C. § 2316**

#### **Disclosure of identity of contractor**

##### **1.6.3.1. Summary of the Law**

This provision is short enough that it may easily be set out in its entirety:

The Secretary of Defense may disclose the identity or location of a person awarded a contract by the Department of Defense to any individual, including a Member of Congress, only after the Secretary makes a public announcement identifying the contractor. When the identity of a contractor is to be made public, the Secretary shall announce publicly that the contract has been awarded and the identity of the contractor.

##### **1.6.3.2. Background of the Law**

This section was enacted in 1982 and has not been amended.<sup>1</sup>

##### **1.6.3.3. Law in Practice**

This section is implemented at FAR 5.303 and DFARS 205.303. The regulations preclude DOD personnel from revealing the identity of a person or corporation awarded a defense contract prior to public announcement of the award and the simultaneous notification of interested members of Congress.

The FAR requires public announcement of awards over \$3 million, unless another dollar amount is specified in agency acquisition regulations. Currently, the dollar threshold for public announcement in the DFARS is \$5 million. Excluded from the FAR reporting requirements are contracts placed with the Small Business Administration under section 8(a) of the Small Business Act and contracts with foreign firms when the place of delivery or performance is outside the United States or its possessions. While the FAR does not specify the type of information to be released, the DFARS lists contract data, competition information, contractor data, funding data, and miscellaneous data as the minimum information to be provided by DOD departments and agencies. More detailed reporting instructions are included in service and DOD agency FAR Supplements.<sup>2</sup>

---

<sup>1</sup>Technical Amendments to 10, 14, 37, and 38 U.S.C., Pub. L. No. 97-295, § 1(26)(A), 96 Stat. 1287, 1291 (1982).

<sup>2</sup>See e.g., AF FAR Supplement 5305.303.

#### **1.6.3.4. Recommendation and Justification**

##### **Retain**

The Panel believes this section provides appropriate controls over the release of information. A premature release of information on a contract award could do harm to the integrity of the procurement process and possibly result in an unwarranted financial advantage to a person or entity who received advance information.

#### **1.6.3.5. Relationship to Objectives**

Retention of this law will promote the financial and ethical integrity of the procurement process.

## 1.6.4. 10 U.S.C. § 2326

### Undefinitized contractual actions: restrictions

#### 1.6.4.1. Summary of the Law

The term "undefinitized contractual action" means a new procurement action for which the terms, specifications, or price are not agreed upon before performance is begun, but explicitly excludes actions related to foreign military sales, purchases at or below the small purchase threshold, special access programs, and congressionally mandated long-lead procurement contracts. Also excluded from coverage by this section are procurement actions taken by the Coast Guard and NASA.

As the title suggests, this statute places restrictions on the use of undefinitized contractual actions. Agency head approval is required before an undefinitized contractual action may be entered into, before the scope of an undefinitized contractual action may be modified, and before requirements for spare parts and support equipment that are not urgently needed may be included in an undefinitized contractual action for spare parts and support equipment that are urgently needed. The latter two approvals require the agency head to agree that such action is both a good business practice and in the best interests of the United States. In addition, the agency head must ensure that when the price is not negotiated until after a substantial portion of the work is complete, the allowable profit reflects any reduced cost risk of the contractor.

The statute also places two other limitations on the use of all undefinitized contractual actions except those for the purchase of initial spares. An undefinitized contractual action must contain a definitization schedule which provides for definitization of the terms, specifications and price by the earlier of 180 days after the contractor submits a qualifying proposal or before the funds obligated or expended exceed 50 percent of the ceiling price for the action. Second, the contracting officer may not obligate more than 50 percent of the ceiling price before definitization unless the contractor submits a timely qualifying proposal, in which case the contracting officer may obligate up to 75 percent prior to definitization. A qualifying proposal is a proposal containing sufficient information to facilitate a complete and meaningful audit conducted by the Department of Defense.

#### 1.6.4.2. Background of the Law

Congress enacted this law in 1986 to encourage the services to hold down the amount of funds obligated on undefinitized contractual actions.<sup>1</sup> A minor technical correction followed in 1989<sup>2</sup> and the term "small purchase threshold" was substituted for the dollar figure of \$25,000 in

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3816, 3920 (1986) (*identical legislation omitted*); H.R. CONF. REP. NO. 1001, 99th Cong., 2d Sess. 497 (1986).

<sup>2</sup>National Defense Authorization Act for Fiscal Years 1990 and 1991, Pub. L. No. 101-189, 103 Stat. 1352, 1604 (1989) ("Congressionally mandated" substituted for "Congressionally-mandated").

1991.<sup>3</sup> When Congress enacted this law, it explained why it exempted four categories of undefinitized contractual actions from coverage. It excluded actions for foreign military sales because agencies could not prevent foreign governments from requesting the most expeditious process for purchasing an item. Small purchases were excluded to reflect the fact that existing regulations concerning undefinitized contractual actions did not cover such purchases. Special access programs were excluded because they were already subject to special Congressional oversight. Finally, an exemption was made for congressionally-mandated long-lead items because agencies cannot control definitization until a full procurement contract is negotiated.<sup>4</sup>

Because Congress recognized that the timing of definitization depends upon submission of a proposal, it rejected a provision calling for definitization within 180 days after the start of an undefinitized contractual action in favor of requiring definitization within 180 days of receiving a qualifying proposal.<sup>5</sup> Initial spares were exempted from the required definitization periods because initial provisioning contracts should not be definitized until enough logistics experience is gained to determine the requirement and configuration for each spare part.<sup>6</sup>

Included with the original enactment of this statute was a requirement that the Secretary of Defense, between October 1, 1986, and March 31, 1989, track the amount of obligated but undefinitized amounts for each six-month period and report to Congress if the undefinitized amount exceeded 10 percent of the amount obligated for all contractual actions. Moreover, the Secretary's authority to enter into additional undefinitized contractual actions was limited if the 10 percent threshold was exceeded. The Secretary could waive these requirements for urgent and compelling considerations relating to national security or public safety.<sup>7</sup> These provisions were never codified and have lapsed with the passage of time.

However, another provision of the original statute, also never codified, remains in effect. This provision requires the DOD Inspector General to periodically audit Defense Department contractual actions and report to Congress on the amount of, and DOD's management of, undefinitized contractual actions.<sup>8</sup>

#### 1.6.4.3. Law in Practice

This statute is primarily implemented at DFARS Subpart 217.74. Although the statutory and regulatory coverage do not apply to the four categories of undefinitized contractual actions described above, DFARS 217.7402 states that contracting officers should apply the policy even to the exempted categories to the maximum extent practicable. DFARS 217.7403 states that it is DOD policy that undefinitized contractual actions shall only be used when definitization prior to the commencement of work is not possible and "the Government's interest demands that the

<sup>5</sup>*Id.*

<sup>6</sup>*Id.*

<sup>7</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3816, 3918 (1986) (*identical legislation omitted*).

<sup>8</sup>*Id.* at 3919.

contractor be given a binding commitment so that contract performance can begin immediately." DFARS 217.7404-1 reflects that contracting officers must obtain approval from the head of the contracting activity prior to taking any action which statutorily requires agency head approval. Although the statute imposes limitations on the obligation and expenditure of funds, DFARS 217.7404-3 and -4 state the limitations primarily in expenditure terms. The statutory policy regarding the amount of allowable profit is reiterated at DFARS 217.7404-6; however, this policy is actually implemented at DFARS 215.971-3(d)(2), which mandates consideration of any reduced risk to the contractor when the contracting officer uses a structured approach for developing a prenegotiation profit objective.

#### **1.6.4.4. Recommendations and Justification**

### **I**

**Amend section 2326(b) to clarify that limitations are on obligations rather than on expenditures.**

One comment pointed out that confusion exists over the amount of funds a contracting officer may obligate prior to definitization because paragraphs (b)(2) and (b)(3) state the limitations in terms of the amount expended rather than the amount obligated.<sup>9</sup> In the same vein, another stated that the contracting community can control obligations but not expenditures.<sup>10</sup> Both comments recommended that the statutory language be changed to properly place the limitation on the amount of funds obligated. The Panel concurs.

One of the comments also stated that paragraph (b)(1)(B) is ambiguous because it requires definitization when a certain amount of funds are "obligated or expended," and the two key words are not synonymous. Furthermore, it is not clear to which entity, the Government or the contractor, the terms are intended to apply.<sup>11</sup>

Although the term "expended" most likely was intended to refer to the funds expended by the contractor, based upon the regulations which preceded this provision,<sup>12</sup> the Panel believes the proper statutory amendment is to delete the words, "or expended," from this provision. This change will recognize the fact that the Government does not have immediate visibility and control of the amount of funds expended by a contractor but does control expenditures by limiting the Government's liability to the amount obligated.

<sup>9</sup>Letter from the DOD Inspector General to Stuart A. Hazlett (Oct. 6, 1992).

<sup>10</sup>Letter from SAF/AQC to Stuart A. Hazlett (Oct. 8, 1992).

<sup>11</sup>Letter from the DOD Inspector General to Stuart A. Hazlett (Oct. 6, 1992).

<sup>12</sup>ASPR 3-408(c).

## II

### **Amend section 2326(b) to allow waiver of 50%/75% limitations.**

Two comments suggested that the 50 percent and 75 percent limitations are too rigid and do not permit the necessary flexibility during contingency operations, as defined in 10 U.S.C. § 101(47), or other national emergencies to contract for urgently needed parts which will be delivered before proposals can be prepared.<sup>13</sup> Such restrictions can be a disincentive for contractors to support the Government's urgent requirements. The Panel agrees and recommends agency heads be permitted to waive these limitations if they determine waiver is in the national interest. However, the Panel does not support additional comments that waiver be allowed if the contractor needs additional funds to continue work while definitization efforts are finalized<sup>14</sup> or that waiver be allowed once negotiations are concluded but before a written modification is executed.<sup>15</sup>

## III

### **Amend section 2326(g)(1)(B) to replace "small purchase threshold" with "simplified acquisition threshold."**

This amendment is necessary to conform to the Panel's recommended change to 41 U.S.C. § 403(11), which would establish a simplified acquisition threshold of \$100,000.<sup>16</sup>

#### **1.6.4.5. Relationship to Objectives**

These recommendations will remove ambiguity from the present law and thereby encourage sound and efficient procurement practices as well as retain in the law the fundamental requirements to be achieved while granting the flexibility to acquisition officials to procure essential items.

#### **1.6.4.6. Proposed Statute**

#### **10 U.S.C. § 2326. Undefined contractual actions: restrictions**

(a) **IN GENERAL.**--The head of an agency may not enter into an undefined contractual action unless the request to the head of the agency for authorization of the contractual action includes a description of the anticipated effect on requirements of the military department concerned if a

<sup>13</sup>Letter from Defense Contract Management Command (DLA), Plans, Policies, and Systems Division to Stuart A. Hazlett (Oct. 6, 1992); Letter from SAF/AQC to Stuart A. Hazlett (Oct. 8, 1992).

<sup>14</sup>Letter from DLA, Defense Contract Management Command, Plans, Policies, and Systems Division signed by Jill E. Pettibone, Acting Chief, to Stuart A. Hazlett (Oct. 6, 1992).

<sup>15</sup>Letter from SAF/AQC signed by Ira L. Kemp, Associate Deputy, to Stuart A. Hazlett (Oct. 8, 1992).

<sup>16</sup>A suggestion was made by the Council of Defense and Space Industry Associations in a letter dated September 28, 1992 to Stuart A. Hazlett to limit the applicability of this statute to undefined contractual actions above \$500,000. No explanation was provided for raising the exemption threshold to this higher dollar amount.

delay is incurred for purposes of determining contractual terms, specifications, and price before performance is begun under the contractual action.

**(b) LIMITATIONS ON OBLIGATIONS AND EXPENDITURES OF FUNDS.--**

(1) A contracting officer of the Department of Defense may not enter into an undefinitized contractual action unless the contractual action provides for agreement upon contractual terms, specifications, and price by the earlier of--

(A) the end of the 180-day period beginning on the date on which the contractor submits a qualifying proposal to definitize the contractual terms, specifications, and price; or

(B) the date on which the amount of funds obligated ~~or expended~~ under the contractual action is equal to more than 50 percent of the negotiated overall ceiling price for the contractual action.

(2) Except as provided in paragraph (3), the contracting officer for an undefinitized contractual action may not ~~expend~~ obligate with respect to such contractual action an amount that is equal to more than 50 percent of the negotiated overall ceiling price until the contractual terms, specifications, and price are definitized for such contractual action.

(3) If a contractor submits a qualifying proposal (as defined in subsection (g)) to definitize an undefinitized contractual action before an amount equal to more than 50 percent of the negotiated overall ceiling price is ~~expended~~ obligated on such action, the contracting officer for such action may not ~~expend~~ obligate with respect to such contractual action an amount that is equal to more than 75 percent of the negotiated overall ceiling price until the contractual terms, specifications, and price are definitized for such contractual action.

(4) The provisions of this subsection may be waived if the head of the agency determines that waiver is necessary in support of contingency operations, as defined in section 101(47) of this title, or is otherwise in the best interests of the United States.

~~(4)~~(5) This subsection does not apply to an undefinitized contractual action for the purchase of initial spares.

**(c) INCLUSION OF NON-URGENT REQUIREMENTS.--**Requirements for spare parts and support equipment that are not needed on an urgent basis may not be included in an undefinitized contractual action for spare parts and support equipment that are needed on an urgent basis unless the head of the agency approves such inclusion as being--

(1) good business practice; and

(2) in the best interests of the United States.

(d) **MODIFICATION OF SCOPE.**--The scope of an undefinitized contractual action under which performance has begun may not be modified unless the head of the agency approves such modification as being--

- (1) good business practice; and
- (2) in the best interests of the United States.

(e) **ALLOWABLE PROFIT.**--The head of an agency shall ensure that the profit allowed on an undefinitized contractual action for which the final price is negotiated after a substantial portion of the performance required is completed reflects--

- (1) the possible reduced cost risk of the contractor with respect to costs incurred during performance of the contract before the final price is negotiated; and
- (2) the reduced cost risk of the contractor with respect to costs incurred during performance of the remaining portion of the contract.

(f) **APPLICABILITY.**--This section does not apply to the Coast Guard or the National Aeronautics and Space Administration.

(g) **DEFINITIONS.**--In this section:

(1) The term "undefinitized contractual action" means a new procurement action entered into by the head of an agency for which the contractual terms, specifications, or price are not agreed upon before performance is begun under the action. Such term does not include contractual actions with respect to the following:

(A) Foreign military sales.

(B) Purchases in an amount not in excess of the amount of the ~~small-purchase~~ simplified acquisition threshold.

(C) Special access programs.

(D) Congressionally mandated long-lead procurement contracts.

(2) The term "qualifying proposal" means a proposal that contains sufficient information to enable the Department of Defense to conduct complete and meaningful audits of the information contained in the proposal and of any other information that the Department is entitled to review in connection with the contract, as determined by the contracting officer.

**1.6.5. 10 U.S.C. § 2329**

**Production special tooling and production special test equipment: contract terms and conditions**

**1.6.5.1. Summary of the Law**

This statute requires the Secretary of Defense to prescribe regulations for payment to contractors for production special tooling and production special test equipment required or fabricated in the performance of contracts. The regulations are to provide a uniform policy for the Department of Defense.<sup>1</sup> The statute provides that the regulations apply to any production contract awarded by a military department where the production special tooling and test equipment used to perform the contract costs the contractor at least \$1 million.<sup>2</sup> For contracts subject to the statute, the costs for production special tooling and test equipment are to be considered direct costs.<sup>3</sup>

The regulations must provide that:

- The terms and conditions, including the maximum amount to be paid for the acquisition of production special tooling and test equipment, are to be negotiated and specified in the contract;
- Except as provided in paragraph (3) following, the contractor shall be paid the maximum amount agreed upon;
- If at the time of award, it is anticipated that the contractor will use the same production special tooling or test equipment to perform a later contract with the Government, and if that tooling and equipment will not be used by the contractor solely for final production acceptance testing under the contract, the contractor shall be paid a negotiated percentage not less than 50 percent (unless the Secretary of the concerned military department approves a lower rate) of the total payment negotiated and shall be paid the balance according to a negotiated amortization schedule so long as appropriations are available; and
- If the contract or program is terminated for the Government's convenience before payment of the full amount agreed upon, the contractor shall be paid the balance of the maximum amount agreed upon, so long as appropriations are available.<sup>4</sup>

<sup>1</sup>10 U.S.C. § 2329(a).

<sup>2</sup>10 U.S.C. § 2329(b).

<sup>3</sup>10 U.S.C. § 2329(d).

<sup>4</sup>10 U.S.C. § 2329(e).

### 1.6.5.2. Background of the Law

The traditional method of paying for production special tooling and test equipment was to pay for it under the program contract under which it was acquired or fabricated, and the Government then took title to the equipment. Agencies thus paid the full cost incurred by a contractor in acquiring or fabricating production special tooling or test equipment, subject to the cost principles.

During the height of the military buildup in the mid-1980s, there was a Navy policy initiative to change the payment procedure so that contractors could amortize these items in the same way as they depreciated general purpose tooling and test equipment. It was the perception of some in the Navy that contractors were spending too much on production special tooling and test equipment. It was believed that once a contractor went into the production mode, there was very little possibility the program would be terminated. Because of this stable environment, it was felt contractors ought to provide the production special tooling and test equipment and depreciate it rather than be reimbursed up-front. Requiring amortization was thought to be a way of encouraging contractors to buy production special tooling and test equipment in a more cost effective manner.<sup>5</sup> The result was a policy applied by the Navy that was opposed by many in the other services and by many contractors, as well as a lack of uniformity within DOD.

Legislation appeared as part of the continuing appropriations legislation for fiscal year 1987. Congress included a provision similar to that described above in the Summary of the Law section, except that it specified that payments could not exceed 50 percent of the full acquisition cost of production special tooling and test equipment and allowed the Government to take title.<sup>6</sup> Congress intended this provision to encourage the defense industry to continue and accelerate the use of private investment. However, there was no desire that defense contractors "bet their companies' on any particular contract," so the provision limited the amount of contractor financial exposure to 50 percent of the contractor's proposed requirements for production special tooling and test equipment.<sup>7</sup> Because this provision was part of appropriations legislation, it was not permanent law.

The present statute was added in December of 1987.<sup>8</sup> One minor technical amendment followed.<sup>9</sup> The legislative history emphasizes that the law "is intended to make clear that contractors will be paid for special tooling and test equipment which they acquire, or which they fabricate themselves."<sup>10</sup> As noted above, however, the terms and conditions of payment are negotiable when the threshold for production special tooling and test equipment is exceeded.

<sup>10</sup>H.R. CONF. REP. NO. 446, 100th Cong., 1st Sess. 663 (1987).

### **1.6.5.3. Law in Practice**

The regulations mandated by this statute are found at DFARS 215.871. In addition to implementing the statutory requirements, the regulations contain additional guidance. They provide that the statute does not apply to contracts where the price is, or is based on, established catalog or market prices of commercial items sold in substantial quantities to the general public, to contracts where the price is set by law or regulation, or to contracts awarded as a result of sealed bidding.

Furthermore, the regulations state the Government generally pays the full amount of the production special tooling and test equipment costs when the contracting officer does not expect the contractor to be awarded future contracts for the same or similar items or when such costs are less than \$1 million. The regulations further provide that the unamortized portion of production special tooling and test equipment costs shall not be considered in developing the profit objective and shall not be included in the facilities capital employed base.

Special tooling and special test equipment costs are covered by their own cost principle. FAR 31.205-40 states that such costs are allowable and are charged as direct costs; however, the costs are allowable only as depreciation or amortization if the contractor acquired the special items prior to contract award or the contract schedule specifically excludes such costs. The DFARS does not expand upon this principle.

### **1.6.5.4. Recommendation and Justification**

#### **Repeal 10 U.S.C. § 2329.**

Comments were received from four sources. The Council of Defense and Space Industry Associations (CODSIA) recommended repealing the statute so that contractors could recover all of their production special tooling and production special test equipment costs, reasoning that:

Reduced defense spending creates an increasingly unacceptable risk of recovery on follow-on contracts.

PST and PSTE may expend their serviceable life on the instant contract.

If the percentage of PST/PSTE cost to total cost on the contract is great enough, 50% recovery will create a loss contract which will impact reimbursement under the progress payment clause as the loss ratio is backed out of progress payment requests.<sup>11</sup>

A second commenter stated that a prime impetus for this law no longer exists. Recent studies now show that since about 1987, contractors have obtained about the same return on

---

<sup>11</sup>Letter from CODSIA to Stuart A. Hazlett (Sept. 28, 1992).

investment on their government work as on their commercial work. Therefore, he would have no objection to repeal of this statute. Additionally, repeal would make sense because the existing framework can cause an administrative burden since it is difficult to precisely identify the allocation between payment and amortization, given that amortization must be on a specific piece of equipment rather than on a generic pool.<sup>12</sup>

A third commenter recommended amending the statute to effectively eliminate the \$1 million threshold in order to give the Government greater flexibility.<sup>13</sup> The final commenter opined the statute was still relevant and necessary but did not elaborate.<sup>14</sup>

Several of the Panel members were involved in discussions within DOD, with the Congressional staffs, and between the industry and DOD during the time the Navy policy and the emerging legislation were matters of significant controversy. Although memories differ as to the motivations for the policy and legislation, there is a clear consensus among the Panel that section 2329 should be repealed.

This consensus is based upon the view that the legislation resulted from a perceived need for Congress to address an area, traditionally covered by regulations, in which there was controversy and a lack of uniform policy within DOD. Section 2329 requires regulations, but provides a detailed rule structure.

In recent years, the statutory requirements for publicizing and approving regulations have been made more stringent, both in law and in practice. The Director of Defense Procurement now clearly has both the authority and the duty to approve or disapprove proposed or final rules which significantly affect offerors or contractors.<sup>15</sup> The Panel believes, and the Director of Defense Procurement agrees, that production special tooling and test equipment is an area that can again be handled in the regulations, without statutory coverage, with the assurance that uniform and equitable policies will apply throughout DOD.

#### **1.6.5.5. Relationship to Objectives**

Repeal of this statute would promote the Panel's goal of simplifying and streamlining the body of acquisition laws, by reserving to the regulations the detailed methodology of paying contractors for their production special tooling and test equipment. In addition, repeal would promote the development and preservation of an adequate industrial base.

## 1.6.6. 10 U.S.C. § 2331

### Contracts for professional and technical services

#### 1.6.6.1. Summary of the Law

Subsections (a) and (b) of this statute require the Secretary of Defense to issue regulations which will ensure "to the maximum extent practicable," that DOD acquires professional and technical services on the basis of the task to be performed rather than on the basis of the number of hours of services provided. The regulations must include requirements to (1) minimize the use of contracts which acquire services on the basis of the number of hours; (2) ensure source selection emphasis is placed on technical and quality factors rather than price; and (3) evaluate proposals on the basis of "cost realism."

Subsection (c) of this law replaces the dollar limitations on the use of master agreements levied by 10 U.S.C. § 2304(j)(4) with a higher dollar threshold if the Secretary of Defense elects to waive the limitations imposed by section 2304(j)(4). The waiver becomes effective 60 days after notice of the waiver is published in the Federal Register.

#### 1.6.6.2. Background of the Law

Section 804 of the National Defense Authorization Act for 1989 called for the establishment of a Government-industry committee to recommend criteria for the evaluation of proposals for professional and technical services. The committee was to develop evaluation criteria which would ensure contractors were not encouraged to propose mandatory uncompensated overtime for professional and technical employees.<sup>1</sup>

The committee report defined uncompensated overtime as "hours worked in excess of the normal 8 hours per day, 40 hours per week, by professional employees, who are exempt from the Fair Labor Standards Act, without additional compensation."<sup>2</sup> Contractors use mandatory uncompensated overtime as a competitive pricing technique, most frequently on cost reimbursement and time and materials type contracts. The report noted that mandatory uncompensated overtime has a negative impact on the quality of professional services rendered and on the Government's ability to make meaningful comparisons among competitors as to the quality of the offered services.

The report recommended that DOD incorporate into the DFARS a policy which stressed that the Government should not award contracts for professional and technical services solely on the basis of price competition or make price the most significant evaluation factor. Instead, awards should be based on the best overall value to the Government. Such a policy would go a long way towards not encouraging contractors to propose uncompensated overtime.

---

<sup>1</sup>National Defense Authorization Act, Fiscal Year 1989, Pub. L. No. 100-456, § 804, 102 Stat. 1918, 2009 (1988).

<sup>2</sup>DOD REPORT ON UNCOMPENSATED OVERTIME, (Mar. 29, 1990) (emphasis original).

The report also stated that the problem of uncompensated overtime would be diminished by using "master agreements" with contractors for buying certain work for specified periods of time, thus reducing the need to award time and materials type contracts. Finally, the report recommended that contractors be allowed to account for their professional and technical services in different ways, so long as they complied with Government accounting rules and regulations.

After considering the committee report, Congress passed section 2331.<sup>3</sup> Subsection(a) reflects Congressional belief that uncompensated overtime might be greatly reduced by acquiring services on the basis of the task to be performed rather than on a time and materials basis.<sup>4</sup> Subsection (b) prescribes regulations which essentially enact the recommendations of the committee report. Subsection (c) reflects Congressional intent to promote the use of master agreements in order to simplify the acquisition of professional and technical services and to diminish the potential for uncompensated overtime.<sup>5</sup> Although the conference report clearly states the statute should not be construed as taking a position on the type of accounting practices a contractor should employ,<sup>6</sup> the Senate report suggests Congress might take a position in the future.<sup>7</sup>

### **1.6.6.3. Law in Practice**

Because section 2331 did not take effect until 1991, experience with the law is limited. DFARS 215.608(a) and 237.701 implement the regulations prescribed by section 2331(a) and (b) concerning uncompensated overtime. DFARS 237.270-3 addresses waiver of the dollar limitations when using master agreements.

### **1.6.6.4. Recommendations and Justification**

#### **I**

#### **Retain section 2331(a) and (b).**

The Panel received one comment which recommended changes to the implementing regulations<sup>8</sup> and another comment which recommended extending the safeguards contained in this statute concerning the uncompensated overtime of professional and technical services contracts to all types of service contracts costing \$100,000 or more.<sup>9</sup> The latter comment also noted that the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have

---

<sup>3</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 834(a)(1), 104 Stat. 1485, 1613 (1990).

<sup>4</sup>S. REP. NO. 384, 101st Cong., 2d Sess. 196 (1990).

<sup>5</sup>*Id.*

<sup>6</sup>H.R. CONF. REP. NO. 923, 101st Cong., 2d Sess. 663 (1990).

<sup>7</sup>S. REP. NO. 384, 101st Cong., 2d Sess. 196 (1990).

<sup>8</sup>Letter from CODSIA to Stuart A. Hazlett, DOD Advisory Panel, Defense Systems Management College (Sept. 28, 1992).

<sup>9</sup>Letter from DOD Inspector General signed by Derek J. Vander Schaaf, Deputy Inspector General, to Stuart A. Hazlett (Oct. 6, 1992).

proposed to incorporate a clause into the DFARS which would extend such safeguards to these presently uncovered service contracts.

The Panel recommends retaining these two subsections as written. They do not appear to impose any significant cost or administrative burden on DOD procurement. The recommendations contained in the comments may be appropriately dealt with in the implementing regulations.

## II

### **Amend section 2331(c) by recodifying at 10 U.S.C. § 2304(j)(4).**

Section 2331(c) sets forth when the dollar limitations imposed by 10 U.S.C. § 2304(j)(4) on the use of master agreements may be waived. Because both sections address the subject of master agreements, section 2331(c) more properly belongs in section 2304(j)(4) and the Panel recommends such recodification. However, the Panel has recommended amending 10 U.S.C. § 2304(j) in such a manner that will obviate further need for section 2331(c).<sup>10</sup>

## III

### **Delete section 2331(c)(3).**

As stated in the preceding recommendation, the Panel has recommended amending 10 U.S.C. § 2304(j) in such a manner that will obviate the need for any portion of section 2331(c). However, if the Panel's recommendation regarding section 2304(j) is not adopted and section 2331(c) is recodified at section 2304(j), the Panel recommends the repeal of section 2331(c)(3).

Although section 2331(c) allows the Secretary of Defense to waive the limitation on the total value of task orders for specific contracting activities, subsection (c)(3) provides that the waiver only becomes effective 60 days after publication in the Federal Register. The Panel received one recommendation to reduce or eliminate this limitation on the effectiveness of the waiver because the 60-day period is "excessive."<sup>11</sup> The Panel agrees. A contracting activity could have an urgent need to issue a task order within 60 days, but need a Secretarial waiver because of the limitation in section 2304(j)(4). Under the present statutory scheme, the contracting activity could not issue the task order until 60 days after publication in the Federal Register. Elimination of this 60-day waiting period would prevent such a problem without abolishing the safeguard of requesting and receiving a waiver.

#### **1.6.6.5. Relationship to Objectives**

Subsections (a) and (b) establish broad policy and the fundamental requirements to be achieved while leaving the detailed implementation to the regulations. Recodifying section

---

<sup>10</sup>See Chapter 1.2 of this Report for the Panel's recommendations to amend 10 U.S.C. § 2304.

<sup>11</sup>Letter from Headquarters Air Force Materiel Command Principal Deputy Staff Judge Advocate to DOD Advisory Panel (Sept. 9, 1992).

2331(c) at section 2304(j)(4) would simplify and make more understandable the statutory scheme concerning master agreements. Deleting section 2331(c)(3) would remove a burdensome and unnecessarily restrictive provision, and thereby encourage the exercise of sound judgment on the part of acquisition personnel.

#### **1.6.6.6. Proposed Statute**

#### **10 U.S.C. § 2331. Contracts for professional and technical services**

(a) In General. The Secretary of Defense shall prescribe regulations to ensure, to the maximum extent practicable, that professional and technical services are acquired on the basis of the task to be performed rather than on the basis of the number of hours of services provided.

(b) Content of Regulations. With respect to contracts to acquire services on the basis of the number of hours of services provided, the regulations described in subsection (a) shall--

- (1) include standards and approval procedures to minimize the use of such contracts;
- (2) establish criteria to ensure that proposals for contracts for technical and professional services are evaluated on a basis which does not encourage contractors to propose uncompensated overtime;
- (3) ensure appropriate emphasis on technical and quality factors in the source selection process;
- (4) require identification of any hours in excess of 40-hour weeks included in a proposal;
- (5) ensure that offerors are notified that proposals which include unrealistically low labor rates or which do not otherwise demonstrate cost realism will be considered in a risk assessment and evaluated appropriately; and
- (6) provide guidance to contracting officers to ensure that any use of uncompensated overtime will not degrade the level of technical expertise required to perform the contract.

~~(c) Waiver of Task Order Limitation. (1) The Secretary of Defense may waive the limitation in section 2304(j)(4) of this title on the total value of task orders for specific contracting activities to the extent the Secretary considers the use of master agreements necessary in order to further the policy set forth in subsection (a).~~

~~(2) During any fiscal year, such a waiver may not increase the total value of task orders under master agreements of a contracting activity by more than 20 percent of the value of all contracts for advisory and assistance services awarded by that contracting activity during fiscal year 1989.~~

~~(3) Such a waiver shall not become effective until 60 days after the Secretary of Defense has published notice thereof in the Federal Register.~~

## 1.6.7. 10 U.S.C. § 2381

### Contracts: regulations for bids

#### 1.6.7.1. Summary of the Law

This statute expressly permits, but does not require, the Secretary of a military department to "prescribe regulations for the preparation, submission and opening of bids for contracts with that department."<sup>1</sup> The statute also expressly permits, but does not require, the Secretary of a military department to require a bidder to accompany its bid with a "written guarantee" that the bidder will timely enter into a contract and furnish a performance bond if the bid is accepted.<sup>2</sup> If the successful bidder does not timely enter into a contract and furnish the bond, the agency has no choice but to take two actions: the agency shall contract with another person and shall hold the defaulting bidder and his guarantors jointly or severally liable for the difference between the bid amount and the amount for which a contract is made with the other person.<sup>3</sup>

#### 1.6.7.2. Background of the Law

This law had its origins in 1878,<sup>4</sup> was part of a major recodification in 1956,<sup>5</sup> and underwent minor technical amendments in 1984.<sup>6</sup> According to FAR 28.001, the purpose of providing bid guarantees is to secure the bidder's liability (a) for failing to enter into a contract within the specified time and (b) for failing to furnish acceptable payment or performance bonds or guarantees. One source believes that Government personnel feel bid guarantees also perform a filtering function in that sureties do not provide bonds for incompetent or under-financed firms. However, the filtering process can be bypassed if the contractor deposits security.<sup>7</sup>

#### 1.6.7.3. Law in Practice

The FAR implements this law at FAR Subparts 28.1 and 28.2. There is no DFARS coverage; however, the military departments do have supplements to the FAR. FAR 28.101-1 sets forth the policy as to when bid guarantees are required. A bid guarantee must be required, unless the chief of the contracting office waives the requirement, and can only be required, if a performance or payment bond is required. Despite the language in the statute which requires agencies to take two actions when a bidder fails to comply with a solicitation requirement for a bid guarantee, the FAR lists nine circumstances where the noncompliance should be waived. This listing is in response to decisions by the Comptroller General. The regulations apply to both sealed bidding and negotiated procurement.

<sup>6</sup>Department of Defense Authorization Act, 1985, Pub. L. No. 98-525, 98 Stat. 2492, 2624 (1984).

<sup>7</sup>Cibinic, *Bid Guarantees: The Tail's Still Wagging!*, 6 Nash & Cibinic Report, 6, ¶ 36 (1992).

Two recent articles point out some of the problems associated with this topic. These problems involve determining what security deposits are acceptable; determining what procedures to follow if a security deposit is to be made, since the regulations do not set out any such procedures; determining who can be a proper surety; determining the type of assets which can be pledged; and, where the guarantees fail to conform to the requirements, determining whether the failure may be waived as a minor informality or is a material defect which mandates rejection of the bid as nonresponsive.<sup>8</sup>

#### 1.6.7.4. Recommendation and Justification

**Amend section 2381(a) to clarify who may prescribe regulations.**

The first line of this statute should be amended by clarifying that the Secretary of Defense may also prescribe pertinent regulations to implement this statute. Such clarification is consistent with the Panel's recommendation elsewhere, and with the inclusion of the regulations in the FAR.

Two comments were received. One indicated the statute did not need revision<sup>9</sup> and the other related more to performance bonds.<sup>10</sup> The primary critique comes from one of the articles cited previously, wherein it was stated:

It is evident . . . bid guarantees add an incredible amount of complexity and cost to sealed bid procurement. It is extremely doubtful whether such cost and complexity is justified by whatever benefits the Government receives from bonds and guarantees. It is time to cut off the tail that wags the dog. The procuring agencies should attempt sealed bid contracting *without* bid bonds or guarantees. If, as we believe, the integrity of the competitive system will not be adversely affected, they should be permanently discarded.<sup>11</sup>

The Panel notes that the statute gives to the regulators the flexibility to conduct such a test program. Indeed, the statute does not even mandate that regulations concerning bid guarantees be written. While there is thus no need to amend the statute in this regard, the Panel nevertheless recommends that the regulators consider such a test program.

### **1.6.7.5. Relationship to Objectives**

This law identifies a broad policy objective and explicitly leaves detailed implementing methodology to the acquisition regulations.

### **1.6.7.6. Proposed Statute**

#### **10 U.S.C. § 2381. Contracts: regulations for bids**

(a) The Secretary of Defense or the Secretary of a military department may--

(1) prescribe regulations for the preparation, submission, and opening of bids for contracts with that department; and

(2) require that a bid be accompanied by a written guaranty, signed by one or more responsible persons, undertaking that the bidder, if his bid is accepted, will, within the time prescribed by the Secretary or other officer authorized to make the contract, make a contract and furnish a bond with good and sufficient sureties for the performance of the contract.

(b) If a bidder, after being notified of the acceptance of his bid, fails within the time prescribed under subsection (a)(2) to enter into a contract and furnish the prescribed bond, the Secretary concerned or other authorized officer shall--

(1) contract with another person; and

(2) charge against the defaulting bidder and his guarantors the difference between the amount specified by the bidder in his bid and the amount for which a contract is made with the other person, this difference being immediately recoverable by the United States for the use of the military department concerned in an action against the bidder and his guarantors, jointly or severally.

(c) Proceedings under this section are subject to regulations under section 205 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. § 486), unless exempted therefrom under section 201(a) of that Act (40 U.S.C. § 481(a)).

## **1.6.8. 10 U.S.C. § 2384**

### **Supplies: identification of supplier and sources**

#### **1.6.8.1. Summary of the Law**

This statute requires defense contractors to mark or otherwise identify the supplies they are furnishing with the identity of the contractor, the national stock number (if there is such a number), and the contractor's identification number for the supplies. Further, the Secretary of Defense is required to issue regulations which call for, whenever practicable, more detailed identification, including the identification number of the actual manufacturer or producer (or source of supply) of the item and the source of any technical data delivered under the contract. However, the more detailed identification called for in the regulations is not required for a contract for commercial items sold in substantial quantities to the general public if the contract acquires such supplies at established catalog or market prices or is awarded through the use of competitive procedures.

#### **1.6.8.2. Background of the Law**

This statute is traceable to the Civil War.<sup>1</sup> It was later revised and codified at 34 U.S.C. § 583, and then revised and eventually recodified in 1956 at its present location, where it read:

Each contractor furnishing supplies to a military department shall mark them with his name in the manner directed by the Secretary of that department. No supplies may be received unless so marked.<sup>2</sup>

Amendments in 1984 added the requirements that supplies be marked with the national stock number and that the Secretary of Defense issue regulations mandating identification of the actual manufacturer or producer and source of technical data.<sup>3</sup> These amendments were intended to give DOD the ability to assess whether to purchase an item directly from the actual producer or manufacturer and to determine which contractor generated the technical data.<sup>4</sup>

Congress amended the law again in 1986, whereby it added the paragraph exempting commercial items sold in substantial quantities to the general public from the additional requirements imposed by the 1984 amendments.<sup>5</sup> Congress believed that when the exemption criteria is satisfied, "the government is assured of the reasonableness of the price, and attempting to identify the actual manufacturer is not essential to ensuring the reasonableness of that price."<sup>6</sup>

<sup>1</sup>Act of July 17, 1862, ch. 200, § 15, 12 Stat. 596.

<sup>2</sup>Act of Aug. 10, 1956, Pub. L. No. 84-1028, ch. 1041, § 1, 70A Stat. 130.

<sup>3</sup>Department of Defense Authorization Act, 1985, Pub. L. No. 98-525, § 1231(a), 98 Stat. 2492, 2599 (1984).

<sup>4</sup>H.R. REP. NO. 690, 98th Cong., 2d Sess. 19 (1984).

<sup>5</sup>National Defense Authorization Act for Fiscal Year 1987, Pub. L. No. 99-661, 100 Stat. 3016, 3936 (1986) (*identical legislation omitted*).

<sup>6</sup>H.R. CONF. REP. NO. 1001, 99th Cong., 2d Sess. 504 (1986).

Furthermore, streamlining the acquisition of commercial products was deemed a higher priority than the possibility the exemption might eliminate some potential for product breakout.<sup>7</sup>

### **1.6.8.3. Law in Practice**

This statute is implemented at DFARS Subpart 217.73. There is no coverage in the FAR. DFARS 217.7303 lists several exemptions to the marking and identification requirements which are in addition to the statutory exemption for certain commercial items. Although DFARS 211.7004-1(g) does not specifically implement this statute, it is in harmony with the law because it provides that commercial items are normally to be marked in accordance with a contractor's standard practices.

### **1.6.8.4. Recommendation and Justification**

#### **Amend section 2384(b)(2) to exempt all commercial items from subsection (b)(1).**

The partial exemption in the 1986 amendments was a positive step towards removing barriers to the acquisition of commercial items. However, the exemption does not apply unless the commercial item (1) is sold in substantial quantities to the general public and (2) is sold at established catalog or market prices or is purchased through the use of competitive procedures. The Panel believes these additional limitations are unnecessary to ensure a commercial item is reasonably priced. Furthermore, retention of these limitations would be inconsistent with the revised Congressional policies the Panel has recommended in 10 U.S.C. § 2301 and with the Panel's recommended definition in 10 U.S.C. § 2302(5).

Two comments were received. One indicated that no part of the statute should apply to commercial products.<sup>8</sup> The other suggested expanding the commercial item exemption by deleting the requirement that the commercial item be sold at established catalog or market prices or be purchased through the use of competitive means, so that the only requirement for the exemption to apply would be if the commercial item was sold in substantial quantities to the general public.<sup>9</sup> The first recommendation would go too far while the second would not go far enough. Through additional research, it was determined the statute does not cause any problems for bar code methods of identification.<sup>10</sup>

---

<sup>7</sup>S. REP. NO. 331, 99th Cong., 2d Sess. 265 (1986).

<sup>8</sup>Letter from DOD Inspector General signed by Derek J. Vander Schaaf, Deputy Inspector General, to Stuart A. Hazlett (Oct. 6, 1992).

<sup>9</sup>Letter from Headquarters Air Force Materiel Command Deputy Principal Judge Advocate to DOD Advisory Panel (Sept. 9, 1992).

<sup>10</sup>Telephone conversation between James Whitaker, the Air Force LOGMARS Program Management Officer (HQ AFMC/LGTX) and Lt Col Michael J. Renner, USAF (Nov. 12, 1992).

#### **1.6.8.5. Relationship to Objectives**

Amending this statute as recommended will facilitate the purchase by DOD or its contractors of commercial items, both as end items and components, by removing requirements for special markings that a commercial vendor would not normally make.

#### **1.6.8.6. Proposed Statute**

##### **10 U.S.C. § 2384. Supplies: identification of supplier and sources**

(a) The Secretary of Defense shall require that the contractor under a contract with the Department of Defense for the furnishing of supplies to the United States shall mark or otherwise identify supplies furnished under the contract with the identity of the contractor, the national stock number for the supplies furnished (if there is such a number), and the contractor's identification number for the supplies.

(b)(1) The Secretary of Defense shall prescribe regulations requiring that, whenever practicable, each contract requiring the delivery of supplies (other than a contract described in paragraph (2)) shall require that the contractor identify--

(A) the actual manufacturer or producer of the item or of all sources of supply of the contractor for that item;

(B) the national stock number of the item (if there is such a number) and the identification number of the actual manufacturer or producer of the item or of each source of supply of the contractor for the item; and

(C) the source of any technical data delivered under the contract.

(2) Paragraph (1) does not apply to a contract that requires the delivery of supplies that are commercial items, as defined in section 2302 of this title, sold in substantial quantities to the general public if the contract-

~~(A) provides for the acquisition of such supplies by the Department of Defense at established catalog or market prices; or~~

~~(B) is awarded through the use of competitive procedures.~~

(c) Identification of supplies and technical data under this section shall be made in the manner and with respect to the supplies prescribed by the Secretary of Defense.

**1.6.9. 10 U.S.C. § 2410a**

**Appropriated funds: availability for certain contracts for 12 months**

**1.6.9.1. Summary of the Law**

This provision is short enough that it may easily be set out in its entirety:

Funds appropriated to the Department of Defense for a fiscal year shall be available for payments under contracts for any of the following purposes for 12 months beginning at any time during the fiscal year:

(1) The maintenance of tools, equipment, and facilities.

(2) The lease of real or personal property, including the maintenance of such property when contracted for as part of the lease agreement.

(3) Depot maintenance.

(4) The operation of equipment.

**1.6.9.2. Background of the Law**

This law was codified in 1988 as part of a general enactment<sup>1</sup> which codified "in title 10, United States Code, various provisions of law that [had] been free-standing permanent provisions of law since 1970."<sup>2</sup> This particular statute was not one of those which had been free-standing since 1970, but was instead first enacted as a stand-alone provision in 1985.<sup>3</sup> It was later amended in 1991 to include "equipment" in paragraph (1) and to add new paragraph (4) concerning the operation of equipment.<sup>4</sup>

**1.6.9.3. Law in Practice**

DFARS 237.106(2) implements paragraphs (1), (3), and (4) of this section.

---

<sup>1</sup>Codification of Military Laws Act of 1988, Pub. L. No. 100-370, § 1(5)(h)(B), 102 Stat. 840, 847.

<sup>3</sup>Further Continuing Appropriations, 1985, Pub. L. No. 99-190, 99 Stat. 1185, 1203.

<sup>4</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 342, 105 Stat. 1291, 1343 (1991).

#### **1.6.9.4. Recommendation and Justification**

##### **Retain**

Two comments were received. One indicated, without elaboration, that the law need not be applied to commercial products.<sup>5</sup> The other suggested extending the time period funds are available to 13 months rather than 12 months.<sup>6</sup>

#### **1.6.9.5. Relationship to Objectives**

Retention of this law facilitates the exercise of sound judgment by acquisition personnel. The law is simple and understandable and encourages efficient procurement practices.

---

<sup>5</sup>Letter from DOD Inspector General signed by Derek J. Vander Schaaf, Deputy Inspector General, to Stuart A. Hazlett (Oct. 6, 1992).

<sup>6</sup>SAF/AQC letter to Stuart A. Hazlett (Oct. 8, 1992).

## **1.6.10. 41 U.S.C. § 12**

### **No contract to exceed appropriations**

#### **1.6.10.1. Summary of the Law**

This section is short enough that it may easily be set out in its entirety:

No contract shall be entered into for the erection, repair, or furnishing of any public building, or for any public improvement which shall bind the Government to pay a larger sum of money than the amount in the Treasury appropriated for the specific purpose.

#### **1.6.10.2. Background of the Law**

This section originated in 1868<sup>1</sup> and has not been subsequently amended. There appears to be no relevant legislative history.

#### **1.6.10.3. Law in Practice**

This law has little, if any, impact on DOD acquisitions, which are generally conducted under general appropriations. The restrictions on appropriated funds for DOD purposes are generally covered by the Anti-Deficiency Act, 31 U.S.C. § 1341. The 1868 law, however, still requires that construction or improvements of public buildings be paid for by specific appropriations, and the law has been cited by the Comptroller General in enforcing this rule.<sup>2</sup>

Although the FAR does not reference this section specifically, it does clearly implement its intent within FAR 32.702, which states, "No officer or employee of the Government may create or authorize an obligation in excess of the funds available, or in advance of appropriations (Anti-Deficiency Act, 31 U.S.C. § 1341), unless otherwise authorized by law."

#### **1.6.10.4. Recommendation and Justification**

##### **Retain**

The Panel believes the purpose of this section remains valid. Retention is recommended because even though it does not significantly impact acquisitions by DOD, it continues to affect acquisitions by other agencies.

---

<sup>1</sup>R. S. § 3733, derived from Act of July 25, 1868, ch. 233, §3, 15 Stat. 177.

<sup>2</sup>See J. Cibinic and R. Nash, FORMATION OF GOVERNMENT CONTRACTS 36, 37 (2d ed. 1986), and the decisions cited therein.

#### **1.6.10.5. Relationship to Objectives**

Retention of this law will promote the financial and ethical integrity of the procurement process.

## **1.6.11. 41 U.S.C. § 413**

### **Tests of innovative procurement methods and procedures**

#### **1.6.11.1. Summary of the Law**

Section 413 was added to the Office of Federal Procurement Policy (OFPP) Act by the OFPP Act Amendments of 1983. This section authorized the Administrator for Federal Procurement Policy to develop innovative procurement methods and procedures to be tested by selected agencies. These methods must be consistent with the policies in 41 U.S.C. § 401.

In developing a program to test innovative procurement methods, section 413(a) directs that the Administrator consult with the heads of executive agencies to:

- ascertain the need for and specify the objectives of such program;
- develop the guidelines and procedures for carrying out such program and the criteria to be used in measuring the success of such program;
- evaluate the potential costs and benefits that may be derived from the innovative procurement methods and procedures tested under such program;
- select the appropriate executive agencies or components of executive agencies to carry out such program;
- specify the categories and types of products or services to be procured under such program; and
- develop the methods to analyze the results of such program.

In addition, prior to implementation, a program brought under section 413 requires approval by the head of the executive agency selected to carry out the program.

Section 413(b) permits the OFPP Administrator, whenever necessary, to request from the House Committee on Government Operations and the Senate Committee on Governmental Affairs a waiver of the application of any provision of law in order to carry out a proposed program brought under subsection (a). The request to Congress must include a description of the proposed program, the executive agency responsible for the program, the procedures the agency will follow in carrying out the program, the provisions of law to be waived, and the provisions of law affected by the program.

### **1.6.11.2. Background of the Law**

41 U.S.C. § 413 was added to the OFPP Act by the OFPP Act Amendments of 1983.<sup>1</sup> The purpose of the 1983 amendments was to improve the management of the Federal procurement process by strengthening OFPP.<sup>2</sup>

### **1.6.11.3. Law in Practice**

This statute provides a vehicle to develop innovative procurement methods and procedures to be tested by selected agencies.

### **1.6.11.4. Recommendation and Justification**

#### **Retain**

This section should be retained as it encourages agencies to try more efficient procurement methods. It also provides the necessary authority and an orderly procedure to act on that authority.

### **1.6.11.5. Relationship to Objectives**

This statute encourages innovative solutions to acquisition related issues. Therefore, retention of this statute is in the best interests of DOD.

---

<sup>1</sup>Office of Federal Procurement Policy Act Amendments of 1983, Pub. L. No. 98-191, § 7, 97 Stat. 1325, 1329-30.  
<sup>2</sup>S. REP. NO. 214, 98th Cong., 1st Sess. 1 (1983).

## **1.6.12. Public Law Number 101-189 § 821**

### **Requirement for certificate of independent price determination in certain department of defense contract solicitations**

#### **1.6.12.1. Summary of the Law**

This section of public law requires the Secretary of Defense to propose a revision to FAR 3.103-1 so that it no longer exempts work performed by foreign suppliers outside the United States from having to execute a Certificate of Independent Price Determination (a certificate against collusive bidding practices).

#### **1.6.12.2. Background of the Law**

The National Defense Authorization Act for Fiscal Years 1990 and 1991 enacted this section.<sup>1</sup>

#### **1.6.12.3. Law in Practice**

This section has been implemented and FAR 3.103-1 no longer includes such a provision.

#### **1.6.12.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this section, since the change to the appropriate FAR Subpart has been accomplished.

#### **1.6.12.5. Relationship to Objectives**

Adoption of the Panel's recommendation will help streamline the body of acquisition laws.

---

<sup>1</sup>Pub. L. No. 101-189, § 821, 103 Stat. 1352, 1503 (1989).

## **1.6.13. Public Law Number 101-189 § 822**

### **Uniform rules on dissemination of acquisition information**

#### **1.6.13.1. Summary of the Law**

This section of public law requires the Secretary of Defense to amend the DFARS so that it contains a single, uniform regulation for DOD regarding dissemination of, and access to, acquisition information.

#### **1.6.13.2. Background of the Law**

The National Defense Authorization Act for Fiscal Years 1991 and 1992 enacted this section.<sup>1</sup> According to the Senate report,<sup>2</sup> this provision was in response to "Ill Wind." The House Armed Services Committee stated in its report on the National Defense Authorization Act for Fiscal Years 1990 and 1991:

. . . this provision is intended to improve the efficiency and effectiveness of Department of Defense acquisition practices and is not intended to provide a basis for a private party to challenge the validity of any implementing rule issued by a Department of Defense component on the ground that it is inconsistent with Department of Defense or government-wide policy.<sup>3</sup>

#### **1.6.13.3. Law in Practice**

An interim rule has been published in the Federal Register.<sup>4</sup>

#### **1.6.13.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retaining this section until the final rule has been published. At that time, the section should be repealed.

#### **1.6.13.5. Relationship to Objectives**

This section supports the Panel's objective of identifying a broad policy objective, but leaving the detailed implementing methodology to the regulators.

## **2. CONTRACT ADMINISTRATION**

### **2.0. Introduction**

This Chapter sets forth the Panel's recommendations concerning laws relating to contract administration. These laws apply primarily to matters arising after award of a DOD contract, although in some cases there is preaward application such as the use of cost principles in pricing contracts and determining the need for and the scope of a warranty provision. Similarly, other laws such as the Truth in Negotiations Act which have substantial post award application were not considered as part of the Panel's construct of contract administration. The Panel divided the laws into the following seven categories:

- Contract Payment
- Cost Principles
- Contract Audit and Access to Records
- Cost Accounting Standards
- Administration of Contract Provisions Relating to Price, Delivery and Product Quality
- Claims and Disputes
- Extraordinary Contractual Relief

The Panel's statutory mandate to streamline the acquisition process and eliminate laws that are unnecessary for the establishment and administration of the buyer and seller relationship has particular application to laws relating to contract administration. Acquisition laws should focus on the contract formation process at which point national policies favoring competition, protection and support for small businesses, and domestic content laws are implemented. Lacking statutory guidance, decisions by procurement officials would not necessarily reflect the national policy decisions articulated in the laws passed by Congress and approved by the President.

After the contract is awarded, however, the normal buyer and seller relationships and dynamics should apply. At this point, the focus is on compliance by both parties to previously agreed upon terms. The buyer wants a conforming item delivered on time and the seller wants timely payment and the opportunity to establish expertise and credibility for subsequent procurements of the same or similar items. There should be little difference from the forces that affect buyers and sellers in the private sector. Only in those limited areas where this normal, mutually understood relationship fails to protect the pre-established rights and obligations of the parties should extraordinary measures be taken. Even here, most matters of concern could be addressed through regulation.

The Panel was keenly aware that the contract administration process involves millions of discrete actions each year such as acceptance of items, payment, cost determinations, assertion of warranty actions or contractor claims among many others. Given the large number and variety of actions, drafting laws is a venture that should clearly be demonstrated as being worth the cost imposed on buyers and sellers. Any attempt should not in turn create worse problems for the much larger number of contractors in the universe which has been identified for reform by new legislation.

The contract administration process should focus on the most efficient manner to ensure contract compliance. The cost of administration to the Government should be commensurate with the results of the effort expended, and the cost to the contractor should be the minimum amount necessary to demonstrate compliance with contract terms and conditions. The Panel had as one of its guiding principles to facilitate the entry and retention of small businesses and companies selling commercial items in the DOD market. To the extent that costs of verifying contract compliance markedly increase the costs of commercial items or items that small businesses can readily supply, this key objective will not be met.

Finally, the Panel felt that, particularly in the area of contract administration, the laws should be easily located, understood and susceptible to compliance. The tens of thousands of companies ranging from the largest multidivisional companies to the "Mom and Pop" operations should not have to seek extensive advice or counsel or assistance from their elected representatives to locate and understand the laws that relate to contract compliance with their customer - the Government.

### **2.0.1. The Contract Administration Process**

The contract administration process involves those activities necessary to ensure that the parties fulfill their respective obligations under the contract. The process runs from the day the contract is awarded through contract close-out. It includes monitoring the contractor's performance at a level deemed appropriate to ensure the quality of the services or product, adjusting the specifications and pricing of the contract as necessary to reflect changes in assumptions about the work to be done, formally accepting the services or product to allow for contract payment and resolving disputes.

The level of contract administration activity can vary widely depending on the nature, object, and duration of the contract. A competitively awarded firm, fixed price contract for 30 day delivery of a commercial, off-the-shelf item will usually require no more than destination inspection and acceptance and payment. In contrast, a large cost reimbursement contract for engineering, developing and producing technologically complex systems over a period of years may require placing full-time contract management personnel in a contractor's plant to identify and solve problems.

FAR Part 42 prescribes general policies and procedures for assigning and performing contract administration functions and related audit services. FAR 42.3 breaks contract administration functions into sixty-seven specific activities. DFARS 242.203 assigns

administration functions for most Defense contracts to the Defense Contract Management Command (DCMC), a component of the Defense Logistics Agency (DLA). DCMC and two Defense agencies, the Defense Contract Audit Agency (DCAA) and the Defense Finance and Accounting Service (DFAS), perform almost all post award functions in DOD.

The establishment and operation of these agencies have not been without difficulties both for DOD contractors and the DOD buying activities. However, these agencies were established with the stated purposes of providing one face to industry in their functional areas, greater uniformity of application of the contract administration laws and regulations, and better service to both buyers and sellers by economies of scale, automation initiatives, and use of the best management practices. Many initiatives are underway to achieve these goals although much remains to be done. The Panel's recommendations take into account these organizational structures and initiatives designed to facilitate a more efficient acquisition process. A brief description of the agencies is set forth below.

### **Defense Contract Management Command**

Prior to 1990, contract administration was performed by the individual military services and DLA. The services managed contracts for major weapons systems. DLA managed contracts for weapons systems, consumable items and spare parts. In February 1990, DCMC was formed and in June 1990 the majority of DOD contract administration functions were consolidated under DCMC. DCMC was one of the first major initiatives to result from the Defense Management Review (DMR), DOD's blueprint for streamlining and improving its operations.

The DMR noted that the consolidation would streamline contract administration services, save overhead and personnel costs and present one unified face to industry on contract administration policies and regulations. Currently, DCMC with 19,000 personnel worldwide is responsible for contract administration involving 25,000 contractors and 413,000 contracts valued at \$740 billion.

DCMC has adopted a number of initiatives to facilitate the effective performance of its mission. One initiative that allows DCMC to allocate resources effectively and efficiently in the performance of its mission is called Process-Oriented Contract Administration Services (PROCAS). Under PROCAS, Government and contractor representatives work together to identify key contractor processes for improvement. The goals of PROCAS are to prevent problems before they occur, continuously improve a contractor's processes and products, and monitor contract performance to the extent necessary.

### **Defense Contract Audit Agency**

The Defense Contract Audit Agency, established in 1965, is a Defense agency under the direction, authority, and control of the DOD Comptroller. DCAA's mission is to perform all contract audits for DOD and provide accounting and financial advisory services for the negotiation, administration, and settlement of contracts and subcontracts. The charter also authorizes providing contract audit services to other Federal agencies on a reimbursable basis.

DCAA conducts independent audits in accordance with generally accepted Government auditing standards issued by the Comptroller General of the United States.

To assure contract compliance and prevention of fraud, waste, and abuse without greatly increasing audit oversight, there is coordination and communication among all audit entities -- Federal auditors, company internal auditors, and outside CPA firms. DCAA's goal is to work with contractors to improve their internal control systems to document that they comply with Federal procurement regulations and to ensure that those contractors who are successful receive less Government oversight.

DCAA has made progress reaching this goal through its support and implementation of the DOD Contractor Risk Assessment Guide (CRAG) Program. CRAG is designed to encourage DOD contractors to develop more effective internal control systems and to improve the effectiveness and efficiency of DOD oversight. Contractors who can demonstrate the implementation of internal control systems that meet CRAG control objectives receive less direct Government oversight. Under CRAG, the scope of DCAA audit oversight can be reduced by assessing the effectiveness of internal controls on contractor accounting and audit systems, thereby enabling DCAA to concentrate its resources on known problem areas.

#### **Defense Finance and Accounting Service**

The Defense Finance and Accounting Service (DFAS) was established as a separate DOD agency in January 1991 as the result of a Defense Management Review (DMR) initiative. DFAS is responsible for the finance and accounting functions of all DOD components. During the next several years, DFAS plans to consolidate operations; standardize policy, systems, and operations; expand innovative use of technology; increase civilian and military work force productivity; and eliminate unnecessary policies and procedures.

Within five years, DOD component finance and accounting functions, except some direct customer support and data input functions, will be consolidated into several DFAS Centers of Excellence. Organizational structures and operating procedures will be standardized by function when the same function exists at more than one DFAS Center. DFAS projects that these initiatives, among others, will reduce its operating costs by half.

Finance and accounting policies will be implemented consistently throughout DOD. Standard DOD-wide policy and procedural guidance suitable for use at all levels will be developed and maintained by DFAS management. There will be a single, standard contract payment system, which will significantly improve efficiency and expedite payments to contractors.

As with DCMC and DCAA, DFAS is committed to streamlining and reducing the costs of its operations. The initiatives of these three Defense agencies are consistent with the Panel's goal of making the acquisition process more efficient and cost effective.

## **2.0.2. Summary of Panel Recommendations**

One hundred and seven laws were identified as falling within the category of contract administration. Nineteen were eliminated from further consideration as "not acquisition related" in the initial screening. The Panel's recommendations on the remaining 88 are:

- Repeal 14
- Amend 12
- Retain 43
- Delete 1
- No action 18

The Panel's recommendations on the subelements of contract administration laws are as follows:

### **2.0.2.1. Contract Payment**

The fifteen laws relating to payment were among the most duplicative, dispersed, and difficult to understand of any of the contract administration laws. The primary recommendations are to consolidate a number of these laws into a single statute, renamed "Contract financing," and to add statutory guidance on making such payments with special attention to the needs of small businesses. In addition to recommending repeal of several outmoded statutes, the Panel recommends amending the Prompt Payment Act to change the procedures for computing discounts. As discussed in more detail later in this report, recent statutory changes to this act have slowed rather than expedited payment to contractors.

### **2.0.2.2. Cost Principles**

Three laws were categorized as cost principles although these included the Vinson-Trammell Act, which is actually a limitation on profits. However, the Panel objectives were satisfied by including this law with the laws more generally accepted as relating to cost principles. Section 2324 of Title 10 received the most attention from those who provided comments to the Panel during its deliberations. This included extensive input from both industry and Government sources and resulted in extended discussion during Panel meetings. The keen interest in this law was exemplified by the action of the Congress in amending it in the National Defense Authorization Act for Fiscal Year 1993. The amendments to the so called "penalty provisions" were similar to those which the Panel had been considering and should alleviate most of the concerns expressed by industry about the law. In addition, the Panel recommends that the detailed coverage on individual cost elements be repealed and left to the regulatory process. This will allow flexibility in future application while taking into account the Congressional interest in this area. Consistent with the Panel's objective of placing policy guidance and basic concepts in law while leaving implementation to regulations, the Panel also recommends that 10 U.S.C. § 2324 be amended to include guidance on total costs, on what constitutes a cost, and cost allowability.

### **2.0.2.3. Contract Audit and Access to Records**

This category of contract administration laws also generated extensive comments from both industry and Government commentators. Of the twenty-one laws identified, 10 U.S.C. § 2313 received the most scrutiny and became the centerpiece of the Panel's recommendations. The Panel recommends that a consolidated audit and access to records statute be enacted by the Congress, eliminating duplication or outmoded elements, while adding exemptions and new categories of contracts to be audited. These exemptions and categories of contracts had been set forth in regulations for many years without a clear trail back to the statute. Consistent with its objective of facilitating the purchase of commercial items, the Panel recommends that 10 U.S.C. § 2313 be listed as one of the statutes inapplicable to procurement of commercial items.

### **2.0.2.4. Cost Accounting Standards**

The Panel's consideration of cost accounting standards focused on the impact of these standards on the purchase of commercial items. The Panel was informed of an increasingly prevalent practice of DOD suppliers maintaining separate production facilities for commercial and DOD work due to the additional costs occasioned by DOD laws and regulations such as the cost accounting standards. Many suggestions for changes to the standards or their application to contractors or classes of contractors were made to the Panel. The Panel felt that imposition of these standards could add significantly to the cost of doing business for a basically commercial contractor and that a number of the suggestions for changes to the standards or their application had merit. However, after reviewing the enabling statute for the Cost Accounting Standards Board, the Panel decided that necessary improvements or reforms could be carried out by the Cost Accounting Standards Board using its existing authority. Thus, the Panel makes no recommendation for legislative action, but recommends that the Cost Accounting Standards Board take early action to consider the issues brought to the Panel's attention. Of particular importance to a strong industrial base and expansion of competition would be regulatory changes to facilitate the purchase of commercial items.

### **2.0.2.5. Administration of Contract Provisions Relating to Price, Delivery, and Product Quality**

Although not falling into easily recognizable categories such as audit and access to records or cost accounting standards, there are eleven laws relating to contract administration issues such as product quality, place of delivery, and assignment of contracts. Of these laws, 10 U.S.C. § 2403 covering warranties on major weapons systems and 41 U.S.C. § 15 covering assignment of contracts were the subjects of most of the comments and recommendations to the Panel. After reviewing the results of several studies addressing the cost effectiveness of warranties on major weapons and hearing both industry and Government sources question the utility of a mandatory warranty for major weapons systems, the Panel recommends the repeal of 10 U.S.C. § 2403. Alternatively, if the Congress continues to mandate the use of such warranties, recommendations are made for changes to the current law to meet some of the concerns expressed to the Panel. With respect to 41 U.S.C. § 15, the Panel recommends retention of this law which has served its

purpose well, but also recommends that its application to contracts not be dependent upon a state of war or national emergency.

#### **2.0.2.6. Claims and Disputes**

The primary statute governing contract claims and disputes is the Contract Disputes Act (CDA), 41 U.S.C. §§ 601-613. The Panel gave extensive consideration to the CDA and other statutes that taken together, comprise the claims and disputes process. Under the CDA, there is overlapping jurisdiction between the United States Claims Court<sup>1</sup> and the agency boards of contract appeals, and any thorough consideration of claims and disputes must take into account whether such duplication is warranted. Congress had choices to make in determining the jurisdiction of the dispute resolution forums and could have chosen, for example, to grant judicial review only after exhaustion of administrative remedies. Alternatively, if the Claims Court is to have original jurisdiction, a duplicative, heavily proceduralized administrative forum is not, strictly speaking, necessary. The choices have already been made, however, and Congress established what has proven to be a workable system.

After completing its top to bottom review of claims and disputes, the Panel concluded that while major changes are not necessary, the claims and disputes process does need fine tuning in some areas.

Because some United States District Courts have persistently but erroneously asserted jurisdiction over contract claims under the Little Tucker Act, 28 U.S.C. § 1346, the Panel recommends a clarifying amendment to this statute. Other Panel recommendations would achieve the following: a uniform appeal period of ninety days both at the Claims Court and the agency boards of contract appeals; a simplified, uniform certification requirement for all contract claims; a \$100,000 threshold rather than the current \$50,000 threshold for claims certification; a \$25,000 threshold rather than the current \$10,000 for accelerated appeals at the boards of contract appeals; and a six year statute of limitations for the filing of contract claims.

Statutory amendments in section 907 of the Federal Courts Administration Act of 1992 and in the National Defense Authorization Act for Fiscal Year 1993 have gone a long way to correcting problems with claims certification and also with shipbuilding claims. Few additional adjustments are needed in these areas that have been problematic for the Government contracting community in the past.

#### **2.0.2.7. Extraordinary Contractual Relief**

The authority, contained in 50 U.S.C. §§ 1431-1435 dates back in one form or another to extraordinary authority granted by the Congress in World War II. Departments and agencies, acting under authority delegated by the President, are authorized to award or amend contracts, make advance payments without regard to other laws, or indemnify against unusually hazardous

---

<sup>1</sup>During the writing of this report, Congress changed the name of the Claims Court to the Court of Federal Claims. See Federal Courts Administration Act of 1992; Court of Federal Claims Technical and Procedural Improvements Act of 1992, Pub. L. No. 102-572, § 907(a) & (b).

or nuclear risks. More detailed guidance is contained in an executive order and implementing regulations. Comments to the Panel and review of the actions taken pursuant to the law demonstrate its continued need and that the law is being carried out prudently. However, as with 41 U.S.C. § 15, the Panel recommends that the law be available for use even when the United States is not at war or in a state of national emergency. There are contingency military operations or relief operations following natural disasters that make a compelling case for the use of this extraordinary authority at any time.

## **2.1. Contract Payment**

### **2.1.0. Introduction**

The Panel identified 15 statutes in the area of contract administration relating to contract payment. Further examination revealed that, while 10 U.S.C. § 2307, "Advance payments," was the primary payment statute in Title 10 addressing advance, progress and partial payments, there were several other similar statutes scattered throughout the U.S. Code. These statutes, 10 U.S.C. § 7312, "Repair or maintenance of naval vessels: progress payments under certain contracts," 10 U.S.C. § 7364, "Advancement of funds for salvage operations," and 10 U.S.C. § 7521, "Progress payments for work done; lien based on payment," all relate to allowances for progress payments and liens in certain types of naval contracts, including vessel repair and maintenance, and salvage operations. Keeping in mind its statutory mandate to streamline the defense acquisition process, the Panel recommends that the other payment statutes be repealed as independent sections and that their substance be merged into 10 U.S.C. § 2307 as new subsections. This move would retain the authority of these various statutes in a centralized location in the Code.

The Panel also recommends renaming 10 U.S.C. § 2307 from "Advance payments" to "Contract financing." The new title more accurately reflects the purpose and context of the proposed consolidated statute and is the same title as the major implementing payment regulation. Finally, an introductory provision was added to 10 U.S.C. § 2307 that clearly states DOD's policy of making payments in a timely manner to facilitate contract performance while protecting the security interests of the Government. The Panel believes that both the Government and the private sector will benefit from the development of this centralized, consolidated statute.

While examining the payment statutes, the Panel noted that 31 U.S.C. § 3324, "Advances," which is applicable to all Government agencies, contained authority duplicative of that contained in 10 U.S.C. § 2307. The Panel considered recommending repeal of this statute in favor of the proposed consolidated statute at 10 U.S.C. § 2307, but was concerned that eliminating 31 U.S.C. § 3324 would cause unnecessary questions regarding the applicability of this authority to all Government agencies. The Panel, therefore, recommends that this statute be retained.

The Panel received several comments from Government and industry representatives on the current use and effectiveness of the Prompt Payment Act, 31 U.S.C. §§ 3901- 3907. The consensus among the commenters and the Panel was that the Act is a useful and necessary tool in the business relationship between the Government and the contracting community. However, one significant problem was identified. 31 U.S.C. § 3904 contains a provision allowing a discount if a payment is made within a certain time period. The current statute provides that this time period will begin from the date of the invoice. Various Government representatives noted that the additional time needed for mailing and routing of these invoices made it very difficult to pay these invoices in time to benefit from the discount. If the discount cannot be taken, the paying office waits until near the end of the thirty day period. This is done because of sound cash management principles. To solve this problem, the Panel recommends that 31 U.S.C. § 3904 be amended to allow the discount period to begin at the later of the receipt of the invoice or receipt of the goods

**and services. This proposal will give the Government more time to make payments and increase the likelihood that the payments will be made within the discount time limit. The Government will benefit from the discount and industry will benefit by receiving its payments more quickly.**

## 2.1.1. 10 U.S.C. § 2307

### Advance payments

#### 2.1.1.1. Summary of the Law

This section allows an agency to make advance, partial, or progress payments under contracts for property or services, not to exceed the unpaid contract price, provided adequate security is given to the Government and such payments are in the public interest. It also specifies a procedure to be followed if a remedy coordination official determines that a contractor has requested advance, partial, or progress payments based on fraud.

#### 2.1.1.2. Background of the Law

Prior to the enactment of 10 U.S.C. § 2307, the advance of public money was prohibited by statute unless allowed by the appropriation.<sup>1</sup> Express statutory authority permitting the use of advance payments was necessary to overcome this prohibition.<sup>2</sup> This section was part of the Armed Services Procurement Act of 1947.<sup>3</sup> Legislative history shows that Congress passed this section in response to the difficulties some defense contractors experienced in trying to obtain necessary financial support from commercial lending sources during World War II.<sup>4</sup> Congress intended that defense contractors producing products and services necessary to DOD would have the critical financial backing necessary to ensure their availability to the armed services in the event of a national emergency.<sup>5</sup>

Several amendments were later made to this section. A 1958 amendment permitted the head of any agency to delegate his powers to other agency officers.<sup>6</sup> In 1978, Congress added a provision requiring written notification to the Senate and House Armed Services Committees of payments exceeding \$25 million, with an opportunity for either Committee to disapprove such payment.<sup>7</sup> The 1985 amendment permitted progress payments only if the work done satisfied the quality requirements in the contract, and then only for 80% of the work done on the project so long as the contractual terms, specifications, and price are not definite.<sup>8</sup> This section was later repealed, but its substance was included in subsection (d) of the statute.<sup>9</sup> Finally, in 1990,

---

<sup>1</sup>R.S. § 3648 (1875), as amended by 31 U.S.C. § 529 (1952).

<sup>2</sup>Office of General Counsel of the Department of the Navy, *Navy Contract Law*, 2d ed. (1959).

<sup>3</sup>Armed Services Procurement Act of 1947, ch. 65, § 5, 62 Stat. 20, 23.

<sup>4</sup>S. REP. NO. 571, 80th Cong., 2d Sess. 18-19 (1947), reprinted in 1948 U.S.C.C.A.N. 1048, 1066-67.

<sup>5</sup>*Id.* at 18.

<sup>6</sup>Act of August 28, 1958, Pub. L. No. 85-800, § 9, 72 Stat. 966, 967.

<sup>7</sup>Department of Defense Appropriation Authorization Act of 1974, Pub. L. No. 93-155, § 807(c), 87 Stat. 605, 616 (1973).

<sup>8</sup>National Defense Authorization Act for Fiscal Year 1986, Pub. L. No. 99-145, § 916, 99 Stat. 583, 688-89 (1985).

<sup>9</sup>Codification of Military Laws, Pub. L. No. 100-370, § 1(f)(1)(A), 102 Stat. 840, 846 (1988).

Congress authorized the agency head to reduce or suspend further payments to contractors based on substantial evidence of fraud.<sup>10</sup>

In spite of numerous changes, the legislative history of this section shows almost universal support for the practice of advance, partial, and progress payments.<sup>11</sup> The only argument against this provision concerned the increased financial risk to the Government as a result of the increased financial support to contractors.<sup>12</sup> More recently, this section has been used with special peacetime contracts that demand payments prior to completion, such as contracts with nonprofit institutions or contracts with very long lead times.<sup>13</sup>

### **2.1.1.3. Law in Practice**

There are numerous provisions concerning payments throughout the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regulation Supplement (DFARS). Advance payments are specifically addressed in FAR Part 32 and 52.232-12 and 52.232-16.

The Office of the General Counsel of the Department of the Air Force noted that most acquisition statutes impose conditions, restrictions, or limitations on contracting officials. When statutes do grant authority, as this one does, it is usually given to overcome other statutory restrictions.<sup>14</sup> Since 10 U.S.C. § 2307 is one of the few statutes that gives DOD actual authority, the Air Force recommends its retention in some form.<sup>15</sup> Headquarters, Air Force Systems Command, supports the consolidation of the payment laws.<sup>16</sup> The Defense Systems Management College recommended that the title of this statute be changed to reflect the approach used in FAR Part 32 which differentiates between "financing" and "payment" methods. It also mentioned that FAR section 32.104 would provide an excellent basis for a policy section in this statute.<sup>17</sup>

### **2.1.1.4. Recommendations and Justification**

**Retain the current authority contained in this statute and merge the substance of three other payment statutes into this statute.**

---

<sup>10</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 836(a), (b), § 1322(a)(4), 104 Stat. 1485, 1615-16, 1671 (1990).

<sup>11</sup>George Washington University Government Contracts Program, *The Armed Services Procurement Act of 1947: A Legislative Abstract* (1991).

<sup>12</sup>*Id.*

<sup>13</sup>*Id.*

<sup>14</sup>Memorandum from John P. Janeczek, Assistant General Counsel (Procurement), Department of the Air Force to Abner Young, SAF/AQCP, Department of the Air Force (Mar. 3, 1992).

<sup>15</sup>*Id.*

<sup>16</sup>Memorandum from Brig. Gen. John M. Nauseef, Deputy Chief of Staff, Financial Management & Comptroller, Department of the Air Force (Mar. 6, 1992).

<sup>17</sup>Memorandum from LtCol Terry Raney, USAF, Department Chair, Contractor Finance Department, Defense Systems Management College to the Chairman of the DOD Advisory Panel on Streamlining and Codifying Acquisition Laws (Apr. 30, 1992).

This section should be renamed "Contract financing" and the substance of 10 U.S.C. §§ 7312, 7364, and 7521 should be incorporated into the renamed 10 U.S.C. § 2307. 10 U.S.C. § 2307 is currently named "Advance payments." The consolidation of these statutes will eliminate duplication, and the renaming of 10 U.S.C. § 2307 will more accurately reflect the purpose and context of the proposed consolidated statute.

The new "Contract financing" statute should be organized as follows:

- An introductory policy section that states that payments shall be made in a timely manner to facilitate contract performance while protecting the security interests of the Government.
- Several subsections covering advance payments, progress payments, and other special payment situations should be included.

10 U.S.C. § 2307 is the section on payment most used by DOD. 10 U.S.C. §§ 7312, 7364, and 7521 all relate to allowances for progress payments and liens in certain types of naval contracts, including vessel repair and maintenance, and salvage operations. These sections should be repealed as independent sections and merged into the proposed consolidated 10 U.S.C. § 2307 as subsections.

The Navy has expressed a concern about merging the substance of 10 U.S.C. § 7521 into the proposed consolidated payment statute.<sup>18</sup> This statute is specific to shipbuilding and has been cited in the Navy's standard liens and titles clause used in all shipbuilding contracts.<sup>19</sup> The Navy was concerned that this authority could be impacted if the section were merged into 10 U.S.C. § 2307.<sup>20</sup> After being assured by the Panel that no change would be made, the Navy agreed to the consolidation of 10 U.S.C. § 7521 and the Panel has included the Navy's proposed statutory language in 10 U.S.C. § 2307.<sup>21</sup>

#### **2.1.1.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law. Small businesses will also benefit from the retention of the Government's authority to make advance, partial, and progress payments.

## 2.1.1.6. Proposed Statute

### Section 2307. ~~Advance payments~~ Contract financing

(a) Payments, authorized under this section and made for financing purposes, should be made periodically and in a timely manner to facilitate contract performance while protecting the security interests of the Government. Government financing shall be provided only to the extent actually needed for prompt and efficient performance, considering the availability of private financing. The contractor's use of contract financing provided and the contractor's financial status shall be monitored. If the contractor is a small business concern, special attention shall be given to meeting the contractor's financial need.

(ab) The head of any agency may--

(1) make advance, partial, progress, or other payments under contracts for property or services made by the agency; and

(2) insert in bid-solicitations for procurement of property or services a provision limiting to small business concerns advance or progress payments.

(bg) Payments made under subsection (ab) may not exceed the unpaid contract price.

(ed) Advance payments made under subsection (ab) may be made only if the contractor gives adequate security and after a determination by the head of the agency that to do so would be in the public interest. Such security may be in the form of a lien in favor of the United States on the property contracted for, on the balance in an account in which such payments are deposited, and on such of the property acquired for performance of the contract as the parties may agree. This lien is paramount to any all other liens and is effective immediately upon the first advancement of funds without filing, notice or any other action on the part of the United States.

(dg)(1) The Secretary of Defense shall ensure that any payment for work in progress (including materials, labor, and other items) under a defense contract that provides for such payments is commensurate with the work already accomplished that meets standards of quality established under the contract. The contractor shall provide such information and evidence as the Secretary of Defense determines necessary to permit the Secretary to carry out the preceding sentence.

(2) The Secretary shall ensure that progress payments referred to in paragraph (1) are not made for more than 80 percent of the work accomplished under a defense contract so long as the Secretary has not made the contractual terms, specifications, and price definite.

(3) This subsection ~~does not apply~~ applies only to any contracts for an amount net in excess of the amount of equal to or greater than the small simplified purchase acquisition threshold.

(f) For contracts made by the Department of the Navy, the Secretary of the Navy--

(1) shall provide that the rate for progress payments on any contract awarded by the Secretary for repair, maintenance, or overhaul of a naval vessel shall be not less than--

(A) 95 percent, in the case of firms considered to be small businesses, and

(B) 90 percent, in the case of all other firms.

(2) may advance to private salvage companies such funds as he considers necessary to provide for the immediate financing of salvage operations, provided such advances are made on terms the Secretary considers adequate for the protection of the United States.

(3) shall provide that partial, progress or other payments made under contracts for construction or conversion of naval vessels shall be secured by a lien in favor of the United States upon work in progress and on property acquired for performance of the contract on account of all payments so made. This lien is paramount to all other liens.

(g) For all contracts or amendments or modifications of contracts for services and materials necessary to conduct research and to make or secure reports, tests, models, or apparatus made by the Secretary of Defense or the Secretaries of the military departments, the provisions of this section and subsections (a) and (b) of title 31 do not apply to any advance, progress or other payments made on said contracts.

(eh)(1) In any case in which the remedy coordination official of an agency finds that there is substantial evidence that the request of a contractor for advance, partial, or progress payment under a contract awarded by that agency is based on fraud, the remedy coordination official shall recommend that the head of the agency reduce or suspend further payments to such contractor.

(2) The head of an agency receiving a recommendation under paragraph (1) in the case of a contractor's request for payment under a contract shall determine whether there is substantial evidence that the request is based on fraud. Upon making such a determination, the agency head may reduce or suspend further payments to the contractor under such contract.

(3) The extent of any reduction or suspension of payments by the head of an agency under paragraph (2) on the basis of fraud shall be reasonably commensurate with the anticipated loss to the United States resulting from the fraud.

(4) A written justification for each decision of the head of an agency whether to reduce or suspend payments under paragraph (2) and for each recommendation received by such agency head in connection with such decision shall be prepared and be retained in the files of such agency.

(5) The head of an agency shall prescribe procedures to ensure that, before such agency head decides to reduce or suspend payments in the case of a contractor under paragraph

(2), the contractor is afforded notice of the proposed reduction or suspension and an opportunity to submit matters to the head of the agency in response to such proposed reduction or suspension.

(6) Not later than 180 days after the date on which the head of an agency reduces or suspends payments to a contractor under paragraph (2), the remedy coordination official of such agency shall--

(A) review the determination of fraud on which the reduction or suspension is based; and

(B) transmit a recommendation to the head of such agency whether the suspension or reduction should continue.

(7) The head of an agency shall prepare for each year a report containing the recommendations made by the remedy coordination official of that agency to reduce or suspend payments under paragraph (2), the actions taken on the recommendations and the reasons for such actions, and an assessment of the effects of such actions on the Federal Government. The Secretary of each military department shall transmit the annual report of such department to the Secretary of Defense. Each such report shall be available to any member of Congress upon request.

(8) This subsection applies to the agencies named in paragraphs (1), (2), (3), and (4) of section 2303(a) of this title.

(9) The head of an agency may not delegate responsibilities under this subsection to any person in a position below level IV of the Executive Schedule.

(10) In this subsection, the term "remedy coordination official", with respect to an agency, means the person or entity in that agency who coordinates within that agency the administration of criminal, civil, administrative, and contractual remedies resulting from investigations of fraud or corruption related to procurement activities.

## 2.1.2. 10 U.S.C. § 2355

### Contracts: vouchering procedures

#### 2.1.2.1. Summary of the Law

This section allows the Secretaries of the military departments, with the approval of the Secretary of Defense and the Comptroller General, to promulgate regulations on the extent of the itemization, substantiation, and certification required of fund vouchers for research and development contracts prior to payment, notwithstanding laws relating to the expenditure of, and accounting for, public funds.

#### 2.1.2.2. Background of the Law

This section was originally enacted in 1952<sup>1</sup> and later codified in Title 10 and Title 32. The legislative history of the original enactment shows that the military departments had experienced problems negotiating research and development contracts with universities, nonprofit organizations, and other civilian institutions because these entities were not equipped to handle the detailed vouchering and auditing procedures involved with Government contracts.<sup>2</sup> The Senate noted that the vouchering and auditing procedures had been relaxed during World War II for research and development contracts and that this practice had been highly successful.<sup>3</sup> At the time of its enactment, there were no dissenting opinions noted in the legislative history.

#### 2.1.2.3. Law in Practice

The Council of Defense and Space Industry Associations (CODSIA) noted that this law is outdated and has created inefficiencies and hardships because of cumbersome processing procedures. It recommended that this law be repealed in order to promote uniform vouchering procedures throughout all Government agencies. CODSIA also stated that this statute has placed an onerous administrative burden on the contractors to which it applies.<sup>4</sup> The Defense Systems Management College (DSMC) noted that to adopt simplified vouchering procedures for all contracts, substantial clarification would be needed because of the differing performance requirements of cost versus fixed price type contracts. Most research and development contracts are cost type, while the majority of production contracts are fixed price. DSMC recommends that a detailed discussion of the implications of the simplified vouchering system should be included in the legislation or implementing regulations.<sup>5</sup>

<sup>1</sup> Act of July 16, 1952, ch. 882, § 6, 66 Stat. 725, 726.

<sup>2</sup> S. REP. NO. 936, 82nd Cong., 1st Sess. 4 (1952), *reprinted in* 1952 U.S.C.C.A.N. 2278, 2281.

<sup>3</sup> *Id.*

<sup>4</sup> Letter from the Council of Defense and Space Industry Associations (CODSIA) to Gary Quigley and Jack Harding (Apr. 23, 1992).

<sup>5</sup> Letter from LtCol. Terry Raney, USAF, Department Chair, Contractor Finance Department, Defense Systems Management College to Chairman of the DOD Advisory Panel on Streamlining and Codifying Acquisition Laws (Apr. 30, 1992).

#### **2.1.2.4. Recommendation and Justification**

##### **Repeal**

This statute gives the Secretaries of the military departments the authority to promulgate rules to simplify the vouchering procedures for only research and development contracts. In the interest of streamlining the acquisition process, the simplified vouchering procedures permitted in this statute should be applied to all Government contracts, not just to research and development. The Panel further recommends that these simplified procedures be promulgated in the regulations, not in the statute. There are numerous provisions in the Federal Acquisition Regulation (FAR) regarding vouchering procedures. The implementation in the regulations provides a greater degree of flexibility in application than do the provisions of the statute. The Panel recommends this statute be repealed, but that the concept of simplified vouchering procedures and the implications of this policy change be fully explained in subsequent regulations.

#### **2.1.2.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication of authority currently present in the procurement process by repealing statutes that have been successfully implemented in the applicable regulations. This recommendation will also facilitate Government access to all types of commercial technologies and skills, not merely those associated with research and development.

### 2.1.3. 10 U.S.C. § 7312

#### **Repair or maintenance of naval vessels: progress payments under certain contracts**

##### 2.1.3.1. Summary of the Law

This law requires the Secretary of the Navy to provide the rate of progress payments on naval ship contracts for repair, maintenance, or overhaul to be not less than 95% for small businesses and not less than 90% for all other businesses.

##### 2.1.3.2. Background of the Law

This law was originally passed in 1987<sup>1</sup> and provided that the progress payments made by the Navy on naval ship contracts would be 90% to small businesses and 85% to all other businesses.<sup>2</sup> It was amended in 1988 to add the words "shall be" before the existing words "not less than."<sup>3</sup> This provision was proposed by the House to establish that the specified rates were minimum rates. The Senate receded.<sup>4</sup> The last amendment to this statute, enacted in 1989,<sup>5</sup> increased the minimum rates in the law by 5% and extended "the applicability of the provision to nuclear-powered vessels and to ship work required to be performed in greater than one year."<sup>6</sup>

##### 2.1.3.3. Law in Practice

One comment was received on the impact this law has had in practice. The Council of Defense and Space Industry Associations (CODSIA) noted that this law is necessary for the integrity of the buyer/seller relationship, particularly in the current economic climate.<sup>7</sup> It mentioned that many of its members are experiencing financial difficulties, not because of the law itself, but because its implementation has thrust the costs of financing on individual contractors and subcontractors.<sup>8</sup> It recommended amending the statute to allow for 100% recoupment of financing costs within 30 days of accrual and progress billing.<sup>9</sup>

<sup>1</sup>National Defense Authorization Act for Fiscal Years 1988 and 1989, Pub. L. No. 100-180, § 1102(a)(1), 101 Stat. 1019, 1145 (1987).

<sup>2</sup>H.R. CONF. REP. NO. 446, 100th Cong., 1st Sess. 674 (1987), *reprinted in* 1987 U.S.C.C.A.N. 1018, 1786.

<sup>3</sup>National Defense Authorization Act for Fiscal Year 1989, Pub. L. No. 100-456, § 1223, 102 Stat. 1918, 2054 (1988).

<sup>4</sup>H.R. CONF. REP. NO. 989, 100th Cong., 2d Sess. 459 (1988), *reprinted in* 1988 U.S.C.C.A.N. 2503, 2587.

<sup>6</sup>H.R. CONF. REP. NO. 331, 101st Cong., 1st Sess. 669 (1989), *reprinted in* 1989 U.S.C.C.A.N. 838, 1126.

<sup>7</sup>Letter from the Council of Defense and Space Industry Associations (CODSIA) to Gary Quigley and Jack Harding (Apr. 23, 1992).

<sup>8</sup>*Id.*

<sup>9</sup>*Id.*

#### **2.1.3.4. Recommendations and Justification**

##### **Repeal and merge in 10 U.S.C. § 2307 as a subsection.**

This law should be repealed as an independent statute and the substantive portions of the law should be merged into the proposed consolidated version of 10 U.S.C. § 2307, "Contract financing," as recommended by the Panel in its review of 10 U.S.C. § 2307. The Panel has recommended that all statutes within Title 10 relating to contract payment and financing be consolidated within a single comprehensive statute. This single statute will centralize all pertinent requirements regarding Title 10 contract financing while eliminating duplication within the United States Code. The Panel agrees with CODSIA that 10 U.S.C. § 7312 is necessary to ensure the financial and ethical integrity of the acquisition process; however, the Panel does not concur that a provision requiring 100% contractor recoupment is necessary. The substance of 10 U.S.C. § 7312, as currently written, has been included in the proposed language of the consolidated 10 U.S.C. § 2307.

#### **2.1.3.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It eliminates the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law. Small businesses will also benefit from the retention of the Government's authority to make advance, partial, and progress payments.

## 2.1.4. 10 U.S.C. § 7364

### Advancement of funds for salvage operations

#### 2.1.4.1. Summary of the Law

This law authorizes the Secretary of the Navy to advance funds to provide for the immediate financing of salvage operations. These advances may be made on any terms the Secretary deems adequate for the protection of the United States.

#### 2.1.4.2. Background of the Law

This law was passed in 1948.<sup>1</sup> The legislative history reveals that, at the beginning of World War II, there was only one naval salvage company in operation capable of performing offshore salvage operations, and none had operated on the west coast between 1937 and 1941.<sup>2</sup> When the United States entered World War II, the Navy commandeered the one existing salvage company and contracted with it to cover the east coast, west coast, and the Caribbean.<sup>3</sup> The Navy also developed a large internal salvage operation during this time that operated primarily in war zones.<sup>4</sup>

Providing advancements for salvagers was an effort by the Congress to encourage the growth of the salvage market.<sup>5</sup> It wished to relieve the Navy of some of its salvage responsibility during peacetime while enabling new salvage companies to emerge.<sup>6</sup> Congress also realized that these salvage companies might not have the liquid capital necessary to perform large offshore salvage operations.<sup>7</sup>

#### 2.1.4.3. Law in Practice

The Council of Defense and Space Industry Associations (CODSIA) stated that, although this law is not outdated and does not contain ambiguous terms, it is duplicative of 10 U.S.C. § 2307 and other advance payments statutes.<sup>8</sup> The Navy Comptroller (NAVCOMPT) noted that this statute contains "fairly favorable authority which doesn't require determinations and

<sup>7</sup> *Id.*

<sup>8</sup> Letter from the Council of Defense and Space Industry Associations (CODSIA) to Gary Quigley and Jack Harding (Apr. 23, 1992).

findings."<sup>9</sup> It expressed concern that merging this statute into a consolidated statute could cause the Navy to lose necessary flexibility.<sup>10</sup>

#### **2.1.4.4. Recommendations and Justification**

##### **Repeal and merge in 10 U.S.C. § 2307 as a subsection.**

It is the Panel's recommendation that all statutes within Title 10 relating to contract payment and financing should be consolidated within a single comprehensive statute. The Panel recommends that 10 U.S.C. § 7364 be repealed as an independent statute and the substantive portions of the law be merged into the proposed consolidated version of 10 U.S.C. § 2307, "Contract financing," as a subsection. Notwithstanding NAVCOMPT concerns, the Panel believes that by incorporating the exact wording of 10 U.S.C. § 7364 into the new "Contract financing" statute as a subsection, the Navy will retain the authority and flexibility it has now. This single comprehensive statute will centralize all pertinent requirements regarding Title 10 contract payment and financing while eliminating duplication within the U.S. Code.

#### **2.1.4.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It eliminates the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law. Small businesses will also benefit from the retention of the Government's authority to make advance, partial, and progress payments.

<sup>10</sup>*Id.*

## 2.1.5. 10 U.S.C. § 7521

### Progress payment for work done; lien based on payment

#### 2.1.5.1. Summary of the Law

This law authorizes the Secretary of the Navy to make partial payments during the progress of work on a naval contract, provided the payments do not exceed the value of the work done and the contract provides for such a payment. Each contract that provides for partial payments will also contain a provision granting a paramount lien to the Government on the contracted item when partial payments are made.

#### 2.1.5.2. Background of the Law

This law was passed in 1911<sup>1</sup> and codified in 1956. As originally proposed, the law would have allowed partial payments of only 90% of the value of the work already performed.<sup>2</sup> The Secretary of the Navy objected to this draft provision, claiming that it would violate existing provisions in naval contracts.<sup>3</sup> The Secretary also said that a 90% limitation on partial payments would put the Government in a position in the future of having to pay, as part of the contract price, the cost of financing the whole contract.<sup>4</sup> He observed that very few contractors have the capital to fund a multimillion dollar project without partial payments along the way.<sup>5</sup> The Secretary felt that the safeguards and precautions already in place to protect the public were extensive and further limitations on the Navy's ability to make partial payments were not needed.<sup>6</sup> The statute incorporates the Navy's recommendations. There have been no further amendments to this law.

#### 2.1.5.3. Law in Practice

The Council of Defense and Space Industry Associations (CODSIA) stated that the ambiguous terms in this statute have led to interpretation problems.<sup>7</sup> Specifically, there is an "ever increasing perception that more detailed audits are necessary, notwithstanding the fact that most of the contracts have been fixed price contracts where the contractor is assuming risks."<sup>8</sup> Even with these problems, CODSIA recommended that this law be retained, but agreed the authority could be adequately included within a subsection of the proposed consolidated statute.<sup>9</sup>

<sup>8</sup>*Id.*

<sup>9</sup>*Id.*

However, the accompanying legislation should explain the significant difference between progress payments based on cost and shipbuilding progress payments based on percentage of completion.<sup>10</sup> The Defense Contract Management District Mid-Atlantic (DCMDM) of the Defense Logistics Agency commented that, while this statute provides that the Government will have a paramount lien over inventory in exchange for partial payments, U.S. Bankruptcy Courts and state courts have failed to consistently recognize the Government's lien as superior.<sup>11</sup> DCMDM suggested that the language granting the Government a superior lien on inventory financed by advance or progress payments could be reinforced.<sup>12</sup> DCMDM also noted that the requirement of a paramount lien should not be limited to naval contracts but should apply to all Government contracts in which progress payments are permitted.<sup>13</sup>

The Department of the Navy submitted significant comments on the current operation of this law. The Office of the General Counsel of the Department of the Navy stated that this statute is used by the Navy almost daily in shipbuilding contracts.<sup>14</sup> The Naval Sea Systems Command noted that "shipbuilding contracts are different from other types of contracts in that they generally involve both extended periods of performance, some up to 10 years, and significant payments by the Government prior to the delivery of the vessels."<sup>15</sup> Because of this, the Navy has found it helpful to cite a specific statute in court for the Government's claimed interest in parts or materials.<sup>16</sup> In fact, the Office of the General Counsel stated that this statute has been the authority cited in the Navy's standard "Liens and Titles" clause and has been incorporated in more than \$14 billion in open contracts.<sup>17</sup> In the 80 years the Navy has been using this authority, an understanding has developed between the Navy, its shipbuilders, and suppliers that "a Government lien attaches when progress payments are made, and that title passes when delivery is made to the shipyard."<sup>18</sup> While the Navy would prefer to keep this statute, it did agree that the essence of the statute could be incorporated into the Panel's proposed consolidated payment statute, 10 U.S.C. § 2307, "Contract financing."<sup>19</sup>

<sup>19</sup>*Id.*

#### **2.1.5.4. Recommendations and Justification**

##### **Repeal and merge in 10 U.S.C. § 2307 as a subsection.**

It is the Panel's recommendation that all statutes within Title 10 relating to contract payment and financing should be consolidated within a single comprehensive statute. The Panel recommends that 10 U.S.C. § 7521 be repealed as an independent statute and that substantive portions of the law be merged into the revised version of 10 U.S.C. § 2307, "Contract financing," as a subsection. While the Panel believes that CODSIA and DCMDM have posed valid points, it is of the opinion that these concerns would be better addressed in the regulations. This single comprehensive statute will centralize all pertinent requirements regarding Title 10 contract payment and financing while eliminating duplication within the U.S. Code.

#### **2.1.5.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law.

## **2.1.6. 31 U.S.C. § 1341**

### **Limitations on expending and obligating amounts**

#### **2.1.6.1. Summary of the Law**

This statute prohibits an officer or employee of the U.S. Government or the District of Columbia from making or authorizing an expenditure or obligation in excess of that available in an appropriation or fund or involving either Government in a contract or obligation for the payment of money before the obligation is made. It also prohibits the authorization of an expenditure or obligation of funds or the involvement of either Government in a contract or obligation for the payment of money required to be sequestered under the Balanced Budget and Emergency Deficit Control Act of 1985. This subsection does not apply to a corporation getting amounts to make loans without legal liability of the U.S. Government. An article to be used by an executive department in the District of Columbia that could be bought out of an appropriation made to a regular contingent fund of the department may not be bought out of another amount available for obligation.

#### **2.1.6.2. Background of the Law**

This statute was originally enacted in 1905.<sup>1</sup> Congress has made only minor amendments to it since that time and has not discussed these amendments in any of its reports. The statute was codified in 1982.<sup>2</sup>

#### **2.1.6.3. Law in Practice**

No comments were received on this statute. It is referenced in FAR 32.702.

#### **2.1.6.4. Recommendation and Justification**

##### **No Action**

This law is not unique to contracting or to DOD acquisition. It does not present a core acquisition issue and only has an indirect relationship to contracting.

#### **2.1.6.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

## **2.1.7. 31 U.S.C. § 3324**

### **Advances**

#### **2.1.7.1. Summary of the Law**

This statute provides that a contract payment for services or delivery of items to the U.S. Government is limited to the value of the items or services already delivered. The statute allows advances only if authorized by a specific appropriation, or authorized by the President to an individual serving in the armed forces at a distant station, or a disbursing official after determining that the advance is necessary to carry out the duties of the official or to satisfy the Government's obligation. The law also allows the head of an agency to advance funds from appropriations for the payment of charges for the purchase of publications, and to the Secretary of the Army for charges for messages, tolls of commercial carriers, leasing, installing, and maintaining facilities for sending messages.

#### **2.1.7.2. Background of the Law**

This law was passed in 1894 as a limitation on the ability of heads of agencies to make advance payments on contracts.<sup>1</sup> In 1930, the statute was amended to permit advance payment for the purchase of subscriptions of newspapers, magazines, and other periodicals for official use.<sup>2</sup> Amendments in the years to follow all involved the ability of the agencies to make advance payments for publications. In 1961, this grant was extended to include the purchase of any publications for technical use including technical and professional books, treatises, and pamphlets.<sup>3</sup> The final substantive amendment to this law, enacted in 1974, permitted the agencies to make advance payments to purchase publications in alternative media such as microfilm, microfiche, and audio tape.<sup>4</sup> The intent of Congress in all of these amendments was the same: to allow the agencies to remain as current as possible by allowing them to purchase up-to-date publications. It also wanted the agencies to take advantage of the substantial savings associated with advance payments for these publications.

#### **2.1.7.3. Law in Practice**

Comments were received from the Navy and the Council of Defense and Space Industry Associations (CODSIA) on this law. CODSIA stated that this statute overlaps the authority in 10 U.S.C. § 2307, "Advance payments," and should be consolidated into a single advance payment

<sup>3</sup>Act of July 20, 1961, Pub. L. No. 87-91, § 1, 75 Stat. 211. *See also* H.R. REP. NO. 560, 87th Cong., 1st Sess. 1-2 (1961), *reprinted in* 1961 U.S.C.C.A.N. 2117, 2118.

<sup>4</sup>Act of Dec. 22, 1974, Pub. L. No. 93-534, 88 Stat. 1731.

statute.<sup>5</sup> The Navy stated that, although this law is duplicative of 10 U.S.C. § 2307, it is used by all Government agencies and should be retained.<sup>6</sup>

#### **2.1.7.4. Recommendation and Justification**

##### **Retain**

Notwithstanding the Panel's recommendation that all statutes within Title 10 relating to contract payment and financing should be consolidated within a single comprehensive "Contract financing" statute, the Panel recommends that 31 U.S.C. § 3324 be retained in its current form. The Navy and Air Force expressed their concern that merging this law into the proposed consolidated payment statute in 10 U.S.C. § 2307 might be viewed as limiting its authority to DOD, although this authority would be available to the non-defense agencies even if it were only in Title 10. The Panel is concerned, however, that eliminating this statute in favor of the consolidated payment statute in Title 10 would cause unnecessary questions regarding the applicability of this authority to all Government agencies.

#### **2.1.7.5. Relationship to Objectives**

This recommendation promotes the purchase of commercial products at commercial market prices and encourages the exercise of sound judgment on the part of acquisition personnel.

## **2.1.8. 31 U.S.C. §§ 3901 - 3907**

### **Prompt Payment Act<sup>1</sup>**

#### **2.1.8.1. Summary of the Law<sup>2</sup>**

The Prompt Payment Act gives the Federal Government an incentive to pay contractors promptly by providing for the payment of interest on late payments.

31 U.S.C. § 3901 defines key terms used in subsequent sections of the Act as well as making its provisions applicable to the various Federal agencies, the Tennessee Valley Authority, and the U.S. Postal Service.

31 U.S.C. § 3902 provides for the payment of interest on any late payment. This interest is to be computed at the rate established by the Secretary of the Treasury and published in the Federal Register. A business entity is not required to request the interest payment to receive it, and each interest payment will be accompanied by a notice stating the rate and amount of the interest. If a business entity is owed an interest penalty that is not paid and makes a written demand, it is entitled to an additional penalty equal to a percentage of such late payment interest penalty specified in regulations to be promulgated by the Director of the Office of Management and Budget. The interest unpaid in any 30 day period shall be added to the principal and interest will accrue on it. No additional appropriations will be given for the payment of interest.

31 U.S.C. § 3903 requires the Director of the Office of Management and Budget to promulgate regulations to carry out the previous section. The statute outlines some specific issues to be addressed in these regulations, including the required payment dates of contracts, the payment of periodic payments, the review and payment of invoices, and the methods of computing interest rates.

31 U.S.C. § 3904 limits the use of discount payments. This statute permits discounts only when made within the specific time stated in the contract, which begins from the date of the invoice.

---

<sup>1</sup>The following statutes are contained within the Act and will be discussed here:

- 10 U.S.C. § 3901 - Definitions and applications
- 10 U.S.C. § 3902 - Interest penalties
- 10 U.S.C. § 3903 - Regulations
- 10 U.S.C. § 3904 - Limitations on discount payments
- 10 U.S.C. § 3905 - Payment provisions relating to construction contracts
- 10 U.S.C. § 3906 - Reports
- 10 U.S.C. § 3907 - Relationship to other laws

<sup>2</sup>For a more complete summary of the Prompt Payment Act, see Michael J. Renner, *Prompt Payment Act: An Interest(ing) Remedy for Government Late Payment*, 21 PUB. CON. L. J. 177, 195-97 (1992).

31 U.S.C. § 3905 requires a construction contractor to notify the contracting agency of any payments and interest owed by the contractor based on substandard work. It further mandates that each construction contract contain a clause requiring the prime contractor to pay the subcontractor within seven days of receiving payment from the agency and a clause allowing interest to be paid to the subcontractor on any payments not made by the prime. The subcontractor is likewise obligated to include the payment and interest penalty clauses in any contracts with other subcontractors. These clauses are not meant to impair the rights of the prime and subcontractor to negotiate to permit retention of a portion of the progress payments to ensure satisfactory performance without incurring a late payment interest penalty, and to permit a determination that all or part of the subcontractor's payment may be withheld per the subcontract. If the subcontract allows for the withholding of all or part of the payment due to the subcontractor, the prime contractor must make notice to the subcontractor and the Government, pay the subcontractor as soon as is practicable, and pay the Government interest on the withheld payments from the eighth day after receipt of the payment from the Government. If the prime contractor is notified by a supplier or subcontractor of the first-tier subcontractor of the deficiency of performance of the first-tier subcontractor, the prime may withhold payment without incurring interest penalties, but must pay the first-tier subcontractor as soon as is practicable.

31 U.S.C. § 3906 requires the head of each agency to submit to the Office of Management and Budget a report detailing the payment practices of the agency during that fiscal year, which must contain certain enumerated information outlined in the statute.

31 U.S.C. § 3907 establishes that a claim for interest penalty may be filed under section 6 of the Contract Disputes Act and states when such a claim will accrue. This section does not limit accrual of such a claim to the time stated in this law but permits a claim to accrue according to section 12 of the Contracts Disputes Act as well.

#### **2.1.8.2. Background of the Law**

The Prompt Payment Act of 1981<sup>3</sup> was enacted to provide incentives for the Federal Government to pay contractors promptly as payments became due. The passage of the Act came about as a result of the failure of the Federal Government to promptly pay contractors in the past.<sup>4</sup> Prior to the Act, a contractor's only recourse for late or nonpayment was to make a claim under the Contract Disputes Act of 1978. This was not often done because of the expense involved in making a claim, the small amount of interest usually involved, and the contractors' apprehension that making such a claim would prejudice them when bidding on future contracts. Some of the resultant problems included overbidding to cover costs of late payments and lack of competition as small businesses ceased bidding on contracts.<sup>5</sup>

While the Prompt Payment Act of 1981 helped the situation, it was not long before the agencies discovered many loopholes that drastically reduced its effectiveness.<sup>6</sup> After numerous

<sup>5</sup>*Id.* at 2.

<sup>6</sup>*Id.* at 5.

complaints from the business community, the Prompt Payment Act of 1988 was passed to close the loopholes.<sup>7</sup> The Act was strengthened by providing the automatic payment of interest, an expanded agency reporting requirement, implementation of the Act in the Federal Acquisition Regulation (FAR), elimination of the 15 day payment grace period, and assistance to small businesses. At the time of passage, support was widespread for the amendments, with the exception of the provisions concerning coverage of subcontractors involved in Federal construction contracts.<sup>8</sup>

### 2.1.8.3. Law in Practice

In the years following the passage of the Prompt Payment Act of 1988, numerous complaints have been logged. Many have involved the implementation of the Act in the FAR, primarily in subpart 32.9, and the Office of Management and Budget (OMB) Circular A-125. These complaints include the fact that payment due dates vary by both the types of payments made under the Government contract and the event used as the starting point to determine when payment is due.

Several other complaints have been received from both industry and military organizations. The U.S. Army Armament, Munitions and Chemical Command noted that when payment is made late on a judgment resulting from a contractor's claim, the interest that accrues is not paid by the agency paying the judgment amount.<sup>9</sup> The payment laws are ambiguous as to who is responsible for the payment of late payment penalty fees and interest.<sup>10</sup> The Defense Finance and Accounting Service mentioned that there seems to be no statute of limitations on the filing of claims for prompt payment interest.<sup>11</sup> It stated that it often receives claims for the payment of interest on invoices that were paid four to six years ago.<sup>12</sup> It recommended including a statute of limitation on the presentation of claims for interest.<sup>13</sup>

Global Associates, an industry source, noted that definitions contained in OMB Circular A-125 are ambiguous and these ambiguities affect the determination of which contracts qualify for prompt payment interest.<sup>14</sup> It complained that, although the Federal Government takes title to property upon arrival at the installation, this does not constitute acceptance by the Government for contractual and advance payment purposes.<sup>15</sup> The Council on Governmental Relations (COGR) noted another problem with the OMB Circular. COGR stated that the definition of

<sup>15</sup>*Id.*

"invoice payment" contained in the circular excludes vouchers submitted for payment under cost reimbursement contracts for Federal research at the nation's nonprofit colleges and universities; thus, they are not protected by the Prompt Payment Act and receive no interest for late payments.<sup>16</sup> It recommended amending the statute to prevent "such inequitable implementation."<sup>17</sup>

The major complaint voiced about the Act appears to be the starting point of the discount period contained in 31 U.S.C. § 3904. One of the amendments to the Act in 1988 was to change the starting point of the discount period to the date of the invoice. Prior to 1988, the discount period began at the later of the receipt of the invoice or the receipt of the goods or services. The Office of the Comptroller of the Department of Defense, the Office of General Counsel for the Department of the Navy, the Command Counsel of Headquarters, Air Force Systems Command, the Office of General Counsel for the Department of the Air Force, and the Office of Financial Management & Comptroller of Headquarters, Air Force Systems Command all agree that a change should be made to the current language concerning the beginning of the discount period.<sup>18</sup> The Command Counsel of the Air Force Systems Command noted that the current discount period is virtually impossible to meet in the 10 days allotted for payment since days are lost in mailing, processing, and weekends.<sup>19</sup> The Office of the Comptroller of the Department of Defense (DOD Comptroller) stated that it has experienced a 15% increase in lost discounts from FY90 to FY91.<sup>20</sup> It also mentioned that once the discount period is lost, the Government often holds the invoice and does not pay it until the end of the 30 day period.<sup>21</sup>

The Air Force commentators and the DOD Comptroller suggested a return to the pre-1988 language of 31 U.S.C. § 3904, thereby extending the discount period to the later of the receipt of the invoice or the receipt of the goods or services.<sup>22</sup> The General Counsel of the Navy

also suggested a change to this statute but that would limit the discount period to the receipt of the invoice only.<sup>23</sup>

#### **2.1.8.4. Recommendations and Justification**

##### **Amend 31 U.S.C. § 3904 to extend the discount period and retain the rest of the Prompt Payment Act.**

The Panel recommends amending 31 U.S.C. § 3904 to allow the discount period to begin at the later of the receipt of the invoice or the receipt of the goods and services. The Panel agrees with the Air Force and DOD Comptroller that this extension of the discount period will be beneficial to Government and industry alike. This proposal will give the Government the full 10 days to make payments and increase the likelihood that the payments will be made within that time. The Government will benefit from the discount, and industry will benefit by receiving its payments promptly. The Panel recommends that the rest of the Prompt Payment Act be retained as written. Although certain commentators have expressed specific concerns with the implementation of the Act, these concerns are mainly with the coverage in OMB Circular A-125 and the regulations. The Act has served a useful purpose in requiring the payment of contractors within 30 days or awarding them interest for late payments and has solved problems experienced by contractors before the passage of the Act. The Panel recognizes that the Prompt Payment Act is a useful and necessary tool in the relationship between the Government and contracting community and should be retained.

#### **2.1.8.5. Relationship to Objectives**

This recommendation furthers the development and preservation of an industrial base. It assists small businesses with limited capital in receiving early payment for their work and promotes the purchase of commercial or modified-commercial products and services by the Department of Defense.

#### **2.1.8.6. Proposed Statute**

##### **Section 3904. Limitation on discount payments**

The head of an agency offered a discount by a business concern from an amount due under a contract for property or service in exchange for payment within a specified time may pay the discounted amount only if payment is made within the specified time. ~~For the purpose of the preceding sentence, the specified time shall be determined from the date of the invoice.~~ For the purpose of the preceding sentence, the specified time shall be determined from the later of the receipt of the goods or services, or the receipt of an invoice in the proper office of the agency. The head of the agency shall pay an interest penalty on an amount remaining unpaid in violation of this section. The penalty accrues as provided under sections 3902 and 3903 of this title, except

<sup>23</sup>Letter from Theodore T. Belazis, Deputy Counsel, Office of the Navy Comptroller, to Gary P. Quigley, Deputy General Counsel, Defense Logistics Agency (Apr. 28, 1992).

that the required payment date for the unpaid amount is the last day specified in the contract that the discounted amount may be paid.

## **2.1.9. Public Law Number 101-510 § 831**

### **Mentor-Protégé Pilot Program**

#### **2.1.9.1. Summary of the Law**

This section established the mentor-protégé pilot program "to provide incentives for major DOD contractors to furnish disadvantaged small business concerns with assistance designed to enhance the capabilities of disadvantaged small business concerns to perform as subcontractors and suppliers under DOD contracts and other contracts and subcontracts in order to increase the participation of such business concerns as subcontractors and suppliers under DOD contracts, other Federal Government contracts, and commercial contracts."<sup>1</sup>

#### **2.1.9.2. Background of the Law**

This section established a program that would "encourage large defense contractors to enter voluntarily into agreements to enhance the capabilities of small disadvantaged businesses (SDBs) to perform in the defense subcontract vendor base."<sup>2</sup> The mentor business would impart knowledge and skills necessary to help the small businesses to compete in the defense market. Congress intended that this program provide "a flexible framework for a mentor firm to develop SDBs capable of meeting available defense opportunities and should foster the establishment of stable, long-term business relationships."<sup>3</sup> Congress also expressed a hope that mentor firms would work with both established and emerging SDBs.<sup>4</sup>

By permitting the Secretary of Defense to promulgate regulations as to the types of firms permitted to participate in the programs, Congress expressed an intention that these regulations should encourage graduates of the Small Business Administration's section 8(a) program to participate as mentor firms.<sup>5</sup> Subsequent subsections provided for a developmental agreement between the parties. Congress intended this agreement would include "agreed upon factors to assess the protégé firm's progress under the program and parameters concerning the number and type of subcontracts the protégé firm may anticipate being awarded."<sup>6</sup> The procedures the parties should follow in the event of termination should also be enumerated in the agreement.<sup>7</sup> Congress emphasized that the termination of the mentor-protégé agreement should not be construed as requiring the mentor and protégé to terminate or otherwise impair an existing subcontract

---

<sup>1</sup>National Defense Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 831, 104 Stat. 1485, 1607-12 (1990).

<sup>2</sup>H.R. REP. NO. 665, 101st Cong., 2nd Sess. 630, 104 Stat. 2931, 3187 (1990), *reprinted in* 1990 U.S.C.C.A.N. 2931, 3187.

<sup>3</sup>*Id.*

<sup>4</sup>*Id.*

<sup>5</sup>*Id.*

<sup>6</sup>*Id.*

<sup>7</sup>*Id.* at 631.

awarded under the program.<sup>8</sup> The public law provides for financial assistance by the mentor firm in the form of progress payments, advance payments, and loans. Further, the public law provides for reimbursement to the mentor firm for the total amount of any progress payment or advance payment and reimbursement for costs of other assistance to a protégé.<sup>9</sup>

Congress emphasized that an increase in the number of subcontracts awarded to small disadvantaged businesses would be the largest indicator of success of this program.<sup>10</sup>

### **2.1.9.3. Law in Practice**

This program was passed in 1990,<sup>11</sup> implemented in 1991, and amended during the Persian Gulf crisis in 1991.<sup>12</sup> To date, 12 firms are enrolled in the program. Headquarters Air Force Systems Command noted that the 1991 amendment strengthened the original program by allowing mentor firms to recover costs incurred in assisting protégé firms as direct items of cost on defense contracts, through indirect expense recovery or through separate contracts or agreements.<sup>13</sup> The Air Force commented that the future cost impacts of the amended program may be substantial.<sup>14</sup> No other comments were received.

Section 807 of the National Defense Authorization Act for 1993 continued the pilot mentor-protégé program and authorized \$55 million for the performance of its functions.<sup>15</sup> This section directed the Secretary of Defense to publish DOD's policy on the program and any regulations or guidance it has issued in the DOD Supplement to the Federal Acquisition Regulation.<sup>16</sup> Congress also directed the Secretary to make certain changes to strengthen the program's small business aspects.<sup>17</sup>

### **2.1.9.4. Recommendation and Justification**

#### **Retain**

The Panel recommends that this statute be retained as written. Its provisions providing for payments by the mentor to the protégé and reimbursement of the mentor's expenses facilitate the entry of new businesses into the DOD vendor base. Because this is a recent statute for which the implementation process has only begun one year ago, time should be given for the program to be

<sup>14</sup>*Id.*

<sup>15</sup>National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 807, 106 Stat. 2315 (1992).

<sup>16</sup>*Id.*

<sup>17</sup>*Id.*

set into motion and its provisions observed in practice before any changes are made. The lack of comments on this law is a strong indication that the acquisition community has yet to discover any major problems requiring improvements to this law. Congress has endorsed this recommendation by retaining the statute in the 1993 National Defense Authorization Act and by providing for its implementation in the regulations. This statute is included in this section of the Report to provide a complete review of payment laws. This statute is discussed more fully in Chapter 4 of this Report.

#### **2.1.9.5. Relationship to Objectives**

This recommendation and this program will aid the Government in establishing a balance between an efficient procurement process with defined socioeconomic policies and full and open access to the commercial marketplace. This recommendation will also help small businesses by giving them added opportunities for participation in the defense acquisition process.

## **2.2. Cost Principles**

### **2.2.0. Introduction**

In the course of its review of laws relating to contract administration, the Panel identified three statutes addressing issues of cost principles. 10 U.S.C. § 2324, "Allowable costs under defense contracts," contains a comprehensive listing of specific unallowable costs as well as a provision assessing penalties for the inclusion of unallowable costs. Following a review of the history of this provision and the comments received from Government and industry, the Panel determined that this statute was passed in response to the few highly publicized cases of contractor abuse and the evidence of abuse discovered by Government auditors in 1985. There was extensive subsequent implementation of this statute in the FAR and DFARS; however, the specificity of the provisions prevented flexible regulatory changes. The Panel believes that the regulatory process is a more flexible alternative for addressing changing situations and specific problems in the acquisition process. The process by which statutory changes are achieved is complex and, in the face of a rapidly changing acquisition process, too slow for effective administration. The Panel recommends that the specific provisions addressing allowable costs be deleted from 10 U.S.C. § 2324 and guidance continued in the regulations. By recommending repeal of this authority from the statute, the Panel notes that it is not making any judgment on the substantive issues of allowability or allocability nor is it, in any way, urging the repeal of the cost principles already present in the regulations. The Panel also determined that a general policy statement regarding costs was necessary as a result of the removal of the specific cost language from 10 U.S.C. § 2324 and included such a statement at the beginning of the proposed statute.

After reviewing the legislative changes mandated by Congress in the National Defense Authorization Act for Fiscal Year 1993, the Panel determined that these changes addressed the major problems voiced by the commentators, while retaining the penalty incentives of the statute. The legislative changes to the penalty provision are very similar to those initially reached by the Panel after lengthy discussion on this issue. The Panel believes that the penalty scheme represents a substantial and important concern to both Government and contractors and should be outlined in the statute to make clear to both groups the specific actions that would subject a contractor to penalties and how those penalties are assessed. The Panel also believes that Congress' changes addressed many of the problems enumerated by the commentators and currently present in the defense procurement system. Experience should be gained under the new law and any implementing regulations before any more changes are made to the penalty process.

In addition to the penalty and cost principle provisions, the remaining substantive authority in this statute addresses the burden of proof to be used in appeals of unfavorable determinations, the requirement of evaluation by the Comptroller General on the implementation of the authority, and the definition of "covered contracts." The Panel decided that it was important to address the burden of proof statutorily because it was not clear that the provision would be enforceable if found only in regulation. The Panel recognizes the importance of oversight of the implementation of this statute by the legislative branch through the Comptroller General and recommends that this authority remain in the statute as well. Finally, the term "covered contract" was used in 10 U.S.C. § 2324. The Panel believes this definition should remain in the statute for clarity's sake. However,

the Panel recommends raising the threshold amount in this definition from \$100,000 to \$500,000, in response to inflation and current conditions in the defense procurement process. The Panel believes that the higher amount is more appropriate in today's economy.

During its review of 10 U.S.C. § 2324, the Panel noted that 41 U.S.C. § 420, "Travel expenses of government contractors," presented a similar problem. 41 U.S.C. § 420 contained very specific statutory authority addressing travel costs by Government contractors. This authority has been addressed in regulatory guidance, but the specificity of the statute has inhibited flexibility in the regulations. It is the Panel's opinion that the regulatory system affords a greater and more efficient response to the changing situations in the defense procurement process. Therefore, it recommends that 41 U.S.C. § 420 be repealed in favor of the regulatory guidance. In the interests of encouraging the integration of the defense and commercial markets, the Panel further recommends that any subsequent regulations promulgated in place of this statute require contractors to keep travel costs to a reasonable level, without restricting them to rigid rate schedules.

The final statute examined in this section was 10 U.S.C. § 2382, "Contract profit controls during emergency periods." During its review of this statute's history, the Panel noted that Congress had reviewed the problems with this law for over 40 years and had suspended its provisions for most of that time in favor of more efficient systems of limiting excess profits. The Panel agrees with the Senate of the 97th Congress that this law is outdated and inefficient. Any procedures considered necessary to limit profits could be adequately addressed in the FAR and DFARS.

## **2.2.1. 10 U.S.C. § 2324**

### **Allowable costs under defense contracts**

#### **2.2.1.1. Summary of the Law**

This section provides that the Secretary of Defense shall require that a covered contract provide that if a contractor submits a proposal for settlement of indirect costs incurred on a contract with the Department of Defense and that proposal contains costs that violate the cost principles in either the FAR or DFARS, the cost will be disallowed. If the Secretary of Defense determines that a cost is unallowable by clear and convincing evidence, the Secretary of Defense shall assess a penalty against the contractor equal to the amount of the disallowed costs plus interest, to compensate the United States for the funds a contractor was paid in excess of what he was entitled. In addition to this penalty, the Secretary of Defense shall assess a further penalty if it is determined that a contractor has submitted a cost that was previously determined to be unallowable. This penalty will be two times the amount of the costs determined to be unallowable. Under the Contract Disputes Act, these actions are considered final and are appealable. The statute also gives the Secretary of Defense the discretion to assess an additional penalty of not more than \$10,000 per proposal.

The section also enumerates many costs that are unallowable under covered contracts. These include, but are not limited to, costs of entertainment, contributions or donations, payments of fines or penalties, costs incurred in the defense of any civil or criminal fraud proceeding, and costs of severance pay. The statute also requires the Secretary of Defense to prescribe regulations to implement this section and to amend current provisions in the DFARS dealing with allowability of contractor costs. One subsection outlines the specific cost principles Congress intended the regulations to address, such as air shows, recruitment, community relations, dining facilities, travel, public relations, and advertising. The regulations shall require that a contracting officer obtain adequate documentation and the opinion of the defense contract auditor before resolving a questioned cost. The defense contract auditor should also be present at any meeting or negotiation regarding the allowability of indirect costs. The regulation also shall provide that any costs that are questioned by the defense contract auditor will be enumerated by individual amounts in his report. The costs of promoting the export of products of the U.S. defense industry are allowable in the regulations provided that they are allocable and reasonable, are determined by the Secretary of Defense to be likely to result in future cost advantages to the United States, and are not more than 110 percent of the costs incurred in the previous fiscal year. These regulations shall also apply to subcontracts.

The section provides that a proposal for settlement of indirect costs shall include a certification by an official of the contractor that, to his knowledge, all costs claimed therein are allowable. This certification requirement may be waived in exceptional cases by the Secretary of Defense or the Secretaries of the military departments if the secretary determines that it would be in the best interest of the United States to waive the certification and states the reasons for this determination in writing. If the proposal for settlement contains a cost that is specified by statute

or regulation as unallowable, the submission shall be subject to the provisions of 18 U.S.C. § 287 and 31 U.S.C. § 3729.

When the contractor appears before the Armed Services Board of Contract Appeals, the U.S. Claims Court or other Federal court seeking the reimbursement of indirect costs, the burden of proof shall be on the contractor to prove such costs are reasonable. Costs incurred by a contractor in connection with any civil, criminal, or administrative proceeding begun by the United States or a state for violation of a Federal or state regulation or statute will not be allowed as a reimbursable cost. The types of dispositions that prevent costs from being allowable include a conviction in a criminal proceeding, a determination of contractor liability in a civil or administrative proceeding alleging fraud, imposition of a monetary penalty in a civil or administrative proceeding, a final decision by DOD to debar or suspend the contractor or to rescind, void, or terminate the contract for default, or a disposition by consent or compromise that could have resulted in one of the above dispositions. If the consent or compromise agreement permits the reimbursement of costs, then they will be allowable.

If the proceeding is commenced by a state, the head of the agency that awarded the contract involved may permit the reimbursement of legal costs incurred if it is determined that the costs were incurred as a result of a specific term or condition of the contract or specific instructions by the agency. If such costs are determined allocable and allowable under the FAR, the amount of reimbursable costs shall not exceed 80% of the actual costs incurred. The regulations shall also provide for appropriate consideration of the complexity of the litigation, generally accepted principles governing the award of legal fees in civil actions, and other factors when determining the amount of costs to be reimbursed.

The final provisions of this statute define the terms "proceeding," "costs," "penalty", and "covered contracts." The Comptroller General is also required to periodically evaluate the implementation of this statute by the Secretary of Defense and to submit a report to Congress on such evaluation.

#### **2.2.1.2. Background of the Law**

This section was enacted in the Department of Defense Authorization Act of 1986.<sup>1</sup> Legislative history showed that Congress was outraged at the highly publicized cases of contractor abuse as well as evidence of abuse found by the Government's own auditors.<sup>2</sup> This law was meant to spell out for the Government and the contractors exactly what was and what was not an allowable cost with as few gray areas as possible.<sup>3</sup> The original version of this section included a long list of what was considered by Congress to be an unallowable cost and provided monetary penalties for the filing of a claim for an unallowable cost.<sup>4</sup> The law also gave the Secretary of Defense the power to promulgate regulations to give guidance to contractors on

<sup>4</sup>*Id.*

costs that fall into the "gray areas" between allowable and unallowable.<sup>5</sup> Also, contractors were required to submit current, accurate, and complete documentation of any claims and all costs incurred when the final settlement was proposed.<sup>6</sup>

While the majority of the Congress was in favor of this provision at its inception, a few complaints were voiced. Some members felt that the publicized cases of abuse illustrated only the few bad contractors in a group of thousands and that a more thorough investigation into the exact extent of contract abuse should be made.<sup>7</sup> It was also said that Congress was trying to micromanage the procurement system and by doing so, would take away DOD's flexibility in this area.<sup>8</sup> However, the public outcry and Congressional outrage over the excessive overspending were enough to outweigh these concerns.

Over the next few years, several amendments to this law were made, most of which addressed costs determined to be unallowable. These included golden parachute payments,<sup>9</sup> insurance taken out against a contractor's cost of correcting defects in materials or workmanship,<sup>10</sup> and severance costs paid to a foreign national employed by a contractor outside the United States.<sup>11</sup> Most recently, Congress determined that the contractor costs incurred in defense of a fraud proceeding would be unallowable.<sup>12</sup> Congress felt that contractors should be in the same position as any other litigant, who cannot recover the costs of defending itself in a criminal proceeding.

### 2.2.1.3. Law in Practice

This statute has been implemented in, or been the basis of, numerous provisions in the FAR and DFARS. Industry representatives have commented extensively on this statute. The Council of Defense and Space Industry Associations (CODSIA) made the following comments.<sup>13</sup> This law imposes arbitrary penalties on contractors, even those who have made the effort to provide adequate safeguards to reasonably protect the Government.<sup>14</sup> Penalties should not be assessed without evidence of a contractor's negligence or intent to defraud.<sup>15</sup> Because of the possibility of penalties if the submission is not 100% accurate, the contractor certification process has slowed to allow for review of all costs.<sup>16</sup> It contends that the Defense Contract Management Command (DCMC) and the Defense Contract Audit Agency (DCAA) have interpreted this

<sup>14</sup>*Id.*

<sup>15</sup>*Id.*

<sup>16</sup>*Id.*

statute strictly to subject contractors to penalties for even inadvertent errors.<sup>17</sup> It stated that it is greatly concerned that the guidance issued by the Defense Logistics Agency (DLA) and DCAA runs counter to the intent of contractors' participation in the Defense Industry Initiative and will damage or undo many of the positive accomplishments already achieved under existing contractor self-governance programs and the Contractor Risk Assessment Guide (CRAG) program.<sup>18</sup> CODSIA also argued that top Government procurement officials have stated that the strict language of the statute leaves no room for flexibility in implementation.<sup>19</sup> CODSIA's ultimate recommendation was that this statute should be repealed or substantially modified.<sup>20</sup>

The Aerospace Industries Association (AIA) commented separately from CODSIA on this statute.<sup>21</sup> It also believes that penalties should not be assessed without evidence of a contractor's negligence or fraudulent intent and that the strict interpretation in the supplemental guidance provided by DLA and DCAA hinders the positive accomplishments achieved under existing contractor self-governing programs.<sup>22</sup> AIA also recommends that this statute be repealed or substantially modified.<sup>23</sup>

The Defense Contract Audit Agency (DCAA) noted that because the provisions of this statute were enacted at different times they are not well integrated.<sup>24</sup> It believes that the costs identified in the statute should be replaced with a general policy statement and the specifics should be left to the regulators.<sup>25</sup> Accordingly, subsection (e)(2) of the statute, which allows for flexibility in the regulations, should be placed at the beginning of the statute and clarified for the regulation writers.<sup>26</sup> DCAA uses the subsection that disallows severance costs for foreign nationals as an example of how the specificity of the law has led to the inflexibility of the subsequent rule, because the regulators were afraid to interpret such a specific statute section.<sup>27</sup> DCAA argues that the law encourages inconsistent treatment among agencies in the application of cost principles and related regulations.<sup>28</sup>

DCAA believes that the penalty provisions should remain in the statute.<sup>29</sup> It does not see the penalty scheme as an impediment to contracting but rather as an effective internal control.<sup>30</sup>

<sup>29</sup>*Id.*

<sup>30</sup>Memorandum from William J. Sharkey, Assistant Director, Policy and Plans, Defense Contract Audit Agency to the Advisory Panel on Streamlining and Codifying Acquisition Laws (Mar. 26, 1992).

DCAA does not agree that contractor errors should be permitted to be excepted from the application of the penalty provision. In that case, every contractor would assert an "error" defense whenever an unallowable cost was found.<sup>31</sup> It also believes that the legislative history of the statute does not support industry assertions that the law was intended to penalize only intentional and negligent inaccuracy.<sup>32</sup> DCAA believes it is appropriate that the details of the penalty scheme should remain in the statute itself and should be retained as currently written.<sup>33</sup>

The Defense Contract Management District Mid-Atlantic (DCMDM) of DLA believes that DOD is interpreting this statute too strictly.<sup>34</sup> The opinion is that, once submitted, the contractor cannot withdraw the proposal for a voluntary removal of unallowable costs.<sup>35</sup> DCMDM argues that if a contractor, of its own accord, discovers that unallowable costs have been inadvertently included in the proposal, it should be allowed to withdraw the proposal and remove the cost.<sup>36</sup> It also believes that the law or implementing regulation should contain a clear and convincing evidence test to be used when making a determination.<sup>37</sup> DCMDM feels that this test will promote consistency in the assessment of penalties throughout DOD.<sup>38</sup> DCMDM also noted some problems that have arisen in contractor relationships with auditors.<sup>39</sup> It recommended that language should be added to the law to clarify that the auditor-recommended costs subject to penalty should identify the amounts of unallowable costs by each applicable contract, not just by amount.<sup>40</sup> The interpretation of what constitutes adequacy of documentation is vague in the law and will undoubtedly lead to some disagreements with auditors.<sup>41</sup> Finally, DCMDM also noted that mandating the presence of the auditor at cost negotiations appears to take away the negotiator's authority to assemble his own support staff for the negotiation process.<sup>42</sup>

The final comment received on this statute came from the Inspector General of the Department of Defense (DODIG).<sup>43</sup> The DODIG believes that this law is serving its intended purpose without creating inefficiencies or unduly burdening the buyer/seller relationship.<sup>44</sup>

In the National Defense Authorization Act for Fiscal Year 1993, Congress made a number of changes to the penalty provisions of 10 U.S.C. § 2324.<sup>45</sup> It limited the monetary penalty that could be assessed to either the amount of the disallowed cost, or, in cases where a disallowed cost is resubmitted, to twice the amount of the disallowed cost.<sup>46</sup> The provision allowing for the imposition of an additional \$10,000 penalty was eliminated as was the "clear and convincing evidence" burden of proof.<sup>47</sup> A new subsection was added that directed the Secretary of Defense to promulgate regulations allowing for the waiver of penalties if the contractor voluntarily withdraws the proposal for settlement of indirect costs, if the amount of unallowable costs found is insignificant, or if the contractor can demonstrate that he has an adequate internal control system and that the unallowable cost was inadvertently submitted in the proposal.<sup>48</sup> Congress noted that the penalty provisions are meant to ensure that the contractors remain responsible for screening their indirect cost submissions for unallowable costs, not the Government.<sup>49</sup>

#### **2.2.1.4. Recommendations and Justification**

**Amend 10 U.S.C. § 2324 to include a statement defining allowable costs and to retain only the provisions addressing the penalty scheme as amended by the National Defense Authorization Act for Fiscal Year 1993, the burden of proof, the evaluation by the Comptroller General, and the definition of "covered contract."**

The Panel recommends that the portion of the statute addressing cost principles be repealed and only the provisions addressing the penalty scheme, burden of proof, evaluation by the Comptroller General, and definition of "covered contract" be retained. The Panel agrees with the industry and DCAA comments that noted this statute was enacted by Congress in response to a specific problem that surfaced at the time of passage. There is extensive coverage of the cost principles in the FAR and DFARS, and addressing the cost principles in the regulations is more appropriate than enumerating them in the statute. DCAA even mentioned that statutory coverage of certain principles subsequently led to inflexibility in rules and regulations. The regulatory process is a more flexible alternative for addressing changing situations and specific problems in the acquisition process. The Panel recommends that the specific provisions addressing the cost principles be deleted from this statute and continued in the regulations. By recommending repeal of the cost principles coverage from the section, the Panel wishes to make clear that it is not making any judgment on the substantive issues of allowability nor is it, in any way, urging the repeal of the cost principles already present in the regulations.

The Panel believes that the legislative changes mandated by Congress in the National Defense Authorization Act for Fiscal Year 1993 address the major problems voiced by the commentators, particularly those of CODSIA, AIA, and DCMDM, while retaining the penalty

<sup>47</sup>*Id.*

<sup>48</sup>*Id.*

<sup>49</sup>H.R. Conf. Rep. No. 966, 102d Cong., 2d Sess. (1992).

language within the statute as DCAA recommended. The legislative changes to the penalty provision are very similar to those initially reached by the Panel after lengthy discussion of this issue. The Panel believes that the penalty scheme represents a substantial and important concern to both Government and contractors and should be outlined in law to make clear to both groups the specific actions that would subject a contractor to penalties and how those penalties are assessed. Experience should be gained under the new law and any implementing regulations before any more changes are made to the penalty process.

In addition to the penalty and cost principle provisions, the remaining substantive authority in this section addresses the burden of proof to be used in appeals of unfavorable determinations, the requirement of evaluation by the Comptroller General on the implementation of the authority, and the definition of "covered contracts." The Panel feels that it is important to address the burden of proof statutorily to make the standard clear and unambiguous. The Panel recognizes the importance of oversight of the implementation of this statute by the legislative branch through the Comptroller General and recommends that this authority remain in the statute as well. Finally, the term "covered contract" is used in the provision addressing penalties and this definition should remain in the statute to define its applicability. However, the Panel has recommended raising the threshold amount in this definition from \$100,000 to \$500,000, in response to inflation and the Panel's recommendation to maintain the TINA threshold at \$500,000. The Panel believes that the higher amount is more appropriate in today's economy.

The Panel believes that a general statement regarding costs is appropriate as a result of the removal of the specific cost language from the statute and has included such a statement at the beginning of the proposed statute. The Panel has also identified 41 U.S.C. § 256 as being duplicative of 10 U.S.C. § 2324(k), which has been recommended for repeal. 41 U.S.C. § 256 does not apply to DOD by statutory exclusion; thus, it is outside the Panel's scope of review. Although the Panel has not made a specific recommendation on 41 U.S.C. § 256, it would urge Congress to repeal this statute as well 10 U.S.C. § 2324(k).

#### **2.2.1.5. Relationship to Objectives**

This recommendation promotes the broad policy objectives and fundamental policy requirements of the Panel. This recommendation promotes the continued commercialization of the defense procurement process by relaxing the harsh consequences for the possibly inadvertent submission of unallowable costs. The recommendation adopts the changes recently approved by Congress to the penalty provision.

2.2.1.6. Proposed Statute<sup>50</sup>

§ 2324. Allowable costs under defense contracts

(a) The total cost of a defense contract is the sum of the allowable direct and indirect costs allocable to the contract, incurred or to be incurred, less any allocable credits, plus any allocable cost of money. In ascertaining what constitutes a cost, any generally accepted method of determining or estimating costs that is equitable and is consistently applied may be used, including standard costs properly adjusted for applicable variances. Costs shall be allowed to the extent they are reasonable, allocable, and determined to be allowable in accordance with the Federal Acquisition Regulation and the Department of Defense Supplement to the Federal Acquisition Regulation. The Secretary shall define in detail and in specific terms those costs, not addressed in the Federal Acquisition Regulation, which are unallowable, in whole or in part, under covered contracts.

~~(a)(1)~~ (1) The Secretary of Defense shall require that a covered contract provide that if the contractor submits to the Department of Defense a proposal for settlement of indirect costs incurred by the contractor for any period after such costs have been accrued and if that proposal includes the submission of a cost which is unallowable because the cost violates a cost principle in the Federal Acquisition Regulation or the Department of Defense Supplement to the Federal Acquisition Regulation, the cost shall be disallowed.

~~(2)(c)~~ (1) If the Secretary determines ~~by clear and convincing evidence~~ that a cost submitted by a contractor in its proposal for settlement is expressly unallowable under paragraph (1) under a cost principle referred to in subsection (b) that defines the allowability of specific selected costs, the Secretary shall assess a penalty against the contractor in an amount equal to --

(A) the amount of the disallowed costs cost allocated to covered contracts for which a proposal for settlement of indirect costs has been submitted; plus

(B) interest (to be computed based on regulations issued by the Secretary) to compensate the United States for the use of any funds which a contractor has been paid in excess of the amount to which the contractor was entitled.

~~(b) If the Secretary~~ (2) If the Secretary determines that a proposal for settlement of indirect costs submitted by a contractor includes a cost determined to be unallowable in the case of such contractor before the submission of such proposal, the Secretary shall assess a penalty against the contractor, ~~in addition to the penalty assessed under subsection (a)~~, in an amount equal to two times the amount of such cost the amount of the disallowed cost allocated to covered contracts for which a proposal for settlement of indirect costs has been submitted.

<sup>50</sup>This proposed language in new subsections (c), (d), and (e) incorporates the changes made by Congress to the penalty provision of this statute in the National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 807, 106 Stat. 2448 (1992). In view of the recent amendment and the substantial changes recommended by the Panel, the proposed section, with the amendments included and deletions recommended by the Panel, is also set forth as it would appear in the U.S. Code.

(d) The Secretary shall prescribe regulations providing for a penalty under subsection (c) to be waived in the case of a contractor's proposal for settlement of indirect costs when--

(1) the contractor withdraws the proposal before the formal initiation of an audit of the proposal by the Federal Government and resubmits a revised proposal;

(2) the amount of unallowable costs subject to the penalty is insignificant; or

(3) the contractor demonstrates, to the contracting officer's satisfaction, that-

(A) it has established appropriate policies and personnel training and an internal control and review system that provide assurances that unallowable costs subject to penalties are precluded from being included in the contractor's proposal for settlement of indirect costs; and

(B) the unallowable costs subject to the penalty were inadvertently incorporated into the proposal.

~~(e)~~(e) An action of the Secretary under subsection (a) or (b) --

(1) shall be considered a final decision for the purposes of section 6 of the Contract Disputes Act of 1978 (41 U.S.C. § 605); and

(2) is appealable in the manner provided in section 7 of such Act (41 U.S.C. § 606).

~~(d) If any penalty is assessed under subsection (a) and (b) with respect to a proposal for settlement of indirect costs, the Secretary may assess an additional penalty of not more than \$10,000 per proposal.~~

~~(e)(1) the following costs are not allowable under a covered contract:~~

~~— (A) Costs of entertainment, including amusement, diversion and social activities and any costs directly associated with such costs (such as tickets to shows or sports events, meals, lodging, rentals, transportation, and gratuities).~~

~~— (B) Costs incurred to influence (directly or indirectly) legislative action on any matter pending before Congress or a State legislature.~~

~~— (C) Costs incurred in defense of any civil or criminal fraud proceeding or similar proceeding (including filing of any false certification) brought by the United States where the contractor is found liable or has pleaded nolo contendere to a charge of fraud or similar proceeding (including filing of a false certification).~~

~~— (D) Payments of fines and penalties resulting from violations of, or failure to comply with, Federal, State, local or foreign laws and regulations, except where incurred as a result of compliance with specific terms and conditions of the contract or specific written~~

~~instructions from the contracting officer authorizing in advance such payments in accordance with applicable regulations of the Secretary of Defense.~~

~~— (E) Costs of membership in any social, dining, or country club or organization.~~

~~— (F) Costs of alcoholic beverages.~~

~~(G) Contributions or donations, regardless of the recipient.~~

~~— (H) Costs of advertising designed to promote the contractor or its products.~~

~~(I) Costs of promotional items and memorabilia, including models, gifts, and souvenirs.~~

~~(J) Costs for travel by commercial aircraft which exceed the amount of the standard commercial airfare.~~

~~(K) Costs incurred in making any payment (commonly known as a "golden parachute payment") which is --~~

~~— (i) in an amount in excess of the normal severance pay paid by the contractor to an employee upon termination of employment; and~~

~~— (ii) is paid to the employee contingent upon, and following, a change in management control over, or ownership of, the contractor or a substantial portion of the contractor's assets.~~

~~(L) Costs of commercial insurance that protects against the costs of contractor for correction of the contractor's own defects in materials or workmanship.~~

~~(M) Costs of severance pay paid by the contractor to foreign nationals employed by the contractor under a service contract performed outside the United States, to the extent that the amount of severance pay paid in any case exceeds the amount paid in the industry involved under the customary or prevailing practice for firms in that industry providing similar services in the United States, as determined under regulations prescribed by the Secretary of Defense.~~

~~(N) Costs of severance pay paid by the contractor to a foreign national employed by the contractor under a service contract performed in a foreign country if the termination of the employment of the foreign national is the result of the closing of, or the curtailment of activities at, a United States military facility in that country at the request of the government of that country.~~

~~(O) Costs incurred by a contractor in connection with any criminal, civil, or administrative proceeding commenced by the United States or a State, to the extent provided in subsection (k).~~

~~—(2) The Secretary shall prescribe regulations to implement this section. Such regulations may establish appropriate definitions, exclusions, limitations, and qualifications.~~

~~(f)(1) The Secretary shall prescribe proposed regulations to amend these provisions of the Department of Defense Supplement to the Federal Acquisition Regulations dealing with the allowability of contractor costs. The amendments shall define in detail and in specific terms those costs which are unallowable, in whole or in part, under covered contracts. These regulations shall, at a minimum, clarify the cost principles applicable to contractor costs of the following:~~

~~— (A) Air shows.~~

~~(B) Membership in civic, community, and professional organizations.~~

~~(C) Recruitment.~~

~~(D) Employee moral and welfare.~~

~~(E) Actions to influence (directly or indirectly) executive branch action on regulatory or contract matters (other than costs incurred in regard to contract proposals pursuant to solicited or unsolicited bids).~~

~~(F) Community relations.~~

~~(G) Dining facilities.~~

~~(H) Professional and consulting services, including legal services.~~

~~(I) Compensation.~~

~~(J) Selling and marketing.~~

~~(K) Travel.~~

~~(L) Public relations.~~

~~(M) Hotel and meal expenses.~~

~~(N) Expense of corporate aircraft.~~

~~(O) Company furnished automobiles.~~

~~(P) Advertising.~~

~~—(2) The regulations shall require that a contracting officer not resolve any questioned costs until he has obtained—~~

~~(A) adequate documentation with respect to such costs; and~~

~~(B) the opinion of the defense contract auditor on the allowability of such costs.~~

~~—(3) The regulations shall provide that, to the maximum extent practicable, the defense contract auditor be present at any negotiation or meeting with the contractor regarding a determination of the allowability of indirect costs of the contractor.~~

~~—(4) The regulations shall require that all categories of costs designated in the report of the defense contract auditor as questioned with respect to a proposal for settlement be resolved in such a manner that the amount of the individual questioned costs that are paid will be reflected in the settlement.~~

~~—(5) The regulations shall provide that costs to promote the export of the products of the United States defense industry, including costs of exhibiting or demonstrating products, shall be allowable to the extent that such costs—~~

~~(A) are allocable, reasonable, and not otherwise unallowable;~~

~~(B) with respect to the activities of the business segment to which such costs are being allocated, are determined by the Secretary of Defense to be likely to result in future cost advantages to the United States; and~~

~~(C) with respect to a business segment which allocates to Department of Defense contracts \$2,500,000 or more of such costs in any fiscal year of such business segment, are not in excess of the amount equal to 110 percent of such costs incurred by such business segment in the previous fiscal year.~~

~~(g) The regulations of the Secretary required to be prescribed under subsections (e) and (f)(1) shall require, to the maximum extent practicable, that such regulations apply to all subcontractors of a covered contract.~~

~~(h)(1) A proposal for settlement of indirect costs applicable to a covered contract shall include a certification by an official of the contractor that, to the best of the certifying official's knowledge and belief, all indirect costs included in the proposal are allowable. Any such certification shall be in a form prescribed by the Secretary.~~

~~—(2) The Secretary of Defense or the Secretary of the military department concerned may, in an exceptional case, waive the requirement for certification under paragraph (1) in the case of any contract if the Secretary—~~

~~(A) determines in such case that it would be in the interest of the United States to waive such certification; and~~

~~(B) states in writing the reasons for that determination and makes such determination available to the public.~~

~~(i) The submission to the Department of Defense of a proposal for settlement of costs for any period after such costs have been accrued that includes a cost that is expressly specified by statute or regulation as being unallowable, with the knowledge that such cost is unallowable, with the knowledge that such cost is unallowable, shall be subject to the provisions of section 287 of title 18 and section 3729 of title 31.~~

(j) In a proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of indirect costs for which a contractor seeks reimbursement from the Department of Defense is in issue, the burden of proof shall be upon the contractor to establish that those costs are reasonable.

~~(k)(1) Except as otherwise provided in this subsection, costs incurred by a contractor in connection with any criminal, civil, or administrative proceeding commenced by the United States or a State are not allowable as reimbursable costs under a covered contract if the proceeding (A) relates to a violation of, or failure to comply with, a Federal or States statute or regulation, and (B) results in a disposition described in paragraph (2).~~

~~(2) A disposition referred to in paragraph (1)(B) is any of the following:~~

~~(A) In the case of a criminal proceeding, a conviction (including a conviction pursuant to a plea of nolo contendere) by reason of the violation or failure referred to in paragraph (1).~~

~~(B) In the case of a civil or administrative proceeding involving an allegation of fraud or similar misconduct, a determination of contractor liability on the basis of the violation or failure referred to in paragraph (1).~~

~~(C) In the case of any civil or administrative proceeding, the imposition of a monetary penalty by reason of the violation or failure referred to in paragraph (1).~~

~~(D) A final decision by the Department of Defense—~~

~~(i) to debar or suspend the contractor;~~

~~(ii) to rescind or void the contract; or~~

~~(iii) to terminate the contract for default;~~

~~—by reason of the violation or failure referred to in paragraph (1).~~

~~(E) A disposition of the proceeding by consent or compromise if such action could have resulted in a disposition described in subparagraph (A), (B), (C), or (D).~~

~~—(3) In the case of a proceeding referred to in paragraph (1) that is commenced by the United States and is resolved by consent or compromise pursuant to an agreement entered into by a contractor and the United States, the costs incurred by the contractor in connection with such proceeding that are otherwise not allowable as reimbursable costs under such paragraph may be allowed to the extent specifically provided in such agreement.~~

~~—(4) In the case of a proceeding referred to in paragraph (1) that is commenced by a State, the head of an agency that awarded the covered contract involved in the proceeding may allow the costs incurred by the contractor in connection with such proceeding as reimbursable costs if the agency head determines, under regulations prescribed by such agency head, that the costs were incurred as a result of (A) a specific term or condition of the contract, or (B) specific written instructions of the agency.~~

~~—(5)(A) Except as provided in subparagraph (C), costs incurred by a contractor in connection with a criminal, civil, or administrative proceeding commenced by the United States or a State in connection with a covered contract may be allowed as reimbursable costs under the contract if such costs are not disallowable under paragraph (1), but only to the extent provided in subparagraph (B).~~

~~(B)(i) The amount of the costs allowable under subparagraph (A) in any case may not exceed the amount equal to 80 percent of the amount of the costs incurred, to the extent that such costs are determined to be otherwise allowable and allocable under the Federal Acquisition Regulation.~~

~~—(ii) Regulations issued for the purpose of clause (i) shall provide for appropriate consideration of the complexity of procurement litigation, generally accepted principles governing the award of legal fees in civil actions involving the United States as a party, and such other factors as may be appropriate.~~

~~(C) In the case of a proceeding referred to in subparagraph (A), contractor costs otherwise allowable as reimbursable costs under this paragraph are not allowable if (i) such proceeding involves the same contractor misconduct alleged as the basis of another criminal, civil, or administrative proceeding, and (ii) the costs of such other proceeding are not allowable under paragraph (1).~~

~~—(6) In this subsection:~~

~~(A) The term "proceeding" includes an investigation.~~

~~(B) The term "costs", with respect to a proceeding--~~

~~(i) means all costs incurred by a contractor, whether before or after the commencement of any such proceeding; and~~

~~(ii) includes --~~

~~(I) administrative and clerical expenses;~~

~~(II) the cost of legal services, including legal services performed by an employee of the contractor;~~

~~(III) the cost of the services of accountants and consultants retained by the contractor; and~~

~~(IV) the pay of directors, officers, and employees of the contractor for time devoted by such directors, officers and employees to such proceeding.~~

~~(C) The term "penalty" does not include restitution, reimbursement, or compensatory damages.~~

(g)(1) The Comptroller General shall periodically evaluate the implementation of this section by the Secretary of Defense. Such evaluation shall consider the extent to which --

(A) such implementation is consistent with congressional intent;

(B) such implementation achieves the objective of eliminating unallowable costs charged to defense contracts; and

(C) such implementation (as well as the provisions of this section and the regulations prescribed under this section) could be improved or strengthened.

(2) The Comptroller General shall submit to the ~~committees named in subsection (e)(2)(C)~~ Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives a report on such evaluation within 90 days of publication by the Secretary of Defense in the Federal Register of regulations that make substantive changes in regulations ~~prescribed under subsection (e) or (f) or in any other regulations of the Department of Defense~~ pertaining to allowable costs under covered contracts.

(h) In this section, the term "covered contract" means a contract for an amount more than \$150,000 entered into by the Department of Defense other than a fixed-price contract without cost incentives.

**2.2.1.7. Text of revised 10 U.S.C. § 2324 as it would appear in the U.S. Code.**

**§ 2324. Allowable costs under defense contracts**

(a) The total cost of a defense contract is the sum of the allowable direct and indirect costs allocable to the contract, incurred or to be incurred, less any allocable credits, plus any allocable cost of money. In ascertaining what constitutes a cost, any generally accepted method of determining or estimating costs that is equitable and is consistently applied may be used, including standard costs properly adjusted for applicable variances. Costs shall be allowed to the extent they are reasonable, allocable, and determined to be allowable in accordance with the Federal Acquisition Regulation and the Department of Defense Supplement to the Federal Acquisition Regulation.

(b) The Secretary of Defense shall require that a covered contract provide that if the contractor submits to the Department of Defense a proposal for settlement of indirect costs incurred by the contractor for any period after such costs have been accrued and if that proposal includes the submission of a cost which is unallowable because the cost violates a cost principle in the Federal Acquisition Regulation or the Department of Defense Supplement to the Federal Acquisition Regulation, the cost shall be disallowed.

(c)(1) If the Secretary determines that a cost submitted by a contractor in its proposal for settlement is expressly unallowable under a cost principle referred to in subsection (b) that defines the allowability of specific selected costs, the Secretary shall assess a penalty against the contractor in an amount equal to --

(A) the amount of the disallowed cost allocated to covered contracts for which a proposal for settlement of indirect costs has been submitted; plus

(B) interest (to be computed based on regulations issued by the Secretary) to compensate the United States for the use of any funds which a contractor has been paid in excess of the amount to which the contractor was entitled.

(2) If the Secretary determines that a proposal for settlement of indirect costs submitted by a contractor includes a cost determined to be unallowable in the case of such contractor before the submission of such proposal, the Secretary shall assess a penalty against the contractor in an amount equal to two times the amount of the disallowed cost allocated to covered contracts for which a proposal for settlement of indirect costs has been submitted.

(d) The Secretary shall prescribe regulations providing for a penalty under subsection (c) to be waived in the case of a contractor's proposal for settlement of indirect costs when--

(1) the contractor withdraws the proposal before the formal initiation of an audit of the proposal by the Federal Government and resubmits a revised proposal;

(2) the amount of unallowable costs subject to the penalty is insignificant; or

(3) the contractor demonstrates, to the contracting officer's satisfaction, that-

(A) it has established appropriate policies and personnel training and an internal control and review system that provide assurances that unallowable costs subject to penalties are precluded from being included in the contractor's proposal for settlement of indirect costs; and

(B) the unallowable costs subject to the penalty were inadvertently incorporated into the proposal.

(e) An action of the Secretary under subsection (b) or (c) --

(1) shall be considered a final decision for the purposes of section 6 of the Contract Disputes Act of 1978 (41 U.S.C. § 605); and

(2) is appealable in the manner provided in section 7 of such Act (41 U.S.C. § 606).

(f) In a proceeding before the Armed Services Board of Contract Appeals, the United States Claims Court, or any other Federal court in which the reasonableness of indirect costs for which a contractor seeks reimbursement from the Department of Defense is in issue, the burden of proof shall be upon the contractor to establish that those costs are reasonable.

(g)(1) The Comptroller General shall periodically evaluate the implementation of this section by the Secretary of Defense. Such evaluation shall consider the extent to which --

(A) such implementation is consistent with congressional intent;

(B) such implementation achieves the objective of eliminating unallowable costs charged to defense contracts; and

(C) such implementation (as well as the provisions of this section and the regulations prescribed under this section) could be improved or strengthened.

(2) The Comptroller General shall submit to the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives a report on such evaluation within 90 days of publication by the Secretary of Defense in the Federal Register of regulations that make substantive changes in regulations pertaining to allowable costs under covered contracts.

(h) In this section, the term "covered contract" means a contract for an amount more than \$500,000 entered into by the Department of Defense other than a fixed-price contract without cost incentives.

## 2.2.2. 10 U.S.C. § 2382

### Contract profit controls during emergency periods

#### 2.2.2.1. Summary of the Law

This statute authorizes the President to promulgate regulations to control excessive profits on defense contracts following a declaration of war by the Congress or declaration of national emergency by the President or Congress. These regulations must be transmitted to Congress within sixty days following the declaration of war or national emergency. These regulations shall establish the standards and procedures for determining what constitutes excessive profits and establishing thresholds for coverage and exemptions. The statute also defines the term "excessive profits." Regulations transmitted to Congress will take effect within sixty legislative days after their transmittal unless both Houses of Congress adopt a concurrent resolution disapproving the regulations. If the regulations are not disapproved by both Houses of Congress, they shall remain in effect for a maximum of five years. They can be extended for up to one year by a concurrent resolution of both Houses of Congress. The U.S. Claims Court has exclusive jurisdiction over claims arising under this section or its regulations. The President is required to transmit an annual report to Congress on the operation of this statute during the time in which the regulations are in effect and at the end of any war or national emergency.

#### 2.2.2.2. Background of the Law

Government efforts to control profits during World War I were unsuccessful and, as a result, Congress began imposing profit limitations on shipbuilding contracts in the 1930s.<sup>1</sup> When initially promulgated in 1934 as part of the Vinson-Trammell Act, this statute was meant to promote the construction of naval vessels, including aircraft.<sup>2</sup> The law required the President to use Government aircraft facilities for building at least 10% of all aircraft.<sup>3</sup> It also provided that aircraft contractors could realize only a reasonable profit and, if contractor bids were found to be inflated, the President could award those contracts to Government facilities.<sup>4</sup> For any contract over \$10,000, 10% of the total contract price was the maximum profit a contractor could realize.<sup>5</sup> Contractors were required to report under oath the amount of profit upon completion of the contract.<sup>6</sup> This report would be forwarded to the Secretary of the Treasury to determine if the profit amount exceeded 10% of the contract price and, if so, the Treasury Department would collect the excess.<sup>7</sup>

<sup>4</sup>*Id.*

<sup>5</sup>*Id.* at 5.

<sup>6</sup>*Id.* at 5.

<sup>7</sup>*Id.* at 5.

This law was amended in 1939<sup>8</sup> to permit contractors who had a loss on a ship or aircraft contract to take credit for that loss over the next four years when computing their excess profits.<sup>9</sup> The prior law allowed contractors to take credit for losses in one year only.<sup>10</sup> Subsequent amendments limited this statute to aircraft and raised the maximum allowable profit amount to 12% of the contract price for aircraft procurement. Following the imposition of the excess-profits tax in the Second Revenue Act of 1940, Congress suspended the profit limitation provisions of the Vinson-Trammell Act.<sup>11</sup>

Following World War II, the termination of renegotiation provisions and the repeal of the excess profits tax left the Vinson-Trammell Act "as the only statutory control of excessive profits for post-war procurement."<sup>12</sup> With the start of the Cold War and increased defense procurement in 1948, Congress enacted the Renegotiation Act of 1948 and extended its provisions to all contracts of the military departments for the procurement of ships, aircraft, and their spare parts.<sup>13</sup> In 1949, Congress made clear that any contract subject to the Renegotiation Act of 1948 would not be subject to the Vinson-Trammell Act as well.<sup>14</sup> The Renegotiation Act was extended a number of times and the Vinson-Trammell Act exemption has been extended accordingly.<sup>15</sup>

In 1981,<sup>16</sup> the Senate recommended the repeal of this law.<sup>17</sup> The view in the Senate was that this law imposed obsolete and unworkable profit limitations on the limited areas of ship and aircraft procurement.<sup>18</sup> Congress refused to repeal the statute but limited its application to contracts entered into or modified in a significant way during war or national emergency.<sup>19</sup> The amendment eliminated the specific profit limitations and instead authorized the President to promulgate regulations to limit excessive profits should a war or national emergency arise.<sup>20</sup> Congress did, however, limit the applicability of this statute and prohibited its implementation or enforcement for contracts made before October 1, 1981.<sup>21</sup>

### 2.2.2.3. Law in Practice

The excess-profit tax was passed in 1940 after "it became clear that the Vinson-Trammell approach of limiting profits to specific percentages of contract prices was of doubtful validity even in peacetime since it curtailed incentives to reduce costs much in the same manner as the

<sup>8</sup>Act of April 3, 1939, ch. 35, § 14, 53 Stat. 555, 560.

cost-plus-a-percentage-of-cost type contract."<sup>22</sup> Implementation of the provisions of the Vinson-Trammell Act during wartime had proven to be inflexible because it treated "the rate of profit return of all contractors alike without regard to such controlling distinctions as the extent of risk assumed, production efficiency, capital investment, and the many other factors that bear on reasonableness of profit."<sup>23</sup> As recently as 1981, the Senate had called for the repeal of this statute for much the same reasons as those articulated by Congress in the 1940s.

#### **2.2.2.4. Recommendation and Justification**

##### **Repeal 10 U.S.C. § 2382.**

The Panel recommends that 10 U.S.C. § 2382 be repealed. Congress has discussed the problems with this law for over 40 years and has suspended its provisions for most of that time in favor of more efficient systems of limiting excess profits. The Panel agrees with the Senate of the 97th Congress that this law is outdated and inefficient. Any procedures considered necessary to limit profits should be addressed in the FAR and DFARS. The regulatory process is a more flexible alternative for addressing changing situations and specific problems that may arise in the procurement process.

#### **2.2.2.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to the Department of Defense with a view toward streamlining the defense acquisition process. This recommendation will also remove from the procurement process a statute which has proven to be confusing to small businesses and commercial companies.

## **2.2.3. 41 U.S.C. § 420**

### **Travel expenses of government contractors**

#### **2.2.3.1. Summary of the Law**

This section is divided into two subsections. Subsection (a) permits the travel, lodging, subsistence, and incidental travel expenses of Government contractors or their employees to be claimed as an allowable cost, subject to the rates codified in Title 5 or promulgated by the Administrator of General Services or the President.

Subsection (b) exempts state institutions or nonprofit institutions involved in contracts for Federally funded research or related activities from the restrictions in subsection (a). The travel costs incurred by the employees of an institution will be paid if the costs are within the price range normally paid by the institution and within the limits established in regulations by the Director of the Office of the Management and Budget. These regulations provide that, should the institution not have a policy regarding travel costs, the rates described in Title 5 will apply.

#### **2.2.3.2. Background of the Law**

This section was amended in 1986 to its current form. At that time Congress was examining the efficiency of travel reimbursement procedures for Government employees because of complaints the payment system took too long and reimbursement rates were too low, forcing Government employees to underwrite travel expenses incurred on official business.<sup>1</sup> Congress directed the Administrator of General Services to promulgate regulations allowing for a per diem allowance for food and other incidentals, based on locality studies, and for the payment of the actual cost of lodging. Congress believed that this system would not only be more equitable, but that it would be more efficient by reducing administrative costs.<sup>2</sup>

After establishing this new system for Government employees, Congress extended it to cover the allowable travel costs for the employees of Government contractors.<sup>3</sup> It felt that contractors who charge travel expenses against Government contracts should only be able to claim what a Federal employee on the same trip could claim.<sup>4</sup> The statute also recognizes an exception for employees of institutions involved in Government research. For contracts involving State or nonprofit institutions involved in Government research, these institutions are able to claim their actual travel costs as long as these costs do not exceed those normally allowed by the institution in its regular operation.

### 2.2.3.3. Law in Practice

There is a marked difference of opinion between the Government and industry sectors regarding the restrictions on the costs allowed for travel by contractor employees. The Defense Contract Audit Agency (DCAA) has been firm in its position that, while the level of detail in the statute is perhaps excessive, limiting contractor employees to the travel rates imposed on Government employees prevents contractor abuse in this area.<sup>5</sup> The comments received from members of the contracting industry have presented a different point of view. The Council of Defense and Space Industry Associations (CODSIA)<sup>6</sup> and the Aerospace Industries Association (AIA)<sup>7</sup> both believe that the limits on reimbursement of contractor travel are unreasonable and unrealistic. They point out that the Government is often able to negotiate lower airfares and hotel costs than those available to the civilian community, and to avoid the payment of hotel taxes, which can save as much as ten percent in lodging costs.<sup>8</sup> In addition, CODSIA stated:

[T]he arbitrary attempt to limit travel costs unrealistically ignores sound business practices and accounting controls as they relate to DOD, as opposed to commercial, related business trips. Additionally, for contractors that have substantial commercial and government business, it forces a choice between two inefficient options - either continue to have an orderly single set of travel policies for all company employees and thereby absorb substantial unallowable costs, or create a cumbersome inefficient dual set of travel policies and accounting procedures which are fundamentally inconsistent with a TQM approach that seeks to optimize the highest quality of performance of all employees for the lowest net cost to the contractor, and thereby reduce collateral overhead expenses.<sup>9</sup>

The industry commentators agree that contractors should be restricted to claiming only those costs that are reasonable and allocable to the individual contracts, but should not be restricted to the rates allowed Government employees.<sup>10</sup>

<sup>9</sup>Letter from the Council of Defense and Space Industry Associations (CODSIA) to Gary Quigley and Jack Harding (Apr. 23, 1992).

<sup>10</sup>*Id.* See also Letter from Paul J. Cienki, Director, Financial Administration, Procurement and Finance, Aerospace Industries Association, to John A. Phillips, Director, Contract Policy, Raytheon Company (Mar. 26, 1992).

#### **2.2.3.4. Recommendation and Justification**

##### **Repeal**

The policies and procedures reflected in this statute should be implemented in the Federal Acquisition Regulation (FAR). Currently, there are several complex and comprehensive provisions in the FAR governing the allowability and allocability of contractor travel expenses. Because the regulatory process provides greater flexibility in implementation and quicker responses to changing conditions, it is unnecessary to retain this authority statutorily. In the interests of encouraging the integration of the defense and commercial markets, it is further recommended that the regulations promulgated in the place of this statute require contractors to keep travel costs to a reasonable level, without restricting them to rigid rate schedules.

#### **2.2.3.5. Relationship to Objectives**

This recommendation would enable a company to integrate the production of both commercial and defense unique products in a single business unit without altering their accounting or management procedures relating to the payment of travel expenses. It would also promote the participation of small businesses in the defense acquisition process by permitting them to use one method of determining their employees' travel expenses.

## **2.3. Audit and Access to Records**

### **2.3.0. Introduction**

The Panel identified 21 laws relating to the audit of and access to contractor records in the contract administration area. The majority of these statutes are part of the Inspector General Act, 5 U.S.C. App. §§ 1-12, which provided for the establishment of the various Offices of the Inspector General in many executive agencies. After researching the history of this Act and the comments received on it, the Panel determined that the Offices of the Inspector General serve an important function in the acquisition process and are necessary to the continued financial and ethical integrity of the procurement process. The Panel noted that 5 U.S.C. App. § 9, which created and established the various Offices, is no longer necessary. The Offices of the Inspector General were created according to the law and have been functioning for many years. There is no continued need to transfer resources; thus, the statute has served its purpose and has no further use. In the interest of streamlining the acquisition process, the Panel recommends that 5 U.S.C. App. § 9 be repealed and the remaining statutes of the Inspector General Act be numbered to reflect this repeal.

The Panel noted that while 10 U.S.C. § 2313 is the primary authority addressing audit and access to contractor records, other statutes also contain similar audit provisions, including subsection (f) of 10 U.S.C. § 2306a, "Truth in Negotiations Act," and 10 U.S.C. § 2406, "Availability of cost and pricing records." Keeping in mind the statutory mandate of streamlining the acquisition process, the Panel recommends that a centralized, comprehensive audit statute be developed at 10 U.S.C. § 2313 and the other audit authority be repealed. To this end, the Panel recommends that the authority contained in 10 U.S.C. § 2306a and the audit coverage at FAR section 52.215-2 be merged into 10 U.S.C. § 2313 to form this comprehensive audit statute.

The Panel determined that the scope of the audit authority in the statute should be extended to more types of contracts. The Panel has included those types of contracts currently listed in FAR section 52.215-2 in subsection (a)(1) of its proposed audit statute. The Panel recognized that industry commentators have noted that this amendment actually expands the statute's scope; however, these types of contract are already listed in the regulation implementing the current statute.

In subsection (a)(2) of the proposed audit statute, the Panel has included the essence of 10 U.S.C. § 2306a(f), the audit provision of the Truth in Negotiations Act. It is the Panel's opinion that this language adequately addresses the audit authority necessary for contracts for which cost and pricing data are required.

The Panel recommends retention of the subpoena authority included in subsection (d) of the current language. Although industry commentators have objected to the inclusion of this authority, the Panel believes that the subpoena authority is a necessary enforcement tool in the defense procurement process. While the Panel has chosen not to include in its proposed audit statute an exemption for contracts for commercial items, the Panel has recommended the adoption of a new statute addressing the purchase of commercial items, which contains a new pricing

subsection and an audit provision tailored specifically to that pricing provision. The proposed audit clause, if enacted, would be the sole source of audit rights for commercial item acquisitions. In addition, one subsection of the new statute will list certain existing statutes that will be superseded by the new commercial item statute when the Government is purchasing a commercial item. 10 U.S.C. § 2313 would be one of the listed statutes. The Panel has included the provisions in FAR subsection 15.106-1 that exempt small purchases and utility services from the provisions of 10 U.S.C. § 2313.

The Panel recognizes that some industry representatives felt that the current three year records retention requirement was overreaching and expensive; however, the ability to audit the books and records of a Government contractor even after the contract has been completed is necessary to maintain the financial and ethical integrity of the acquisition process.

With the development of this centralized, comprehensive audit statute at 10 U.S.C. § 2313, the Panel recommends that the similar audit authority contained in 10 U.S.C. § 2406, "Availability of cost and pricing records," be repealed. The Panel recognizes that the authority contained in this statute is important to the continued financial and ethical integrity of the defense procurement process; however, it believes that 10 U.S.C. § 2313 and the proposed amendments to that law provide adequate audit authority.

## **2.3.1. 5 U.S.C. App. 3 §§ 1-12**

### **Inspector General Act<sup>1</sup>**

#### **2.3.1.1. Summary of the Law**

The Inspector General Act has been codified into twelve sections of the U.S. Code. Section 1 names the short title of the Act. Section 2 states the purposes of the Office of Inspector General, including conducting and supervising independent, objective audits and investigations into programs and operations of affected establishments, and detecting and preventing fraud, waste, and abuse.

Section 3 requires the President, with the consent of the Senate, to appoint an Inspector General (IG) at the head of each office. This appointment will be made without regard to the appointee's political affiliation and will be based on integrity and demonstrated ability in a variety of categories.

Section 4 requires the IG to establish policy direction and supervise, conduct, and coordinate audits and investigations in the agency in which the Office is established; to establish policy and coordinate any programs designed to promote economy and efficiency in management; and to detect and prevent fraud and waste.

---

<sup>1</sup>The Inspector General Act includes the following statutes:

- 5 U.S.C. App. 3 § 1 - Short title
- 5 U.S.C. App. 3 § 2 - Purpose and establishment of Offices of Inspector General; departments and agencies
- 5 U.S.C. App. 3 § 3 - Appointment of Inspector General; supervision; removal; political activities; appointment of Assistant Inspector General for Auditing and Assistant Inspector General for Investigations
- 5 U.S.C. App. 3 § 4 - Duties and responsibilities; report of criminal violations to Inspector General
- 5 U.S.C. App. 3 § 5 - Semiannual reports; transmittal to Congress; availability to public; immediate report on serious or flagrant problems; disclosure of information; definitions
- 5 U.S.C. App. 3 § 6 - Authority of Inspector General; information and assistance from Federal agencies; unreasonable refusal; office space and equipment
- 5 U.S.C. App. 3 § 7 - Complaints by employees; disclosure of identity; reprisals
- 5 U.S.C. App. 3 § 8 - Additional provisions with respect to the Inspector of the Department of Defense
- 5 U.S.C. App. 3 § 8A - Special provisions relating to the Agency for International Development
- 5 U.S.C. App. 3 § 8B - Special provisions relating to the Nuclear Regulatory Commission
- 5 U.S.C. App. 3 § 8C - Special provisions concerning the Department of the Treasury
- 5 U.S.C. App. 3 § 8D - Special provisions concerning the Department of Justice
- 5 U.S.C. App. 3 § 8E - Requirements for Federal entities and designated Federal entities
- 5 U.S.C. App. 3 § 8F - Rule of construction of special provisions
- 5 U.S.C. App. 3 § 9 - Transfer of functions
- 5 U.S.C. App. 3 § 10 - Conforming and technical amendments
- 5 U.S.C. App. 3 § 11 - Definitions
- 5 U.S.C. App. 3 § 12 - Effective date

Section 5 describes the semiannual reports the IG is required to file with Congress and the head of the establishment. This section outlines in detail the information to be furnished in this report, including a description of significant problems discovered, a listing and summary of each audit report issued by the Office, and statistical tables.

Section 6 authorizes the IG to have access to all records, reports, etc., that relate to any problems and operations for which the IG is responsible and to request or subpoena information and assistance necessary to carry out the IG's duties and responsibilities from any federal, state, or local governmental agency or unit.

Section 7 permits the IG to receive and investigate complaints or information from employees of the establishment about the possible existence of activities that constitute a violation of law, rules, or regulations, mismanagement, gross waste of funds, or abuse of authority.

Sections 8 - 8E address special provisions for specific Offices of Inspector General in the Department of Defense, the Agency for International Development, the Nuclear Regulatory Commission, the Department of the Treasury, the Department of Justice, and other Federal entities.

Section 9 provides for the transfer of audit and investigative functions from the internal auditing bodies performing these functions for the agencies and departments to the respective Offices of the Inspector General within each entity. All personnel, assets, liabilities, contracts, property, records, and unexpended balances or appropriations, authorizations, allocations, or other funds held by the internal auditing bodies will also be transferred to the Offices of the Inspector General. Section 10 provides for conforming and technical amendments to 5 U.S.C. §§ 5315 and 5316, and 42 U.S.C. § 3522. Section 11 defines the terms "head of the establishment," "establishment," "Inspector General," "Office," and "Federal agency." Finally, section 12 provides that this Act and the amendments made by this Act in section 10 will take effect October 1, 1978.

### **2.3.1.2. Background of the Law**

This Act was passed as part of the Inspector General Act of 1978.<sup>2</sup> The Congressional purpose of the legislation was to "create Offices of Inspector and Auditor General in seven executive departments and six executive agencies, to consolidate existing auditing and investigative resources to more effectively combat fraud, abuse, waste, and mismanagement in the programs and operations of those departments and agencies."<sup>3</sup> These executive entities included the Community Services Administration, the Environmental Protection Agency, the General Services Administration, the National Aeronautics and Space Administration, the Small Business Administration, the Veterans' Administration, and the Departments of Agriculture, Commerce, Housing and Urban Development, Interior, Labor, and Transportation.<sup>4</sup>

<sup>3</sup>S. REP. NO. 1017, 95th Cong., 2d Sess. 1 (1978), reprinted in 1978 U.S.C.C.A.N. 2676.

<sup>4</sup>*Id.*

Congress noted evidence that "fraud, abuse and waste in the operations of the Federal departments and agencies and in Federally-funded programs are now reaching epidemic proportions."<sup>5</sup> Congress believed that the Government had failed to make sufficient effort to detect and prevent fraud, waste, and mismanagement in Federal programs and expenditures and targeted basic organizational deficiencies in the way the executive agencies have approached their audit and investigative responsibilities as the main reason for this failure.<sup>6</sup> Congress agreed with the General Accounting Office (GAO) that the audit and investigative authority of an agency must be placed in persons who only report to, and are under the supervision of, the head of the agency.<sup>7</sup> In most agencies at that time, the internal auditors and investigators were reporting to and under the supervision of the very officials whose programs they were investigating, making such investigations futile.<sup>8</sup>

The IG concept would provide a central focal point in each major agency for the investigative and audit responsibilities.<sup>9</sup> Congress believed that this concept would remove the inherent conflict of interest that had existed when the investigative and audit functions were under the authority of the official being audited.<sup>10</sup> Congress further provided for the independence of the Inspector and Auditor General "by making him a presidential appointee, subject to Senate confirmation, and by taking the unusual step of requiring the President to report to Congress explaining his reasons for removing an incumbent in office."<sup>11</sup>

Subsequent amendments to the Act established Offices of the Inspector General in the Agency for International Development, the Department of Defense, the State Department, the U.S. Information Agency, and the Foreign Service. The final substantive amendment was in 1988, when Congress added the Departments of Energy, Health and Human Services, Justice and Treasury, Federal Emergency Management Agency, Nuclear Regulatory Commission, Office of Personnel Management, the Government Printing Office, and Railroad Retirement Board to the list of entities to be subject to the Inspector General Act.<sup>12</sup> This amendment also added a provision that was to ensure the uniformity and reliability of reports required under the Act. Congress noted that 21 departments and agencies had established Offices of Inspector General since 1976 with a goal to improve the management of the Federal Government.<sup>13</sup> Congress observed that these offices had greatly improved the operations of their respective departments and agencies and felt that the above agencies should be subject to the provisions of the Act as well.<sup>14</sup>

### 2.3.1.3. Law in Practice

Few comments were received on this Act and its impact in practice. The Aerospace Industries Association (AIA) noted that a number of the responsibilities assigned by the Act to the IG duplicate those already assigned to the Defense Contract Audit Agency (DCAA).<sup>15</sup> AIA believes that the IG's "overemphasis on fraud indicators intrudes on the normal functioning of the procurement process."<sup>16</sup> It argued that the introduction of the IG into the procurement process hampers the resolution of legitimate disagreements through normal administrative procedures, thus unduly burdening the buyer/seller relationship.<sup>17</sup> AIA stated that the Act should be repealed.<sup>18</sup> The Department of the Air Force noted that 5 U.S.C. App. 3 § 9(a)(1)(C), which concerns the transfer of certain organizations to the Department of Defense Inspector General (DODIG), has served its purpose and could now be eliminated.<sup>19</sup> The DODIG stated that the Act is serving its intended purpose, does not duplicate or overlap with other laws, and is necessary to protect the best interests of DOD.<sup>20</sup>

### 2.3.1.4. Recommendations and Justification

**Amend to repeal 5 U.S.C. App. 3 § 9 that provides for the transfer of auditing and investigating authority to the Office of the Inspector General.**

The Panel recommends that 5 U.S.C. App. 3 § 9, which transfers the offices conducting auditing and investigating functions within the agencies and departments to the appropriate Office of Inspector General, be repealed. These requirements have been accomplished as the Offices of Inspector General have been established and are in operation. This section is no longer necessary and, in the interest of streamlining the laws applicable to the defense acquisition process, it should be repealed. The Panel believes that the Offices of Inspector General serve a very important function in the acquisition process and are vitally necessary to the continued financial and ethical integrity of the procurement process. The Panel recommends that the remaining provisions of the Inspector General Act should be retained as written but renumbered to reflect the repeal of 5 U.S.C. App. 3 § 9.

<sup>19</sup>Memorandum from Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting) and Assistant Secretary (Acquisition), Office of the Assistant Secretary of the Department of the Air Force to the Office of General Counsel, Defense Logistics Agency (Apr. 24, 1992).

<sup>20</sup>Letter from Derek H. Vander Schaaf, Deputy Inspector General, Department of Defense to Diane Sidebottom, Acquisition Law Task Force (May 19, 1992).

### **2.3.1.5. Relationship to Objectives**

This recommendation satisfies the Panel's statutory mandate of reviewing acquisition laws applicable to the Department of Defense with a view toward streamlining the defense acquisition process. It helps to eliminate authority that has been used within the time intended but is now unnecessary. The retention of the Act promotes financial and ethical integrity in the acquisition process and encourages the exercise of sound judgment on the part of acquisition personnel.

## 2.3.2. 10 U.S.C. § 2313

### Examination of books and records of contractor

#### 2.3.2.1. Summary of the Law

This law permits an agency named in 10 U.S.C. § 2303 (i.e., Department of Defense, Department of the Army, Department of the Air Force, Department of the Navy, the Coast Guard, and the National Aeronautics and Space Administration) to inspect the plant and audit the books and records of a contractor or subcontractor performing a cost or cost-plus-a-fixed-fee contract. Subsection (b) allows the Comptroller General to inspect the books and records of a contractor or subcontractor who is awarded a contract using a procedure other than sealed bid procedures. Subsection (c) of this statute exempts foreign contractors and subcontractors from the audit authority of the agencies, with the concurrence of the Comptroller General. The concurrence of the Comptroller General is unnecessary where the contractor or subcontractor is a foreign Government and is precluded by the laws of the country from making its books and records available, or where the head of the agency determines that the public interest would not be served by exercise of the Comptroller's audit authority. Subsection (d) of this statute permits the Director of the Defense Contract Audit Agency (DCAA) to subpoena the books and records of a contractor, access to which is authorized by this section. The Director must then submit an annual report to the Secretary of Defense on the exercise of the subpoena authority, which is then forwarded to the Committees on Armed Services of the Senate and House of Representatives.

#### 2.3.2.2. Background of the Law

This law was enacted as part of the Armed Services Procurement Act of 1947.<sup>1</sup> In the initial language of the statute, the audit provisions were a very small part of the authority given in the law. The law was primarily passed to permit the head of the agency to enter into any type of contract that would promote the best interests of the Government.<sup>2</sup> Congress stated that the right to use the most suitable type of contract was as important as the right to procure by negotiation; however, the prohibition against using the cost-plus-a-percentage-of-cost contract was continued.<sup>3</sup> While fixed-price contracts were to be used in most negotiated procurements, wartime experience had shown the value in being able to use the proper type of contractual arrangement.<sup>4</sup> In particular, Congress recognized the utility in permitting cost-plus-fixed-fee contracts for research and development.<sup>5</sup> Congress believed it would be unfair to expect a nonprofit educational institution to perform a fixed-price contract when costs are uncertain and subject to daily change.<sup>6</sup> Few nonprofit institutions could afford that risk, and they would have to

<sup>4</sup> *Id.* at 16.

<sup>5</sup> *Id.* at 17.

<sup>6</sup> *Id.* at 17.

include extremely high contingency cost allowances for their own protection.<sup>7</sup> Included in this law was a provision allowing the agency head to inspect the plant and audit the books and records of the contractor or subcontractor.

This law was amended in 1951 to require insertion, in all contracts negotiated without advertising, a provision permitting the Comptroller General or his representatives to have access to and the right to examine any pertinent books, records, documents, or papers of the contractor or subcontractor engaged in the performance of contracts or subcontracts.<sup>8</sup> Congress felt that negotiated contracts were made under special circumstances and required close supervision and control.<sup>9</sup> At the time of passage, most agencies were in favor of this amendment.<sup>10</sup> The General Services Administration suggested that purchases of less than \$1,000 should be exempt from the amendment; however, Congress felt that since the law merely authorizes the Comptroller General to examine such contracts or records, this exemption was unnecessary.<sup>11</sup>

The next amendment to this law was in 1961,<sup>12</sup> when a provision was added to exempt certain foreign contractors from the requirement of an examination-of-records clause.<sup>13</sup> The requirement for an examination-of-records clause had caused delays and difficulties in placing contracts with foreign contractors, particularly when contracting with a foreign Government or agency, since they often felt this clause impinged on their sovereign rights.<sup>14</sup> When legal or policy reasons prevented a potential contractor from agreeing to the examination-of-records clause, the contracting officer had to try to make the procurement from another source.<sup>15</sup> If the supplies or services could not be obtained elsewhere and the contractor refused the examination clause, the contracting officer was faced with failing to procure the supplies or breaking the law.<sup>16</sup> The Air Force commented that, on many occasions, it was unable to procure needed supplies and services because they were available from only one source of foreign supply (e.g., postal and transportation equipment from Japan, Belgium, the Netherlands, and Germany).<sup>17</sup> This amendment permitted the exclusion of the provision if the agency head determined that the inclusion of the clause would not be in the public interest and the Comptroller General concurred.<sup>18</sup>

The last substantive amendment to this statute was in 1985.<sup>19</sup> Congress added a provision that authorized the Director of DCAA to subpoena any book, paper, statement, record, information, account, writing, or other document of a contractor, if the Director is entitled to

access to such documentation.<sup>20</sup> Congress stated that it did not intend this provision to expand DCAA's scope of access to books and records but intended to provide the Director with an enforcement mechanism if examination was not readily permitted.<sup>21</sup> Congress believed that the subpoena power should be used sparingly and only when other investigative methods had failed.<sup>22</sup>

### **2.3.2.3. Law in Practice**

The authority contained in this statute has been implemented in FAR sections 52.215-1,<sup>23</sup> 52.215-2,<sup>24</sup> 15.106-1,<sup>25</sup> and 15.106-2.<sup>26</sup> The Inspector General of the Department of Defense (DODIG) stated that this "statute needs to be amended to provide contract auditors with the authority to review and evaluate contractor internal audit reports."<sup>27</sup>

A recent case in the 4th Circuit held that DCAA's statutory subpoena power extends only to cost information related to Government contracts and that defense contractor internal audit materials were beyond the scope of DCAA's subpoena power.<sup>28</sup> The DODIG noted that access by DCAA to contractor internal audit reports would reduce duplicative audit coverage.<sup>29</sup>

DCAA commented that this statute is limited because it only applies to cost or cost-plus-fixed-fee contracts.<sup>30</sup> It recommended that this provision be broadened to apply to all contracts for which the Government has a need to review contractor books and records, including time and material, fixed-price-incentive, firm-fixed-price, and cost-plus-award-fee contracts.<sup>31</sup> The Air Force Contract Law Center agreed with this recommendation but would expand its application even further to include fixed-price-redeterminable, cost-sharing, cost-plus-award-fee, cost-plus-incentive-fee, labor-hour, cost-reimbursement-term, fixed-price-level-of-effort, and variable quantity contracts.<sup>32</sup>

The Aerospace Industries Association (AIA) stated that the provision that requires contractors to retain books and records for three years following final payment has placed an

undue and expensive burden on the contractor.<sup>33</sup> The result of this requirement is prolonged maintenance of nonproductive storage facilities and large record keeping and storage related costs.<sup>34</sup> AIA recommended that the statute be modified to provide a more reasonable retention provision.<sup>35</sup> It also recommended that the statute allow that photographic or electronic images of original records are suitable for this purpose.<sup>36</sup> AIA noted that the subpoena authority of the Director of DCAA has contributed to an adversarial buyer/seller relationship.<sup>37</sup>

The Council of Defense and Space Industry Associations (CODSIA) stated that this law has created an atmosphere of suspicion between contractors and Government and has generated unnecessary administrative requirements.<sup>38</sup> CODSIA noted that the law contains ambiguous terms that have been the subject of litigation.<sup>39</sup> It recommended the statute be amended to clarify that the scope of the examination should be limited to records that are directly related to the performance of the contract, not irrelevant internal records.<sup>40</sup> CODSIA also recommended that the examination provision should be extended to the growing number of foreign contractors, and the subpoena power should be limited to those situations where a criminal indictment has been issued.<sup>41</sup> CODSIA recommended that this examination authority should exempt businesses and business segments of Government contractors that provide commercial products because of the sensitive nature of the information to be audited.<sup>42</sup> In a supplemental comment, CODSIA expressed a concern about the inclusion of cost-reimbursement, time and materials, labor-hour, or price-redeterminable contracts within the scope of this statute.<sup>43</sup> It contended that such an expansion is inconsistent with the Panel's goal of streamlining.<sup>44</sup> CODSIA stated that the statute does not require the auditing of a significant number of foreign contractors and strongly encouraged strengthening the audit provisions relating to foreign contracts.<sup>45</sup> Finally, CODSIA recommended a specific definition of "records" and exempting fixed price contracts from the audit provisions.<sup>46</sup>

<sup>45</sup>*Id.*

<sup>46</sup>*Id.*

The Defense Logistics Agency, Defense Plant Representative Office Boeing/Seattle, Washington, stated that the problems it has observed are not with the law, but with its over zealous application.<sup>47</sup>

The Center for Strategic and International Studies (CSIS) noted that subsection (b) of this law allows for audit authority by the General Accounting Office (GAO) through the Comptroller General.<sup>48</sup> This provision predates the creation of DCAA as the chief contract audit arm of the Government and is inconsistent with other laws.<sup>49</sup> The Office of the Assistant Secretary of the Air Force Acquisition (SAF/AQC) recommended combining 10 U.S.C. § 2406, 10 U.S.C. § 2313, and 10 U.S.C. § 2306a(f) into a single comprehensive audit statute.<sup>50</sup>

The GAO commented that it fully supports the Panel's attempt to consolidate statutes in the audit area.<sup>51</sup> GAO stated that it believes it is important for it to retain the ability to audit firm fixed-price, negotiated contracts. As a result, it contends that "to make the audit authority of the Comptroller General coextensive with that of the contracting agencies could limit our ability to perform such reviews."<sup>52</sup> It provided the Panel with proposed statutory language to this end. GAO also supported and offered its assistance in developing some sort of audit accommodation for procurement from commercial vendors.

#### **2.3.2.4. Recommendation and Justification**

**Amend to combine 10 U.S.C. § 2313 and 10 U.S.C. § 2306a(f) and certain regulatory provisions into a single comprehensive audit statute.**

The Panel recommends that 10 U.S.C. § 2313 be amended to merge the audit provision of the Truth in Negotiations Act (10 U.S.C. § 2306a(f)) and the audit coverage in FAR section 52.215-2 into a single comprehensive audit statute. To this end, the Panel has accepted the proposed statutory language provided by GAO with some minor changes. The Panel has included those types of contracts currently listed in FAR section 52.215-2 in its proposed audit statute. The Panel recognizes that industry commentators have noted that this amendment actually expands the statute's authority; however, because these types of contracts are listed in the regulation implementing the statute, they are currently binding on contractors and represent no new authority.

---

<sup>47</sup>Letter from Paul J. Madden, Defense Logistics Agency, Defense Plant Representative Office, Boeing/Seattle, Washington to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (Apr. 10, 1992).

<sup>48</sup>Memorandum from Debbie van Opstal to the Flowdown Cost Accounting Task Forces, Center for Strategic and International Studies (May 5, 1992).

<sup>49</sup>*Id.*

<sup>50</sup>Memorandum from Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), to the Office of the General Counsel of the Defense Logistics Agency (Apr. 24, 1992).

<sup>51</sup>Letter from James F. Hichman, General Counsel, General Accounting Office, to Gary Quigley, Deputy General Counsel, Defense Logistics Agency (Sept. 24, 1992).

<sup>52</sup>*Id.*

In subsection (a)(2) of the proposed audit statute, the Panel has included the essence of 10 U.S.C. § 2306a(f), the audit provision of the Truth in Negotiations Act. The Panel believes that this language adequately addresses the audit authority necessary for contracts in which cost and pricing data are necessary.

The Panel recommends retention of the subpoena authority included in subsection (d) of the current language. Although industry commentators have objected to the inclusion of this authority, the Panel believes that the subpoena authority is a necessary enforcement tool in the defense procurement process. While the Panel has chosen not to include in its proposed audit statute an exemption for contracts for commercial items, the Panel has recommended to Congress the adoption of a new statute addressing the purchase of commercial items which contains a new pricing subsection and an audit provision tailored specifically to that pricing provision. The proposed audit clause, if enacted, would be the sole source of audit rights for commercial item acquisition. In addition, one subsection of the new commercial item statute will list certain existing statutes that will be superseded by this new statute when the Government is purchasing a commercial item. 10 U.S.C. § 2313 would be one of these statutes. The Panel has included the provisions in FAR subsection 15.106-1 that exempt small purchases and utility services from the provisions of 10 U.S.C. § 2313.

The Panel recognizes that AIA feels that the three year records retention requirement is overreaching and expensive; however, the ability to audit the books and records of a Government contractor even after the contract has been completed is necessary to maintain the financial and ethical integrity of the acquisition process.

The Panel believes that the proposed audit statute will better target the types of contracts for which the Government believes audit authority is particularly necessary while exempting small purchases and commercial contracts.

#### **2.3.2.5. Relationship to Objectives**

This recommendation satisfies the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It promotes the continued commercialization of the defense procurement process by enabling a company to integrate the production of both commercial and defense unique products in a single business unit without altering its accounting or management procedures. By exempting commercial products from these audit procedures, this recommendation also promotes the purchase of commercial or modified-commercial products and services by DOD at or based on commercial market prices.

### 2.3.2.6. Proposed Statute

#### § 2313. Examination of books and records of contractor

(a) An agency named in section 2303 of this title ~~is entitled, acting through an authorized representative, to inspect the plant and audit the books and records of--~~

(1) is entitled to inspect the plant and audit the books and records of --

(1A) a contractor performing a ~~cost or cost-plus-a-fixed-fee contract cost-reimbursement, incentive, time-and-materials, labor-hour, or price-redeterminable contract, or any combination of these~~ made by that agency under this chapter; and

(2B) a subcontractor performing any subcontract under a ~~cost or cost-plus-a-fixed-fee contract cost-reimbursement, incentive, time-and-materials, labor-hour, or price-redeterminable contract or any combination of these~~ made by that agency under this chapter.

(2) shall, for the purpose of evaluating the accuracy, completeness, and currency of cost or pricing data required to be submitted by section 2306a of this title with respect to a contract or subcontract, have the right to examine all records of the contractor or subcontract related to--

(A) the proposal for the contract or subcontract;

(B) the discussions conducted on the proposal;

(C) pricing of the contract or subcontract; or

(D) performance of the contract or subcontract.

(b) In subsection (a), the terms "books and records" and "records" include books, documents, accounting procedures and practices, and other data, regardless of form or type.

(c)(1) The Director of the Defense Contract Audit Agency (or any successor agency) may require by subpoena the production of books and records of a contractor, access to which is provided to the Secretary of Defense by subsection (a)(1) or (a)(2).

(2) Any such subpoena, in the case of contumacy or refusal to obey, shall be enforceable by order of an appropriate United States district court.

(3) The authority provided by paragraph (c)(1) may not be redelegated.

(4) The Director (or any successor official) shall submit an annual report to the Secretary of Defense on the exercise of such authority during the preceding year and the reasons

why such authority was exercised in any instance. The Secretary shall forward a copy of each such report to the Committees on Armed Services of the Senate and House of Representatives.

(bd) Except as provided in subsection (ee), each contract awarded after using procedures other than sealed bid procedures shall provide that the Comptroller General and his representatives are entitled, ~~until the expiration of three years after final payment,~~ to examine any books, documents, papers, or records of the contractor, or any of his subcontractors, that directly pertain to, and involve transactions relating to, the contract or subcontract.

(ee) Subsection (bd) does not apply to a contract or subcontract with a foreign contractor or foreign subcontractor if the head of the agency named in section 2303 determines, with the concurrence of the Comptroller General or his designee, that the application of that subsection to the contract or subcontract would not be in the public interest. However, the concurrence of the Comptroller General or his designee is not required --

(1) where the contractor or subcontractor is a foreign government or agency thereof or is precluded by the laws of the country involved from making its books, documents, papers, or records available for examination; and

(2) where the head of the agency determines, after taking into account the price and availability of the property and services from United States sources, that the public interest would be best served by not applying subsection (bf).

~~(d)(1) The Director of the Defense Contract Audit Agency (or any successor agency) may require by subpoena the production of books, documents, papers, or records of a contractor, access to which is provided to the Secretary of Defense by subsection (a) or by section 2306a of this title.~~

~~(2) Any such subpoena, in the case of contumacy or refusal to obey, shall be enforceable by order of an appropriate United States district court.~~

~~(3) The authority provided by paragraph (1) may not be redelegated.~~

~~(4) The Director (or any successor official) shall submit an annual report to the Secretary of Defense on the exercise of such authority during the preceding year and the reasons why such authority was exercised in any instance. The Secretary shall forward a copy of each such report to the Committees on Armed Services of the Senate and House of Representatives.~~

(f) The right of an agency under subsection (a) and the Comptroller General under subsection (d) shall expire three years after final payment under the contract or subcontract.

(g) This section is inapplicable to contracts awarded under simplified acquisition procedures or for utility services at rates not exceeding those established to apply uniformly to the public, plus any applicable reasonable connection charge.

### 2.3.3. 10 U.S.C. § 2406

#### Availability of cost and pricing records

##### 2.3.3.1. Summary of the Law

This section requires a contractor, under a covered contract, to make available to the head of the agency, or his representative, records of the contractor's cost and pricing data in the form and manner maintained by the contractor. The statute also lists the kinds of records that are subject to this audit authority. The Secretary of Defense is required to promulgate regulations to carry out this statute, which shall include the period for which records shall be maintained. Finally, this law also contains a definitional subsection.

##### 2.3.3.2. Background of the Law

This section was enacted as part of the Department of Defense Authorization Act of 1986.<sup>1</sup> Congress indicated that this provision was not intended to require new, additional information from contractors, but that contractors would provide DOD with information they already have available.<sup>2</sup> Congress was extremely concerned about the impact of this provision, because there was a lack of Congressional hearings and considerable controversy regarding its effectiveness.<sup>3</sup> Because of this concern, Congress directed DOD to evaluate all provisions of the legislation and indicate any necessary changes.<sup>4</sup> In 1986,<sup>5</sup> the section was amended to its current form. The requirements of this amendment applied to manufacturing contracts for major weapon systems subject to the requirements of 10 U.S.C. § 2306a (Truth in Negotiations) that are either pending or entered into after the enactment of the act.<sup>6</sup> Congress intended that the regulations governing access under this section would be consistent with the efforts of the Under Secretary of Defense for Acquisition, in order to coordinate audit and oversight of contractor activities.<sup>7</sup> Congress also intended that cost data kept by the contractor should reflect recurring as well as non-recurring costs, and this data should be made available to auditors.<sup>8</sup> Finally, Congress stressed that this section should make clear that the contractor is not required to maintain any additional data or data in a form or manner different from the way the contractor ordinarily maintains data.<sup>9</sup>

### 2.3.3.3. Law in Practice

The submission of cost and pricing data is addressed in subpart 15.8 of the Federal Acquisition Regulation (FAR). The Inspector General of the Department of Defense (DODIG) commented that this law is serving its intended purpose and is not ambiguous, inefficient, or irrelevant.<sup>10</sup> The Aerospace Industries Association (AIA) stated that this statute duplicates the examination of records provisions in 10 U.S.C. § 2313, "Examination of books and records of contractor," and 10 U.S.C. § 2306, "Kinds of contracts."<sup>11</sup> AIA believes that this statute should not be applied to commercial products and services and should be repealed.<sup>12</sup> The Defense Contract Audit Agency (DCAA) noted that this statute largely duplicates, and is less inclusive than, the access rights provided by 10 U.S.C. § 2306a, "Truth in negotiations."<sup>13</sup> DCAA believes that 10 U.S.C. § 2306a(f) should be reworded to provide a uniform period of record retention for both prime and subcontractors.<sup>14</sup> Such an amendment would render 10 U.S.C. § 2406 unnecessary.<sup>15</sup> The Defense Logistics Agency Defense Plant Representative Office, Boeing/Seattle, Washington, stated that this law is still relevant and is required for the integrity of the procurement system; however, it has created inefficiencies.<sup>16</sup>

### 2.3.3.4. Recommendation and Justification

#### Repeal

The Panel recommends that this law be repealed. The Panel has recommended a comprehensive audit statute at 10 U.S.C. § 2313, "Examination of books and records of contractor," that incorporates provisions of 10 U.S.C. § 2313, 10 U.S.C. § 2306a, and certain FAR provisions. The Panel agrees that the authority contained in this section is important to the continued financial and ethical integrity of the defense procurement process; however, it believes that 10 U.S.C. § 2406 should be repealed in favor of the recommended comprehensive audit statute at 10 U.S.C. § 2313.

<sup>15</sup>*Id.*

<sup>16</sup>Letter from Paul J. Madden, Defense Logistics Agency Defense Plant Representative Office, Boeing/Seattle, Washington to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (Apr. 10, 1992).

#### **2.3.3.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to the Department of Defense with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication of authority currently present in the procurement process by merging similar statutes into one comprehensive and centrally located law and repealing statutes that are substantially similar to laws contained elsewhere in the U.S. Code.

## **2.3.4. 18 U.S.C. § 1516**

### **Obstruction of federal audit**

#### **2.3.4.1. Summary of the Law**

This section prohibits any person with intent to deceive or defraud the United States from influencing, obstructing, or impeding a Federal auditor in performance of official duties. The penalty for such interference is a fine, imprisonment of not more than five years, or both. The section also contains a provision that defines the term "Federal auditor."

#### **2.3.4.2. Background of the Law**

This section was enacted as part of the Anti-Drug Abuse Act of 1988.<sup>1</sup> There is no mention of this provision in the Senate or House Reports or the Congressional Record.

#### **2.3.4.3. Law in Practice**

The Inspector General of the Department of Defense (DODIG) commented that this law is relevant and required for the continued financial and ethical integrity of the procurement process.<sup>2</sup> The DODIG also stated that the law is serving its intended purpose and is necessary to protect the best interests of DOD.<sup>3</sup> The Aerospace Industries Association (AIA) stated that this law duplicates 10 U.S.C. § 2276, "Inspection and audit of plant and books of contractor; criminal provisions."<sup>4</sup> AIA also believes that this statute contains ambiguous terms that have led to interpretation problems and abuse by Government auditors who impose unwarranted demands on contractors.<sup>5</sup> AIA argues that because of the ambiguities, this statute should be repealed or, at least, amended to provide more precise definitions to prevent abuse by Government auditors.<sup>6</sup>

<sup>5</sup>*Id.*

<sup>6</sup>*Id.*

#### **2.3.4.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this statute be retained. This statute is not limited to DOD but applies to agencies Government-wide. There may be redundancy between this statute and 10 U.S.C. § 2276; however, the Panel has recommended the repeal of 10 U.S.C. § 2276 because it is obsolete. Notwithstanding that the scope of this law may have been misinterpreted by some Government auditors, the Panel believes that 18 U.S.C. § 1516 is required for the continued financial and ethical integrity of the acquisition process and should be retained.

#### **2.3.4.5. Relationship to Objectives**

This recommendation helps to promote the financial and ethical integrity of the defense procurement process while encouraging the exercise of sound judgment on the part of acquisition personnel.

## **2.4. Cost Accounting Standards**

### **2.4.0. Introduction**

In the area of cost accounting standards, the Panel focused its review on 41 U.S.C. § 422, the statute establishing the Cost Accounting Standards (CAS) Board. The Panel recommends that 41 U.S.C. § 422 be retained and that the CAS Board use its existing authority to facilitate purchases of commercial items and services by DOD.

41 U.S.C. § 422 established the CAS Board within the Office of Federal Procurement Policy (OFPP), with the Administrator of OFPP as the chairman and the other four members to be chosen from DOD, the General Services Administration (GSA), and the private sector. The CAS Board currently consists of five members representing both Government and industry. The members include Allan V. Burman, Administrator for Federal Procurement Policy; William Reed, Director of the Defense Contract Audit Agency; Edward Hefferon, Deputy Inspector General, GSA; Donald Hayes and Samuel Self, representatives of the private sector. The Board maintains a staff of four full-time staff members and one part-time consultant.

The Panel recommends that 41 U.S.C. § 422 not be changed because it is an enabling statute that establishes the CAS Board and gives it authority to promulgate cost accounting standards and implementing regulations for all executive agencies, contractors, and subcontractors. The statute currently gives the Board broad authority to exempt classes of contractors and subcontractors, and types of contracts and subcontracts, from the cost accounting standards. In this regard, the Panel recommends that the CAS Board, as a priority matter, use its existing authority to exempt contracts for commercial products, or, as a minimum, to limit the standards that would be applicable to Government contracts for commercial items. The Panel believes that this action would be among the most important steps that could be taken to facilitate the Government's purchase of commercial items and services.

One of the Panel's primary objectives is to promote the ability of the Government, particularly DOD, to purchase commercial items and services without requiring contractors to change their accounting or management practices to comply with unique Government requirements. Contractors entering into contracts for commercial items with the Government should be able to integrate defense and commercial production where economically feasible without being subject to restrictive cost accounting standards. The Panel believes that no legislative changes are necessary to achieve this goal because the Board has sufficient authority to limit the application of the cost accounting standards.

The Panel's recommendation will result in cost savings by allowing businesses to consolidate the production of commercial and defense related products in a single business unit without altering existing accounting or management practices. In addition, the recommendation promotes DOD's purchase of commercial or modified-commercial products and services at or near commercial market prices.

The CAS Board has used its authority to (1) exempt certain categories of contractors from the Board's rules and regulations; (2) grant waivers of its requirements for certain individual contracts; (3) limit requirements for formal disclosure of accounting practices to large Government contractors; and (4) limit application of individual standards either by exempting certain categories of contractors or by establishing a dollar threshold for application of the standard.

The Board has published a Statement of its current objectives, policies and concepts in the Federal Register, Vol. 57, No. 134, July 13, 1992. The Statement is intended to clarify the current views of the Board and to provide an increased awareness of its decision making process. The Board intends that subsequent promulgations be consistent with the objectives and policies described in the Statement. The Statement should give contractors and Federal agencies a better understanding of the complex and difficult issues facing the Board when it promulgates and revises the cost accounting standards. The Panel believes that its goal of promoting increased DOD commercial buying is consistent with the CAS Board's current objectives and policies.

After consideration of public comments, the Board recodified the CAS Rules and Regulations at 48 C.F.R. Chapter 99, previously found at 48 C.F.R. Part 30 and C.F.R. Parts 331 through 420. The final rule was established by the Board and published in the Federal Register on April 17, 1992. The Board took this action to provide a single set of rules and cost accounting standards applicable to Government contractors and subcontractors. The recodification represents an effort by the Board to reconcile the existing sets of cost accounting standards previously promulgated by other bodies. The Panel concluded, especially in view of the Board's recent initiatives, that legislative intervention or changes to the Board's enabling statute are unnecessary.

For convenience, the Panel reviewed several other statutes under the cost accounting standards category, although these statutes are not directly related to the standards. Most notably, the Panel reviewed 10 U.S.C. § 2410b, which directs the Secretary of Defense to promulgate regulations regarding the standards for inventory accounting systems utilized by contractors doing business with DOD.

As directed by the statute, regulations have been promulgated in the DFARS. Accordingly, the Panel recommends that 10 U.S.C. § 2410b be repealed. The Panel believes that the development of standards for contractor inventory accounting systems properly is a function of the regulatory system. Any ambiguities that may exist are in the regulations, not in the statutory language, and the majority have been clarified through joint Government and industry effort. The Secretary of Defense has the authority to promulgate further regulations without this law; thus, in the interest of streamlining Title 10 of the U.S. Code, the Panel concluded that the law is unnecessary and should be repealed.

## 2.4.1. 10 U.S.C. § 2410b

### Contractor inventory accounting systems: standards

#### 2.4.1.1. Summary of the Law

This section directs the Secretary of Defense to promulgate regulations regarding the standards for inventory accounting systems utilized by persons contracting with the DOD. The Secretary of Defense must also include in the regulations any certification and enforcement requirements.

#### 2.4.1.2. Background of the Law

This section was enacted and codified in 1988.<sup>1</sup> In passing this law, Congress directed the Secretary of Defense to use the elements outlined in the Federal Register on December 14, 1987,<sup>2</sup> in promulgating the initial standards. These elements were developed by the Defense Acquisition Regulation Council in an effort to amend the standards for material management and accounting systems in the Defense Federal Acquisition Regulation Supplement (DFARS). Congress went further to require the promulgation of regulations that give contracting officers clear direction when a defense contractor's inventory accounting system is so unreliable that it is impossible for the contracting officer to judge any material detriment to the United States.<sup>3</sup>

#### 2.4.1.3. Law in Practice

The provisions of this statute have been implemented, as required, in subparts 242.72 and 252.242-7004 of the DFARS. The comments received from the Inspector General of the Department of Defense (DODIG) and the University of California agree that regulations regarding contractor inventory accounting standards have been promulgated, as prescribed by this statute.<sup>4</sup> The DODIG recommends that this statute should remain unchanged until the regulatory guidance is updated.<sup>5</sup> The University of California noted that universities are required to conform to standards set by the Office of Management and Budget,<sup>6</sup> so that the additional standards

---

<sup>1</sup>National Defense Authorization Act, Fiscal Year 1989, Pub. L. No. 100-456, § 834 (a)(1), 102 Stat. 1918, 2024 (1988).

<sup>2</sup>Material Requirements Planning System, 52 Fed. Reg. 47,427 (codified at 48 C.F.R. Part 245)

<sup>3</sup>H.R. CONF. REP. NO. 989, 100th Cong., 2d Sess. 433 (1988), *reprinted in* 1988 U.S.C.C.A.N. 2503, 2564.

<sup>4</sup>Memorandum from Michael R. Hill, Assistant Inspector General for Audit Policy and Oversight, Office of the Inspector General of the Department of Defense to the Deputy General Counsel, Defense Logistics Agency (May 27, 1992); Letter from David F. Mears, Director, Research Administration Office, University of California, to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (May 19, 1992).

<sup>5</sup>Memorandum from Michael R. Hill, Assistant Inspector General for Audit Policy and Oversight, Office of the Inspector General of the Department of Defense to the Deputy General Counsel, Defense Logistics Agency (May 27, 1992).

<sup>6</sup>See Office of Management and Budget Attachment N to Circular A-110 (Audit procedures are contained in OMB Circular A-133.).

imposed by the DFARS are duplicative and unnecessary.<sup>7</sup> The Defense Contract Audit Agency (DCAA) noted that there has been a significant improvement in all aspects of material management as a result of this law and its implementation in the DFARS.<sup>8</sup> DCAA also commented that there were some problems in interpreting the regulations when they were first promulgated; however, Government and industry worked together to solve these implementation problems.<sup>9</sup> DCAA also believes that the regulations are ambiguous concerning system accuracy and measurement.<sup>10</sup>

The Council of Defense and Space Industry Associations (CODSIA) noted that this statute is redundant with other accounting standard and certification statutes. These multiple statutes "inevitably create confusion and lead to an inability to administer the statutes with straightforward efficiency and understanding."<sup>11</sup>

#### **2.4.1.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that this statute be repealed, because it is merely an enabling statute allowing for the promulgation of regulations. The development of standards for contractor inventory accounting systems properly belongs within the regulatory system and should not be made statutory. Regulations on these standards have already been promulgated and implemented. Any ambiguities that may exist are in the regulations, not in the statutory language, and the majority have been overcome through joint Government and industry effort. While DCAA believes this law is serving its intended purpose, it also notes that it is the guidance in the regulations, not in the law, that has significantly improved contractor material management systems. The Secretary of Defense would retain the authority to promulgate further regulations without this law; thus, in the interest of streamlining the U.S. Code, this law should be repealed as unnecessary.

#### **2.4.1.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of streamlining the defense acquisition process by recommending the repeal of statutes that have been successfully implemented in the applicable regulations.

## 2.4.2. 41 U.S.C. § 422

### Cost accounting standards board

#### 2.4.2.1. Summary of the Law

This statute established the Cost Accounting Standards (CAS) Board within the Office of Federal Procurement Policy (OFPP), with the Administrator for Federal Procurement Policy as the chairman and the other four members to be chosen from the DOD, the General Services Administration, and the private sector. The statute also outlines, in great detail, the Board's authority to promulgate cost accounting standards to be used by all executive agencies, contractors, and subcontractors in procurement contracts, as well as the regulations necessary to implement those standards. The Board is also required to make an annual report to Congress and permitted to receive appropriations necessary for its operation. The law also describes the term of office, compensation, and staff of each Board member.

#### 2.4.2.2. Background of the Law

The current CAS Board was established as part of the OFPP Act Amendments of 1988.<sup>1</sup> The first CAS Board, with the Comptroller General as chairman, had been established in 1970 in response to a study done by the Comptroller General which determined that "uniform cost accounting standards were both feasible and desirable."<sup>2</sup> Over the next decade, the Board promulgated nineteen cost accounting standards.<sup>3</sup> In 1980, the Congress failed to provide appropriations for the operation of the Board and it ceased operating; however, its standards, rules, and regulations continued to remain in effect.<sup>4</sup> In the interim, "several of the standards which were issued by the Board have become outdated. Examples include the standards related to pension costs, insurance costs, and the accrual of vacation time by employees on government contracts."<sup>5</sup> In 1988, Congress reestablished the Board, with the Administrator for Federal Procurement Policy as chairman. This change from the original Board chairmanship was urged by many witnesses who testified before the Senate to address concerns about the constitutional validity of a Board chaired by the Comptroller General.<sup>6</sup> The function of the second Board is virtually identical to that of the first Board; that is, to determine the measurement, assignment, and allocation of costs. As with the original Board, issues of allowability would be left to the agencies.<sup>7</sup>

<sup>6</sup>*Id.* at 9.

<sup>7</sup>*Id.* at 17.

### 2.4.2.3. Law in Practice

The CAS Board currently consists of five members representing both government and civilian interests. These members include Allan V. Burman, Administrator for Federal Procurement Policy; William Reed, Director of the Defense Contract Audit Agency (DCAA); Edward Hefferon, Deputy Inspector General of the General Services Administration; Donald Hayes and Samuel Self of the private sector. For support the Board maintains a staff of four full-time staff members and one part-time consultant. The Board has recently considered the DOD-issued guidelines for CAS 412. 40(c) waiver requests,<sup>8</sup> a report issued by the DOD Inspector General on the application of CAS coverage by DOD on smaller contractors, the request by Congress that GAO review the CAS Board's activities, and a proposal to raise CAS thresholds from \$10 million to \$25 million.<sup>9</sup>

The Air Force noted that there was significant controversy when the DOD attempted to take over the functions of the first Board when it went out of existence in 1980.<sup>10</sup> Although the Board has been re-established in accordance with the new statute, the Air Force believes that it is necessary that this statutory authority remain in the U.S. Code.<sup>11</sup> DCAA commented that the re-establishment of the CAS Board was necessary in order to have an entity with the authority to issue new standards, update existing standards, and grant waivers and exceptions.<sup>12</sup> DCAA maintained that the cost accounting standards are necessary for the continuing financial and ethical integrity of the defense procurement process.<sup>13</sup> Because cost accounting standards apply only when there are no legitimate market forces to establish fair and reasonable prices, and the Board is authorized to exempt classes or categories of contractors, subcontractors, and products from the requirements, DCAA favors retention of this statute.<sup>14</sup>

The Public Contract Law Section of the American Bar Association pointed out a number of problems it perceived with 41 U.S.C. § 422. Because the CAS Board was given authority over issues of allocability and the FAR Council was given authority over issues of allowability, the section contends that there have been several instances in which the cost principles promulgated in the FAR conflict with applicable cost accounting standards.<sup>15</sup> Accordingly, the section recommended that the authority of the CAS Board be extended to include issues of allowability as well as allocability.<sup>16</sup> The section also noted that compliance with the cost accounting standards and the provisions of the Truth in Negotiations Act (TINA) have become a serious impediment to

---

<sup>8</sup>CAS 412.40(c) addresses "Pension costs, Composition and Measurement."

<sup>9</sup>New Developments, CAS Guide (CCH) ¶ 20,000 (Aug. 1992).

<sup>10</sup>Letter from Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Assistant Secretary (Acquisition), Office of the Assistant Secretary of the Department of the Air Force to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (May 11, 1992).

<sup>11</sup>*Id.*

<sup>12</sup>Letter from Michael J. Thibault, Assistant Director, Policy and Plans, Defense Contract Audit Agency to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (June 17, 1992).

<sup>14</sup>*Id.*

<sup>15</sup>Letter from John S. Pachter, Chair, Public Contract Law Section of the American Bar Association to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (June 18, 1992).

<sup>16</sup>*Id.*

the purchase of commercial products, because many commercial companies do not have the extensive data tracking systems necessary for compliance.<sup>17</sup> It recommended that the statute should be amended to provide "that contracts awarded on the basis of adequate price competition are also exempt from CAS," and "that CAS does not apply to purchases from a company whose business is predominately commercial, where the price is based on: (a) overall value to the government; and/or (b) comparison with the cost of alternatives, if any."<sup>18</sup> The section also recommended that the Board be given more staff and the ability to make interim standards or interpretations when it finds that there are "urgent and compelling circumstances."<sup>19</sup>

The Council of Defense and Space Industry Associations (CODSIA) commented that changing technology has made it necessary to address important cost accounting issues.<sup>20</sup> It stated that industry feels generally favorable about the re-establishment of the CAS Board to accomplish this goal.<sup>21</sup> CODSIA also mentioned the fact that the Board is seriously understaffed. It stated:

This apparent lack of resources necessary to deal with the detailed and technical issues which arise in connection with application of the CAS not only precludes holding enough meaningful Board meetings to allow significant progress, but also results in relating back to the implementing agencies some of the CAS Board functions. This makes the Board highly sensitive to the reaction of those agencies to its positions and, on particular issues, could result in a compromise of the Board's independence.<sup>22</sup>

CODSIA also commented that, because the Board consists of predominantly Government representatives, there could be a predisposition in favor of the Government, which would defeat Congress' intent of having an independent board.<sup>23</sup> CODSIA stated that it believes the statute should be amended to alter the Board's composition to include more industry representatives.<sup>24</sup> CODSIA also noted that the General Accounting Office has recently begun a review of the CAS Board's operations at Congress' request.<sup>25</sup>

The National Security Industrial Association (NSIA) commented separately from CODSIA on this law. NSIA also noted that the Board is seriously understaffed and stated its

<sup>25</sup>Letter from the United States House of Representatives Committee on Government Operations to the Honorable Charles A. Bowsher, Comptroller General, General Accounting Office. (June 16, 1992).

belief that the Office of Management and Budget has little inclination to see the purpose of the law fulfilled.<sup>26</sup> NSIA contended that the major problem with this law is the overlap and conflict of the standards promulgated by the Board with the regulations promulgated by the FAR Council.<sup>27</sup> This dichotomy has arisen because the Board was given the statutory authority to promulgate standards concerning the allocability of costs while the FAR Council was to draft regulations on allowability of costs. NSIA stated that it believes the FAR Council often goes too far and either promulgates regulations on allocability contrary to this statute or promulgates regulations that ostensibly address allowability but, in reality, govern questions of allocability.<sup>28</sup> NSIA believes that by giving the CAS Board the exclusive authority to promulgate standards on both allocability and allowability, this conflict would be resolved.<sup>29</sup> NSIA agreed that the cost accounting standards and the Board have done much to protect DOD interests and the financial and ethical integrity of the defense procurement process.<sup>30</sup> It also stated that "there is a continuing need for uniformity and consistency in cost accounting for government contracts."<sup>31</sup>

The Aerospace Industries Association (AIA) provided additional comments on this law.<sup>32</sup> AIA contended that this statute is necessary for the financial and ethical integrity of the procurement process.<sup>33</sup> It also stated that certain FAR provisions have overlapped the Board's authority in determining allocability.<sup>34</sup> Even so, AIA voiced strong opposition "to the expansion of the CAS Board's authority to include the determination of cost allowability."<sup>35</sup> According to AIA, the primary objective of the Board is to achieve consistency in cost accounting practices and should not be extended to include issues of allowability.<sup>36</sup>

#### 2.4.2.4. Recommendations and Justification

**Retain 41 U.S.C. § 422 and request that the Cost Accounting Standards Board, using its existing authority, take prompt action to facilitate purchases of commercial items by DOD.**

The Panel recommends that this statute be retained. This is an enabling statute that establishes the CAS Board and gives it the authority to promulgate cost accounting standards. This statute also gives the Board broad authority to exempt classes of contractors and subcontractors, and types of contracts and subcontracts, from the cost accounting standards. One of the Panel's major goals is to promote the ability of the Government, particularly DOD, to

---

<sup>36</sup>*Id.*

purchase commercial products and services without requiring contractors to alter their management and accounting procedures to adhere to Government-unique requirements. Those entities entering into contracts for commercial items with the Government should be able to integrate defense and commercial production where economically feasible without being subject to restrictive cost accounting standards. The Panel believes it is not necessary to make a legislative change to this statute to achieve this goal because the Board has sufficient statutory authority to facilitate this integration of defense and commercial production. The Panel recommends that the CAS Board, as a priority matter, use its existing authority to exempt contracts for commercial products, or, as a minimum, to limit the standards that would be applicable to contracts for commercial items. The Panel believes that prompt action by the CAS Board would be among the most important steps to be taken in facilitating the purchase of commercial items and services by DOD.

The Panel agrees that there may be staffing problems that are impacting on the efficiency of the Board's operation; however, it feels that this issue is more properly addressed in the administrative and budgeting process, not through statutory alteration. The Panel recommends the deletion of subsection (f)(3). Since the rules and procedures required by this subsection have already been promulgated, there is no further need for the statutory provision requiring promulgation by November 17, 1988.

#### **2.4.2.5. Relationship to Objectives**

The recommendation made by the Panel will facilitate business entities in integrating the production of both commercial and defense peculiar products in a single business unit without altering their accounting or management procedures. It promotes the purchase of commercial or modified commercial products and services by DOD at, or based on, commercial market prices. It would reduce cost to contractors and the Government by permitting the use of data that already exists and is already being collected without imposing additional administrative burdens.

### **2.4.3. Public Law Number 91-379, § 103**

#### **Defense Production Act - Amendments - Economic Stabilization**

##### **2.4.3.1. Summary of the Law**

This section of the public law amended the 1950 Defense Production Act and established the first Cost Accounting Standards Board in 1970. Congress stopped funding the Board in 1980 and it ceased functioning.

##### **2.4.3.2. Background of the Law**

This section of Pub. L. No. 91-379 was repealed in 1988, and the current Cost Accounting Standards Board was established by Pub. L. No. 100-679.

##### **2.4.3.3. Recommendation and Justification**

###### **Delete**

This section was repealed by Pub. L. No. 100-679, § 5(b), Nov. 17, 1988, 102 Stat. 4063, codified at 50 U.S.C. App. § 2168.

##### **2.4.3.4. Relationship to Objectives**

Deletion of this section will eliminate an unnecessary law and thereby streamline the body of acquisition laws.

## **2.5. Administration of contract provisions relating to price, delivery, and product quality**

### **2.5.0. Introduction**

During the initial review of the statutes relating to contract administration, the Panel was easily able to divide them into six distinct categories: contract payment, cost principles, contract audit and access to records, cost accounting standards, claims and disputes, and extraordinary contractual relief. Once these categories were established, there were 11 statutes that did not fall into any of the six categories. To accommodate these statutes, the Panel developed a category for statutes addressing the administration of contract provisions relating to price, delivery, and product quality. Many of these laws proved to be historical anomalies that had been adequately addressed in implementing regulations long ago.<sup>1</sup> In keeping with the Panel's goal of deleting statutory authority that has been addressed in the regulations with greater flexibility, the Panel recommends repeal of these statutes. Other statutes were unique laws which had either not been fully implemented in the regulations or which are used or cited on a regular basis by DOD.<sup>2</sup> The Panel recommends retention of these statutes.

During its examination of 41 U.S.C. § 15, "Transfer of contracts; assignments of claims; set-off against assignee," the Panel noted that the statute's authority is limited to times of war or national emergency. The Panel believes that this authority should be applicable at all times and to all contracts that are governed by this statute. In a recent amendment to the Defense Production Act, Congress expanded its applicability to include both times of national emergency and the determination by the President that use of the authority is necessary.<sup>3</sup> The Panel noted that Congress has recognized that some statutory authority, previously reserved for times of war or national emergency, should be available in peacetime as well. The Panel recommends that the authority contained in 41 U.S.C. § 15 follow this trend. The Panel recommends that this statute be otherwise retained. Throughout its long history, this statute has consistently served the purpose Congress intended. This provision has been favorably cited in numerous cases, many of them very recently. The history of the law has shown its positive impact on the small business community.

Of major interest was 10 U.S.C. § 2403, "Major weapon systems; contractor guarantees." After reviewing the comments received and two studies made on the effectiveness of warranty

---

<sup>1</sup>These statutes include:

- 10 U.S.C. § 2383 - Procurement of critical aircraft and ship spare parts; quality control
- 10 U.S.C. § 4534 - Subsistence supplies; contract stipulations; place of delivery change and reclamation
- 10 U.S.C. § 9534 - Subsistence supplies; contract stipulations; place of delivery on inspection
- 41 U.S.C. § 20 - Deposit of contracts

<sup>2</sup>These statutes include:

- 10 U.S.C. § 2312 - Remission of liquidated damages
- 31 U.S.C. § 6306 - Authority to vest title in tangible personal property for research
- 41 U.S.C. § 417 - Record requirements

<sup>3</sup>S. 347, 102d Cong., 2d Sess. (1992).

implementation in DOD,<sup>4</sup> the Panel determined that there are significant problems in the administration of warranties in every branch of DOD. The comments and studies also show a reluctance by DOD to issue warranty waivers, which can result in the purchase of warranties without regard to their cost effectiveness.

The Panel believes that warranties would be much more effectively implemented on a case-by-case basis instead of by statutory mandate. In this way, the Services could purchase warranties only for those contracts or products that would be effectively served by them and make other arrangements when warranties would not be cost effective. By this recommendation, the Panel is not suggesting that warranties are unnecessary in all cases, but rather that they should be used only when appropriate. The Panel recommends that clear, specific guidance should be included in the regulations governing purchase of warranties and issuance of waivers.

As an alternative, the Panel recommends that this statute be revised to address some of the problems associated with its implementation. Even though Congress had stated that it intended waivers to be given if the warranties would not be cost effective, virtually no waivers have been issued. The regulatory implementation of the provision should be amended to provide better guidance to the field personnel. It is clear from the comments received that the flexibility Congress attempted to build into the statute has not been effective. The Panel believes that waivers must be more readily available in the acquisition process for those instances where a warranty would not be cost effective. To this end, the Panel recommends vesting the waiver authority in a lower level official to help expedite waiver approval. The Panel also agrees that the Secretary of Defense should promulgate a policy statement supporting the use of waivers when a warranty would not be cost effective and should actively encourage the use of waivers in any further implementation or guidance.

The Panel believes that the warranty program must be improved if it is to be used with any measure of cost effectiveness. Increased use of waivers will also help the warranty administration system by exempting many contracts in which warranties were not effective from the outset. While the Panel still believes that the best course of action would be to repeal this statute in its entirety, the amendments recommended above will at least alleviate some of the more serious problems with the current system.

---

<sup>4</sup>These studies include one by MKI, Inc., *Warranty Guidebook Research Summary* (1992) and one by the Office of the Deputy Director for Defense Systems Procurement Strategies, *Report on the Administration of Department of Defense Weapon System Warranties* (1992).

## **2.5.1. 10 U.S.C. § 2312**

### **Remission of liquidated damages**

#### **2.5.1.1. Summary of the Law**

This section allows the Comptroller General, upon the recommendation of the head of an agency, to remit all or part of any liquidated damages assessed for delay in performing a contract, when the contract provides for such damages.

#### **2.5.1.2. Background of the Law**

This section was part of the Armed Services Procurement Act of 1947 (ASPA).<sup>1</sup> Some contracts contain a provision that allows for liquidated damages should the contractor fail to perform on time.<sup>2</sup> Subsection 6 of the ASPA allowed the Comptroller General to waive any or all of the liquidated damages that may accrue on a contract with the Government.<sup>3</sup> Congress noted that "numerous instances arise in which the strict application of liquidated damages provisions results in deduction of amounts which are out of proportion to the contract price of the items involved and to any damage actually suffered by the government."<sup>4</sup> This section was codified at 10 U.S.C. § 2312 in 1956<sup>5</sup> and no further amendments have been made to it.

#### **2.5.1.3. Law in Practice**

The authority contained in this law has been implemented in subpart 12.2 of the Federal Acquisition Regulation (FAR).<sup>6</sup> The language at 12.202(d) of the Policy subsection repeats almost exactly the language contained in the statute. The Office of the Inspector General of the Department of Defense (DODIG) stated that this law is still relevant and is serving its intended purpose in the procurement process.<sup>7</sup> The DODIG did note that there is some overlap between this law and 41 U.S.C. § 256a, "Waiver of liquidated damages." However, the DODIG interpreted the Title 41 provision to be applicable to all contracts, including sales contracts, while the Title 10 provision is limited to DOD procurement contracts.<sup>8</sup> The Council of Defense and Space Industry Associations (CODSIA) commented that this law is serving its intended purpose and is still relevant.<sup>9</sup> The Defense Contract Management District Mid-Atlantic (DCMDM), Defense Logistics Agency, stated that there was some question whether this statute is consistent

<sup>8</sup> *Id.*

<sup>9</sup> Letter from the Council of Defense and Space Industry Associations (CODSIA) to Gary Quigley and Jack Harding (Aug. 7, 1992).

with the Contract Disputes Act (CDA).<sup>10</sup> DCMDM believes that the imposition and amount of liquidated damages should be left to the discretion of the contracting officers, and any disputes should be handled under the CDA.<sup>11</sup> The Defense Contract Management District North Central (DCMDNC) recommended that this statute be eliminated as the same relief is available under Pub. L. No. 85-804, "Extraordinary Contractual Relief."<sup>12</sup>

#### **2.5.1.4 Recommendation and Justification**

##### **Retain 10 U.S.C. § 2312.**

The Panel recommends that 10 U.S.C. § 2312 be retained. This statute continues to provide a useful and important function in the acquisition process and has been implemented in the appropriate regulations. DCMDM questioned the consistency of this provision with the Contract Disputes Act; however, this authority is consistent with the Comptroller General's basic authority to remit or forgive obligations to the government under certain circumstances. This statute appears to be serving its intended purpose and the Panel believes it should be retained.

#### **2.5.1.5. Relationship to Objectives**

This recommendation promotes the purchase of items produced by small business and commercial or modified-commercial items by DOD by permitting the agencies to be flexible in the remission of liquidated damages. This provision allows the agencies and the Comptroller General to take into account any special circumstances and to make decisions on each contract on an individual basis.

## **2.5.2. 10 U.S.C. § 2383**

### **Procurement of critical aircraft and ship spare parts: quality control**

#### **2.5.2.1. Summary of the Law**

This statute provides that the Secretary of Defense shall require any contractor supplying critical aircraft or ship spare parts to provide parts that meet all appropriate qualification and contractual quality requirements as may be specified in the solicitation and made available to prospective offerors. The Secretary of Defense shall use the requirements that were used to qualify the original production part, if available, unless the Secretary determines such requirements are unnecessary.

#### **2.5.2.2. Background of the Law**

A prior version of 10 U.S.C. § 2383<sup>1</sup> (unrelated to the current law), which permitted the Secretary of a military department to make emergency purchases of war material abroad free of duty, was repealed in 1962.<sup>2</sup> The current version of this statute was enacted as part of the National Defense Authorization Act, Fiscal Year 1989.<sup>3</sup> Congress recognized that there may be circumstances in which the same quality and qualifications requirements that were used during the development and production stages of a defense program would not apply to a part supplied to support a fielded system.<sup>4</sup> Technology changes would alter quality and qualification requirements.<sup>5</sup> As a result, Congress intended that the original qualification and quality requirements serve as the baseline, and subsequent modifications should be documented.<sup>6</sup> There was one technical amendment to the statute in 1991.<sup>7</sup>

#### **2.5.2.3. Law in Practice**

This law has not been implemented in Federal regulations. The Office of the Inspector General of the Department of Defense (DODIG) stated that it strongly supports ". . . the statutory requirement for the thorough testing of all new or modified weapon systems and their platforms, especially in today's downsizing environment. We also strongly support the requirement that critical spare parts meet the qualification and contractual requirements of the original production

<sup>4</sup>H.R. Conf. Rep. 989, 100th Cong., 2d Sess. 426 (1988), reprinted in 1988 U.S.C.C.A.N. 2503, 2556.

<sup>5</sup>*Id.*

<sup>6</sup>*Id.*

<sup>7</sup>National Defense Authorization Act for Fiscal Years 1992 and 1993, Pub. L. No. 102-190, § 1061(a)(13), 105 Stat. 1290, 1473.

parts provided to the Government."<sup>8</sup> It believes that this statute is necessary to protect the best interests of DOD, does not overlap with other statutes, and is still relevant.<sup>9</sup> The Council of Defense and Space Industry Associations (CODSIA) stated that this law is basically serving its purpose of ensuring that spare parts meet the same standards as the original parts.<sup>10</sup> It did note, however, that redundant tests for the requalification of original production parts by the original manufacturer may "increase the cost of parts to the Government without any 'value added.'"<sup>11</sup> Within the Defense Logistics Agency, the Defense Contract Management District West (DCMDW) recommended repeal of this law,<sup>12</sup> but the Defense Contract Management District North Central (DCMDNC) recommended expanding the statute's coverage to all major weapon systems because there appeared to be no compelling reason to limit its application to aircraft and ship spare parts.<sup>13</sup>

This statute was considered by the Defense Acquisition Regulatory Council (DAR Council) for implementation in 1989. The National Security Industrial Association (NSIA) had commented to the DAR Council that DOD had not issued any regulations or attempted to put this statute into effect.<sup>14</sup> NSIA noted that, as a result, DOD continued to buy inferior parts without regard to the provisions of this statute.<sup>15</sup> It contended that "the implementation of the Government's continuing to use this outlawed practice are enormous in terms of personnel safety, mission success and potential third party liability."<sup>16</sup> The DAR Council determined that this authority was "directed more toward program managers than contracting officers," and declined further action.<sup>17</sup>

The Panel discussed the authority contained in this statute and observed that this type of statutory mandate is not necessary in defense procurement contracts. Informal contacts with procurement officials confirmed that this authority is not necessary. Quality assurance procedures already available to DOD are adequate.

#### **2.5.2.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that 10 U.S.C. § 2383 be repealed. There is adequate authority in the procurement process without the necessity of a statute. The qualification and quality standards should be a matter for engineering and technical judgment based on current needs, technology, and experience with the use of the item or part.

#### **2.5.2.5. Relationship to Objectives**

This recommendation will establish a balance between an efficient process of obtaining necessary equipment and full and open access to the procurement system and the commercial market.

## **2.5.3. 10 U.S.C. § 2403**

### **Major weapon systems: contractor guarantees**

#### **2.5.3.1. Summary of the Law**

This section requires that the head of an agency may not enter into contracts for weapon systems unless the contractor provides a written guarantee. This guarantee must provide that the item will conform to design and manufacturing requirements, will be free from all defects in materials and workmanship, and will conform to essential performance requirements. If the product fails to conform to the guarantee, the contractor will either take corrective action necessary to correct the failure or pay the costs reasonably incurred by the United States in taking corrective action. The head of an agency cannot require a guarantee from a prime contractor for a weapon system or component that is supplied by the United States. The Secretary of Defense may waive these guarantees, provided that the waiver is necessary in the interest of national defense or if the guarantee would not be cost effective. The Secretary of Defense may not delegate this waiver authority to anyone below the level of Assistant Secretary of Defense or Assistant Secretary of a military department.

Before the Secretary of Defense makes a waiver for a weapon system that is a major defense acquisition program, the Committees on Armed Services and Appropriations of the Senate and House of Representatives must be notified in writing of the Secretary and the reasons therefor. The Secretary of Defense also must submit a report on all waivers made in the preceding calendar year on weapon systems that are not major defense acquisition programs with explanations as to why those waivers were granted.

The guarantee is required only for those weapon systems that are in mature full-scale production; however, the Secretary of Defense is not prohibited from negotiating for a similar guarantee on weapon systems not yet in full-scale production. Notwithstanding the provisions of this statute, the head of an agency is not prohibited from negotiating the specific details of the guarantee, including requiring that a component supplied by the United States be properly installed by the contractor so that the guarantee is not compromised, reducing the price of a contract to take into account a payment for corrective action, exempting the amount of production by a second source contractor equivalent to the first one-tenth of the eventual total production by the second source contractor from these requirements, and using written guarantees to a greater extent than required by this statute. Finally, the section requires the Secretary of Defense to promulgate regulations to carry out this statute and exempts the Coast Guard and the National Aeronautics and Space Administration from its provisions.

### 2.5.3.2. Background of the Law

This statute was passed in 1984 as part of the Department of Defense Authorization Act of 1985.<sup>1</sup> Although Congress had previously passed a warranty provision applicable to the military departments,<sup>2</sup> problems were perceived in its use. In the passage of the previous provision, Congress had anticipated that the warranty situation of each contract would be negotiated on an individual basis.<sup>3</sup> Congress determined, however, that the military departments had not been negotiating the warranty provisions in the manner anticipated.<sup>4</sup> Instead, the general approach of the military departments had been to specify a warranty clause and require that it be included in the contract.<sup>5</sup> The warranty law "was never intended to create this type of simplistic, mechanistic approach to defense contracting."<sup>6</sup>

Congress agreed that there should be enough flexibility to give DOD the authority to craft "specific warranties to consider the formulation of exclusions or limitations to address situations where a contractor has not designed a system."<sup>7</sup> DOD should be able to narrow the scope of the warranty clause if it would be inequitable to apply the full warranty to a contractor with limited design involvement.<sup>8</sup>

Congress noted that virtually no warranty exemptions had been issued in the years since the previous warranty provision had been passed.<sup>9</sup> It stated that the Committees on Armed Services had never intended to require warranties if they were not cost effective.<sup>10</sup> Congress also expressed the concern that there had been a lack of communication between the military departments and their field personnel about "the appropriate implementation of Congressional guarantee language and its inherent flexibility."<sup>11</sup> With the passage of this new warranty provision, Congress believed that the new sections would give the military the inherent flexibility to negotiate guarantees on a case-by-case method, including the authority to negotiate reasonable exclusions, limitations, and time durations.<sup>12</sup>

### 2.5.3.3. Law in Practice

Two recent studies have been done on the effectiveness of weapon system warranty implementation in DOD. The first was done by MKI, Inc. for the Defense Systems Management

---

College.<sup>13</sup> This study stated that the three functions served by a warranty are: to assure DOD that it receives a product free from design, manufacture, or structural defects; to motivate the contractor to produce defect-free products; and to insure DOD against the risks of repair or replacement.<sup>14</sup> It also examined the different kinds of warranties in use today within DOD. The "zero-defects warranty" is the most conventional form of warranty and envisions a failure free product.<sup>15</sup> The "expected failure warranty" is a type of assurance warranty wherein a breach occurs only after a specified number of failures have occurred.<sup>16</sup> The "systemic warranty" is more connected to the basic design of the product than the other two types of warranty. It defines a "systemic defect" in the product as:

one which occurs with a frequency, sameness, or pattern to indicate a logical regularity which exceeds predicted failure rates. When a systemic defect is detected, the Government presumes that all weapon systems produced under like circumstances are similarly defective and require replacement or correction on a fleet-wide basis.<sup>17</sup>

The study noted many problems with the warranty programs in use within DOD today. It stated that "[p]rogram managers tend to view warranties from the perspective of small individual consumers instead of monopsonistic industrial buyers."<sup>18</sup> This is a faulty position, because most consumers believe that a product under warranty will not fail during the warranty period, and most consumer warranties are based upon competitive market consideration.<sup>19</sup> On the other hand, a weapon system warranty is dictated by the customer, the Government, and envisions the ultimate failure of the product.<sup>20</sup> The study also found that the current guidance available to program managers "does not succinctly and specifically enumerate real-world problems which program managers must overcome to successfully structure, implement, and administer warranties."<sup>21</sup> Moreover, warranty programs rely on effective administration and, at the time of passage of this statute, Congress did not provide funding for administration.<sup>22</sup>

The study noted that all warranties are dependent upon their duration, and "many weapon system warranties are too short to be effective."<sup>23</sup> The warranty period should be long enough to allow the field operations to determine the effectiveness of the product.<sup>24</sup> It also stated that "[w]aiver requests are not seriously considered as proposed warranty options by procurement activities. To date, the use of waivers, which should have been extensive, has been virtually

---

nil."<sup>25</sup> Although this particular study did not give specific recommendations to combat this problem, the industry representative at the Defense Systems Management College stated that the majority of the sources used in this study argued that the best solution to the warranty problem would be to repeal the statute.<sup>26</sup> If this recommendation is not feasible, the sources recommended that the waiver authority should be used much more often.<sup>27</sup> Instead of trying to justify the use of a waiver, they recommend instead that the Government should have to justify the use of the warranty.<sup>28</sup> In assessing the granting of a waiver, the Government should examine whether the warranty would be cost effective, whether it would have a meaningful performance in the program, and whether the use of the warranty in the field would be justified.<sup>29</sup> If this assessment determines that a warranty should not be used, the burden of proof should then shift to the Office of the Secretary of Defense to prove the usefulness of the warranty.<sup>30</sup> If the recommendation to use waivers more often is not feasible, the sources recommend that affirmative language should be added to the statute to make it easier to obtain a waiver.<sup>31</sup>

The second study was done by the Office of the Deputy Director for Defense Systems Procurement Strategies in the Office of the Under Secretary of Defense for Acquisition.<sup>32</sup> This study was done to review the current administration of warranties within DOD.<sup>33</sup> The study concluded that effective administration was the primary way to ensure effective warranty coverage and noted two General Accounting Office studies in 1987 and 1989 that criticized DOD's ability to effectively administer warranties.<sup>34</sup> The study also looked at the statute's implementation in DFARS subpart 246.7, and in the service regulations for the Army, Air Force, and Navy.<sup>35</sup> The Services were asked to provide current contracts containing warranties for review in this study.<sup>36</sup> Two case studies each were provided by the Army, Air Force, and Navy.<sup>37</sup>

After examining the case studies provided by the Services and the guidance in the regulations, the study reported the following findings:

- "Contractor expenses for warranty repairs were less than the negotiated price for warranty in 4 out of 5 cases."<sup>38</sup>

<sup>38</sup>*Id.* at 24.

- 4 out of 5 cases reported a significant number of warranty claims that were determined to be open or non-valid.<sup>39</sup> One of the case studies seems to suggest that the reasons for the large number of open or non-valid cases is the "administrative problems of the government" and the "inherent difficulties of determining claim coverage."<sup>40</sup>

- Of the seven contracts that contained a threshold requirement that had to be fulfilled before the warranty became effective, only two ever reached the threshold. "The examples highlight the difficulties in establishing warranty thresholds. Warranty claim data bases should be considered when establishing thresholds."<sup>41</sup>

- In contracts with systemic warranties, no claims have been submitted, which makes the Services' ability to monitor systemic defects suspect.<sup>42</sup>

- "Warranty provisions were negotiated that did not consider the data capabilities of the existing supply and maintenance systems."<sup>43</sup>

- Of all the cases studied, the Navy's SM-2 program had the strongest warranty administration system, but claims were made on only approximately 1% of the total missile sections.<sup>44</sup>

- "Fundamental problems exist with the Air Force's warranty tracking system."<sup>45</sup>

- The Service regulations requiring post award reviews of warranty cost effectiveness are not being implemented by the Services.<sup>46</sup>

The study stated that, while individual case studies are not conclusive, they collectively point to a trend of difficulties and deficiencies in the warranty administration systems of the Services.<sup>47</sup> It also noted a clear indication that the warranty benefits negotiated for Government contracts are not being fully realized.<sup>48</sup> It recommends that this statute be repealed.

The Office of the Deputy Assistant Secretary of the Air Force (Contracting) supports the conclusions reached in the study performed for the Office of the Under Secretary of Defense for Acquisition.<sup>49</sup> It notes another study performed by the Air Force Logistics Management Center (AFLMC)<sup>50</sup> that confirmed that the Air Force does not have the "data systems designed to track warranted items. Compounding this problem was the lack of necessary manpower resources in the field and in the Program Offices for accomplishing warranty administration."<sup>51</sup> This study suggested alternative warranty administration approaches including using contractor support in establishing a warranty management system and obtaining warranties that can be managed through the use of existing data systems and measured with data obtained through intensive, in-house collection efforts.<sup>52</sup> The Air Force recommends that if the warranty manager cannot use one of these three options and an effective option cannot be developed, then a warranty waiver should be prepared.<sup>53</sup> The Air Force believes that this statute, or at least the portion that mandates a weapon system warranty, should be repealed.<sup>54</sup> In the alternative, it made a number of recommendations designed to make the statute more effective.<sup>55</sup> The law could be amended to make it applicable only to major weapon systems.<sup>56</sup> DOD should promulgate a policy statement that firmly supports the waiver of warranties in cases where the cost benefit analysis clearly shows that the warranty would not be cost effective.<sup>57</sup> In an additional comment, the Office of the Deputy Assistant Secretary of the Air Force (Contracting) suggested that if a cost benefit analysis shows a warranty is not cost effective, and the contracting officer includes sufficient supporting documentation in the contract file, the warranty requirement and Congressional notification requirement should be waived.<sup>58</sup>

In a memorandum, the Headquarters Air Force Materiel Command, Directorate of Program Support, noted that the overall intent and purpose of the warranty statute is working, but problems have been identified.<sup>59</sup> It believes that the requirements for congressional notification and waiver authority have stifled attempts to waive the warranty where it would not be cost effective. The AF Materiel Command Program Support Directorate also noted that the Air Force submits few requests for waivers because of this difficult process. It contends that the

<sup>58</sup>Memorandum from Col. Lloyd T. Watts, Jr., USAF, Chief Systems & Logistics Contracting Division, Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Department of the Air Force (Oct. 4, 1992).

<sup>59</sup>Memorandum by M.E. Smalling, Director, Program Support, Headquarters Air Force Materiel Command, to Stuart Hazlett (Sept. 16, 1992).

approval of waivers at a lower authority level, the Head of the Contracting Activity, for instance, would allow for more waivers where the warranty is not cost effective. An acquisition staff analyst of AF Materiel Command argues that while the intent of the statute is valid, "the implementation is severely lacking." To improve this situation, he recommends improving the guidance for conducting warranty cost benefit analyses.<sup>60</sup> He further contends that the cost of the warranty only provides a marginal benefit, and the relationship of the warranty to the specifications is often unclear.<sup>61</sup> The analyst believes that the "existing FAR warranty clauses and correction of defects clauses, along with latent defects and performance provisions are often adequate to preclude the need for a special weapon systems warranty clause,"<sup>62</sup> and recommends that the law be amended to raise the contractor liability limits so that the contractor bears more of the risk of the warranty.

The Navy also agreed with the conclusions reached by the study performed for the Office of the Under Secretary of Defense for Acquisition.<sup>63</sup> The Navy noted that half of its major buying commands had supported a total repeal of this statute while the other half supported an amendment to permit flexibility in the application of future warranties.<sup>64</sup> The Navy took the position that this statute should be repealed.<sup>65</sup> On the other hand, the Army did not agree with the study's conclusions.<sup>66</sup> It contends that warranties offer tangible and intangible benefits, including promoting "product quality improvements which make costly warranty repairs unnecessary."<sup>67</sup> The Army contends that although there are significant problems with the current administration of warranties, they do serve a valid purpose.<sup>68</sup>

The Inspector General of the Department of Defense (DODIG) commented that it believes that this law is serving its intended purpose, is still relevant, has not created inefficiencies, and is required for the continuing financial and ethical integrity of the DOD procurement process.

#### **2.5.3.4. Recommendation and Justification**

##### **Repeal 10 U.S.C. § 2403 requiring contractor guarantees on major weapons systems.**

The Panel recommends that this section be repealed. Although the DODIG and the Army have commented that this statute is serving its intended purpose, the results of the two studies cited above and the other numerous comments received show significant problems in the

<sup>66</sup> Memorandum from George E. Dausman, Deputy Assistant Secretary of the Army (Procurement), Department of the Army to Director of Defense Procurement, Office of the Under Secretary of Defense (Acquisition) (Oct. 20, 1992).

<sup>67</sup> *Id.*

<sup>68</sup> *Id.*

administration and effectiveness of weapon system warranties in every branch of DOD. The problems the Services are experiencing not only cause serious administrative burdens on the Government but can make the warranties of very limited value, because the Government is not always able to make successful warranty claims. Also, the reluctance of DOD to issue warranty waivers fosters the use of warranties without regard to their cost effectiveness.

The Panel believes that warranties would be much more effective if the law permitted more flexible implementation and tailoring to program specific needs. In this way, the Services could purchase effective warranties or make other arrangements when warranties would not be cost effective. By this recommendation, the Panel is not suggesting that warranties unnecessary in all cases, but that they should be used only when appropriate. The Panel recommends that clear, specific guidance should be included in the regulations governing purchase of warranties and issuance of waivers.

As an alternative, the Panel recommends that this section be revised to address problems associated with its implementation.

In 1984, Congress had noted that the military departments were not negotiating warranty provisions but mandating their inclusion in procurement contracts. Even though Congress had stated that it intended waivers to be given if the warranties would not be cost effective, virtually no waivers had been issued. It also found that the regulatory implementation of the provision should provide better guidance to the field personnel. It is clear from the comments received that the problems that Congress noted at the passage of this statute in 1984 appear to still exist today, and the flexibility Congress attempted to build into the statute has not solved these problems. The Panel believes that waivers must be more readily available in the acquisition process for those instances where a warranty would not be cost effective. To this end, the Panel recommends that the approval of waivers be at a much lower level. Vesting the waiver authority in a lower level official will help expedite waiver approval. The Panel also agrees that DOD should promulgate a policy statement supporting the use of waivers when a warranty would not be cost effective and should actively encourage the use of waivers in any further implementation or guidance.

The Panel believes that the warranty program must be improved if it is to be used with any measure of cost effectiveness. The Panel concurs that the measures suggested in the AFLMC study would greatly improve the present warranty administration system. The Panel also agrees with the Office of the Deputy Assistant Secretary of the Air Force for Acquisition that warranties should be limited to major weapon systems. These two suggestions should focus the administration system on those large contracts where warranties would be most effectively employed. While the Panel still believes that the best course of action would be to repeal this statute, the above recommendations, if accepted, can make significant improvements to the statute as drawn.

#### **2.5.3.5. Relationship to Objectives**

This recommendation promotes the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. This

recommendation eliminates a provision of the Code that practice has shown to be cumbersome and not cost effective.

## **2.5.4. 10 U.S.C. § 4534**

### **Subsistence supplies; contract stipulations; place of delivery change and reclamation**

#### **2.5.4.1. Summary of the Law**

Each contract for subsistence supplies for the Army that is made on public notice must provide for complete delivery, on inspection, at a specified place.

#### **2.5.4.2. Background of the Law**

This section was originally passed in 1818<sup>1</sup> and has changed little since that time. There was no specific mention of this section in the history of the law. Subsequent amendments in 1835<sup>2</sup> and 1861<sup>3</sup> were technical. An amendment in 1950 expanded the application of the statute to the newly created Air Force.<sup>4</sup> This amendment did not change the actual language of the statute. The law was codified in 1956<sup>5</sup> and no further amendments have been made. At the time of codification, the statute was placed in two parts of Title 10: 10 U.S.C. § 4534, which applies to the Army, and a duplicate provision at 10 U.S.C. § 9534, which applies to the Air Force.

#### **2.5.4.3. Law in Practice**

The Office of the Inspector General of the Department of Defense (DODIG) notes that it found no relevant recent cases, and neither the Federal Acquisition Regulation (FAR) nor the Defense Federal Acquisition Regulation Supplement (DFARS) cites this provision.<sup>6</sup> The DODIG did mention that this law seems to provide "legal basis for a number of FAR clauses (37 to be exact) dealing with contracting for and inspection of subsistence supplies, e.g. FAR Subpart 5.202(a)(9) providing an exception to synopses and notice for perishable subsistence supplies, and FAR Subpart 46.4, providing for inspection of condition and quality of perishable subsistence supplies at points of embarkation vice destination, etc."<sup>7</sup> The DODIG concludes, therefore, that this law is still relevant and serves an important function in the acquisition process.<sup>8</sup> It did note, however, an overlap in authority between this law and 10 U.S.C. § 9534, which contains the same language, except that section 9534 applies to the Air Force and section 4534 applies to the Army.<sup>9</sup> The DODIG recommends combining these provisions into a single statute.<sup>10</sup>

<sup>5</sup>Act of August 10, 1956, ch. 1041, 70A Stat. 254.

<sup>6</sup>Letter from Derek Vander Schaaf, Deputy Inspector General, Office of the Inspector General of the Department of Defense to Diane Sidebottom, Acquisition Law Task Force, Defense Systems Management College (July 1, 1992).

<sup>7</sup>*Id.*

<sup>8</sup>*Id.*

<sup>9</sup>*Id.*

<sup>10</sup>*Id.*

The Defense Contract Management Districts Mid-Atlantic (DCMDM), West (DCMDW) and North Central (DCMDNC) all stated that this law is unnecessary and should be repealed.<sup>11</sup> The Defense Personnel Support Center (DPSC) also recommended repeal.<sup>12</sup> DPSC, part of the Defense Logistics Agency, purchases subsistence supplies for the Army as well as the other services. DPSC noted that it commonly uses FAR subpart 52.247-49, which provides for delivery to an unspecified location and, therefore, conflicts with the language of 10 U.S.C. § 4534.<sup>13</sup>

#### **2.5.4.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that this section be repealed. The issue of the place of delivery of subsistence supplies is addressed in the regulations. The DODIG is correct that there are numerous FAR provisions that discuss subsistence supplies and their inspection and delivery; however, none of these regulations appears to be based upon this statute and each would continue to be in effect were this statute repealed. This section appears to be obsolete and has since been supplanted by more useful authority in the regulations.

#### **2.5.4.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. This recommendation also helps to eliminate statutes that have outlived their usefulness and are no longer used within DOD.

## **2.5.5. 10 U.S.C. § 9534**

### **Subsistence supplies; contract stipulations; place of delivery**

#### **2.5.5.1. Summary of the Law**

Each contract for subsistence supplies for the Air Force that is made on public notice must provide for complete delivery, on inspection, at a specified place.

#### **2.5.5.2. Background of the Law**

This section was originally passed in 1818<sup>1</sup> and has changed little since that time. There was no specific mention of this section in the history of the law. Subsequent amendments in 1835<sup>2</sup> and 1861<sup>3</sup> were technical and amendment in 1950 only amended the statute to include the newly created United States Air Force.<sup>4</sup> The law was codified in 1956<sup>5</sup> and no further amendments have been made.

#### **2.5.5.3. Law in Practice**

The Office of the Inspector General of the Department of Defense (DODIG) notes that it found no relevant recent cases, and neither the Federal Acquisition Regulation (FAR) nor the Defense Federal Acquisition Regulation Supplement (DFARS) cite these provisions. The DODIG did mention that this law seems to provide "legal basis for a number of FAR clauses (37 to be exact) dealing with contracting for and inspection of subsistence supplies, e.g., FAR 5.202(a)(9) providing an exception to synopses and notice for perishable subsistence supplies, and FAR Subpart 46.4, providing for inspection of condition and quality of perishable subsistence supplies at points of embarkation vice destination, etc." The DODIG concludes, therefore, that this law is still relevant and serves an important function in the acquisition process. It did note, however, a duplication of authority between this law and 10 U.S.C. § 4534, which contains the exact language as in 10 U.S.C. § 9534, except that section 9534 applies to the Air Force and section 4534 applies to the Army. The DODIG recommends combining these provisions into a single statute.

The Defense Contract Management District Mid-Atlantic (DCMDM) and West (DCMDW) both stated that this law is unnecessary and should be repealed. The Defense Personnel Support Center (DPSC) also recommended repeal. DPSC commented that it was unaware that this law even existed. It noted that it commonly uses FAR clause 52.247-49 which provides for delivery to an unspecified location and conflicts with the language of 10 U.S.C. § 9534.

<sup>1</sup> Act of April 14, 1818, ch. 61, § 7, 3 Stat. 426, 427.

<sup>2</sup> Act of March 3, 1835, ch. 49, § 1, 4 Stat. 780.

<sup>3</sup> Act of March 2, 1861, ch. 84, § 10, 12 Stat. 214, 220.

<sup>4</sup> Act of June 28, 1950, ch. 383, § 402(a), 64 Stat. 272, 277.

<sup>5</sup> Act of August 10, 1956, ch. 1041, 70A Stat. 254.

#### **2.5.5.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that this section be repealed. The agencies that would be potentially affected by this statute have stated that this statute is unnecessary. The issue of the place of delivery of subsistence supplies is addressed in the regulations. The DODIG is correct that there are numerous FAR provisions which discuss subsistence supplies and their inspection and delivery; however, none of these regulations appears to depend upon this statute and each would continue to be in effect if it were repealed. While the DODIG correctly notes that this statute duplicates authority in 10 U.S.C. § 4534 and recommends their consolidation, the entities that buy these supplies argue that neither of these statutes is currently used, but that they follow the guidance given in the regulations. DPSC stated that it has found the authority in the FAR most useful. This section appears to be obsolete and has since been supplanted by more useful authority in the regulations. The Panel recommends that this section be repealed in favor of the FAR coverage.

#### **2.5.5.5. Relationship to Objectives**

This recommendation satisfies the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication of authority present in the procurement process by repealing statutes, the substance of which has been addressed in the current regulations. This recommendation also helps eliminate statutes that have outlived their usefulness and are no longer used within DOD.

## 2.5.6. 15 U.S.C. §§ 1535 - 1536

### Economy Act<sup>1</sup>

#### 2.5.6.1. Summary of the Law

15 U.S.C. § 1535 permits the head of an agency to purchase goods or services from another agency if the goods or services are available and the head of the agency determines that the purchase is in the best interests of the Government and cannot be obtained as conveniently or cheaply from a commercial source. Payment for these goods and services may be made in advance, on delivery, or on the written request of the agency filling the order. An order made between agencies obligates an appropriation of the ordering agency. This obligation is released if the agency filling the order does not incur obligations in either providing or contracting for the goods and services. This section does not permit the placement of orders for goods or services to be made by convict labor, nor does it affect other statutes addressing working funds.

15 U.S.C. § 1536 requires that an advance payment made on an order under the Economy Act (15 U.S.C. § 1535) be credited to a special working fund that the Secretary of the Treasury considers necessary to be established. Any other payment is credited to the appropriation or fund against which charges were made to fill the order. An amount paid under the Economy Act may be expended in providing goods or services, or for a purpose specified for the appropriation or fund credited. Where goods are provided from stocks on hand, the amount received in payment is credited so as to be available to replace the goods, unless another law authorizes the amount to be credited to some other appropriation or fund or the head of the executive agency filling the order decides that replacement is not necessary, in which case the amount received is deposited in the U.S. Treasury as miscellaneous receipts. This statute does not affect other laws governing agency funds and accounts.

#### 2.5.6.2. Background of the Law

These statutes were originally enacted in 1920<sup>2</sup> and are jointly and more commonly known as the Economy Act. Congress stated that this provision was meant to facilitate the interagency transfer of money to be directly used for interagency work orders.<sup>3</sup> Previously, such transfers could only be made through the reimbursement of appropriations.<sup>4</sup> Technical amendments have been made to these statutes over the years, and they were codified in 1982.<sup>5</sup>

---

<sup>1</sup>The Economy Act includes:

15 U.S.C. § 1535 - Agency agreements

15 U.S.C. § 1536 - Crediting payments from purchases between executive agencies

<sup>2</sup>Act of May 21, 1920, ch 194, § 7(a)-(c), 41 Stat. 607, 613.

<sup>3</sup>H.R. REP. NO. 814, 66th Cong., 2d Sess 5 (1920).

<sup>4</sup>*Id.*

<sup>5</sup>Act of September 13, 1982, Pub. L. No. 97-258, 47 Stat. 933-934.

### **2.5.6.3. Law in Practice**

The Economy Act is implemented in subpart 17.5, "Interagency Acquisitions Under the Economy Act,"<sup>6</sup> of the FAR and is referenced in the policy section of FAR subpart 42.1, "Interagency Contract Administration and Audit Services."<sup>7</sup> No comments were received on either of these statutes.

### **2.5.6.4. Recommendation and Justification**

#### **No Action**

The Panel took no action these statutes. The Economy Act does not present a core acquisition issue and only has an indirect relationship to contracting with the civilian sector. The Panel believes that while this statute is tangentially related to DOD acquisition, it is not appropriate for action by the Panel.

### **2.5.6.5. Relationship to Objectives**

Action on these statutes would not specifically promote the objectives of the Panel.

<sup>6</sup>48 C.F.R. 17.5.

<sup>7</sup>48 C.F.R. 42.1.

## **2.5.7. 31 U.S.C. § 6306**

### **Authority to vest title in tangible personal property for research**

#### **2.5.7.1. Summary of the Law**

This statute permits the head of an agency to vest title in tangible personal property in a nonprofit institution of higher education or a nonprofit organization whose primary purpose is conducting scientific research, provided the property is purchased with funds provided under a cooperative agreement, procurement contract, or grant agreement with the institution or organization. The statute also permits the agency to vest title when doing so will further the objectives of the agency, is under conditions the head of the agency deems appropriate and is without further obligation to the U.S. Government.

#### **2.5.7.2. Background of the Law**

This statute was promulgated as part of the Federal Grant and Cooperative Agreement Act of 1977,<sup>1</sup> which permits the agency head to enter into contracts, grants, or cooperative agreements with nonprofit institutions and organizations and to vest title to tangible personal property purchased with contract, grant, or cooperative funds in those nonprofit institutions or organizations.<sup>2</sup> Congress had found that many agencies were encountering problems if the choice of contractual instrument to be used was limited, by statute, to a particular instrument.<sup>3</sup> Congress intended to give agencies the necessary flexibility in their relationships with non-Federal entities by permitting them to choose one or all three enumerated types of instruments.<sup>4</sup> This statute superseded any existing statutes that required the use of a particular implementation instrument.<sup>5</sup>

Congress also intended to permit the agencies to vest title in tangible personal property purchased under the applicable agreement in the nonprofit institution or organization; however, a limit was placed on this authority.<sup>6</sup> It stated that this provision was not intended "to preclude or inhibit the executive branch from developing Government-wide executive guidance on the use and application of such authority."<sup>7</sup>

#### **2.5.7.3. Law in Practice**

This statute has been partially implemented in the Federal Acquisition Regulation (FAR), sections 35.014<sup>8</sup> and 52.245-15.<sup>9</sup> While much of the authority contained in this statute has been

---

<sup>1</sup>Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95-224, § 7, 92 Stat. 1, 5 (1978).

<sup>2</sup>S. REP. NO. 449, 95th Cong., 2d Sess. 11 (1978), *reprinted in* 1978 U.S.C.C.A.N. 11, 20.

<sup>6</sup>*Id.* at 11.

<sup>7</sup>*Id.* at 11.

<sup>8</sup>48 C.F.R. 35.014

included in these two regulations, they do not fully address the provisions of the statute and, in fact, refer the user back to the statute itself. The only comment received on this statute was from the Office of the Inspector General of the Department of Defense (DODIG).<sup>10</sup> The DOD IG stated that this statute provides the necessary statutory authority required to support the policies and procedures found in the Office of Management and Budget (OMB) Circular A-110, "Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations."<sup>11</sup> The DODIG also noted that it believes this statute is still relevant, has prevented inefficiencies, and promotes financial and ethical integrity.<sup>12</sup>

#### **2.5.7.4. Recommendation and Justification**

##### **Retain 31 U.S.C. § 6306.**

The Panel recommends that this statute be retained. The complete authority is contained only in the statute and has not yet been fully implemented in the regulations. The Panel believes that this statute has a necessary function in the defense acquisition process.

#### **2.5.7.5. Relationship to Objectives**

This recommendation helps to facilitate Government access to commercial technologies and skills available in the commercial marketplace. By giving the agencies flexibility in contracting and discretion in assisting nonprofit research institutions and organizations through the transfer of tangible personal property, this statute enables the Government to maintain open and cordial relationships with these entities and to obtain necessary scientific information.

---

## **2.5.8. 41 U.S.C. § 15**

### **Transfers of contracts; assignments of claims; set-off against assignee**

#### **2.5.8.1. Summary of the Law**

This statute prevents the transfer or assignment of a contract or claim by the contractor to anyone. Such a transfer shall cause the contract or claim against the United States to be nullified. The United States, however, retains all rights of action for breach of contract. There is an exemption, however, enabling contractors to assign only the right to payment under the contract in order to obtain contract financing. To qualify for the exemption, the contract must provide for payments aggregating \$1000 or more, which may be assigned only to a bank, trust company, or other bona fide financing institution. The contract cannot be assigned to more than one party and cannot be reassigned thereafter, and the assignee must file written notice of the assignment with a true copy of the assignment instrument with certain specified officials.

The statute also provides that, once assigned, no liability of the assignor to the United States shall create or impose any liability on the assignee to make restitution or repayment. Any agency designated by the President may, in times of war or national emergency, provide in the contract that any payments made to the assignee shall not be subject to set-off or reduction. In contracts containing a clause eliminating set-off or reduction, the assignee is not responsible for any liability of the assignor to the United States that arises as a result of renegotiation, fines, penalties, taxes, social security contributions, or withholding violations.

#### **2.5.8.2. Background of the Law**

This statute was originally enacted in 1862 as a prohibition on the transfer of contracts.<sup>1</sup> It was subsequently amended in 1940 to permit the assignment of claims under specific circumstances.<sup>2</sup> Congress noted that the previous statute addressing the assignment of claims was so strictly worded and interpreted that an assignment had to conform exactly with the requirements of the statute or be held void, even if the assignment conferred no rights to the assignee.<sup>3</sup> As a result, banks and other lending institutions that might have been willing to provide financing for the performance of Government contracts were unable to rely on assignments of claims or payments under the contract as security.<sup>4</sup> Congress felt that many small businesses were unable to bid on Government accounts because of a resulting inability to obtain financing.<sup>5</sup> Congress believed that this statute would enable contractors to obtain financing from private sources.<sup>6</sup>

<sup>1</sup> Act of July 17, 1862, ch. 200, § 14, 12 Stat. 594, 596.

<sup>2</sup> Assignment of Claims Act of 1940, ch. 779, § 1, 54 Stat. 1029, 1030.

<sup>3</sup> H.R. REP. NO. 2925, 76th Cong., 3d Sess. 2 (1940).

<sup>4</sup> *Id.*

<sup>5</sup> *Id.*

<sup>6</sup> *Id.*

The final amendment to this statute was in 1951.<sup>7</sup> This Act was passed to "encourage the participation of banks and lending institutions in the financing of Government contractors."<sup>8</sup> A number of Comptroller General decisions after World War II had undermined the position of the assignee to collect money due under the contract if there were no other forms of collateral available.<sup>9</sup> These decisions permitted the withholding of payments to the assignee should there be a price revision and allowed set-off by the Government for claims against the assignor for unpaid taxes and social security withholdings.<sup>10</sup> These and other decisions deterred banks from accepting assignments of claims as collateral, seriously undermined the V-loan program in effect at the time, and interfered with the ability of small businesses to bid on Government contracts.<sup>11</sup> Congress extended the protection for set-off to include the types of situations seen in the cases at the time and extended the applicability of the provision to the General Services Administration, the Atomic Energy Commission, and other agencies the President may designate.<sup>12</sup> Originally, this provision had been limited to the military departments.<sup>13</sup> No further amendments have been made to this statute.

This statute is referenced in 50 U.S.C. § 1651, "Other law, powers and authorities conferred thereby, and actions taken thereunder; Congressional studies." This statute, and those preceding it, was enacted as part of the National Emergencies Act of 1976 that provided for the termination of existing national emergencies and for the procedures to be followed in declaring and terminating future national emergencies.<sup>14</sup> Section 1651 exempts certain statutes from the provisions of the National Emergencies Act including 41 U.S.C. § 15.

### 2.5.8.3. Law in Practice

The authority contained in the statute is also fully implemented in the FAR subpart 32.8<sup>15</sup> and in the DFARS 232.803-806.<sup>16</sup> Many recent cases have cited this law with approval. In *Monchamp Corp. v. United States*, 19 Cl. Ct. 797 (1990), the Claims Court succinctly explained the purpose of this law:

[T]he statute is intended for the benefit of the Government and serves two purposes: first, to prevent persons of influence from buying up claims against the United States, which might then be properly urged upon officers of the Government; and second, to

<sup>7</sup>Assignment of Claims Act of 1940 Amendment, ch. 75, 65 Stat. 41, 42 (1951).

<sup>16</sup>48 C.F.R. 232.803-806.

enable the United States to deal exclusively with the original claimant instead of several parties.<sup>17</sup>

The Office of the Inspector General of the Department of Defense (DODIG) believes that the authority in this statute is necessary and should be retained.<sup>18</sup> It notes that the law is relevant in the current acquisition environment, does not overlap with other laws, and promotes efficiency in the procurement process.<sup>19</sup> Reaching an opposite conclusion, the Council of Space and Defense Industry Associations (CODSIA) commented that this law has created inefficiencies, is outdated, and overlaps 31 U.S.C. § 3727.<sup>20</sup> 31 U.S.C. § 3727 provides for the assignment of claims against the U.S. Government when the claim has been allowed and a warrant for payment has been issued. This statute also includes provisions protecting the assignee from set-offs. CODSIA also believes that there have been interpretation problems that have led to much litigation.<sup>21</sup>

The Defense Logistics Agency Defense Contract Management District South (DCMDS) also noted that this statute overlaps 31 U.S.C. § 3727 and recommended some coordination between the two.<sup>22</sup> DCMDS also commented that there is no definition of "financing institution" in 41 U.S.C. § 15 and recommended that there should be a definition or some guidelines for determining a financial institution.<sup>23</sup>

#### **2.5.8.4. Recommendations and Justification**

**Amend the Assignment of Claims Act, 41 U.S.C. § 15, to delete the subsection which prohibits set-off against assignees only during times of declared war or national emergency.**

The Panel recommends that that portion of 41 U.S.C. § 15 which limits the prohibition subjecting an assignee of a contract or claim against the Government to a reduction or set-off to times of war and national emergency be deleted. The Panel believes that this prohibition against reduction or set-off should be applicable at all times and to all contracts that are governed by this statute. In the period between the late 1940s and the early 1980s, Congress passed almost yearly declarations of national emergency; thus, this statute was continually in effect; however, in the early 1980s, the declaration was suspended. Congress had included this statute on a list of those applicable only during times of war or national emergency that would remain binding law without

<sup>23</sup>*Id.*

declaration of either.<sup>24</sup> The Panel believes that this authority should not be dependent on declarations of war or national emergency and recommends that such a contingency be deleted from the statute. In a recent amendment to the Defense Production Act, Congress expanded its applicability to include both times of national emergency and the determination by the President that use of the authority is necessary.<sup>25</sup> The Panel believes that Congress has recognized that some statutory authority, previously reserved for times of war or national emergency, should be available in peacetime as well. The Panel recommends that the authority contained in 41 U.S.C. § 15 follow this trend.

The Panel recommends that this statute be otherwise retained. Throughout its long history, this statute has consistently served the purpose Congress intended. This provision has been favorably cited in numerous cases, many of them recently. Indeed, the history of the law has shown its positive impact on the small business community. 41 U.S.C. § 15 contains authority that is not found elsewhere in the Code. Although there is some overlap between this law and 31 U.S.C. § 3727, 31 U.S.C. § 3727 is limited to contracts and has specific authority. For this reason, and the fact that this statute is not limited in application to DOD, the Panel believes it would be in the Government's best interests to retain the remainder of this statute.

#### **2.5.8.5. Relationship to Objectives**

This recommendation promotes the purchase of commercial or modified-commercial products and services by DOD at or based on commercial market prices by permitting commercial entities to continue to make use of existing relationships and practices with financing institutions. It also promotes the participation of small businesses in the defense acquisition process by retaining the authority they need to obtain necessary financing.

#### **2.5.8.6. Proposed Statute**

##### **§ 15. Transfers of contracts; assignments of claims; set-off against assignee**

(a) No contract or order, or any interest therein, shall be transferred by the party to whom such contract or order is given to any other party, and any such transfer shall cause the annulment of the contract or order transferred, so far as the United States is concerned. All rights of action, however, for any breach of such contract by the contracting parties, are reserved to the United States.

(b) The provisions of ~~the preceding paragraph~~ subsection (a) shall not apply in any case in which the moneys due or to become due from the United States or from any agency or department thereof, under a contract providing for payments aggregating \$1,000 or more, are assigned to a bank, trust company, or other financing institution, including any Federal lending agency. Provided:

---

<sup>24</sup>50 U.S.C. § 1651.

<sup>25</sup>Defense Production Act Amendments, Pub. Law No. 102-558, 106 Stat.4198. (1992).

~~(1) That, in the event of any contract entered into prior to October 9, 1940, claims shall be assigned without the consent of the head of the department or agency concerned;~~

(2) That, in the case of any contract entered into after October 9, 1940, no claim shall be assigned if it arises under a contract which forbids such assignment;

(3) That, unless otherwise expressly permitted by such contract, any such assignment shall cover all amounts payable under such contract and not already paid, shall not be made to more than one party, and shall not be subject to further assignment, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing;

(4) That, in the event of any such assignment, the assignee thereof shall file written notice of the assignment together with a true copy of the instrument of the assignment with

(A) the contracting officer or the head of his department or agency;

(B) the surety or sureties upon the bond or bonds, if any, in connection with such contract; and

(C) the disbursing officer, if any, designated in such contract to make payment.

(c) Notwithstanding any law to the contrary governing the validity of assignments, any assignment pursuant to this section shall constitute a valid assignment for all purposes.

(d) In any case in which moneys due or to become due under any contract are or have been assigned pursuant to this section, no liability of any nature of the assignor to the United States or any department or agency thereof, whether arising from or independently of such contract, shall create or impose any liability on the part of the assignee to make restitution, refund, or repayment to the United States of any amount heretofore since July 1, 1950, or hereafter received under the assignment.

(e) Any contract of the Department of Defense, the General Services Administration, the Atomic Energy Commission, or any other department or agency of the United States designated by the President, except any such contract under which full payment has been made, may, ~~in time of war or national emergency proclaimed by the President (including the national emergency proclaimed December 16, 1950) or by Act or joint resolution of the Congress and until such war or national emergency has been terminated in such manner,~~ provide or be amended without consideration to provide that payments to be made to the assignee of any moneys due or to become due under such contract shall not be subject to reduction or set-off.

(f) If such a provision as is described in subsection (e) of this section or one to the same general effect has been at any time heretofore or is hereafter included or inserted in any such

contract, payments to be made thereafter to an assignee of any moneys due or to become due under such contract, ~~whether during or after such war or emergency~~, shall not be subject to reduction or set-off for any liability of any nature of the assignor to the United States or any department or agency thereof which arises independently of such contract, or hereafter for any liability of the assignor on account of

(1) renegotiation under any renegotiation statute or under any statutory renegotiation article in the contract,

(2) fines,

(3) penalties (which term does not include amounts which may be collected or withheld from the assignor in accordance with or for failure to comply with the terms of the contract), or

(4) taxes, social security contributions, or the withholding or non withholding of taxes or social security contributions, whether arising from or independently of such contract.

(g) Except as herein otherwise provided, nothing in this section shall be deemed to affect or impair rights of obligations heretofore accrued.

## **2.5.9. 41 U.S.C. § 20**

### **Deposit of Contracts**

#### **2.5.9.1. Summary of the Law**

This law requires that all contracts that require the advance of money or are connected with the settlement of public accounts be deposited in the General Accounting Office. This does not apply to the existing laws in regard to the contingent funds of Congress.

#### **2.5.9.2. Background of the Law**

This law was first passed in 1798 and has been changed little since then.<sup>1</sup> In this initial enactment, Congress required that the contracts be deposited in the offices of the Comptroller of the Treasury.<sup>2</sup> The law was amended in 1894 to change the location of the deposit to the offices of the Auditor of the Treasury.<sup>3</sup> In 1921, Congress created the General Accounting Office (GAO) and transferred all duties of the Auditor of the Treasury to this new office.<sup>4</sup> The statute was codified in its current location in Title 41 in 1966<sup>5</sup> and has not been amended since then.

#### **2.5.9.3. Law in Practice**

This law has not been implemented in the federal regulations. The U.S. Attorney General issued two opinions in the 1930s exempting licenses and insurance policies from the requirements of this statute.<sup>6</sup> The Comptroller General of the United States has issued several decisions citing this statute, the most recent of which was in 1961. In 29 Comp. Gen. 576, it was decided that there were delays in the auditing of the accounts of disbursing officers and auditing the responsibilities of certifying and other accountable officers because contracts were not being forwarded to the GAO for immediate audit reference purposes.<sup>7</sup> The Office of the Inspector General of the Department of Defense (DODIG) stated that it believes that this statute has worked in the past and makes common sense.<sup>8</sup> It also noted that this statute is still relevant, does not overlap or duplicate other statutes, and is necessary to continue financial and ethical integrity.<sup>9</sup> In a preliminary review of this statute, the GAO stated that, years ago, it had delegated the retention authority contained in this statute to the executive agencies.<sup>10</sup> This delegation

permitted the agencies to maintain copies of their contracts individually with the understanding that GAO would be able to review the contracts at any time.<sup>11</sup>

#### **2.5.9.4. Recommendation and Justification**

##### **Repeal 41 U.S.C. § 20, requiring contracts to be deposited with GAO.**

The Panel recommends that this statute be repealed. The current system of permitting the executive agencies to maintain their own files, open to GAO inspection, is successful, and GAO does not have the storage space necessary to abide by the exact language of this statute. GAO would retain its contract audit capabilities without this statute through authority elsewhere in the U.S. Code.<sup>12</sup> This outdated authority is, therefore, no longer needed.

#### **2.5.9.5. Relationship to Objectives**

This recommendation satisfies the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. This recommendation also helps to eliminate statutes that have outlived their usefulness and are no longer used within the Federal Government.

## **2.5.10. 41 U.S.C. § 417**

### **Record requirements**

#### **2.5.10.1. Summary of the Law**

This law requires each executive agency to establish and maintain, for a period of five years, a computer file containing unclassified information on all procurement actions by fiscal year. The statute enumerates the necessary inclusions in this computer file and the necessity to keep separate those procurements for which only one responsible source submitted a bid or proposal. The statute also requires the transmission of this information to the General Services Administration for entry into the Federal Procurement Data System.

#### **2.5.10.2. Background of the Law**

This statute was added to the Office of Federal Procurement Policy Act of 1974 by the Deficit Reduction Act of 1984.<sup>1</sup> In 1984, Congress intended to facilitate congressional oversight of contracting activities by requiring all federal agencies to maintain computer records of all procurements, both competitive and noncompetitive.<sup>2</sup> Congress also wanted the computer records to be kept with an index to facilitate access by Congress, other agencies and the public.<sup>3</sup>

#### **2.5.10.3. Law in Practice**

This statute has been implemented in FAR subpart 4.601<sup>4</sup> and DFARS subpart 204.6.<sup>5</sup> These two regulations contain the verbatim language of the statute. The only comment received on this law was from the Office of the Inspector General of the Department of Defense (DODIG).<sup>6</sup> The DODIG stated that "open government, appropriate oversight, and continued financial and ethical integrity probably require such minimal record keeping" to be imposed on the Government.<sup>7</sup>

#### **2.5.10.4. Recommendation and Justification**

##### **Amend 41 U.S.C. § 417.**

The Panel recommends that this statute be amended to reflect the Panel's recommendation to establish a simplified acquisition threshold. As part of the Panel's deliberations on the adoption

<sup>7</sup>*Id.*

of this threshold, representatives of the small business community noted a potential loss of visibility for contract actions below the new threshold, while contract analysts voiced the same reservations over any discontinuity in the reporting of statistics at any range above the \$25,000 level. Senior DOD officials assured the Panel, however, of their desire to monitor management performance by continuing current contract reporting procedures at \$25,000. Given those assurances, there should be no loss of either policy visibility or statistical control by the adoption of the simplified acquisition threshold at the \$100,000 level. No coverage is necessary in the proposed amendment. Reporting procedures for contract actions between \$25,000 and \$100,000 can be addressed in regulations.

#### **2.5.10.5. Relationship to Objectives**

This recommendation would continue to promote financial and ethical integrity without duplicating any statutes or regulations.

#### **2.5.10.6. Proposed Statute**

##### **§ 417. Record requirements**

(a) Establishment and maintenance of computer file by executive agency; time period coverage

Each executive agency shall establish and maintain for a period of five years a computer file, by fiscal year, containing unclassified records of all procurements, other than ~~small purchases~~ ~~simplified acquisitions~~, in such fiscal year.

(b) Contents

The record established under subsection (a) of this section shall include --

(1) with respect to each procurement carried out using competitive procedures --

(A) the date of the contract award;

(B) information identifying the source to whom the contract was awarded;

(C) the property or services obtained by the Government under the procurement; and

(D) the total cost of the procurement;

(2) with respect to each procurement carried out using procedures other than competitive procedures --

(A) the information described in clauses (1)(A), (1)(B), (1)(C), and (1)(D);

(B) the reason under § 253(c) of this title or § 2304(c) of Title 10, as the case may be, for the use of such procedures; and

(C) the identity of the organization or activity which conducted the procurement.

(c) Record categories

The information that is included in such record pursuant to subsection (b)(1) of this section and relates to procurements resulting in the submission of a bid or proposal by only one responsible source shall be separately categorized from the information relating to other procurements included in such record. The record of such information shall be designated "noncompetitive procurements using competitive procedures."

(d) Transmission and data system entry of information.

The information included in the record established and maintained under subsection (a) of this section shall be transmitted to the General Services Administration and shall be entered in the Federal Procurement Data System referred to in § 405(d)(4) of this title.

## **2.6. Claims and Disputes**

### **2.6.0. Introduction**

The primary statute governing contract claims and disputes is the Contract Disputes Act (CDA), 41 U.S.C. §§ 601-613. The Panel gave extensive consideration to the CDA and other statutes that, taken together, comprise the claims and disputes process. After completing its review, the Panel concluded that major changes are not necessary. Congress has established what has proven to be a workable system for asserting claims and resolving disputes.

A central issue in any consideration of claims and disputes is the system of overlapping dispute forums and remedies established by the CDA. After denial of a contract claim by the contracting officer, a contractor may appeal to the agency board of contract appeals or directly to the U.S. Claims Court. In addition, some United States District Courts have permitted a third forum for claims not exceeding \$10,000 by asserting jurisdiction under the Little Tucker Act, 28 U.S.C. § 1346. As for the choice of forums between the Claims Court and the agency boards of contract appeals, the Panel believes it would be unwise to intervene in an intricate system that is already working. Exhaustion of administrative remedies could have been required by the Congress as it is for some other types of noncontractual claims against the Government, and this option might have been equally feasible and perhaps more logical. However, the overlap created by the CDA has not been problematic.

As for the problem of further overlapping jurisdiction in the U.S. District Courts, the Panel recommends that the exemption of contract claims contained in the Little Tucker Act be clarified. The Panel has reviewed the legislative history and the interpretive cases and reaffirmed that the Little Tucker Act confers no jurisdiction over contract claims. Were it not for the fact that some district courts have persisted in erroneously taking jurisdiction over contract disputes, the Panel would not need to consider the Little Tucker Act at all. In view of the confusion, however, the Panel is recommending appropriate clarification of 28 U.S.C. § 1346.

While not in need of major overhaul, the claims and disputes process does need fine tuning in some areas. For example, one anomaly arising out of the duplication of forums is the different time limitation on appeals. The effect of having a longer appeal period for the Claims Court is that appellants that miss the time limitation for an administrative appeal may, for that reason alone, elect to file in the Claims Court. The discrepant appeal periods do not appear to have other necessary or intended consequences, and therefore, the Panel recommends a uniform appeal period of ninety days.

Also, certification issues have consumed extensive resources at both the Claims Court and the agency boards of contract appeal, in part because of the overlap and inconsistency among three separate statutes that pertain to certification. Not only does the CDA have a certification provision at 41 U.S.C. § 605(c), but there are two additional provisions applicable to DOD: 10 U.S.C. § 2410, which governs all claims and other requests exceeding \$100,000 made under DOD contracts; and 10 U.S.C. § 2405, which applies to shipbuilding claims. Congress has very

recently amended all three statutes. In the Federal Courts Administration Act of 1992,<sup>1</sup> Congress amended the CDA to broaden the definition of who is authorized to certify contractor claims and to clarify that defects in certification do not divest the disputes forums of jurisdiction. In the National Defense Authorization Act for Fiscal Year 1993,<sup>2</sup> Congress also amended the claim certification provisions in 10 U.S.C. § 2410 and authorized the Secretary of Defense to develop implementing guidance.

The statutory certification provisions still overlap and have not been completely harmonized by the recent amendments. Congress has made significant improvements in the certification process, and further work in the regulatory arena may resolve any remaining problem areas. Following the regulatory implementation provided for by the 1993 Authorization Act, the final barrier to a uniform and simplified certification standard may be eliminated by repealing 10 U.S.C. § 2410.

10 U.S.C. § 2405 governing shipbuilding claims generated extensive debate. In the final analysis, however, the Panel concluded that little change was needed in this area. In the 1993 Authorization Act, Congress rectified a substantial problem area by allowing for waiver of the time limit for filing shipbuilding claims under certain equitable circumstances. Moreover, most of the problems identified by those who commented on this statute focus on the Navy's implementing regulation, not the statute itself.

Other Panel recommendations relating to claims and disputes include: amending 41 U.S.C. § 605 to raise the threshold for claims certification from \$50,000 to \$100,000; amending 41 U.S.C. § 608(a) to raise the cap for accelerated appeals at the boards of contract appeals from \$10,000 to \$25,000; and amending 41 U.S.C. § 605(a) to impose a six year statute of limitations for the filing of contract claims.

Other statutes that were identified as bearing indirectly on defense acquisition were not considered for action by the Panel: 31 U.S.C. § 1304 and 31 U.S.C. § 3717, governing the judgment fund and interest on claims, respectively, and 5 U.S.C. §§ 581-593, which encourages the use of alternative means of dispute resolution (ADR). ADR is available both at the Claims Court and the boards of contract appeals, but it has no unique application to DOD acquisition and does not present core acquisition issues. Nor do the judgment fund and interest provisions in Title 31 affect DOD uniquely or adversely. Therefore, the Panel chose to take no action on these statutes.

During the course of its review of all acquisition statutes, the Panel noted that there are a variety of statutes throughout the U.S. Code that contain interest rate provisions that are not consistent.<sup>3</sup> In keeping with its congressional mandate to streamline the acquisition process, the Panel believes that there should be one common interest rate applicable to all procurement-related

---

<sup>1</sup>Federal Courts Administration Act of 1992; Court of Federal Claims Technical and Procedural Improvements Act of 1992, Pub. L. No. 102-572, § 907(a) &(b), 106 Stat. 4518.

<sup>2</sup>National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 813, 106 Stat. 2452 (1993).

<sup>3</sup>For example, 10 U.S.C. § 2324, Allowable costs under defense contracts; 10 U.S.C. § 2306a, Cost or pricing data: truth in negotiations; and the Contract Disputes Act, 41 U.S.C. §§ 601-613.

statutes. The Panel did not have sufficient opportunity to develop a statutory recommendation to address this issue. However, the Panel recommends that Congress consider enacting a new statute that sets out a common interest rate to be used in the acquisition process.

## **2.6.1. 5 U.S.C. §§ 581 - 593<sup>1</sup>**

### **Alternative Means of Dispute Resolution in the Administrative Process**

#### **2.6.1.1. Summary of the Law**

This statute was enacted to encourage the use of alternate dispute resolution by the executive agencies. Section 581 defines the terms "agency," "administrative process," "alternative means of dispute resolution," "award," "dispute resolution communication," "dispute resolution proceeding," "in confidence," "issue in controversy," "neutral," "party," "person," and "roster." Section 582 permits an agency to use a dispute resolution proceeding for the resolution of an issue in controversy that relates to an administrative program, provided the parties agree to the proceeding. It also gives guidelines for when the use of dispute resolution proceedings may be inappropriate, including: when resolution of the matter is required for precedential value and the proceeding is not likely to be generally accepted as authoritative precedent; when the matter involves significant questions of Government policy and resolution by the proceeding is not likely to serve to develop recommended policy; when the resolution could result in inconsistent results concerning established policies of special importance; when the matter significantly affects persons or organizations not parties to the proceeding; when a full public record is important and the proceeding will not provide that; or when the proceeding would interfere with the agency's continued jurisdiction. This section also makes clear that dispute resolution proceedings are voluntary and merely supplement other available agency dispute resolution techniques.

Section 583 defines the term "neutral" as a permanent or temporary officer or employee of the Federal Government or any other acceptable individual. A neutral must have no conflicts of interest with the issues in controversy unless such conflict is disclosed to and agreed upon by all parties. A neutral serving as a conciliator, facilitator, or mediator serves at the will of the parties. This section also directs the Administrative Conference of the United States to establish standards for neutrals, maintain a roster of individuals who meet such standards and may serve as neutrals, enter into contracts for the services of neutrals to be used by the agencies, and develop

---

<sup>1</sup>This subchapter includes:

- 5 U.S.C. § 581 - Definitions
- 5 U.S.C. § 582 - General authority
- 5 U.S.C. § 583 - Neutrals
- 5 U.S.C. § 584 - Confidentiality
- 5 U.S.C. § 585 - Authorization of arbitration
- 5 U.S.C. § 586 - Enforcement of arbitration agreement
- 5 U.S.C. § 587 - Arbitrators
- 5 U.S.C. § 588 - Authority of arbitrator
- 5 U.S.C. § 589 - Arbitration proceedings
- 5 U.S.C. § 590 - Arbitration awards
- 5 U.S.C. § 591 - Judicial review
- 5 U.S.C. § 592 - Compilation of information
- 5 U.S.C. § 593 - Support services

procedures to assist agencies in obtaining the services of neutrals on an expedited basis. An agency may use the officers or employees of another agency as neutrals and may enter into interagency agreements for the reimbursement of the full or partial cost of the services of the employee. The section permits the agency to enter into a contract with any person on the roster established by the Administrative Conference of the United States or a roster maintained by an organization or individual. The parties may agree on compensation for the neutral that is fair and reasonable to the Government.

Section 584 discusses the confidentiality requirements of the participants in a dispute resolution proceeding. A neutral in a proceeding is prohibited from voluntarily disclosing or being compelled to disclose information or communications provided in confidence unless all parties agree to the disclosure in writing; the communication is already public knowledge; the communication must be made public by statute; or a court determines that disclosure is necessary to prevent injustice, establish a violation of law, or prevent harm to public health and safety. A party in a dispute resolution proceeding is prohibited from disclosing any information or communication, either voluntarily or compulsorily, unless the communication was made by the party seeking disclosure, all parties consent in writing, the communication has already been made public, a statute requires that the communication be made public, a court determines that the communication should be disclosed, the communication is necessary in determining the existence or meaning of an award or agreement, or the communication was provided to or was available to all parties in the proceeding. Any communication or information that is disclosed in violation of this section is inadmissible in any future proceeding relating to the issues in controversy. The parties can agree, before the proceeding begins, to alternative confidential procedures by the neutral. If a neutral receives a request for disclosure through a legal process, the neutral will attempt to notify all parties and any affected nonparty of the demand. If those notified do not offer to defend the disclosure refusal by the neutral, they will have waived their objection to the disclosure. This section does not prevent discovery or admissibility of any evidence otherwise discoverable. The disclosure prohibitions have no effect on information and data necessary to document an agreement or order; nor will they prevent the gathering of information for research or educational purposes. These prohibitions will not prevent the use of communications in a proceeding between the neutral and a party in the same proceeding.

Section 585 permits the use of arbitration as an alternative means of dispute resolution if all parties consent. This consent can be obtained either before or after the issue in controversy has arisen. Under this section, a party may agree to submit only certain issues to arbitration, or only if the award is within a certain range of possible outcomes. Any arbitration agreement setting forth the subject matter shall be in writing. The section prohibits an agency from requiring a person to consent to arbitration as a condition of entering into a contract or receiving a benefit. An officer or employee of an agency may offer to use arbitration if he/she has the authority to enter into a settlement or is authorized to consent to the use of arbitration.

Section 586 states that an agreement to arbitrate is enforceable pursuant to 9 U.S.C. § 4. An action brought to enforce an agreement to arbitrate cannot be dismissed or relief denied on the grounds that it is against the United States or the United States is an indispensable party. Section 587 permits the parties to the arbitration to participate in the selection of the arbitrator. Such

arbitrator will be a neutral as described in previous sections. Section 588 describes the authority of the arbitrator. This authority includes the ability to regulate and conduct the arbitration hearings, to administer oaths and affirmations, to compel the attendance of witnesses and the production of evidence at the hearing, and to make awards.

Section 589 describes the procedures to be followed before, during, and after the arbitration proceedings. The arbitrator is required to set a time and place of the hearing and notify the parties. Any party who wants a record of the hearing shall be responsible for preparing of the record, notifying the other parties and the arbitrator of the record, furnishing copies, and paying all costs of the record. At the arbitration, the parties are permitted to be heard, to present evidence, and to cross-examine witnesses. The arbitrator may conduct the proceeding by telephone, television, computer, or other electronic means if all parties agree and have an opportunity to participate. The hearing shall be conducted expeditiously and informally. The arbitrator may receive any oral or documentary evidence, except that which is irrelevant, immaterial, repetitious, or privileged, and may interpret and apply relevant statutory and regulatory requirements, legal precedents, and policy directives. No interested person shall make *ex parte* communications to the arbitrator. If such communication is made, the arbitrator will make a memorandum of the communication, enter it as part of the record, and provide an opportunity for rebuttal. Upon receipt of the *ex parte* communication, the arbitrator may require the offending party to show cause why the claim should not be resolved against the party as a result of the communication. The arbitrator shall make an award within 30 days after the close of the hearing or the filing of briefs, if permitted, unless the parties agree to some other time limit or the agency has a rule providing for another time limit.

Section 590 addresses arbitration awards. It provides that, unless there is a rule otherwise, the award in an arbitration proceeding shall include a brief and an informal discussion of the factual and legal basis for the award and shall be filed with the relevant agencies with a proof of service. The award shall become final 30 days after it is served on all parties, unless the agency files an extension. The head of an agency that is a party in the arbitration can terminate the proceeding or vacate the award if he does so before the award becomes final and serves a notice of this intention on all interested parties. An award that is thus vacated shall not be admissible in any proceeding relating to the issues in controversy. After the award is vacated, a party to the arbitration may petition the agency head to be reimbursed for the attorney fees and expenses incurred in connection with the arbitration and will be awarded those fees that would not have been incurred in the absence of the arbitration proceeding. This section makes a final award binding on all parties and enforceable under 9 U.S.C. §§ 9-13. No enforcement action may be dismissed or relief denied because it is against the United States or the United States is an indispensable party. An arbitration award may not serve as estoppel in any other proceeding on the same issues nor can it be used as a precedent or otherwise be considered in any factually unrelated proceeding.

Section 591 permits a person adversely affected or aggrieved by an arbitration award to bring an action for judicial review under 9 U.S.C. §§ 9-13. A decision by the agency to use or not use a dispute resolution proceeding is within the discretion of the agency and not subject to

judicial review. If the agency head decides to terminate an arbitration proceeding or to vacate an arbitration award, that is also within his discretion and not subject to judicial review.

Section 592 provides that the Chairman of the Administrative Conference of the United States shall compile and maintain data on the use of alternative means of dispute resolution in conducting agency proceedings. The agencies shall supply such information as is required to enable the Chairman to comply with this section. Section 593 enables an agency to use the services and facilities of other Federal agencies, public and private organizations and agencies and individuals with their consent.

#### 2.6.1.2. Background of the Law

This group of statutes was passed as part of the Administrative Dispute Resolution Act of 1990.<sup>2</sup> The purpose of this bill was to "place government-wide emphasis on the use of innovative ADR [Alternative Dispute Resolution] procedures by agencies and to put in place a statutory framework to force the effective and sound use of these flexible alternatives to litigation."<sup>3</sup> Congress noted that the agencies are currently able to use ADR methods without the express authorization of statute or regulation; however, through these statutes, it decided to send a message to the agencies that the use of ADR is an accepted practice and to provide support for agency efforts to expand or enhance their ADR programs.<sup>4</sup> Congress noted that the private sector has been using ADR as an alternative to litigation and that Federal agencies were authorized to use many ADR techniques, such as mediation, conciliation, and mini trials.<sup>5</sup> Some agencies, such as the Environmental Protection Agency, the Army Corps of Engineers, the Merit Systems Protection Board, and the Department of Justice had individual ADR programs in place and operational.<sup>6</sup> Congress stated that the Administrative Conference of the United States (ACUS) had done a great deal of work regarding Federal agency use of ADR techniques.<sup>7</sup> ACUS had recommended that the agencies begin to use formal rule making in the early 1980s, and once that system had proved successful, it began to explore the use of informal, non adversarial ADR techniques for resolving disputes.<sup>8</sup> Congress noted that ACUS believed that although the "federal agencies already possess the authority to use most ADR procedures, . . . agencies often avoid ADR techniques due to confusion over agency authority to use them and the acceptability of such techniques within the Executive Branch."<sup>9</sup> ACUS recommended the passage of legislation to clarify and expand the agencies' ADR authority.<sup>10</sup>

Hearings were held on the appropriateness of the use of ADR to resolve agencies' disputes and the constitutional questions that it presents.<sup>11</sup> Most of those testifying agreed that there was

<sup>10</sup>*Id.* at 3934.

<sup>11</sup>*Id.*

a need for the flexibility afforded by ADR; however, the Department of Justice expressed concerns that "the use of binding arbitration by agencies that do not already have specific statutory authorization to do so raises serious constitutional concerns."<sup>12</sup> Further hearings and studies convinced Congress that the statutes enacted would not pose any significant constitutional questions.<sup>13</sup> Congress also included a sunset provision which provided that the authority to use dispute resolution proceedings and the other amendments included in the Act would terminate on October 1, 1995.

#### **2.6.1.3. Law in Practice**

Few comments were received on these laws. The Council of Defense and Space Industry Associations (CODSIA) stated that 5 U.S.C. § 582, "General authority," is not serving its intended purpose since the Federal Acquisition Regulation (FAR) has not been amended to encourage the use of ADR. CODSIA believes that most agencies have not implemented these laws by adopting a policy that addresses the use of ADR. CODSIA also commented that 5 U.S.C. § 591, "Judicial review," precludes judicial review of an agency's determination whether to use ADR or vacate an arbitrator's award. CODSIA argues that this section undercuts the merits of true ADR use. The Inspector General of the Department of Defense (DOD IG) commented that it believes these laws are serving their intended purposes, are still relevant, have not created inefficiencies, and are necessary to protect the best interests of DOD.

#### **2.6.1.4. Recommendation and Justification**

##### **No Action**

The Panel took no action on these statutes. These laws are not unique to contracting or to DOD acquisition. They do not present any core acquisition issues and have only an indirect relationship to contracting. The Panel believes that while these statutes are tangentially related to DOD acquisition, they are not appropriate for action by the Panel.

#### **2.6.1.5. Relationship to Objectives**

Action on these statutes would not specifically promote the objectives of the Panel.

## 2.6.2. 10 U.S.C. § 2405

### Limitation on adjustment of shipbuilding contracts

#### 2.6.2.1. Summary of the Law

This section prohibits the Secretary of a military department from adjusting a price under a shipbuilding contract entered into after December 7, 1983, for an amount set forth in a claim, request for equitable adjustment, or demand for payment under the contract arising from events that occurred more than 18 months before the submission of the claim, request, or demand. A claim, request, or demand shall be considered to have been submitted only when the contractor has provided the certification required by section 6(c)(1) of the Contract Disputes Act (41 U.S.C. § 605(c)(1)) and the required supporting data.

#### 2.6.2.2. Background of the Law

Congress has periodically held hearings to examine the problems involved with shipbuilding claims. In 1980, it commissioned a study to evaluate the Navy's efforts to solve some of the problems associated with shipbuilding claims. The resulting report recommended a six month time limit on the submission of claims. In 1982, the General Accounting Office (GAO) began a study of recommendations for the improvement of the procurement process. As part of that study, GAO noted that the late submission of shipbuilding claims had been a major factor in the Navy's inability to settle claims and recommended a one year time limit. After considering these recommendations, Congress agreed that some limit was necessary and determined that 18 months was a reasonable time period. Congress again examined shipbuilding claims in 1984.<sup>1</sup> It noted that two concerns had arisen since the passage of the statute in 1983.<sup>2</sup> The first concern addressed the meaning of the word "event" in terms of when the 18 month time limit for filing a claim would be triggered.<sup>3</sup> Congress stated that the triggering event for a claim alleging defective Government property would be when a defect is discovered and the Government orders its repair or replacement.<sup>4</sup> The 18 month time limit would begin when the contractor knew or should have known of the triggering event.<sup>5</sup> Congress stated that it considered amending the statute to include a definition of "event" but instead directed the Navy to provide implementing guidance, indicating that it would revisit this statute if the Navy did not fairly implement it.<sup>6</sup> The second area of concern identified by Congress addressed the certification requirement.<sup>7</sup> The initial version of the statute had provided that regulations promulgated by the Secretary of Defense would address the necessary documentation and substantiation of claims.<sup>8</sup> Congress noted that

---

<sup>1</sup>S. REP. NO. 500, 98th Cong., 2d Sess. 257 (1984).

<sup>2</sup>*Id.* at 256.

<sup>3</sup>*Id.* at 257.

<sup>4</sup>*Id.*

<sup>5</sup>*Id.*

<sup>6</sup>*Id.*

<sup>7</sup>*Id.*

<sup>8</sup>*Id.*

there was concern that this provision would be interpreted as amending the Contract Disputes Act.<sup>9</sup> To prevent this unintended interpretation, Congress referenced the certification provision of the Contract Disputes Act and required the submission of necessary supporting data as defined by regulations issued by the Secretary of the Navy.<sup>10</sup>

This statute was codified as part of the Department of Defense Authorization Act of 1985.<sup>11</sup> It was proposed by the Senate, and the House of Representatives receded with a technical amendment.<sup>12</sup>

In the 1993 DOD Authorization Act, Congress amended the certification requirements in 10 U.S.C. § 2405(b) to permit the waiver of the 18 month time limit if the certification submitted is defective solely because of the status of the person who made the original certification.<sup>13</sup>

### 2.6.2.3. Law in Practice

This section contains one of three certification provisions pertaining to contract claims. The Contract Disputes Act at 41 U.S.C. § 605(c)(1) governs certification of contract claims, and 10 U.S.C. § 2410 contains certification requirements applicable to claims and other requests for relief exceeding \$100,000 under DOD contracts. Many industry comments were received on this statute. The Council of Defense and Space Industry Associations (CODSIA) noted that this law is currently being implemented under an interim regulation, and that it took the Navy eight years to begin this implementation.<sup>14</sup> CODSIA believes that the Navy's implementation is unfair because it is applied retroactively and ignores the specific Contract Disputes Act standard established in the statute.<sup>15</sup> CODSIA also argues that the Navy has ignored the Contract Disputes Act certification requirements and standards and has created a "known or should have known" standard "that has never been used by any other government agency in the interpretation of claims statutes or ever been recognized by any judicial body."<sup>16</sup> It states that the term "event" in the regulation is so ambiguous that it has caused costly, unnecessary, and inefficient litigation.<sup>17</sup> CODSIA further contends that this statute is no longer relevant but that its implementation is creating inefficiencies.<sup>18</sup> It also believes that the law conflicts with other statutes of limitation and should be repealed in order to allow the time bar applicable to all other claims to be applicable to shipbuilding claims as well.<sup>19</sup>

<sup>15</sup>*Id.*

<sup>16</sup>*Id.*

<sup>17</sup>*Id.*

<sup>18</sup>*Id.*

<sup>19</sup>*Id.*

The Shipbuilders Council of America (SCA) provided additional comments on this statute.<sup>20</sup> It noted that the Navy's interim implementing regulation of December 1991 is the subject of four cases "currently being litigated in the Court of Claims and the issue has been raised in yet another case in the Federal Court of Appeals."<sup>21</sup> The SCA surveyed its industry and found that there are at least 16 other potential litigation cases on the issue of when the time bar begins to run.<sup>22</sup> The SCA also argued that the Navy has adopted a subjective "known or should have known" standard that is singularly unique and "imputes incidental knowledge of a subcontractor employee to the prime contractor; that encourages a shipbuilder to submit piecemeal and 'protective claims' with no assurance that the Department of Justice will recognize the 'protective claims;' and that ignores the specific statutory requirements of the Contract Disputes Act that are incorporated by reference in 10 U.S.C. § 2405(b)."<sup>23</sup> The SCA states that a typical shipbuilding contract can have from 2,000 to 10,000 changes over the course of its construction period, and the Navy expects protective claims to be submitted every time a change is made.<sup>24</sup> It believes that this practice is "unduly onerous and nonsensical."<sup>25</sup>

The SCA commented that there were other serious problems with the implementation of this statute. It stated that the Navy regulation has applied this authority retroactively, even though the statute is silent on this issue.<sup>26</sup> Also, it comments that the Navy has refused to adopt a tolling standard that is consistent with all other statutes of limitations.

A reasonable tolling standard would alleviate the need for thousands of "protective claims" to be filed, each of which requires a quantification of dollar amount and a certification even though the contractor may not be able to quantify the dollar amount until after the change is completed or altered by one or more of the subsequent thousands of changes that occur in a typical shipbuilding contract.<sup>27</sup>

The SCA believes that the implementation of this statute violates "all reasonable standards of fairness and ignores the fundamental requirements of the Contract Disputes Act."<sup>28</sup> It recommends that this statute be repealed or modified to include a "known or should have known" standard that is consistent with other statutes of limitation.<sup>29</sup> It also recommends that direction be given that any implementing regulations must contain tolling procedures.<sup>30</sup>

<sup>25</sup>*Id.*

<sup>26</sup>*Id.*

<sup>27</sup>*Id.*

<sup>28</sup>*Id.*

<sup>29</sup>*Id.*

<sup>30</sup>*Id.*

In later comments, the SCA again noted that the Navy has never cited specific parts of the legislative history of the statute to support its "known or should have known" standard, despite repeated requests.<sup>31</sup> It also contends that the statute does not provide any protection to the prime contractor when the subcontractor does not submit a claim until close to or after the 18 month limitation.<sup>32</sup> It notes that it is impossible to certify a claim until one can quantify it, and constructive changes are even more difficult to identify and quantify.<sup>33</sup> It discusses a number of deficiencies in the Navy's interim regulations, including ambiguous guidance to subcontractors on what constitutes correction of a defect and no requirement that the Navy must give timely notice of a deficiency in certification or supporting data.<sup>34</sup> The SCA provided proposed amending language to solve some of the problems it has identified.<sup>35</sup> This amendment would take several steps to relax the strict interpretation of the certification provision of the statute.<sup>36</sup>

The American Bar Association Section of Public Contract Law (the Section) also noted that, although this statute was passed in October 1984, the Navy did not finalize the implementing regulations until 1991.<sup>37</sup> The Section commented that it has a number of concerns with respect to the implementation of this statute in the Navy's interim regulation, including how the definition and application of the "known or should have known" standard is used in the regulation, when and what kind of supporting data is needed, and when the period for submission of the claim, request, or demand begins to run.<sup>38</sup> The Section argues that this statute "will lead to disputes over its application to specific claims, requests, and demands."<sup>39</sup>

The Naval Sea Systems Command noted that this statute was enacted in response to the submission in the 1970s of large, omnibus claims by shipbuilders.<sup>40</sup> The first claims to be affected by the statute were submitted in late 1986.<sup>41</sup> The Navy implemented the statute in the DFARS and, upon industry request, in naval regulations.<sup>42</sup> The Navy contends that this statute is necessary to ensure the timely submission of shipbuilding claims and believes that its implementation fairly interprets and applies the statute.<sup>43</sup> It is the Navy's firm position that the unique nature of shipbuilding has made this statute essential.<sup>44</sup> The Navy responded to some of the SCA's comments on this statute. It noted that the "known or should have known" standard

requires imputation of knowledge of a subcontractor to a prime contractor only in cases of subcontract claims.<sup>45</sup> It also stated that "the Navy has never required or even indicated that the statute applies to routine changes and, for most changes, the statute will have no effect."<sup>46</sup>

Although the Navy noted that tolling is not allowed under the statute, it stated that its interim regulations permit a shipbuilder to supplement its data and revise the amount requested after an initial best estimate of the costs is submitted.<sup>47</sup> The Navy has also "made a binding representation in promulgating the Interim Rule that it will not challenge, and will be estopped from challenging, the adequacy of an otherwise valid certification on the basis that the amount of the claim was revised or supporting data had been supplemented."<sup>48</sup> The Navy stated that it supported the amendment to the certification requirement in the DOD Authorization Act for Fiscal Year 1993.<sup>49</sup> In closing, the Navy stated that this statute is fair and "represents the only presently effective mechanism that ensures the timely submission of claims."<sup>50</sup>

#### **2.6.2.4. Recommendations and Justification**

**Amend 10 U.S.C. § 2405 to remove the specific certification requirement in subsection (b) and include a statement providing for implementation of the certification requirement in regulation. In view of the recent statutory changes made by Congress, no further change is necessary to the certification requirement.**

Although there have been several comments lamenting the way this statute is working in practice, the statute itself is relatively clear. The problems noted by the commentators focus on the regulations implementing this statute, not on the statute itself. Industry representatives have made similar complaints about this statute over the years, and Congress has examined this statute a number of times without significantly amending it. Although Congress did agree to examine this statute if it was not implemented fairly by the Navy, the Navy's interim regulations are so recent that it would be premature to declare the regulations unfair. Because the regulatory implementation process has just begun on the authority contained in this statute, the Panel believes that it would be premature to consider repeal.

However, at some later date, it could be argued that the regulations issued by the Navy governing certification of claims and the required supporting data are more flexible and broader than the authority currently contained in the statute. Therefore, the Panel recommends that the specific requirements currently in the statute be removed in favor of a statement providing for regulatory guidance on this issue. The Panel believes that such a recommendation will protect the best interests of DOD while alleviating the concern expressed by industry.

<sup>45</sup>*Id.*

<sup>46</sup>*Id.*

<sup>47</sup>*Id.*

<sup>48</sup>*Id.*

<sup>49</sup>*Id.*

<sup>50</sup>*Id.*

In the Fiscal Year 1993 Department of Defense Authorization Act, Pub. L. No. 102-484, Congress has already added a provision (new subsection (c)) allowing for a waiver of the 18 month time limit if the certification was made by an unauthorized person and found deficient. The Panel agrees with the Navy that this amendment will resolve a potential problem in the shipbuilding claims area. Many of the cases cited by the industry commentators are in court today because there is currently no authority for waiver under such circumstances.

#### **2.6.2.5. Relationship to Objectives**

This recommendation promotes the financial and ethical integrity of the acquisition process while encouraging the exercise of sound judgment on the part of acquisition personnel.

#### **2.6.2.6. Proposed Statute<sup>51</sup>**

##### **Section 2405. Limitation on adjustment of shipbuilding contracts**

(a) The Secretary of a military department may not adjust any price under a shipbuilding contract entered into after December 7, 1983, for an amount set forth in a claim, request for equitable adjustment, or demand for payment under the contract (or incurred due to the preparation, submission, or adjudication of any such claim, request, or demand) arising out of events occurring more than 18 months before the submission of the claim, request, or demand.

(b) For the purposes of subsection (a), a claim, request, or demand shall be considered to have been submitted only when the contractor has provided the certification and supporting data for the claim, request, or demand required by ~~section 6(e)(1) of the Contract Disputes Act of 1978 (41 U.S.C. 605(e)(1)) and the supporting data for the claim, request, or demand regulations promulgated by the Secretary of a military department.~~

(c)(1) If a certification referred to in subsection (b) with respect to a shipbuilding contract is determined to be deficient because of the position, status, or scope of authority of the person executing the certification, the contractor may resubmit the certification. The resubmitted certification shall be based on the knowledge of the contractor and the supporting data that existed when the original certification was submitted. The appropriateness of the person executing the resubmitted certification shall be determined on the basis of applicable law in effect at the time of the resubmission.

(2) If a certification is resubmitted pursuant to paragraph (1) by the date described in paragraph (3), the resubmitted certification shall be deemed to have been submitted for purposes of this section at the time the original certification was submitted.

(3) The date by which a certification may be resubmitted for purposes of paragraph (2) is the date which is the later of --

---

<sup>51</sup>Subsection (c) has been added by Congress pursuant to the National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 807, 106 Stat. 3134 (1992).

(A) 90 days after the promulgation of regulations under section 2410(e) of this title; or

(B) 30 days after the date which is the earlier of the date on which --

(i) the contractor is notified in writing, by an individual designated to make such notification by the Secretary of Defense, of the deficiency in the previously submitted claim, request, or demand;

(ii) a board of contract appeals issues a decision determining the previously submitted claim, request, or demand to be deficient; or

(iii) a Federal court renders a judgment determining the previously submitted claim, request, or demand to be deficient.

## 2.6.3. 10 U.S.C. § 2410

### Contract claims: certification

#### 2.6.3.1. Summary of the Law

This section prohibits the payment of a contract claim, request for equitable adjustment to contract terms, request for relief under Pub. L. No. 85-804, or similar request from a contractor that exceeds \$100,000 unless one of the contractor's senior officials in charge at the plant or location involved certifies that the claim or request is submitted in good faith and all supporting data are accurate and complete to the best of such official's knowledge and belief.

#### 2.6.3.2. Background of the Law

This section is part of the Codification of Military Laws Act of 1988.<sup>1</sup> The purpose of this Act was to codify in Title 10 of the U.S. Code assorted provisions of law that had been enacted as free-standing permanent provisions of laws since 1970.<sup>2</sup> The certification requirement contained in this statute had been included in the DOD Appropriation Authorization Act of 1979.<sup>3</sup> Congress expressed a grave concern with the problem of contractors submitting inflated or exaggerated claims.<sup>4</sup> Congress believed that since a civil servant must certify the accuracy of any claims submitted against the Government, a company doing business with DOD should be subject to the same certification requirement.<sup>5</sup> The codification of the certification requirement did not make any specific substantive changes and was not specifically mentioned.<sup>6</sup>

#### 2.6.3.3. Law in Practice

This section has been implemented in the Federal Acquisition Regulation (FAR), Subsection 33.207,<sup>7</sup> and DOD Federal Acquisition Regulation Supplement (DFARS), Subsection 233.7000.<sup>8</sup> This section contains one of three certification provisions pertaining to contract claims. The Contract Disputes Act at 41 U.S.C. § 605(c)(1) governs certification of contract claims, and 10 U.S.C. § 2405 contains certification requirements applicable to shipbuilding claims.

Many industry comments were received on the impact of this law. The Council of Defense and Space Industry Associations (CODSIA) stated that this law is not serving its

<sup>1</sup>Codification of Military Laws, Pub. L. No. 100-370, § 1(h)(2), 102 Stat. 840, 847 (1988).

<sup>2</sup>H.R. REP. NO. 696, 100th Cong., 2d Sess. 3, *reprinted in* 1988 U.S.C.C.A.N. 1077.

<sup>3</sup>DOD Appropriation Authorization Act, 1979, Pub. L. No. 95-485, § 813, 92 Stat. 1611, 1624.

<sup>4</sup>H.R. REP. NO. 1118, 95th Cong., 2d Sess. 117 (1979).

<sup>5</sup>*Id.*

<sup>6</sup>Codification of Military Laws, Pub. L. No. 100-370, § 1(h)(2), 102 Stat. 840, 847 (1988).

<sup>7</sup>48 C.F.R. 33.207.

<sup>8</sup>48 C.F.R. 233.7000.

intended purpose but has created chaos about who can certify a claim.<sup>9</sup> It strongly recommends changes similar to those that were enacted in section 816 of the Department of Defense Authorization Act for Fiscal Year 1993.<sup>10</sup>

The American Bar Association Section of Public Contract Law (the Section) notes that this statute requires the certification by "a senior official of the contractor in charge at the plant or location involved" while the Contract Disputes Act does not identify the status or position of an individual eligible to certify a claim.<sup>11</sup> The Section argues that requiring two different standards for claims submitted under the Contract Disputes Act and claims submitted under 10 U.S.C. § 2410 has created needless uncertainty in contractors wishing to assert claims under DOD contracts that are also submitted under the Contract Disputes Act.<sup>12</sup> Last year, one out of every three appeals at the Armed Services Board of Contract Appeals that involved contractor claims in excess of \$50,000 required active board participation on certification issues.<sup>13</sup> The U.S. Claims Court and the other boards of contract appeals reflect similar statistics.<sup>14</sup> The Section recommends amending this statute to reference the certification provision in the Contract Disputes Act (41 U.S.C. § 605(c)(1)).<sup>15</sup> It believes that "if two separate contract claim certification requirements are necessary, those statutes should be consistent and contain clear guidance on who must certify."<sup>16</sup> The Section argues that this amendment would alleviate the troublesome and increasing difficulties in the certification requirement, would reduce waste and inefficiency, and would help to alleviate the adversarial relationship between the Government and the Federal procurement industry.<sup>17</sup>

In 1980, the Office of Federal Procurement Policy (OFPP) issued guidance on the overall area of certification in the Contract Disputes Act (CDA) in Policy Letter 80-3.<sup>18</sup> In response to the extensive litigation in recent years, OFPP has proposed to replace the certification guidance in Policy Letter 80-3 with new language.<sup>19</sup> This revised language would relax the certification requirement of the CDA by allowing the contractor to designate specific people with the authority to certify CDA claims.<sup>20</sup> OFPP intends to publish its revised guidance in late 1992 or early 1993.

OFPP has also expressed the intention to work with DOD to develop legislation to conform the requirements of 10 U.S.C. § 2410 with the CDA and the proposed policy.<sup>21</sup> OFPP's

efforts will be directly impacted, however, by Congress' recent amendments to both the CDA and 10 U.S.C. § 2410. In the Federal Courts Administration Act of 1992,<sup>22</sup> Congress amended the certification requirements of the CDA to broaden the definition of who is authorized to certify contract claims and to clarify that defects in certification do not divest the disputes forum of jurisdiction. In the National Defense Authorization Act for Fiscal Year 1993, Congress authorized the Secretary of Defense to promulgate regulations in the FAR requiring that a contractor claim be certified as required in the CDA and that this certification be made by a person with the authority to bind the contractor and with the requisite knowledge of the claim or request for relief.<sup>23</sup> Once these regulations are published, 10 U.S.C. § 2410 would be repealed.<sup>24</sup> Congress stated that this statute has prevented the adoption of a Government-wide certification standard.<sup>25</sup> The repeal of the statute and publication of regulations were intended to facilitate a single certification.<sup>26</sup>

#### **2.6.3.4. Recommendation and Justification**

##### **Repeal 10 U.S.C. § 2410.**

The Panel notes that the CDA and 10 U.S.C. § 2410 certification requirements have not been completely harmonized by the recent amendments. 10 U.S.C. § 2410 requires that the certifying official have knowledge of the claim, which is not required by the CDA. Regulatory guidance may be able to complete the harmonization process without further congressional action.

Although the two statutes may be able to be harmonized through the regulatory process, the Panel agrees with Congress that a single, Government-wide certification standard would be preferable. As noted above, 10 U.S.C. § 2410 is repealed upon promulgation by DOD of appropriate regulatory guidance that would implement Congressional policies expressed in the 1993 Authorization Act. Direct repeal of 10 U.S.C. § 2410 would rectify the problems caused by having two overlapping but inconsistent statutory provisions governing certification.

In its discussion of 10 U.S.C. § 2405, the Panel has also recommended that the separate certification requirements in 10 U.S.C. § 2405 be eliminated. Both CDA certification requirements at 41 U.S.C. § 605(c)(1) and 10 U.S.C. § 2405 are addressed more fully by separate coverage in this Report.

#### **2.6.3.5. Relationship to Objectives**

This recommendation will further the Panel's statutory mandate of reviewing acquisition laws applicable to DOD with a view toward streamlining the defense acquisition process. It helps to eliminate the duplication and overlap of authority currently present in the procurement process.

<sup>23</sup> National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 813, 106 Stat. 2452 (1992).

<sup>24</sup> *Id.*

<sup>25</sup> CONF. REP. NO. 966, 102d Cong., 2d Sess. (1992).

<sup>26</sup> *Id.*

This recommendation will also provide the means for expeditious and fair resolution of procurement disputes.

#### **2.6.3.6. Current Statute**

##### **§ 2410. Contract claims: certification**

A contract claim, request for equitable adjustment to contract terms, request for relief under Public Law 85-804 (50 U.S.C. § 1431 *et seq.*), or other similar request by a contractor that exceeds \$100,000 may not be paid unless a senior official of the contractor in charge at the plant or location involved certifies at the time the claim or request is submitted that --

(1) the claim or request is made in good faith; and

(2) All supporting data submitted in connection with the claim or request are accurate and complete to the best of such official's knowledge and belief.

#### **2.6.3.7. Congressional Amendments<sup>27</sup>**

##### **Sec. 813. CERTIFICATION OF CONTRACT CLAIMS**

###### **(a) REGULATIONS ON CERTIFICATION OF CONTRACT CLAIMS**

(1) Chapter 141 of title 10, United States Code, as amended by sections 384 and 808, is further amended by adding at the end the following new section:

##### **§ 2410e. Contract claims: certification regulations**

(a) REGULATIONS. -- The Secretary of Defense may propose, for inclusion in the Federal Acquisition Regulation, regulations relating to certification of contract claims, requests for equitable adjustment to contract terms, and requests for relief under Public Law 85-804 (50 U.S.C. § 1431 *et seq.*) that exceed \$100,000. Such regulations, at a minimum, shall --

(1) provide that a contract claim, request for equitable adjustment to contract terms, or request for relief under Public Law 85-804 (50 U.S.C. § 1431 *et seq.*) may not be paid unless the contractor provides, at the time the claim or request is submitted, the certification required by section 6(c)(1) of the Contract Disputes Act of 1978 (41 U.S.C. § 605(c)(1)); and

(2) require that the person who certifies such a claim or request be an individual who is authorized to bind the contractor and who has knowledge of the basis of the claim or request, knowledge of the accuracy and completeness of the supporting data, and knowledge of the claim or request.

---

<sup>27</sup>These amendments were enacted in the National Defense Authorization Act for Fiscal Year 1993, Pub. L. No. 102-484, § 813, 106 Stat. 2452 (1993).

**(b) PUBLICATION.** -- The Secretary of Defense shall ensure that, upon promulgation of the regulations, the regulations are published in the Federal Register.

**(c) REPORT.** -- If at any time the Secretary of Defense proposes revisions to the regulations promulgated pursuant to this section, the Secretary shall ensure that the proposed revisions are published in the Federal Register and, at the time of publication of such revisions, shall submit to Congress a report describing the proposed revisions and explaining why the regulations should be revised. The Secretary of Defense may not promulgate regulations containing such proposed revisions until the expiration of the 90-day period beginning on the date of receipt by Congress of such report.

**(2)** The table of sections at the beginning of such chapter, as amended by sections 384 and 808, is further amended by adding at the end the following new item:

"2410e. Contract claims: certification regulations."

**(b) REPEAL.** -- Section 2410 of title 10, United States Code, is repealed, effective upon the promulgation of regulations pursuant to section 2410e of title 10, United States Code, as added by subsection (a).

## 2.6.4. 28 U.S.C. § 1346<sup>1</sup>

### United States as defendant

#### 2.6.4.1. Summary of the Law

This section gives the U.S. District Courts concurrent original jurisdiction with the U.S. Claims Court over particular civil actions. These actions include: (1) any civil action against the United States for the recovery of any tax, penalty, or sum alleged to have been excessive or in any manner wrongfully collected under the internal revenue laws; or (2) any other civil action against the United States, not exceeding \$10,000, founded on the Constitution, any Act of Congress, any regulation of an executive department, any express or implied contract with the United States, or for liquidated or unliquidated damages in cases not sounding in tort except that the district courts shall not have jurisdiction of any civil action or claim against the United States founded upon any express or implied contract or liquidated or unliquidated damages in cases not sounding in tort, that are subject to sections 8(g)(1) and 10 (a)(1) of the Contract Disputes Act. Express or implied contracts with the United States shall include contracts with the Army and Air Force Exchange Service, Navy Exchanges, Marine Corps Exchanges, Coast Guard Exchanges, or Exchange Councils of the National Aeronautics and Space Administration.

#### 2.6.4.2. Background of the Law

This section was enacted in 1948 in what became commonly known as the Little Tucker Act.<sup>2</sup> It was amended in 1949 to add a subsection giving the district court exclusive jurisdiction over civil claims for money damages for injury to person or property caused by the negligent or wrongful act or omissions of an employee of the Government.<sup>3</sup> The next substantive amendment to this statute, in 1954, was designed to "permit taxpayers a greater opportunity to sue the United States in the district court of their own residence to recover taxes which they feel have been wrongfully collected."<sup>4</sup> At the time of the amendment, suits to recover wrongfully assessed taxes could be litigated in district court only if the claim was under \$10,000 and Congress could find no reason for this restriction.<sup>5</sup> It noted that the original theory behind this restriction was "the feeling that taxpayers wealthy enough to be assessed taxes in excess of \$10,000 could afford to go to Washington and pursue his (sic) rights in the Court of Claims."<sup>6</sup> Congress believed that a taxpayer should be able to seek his remedy in the jurisdiction where he lives or where the tax accrued, regardless of the amount in controversy.<sup>7</sup>

---

<sup>1</sup> The Panel has limited its review of this statute to subsection (a) only.

<sup>2</sup> Act of June 25, 1948, ch. 646, 62 Stat. 933.

<sup>3</sup> Act of April 25, 1949, ch. 92, § 2(a), 63 Stat. 62.

<sup>4</sup> Act of July 30, 1954, ch. 648, 68 Stat. 589; H.R. REP. NO. 659, 83d Cong., 2d Sess. 1, *reprinted in* 1953 U.S.C.C.A.N. 2716.

<sup>5</sup> *Id.* at 2.

<sup>6</sup> *Id.*

<sup>7</sup> *Id.*

In 1964, Congress again amended this statute<sup>8</sup> to "give U.S. district courts concurrent jurisdiction with the Court of Claims to hear civil actions or claims to recover fees, salary, or compensation for official services of officers or employees of the United States where the claim does not exceed \$10,000 in amount."<sup>9</sup> Congress stated that to ensure that justice would be served efficiently, the district courts should be able to hear claims for compensation as well as improper discharge claims.<sup>10</sup> In 1966, Congress added a subsection conferring jurisdiction on the district courts over wrongful levy actions and actions involving surplus proceeds and substituted sale proceeds.<sup>11</sup> The final substantive amendment to this statute added a subsection that allows "the United States to be made a party to actions in the United States District Courts to quiet title to lands in which the United States claims an interest."<sup>12</sup>

### 2.6.4.3. Law in Practice

There is no Federal Acquisition Regulation (FAR) or Department of Defense Federal Acquisition Regulation Supplement (DFARS) coverage that specifically address this statute, and no industry or Government comments were received on this law. This statute has been the subject of a number of cases in Federal court. These cases have focused on the jurisdiction granted by this statute. In *Mark Dunning Industries, Inc. v. Cheney*, the court explained the jurisdictional limits of this statute:

The Tucker Act, 28 U.S.C. § 1346(a)(2), and the Contract Disputes Act of 1978, 41 U.S.C. §§ 602(a), 607(g)(1), 609(a)(1), provide that the United States District Courts have no jurisdiction over suits against the United States founded on contracts with the United States. Instead, contractors may bring such suits only in the United States Claims Court, 28 U.S.C. § 1491; 41 U.S.C. § 609, or with the agency's board of contract appeals, 41 U.S.C. §§ 606, 607.<sup>13</sup>

An earlier case came to the same conclusion and held that in cases involving the termination of Government defense contracts, the district court had no jurisdiction over any issue other than that of title.<sup>14</sup> Notwithstanding this line of cases, the jurisdiction issue continues.

In 1989, the U.S. Department of Justice (DOJ) Office of Legislative Affairs proposed legislative changes designed to improve resolution of contract disputes.<sup>15</sup> One of these changes

<sup>8</sup>Act of August 30, 1964, Pub. L. No. 88-519, 78 Stat. 699.

<sup>9</sup>S. REP. No. 1390, 88th Cong., 2d Sess. 1 (1964), reprinted in 1964 U.S.C.C.A.N. 3254, 3255.

<sup>10</sup>*Id.* at 2.

<sup>11</sup>Federal Tax Lien Act of 1966, Pub. L. No. 89-179, § 202(a), 80 Stat. 1125, 1148-9; S. REP. No. 1708, 89th Cong., 2d Sess. 35 (1966), reprinted in 1966 U.S.C.C.A.N. 3722, 3756.

<sup>12</sup>Act of October 25, 1972, Pub. L. No. 92-562, § 1, 86 Stat. 1176; H.R. REP. NO. 1559, 92d Cong., 2d Sess. 1 (1972), reprinted in 1972 U.S.C.C.A.N. 4547.

<sup>13</sup>*Mark Dunning Industries, Inc. v. Cheney*, 934 F.2d 266, 269 (11th Cir. 1991) (citations omitted). See also *A.E. Finley & Associates, Inc. v. United States*, 898 F.2d 1165 (6th Cir. 1990); *Cessna Aircraft Company v. Department of the Navy*, 744 F.Supp. 260 (D.Kan. 1990).

<sup>14</sup>*United States v. Digital Products Corporation*, 624 F.2d 690, 691 (5th Cir. 1980).

was "intended to clarify the jurisdiction of the district courts and the United States Claims Court over cases arising under the Contract Disputes Act . . ."16 The intention of Congress was to vest exclusive jurisdiction over Government contract disputes in the Claims Court and the Federal Circuit and to divest district courts of all jurisdiction over such disputes.17 The DOJ Office of Legislative Affairs offered language designed to eliminate "confusion over the appropriate jurisdiction where a Federal statute is alleged by a contractor to affect the terms or even the existence of a Government contract subject to the Contract Disputes Act."18 Some courts had concluded that there was a difference between "statutory claims" and "contract claims" and the district courts had jurisdiction over the former.19 This distinction made little sense and appeared to violate the congressional intent expressed in the Contract Disputes Act and the Little Tucker Act.20 By including specific language divesting the district courts of all jurisdiction over contract claims, the DOJ Office of Legislative Affairs hoped to prevent further adverse decisions.21

#### **2.6.4.4. Recommendation and Justification**

##### **Amend to include language clarifying the exemption provision in 28 U.S.C. § 1346(a)(2).**

The Panel recommends that this law be amended to clarify the exemption of contract disputes in 28 U.S.C. § 1346(a)(2). This statute was enacted to give people with claims under \$10,000 a local forum in the regional district courts in which to have their day in court. This statute specifically exempts any disputes over contracts with the United States subject to the Contract Disputes Act. Some Federal courts have consistently refused to grant district court jurisdiction to contractors suing the Government, while other courts have reasoned that some questions brought under the CDA involve "statutory claims" within the jurisdiction of the district courts. The statute was intended to be used to litigate tax collection and small, non-tort cases. Congress intended this statute to divest the district court of jurisdiction over contract claims. The judicial decisions since the passage of 28 U.S.C. § 1346 show a difference of opinion among the courts who have examined the jurisdiction issue. The Panel believes that the language proposed by the DOJ Office of Legislative Affairs adequately addresses this current jurisdictional confusion and recommends that 28 U.S.C. § 1346(a)(2) be amended to include this clarifying language.

#### **2.6.4.5. Relationship to Objectives**

This recommendation furthers the broad policy objectives and fundamental policy requirements of the Panel.

#### 2.6.4.6. Proposed Statute

##### § 1346. United States as defendant

(a) The district courts shall have original jurisdiction, concurrent with the United States Claims Court, of:

(1) Any civil action against the United States for the recovery of any internal-revenue tax alleged to have been erroneously or illegally assessed or collected, or any penalty claimed to have been collected without authority or any sum alleged to have been excessive or in any manner wrongfully collected under the internal-revenue laws;

(2) Any other civil action or claim against the United States, not exceeding \$10,000 in amount, founded either upon the Constitution, or any Act of Congress, or any regulation of an executive department, or upon any express or implied contract with the United States, or for liquidated or unliquidated damages in cases not sounding in tort, ~~except that the district courts shall not have jurisdiction of any civil action or claim against the United States founded upon any express or implied contract with the United States or for liquidated or unliquidated damages in cases not sounding in tort which are subject to sections 8(g)(1) and 10(a)(1) of the Contract Disputes Act of 1978. For the purpose of this paragraph, an express or implied contract with the Army and Air Force Exchange Service, Navy Exchanges, Marine Corps Exchanges, Coast Guard Exchanges, or Exchange Councils of the National Aeronautics and Space Administration shall be considered an express or implied contract with the United States.~~ except that the district courts shall not have jurisdiction over any civil action or claim against the United States which relates in any manner to a contract subject to the Contract Disputes Act of 1978, including, but not limited to, a claim which seeks to establish the existence or nonexistence of such a contract with the United States, seeks to establish that an existing contract subject to the Contract Disputes Act is void, or seeks to determine and construe the terms of such a contract. This exception bars the district courts from exercising any jurisdiction over the above-described civil actions or claims pursuant to 28 U.S.C. 1331, 1334, or any other provision of law.

(b) Subject to the provisions of chapter 171 of this title, the district courts, together with the United States District Court for the District of the Canal Zone and the District Court of the Virgin Islands, shall have exclusive jurisdiction of civil actions on claims against the United States, for money damages, accruing on and after January 1, 1945, for injury or loss of property, or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred.

(c) The jurisdiction conferred by this section includes jurisdiction of any set-off, counterclaim, or other claim or demand whatever on the part of the United States against any plaintiff commencing an action under this section.

(d) The district court shall not have jurisdiction under this section of any civil action or claim for a pension.

(e) The district courts shall have original jurisdiction of any civil action against the United States provided in section 6226, 6228(a), 7426, or 7428 (in the case of the United States district court for the District of Columbia) or section 7429 of the Internal Revenue Code of 1954.

(f) The district courts shall have exclusive original jurisdiction of civil actions under section 2409a to quiet title to an estate or interest in real property in which an interest is claimed by the United States.

## 2.6.5. 31 U.S.C. § 1304

### Judgments, awards, and compromise settlements

#### 2.6.5.1. Summary of the Law

This section provides that necessary amounts are appropriated for the payment of final judgments, awards, and compromise settlements, and interest and costs specified in the judgment when the payment is not otherwise provided for, and when the payment is certified by the Comptroller General under a decision of a board of contract appeals. The statute also provides for the payment of interest from the appropriation authorized by this section on a judgment of a district court when the judgment becomes final after review on appeal or petition. Interest is also payable on judgments of the Court of Appeals for the Federal Circuit and the U.S. Claims Court; but only from the date of filing of the transcript of the judgment with the Comptroller General through the day before the date of the mandate of affirmance. The interest payable in a proceeding reviewed by the U.S. Supreme Court is not allowed after the end of the term in which the judgment is affirmed. This section also provides for the payment of a judgment or compromise settlement against the Government when the judgment or settlement arises out of an express or implied contract made by the Army and Air Force Exchange Service, Navy Exchanges, Marine Corps Exchanges, Coast Guard Exchanges, or Exchange Council of the National Aeronautics and Space Administration. The Exchange making the contract shall reimburse the fund for the amount paid.

#### 2.6.5.2. Background of the Law

This section was originally enacted in 1956 as part of what became known as the Automatic Payment of Judgments Act.<sup>1</sup> It was amended in 1966 to further simplify the payment of certain compromise settlements.<sup>2</sup> Congress stated that the passage of the Automatic Payment of Judgments Act "both reduced the interest charges accruing upon judgments against the United States and the irritations inevitably associated with the delays occasioned by the former method of payment."<sup>3</sup> The 1966 amendment was intended to make final judgments of state and foreign courts payable from the permanent indefinite appropriation established by the Act.<sup>4</sup> Congress stated that it did not intend the permanent indefinite appropriation to be used to satisfy judgments that are otherwise provided for.<sup>5</sup> Further amendments were primarily technical.

<sup>3</sup>*Id.* at 2.

<sup>4</sup>*Id.* at 2.

<sup>5</sup>*Id.* at 2.

### **2.6.5.3. Law in Practice**

It is commonly referred to as the "judgment fund" statute. 41 U.S.C. § 612 (a) and (b) of the Contract Disputes Act (CDA) provide that an adverse decision or monetary award against the Government for claims under the CDA will be paid out of the judgment fund established by 31 U.S.C. § 1304.<sup>6</sup> The agencies then reimburse any payments made through the fund from their annual appropriations.<sup>7</sup> There are no formal regulations or guidance governing the payment process, but the General Accounting Office has issued an informal instruction letter.<sup>8</sup> The ASBCA Recorder has indicated that, of the 2400 cases administered by the ASBCA, 1 or 2 per month require payment through the judgment fund.<sup>9</sup> The rest are paid through contract modification.<sup>10</sup> This statute is referenced in FAR section 33.105, "Protests to GSBICA." No comments were received from the Government or industry on this statute.

### **2.6.5.4. Recommendation and Justification**

#### **No action**

The Panel took no action this statute. It does not present a core acquisition issue and only has an indirect relationship to contracting. The Panel believes that while this statute is tangentially related to DOD acquisition, it is not appropriate for action by the Panel.

### **2.6.5.5. Relationship to Objectives**

Action on this statute would not specifically promote the objectives of the Panel.

## **2.6.6. 31 U.S.C. § 3717**

### **Interest and penalty on claims**

#### **2.6.6.1. Summary of the Law**

This section describes the minimum rate of interest the head of an agency shall charge on an outstanding debt on a U.S. Government claim. This rate is equal to the average investment rate obtained on U.S. Treasury tax and loan accounts for the twelve month period ending September 30 of each year, rounded to the nearest whole percentage point. This rate is to be published by the Secretary of the Treasury and shall be effective on the first day of the next calendar quarter. The Secretary of the Treasury may change the rate of interest if the current rate is more or less than the existing published rate by two percentage points. This statute also provides for the events that trigger the accrual of interest. The rate to be charged, once determined, remains fixed throughout the duration of the indebtedness. The head of the agency may waive interest if the amount due on the claim is paid within 30 days after the date from which interest accrues and may extend the 30 day period. The agency head may also assess a charge to cover the cost of processing and handling a delinquent claim and a penalty charge of not more than six percent a year for failure to pay a part of a debt more than 90 days past due. Interest does not accrue on these additional charges.

The provisions of this statute do not apply if a statute, regulation, loan agreement, or contract prohibits the assessment of interest and other costs and the claim is under a contract executed before October 25, 1982. Finally, the statute permits the agency head to promulgate regulations identifying circumstances that would make the waiver of the collection of interest and charges appropriate.

#### **2.6.6.2. Background of the Law**

This statute was enacted as part of the Federal Claims Collection Act of 1966.<sup>1</sup> Congress stated its purpose in enacting this law was:

to authorize heads of agencies or their designees to compromise claims that do not exceed \$20,000, and are claims for money or property arising out of activities of the agency or are referred to it. Collection action may be terminated or suspended where the individual has no present or prospective financial ability to pay any significant amount or where the cost of collection is likely to exceed the amount of recovery.<sup>2</sup>

---

<sup>1</sup>Federal Claims Collection Act of 1966, Pub. L. No. 89-508, § 3, 80 Stat. 308, 309.

<sup>2</sup>S. REP. NO. 1331, 89th Cong., 2d Sess. 1 (1966), reprinted in 1966 U.S.C.C.A.N. 2532.

At the time this law was passed, Congress noted that the existing law prevented the agencies from realistically dealing with claims of the United States arising out of their activities.<sup>3</sup> If the agency could not collect the claim, its only recourse was to refer the matter to the General Accounting Office, which would then attempt to collect it.<sup>4</sup> The agency could not compromise, terminate, or suspend a claim if it became apparent that the claim was uncollectable.<sup>5</sup> Congress commented that this inherent inflexibility in the law had resulted in repeated appeals for relief.<sup>6</sup> It stated that this statute would give the agencies the legal authority to deal realistically with the problems of collection.<sup>7</sup>

This law was amended by the Debt Collection Act of 1982.<sup>8</sup> The Debt Collection Act was enacted "to facilitate substantially improved collection procedures in the federal government."<sup>9</sup> This particular provision gave the agencies the authority to assess and collect interest and penalties on debts owed to the Government.<sup>10</sup> Until this point, there was no provision, in most cases, for the assessment of interest and penalties or, when interest could be charged, it was well below market rates.<sup>11</sup> Without the potential assessment of interest and penalties, Congress believed that debtors had no reason to pay on time.<sup>12</sup> It enacted this provision to provide incentives for "the debtor to pay while protecting the debtor and the social objective of the government programs by allowing flexibility in the assessment of the interest and penalty charges."<sup>13</sup> The statute was codified in its current form in 1983.<sup>14</sup>

### 2.6.6.3. Law in Practice

This statute has been implemented in numerous FAR sections, including subsection 33.280<sup>15</sup> and various subsections under section 32.614.<sup>16</sup> No Government or industry comments were received on this statute.

### 2.6.6.4. Recommendation and Justification

#### No action

The Panel took no action on this law. This law is not unique to contracting or DOD acquisition. The Panel believes that this statute is related to DOD acquisition, but is not of primary importance to the Panel at this time.

Action on this statute would not specifically promote the objectives of the Panel.

## **2.6.7. 41 U.S.C. §§ 601 - 613**

### **Contract Disputes Act**

#### **2.6.7.1. Summary of the Law**

The Contract Disputes Act provides a statutory process for the resolution of claims and disputes arising out of the administration of Government contracts.

Section 601 defines the terms "agency head," "executive agency," "contracting officer," "contractor," "Administrator," "agency board," and "misrepresentation of fact." Section 602 applies the authority in this Act to any express or implied contract entered into by an executive agency for the disposal of personal property or the procurement of property, services or construction, alteration, repair, or maintenance of real property. For the contracts of the Tennessee Valley Authority, this authority applies to only those contracts that contain a clause allowing for resolution through an agency administrative process. At the discretion of the agency head, this authority may not apply to contracts with a foreign Government, an agency thereof, or an international organization.

Section 603 states that any appeals of maritime contracts shall be governed by chapters 20 or 22, as applicable, of Title 46. Section 604 makes a contractor liable to the Government if he is unable to support a claim and that inability is determined to be because of a misrepresentation of fact or fraud. This liability will be equal to the amount of the unsupported claim and all costs incurred by the Government in reviewing the claim. This statute also sets a six year statute of limitations on such an action.

Section 605 requires all claims by a contractor against the Government to be submitted in writing to the contracting officer for a decision. Once a decision is made, the contracting officer shall issue it in writing and mail or furnish a copy to the contractor. While the decision must state the reasons and inform the contractor of his rights, specific findings of fact are not necessary and are not binding if made. This authority shall not extend to a claim or dispute for penalties or forfeiture and does not permit the contracting officer to resolve any claim involving fraud. The contracting officer's decision is final and not reviewable except as authorized by this chapter. A decision on claims under \$50,000 shall be made in less than 60 days from receipt of a written request from the contractor. Claims over \$50,000 require certification from the contractor and a decision will be made 60 days after receipt of the certification. In the event of undue delay, the contractor can request the agency board of contract appeals to direct the contracting officer to issue a decision in a specified period of time. Any failure of the contracting officer to issue a decision within the applicable time limits shall be deemed to be a denial and will authorize the commencement of an appeal or suit as provided in this chapter. The contractor and contracting officer can decide to use alternative means of dispute resolution in resolving the claim once the contractor has certified the claim. The statutory basis for the use of alternative means of dispute resolution will terminate after October 1, 1995.

Section 606 permits the contractor to appeal the contracting officer's decision to the agency board of contract appeals within 90 days from receipt of the decision. Section 608 requires the agency board to promulgate rules that establish simplified procedures for the expedited resolution of claims under \$10,000. This small claims procedure shall be applicable at the sole election of the contractor and these appeals shall be resolved within 120 days from the date on which the contractor elects to utilize the procedure. A decision made under the small claims procedure will be final and unappealable and will have no value as precedent for future cases. Every three years, a review will be made to determine the amount that qualifies a claim as a "small claim."

Section 609 permits a contractor to appeal the decision of a contracting officer directly to the U.S. Claims Court<sup>1</sup> without first appealing to the agency board of contract appeals. An appeal on a contract concerning the Tennessee Valley Authority will be taken directly to the U.S. District Court. An appeal under this section shall be filed within 12 months of the receipt of the contracting officer's decision. If the contractor or the Government appeals from the agency board, the board's decision will not be final on a question of law, but will be final on a question of fact unless the decision is fraudulent or so grossly erroneous as to necessarily imply bad faith. If two or more suits arising from one contract are filed with the U.S. Claims Court and one or more of the agency boards, the Claims Court may order the consolidation of the suits or the transfer of the suits to or among the agency boards involved.

Section 610 permits a member of an agency board of contracts appeals to administer oaths to witnesses, authorize depositions and discovery proceedings, and subpoena the attendance of witnesses and production of books and papers. A district court, upon application of the agency board through the Attorney General, may issue an order requiring a person to obey the board's subpoena.

Section 611 requires interest to be assessed on amounts owed to a contractor from the date the contracting officer received the claim until the payment is made. The interest will be paid at the rate established by the Secretary of the Treasury.

Section 612 requires any judgments or monetary awards against the United States to be paid from the permanent indefinite judgment fund established in 31 U.S.C. § 1304. Any payments made from the fund will be reimbursed by the agency whose appropriations were used for the contract out of available funds or by obtaining additional appropriations. Any judgments or monetary awards assessed against the Tennessee Valley Authority shall be paid according to the procedures described in 16 U.S.C. § 831h(b). Section 613 provides that if one of the provisions described above is held invalid, the other provisions will not be affected by that decision.

---

<sup>1</sup>During the writing of this report, Congress changed the name of the U.S. Claims Court to the Court of Federal Claims. See Federal Courts Administration Act of 1992; Court of Federal Claims Technical and Procedural Improvements Act of 1992, Pub. L. No. 102-572, § 907(a) & (b), 106 Stat. 4518.

### 2.6.7.2. Background of the Law

The Contract Disputes Act of 1978 was passed to provide:

a fair, balanced and comprehensive statutory system of legal and administrative remedies in resolving Government contract claims. The act's provisions help to induce resolution of more contract disputes by negotiation prior to litigation; equalize the bargaining power of the parties when a dispute exists; provide alternate forums suitable to handle the different types of disputes; and insure fair and equitable treatment to contractors and Government agencies.<sup>2</sup>

At the time of the Act's passage, "the means for resolving disputes for Government contracts was a mixture of contract provisions, agency regulations, judicial decisions and statutory coverage."<sup>3</sup> Direct access to the courts was limited to breach of contract claims, and the agencies limited even these claims as much as possible by contract clauses that were not subject to negotiation.<sup>4</sup> Congress believed that the contract remedies system of the time had developed without direction, and the problems created by the system were made worse by the inappropriate application of the Administrative Procedures Act philosophy to the adjudication of contract disputes.<sup>5</sup> Congress stated further that "the present system is often too expensive and time consuming for the efficient and cost effective resolution of small claims and, on the other hand, often fails to provide the procedural safeguards and other elements of due process [that] should be the right of litigants."<sup>6</sup> The Subcommittees on Federal Spending Practices and Open Government and the Subcommittee on Citizens and Shareholders Rights and Remedies held extensive hearings on the proposed Act.

In the definitional section, Congress specifically excluded subcontractors from the authority of the Act. It stated that by dealing with only prime contractors, the Government's job was made easier and cheaper, and many frivolous claims were eliminated.<sup>7</sup> In the section addressing settlement authority, Congress abolished the distinction between claims "arising under the contract" and claims "brought for breach of contract."<sup>8</sup> It believed that this would eliminate the persistent problems over the types of claims an agency could settle and was essential to make the system more efficient.<sup>9</sup>

In the section establishing the informal administrative conference, Congress stated that its intention was not to undermine the authority of the contracting officer, but to "encourage both

<sup>9</sup>*Id.* at 19.

parties to settle claims at the earliest opportunity."<sup>10</sup> In another provision, Congress gave the agencies the ultimate authority to determine if an agency board of contract appeals was necessary but recommended that the expertise of the Office of Federal Procurement Policy should be consulted in making that determination.<sup>11</sup> A separate provision was included to address the procedures to be followed for small claims.<sup>12</sup> It stated that "[t]he purpose of the expedited small claims procedure with its lack of due process safeguards is to provide simplicity, speed and economy."<sup>13</sup> In the section granting the boards of contract appeals the authority to issue subpoenas and order discovery, Congress stated that this authority was necessary to ensure that the boards' records would be complete and that the boards would have the ability to obtain the information necessary for accurate findings.<sup>14</sup> Congress passed the Act in virtually the same form it exists in the Code today.

Congress recently amended the certification requirements in 41 U.S.C. § 605(c) to broaden the definition of who may certify a contract claim and to clarify that defects in certification do not divest the disputes forum of jurisdiction.<sup>15</sup> Interest may be charged from the time of submission of the original certification, and this provision becomes effective 60 days after implementation of these amendments in the Federal Acquisition Regulation (FAR).

### 2.6.7.3. Law in Practice

The Contract Disputes Act has been referenced or implemented in over 150 sections of the FAR, but the primary section addressing this Act is section 33.202.<sup>16</sup>

The Inspector General of the Department of Defense (DODIG) notes inconsistency among the False Claims Act, the Contract Disputes Act, and 28 U.S.C. § 2514.<sup>17</sup> The DODIG argues that the burden of proof required under the Contract Disputes Act and 28 U.S.C. § 2514 should be consistent with the one contained in the False Claims Act.<sup>18</sup> The DODIG recommends that the definition of "fraud" in 28 U.S.C. § 2514 and the term "misrepresentation of fact" in the Contract Disputes Act should conform with the definition of "knowing" and "knowingly" in the False Claims Act.<sup>19</sup> The DODIG argues that these recommendations will "provide for consistency among the three laws concerning the level of knowledge and the standard of proof necessary to prove a false claim against the Government."<sup>20</sup>

<sup>20</sup>*Id.*

The American Bar Association Section of Public Contract Law (the Section) believes that a statutory change is necessary to eliminate an existing overlap between the Contract Disputes Act (CDA) and the False Claims Act.<sup>21</sup> The Section notes that disputes over the proper interpretation of a contract term can form the basis for both a contract action under the CDA and an action by the Government or a *qui tam* relator under the False Claims Act.<sup>22</sup> The Section argues that allegations of fraud often have the practical effect of transforming a contract dispute into a False Claims Act case, which would then fall within the jurisdiction of the district court.<sup>23</sup> It believes that district court judges and juries do not have the expertise to hear and decide complex statutory and regulatory procurement issues, while the Claims Court and board of contract appeals are more experienced in construing Federal procurement laws.<sup>24</sup> The Section argues that "the inability of a contractor to obtain Claims Court or board review of legal issues relating to contract interpretation undermines the congressional mandate vesting exclusive jurisdiction over contract disputes in a specialized fora."<sup>25</sup> The Section recommends the enactment of a statute clearly establishing that the boards of contract appeals and the Claims Court have jurisdiction over Federal procurement law disputes, regardless of the presence of fraud allegations. It believes that this statute will result in the consistent and workable interpretation of Federal contract issues.<sup>26</sup> The Section also recommends the retention of the claim certification requirement in 41 U.S.C. § 605, as amended by the Federal Courts Administration Act of 1992,<sup>27</sup> while recommending repeal, or in the alternative, amendment of the certification requirement in 10 U.S.C. § 2410.<sup>28</sup>

The Nash and Cibinic Report (the Report) notes that there was considerable discussion about the amount of litigation under the CDA at the Judicial Conference of the U.S. Claims Court in 1987.<sup>29</sup> It reports that the focus of discussion was on jurisdictional and administrative procedures under the CDA. The Report states that there have been many instances when the lack of declaratory judgment jurisdiction has proven to be a bar to the consideration of nonmonetary claims under the CDA.<sup>30</sup> The Report indicates that it was decided that an amendment to the CDA would be the most efficient way to remedy this situation.<sup>31</sup> The discussion of this issue at the Judicial Conference indicated that, while most agreed that a change was needed, "there was almost no consensus on a statutory amendment . . . It was clear that while the judges of the court and private practitioners would like to see some solution which removes this jurisdictional bar, the Department of Justice (DOJ) is very reluctant to agree to an amendment in this area."<sup>32</sup> The Report also noted the discussion on the issue of certification and the problems it has continued to

<sup>31</sup>*Id.*

<sup>32</sup>*Id.*

create, especially in the face of Federal Circuit decisions that the issue is jurisdictional.<sup>33</sup> Congress recently addressed problems with certification requirements.<sup>34</sup>

The last area of major focus at the Conference concerned the applicable statute of limitations. The Report relates that, although there is a general six year statute of limitations on all suits against the Government in the U.S. Claims Court, there have been decisions that determined that this statute of limitations is not applicable to the CDA.<sup>35</sup> "As a result of this confusing situation, the DOJ representatives at the Judicial Conference suggested that the CDA be amended to include an 18 month statute of limitations on the assertion of claims to the contracting officer (CO). In the ensuing discussion there seemed to be agreement that any such statute should cover both claims by contractors and by the Government. There also seemed to be agreement that 18 months was a rather short period of time and that three years might be more appropriate."<sup>36</sup> The Report concluded its discussion of the CDA by commenting that nine years of litigation have shown many areas of controversy that have significantly decreased the efficiency of the Act.<sup>37</sup> It urged the formulation of legislative adjustments to correct these problems.<sup>38</sup>

Also of concern at the Conference were the problems presented by the appeal time differences inherent in the CDA.<sup>39</sup> 41 U.S.C. § 606 allows 90 days for appeals to agency appeals boards, while 41 U.S.C. § 609(a)(3) gives one year for appeals to the Claims Court.<sup>40</sup> There appears to be no reason for this difference in appeals times and has caused some confusion among contracting officers.<sup>41</sup> All participants indicated that an amendment to provide for one consistent appeal period would be welcomed.<sup>42</sup>

In 1980, the Office of Federal Procurement Policy (OFPP) issued guidance on this statute in the form of Policy Letter 80-3.<sup>43</sup> This Policy Letter was intended "to ensure that the procuring agencies adopted uniform and consistent language when amending their regulations to comply with changes required by the Contract Disputes Act."<sup>44</sup> It was also intended to further the congressional goal of providing expedient resolution of contractor claims without expending time litigating the certification issue.<sup>45</sup> In the first nine years, there was little litigation over the language provided in Policy Letter 80-3 and the language was included virtually verbatim into FAR Section 33.207(c).<sup>46</sup> However, in the last few years this has become the major issue

<sup>44</sup> *Id.* (citing 45 Fed. Reg. 31035 (May 9, 1980)).

<sup>45</sup>*Id.*

<sup>46</sup>*Id.*

litigated in the contract disputes area.<sup>47</sup> The Court of Appeals for the Federal Circuit has interpreted the language in FAR section 33.207(c), causing a rash of litigation into every aspect of the Court's interpretation, "including what constitutes 'primary responsibility,' what level of physical presence qualifies as being 'at' the plant or location involved, and what constitutes overall responsibility 'in general.'"<sup>48</sup>

In response to this rash of litigation, OFPP proposed to replace the certification guidance in Policy Letter 80-3 with new language.<sup>49</sup> The new language proposes to allow certification by any general partner of a partnership of individuals, an officer appointed by the contractor's governing body, or an employee authorized by specific action to certify CDA claims.<sup>50</sup> OFPP intends this recommendation to deter the submission of unsupported and inflated claims and to promote efficiency at the contractor level by allowing the contractor to designate specific people with the authority to certify.<sup>51</sup> OFPP hopes that this revised language will "help guarantee that the emphasis of dispute resolution moves away from the issue of certification and returns to the merit of the claim."<sup>52</sup> OFPP intends to make these changes in late 1992 or early 1993.

OFPP's efforts will be directly impacted, however, by Congress' recent amendments to both the CDA and 10 U.S.C. § 2410. In the Federal Courts Administration Act of 1992,<sup>53</sup> Congress amended the certification requirements of the CDA to broaden the definition of who is authorized to certify contract claims and to clarify that defects in certification do not divest the disputes forum of jurisdiction. In the National Defense Authorization Act for Fiscal Year 1993, Congress authorized the Secretary of Defense to promulgate regulations in the FAR requiring that a contractor claim be certified as required in the CDA and that this certification be made by a person with the authority to bind the contractor and with the requisite knowledge of the claim or request for relief.<sup>54</sup> Once these regulations are published, 10 U.S.C. § 2410 would be repealed.<sup>55</sup> Congress stated that this statute has prevented the adoption of a Government-wide certification standard.<sup>56</sup> The repeal of the statute and publication of regulations were intended to facilitate a single certification standard.<sup>57</sup>

#### **2.6.7.4. Recommendations and Justification**

### **I**

#### **Amend the time for appeals to the Claims Court contained in 41 U.S.C. § 609(a)(3).**

The Panel recommends that this statute be amended to change the time in which a contractor may appeal to the Claims Court on a decision by a contracting officer from one year to 90 days. The current one year appeal limitation is in the Contract Disputes Act at 41 U.S.C. § 609(a)(3). There is no sound reason for having two separate periods for appeal to the Claims Court and the boards of contract appeals. Further, the Panel believes that the one year appeal limitation impedes the Government in its resolution of contractor claims because the matters are left open for long periods of time, personnel turnover makes locating witnesses difficult, and documents can be lost, misplaced, or destroyed in that one year time period. The Panel believes that a 90 day period, which is the current time period allowed to appeal to the agency boards under 41 U.S.C. § 606, is reasonable for all contractor appeals. The Panel recommendation to amend this statute will streamline the acquisition process by making the time for all contractor appeals consistent while preserving the financial and ethical integrity of the acquisition process.

### **II**

#### **Amend 41 U.S.C. § 605 to raise the threshold amounts from \$50,000 to \$100,000 and to incorporate Congress' recent amendments regarding certification in subsection (c).**

The Panel recommends that the \$50,000 claims threshold for issuance of a decision by the contracting officer and for certification by the contractor be raised to \$100,000. This larger amount is attributable to the amount of inflation experienced since the passage of the Contract Disputes Act. The Panel is attempting to establish a uniform, simplified acquisition threshold throughout the statutes it is reviewing and believes that a higher threshold of \$100,000 is better suited to the current economic environment. The Panel recommends removing the term "\$50,000" wherever it appears in 41 U.S.C. § 605 (c) and replacing it with the term "\$100,000."

The Panel supports the amendments made by Congress to the certification provisions in 41 U.S.C. § 605(c). This section contains one of three certification provisions pertaining to contract claims. 10 U.S.C. § 2410 governs certification of claims and other requests for relief exceeding \$100,000 under DOD contracts, and 10 U.S.C. § 2405 contains certification requirements applicable to shipbuilding claims. The Panel was considering recommendations to develop a single certification provision for claims on Government contracts and to relax the stringent requirements regarding deficient certifications. The Panel believes that Congress' amendments to 41 U.S.C. § 605(c) and 10 U.S.C. § 2410 go a long way toward achieving these goals and has included the most recent congressional amendments in the proposed statutory language included below. The Panel agrees with Congress that the overlapping requirements at 10 U.S.C. § 2410 should be repealed upon the promulgation of regulatory guidance but notes that the overlapping certification

requirements at 10 U.S.C. § 2405 could continue to be a barrier to a single government-wide certification.

### **III**

**Amend 41 U.S.C. § 605(a) to include a six year statute of limitations for the filing of claims by and against the Government.**

The Panel recommends that a six year statute of limitations be included in the CDA. There is currently a general six year statute of limitations for all suits against the Government in the Claims Court. However, the courts have determined that this statute of limitations does not apply to claims filed under the CDA. In decisions issued by the Claims Court and the Federal Circuit, the courts reasoned that by imposing a one year statute of limitations on all appeals from contracting officer decisions, the CDA overrides the general six year statute of limitations. These decisions have left doubt whether a statute of limitations exists under the CDA and, if so, how much time is given. This situation has caused some confusion and litigation among the participants in the DOD procurement process. The Panel believes that a statute of limitations in the CDA is appropriate and has recommended a six year time length to remain consistent with the general Claims Court statute of limitations.

### **IV**

**Amend 41 U.S.C. § 608(a) to raise the maximum amount from \$10,000 to \$25,000.**

The Panel recommends that the \$10,000 claims maximum amount for the use of the small claims appeals process be raised to \$25,000. The Panel believes that this figure is not only more responsive to the level of inflation experienced since the Contract Disputes Act was passed, but will also serve to enable more contractors to use the expedited appeals process. By having more contractors use this expedited procedure, the agency boards will have more opportunity to concentrate on the larger claims. The Panel recommends that the term "\$10,000" be removed wherever it appears in 41 U.S.C. § 608 and replaced with the term "\$25,000."

#### **2.6.7.5. Relationship to Objectives**

These recommendations will provide the means for expeditious and fair resolution of procurement disputes through uniform interpretation of laws and implementing regulations.

## 2.6.7.6. Proposed Statute

### § 605. Decision by contracting officer<sup>58</sup>

#### (a) Contractor claims

All claims by a contractor against the government relating to a contract shall be in writing and shall be submitted to the contracting officer for a decision. All claims by the government against a contractor relating to a contract shall be the subject of a decision by the contracting officer. All claims by a contractor against the government relating to a contract and all claims by the government against a contractor relating to a contract must be brought within six years of the occurrence of the events giving rise to the claim. The contracting officer shall issue his decisions in writing, and shall mail or otherwise furnish a copy of the decision to the contractor. The decision shall state the reasons for the decision reached, and shall inform the contractor of his rights as provided in this chapter. Specific findings of fact are not required, but, if made, shall not be binding in any subsequent proceedings. The authority of this subsection shall not extend to a claim or dispute for penalties or forfeitures prescribed by statute or regulation which another Federal agency is specifically authorized to administer, settle, or determine. This section shall not authorize any agency head to settle, compromise, pay, or otherwise adjust any claim involving fraud.

#### (b) Review; performance of contract pending appeal

The contracting officer's decision on the claim shall be final and conclusive and not subject to review by any forum, tribunal, or Government agency, unless an appeal or suit is timely commenced as authorized by this chapter. Nothing in this chapter shall prohibit executive agencies from including a clause in government contracts requiring that pending final decision of an appeal, action, or final settlement, a contractor shall proceed diligently with performance of the contract in accordance with the contracting officer's decision.

#### (c) Amount of claim; certification; notification; time of issuance; presumption

(1) A contracting officer shall issue a decision on any submitted claim of ~~\$50,000~~ \$100,000 or less within sixty days from his receipt of a written request from the contractor that a decision be rendered within that period. For claims of more than ~~\$50,000~~ \$100,000, the contractor shall certify that the claim is made in good faith, that the supporting data are accurate and complete to the best of his knowledge and belief, that the amount requested accurately reflects the contract adjustment for which the contractor believes the government is liable, and that the certifier is duly authorized to certify the claim on behalf of the contractor.

---

<sup>58</sup>Subsections (6) and (7) were added by the Federal Courts Administration Act of 1992; Court of Federal Claims Technical and Procedural Improvements Act of 1992, Pub. L. No. 102- 572, § 907(a) & (b), 106 Stat. 4518. The Panel has made an additional amendment to subsection (6) by raising the threshold amount from \$50,000 to \$100,000.

(2) A contracting officer shall, within sixty days of receipt of a submitted certified claim over ~~\$50,000~~ \$100,000--

(A) issue a decision; or

(B) notify the contractor of the time within which a decision will be issued.

(3) The decision of a contracting officer on submitted claims shall be issued within a reasonable time, in accordance with regulations promulgated by the agency, taking into account such factors as the size and complexity of the claim and the adequacy of the information in support of the claim provided by the contractor.

(4) A contractor may request the agency board of contract appeals to direct a contracting officer to issue a decision in a specified period of time, as determined by the board, in the event of undue delay on the part of the contracting officer.

(5) Any failure by the contracting officer to issue a decision on a contract claim within a period required will be deemed to be a decision by the contracting officer denying the claim and will authorize the commencement of the appeal or suit on the claim as otherwise provided in this chapter. However, in the event an appeal or suit is so commenced in the absence of a prior decision by the contracting officer, the tribunal concerned may, at its option, stay the proceedings to obtain a decision on the claim by the contracting officer.

(6) The contracting officer shall have no obligation to render a final decision on any claim of more than ~~\$50,000~~ \$100,000 that is not certified in accordance with paragraph (1) if, within 60 days after receipt of the claim, the contracting officer notifies the contractor in writing of the reasons why any attempted certification was found to be defective. A decertification was found to be defective. A defect in the certification of a claim shall not deprive a court or an agency board of contract appeals of jurisdiction over that claim. Prior to the entry of a final judgment by a court or a decision by an agency board of contract appeals, the court or agency board shall require a defective certification to be corrected.

(7) The certification required by paragraph (1) may be executed by any person duly authorized to bind the contractor with respect to the claim.

#### **§ 608. Small claims**

##### **(a) Accelerated disposition of appeals**

The rules of each agency board shall include a procedure for the expedited disposition of any appeal from a decision of a contracting officer where the amount in dispute is ~~\$10,000~~ \$25,000 or less. The small claims procedure shall be applicable at the sole election of the contractor.

**(b) Simplified rules of procedure**

The small claims procedure shall provide for simplified rules of procedure to facilitate the decision of any appeal thereunder. Such appeals may be decided by a single member of the agency board with such concurrences as may be provided by rule or regulations.

**(c) Time of decision**

Appeals under the small claims procedure shall be resolved, whenever possible, within one hundred twenty days from the date on which the contractor elects to utilize such procedure.

**(d) Finality of decision**

A decision against the Government or the contractor reached under the small claims procedure shall be final and conclusive and shall not be set aside except in cases of fraud.

**(e) Effect of decision**

Administrative determinations and final decisions under this section shall have no value as precedent for future cases under this chapter.

**(f) Review of requisite amount in controversy**

The Administrator is authorized to review at least every three years, beginning with the third year after November 1, 1978, the dollar amount defined in subsection (a) of this section as a small claim, and based upon economic indexes selected by the Administrator adjust that level accordingly.

**§ 609. Judicial review of board decisions**

**(a) Actions in United States Claims Court; district court actions; time for filing**

(1) Except as provided in paragraph (2), and in lieu of appealing the decision of the contracting officer under section 605 of this title to an agency board, a contractor may bring an action directly on the claim in the United States Claims Court, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(2) In the case of an action against the Tennessee Valley Authority, the contractor may only bring an action directly on the claim in a United States district court pursuant to section 1337 of title 28, notwithstanding any contract provision, regulation, or rule of law to the contrary.

(3) Any action under paragraph (1) or (2) shall be filed within ~~twelve months~~ ninety days from the date of the receipt by the contractor of the decision of the contracting officer concerning the claim, and shall proceed de novo in accordance with the rules of the appropriate court.

**(b) Finality of board decisions**

In the event of an appeal by a contractor of the Government from a decision of any agency board pursuant to section 607 of this title, notwithstanding an contract provision, regulation, or rules of law to the contrary, the decision of the agency board on any question of law shall not be final or conclusive, but the decision on any question of fact shall be final and conclusive and shall not be set aside unless the decision is fraudulent, or arbitrary, or capricious, or so grossly erroneous as to necessarily imply bad faith, or if such decision is not supported by substantial evidence.

**(c) Remand or retention of case**

In any appeal by a contractor or the Government from a decision of any agency board pursuant to section 607 of this title, the court may render an opinion and judgment and remand the case for further action by the agency board or by the executive agency as appropriate, with such direction as the court considers just and proper.

**(d) Consolidation**

If two or more suits arising from one contract are filed in the United States Claims Court and one or more agency boards, for the convenience of parties or witnesses or in the interest of justice, the United States Claims Court may order the consolidation of such suits in that court or transfer any suits among the agency boards involved.

**(e) Judgments as to fewer than all claims**

In any suit filed pursuant to this chapter involving two or more claims, counterclaims, cross-claims, or third-party claims, and where a portion of one such claim can be divided for purposes of decision or judgment, and in any such suit where multiple parties are involved, the court, whenever such action is appropriate, may enter a judgment as to one or more but fewer than all of the claims, portions thereof, or parties.

## **2.7. Extraordinary Contractual Relief**

### **2.7.0. Introduction**

The authority contained in 50 U.S.C. §§ 1431-1435, popularly known as Pub. L. No. 85-804, permits the President to authorize any department or agency to enter into or modify contracts and make advance payments without regard to law or regulation when the President determines that such action is in the interest of national defense. This authority is limited to times of national emergency declared by Congress or the President, and up to six months thereafter. Although the authority contained in these statutes is very broad, it has been more defined in practice by a series of Executive Orders dating back to the 1950s. These Executive Orders include most of the language of the statutes and provide more specific guidance on their implementation.

The authority contained in these statutes is important to the proper function of all Federal agencies affected by it and should be retained. DOD and NASA are the primary users of this authority and neither has indicated problems with its implementation. The private sector expressed a concern about the implementation of the indemnification provisions of the Executive Orders; however, the Panel determined that this problem would be better solved by a change in the regulations and the Executive Order than by a statutory amendment. The Panel also decided that an increase of the dollar threshold in 50 U.S.C. § 1431 would have little impact on the operation of the statute but noted that Congress may wish to revisit this issue.

The Panel does recommend one change to broaden the applicability of extraordinary contractual relief. It is currently limited to times of national emergency. In a recent bill reauthorizing the Defense Production Act, Congress included a provision permitting a similar exercise of authority in times of national emergency or by declaration of the President that such exercise is necessary.<sup>1</sup> The Panel believes that these amendments indicate that Congress has recognized that some statutory authority, previously reserved for times of war or national emergency, should be available in peacetime as well. Pub. L. No. 85-804 has been in effect since the 1950s and has been used steadily and effectively in that time by the military departments and other Federal agencies. The authority contained therein has been used widely for indemnification of unusually hazardous risks and is treated as permanent by many in the procurement system. The Panel believes that this very useful authority should be available at all times and recommends the repeal of the section limiting the authority to times of national emergency.

## **2.7.1. 50 U.S.C. §§ 1431-1435 (Pub. L. No. 85-804)**

### **Extraordinary Contractual Relief<sup>1</sup>**

#### **2.7.1.1. Summary of the Law**

This public law has been codified into 50 U.S.C. §§ 1431-1435; however, it is more commonly known by its public law number.

50 U.S.C. § 1431 permits the President to authorize any department or agency to enter into contracts, amend or modify contracts, and make advance payments on contracts without regard to law or regulation when the President determines that such action is in the interest of the national defense. The authority is not granted for obligations of greater than \$50,000 without approval by an official at or above the level of an Assistant Secretary or his Deputy, or an assistant head or his deputy, of such department or agency, or by a Contract Adjustment Board or for obligations greater than \$25,000,000 without notification, in writing, to the Senate and House Armed Services Committees.

Section 1432 restricts the broad authority given in the previous section. This law prohibits the use of the cost-plus-a-percentage-of-cost system of contracting, mandates the use of formal advertising and competitive bidding when required, and prohibits the violation of the laws on limitation of profits.

Section 1433 requires the insertion of a contract clause granting the Comptroller General of the United States access to the books and records of all contractors for up to three years after the completion of the contract. The President may promulgate regulations exempting contracts with foreign contractors or Governments from this requirement. A written report to Congress is required when the exemption is used.

Section 1434 requires agencies to make an annual report to Congress whenever they take action under the provisions of this section.

Section 1435 limits the effective period of these sections to the time of a national emergency declared by Congress or the President, and up to six months thereafter.

#### **2.7.1.2. Background of the Law**

<sup>1</sup>This public law has been codified into the following statutes:

50 U.S.C. § 1431 - Authorization; official approval; Congressional action; notification of committees of certain proposed obligations, resolution of disapproval, continuity of session, computation of period

50 U.S.C. § 1432 - Restrictions

50 U.S.C. § 1433 - Public record; examination of records by Comptroller General; exemptions; exceptional conditions; reports to Congress

50 U.S.C. § 1434 - Reports to Congress; publication

50 U.S.C. § 1435 - Effective period

All five sections were passed as part of Pub. L. No. 85-804.<sup>2</sup> This legislation was enacted to make permanent the authority granted in Title II of the First War Powers Act, 1941, with certain exceptions, which expired on June 30, 1958 after two extensions.<sup>3</sup> This authority was originally passed during World War II and was only effective during that war, but was revived by President Truman in 1951 after he declared a national emergency at the outbreak of the Korean conflict.<sup>4</sup> Title II was extended five times by the next four Congresses.<sup>5</sup> In 1958, DOD asked Congress to make this authority permanent to relieve DOD from continually asking for extensions.<sup>6</sup> In view of the country's involvement in the Cold War at that time, this request was granted.

The purpose of this law was to enable the Federal Government to address situations that normally arise in a multibillion dollar procurement program but are not adequately addressed by the normal procurement authority.<sup>7</sup> Congress intended that the agencies of Government be permitted to obtain vital products and services during times of national emergency without the normal delays caused by misunderstandings, mistakes, and ambiguities.<sup>8</sup> Congress found that without this authority or its equivalent "it would be difficult or impossible to employ some of the special procurement techniques which are necessary in times of partial mobilization."<sup>9</sup> The major categories of problems this law would help to alleviate include amendments without consideration, unavoidable mistakes and ambiguities, formalization of informal commitments, and the making of advance payments.<sup>10</sup> In particular, amendments without consideration were retained "to insure the continued availability to the Government of a necessary source of supply. . . ." <sup>11</sup>

Certain restrictions on this authority were included and remain unchanged in 50 U.S.C. § 1432 today. Because Congress felt this authority should not be exercised without oversight, it required that annual reports be made to Congress whenever the authority had been used, as well as requiring dissemination through publication in the Congressional Record.<sup>12</sup> Congress believed this legislation "provides adequate safeguards to the public purse and at the same time allows the flexibility necessary for an efficient and fair procurement program for our national defense."<sup>13</sup> While the basic authority contained in these laws remains much the same as when they were passed in 1958, there have been several additions. The \$25 million limitation on obligations of the United States, contained in 50 U.S.C. § 1431, was added after the enactment of Pub. L. No. 85-

804, as was the authority to exempt foreign contractors and foreign Governments from the inspection of records requirement contained in 50 U.S.C. § 1433.<sup>14</sup>

These statutes are referenced in 50 U.S.C. § 1651, "Other laws, powers and authorities conferred thereby, and actions taken thereunder; Congressional studies." 50 U.S.C. § 1651 and those statutes preceding it were enacted as part of the National Emergencies Act of 1976, which provided for the termination of all existing national emergencies and the procedures to be followed in declaring and terminating future national emergencies.<sup>15</sup> Section 1651 exempts certain statutes from the provisions of the National Emergencies Act, including 50 U.S.C. §§ 1431 - 1435.

### 2.7.1.3. Law in Practice

The authority given by this public law is very broad and has been more defined in practice by a series of Executive Orders starting in the 1950s.<sup>16</sup> These Executive Orders include most of the language of the statutes and provide more specific guidance on their implementation. Some of that guidance includes:

- The limitation as to amounts appropriated and contract authorization provided does not apply to indemnification provisions for "claims and losses arising out of or resulting from risks that the contract defines as unusually hazardous or nuclear in nature."<sup>17</sup> This limitation applies only to those claims that are not adequately covered by insurance and are not caused by willful misconduct or lack of good faith on the part of the contractor or subcontractor.
- The authority to discharge an obligation by paying a subcontractor or third party obligor directly is available.
- The requirement that DOD maintain records of all actions taken and make an annual report to Congress describing the circumstances of each use.
- Every contract entered into under this authority must contain a clause requiring the contractor to warrant that no person or agency has been employed by the contractor to solicit the contractor in exchange for a commission or contingent fee.
- Socioeconomic provisions such as anti-discrimination, Walsh-Healey Act, Davis-Bacon Act, Copeland Act, and Eight Hour Law shall still apply to contracts made under this authority.

<sup>16</sup>Exec. Order No. 10,789, 23 Fed. Reg. 8897 (1958), *reprinted in* 50 U.S.C.A. § 1431 at 489-92 (1991), as amended by Exec. Order No. 11,051, 27 Fed. Reg. 9683 (1962), Exec. Order No. 11,382, 32 Fed. Reg. 16,247 (1967), Exec. Order No. 11,610, 36 Fed. Reg. 13,755 (1971), Exec. Order No. 12,148, 44 Fed. Reg. 43,239 (1979).

<sup>17</sup>Exec. Order No. 10,789, 23 Fed. Reg. 8897 (1958), *reprinted in* 50 U.S.C.A. § 1431 at 489 (1991).

• This authority was also extended to the Departments of Treasury, Interior, Agriculture, Commerce, Transportation, the Atomic Energy Commission, the General Services Administration, the National Aeronautics and Space Administration, the Tennessee Valley Authority, Government Printing Office, and the Federal Emergency Management Agency.

Every year, agencies are required to submit a report to Congress describing the circumstances and outcomes of all requests for Pub. L. No. 85-804 relief. These reports are then published in the Congressional Record. In 1991, DOD received 57 requests for Pub. L. No. 85-804 relief, of which 44 were approved and 13 were disapproved.<sup>18</sup> DOD and NASA are the primary users of this authority.

The National Association of Surety Bond Producers (NASBP) expressed concern about the indemnity provisions associated with the public law, primarily in the area of environmental cleanup.<sup>19</sup> It is NASBP's feeling that when a contractor is hired to clean a toxic site, the surety should be responsible solely for the cleanup itself.<sup>20</sup> NASBP contends that there is a lack of liability insurance and Government indemnification in the environmental cleanup area that needs to be addressed.<sup>21</sup>

The Defense Contract Audit Agency (DCAA) stated that the terminology in 50 U.S.C. § 1432 should be consistent with the Competition in Contracting Act.<sup>22</sup> DCAA also stated that it believes that 50 U.S.C. § 1432 should be amended to require the contractor to furnish cost and pricing data pursuant to the Truth in Negotiations Act (TINA).<sup>23</sup> It further noted that 50 U.S.C. § 1433 should be amended to expand the Comptroller General's auditing authority.<sup>24</sup>

The Council of Defense and Space Industry Associations (CODSIA) stated that there is an apparent general reluctance of Government agencies to use the authority given in Pub. L. No. 85-804, and a particular reluctance to approve indemnity clauses for unusually hazardous risks.<sup>25</sup> Even so, CODSIA mentioned that this law provides a basis for "equitable treatment of a contractor which has performed in good faith and has been subjected to anomalies that were not envisioned at the time of the contract award."<sup>26</sup> It also stated that this law protects the best interests of DOD for, without this law, "the government could find itself in the position of not being able to award contracts in highly specialized areas as nuclear or high risk advanced state of

the art technology."<sup>27</sup> CODSIA mentioned that there have been some interpretive ambiguities regarding the indemnification of high risk and environmental compliance and remediation. It also recommended that the dollar threshold cited in 50 U.S.C. § 1434 should be increased. Even with these perceived problems, CODSIA stated this law serves a vitally important purpose in the acquisition process and should be retained.<sup>28</sup>

#### **2.7.1.4. Recommendations and Justification**

##### **I**

**Repeal 50 U.S.C. § 1435 to permit use of the authority contained in this statute at all times.**

50 U.S.C. § 1435 limits the application of extraordinary contractual relief to times of national emergency. The Panel believes, however, that the authority contained in these statutes should be available at all times and should not be limited to times of national emergency. In a recent bill reauthorizing the Defense Production Act, Congress included a provision permitting a similar exercise of authority in times of national emergency or by declaration of the President that such exercise is necessary.<sup>29</sup> The Panel believes that these amendments indicate that Congress has recognized that some statutory authority, previously reserved for times of war or national emergency, should be available in peacetime as well. Pub. L. No. 85-804 has been in effect since the 1950s and has been used steadily and effectively in that time by the military departments and other Federal agencies. The authority contained therein has been used widely for indemnification and is treated as permanent by many in the procurement system. The Panel believes that this necessary authority should be available at all times and recommends the repeal of 50 U.S.C. § 1435.

##### **II**

**Retain 50 U.S.C. §§ 1431-1434.**

The authority contained in Pub. L. No. 85-804 and codified in 50 U.S.C. §§ 1431-1434 is important to the proper function of all Federal agencies affected by it. DOD uses this authority more than any other agency and has voiced no complaints about its implementation. The concern expressed by the private sector on the subject of indemnification may be valid but would be better solved by a change in the regulations and the Executive Order in which indemnification is extensively addressed. Raising the dollar threshold to \$100,000 or some similar figure would have little impact on the operation of the statute. However, Congress may wish to revisit this issue when it considers repeal of 50 U.S.C. § 1435. Because these statutes have been implemented and used as Congress intended with adequate results, it is the Panel's recommendation that these statutes be retained in their entirety.

#### **2.7.1.5. Relationship to Objectives**

These statutes are important to the acquisition process because they are consistent with the development and preservation of an industrial base while encouraging the exercise of sound judgment on the part of acquisition personnel.

### **3. SERVICE SPECIFIC AND MAJOR SYSTEMS STATUTES**

#### **3.0. Introduction**

A large number of the sections reviewed by the Panel did not fit into any of the categories of contract formation, contract administration, socioeconomic requirements, standards of conduct or intellectual property. Accordingly, these disparate provisions were grouped together for purposes of analysis. The Panel divided this large collection of statutory provisions into these following categories:

- **Major Systems Statutes**
- **Testing Statutes**
- **Service Specific Laws**
- **The Brooks Act and Warner Amendment**
- **DOD Commercial and Industrial Activities**
- **Industrial Base and Manufacturing Technology Laws**
- **Fuel and Energy-Related Laws**
- **Fiscal Statutes**
- **Miscellaneous Statutes**

This list contained several subjects of great importance to the DOD acquisition process, such as major systems acquisition, testing, the acquisition of automatic data processing equipment, and the industrial base. Areas of lesser overall importance but of significant interest to special constituencies of the DOD acquisition community, such as the service specific provisions, fuel and energy laws, and the miscellaneous sections, are also included.

The Panel examined some 220 provisions in this category. The methodology employed was to group these statutes in the above-listed categories as a package with their legislative histories and to circulate them to each cognizant DOD activity, and where appropriate, to industry. Industry comments were not solicited as to statutes governing the internal workings of the DOD. The panel requested comments as to whether and how the statute was being used and recommendations as to retention, amendment or repeal. Upon receipt of comments, analysis was conducted and proposed statutory changes were provided for further comment by interested parties. In many cases this commenting process consisted of numerous iterations. Coordination consisted of correspondence, visits by the working group to cognizant officials and telephone conferences. In this manner significant consensus was developed. Nevertheless, not all recommendations achieved universal agreement.

The Panel's goals of (1) streamlining and (2) eliminating unnecessary provisions, and the objectives of (1) limiting statutes to broad policy (leaving detailed implementation to regulations), and (2) encouraging the exercise of sound judgment by acquisition personnel, are particularly relevant to the provisions addressed in this chapter. Certain statutes, especially in the area of major systems and testing, are characterized by extensive statutory guidance concerning the completion of reports and other programmatic documentation. The Panel noted, in reviewing the history of such provisions, that some started out as relatively short statutes but became more detailed over the years. In fairness, it must be noted that the increased detail was a result of the actual or perceived management deficiencies of DOD in implementing congressional policies. Where appropriate, the Panel strove to reduce statutory detail, leaving the existing policy in place, providing greater flexibility to the DOD and calling for detailed implementation by regulation.

Several chapters of Title 10 contain service-unique acquisition provisions, many of ancient vintage.<sup>1</sup> The Panel initially noted that many of these provisions were apparently duplicative of more general DOD acquisition provisions in Part IV, Subtitle A of Title 10. Additionally, the Panel suspected on initial review that some of these provisions were not being used. The Panel analyzed these sections with a view toward eliminating unnecessary sections and consolidating where appropriate.

### **3.0.1. Major Systems Acquisition**

Chapter 144 of Title 10, United States Code contains laws which govern major defense acquisition programs. All major defense acquisition programs must meet certain reporting, baselining and acquisition strategy requirements which are described in this chapter. The Panel concluded that these statutory requirements were excessively detailed, in some cases duplicative and in others inconsistent with the reality of reduced defense budgets.

While recognizing the continued necessity of reports to the Congress, the Panel recommended removing the excessive detail from 10 U.S.C. § 2432, Selected Acquisition Reports, but retaining the broad policy that such reports be submitted. In view of concerns that Program Managers (PMs) were inundated with various reporting requirements in differing formats and calling for differing data, the Panel recommended a unified reporting format for all users, including the Congress, in the format which DOD uses to manage its operations. This unified format would greatly reduce the burden on PMs and eliminate the periodic necessity for amendment of the statute to more closely follow DOD practices. The Panel also recommended folding the Unit Cost Report requirement of 10 U.S.C. § 2433 into § 2432.

Other recommendations concerning Chapter 144 are to streamline 10 U.S.C. §§ 2434 and 2435 concerning independent cost estimates, manpower estimates and baseline requirements by eliminating statutory detail but retaining existing policy. The Panel recommended that the legislation governing Defense Enterprise Programs (DEPs), 10 U.S.C. §§ 2436-37, be repealed. DEPs have not been successfully implemented by DOD or supported by Congress. The Panel

---

<sup>1</sup>Subtitle B, Part IV of Title 10 (Army); Subtitle C, Part IV of Title 10 (Navy); Subtitle D, Part IV of Title 10 (Air Force).

also recommended repeal of statutory requirements for competitive prototyping and competitive alternative sources, 10 U.S.C. §§ 2438-39. The Panel believes that mandating such strategies is inappropriate in today's reduced budget environment and may be unaffordable. However, the Panel recommended retaining the major defense acquisition pilot program because it has not yet been implemented and some experience with the program is warranted.

### **3.0.2. Testing Statutes**

Various statutes within Title 10 of the U.S. Code establish requirements regarding testing of major weapon systems and munitions programs by DOD. Under the current statutory scheme, all major defense systems, as defined under 10 U.S.C. § 2302(5), must undergo operational test and evaluation before those systems may proceed beyond low-rate initial production. For major defense systems under section 2430 of Title 10, that testing must be set forth in a plan that has been approved by the Director of Operational Test and Evaluation of DOD, who must then evaluate the results of that testing and report on it to the congressional defense committees before low-rate initial production may be exceeded. No system-contractor employees may be involved in this testing unless such employees will also be involved in system deployment. Further, support contractors may not assist operational testing if they have previously been involved in system development, production, or developmental testing unless their impartiality has been assured in writing by the Director of Operational Test and Evaluation or the contractor functioned solely as a representative of the Federal Government. With regard to live-fire testing, major defense acquisition programs with user-protection features and major munitions programs may not proceed beyond low-rate initial production until combat-relevant survivability or lethality testing has been completed. This requirement may be waived by the Secretary of Defense if unreasonably expensive or impracticable and if an alternative is available. A specific requirement for such testing exists for wheeled or tracked vehicles.

Congress rightly is concerned about past abuses where the DOD inappropriately rushed to production without adequate testing. It appropriately gives a high priority to its testing requirements. The testing community is also ever vigilant and protective of its statutory mandates. The PEOs and PMs, on the other hand, in some cases express frustration over the delays and expense imposed on their programs by overzealous testers. Thus, testing is a contentious subject with strong advocates in each camp.

The Panel concluded that a consolidation of the four current testing statutes and elimination of statutory detail would further its statutory streamlining mandate and allow the flexibility desired by the testing and acquisition communities. The Panel developed a dual proposal in the testing area. Initially, the Panel recommends the repeal of the four testing statutes within Title 10 in their entirety and the enactment of a streamlined testing statute. This streamlined statute sets forth the basic rule that both vulnerability/lethality and operational testing must occur before proceeding beyond low-rate initial production. The proposed statute adopts extant definitions of those terms. The statute then vests discretion in the Secretary of Defense to implement the required testing. Broad guidelines in specific areas -- such as contractor involvement and authority to modify operational testing requirements -- are provided. These

guidelines state general principles, but specific implementation of the rule is left to the Secretary of Defense.

The Panel recognized, however, that in view of the sensitivity and concern in the Congress for adequate testing, there may be reluctance to fully adopt such a streamlined approach. Accordingly, at a minimum, the Panel recommends the Congress adopt certain specific statutory amendments that are set forth in the analysis of each individual statute within this subchapter.

Specifically, the Panel recommends repeal of 10 U.S.C. § 2362 as subsumed by the requirements of 10 U.S.C. § 2366. With regard to the live-fire requirements of section 2366, the Panel recommends substitution of the phrase "vulnerability" for "survivability" throughout the statute. The former term more accurately reflects the type of testing mandated by the law. The Panel also recommends elimination of the requirement for "full-up" vulnerability testing. As a mandatory requirement, that testing can add considerable time and expense in certain high value systems.

Recommended amendments to the operational test and evaluation (OT&E) requirements of 10 U.S.C. § 2399 include authority to modify dedicated OT&E requirements for certain types of programs and amendments to permit greater system and support contractor involvement in OT&E. Finally, the Panel recommends that 10 U.S.C. § 2400 be amended to add strategic defense missiles as a low density production base item, and to make the Test and Evaluation Master Plan discretionary for low density items.

### **3.0.3. Service Specific Laws**

The Panel examined the service-specific acquisition sections in the last three subtitles of Title 10. These laws fall into two main groups: (1) the Army/Air Force statutes, that evolved historically out of the same source law, and (2) Navy-peculiar laws. These laws provide various authorities to a secretary of an individual military department and are grouped in that Service's chapter of Title 10. These provisions are of such a disparate nature that summarizing them in an introduction is not warranted.

In instances where a grant of authority is no longer used, or otherwise obsolete, the Panel recommends repeal. In a number of cases, efforts were made to modernize still-meaningful authorities and to consolidate sections that so lend themselves into a single, streamlined section. For example, the authorities at 10 U.S.C. §§ 7361 through 7367 all cover naval salvage operations and all were enacted by the same law. These sections were consolidated, and the language modernized where appropriate. Other examples are as follows :

- the service-specific authorities to contract for architect-engineering services (10 U.S.C. §§ 4540, 9540 and 7212) were recommended for repeal as laws that had clearly outlived their usefulness; the collective analysis for these statutes discusses the problems raised by the 6% fee limit in these laws and their interplay with the Brooks architect-engineering statute.

- the laws at 10 U.S.C. §§ 4506/9506, 4507/9507 and 4508, all involving authority to sell or loan a government item or service, were crafted into a single statute that sets forth specified authorities to sell or loan government material for prescribed purposes. It includes important authority to permit the sale or use of government test facilities by private contractors at specified rates.
- Civil Reserve Air Fleet (CRAF) enhancement authorities at 10 U.S.C. §§ 9512 and 9513 were recommended for amendment to permit private contractors limited commercial use of military airfields. This proposal was based on the crucial role played by CRAF during Operations Desert Storm/Desert Shield.

The Panel notes that those service-specific authorities that are marked for retention might appropriately be collected into a "Service Procurement Generally" chapter.<sup>2</sup>

### **3.0.4. The Brooks Act and the Warner Amendment**

Under the Brooks Act, the acquisition of ADPE by the federal executive agencies is centralized under the General Services Administration (GSA). That agency retains exclusive authority to procure ADPE. While GSA delegates that authority, to varying degrees, to the individual agencies, it still retains extensive managerial oversight of this acquisition process. Under the Warner Amendment, DOD is authorized to purchase directly certain, delineated types of ADPE related to military and intelligence missions. In the exercise of that authority, and in conducting individual procurements when delegated authority by the GSA, the DOD components have developed their own, internal mechanisms for ADPE procurement.

The Panel deliberated extensively over this question, but was unable to achieve a consensus among its members as to a formal, legislative recommendation in this area. At a minimum, however, the Panel agreed that the blanket delegation of procurement authority to DOD should be raised significantly.

The discussion presents the two major alternative recommendations considered with supporting rationale for each. The two primary recommendations considered by the Panel were (1) to amend the Warner Amendment to wholly exempt DOD from the Brooks Act and with it from GSA oversight, or (2) to significantly increase the blanket delegation of procurement authority for DOD.

### **3.0.5. DOD Commercial and Industrial Activities**

Chapter 146 of Title 10 deals with DOD Commercial and Industrial Activities. Specifically, it contains laws regulating DOD contracting for commercial services under OMB Circular A-76. It includes restrictions on the contracting out of core logistics activities by DOD,

---

<sup>2</sup>Such a chapter could include those procurement-related authorities that vest in both the Secretary of Defense and the secretaries of the military departments.

and sets forth specific guidance on depot-level maintenance activities by DOD. These statutory provisions present a confusing and contradictory set of rules.

The Panel's goal in this area was to consolidate and streamline these conflicting rules into a coherent statement of basic and essential principles that eliminates, as far as possible, unnecessary detail. The Panel also attempted to balance these competing interests into a set of rules that affords the Department managerial flexibility while preserving meaningful congressional oversight and effective community input. To that end, the Panel proposes a single section, 24XX, governing traditional A-76 contracting procedures for the Department. A second section, 24XY, sets forth the basic principles regarding the contracting of core logistics functions by DOD.

Proposed section 24XX provides that DOD secretaries shall procure from the private sector if such source can provide services or supplies adequate to meet defined performance standards at a cost lower than that of an in-house, government source. The proposed section 24XX adopts the current "realistic and fair" cost comparison standard and delineates the types of costs to be included in that comparison. The proposed section maintains the requirement of federal employee consultation and maintains, in streamlined form, the extant requirement of notice to Congress of intent to study a conversion, as well as notice of the decision itself.

The Panel recommends repeal of sections 2463 (maintenance of cost data), 2465 (prohibition on contracting out fire fighting and security guard functions) and 2468 (installations commanders' contracting out authority).

The proposed section 24XY restates the basic, core logistics standard and adopts the current definition of "core" but permits DOD secretaries to define "core capabilities," and to identify those activities necessary to sustain those capabilities. The proposed section then requires DOD secretaries to perform such core functions in-house. It permits competition among government entities for assignment of such work as a means of encouraging greater economy and efficiency in these activities.

In excess of core requirements, DOD secretaries are permitted, at their discretion, to use competition to acquire additional maintenance and repair of defense supplies. Such competition may be public/public, public/private, or private/private. However, in order to ensure a level playing field in such competitions, the proposed section requires that all bids "shall accurately disclose all costs properly and consistently derived from accounting systems and practices that comply with laws, policies and standards applicable to those entities." This new, cost comparison language attempts to address issues raised by both the private sector and DOD activities regarding inequities in the current, cost comparison process. Finally, competitions under this proposed section are exempted from A-76 requirements.

Based on this modification of the current, core logistics section, the Panel recommends the repeal of 10 U.S.C. § 2466. That section sets forth the 60/40 rule regarding DOD contracting for depot-level maintenance, i.e., that the Department may not contract out more than 40% of its depot-level maintenance.

The Panel considered, but rejected, application of the same "core" concept to Departmental, in-house manufacturing capabilities. Instead, the Panel recommends consolidation and amendment of the Army and Air Force Arsenal Acts to provide DOD secretaries with discretionary authority to workload in-house manufacturing requirements.

Finally, the Panel recommends repeal of 10 U.S.C. § 2212, requiring line-item budgeting of contracted advisory and assistance services. The Panel notes that this same budgeting requirement is present in a recently enacted appropriations bill.

### **3.0.6. Industrial Base and Manufacturing Technology Laws**

The Panel examined those laws within Title 10 concerning DOD Industrial Base and Manufacturing Technology policies. However, this area of defense acquisition policy has been the subject of considerable legislative effort in the National Defense Authorization Act for Fiscal Year 1993. That legislation repealed virtually all of these laws and enacted in their place new, and much more detailed, policies regarding the defense technology and industrial base.

The Panel believes that, because this body of legislation is new and untested, it is not feasible to engage in full-scale analysis of each new statutory section. However, the Panel also believes that it is important to develop a position, albeit a generalized one, in this important area of defense acquisition. Therefore, based on the legislative histories of the repealed statutes, the comments that the Panel received during its survey of those laws, a review of the newly-enacted legislation, and other research, the Panel has developed a comment on the industrial base legislation enacted in the National Defense Authorization Act for Fiscal Year 1993. This comment is guided by the statement of goals and objectives adopted by the Panel.

Essentially, the Panel endorses the overall goal of this legislation, but notes that it contains excessive detail. Also, the Panel recommends that Congress consider an additional policy statement as to the interplay between domestic industrial base issues and international defense trade and cooperation. Finally, the Panel notes that, in this era of downsizing, industrial base issues are increasingly generating antitrust legal and policy issues. While such issues are outside the scope of the Panel's review, they warrant congressional scrutiny.

### **3.0.7. Fuel and Energy-Related Laws**

The Panel considered statutory provisions that relate to fuel or energy system procurement by DOD. They are not currently organized or grouped within Title 10 on that basis.

Some of the sections dealt directly with fuel and petroleum acquisition. For example, the Panel recommends amending the authority to waive contract procedures at 10 U.S.C. § 2404 to add authority to sell excess petroleum stores and credit those proceeds to applicable appropriations. The Panel also recommended a modification in authority to contract for storage of fuels and management of tank farms to accommodate management-only contracts.

The Defense Logistics Agency sought repeal of a prohibition on the purchase of Angolan petroleum products. However, this provision was recently modified in the National Defense Authorization Act for Fiscal Year 1993. Under this modification, the prohibition ceases to become effective upon certification by the President that free and fair elections have been conducted in Angola. As set forth in the individual analysis for this provision, the Panel recognizes that, from an acquisition policy point of view, the prohibition significantly impedes economy and efficiency in petroleum acquisition. However, because of recent congressional action on this issue, the Panel makes no formal recommendation in this area.

Other sections were essentially policy-related enactments, mandating environmentally sound acquisition practices by the DOD. In the absence of any significant burden on acquisition practices, these sections were recommended for retention. Sections 2481, 2483, and 2490 granted authority to sell excess utility services. These sections were also recommended for retention. Finally, the Panel recommends that this body of law should be collected within Title 10 into a single chapter dealing exclusively with fuel and energy-related acquisition.

### **3.0.8. Fiscal Statutes**

The Panel considered numerous statutes, primarily located within Chapter 131 of Title 10, that relate to DOD fiscal authority and budgetary procedures. Of these statutes, those that dealt with exemptions for various DOD expenditures from anti-deficiency requirements were deemed directly related to DOD acquisition and recommended for retention. The consensus of the Panel was that a number of the other fiscal and budgetary Title 10 statutes were not directly related to the DOD acquisition process and hence were outside the scope of the Panel's charter. The Panel formally recommended no action for each of these laws, but notes certain dispositions thereof that the Congress may wish to consider. The Panel did, however, recommend an amendment to the "M" account provisions at 31 U.S.C. 1552(a) to exempt sufficient funds required for existing contracts from the five-year cancellation of funds rule to complete unfinished work, and to pay close-out costs and contract claims.

## **3.1. Major Systems Statutes**

### **3.1.0. Introduction**

Chapter 144 of Title 10, United States Code, contains those laws which govern major defense acquisition programs. A major defense acquisition program is defined as a DOD acquisition program that is not a highly sensitive classified program and that is estimated by the Secretary of Defense to require an eventual total expenditure for RDT&E of more than \$300 million (in FY90 constant dollars) or procurement of more than \$1.8 billion (in FY90 constant dollars). Additionally, the Secretary may designate any acquisition program as a major defense acquisition program.

All major defense acquisition programs must meet certain reporting requirements which are described throughout this chapter. These reporting requirements have been modified many times since their inception. In fact, the National Defense Authorization Act for FY 1993 made certain amendments to the Selected Acquisition Report requirements.<sup>1</sup> Notwithstanding recent changes, the Panel's review has uncovered certain areas in which the statutes can be streamlined to operate more efficiently.

First, the statutory requirements are excessively detailed. While the Panel recognizes the necessity of reporting, as well as the history which has led to such detail in these reporting statutes, the Panel concludes that it would be more effective to eliminate statutorily-mandated descriptions of the reports. Therefore, the Panel recommends deleting much of the detail on each of the statutes and requiring the Secretary of Defense to promulgate regulations describing the contents of each report.

The Panel has also found duplication in some of the reports. In an effort to eliminate such redundancy, the Panel recommends repeal of certain sections of the chapter. Those sections which are recommended for repeal would then be incorporated into one consolidated report. For example, relevant portions of the Unit Cost Reports can be incorporated into the Selected Acquisition Reporting statute.

Consistent with the streamlining charter, many specific changes have been recommended in most of the sections in this chapter. The Panel recommends removal of excessive detail from 10 U.S.C. § 2432 as well as incorporation of 10 U.S.C. § 2433 into § 2432. The policy requirement of 10 U.S.C. § 2434 to prepare manpower and independent cost estimates should be retained; however, the Secretary of Defense should be given the discretion to determine the contents of such reports. Again, in the interest of streamlining, the Panel recommends deletion of details concerning baseline content and procedures for review of the deviation report found in 10 U.S.C. § 2435.

Defense Enterprise Programs (DEPs) have not been implemented successfully and are not totally supported by Congress. Their effectiveness is negligible. Consequently, the Panel

---

<sup>1</sup>Pub. L. No. 102-484, § 817, 106 Stat. 2454 (1992).

recommends repeal of the Defense Enterprise Program statutes, 10 U.S.C. §§ 2436 and 2437. However, the Pilot Program created by Pub. L. No. 101-510, § 809, designates all pilot programs as DEPs. Therefore, the Panel recommends repeal of that portion of Pub. L. No. 101-510 which so designates pilot programs. The Panel recommends retention, however, of the Pilot Program itself. As the pilot program has not yet been implemented by OSD, it should be retained until some experience is gained.

Section 2439 requires the Secretary to prepare an acquisition strategy which addresses the use of competitive alternative sources.<sup>2</sup> Many of the more onerous restrictions of the statute, however, have recently been removed. Notwithstanding, considering the status of today's defense budget, the appropriateness of a competitive alternative sources requirement is questionable. The Panel therefore recommends repeal of 10 U.S.C. § 2439. Such a repeal would not preclude the Secretary of Defense from establishing an alternative source where quantities justified such an acquisition strategy.

Finally, in 10 U.S.C. § 2438,<sup>3</sup> the Secretary of Defense is required to prepare an acquisition strategy that provides for competitive prototyping of major weapon systems and subsystems. This section derives from a former Title 10 provision at section 2365. Experience under the former statute has led the Panel to recommend repeal, on the basis that competitive prototyping should not be legislatively mandated, but rather left to the managerial discretion of the Secretary of Defense.

---

<sup>2</sup>The National Defense Authorization Act for FY93 redesignates this former section 2438 as 2439 and enacted a new section 2438 regarding competitive prototyping. That new section reenacts a former section 2365.

<sup>3</sup>*Supra* note 2, and accompanying text.

### **3.1.1. 10 U.S.C. § 2430**

#### **Major defense acquisition program defined**

##### **3.1.1.1. Summary of Law**

This section defines a "major defense acquisition program" as a DOD acquisition program that is not a highly sensitive classified program and is either designated by the Secretary of Defense as a major defense acquisition program, or is estimated by the Secretary of Defense to require an eventual total RDT&E expenditure of more than \$300 million in 1990 dollars or an eventual total procurement expenditure of more than \$1.8 billion in 1990 dollars.

##### **3.1.1.2. Background of Law**

This section was codified in Title 10 by the Defense Technical Corrections Act of 1987.<sup>1</sup> There were no substantive legislative reports issued with that public law. However, it appears that the general structure of this definition -- two tiers, one based on total R&D expenditure and the other on total procurement expenditure -- mirrored the major system definition originally set forth in the Defense Procurement Reform Act of 1984.<sup>2</sup>

Prior to 1993, the monetary thresholds were set at \$200 million eventual total expenditure on RDT&E in FY 1980 constant dollars, or eventual total procurement expenditures of more than \$1 billion in FY 1980 constant dollars. These thresholds were raised by the National Defense Authorization Act for Fiscal Year 1993 to their current levels.<sup>3</sup> These changes were part of overall amendments to the major defense acquisition program statutes that were requested by DOD.<sup>4</sup>

##### **3.1.1.3. Law in Practice**

The definition of a major defense acquisition program in this section is currently utilized in DOD Directive 5000.2M, Part 17, which sets forth the Acquisition Categories (ACAT) I and II levels. The ACAT II level parallels the statutory definition of "major system" codified at 10 U.S.C. § 2302(5).<sup>5</sup> The ACAT I level sets forth the current, higher statutory threshold for major

---

<sup>1</sup>Pub. L. No. 100-26, § 7(b)(1)(A), 101 Stat. 279 (1986).

<sup>2</sup>Pub. L. No. 98-525, § 1211, 98 Stat. 2492 (1983).

<sup>3</sup>Pub. L. No. 102-484, § 817(c), 106 Stat. 2455 (1992).

<sup>4</sup>H.R. CONF. REP. NO. 966, 102d Cong., 2d Sess. 728 (1992)

<sup>5</sup>Under that section, the term "major system" means a combination of elements that will function together to produce the capabilities required to fulfill a mission need. The total R&D expenditures must be more than \$75 million (in FY80 dollars) or total procurement expenditures of more than \$300 million. The agency head may also designate a system as a "major system." 10 U.S.C. § 2302(5). An identical "major system" definition is set forth at 41 U.S.C. § 403(9). For further discussion of that "major system" definition, see ch. 1.1.2 of this Report. In that subchapter, the Panel recommends amendment of § 2302(3) to utilize the Title 41 definition section consistently, and in lieu of the separate, major system definition currently at § 2302(5). Accordingly, proposed statutory

defense acquisition programs. The two ACAT levels are utilized throughout the DOD Directive 5000 series to establish various reporting and acquisition requirements for either a "major system" or a "major defense acquisition program."

These two statutory definitions are used as thresholds in various other sections within Title 10. By its terms, the "major system" definition at 10 U.S.C. § 2302(5) applies to all relevant subsections within Chapter 137 of Title 10. For example, all the competitive statutes within that Chapter use the section 2302(5) standard.<sup>6</sup> The requirements of Chapter 144 of Title 10, however, rely upon the section 2430 definition for purposes of that chapter.

In the testing area, 10 U.S.C. § 2399 references 10 U.S.C. § 2302(5) to define those major programs that must undergo initial operational test and evaluation before proceeding beyond low-rate initial production.<sup>7</sup> However, that same statute then references 10 U.S.C. § 138(a)(2)(B) for those major defense acquisition programs for which operational testing may not be conducted without prior test plan approval by the Director of Operational Test and Evaluation. The definition at 10 U.S.C. § 138(a)(2)(B) uses the 10 U.S.C. § 2430 threshold.<sup>8</sup> Further, 10 U.S.C. § 2366 uses the 10 U.S.C. § 2302(5) definition to establish in part those systems that must undergo live-fire testing.<sup>9</sup> The testing requirements of 10 U.S.C. § 2362, however, use the "major defense acquisition program" definition of 10 U.S.C. § 2430.<sup>10</sup>

Certain employment prohibitions for DOD procurement officials at 10 U.S.C. §§ 2397b and 2397c use the "major system" definition of section 2302(5).<sup>11</sup> However, while the contract warranty provision at 10 U.S.C. § 2403(a)(1) sets forth its own definition of "weapon system," it relies upon the "major defense acquisition program" of section 2430 for those systems for which the warranty requirement may be waived.<sup>12</sup> Similarly, industrial base analysis is required only for major defense acquisition programs.<sup>13</sup>

---

language in this chapter adopts a conforming reference to § 2302(3). However, for ease of reference, these analyses refer to the current 2302(5) citation when discussing that section in narrative text.

<sup>6</sup>These subsections include: 10 U.S.C. §§ 2304(d)(1)(B)(noncompetitive procedure for follow-on major system contract) and 2305(d)(1)(A)(bid requirements for major system development contracts).

<sup>7</sup>10 U.S.C. § 2399(a)(2).

<sup>8</sup>Further discussion of this testing requirement is set forth at ch. 3.2.3 of this Report.

<sup>9</sup>10 U.S.C. § 2366(e)(1)(B) and (e)(2)(B).

<sup>10</sup>The low rate initial production definition of 10 U.S.C. § 2400 uses the phrase "major system" without further definition of the term.

<sup>11</sup>10 U.S.C. § 2397b(f)(5); 10 U.S.C. § 2397c(b)(1)(A)(ii) and (iv)(requirement to identify major systems upon which successful bidder worked within past two years). Those sections are recommended for repeal at ch. 6.7.5 and 6.7.6. of this Report.

<sup>12</sup>Section 2403, Contract Warranties, is recommended for repeal in ch. 2.5.3 of this Report.

<sup>13</sup>The National Defense Authorization Act for FY93 repealed a prior 10 U.S.C. § 2502, where this requirement had initially been set forth, and enacted the same requirement into a new 10 U.S.C. § 2440 within Chapter 144 of Title 10. Pub. L. No. 102-484, § 4216(b), 106 Stat. 2669 (1992).

The legislative histories of these statutory provisions rarely discuss the utilization of a particular, major system definition. Often, the definition in particular legislation adopts a practice or standard then in use within DOD.<sup>14</sup>

Comments received regarding the issue of the dual definition of major system/major defense acquisition program generally supported retention of the dual definition. The Office of the Assistant Secretary of the Air Force (Acquisition) notes that:

A major purpose of the MDAP designation is to determine reporting requirements. Although an MDAP usually has one or more major systems, not every major system is part of an MDAP. We support making definitions consistent where it makes sense. However, due to the different purposes for which these categories have been developed, we do not believe these two definitions can or should be made consistent.<sup>15</sup>

The DOD Inspector General also opposes any change to these two definitions because the statutes are not used synonymously within the U.S. Code.<sup>16</sup> The Department of the Army, however, recommends amendments to make these definitions consistent.<sup>17</sup> The Council of Defense and Space Industry Associations (CODSIA) concurs with that recommendation.<sup>18</sup>

#### **3.1.1.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retention of this statute without change. The Panel believes that the dual major system definition continues to serve a useful purpose, both in Title 10 and in the DOD Directive system. The Panel recognizes that the dual definitions can be confusing.<sup>19</sup> However, there is value to maintaining a two-tier level of oversight. It provides additional flexibility, both to the Congress in establishing its oversight, and to the Department in terms of its internal acquisition management.

---

<sup>14</sup>For example, the major system language of 10 U.S.C. § 2403 - per unit cost of more than \$100,000 or eventual total procurement of more than \$10 million - was adopted based on internal DOD implementation of a prior, freestanding public law provision. See S. REP. NO. 500, 98th Cong., 2d Sess. 243 (1984).

<sup>15</sup>Letter from Brig Gen Robert W. Drewes, Deputy Assistant Secretary (Contracting), Assistant Secretary (Acquisition), Department of the Air Force, to Advisory Panel, dated 11 Mar. 1992.

<sup>16</sup>Letter from Derek J. Vander Schaaf, Deputy Inspector General, Department of Defense, to Mr. Stuart Hazlett, Defense Systems Management College, dated 3 Mar. 1992.

<sup>17</sup>Memorandum from Office of the Assistant Secretary (Research, Development and Acquisition), Department of the Army, to Maj Gen John Slinkard and Mr. Thomas Madden, dated 27 Feb. 1992.

<sup>18</sup>Letter from CODSIA to Maj Gen Slinkard and Mr. Madden, Advisory Panel, dated 12 Mar. 1992.

<sup>19</sup>For example, the Defense Acquisition Workforce legislation, at 10 U.S.C. § 1737(a)(3), defines a "significant nonmajor defense acquisition program" as a threshold that is less than a major defense acquisition program under § 2430 but more than a major system under § 2302(5).

### **3.1.1.5. Relationship to Objectives**

Retention of this statute without change will serve the best interests of DOD while preserving a statutory basis for meaningful congressional oversight of the DOD acquisition process.

### 3.1.2. 10 U.S.C. § 2431

## Weapons Development and Procurement Schedules

### 3.1.2.1. Summary of Law

This law requires the Secretary of Defense to submit to the Congress annually a report on development and procurement schedules for each weapon system for which fund authorization is required under 10 U.S.C. § 114(a). Specifically, the law requires:

- The development schedule, including estimated annual costs until development is completed;
- The planned procurement schedule, including the best estimate of the Secretary of Defense on the annual costs and units to be procured until procurement is completed;
- To the extent required by the statute, the result of all operational testing and evaluation up to the time of the submission of the report, or if operational testing and evaluation has not been conducted, a statement of the reasons and the results of such other testing and evaluation as has been conducted; and
- The most efficient production rate and the most efficient acquisition rate consistent with the program priority established for such weapon system by the Secretary concerned.

### 3.1.2.2. Background of Law

Development and procurement reporting requirements for major weapon systems were first set forth as a freestanding provision of law within the Act Authorizing Appropriations for FY 72 for Military Procurement, Research and Development and For Other Purposes.<sup>1</sup> The Senate Committee Report on that legislation noted that "the committee has continued its surveillance in expanded areas of interest relating to the procurement and management of major weapon system programs."<sup>2</sup> The Committee also noted that it was "particularly interested in the cost performance measurement system that has evolved to better manage and control the cost and performance of these weapon programs. The Committee understands that this system is not a panacea that will prevent cost overruns or improve performance of the weapon system. . . . [H]owever, . . . this system . . . should provide early identification of any problems related to the cost and progress of a program that could enable alternate or corrective action to be taken."<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 92-156, § 506, 85 Stat. 429 (1971).

<sup>2</sup>S. REP. NO. 359, 92nd Cong., 1st Sess. 20 (1971).

<sup>3</sup>*Id.*

The House Report on that same legislation discussed the problem of weapon system cost growth at length.<sup>4</sup> That Report noted that "[c]andor with the Congress about such things as the uncertainties associated with cost estimates, technical-risk assessments, and the status of development must be practiced lest surprises undermine the confidence of the Congress and the congressional support for programs."<sup>5</sup>

The DOD Appropriations Authorization Act for 1974 [sic] repealed that provision and enacted virtually the same requirements in this current statutory section.<sup>6</sup> The section was originally codified as section 139 of Title 10, and included a supplemental report requirement at the time of contract award. The purpose of that statutory provision was to facilitate congressional oversight of weapon system development. Moreover, this statute represented a new congressional approach to exercising control over costs of major defense acquisition programs and other weapon systems by requiring the Secretary of Defense to submit an annual written report regarding development and procurement schedules for each system.

Amendments in 1975, 1980, 1981, 1982, and 1984 made technical corrections to the statute. The Goldwater-Nichols Department of Defense Reorganization Act of 1986<sup>7</sup> redesignated the statute as 10 U.S.C. § 2431. As part of that Act, Congress adopted a policy objective to "reduce the administrative burden placed on the Department of Defense by requirements for reports, studies, and notifications to be submitted to Congress through the elimination of outdated, redundant, or otherwise unnecessary reporting requirements."<sup>8</sup> The policy objectives affecting § 2431, however, were not implemented until the enactment of the National Defense Authorization Act for Fiscal Year 1991.<sup>9</sup> This Act repealed the supplemental report on weapons procurement then required by § 2431.

### 3.1.2.3. Law in Practice

The reporting requirement of this section is essentially a budgetary requirement that is implemented by the DOD Budget Guidance Manual.<sup>10</sup> Comparable data is obtained from contractors through the DOD Directive 5000.2M, Part 20, Cost Management Reports.

The Office of the Assistant Secretary of the Army (Research, Development & Acquisition), Deputy Assistant Secretary for Plans, Programs and Policy, notes with respect to this section that:

This section should be repealed and incorporated with the Selected Acquisition Reports (SAR), section 2432. Programmatic information in this report is consistent with that data provided by

---

<sup>4</sup>H.R.Rep. No. 232, 92nd Cong., 1st Sess. 831 (1971).

<sup>5</sup>*Id.*

<sup>6</sup>Pub. L. No. 93-155, § 803, 87 Stat. 615 (1973).

<sup>7</sup>Pub. L. No. 99-433, § 101(a)(5), 100 Stat. 995 (1985).

<sup>8</sup>H. R. Rep. No. 499, 101st Cong., 2d Sess. 1 (1990).

<sup>9</sup>Pub. L. No. 101-510, 104 Stat. 1485 (1990).

<sup>10</sup>DOD Budget Guidance Manual, 7110-1-M, Sec. 4, "Procurement."

the SAR. SAR should be tailored to meet content and time requirements of the President's Budget to Congress under section 1105 of Title 31. Consolidating operational test and evaluation data found in section 2431 as part of the SAR will provide a single and comprehensive report to Congress.<sup>11</sup>

#### **3.1.2.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this reporting requirement be retained. It is not overly onerous or burdensome, and the statute has not created any significant problems. The Panel believes that it would be inappropriate to incorporate this reporting requirement into the SAR because it is more broadly applied than the SAR. While the SAR applies only to major defense acquisition programs, weapons development and procurement schedules reports apply to each weapon system that must meet certain fund authorization requirements under 10 U.S.C. § 114(a). In addition, this section is essentially a budgetary reporting requirement. The SAR is essentially a program status reporting requirement.

#### **3.1.2.5. Relationship to Objectives**

Retention of this statute will maintain an effective congressional oversight provision that does not unduly hamper sound DOD procurement practices. Retention of this statute will also promote the Panel objective that acquisition laws should, when generating reporting requirements, permit as much as possible, the use of data that already exists and is already collected without imposing additional administrative burdens.

---

<sup>11</sup>Memorandum from Mr. Keith Charles, Deputy Assistant Secretary for Plans, Programs and Policy, to Deputy for Program Assessment and International Cooperation, dated 10 Sep. 1992.

### **3.1.3. 10 U.S.C. § 2432**

#### **Selected Acquisition Reports**

##### **3.1.3.1. Summary of Law**

This section requires the Secretary of Defense to submit to Congress periodic status reports on major defense acquisition programs. Specifically, the section requires the Secretary of Defense to submit to the Congress quarterly reports on current major defense acquisition programs.

The reports are required to contain an abundance of information. For example, the statute dictates that weapons development and procurement schedules, unit cost, full life cycle cost analysis production information (baseline, maximum, current and future production rates) be included. The reports must also include an estimation of cost and schedule variances between the program acquisition unit cost at the current production rate and at the baseline rate. This information must be included in either an Annual or a Quarterly Selected Acquisition Report (SAR). The report submitted for the first quarter of a fiscal year is known as the comprehensive annual SAR. Reports submitted for the remaining three quarters are known as the Quarterly SARs. Quarterly SARs are required to be submitted only if a program for which a prior Annual SAR report was submitted experienced a 15% or more increase in program acquisition unit costs and current procurement unit cost, or a 6 month or more delay in any program schedule milestone. A report need not be submitted upon the approval of the Armed Services Committees of the Congress.

##### **3.1.3.2. Background of Law**

The SAR was originally developed by DOD in 1969 as an internal reporting system to summarize information on major defense acquisition programs managed by DOD components.<sup>1</sup> The first formal SAR was submitted to the Congress in response to a request by the chairman of the Senate Armed Services Committee to the Secretary of Defense for periodic status reports on major weapon systems. In 1971, the Senate Armed Services Committee noted that:

[A]nalyzes of the quarterly reports received by the committee on selected major weapon programs . . . have proved extremely beneficial in assisting the committee to maintain an oversight of the programs throughout the year and in deliberation on the fiscal year 1972 budget request. Refinements to these reports have done much to improve the data and additional refinements are expected.<sup>2</sup>

---

<sup>1</sup>DOD Policy Directive "Performance Measurement for Selected Acquisitions," in effect in 1971.  
<sup>2</sup>S. REP. NO. 359, 92d Cong., 1st Sess. 20 (1971).

In 1982, this section was codified into Title 10 by the DOD Authorization Act for FY83.<sup>3</sup> The Senate version of that bill had contained a requirement for unit cost reporting. The House version contained a provision that required SARs on programs that exceeded \$200 million in RDT&E or \$1 billion in procurement funds.<sup>4</sup> Comprehensive SARs were required annually with abbreviated SARs quarterly only when there were changes in cost, performance or schedule. In conference, the Senate receded with an amendment that incorporated the House SAR requirement into the Senate provision requiring Unit Cost Reports.<sup>5</sup> The SAR was intended to improve congressional oversight of cost growth in major defense acquisition programs.<sup>6</sup>

Although this section has been changed many times, it has been significantly amended only three times. In 1984, the format of the SAR was amended to require additional information as well as bring the reporting requirements in line with internal DOD acquisition policy.<sup>7</sup> This amendment was based on proposed modifications submitted by the DOD.<sup>8</sup> The Congress expressly rejected the proposal, however, that the SAR not be required until full-scale development was scheduled to commence.<sup>9</sup>

In 1985, the SAR requirement was again amended to require the Secretary of Defense to submit a full life cycle cost estimate for each acquisition program in the SAR after the first quarter of Fiscal Year 1985.<sup>10</sup> This amendment was the result of congressional dissatisfaction with the December 1984 SAR. The Senate Armed Services Committee had noted that key cost and schedule data had been omitted from that SAR without formal consultation with Congress, thereby rendering the report useless for the purpose of congressional oversight.<sup>11</sup>

Most recently, the National Defense Authorization Act for Fiscal Year 1993 amended this section once again to bring it in line with DOD acquisition policy.<sup>12</sup> Specifically, the changes redefined the term "major contract," changed references to the time frame within which certain production rates are applicable and changed the term "more than" to "at least" when it appears in sections 2432 and 2433, Unit Cost Reports. Other changes relevant to the SAR process include increasing thresholds for qualification as a major defense acquisition program, allowing the Secretary to adjust those thresholds, and allowing the Secretary to waive the SAR requirement.<sup>13</sup>

---

<sup>3</sup>Pub. L. No. 97-252, § 1107, 96 Stat. 739-46 (1982).

<sup>4</sup>That House provision would also have required the program manager to submit reports to the Service Secretaries upon belief that there would be a 15% increase in contract cost or 15% slip in contract schedule. The Secretary would then be required to so report to the Congress. This provision was deleted in conference.

<sup>5</sup>H. CONF. REP. No. 749, 97th Cong., 2d Sess. 171 (1982). The two provisions were codified into Chapter 139 of Title 10 as two related sections, §§ 139a and 139b.

<sup>6</sup>*Id.*

<sup>7</sup>DOD Authorization Act for FY 1986, Pub. L. No 99-145, § 1201, 99 Stat. 715-161 (1985).

<sup>8</sup>H. R. Rep. 691, 98th Cong., 2d Sess. 271 (1984).

<sup>9</sup>*Id.*

<sup>10</sup>Department of Defense Appropriations Act for FY 1987, Pub. L. No. 99-500, § 101(c), 100 Stat. 1783 (Identical legislation omitted).

<sup>11</sup>H.R. REP. No. 145, 99th Cong., 2d Sess. 468 (1985).

<sup>12</sup>Pub. L. No. 102-484, § 817(c), 106 Stat. 2455 (1992).

<sup>13</sup>*Id.* H. R. Rep. No. 966, 102nd Cong., 2nd Sess. 728 (1992).

One Air Force commenter also notes that it "currently submit[s] duplicative information in the SAR, the DAES, and the Acquisition Program Baseline (APB), with enough format and timing differences to require each report be prepared and submitted separately. In addition, because of the timing differences, often the data differs from one report to another on the same program."<sup>17</sup>

However, the Office of Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition) states that there is not much to be gained by additional, minor modification of reporting requirements. That Office indicates that some consolidation already has been accomplished through modification of internal procedures.<sup>18</sup>

Overall, however, certain issues have arisen based on the structure and implementation of this section. Such issues include: Whether the current statutory detail of the SAR is necessary for Congress to effectively oversee major defense acquisition programs? Whether the reporting requirements of this and related statutes can be streamlined and made more consistent with DOD internal reporting procedures? Whether related reports required by this chapter can be consolidated into one meaningful report?

#### **3.1.3.4. Recommendation and Justification**

##### **Amend to remove detail and to incorporate Unit Cost Report requirement currently in 10 U.S.C. § 2433.**

The Panel recognizes that the Congress clearly needs to receive cost and program status information on major defense acquisition programs. This data is necessary for effective, meaningful oversight. However, the processing of this required information can, and should be, streamlined. Therefore, the Panel recommends revising this section to make the information contained in the SAR consistent with that which is used by the DOD to internally manage major defense acquisition programs.

In essence, the Panel's objectives are in many ways the same as those propounded in the Center for Naval Analysis Report.<sup>19</sup> The Panel proposes to:

- Provide a single, authoritative, credible, easily understood source of status information on weapon systems for program managers, Service Acquisition Executives, OSD, the Congress, and related agencies (i.e., OMB, GAO).
- Minimize the burden on PMs and their staffs of preparing and updating the report.

---

<sup>17</sup>Memorandum from Col. Blaise Durante, Assistant Deputy Assistant Secretary (Management Policy and Program Integration), Assistant Secretary (Acquisition), Department of the Air Force, to Maj Gen John Slinkard, HQ AFSC, dated 19 Feb. 1992.

<sup>18</sup>Letter from Mr. John D. Christie, Director, Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition), to Ms. Theresa Squillacote, dated 10 Sep. 1992.

<sup>19</sup>Redesigning the Selected Acquisition Report, *supra* note 14 at 4-5.

### 3.1.3.3. Law in Practice

The requirements of the SAR are implemented by DOD Manual 5000.2M, Part 17, Selected Acquisition Reports, and DOD Directive 7000.3-G, Preparation and Review of Selected Acquisition Reports. Additionally, the DOD has developed software, called the Consolidated Acquisition Reporting System (CARS) with different modules for the SAR, the Defense Acquisition Executive Summary (DAES) and for acquisition program baselines.

Although DOD has learned to manage SAR reporting, and, indeed, itself initiated this reporting as an internal oversight procedure, the current statutory framework is characterized by complexity and excessive detail. In a study conducted by the Center for Naval Analysis, it was found that "the median effort required for preparation of a SAR is 80 man-hours and the median elapsed time for preparation is about 3.5 weeks, with about 8 weeks required for the review and approval process after the SAR leaves the PMO."<sup>14</sup> It has also been noted that it takes users about three and one-half hours to review the SARs. Further, Program Managers are faced with the burdensome requirement to prepare a large number of reports for the various levels of the Department and Congress. A survey of Army Program Executive Officers indicated that Army Program Managers spent between 300 and 600 man-hours of effort annually in preparing all of their SARs and quarterly UCRs.<sup>15</sup> These numbers do not include the time preparing the DAES and other reporting requirements facing PMs.

In addition, there is considerable duplication in the various internal and congressional reporting requirements. As one Army Program Executive Officer noted:

[Duplication] exists among the Selected Acquisition Report (SAR), Defense Acquisition Executive Summary (DAES), Unit Cost Report (UCR), Program Baseline and Annex, and the Army Acquisition Management System (AAMS). Cost and funding data, program schedules, and milestones are contained in four of the five reports. Program Acquisition/Unit and Unit Flyaway Costs, as well as procurement and delivery information and contract status, are contained in three of the five. . . . In spite of this redundancy, data must be entered separately into each report data collection system to generate output. Duplication of effort is a major contributor to confusion and controversy among program reports.<sup>16</sup>

---

<sup>14</sup>Center for Naval Analyses, "Redesigning the Selected Acquisition Report," CRM 89-204, 4-5 (September 1989).

<sup>15</sup>Memoranda from the following Department of the Army Program Executive Offices to the Deputy General Counsel (Acquisition), Department of the Army: Maj Gen Dewitt T. Irby, Jr., Aviation, dated 20 Apr. 1992; Mr. Dale G. Adams, Armaments, 10 Apr. 1992; Brig Gen. Robert A. Drolet, Air Defense, dated 8 Apr. 1992; Ms. Mary D. Kelly, Plans and Programs, STAMIS, dated 23 Mar. 1992; Brig Gen Otto Guenther, Communications Systems, dated 20 Apr. 1992; Maj Gen William Harmon, Command and Control Systems, dated 10 Apr. 1992; and Lt. Gen Robert Hammond, Strategic Defense, dated 13 Apr. 1992.

<sup>16</sup>Memorandum from Brig Gen Robert A. Drolet, Air Defense, to Deputy General Counsel (Acquisition), Department of the Army, dated 8 Apr. 1992.

- Subsume, to the greatest extent possible, relevant parts of all similar documents or reports which are not currently included in the SAR.
- Standardize definitions and terminology.
- Eliminate redundant items of information.
- Give the Secretary of Defense discretion and latitude to properly and effectively manage these programs.
- Remove the excessive detail from the statute.

To accomplish this, the statutory definitions and itemized description of the information to be contained in a SAR would be deleted. The Secretary of Defense would be given the authority to promulgate guidelines to describe the information to be included in the SAR. The information would be consistent with that which is currently required by the internal reporting system.<sup>20</sup> In this manner, repeated amendment of this requirement to conform it to internal DOD procedures, as has occurred in the past, would no longer be necessary. This framework would also increase the flexibility of DOD. In exercising this flexibility, however, the Department will have to be cognizant of the past problems which led Congress to enact such statutory detail.

The Panel recommends that the Unit Cost Report section at 10 U.S.C § 2433 be similarly streamlined and that the requirement for a unit cost report appear in this section and not in a separate statute.<sup>21</sup> To that end, the proposed statute requires, at subsection (f)(1), that the Secretary of Defense shall require the program manager to submit to the service acquisition executive a written report on the unit costs of the program. Subsections (f)(2)(3) and (3) contain the congressional reporting requirement currently set forth in the UCR statute, § 2433. Although the definitional sections have been deleted, the Secretary of Defense may define pertinent terms through implementing regulations.

Specifically, the proposed statutory language adding the UCR requirement to the SAR statute would delete the separate 25% breach standard currently set forth in the UCR statute. This deletion would remove the onerous penalties incurred by a 25% breach currently set forth in the UCR statute, 10 U.S.C. § 2433. This change is discussed in greater detail at chapter 3.1.4.

This new SAR will serve the purpose which Congress and the Department originally intended but will greatly reduce the administrative burden of the reporting agency. It will allow for a consistent, streamlined reporting process utilizing the same data base and the same information. The Panel notes in support of this recommendation that these two sections were originally enacted as two related sections, and that the legislative history of these sections indicates that the Congress viewed these reports as analytically related to each other. It was only as the amount of detail set forth in the sections increased that the two reporting requirements

---

<sup>20</sup>In addition, the requirement for the submission of preliminary SARs would be deleted as redundant.

<sup>21</sup>See Ch. 3.1.4. of this Report

were clearly split into two separate, statutory provisions. If the legislative detail is decreased, as the Panel proposes herein, the rationale for separate provisions is eliminated.

The Offices of the Assistant Secretary of the Army (Research, Development and Acquisition), Assistant Secretary of the Navy (Research, Development & Acquisition) and the Assistant Secretary of the Air Force (Financial Management) have concurred with these recommendations.<sup>22</sup>

The Office of the Under Secretary of Defense for Acquisition recommends that sections 2432 and 2433 remain separate.<sup>23</sup> That Office is concerned that consolidation of the statutes would lead to confusion because the SAR is a report for Congress and the UCR is internal. Additionally, that Office is concerned that the combination would result in a mandatory requirement for quarterly SARs in order to accommodate the quarterly UCR.<sup>24</sup> However, in the interest of streamlining, the Panel believes that the two sections can be effectively combined. The addition of the UCR requirement to this statute does not alter the quarterly SAR provisions. The Panel clarifies that its intent is not to generate a quarterly SAR. Rather, the purpose is to streamline and to significantly reduce the administrative burden of redundant reporting requirements.

Finally, as noted above, Congress recently made changes to this section. The changes recommended here are consistent with and a follow-on to those recently made. However, if this proposed consolidation is not accepted, the SAR should remain as it exists. The personnel responsible for preparing it have established additional procedures and can accomplish the task, however cumbersome.

### 3.1.3.5. Relationship to Objectives

Amendment of this statute will further the goal of streamlining DOD acquisition practices while maintaining effective congressional oversight. Retention of this statute will also specifically promote the Panel objective that acquisition laws should, when generating reporting requirements, permit as much as possible, the use of data that already exists and is already collected without imposing additional administrative burdens.

---

<sup>22</sup>Memorandum from Mr. Stephen Burdt, Director for Program Evaluation, Office of the Assistant Secretary of the Army, to DOD Advisory Panel, dated 21 Sep. 1992. The other two offices listed above have orally confirmed their endorsement of this proposal. Assistant Deputy Assistant Secretary (Management Policy and Program Integration), Assistant Secretary (Acquisition), Department of the Air Force, notes that "if the SECDEF actually reduces the program office reporting workload and increases the use of a common data base, then we would be in agreement with the recommended change . . . [However,] our experience with [such] involvement is that attempts to change the reports, e.g., the DAES, actually result in additional workload for the Services." See Memorandum from Col. Blaise Durante, Assistant Deputy Assistant Secretary (Management Policy and Program Integration), Assistant Secretary (Acquisition), Department of the Air Force, to Maj Gen John Slinkard, HQ AFSC, dated 19 Feb. 1992.

<sup>23</sup>Memorandum from Mr. Gene Porter, Principal Deputy Director, Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition), to DOD Panel, dated 9 Nov. 1992.

<sup>24</sup>*Id.* As currently written, this statute requires a quarterly SAR unless an identified breach has not occurred. This language is interpreted as not setting forth a mandatory requirement for a quarterly SAR.

### 3.1.3.6. Proposed Statute

#### § 2432. Selected Acquisition Reports; Unit Cost Reports

~~(a) In this section:~~

~~(1) The term "program acquisition unit cost", with respect to a major defense acquisition program, means the amount equal to (A) the total cost for development and procurement of, and system-specific military construction for, the acquisition program, divided by (B) the number of fully configured end items to be produced for the acquisition program.~~

~~(2) The term "procurement unit cost", with respect to a major defense acquisition program, means the amount equal to (A) the total of all funds programmed to be available for obligation for procurement for the program for a fiscal year, reduced by the amount of funds programmed to be available for obligation for such fiscal year for advanced procurement for such program in any subsequent year and increased by any amount appropriated in years before such fiscal year for advanced procurement for such program in such fiscal year, divided by (B) the number of fully configured end items to be procured with such funds during such fiscal year. If for any fiscal year the funds appropriated, or the number of fully configured end items to be purchased, differ from those programmed, the procurement unit cost shall be revised to reflect the appropriated amounts and quantities.~~

~~(3) The term "major contract", with respect to a major defense acquisition program, means each of the six largest prime, associate or Government furnished equipment contracts under the program that is in excess of \$40,000,000~~

~~(4) The term "full life-cycle cost", with respect to a major defense acquisition program, has the meaning given the term "cost of the program" in section 2434(b)(2) of this title.~~

~~(b)(a)(1) The Secretary of Defense shall submit to Congress at the end of each fiscal-year quarter a report on current major defense acquisition programs. Except as provided in paragraphs (2) and (3), each such report shall include a status report on each defense acquisition program that at the end of such quarter is a major defense acquisition program. Reports under this section shall be known as Selected Acquisition Reports.~~

~~(2) A status report on a major defense acquisition program need not be included in the Selected Acquisition Report for the second, third, or fourth quarter of a fiscal year if such a report was included in a previous Selected Acquisition Report for that fiscal year and during the period since that report there has been--~~

~~(A) less than a 15 percent increase in program acquisition unit cost and current procurement unit cost; and~~

~~(B) less than a six-month delay in any program schedule milestone shown in the Selected Acquisition Report.~~

(3)(A) The Secretary of Defense may waive the requirement for submission of Selected Acquisition Reports for a program for a fiscal year if-

(i) the program has not entered full scale development or engineering and manufacturing development;

(ii) a reasonable cost estimate has not been established for such program;

and

(iii) the system configuration for such program is not well defined.

(B) The Secretary shall submit to the Committees on Armed Services of the Senate and House of Representatives a written notification of each waiver under subparagraph (A) for a program for a fiscal year not later than 60 days before the President submits the budget to Congress pursuant to section 1105 of title 31 in that fiscal year.

~~(e)(1) Each Selected Acquisition Report for the first quarter for a fiscal year shall include-~~

~~(A) the same information, in detailed and summarized form, as is provided in reports submitted under section 2431 of this title;~~

~~(B) the current program acquisition unit cost for each major defense acquisition program included in the report and the history of that cost from the date the program was first included in a Selected Acquisition Report to the end of the quarter for which the current report is submitted; and~~

~~(C) such other information as the Secretary of Defense considers appropriate.~~

~~(2) Each Selected Acquisition Report for the first quarter of a fiscal year shall be designed to provide to the Committees on Armed Services of the Senate and House of Representatives the information such Committees need to perform their oversight functions. The Secretary of Defense may approve changes in the content of the Selected Acquisition Report if the Secretary provides such Committees with written notification of such changes at least 60 days before the date of the report that incorporates the changes.~~

~~(3) In addition to the material required by paragraphs (1) and (2), each Selected Acquisition Report for the first quarter of a fiscal year shall include the following:~~

~~(A) A full life cycle cost analysis for each major defense acquisition program included in the report that is in the full scale engineering development stage or has completed that stage.~~

~~(B) If the system that is included in that major defense acquisition program has an antecedent system, a full life cycle cost analysis for that system.~~

~~(C) Production information for each major defense acquisition program included in the report that is produced at a rate of six units or more per year, including (with respect to each such program) the following:~~

~~(i) specification of the baseline production rate for each year of production of the program, defined as the rate or rates to be achieved at full rate production as assumed in the decision to proceed with production (commonly referred to as the "Milestone III" decision).~~

~~(ii) Specification, for each of the two budget years of production under the program, of the minimum sustaining production rate, defined as the production rate for each budget year that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers.~~

~~(iii) Specification, for each of the two budget years of production under the program, of the maximum production rate, defined as the production rate for each budget year that is attainable with the facilities and tooling programmed to be available for procurement under the program or otherwise to be provided with Government funds.~~

~~(iv) Specification, for each of the two budget years of production, of the current production rate, defined as the production rate for each budget year for which the report is submitted, based on the budget submitted to Congress pursuant to section 1105 of title 31;~~

~~(v) Estimation of any cost variance--~~

~~(I) between the budget year procurement unit cost at the production rate specified pursuant to clause (iv) and the and the budget year procurement unit costs at the minimum sustaining production rate specified pursuant to clause (ii); and~~

~~(II) between the total remaining procurement cost at the current production rate specified pursuant to clause (iv) and the total remaining procurement cost at the maximum production rate specified pursuant to clause (iii)~~

~~(vi) Estimation of any cost variance--~~

~~(I) between the budget year procurement unit costs at the current production rate specified pursuant to clause (iv) and the budget year procurement unit costs at the maximum production rate specified pursuant to clause (iii) and;~~

~~(II) between the total remaining procurement cost at the current production rate specified under clause (iv) and the total remaining cost at the maximum production rate specified under clause (iii)~~

~~(vii) Estimation of any quantity variance--~~

~~(I) between the budget year quantities assumed in the minimum sustaining production rate specified under clause (i) and the current production rate specified under clause (iv); and~~

~~(II) between the budget year total quantities assumed in the maximum production rate specified under clause (iii) and the current production rate specified under clause (iv).~~

~~(4) Selected Acquisition Reports for the first quarter of a fiscal year shall be known as comprehensive annual Selected Acquisition Reports--~~

~~(5) The Secretary of Defense shall ensure that paragraph (4) of subsection (a) is implemented in a uniform manner, to the extent practicable, throughout the Department of Defense.~~

(b)(1) Selected Acquisition Reports for the first quarter of a fiscal year shall be known as comprehensive annual Selected Acquisition Reports.

(2) Selected Acquisition Reports for the second, third, and fourth quarters of a fiscal year shall be known as quarterly Selected Acquisition Reports.

(3) Each Selected Acquisition Report for the first quarter of a fiscal year shall be designed to provide to the Committees on Armed Services of the Senate and House of Representatives the information such Committees need to perform their oversight functions. In the interests of consistency and streamlining of reporting, the Secretary of Defense shall include in the Selected Acquisition Reports, such information as is used by the Department of Defense to manage major defense acquisition programs. The Secretary of Defense shall determine the scope and form of the items to be included in both the Comprehensive Annual and Quarterly Selected Acquisition Report and issue guidelines to ensure consistent reporting procedures. The Secretary of Defense may approve changes in the content of the Selected Acquisition Report if the Secretary provides such Committees with written notification of such changes at least 60 days before the date of the report that incorporates the changes.

(4) Each Quarterly SAR shall contain a notification of any Program Acquisition Unit Cost or Current Procurement Unit Cost increase of at least 15%.

~~(d)(1) Each Selected Acquisition Report for the second, third, and fourth quarters of a fiscal year shall include—~~

~~(A) with respect to each major defense acquisition program that was included in the most recent comprehensive annual Selected Acquisition Report, the information described in subsection (e); and~~

~~(B) with respect to each major defense acquisition program that was not included in the most recent comprehensive annual Selected Acquisition Report, the information described in subsection (e).~~

~~(2) Selected Acquisition Reports for the second, third, and fourth quarters of a fiscal year shall be known as Quarterly Selected Acquisition Reports.~~

~~(e) Information to be included under this subsection in a Quarterly Selected Acquisition Report with respect to a major defense acquisition program is as follows:~~

~~(1) The quantity of items to be purchased under the program.~~

~~(2) The program acquisition cost.~~

~~(3) The program acquisition unit cost.~~

~~(4) The current procurement cost for the program.~~

~~(5) The current procurement unit cost for the program.~~

~~(6) The reasons for any change in program acquisition cost, program acquisition unit cost, procurement cost, or procurement unit cost or in program schedule from the previous Selected Acquisition Report.~~

~~(7) The major contracts under the program and the reasons for any cost or schedule variances under those contracts since the last Selected Acquisition Report.~~

~~(8) The completion status of the program (A) expressed as the percentage that the number of years for which funds have been appropriated for the program is of the number of years for which it is planned that funds will be appropriated for the program, and (B) expressed as the percentage that the amount of funds that have been appropriated for the program is of the total amount of funds which it is planned will be appropriated for the program.~~

~~(9) Program highlights since the last Selected Acquisition Report.~~

~~(f) (c) Each comprehensive annual Selected Acquisition Report shall be submitted within 60 days after the date on which the President transmits the Budget to Congress for the following fiscal year, and each Quarterly Selected Acquisition Report shall be submitted within 45 days after the end of the fiscal-year quarter. A preliminary report shall be submitted for each annual Selected Acquisition Report within 30 days of the date on which the President submits the Budget to Congress.~~

~~(g) (d) The requirements of this section with respect to a major defense acquisition program shall cease to apply after 90 percent of the items to be delivered to the United States under the program (shown as the total quantity of items to be purchased under the program in the most recent Selected Acquisition Report) have been delivered or 90 percent of planned expenditures under the program have been made.~~

~~(h)(1) (e) Total program reporting under this section shall apply to a major defense acquisition program when funds have been appropriated for such and the Secretary of Defense has decided to proceed to full-scale engineering and manufacturing development of such program. Reporting may be limited to the development program as provided by the Secretary of Defense's guidelines promulgated pursuant to subsection (b)(3) in paragraph (2) before a decision is made by the Secretary of Defense to proceed to full-scale engineering and manufacturing development if the Secretary notifies the Committees on Armed Services of the Senate and House of Representatives of the intention to submit a limited report under this subsection not less than 15 days before a report is due under this section.~~

~~(2) A limited report under this subsection shall include the following:~~

~~(A) The same information, in detail and summarized form, as is provided in reports submitted under subsections (b)(1) and (b)(3) of section 2431 of this title.~~

~~(B) Reasons for any change in the development cost and schedule.~~

~~(C) The major contracts under the development program and the reasons for any cost or schedule variances under those contracts since the last Selected Acquisition Report.~~

~~(D) The completion status of the development program expressed--~~

~~(i) as the percentage that the number of years for which funds have been appropriated for the development program is of the number of years for which it is planned that funds will be appropriated for the program; and~~

~~(ii) as the percentage that the amount of funds that have been appropriated for the development program is of the total amount of funds which it is planned will be appropriated for the program.~~

~~(E) Program highlights since the last Selected Acquisition Report.~~

~~(F) Other information as the Secretary of Defense considers appropriate.~~

~~(3) The submission requirements for a limited report under this subsection shall be the same as for quarterly Selected Acquisition Reports for total program reporting.~~

(f)(1) Unit Cost Reports-- The Secretary of Defense shall require the program manager for a major defense acquisition program, on a quarterly basis, to submit to the service acquisition executive designated by the Secretary concerned a written report on the unit costs of the program. This report shall be known as the Unit Cost Report. It shall be submitted not more than 30 calendar days after the end of the quarter. The Secretary of Defense shall issue regulations implementing this requirement.

(2) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program, the service acquisition executive shall determine whether the current program acquisition unit cost for the program has increased by at least 15 percent over the program acquisition unit cost for the program as shown in the Baseline Report.

(3) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program that is a procurement program, the service acquisition executive, in addition to the determination under paragraph (2), shall determine whether the current procurement unit cost for the program has increased by at least 15 percent over the procurement unit cost for the program as set forth in the Baseline Report.

(4) If, based upon the service acquisition executive's determination, the Secretary concerned determines (for the first time since the beginning of the current fiscal year) that the current program acquisition unit cost has increased by at least 15 percent as determined under paragraph (2), or that the current procurement unit cost has increased by at least 15 percent as determined under paragraph (3), the Secretary shall notify Congress in writing of such determination and of the increase with respect to such program within 30 days after the date on which the service acquisition executive reports his determination of such increase in such unit cost to the Secretary and shall include in such notification the date on which the determination was made.<sup>25</sup>

---

<sup>25</sup>Sections (f)(2), (3) and (4) which appear in this revised SAR statute were taken directly from 10 U.S.C. § 2433.

### **3.1.4. 10 U.S.C. § 2433**

#### **Unit Cost Reports**

##### **3.1.4.1. Summary of Law**

This statute requires the program manager for a major defense acquisition program to submit a quarterly written report on the unit costs of a program to the service acquisition executive when certain thresholds are met. Moreover, it dictates that such reports contain program acquisition unit cost, procurement unit cost, any cost variance or schedule variance since the Baseline Report was submitted, any changes from program schedule milestones and various additional information.

Such reports must be filed if the program acquisition (or procurement, if it is a procurement program) unit cost has increased by 15% or more over that shown in the baseline, or the total cost variances or schedule variances have resulted in a 15% increase in the cost of the contract since signed and if such a report had not been previously filed during the current fiscal year. If it is discovered, after such report that the current program acquisition (or procurement, if it is a procurement program) unit cost has increased by 5% or more over the current cost as shown in the most recent report or the cost variances have resulted in a 5% increase, an additional report must be submitted.

Subsequently, the service acquisition executive is charged with determining whether the current cost has increased by at least 15% or by at least 25% over the cost as set out in the baseline. If the Secretary agrees with such determination, he must notify Congress and include all information previously described as required. This information is included in the Annual SAR.

If the increase is at least 25%, the Secretary of Defense must certify that the program is essential to the national defense, there are no alternatives, the new estimates are reasonable, and the management structure is adequate.

##### **3.1.4.2. Background of Law**

The requirement for unit cost reporting first appeared as a freestanding provision in the DOD Authorization Act for FY82.<sup>1</sup> In 1983, the Congress enacted this section as a permanent requirement.<sup>2</sup> The language originated in the Senate version of the bill. The Senate Report noted:

The committee remains seriously concerned about the continued escalation in the unit costs of some of our major defense systems.

---

<sup>1</sup>Pub. L. No. 96-86, § 817, 95 Stat. 1129 (1981).

<sup>2</sup>DOD Authorization Act for FY 1983, Pub. L. No. 97-252, § 1107, 96 Stat. 746 (1983).

. . . The Committee believes that the cost tracking mechanism approved by the Congress last year is a reasonable and workable method of giving excessive unit cost growth the level of visibility and accountability that it deserves. Therefore, the committee recommends placing the requirement for the unit cost report system approved last year in permanent law.<sup>3</sup>

In 1984, the provision was amended to add the requirement that the program manager submit reports to the service secretary upon reason to believe that a 15% increase in contract cost or 15% slip in contract schedule. The secretary would then be required to so report to the Congress.<sup>4</sup> It was also amended to add the current Baseline Report definition. Overall, the requirement was designed to control unit cost growth by identifying at an early stage major defense systems experiencing cost growth problems.<sup>5</sup>

In 1986, this section was redesignated to its current section. In 1989, the section was amended to eliminate separate quarterly internal unit cost reports by consolidating those reports into the internal Defense Acquisition Executive Summary Reports. It also consolidated the external unit cost exception reports by consolidating them with the SARs, and standardized certain cost and baseline reporting criteria.<sup>6</sup> The conferees noted that further streamlining was warranted not only for congressional reports but also for reports required of program managers by the Secretary of Defense and by the services.<sup>7</sup>

Most recently, the National Defense Authorization Act for FY 1993 amended this section to extend the internal report deadline, to substitute "at least" for "more than" when describing the triggering unit cost increase, to alter the date of the Secretary's congressional reporting requirement, and to alter the circumstances when a unit cost breach triggers a SAR.<sup>8</sup>

### 3.1.4.3. Law in Practice

The reporting requirements are implemented by DOD Manual 5000.2M, Part 18, Unit Cost Reports.

Commenters noted that unit cost reports generally serve a useful purpose. One Army Program Executive Office stated that "the UCR as presently used provides feeder information to the SAR and as such would be very difficult to eliminate as it provides the necessary in depth data to substantiate the SAR. It also serves as the documentation provided to the Cost Analysis

---

<sup>3</sup>S. REP. NO. 330, 97th Cong., 1st Sess. 147 (1983).

<sup>4</sup>This requirement was initially proposed by the 1983 House DOD Authorization bill as an amendment to the SAR statute but had been deleted in conference. It was repropoed the following year as an amendment to this section.

<sup>5</sup>H.R. REP. NO. 691, 98th Cong., 2d Sess. 271 (1984).

<sup>6</sup>National Defense Authorization Act for FYs 90 and 91, Pub. L. No. 101-189, 103 Stat. 1352 (1989).

<sup>7</sup>H.R. REP. NO. 331, 101st Cong., 1st Sess. 603 (1989).

<sup>8</sup>Pub. L. No. 102-484, § 817(d), 106 Stat. 2456-57 (1992).

Improvement Group for their use in validating the cost for the program involved."<sup>9</sup> One Air Force commenter also opposes outright elimination of the unit cost report.<sup>10</sup>

However, an increase in unit cost may be a false indicator of a problematic program. An increase in unit cost may be the result of many things not related to program health. For example, if Congress or OSD alters program funding or quantity, unit cost may be adversely affected. Often, unit cost breaches may result from these funding or quantity perturbations.

Moreover, it is sometimes difficult to determine exactly how a unit will be measured. In an armored vehicle or aircraft program, there is usually no problem identifying the unit. However, in a missile, rocket, or communication program the task is more difficult because numerous components may be necessary for the system to operate and they are not all self-contained. Units may be artificially designated, raising further questions as to the relevance of a breach to the health of the program.

Failure to submit required reports or certifications in the statutorily-required time will trigger the suspension of the obligation of funds. This penalty, if imposed, may result in program delays with greater costs than savings. Fortunately, action is usually taken in time to avoid suspension of obligations.

Additionally, DOD does not solely manage its programs in terms of unit cost, but in terms of cost, performance and schedule. Decisions to terminate programs are generally not made because unit costs are exceeded but for affordability considerations and for failure of program performance or inability to counter the relevant threat.

As one commenter noted,

program termination should not be made solely on the increase in unit costs. Under APB procedures, OSD has created separate cost reporting requirements for R&D, procurement, and MILCON, and this information should be used in conjunction with the unit cost reports to determine program health. Granted, when programs reach the media and congressional floor, much is made of increase in unit costs, playing on public ignorance of all the factors that enter into increase in unit costs.<sup>11</sup>

#### **3.1.4.4. Recommendation and Justification**

##### **Repeal; incorporate Unit Cost Report requirement into 10 U.S.C. § 2432.**

The Panel recommends repeal of the unit cost reporting statute. Sufficient information necessary for effective congressional oversight, and to track cost growth of a major defense acquisition program, will be included in the SAR as proposed to be amended. Further, unit cost reports are in many cases not relevant barometers of program health. The Panel acknowledges, however, that unit cost can sometimes serve a useful purpose, and that the requirement should be incorporated into the SAR statute.

The Panel specifically recommends deletion of the dual 15% and 25% breach thresholds. The Panel proposes retention of the 15% breach threshold, as it would generally encompass the 25% breach. In the current language of the section, the 25% breach also triggers a number of potentially onerous consequences for the program, e.g., suspension of the obligation of funds. Under the proposed statute, the 15% breach triggers solely a notification to the Congress. The Panel believes that this notification should be the only statutorily mandated consequence of a unit cost breach. Upon notification, the Congress may take whatever oversight action it deems appropriate, including suspension of funds.

As noted in the analysis for 10 U.S.C. § 2432, this consolidation is supported by the relevant military departments. The Office of the Under Secretary of Defense for Acquisition recommended that this statute remain separate from the SAR statute. However, as discussed in the rationale for amending 10 U.S.C. § 2432, the Panel would combine them in the interest of streamlining and to ease the administrative burden of duplicative reporting requirements.

#### **3.1.4.5. Relationship to Objectives**

Repeal of this statute, and consolidation of its broad reporting requirements into 10 U.S.C. § 2432, will further the goal of streamlining the DOD acquisition process while maintaining effective congressional oversight. Repeal of this statute will specifically promote the Panel objective that acquisition laws should, when generating reporting requirements, permit as much as possible the use of data that already exists and is already collected without imposing additional administrative burdens.

#### **3.1.4.6 Proposed Statute**

Subsection (f)(1), (2), (3) and (4) of proposed statute for 10 U.S.C. § 2432 provides as follows:<sup>12</sup>

---

<sup>12</sup>The standard format of this Report is to present proposed statutory changes in a "line-in, line-out" format. However, this recommended consolidation, and other consolidations proposed within this chapter (chs. 3.3.5, 3.3.24 through 3.3.28; 3.3.32; and 3.5.1 through 3.5.8) do not readily lend themselves to this format. Frequently, a number of separate sections are being subsumed within the proposed statute. Therefore, to permit a direct comparison between the proposed and the current statutory language, the relevant portion of the proposed,

(f)(1) Unit Cost Reports-- The Secretary of Defense shall require the program manager for a major defense acquisition program, on a quarterly basis, to submit to the service acquisition executive designated by the Secretary concerned a written report on the unit costs of the program. This report shall be known as the Unit Cost Report. It shall be submitted not more than 30 calendar days after the end of the quarter. The Secretary of Defense shall issue regulations implementing this requirement.

(2) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program, the service acquisition executive shall determine whether the current program acquisition unit cost for the program has increased by at least 15 percent over the program acquisition unit cost for the program as shown in the Baseline Report.

(3) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program that is a procurement program, the service acquisition executive, in addition to the determination under paragraph (2), shall determine whether the current procurement unit cost for the program has increased by at least 15 percent over the procurement unit cost for the program as set forth in the Baseline Report.

(4) If, based upon the service acquisition executive's determination, the Secretary concerned determines (for the first time since the beginning of the current fiscal year) that the current program acquisition unit cost has increased by at least 15 percent as determined under paragraph (2), or that the current procurement unit cost has increased by at least 15 percent as determined under paragraph (3), the Secretary shall notify Congress in writing of such determination and of the increase with respect to such program within 30 days after the date on which the service acquisition executive reports his determination of such increase in such unit cost to the Secretary and shall include in such notification the date on which the determination was made.<sup>13</sup>

#### **Current Statute.**

The text of the current section 2433, to be repealed and replaced in part by proposed subsections (f)(1), (2), (3) and (4) of section 2432, provides as follows:

10 U.S.C. § 2433. Unit cost reports

(a) In this section:

(1) The terms "program acquisition unit cost", "procurement unit cost", and "major contract" have the same meanings as provided in section 2432(a) of this title.

---

consolidated statute is reiterated in the individual analysis, together with the text of the current law -- neither one using the "strike-out" format.

<sup>13</sup>Subsections (f)(2), (3) and (4) which appear in this revised SAR statute were taken directly from 10 U.S.C. § 2433.

(2) The term "Baseline Selected Acquisition Report", with respect to a unit cost report that is submitted under this section to the service acquisition executive designated by the Secretary concerned on a major defense acquisition program, means the Selected Acquisition Report in which information on the program is first included or the comprehensive annual Selected Acquisition Report for the fiscal year immediately before the fiscal year containing the quarter with respect to which the unit cost report is submitted, whichever is later.

(3) The term "procurement program" means a program for which funds for procurement are authorized to be appropriated in a fiscal year.

(4) The term "Baseline Report", with respect to a unit cost report that is submitted under this section to the service acquisition executive designated by the Secretary concerned on a major defense acquisition program, means--

(A) the most recent Selected Acquisition Report submitted under subsection (e)(2)(B) that includes information on the program, if that report was submitted for the second, third, or fourth quarter of the preceding fiscal year;

(B) if no report was submitted under subsection (e)(2)(B) with respect to the program during that three-quarter period, the most recent Selected Acquisition Report submitted under subsection (e)(1) that includes information on the program, if that report was submitted during that three-quarter period; and

(C) if no report was submitted with respect to the program under subsection (e)(1) or (e)(2)(B)(ii) during that three-quarter period, the baseline Selected Acquisition Report.

(b) The program manager for a major defense acquisition program (other than a program not required to be included in the Selected Acquisition Report for that quarter under section 2432(b)(3) of this title) shall, on a quarterly basis, submit to the service acquisition executive designated by the Secretary concerned a written report on the unit costs of the program. Each report shall be submitted not more than 7 days (excluding Saturdays, Sundays, and legal public holidays) after the end of that quarter. The program manager shall include in each such unit cost report the following information with respect to the program (as of the last day of the quarter for which the report is made):

(1) The program acquisition unit cost.

(2) In the case of a procurement program, the procurement unit cost.

(3) Any cost variance or schedule variance in a major contract under the program since the Baseline Report was submitted.

(4) Any changes from program schedule milestones or program performances reflected in the baseline description established under section 2435 of this title that are known, expected, or anticipated by the program manager.

(c)(1) If the program manager of a major defense acquisition program for which a unit cost report has previously been submitted under subsection (b) determines at any time during a quarter that there is reasonable cause to believe--

(A) that the program acquisition unit cost for the program has increased by more than 15 percent over the program acquisition unit cost for the program as shown in the Baseline Report;

(B) in the case of a major defense acquisition program that is a procurement program, that the current procurement unit cost for the program has increased by more than 15 percent over the procurement unit cost for the program as reflected in the Baseline Report; or

(C) that cost variances or schedule variances of a major contract under the program have resulted in an increase in the cost of the contract of at least 15 percent over the cost of the contract as of the time the contract was made; and if a unit cost report indicating an increase of such percentage or more has not previously been submitted to the service acquisition executive designated by the Secretary concerned during the current fiscal year (other than the last quarterly unit cost report under subsection (b) for the preceding fiscal year), then the program manager shall immediately submit to such service acquisition executive a unit cost report containing the information, determined as of the date of the report, required under subsection (b).

(2) If in any fiscal year the program manager for a major defense acquisition program has submitted to the service acquisition executive designated by the Secretary concerned a unit cost report (other than the last quarterly unit cost report under subsection (b) for the preceding fiscal year) indicating an increase of 15 percent or more in a category described in clauses (A) through (C) of paragraph (1) and subsequently determines that there is reasonable cause to believe--

(A) that the current program acquisition unit cost of the program has increased by more than 5 percent over the current program acquisition unit cost as shown in the most recent report under this subsection or subsection (b) submitted to such service acquisition executive with respect to that program;

(B) in the case of a major defense acquisition program that is a procurement program, that the current procurement unit cost for the program has increased by more than 5 percent over the current procurement unit cost as shown in the most recent report under this subsection or subsection (b) submitted to such service acquisition executive with respect to that program; or

(C) that cost variances or schedule variances of a major contract under the program have resulted in an increase in the cost of the contract of at least 5 percent over the cost of the contract as shown in the most recent report under this subsection or subsection (b) submitted to such service acquisition representative with respect to that program;

the program manager shall immediately submit to [the] such service acquisition executive a unit cost report containing the information, determined as of the date of the report, required by subsection (b).

(d)(1) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program, the service acquisition executive shall determine whether the current program acquisition unit cost for the program has increased by more than 15 percent, or by more than 25 percent, over the program acquisition unit cost for the program as shown in the Baseline Report.

(2) When a unit cost report is submitted to the service acquisition executive designated by the Secretary concerned under this section with respect to a major defense acquisition program that is a procurement program, the service acquisition executive, in addition to the determination under paragraph (1), shall determine whether the current procurement unit cost for the program has increased by more than 15 percent, or by more than 25 percent, over the procurement unit cost for the program as reflected in the Baseline Report.

(3) If, based upon the service acquisition executive's determination, the Secretary concerned determines (for the first time since the beginning of the current fiscal year) that the current program acquisition unit cost has increased by more than 15 percent, or by more than 25 percent, as determined under paragraph (1) or that the current procurement unit cost has increased by more than 15 percent, or by more than 25 percent, as determined under paragraph (2), the Secretary shall notify Congress in writing of such determination and of the increase with respect to such program within 30 days after the date on which the service acquisition executive reports his determination of such increase in such unit cost to the Secretary and shall include in such notification the date on which the determination was made.

(e)(1)(A) Except as provided in subparagraph (B), whenever the Secretary concerned determines under subsection (d) that the current program acquisition cost of a major defense acquisition program has increased by more than 15 percent, a Selected Acquisition Report shall be submitted to Congress for the first fiscal-year quarter ending on or after the date of the determination and such report shall include the information described in section 2432(e) of this title. The report shall be submitted within 45 days after the end of that quarter.

(B) Whenever the Secretary makes a determination referred to in subparagraph (A) in the case of a major defense acquisition program during the second quarter of a fiscal year and before the date on which the President transmits the budget for the following fiscal year to Congress pursuant to section 1105 of title 31, the Secretary is not required to file a Selected Acquisition Report under subparagraph (A) but shall include the information described in subsection (g) regarding that program in the comprehensive annual Selected Acquisition Report submitted in that quarter.

(2) If the percentage increase in the current program acquisition cost of a major defense acquisition program (as determined by the Secretary under subsection (d)) exceeds 25 percent, the Secretary of Defense shall submit to Congress, before the end of the 30-day period beginning

on the day the Selected Acquisition Report containing the information described in subsection (g) is required to be submitted under section 2432(f) of this title--

(A) a written certification, stating that--

(i) such acquisition program is essential to the national security;

(ii) there are no alternatives to such acquisition program which will provide equal or greater military capability at less cost;

(iii) the new estimates of the program acquisition unit cost or procurement unit cost are reasonable; and

(iv) the management structure for the acquisition program is adequate to manage and control program acquisition unit cost or procurement unit cost; and

(B) if a report under paragraph (1) has been previously submitted to Congress with respect to such program for the current fiscal year but was based upon a different unit cost report from the program manager to the service acquisition executive designated by the Secretary concerned, a further report containing the information described in subsection (g), determined from the time of the previous report to the time of the current report.

(3) If a determination of a more than 15 percent increase is made by the Secretary under subsection (d) and a Selected Acquisition Report containing the information described in subsection (g) is not submitted to Congress under paragraph (1), or if a determination of a more than 25 percent increase is made by the Secretary under subsection (d) and the certification of the Secretary of Defense is not submitted to Congress under paragraph (2), funds appropriated for military construction, for research, development, test, and evaluation, and for procurement may not be obligated for a major contract under the program. The prohibition on the obligation of funds for a major defense acquisition program shall cease to apply at the end of a period of 30 days of continuous session of Congress (as determined under section 7307(b)(2) of this title ) beginning on the date--

(A) on which Congress receives the Selected Acquisition Report under paragraph (1) or (2)(B) with respect to that program, in the case of a determination of a more than 15 percent increase (as determined in subsection (d)); or

(B) on which Congress has received both the Selected Acquisition Report under paragraph (1) or (2)(B) and the certification of the Secretary of Defense under paragraph (2)(A) with respect to that program, in the case of a more than 25 percent increase (as determined under subsection (d)).

(f) Any determination of a percentage increase under this section shall include expected inflation.

(g)(1) Except as provided in paragraph (2), each report under subsection (e) with respect to a major defense acquisition program shall include the following:

(A) The name of the major defense acquisition program.

(B) The date of the preparation of the report.

(C) The program phase as of the date of the preparation of the report.

(D) The estimate of the program acquisition cost for the program as shown in the Selected Acquisition Report in which the program was first included, expressed in constant base-year dollars and in current dollars.

(E) The current program acquisition cost in constant base-year dollars and in current dollars.

(F) A statement of the reasons for any increase in program acquisition unit cost or procurement unit cost.

(G) The completion status of the program (i) expressed as the percentage that the number of years for which funds have been appropriated for the program is of the number of years for which it is planned that funds will be appropriated for the program, and (ii) expressed as the percentage that the amount of funds that have been appropriated for the program is of the total amount of funds which it is planned will be appropriated for the program.

(H) The fiscal year in which information on the program was first included in a Selected Acquisition Report (referred to in this paragraph as the 'base year') and the date of that Selected Acquisition Report in which information on the program was first included.

(I) The type of the Baseline Report (under subsection (a)(4)) and the date of the Baseline Report.

(J) The current change and the total change, in dollars and expressed as a percentage, in the program acquisition unit cost, stated both in constant base-year dollars and in current dollars.

(K) The current change and the total change, in dollars and expressed as a percentage, in the procurement unit cost, stated both in constant base-year dollars and in current dollars and the procurement unit cost for the succeeding fiscal year expressed in constant base-year dollars and in current year dollars.

(L) The quantity of end items to be acquired under the program and the current change and total change, if any, in that quantity.

(M) The identities of the military and civilian officers responsible for program management and cost control of the program.

(N) The action taken and proposed to be taken to control future cost growth of the program.

(O) Any changes made in the performance or schedule milestones of the program and the extent to which such changes have contributed to the increase in program acquisition unit cost or procurement unit cost.

(P) The following contract performance assessment information with respect to each major contract under the program:

(i) The name of the contractor.

(ii) The phase that the contract is in at the time of the preparation of the report.

(iii) The percentage of work under the contract that has been completed.

(iv) Any current change and the total change, in dollars and expressed as a percentage, in the contract cost.

(v) The percentage by which the contract is currently ahead of or behind schedule.

(vi) A narrative providing a summary explanation of the most significant occurrences, including cost and schedule variances under major contracts of the program, contributing to the changes identified and a discussion of the effect these occurrences will have on future program costs and the program schedule.

(2) If a program acquisition unit cost increase or a procurement unit cost increase for a major defense acquisition program that results in a report under this subsection is due to termination or cancellation of the entire program, only the information specified in clauses (A) through (F) of paragraph (1) and the percentage change in program acquisition unit cost or procurement unit cost that resulted in the report need be included in the report. The certification of the Secretary of Defense under subsection (e) is not required to be submitted for termination or cancellation of a program.

(h) Reporting under this section shall not apply if a program has received a limited reporting waiver under section 2432(h) of this title.

### **3.1.5. 10 U.S.C. § 2434**

## **Independent cost estimates, operational manpower requirements**

### **3.1.5.1. Summary of Law**

Currently, an independent cost estimate, together with a manpower estimate, must be considered by the Secretary of Defense prior to approval of full-scale engineering development or production and deployment of a major defense acquisition program. Additionally, this statute defines the scope and material to be included in both the independent estimate and the manpower estimate. Essentially, it requires that the Secretary be aware of the cost and total manpower estimate of a program.

### **3.1.5.2. Background of Law**

Prior to the enactment of this section, the Secretary of Defense had established a process for independent review and evaluation of service cost estimates for major defense acquisition programs. Specifically, by regulation, the Secretary of Defense had established a Cost Analysis Improvement Group to advise the Defense System Acquisition Review Council on matters related to cost. That Group provided an independent review and evaluation for the Council of service cost estimates for major weapon systems.

This section was enacted by the DOD Authorization Act for FY 1984.<sup>1</sup> The language originated in the Senate version of the bill. The section originally prohibited the Secretary of Defense from approving the full-scale engineering development or the production and deployment of a major defense program until an independent estimate of the cost of the program was submitted and considered by the Secretary and a manpower estimate was submitted to the House and Senate Armed Services Committees. The Senate Committee stated that it was encouraged by the extent to which the Department was utilizing independent cost estimates to better manage and oversee major defense acquisition programs. However, it noted that the cost estimate must be prepared by an office which is not under the supervision, direction or control of the military department, defense agency or other component of DOD that is directly responsible for carrying out the development or acquisition of the program. Also, the independent cost estimates were to include all elements of the life-cycle costs of the program.<sup>2</sup>

The section was redesignated to its current section in 1985.<sup>3</sup> Subsequently, the statute was amended to define and require manpower estimates as additional submissions to the Senate and House Armed Services Committees by the Secretary of Defense.<sup>4</sup> When enacting the manpower requirement, the Senate Committee noted its concern:

---

<sup>1</sup>Pub. L. No. 98-94, § 831, 97 Stat. 682 (1983).

<sup>2</sup>See S. REP. NO. 174, 98th Cong., 1st Sess. 244 (1983).

<sup>3</sup>Pub. L. No. 99-433, §§ 101(a)(5) in part, 110(d)(15), (g)(9), 100 Stat. 995, 1003, 1004 (1985).

<sup>4</sup>Pub. L. No. 99-661, § 1208(a)-(c)(1), 100 Stat. 3975 (1985).

... with an inability to properly consider the manpower requirements associated with major defense acquisition programs during the development and procurement decision stages of these programs. This has resulted with the Congress being confronted with unexpected manpower requirements to permit the proper operation, maintenance and support of new weapons systems only after the systems have been fully developed, procured and fielded.<sup>5</sup>

The National Defense Authorization Act for Fiscal Years 1992 and 93 repealed the requirement to submit manpower reports to the House and Senate Armed Services Committees.<sup>6</sup> It merely required that the Secretary "consider" the independent cost estimate and manpower estimate prior to approving full-scale engineering development or production and deployment. In so amending, Congress had recognized that the bulk of reports received to date imposed no net change on the civilian or military personnel end-strengths of the Military Departments. Hence, in an effort to eliminate unnecessary reporting requirements, the manpower estimate reporting requirement was repealed.<sup>7</sup>

### **3.1.5.3. Law in Practice**

This section is implemented by DOD Directive 5000.2M, Part 6, Manpower Estimate Report, and by Part 15, Program Office and Independent Life-Cycle Cost Estimates. Cost estimating methodology is also discussed in Part 8 to that Manual, Cost and Operational Effectiveness Analysis, at paragraph 2(b)(11).

Currently, because of the 1991 amendment, the statute is not as demanding as it had been initially.

### **3.1.5.4. Recommendation and Justification**

**Amend to delete manpower and independent cost estimate report content and definition of manpower estimate; Amend definitions of independent cost estimate and manpower estimates to recast as policy guidance.**

Although Congress determined that it could do without manpower reports, it left in place the detailed descriptions of the report, as well as the contents of the independent cost estimates. Consistent with the Panel's objective to eliminate unnecessary statutory detail, the Panel recommends an amendment to allow the Secretary of Defense the discretion to prescribe regulations governing the contents of manpower estimates and independent cost estimates. This approach would leave intact the policy requirement to prepare such reports, but give to the Secretary the discretion to determine the details of the contents of such reports.

---

<sup>5</sup>S. REP. NO. 331, 99th Cong., 2d Sess. 218 (1985).

<sup>6</sup>Pub. L. No. 102-190, § 801, 105 Stat. 1412 (1992).

<sup>7</sup>H.R. REP. No. 311, 102d Cong., 1st Sess. 567 (1991).

One Army commenter noted that the definition of "independent estimate" is critical because it is essential that this function be performed outside the acquisition community.<sup>8</sup> While an Air Force commenter noted that "if [Congress] no longer require[s] the manpower requirements level of detail, they should eliminate the words in law describing exactly what the Services should 'consider'," he supported some statutory detail concerning the independent cost estimate.<sup>9</sup>

Consequently, the Panel recommends retention of the requirement that the independent cost estimate be prepared by an independent, outside entity. However, the Panel would modify the language to cast it as a policy requirement rather than as a definition. Similarly, the Panel would retain some policy guidance as to the nature and purpose of the manpower estimate, to assist, but not dictate, regulatory implementation.

The Office of Acquisition Policy and Program Integration, Under Secretary of Defense for Acquisition, notes that the recommended amendment does not conform with DOD acquisition policy, which requires independent cost estimates for all major programs beginning at Milestone I. In addition, that Office notes that the current retention of a separate manpower estimate report will inhibit DOD flexibility in combining the manpower and cost estimate reports into one document. That Office recommends that the term full scale engineering development be changed to engineering and manufacturing development to comport with current DOD policy. This change should be made to all applicable acquisition statutes.<sup>10</sup>

The Panel notes that, under the proposed statute, the DOD is able to require independent cost estimates at appropriate points through regulations and is not inhibited by the proposed statute. Also, the proposed statute solely requires the submission of an independent cost estimate and manpower estimate; it does not require that these estimates be submitted in separate reports.

### **3.1.5.5. Relationship to Objectives**

Amendment of this statute will promote the best interests of DOD by affording it greater managerial flexibility. Amendment will generally promote the Panel's stated objective of setting forth in statute broad guidelines, with details left to regulatory implementation.

### 3.1.5.6. Proposed Statute

#### 10 U.S.C. § 2434. Independent Cost Estimates: Operational Manpower Requirements

(a) Requirement for approval. The Secretary of Defense may not approve the full-scale engineering and manufacturing development, or the production and deployment, of a major defense acquisition program unless an independent estimate of the cost of the program, together with a manpower estimate, has been considered by the Secretary.

~~(b) The Secretary of Defense shall promulgate regulations governing the content and submission of an independent estimate of the cost of the program and a manpower estimate; provided, --~~  
~~Definitions: In this section:~~

~~(1) The term "independent estimate" means, with respect to a major defense acquisition program, an estimate of the cost of such program shall--~~

~~(A) be prepared by an office or other entity that is not under the supervision, direction, or control of the military department, defense agency, or other component of the Department of Defense that is directly responsible for carrying out the development or acquisition of the program, and~~

~~(B) include all costs of development, procurement, and operations and support, without regard to funding source or management control, and~~

~~(2) The manpower estimate shall properly consider, during the development and production stage of the program, the total personnel required to operate, maintain and support the program upon full operational deployment.~~

~~(2) The term "cost of the program" means, with respect to a major defense acquisition program, all elements of the life cycle costs of the program, including-~~

~~(A) the cost of all research and development efforts, without regard to the funding source or management control;~~

~~(B) the cost of the prime hardware and its major sub-components, support costs (including training, peculiar support, and data), initial spares, military construction costs, and the cost of all related procurements (including, where applicable, modifications to existing aircraft or ship platforms), without regard to the funding source or management control of the program; and~~

~~(C) all elements of operating and support costs.~~

~~(3) The term "manpower estimate" means, with respect to a major defense acquisition program, an estimate of-~~

~~(A) the total number of personnel (including military, civilian, and contractor personnel), expressed in total personnel or in man years, that will be required to operate, maintain, and support the program upon full operational deployment and to train personnel to operate, maintain, and support the program upon full operational deployment;~~

~~(B) the increases in military and civilian personnel end strengths that will be required for full operational deployment of the program above the end strengths authorized in the fiscal year in which such an estimate is submitted and the fiscal year or years in which such increases will be required; and~~

~~(C) the manner in which such a program would be operationally deployed if no increases in military and civilian end strengths were authorized above the strengths authorized for the fiscal year in which such estimate is submitted.~~

### **Enhanced Program Stability**

#### **3.1.6.1. Summary of Law**

This section requires the Secretary of a military department to establish a baseline description for a major defense acquisition program. It also requires Program Managers to provide reports to the Secretary if a reasonable possibility of a baseline breach is imminent. Moreover, the Secretary must review the program and submit a report to the Under Secretary of Defense for Acquisition if the cost exceeds a certain percentage or a program milestone slips more than 180 days. Finally, baseline descriptions must be forwarded to Congress for those programs designated as Defense Enterprise Programs.

#### **3.1.6.2. Background of Law**

This section was originally enacted in 1986 by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> The Senate bill contained a provision that would require the DOD to establish a cost, performance and schedule baseline for all programs designated as defense enterprise programs. The House amendment contained a similar provision requiring a baseline for all major defense acquisition programs. That bill also specified the cost, performance characteristics and specifications, scheduled milestones, testing parameters and initial provisioning plans to be included in the baseline. Finally, it required transmittal of the baselines to the Congress before full-scale development or full-rate production approval. In conference, the DOD was directed to prepare baselines for all major defense acquisition programs, but transmit only those for programs designated as defense enterprise programs.<sup>2</sup>

The Senate Committee Report on that legislation drew heavily upon the recommendations of the then-recently released Packard Commission report.<sup>3</sup> In an effort to implement private sector management tools in the defense acquisition process, the Senate proposed this provision to require the Secretaries of military departments to establish baseline descriptions for major defense acquisition programs. The Senate Committee Report noted that:

Under current practice, Congress evaluates and authorizes funding for annual increments of activity in each defense program. This current process of annual reviews reinforces a tendency to focus on accounting considerations rather than policy issues. It tends also to prolong contentiousness over a program, thus undermining stable program management.

---

<sup>1</sup>Pub.L. No. 99-500, § 101(c), 100 Stat. 3341 (1986)(Identical legislation omitted).

<sup>2</sup>H. CONF. REP. No. 1001, 99th Cong., 2d Sess. 495 (1986).

<sup>3</sup>R. Formula For Action. Final Report by the President's Commission of Defense Management. (Packard Commission, Apr. 1986).

By contrast in the Department of Defense, systems are reviewed in detail by senior decision-makers only at key milestones in the acquisition cycle of the program. If approved to proceed, the Services establish a baseline for the program which is sufficient to support the program until the next acquisition milestone. The Packard Commission recommended extending this baselining and milestone review process to Congress. . . .<sup>4</sup>

The House Committee Report noted that, by baselining the program, buy-ins would be discouraged and that gold-plating and unnecessary changes would be minimized.<sup>5</sup>

The section was amended in 1987 to modify a requirement that program deviations be reviewed by a panel.<sup>6</sup> A limitation on program manager tours was added in 1988 but repealed in 1991.<sup>7</sup>

### **3.1.6.3. Law in Practice**

This section is implemented by DOD Directive 5000.2M, Part 14, Acquisition Program Baselines.

The use of baselines has proven beneficial in the management of major defense acquisition programs. While no comments were received regarding the underlying utility of baseline reports, one Army PEO noted that this section contains excessive detail.<sup>8</sup>

### **3.1.6.4. Recommendation and Justification**

#### **Amend to delete Baseline Description and review procedures.**

The Panel recommends that the basic requirement for baseline establishment be retained. The establishment of a baseline provides an effective means both for internal DOD program management and for congressional program review. Indeed, the legislative intent underlying the enactment of this statute remains fully relevant today.

However, in the interest of streamlining excessive statutory detail and providing the Secretary authority to prescribe internal management procedures of DOD, the Panel recommends deletion of details concerning baseline content and procedures for review of the deviation report. Numerous baseline breaches occur throughout the year and all do not necessitate the establishment of a review panel. Also, the Panel recommends that the statute be amended to

---

<sup>4</sup>S. REP. NO. 331, 99th Cong., 2d Sess. 259 (1986).

<sup>5</sup>H.R. REP. No. 718, 99th Cong., 2d Sess. 254 (1986).

<sup>6</sup>Pub.L. No. 100-180, § 803(a), 101 Stat. 1125 (1987).

<sup>7</sup>Pub.L. No. 100-370, § 1(i)(1), 102 Stat. 848 (1990); Pub. L. No. 101-510, § 1484(k)(11), 104 Stat. 1665 (1990).

<sup>8</sup>Memorandum from Brig Gen. Robert Drolet, Air Defense, to Mr. Anthony Gamboa, Deputy General Counsel (Acquisition), Department of the Army, dated 8 Apr. 1992.

charge the Secretary of Defense with the responsibility of providing regulations to govern baselines, deviation reports, and recommendations for approval of revised baselines.

The Office of Acquisition Policy and Program Integration, Under Secretary of Defense (Acquisition), recommends that the contents of the baseline description appear in the statute, noting that the proposed revision deprives the statute of essential content.<sup>9</sup> However, the Panel believes that, in the interest of streamlining, such detail should be set out in regulation. The essential content of the section is the requirement that baselining be established, and not detailed descriptions of what appropriate baselining must encompass.

### **3.1.6.5. Relationship to Objectives**

Amendment of this statute would promote the best interests of the DOD. It would afford the Department greater managerial flexibility while maintaining an effective tool for meaningful congressional oversight. Specifically, amendment of this statute as proposed will promote the Panel objective that acquisition laws should, when generating reporting requirements, permit as much as possible, the use of data that already exists and is already collected without imposing additional administrative burdens. Amendment will also promote the Panel's stated objective of setting forth in statute broad guidelines, with details left to implementing regulations.

### **3.1.6.6. Proposed Statute**

#### **§ 2435. Enhanced Program Stability**

##### **(a) Baseline description requirement.**

(1) The Secretary of a military department shall establish a baseline description for a major defense acquisition program under the jurisdiction of such Secretary--

(A) before such program enters full-scale engineering manufacturing and development; and

(B) before such program enters full-rate production.

~~(2) A baseline description required under paragraph (1) shall include the following:~~

~~(A) In the case of the full-scale development stage--~~

~~(i) a description of the performance goals for the weapons system to be acquired under the program;~~

~~(ii) a description of the technical characteristics and configuration of such system;~~

---

<sup>9</sup>Memorandum from Mr. Gene Porter, Principal Deputy Director, Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition), to DOD Panel, dated 9 Nov. 1992.

~~(iii) total development costs for such stage by fiscal year; and~~

~~(iv) the schedule of development milestones.~~

~~(B) In the case of the production stage--~~

~~(i) a description of the performance of the weapons system to be acquired under the program;~~

~~(ii) a description of the technical characteristics and configuration of such system;~~

~~(iii) number of end items by fiscal year;~~

~~(iv) the schedule of production milestones;~~

~~(v) testing;~~

~~(vi) initial training;~~

~~(vii) initial provisioning; and~~

~~(viii) total procurement costs for such stage (including the cost of all elements included in the baseline description) by fiscal year, which may not exceed the amount of the independent cost estimate for that program submitted to the Secretary of Defense under section 2434 of this title.~~

(b) The Secretary of Defense shall promulgate regulations governing --

(1) the content of baselines;

(2) the submission of deviation reports by program managers to the Secretary of the military department concerned, and the Under Secretary of Defense for Acquisition; and.

(3) procedures for departmental review of deviation reports and submission and approval of a revised baseline.

(b) Program deviation reports:

~~(1) The program manager of a major defense acquisition program shall immediately submit a program deviation report for such program to the Secretary of the military department concerned and to the service acquisition executive designated by such Secretary if such manager determines at any time during the full-scale engineering development stage or the production stage that there is reasonable cause to believe that--~~

~~(A) the total cost of completion of the program will be more than the amount specified in the baseline description established under subsection (a) for such stage;~~

~~(B) any milestone specified in such baseline description will not be completed as scheduled; or~~

~~(C) the system to be acquired under the program will not fulfill the description of performance, technical characteristics, or configuration specified in such baseline description.~~

~~(2) The Secretary of the military department concerned shall, with respect to any major defense acquisition program for which a program deviation report is received under paragraph~~

~~(1), and for which the total cost of completion of the stage will exceed by 15 percent or more, in the case of a development stage, or by 5 percent or more, in the case of a production stage, the amount specified in the baseline description established under subsection (a) for such stage; or any milestone specified in such baseline description will be missed by more than 180 days--~~

~~(A) establish a review panel to review such program; and~~

~~(B) submit a report containing the program deviation report and the results of such review to the Under Secretary of Defense for Acquisition before the end of the 45-day period beginning on the date that the program deviation report is submitted under paragraph (1).~~

### **3.1.7. 10 U.S.C. §§ 2436 and 2437**

#### **Defense Enterprise Programs; Defense Enterprise Programs: milestone authorization**

##### **3.1.7.1. Summary of Laws**

Section 2436 provides that the Secretary of Defense shall conduct, through the military departments, a program to increase the efficiency of defense acquisition management structures. Under the program, certain acquisition programs may be designated as defense enterprise programs, (DEPs). Except as specified by the senior procurement executive of the cognizant military department, DEPs are exempt from all regulation except for the FAR and DFARS.

Section 2437 provides that the Secretary of Defense may designate a DEP for milestone authorization if the program is ready for full-scale engineering development or full-rate production. Baseline reports must be submitted for such programs. Congress must authorize funds for up to a five year period if the program is approved to proceed into either of those stages. Program deviations for such programs must be submitted to the defense committees, and funding may thereafter be blocked unless a formal program review is scheduled. These statutes attempt to institute a program to increase the efficiency of defense acquisition programs. They allow for a streamlined management structure and an exemption from certain regulations, policies, directives, or administrative rules or guidelines. Finally, they allow the Secretary to issue guidelines governing the management of defense enterprise programs.

##### **3.1.7.2. Background of Laws**

These sections were originally enacted in 1986 by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> Both versions of the bill had contained comparable provisions, although the House bill would have limited DEPs to major defense acquisition programs. The legislation drew heavily upon the recommendations of the then-recently released Packard Commission report that private sector management tools should be implemented into the defense acquisition process.<sup>2</sup> The Senate Committee Report noted:

The current framework for acquisition management in the Department of Defense runs counter to the private industry model. The authority and responsibility for the management of specific programs have been diluted by the growth of large bureaucratic oversight and review organizations. The growth of this bureaucracy has resulted in the insertion of unnecessary layers between program managers and the Secretaries of the Services, as

---

<sup>1</sup>Pub.L. No. 99-500, § 101(c), 100 Stat. 3341 (1986).

<sup>2</sup>A Formula For Action. Final Report by the President's Commission on Defense Management. (Packard Commission, Apr. 1986).

well as the proliferation of functional organizations which often make conflicting claims on the management priorities of a defense program.

Concurrent with the growth of this bureaucratic structure has been the increase in the numbers of detailed directives, specification and regulations, which further limit the program manager's flexibility. Finally, the annual authorization and appropriations process frequently denies the program manager in the Department of Defense the funding stability required for effective long-term planning. As a result, the acquisition cycle for major defense systems averages ten to fifteen years, or about twice the length of time required to develop and manufacture systems of similar complexity in private industry.<sup>3</sup>

Thus, the DEP programs were crafted to enhance the authority of the program manager to manage a program with minimum reliance on outside review. DEPs were designed to increase the efficiency of the management structure of major and non-major defense acquisition programs. Congress intended that all major acquisition programs eventually become DEPs.<sup>4</sup>

### 3.1.7.3. Laws in Practice

These sections are implemented in part by DOD Directive 5000.2M, Part 19, Program Deviation Reports. However, the Department never fully implemented these sections. A draft directive implementing the DEP authorities is still under consideration by DOD. In a recent review of DEPs, DOD noted that problems had developed regarding Congressional support in appropriating multiyear funds for the DEPs.<sup>5</sup> Specifically, while the Armed Services Committees were willing to provide multiyear program authorizations, the Appropriations Committees were unwilling to entertain multiyear appropriations. The Report also noted that certain Defense Management Review initiatives had reduced the regulatory burden, thereby achieving at least in part the goal that DEPs were intended to accomplish. Finally, that Report noted that defense budgets cuts and force restructuring limited the potential benefits of DEPs, and that overall, there was no advantaged to be gained from DEPs.<sup>6</sup>

It should be noted, however, that Army Program Managers of DEP programs were enthusiastic about DEPs because it gave them authority to waive internal Army requirements.<sup>7</sup>

Irby, Jr., Aviation, dated 20 Apr. 1992; Mr. Dale G. Adams, Armaments, dated 10 Apr. 1992; Brig Gen Robert A. Drolet, Air Defense, dated 8 Apr. 1992; Ms. Mary D. Kelly, Plans and Programs, STAMIS, dated 23 Mar. 1992; Brig Gen Otto Guenther, Communications

However, the Army could do this by regulation and does not need statutory authority to waive its own requirements.

#### **3.1.7.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of the sections authorizing Defense Enterprise Programs. The Office of the Under Secretary of Defense for Acquisition concurs with the assessment that DEPs have not been successfully implemented and supports the recommendation to repeal.<sup>8</sup>

The concept of DEPs still exists in the current DOD emphasis on the Major Defense Acquisition Pilot Program enacted in 1990.<sup>9</sup> Under that section, up to six major defense acquisition programs designated by the Secretary of Defense for participation in the program may have the applicability of many laws waived. These waivers could be given in order to increase the efficiency and effectiveness of the acquisition process in major defense acquisition programs. If granted, they could exempt the programs from statutory requirements, including those applicable to price, cost, schedule, performance, management, oversight, and other relevant statutes. However, each participating major defense acquisition program will be designated as a defense enterprise program. With the streamlined approach of the Pilot Program, designation of such programs as DEPs is no longer necessary.

Moreover, burdensome additional review and reporting requirements are imposed on DEPs nominated for milestone authorization that are not applicable to other major defense acquisition programs. The additional requirements of an OSD level review board, a revised baseline to Congress and suspension of obligation authority add little value over the structure for other major defense acquisition programs.

In making this recommendation, it should be noted that section 809(d) of Pub. L. No. 101-510 designates Pilot Programs as DEPs. If sections 2436 and 2437 are repealed, section 809(d) of Pub. L. No. 101-510 will also have to be repealed.

#### **3.1.7.5. Relationship to Objectives**

Repeal of these sections would significantly promote the goal of streamlining the DOD acquisition process. Specifically, repeal will eliminate statutory provisions that have not been effectively implemented within the DOD and, in any event, have been superseded by other initiatives.

<sup>9</sup>DOD Authorization Act for Fiscal Year 1991, Pub. L. No. 101-510, § 809 (1990).

### **3.1.8. 10 U.S.C. § 2438**

#### **Major Programs: competitive prototyping**

##### **3.1.8.1. Summary of Law**

This new section requires the Secretary of Defense to prepare an acquisition strategy which provides for the competitive prototyping of major weapon systems and any major subsystems under a major defense acquisition program prior to the commencement of development. This acquisition strategy must (1) require that contracts be entered into with not less than two contractors; (2) require that all systems or subsystems be tested in comparative side-by-side test; and (3) require that each contractor that develops a prototype system or subsystem before submitting cost and production estimates. This requirement may be waived, however, if a written justification is submitted to the Under Secretary of Defense for Acquisition explaining why the use of competitive prototyping is not practicable.

##### **3.1.8.2. Background of Law**

This section derives from a prior section, 10 U.S.C. § 2365, "Competitive prototype strategy requirement: major defense acquisition programs," that had expired on September 30, 1991 and that was repealed by the passage of this section in 1992. The House Armed Services Committee noted that,

"[10 U.S.C. § 2438] would have the effect of reinstating a requirement that the Secretary use competitive prototyping in developing major weapons systems or subsystems . . . [I]t includes exceptions that give the Secretary broad latitude in the application of the requirement to specific development programs. [I]t changes 2365 by: (1) eliminating the termination date; and (2) removing a subparagraph that had the effect of automatically exempting all special access programs . . . The Secretary would nevertheless have the authority to exempt special access programs under the exception clause."<sup>1</sup>

10 U.S.C. § 2365 was first introduced in the National Defense Authorization Act for Fiscal Year 1987.<sup>2</sup> The provision originated in the House version of the bill. The House Committee Report stated that competitive prototyping "is critically important for knowing the strengths and weaknesses of a weapons system before entering full-scale development; gives the troops higher quality, better designed weapons; and helps the industry maintain and have more and better design teams."<sup>3</sup>

---

<sup>1</sup>H. R. REP. NO. 527, 102nd Cong., 2d Sess. 294 (1992).

<sup>2</sup>Pub. L. No. 99-661, § 909, 100 Stat. 3816 (1986).

<sup>3</sup>H.R. REP. NO. 527, 102d Cong., 2d Sess. 295 (1992).

Nonetheless, while the importance and utility of competitive prototyping was well established, the statute was amended in 1988 to include a sunset provision which caused it to expire on September 30, 1991.<sup>4</sup> The Armed Services conferees believed that three years would provide a base of experience that would permit the Department of Defense, after the legislation expires, to develop appropriate regulatory guidance for the use of competitive prototype strategies.<sup>5</sup>

The initiative to reinstate competitive prototyping was introduced in the House by Representative Ireland of Florida. It was prompted by the success of competitive prototyping in the F-16 fighter program and the lack of competitive prototyping as one of the problems with the A-12 program and a potential problem with the AX program.<sup>6</sup>

### **3.1.8.3. Law in Practice**

This section is currently implemented in DOD Directive 5000.2-M, Part 17, "Competitive Prototyping." Because it is recently enacted, 10 U.S.C. § 2438 does not have an independent practice history. However, section 2365 was followed as well as waived throughout the course of its five-year history.

### **3.1.8.4. Recommendation and Justification**

#### **Repeal**

The Panel recommends repeal of this section. Congressional proponents of reinstating the law stated that, "Competitive prototyping makes eminently good sense [and] it is consistent with the DOD's new acquisition strategy that places heavier emphasis on R&D and stresses prototype over production . . ." <sup>7</sup> While the Panel agrees in principle with these concepts, competitive prototyping should not be statutorily-prescribed.

When the Panel initially analyzed § 2365, "Competitive prototype strategy requirement: major defense programs," the section was no longer in effect because its sunset date of September 30, 1991 had passed. The Panel's clear consensus was that it should be deleted from the U.S. Code and not reinstated, even though the Panel was aware that Congress was considering reinstating or amending the statute. The Panel reasoned that the specific requirement for competitive prototyping, with exceptions requiring written Congressional notification, duplicated normal congressional oversight and constituted a requirement for a single preferred approach outside the planning context of the overall acquisition strategy of a major weapons system program. The Panel believed, and still believes, that in an environment of reduced budgets, fewer

<sup>6</sup>H.R. REP. No. 966, 102d Cong., 2d Sess. 802 (1992).

<sup>7</sup>Continued Need for Competitive Prototyping, 1992: Hearings on H.R. 4303 Before the Committee on Armed Services, 102d Cong., 2d Sess. 408 (1992) (statement of Rep. Andy Ireland).

new start programs, and greater reliance on modifications and upgrades of existing systems, it is unlikely that competitive prototyping will be affordable as the legislated norm.

The retention of this statute will also frequently require additional unnecessary paperwork to be generated justifying waivers. The better approach is to allow the Secretary of Defense to address this issue by internal regulation and ensure that competitive prototyping is considered as part of the overall acquisition strategy. Indeed, DOD has regulations which encourage, if not require, competitive prototyping in certain circumstances.<sup>8</sup>

#### **3.1.8.5. Relationship to Objectives**

Repeal of this statute would further the best interests of DOD by affording it greater managerial flexibility in developing its acquisition strategies.

---

<sup>8</sup>See, e.g., DOD Directive 5000.2M, Part 12, § 2, para. (b); DOD Directive 5000.2, Part 3 (acquisition strategies must include provisions for competitive prototyping, unless the milestone decision authority approves a waiver and submits a written notification to Congress that competitive prototyping is not practicable).

### **3.1.9. 10 U.S.C. § 2439 (recently changed from §2438)**

#### **Major Programs: Competitive Alternative Sources**

##### **3.1.9.1. Summary of Law**

The current statute requires the Secretary of Defense to prepare an acquisition strategy which addresses the use of competitive alternative sources for the primary system and major subsystems of each major defense acquisition program before the program enters full scale development. The strategy must address the use of competitive alternate sources for the primary system and major subsystems from the beginning of full-scale development through the end of procurement. The requirement for competitive alternative sources is satisfied even though alternative sources do not provide identical system or subsystems, if the systems or subsystems serve similar functions and compete effectively with each other.

##### **3.1.9.2. Background of Law**

Initially, the section had required dual-sources at least from the beginning of full-scale development until the completion of production unless waived by the Secretary. Moreover, it required the Secretary to submit the strategy to Congress. Congress, in passing the statute, desired to ensure alternative sourcing was considered sufficiently early in the acquisition cycle.<sup>1</sup>

Congress replaced the text of the prior statute by Pub. L. No. 101-510.<sup>2</sup> In Pub. L. No. 101-510, Congress removed the preference for dual-sources unless alternative sources reduces technical risk, reduces cost, enables timely system procurement or is otherwise in the national security interest. The intent of the statute is not to mandate that programs justify a dual-source decision before full-scale development, but rather to ensure alternative sourcing was considered sufficiently early in the acquisition cycle when strategy options could be developed. Additionally, the modification eliminated a requirement that the Secretary submit the acquisition strategy to Congress.

In the National Defense Authorization Act for Fiscal Year 1993, this section was redesignated as section 2439 in order to add a section entitled "Major programs: competitive prototyping" as section 2438.<sup>3</sup>

##### **3.1.9.3. Law in Practice**

The latest change eliminates the reporting burden created by the earlier version. However, considering the status of today's defense budget, the appropriateness of legislating Competitive Alternative Sources as a preference is questionable. It is no longer a viable or affordable

---

<sup>2</sup>National Defense Authorization Act for FY91, Pub. L. No. 101-510 §, 104 Stat. 1485 (1990).

<sup>3</sup>National Defense Authorization Act for FY93, Pub. L. No. 102-484, § 821(a), 106 Stat. 2459 (1992).

program. The Services, for affordability considerations, have eliminated most of their second sources. Moreover, the money and quantities needed to fund and justify using competitive alternative sources are generally not available now and are not likely to be available in the foreseeable future. Finally, as the Deputy Director, Acquisition Policy and Program Integration, has stated, DOD policy already calls for the consideration of competitive alternative sources sufficiently early in the acquisition cycle.<sup>4</sup> Accordingly, this provision is not necessary.

#### **3.1.9.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this competitive alternative sources requirement. Acquisition strategies are more appropriately left to implementation by regulation.

#### **3.1.9.5. Relationship to Objectives**

Repeal of this statute will promote the best interests of DOD by affording the Department greater managerial flexibility in developing its acquisition strategies.

---

<sup>4</sup>Memorandum from Mr. Gene H. Porter, Principal Deputy Director, Acquisition Policy & Program Integration, DOD, to Advisory Panel, dated 9 Nov. 1992.

### **3.1.10. Public Law Number 101-510 § 809**

#### **Major Defense Acquisition Pilot Program**

##### **3.1.10.1. Summary of Law**

This statute permits the Secretary of Defense to conduct a pilot program for the purpose of determining the potential for increasing the efficiency and effectiveness of the acquisition process in major defense acquisition programs. Certain programs are to be designated as part of the pilot program in authorizing legislation.

The statute requires the Secretary to conduct the program in accordance with standard commercial, industrial practices and to notify Congress of proposed pilot programs. Additionally, and most importantly, it allows the Secretary, with certain limitations, to waive many provisions of law and regulations which may tend to impede the progress of a program. Finally, it requires that these pilots be designated Defense Enterprise Programs.

##### **3.1.10.2. Background of Law**

This section was originally enacted by the National Defense Authorization Act For Fiscal Year 1991.<sup>1</sup> The language originated in the Senate version of the bill. The Senate Committee Report indicated that the provision was included in response to a Department of Defense request for authority to establish a pilot program for six major programs that could be exempted from any statutory requirements. The Senate Committee rejected the blanket authority sought by the Department and instead permitted such waivers only after the selection of the program, and the list of laws from which exemption is sought, had been previously approved by the Congress.<sup>2</sup> In conference, the House receded with an amendment that the Congress must expressly approve the list of procurement laws from which exemption is sought.<sup>3</sup>

As originally enacted, the Secretary's authority to waive statutory requirements was scheduled to expire September 30, 1992. This expiration would have essentially removed the effectiveness of the Pilot Program. Under the National Defense Authorization Act for Fiscal Year 1993, this authority has been extended through September 30, 1995.<sup>4</sup> In addition, eligibility under the pilot program was extended to non-major acquisition programs.<sup>5</sup>

##### **3.1.10.3. Law in Practice**

The changes noted above to the pilot program were necessary because the Department of Defense has yet to formally submit a list of candidate programs for consideration. However, the

<sup>2</sup>S. REP. NO. 384, 101st Cong., 2d Sess. 193-194 (1990).

<sup>3</sup>H.R. CONF. REP. NO. 923, 101st Cong., 2d Sess 623 (1990).

<sup>4</sup>National Defense Authorization Act for FY93, Pub. L. No. 102-484, § 811, 106 Stat. 2450 (1992).

<sup>5</sup>*Id.*

Department anticipates submission of the Strategic Sealift, Joint Primary Aircraft Training System, and Close Range Unmanned Aerial Vehicle as potential participants in the pilot program <sup>6</sup>

Additionally, DOD intends to amend DOD Directive 5000.1 by adding a section governing Defense Acquisition Pilot Programs. It is the intent of Office of the Secretary of Defense, however, to limit qualifying programs to those with limited risk and limited development.<sup>7</sup>

#### **3.1.10.4. Recommendation and Justification**

##### **Amend to reflect repeal of § 2436.**

As the pilot program has yet to be implemented by DOD, retention of the statute is recommended until some experience is gained with the program. However, insofar as section (d) of this statute requires the designation of participating programs as Defense Enterprise Programs (under 10 U.S.C. § 2436), that subsection should be repealed. At chapter 3.1.7 of this Report, the Panel recommends the repeal of the Defense Enterprise Program statute. Consequently, this statute should be revised to reflect that change.

#### **3.1.10.5. Relationship to Objectives**

Amendment of this statute will streamline the DOD acquisition process and ensure that related statutes are consistent.

#### **3.1.10.6 Proposed Statute**

##### **Defense Acquisition Pilot Program**

(a) Authority to conduct pilot program. The Secretary of Defense may conduct a pilot program for the purpose of determining the potential for increasing the efficiency and effectiveness of the acquisition process in defense acquisition programs.

(b) Designation of participating programs.

(1) Subject to paragraph (2), the Secretary may designate not more than six defense acquisition programs for participation in the pilot program.

(2) The Secretary may designate for participation in the pilot program only those defense acquisition programs specifically authorized to be so designated in a law authorizing appropriations for such program enacted after the date of the enactment of this Act.

(c) Conduct of pilot program.

---

<sup>6</sup>This proposed submission is currently in draft and pending in the Office of the Under Secretary of Defense (Acquisition), Acquisition Policy and Program Integration.

<sup>7</sup>*Id.*

(1) In the case of each defense acquisition program designated for participation in the pilot program, the Secretary--

(A) shall conduct the program in accordance with standard commercial, industrial practices; and

(B) may waive or limit the applicability of any provision of law that is specifically authorized to be waived in the law authorizing appropriations referred to in subsection (b)(2) and that prescribes--

(i) procedures for the procurement of supplies or services;

(ii) a preference or requirement for acquisition from any source or class of sources;

(iii) any requirement related to contractor performance;

(iv) any cost allowability, cost accounting, or auditing requirements; or

(v) any requirement for the management of, testing to be performed under, evaluation of, or reporting on a defense acquisition program.

(2) The waiver authority provided in paragraph (1)(B) does not apply to a provision of law if, as determined by the Secretary--

(A) a purpose of the provision is to ensure the financial integrity of the conduct of a Federal Government program; or

(B) the provision relates to the authority of the Inspector General of the Department of Defense.

~~(d) Designation as defense enterprise program. The Secretary shall designate each participating defense acquisition program as a defense enterprise program under section 2436 of title 10, United States Code. The Secretary may waive the applicability of the requirement of this subsection or any provision of such section 2436 to any such acquisition program if he determines that such a waiver is necessary for the purpose of the pilot program.~~

~~(e) (d) Regulations. (1) Not later than 270 days after the date of the enactment of this Act, the Secretary shall publish proposed regulations to implement this section and an invitation for public comment on the proposed regulations. Not later than one year after such date, the Secretary shall promulgate final regulations to implement this section.~~

(2)(A) The Secretary may not waive or limit the applicability of a law to a defense acquisition program under subsection (c)(1)(B) unless the Secretary first prescribes regulations specifying the waiver or limitation.

**(B) In the case of a waiver or limitation of the applicability of a requirement imposed by a statute, including a regulation prescribed to implement such statutory requirement, the following procedures shall apply:**

**(i) The Secretary shall publish the proposed waiver or limiting regulations and provide an opportunity for public comment on the proposed regulations for a period of not less than 60 days.**

**(ii) If a Federal Government official outside the Department of Defense has the responsibility for implementation of the statute, the Secretary shall consult with such official regarding the proposed waiver or limitation before publishing the proposed waiver or limiting regulations under clause (i).**

**(3) The Secretary may prescribe separate regulations for one or more defense acquisition programs designated by the Secretary for participation in the pilot program.**

**(f) (e) Notification and implementation. (1) The Secretary shall transmit to the congressional defense committees a written notification of each defense acquisition program proposed to be designated by the Secretary for participation in the pilot program.**

**(2) If the Secretary proposes to waive or limit the applicability of any provision of law to a defense acquisition program under the pilot program in accordance with this section, the Secretary shall include in the notification regarding that acquisition program--**

**(A) the provision of law proposed to be waived or limited;**

**(B) the effects of such provision of law on the acquisition, including specific examples;**

**(C) the actions taken to ensure that the waiver or limitation will not reduce the efficiency, integrity, and effectiveness of the acquisition process used for the defense acquisition program; and**

**(D) specific budgetary and personnel savings, if any, that will result from the waiver or limitation.**

**(g) (f) Limitation on waiver authority. The applicability of the following requirements of law may not be waived or limited under subsection (c)(1)(B) with respect to a defense acquisition program:**

**(1) The requirements of this section.**

**(2) The requirements contained in any law enacted on or after the date of the enactment of this Act if that law designates such defense acquisition program as a participant in the pilot**

program, except to the extent that a waiver of such requirement is specifically authorized for such defense acquisition program in a law enacted on or after such date.

~~(h)~~ (g) Termination of authority. The authority to waive or limit the applicability of any law under this section may not be exercised after September 30, 1995.

## **3.2. Testing Statutes**

### **3.2.0. Introduction**

The Panel considered those statutes within Title 10 of the U.S. Code that establish requirements regarding testing of major weapon systems and munitions programs by the DOD. Originally enacted in the mid-1980s, some of these laws, such as those applicable to wheeled or tracked vehicles, were passed by the Congress in response to unique problems involving specific programs. Others, such as the operational test and evaluation requirements, were initiated not only in response to program-specific issues but also as part of a broader effort by the Congress to set forth concrete guidance on testing policy. For example, in 1986, the Armed Services Committee conferees set forth a clear policy statement that "developmental testing and initial operational testing are separate, yet complementary, elements in the acquisition process."<sup>1</sup> Thus, Congress mandated a clear standard on the segregation of operational and developmental testing. That standard has been stringently implemented in laws enacted prohibiting system contractor involvement in operational testing.

Under the current statutory scheme, all major systems, as defined under 10 U.S.C. § 2302(5), must undergo operational test and evaluation before they may proceed beyond low-rate initial production. For major defense acquisition programs under section 2430 of Title 10, that testing must be set forth in a plan that has been approved by the Director of Operational Test and Evaluation of the DOD, who must then evaluate the results of that testing and report on it to the congressional defense committees before low-rate initial production may be exceeded. No system contractor employees may be involved in this testing unless such employees will be involved in system deployment. Further, support contractors may not assist in operational testing if they have previously been involved in system development, production, or developmental testing unless their impartiality has been assured in writing by the Director of Operational Test and Evaluation, or when the contractor functioned solely as a representative of the Federal Government. Finally, operational test and evaluation is defined as field testing, under realistic combat conditions, of weapons, equipment, or munitions or their components to determine their combat effectiveness. Such testing may not be based exclusively on computer modeling or simulation.

With regard to live-fire testing, major defense acquisition programs with user-protection features and major munitions programs may not proceed beyond low-rate initial production until combat-relevant survivability or lethality testing has been completed. This requirement may be waived by the Secretary of Defense if unreasonably expensive or impracticable and if an alternative is available. A specific requirement for such testing exists for wheeled or tracked vehicles. All of these requirements evolved out of the Army's experience with the Bradley Fighting Vehicle in the early 1980s.

All of the above requirements are intended to ensure best-value for the defense procurement dollar, and in particular that no system is fielded without operational effectiveness. Within that process, the highest ethical standards must be maintained.

---

<sup>1</sup>H.R. REP. No. 1001, 99th Cong., 2d Sess. 489-99 (1986).

Congress rightly is concerned about past abuses where the Department inappropriately rushed to production without adequate testing. It gives a high priority to its testing requirements, and the testing community is ever vigilant and protective of its statutory mandates. The Program Executive Officers (PEOs) and Program Managers (PMs), on the other hand, in some cases express frustration over the delays and expense imposed on their programs by overzealous testers. Thus, testing is a contentious subject with strong advocates in each camp.

The Panel's analyses and recommendations in this area included extensive comments by and discussion with the testing community within the DOD.<sup>2</sup> In addition, the Panel received a survey of comments from PEOs and PMs within the Department of the Army. These latter comments were especially useful in obtaining a balance between the concerns of the testing community for thoroughness and the concerns of the field for flexibility in program management. The Panel was asked to consider the following:

- The need for greater contractor involvement in initial operational test and evaluation, from both the system and support contractor.
- The need to modify the requirement for full-up vulnerability testing to permit component, subsystem and subassembly testing.
- The need to extend the authority to waive vulnerability/lethality testing past Milestone II.
- The desirability of greater flexibility in the application of the operational test and evaluation requirement; the need to balance the benefits of such testing against its cost and time impact on the acquisition process; and the desire to include program risk or urgency in that balancing process.
- The benefits of combined developmental and operational testing, including greater reliance on technical test data where appropriate.
- The allowability of test costs.
- The need for greater PM/PEO involvement in decisions such as Operational Testing and low-rate initial production quantities, ultimate test scenarios and failure determination timing and analysis.
- The need for greater use of computer simulation and modeling.

---

<sup>2</sup>The individual analyses that follow include comments from the following offices: Office of the Secretary of Defense (Operational Test and Evaluation); Office of the Under Secretary of Defense for Acquisition (Developmental Test and Evaluation); Department of the Air Force (Test and Evaluation); Deputy Under Secretary of the Army (Operations Research); Department of the Navy (Test, Evaluation and Technology Requirements) and Aerospace Industries Association (Flight Test Group).

- The need for greater clarity as to what types of systems are covered programs for both vulnerability/lethality and operational testing; and greater clarity as to when interim systems require testing independent of testing of subsequent programs into which those systems are integrated.

The Panel concluded that a consolidation of the four current testing statutes and elimination of statutory detail would further its statutory streamlining mandate and allow the flexibility desired by the testing and acquisition communities. The Panel developed a dual proposal in the testing area. Initially, the Panel recommends the repeal of the four testing statutes within Title 10 in their entirety and the enactment of a streamlined testing statute. That statute is set forth immediately following this introduction. This streamlined statute sets forth the basic rule that both vulnerability/lethality and operational testing must occur before proceeding beyond low-rate initial production. The proposed statute adopts extant definitions of those terms. The statute then vests discretion in the Secretary of Defense to implement the required testing. Broad guidelines in specific areas -- such as contractor involvement and authority to modify Operational Testing requirements -- are provided. These guidelines state general principles, but specific implementation is left to the Secretary of Defense.

The Panel recommends enactment of such a statute because it would genuinely promote various of the goals and objectives of the Panel. It would eliminate duplicative, unnecessary, oversight in these four testing statutes, such as excessive definitional and reporting detail. It would afford the Department greater flexibility to exercise sound managerial discretion in testing application and implementation. It would allow greater flexibility for participation of system contractors in Operational Testing where such involvement is necessary and prudent. The Panel achieved a high level of consensus within the DOD testing community in support of the proposed, streamlined statute.<sup>3</sup>

The increased flexibility provided by the streamlined testing statute addresses many of the issues raised by the PM/PEO community. Authority to modify full Operational Testing requirements would provide management discretion to both the tester and the PM/PEO to craft a test plan that can more accurately reflect individual program risk, resources, schedule and needs.

The Panel recognized, however, that in view of the sensitivity and concern in the Congress for adequate testing, there may be reluctance to fully adopt such a streamlined approach. Accordingly, at a minimum, the Panel recommends the Congress adopt certain specific, statutory amendments that are set forth in the analysis for each individual statute within this subchapter.

---

<sup>3</sup>Memorandum from Howard W. Leaf, Lt. Gen, USAF (Ret.), Director, Test and Evaluation, Department of the Air Force to DOD Advisory Panel, dated 11 Dec. 1992, ("agree in principle with the Advisory Panel's work.... The proposed draft [streamlined statute] does a credible job remedying some of the hard issues that hamper effective execution of test and evaluation"); datafax transmission from Col. Chip Ferguson, for Mr. Charles E. Adolph, Director, Test and Evaluation, Office of the Under Secretary of Defense for Acquisition, to Ms. Theresa Squillacote, dated 30 Oct. 1992; Mr. Walter Hollis, Deputy Under Secretary of the Army (Operation Research), to DOD Advisory Panel, dated 30 Oct. 1992, ("agree in principle that objective of the Advisory Panel is best served by developing a single, streamlined statute....")

Specifically, the Panel recommends repeal of 10 U.S.C. § 2362 as subsumed by the requirements of 10 U.S.C. § 2366. With regard to the live-fire requirements of section 2366, the Panel recommends substitution of the phrase "vulnerability" for "survivability" throughout the statute. The former term more accurately reflects the type of testing mandated by the law. The Panel also recommends elimination of the requirement for "full-up" vulnerability testing. As a mandatory requirement, that testing can add considerable time and expense to certain, high-value systems.

The Panel recommends amendments to the operational test and evaluation (OT&E) requirements of 10 U.S.C. § 2399, including authority to modify dedicated OT&E requirements for certain types of programs and amendment to permit greater system and support contractor involvement in OT&E logistic support. Finally, the Panel recommends that 10 U.S.C. § 2400 be amended to add strategic defense missiles as a low density production base item, and to make the Test and Evaluation Master Plan discretionary for low density items. The supporting rationale for each of these proposed amendments is set forth within the individual analyses.

### **3.2.0.1. Draft Streamlined Testing Statute**

(a) Policy-- Production of a major system under section 2302(3) of this title that is designed for use in combat may not proceed beyond low-rate initial production until the Secretary of Defense has conducted operational test and evaluation and realistic vulnerability or lethality testing and the requirements set forth below have been met.

#### **(b) Definitions--**

(1) Low-rate initial production is the minimum quantity necessary to provide production-configured or representative articles for operational tests, to establish an initial production base, and that will permit an orderly increase in the production rate to full-rate production of the system after successful completion of operational testing. The Secretary of Defense shall issue regulations formulating specific low-rate initial production standards for those programs with low density production bases, such as naval vessels, military satellites and strategic defense missiles.

(2) Operational test and evaluation as used herein has the meaning given that term in section 138(a)(2)(A) of this title. For purposes of this section, operational evaluation may be based in part, but not exclusively, on:

- A) computer modeling;
- B) simulation;
- C) an analysis of system requirements, engineering proposals, design specifications, or any other information contained in program documents.

#### **(3) Realistic vulnerability testing--**

A) Realistic vulnerability testing means testing for vulnerability of the system in combat by firing munitions likely to be encountered in combat, or munitions similar thereto, at the system configured for combat, including all hazardous or dangerous materials that would normally be on board in combat.

B) Such testing shall focus on potential user casualties as well as combat performance given the susceptibility to attack.

C) In the case of a high value system, in lieu of a complete system configured for combat, vulnerability testing may be conducted on components, subsystems and subassemblies or realistic replicas or surrogates, and through the design analyses, modeling and simulation, and analysis of combat data.

(4) Realistic lethality testing means testing for lethality by firing the munition or missile concerned at appropriate targets configured for combat.

(c) Regulations--The Secretary of Defense shall promulgate regulations governing vulnerability and lethality testing, operational test and evaluation and low-rate initial production. The Director

of Operational Test and Evaluation of the DOD shall approve the adequacy of plans for operational test and evaluation as required by such regulations.

**(d) Impartial contractor support of testing--**

(1) No person employed by a contractor for the system being tested, or entity affiliated with such contractor, may be involved in operational test and evaluation for that system except as authorized by the Secretary of Defense pursuant to paragraph (2), below.

(2) The Secretary of Defense shall establish regulations regarding involvement by employees of system contractors, or of any entities affiliated with such contractors, in operational test and evaluation analytic and logistic support. Such regulations shall ensure the impartiality of that contractor and the integrity of the testing and evaluation process. In such cases, the operational test and evaluation plan must identify the specific involvement of the system contractor or affiliated entity in the operational test and evaluation process and the steps taken to ensure that contractor's impartiality and confidentiality.

(3) With respect to service contractors that are not entities affiliated with system contractors and that are otherwise supporting operational test and evaluation, the Secretary of Defense shall require such contractors to establish procedures to ensure that test and evaluation data made available to them is treated as government sensitive information. Access to this information by contractor employees shall be limited and available only under such approved procedures.

**(e) Vulnerability and Lethality Testing--**

(1) Realistic vulnerability testing shall be conducted for those major systems as defined in 2302(3) of this title, or major product improvements thereto, that include features designed to protect users in combat. Modifications or upgrades not significantly affecting the vulnerability of a system need not be tested for vulnerability.

(2) Lethality testing shall be conducted on munition or missile programs that are major systems as defined in 2302(3) of this title. Modifications or upgrades not significantly affecting the lethality of a system need not be tested for lethality.

**(f) Authority to Modify--** The Secretary of Defense may modify the requirements for vulnerability and lethality testing, or for initial operational test and evaluation, where the Secretary,

(1) determines that such testing would be unreasonably expensive or impractical, cause unwarranted delay or be unnecessary because of the acquisition strategy for that system, and,

(2) reports to Congress on the actions taken to ensure that the system will be operationally effective and suitable when it is introduced into the field.

**(g) Reporting--**

(1) After completion of operational test and evaluation for a major defense acquisition program as defined in section 2430 of this title, the Director of Operational Test and Evaluation shall analyze all test results and report thereon to the Secretary of Defense, the Under Secretary of Defense for Acquisition and the Armed Services Committees of Congress. Production may not proceed beyond low-rate initial production until such reports have been submitted by the Director of Operational Test and Evaluation.

(2) After completion of required vulnerability and lethality testing for a major defense acquisition program, the Secretary of Defense shall submit a report on such testing to the Armed Services Committees of Congress describing the results of the vulnerability or lethality testing and assessing the testing overall.

### 3.2.1. 10 U.S.C. § 2362

#### **Testing Requirements: wheeled or tracked vehicles**

##### **3.2.1.1. Summary of the Law**

This section provides that the Secretary of Defense may not contract for a major vehicle program until testing the vulnerability of the vehicle through a Joint Live Fire Testing Program has occurred. The results of that test, including a description of the firing parameters used, the pass/fail results and the potential shortcoming revealed by the test and specified cost analysis, shall be submitted to the Congress. A report on the estimated cost and schedule of the testing shall also be submitted to Congress in the Test and Evaluation Master Plan.

The section applies to any major defense acquisition program for the acquisition of any newly developed combat wheeled or tracked armored vehicles or existing such vehicles with significant new survivability modifications.

##### **3.2.1.2. Background of the Law**

This law was enacted by the DOD Authorization Act for Fiscal Year 1986.<sup>1</sup> It was introduced into the House version of that bill by an amendment made to the House bill during floor debates.<sup>2</sup> It was intended that such testing would be comparable to the Joint Live Fire Testing Program then underway on the Bradley Fighting Vehicle. The amendment sponsor, when introducing the amendment, asserted that current testing of armored vehicles was based on computer analysis that was costly, time-consuming, and often inaccurate. In comparison, combat-relevant testing was deemed not only less expensive but also more likely to produce test results reflective of actual combat performance. The amendment sponsor also expressly stated that: "A primary requirement of this amendment is that testing must be completed prior to or simultaneously with the first request for production funds."<sup>3</sup>

##### **3.2.1.3. Law in Practice**

This statute is implemented by DOD Instruction 5000.2M Part 8, Test and Evaluation at paragraph 3(b) (February 23, 1991). The regulation essentially reiterates the pertinent requirements of the statute.

Generally, there was consensus among all those surveyed that realistic survivability analysis and vulnerability testing remained a valid requirement.<sup>4</sup> With the exception of the Army,

<sup>1</sup>Pub. L. No. 99-145, §1239(a)(1), 99 Stat. 599 (1985).

<sup>2</sup>131 Cong. Rec. 5351 (March 19, 1985) (remarks of Rep. Levine).

<sup>3</sup>*Id.*

<sup>4</sup>Comments were obtained from the following offices: Office of the Secretary of Defense (Operational Test and Evaluation); Office of the Under Secretary of Defense for Acquisition (Developmental Test and Evaluation); Department of the Air Force (Test and Evaluation), Deputy Under Secretary of the Army (Operations Research);

however, comments received in this area were directed specifically at the broader requirements of 10 U.S.C. § 2366.

With respect to this statute, the Army noted:

This statute should be combined with 10 U.S.C. § 2366 into a single statute since both of these existing statutes mandate system live-fire testing prior to the production authorization and expenditure of procurement funds. The basic intent of both statutes is to assure proof of realistic system survivability under combat conditions prior to extensive procurement commitments.<sup>5</sup>

#### **3.2.1.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends that 10 U.S.C. § 2362 be repealed in its entirety. That recommendation is based on the conclusion that all of the essential requirements of this statute are covered in 10 U.S.C. § 2366. Specifically, the Panel notes as follows:

- **Covered Programs:**

- There is no program subject to live-fire testing under this statute that would not also be subject to the testing requirements of 10 U.S.C. § 2366. This statute applies to major vehicle programs, and is defined to mean a major defense acquisition program for new combat wheeled or tracked armored vehicles or modifications thereto. "Major defense acquisition program" is defined as a program which is subject to the SAR reporting requirements in 10 U.S.C. § 2432. Therefore, the term as used in this statute applies to major defense acquisition programs as defined at 10 U.S.C. § 2430.
- Under 10 U.S.C. § 2366, covered systems includes vehicles or weapon platforms with features designed to protect users in combat that are also major systems under 10 U.S.C. § 2302(5). All combat wheeled or tracked armored vehicles are vehicles with features designed to protect users in combat. In addition, the lesser dollar thresholds in 10 U.S.C. § 2302(5) would clearly encompass those 10 U.S.C. § 2430 major programs subject to testing under the instant statute.

- **Required Testing:**

- There does not appear to be any type of testing required under this statute that would not also be required under 10 U.S.C. § 2366. This statute defines testing to include

---

Department of the Navy (Test, Evaluation and Technology Requirements) and Aerospace Industries Association (Flight Test Group)

<sup>5</sup>Letter from Mr. Walter Hollis, Deputy Under Secretary of the Army, (Operations Research), to Mr. Anthony Gamboa, Deputy General Counsel (Acquisition), Department of the Army, dated 5 June 1992.

testing the vulnerability of the vehicle against the most capable weapon that is likely to be a combat threat to the vehicle and against which the vehicle is designed to survive. Survivability testing as currently described in 10 U.S.C. § 2366 means testing for vulnerability of the system in combat by firing munitions likely to be encountered in combat at the system configured for combat, with the primary emphasis on testing vulnerability with respect to potential user casualties and taking into equal consideration the susceptibility to attack and combat performance of the system. The Panel concludes that these testing definitions are functionally equivalent.<sup>6</sup>

- **Differences:**

- The two statutes differ in the reporting requirements and in waiver authority. The instant statute sets forth detailed information required to be submitted to the defense committees with regard to each program tested. The report required by 10 U.S.C. § 2366 requires that the Secretary of Defense describe the test results and assess the overall testing. The latter version adequately states the reporting requirement and avoids the burden present in the more detailed reporting requirement of the instant statute.
- The Secretary of Defense waiver authority in 10 U.S.C. § 2366 is not present in this statute. However, the same considerations that led to enactment of this authority in 10 U.S.C. § 2366: that in some cases vulnerability testing is overly expensive or otherwise not practical -- warrant applying the same waiver authority to the test requirements of this statute.

Based on the above, the Panel concludes that this statute is subsumed by the requirements of 10 U.S.C. § 2366 and recommends that it be repealed in its entirety.

### **3.2.1.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process by removing duplicative legislation.

---

<sup>6</sup>In the analysis for Section 2366, the Panel proposes to insert the phrase "vulnerability" for "survivability" where it appears in the text in order to more accurately define the type of testing mandated by the statute. See Ch. 3.2.2 of this Report.

## **3.2.2. 10 U.S.C. § 2366**

### **Major Systems and Munitions Programs; Survivability and Lethality Testing Required Before Full-Scale Production**

#### **3.2.2.1. Summary of the Law**

This section provides that major defense acquisition programs with user protection features, and major munitions programs, may not proceed beyond low-rate initial production until combat-relevant survivability or lethality testing has been completed. Such tests must be carried out sufficiently early in the developmental phase to permit any design deficiency to be corrected before proceeding beyond low-rate initial production. The testing costs are to be covered by program funds. However, the Secretary of Defense may waive the testing requirement upon certification to Congress that live-fire testing would be unreasonably expensive and impracticable and upon offering an alternative to live-fire testing.

#### **3.2.2.2. Background of the Law**

This section was enacted by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> The language originated in the House version of the bill and was largely incorporated in the final version of the bill. The Conference Report stated that survivability and lethality testing should be carried out early enough to allow design deficiencies to be corrected prior to full-scale production.<sup>2</sup> The conferees also directed DOD to conduct a full-scale review of DOD testing policy, including a review of the relationship between developmental and operational testing.<sup>3</sup>

The National Defense Authorization Act for Fiscal Years 1988 and 1989 added the limitation on low-rate initial production; modified the limitation on contractor involvement in operational testing to permit such involvement if the contractor will operate the system during combat deployment; and modified the definition of realistic survivability testing.<sup>4</sup> The House version of the bill specifically required the Secretary of Defense to designate a civilian official in DOD to be responsible for vulnerability and lethality testing. The Senate version had proposed repealing this section in its entirety. The Senate ultimately receded to the House version with modifications. The conferees stated their belief that:

Live-fire testing is a valuable tool for determining the inherent strengths and weaknesses of adversary, U.S. and allied weapon systems. The conferees intend that the Secretary of Defense implement this section in a manner which encourages the conduct of full-up vulnerability and lethality tests under realistic combat

---

<sup>1</sup>Pub. L. No. 99-500, § 101(c), 100 Stat. 3341 (1986)(Identical legislation omitted).

<sup>2</sup>H.R. CONF. REP No. 1001, 99th Cong., 2d Sess. 498-99 (1986).

<sup>3</sup>*Id.*

<sup>4</sup>Pub. L. No. 100-180, § 802, 101 Stat. 1123 (1987).

conditions, first at the sub-scale level as sub-scale systems are developed, and later at the full-scale level mandated in this legislation. . . . The conferees intend this type of developmental testing to be performed as part of the responsibilities of the Under Secretary of Defense for Acquisition.<sup>5</sup>

The same bill also included a provision permitting the Secretary of Defense to reprogram up to one third of one percent of total program procurement funds for the purpose of conducting necessary vulnerability/lethality live fire tests and evaluations.

### 3.2.2.3. Law in Practice

This section is implemented in part 8 of DOD Instruction 5000.2, Defense Acquisition Management Policies and Procedures, and parts 7, 10 and 11 of DOD 5000.2M, Defense Acquisition Management Documentation and Reports. Part 7 of DOD 5000.2M sets forth the live-fire testing elements required to be present in the overall testing plan. Part 10 of that Instruction sets forth the requirements of the separate Live Fire Test Report, and essentially reiterates the pertinent requirements of the statute. Part 11 of the same Instruction implements the authority to waive Live Fire testing requirements, but, other than to repeat the statutory waiver standard (unreasonably expensive and impractical) does not provide additional guidance on what types of systems may warrant waiver.

Virtually all of the parties surveyed concurred that the type of testing required by this statute remained relevant.<sup>6</sup> The Army noted that with increasingly sophisticated threats and with the increased accuracy expected from our weaponry, that survivability and lethality testing is more relevant than ever before.<sup>7</sup> The Navy noted that this type of testing would generally be conducted regardless of whether a such statutory requirement existed.<sup>8</sup>

However, the services and OSD offices also agreed that the statute should be amended to: (1) speak in terms of "vulnerability" testing, instead of "survivability" testing; (2) permit waiver authority after Milestone II, and (3) permit vulnerability testing on components, subsystems or subassemblies.<sup>9</sup>

---

<sup>5</sup>H. R. CONF. REP No. 58, 100th Cong., 1st Sess. 655 (1987).

<sup>6</sup>Comments were obtained from the following offices: Office of the Secretary of Defense (Operational Test and Evaluation); Office of the Under Secretary of Defense for Acquisition (Developmental Test and Evaluation); Department of the Air Force (Test and Evaluation); Deputy Under Secretary of the Army (Operations Research); Department of the Navy (Test, Evaluation and Technology Requirements) and Aerospace Industries Association (Flight Test Group).

<sup>9</sup>Memorandum from Mr. Charles E. Adolph, Director, Test and Evaluation, Office of the Under Secretary of Defense, to Acquisition Law Task Force, (undated), and Memorandum from Mr. Walter Hollis, Deputy Undersecretary of the Army (Operations Research), RADM W.P. Houley, Deputy Director, Test & Evaluation and

### 3.2.2.4. Recommendation and Justification

**Repeal, or amend to eliminate full-up testing requirements, to change 'Survivability' to 'Vulnerability,' and to extend Waiver Authority.**

The Panel's primary recommendation is to repeal this statute in its entirety, and enact the streamlined statute. In the alternative, the Panel recommends that this statute be retained but amended as follows:

#### I.

#### **Eliminate Full-Up Testing Requirement**

This statute should be amended at subsection (e)(3) to read:

The term '~~realistic survivability~~ vulnerability testing' means, in the case of a covered system (or a covered product improvement program for a covered system), testing for vulnerability of the system in combat by firing munitions likely to be encountered in combat (or munitions with a capability similar to such munitions) at the system configured for combat, or in the case of high value systems, at components, subsystems, and subassemblies or realistic replicas or surrogates, and through the design analyses, modeling and simulation, and analysis of combat data, with the primary emphasis on testing vulnerability with respect to potential user casualties and taking into equal consideration the susceptibility to attack and combat performance of the system.

All of the parties surveyed - the services, OSD, the PEOs/PMs and industry associations -- were unanimous in the belief that full-up testing, as currently required by the statute, can add considerable time and expense to the program and product improvements. It was noted that testing system components would permit design changes to be made early in the development process at minimum cost before the system design is complete. As one Army PEO stated:

When survivability testing is justified, it is not reasonable to require vehicles/weapon systems to be fully combat equipped. There should be some trade-off, supported by simulation or analysis, between the cost . . . and the benefits to be gained from live fire testing. Considering the cost and complexity of many of today's electronics/computer subsystems it would appear that damage assessment could be logically made without actually requiring these subsystems to be destroyed, especially in the early stages of

---

Technology, Department of the Navy, and Mr. Howard W. Leaf, Lt Gen, USAF (Ret), Director, Test and Evaluation, to Director, Test and Evaluation, Office of the Secretary of Defense, dated 6 Aug. 1992.

program development when assets for training and performance, RAM and environmental testing are at a minimum. Again, greater use of computer simulation should be used to supplement operational test data to provide comprehensive assessments. The current waiver authority is too high and the process too time intensive, leading organizations to 'cave-in' to unreasonable requirements, rather than attempting to defend why testing is unreasonably expensive and impractical.<sup>10</sup>

Vulnerability at the subsystem level was deemed particularly appropriate for high-value systems, including those with long lead issues.

The Panel concurs in the position that full-up testing can add unnecessary time and expense. While component testing could arguably be achieved through the waiver authority set forth in this section, that authority does not appear adequate to meet the needs described herein. The process of obtaining such a waiver is cumbersome and waivers are rarely requested. Indeed, the OSD Live-Fire Office has recommended such a waiver on only two occasions since the law was enacted.<sup>11</sup> In any event, the Panel believes that it is preferable to state explicitly in the statute the viability of component testing in this area.

The Panel would make component testing applicable to "high value" systems without attempting to further define that term. The Panel believes that, rather than adopting a statutory standard, the phrase should be defined through implementing regulations. This would preserve the flexibility to, for example, maintain differing standards depending on the type of system and costs involved.

In so recommending, the Panel acknowledges the recent report of the National Research Council's Committee on Weapon Effects on Airborne Systems.<sup>12</sup> That Report concluded that a waiver should be required to omit any full-scale, full-up tests. However, the National Research Council Report was issued near the completion of the Panel's Report. Therefore, the Panel has not had the opportunity to fully consider the National Research Council's Report.<sup>13</sup>

## II.

### Extend Waiver Authority

The Panel would amend subsection (c)(1) to read:

---

<sup>10</sup>Letter from Brig Gen Robert A. Drolet, Air Defense, Department of the Army, to Mr. Anthony Gamboa, Deputy General Counsel (Acquisition), Department of the Army, dated 8 Apr. 1992.

<sup>11</sup>Memorandum from Mr. Jim O'Bryon, Deputy Director, Test and Evaluation/Live-Fire Testing, Office of the Under Secretary of Defense (Acquisition), to Ms. Theresa Squillacote, dated 10 July 1992.

<sup>12</sup>National Research Council, Vulnerability Assessment of Aircraft (National Academy Press, Washington, D.C. 1993).

<sup>13</sup>*Id.*

(1) the Secretary of Defense may waive the application of the ~~survivability~~ vulnerability and lethality tests of this section to a covered system, munitions program, missile program or covered product improvement program if the Secretary, ~~before the system enters full-scale development~~ certifies to Congress that live-fire testing of such system or program would be unreasonably expensive and impractical. The Secretary shall include with any such certification a report explaining how the Secretary plans to evaluate the vulnerability or the lethality of the system or program and assess possible alternatives to realistic ~~survivability~~ vulnerability testing of the system or program.

This proposed amendment is based on the fact that the cost and complexity of vulnerability testing may not be known until after some systems enter engineering and manufacturing development.

### III.

#### Substitute the term "Vulnerability" for "Survivability"

The Panel recommends that the statute be amended to insert "vulnerability" instead of "survivability" at each point in the statute that the latter phrase appears. In the testing community, the phrase "survivability" encompasses the entire spectrum of considerations from target acquisition, maneuver, jamming and tactics (gained from operational testing generally) to warhead lethality and target vulnerability (gained from live-fire testing specifically). The proposed change makes clear the live fire testing is intended to address specifically the probability of kill given a hit, including both platform and crew vulnerability.

#### 3.2.2.5. Relationship to Objectives

Amendment of this statute as set forth would promote the best interests of DOD while maintaining essential congressional oversight of lethality/vulnerability testing. Amendment would also promote the objectives that acquisition laws should promote the exercise of sound judgement on the part of acquisition personnel.

#### 3.2.2.6. Proposed Statute

**§ 2366. Major systems and munitions programs: survivability and lethality testing required before full-scale production**

##### (a) Requirements--

(1) The Secretary of Defense shall provide that

(A) a covered system may not proceed beyond low-rate initial production until realistic ~~survivability~~ vulnerability testing of the system is completed in accordance with this

section and the report required by subsection (d) with respect to that testing is submitted in accordance with that subsection; and

(B) a major munitions program or a missile program may not proceed beyond low-rate initial production until realistic lethality testing of the program is completed in accordance with this section and the report required by subsection (d) with respect to that testing is submitted in accordance with that subsection.

(2) The Secretary of Defense shall provide that a covered product improvement program may not proceed beyond low-rate initial production until

(A) in the case of a product improvement to a covered system, realistic ~~survivability- vulnerability~~ testing is completed in accordance with this section; and

(B) in the case of a product improvement to a major munitions program or a missile program, realistic lethality testing is completed in accordance with this section.

(b) Test Guidelines--

(1) ~~Survivability-Vulnerability~~ and lethality tests required under subsection (a) shall be carried out sufficiently early in the development phase of the system or program (including a covered product improvement program) to allow any design deficiency demonstrated by the testing to be corrected in the design of the system, munition, or missile (or in the product modification or upgrade to the system, munition, or missile) before proceeding beyond low-rate initial production.

(2) The costs of all tests required under that subsection shall be paid from funds available for the system being tested.

(c) Waiver Authority--

(1) The Secretary of Defense may waive the application of the ~~survivability-vulnerability~~ and lethality tests of this section to a covered system, munitions program, missile program, or covered product improvement program if the Secretary, ~~before the system enters full-scale development~~, certifies to Congress that live-fire testing of such system or program would be unreasonably expensive and impractical. The Secretary shall include with any such certification a report explaining how the Secretary plans to evaluate the ~~survivability- vulnerability~~ or the lethality of the system or program and assessing possible alternatives to realistic ~~survivability vulnerability~~ testing of the system or program.

(2) In time of war or mobilization, the President may suspend the operation of any provision of this section.

(d) Reporting to Congress-- At the conclusion of ~~survivability vulnerability~~ or lethality testing under subsection (a), the Secretary of Defense shall submit a report on the testing to the defense

~~committees of Congress Committees on Armed Services and on Appropriations of the Senate and the House of Representatives (as defined in section 2362(e)(3) of this title).~~ Each such report shall describe the results of the survivability vulnerability or lethality testing and shall give the Secretary overall assessment of the testing.

(e) Definitions --In this section:

(1) The term "covered system" means a vehicle, weapon platform, or conventional weapon system-

(A) that includes features designed to provide some degree of protection to users in combat; and

(B) that is a major system within the meaning of that term in section 2302(3) of this title.

(2) The term "major munitions program" means-

(A) a munitions program for which more than 1,000,000 rounds are planned to be acquired; or

(B) a conventional munitions program: that is a major system within the meaning of that term in section 2302(3) of this title.

(3) The term "realistic survivability vulnerability testing" means, in the case of a covered system (or a covered product improvement program for a covered system), testing for vulnerability of the system in combat by firing munitions likely to be encountered in combat (or munitions with a capability similar to such munitions) at the system configured for combat, or in the case of high value systems, at components, subsystems, and subassemblies or realistic replicas or surrogates, and through the design analyses, modeling and simulation, and analysis of combat data, with the primary emphasis on testing vulnerability with respect to potential user casualties and taking into equal consideration the susceptibility to attack and combat performance of the system.

(4) The term "realistic lethality testing" means, in the case of a major munitions program or a missile program (or a covered product improvement program for such a program), testing for lethality by firing the munition or missile concerned at appropriate targets configured for combat.

(5) The term "configured for combat," with respect to a weapon, system, platform, or vehicle, means loaded or equipped with all dangerous materials (including all flammables and explosives) that would normally be on board in combat.

(6) The term "covered product improvement program" mean a program under which

(A) a modification or upgrade will be made to a covered system which (as determined by the Secretary of Defense) is likely to affect significantly the survivability vulnerability of such system; or

(B) a modification or upgrade will be made to a major munitions program or a missile program which (as determined by the Secretary of Defense) is likely to affect significantly the lethality of the munition or missile produced under the program.

### **3.2.3. 10 U.S.C. § 2399**

## **Operational test and evaluation of defense acquisition programs**

### **3.2.3.1. Summary of Law**

This section provides that a major defense acquisition program may not proceed beyond low-rate initial production until initial operational test and evaluation is completed. The Office of Operational Test and Evaluation (OT&E) must approve the adequacy of all testing plans, shall analyze testing results, and report thereon to Congress before proceeding with full scale production. The section also provides that the Office of OT&E shall determine the quantity of articles to be procured for major defense acquisition program testing, and the departments may make the same determination for non-major systems. The section further provides that no system contractor employee may be involved in major defense acquisition program operational testing unless such employees will be involved in actual system deployment. Also, no person who participates in system development, production or testing may provide test consulting services unless that person's impartiality is ensured in writing by the Director of OT&E. No contractor involved in development, production or testing may participate in operational testing, data collection, performance assessment or evaluation unless the contractor functioned solely as a Federal government representative. Finally, the section requires an annual report on the status of test activities and provides that operational testing may not be based exclusively on computer analysis.

### **3.2.3.2. Background of Law**

Initial operational test and evaluation requirements were set forth in the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> Those requirements were included in a single section with live fire test requirements. The National Defense Authorization Act for Fiscal Years 1990 and 1991 split off operational test and evaluation requirements into a separate statutory section.<sup>2</sup> The Conference Report stated the conferees' concern was that:

... too many weapon systems are entering full production status before they have successfully completed operational test and evaluation and have their identified design deficiencies corrected. The conference agreement would permit establishment of a single production source, and recognizes the advantages of maintaining this source once started. This recognition is not intended to condone a continuing reapproval of 'low-rate initial production' quantities that eventually may total to a significant percentage of the total planned procurement.<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 99-500, § 101(c), 100 Stat. 3341 (1986) (Identical legislation omitted).

<sup>2</sup>Pub. L. No. 101-189, § 802(a)(1), 103 Stat. 1484 (1989).

<sup>3</sup>H.R. CONF. REP. No. 331, 101st Cong., 1st Sess. 601 (1989).

The Conference Report further indicated that the prohibition on contractors who had been involved in developmental testing or involvement in operational testing was intended to avoid any compromise of the integrity of the operational test and evaluation. The conferees stated, however, that "some flexibility in the use of contractor support is required. For instance, operational tests may require contractor support in areas such as instrumentation, data collection and data processing."<sup>4</sup> Therefore, an exception was permitted where the OT&E Director is able to demonstrate support contractor impartiality. No exception, however, was intended that would permit a support contractor to participate in development of criteria for data collection, performance assessment or evaluation where the contractor has been involved in system development.<sup>5</sup>

The National Defense Authorization Act for FY 1993 amended the contractor bar provision at subsection (e) to exempt from that bar contractors that have participated in development, production or testing solely as a representative of the Federal government.<sup>6</sup>

### 3.2.3.3. Law in Practice

This statute is implemented by DOD Instruction 5000.2M, Part 8, Test and Evaluation (February 23, 1991). By the terms of that Instruction, the statute applies to Acquisition Categories I and II. Paragraphs 4 and 5 of part 8 of that Instruction set forth operational testing policies and procedures. The regulation essentially reiterates the pertinent requirements of the statute.

In practice, the most controversial issue regarding this statute is the limitation on contractor involvement in operational testing. The parties surveyed were unanimous in the desire for a more expansive statement of the circumstances in which contractor involvement in operational testing will be permitted.<sup>7</sup> Specifically, all commenters believed that greater system contractor support is necessary in the area of analytical and logistic support. A synopsis of the comments received identified the following types of concerns:

- System contractor support in initial operational testing is beneficial in providing logistic support, test failure analyses and software and instrumentation support that would increase the value of operational testing data generated while maintaining the integrity of test results.

---

<sup>4</sup>*Id.* at 600.

<sup>5</sup>*Id.*

<sup>6</sup> Pub. L. No. 102-484, § 819, 106 Stat. 2458 (1992).

<sup>7</sup> Comments were obtained from the following offices: Office of the Secretary of Defense (Operational Test and Evaluation); Office of the Under Secretary of Defense for Acquisition (Developmental Test and Evaluation); Department of the Air Force (Test and Evaluation); Deputy Under Secretary of the Army (Operations Research); Department of the Navy (Test, Evaluation and Technology Requirements) and Aerospace Industries Association (Flight Test Group). In addition, comments were received from a survey of Department of the Army Program Managers and Program Executive Officers.

- As the services down-size and DOD shifts more to a technology strategy, wherein fieldable prototype and advanced technology demonstrators are stressed, system support by the contractor will become even more critical.
- Private sector testing support is cost effective and often not available elsewhere.
- The limitation adds time and cost when outside technical support has to be hired and brought up to speed for data analysis and corrective action.
- The experience level of user personnel in operational testing is low or non-existent and therefore not representative of a normal operational unit where a broad range of experience with a weapon system is commonly found. Thus, judicious use of contractor personnel to broaden the personnel experience base during operational testing would provide a more realistic assessment of the operability of the system.

The Army PEOs and PMs surveyed also raised substantial issues regarding the validity of an absolute requirement for dedicated, sequential initial OT&E for all major systems under section 2302(5) that are designated for use in combat.

- Such testing requires more assets than are necessarily required for reasonable evaluation, adding significantly to overall program costs.
- Operational testing is often conducted on interim systems that are components of major programs. Then operational testing is repeated unnecessarily when such systems are integrated into the major program, where no significant change in subsystem functioning occurs after integration.
- Flexibility should exist for those programs or systems that are clearly low risk. For example, the PEO for Army Combat Support indicated that in the Non-Developmental Item (NDI) area, the Government is competing for contractor interest with many commercial ventures that do not have similar restrictions. In such cases, the OT/LRIP restrictions require a stretch out of monthly production deliveries, resulting in an artificial ramp-up that significantly increases unit costs.

- Operational testing, in some programs, accumulates too little data to be statistically relevant.<sup>8</sup>

Finally, the Panel notes that the Departments of the Army, Navy and Air Force had jointly proposed that the statute be modified to permit system contractors to be involved in OT&E in the five following instances:<sup>9</sup>

- Maintenance and support actions of the same type that the system contractor would be expected to perform as part of interim contractor support or contractor logistics support when the system is deployed in combat.
- Conducting and reporting analyses of test failures to assist in isolating causes of failure (but excluding participation in data scoring and assessment conferences).
- Providing and operating system-unique test equipment, test beds, and test facilities which may include software, software support packages, instrumentation and instrumentation support.
- Providing logistics support and training as required in the event that such services have not yet been developed and are not available from the military department or Defense Agency having responsibility for conducting or supporting the operational test and evaluation.
- Providing data generated prior to the conduct of the operational test, if deemed appropriate and validated by the independent operational test agency in order to ensure that critical issues are sufficiently and adequately addressed.

#### **3.2.3.4. Recommendation and Justification**

##### **Repeal**

The Panel's primary recommendation is to repeal this statute in its entirety and enact the streamlined statute. In the alternative, the Panel recommends that this statute be retained but amended as follows:

---

<sup>8</sup>These issues are synopsized from all of the comments received. See Memoranda from the following Department of the Army Program Executive Offices to the Deputy General Counsel (Acquisition), Department of the Army: Maj Gen Dewitt T. Irby, Jr., Aviation, dated 20 Apr. 1992; Mr. Dale G. Adams, Armaments, dated 10 Apr. 1992; Brig Gen Robert A. Drolet, Air Defense, dated 8 Apr. 1992; Ms. Mary D. Kelly, Plans and Programs, STAMIS, dated 23 Mar. 1992; Brig Gen Otto Guenther, Communications Systems, dated 20 Apr. 1992; Maj Gen William Harmon, Command and Control Systems, dated 10 Apr. 1992; and Lt Gen Robert Hammond, Strategic Defense, dated 13 Apr. 1992.

<sup>9</sup>Memorandum from Howard W Leaf, Lt Gen, USAF (Ret), Director, Test and Evaluation, Department of the Air Force, to DOD Advisory Panel, dated 25 Sep. 1992.

## I

### **Amend Statute to Permit Modification of Mandatory Operational Testing Requirement.**

The Panel recommends that this statute be amended at subsection (b) to add the following language:

(6) The Secretary of Defense may modify the requirements for initial operational test and evaluation, set forth above, where the Secretary:

(A) certifies to Congress that such testing would be unreasonably expensive and impractical, cause unwarranted delay or be unnecessary because of the acquisition strategy for that system; and

(B) describes the actions taken to ensure that the system will be operationally effective and suitable when it is introduced into the field.

The Panel bases this recommendation on extensive comments received from the field that an absolute requirement for dedicated, sequential operational testing can, in certain cases, significantly hinder the acquisition process. In those cases that can be legitimately identified as low risk, such as some NDI purchases, operational testing may add significant cost to the program. Similarly, in programs for which there is an urgency of need and/or limited quantities, such as the Army Special Operations aircraft program, full-scale operational testing may be unwarranted. The Panel believes that the statute should at least provide some flexibility for a cost-risk analysis of the benefits of operational testing in some cases. For programs where operational testing would interrupt an ongoing production process (where, for instance, the covered program is a modification), the increase in unit cost may simply outweigh the relative benefit of full-scale operational testing.

In addition, the proposed language, at subsection (b)(6), would also ensure that the credibility of the process is maintained along with accountability to the Congress. Thus, authority to modify would not result in a total absence of congressional oversight, but rather in a more tailored oversight system.

## II

### **Amend to Permit Greater System Contractor Involvement in Operational Testing Logistic and Other Support Functions**

The Panel recommends that this statute be amended at subsection (d) as follows:

(d) IMPARTIALITY OF CONTRACTOR TESTING PERSONNEL-- In the case of a major defense acquisition program (as defined in subsection (a)(2), no person employed by the contractor for the system being tested may be involved in the conduct of the operational test and evaluation required under subsection (a)(1). The limitation in the preceding sentence does not apply

(1) to the extent that the Secretary of Defense plans for persons employed by that contractor to be involved in the operation, maintenance, and support of the system being tested when the system is deployed in combat or

(2) to the extent that the Secretary of Defense has authorized by regulation involvement by system contractor employees in operational test and evaluation analytic and logistic support. Such regulations must ensure the impartiality of that contractor and the integrity of the testing and evaluation process. In such cases, the operational test and evaluation plan must identify the specific involvement of that contractor in the operational test and evaluation process and the steps taken to ensure contractor impartiality.

The Panel recommends the above change in order to permit greater system contractor involvement in operational testing to address the concerns raised by the acquisition and testing communities as set forth above, and specifically the need for greater system contractor involvement in test analytic and logistic support. The Panel believes the amendment adequately addresses the original congressional concerns underlying this statute regarding instances of contractor involvement in operational testing that clearly compromised the testing process. The proposed amendment requires the Secretary of Defense to specifically authorize the types of circumstances when system contractor involvement will be permitted and to ensure that it will not compromise the integrity of the testing process. Such involvement must also be set forth with specificity in the operational test plan.

Rather than make the law too specific, the Panel elected instead to provide in the statute for the Secretary of Defense to promulgate via regulation any specific provisions for system contractor involvement in OT&E while placing adequate controls on their involvement. The Panel believes this can be effectively accomplished while preserving the current intent of the law.

### III

#### **Amend Statute to Permit Greater Support/Nonsystem Contractor Involvement in Operational Testing.**

The Panel further recommends that subsection (e) be amended as follows:

(e) IMPARTIAL CONTRACTED ADVISORY AND ASSISTANCE SERVICES.-

(1) The Director may not contract with any person for advisory and assistance services with regard to the test and evaluation of a system if that person participated in (or is participating in) the development, or production, or testing of such system for a military department or Defense Agency (or for another contractor of the Department of Defense).

\*\*\*\*\*

(3)(A) A contractor that has participated in (or is participating in) the development, or production, or testing of a system for a military department or Defense Agency (or for another contractor of the Department of Defense) may not be involved (in any way) in the establishment of criteria for data collection, performance assessment, or evaluation activities for the operational test and evaluation.

(B) The limitation in subparagraph (A) does not apply to a contractor that has participated in such development, or production, or testing solely as a representative of the Federal Government.

This amendment preserves the general limitation on support contractor involvement in operational testing activities where that contractor has previously supported system development or production and the contractor was not acting solely as a representative of the Federal Government. Thus, the congressional goal that contractors who supported system development and production be barred from subsequent operational testing because they may not have the requisite objectivity is maintained by this proposed amendment. Elimination of the phrase "testing" will, however, permit support contractor involvement in operational testing even where that contractor has previously supported developmental testing. In such a situation, the potential conflict of interest is not present. And, as the above comments demonstrate, greater support contractor involvement in operational testing data collection and other types of testing support can provide much greater efficiency in the overall testing process.

With respect to both of these proposed contractor involvement amendments, the Panel notes that when this legislation was enacted, Congress itself recognized that "some flexibility in the use of contractor support is required. For instance, operational tests may require contractor support in areas such as instrumentation, data collection and data processing."<sup>10</sup> Thus, these proposed amendments do not undermine the congressional intent underlying this statute.

### **3.2.3.5. Relationship to Objectives**

If repeal is not accepted, amendment of this statute as proposed will promote the best interests of DOD while preserving valid congressional oversight provisions.

---

<sup>10</sup>H.R. CONF. REP. No. 331, 101st Cong., 2d Sess. 600 (1989).

### **3.2.3.6. Proposed Statute**

#### **§ 2399. Operational test and evaluation of defense acquisition programs.**

##### **(a) Condition for Proceeding Beyond Low-Rate Initial Production--**

(1) The Secretary of Defense shall provide that a major defense acquisition program may not proceed beyond low-rate initial production until initial operational test and evaluation of the program is completed.

(2) In this subsection, the term "major defense acquisition program" means

(A) a conventional weapons system that is a major system within the meaning of that term in section 2302(5)(3) of this title; and

(B) is designed for use in combat.

##### **(b) Operational Test and Evaluation--**

(1) Operational testing of a major defense acquisition program may not be conducted until the Director of Operational Test and Evaluation of the Department of Defense approves (in writing) the adequacy of the plans (including the projected level of funding) for operational test and evaluation to be conducted in connection with that program.

(2) The Director shall analyze the results of the operational test and evaluation conducted for each major defense acquisition program. At the conclusion of such testing, the Director shall prepare a report stating the opinion of the Director as to

(A) whether the test and evaluation performed were adequate; and

(B) whether the results of such test and evaluation confirm that the items or components actually tested are effective and suitable for combat.

(3) The Director shall submit each report under paragraph (2) to the Secretary of Defense, the Under Secretary of Defense for Acquisition, and the congressional defense committees. Each such report shall be submitted to those committees in precisely the same form and with precisely the same content as the report originally was submitted to the Secretary and Under Secretary and shall be accompanied by such comments as the Secretary may wish to make on the report.

(4) A final decision within the Department of Defense to proceed with a major defense acquisition program beyond low-rate initial production may not be made until the Director has submitted to the Secretary of Defense the report with respect to that program under paragraph (2) and the congressional defense committees have received that report.

(5) In this subsection, the term "major defense acquisition program" has the meaning given that term in section 138(a)(2)(B) of this title.

(6) The Secretary of Defense may modify the requirements for initial operational test and evaluation, set forth above, where the Secretary

(A) certifies to Congress that such testing would be unreasonably expensive and impractical, cause unwarranted delay or be unnecessary because of the acquisition strategy for that system; and

(B) describes the actions taken to ensure that the system will be operationally effective and suitable when it is introduced into the field.

(c) Determination of Quantity of Articles Required for Operational Testing.-- The quantity of articles of a new system that are to be procured for operational testing shall be determined by-

(1) the Director of Operational Test and Evaluation of the Department of Defense, in the case of a new system that is a major defense acquisition program (as defined in section 138(a)(2)(B) of this title); or

(2) the operational test and evaluation agency of the military department concerned, in the case of a new system that is not a major defense acquisition program.

(d) Impartiality of Contractor Testing Personnel-- In the case of a major defense acquisition program (as defined in subsection (a)(2)), no person employed by the contractor for the system being tested may be involved in the conduct of the operational test and evaluation required under subsection (a)(1). ~~The limitation in the preceding sentence does not apply to the extent that the Secretary of Defense plans for persons employed by that contractor to be involved in the operation, maintenance, and support of the system being tested when the system is deployed in combat.~~ The limitation in the preceding sentence does not apply

(1) to the extent that the Secretary of Defense plans for persons employed by that contractor to be involved in the operation, maintenance, and support of the system being tested when the system is deployed in combat, or,

(2) to the extent that the Secretary of Defense has authorized by regulation involvement by system contractor employees in operational test and evaluation analytic and logistic support. Such regulations must ensure the impartiality of that contractor and the integrity of the testing and evaluation process. In such cases, the operational test and evaluation plan must identify the specific involvement of that contractor in the operational test and evaluation process and the steps taken to ensure contractor impartiality.

(e) Impartial Contracted Advisory and Assistance Services--

(1) The Director may not contract with any person for advisory and assistance services with regard to the test and evaluation of a system if that person participated in (or is participating in) the development, or production, ~~or testing~~ of such system for a military department or Defense Agency (or for another contractor of the Department of Defense).

(2) The Director may waive the limitation under paragraph (1) in any case if the Director determines in writing that sufficient steps have been taken to ensure the impartiality of the contractor in providing the services. The Inspector General of the Department of Defense shall review each such waiver and shall include in the Inspector General's semiannual report an assessment of those waivers made since the last such report.

(3)(A) A contractor that has participated in (or is participating in) the development or production, ~~or testing~~ of a system for a military department or Defense Agency (or for another contractor of the Department of Defense) may not be involved (in any way) in the establishment of criteria for data collection, performance assessment, or evaluation activities for the operational test and evaluation.

(B) The limitation in subparagraph (A) does not apply to a contractor that has participated in such development, or production, ~~or testing~~ solely as a representative of the Federal Government.

(f) Source of Funds for Testing--The costs for all tests required under subsection (a) shall be paid from funds available for the system being tested.

(g) Director's Annual Report--As part of the annual report of the Director under section 138 of this title, the Director shall describe for each program covered in the report the status of test and evaluation activities in comparison with the test and evaluation master plan for that program, as approved by the Director. The Director shall include in such annual report a description of each waiver granted under subsection (e)(2) since the last such report.

(h) Definitions--In this section:

(1) The term "operational test and evaluation" has the meaning given that term in section 138(a)(2)(A) of this title. For purposes of subsection (a), that term does not include an operational assessment based exclusively on-

(A) computer modeling;

(B) simulation; or

(C) an analysis of system requirements, engineering proposals, design specifications, or any other information contained in program documents.

(2) The term "congressional defense committees" means the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives.

### **3.2.4. 10 U.S.C. § 2400**

#### **Low-rate initial production of new systems**

##### **3.2.4.1. Summary of Law**

This section provides that, for major systems, the decision on the quantity to be procured for low-rate initial production shall be made when the milestone II (engineering and manufacturing development decision) is made and by that same deciding official. Any decision for production increases must also be made by that deciding official, and the quantity amounts reported in the initial Selected Acquisition Report, (SAR) on that system. Except for naval vessel and satellite programs, low-rate initial production is defined as the minimum quantity necessary to provide production-configured or representative articles for operational tests, the quantity necessary to establish an initial production base, and the quantity necessary to permit an orderly increase in production sufficient to lead to full-rate production.

##### **3.2.4.2. Background of Law**

This section was enacted by the National Defense Authorization Act for Fiscal Year 1990- and 1991.<sup>1</sup> Introduced by the House version of the bill, the House Committee Report indicated concern that in some cases DOD had been purchasing a large share of the total procurement program before completing operational testing under the guise of low-rate initial production.<sup>2</sup> Nonetheless, in conference, the conferees stated their agreement that this definition could still permit the establishment of a single production source, and maintain the advantages of a source once started, provided that full-scale production was not incrementally achieved through initial low-rate production quantities.<sup>3</sup>

##### **3.2.4.3. Law in Practice**

This statute is implemented by DOD Instruction 5000.2, part 8 (Test and Evaluation) (February 23, 1991).

The comments received raised no major issues with respect to this statute. The parties surveyed indicated that the statute continues to serve a valid purpose by ensuring that appropriate operational and vulnerability/lethality testing is completed before production proceeds beyond low-rate initial production. No indication was given that the statutory definition of low-rate initial production was inadequate or otherwise hindered the testing process or development of an adequate production base.<sup>4</sup>

---

<sup>1</sup>Pub. L. No. 101-189, § 803(a), 103 Stat. 1487 (1989).

<sup>2</sup>H. R. REP. NO. 121, 101st Cong., 1st Sess. 17 (1989).

<sup>3</sup>H.R. CONF. REP. NO. 331, 101st Cong., 1st Sess. 601 (1989).

<sup>4</sup>Comments were obtained from the following offices: Office of the Secretary of Defense (Operational Test and Evaluation); Office of the Under Secretary of Defense for Acquisition (Developmental Test and Evaluation); Department of the Air Force (Test and Evaluation); Deputy Under Secretary of the Army (Operations Research);

The Army Program Executive Officer for Strategic Defense did recommend that, in order to preserve a mobilization production base, strategic defense missiles should be added to the statute as one of the low density production items listed at subsection (c).<sup>5</sup> Those listed items (naval vessels and satellite programs) are exempt from the standard low-rate initial production definition. The Office of Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition), does not agree with the proposed addition of strategic defense missiles to those systems requiring a different definition of low-rate initial production. That Office cites Upper Tier Theater Missile Defense Systems, Ground Based Interceptors, CORPS Surface-to-Air Missiles, and PATRIOT Upgrades as systems where the total production quantities and production rates are substantially larger than those of naval vessels and satellite programs.<sup>6</sup>

#### **3.2.4.4. Recommendation and Justification**

##### **Amend to add strategic defense missiles at (c) and to make TEMP discretionary.**

The Panel recommends that this statute be retained but amended at subsection (c)(1) and (2) to include strategic defense missiles as a category of system with a low-density production rate similar to those already listed and therefore exempt from the standard low-rate initial production definition. While theater missile systems may have production quantities that exceed naval vessels and satellite programs, strategic defense missile systems generally have lower production quantities. Thus, this type of system warrants consideration by the Congress as a type of system that is exempt from the standard, low-rate initial production definition.

Additionally, the Panel recommends that (c)(3) be amended to make the Test and Evaluation Master Plan (TEMP) discretionary for these exempted systems.

Prior to enactment of this language, the Navy had not developed TEMPs for about half of its ship programs because many of those programs were repetitive procurements of auxiliary and amphibious support ship programs, built to commercial specifications and without developmental risk and operational testing. This amendment proposes to enact in the statute this prior, Navy policy.<sup>7</sup>

---

Department of the Navy (Test, Evaluation and Technology Requirements) and Aerospace Industries Association (Flight Test Group).

<sup>5</sup>Memorandum from Lt. Gen. Robert Hammond, PEO, Strategic Defense to General Counsel HQ Department of the Army, dated 13 April 1992. See also Letter from Mr. Walter Hollis, Deputy Under Secretary of the Army, (Operations Research), to Mr. Anthony Gamboa, Deputy General Counsel (Acquisition), Department of the Army, dated 5 June 1992.

<sup>6</sup>Memorandum from Mr. Gene Porter, Principal Deputy Director, Acquisition Policy & Program Integration, Under Secretary of Defense (Acquisition), to DOD Advisory Panel, dated 9 Nov. 1992.

<sup>7</sup>Letter from RADM Houley, Director, Test and Evaluation & Technology Requirements, Department of the Navy, to Ms. Theresa Squillacote, dated 28 Aug. 1992.

### **3.2.4.5. Relationship to Objectives**

Amendment of this statute will promote the best interests of DOD while maintaining the underlying utility of the statutory definition.

### **3.2.4.6. Proposed Statute**

#### **§ 2400. Low-rate initial production of new systems**

##### **(a) Determination of Quantities To Be Procured for Low-Rate Initial Production.**

(1) In the course of the development of a major system, the determination of what quantity of articles of that system should be procured for low-rate initial production (including the quantity to be procured for reproduction verification articles) shall be made-

(A) when the milestone II decision with respect to that system is made; and

(B) by the official of the Department of Defense who makes that decision.

(2) In paragraph (1), the term "milestone II decision" means the decision to approve the full-scale engineering development of a major system by the official of the Department of Defense designated to have the authority to make that decision.

(3) Any increase from a quantity determined under paragraph (1) may only be made with the approval of the official making the determination.

(4) The Secretary of Defense shall include a statement of the quantity determined under paragraph (1) in the first SAR submitted with respect to the program concerned after that quantity is determined. For purposes of the preceding sentence, the term "SAR" means a Selected Acquisition Report submitted under section 2432 of this title.

(b) Low-Rate Initial Production of Weapon Systems. Except as provided in subsection (c), low-rate initial production with respect to a new system is production of the system in the minimum quantity necessary-

(1) to provide production-configured or representative articles for operational tests pursuant to section 2399 of this title;

(2) to establish an initial production base for the system; and

(3) to permit an orderly increase in the production rate for the system sufficient to lead to full-rate production upon the successful completion of operational testing.

(c) Low-rate Initial Production of Naval Vessel, Satellite and Strategic Defense Missile Programs.

(1) With respect to naval vessel ~~programs and~~, military satellite and strategic defense missile programs, low-rate initial production is production of items at the minimum quantity and rate that (A) preserves the mobilization production base for that system, and (B) is feasible, as determined pursuant to regulations prescribed by the Secretary of Defense.

(2) For each naval vessel ~~program and~~, military satellite and strategic defense missile program, the Secretary of Defense shall submit to Congress a report providing-

(A) an explanation of the rate and quantity prescribed for low-rate initial production and the considerations in establishing that rate and quantity;

(B) a test and evaluation master plan for that program, if the Secretary of Defense has required that one be developed; and

(C) an acquisition strategy for that program that has been approved by the Secretary, to include the procurement objectives in terms of total quantity of articles to be procured and annual production rates.

### **3.3. Service Specific Laws**

#### **3.3.0. Introduction**

This subchapter examines the service-specific acquisition sections in the last three subtitles of Title 10. These laws fall into two main groups: (1) the Army/Air Force statutes, that evolve historically out of the same source law, and (2) Navy-peculiar laws. These laws provide various authorities to a secretary of an individual military department and are grouped in that Service's chapter of title 10. These many provisions are of such a disparate nature that they will not be summarized in this introduction.

Generally, the Panel's approach to these statutes was as follows. If a law constituted a grant of authority to the service, the service was surveyed to determine whether the authority was still used and still relevant to modern procurement practices. An analysis was also made as to whether the service-specific authority was also contained in authority elsewhere provided to the DOD as a whole. Any issues raised with regard to still-relevant statutes were considered, and in some instances, amendments are recommended to address these issues. In many cases where a grant of authority is recommended for retention, the authority is rewritten to vest with the "Secretary of Defense and secretaries of the military departments" rather than with the secretary of a particular service.

In instances where a grant of authority is no longer used, or otherwise obsolete, the Panel recommends repeal. Quite frequently, older statutes originating as emergency wartime provisions have been overtaken by modern acquisition practices and are no longer relevant.

In a number of cases, efforts were made to modernize still-meaningful authorities. Often, the body of laws within a single chapter originated from the same source. These sections lend themselves to consolidation into a single, streamlined section. For example, the authorities at 10 U.S.C. §§ 7361 through 7367 all cover naval salvage operations and all were enacted by the same law. These sections were consolidated, and the language modernized where appropriate.

Of the laws examined within this subchapter, a number stand out as highlights:

- The service-specific authorities to contract for architect-engineering (A-E) services (10 U.S.C. §§ 4540 and 9540, and 10 U.S.C. § 7212) were recommended for repeal as laws that have clearly outlived their usefulness; the collective analysis for these statutes discusses the problems raised by the 6% fee limit in these laws and their interplay with the Brooks A-E statute.
- The laws at 10 U.S.C. §§ 4506/9506, §§ 4507/9507 and § 4508, all involving authority to sell or loan a government item or service, were crafted into a single statute that sets forth specified authorities to sell or loan government material for prescribed purposes. It includes an important authority to permit sales or the use of government test facility services to private contractors at specified rates.

- Civil Reserve Air Fleet (CRAF) enhancement authorities at 10 U.S.C. §§ 9512 and 9513 were recommended for amendment to permit private contractors limited commercial use of military airfields. This proposal was based on the crucial role played by CRAF during Operation Desert Storm/Desert Shield.

The individual analyses for all of these sections are set forth in this subchapter. The Panel notes that those service-specific authorities that are marked for retention might appropriately be collected into a "Service Procurement Generally" chapter.

### **3.3.1. 10 U.S.C. §§ 4501 and 9501**

#### **Industrial mobilization: orders; priorities; possession of manufacturing plants; violations (Army and Air Force)**

##### **3.3.1.1. Summary of Law**

These sections provide that the President, acting through a military department and for war preparation, may order from any person or industry products that they typically produce. That person or industry must comply with that order. If the person or industry refuses to comply or provide a reasonable price, the President may take possession of and utilize such facilities when the military department secretary determines that it is necessary for war preparation. The person or industry must then receive compensation. A fine may be imposed for failure to comply.

##### **3.3.1.2. Background of Law**

These sections were originally enacted in 1916 by the Act for Making Further Provision for the National Defense.<sup>1</sup> No report language discussing these provisions is available. They were retained by the Army and Air Force Organization Act of 1950 and codified in 1956.

##### **3.3.1.3. Law in Practice**

Executive Order 12742, "National Security Industrial Responsiveness," dated Jan. 8, 1991, delegated certain authorities of the President under this section and provided for implementation of the authority delegated.

The Office of the Judge Advocate General, Department of the Army, reports that this Army provision is critical because, during lapses of the Defense Production Act, this statute is the only one that provides authority to establish priorities for defense production orders.<sup>2</sup> It further notes that this statute and the Defense Production Act were the bases for all priority orders issued during Desert Shield/Desert Storm.<sup>3</sup>

The Operational Contract Division, Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force (Acquisition), reports that the Air Force statute is still needed because it provides the President authority to direct production of critical material in times of war and no other such permanent authority exists.<sup>4</sup> That Office also notes that this authority may become increasingly vital, given the current defense strategy of reconstitution.<sup>5</sup>

<sup>1</sup>Pub. L. No. 64-85, ch. 134, § 120, 39 Stat. 213 (1916).

<sup>2</sup>Memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army, to Acquisition Law Advisory Panel, dated 1 May 1992.

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Mr. Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Assistant Secretary (Acquisition), Department of the Air Force, to Ms. Theresa Squillacote, DOD Advisory Panel, dated 20 Nov. 1992.

<sup>5</sup>*Id.*

### 3.3.1.4. Recommendation and Justification

#### Retain and Consolidate

The Panel recommends that these sections be retained as they continue adequately to serve a valid purpose within the DOD. While authority to prioritize war or national emergency orders is also available through Title I of the Defense Production Act,<sup>6</sup> such authority is not available during periodic lapses of that legislation. Hence, these permanent law provisions are still necessary. The Panel does recommend, however, that these two statutes be consolidated into a single statute with authorities vested in the Secretary of Defense and in the secretaries of the military departments.

### 3.3.1.5. Relationship to Objectives

Retention and consolidation of these statutes promotes the best interests of DOD by providing an authority that is essential for national defense.

### 3.3.1.6. Proposed Statute

#### Industrial mobilization: orders; priorities; possession of manufacturing plants; violations

(a) In time of war or when war is imminent, the President, ~~through the head of any department, through the Secretary of Defense or secretary of the military department concerned,~~ may order from any person or organized manufacturing industry necessary products or materials of the type usually produced or capable of being produced by that person or industry.

(b) A person or industry with whom an order is placed under subsection (a), or the responsible head thereof, shall comply with that order and give it precedence over all orders not placed under that subsection.

(c) In time of war or when war is imminent, the President, ~~through the head of any department, the Secretary of Defense or secretary of the military department concerned,~~ may take immediate possession of any plant that is equipped to manufacture, or that in the opinion of the ~~Secretary of the Army~~ Secretary of Defense or secretary of a military department concerned, is capable of being readily transformed into a plant for manufacturing, arms or ammunition, parts thereof, or necessary supplies for ~~the Army, armed forces~~ if the person or industry owning or operating the plant, or the responsible head thereof, refuses-

(1) to give precedence to the order as prescribed in subsection (b);

(2) to manufacture the kind, quantity, or quality of arms or ammunition, parts thereof, or necessary supplies, as ordered by the Secretary; or

---

<sup>6</sup>See ch. 7 of this Report.

(3) to furnish them at a reasonable price as determined by the Secretary.

(d) The President, through the Secretary of Defense or the secretary of a military department concerned, may manufacture products that are needed in time of war or when war is imminent, in any plant that is seized under subsection (c).

(e) Each person or industry from whom products or materials are ordered under subsection (a) is entitled to fair and just compensation. Each person or industry whose plant is seized under subsection (c) is entitled to a fair and just rental.

(f) Whoever fails to comply with this section shall be imprisoned for not more than three years and fined not more than \$50,000.

### **3.3.2. 10 U.S.C. §§ 4502 and 9502**

#### **Industrial mobilization: plants; lists; Board on Mobilization of Industries Essential for Military Preparedness**

##### **3.3.2.1. Summary of Law**

These sections provide that the Secretaries of the Army and Air Force shall maintain a list of and track the manufacturing abilities of all private facilities equipped to or capable of being equipped to manufacture service arms or ammunition. The secretaries are required to prepare plans for such conversion. The President is authorized to appoint and support a Mobilization Board of Military Preparedness Industries.

##### **3.3.2.2. Background of Law**

These sections were originally enacted in 1916 by the Act for Making Further Provision for the National Defense.<sup>1</sup> No report language discussing these provisions is available. They were retained by the Army and Air Force Organization Act of 1950 and codified in 1956.

##### **3.3.2.3. Law in Practice**

These sections are implemented by DOD Instruction on 4005.3 Industrial Preparedness Planning (Apr. 18, 1985) and DOD Directive 4005.1, Industrial Preparedness Program (Nov. 26, 1985).

The Department of the Army, Office of the Judge Advocate General submitted no comments with regard to this statute. The Department of the Army, Office of the Assistant Secretary (Research, Development and Acquisition), Acquisition and Industrial Base Policy, states that it believes the law provides a needed authority for maintaining data on contractors which have useful productive capacity.<sup>2</sup> That Office further notes that, while the emergency response from the industrial base is currently more limited than when this law was originally passed, the Army still requires certain data on manufacturers of sustainment type commodities.<sup>3</sup>

The Operational Contract Division, Deputy Assistant Secretary (Contracting), Office of the Assistant Secretary of the Air Force (Acquisition), reports that this Air Force statute is still needed because it provides authority for the Department to engage in the production base analyses required for effective, industrial base management.<sup>4</sup> Specifically, that Office notes that it

---

<sup>1</sup>Pub. L. No. 64-85, ch. 134, § 120, 39 Stat. 213 (1916).

<sup>2</sup>Memorandum from Mr. Bruce H. Waldsch, Office of the Assistant Secretary (Research, Development and Acquisition), Acquisition and Industrial Base Policy, Department of the Army, to Ms. Theresa Squillacote, Acquisition Law Task Force, dated 23 Nov. 1992.

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Mr. Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Assistant Secretary (Acquisition), Department of the Air Force, to Advisory Panel, dated 20 Nov. 1992.

does collect the data specified in this statute and that this statute is the sole authority to collect such data.<sup>5</sup>

#### 3.3.2.4. Recommendation and Justification

##### Retain and Consolidate

The Panel recommends that these sections be retained as they continue adequately to serve a valid purpose within the Department. In particular, these authorities enable the cognizant military departments to engage in the industrial base analyses required under other sections of Title 10. The Panel does recommend, however, that these two sections be consolidated into a single section with authorities vested in the Secretary of Defense and in the secretaries of the military departments. Further, the word "all" can be deleted without detracting from the Secretary's authority to maintain a list of privately owned plants.

#### 3.3.2.5. Relationship to Objectives

Retention and consolidation of these sections will further the goals of maintaining acquisition statutes that further the best interests of DOD while streamlining the acquisition process.

#### 3.3.2.6. Proposed Statute

##### Industrial mobilization: plants; lists; Board on Mobilization of Industries Essential for Military Preparedness

(a) ~~The Secretary of the Air Force~~ Secretary of Defense and secretaries of the military departments are authorized to maintain a list of all privately owned plants in the United States, and the Territories, Commonwealths, and possessions, that are equipped to manufacture for the ~~Air Force~~ armed forces arms or ammunition, or parts thereof, and may, when they deem it necessary, obtain complete information of the kinds of those products manufactured or capable of being manufactured by each of those plants, and of the equipment and capacity of each of those plants.

(b) ~~The Secretary of Defense and secretaries of the military departments are authorized to~~ maintain a list of privately owned plants in the United States, and the Territories, Commonwealths, and possessions, that are capable of being readily transformed into factories for the manufacture of ammunition for the ~~Air Force,~~ armed forces and that have a capacity sufficient to warrant conversion into ammunition plants in time of war or when war is imminent, and may, when they deem it necessary, ~~shall~~ obtain complete information as to the equipment of each of those plants.

---

<sup>5</sup>*Id.*

(c) The ~~Secretary~~ secretaries may prepare comprehensive plans for converting each plant listed pursuant to subsection (b) into a factory for the manufacture of ammunition or parts thereof.

(d) The President may appoint a nonpartisan Board on Mobilization of Industries Essential for Military Preparedness, and may provide necessary clerical assistance to organize and coordinate operations under this section and ~~section 9501~~ under section XXYY of this title.<sup>6</sup>

---

<sup>6</sup>An appropriately conforming amendment must be made, deleting the reference to § 9501.

### **3.3.3. 10 U.S.C. § 4504 and 9504**

#### **Procurement for Experimental Purposes**

##### **3.3.3.1. Summary of Laws**

These statutes provide that the Secretaries of the Army and Air Force may purchase noncompetitively, for experimental purposes, ordnance, signal and chemical warfare supplies, parts and designs necessary for the national defense. The competition requirements still apply to purchases in quantity.

##### **3.3.3.2. Background of Laws**

These sections were enacted in 1939 by the Act to Authorize the Purchase of Equipment and Supplies for Experimental and Test Purposes.<sup>1</sup> The Senate Report indicated that the purpose of the bill was to extend the Secretary of War's authority under the Air Corps Act of 1926 (now codified at 10 U.S.C. § 2271-79).<sup>2</sup> That is, Congress intended to broaden procurement authority for those developing services -- Air Corps, Ordnance, Signal Corps and Chemical Warfare Service -- that develop and use largely noncommercial equipment and supplies. The provision was intended to overcome then-existing Comptroller General limitations on the purchase of development and experimental items. Under extant case law, procurement was limited to single items, which was insufficient for service testing, prevented comparative analysis among manufacturers and was expensive.<sup>3</sup> The House Report indicated that the limitation on the competition exemption was intended to ensure that the authority was strictly limited to procurement for experimental and test purposes.<sup>4</sup>

The sections were codified in 1956 with minor language changes.

##### **3.3.3.3. Laws in Practice**

The Army Office of the Judge Advocate General advises that this authority is not currently utilized by any of the offices that it surveyed.<sup>5</sup> The US Army Corps of Engineers similarly

<sup>2</sup>S. REP. NO. 246, 76th Cong., 1st Sess. 1, 2 (1939).

<sup>3</sup>*Id.*

<sup>4</sup>H.R. REP. NO. 845, 76th Cong., 1st Sess. 1, 2 (1939).

<sup>5</sup>The Office of the Judge Advocate General, Department of the Army, solicited comments from the following offices: the staff judge advocates, Forces Command, Training and Doctrine Command, US Army Japan, US Forces Korea/Eighth US Army, Southern Command and Western Command, the Community and Family Support Center (CFSC), the Judge Advocate, US Army Europe, the Army Judge Advocate General's School, and the General Counsel, Army and Air Force Exchange Service. See memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army, to Acquisition Law Advisory Panel, dated 1 May 1992.

advises.<sup>6</sup> HQ, US Army Materiel Command posits that this authority is not necessary, since comparable legal authority exists under the CICA.<sup>7</sup> The Air Force states that authority to buy experimental supplies is covered by 10 U.S.C. § 2358, and that authority to buy competitively or noncompetitively is currently provided by the CICA.<sup>8</sup> The Air Force states that it is unaware of any current use of this authority within that service.<sup>9</sup>

However, a survey of special operations offices indicates that this authority is utilized by them in connection with some highly classified special access programs.

#### **3.3.3.4. Recommendation and Justification**

##### **Retain and Consolidate**

Based on the continued utility of these sections for highly classified special access programs, the Panel recommends that they be retained and consolidated as set forth below.

#### **3.3.3.5. Relationship to Objectives**

Retention of these statutes will promote the best interests of DOD by affording procurement flexibility for special operations purposes.

#### **3.3.3.6. Proposed Statute**

##### **Procurement for experimental purposes**

The Secretary of ~~Defense and secretaries of the military departments the Army/Air Force~~ may buy ordnance, signal, and chemical warfare supplies, including parts and accessories, and designs thereof, that ~~he the secretary concerned~~ considers necessary for experimental or test purposes in the development of the best supplies that are needed for the national defense. Purchases under this section may be made inside or outside the United States, with or without competitive bidding, and by contract or otherwise. Chapter 137 of this title applies when such purchases are made in quantity.

### **3.3.4. 10 U.S.C. §§ 4505 and 9505**

#### **Procurement of production equipment**

##### **3.3.4.1. Summary of Laws**

These sections provide that the Secretaries of the Army and Air Force may make or procure gauges, dies, jigs, tools, fixtures, and other special aids, and specifications and drawings necessary for the immediate manufacture of arms, ammunition, or other special equipment needed in time of war. When in the national interest, the Secretaries may procure these items noncompetitively.

##### **3.3.4.2. Background of Laws**

These laws were originally enacted in 1916 by the Act for Making Further Provision for the National Defense.<sup>1</sup> No report language is available on this provision.

##### **3.3.4.3. Laws in Practice**

The Office of the Judge Advocate General, Department of the Army, advises that none of the offices it surveyed currently use this authority.<sup>2</sup> The Office of Counsel, US Army Corps of Engineers also advises that it does not use this authority.<sup>3</sup> The Office of Counsel, US Army Materiel Command states that legal authority for such purchases is currently available under the Competition in Contracting Act (CICA).<sup>4</sup> The Office of the Assistant Secretary (Acquisition), Department of the Air Force states it does not currently use this authority and believes it is superseded by 10 U.S.C. § 2304.<sup>5</sup>

##### **3.3.4.4. Recommendation and Justification**

#### **Repeal**

The Panel recommends repeal of these statutes as obsolete laws that are no longer used by the Department. In addition, authorization for the Army and Air Force Secretaries to purchase such items is already provided by general authorization provisions (10 U.S.C. § 3013(b)(3) and 10

U.S.C. § 8013(b)(3)) and by annual appropriation and authorization legislation. The emergency noncompetitive procurement procedure is also currently provided by the CICA.

#### **3.3.4.5 Relationship to Objectives**

Repeal of these statutes promotes the goal of streamlining the DOD acquisition process by deleting an obsolete provision.

**3.3.5. 10 U.S.C. §§ 4506 and 9506**

**Sale, loan or gift samples, drawings and information to contractors**

**10 U.S.C. §§ 4507 and 9507;**

**Sale of ordnance and ordnance stores to designers**

**10 U.S.C. § 4508**

**Tests of iron, steel and other materials**

**3.3.5.1. Summary of Laws**

- 10 U.S.C. §§ 4506/9506: These sections authorize the Secretaries of the Army and Air Force, respectively, to sell or give samples, drawings and manufacturing information to any service or supply contractor or person likely to manufacture Army or Air Force supplies under approved production plans;
- 10 U.S.C. §§ 4507/9507: These sections provide that the Secretaries of the Army and Air Force, respectively, may sell to designers who are U.S. nationals, ordnance and ordnance stores as necessary for design development.
- 10 U.S.C. § 4508: This section provides that the Secretary of the Army may authorize the use of the Army's machine for testing iron, steel and other industrial materials. A fee payment is required. Test results are to be furnished to the Army for evaluation.

**3.3.5.2. Background of Laws**

- 10 U.S.C. §§ 4506/9506: These sections were originally enacted in 1937 by the Act Authorizing the Secretary of War to Sell, Loan or Give Samples to Prospective Manufacturers.<sup>1</sup> The Senate Report indicated that the bill had been recommended by the War Department because samples that were provided to manufacturers to facilitate production were disassembled and thus lost their original identity and usefulness. The military departments lacked authority, however to drop such items from requisite property accountability of the departments. Hence, the War Department sought this authority.<sup>2</sup>

<sup>1</sup>Pub. L. No. 75-215, ch. 525, 50 Stat. 535 (1937).

<sup>2</sup>S. REP. NO. 310, 75th Cong., 1st Sess. 1-2, (1937).

- 10 U.S.C. §§ 4507/9507: These sections were originally enacted by the 1904 Army Appropriations Act.<sup>3</sup> The legislative history does not contain any relevant discussion of these provisions. The provisions were codified in 1956 with minor language changes.
- 10 U.S.C. § 4508: This statute was originally enacted in 1878 by the Act Making Appropriations for Sundry Civil Expenses for 1879.<sup>4</sup> No legislative history discussing this provision is available. A congressional report requirement was added in 1885 and deleted in 1928. The provision was codified in 1956. A technical amendment was made in 1965 transferring to the Secretary of the Army the Chief of Ordnance functions originally present in this section.

### 3.3.5.3. Laws in Practice

- 10 U.S.C. §§ 4506/9506: 10 U.S.C. § 4506 is implemented at Army Federal Acquisition Regulation Supplement (AFARS) 45.190. Under that regulation, heads of contracting activities are authorized sell, lend or give the delineated information to any likely Army supplier. It generally limits distribution of classified material and also directs the decision-maker to consider the value of the property to the government, handling and storage charges and the probable cost of procurement. AFARS 45.191 permits the loan of government equipment to private firms or educational institutions for use in R&D provided that the research is of interest to the government and that the results will be furnished to the government without cost.

The Department of the Air Force, Office of General Counsel, reports that 10 U.S.C. § 9506 is not currently relied upon by the Department.<sup>5</sup> The Department of the Army, Office of the Judge Advocate General, reports that this section is relied upon by that Department, and in particular by the US Army Strategic Defense Command (SDC).<sup>6</sup>

SDC states that the limitation that samples and drawings may be supplied only under "approved production plans", frequently hampers its ability to facilitate manufacture by providing samples and drawings to contractors or prospective contractors.<sup>7</sup> This problem arises because it is often necessary to provide samples or drawings initially in order to develop approved production plans. The SDC therefore recommends deletion of this language to permit potential contractors the opportunity of demonstrating greater responsiveness to government requirements. It also recommends that authority in this section be expanded to permit the military departments to provide similar items or information to educational or non-profit institutions.<sup>8</sup>

<sup>3</sup>Act of Apr. 23, 1904, ch. 1485, 33 Stat. 276 (1904).

<sup>4</sup>Act of Jun. 20, 1878, ch. 359, 20 Stat. 223 (1878).

<sup>5</sup>Memorandum from Mr. John P. Janeczek, Assistant General Counsel (Procurement), Department of the Air Force, to Mr. Donald Freedman, Acquisition Law Task Force, dated 27 Mar. 1992.

<sup>6</sup>Memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army, to Acquisition Law Advisory Panel, dated 1 May 1992.

<sup>7</sup>Datafax transmission from Col. Robert Hamilton, Legal Office, US Army Strategic Defense Command, to Ms. Theresa Squillacote, dated 20 Apr. 1992.

<sup>8</sup>*Id.*

SDC believes that this authority should be extended with the goals of promoting independent research and development in the private sector and of promoting technology transfer between the government and the private sector. SDC cites the following as an example of the type of situation in which it has made and would make greater use of this authority:

A contractor wanted to use some computer chips to study a generic problem through IR&D. Since the product is one for which the yield rate is low, we were able to declare some existing clips as scrap material. Had it been necessary to use 'spec' items, we would have had some difficulty under existing regulations because the transaction would not have involved an 'approved production plan' nor would we have been able to say that the items would not have been consumed in the process of their use.<sup>9</sup>

-- 10 U.S.C. §§ 4507/9507: 10 U.S.C. § 4507 has been implemented by the Army at 32 C.F.R. § 621.2. Those regulations provide in part that sales under this section are limited to quantities of an item which authorized purchasers can put to their own use.

The Department of the Air Force, Office of General Counsel, reports that 10 U.S.C. § 9507 is not currently relied upon by that Department.<sup>10</sup> The Department of the Army, Office of the Judge Advocate General, reports that it does rely upon this provision to support its ordnance contractors.<sup>11</sup> The US Army Corps of Engineers does not utilize this authority.<sup>12</sup> The Office of Counsel, US Army Materiel Command reports extensive use of this authority by its subordinate commands to support contractor independent research and development efforts.<sup>13</sup>

c) 10 U.S.C. § 4508: The Office of Judge Advocate General, Department of the Army, advises that this authority is currently utilized extensively by US Army, Europe (USAEUR) and by SDC as a vehicle for giving contractors access to government laboratories and for strengthening the nation's industrial base.<sup>14</sup> The Office of Chief Counsel, US Army Materiel Command (AMC) similarly states that its subordinate commands and installations make use of this authority.<sup>15</sup> AMC states that "providing test services benefits the private sector because no duplicate facilities exist which can provide the services. The Government is benefited because it can retain the test data generated. As private industry reimburses the costs of tests, the programs provide a no-cost source of valuable data. AMC has a continuing interest in use of this statute

<sup>15</sup>*Supra* note 13.

and strongly recommends that it be retained."<sup>16</sup> The Office of Chief Counsel, US Army Corps of Engineers reports no current usage.<sup>17</sup>

#### **3.3.5.4. Recommendation and Justification**

##### **Amend to clarify and consolidate statutes and to provide additional authority to sell**

The Panel recommends that these three authorities be consolidated into a single statute as set forth below.

All of these authorities, as they exist in the individual sections, are currently relied upon by the military services and thus continue to serve a relevant purpose. The Panel recommends consolidating these authorities into a single, "sales" statute, with authority vested in the Secretary of Defense and the secretaries of the military departments.<sup>18</sup>

With respect to 10 U.S.C. §§ 4506/9506 and §§ 4507/9507, the proposed amendments have the overall goal of promoting greater private sector independent research and development by permitting greater flexibility in the exchange of information or items between the government and private sectors. Thus, the authority to sell, lend or give technical information is amended to remove the current "approved production plan" limitation. The proposed statute also broadens the parties who may receive such items or information to any person or entity. It thus incorporates educational and nonprofit institutions and removes the "likely DOD supplier" limitation. The proposed statute also expressly sanctions the sale of equipment or materials for IR&D purposes when the item will be used exclusively for such purposes and has no other commercial value to the purchaser. The Panel would not add a limitation providing that the research results must be furnished to the government without restriction or cost, as such a provision would undercut the IR&D value of the authority.

The statute also specifically permits such sales for use in demonstrations to friendly foreign governments. Currently, there is no authority permitting, for example, the sales of ordnance to U.S. firms for demonstration of equipment by them to foreign governments.

With respect to 10 U.S.C. § 4508, the use of test facilities is treated as the sale of test facilities' services and therefore appropriately consolidated into such a statute. The Panel leaves the issue of what constitutes appropriate fees for regulatory implementation.

Finally, the Panel notes that the proposed amendments to these statutes must also be accompanied by an amendment to 10 U.S.C. § 2314. That statute exempts procurement by the DOD military departments, NASA, and the Coast Guard from the provisions of the advertising

---

<sup>16</sup>Memorandum from Mr. Robert Macfarlane, Deputy Command Counsel, US Army Materiel Command, to Advisory Panel, dated 22 May 1992.

<sup>17</sup>*Supra* note 12.

<sup>18</sup>The Congress may wish to consider whether the limited sales authority at 10 U.S.C. § 2208(i) should be consolidated as well.

requirements of Revised Statute 3709 (codified at 41 U.S.C. § 5). However, sales by these agencies are not exempted from that statute. And 41 U.S.C. § 5 provides that, with limited exceptions, "sales and contracts of sale by the Government shall be governed by the requirements of this section for advertising." The Panel would therefore amend the blanket exemption of 10 U.S.C. § 2314 to state that the "procurement or sale of" property or services by DOD are exempt from the Revised Statute advertising requirements.

### **3.3.5.5. Relationship to Objectives**

This proposed consolidated statute serves the best interests of the Department by facilitating the goal of greater technology transfer between the government and private sectors. It also streamlines the acquisition process by eliminating duplicative authorities.

### **3.3.5.6. Proposed Statute**

1. The text of the Proposed Consolidated Sales Statute is as follows:

(a) The Secretary of Defense and secretaries of the military departments, under regulations to be prescribed by the Secretary of Defense and when determined to be in the interest of national defense, may,

(1) sell, lend or give samples, drawings and manufacturing or other information (subject to the rights of third parties) to any person or entity;

(2) sell or lend government equipment or materials to any person or entity:

(A) for use in independent research and development programs, provided that the equipment or material will be used exclusively for such research and development; or

(B) for use in demonstrations to a friendly foreign government.

(3) make available to any person or entity, for appropriate fees, the services of any government laboratory, center, range or other testing facility for the testing of materials, equipment, models, computer software and other items.

(A) fees for such services shall be established by regulations issued pursuant to subsection (a). Such fees may not be less than the direct costs such as utilities, contractor support, and salaries of personnel incurred by the U.S. to provide such testing.

(B) the results of tests performed are confidential and may not be divulged outside the government without the consent of the persons for whom they are performed.

(b) Funds received from sales authorized at subsection (A) may be credited to the appropriations or funds of the selling activity.

## **Current Statutes**

The text of the current laws is as follows:

10 U.S.C. §§ 4506 and 9506:

The Secretary of the Army [Air Force], under regulations to be prescribed by him, may sell, lend or give such samples, drawings, and manufacturing or other information as he considers best for the national defense-

- (1) to any contractor for Army [Air Force] supplies under approved production plans; and
- (2) to any person likely to manufacture or supply Army [Air Force] supplies under such plans.

10 U.S.C. §§ 4507 and 9507:

The Secretary of the Army [Air Force] may sell to designers who are nationals of the United States serviceable ordnance and ordnance stores necessary in the development of designs for the armed forces.

10 U.S.C. § 4503:

(a) The Secretary of the Army may authorize the use of the Army's machine for testing iron, steel, and other materials for industrial purposes, by any person upon payment of a suitable fee. The officer in charge of the test--

- (1) shall require payment of fees for the tests authorized by this section in accordance with a table of fees approved by the Secretary;
- (2) may require payment in advance;
- (3) may spend the fees to received in making such tests; and
- (4) shall fully report the tests and the expenditure of the fees to the Secretary.

The table of fees shall be adjusted from time to time so as to defray the cost of the tests as fully as possible.

(b) The Secretary shall consider any program of tests submitted by the American Society of Civil Engineers, and a record of the tests shall be furnished the Society for publication at its expense.

2. 10 U.S.C. § 2314

Sections 3709 and 3735 of the Revised Statutes (41 U.S.C. 5 and 13) do not apply to the procurement or sale of property or services by the agencies named in section 2303 of this title.

### **3.3.6. 10 U.S.C. §§ 4531 and 9531**

#### **Authorization**

##### **3.3.6.1. Summary of Laws**

These sections authorize the Secretaries of the Army and Air Force to purchase materials and facilities in support of the military departments, including five listed types of equipment, but excluding prototype commercial aircraft. The five types of equipment are guided missiles, standard equipment, equipment to replace obsolete or unserviceable equipment, necessary spare equipment and supply reserves as needed.

##### **3.3.6.2. Background of Laws**

These laws were originally enacted by the 1949 Army and Air Force Authorization Act.<sup>1</sup> The Senate Report indicated that the provisions were intended to provide the respective Secretaries with broad authority to procure all necessary materials and facilities for the maintenance and support of those departments.<sup>2</sup> The limitation on prototype commercial aircraft was inserted in the Senate version of the bill because of a concern that the authorization language could be interpreted to permit the development of such aircraft.<sup>3</sup>

##### **3.3.6.3. Laws in Practice**

The Air Force General Counsel's Office, the Army Judge Advocate General's Office, the Army Corps of Engineers, and the Army Materiel Command all report that these provisions are not currently relied upon by their departments as contracting authority.<sup>4</sup>

##### **3.3.6.4. Recommendation and Justification**

#### **Repeal**

These sections should be repealed as obsolete laws. They are no longer relied upon by the affected departments and serve no useful purpose. In addition, authorization for the Army and Air Force Secretaries to purchase such items is already provided by general authorization

---

<sup>1</sup>Pub. L. No. 81-604, § 112, 64 Stat. 322 (1950).

Janeczek, Assistant General Counsel (Procurement), Department of the Air Force, to Mr. Donald Freedman, Acquisition Law Task Force, dated 27 Mar. 1992; Memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army to Acquisition Law Advisory Panel, dated 25 Feb. 1992; Memorandum from Mr. Lester Edelman, Chief Counsel, US Army Corps of Engineers, to Deputy General Counsel (Acquisition), Department of the Army, dated 18 March 1992; Memorandum from Mr. Robert Macfarlane, Deputy Command Counsel, Army Materiel Command, to Advisory Panel, dated 24 Apr. 1992.

provisions [10 U.S.C. § 3013(b)(3) and 10 U.S.C. § 8013(b)(3)] as well as by annual appropriation and authorization legislation.

### **3.3.6.5 Relationship to Objectives**

Repeal of these statutes promotes the objective of streamlining the DOD acquisition process by removing obsolete provisions.

### **3.3.7. 10 U.S.C. § 4533**

#### **Army rations**

##### **3.3.7.1. Summary of Law**

This section provides that any branch, office, or designee of the Secretary of the Army shall buy components of Army rations.

##### **3.3.7.2. Background of Law**

This section was first enacted in 1818 by the "Act Regulating the Staff of the Army."<sup>1</sup> The Army Organization Act of 1950 expressly retained this authority and vested it in the Secretary of the Army.<sup>2</sup> The legislative histories to these Acts do not discuss this specific provision.

##### **3.3.7.3. Law in Practice**

The Office of the Judge Advocate General, Department of the Army, the Office of Counsel, US Army Materiel Command, and the Office of Counsel, US Army Corps of Engineers report that this provision is not currently relied upon by the Army as authority for its ration procurement.<sup>3</sup>

##### **3.3.7.4. Recommendation and Justification**

###### **Repeal**

This section should be repealed in its entirety as obsolete law. The law no longer serves any relevant purpose and the same purchasing authority is provided by other legislation, including annual appropriation and authorization acts.

##### **3.3.7.5. Relationship to Objectives**

Repeal of this statute promotes the goal of streamlining the DOD acquisition process by removing an obsolete provision.

---

<sup>1</sup>Revised Statutes § 1141, Apr. 14, 1818.

<sup>3</sup>Memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army, to Acquisition Law Advisory Panel, dated 25 Feb. 1992; Memorandum from Mr. Robert Macfarlane, Deputy Command Counsel, Army Materiel Command, to Advisory Panel, dated 2 Apr. 1992; Memorandum from Mr. Lester Edelman, Chief Counsel, US Army Corps of Engineers, to Deputy General Counsel (Acquisition), Department of the Army, dated 18 Mar. 1992.

### **3.3.8. 10 U.S.C. §§ 4535 and 9535**

#### **Exceptional subsistence supplies: purchase without advertising**

##### **3.3.8.1. Summary of Laws**

These sections provide that exceptional articles of supplies for members of the Army and Air Force that will be accepted regardless of condition may be purchased without advertising.

##### **3.3.8.2. Background of Laws**

These sections were originally enacted by the Army Appropriation Act of 1895.<sup>1</sup> The sections were based on a letter from the Secretary of War to the Congress requesting this amending language.<sup>2</sup> "Exceptional" articles of supply were those that were furnished upon written guarantee of acceptance regardless of condition. These types of supplies were often needed on short notice. Therefore, the Secretary desired authority to procure such items without regard to advertising requirements.

The great bulk of these exceptional articles consists of special brands, fine varieties, or special trade packages, on which no reduction in price can be expected for the small quantities desired from time to time. No competition, therefore, is practicable.<sup>3</sup>

The provisions were codified in 1956 with minor language changes and technical corrections.<sup>4</sup>

##### **3.3.8.3 Laws in Practice**

The Department of the Air Force, Office of General Counsel, states that this provision of law is not relied upon by the Air Force.<sup>5</sup> The Department of the Army, Office of Judge Advocate General, reports that this provision of law appears inconsistent with the Competition in Contracting Act (CICA) and, in any event, is not required by the Department because the CICA permits waiver of publication requirements for procurements of subsistence supplies under exigent

<sup>4</sup>Pub. L. No. 84-1028, ch. 1041, 70A Stat. 254 (1956). The authority was then devolved to the Secretaries of the Army and Air Force, respectively.

<sup>5</sup>Memorandum from Mr. John Janeczek, Assistant General Counsel (Procurement), Department of the Air Force, to Mr. Donald Freedman, Acquisition Law Task Force, dated 27 Mar. 1992.

circumstances.<sup>6</sup> The Offices of Counsel, US Army Corps of Engineers and US Army Materiel Command, also report that those offices do not currently rely upon this provision.<sup>7</sup>

#### **3.3.8.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of these sections. The same purchasing authority is already provided by general authorization provisions (10 U.S.C. § 3013(b)(3) and 10 U.S.C. § 9013(b)(3)) and by annual appropriation and authorization legislation. The unusual and compelling urgency exception to the competition requirement set forth at 10 U.S.C. § 2304(c)(2) provides the emergency advertising exception apparently intended by these sections.

#### **3.3.8.5. Relationship to Objectives**

Repeal of these statutes promotes the goal of streamlining the DOD acquisition process by deleting an obsolete provision.

---

<sup>6</sup>Memorandum from Col. Maurice J. O'Brien, Chief, Contract Law Division, Office of the Judge Advocate General, Department of the Army, to Acquisition Law Advisory Panel, dated 25 Feb. 1992.

<sup>7</sup>Memorandum from Mr. Lester Edelman, Chief Counsel, US Army Corps of Engineers, to Deputy General Counsel (Acquisition), Department of the Army, dated 18 Mar. 1992; Memorandum from Mr. Robert Macfarlane, Deputy Command Counsel, US Army Materiel Command, to Advisory Panel, dated 2 Apr. 1992.

### **3.3.9. 10 U.S.C. §§ 4537 and 9537**

#### **Military surveys and maps: assistance of U.S. mapping agencies**

##### **3.3.9.1. Summary of Laws**

These sections provide that the Secretaries of the Army and Air Force may obtain the assistance of the listed U.S. mapping agencies for various mapping services.

##### **3.3.9.2. Background of Laws**

These sections were originally enacted by the 1928 Act Authorizing Mapping Agencies of the Government to Assist in Preparing Military Maps.<sup>1</sup> The House Report noted that the authority to secure assistance of U.S. mapping agencies had been carried in annual War Department appropriations for many years, and that it was now being enacted into permanent law.<sup>2</sup>

##### **3.3.9.3. Laws in Practice**

The Department of the Air Force, Office of General Counsel, reports that this provision is not relied upon by the Air Force to obtain mapping services.<sup>3</sup> The US Army Corps of Engineers, Office of Counsel, and HQ Army Materiel Command Chief Counsel state that, since the establishment of the Defense Mapping Agency (DMA) in 1982, the individual services obtain mapping support from DMA pursuant to 10 U.S.C. §§ 2791-2795.<sup>4</sup> DMA apparently utilizes Economy Act procedures set forth at 31 U.S.C. § 1535 both to provide interagency mapping services and to obtain such services from the agencies listed in these sections.<sup>5</sup>

##### **3.3.9.4. Recommendation and Justification**

#### **Repeal**

These sections should be repealed in their entirety. While the purpose of these sections remains valid, the military departments are able to obtain the same services through other statutory authority.

<sup>1</sup>Pub. L. No. 70-379, ch. 544, 45 Stat. 509 (1928).

Repeal of these statutes promotes the goal of streamlining the DOD acquisition process by removing an obsolete provision.

### **3.3.11. 10 U.S.C. § 4540; 10 U.S.C. § 9540; and 10 U.S.C. § 7212**

#### **Architectural and engineering services**

#### **10 U.S.C. § 2855**

#### **Law applicable to contracts for architectural and engineering services and construction design**

##### **3.3.11.1. Summary of Laws**

Sections 4540 and 9540 provide that the Secretaries of the Army and Air Force, respectively, may employ, by contract or otherwise, the architectural and engineering (A-E) services of any person outside the Department for producing and delivering designs, plans, drawings, and specifications needed for any defense public works or utilities project. The Secretaries may make these contracts when in-house services are inadequate and when otherwise advantageous to the national defense. These statutes limit the fee for such services to 6% of the estimated construction cost, while also stipulating that certain enumerated civil service requirements do not apply to the employment of architectural and engineering services.

Section 7212 provides the same authority for the Secretary of the Navy, but also expressly permits these contracts to be entered into without advertising.

##### **3.3.11.2. Background of Laws**

The oldest of these authorities, section 7212, was originally enacted by Pub. L. No. 76-43, as approved April 25, 1939. The legislation was based on congressional studies conducted prior to W.W.II that recommended increased expenditures for improvements to existing military bases and construction of new ones. In addition to providing authority for private sector contracting to expedite the preparation of plans and specification for shipbuilding and engineering services, the statute also eliminated formal advertising for A-E services. As the Committee Report to this naval authorization act stated:

It is desired to eliminate advertising for engineering and architectural services, as is required by section 3709 of the Revised Statutes, for two reasons: (1) because such advertising would delay the initiation of the work and, (2) because responding to advertising for professional services of this character is considered to be unethical. Furthermore, it is as illogical to advertise for the services of a shipbuilding or other engineering specialist as it would be to advertise for the services of a medical specialist. Standard fees have been established by reputable professional societies for various kinds of engineering works, so that the question of the magnitude

of the fee does not enter into the selection of an engineering or architectural firm. The question in each case should be decided upon the special qualifications of the firms under consideration.<sup>1</sup>

The House and Senate Reports on this bill did not otherwise expressly refer to the establishment of the 6% fee limitation.

Sections 4540 and 9540 were enacted shortly thereafter by Pub. L. No. 76-309, approved August 7, 1939, that granted comparable authority to the Secretary of War. The original language of this legislation included the same exemption from advertising requirements for such contracts as had the naval authorization.<sup>2</sup>

The reports to this War Department legislation also do not contain express reference to the imposition of the 6% fee limitation. However, in the hearings before the Senate Committee on Military Affairs on the bill,<sup>3</sup> Colonel Hartman, on behalf of the War Department, made the following statement:

It will be noted that in the bill the maximum fee is set at 6 percent of the estimated cost of the project. This would be an absolute maximum and is not intended to set a standard. The fees paid for architectural and engineering services on works similar to those contemplated by the War Department vary from 4 to 6 percent. There is no danger that the War Department will pay exorbitant fees for this work as definite standards have been established by the American Institute of Architects, the American Society of Civil Engineers, and other reputable professional societies.<sup>4</sup>

In wartime decisions interpreting these statutes, the Comptroller General concluded that the 6% fee limit applied solely to those costs associated with producing and delivering designs, plans, drawings, and specifications, and did not apply to contract costs arising from other types of architect-engineering services, such as technical supervision.<sup>5</sup>

In 1947, the Armed Services Procurement Act (ASPA) set limitations on fees to be paid for various types of contracts. That Act maintained the same 6% fee limitation on cost-plus-fixed-fee contracts for architectural or engineering services for a public work or utility. This provision is currently codified at 10 U.S.C. § 2306(d).<sup>6</sup> In 1949, the Federal Property and

---

<sup>1</sup>S. REP. NO. 263, 76th Cong., 1st Sess. 61-66 (1939).

<sup>2</sup>Although this exemption from advertising was not included when the law was codified, the Comptroller General has held that this omission was inadvertent and that the Army and Air Force authority do contain implicit authority to exempt such contracts from advertising requirements. See Comp. Gen. B-152306, Unpublished Opinion dated Dec. 12, 1966, p. 13.

<sup>3</sup>See S. REP. NO. 2562, 76th Cong., 1st Sess. 13 (1939).

<sup>4</sup>*Id.*

<sup>5</sup>21 Comp. Gen. 580 (Dec. 18, 1941); 22 Comp. Gen. 464 (Nov. 14, 1942).

<sup>6</sup>The Armed Services Procurement Act was codified into Title 10 by Pub. L. No. 84-1028, 70A Stat. 1-685 (1956).

Administrative Services Act (FPASA) applied the same limitation to cost-plus-fixed-fee architect-engineering contracts for civilian agencies. That provision is codified at 41 U.S.C. § 254(b).

During the decades following the war, most Federal agencies interpreted the term "architectural or engineering services," as used in the ASPA and FPASA, as having comparable application as the limitation contained in the three earlier service-specific statutes. Therefore, the 6% fee limitation was deemed not applicable to the costs of any architect-engineering services other than those associated with the production of designs, plans, drawings, and specifications.<sup>7</sup> Most Federal agencies also utilized a qualifications-based selection process in contracting for architect-engineering services in which technical ability, rather than price, was the predominant source selection factor.<sup>8</sup>

In 1967, in response to issues arising from proposals to exempt certain Federal agencies from the 6% fee limitation, the GAO conducted a comprehensive review of these five statutes and of the Federal procurement of architect-engineering services.<sup>9</sup> In that report, the GAO made the following findings:

(1) that the 6% fee limitation in the ASPA and FPASA applied to costs associated with all architect-engineering services and not just those delineated in the Title 10 service-specific statutes;<sup>10</sup>

(2) that architect-engineering contracts were subject to the cost and pricing data requirements of Pub. L. No. 87-653 (the Truth in Negotiations Act);

(3) that the technical ability source selection procedures utilized by many Federal agencies in the procurement of architect-engineering services did not comport with the competitive negotiations requirements of Pub. L. No. 87-653; and,

(4) that the 6% fee limitation was impractical, unsound, and should be repealed.

Representative Jack Brooks, Chairman of the House Government Operations Committee, responded to the GAO study by letter dated November 16, 1967. In that letter, Chairman Brooks set forth the Committee's position with respect to the GAO report. Specifically, the Committee disagreed with the GAO position that the ASPA and FPASA 6% fee limitation applied to all architectural and engineering services. Rather, the Committee maintained that the limitation set forth in those statutes was a simplification and incorporation of the more detailed language in the earlier, service-specific statutes.

---

<sup>7</sup>Armed Services Procurement Regulation (ASPR)(superseded by FAR, 48 C.F.R. § 18.306.2(b)).

<sup>8</sup>ASPR,(superseded by FAR 48 C.F.R. §§ 18-402.2 and 18-306.2(a)(1)).

<sup>9</sup>"Government-wide Review of the Administration of Certain Statutory and Regulatory Requirements Relating to Architect-Engineer Fees," Report to the Congress dated Apr. 20, 1967.

<sup>10</sup>This finding reaffirmed an earlier Comptroller General decision reported at B-152306 (Dec. 12, 1966). That decision also held that, despite their facial limitation to cost-plus-a-fixed-fee contracts, these ASPA and FPASA statutes applied to all types of contracts.

The Committee also disagreed with the GAO's conclusion that a technical ability based source selection procedure was not compatible with extant competitive negotiation requirements. With respect to the GAO's recommendation for clarifying legislative action, including repeal of the 6% fee limitation, the Committee stated:

This leads us to the final question of what legislative action, if any, is necessary based upon the findings in this report. As far as the repeal of the statutory limitation is concerned, we have serious doubts as to the advisability of this course of action -- at least at this time. Nor are we of the opinion that they are either useless or unworkable. The A-E services as described in the 1939 Navy statute...are the predominant services provided the Government by members of this profession . . . . [I]f these limitations on A-E fees are to be repealed, arguments of equal persuasion might be levied against other fee limitation provisions in our procurement statutes .

Also, if we were to repeal the limitations on A-E contracts, no practical and acceptable substitute is available for the overall protection of the public against ill-advised action on the part of executive officials. The extension of 'competitive negotiation' . . . to this type contract would not only be an unacceptable substitute, but could seriously compromise the quality of A-E services the Government receives.<sup>11</sup>

Thereafter, in 1972, Congress enacted the Brooks Architect-Engineering Act,<sup>12</sup> currently codified at 40 U.S.C. § 541-544. That legislation amended the FPASA by adding provision for the selection of federal architect-engineering services under a specified, qualifications-based source selection procedure. The stated purpose of the legislation was "to cast in statutory form the traditional system Government agencies have used for more than 30 years in the procurement of architect-engineer services."<sup>13</sup> The Senate Report noted the 1967 GAO recommendations, especially repeal of the 6% fee limitations. With respect to that recommendation, the Senate Report stated:

The bill does not affect existing statutes that limit architect-engineer fees to 6 percent of the estimated construction cost. The 6 percent limitation, when applied to the preparation of designs, plans, drawings, and specifications as Congress intended, is a valuable safeguard to the public. While the limitation may pose some difficulty in negotiating fair compensation for small projects,

---

<sup>11</sup>Letter to the Honorable Elmer B. Staats, from the House of Representatives Committee on Government Operations, dated Nov. 16, 1967.

<sup>12</sup>Pub. L. No. 92-585, 86 Stat. 1278 (1972).

<sup>13</sup>S. REP. NO. 1219, 92d Cong., 2d Sess. 6 (1972). The Report expressly stated that the procedures set forth therein were applicable to both military and civilian federal agencies. *Id.* at 8-9.

renovation work and projects requiring exceptional design effort, the 6 percent fee limitation is deemed to be an equitable ceiling.

\*\*\*\*\*

[T]he committee feels that the Government's interest . . . is best served by placing the emphasis on obtaining the highest qualified architectural and engineering services available. The bill makes ample provision for keeping costs under control by requiring negotiation for a fee that is fair and reasonable to the Government under the circumstances and by retaining the statutory 6 percent limitation on architect-engineer fees.<sup>14</sup>

In 1980, the Comptroller General ruled that, because the Brooks Act amended the FPASA and not the ASPA, DOD was not authorized to use Brooks Act procedures.<sup>15</sup> However, such procedures were deemed applicable to DOD military construction A-E procurement because statutory authorization for application of "established procedures" in A-E procurement was contained in yearly military construction authorization acts. Thereafter, the Comptroller General reversed its decision and ruled that Brooks Act procedures were applicable to all A-E procurement by DOD.<sup>16</sup>

In 1982, Congress permanently enacted for DOD a requirement to follow Brooks Act procedures in military construction-related procurements. That provision, codified at 10 U.S.C. § 2855, states:

Contracts for architectural and engineering services and construction design in connection with a military construction project or a military family housing project shall be awarded in accordance with Title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. § 541 et seq.)

In 1988, the FPASA was amended to state that the definition of architectural and engineering services for Brooks Act purposes included: research, planning, development, design, construction, alteration, or repair of real property, and other services justifiably performed, including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals, and other related services.<sup>17</sup>

---

<sup>14</sup>*Id.* at 3-4.

<sup>15</sup> Association of Soil and Foundation Engineers, B-199548, Sep. 15, 1980, 80-2 CPD 196.

<sup>16</sup> Association of Soil and Foundation Engineers, B-199548.2, Aug. 13, 1982, 82-2 CPD 128.

<sup>17</sup> Pub. L. No. 100-679, § 8, 102 Stat. 4069 (1988).

No change to the 6% fee limitation was made by that legislation. However, a bill that would amend the FPASA to raise the 6% architect-engineering fee limit applicable to civilian agencies to 8% was recently introduced in the Congress.<sup>18</sup>

### 3.3.11.3. Laws in Practice

The scope of architect-engineering services to which Brooks Act procedures apply is set forth at FAR section 36.102.<sup>19</sup> The DFARS, at section 236.606-70, implements the 6% fee limit and expressly states:

[T]he six percent limit applies only to that portion of the contract (or modification) price attributable to the preparation of designs, plans, drawings, and specifications. If a contract or modification also includes other services, the part of the price attributable to the other services is not subject to the six percent limit.<sup>20</sup>

The Army Corps of Engineers FAR Supplement (EFARS) identifies the following costs as not subject to the 6% fee limitation: initial site visits, field and topographic surveys; feasibility studies, economic studies and other investigations; consultant services not related to the production and delivery of working drawings or specifications; preparation of environmental impact assessments and statements; and construction supervision.<sup>21</sup> The Air Force fee limit is implemented by Air Force Regulation 88-31. That regulation applies the 6% limit to costs for visual inspections of the site or facilities, familiarization with the scope and conditions of construction, and coordination with the using organization's needs. It does not apply the limit to technical field investigations such as topographical surveys, soil analyses, subsurface exploration, or similar fact finding surveys.

Many other Federal agencies, such as the Departments of Energy, Transportation, Veterans Administration, and NASA maintain their own definitions of the scope of services to which the 6% fee limit does or does not apply.

With regard to the practical effects of these statutes, comments were solicited from the military departments as well as from private, architect-engineering associations.

---

<sup>18</sup>S. 1095, the Excellence in Public Architecture Act, passed the Senate on Jan. 24, 1992. However, it was not reported out of Committee in the House.

<sup>19</sup>That section was recently rewritten to state, in relevant part, that covered architect-engineer services include:

(2) professional services of an architectural or engineering nature performed by contract that are associated with research, planning, development, design, construction, alteration, or repair of real property; and

(3) Such other professional services of an architectural or engineering nature, or incidental services, which members of the architectural and engineering professions...may logically or justifiably perform, including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, value engineering, construction phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals, and other related services. Amendment to FAR 36.102, 56 Federal Register 122 (June 15, 1991).

<sup>20</sup>DFARS, 48 C.F.R. 236.606-70(c).

<sup>21</sup>EFARS, § 36.605(101).

The Air Force, through the Operational Contracting Division of the Deputy Assistant Secretary (Contracting) for the Assistant Secretary of the Air Force (Acquisition), noted the regulatory implementation of section 9540 and stated "this law has application to the current acquisition process."<sup>22</sup> The U.S. Army Corps of Engineers, Office of Chief Counsel, recommends that the 6% fee limitation be deleted, stating:

A fee limitation is inherently contrary to the objective of negotiating a fair and reasonable fee. For small projects requiring a variety of A-E disciplines such as building renovations, . . . 6% is inadequate to prepare thorough plans and specifications. For large projects, a fee limitation can work against the government negotiator. A-Es often expect the maximum 6%, although the Government estimate of a fair and reasonable price may be considerably less. The 6% limit is outdated; the cost of design has increased relative to the cost of construction.<sup>23</sup>

That Office also notes that the regulatory implementation of this authority substantially diminishes the fee-limiting effect because it provides so many exemptions from the limit.<sup>24</sup> Finally, that Office also recommends that, if these three statutes are repealed in their entirety, an amendment should be made to 10 U.S.C. § 2855 that permanently authorizes A-E procurement. That section currently requires the use of Brooks Act procedures in military construction procurements. The Army Corps of Engineers is concerned that, absent these statutes, no authority would exist authorizing the procurement of A-E services for non-military construction related projects.<sup>25</sup>

The Naval Facilities Engineering Command (NAVFAC) recommends repeal of 10 U.S.C. § 7212 as it has been supplanted by the Brooks Act. NAVFAC cites for example:

The provision in 10 U.S.C. § 7212 stating that the secretary may contract ". . . without advertising . . .," probably alluded to the pre-CICA name for the sealed bid procedures that was called "formal advertising." This portion of the statute has also become unnecessary since the passage of the Brooks Act which codifies the "slate and selection" process used by the military services since the passage of the Public Works Act of 1939.<sup>26</sup>

NAVFAC notes further:

---

<sup>22</sup>Letter from Mr. Ira L. Kemp, Associate Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition), to Ms. Theresa Squillacote, DOD Advisory Panel, dated 20 Nov. 1992.

<sup>23</sup>Letter from Mr. Lester Edelman, Chief Counsel, DOD Advisory Panel, U.S. Army Corps of Engineers, to Deputy General Counsel (Acquisition), Department of the Army, dated 18 Mar. 1992.

<sup>24</sup>*Id.*

<sup>25</sup>Datafax transmission from U.S. Army Corps of Engineers Acquisition Law Task Force dated 19 Aug. 1992.

<sup>26</sup>Memorandum from Mr. Harvey Wilcox, Deputy General Counsel (Logistics), Department of the Navy, Office of the General Counsel, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

The 6% limitation in subsection (b) is not imposed on non-military federal agencies, except in the case of a cost reimbursable contract for A-E services, See, 10 U.S.C. § 2306 and 41 U.S.C. § 254.<sup>27</sup>

Comments were also solicited from the American Consulting Engineers Council, the National Society of Professional Engineers, the American Institute of Architects and the Committee on Federal Procurement of Architect-Engineer Services (COFPAES). Several of these organizations solicited inputs from their memberships, with the result that comments were received from over 150 private, architect-engineer firms nationwide.<sup>28</sup>

They overwhelmingly recommended repeal of the 6% fee limit in these statutes, and also provided a wealth of anecdotal and other data to support that position. Their comments raised the following issues:

**(1) Administrative Burden**

(a) the 6% fee limit is applied differently by each Federal agency and even by different sections of the same agency;

(b) requires extensive documentation of those A-E services covered by the fee limit and those that are not; and

(c) adds to contract negotiation time.

**(2) Reduces Quality of Federal A-E Services**

(a) allows no variation for project complexity or size, which is particularly relevant for those projects for which a high level of technological skill is required;

(b) clearly penalizes the smaller project, for which overhead is proportionately greater;

(c) encourages A-Es to shortcut design time, leading to greater pursuit of claims against A-Es for alleged A-E errors;

(d) encourages A-Es to utilize less skilled, less expensive staff on Federal contracts; and

(e) A-Es will use standard designs, thereby not always considering a variety of project design alternatives.

**(3) Raises Cost of A-E Services**

---

<sup>27</sup>*Id.*

<sup>28</sup>Those comments are too numerous to be cited individually herein. They are compiled and on file with the Defense Systems Management College.

- (a) poorer quality design leads to greater need for repair and renovation;
- (b) reduces pool of A-E firms willing to contract with the Government;
- (c) less effort is expended to fully investigate existing conditions; changed conditions are therefore commonplace;
- (d) contract schedules are often extended to accommodate supplemental design efforts midterm; and
- (e) limits competitors for Federal A-E business; increases use of in-house staff.

#### **3.3.11.4. Recommendations and Justification**

##### **I**

#### **Repeal sections 4540, 9540 and 7212 as obsolete laws**

The Panel recommends these three sections be repealed as obsolete.

Professional architect-engineering services are a unique product in which the professionalism and technical quality of the services being rendered are extremely important. The legislative history of these statutes, as well as that of the Brooks Act, clearly indicates that Congress understood this fact. In 1972, Congress expressly sanctioned a specific A-E contracting process in which source selection could be based on qualification criteria as opposed to price.

Congress recognized the same fact in 1939 when it enacted the naval authority at 10 U.S.C. § 7212. Indeed, it was this fact upon which Congress relied when it provided for an advertising exemption for such contracts, adopting the initial 6% fee limit not only as a maximum cap but also to emulate the standard fee then applied by professional societies. Thus, Congress stated in the report to that legislation that "[s]tandard fees have been established by reputable professional societies for various kinds of engineering works, so that the question of the magnitude of the fee does not enter into the selection of an engineering or architectural firm. The question in each case should be decided upon the special qualifications of the firms under consideration."<sup>29</sup>

When Congress enacted the Brooks Architect-Engineering Act in 1972, it unequivocally endorsed the qualifications-based source selection procedures then being used by most Federal agencies in A-E procurements. Congress retained the 6% fee limit as "cost safeguard," while at the same time acknowledging such a limit hindered negotiation of fair compensation for small projects, renovation work, and projects requiring exceptional design effort. This legislative background, and the interplay between the GAO and Congress that culminated in the enactment

---

<sup>29</sup>*Supra* note 1.

of the Brooks Act, suggests Congress retained the fee limit in 1972 to moderate arguments that its adoption of the qualification-based selection procedure would lead to unrestrained costs.

However, retention of the fee limit no longer serves that purpose. The qualification-based selection procedure has not resulted in exorbitant A-E fees. In fact, the profit rate for the private sector on such defense contracts averages significantly below that available on other commercial contracts.<sup>30</sup> Since 1967 when the GAO conducted its initial survey, Government officials have consistently maintained that the negotiation process in qualifications-based selection is sufficient to ensure a fair and reasonable price is established. In essence, since its formal adoption in 1972, qualifications-based selection has been validated, allaying the cost concerns that were present when it was first enacted.

In addition, in the era of modern Federal A-E procurement, the fee limit demonstrably adds cost and diminishes quality. Private A-E entities have expressly stated that, on Federal projects, design is often short-circuited, leading to more substantial contract modifications, protests, repairs, and maintenance costs. Many of those flaws are attributed to the greater reliance placed on standard plans and designs used by A-E firms willing to accept fee limitations. The pool of A-E entities willing to do business with the Government is also clearly restricted by the fee limitation, a barrier to competition which indirectly raises the negotiated price.

Finally, the administrative burden to both the Government and private sector is significant. Individual agencies have enacted their own standards delineating those costs that are subject to the fee limit and those that are not. Great effort is typically expended by the contracting parties attempting to apply those standards. This effort is particularly difficult given the extremely broad ranges of technical services now routinely required in modern A-E procurements. This entire regulatory web will be eliminated by repeal of these statutes.

## II

### **Amend 10 U.S.C. § 2306(d) and 41 U.S.C. § 254(b) to delete 6% fee limit**

The Panel recommends that the above statutes be amended to delete the 6% fee limitation as well. While 41 U.S.C. § 254(b) applies to civilian agencies and is not within the purview of this Panel, the Panel recommends that Congress consider deleting it as well.<sup>31</sup>

---

<sup>30</sup>"Federal Compensation for A/E Services," A Report by the Committee on Federal Procurement of A/E Services, Feb. 1992, pp. 32-33.

<sup>31</sup>See ch. 1.2.3. for an analysis of § 2356 and implementation of this recommendation.

### III

#### **Amend 10 U.S.C. § 2855 to Permanently Authorize A-E Procurement**

The Panel recommends that 10 U.S.C. § 2855 be amended to clarify that authority in that section to purchase A-E services extends to the U.S. Army Corps of Engineers' Civil Works program as well as to all military construction.

##### **3.3.11.5. Relationship to Objectives**

Repeal of these service-specific, A-E statutes would promote the goal of streamlining the DOD acquisition process by removing obsolete laws that affirmatively hinder effective procurement of A-E services.

##### **3.3.11.6. Proposed Statute**

#### **10 U.S.C. § 2855 Law applicable to contracts for architectural and engineering services and construction design**

(a) The Secretary of Defense and the Secretaries of the military departments may contract for architectural and engineering services in connection with a military construction or family housing project or for other Department of Defense purposes.

(b) Contracts for such architectural and engineering services shall be awarded in accordance with Title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. § 541 et seq.), without regard to sections 305, 3324 and 7204, chapter 51 and subchapters III, IV and VI of chapter 53 of title 5.

### **3.3.12. 10 U.S.C. §§ 4541 and 9541**

#### **Gratuitous services of officers of the Army/Air Force Reserve**

##### **3.3.12.1. Summary of Laws**

These sections permit the Secretaries of the Army and Air Force to accept the gratuitous services of Reserve officers in enrolling, organizing, and training members of the Reserves or the Reserve Officers' Training Corps (ROTC), or in consulting on matters related to the armed forces.

##### **3.3.12.2. Background of Laws**

These sections were originally enacted in 1917 as a proviso to the Army Appropriations Act of 1918.<sup>1</sup> The legislative history of that bill does not contain any discussion of this specific provision. The provision was made permanent law by the Defense Authorization Act of 1947, and was codified into Title 10 in 1982.<sup>2</sup>

##### **3.3.12.3. Laws in Practice**

The Air Force Office of General Counsel reports this authority is not currently used by the Air Force.<sup>3</sup> The Department of the Army, Office of the Judge Advocate General, reports this authority remains useful to that department.<sup>4</sup> Although the Anti-Deficiency law prohibits the military departments from accepting gratuitous services, the General Accounting Office (GAO) has determined that the Government may accept gratuitous services when provided pursuant to a written agreement.<sup>5</sup> This authority permits the departments to accept such services without a written agreement. This authority also permits the Army to utilize Army Reservist services in support of the Junior ROTC program. The Army Materiel Command and Army Corps of Engineers do not report any utilization of this statute.<sup>6</sup>

##### **3.3.12.4. Recommendation and Justification**

###### **Retain and Consolidate**

These sections should be retained and consolidated into a single authority for the Secretary of Defense and for the secretaries of the military departments. The authority remains

<sup>5</sup>Matter of Romey, USAR, B-216466, (Nov. 14, 1984).

<sup>6</sup>Memorandum from Mr. Robert Macfarlane, Deputy Command Counsel, US Army Materiel Command, to Advisory Panel, dated 2 Apr. 1992.

useful to the Army, particularly for training purposes, and is not superseded by other statutory provisions. Accordingly, the Panel recommends these sections be consolidated as specified below.

#### **3.3.12.5. Relationship to Objectives**

Retention and consolidation of these statutes promote the goals of streamlining the acquisition process while protecting the best interests of DOD.

#### **3.3.12.6. Proposed Statute**

##### **Gratuitous services of officers of the armed forces reserves**

The Secretary of Defense, or Secretaries of the military departments, may accept the gratuitous services of officers of their Reserve forces in enrolling, organizing, and training members of their Reserve or the Reserve Officers' Training Corps, or in consulting on matters related to the Armed Forces.

### **3.3.13. 10 U.S.C. § 9511; 10 U.S.C. § 9512; 10 U.S.C. § 9513**

#### **Definitions; Contracts for the inclusion or incorporation of defense features; Commitment of aircraft to the Civil Reserve Air Fleet**

##### **3.3.13.1. Summary of Laws**

Section 9511 contains definitions of terms used in Sections 9512 and 9513. Section 9512 provides that, subject to Chapter 137 of Title 10 and to the availability of funds, the Secretary of Defense may contract with any U.S. citizen for the incorporation of defense features in any new or existing aircraft owned by the citizen. Such contracts shall include terms required under section 9513 of this title and provide that the contractor shall repay to the U.S. a percentage of any amount the U.S. is contractually required to pay upon destruction or damage to the aircraft, or other loss of use.

Section 9513 provides that each contract entered into under section 9512 shall provide that any aircraft covered under the contract shall be committed to the Civil Reserve Air Fleet (CRAF), and that, as long as the aircraft remains privately owned, it shall be operated for DOD as needed during any Civil Reserve Air Fleet activation, notwithstanding any other commitment. The section further provides that the contractor operating such aircraft shall be paid at fair and reasonable rates. Finally, section 101 of the Defense Production Act does not apply to such covered aircraft during any Civil Reserve Air Fleet activation.<sup>1</sup>

##### **3.3.13.2. Background of Laws**

Section 9512 was originally enacted by the DOD Authorization Act for Fiscal Year 1982.<sup>2</sup> The language originated in the House version of the bill. The Secretary of the Air Force was authorized to modify existing and newly manufactured civil aircraft to configurations capable of carrying outsize and bulk military cargo, and provide financial incentives for civilian participation in the CRAF program. The section was amended in its entirety by the National Defense Authorization Act for Fiscal Year 1990 and 1991.<sup>3</sup> The current language originated in the Senate version of that bill. The Senate Committee Report indicated that the proposed amendment permitting defense features to be incorporated in commercial aircraft at the time of their construction was intended to provide needed authority to enhance the Civil Reserve Air Fleet (CRAF).<sup>4</sup> The House receded in conference.<sup>5</sup>

---

<sup>1</sup>That section of the Defense Production Act authorizes the President to prioritize defense contracts.

<sup>2</sup>Pub. L. No. 97-86, § 915(2), 95 Stat. 1126 (1981).

<sup>3</sup>Pub. L. No. 101-189, § 1636(b), 103 Stat. 1610 (1989).

<sup>4</sup>S. REP. NO. 81 101st Cong., 1st Sess. 71 (1989).

<sup>5</sup>H. CONF. REP. No. 331, 101st Cong., 1st Sess. 672 (1989).

As with § 9512, § 9513 was also originally enacted by the DOD Authorization Act for Fiscal Year 1982.<sup>6</sup> The legislative history to that bill indicates that the section was intended to establish a greater commitment to the CRAF by DOD.

### 3.3.13.3. Laws in Practice

These sections are implemented by Air Mobility Command Regulation 55-8 (August 13, 1992).<sup>7</sup>

These sections are administered by the Civil Air Directorate, Air Mobility Command, which is overseen by the U.S. Transportation Command (USTRANSCOM).<sup>8</sup> Air Mobility Command, with the approval of USTRANSCOM, has proposed amendment and reorganization of these sections that would authorize the use for specified purposes of military airfields by commercial aircraft that maintain a CRAF commitment.

In a recent White Paper on Incentives for the Civil Reserve Air Fleet, dated 11 August 1992, the Air Mobility Command noted that activation of the CRAF during Operation Desert Shield/Desert Storm resulted in significant air carrier contributions to DOD. The paper examines the need for preservation and enhancement of voluntary participation in the CRAF as key to building an effective commercial/DOD partnership. In support of that partnership in the air carrier field, the Air Mobility Command posits the need to enhance the mobilization base of the US commercial air carrier industry and to recognize the interdependence of military and civilian airlift capabilities. As an added inducement to voluntary CRAF commitment, the proposed amendment would afford the Secretary of the Air Force authority to authorize limited use of military airfields by commercial carriers.

The cognizant Offices of Counsel of the USTRANSCOM commands support these proposed amendments.<sup>9</sup> The Associate Deputy Assistant Secretary for Transportation, Department of the Air Force, has indicated that Office's support for the proposed revisions.<sup>10</sup>

---

<sup>6</sup>Pub. L. No. 97-86, § 1636(c)(1), 95 Stat. 1126 (1981).

<sup>7</sup>The underlying authority to enter into CRAF agreements is set forth at Executive Order 11490, Oct. 28, 1969, 24 F.R. 17567, as amended by Executive Order 11921, June 11, 1976, 41 F.R. 2494, as amended by Executive Order 12656, Nov. 18, 1988, 53 F.R. 47491.

<sup>8</sup>USTRANSCOM is a unified command established in April, 1987 and is comprised of Air Mobility Command, Military Sealift Command, and Military Traffic Management Command. By Memorandum dated 14 February 1992, the Secretary of Defense assigned to USCINTRANS the mission of providing air, land and sea transportation for DOD, both in time of peace and time of war.

<sup>9</sup>Letter from Brig Gen Thomas L. Hemingway, USAF, Chief Counsel, USTRANSCOM, to Ms. Theresa Squillacote, dated 10 December 1992. See also datafax transmission from Mr. Charles H. Joergenson, Office of Chief Counsel, USTRANSCOM, to Ms. Theresa Squillacote, Counsel, Acquisition Law Task Force, dated 22 Dec. 1992.

<sup>10</sup>Datafax transmission from Mr. Frank Colson, Associate Deputy Assistant Secretary of the Air Force (Transportation), to DOD Advisory Panel, dated 30 Dec. 1992.

#### **3.3.13.4. Recommendation and Justification**

##### **Amend and consolidate to grant authority to contract with CRAF contractors for limited use of military airfields**

The Panel recommends that these statutes be amended as set forth below. The provisions regarding CRAF enhancement contracts -- that is, contracts for modifications to aircraft owned by those commercial carriers that have made a CRAF commitment -- are currently set forth both at 10 U.S.C. §§ 9512 and 9513. Each of these two sections, therefore, currently cross-reference each other. For clarity and streamlining purposes, the CRAF enhancement provisions would be consolidated into a single section, the proposed § 9512.

Section 9513 would then be amended in its entirety to grant the Secretary of the Air Force discretionary authority to authorize the limited use of military installations to air carriers as an inducement to commit aircraft to the CRAF. Increased use of CRAF capabilities can be of significant value in this era of defense drawdown. Similarly, greater utilization of CRAF would be a significant part of an overall commitment towards the goal of increased civil/military integration.

Finally, a conforming amendment to the definition section at 10 U.S.C. § 9511, to set forth a new definition of "contractor," would be required. Currently, the definition of "contractor" is limited to a contractor with a CRAF enhancement obligation. The new definition proposed at § 9511(c) would broaden that to definition to include any contractor with a CRAF commitment, thus making the definition section co-extensive with the new authority proposed at 10 U.S.C. § 9513.

#### **3.3.13.5. Relationship to Objectives**

Amendment of these sections will further the best interests of the DOD by affording it greater opportunities to contract for CRAF commitment.

#### **3.3.13.6. Proposed Statutes**

##### **§ 9511. Definitions**

In this subchapter:

- (1) The terms "aircraft", "citizen of the United States", "person", and "public aircraft" have the meaning given those terms by section 101 of the Federal Aviation Act of 1958 (49 U.S.C. 1301)
- (2) The term "passenger-cargo combined aircraft" means a civil aircraft equipped so that its main deck can be used to carry both passengers and property (including mail) simultaneously.
- (3) The term "cargo-capable aircraft" means a civil aircraft equipped so that all or substantially all of the aircraft's capacity can be used for the carriage of property or mail.

(4) The term "passenger aircraft" means a civil aircraft equipped so that its main deck can be used for the carriage of individuals and cannot be used principally, without major modification, for the carriage of property or mail.

(5) The term "cargo-convertible aircraft" means a passenger aircraft equipped or designed so that all or substantially all of the main deck of the aircraft can be readily converted for the carriage of property or mail.

(6) The term "civil aircraft" means an aircraft other than a public aircraft.

(7) The term "Civil Reserve Air Fleet" means those aircraft allocated, or identified for allocation, to the Department of Defense under section 101 of the Defense Production Act of 1950 (50 U.S.C. App. 2071), or made available (or agreed to be made available) for use by the Department of Defense under a contract made under this title, as part of the program developed by the Department of Defense through which the Department of Defense augments its airlift capability by use of civil aircraft.

(8) The term "contractor" means a citizen of the United States (A) who owns or controls, or who will own or control, a new or existing aircraft and who contracts with the Secretary to modify that aircraft by including or incorporating specified defense features in that aircraft and to commit that aircraft to the Civil Reserve Air Fleet, or (B) who subsequently obtains ownership or control of a civil aircraft covered by such a contract and assumes all existing obligations under that contract, or (C) who owns or controls, or will own or control, new or existing aircraft and who contractually commits all or some of said aircraft to the Civil Reserve Air Fleet.

(9) The term "existing aircraft" means a civil aircraft other than a new aircraft.

(10) The term "new aircraft" means a civil aircraft that a manufacturer has not begun to assemble before the aircraft is covered by a contract under section 9512 of this title.

(11) The term "Secretary" means the Secretary of the Air Force.

(12) The term "defense feature" means equipment or design features included or incorporated in a civil aircraft which ensures the interoperability of such aircraft with the Department of Defense airlift system. Such term includes any equipment or design feature which enables such aircraft to be readily modified for use as a cargo-convertible, cargo-capable, or passenger-cargo combined aircraft.

#### **§ 9512. Contracts for the inclusion or incorporation of defense features**

(a) Subject to the provisions of chapter 137 of this title, and to the extent that funds are otherwise available for obligation, the Secretary-

(1) may contract with any citizen of the United States for the inclusion or incorporation of defense features in any new or existing aircraft to be owned or controlled by that citizen; and

(2) may contract with United States aircraft manufacturers for the inclusion or incorporation of defense features in new aircraft to be operated by a United States air carrier.

(b) Each contract entered into under subsection (a) shall provide include

(1) that any aircraft covered by the contract shall be committed to the Civil Reserve Air Fleet;

(2) that, so long as the aircraft is owned or controlled by a contractor, the contractor shall operate the aircraft for the Department of Defense as needed during any activation of the Civil Reserve Air Fleet, notwithstanding any other contract or commitment of that contractor; and

(3) that the contractor operating the aircraft for the Department of Defense shall be paid for that operation at fair and reasonable rates.

(c) Each contract entered into under subsection (a) shall include ~~(1) the terms required by section 9513 of this title and~~ a provision that requires the contractor to repay to the United States a percentage (to be established in the contract) of any amount paid by the United States to the contractor under the contract with respect to any aircraft if-

(1) the aircraft is destroyed or becomes unusable, as defined in the contract;

(2) the defense features specified in the contract are rendered unusable or are removed from the aircraft;

(3) control over the aircraft is transferred to any person that is unable or unwilling to assume the contractor's obligations under the contract; or

(4) the registration of the aircraft under section 501 of the Federal Aviation Act of 1958 (49 U.S.C. App. 1401) is terminated for any reason not beyond the control of the contractor.

(d)(1) A contract under subsection (a) for the inclusion or incorporation of defense features in an aircraft may include a provision authorizing the Secretary-

(A) to contract, with the concurrence of the contractor, directly with another person for the performance of the work necessary for the inclusion or incorporation of defense features in such aircraft; and

(B) to pay such other person directly for such work.

(2) A contract entered into pursuant to subsection (d) may include such specifications for work and equipment as the Secretary considers necessary to meet the needs of the United States.

(e) Notwithstanding section 101 of the Defense Production Act of 1950 (50 U.S.C. App. 2071), each aircraft covered by a contract under section 9512 of this title shall be committed exclusively

to the Civil Reserve Air Fleet for use by the Department of Defense as needed during any activation of the full Civil Reserve Air Fleet unless the aircraft is released from that use by the Secretary of Defense.

**§ 9513 Use of Military Installations by Civil Reserve Air Fleet Contractors**

(a) The Secretary of the Air Force may contract for the use by CRAF contractors of Air Force installations designated by the Secretary. With the consent of the Secretary concerned, such a contract may provide for the use of installations under the jurisdiction of armed forces other than the Air Force, designated by the Secretary. The use of military installations authorized of this section may be upon such terms as the Secretary believes will promote the national defense or be in the public interest.

(b) A contract entered into under paragraph (1) may authorize the use of the designated installation as a weather alternate, a technical stop not involving the enplaning or deplaning of passengers or cargo, or, for installations within the United States, for other commercial purposes. The Secretary may, notwithstanding any other provision of the law, establish different levels and types of uses for different installations, and discriminate among contractors with respect to levels and types of uses.

(c) Notwithstanding the provisions of Section 1107 of the Federal Aviation Act of 1958, or any other provision of the law, amounts collected from the contractor for landing fees, services, supplies, or other charges authorized to be collected under the contract shall be credited to the appropriation of the parent service of the military installation to which the contract pertains.

(d) A contract entered into under subsection (a) shall provide that the contractor agrees to indemnify and hold harmless the Air Force (and the armed forces exercising jurisdiction over the installation, in the case of an installation under the jurisdiction of an armed force other than the Air Force), from all actions, suits, or claims of any sort resulting from, relating to, or arising out of any activities conducted, or services or supplies furnished, in connection with the contract.

(e) A contract entered into under subsection (a) shall provide that the Secretary or the Secretary concerned (in the case of an installation under the jurisdiction of an armed force other than the Air Force), may at any time and without prior notice deny access to an installation designated under a contract if military exigencies require it.

~~(a) Each contract under section 9512 of this title shall provide--~~

~~(1) that any aircraft covered by the contract shall be committed to the Civil Reserve Air Fleet;~~

~~(2) that, so long as the aircraft is owned or controlled by a contractor, the contractor shall operate the aircraft for the Department of Defense as needed during any activation of the full Civil Reserve Air Fleet, notwithstanding any other contract or commitment of that contractor; and~~

~~(3) that the contractor operating the aircraft for the Department of Defense shall be paid for that operation at fair and reasonable rates.~~

~~(b) Notwithstanding section 101 of the Defense Production Act of 1950 (50 U.S.C. App. 2071), each aircraft covered by a contract under section 9512 of this title shall be committed exclusively to the Civil Reserve Air Fleet for use by the Department of Defense as needed during any activation of the full Civil Reserve Air Fleet unless the aircraft is released from that use by the Secretary of Defense.~~

### **3.3.14. 10 U.S.C. § 7201**

#### **Guided missiles; research and development, procurement, construction**

##### **3.3.14.1. Summary of Law**

This law authorizes the Secretary of the Navy to conduct guided missile-related R&D and procurement.

##### **3.3.14.2. Background of Law**

This section was enacted by the 1949 Army and Air Force Authorization Act.<sup>1</sup> It was intended to facilitate the development of the post-war guided missile program.<sup>2</sup>

##### **3.3.14.3. Law in Practice**

The Navy Offices of Counsel from whom comments were solicited, including Comptroller of the Navy, Naval Sea Systems Command, and Naval Air Systems Command, all report that this law is no longer utilized by the Navy and recommend its repeal.<sup>3</sup>

##### **3.3.14.4. Recommendation and Justification**

###### **Repeal**

This law should be repealed in its entirety. It is obsolete and does not serve any continued purpose within the Navy.

##### **3.3.14.5. Relationship to Objectives**

Repeal of this statute facilitates the goal of streamlining the DOD acquisition process by deleting an obsolete naval authority.

---

<sup>1</sup>Pub. L. No. 81-604, ch. 454, § 303(b), 64 Stat. 325 (1950).

<sup>2</sup>H.R. CONF. REP No. 2322, 81st Cong., 2d Sess. 8 (1950).

<sup>3</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

### **3.3.15. 10 U.S.C. § 7203**

#### **Scientific investigation and research**

##### **3.3.15.1. Summary of Law**

This section authorizes the Secretary of the Navy to expend available appropriations for scientific investigation and research. It also authorizes the Secretary of the Navy to delegate that authority.

##### **3.3.15.2. Background of Law**

This law was enacted by the Naval Appropriation Act of 1946.<sup>1</sup> The legislative history merely states that it intended to provide a permanent authorization for recurring appropriations of this type.<sup>2</sup>

##### **3.3.15.3. Law in Practice**

A survey of cognizant Department of Navy Offices of Counsel regarding this section revealed that the Navy Comptroller and the Office of Naval Research do not currently rely upon this authority and recommend its repeal.<sup>3</sup> The Navy International Programs Office states, however, that the Navy's Scientist and Engineer Exchange Program and Data Exchange Agreements and Information Exchange Program rely on 10 U.S.C. § 7203 for their legal underpinning.<sup>4</sup> Based thereon, the Navy Office of General Counsel suggests the alternative of developing a more narrowly tailored, new statutory authority for international exchange programs rather than retaining this section for limited use to justify exchange programs and international agreements.<sup>5</sup>

The other military departments do not have comparable authority to engage in the international exchange of scientific personnel outside the scope of an established Memorandum of Understanding or international cooperative R&D agreement. To rectify that problem, the DOD Office of General Counsel has initiated a legislative proposal to grant such authority department-wide. The military departments have reached consensus upon the language submitted by the DOD Office of General Counsel.<sup>6</sup>

<sup>4</sup>*Id.* See also Memorandum from Mr. R. David Gale, Jr., Assistant to the General Counsel (International) Department of the Navy, to Assistant to the General Counsel (FOIA), Department of the Navy, dated 27 Apr. 1992.

<sup>5</sup>*Id.*

<sup>6</sup>Memorandum from Department of Defense Office of General Counsel, to Under Secretary of Defense for Acquisition, dated 14 Apr. 1992.

#### 3.3.15.4. Recommendation and Justification

##### Amend and redesignate to provide scientific exchange authority

The Panel recommends that this statute be amended to provide for the international exchange of scientific personnel by all military departments. The Panel also recommends that this statute be redesignated outside the naval procurement chapters of Title 10 to clarify that the authority provided is not limited to the Department of the Navy.

#### 3.3.15.5. Relationship to Objectives

Amendment and redesignation of this statute will promote the best interests of the DOD by providing a needed authority for international scientific personnel exchanges.

#### 3.3.15.6. Proposed Statute

##### § ~~XXXX~~ Exchange of Scientific Personnel

(a) The Secretary of Defense is authorized to enter into agreements with the governments of allied and other friendly foreign countries for the exchange of military and civilian personnel of the United States Department of Defense and such personnel of the defense ministries of such foreign governments.

(b) Pursuant to these agreements, personnel of foreign defense department or ministries may be assigned to positions in the U.S. Department of Defense, and personnel of the U.S. Department of Defense may be assigned to positions in foreign defense departments or ministries. In the case of agreements for the exchange of personnel engaged in research and development activities, such agreements may provide for assignments to positions in private industry which support the foreign defense departments or ministries. The specific positions and the individuals to be assigned must be acceptable to both governments.

(c) These agreements shall be based on the principle of reciprocity such that each government will provide personnel of essentially equal qualifications, training, and skill. Salary, per diem, cost of living, travel, cost of language or other training, and other costs (except for cost of temporary duty directed by the host government and costs incident to the use of host government facilities in the performance of assigned duties) shall be paid by each government for its own personnel in accordance with its laws and regulations.

~~(a) The Secretary of the Navy may make such expenditures as he considers appropriate for scientific investigations and research from any naval appropriation available for these purposes.~~

~~(b) The Secretary, to the extent he considers proper, may delegate the authority conferred by this section to any person in the Department of the Navy, with or without the authority to make successive redelegations.~~

### **3.3.16. 10 U.S.C. § 7213**

#### **Relief of contractors and their employees from losses by enemy action**

##### **3.3.16.1. Summary of the Law**

This statute provides that public works construction funds may be used to recompense contractors and their employees from losses from enemy action.

##### **3.3.16.2. Background of the Law**

This section was enacted by the 1942 Act Authorizing Navy Public Works Construction.<sup>1</sup> It was intended to function as relief authorization for contractors and their employees engaged on public works projects on Wake Island and Guam when these places were captured and occupied during World War II.<sup>2</sup>

##### **3.3.16.3. Law in Practice**

The Naval Facilities Engineering Command Office of Counsel commented that the statute, taken at face value, does not limit relief to construction contractors, although the only appropriation made available is the military construction appropriation.<sup>3</sup> That Office also stated that extraordinary relief is limited to losses from enemy action, and that the authority granted by Pub. L. No. 85-804 was now generally used as a basis for extraordinary relief. Further, Executive Order 10789 allowed the Secretary of Defense to grant relief on a broader basis than losses associated with enemy action. Based on these conclusions, the Navy Office of General Counsel recommends repeal of this section.<sup>4</sup>

##### **3.3.16.4. Recommendation and Justification**

#### **Repeal**

This statute should be repealed in its entirety. It provides relief authority intended for a specific historical circumstance. It no longer serves any useful purpose for the Navy.

---

<sup>1</sup>Pub. L. No. 77-438, ch. 431, § 3, 56 Stat. 51 (1942).

<sup>3</sup>Memorandum from Mr. Harvey Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>4</sup>*Id.*

### **3.3.16.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process by removing an obsolete provision.

### 3.3.17. 10 U.S.C. § 7229

#### Purchase of Fuel

##### 3.3.17.1. Summary of Law

This section provides that the Secretary of the Navy may purchase fuel in any manner considered proper.

##### 3.3.17.2. Background of Law

This section was originally enacted by the Naval Service Appropriation Act of 1850.<sup>1</sup> The legislative history for that law does not contain any language directly relevant to this particular provision. The original language contained a domestic preference requirement that was repealed by a 1933 Naval Appropriations Act, also without explicating language.<sup>2</sup>

In the 1956 codification of Title 10, the following italicized language was deleted from this section:

In purchasing fuel for the Navy, *or for naval stations and yards*, the Secretary of the Navy shall have the power to discriminate and purchase in such manner as he may deem proper that kind of fuel which is best adapted to the purpose for which it is to be used.<sup>3</sup>

The relevant portion of the report to the 1956 Act merely stated that this language was being deleted because this law had been interpreted as authorizing the Armed Services Petroleum Purchasing Agency (predecessor to the Defense Fuel Supply Center) to negotiate fuel contracts when filling the consolidated fuel requirements of the entire armed forces.<sup>4</sup> The note in the United States Code Annotated has adopted this same language.

However, a search of the GAO Comptroller General decisions, both published and unpublished, reveals no document discussing this provision or setting forth such an interpretation. A computer search of relevant case law reveals no case that cites to or interprets this provision of law.

---

<sup>1</sup>Revised Statutes § 3728.

<sup>2</sup>Act of Mar. 3, 1933, ch. 212 (41 U.S.C. § 10a).

<sup>3</sup>Pub. L. No. 84-1028, ch. 104, 70A Stat. 1056 (1956).

<sup>4</sup>H. R. Rep. No. 970, 84th Cong., 2nd Sess. 532 (1956).

### 3.3.17.3. Law in Practice

Despite the apparent historical interpretation of this provision as governing all fuel purchases by the Defense Fuel Supply Center predecessor agency, Defense Fuel Supply Center states that it does not rely upon this law when entering into any type of fuel purchase.<sup>5</sup>

Navy Petroleum Office at Cameron Station, Virginia, reports that NavSup Instruction 4200.81 and NavSup Publication 485 govern all of its fuel acquisition procedures. Those regulations do not refer to this statute as providing contracting authority for any fuel purchasing, emergency or otherwise. NavSup Instruction 4200.81 cites to 10 U.S.C. § 2304(c)(2) as authority for emergency ship's fuel purchases over \$25,000.

Navy Command offices of counsel state:

**Navy Comptroller:** Section 7229 is considered to be important and needed authority that must be retained. It is employed by the Navy regularly to purchase fuel world-wide in connection with Fuel Exchange Agreements and in the absence of existing fuel purchase contracts. It confers needed flexibility that would be lost by repeal. Section 7229 is distinct from and unrelated to 41 U.S.C. § 11a, which provides a bona fide needs exception to the Secretary of the Army for fuel purchases.

**International Programs:** Without offering an opinion as to its validity, we can advise that Navy JAG relies in part on this section as the legal authority to enter into international fuel exchange agreements.

**Military Sealift Command:** This statute permits the Secretary of the Navy to purchase fuel in any manner he considers proper. This statute is used extensively by MSC in the purchase of fuel for USNS vessels when outside CONUS. This statute does not overlap 41 U.S.C. § 11a, which is only applicable to the Army. Recommend retention of this statute.<sup>6</sup>

Based on the above, Navy Office of General Counsel recommends that this section be retained without change.<sup>7</sup>

The Panel inquired further why the emergency fuel purchasing authority cited in the regulations, relying upon CICA authority, was insufficient. The Navy responded that the CICA

<sup>5</sup>Memorandum from Ms. Kay Bushman, Associate Counsel, Defense Fuel Supply Center Office of Counsel, to Ms. Theresa Squillacote, Counsel, Acquisition Law Task Force, dated 11 Dec. 1992.

<sup>6</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>7</sup>*Id.*

"unusual and compelling" authority requires a written justification and approval regarding the potential serious injury to the government absent full and open competition. While a master of a ship is presumed to have authority to procure necessities for a vessel,<sup>8</sup> that master is not a contracting officer and therefore cannot make the requisite justification and approval. Consequently, the authority of § 7229 is required.<sup>9</sup>

#### **3.3.17.4. Recommendation and Justification**

##### **Retain**

The Panel recommends retaining this law should be retained in its entirety because it continues to serve a valid purpose as emergency fuel purchasing authority for the Navy.

#### **3.3.17.5. Relationship to Objectives**

Retention of this statute will promote the best interests of DCD.

---

<sup>8</sup>Marine Fuel Supply & Towing v. M/V Kentucky, 869 F. 2nd 473 (9th Cir. 1988).

<sup>9</sup>Memorandum from Mr. Theodore P. Fredman, Assistant to the General Counsel, Department of the Navy, to Counsel, Acquisition Law Task Force, dated 22 May 1992.

### **3.3.18. 19 U.S.C. § 7230**

#### **Sale of Degaussing Equipment**

##### **3.3.18.1. Summary of the Law**

This section provides the Secretary of the Navy with authority to sell degaussing equipment that is not readily available to private ship owners, and states that the proceeds may be credited to the involved appropriation.

##### **3.3.18.2. Background of the Law**

This statute was originally enacted in 1957 by An Act Authorizing the Sale of Degaussing Equipment.<sup>1</sup> It was intended to assist private owners in maintaining degaussing equipment on their vessels in order to deal with the large number of ocean magnetic mines that remained after World War II.<sup>2</sup>

##### **3.3.18.3. Law in Practice**

The Naval Sea Systems Command was not aware of any use of this statute.<sup>3</sup>

The Navy Office of General Counsel states that this section appears to be an obscure section without application to current circumstances and recommends its repeal.<sup>4</sup>

##### **3.3.18.4. Recommendation and Justification**

###### **Repeal**

This section was enacted to deal with a unique situation that existed after World War II. It has no current applicability to the Navy and should be repealed.

##### **3.3.18.5. Relationship to Objectives**

Repeal of this section will further the goal of streamlining the DOD acquisition process by deleting an obsolete provision.

<sup>4</sup>*Id.*

### 3.3.19. 10 U.S.C. § 7296

#### Appropriations; available for other purposes

##### 3.3.19.1. Summary of Law

This section permits interchange of funds appropriated for vessel construction or conversion and their machinery and equipment. Conversion appropriations for auxiliary vessels may be used to purchase such vessels as well.

##### 3.3.19.2. Background of Law

The auxiliary vessel authority was enacted in 1939 by An Act to Permit the President to Acquire and Convert Certain Auxiliary Vessels.<sup>1</sup> It was intended to permit the Navy quickly to acquire three tankers then being constructed under a Maritime Commission contract.<sup>2</sup> The remaining language was contained within a 1950 Naval Authorization Act and was intended to facilitate a post-World War II naval modernization effort.<sup>3</sup>

##### 3.3.19.3. Law in Practice

The following comments were received by the cognizant Navy OGC offices of counsel:

Navy Comptroller: We are not aware of any recent use of this statute. As it does not appear to be a necessary one, we would not object to its repeal.

Naval Sea Systems Command: It does not appear that this statute is necessary. The Shipbuilding and Conversion, Navy (SCN) includes all the amounts for acquisition of ships, including auxiliaries, and machinery and equipment for those ships. Within this appropriation, the Navy presently has the flexibility, at least within a program, to move money between the hull, machinery and equipment.<sup>4</sup>

The Navy Office of General Counsel recommends the repeal of this section.<sup>5</sup> The DOD Office of General Counsel (Fiscal and IG) has also reviewed this statute and concurs in recommending its repeal as anachronistic law.<sup>6</sup>

<sup>5</sup>*Id.*

#### **3.3.19.4. Recommendation and Justification**

##### **Repeal**

This statute should be repealed as it no longer serves any useful purpose.

#### **3.3.19.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining the DOD acquisition process by removing an obsolete provision.

---

<sup>6</sup>Memorandum from Mr. Tom Morgan, Deputy General Counsel (Fiscal & IG), Department of Defense, to Ms. Theresa Squillacote, dated 5 May 1992.

### **3.3.20. 10 U.S.C. § 7298**

#### **Conversion of combatants and auxiliaries**

##### **3.3.20.1. Summary of the Law**

This section provides that the President may convert vessels as needed without limitation on expenditures for each individual conversion but within an overall set amount.

##### **3.3.20.2. Background of the Law**

This section was enacted by a 1947 Act to Convert Certain Naval Vessels, and was intended to assist the Navy in developing prototype vessels to incorporate the latest technological developments in naval warfare.<sup>1</sup>

##### **3.3.20.3. Law in Practice**

Naval Sea Systems Command Office of Counsel stated that it does not appear that this authority is necessary. As conversions are authorized and appropriated within the Shipbuilding and Conversion appropriation, additional authority is not necessary to complete multiple conversions within the total amount appropriated.<sup>2</sup>

The Navy Office of General Counsel recommends that this section be repealed.<sup>3</sup>

##### **3.3.20.4. Recommendation and Justification**

###### **Repeal**

This statute should be repealed as obsolete law that no longer serves any continuing purpose within the Navy.

##### **3.3.20.5. Relationship to Objectives**

Repeal of this statute furthers the goal of streamlining the DOD acquisition process.

---

<sup>1</sup>Pub. L. No. 80-320, ch. 439, § 1, 61 Stat. 718 (1947). See S. REP. NO. 604, 80th Cong., 1-2 (1947)

<sup>2</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>3</sup>*Id.*

### **3.3.21. 10 U.S.C. § 7299a**

#### **Construction of combatant and escort vessels and assignment of vessel projects**

##### **3.3.21.1. Summary of Law**

This section provides that:

(a) combatant and escort vessel construction is subject to the requirements of the Act of March 27, 1934, requiring that alternate vessels be constructed in a Navy yard; the president may direct otherwise when not inconsistent with the public interest.

(b) the assignment of naval conversion and repair work may not be assigned based on a particular type of shipyard or geographic area.

(c) bid evaluation for vessel repair work shall include evaluation of costs of moving the vessel and its crew to and from vessel homeport.

(d) a determination of whether adequate competition among homeport firms exists must be made before bid solicitation for short term repair work; if adequate competition exists among such firms, the Secretary shall solicit only to homeport firms and may not award to any other firms; this paragraph supersedes paragraph (b) but does not apply to voyage repairs.

##### **3.3.21.2. Background of Law**

The language of subsections (a) and (b) was codified in 1982.<sup>1</sup> The source law for these original sections is not identified in the 1982 codification act.

The language of subsection (c) was added as a floor amendment to the House version of the National Defense Authorization Act for 1987.<sup>2</sup> It was intended to require the Navy to acknowledge interport cost differential (i.e., the cost of moving a vessel from its homeport to the port of repair) when evaluating bids for overhaul and repair work.<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 97-295, § 1(48)(A), 96 Stat. 1298 (1982).

<sup>2</sup>Pub. L. No. 99-661, § 1201(A), 100 Stat. 3967 (1987).

<sup>3</sup>133 Cong. Rec. 11891 (May 11, 1987)(debate on amendment to H.R. 1748 offered by Rep. Hunter).

The language of subsection (d) was enacted by the National Defense Authorization Act for Fiscal Years 1988 and 1989.<sup>4</sup> It was intended to prevent disruption of vessel crews by establishing a preference for firms that would perform work at the homeport when the repair would be short-term (six months or less).

### **3.3.21.3. Law in Practice**

The following comments were received from the cognizant Navy Command offices of counsel:

Naval Sea Systems Command: Paragraph (a) of Section 7299a addresses the requirement that alternate vessels be constructed in a Navy shipyard unless determined by the President to be inconsistent with the public interest. It has been approximately twenty years since the last ship constructed in a Navy shipyard was delivered. This has necessitated preparing and staffing Presidential findings for more than two decades. Exec. Order 12765 of June 11, 1991, 56 F.R. 27401 (June 13, 1991), delegated to the Secretary of Defense this authority. This authority was further delegated to the Secretary of the Navy on 27 September 1991 subject to further redelegation to civilian presidential appointees. Considering the realities of present Navy ship construction entirely in private shipyards, it is likely that an annual exception to the statute will continue to be required. As the statute has not been applied in some time and in order to avoid the need to continue processing an exception, its repeal is recommended.

The language in 7299a(b) is considered unnecessary and confusing to both the industry and the Government. We believe that the intention of this statute was to restrict the Navy from making a decision to overhaul, for example, all FFGs in the Northeast or all Aegis class cruisers in a Navy shipyard. On the other hand, 7299a(d) (1) clearly codifies what has been the Navy's Homeport Policy since the early 1970's, that is to perform overhauls (short term in its latest iteration) in the homeport of the vessel whenever practicable. This policy is based on the Navy's underlying implementation of the Homeport Policy necessarily requires geographical restrictions and light of the recognition of this policy in 7299a(d)(1), 7299(b) is considered to be potentially inconsistent and therefore, it should be deleted.

The remaining paragraphs are considered important in providing support for the Navy's Homeport Policy applicable to the overhaul

---

<sup>4</sup>Pub. L. No. 100-180, § 1101, 101 Stat. 1145 (1990).

and repair of naval vessels... Therefore, paragraphs (c) and (d) should be retained.<sup>5</sup>

Based on the above, the Navy Office of General Counsel recommends that subsections (a) and (b) be repealed while the remainder of the statute be retained without modification.<sup>6</sup>

#### **3.3.21.4. Recommendation and Justification**

##### **Amend to repeal obsolete and contradictory provisions**

The Panel recommends repeal of subsections (a) and (b). Subsection (a) is obsolete. Subsection (b) clearly conflicts with the Navy's Homeport Policy embodied in subsections (c) and (d). That Homeport Policy is the result of recently enacted legislation that continues to serve a valid purpose. Thus, the Panel recommends retention of subsections (c) and (d).

#### **3.3.21.5. Relationship to Objectives**

Amendment of this statute will further the goal of streamlining the DOD acquisition process by deleting obsolete and contradictory provisions of law.

#### **3.3.21.6. Proposed Statute**

##### **§ 7299a. Construction of combatant and escort vessels and assignment of vessel projects**

~~(a) The distribution of assignments and contracts for the construction of combatant vessels and escort vessels is subject to the Act of March 27, 1934 (ch. 95, 48 Stat. 503), requiring that the first and each succeeding alternate vessel be constructed in a Navy yard. However, the President may direct that a vessel be constructed in a Navy or private yard if the requirement of this subsection is inconsistent with the public interest.~~

~~(b) The assignment of naval vessel conversion, alteration, and repair projects shall be based on economic and military considerations and may not be restricted by a requirement that certain parts of naval shipwork be assigned to a particular type of shipyard or geographical area or by a similar requirement.~~

(a)(e) In evaluating bids or proposals for a contract for the overhaul, repair, or maintenance of a naval vessel, the Secretary of the Navy shall, in determining the cost or price of work to be performed in an area outside the area of the homeport of the vessel, consider foreseeable costs of moving the vessel and its crew from the homeport to the outside area and from the outside area back to the homeport at the completion of the contract.

---

<sup>5</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>6</sup>*Id.*

(b)(4)(1) Before issuing a solicitation for a contract for short-term work for the overhaul, repair, or maintenance of a naval vessel, the Secretary of the Navy shall determine if there is adequate competition available among firms able to perform the work at the homeport of the vessel. If the Secretary determines that there is adequate competition among such firms, the Secretary-

(A) shall issue such a solicitation only to firms able to perform the work at the homeport of the vessel; and

(B) may not award such contract to a firm other than a firm that will perform the work at the homeport of the vessel.

(2) Paragraph (1) applies notwithstanding ~~subsection (b)~~ or any other provision of law.

(3) Paragraph (1) does not apply in the case of voyage repairs.

(4) In this subsection, the term "short-term work" means work that will be for a period of six months or less.

### **3.3.22. 10 U.S.C. § 7301**

#### **Bids on Construction: Estimates Required**

##### **3.3.22.1. Summary of Law**

This section requires that bidders on naval contracts shall include their estimates on which the bid is based with their bids. It also includes delegation authority.

##### **3.3.22.2. Background of Law**

This statute was originally enacted by the 1946 Act Enacting Certain Provisions now included in the Naval Appropriation Act.<sup>1</sup> The report to that legislation merely indicated that the purpose of the bill was to provide authority in substantive law contained in numerous appropriations customarily made in the past for the Navy.<sup>2</sup> It was intended to return the Naval Appropriation Bill to its primary purpose of appropriating money rather than enacting law.<sup>3</sup>

##### **3.3.22.3. Law in Practice**

Naval Sea Systems Command has reported to the Navy Office of General Counsel that it did not see any continuing need for this statute. Therefore, the Navy Office of General Counsel recommends that this statute be repealed.

##### **3.3.22.4. Recommendation and Justification**

###### **Repeal**

This statute should be repealed. The specific problem sought to be addressed by this statute is unknown. Furthermore, the requirement that estimates be submitted with naval construction bids is not necessary under current procurement procedures.

##### **3.3.22.5 Relationship to Objectives**

Repeal of this statute furthers the goal of streamlining the DOD acquisition process by deleting an obsolete provision.

---

<sup>1</sup>Act of Aug. 2, 1946, ch. 756, 60 Stat. 857 (1946).

<sup>2</sup>H. R. Rep. No. 2549, 79th Cong., 2d Sess. (1946).

<sup>3</sup>*Id.*

### **3.3.23. 10 U.S.C. § 7302**

#### **Construction on Pacific Coast**

##### **3.3.23.1. Summary of the Law**

This section requires the Navy to construct in Pacific Coast shipyards such vessels as the President determines necessary to maintain shipyards there adequate to meet the requirements of the national defense.

##### **3.3.23.2. Background of the Law**

This section was enacted by the Naval Vessel Authorization Act of 1938 and was intended to improve a perceived weakness in Pacific coast shipyard facilities in preparation for war.<sup>1</sup>

##### **3.3.23.3. Law in Practice**

The Naval Sea Systems Command reported to the Navy Office of General Counsel that, to their knowledge, this section has only rarely been discussed<sup>2</sup>. Comments received from the Navy Office of General Counsel, through the Deputy Assistant Secretary of the Navy (Ship Programs), note that, while there are several industrial base studies presently underway, none will implicate this section. The Navy further reports the only remaining ship construction on the west coast is at NASCO, and that decisions regarding that shipyard are not driven by any specific need to have Pacific Coast shipyards. Indeed, in the mid-1980's, when a major combatant shipyard was closed on the west coast, the Navy decided that there was no need for yards on both coasts.<sup>3</sup> Based on the above, the Navy Office of General Counsel recommends repeal of this section.<sup>4</sup>

##### **3.3.23.4. Recommendation and Justification**

###### **Repeal**

This section should be repealed. It was enacted to address a specific problem in naval readiness that existed prior to World War II. That problem is no longer an issue for the Navy, and the statute does not serve any other valid purpose.

---

<sup>1</sup>Pub. L. No. 75-528, ch. 243, § 11, 52 Stat. 401 (1938). See H. R. Rep. No. 1899, 75th Cong., 3d Sess. 22-24 (1938).

<sup>2</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>3</sup>Datafax transmission from Mr. Theodore Fredman, Assistant to the General Counsel, to Ms. Theresa Squillacote, Acquisition Law Task Force, dated 28 Apr. 1992.

<sup>4</sup>Notes 2 and 3, *supra*.

### **3.3.23.5. Relationship to Objectives**

Repeal will further the goal of streamlining the DOD acquisition process by removing an obsolete requirement.

### **3.3.24. 10 U.S.C. § 7304**

#### **Examination by board; unfit vessels stricken from Naval Vessel Register**

##### **3.3.24.1. Summary of the Law**

This section provides that the Secretary of the Navy shall designate boards of naval officers to examine naval vessels at least every three years, and to recommend which, if any, shall be found unfit for service and stricken from the Naval Vessel Register. If the Secretary concurs, the Secretary shall strike the vessel(s) from the Naval Vessel Register.

##### **3.3.24.2. Background of the Law**

This section was originally enacted by the Act Making Appropriations for the Naval Service for Fiscal Year 1883.<sup>1</sup> The House Committee Report on that legislation merely reiterated the requirements of the legislation without further explanation.

##### **3.3.24.3. Law in Practice**

This law is administered by the Naval Sea Systems Command. That Command reports that this law is still relied upon by the Navy to review vessel fitness.<sup>2</sup>

##### **3.3.24.4. Recommendation and Justification**

###### **Retain and Consolidate**

The Panel recommends that this section be consolidated with 10 U.S.C. §§ 7305, 7306, 7307(a) and 7308 into a single statute that sets forth authority to strike vessels and to dispose of vessels that have been so stricken, as well as other vessels. Technically, this provision is not related to the DOD acquisition process. However, it is intimately related to the other sections cited above that are acquisition-related. For streamlining purposes, the Panel believes that this section is appropriately consolidated with those provisions.

Naval Sea Systems Command concurs in this proposed consolidation.<sup>3</sup>

---

<sup>1</sup> Act of August 5, 1882, ch. 391, § 2, 22 Stat. 296 (1882)

<sup>2</sup> Datafax transmission from Ms. Janice Passo, Naval Sea Systems Command, Office of Counsel, to Ms. Theresa Squillacote, dated 17 Sep. 1992.

<sup>3</sup> *Id.*

### 3.3.24.5. Relationship to Objectives

Retention and consolidation of this section would promote the goal of streamlining the DOD acquisition process by providing a single statement of authority for related statutory provisions.

### 3.3.24.6. Proposed Statute<sup>4</sup>

#### Consolidated Statute Disposition of Naval Vessels

a) The Secretary of the Navy shall designate boards of naval officers to examine all naval vessels, including unfinished vessels. Each vessel shall be examined at least once every three years if practicable.

b) That board shall recommend to the Secretary of the Navy in writing which vessels, if any, should be stricken from the Naval Vessel Register. In making such recommendations, the board shall consider whether any vessel is unfit for service or whether any unfinished vessel cannot be finished without disproportionate expense.

c) Where the Secretary concurs with any such recommendation, the Secretary shall strike the name of that vessel from the Naval Vessel Register. The Secretary of the Navy shall appraise each vessel so stricken. When the Secretary determines that it is in the national interest, the Secretary is authorized to sell such vessels under prescribed regulations.

(1) Vessels stricken from the Naval Vessel Register and not subject to disposition under any other law, may be sold at public sale to the highest acceptable bidder, regardless of their appraised value, after being advertised for sale for a period of not less than 30 days.

(2) If the Secretary determines that the bid prices received after advertising are not considered reasonable and that readvertising will serve no useful purpose, such vessels may be sold by negotiation to the highest acceptable offeror, provided:

(A) that each responsible bidder has been notified of intent to negotiate and has been given a reasonable opportunity to negotiate; and

(B) the negotiated price is higher than the highest rejected price of any responsible bidder, or

(C) the negotiated price is reasonable and is in the national interest.

d) The Secretary of the Navy is further authorized to transfer, by gift or otherwise, any stricken or captured vessel to:

---

<sup>4</sup>This proposed consolidated statute is referenced in the individual analyses for §§ 7305, 7306, 7307 and 7308.

(1) any state, commonwealth or possession of the United States, municipal corporation or any political subdivision thereof;

(2) the District of Columbia; or

(3) any not-for-profit or nonprofit entity provided, that the transfer occurs at no cost to the United States and that the transferee agrees to maintain the vessel in a condition satisfactory to the Navy.

e) The Secretary of the Navy is further authorized to use any stricken vessel for experimental purposes, provided that the vessel shall first be stripped as practicable. The proceeds received from stripping the vessel shall be credited to appropriations available for the procurement of those scrapping services needed for stripping. Excess receipts shall be deposited into the general fund of the Treasury.

f) The provisions of the Federal Property and Administrative Services Act (40 U.S.C. 471 et seq.) do not apply to the disposition of a naval vessel under this section.

g) Notwithstanding any other provision of law, no battleship, aircraft carrier, cruiser, or destroyer, or submarine of the Navy may be sold, transferred, or otherwise disposed of, unless the Chief of Naval Operations certifies that it is not essential to the defense of the United States.

#### **Current Statutes**

The text of the current section 7304 is as follows:

**10 U.S.C. § 7304. Examination by board; unfit vessel stricken from Naval Vessel Register**

(a) The Secretary of the Navy shall designate boards of naval officers to examine vessels of the Navy. Each vessel shall be examined by a board at least once every three years, if practicable.

(b) When a board, in conducting an examination under this section, finds that any vessel is unfit for service or that an unfinished vessel in any naval shipyard cannot be finished without disproportionate expense, it shall submit a written report to the Secretary stating fully the reasons for its opinion. If the Secretary concurs, he shall strike the name of that vessel from the Naval Vessel Register.

### **3.3.25. 10 U.S.C. § 7305**

#### **Sale of vessel stricken from Naval Vessel Register**

##### **3.3.25.1. Summary of Law**

This section provides that the Secretary of the Navy shall appraise stricken vessels. When in the national interest, the Secretary is directed to offer the vessel for sale. The section sets forth a detailed, advertisement and bid procedure to be utilized when offering such vessels for sale. That procedure requires a three month advertisement period, a 10% of bid cash deposit, and a surety bond. The section further provides that, unless otherwise provided by law, no naval vessel may be sold in any other manner or for less than the appraised value unless the President so directs in writing. Finally, the statute also provides that its terms do not apply to vessels whose disposition is authorized by the Federal Property and Administrative Services Act.

##### **3.3.25.2. Background of Law**

This section was originally enacted by the Act Making Appropriations for the Naval Service for Fiscal Year 1883.<sup>1</sup> The House Committee Report to that legislation merely reiterated the requirements of the legislation without further explanation.<sup>2</sup>

##### **3.3.25.3. Law in Practice**

This section is administered by the Naval Sea Systems Command. That Command reports that the statute continues adequately to serve a valid purpose. The Command does report, however, that the three month advertisement requirement is burdensome and hinders efficient disposition of stricken vessels.<sup>3</sup>

By Executive Order Number 11765,<sup>4</sup> the President authorized the sale of stricken vessels pursuant to this section by negotiation if bids received are deemed not reasonable and if no useful purpose would be served by readvertising.

##### **3.3.25.4. Recommendation and Justification**

#### **Amend and Consolidate**

The Panel recommends that this section be amended and consolidated into the draft, consolidated statute, "Disposition of Naval Vessels." The Navy desires retention of authority to sell, transfer or otherwise dispose of stricken naval vessels. While the current statute provides

---

<sup>1</sup>Act of August 5, 1882, Sec. 2, 22 Stat. 296 (1882).

<sup>2</sup>H.R. REP. NO. 1433, 47th Cong., 1st Sess. 8 (1882).

<sup>3</sup>Datafax transmission from Ms. Janice Passo, Naval Sea Systems Command, Office of Counsel, to Ms. Theresa Squillacote, dated 17 Sep. 1992.

<sup>4</sup>January 29, 1974, 39 F.R. 2577.

such authority, the current bid procedure is antiquated and frequently supplemented by the negotiation procedures in the relevant Executive Order. The proposed consolidated statute modernizes the sealed bid procedure and incorporates the regulatory negotiation procedure. The consolidated statute also incorporates other statutes relevant to the same subject.

Naval Sea Systems Command, Office of Counsel, concurs with this proposed consolidation.<sup>5</sup>

### **3.3.25.5. Relationship to Objectives**

Consolidation of this statute will promote the goal of streamlining the DOD acquisition process.

### **3.3.25.6. Proposed Statute**

Subsection (c) of proposed text of the consolidated statute, Disposition of Naval Vessels, at ch. 3.3.24 provides as follows:

c) Where the Secretary concurs with any such recommendation, the Secretary shall strike the name of that vessel from the Naval Vessel Register. The Secretary of the Navy shall appraise each vessel so stricken. When the Secretary determines that it is in the national interest, the Secretary is authorized to sell such vessels under prescribed regulations.

(1) Vessels stricken from the Naval Vessel Register and not subject to disposition under any other law, may be sold at public sale to the highest acceptable bidder, regardless of their appraised value, after being advertised for sale for a period of not less than 30 days.

(2) If the Secretary determines that the bid prices received after advertising are not considered reasonable and that readvertising will serve no useful purpose, such vessels may be sold by negotiation to the highest acceptable offeror, provided:

(A) that each responsible bidder has been notified of intent to negotiate and has been given a reasonable opportunity to negotiate; and

(B) the negotiated price is higher than the highest rejected price of any responsible bidder, or

(C) the negotiated price is reasonable and is in the national interest.

### **Current Statutes**

The text of the current Section 7305 that is to be repealed and replaced by subsection (c) is as follows:

---

<sup>5</sup>Supra note 3.

**10 U.S.C. § 7305. Sale of vessel stricken from Naval Vessel Register**

**(a) This section does not apply to a vessel the disposal of which is authorized by the Federal Property and Administrative Services Act of 1949 (40 U. S. C. 471 et seq.), if it is to be disposed of under that Act.**

**(b) The Secretary of the Navy shall appraise each vessel stricken from the Naval Vessel Register under section 7304 of this title. If he considers that the sale of the vessel is in the best interest of the United States, he shall advertise it for sale.**

**(c) The advertisement shall ask for sealed bids for the purchase of the vessel and shall be published for at least three months in newspapers used by the Department of the Navy for other advertisements. It shall--**

**(1) state the name, location, and appraised value of the vessel to be sold;**

**(2) state the day, hour, and place for the opening of the bids;**

**(3) state that the sale will be for cash to the bidder submitting the highest bid above the appraised value of the vessel; and**

**(4) specify the period of time, after the opening of the bids, within which the successful bidder will be required to pay the remaining 90 percent of the amount bid by him.**

**(d) The Secretary shall--**

**(1) require that each bid be accompanied by a cash deposit of not less than 10 percent of the amount of the bid; and**

**(2) require that each bid be accompanied by a bond, with two or more sureties to be approved by him, conditioned on the payment of the remaining 90 percent within the time specified in the advertisement.**

**(e) The bids shall be opened at the time and place stated in the advertisement, and a record shall be made of them.**

**(f) If the bidder whose bid is accepted defaults in the payment of all or part of the remaining 90 percent of the amount of his bid within the time specified, his cash deposit of 10 percent of that amount shall be forfeited to the United States and the Secretary shall advertise the vessel again and resell it in the manner prescribed in this section.**

**(g) The cash deposit forfeited by a defaulting bidder shall be applied, first, to the payment of the expenses of the advertisement and resale of the vessel and, second, to the payment of the**

difference, if any, between the amount bid by the defaulting bidder and the amount for which the vessel is resold. Any balance remaining shall be covered into the Treasury.

(h) This section does not prevent a suit for breach of any condition of a bond furnished by a bidder.

(i) Each vessel sold as prescribed in this section shall be delivered to the purchaser upon full payment to the Secretary of the amount bid.

(j) The net proceeds of each sale under this section shall be covered into the Treasury.

(k) A sale under this section of a vessel the disposal of which is authorized by the Federal Property and Administrative Services Act of 1949 (40 U. S. C. 471 et seq.), is subject to regulations under section 205 of that Act (40 U. S. C. 486).

(l) Except as otherwise provided by law, no vessel of the Navy may be sold in any other manner than that provided by this section, or for less than its appraised value, unless the President so directs in writing.

### **3.3.26. 10 U.S.C. § 7306**

#### **Use for experimental purposes**

##### **3.3.26.1. Summary of Law**

This section provides that the Secretary of the Navy, with presidential approval, may use any stricken vessel for experimental purposes when in the best interests of the United States. The Secretary must carry out such stripping of the vessel as is practicable before use for experimental purposes. Proceeds resulting from stripping may be credited to applicable appropriations.

##### **3.3.26.2 Background of Law**

This section was originally enacted by the Act Authorizing the President to Dispose of Certain Public Vessels.<sup>1</sup> The House Committee Report accompanying this legislation noted that there was then no existing provision for the legal disposition of stricken vessels other than by sale.<sup>2</sup> The Committee noted that in some instances it would be more advantageous to withhold vessels from sale and to use them for experimental purposes, such as targets for experimental firings.<sup>3</sup>

##### **3.3.26.3. Law in Practice**

Naval Sea Systems Command reports that, while it is not aware of any restriction on the use of stricken vessels absent this section, the authority is a useful one. This section continues adequately to serve a valid purpose. Naval Air Systems Command reports that this statute appears necessary to authorize the use of stricken vessels as targets and should be preserved.<sup>4</sup>

Based on the above, Navy Office of General Counsel recommends that this section should be retained because of the need for periodic use of vessel hulks for weapon tests.<sup>5</sup>

##### **3.3.26.4. Recommendation and Justification**

###### **Retain and Consolidate**

The Panel recommends that this section be consolidated with 10 U.S.C. §§ 7304, 7305, 7307(a) and 7308 into a single section that sets forth authority to strike vessels and to dispose of vessels that have been so stricken and of other vessels. Arguably, this section is not related to the DOD acquisition process. However, it is intimately related to the other sections cited above that

---

<sup>1</sup>Pub. L. No. 77-126, ch. 231, 55 Stat. 260 (1941).

<sup>2</sup>H.R. REP. No. 745, 77th Ccong., 1st Sess. 1, 2 (1941).

<sup>3</sup>*Id.*

<sup>4</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>5</sup>*Id.*

also deal with disposition of stricken vessels and that are acquisition related. For streamlining purposes, the Panel believes that this section is appropriately consolidated.

Naval Sea Systems Command, Office of Counsel, had no strong views regarding the proposed consolidation of this section.<sup>6</sup>

### **3.3.26.5. Relationship to Objectives**

Consolidation of this statute will promote the goal of streamlining the DOD acquisition process.

### **3.3.26.6 Proposed Statute**

Subsection (e) of proposed text of consolidated statute, Disposition of Naval Vessels, at ch. 3.3.24 provides as follows:

e) The Secretary of the Navy is further authorized to use any stricken vessel for experimental purposes, provided that the vessel shall first be stripped as practicable. The proceeds received from stripping the vessel shall be credited to appropriations available for the procurement of those scrapping services needed for stripping. Excess receipts shall be deposited into the general fund of the Treasury.

The text of the current Section 7306, to be repealed and replaced by subsection (e), above, is as follows:

#### **Current Statutes**

10 U.S.C. § 7306. Use for experimental purposes

(a) The Secretary of the Navy, with the approval of the President, may use for experimental purposes any vessel stricken from the Naval Vessel Register under section 7304 of this title, if he determines that it is in the best interest of the United States.

(b)(1) Before using any vessel for an experimental purpose pursuant to this section, the Secretary shall carry out such stripping of the vessel as is practicable.

(2) Amounts received as a result of stripping of vessels pursuant to this subsection shall be credited to applicable appropriations available for the procurement of scrapping services under this subsection, to the extent necessary for the procurement of those services. Amounts received which are in excess of amounts necessary for procuring those services shall be deposited into the general fund of the Treasury.

---

<sup>6</sup>Datafax transmission from Ms. Janice Passo, Naval Sea Systems Command, Office of Counsel, to Ms. Theresa Squillacote, dated 17 Sep. 1992.

(3) In providing for stripping of a vessel pursuant to this subsection, the Secretary shall ensure that such stripping does not destroy or diminish the structural integrity of the vessel.

### **3.3.27. 10 U.S.C. § 7307**

#### **Restriction on disposal**

##### **3.3.27.1. Summary of Law**

This section provides that, notwithstanding any other provision of law, no battleship, aircraft carrier, cruiser, destroyer or submarine may be sold, transferred, or otherwise disposed of unless the Chief of Naval Operations certifies that it is not essential to the national defense. It further provides that, after August 5, 1974, no vessel in excess of 3,000 tons or less than 20 years of age may be sold or otherwise disposed of to another national unless such disposition has been approved of by law. Finally, the section also provides that, after August 5, 1974, any other type of naval vessel may be sold or otherwise disposed of to a foreign nation only after notification to the Senate and House Armed Services committees and after expiration of 30 days continuous session of the Congress.

##### **3.3.27.2. Background of Law**

The language of subsection (a) was originally enacted in 1940 by An Act to Expedite the National Defense and for Other Purposes.<sup>1</sup> That Act prohibited the disposal of any military or naval weapon, ship, aircraft or other military supplies without certification by the Chief of Naval Operations or the Army Chief of Staff that such material is not essential to the national defense. It also included a congressional notice requirement. The legislative history to that legislation does not contain any explanatory language. The statute was amended in 1946 to delete the congressional reporting requirement.<sup>2</sup> It was deemed superfluous because of then-current disposal procedures under the Surplus Property Act of 1944.<sup>3</sup>

In 1951, the language of current subsection (b) was added. It originally provided that, notwithstanding the Mutual Defense Assistance Act of 1949, no battleship, carrier, cruiser, destroyer, or submarine that has not been stricken may be sold or otherwise disposed of unless authorized by the Congress.<sup>4</sup> The House Committee Report indicated that the provisions "embody the intent . . . that the combatant capabilities of the United States Navy should not be decreased as a result of the sale or gift of combat ships to foreign governments without the specific approval of the Congress in each instance."<sup>5</sup>

In 1974, subsection (b) was amended to substantially its present form by the Military Authorization Act for Fiscal Year 1975.<sup>6</sup> The language originated in the Senate version of that bill. The Senate Committee Report indicated that the language was added to the bill to insure that

---

<sup>1</sup>Pub. L. No. 76-671, § 14, 54 Stat. 681 (1940).

<sup>2</sup>Pub. L. No. 79-615, §§ 29 and 57, 60 Stat. 871 (1946).

<sup>3</sup>H.R. REP. No. 311, 79th Cong., 1st Sess. (item 59) (1945).

<sup>4</sup>Pub. L. No. 82-3, § 4, 65 Stat. 4 (1951).

<sup>5</sup>H.R. REP. No. 1, 82nd Cong., 2nd Sess. 1 (1951).

<sup>6</sup>Pub. L. No. 93-365, § 702, 88 Stat. 405 (1974).

Congress would be made aware of and approve the disposal of naval vessels as authorized.<sup>7</sup> The Conference Report to that legislation indicated that the language was intended to get formal congressional control over the transfer of naval vessels to other nations.<sup>8</sup> In 1976, the statute was amended to raise the vessel transfer notification threshold from 2,000 to 3,000 tons.<sup>9</sup> The House Committee Report indicated that the amendment was intended to reduce the number of transfers that would require authorizing legislation.<sup>10</sup>

In 1985, subsection (b) was again amended to add the requirement that any lease or loan under that section must be made in accordance with the provisions of the Arms Export Control Act or the Foreign Assistance Act of 1961.<sup>11</sup> The Senate Report indicated that the amendment was intended to clarify ambiguity within the Navy as to whether transfers under this section were in fact subject to pricing standards established by the Arms Export Control Act.<sup>12</sup>

### 3.3.27.3. Law in Practice

There are no specific FAR, DFARS, or Navy Supplement regulations implementing this statute. The Office of the Chief of Naval Operations recommends retention of subsection (a) in order to ensure not all Chief of Naval Operations has the opportunity to review proposed dispositions of vessels in order to certify that the vessel is not essential to the national defense.<sup>13</sup> Subsection (b) is administered by Navy International Programs Office (Navy IPO). That Office reports that the sole purpose of this statute is to provide congressional notification for ship transfers either through enactment of enabling legislation or through the 30-day congressional notification provision.<sup>14</sup> This statute is not relied upon as statutory authority to transfer naval vessels. The Navy relies exclusively upon the following statutes, all of which contain their own congressional notification provisions, as authority to transfer vessels to foreign governments:

- The Arms Export Control Act, sections 21 and 36(b)(1)(sales)(22 U.S.C. §§ 2761 and 2776);
- The Arms Export Control Act, section 61 (lease) (22 U.S.C. § 2796); (30 day congressional notification provisions)
- Foreign Assistance Act, section 516 (22 U.S.C. § 2321j);
- Foreign Assistance Act, section 517 (22 U.S.C. § 2321k); (30 day congressional notification provisions);

<sup>7</sup>S. REP. NO. 884, 93rd Cong., 2nd Sess. (1974).

<sup>8</sup>S. CONF. REP. NO. 1038, 93rd Cong., 2nd Sess. 148 (1971).

<sup>9</sup>Pub. L. No. 94-457, § 2, 90 Stat. 1938, (1976).

<sup>10</sup>H.R. REP. NO. 1646, 94th Cong., 2nd Sess. 4, 5 (1976).

<sup>11</sup>Pub. L. No. 99-83, § 122, Aug. 8, 1985.

<sup>12</sup>S. Rep. 34, 99th Cong., 1st Sess. April 19, 1985.

<sup>13</sup>Memorandum from Deputy Advisor, Chief of Naval Operations, to Deputy Chief of Naval Operations, dated 6 Nov. 1992.

<sup>14</sup>Datafax transmission from Mr. R. David Gale, Jr., Assistant to the General Counsel (International), Department of the Navy, to Ms. Theresa Squillacote, dated 24 Aug. 1992.

- Foreign Assistance Act, section 519 (22 U.S.C. § 2321m) (15 day congressional notification provision)

Navy IPO reports further that this statute is extremely burdensome to administer because it frequently jeopardizes "hot ship" transfers. In a "hot ship" transfer, the foreign crew relieves the watch of the U.S. Navy crew coincident with the decommissioning of the ship from the U.S. Navy. Such transfers are mutually beneficial since inactivation costs for the U.S. Navy and reactivation costs for the recipient Navy are minimized. However, timing on such transfers is crucial, and a delay in transfer is costly in terms of both money and manpower. The timing of enabling legislation required by this statute, as well as the 30 day continuous congressional session requirement,<sup>15</sup> is often uncertain. This statute therefore frequently renders "hot ship" transfers difficult or even impossible, resulting in a waste of appropriated funds. The Navy IPO cites as a recent example of this problem a significant delay in the transfer of 3 Knox class frigates and an Adams class destroyer to Greece in early 1992.<sup>16</sup>

#### **3.3.27.4. Recommendation and Justification**

**Amend to repeal subsection (b); retain and consolidate subsection (a).**

Subsection (a) of this section should be retained and consolidated into the proposed Disposition of Naval Vessels statute. Subsection (a) of this section provides that no ship may be transferred to any entity without prior approval by the Chief of Naval Operations. This certification requirement ensures appropriate consideration of national defense issues within the department of the Navy prior to disposition of the listed vessels.

Subsection (b) of the statute, as amended, was intended to provide Congress with authority to control vessel transfers by requiring notice and enabling legislation for transfers to foreign governments. However, Congress is able to obtain the same control through the notification provisions present in the statutory authorities relied upon by the Navy IPO for vessel transfers to other nations. Moreover, because authority to sell, lease or otherwise dispose of such vessels is provided by other statutory authority, the enabling legislation requirement of this statute is also redundant. Therefore, the Panel recommends repeal of subsection (b).

The Department of the Navy concurs with the proposed disposition.<sup>17</sup>

---

<sup>15</sup>The statutory authorities relied upon by Navy IPO for authority to transfer require advance congressional notification periods but they do not contain the continuous session requirement present here.

<sup>16</sup>Datafax transmission from Mr. R. David Gale, Jr., Assistant to the General Counsel (International), Department of the Navy, to Ms. Theresa Squillacote, dated 24 Aug. 1992

<sup>17</sup>Memorandum from Mr. R. David Gale Jr., Assistant to the General Counsel (International), Department of the Navy to Chief of Naval Operations, dated 12 Nov. 1992.

### **3.3.27.5. Relationship to Objectives**

Amendment of this statute will further the goal of streamlining the DOD acquisition process by deleting a redundant provision and consolidating the remaining authority into a streamlined statute.

### **3.3.27.6. Proposed Statute**

Subsection (g) of proposed text of consolidated statute, Disposition of Naval Vessels at chapter 3.3.24 contains the language currently set forth within subsection 7303(a). Proposed subsection (g) provides as follows:

g) Notwithstanding any other provision of law, no battleship, aircraft carrier, cruiser, or destroyer, or submarine of the Navy may be sold, transferred, or otherwise disposed of, unless the Chief of Naval Operations certifies that it is not essential to the defense of the United States.

### **Current Statutes**

The text of the current subsection 7307(a) is as follows:

10 U.S.C. § 7307. Restriction on disposal

(a) Notwithstanding any other provision of law, no battleship, aircraft carrier, cruiser, destroyer, or submarine of the Navy may be sold, transferred, or otherwise disposed of, unless the Chief of Naval Operations certifies that it is not essential to the defense of the United States.

The text of the current subsection (b), recommended for repeal, is as follows:

(b)(1) A naval vessel in excess of 3,000 tons or less than 20 years of age may not be sold, leased, granted, loaned, bartered, transferred, or otherwise disposed of to another nation unless the disposition of that vessel is approved by law enacted after August 5, 1974, except that any lease or loan of such a vessel under such a law shall be made only in accordance with the provisions of chapter 6 of the Arms Export Control Act (22 U.S.C. 2796 et seq.) or chapter 2 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2311 et seq.)

2) A naval vessel not subject to the provisions of paragraph (1) may be sold, leased, granted, loaned, bartered, transferred, or otherwise disposed of to another nation in accordance with applicable provisions of law only after the Secretary of the Navy, or his designee, has notified the Committees on Armed Services of the Senate and the House of Representatives in writing of the proposed disposition and 30 days of continuous session of Congress have expired following the date on which notice was transmitted to such committees. For purposes of this paragraph, the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of such 30-day period.

### **3.3.28. 10 U.S.C. § 7308**

#### **Transfer or gift of obsolete, condemned, or captured vessels**

##### **3.3.28.1. Summary of Law**

This section provides that, subject to certain provisions in the Federal Property and Administrative Services Act of 1949 (40 U.S.C. § 474), the Secretary of the Navy may transfer by gift or under such terms as the Secretary prescribes, any obsolete, condemned, or captured naval vessel to any State, Territory, Commonwealth, or U.S. possession, any municipal corporation or political subdivision thereof, the District of Columbia or any nonprofit or not-for-profit entity. Each transfer agreement must provide that the transfer shall be without cost to the government and that the vessel will be maintained in a condition satisfactory to the Navy. The section also contains a 60 day congressional notice requirement.

##### **3.3.28.2. Background of Law**

This section was originally enacted in 1946 by An Act to Provide for the Disposition of Vessels, Trophies, Relics and Material of Historical Interest.<sup>1</sup> The House Committee Report indicated that the authority was conferred because transfer of trophies and naval material of historic interest would promote the interest of the public in national defense matters and because such material commemorates historic deeds performed with and by such materials.<sup>2</sup> Major language changes were made in 1980 and 1988.<sup>3</sup> In 1990 an additional requirement that during the 60 day period, the transfer is approved only if Congress does not pass a concurrent resolution stating that it does not favor the proposed transfer, was deleted.<sup>4</sup>

##### **3.3.28.3. Law in Practice**

This section is administered by Naval Sea Systems Command. That Office reports that it frequently relies on this law.<sup>5</sup> That Office notes that it is particularly important that the vessel donation be at no cost to the government, and that the transferee be required to maintain the vessel in a condition satisfactory to the Navy.<sup>6</sup>

---

<sup>1</sup>Pub. L. No. 79-649, § 1, 60 Stat. 847, (1946).

<sup>2</sup>H.R. REP. No. 2552, 79th Cong., 2nd Sess. 1,2 (1946).

<sup>3</sup>Pub. L. No. 96-513, § 513(29), 94 Stat. 2933 (1980); Pub. L. No. 100-456, § 1234(a)(6), 102 Stat. 2059 (1986).

<sup>4</sup>Pub. L. No. 101-510, § 1427, 104 Stat. 1685 (1990).

<sup>5</sup>Datafax transmission from Ms. Janice Passo, Naval Sea Systems Command, Office of Counsel, to Ms. Theresa Squillacote, dated 17 September 1992.

<sup>6</sup>*Id.*

#### 3.3.28.4. Recommendation and Justification

##### Retain and Consolidate

The Panel recommends that the authority conferred by this statute be retained because it continues to serve a valid purpose within the Department of the Navy. However, this authority should be consolidated within the draft, consolidated statute on Disposition of Naval Vessels.

Naval Sea Systems Command, Office of Counsel, concurs with this proposed consolidation.<sup>7</sup>

#### 3.3.28.5. Relationship to Objectives

Consolidation of this statute will promote the goal of streamlining the DOD acquisition process.

#### 3.3.28.6. Proposed Statute

Subsection (d) of proposed text of consolidated statute, Disposition of Naval Vessels at chapter 3.3.24 provides as follows:

d) The Secretary of the Navy is further authorized to transfer, by gift or otherwise, any stricken or captured vessel to:

(1) any state, commonwealth or possession of the United States, municipal corporation or any political subdivision thereof;

(2) the District of Columbia; or

(3) any not-for-profit or nonprofit entity provided, that the transfer occur at no cost to the United States and that the transferee agrees to maintain the vessel in a condition satisfactory to the Navy.

#### Current Statutes

The text of the current Section 7308 is as follows:

10 U.S.C. § 7308. Transfer or gift of obsolete, condemned, or captured vessels

(a) Subject to subsections (c) and (d) of section 602 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 474), the Secretary of the Navy may transfer by gift or otherwise, on terms prescribed by him, any obsolete or condemned vessel of the Navy or any captured vessel in the possession of the Department of the Navy to--

---

<sup>7</sup>*Id.*

(1) any State, Territory, Commonwealth, or possession of the United States, or any municipal corporation or political subdivision thereof;

(2) the District of Columbia; or

(3) any corporation or association whose charter or articles of agreement denies it the right to operate for profit.

(b) Each agreement for the transfer of a vessel under this section shall include a stipulation that--

(1) the transferee will maintain the vessel in a condition satisfactory to the Department of the Navy; and

(2) no expense to the United States will result from the transfer.

(c) No transfer under this section takes effect unless--

(1) notice of the proposal to make the transfer is sent to Congress; and

(2) 60 calendar days of continuous session of Congress have expired after the notice is sent to Congress.

### **3.3.29. 10 U.S.C. § 7310**

#### **Policy in constructing combatant vehicles**

##### **3.3.29.1. Summary of Law**

This section states a policy to modernize the combatant forces of the Navy through construction of advanced, versatile, survivable and cost-effective combatant vessels in sufficient numbers. It requires the Navy to develop plans and programs for the construction and deployment of weapons systems, including naval aviation, that are more effective, more survivable, and less costly than those naval systems as of October, 1978. It includes a reporting requirement.

##### **3.3.29.2. Background of Law**

This section was enacted by the DOD Appropriation Authorization Act of 1979 [sic].<sup>1</sup> The language first appeared in the Senate version of the bill.<sup>2</sup> The Senate Report stated that the provision was intended to bring greater insight and expertise to the problem of obtaining needed ships in a timely and efficient manner.<sup>3</sup>

##### **3.3.29.3. Law in Practice**

The Space and Naval Warfare Systems Command Office of Counsel commented that it did not see a need for the continued existence of this section. The issues raised by this statute are resolved during the give and take of the budget process. The Naval Air Systems Command Office of Counsel also felt that the section was unnecessary, given today's circumstance of downsizing the naval force structure.<sup>4</sup>

Based on the above, the Navy Office of General Counsel concluded that today's circumstances of downsizing the naval force structure are completely different from those prevailing in 1978. This section no longer accurately expresses national policy. Accordingly, this section should be recommended for repeal.<sup>5</sup>

---

<sup>1</sup>Pub. L. No. 95-485, § 810(a), 92 Stat. 1623 (1978).

<sup>2</sup>S. REP. NO. 2571, 95th Cong., 1st Sess. 342 (1979).

<sup>3</sup>S. REP. NO. 826, 95th Cong., 2d Sess. 106 (1978).

<sup>4</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 8 Apr. 1992.

<sup>5</sup>*Id.*

#### **3.3.29.4. Recommendation and Justification**

##### **Repeal**

The Panel concurs with the recommendation of the Navy Office of General Counsel that this section should be repealed. The statute was relevant to the national security conditions existing at the time the law was enacted. However, changed conditions have made this statute obsolete. A naval modernizing policy mandating a comparison of force structure to that in existence on a specified date serves no value where political and military conditions have changed so drastically since this section was originally enacted.

#### **3.3.29.5. Relationship to Objectives**

Repeal of this statute furthers the goal of streamlining the DOD acquisition process by removing an anachronistic provision.

### **3.3.30. 10 U.S.C. § 7311**

#### **Repair or maintenance of naval vessels: handling of hazardous waste**

##### **3.3.30.1. Summary of Law**

This section provides that each contract entered into for work on a naval vessel (other than for new construction) shall include provisions requiring the identification of hazardous waste, specifying government and contractor responsibility for hazardous waste removal, providing for contractor compensation for hazardous waste removal, and establishing accountability guidelines. It also provides for contract renegotiation in specified circumstances.

##### **3.3.30.2. Background of Law**

This section was originally enacted by the National Defense Authorization Act for 1987.<sup>1</sup> It was intended to accommodate contractors' concern regarding liability for the disposition of hazardous waste produced on ships during overhaul. In 1989, the section was amended to apply to all contracts for naval vessel work except new construction, to set forth the identification requirements at subsection (a)(1) and to specify the situations in which contract negotiation is required.<sup>2</sup> The Conference Report indicated that the amendments were designed to ensure that hazardous waste is appropriately identified.<sup>3</sup> The Report stated that:

The conferees emphasize that the conference agreement does not alter any federal liability for the handling of hazardous waste as established by the Solid Waste Disposal Act, and other applicable Federal laws and regulations. Finally, the conferees agree that this approach to handling hazardous wastes arising from ship repair work is taken only because of the unique circumstances of such work, such as the quantity and diverse nature of hazardous wastes arising from such work, and because of the complexity of the determination under law and implementing regulations of how and when hazardous waste is generated on board a U.S. naval vessel. For these reasons, the conferees do not view this conference agreement as providing a precedent for similar handling of issues involving hazardous wastes arising from other situations.<sup>4</sup>

<sup>1</sup>Pub. L. No. 99-661, §1202(a), 100 Stat. 3967 (1986).

<sup>2</sup>Pub. L. No. 101-189, § 1011(a), 103 Stat. 1599 (1989).

<sup>3</sup>H.R. REP. No. 331, 101st Cong., 1st Sess. 669 (1989).

<sup>4</sup>*Id.*

### 3.3.30.3. Law in Practice

As presently written, 10 U.S.C. § 7311 presents two problems. First, estimating the type and amount of hazardous waste to be generated during ship repair is difficult because this information is not generally available during ship operation periods and often is developed only as contract work progresses. Second, section 7311's requirements regarding the use of Navy and contractor generator numbers are inconsistent with the general Federal and state regulatory schemes covering the issuance of generator identification numbers and use of hazardous waste manifests.

Any effort to address the first problem by repealing section 7311's provisions requiring notice to ship repair contractors about types and amounts of hazardous waste would be contentious.<sup>5</sup> The statute addresses the difficulty of preparing such estimates by requiring renegotiation of any contract in which the type and amount of waste is different from the Government's estimates. Inasmuch as Congress has placed the risk on the Navy, the Navy must work on ways to lessen this risk within the established statutory scheme.

The second problem involves subsection 7311(a)(4), which requires the use of a Navy generator number for solely Navy generated waste, a contractor generator number for solely contractor generated waste, and both Navy and contractor generator numbers for co-generated waste on manifests, contracts, invoices, and other documents. At present, the Environmental Protection Agency (EPA) has no regulations defining co-generators nor do EPA manifests allow space for the names and numbers of more than one generator. The Navy's definition is consistent with the regulatory definition of "generator" at 40 C.F.R. § 260-10 as "any person, by site, whose act or process produces hazardous waste identified or listed in part 261 of this chapter or whose act first causes a hazardous waste to become subject to regulation." Implementation of the Navy's definition, however, has been difficult because EPA has refused to issue guidance on the implementation of 7311 and States have refused to issue more than one generator number for a particular site or have issued numbers with restrictions on their use.

Ship repair contractors want this problem resolved by amending section 7311 to make the vessel itself, when in the shipyard, the "site" for which a generator number is issued and to require EPA to issue such numbers to the Navy.<sup>6</sup> The Navy does not support this position because it is inconsistent with specific provisions enacted in the Federal Facilities Compliance Act at the Administration's request. These provisions establish that shipboard hazardous material is not subject to regulation under the Resource Conservation and Recovery Act (RCRA) until it is removed from the vessel.<sup>7</sup>

---

<sup>5</sup>Memorandum from Mr. Harvey J. Wilcox, Deputy General Counsel (Logistics), Department of the Navy, to Counsel, Acquisition Law Task Force, dated 28 Apr. 1992.

<sup>6</sup>Letter from Council of Defense and Space Industry Associations (CODSIA) to Mr. Gary Quigley and Mr. Jack Harding, dated 23 Apr. 1992.

<sup>7</sup>Memorandum from Naval Sea Systems Command to Director, Defense Procurement, DOD, dated 12 Dec. 1991. The Panel's review of RCRA is at ch 4.4.3. of this Report.

Ship repair contractors appear to oppose use of their generator numbers on any hazardous wastes from Navy vessels because their identification as generators may expose them to potential liability for cleanup costs for improperly disposed of hazardous waste. Their position, however, is inconsistent with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), which clearly regards the person who arranges for disposal or the transporter who selects the disposal as the liable entity. The shift of all the liability to the Navy would remove any incentive for the repair contractor to take the necessary care in making these arrangements. Moreover, there is no evidence that Congress, in enacting 10 U.S.C. § 7311, intended to shield ship repair contractors from all liability for their hazardous waste activities. Subsection 7311(a)(4) repeatedly references "applicable law" and the RCRA. And, subsection 7311(d) states that nothing in the statute is intended to alter those provisions of RCRA (which amended the Solid Waste Disposal Act) relating to generators of hazardous waste. Therefore, the Navy recommends forwarding the statute to EPA for the promulgation of regulations defining co-generators and related implementation instructions dealing with co-generation or referring it to congressional committees reviewing RCRA authorization with a request to address the co-generation issue.<sup>8</sup>

With respect to this statute, the Shipbuilders' Council of America notes that congressional action is required to direct the EPA to implement 10 U.S.C. § 7311 with a standard that will ensure that hazardous waste is properly identified, and that hazardous waste generator identification numbers are issued in a uniform manner throughout the United States.<sup>9</sup> The Council notes that such action by the Congress would alleviate most of the problems that evolve around the contract clauses that currently reference 10 U.S.C. § 7311, and most importantly, would alleviate the situation that places both the Navy and contractors in jeopardy of civil or criminal violations of existing environmental laws.<sup>10</sup>

#### **3.3.30.4. Recommendation and Justification**

##### **Retain**

The Panel recommends that this section be retained. Portions of the section may be considered related to the DOD acquisition process because the statute mandates certain contract terms. However, the Panel does not propose any amendment to address the issues raised above as such statutory provisions are secondary to the fundamental environmental issues regarding the reconciliation of the statute with the Resource Conservation and Recovery Act and the allocation of liability between the Government and the contractor for hazardous waste generated during the course of ship repair. The definition of a co-generator and the related implementation procedures are currently under consideration by the Environmental Protection Agency, which has primary responsibility and the expertise to resolve these legal issues. Any attempt to repeal section 7311 will engender strong opposition and any attempt to move section 7311 from Title 10 to Title 42

---

<sup>8</sup>*Id.*

<sup>9</sup>Letter from Mr. Frank Losey, General Counsel, Shipbuilders Council of America, to Mr. Anthony Gamba and Mr. LeRoy Haugh, dated 17 Nov. 1992.

<sup>10</sup>*Id.*

will require support from both the Congressional Armed Services Committees and the Environmental Committees.

Therefore, the Panel recommends retention of this statute with a further recommendation to the Congress that it direct the EPA to implement 10 U.S.C. § 7311 with a standard that will ensure that hazardous waste is properly identified, and that hazardous waste generator identification numbers are issued in a uniform manner throughout the United States.

#### **3.3.30.5. Relationship to Objectives**

Retention of this statute will promote the best interests of the DOD by maintaining an equitable distribution of liability for hazardous waste disposal between DOD and private ship contractors.

### **3.3.31. 10 U.S.C. § 7313**

#### **Ship overhaul work: availability of appropriations for unusual cost overruns and for changes in scope of work**

##### **3.3.31.1. Summary of Law**

This section provides that appropriations available to the DOD for a fiscal year may be used for payment of unusual cost overruns incident to ship overhaul, maintenance, and repair for a vessel inducted into an industrial-fund activity or contracted for during a prior fiscal year. This statute also provides that an appropriation may be used after the otherwise-applicable expiration of the availability for obligation of that appropriation for changes in scope of work for ship overhaul, maintenance, and repair.

##### **3.3.31.2. Background of Law**

This section was originally enacted by the National Defense Appropriations Act for Fiscal Year 1987.<sup>1</sup> No legislative history is available. It was codified into Title 10 in 1988.<sup>2</sup>

##### **3.3.31.3. Law in Practice**

The Office of General Counsel, Department of the Navy, reports that this statute is still currently relied upon, particularly by Naval Sea Systems Command, which strongly urges its retention.<sup>3</sup> That Office notes that the statute provides needed flexibility in unique fiscal issues arising from ship repair and overhaul.<sup>4</sup>

##### **3.3.31.4. Recommendation and Justification**

###### **Retain**

The Panel recommends that this statute be retained. It continues adequately to serve a valid purpose within the Department of the Navy.

##### **3.3.31.5. Relationship to Objectives**

Retention of this statute will promote the best interests of the DOD by providing essential fiscal authority to meet unique naval repair needs.

<sup>4</sup>*Id.*

### **3.3.32. 10 U.S.C. §§ 7361 - 7367**

#### **Naval salvage facilities**

##### **3.3.32.1. Summary of Laws**

The sections within chapter 637 of Title 10 set forth authorization for naval salvage activities by the Department of the Navy. Specifically, section 7361 authorizes the Secretary of the Navy to provide for necessary salvage facilities. The Secretary must submit any proposed contract that affects the Department of Transportation to the Secretary of Transportation. Term contracts are authorized only if available commercial facilities are inadequate, and public notice has ensured adequate competition.

Section 7362 authorizes the Secretary of the Navy to acquire vessels and equipment for operation by private salvage companies. Section 7363 requires the Secretary of the Navy, prior to obtaining a salvage vessel, to obtain a written agreement that any transferee will use a transferred vessel to support organized offshore salvage facilities for as many years as the Secretary deems appropriate.

Section 7364 authorizes the Secretary of the Navy to advance to private salvage companies funds as necessary to provide for immediate financing of salvage operations.<sup>1</sup> Section 7365 provides authority to settle claims by the U.S. for Navy salvage services. Section 7366 limits annual appropriations for salvage activities to \$3,000,000 annually. Finally, section 7367 provides that amounts received under these authorities shall be credited to salvage appropriations. However, any amount that exceeds costs incurred must be submitted to the Treasury.

##### **3.3.32.2. Background of Laws**

All of the sections within this chapter were enacted by the 1948 Act Authorizing Naval Salvage Facilities.<sup>2</sup> The purpose of that legislation was to authorize the Secretary of the Navy to provide offshore salvage facilities for the protection of public and private shipping in U.S. waters. The House Committee report noted that offshore salvage was essential to prevent stranded vessels from becoming a complete loss.<sup>3</sup> The Report also noted there was an insufficient level of private services available because private salvage companies were often unable to generate a profit by their work. The bill was intended to correct that problem by enabling the Secretary of the Navy to contract with private salvage companies and to assist those companies in maintaining adequate facilities and equipment.<sup>4</sup>

---

<sup>1</sup>Providing for advancement of funds for salvage operations, 10 U.S.C. § 7364 has been addressed in ch. 2.1.4 of this Report.

<sup>2</sup>Pub. L. No. 80-513, ch 256, § 1(a), 62 Stat. 209 (1948).

<sup>3</sup>H.R. REP. No. 1605, 80th Cong., 2d Sess. 2, 3 (1948).

<sup>4</sup>*Id.*

### 3.3.32.3. Laws in Practice

Naval Sea Systems Command Office of Counsel reports all of these sections continue to provide the basis for the operations of the Navy's Supervisor of Salvage and should be retained. The Navy Office of General Counsel recommends that these sections be retained.<sup>5</sup> No issues regarding regulatory implementation or other practical application of these sections have been identified.<sup>6</sup>

### 3.3.32.4. Recommendation and Justification

#### Retain and Consolidate

The authorities provided by these sections should be retained in their entirety but consolidated. They continue to serve a valid purpose by providing the statutory basis for naval salvage operations. Further, no problems with these provisions have been raised requiring legislative adjustment.

However, the Panel recommends these statutes be consolidated into a single statute for streamlining purposes. The Naval Sea Systems Command Office of Counsel concurs in the language of the consolidated statute proposed below.<sup>7</sup>

### 3.3.32.5. Relationship to Objectives

Retention and consolidation of these statutory authorities would promote the goal of streamlining the DOD acquisition process.

### 3.3.32.6. Proposed Statute

#### Consolidated Naval Salvage Facilities Statute

- a) The Secretary of the Navy may contract or otherwise provide for necessary salvage facilities for public and private vessels.
- b) The Secretary shall submit to the Secretary of Transportation each proposed salvage contract that affects the interests of the Department of Transportation.

---

<sup>5</sup>Memorandum from Mr. Harvey Wilcox, Deputy General Counsel, Department of the Navy, to Counsel, Acquisition Law Task Force, dates 8 April 1991.

<sup>6</sup>Memorandum from Mr. Richard A. Lisker, Assistant Counsel, Naval Sea Systems Command to Ms. Theresa Squillacote, dated 24 July 1992.

<sup>7</sup>*Supra* note 5. The annual appropriation limit of \$3 million, § 7366, is deleted. The original purpose of this appropriation limit is unclear, but it appears to have little utility in the current authorization and appropriation process.

c) Term contracts are authorized only upon a showing that available commercial salvage facilities are inadequate to meet national defense requirements and upon adequate public notice of intent to so contract.

d) The Secretary of the Navy may acquire or transfer such vessels and equipment for operation by private salvage companies as the Secretary considers necessary.

e) Any private recipient of any salvage vessel or gear must agree in writing that such vessel or gear will be used to support organized offshore salvage facilities for as many years as the Secretary shall consider appropriate.

f) Monies received under this chapter shall be credited to appropriations for maintaining naval salvage facilities. However, any amount received in excess of naval salvage costs incurred in that fiscal year shall be covered into the Treasury.

g) The Secretary of the Navy, or designee, may settle and receive payment of any claim by the United States for salvage services rendered by the Department of the Navy.

### **Current Statutes**

The current statutes provide as follows:

#### **§ 7361. Naval salvage facilities: contracts for commercial facilities**

(a) The Secretary of the Navy may provide, by contract or otherwise, necessary salvage facilities for public and private vessels upon such terms as he determines to be in the best interest of the United States.

(b) The Secretary shall submit to the Secretary of Transportation for recommendation and comment each proposed contract for salvage facilities that affects the interests of the Department of Transportation.

(c) Term contracts for salvage facilities may be made under this section only if--

(1) the Secretary of the Navy determines that available commercial salvage facilities are inadequate to meet the requirements of national defense; and

(2) public notice of the intention to enter into the contracts has been given in a manner and for a period that will, in the Secretary's judgment, provide the maximum competition for such contracts among commercial salvage organizations.

#### **§ 7362. Commercial use of naval facilities**

The Secretary of the Navy may acquire or transfer, by charter or otherwise, for operation by private salvage companies, such vessels and equipment as he considers necessary.

**§ 7363. Transfer of equipment: contract provisions**

Before any salvage vessel or salvage gear is sold, chartered, leased, lent, or otherwise transferred by the Department of the Navy to any private party, the transferee must agree in writing with the Department that the vessel or gear will be used to support organized offshore salvage facilities for a period of as many years as the Secretary considers appropriate. The agreement shall contain such other provisions as the Secretary considers appropriate to assure the fulfillment of the undertaking.

**§ 7365. Settlement of claims**

The Secretary of the Navy, or his designee, may consider, ascertain, adjust, determine, compromise, or settle and receive payment of any claim by the United States for salvage services rendered by the Department of the Navy.

**§ 7366. Limitation on appropriations**

Not more than \$ 3,000,000 may be appropriated annually for the administration of this chapter.

**§ 7367. Disposition of receipts**

Money received under this chapter shall be credited to appropriations for maintaining salvage facilities by the Department of the Navy. However, if the amount received in any year exceeds the cost incurred by the Navy during that year in giving and maintaining salvage services, the excess shall be covered into the Treasury.

## **3.4. The Brooks Act and the Warner Amendment**

### **3.4.0. Introduction**

This subchapter examines the difficult issue of the process and structure by which the DOD acquires automatic data processing equipment (ADPE). Under the Brooks Act, the acquisition of ADPE by the federal executive agencies is centralized under the General Services Administration (GSA). That agency retains exclusive power to procure ADPE. While GSA delegates that authority, to varying degrees, to the individual agencies, it still retains extensive managerial oversight of this acquisition process.

GSA fulfills its oversight responsibilities under the Brooks Act by performing Information Resources Management (IRM) reviews. In its IRM review program, GSA conducts comprehensive information resources procurement and management review of federal agencies, including DOD. The IRM reviews include assessments of pre-acquisition studies, procurement and contracting practices, oversight of acquisition activities, internal delegations of procurement authority and specific agency delegation requests.

Under the Warner Amendment, however, DOD is authorized to purchase directly certain, delineated types of ADPE related to military or intelligence missions. In the exercise of that authority, and in conducting individual procurements when delegated authority by the GSA (through Delegations of Procurement Authority, or DPAs), the DOD components have developed their own, internal mechanisms for ADPE procurement. Indeed, DOD has recently begun implementation of Defense Management Review Directive 918, mandating the establishment of a new agency (the Defense Information Systems Agency, or DISA) within DOD to centralize ADPE acquisition and management.

The overlap between these structures has created a confusing hierarchy for ADPE procurement, one that is complicated by the statutory exemption in the Warner Amendment and by the legal issues surrounding the definition of ADPE. Because of this situation, many questions have arisen regarding the continued validity of the current GSA role in this process.

The Panel deliberated extensively over this question. It received comments from a wide variety of parties on this issue, and considered a number of alternative recommendations.<sup>1</sup> Nonetheless, the Panel was unable to achieve a consensus among its members as to a formal, legislative recommendation in this area. At a minimum, however, the Panel agreed that the blanket delegation of procurement authority to the DOD should be raised significantly.

---

<sup>1</sup>The Panel solicited comments from a number of Army Commands, as well as the Council of Defense and Space Industry Associations (CODSIA). In addition, a representative of the GSA Management Reviews Division made an extensive oral presentation to the Panel on 22 October 1992, followed by a written submission. Finally, agencies that specialize in DOD ADPE procurement, such as the Department of the Army Information System Selection and Acquisition Agency (ISSAA) and the Defense Information Systems Agency (DISA) also contributed to the Panel's deliberations in this area.

Therefore, this subchapter presents the two major alternative recommendations considered by the Panel, with supporting rationale for each. It precedes that discussion by examining the legislative histories of the two relevant statutes, and by examining the administrative and managerial aspects of DOD ADPE procurement.

The two primary recommendations considered by the Panel were (1) to amend the Warner Amendment to wholly exempt DOD from the Brooks Act, and with it from GSA oversight, or (2) to significantly increase the blanket delegation of procurement authority for DOD.

In support of the first recommendation, the Panel noted the following points. First, it was apparent that many of the underlying reasons for enactment of the Brooks Act in 1965 are no longer relevant. These reasons include better utilization of government ADPE, better management information and more economic acquisition of government ADPE. The near-obsolence of large, mainframe computer systems obviates multiagency service centers and effective reutilization of ADPE resources within the federal government. Also, individual agencies have at times been able to achieve greater economies of scale than the GSA when purchasing ADPE on their own. This conclusion is particularly true of DOD, the federal sector's largest single ADPE purchaser.

Second, significant delays are associated with GSA oversight of ADPE procurement, and this oversight has spawned overlapping, and arguably unnecessary, layers of bureaucracy. This latter issue takes on greater meaning with the advent of the DISA within DOD.

Third, increasing ambiguity as to the legal definition of the term "automatic data processing equipment" has broadened the scope of the Brooks Act, significantly enlarging the scope of GSA's oversight role.

Based on these reasons, and particularly on the evidence that DOD, under DISA, should be able to exercise significant expertise when conducting its own ADPE procurements, the Panel considered at length the option of recommending a wholesale exemption of DOD from the Brooks Act.

The second alternative recommendation considered by the Panel was to amend the Brooks Act to mandate a significantly higher blanket delegation of procurement authority to DOD. This alternative would retain GSA's overall management review role, while permitting DOD greater latitude in conducting its individual ADPE procurements. This view is premised on the belief that GSA has developed significant expertise in ADPE acquisition and can meaningfully assist DOD components to more effectively manage their ADPE acquisition. This latter alternative was considered in conjunction with a recommendation that statutory limits be established to prevent a further broadening of the Brooks Act through legal interpretation.

The Panel did not achieve a consensus on this recommendation, either.

All Panel members agreed, however, that the DOD should have some relief from the DPA process, and, to this end, a significant increase in the blanket DPA should be granted.

In their oral presentation to the Panel, the GSA representatives indicated that the dollar value of DOD procurements that require individual DPAs should be raised. The Panel agrees, although it does not have an empirical basis upon which to recommend a specific dollar level. With the establishment of DISA, there will be a central point of review for most DOD ADPE procurements. Accordingly, the Panel believes that a uniform blanket DPA for DOD is justified. According to the GSA representatives, the level of blanket DPAs for major agencies may be raised to \$25 million. Given the substantial ADPE expertise and the central review of DISA, it appears that the DOD blanket delegation should be at least as high.

### 3.4.1. 40 U.S.C. § 759 and 10 U.S.C. § 2315

#### The Brooks Act and the Warner Amendment

##### 3.4.1.1. Summary of Laws

- 40 U.S.C. § 759

This section, known as the Brooks Act, assigns to the General Services Administration (GSA) responsibility for acquisition of all automatic data processing equipment (ADPE) and related services for the federal agencies. Specifically, this law authorizes and directs the Administrator of the GSA to coordinate and provide for the purchase, lease and maintenance of ADPE by federal agencies. ADPE is defined as "any equipment or interconnected system or subsystems of equipment that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching interchange, transmission, or reception, of data or information . . . by a Federal agency."<sup>1</sup>

The Administrator is not responsible for the acquisition of certain, specified categories of ADPE acquisition, including DOD ADPE procurement if the function, operation, or use involves intelligence activities, national security cryptologic activities, the command and control of military forces, or equipment that is integral to a weapon system or critical to the direct fulfillment of military or intelligence missions.

The Administrator may provide for joint utilization by, or transfer of, such equipment among federal agencies, and may also delegate that authority. The Administrator may also delegate to an agency official<sup>2</sup> authority to lease, purchase or maintain ADPE if the Administrator determines that this official is sufficiently independent of program responsibility, and has sufficient experience and resources and the ability to carry out fairly and effectively procurements under this section.<sup>3</sup>

The Administrator may also delegate to Federal agencies the authority to purchase, lease and maintain ADPE when necessary for economy and efficiency, when essential to national defense or security, or when necessary or desirable to allow for the orderly implementation of a program for the utilization of such equipment. These delegations are referred to as Delegations of Procurement Authority, or DPAs. The Administrator retains authority to revoke any such delegation, and a delegation does not preclude further review by the Administrator.<sup>4</sup>

This law also provides that the Secretary of Commerce shall promulgate compulsory standards for federal computer systems, although the agency may set more stringent standards in

<sup>1</sup>40 U.S.C. § 759(a)(2)(A)(1986 and Supp. 1992). The definition also applies to such equipment as used under a federal agency contract.

<sup>2</sup>That official must be designated as the senior information management official pursuant to 44 U.S.C. § 3506.

<sup>3</sup>40 U.S.C. § 759(b) (1986 and Supp. 1992).

<sup>4</sup>*Id.*

certain circumstances. Also, the Secretary may waive such standards if they would adversely affect mission or cause a major adverse financial impact.<sup>5</sup>

All authority granted the Administrator and Secretary under this section must be exercised subject to direction by the President. Nor may the Administrator interfere with agency determinations as to their ADPE needs.<sup>6</sup>

This law also establishes that, upon the request of an interested party in connection with any procurement subject to this section, the Board of Contract Appeals of the General Services Administration (GSBCA or the Board) shall review any decision by a contracting officer concerning an ADPE procurement that is alleged to violate a statute or regulation.<sup>7</sup> This provision requires the GSBCA to hold a hearing within 10 days of receiving a protest and to make a final ruling within 45 working days. It also requires the Board to suspend the Agency Delegation of Procurement Authority until the resolution of the case, unless compelling reasons dictate otherwise. This law also provides each party the right to appeal any decision to a federal court of appeals.<sup>8</sup>

- **10 U.S.C. § 2315**

This section, known as the Warner Amendment, reiterates within Title 10 the exemption from the Brooks Act of DOD ADPE procurement if the function, operation, or use involves intelligence activities, national security cryptologic activities, the command and control of military forces, or equipment that is integral to a weapon system or critical to the direct fulfillment of military or intelligence missions.

### **3.4.1.2. Background of Laws**

- **The Brooks Act**

Before the advent of the Brooks Act in 1965, the acquisition of ADPE and services was decentralized among the various federal agencies. A Bureau of the Budget report in 1959 noted extensive inefficiency and duplication of effort from the decentralization of the federal ADPE acquisition function.<sup>9</sup> In response, and concerned that agencies were not conducting their ADPE acquisition properly, Congress commissioned the General Accounting Office between 1959 and 1964 to prepare reports and perform audits on the present state of ADPE acquisitions. Those reports and audits revealed essentially the same deficiencies cited in the initial Bureau of Budget report.<sup>10</sup>

---

<sup>5</sup>40 U.S.C. § 759(d) (1986 and Supp. 1992).

<sup>6</sup>40 U.S.C. § 759(e) (1986 and Supp. 1992).

<sup>7</sup>40 U.S.C. § 759(f) (1986 and Supp. 1992). This section is discussed in further detail in this report at ch. 1.5.9.

<sup>8</sup>*Id.*

<sup>9</sup>"Report of Findings and Recommendations Resulting from the Automatic Data Processing (ADP) Responsibilities Study, Sep. 1958 to June 1959," Bureau of the Budget. Reprinted in hearings on H.R. 4845, 89th Cong., 1st Sess. (1958).

<sup>10</sup>S. REP. NO. 938, 89th Cong., 1st Sess. 2 (1965).

It was against this background that the Congress enacted the Brooks Act in 1965.<sup>11</sup> At that time, annual government ADPE expenditures totaled about \$3 billion, or 3% of the entire federal budget. It was hoped that the Brooks Act would save the government between \$100 million and \$200 million annually.<sup>12</sup>

The Act's objectives were threefold: (1) to improve information management; (2) to optimize the utilization of government ADPE through sharing of assets, and (3) to provide more economical ADPE acquisition. In particular, the Brooks Act emphasized the efficient utilization of ADPE assets.<sup>13</sup> Because much government-owned equipment was used less than 20% of the time, Congress believed that increased time-sharing of this equipment would diminish the number of ADPE procurements. In addition, by creating a revolving fund, the government hoped to combine small buys into a single periodic government "mega-buy." Officials also hoped that buying in quantity would lower the overall costs to the government.<sup>14</sup>

The Brooks Act ultimately made the GSA the sole, directly-authorized procurer of all government automatic data processing equipment. This choice was based on GSA's role as the government's principal buyer and property manager. Assigning responsibility to the GSA also provided that agency with the opportunity to develop contracting and technical expertise in sufficient depth to keep pace with technological change and to avoid some of the worst problems of the past. At that time, the federal government was the largest single user of ADPE in the world.

- **The Paperwork Reduction Act of 1980 and the Paperwork Reduction Reauthorization Act of 1986**

In 1980, Congress passed the Paperwork Reduction Act of 1980 to promote greater efficiency and economy in federal agencies' information management activities.<sup>15</sup> That legislation, while not directly amending the Brooks Act, did require an agency head to designate a senior official to review agency information management, including information collection requests. The act also required federal agencies to assign to that official the responsibility for the conduct of acquisitions made pursuant to a Brooks Act delegation. As initially passed, the legislation required the Director of the newly established Office of Information and Regulatory Affairs to develop, in consultation with the Administrator of GSA, a five-year plan for meeting the ADPE needs of the federal government under the Brooks Act.

This Act was based in part upon the congressional perception that federal procurement of ADPE was inefficient and overly time-consuming.<sup>16</sup> However, four members of the Senate Governmental Affairs Committee expressly and vehemently opposed any legislation that would in effect constitute an expansion of the Brooks Act by broadening GSA's managerial role. Citing

<sup>11</sup>Pub. L. No. 89-306, 79 Stat. 1127 (1965).

<sup>12</sup>S. REP. NO. 938, 89th Cong., 1st Sess. 4 (1965).

<sup>13</sup>*Id.* at 5.

<sup>14</sup>*Id.*

<sup>15</sup>Pub. L. No. 96-551, 94 Stat. 2812, codified at 44 U.S.C. §§ 3501 et. seq.

<sup>16</sup>S. REP. NO. 930, 96th Cong., 2d Sess. (1980).

numerous studies, these members noted that implementation of the Brooks Act had resulted in unforeseen adverse impacts on timely and efficient procurement of ADPE.<sup>17</sup> These members noted that the deficiencies of ADPE procurement under the Brooks Act procedures were particularly evident in ADPE procurement by national defense and intelligence agencies. These members noted that significant delays had been demonstrated by Brooks Act mandated procedures, and that these procedures, if expanded by the current legislation, could seriously undermine national defense.<sup>18</sup>

The second major amendment to the Brooks Act was enacted by the Competition in Contracting Act of 1984.<sup>19</sup> That Act enacted the current subsection (f), authorizing the GSA Board of Contract Appeals to review "any decision by a contracting officer alleged to violate a statute or regulation," upon request of an interested party.<sup>20</sup>

In 1986, the Brooks Act was again amended by the Paperwork Reduction Reauthorization Act of 1986.<sup>21</sup> That Act revised the definition of ADPE at subsection (a)(2)(A) to include computer hardware, software, support services and communications. The broader definition was intended to acknowledge the merging of ADPE and communications technology.<sup>22</sup>

That legislation also authorized the "Agency Designated Senior IRM Officials" as individuals responsible for conduct of acquisitions under the Brooks Act delegation.<sup>23</sup> The Conference Report noted that this designation was intended to encourage the GSA Administrator to delegate procurement authority to officials with sufficient experience, resources and ability to conduct such procurements soundly. It was contemplated that the Administrator would grant such authority for all procurement for a period of time rather than on a case-by-case basis.<sup>24</sup> "Such delegations would be limited to agencies that demonstrate viable planning and management of their use of automatic data processing equipment."<sup>25</sup> This legislation is thus the statutory basis for establishment of the Management Reviews Division within the General Services Administration, responsible for on-site reviews of the agencies' information resources programs under the Brooks Act.

---

<sup>17</sup>S. REP. NO. 930, 96th Cong., 2d Sess. 65-107 (1980). These additional views were filed by Senators Henry Jackson, William Cohen, Ted Stevens and John Glenn.

<sup>18</sup>*Id.* These four members noted their intent to propose, during floor debates, an amendment that would exempt certain military critical ADPE. The scope of their amendment later formed the basis for the Warner Amendment legislation passed the following year.

<sup>19</sup>Deficit Reduction Act of 1984, Pub. L. No. 98-369, § 2713, 98 Stat. 494, 1184 (1984).

<sup>20</sup>*Id.* The Conference Report to that legislation noted that, "due to the increasing number of computer procurements conducted every year, coupled with the complexity of the technology, the current informal process of resolving conflicts between the buying agency and the suppliers has become cumbersome and prolonged. Further, charges have been made by both the agencies and the contractors that GSA's current process does not provide an objective forum for dispute resolution. The conferees believe that it has become increasingly apparent that a new forum is needed to provide a fair, equitable and timely remedy in this area." H. R. CONF. REP. ## • The Warner Amendment

The first major change in Brooks Act procedures specific to DOD ADPE procurement was the Warner Amendment of 1981, codified at 10 U.S.C. § 2315.<sup>26</sup> This amendment exempts certain DOD ADPE procurements from the restrictions of the Brooks Act if their function or operational use involves: intelligence activities, or cryptologic activities related to national security; command and control of military forces; equipment which is an integral part of a weapons system; or functions, operations, or uses that are critical to the direct fulfillment of military or intelligence missions. Specifically excluded from the scope of this exemption, however, is ADPE used for routine administrative and business applications, such as payroll, finance, logistics and personnel management.

During its enactment, the Warner Amendment was the subject of a heated controversy between the Senate and the House of Representatives. The Senate asserted that the national defense would be best served by streamlining the ADPE procurement process, arguing that the cumbersome procedures of the Brooks Act should not apply to most defense-related procurements.<sup>27</sup> The Senate Committee noted:

the redundant and time-consuming reviews and procedures entailed in the procurement of defense automatic data processing equipment and ADP services are not in the national interest. Beyond encouraging the acquisition of obsolescent equipment, the effect on the Department of Defense of Federal Government ADP procurement regulations has been essentially threefold: (1) They induce monetary inefficiencies by making it difficult for the armed services to obtain fewer and less costly ADPE services..(2) Federal regulations remove the ADP decision-making process from the Service level where knowledge and understanding of the operational requirements resides, and place it within ADP bureaucracies of the General Services Administration and the Office of Management and Budget not familiar with these requirements.. (3) Significant and unnecessary time and personnel costs are incurred in the course of most ADP procurements. <sup>28</sup>

The House opposed this idea, with some members pointing out that the government had saved \$4.2 billion in ADPE costs because of the competition requirements of the Brooks Act delegations. They argued that the Senate bill would waive many of those requirements, allowing the DOD "free reign" at the taxpayers expense.<sup>29</sup> Dissenting members of the House Committee, however, supported the exemption: "By involving GSA a new layer of regulation and bureaucracy will be imposed upon these computer acquisitions. To the degree that such specialized, non-general purpose ADPE are procured in a manner less timely than would

---

<sup>26</sup>This amendment was contained in the DOD Authorization Act for FY82, Pub. L. 97-86, 95 Stat. 1117 (1981).

<sup>27</sup>S. REP. NO. 58, 97th Cong., 1st Sess. 21 (1981)

<sup>28</sup>*Id.* at 142-43.

<sup>29</sup>H.R. REP. No. 71, 97th Cong., 1st Sess. 22 (1981).

otherwise be the case and to the extent that, because of interference with the planned procurement on the part of GSA, less capable systems are procured than had been sought, the defense posture of the United States will be adversely affected."<sup>30</sup>

In conference, the Senate version prevailed.<sup>31</sup> The Warner Amendment thus removes the procurement of all "military operational" ADPE resources from the jurisdiction of GSA and places the authority to procure directly with the DOD. No delegation is required, nor are these procurements subject to the protest resolution provisions of the Brooks Act.

### 3.4.1.3. Laws in Practice

- **GSA Oversight Responsibilities**

The GSA's regulations governing Federal Information Program (FIP) resources<sup>32</sup> are contained in the Federal Information Resource Management Regulation (FIRMR). The FIRMR specifies that it "relies on the FAR for general policies and procedures."<sup>33</sup> Part 39 of the FAR deals with acquisition of Information Resources within the government. An appendix to FAR Part 39 contains a republication of the entire section of the FIRMR acquisition provisions that apply to FIP resources. The FAR cautions that acquisition personnel "shall follow the FAR, except where the FIRMR prescribes special policies, procedures, provisions or clauses."<sup>34</sup> The Defense Federal Acquisition Regulation Supplement (DFARS), Part 239, supplements the FAR and the FIRMR within DOD. The DFARS specifies that the FIRMR takes precedence and must be followed when acquisitions are subject to the Brooks Act.<sup>35</sup>

While the administrator of the GSA has the sole authority to procure ADPE, he or she may delegate such authority to executive agencies and does so via both "blanket" delegations of procurement authority (DPA) up to a stated dollar amount and by a case-by-case delegation above that ceiling.<sup>36</sup> Generally, agencies may "competitively" acquire ADPE where the dollar value does not exceed \$2.5 million. Sole source procurements by agencies are limited to \$250,000 without GSA processing.<sup>37</sup> Some agencies have higher "blanket" delegations of procurement authority than others. Based on GSA's latest review of DOD components, the Departments of the Army and Air Force have received increased procurement authority; the Office of the Secretary of Defense and Department of the Navy's procurement authority remain at \$2.5 million; and the Defense Logistics Agency and the Army Corps of Engineers' procurement authorities were reduced to \$500,000.<sup>38</sup>

<sup>30</sup>H.R. REP. No. 71, Part 3, 97th Cong., 1st Sess. 53-54 (1981).

<sup>31</sup>H. R. CONF. REP. No. 311, 97th Cong., 1st Sess. 123, 124 (1981).

<sup>32</sup>GSA refers to ADPE by this term; FIP resources and ADPE are used herein interchangeably.

<sup>33</sup>FIRMR, 48 C.F.R. 201-39.1002a.

<sup>34</sup>FAR, 48 C.F.R. 39.001.

<sup>35</sup>DFARS, 48 C.F.R. 239.001.

<sup>36</sup>FIRMR, 41 C.F.R. 201-45 Appendix B, Bulletin C-5.

<sup>37</sup>FIRMR, 41 C.F.R. 201-20.305-1(a) and FIRMR Bulletin A-1, Attachment B, Section 201-1.002.2(a)).

<sup>38</sup>The GSA is currently examining whether it will raise the DOD DPA blanket threshold to \$25 million. Ms. Susan Tobin, Management Reviews Division, General Services Administration, Remarks at the Meeting of the Acquisition Law Advisory Panel, 22 October 1992.

If any part of an acquisition exceeds a blanket delegation or a specific delegation, a new DPA is required for the entire acquisition.<sup>39</sup> Likewise, if the procurement "materially" deviates from the terms and conditions of a DPA, an amendment must be obtained from GSA. Once a delegation of procurement authority has been requested by an agency within the DOD, the DPA is deemed approved after 30 days if it has not been specifically disapproved before then. Thus, a delegation can occur regardless of whether GSA reviews or approves the request. GSA adopted this policy in response to criticism that the delegation process delayed DOD ADPE procurements.

GSA also fulfills its oversight responsibilities under the Brooks Act by performing Information Resources Management (IRM) reviews. In its IRM review program, GSA conducts comprehensive information resources procurement and management review of federal agencies, including DOD. The IRM reviews include assessments of pre-acquisition studies, procurement and contracting practices, oversight of acquisition activities, internal delegations of procurement authority and specific agency delegation requests.

- **DOD ADPE Procurement**

In Fiscal Year 1992, DOD's estimated information technology expenditures amounted to nearly 40% of the entire federal government's information technology expenditures, or \$9.5 billion out of \$24 billion.<sup>40</sup>

Procurement of ADPE by DOD can be divided into two very distinct classes. The first class is equipment intended solely for business applications. Other terms for this class include IRM or non-tactical. This class of ADPE is typically used for support functions and for research. Equipment is usually limited to that available in the marketplace, or commercial, off-the-shelf equipment. There is usually no large research and development investment for the government for this hardware. The government buys the same software and hardware that is available to the private sector.

The second class of equipment is that which is used as an integral part of military operations or weapons systems. ADPE in this category is said to be embedded, mission-critical or militarized. This equipment differs from business applications primarily in the fact that tactical computer hardware is very much an integral part of a "system of systems," and not a stand-alone processor. Although the processor is often the very visible center piece of a business application, it may be much less prominent in a weapon system which is built around the sensors and displays.<sup>41</sup>

---

<sup>39</sup>FIRMR, 41 C.F.R. 201-20.305-3.

<sup>40</sup>Memorandum from Martin Kwapinski, Management Reviews Division, General Services Administration, to Ms. Theresa Squillacote, dated 23 October 1992.

<sup>41</sup>There has been considerable litigation regarding the definition of this type of ADPE. See Communications Technology, Inc., GSBICA No. 9978-P, 89-3 BCA Para. 21, 941 (1989)(software used to train operational fighter pilots too remote from actual mission)(J. Hendley, dissenting); Information Systems & Networks Corp. v. U.S., 946 F.2d 876 (Fed. Cir. 1989)(exemption requires finding of real and convincing nexus; not present where not all computers would contribute to military/intelligence mission). But see, Cyberchron Corp., GSBICA No. 10263-P, 90-1 BCA Para. 22,390, enfd. 867 F.2d 1407 (1989)(exemption where all equipment would be used as integral part

The current statutory and regulatory framework is complex and makes it difficult for the DOD to buy ADPE. The Information System Selection & Acquisition Agency, Department of the Army (ISSAA), notes the following examples of ADPE procurement under GSA oversight:

In a procurement to obtain FIP maintenance and FIP software in support of Fort Sam Houston, the Agency Procurement Request (APR) was received at ISSAA on 30 May 1990. On 6 June 1990, ISSAA forwarded the APR to GSA. On 12 June 1990, GSA notified ISSAA that the projected return date of the approved DPA was 12 July 1990. On 12 July 1990, GSA issued a letter to ISSAA stating that "the requirements justification and certifications referenced in the justification for other than full and open competition need to be updated. Therefore, we are denying your request." GSA also directed the Army to re-conduct its market survey and re-evaluate its requirements, to include the system's life. The referenced J&A had been approved on 31 October 1989. On approximately 15 July 1990, ISSAA issued memorandum to Sacramento stating, per GSA, that "GSA has denied your request for a delegation of procurement because the requirements justification and certifications in the J&A are a year or more old. GSA requires that the requirements justification and certification in the J&A be updated." On 31 October 1990, ISSAA resubmitted the APR with revised J&A dated 12 October 1990. No "sole source" justification had been changed, but the contract life was reduced by six months because of the delays in getting a DPA. On 23 November 1990, GSA issued the DPA for the Army's requirements.<sup>42</sup>

In another example, in a procurement for an Automated Retail Outlet System,

GSA notified the Army on 10 June 1992 that they would reject the Army's APR dated 14 May 1992 because the certified dates for FIRMR studies were out of sequence.<sup>43</sup> The Justification & Approval for sole source was certified in the APR as completed in January, 1992. The dates of the Requirements Analysis and Analysis of Alternatives were in May 1992. The GSA concluded, without consulting ISSAA, that the Army had first picked their favorite contractor and then worked backwards to justify this choice. ISSAA explained that this was not true, that the customer

---

of weapon system), and Computer Sciences Corp., GSBGA No. 10388-P, 90-1 BCA Para. 22,538 (exemption where nonexempt uses of equipment were incidental to primary intelligence and command and control functions).

<sup>42</sup>Datafax transmissions from Mr. Rex Bolton, Chief, Authorizations and Review, ISSAA, to Ms. Theresa Squillacote, dated 21 and 22 December 1992. That Office notes, however, that good interagency working relationships between ISSAA and GSA have been established over the years.

<sup>43</sup>This sequencing is not prohibited by any law or regulation nor by GSA guidance.

had been asked to update and provide more detail in the studies, and the dates reflected the revised completion times. ISSAA complained that they had not been asked to clarify this situation before a decision had been made to reject the APR. ISSAA told GSA that the Army had received more DPA authority from the GSA since APR submission, and that ISSAA intended to withdraw the APR and issue an Army DPA. The GSA supervisor said that he would not allow the Army to withdraw the APR, and that GSA would reject it anyway, despite the explanation. An undated rejection was received by data fax transmission within the hour. GSA explained that "the documentation provided does not support the proposed acquisition strategy. GSA's review indicates that the documentation was prepared after the acquisition strategy had been determined."<sup>44</sup>

As these examples illustrate, the complexity of the DPA process has also raised issues regarding the delay inherent in this process. In 1980, when Congress passed the Paperwork Reduction Act,<sup>45</sup> the Senate expressly stated its concern with the length of time required to obtain DPAs from the GSA, particularly as regards weapon systems.<sup>46</sup>

Currently, GSA reports that the average time for review of all agency procurement requests is 18.4 days.<sup>47</sup> However, GSA also reports that that figure is considerably longer -- up to six to eight weeks -- in more complex ADPE procurements.<sup>48</sup> And, that figure may extend even further if a procurement involves a DPA amendment or additional technical review. Because of this complexity, in extreme cases the equipment at time of purchase may not be state-of-the-art because it is based on specifications written considerably earlier.

Recently, DOD implemented an initiative to centralize DOD ADPE procurement within a new DOD agency. On 25 June 1991, the Defense Communications Agency was rechartered as the Defense Information Systems Agency (DISA) in recognition of plans to greatly expand the agency's scope of operations.

Under Defense Management Review Directive 918,<sup>49</sup> DISA became the central manager of the defense information infrastructure. This role encompasses: (1) implementation of systems security; (2) development, specification, certification, and endorsement of information technology standards; (3) network management, engineering, design and control of long haul and regional communications and technical management of base level communications; (4) management and workload control of data processing installations; (5) central design activities for support systems

activities; and (6) acquisition of information technology components and services that require integration.

In acquisition, DISA will assume responsibility for centrally acquiring information technology hardware, software, and services requiring systems integration. DISA will acquire commodity goods and services and will function as the information technology reuse organization. DISA is delegated authority to procure information technology assets and services.

- **GSA Position**

GSA opposes any alteration of its current oversight role in ADPE procurement.<sup>50</sup> GSA maintains that its extensive experience with all federal agencies and programs gives it a Government-wide perspective on issues relating to the business and administrative use of federal information processing resources. GSA contends that this experience provides an advantage over a single agency focus, and that it uses this advantage to share information with DOD agencies, and to formulate recommendations for improvement. GSA also promotes the establishment and use of government-wide standards for systems and software.<sup>51</sup>

GSA's involvement in pre-acquisition processes, it is contended, ensures that the acquisition planning process promotes competition and efficiency. An agency's efforts and ability to promote and obtain competition will be a determining factor in GSA's decision to grant or deny authority to acquire information resources.

GSA maintains that exemption of DOD from its oversight role will have a significant negative impact on federal ADPE procurement, both in DOD and within the government in general. As the single largest federal purchaser, DOD would be able to set a de facto standard, thus splitting the aggregated buying power of the Federal Government. This split would result in increased costs for both the civilian agencies and DOD. Because GSA also contends that the Office of the Secretary of Defense does not provide sufficient oversight of information resources management by its components, any DOD exemption from the Brooks Act would therefore require the creation of a duplicate, oversight bureaucracy within DOD.

#### **3.4.1.4. Recommendation and Justification**

##### **No Legislative Recommendation**

The Panel considered two alternative recommendations regarding these statutes but was unable to reach consensus. All Panel members agreed, however, that the DOD should have some relief from the DPA process, and, to this end, a significant increase in the blanket DPA should be granted.

---

<sup>50</sup>The GSA position summarized here is based on Memorandum from Martin Kwapinski, Management Reviews Division, General Services Administration, to Ms. Theresa Squillacote, (with attachments) dated 23 Oct. 1992.

<sup>51</sup>This role may be increasingly compromised by the growing tendency for government to adopt open systems architectures.

The Panel does recommend unanimously that Congress examine in-depth the method by which DOD procures ADPE. To assist in that examination, the two primary alternatives considered by the Panel, with a supporting rationale for each, are set forth below.

- **Amend the Warner Amendment to Wholly Exempt DOD from the Brooks Act**

This recommendation is based on an analysis of the Brooks Act legislative history, and on an analysis of its current implementation.

## **LEGISLATIVE HISTORY**

The Brooks Act was intended to give the Administrator of General Services operational responsibility to provide the federal government with: (1) optimum utilization of ADPE resources, (2) more economic acquisition of government ADPE, and (3) better management information. As discussed below, these reasons are no longer relevant.

### **Optimum Utilization of Government ADPE**

**ADPE Service Centers:** In 1965, Congress felt that there was "widespread waste in available but unused Government ADPE time." The Brooks Act was intended to authorize GSA to establish multiagency service centers to furnish ADPE support to multiple users.

The technology and architecture of ADPE systems has changed dramatically since 1965. Large processing centers have become the dinosaurs of the computer age. The technology has progressed to the point where personal computers have far greater computational power than the large main-frame computers of the 1960s. At the same time, decentralized and distributed data processing is becoming more common than centralized processing.

Today, cost savings associated with centralized processing are not as significant as they were when the Brooks Act was enacted. Software is now the major cost driver, not hardware. Rather than saving money, large processing centers can promote waste. The capital investment associated with large processing centers often inhibits conversion to more efficient distributed processing systems. Large processing centers can also foster noncompetitive sole source relationship with vendors.

**Reutilization of ADPE Resources:** In the 1960s and 1970s some savings were obtained by reutilizing ADPE resources. During that period, the hardware for large computer systems was very expensive and often represented the major cost component of a computer system. Savings could be achieved by reutilizing equipment that had not become obsolete.

However, reuse of old hardware often resulted in lack of compatibility with newer systems and sole-source dependence upon the original manufacturer. The revolution in microchip technology caused a dramatic increase in computing power throughout the 1980s, together with an equally dramatic drop in prices. Not only did these trends diminish costs, but maintenance of

old equipment also became very expensive when manufacturers stopped supporting obsolete equipment.

The federal government derives minimal benefit today from the reutilization of ADPE. While reutilization of hardware and software should be encouraged within an agency wherever possible, the limited economic benefits of reutilization no longer justify maintenance of a large government-wide bureaucracy. Changes in technology and system architecture, the reduced cost of new equipment, and the high cost of maintaining old equipment generally favor the acquisition of new equipment.<sup>52</sup> The significant economic benefits associated with reutilization in 1965 no longer apply today as markedly as they did when the Brooks Act was originally enacted.

#### More Economic ADPE Acquisition of Government ADPE

When the Brooks Act was enacted, Congress believed that the federal government was not receiving special advantages, such as volume discounts from volume purchases, and attempted to achieve such advantages through GSA oversight. In practice, however, agencies awarding large Indefinite Delivery/Indefinite Quantity (IDIQ) or requirements contracts have often been more successful than GSA in achieving significant cost savings.<sup>53</sup> These agencies have attained the volume discounts that are still elusive for GSA, particularly on multiple award schedule contracts.

There is also growing pressure to compete each ADPE procurement without imposing "compatibility limited" requirements. This pressure has reduced the Government's ability to consolidate requirements and obtain volume discounts. Also, large IDIQ or requirement contracts inevitably result in protracted litigation and resulting delays.

Further, in 1965, hardware acquisition was the major expense of an ADPE system. The availability of investment funds to make a capital investment in hardware often determined the nature of the system acquired.<sup>54</sup> Recognizing the high cost associated with equipment leases, GSA was expected to monitor the leasing of ADPE. The revolving fund was established as a mechanism to combine requirements and make a single capital investment with the objective of saving money.

---

<sup>52</sup>In response to pressure from both new and used ADPE sellers, GSA requires agencies to consider offers of used components in ADPE procurements. FIRMR, § 201.39.803-3(a)(1); FAR § 10.010. See generally SIRM Bulletin C-29, 2Feb. 1991, "Acquisition of Used Computer Equipment. Unless the agency has a critical requirement that mandates the use of new equipment, agencies may be forced to accept used equipment and components. This requirement permits manufacturers and resellers to recycle old, otherwise unmarketable equipment to the federal government.

<sup>53</sup>Indeed, the Director of Management Reviews of General Services Administration noted that the DOD very often can get a better price on a contract. Ms. Susan Tobin, Management Reviews Division, General Services Administration, Remarks at the Meeting of the Acquisition Law Advisory Panel, 22 Oct. 1992.

<sup>54</sup>Consistent with Congressional guidance, DOD categorizes a cost as either an investment or an expense. With certain exceptions, items costing less than \$15,000 are considered expense items while items over \$15,000 are considered investment items. DOD categorizes ADPE by the cost of the complete system rather than by the cost of its components parts.

Consistent with congressional guidance, and excluding large telecommunication ADPE, DOD seldom leases ADPE.<sup>55</sup> The cost of hardware has fallen so dramatically that this availability of capital investment funds is often not the major issue it once had been. Similarly, the revolving fund provides little, if any, value to DOD.

### Better Management Information

In enacting the Brooks Act, Congress expected GSA to assimilate and collect information needed for ADPE management in the federal government. Today, GSA has only a limited role in the actual collection or assimilation of data concerning ADPE within the federal government.

In practice, GSA simply collects and collates limited information (the estimated value of the project, etc.) about pending procurements as part of the process by which it grants a delegation of procurement authority. GSA also monitors and reports on protests before the GSBICA. A periodic publication by GSA attempts to make correlations between GSBICA decisions and the overall ADPE procurement process.

Exemption of DOD from the Brooks Act would not necessarily end GSA's collection of information. DOD routinely keeps the same type of information collected by GSA. It would not be difficult for DOD to continue to provide the information now collected through the DPA process.

In any event, GSA's collection of information arguably has added little to the overall procurement process. While it has complied with its statutory mandate, it is difficult to argue that this limited information is very useful. Indeed, the Congress has itself raised questions regarding the adequacy of GSA's management information role.<sup>56</sup>

Perhaps most importantly, the government-wide management role for GSA that was envisioned under the Brooks Act for information resources is no longer needed. Virtually every federal agency has an information management organization that defines requirements, conducts procurements, and fields information systems. Within DOD, this role is being assumed by the DISA. Further, there is an increasing tendency for the government to adopt open systems architecture that depends on industry standards.

### IMPLEMENTATION

The Panel also notes the following reasons for exempting DOD from the Brooks Act, in addition to those based on the legislative history of the Act:

---

<sup>55</sup>DOD policy permits leasing of ADPE only under a limited number of circumstances. For example, ADPE can be leased to satisfy a short term requirement or for evaluation.

<sup>56</sup>See, for example, Thirty-eighth Report by the Committee on Government Operations, "Administration of Pub L. No. 89-306,, Procurement of ADP Resources by the Federal Government," H.R. REP. No. 1746, 94th Cong., 2d Sess. (1976).

## Delays Associated with GSA Oversight of ADPE Procurements

DOD has frequently expressed concern over the additional time required to obtain delegations of procurement authority from GSA. The Senate Report to the Paperwork Reduction Act of 1980 also expressed these same concerns, particularly as they might apply to computer systems embedded in weapons systems.<sup>57</sup>

GSA's current policies concerning approvals of delegations of procurement authority are perhaps the best evidence that this process has no substantive value. Once a delegation of procurement authority has been requested by an agency within DOD, the DPA is deemed approved after 30 days if it has not been specifically disapproved. Thus, a delegation can occur regardless of whether GSA reviews or approves the request. GSA adopted this policy in response to criticism that the delegation process delayed DOD procurements.

### Overly Broad Definitions of ADPE

When enacted, the Brooks Act applied only to general purpose commercially available ADPE systems and components. As a result in part of a jurisdictional issue that arose during the protest of the award on an Army printing and publishing contract, the Congress amended the Brooks Act and expanded the definition of ADPE. The term "Automatic data processing equipment" was redefined to mean "any equipment or interconnected system or subsystems of equipment that are used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information, including communications."<sup>58</sup> This definitional change has enormously broadened the scope of the Brooks Act.

### Unnecessary Bureaucracy

An unfortunate result of the Brooks Act has been to foster separate organizations for the acquisition of general purpose ADPE. A separate culture has been spawned in which requirements are defined and approved in different channels, while separate procuring agencies have been established in each DOD agency to acquire general purpose ADPE. In some procurements, the approving official and the procuring activity are determined by how the item will be used rather than the nature of the item itself.

Based on the above rationale, one alternative considered by the Panel was to amend 10 U.S.C. § 2315 to read as follows:

(a) Section III of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. § 759) is not applicable to the procurement by the Department of Defense of automatic data processing equipment or services.

---

<sup>57</sup>S. REP. NO. 630, 96th Cong., 2d Sess. 69 (1980).

<sup>58</sup>H.R. CONF. REP. NO. 1005, 99th Cong., 2d Sess. 776 (1986).

- **Significantly Increase the Blanket Delegation of Procurement Authority for DOD**

The Panel also considered a proposal to significantly increase the blanket delegation of procurement authority for DOD. Under this proposal, however, the GSA would retain its managerial oversight functions but more limited procurement authority.

In support of this alternative, some members of the Panel noted the following points:

First, on several occasions since the Brooks Act was passed in 1965, Congress has determined that the Brooks Act should apply to DOD procurements and no compelling justification has been presented to change the law. In 1982, for example, Congress considered and rejected the wholesale exemption of DOD from the Brooks Act.<sup>59</sup> In 1984 Congress strengthened the Brooks Act application to DOD and other federal agencies. At that time, Congress authorized the GSBCA to suspend an agency's delegation of procurement authority under the Brooks Act when there was a protest in which the GSBCA found that the agency's actions, leading to contract award, violated a law, regulation, or the terms of the DPA.<sup>60</sup> The GSBCA was given this protest authority on an experimental basis. In 1986, Congress gave the GSBCA permanent protest authority and the House and Senate conferees on the Paperwork Reduction Reauthorization Act stated that the GSBCA had "lived up to, and surpassed, the expectations expressed when the determination was made to grant it protest jurisdiction."<sup>61</sup>

Second, the DPA process is an essential part of the GSA oversight of DOD acquisitions and should be retained. The GSA has significant ADPE expertise and over the years it has made numerous recommendations through its oversight responsibilities to strengthen the DOD ADPE acquisition process.<sup>62</sup> DOD has acknowledged the benefit of these recommendations.<sup>63</sup> In addition, the DPA process does not appear to significantly delay ADPE procurements. A GAO study in 1986 found that the time required for ADPE procurements that were exempt from the Brooks Act did not differ significantly from the time required for ADPE procurements which required a DPA:

Defense reported to us that it has conducted 141 procurements under the Warner Amendment from the time of its enactment to July 1985. The extent of competition reported by Defense is similar for both Warner Amendment and Brooks Act procurements. In the 22 selected examples we reviewed, we found that there is little difference between Warner Amendment and Brooks Act procurements in the acquisition procedures followed and total time needed to complete procurements. Defense could not provide

<sup>62</sup>Ms. Susan Tobin, Management Reviews Division, General Services Administrations, Remarks at the Meeting of the Acquisition Law Advisory Panel, 22 Oct. 1992.

<sup>63</sup>*Id.*

studies or other support for claims of shorter acquisition time for Warner Amendment procurements. On the basis of our review, we believe that Defense's implementation of the Warner Amendment has not resulted in more expeditious acquisition of computer resources for critical military missions. Therefore, we do not believe the use of acquisition time provides a basis for justifying the extension of the Warner Amendment to exempt all Defense ADP procurements from requirements of the Brooks Act.<sup>64</sup>

The following comments of the Computer and Communications Industry Association are also noted:

DPAs should be issued in a manner that not only faithfully reflects the requirements and intent of the Brooks Act, but to actually assist the Government in managing a set of policies and practices to improve the efficiency, effectiveness and competitiveness of computer and communications acquisitions. The information movement and management industry not only supports the Brooks Act, but believes the balance and fairness it brings is equally in the interest of all competitors and all participants in the contract process.<sup>65</sup>

Third, the Brooks Act helps assure uniform government-wide ADPE standards by providing one agency, GSA, the authority to establish regulations and procedures for ADPE procurements except those exempt under the Warner Act amendment. Such uniformity fosters competition by establishing a common base for all offerors to consider. The Warner Act modified that common base in 1982 for critical military functions. No further modifications are justified. As the GSA representatives stated in the discussions with the Panel, the Warner Amendment:

actually created two markets for computers: the administrative general processing market, and the weapons systems market. Think about creating a third market, general purpose computing under DOD. Otherwise you may find yourselves embedding more into the weapons systems and paying higher dollars.<sup>66</sup>

Fourth, GSBCA should continue to have jurisdiction over DOD procurements which are not exempt from the Brooks Act. As the House and Senate Conferees on the Paperwork Reduction Reauthorization Act stated in 1986 "with the Board, vendor(s) are far better assured that the federal procurement system has treated them fairly and honestly, . . . while agencies are

---

<sup>64</sup>*Id.*; GAO/IMTEC-86-29, p. 1 (July 1986).

<sup>65</sup>Comments to the Advisory Panel from the Computer and Communications Industry Association, November 19, 1992.

<sup>66</sup>Ms. Susan Tobin, Management Reviews Division, General Services Administration, Remarks at the Meeting of the Acquisition Law Advisory Panel, 22 October 1992.

better able to reap the benefits of competition."<sup>67</sup> If the Warner amendments were changed to exempt all DOD procurements, then the GSBCA would no longer have jurisdiction over these procurements.

Therefore, an alternative by which the GSA retains managerial oversight, but DOD retains authority over the majority of its individual ADPE procurements, is one that the Panel believes also warrants consideration by the Congress. Such consideration may be particularly useful at this time when the establishment of DISA offers the opportunity for DOD to develop and institutionalize greater expertise and more effective internal management control of its ADPE acquisition process.

Finally, the Panel also believes that the definition of ADPE, and of general purpose versus special purpose ADPE, should be set forth with greater clarity to avoid an unwarranted expansion of the scope of the Brooks Act.

#### **3.4.1.5. Relationship to Objectives**

A significant increase in GSA's blanket DPA to DOD would promote the streamlining and cost effectiveness of DOD ADPE acquisition by minimizing excessive bureaucracy and by affording greater latitude to DOD in the internal management of its ADPE acquisition.

## **3.5. DOD Commercial AND Industrial Activities**

### **3.5.0 Introduction**

This subchapter encompasses those sections within Chapter 146 of Title 10 dealing with DOD Commercial and Industrial Activities. Specifically, this subchapter analyzes those laws regulating DOD contracting for commercial services under OMB Circular A-76. It includes restrictions on the contracting out of core logistics activities by DOD, and sets forth specific guidance on depot-level maintenance activities by DOD.

The statutory provisions in Chapter 146 of Title 10 present a confusing and contradictory set of rules regarding the DOD's contracting-out process. The tension among these sections clearly reflects the diversity of interests at stake in this area. For example, 10 U.S.C. § 2461, prohibiting conversion to private contractor performance of an in-house function unless extensive notice to the Congress has occurred, serves generally to protect in-house performance by maximizing congressional and community input before a decision to contract out. However, 10 U.S.C. § 2462 requires the Secretary of Defense to procure a supply or service related to a DOD function from the private sector if that source is less expensive.

The Panel's goal in this area was to consolidate and streamline these conflicting rules into a coherent statement of basic and essential principles that eliminates, as far as possible, unnecessary detail. The Panel also attempted to balance these competing interests into a proposed set of rules that affords the Department managerial flexibility while preserving meaningful congressional oversight and effective community input. To that end, the Panel proposes a single section, 24XX, governing traditional A-76 contracting procedures for the Department. A second section, 24XY, sets forth the basic principles regarding identification and competition for core logistics functions by DOD.<sup>1</sup> The Panel developed these proposed sections based on its analysis of the legislative histories of the extant laws, and based on extensive comments from affected parties within the DOD acquisition community, including relevant federal employee labor organizations. The Panel achieved a high degree of consensus of support within that community on these proposals.

Proposed section 24XX provides that DOD shall procure from the private sector if such a source can provide a service or supply adequate to meet defined performance standards at a cost lower than that of an in-house, government source. This statement reiterates the basic rule currently set forth in 10 U.S.C. § 2462, but adds a new performance factor in the phrase "adequate to meet defined performance standards." This addition is discussed in the individual analysis for 10 U.S.C. § 2462.

Proposed section 24XX adopts the "realistic and fair" cost comparison standard currently set forth in 10 U.S.C. § 2462. It also consolidates within that section a brief delineation of the

---

<sup>1</sup>Those two statutes are set forth immediately following this introduction, followed then by the individual analyses that reference them.

types of costs to be included in that comparison, as now set forth in greater detail in 10 U.S.C. § 2467.

This proposed section maintains the requirement of federal employee consultation currently in 10 U.S.C. § 2467. As noted in the individual analysis for that section, federal employee consultation is an important avenue for ensuring that cost comparisons not only reflect the most efficient organization possible, but also are based on essential performance standards. Section 24XX also maintains, albeit in streamlined form, the extant requirement in 10 U.S.C. § 2461 of notice to Congress of intent to study a conversion, as well as notice of the decision itself. The Panel regards notice of intent to study as a legitimate tool to promote community involvement, and involvement by other interested parties, in this important, decision-making process.

Finally, proposed section 24XX waives these requirements for specified functions, as does the current 10 U.S.C. § 2461. It adds, however, installations scheduled for closure as an additional item not subject to these procedures on the basis that additional flexibility is required when implementing a base closure.

The Panel recommends repeal of sections 2463 (Maintenance of cost data), 2465 (Prohibition on contracting out fire fighting and security guard functions) and 2468 (Installation commanders' contracting out authority). The supporting rationale for these recommendations is set forth in the individual analyses for each of these sections.

Proposed section 24XY restates the basic, core logistics standard now set forth at 10 U.S.C. § 2464. It adopts the definition of "core" currently contained in that section, but permits DOD secretaries to define "core capabilities," and to identify those activities necessary to sustain those capabilities. The proposed section then requires DOD secretaries to perform such core functions in-house. It does not permit DOD secretaries to deviate from that requirement, however, as does the current section. It does permit competition among government entities for assignment of such work as a means of encouraging greater economy and efficiency in these activities.

For requirements in excess of core requirements, DOD secretaries are permitted, at their discretion, to use competition to acquire additional maintenance and repair of defense supplies. Such competition may be public/public, public/private, or private/private. However, in order to ensure a level playing field in such competitions, the proposed section requires that all bids "shall accurately disclose all costs properly and consistently derived from accounting systems and practices that comply with laws, policies and standards applicable to those entities." This new cost comparison language attempts to address issues regarding comparability raised by both the private sector and DOD activities regarding inequities in the current cost comparison process. Finally, competitions under this proposed section are exempt from A-76 requirements.

Based on this modification of the current, core logistics section, the Panel recommends the repeal of 10 U.S.C. § 2466. That section sets forth the 60/40 rule regarding DOD contracting for depot-level maintenance: that the Department may not contract out more than 40% if of its

depot-level maintenance. The 60% in-house requirement was a somewhat arbitrary figure, used first by the Department and later adopted by the Congress. It was thought to represent the amount of in-house maintenance necessary to preserve the department's military readiness and surge capabilities. The same standard, however, underlies the core logistics concept. The Panel believes, therefore, that the level of in-house depot-level maintenance necessary to preserve military readiness and surge capability should not be subject to an arbitrary figure. Rather, the Panel believes that this area is best guided by the same, industrial base-related core logistics concept set forth in the current section 2464. The Panel believes that the Secretary of Defense should have the flexibility to determine core requirements for depot-level maintenance purposes. These requirements will undoubtedly vary for each facility. The Panel recognizes that this area is extremely complex and controversial and one in which industry, DOD, and the Congress attempt to reconcile competing interests and to achieve a balance that preserves a viable public and private sector defense industrial base.

The Panel considered, but rejected, application of the same "core" concept to Departmental in-house manufacturing capabilities. The Panel decided that these capabilities were not sufficiently developed to warrant this treatment. Instead, the Panel recommends consolidation and amendment of the Army and Air Force Arsenal Acts to provide DOD secretaries with discretionary authority to workload in-house manufacturing requirements.

Finally, the Panel recommends repeal of 10 U.S.C. § 2212, requiring line-item budgeting of contracted advisory and assistance services. The Panel notes that this same budgetary requirement is present in a recent appropriations act.

## **10 U.S.C. § 24XX Contracting for DOD Commercial or Industrial Functions**

**(a) IN GENERAL** - Except as otherwise provided by law, the Secretary of Defense or secretary of a military department shall procure those supplies and services necessary for or beneficial to the performance of authorized functions of the Department of Defense from a source in the private sector, if such a source can provide the service or supply adequate to meet defined performance standards at a cost that is lower than the cost at which the Department can provide the same supply or service. This cost comparison shall include any cost differential required by law, Executive Order, or regulation. The requirements of this subsection shall not apply to inherently governmental functions or functions which the Secretary concerned determines must be performed by military or Government personnel.

(1) A DOD function may not be converted to performance by a private contractor to circumvent civilian personnel hiring policies.

(2) A DOD function may not be in any way altered for the purpose of exempting such function from conversion to performance by a private contractor.

**(b) REALISTIC AND FAIR COST COMPARISONS--** For the purpose of determining whether to contract with a source in the private sector, in contrast with performance by a government source, for the performance of a DOD function on the basis of a cost comparison, the Secretary of Defense or secretary of a military department shall ensure that all costs considered are realistic and fair. At a minimum, such estimated costs must include costs of quality assurance, technical performance monitoring, liability insurance, employee retirement and disability benefits, and all other applicable overhead costs.

**(c) CONSULTATION** - The Secretary of Defense shall ensure that affected civilian employees are consulted and that their views on the development and preparation of any performance work statements or management efficiency studies to be used in the cost comparison are obtained by cognizant DOD officials. In the case of employees represented by a labor organization accorded exclusive recognition under section 7111 of Title 5, U.S. Code, consultation with representatives of that labor organization shall satisfy the consultation requirement in this subsection. In the case of employees not exclusively represented by a labor organization under section 7111 of Title 5, consultation with appropriate representatives of those employees shall satisfy the consultation requirement of this subsection.

**(d) NOTICE AND REPORTING** - Prior to conversion to a private source of any DOD function currently performed by Government personnel, the Secretary of Defense or secretary of a military department must:

(1) notify the Congress of a decision to study such conversion and of a decision to convert, provide a summary of the cost comparison, certify that the performance of such function by a private contractor is expected to result in a cost savings and equivalent performance quality, and certify that the costs for performance by government employees are based on the most efficient method of operation, and,

(2) report to the Congress on the potential economic effect of the conversion on the affected employees and local community and on the effect on the military mission of the function. Such report must also include the amount of the accepted private contractor bid, of the comparable cost of performance by government employees, and of relevant contract administration costs.

(e) This section shall not apply:

(1) to functions included on the procurement list established pursuant to section 2 of the Act of June 25, 1938, (41 U.S.C. § 47), popularly referred to as the Wagner-O'Day Act;

(2) to functions that are planned to be converted to performance by a qualified nonprofit agency for the blind or by a qualified nonprofit agency for other severely handicapped persons in accordance with that Act;

(3) to functions performed by 50 or fewer government employees;

(4) to installations that are scheduled for closure under base realignment and closure procedures;

(5) to those core logistics functions designated for in-house, government performance pursuant to section 24XY; or

(6) during war or during a period of national emergency declared by the President or Congress.

## **10 U.S.C. § 24XY Core Logistics Functions**

**(a) POLICY** - It is essential for the national defense that Department of Defense activities maintain a core logistics capability (including personnel, equipment, and facilities) sufficient to ensure a ready and controlled source of technical competence and resources necessary for an effective and timely response to national defense contingency situations and other emergency requirements.

**(b)** Accordingly, the Secretary of Defense or secretary of a military department shall identify those logistics activities that are necessary to maintain the logistics capabilities described in subsection (a).

**(1)** Notwithstanding any other provision of law, the Secretary of Defense or secretary of a military department shall have the modification, depot maintenance, and repair of defense-related material performed by Government or military personnel at activities identified in subsection (b) as the secretary determines necessary to maintain the core logistics capabilities described in subsection (a).

**(2)** The Secretary of Defense or the secretary of a military department may use competition among these Government-owned facilities to determine which entity can most efficiently perform the core logistics requirements described at subsection (a) above, considering both cost and performance factors.

**(c)** In excess of the core logistics requirements described in subsection (b), above, the Secretary of Defense or secretary of a military department may acquire the additional modification, depot maintenance and repair of defense-related material and components, and the production of defense-related supplies, needed for the Department of Defense through (i) competition among maintenance activities owned by the United States, (ii) competition between such activities and private firms, or (iii) competition among private firms.

**(d)** In competitions under this section, whether between DOD activities, between DOD activities and private firms, or between private firms, bids from these entities shall accurately disclose all costs properly and consistently derived from accounting systems and practices that comply with laws, policies and standards applicable to those entities.

**(e)** The procedures or requirements of OMB Circular A-76 do not apply to determinations made or competitions entered into pursuant to this section.

### **3.5.1. 10 U.S.C. § 2461**

#### **Commercial or industrial type functions; required studies and reports before conversion to contractor performance**

##### **3.5.1.1. Summary of Law**

This section states that commercial or industrial functions of DOD being performed on October 1, 1980 by DOD civilian employees may not be converted to performance by a private contractor unless the Secretary of Defense notifies the Congress of a decision to study such a potential conversion, provides a detailed cost comparison report that concludes that a cost savings will result from the conversion, and certifies that the in-house cost estimate is based on the most efficient and cost effective organization. The Secretary of Defense must also report on the potential economic effect of contracting for the function if more than 75 employees are involved, the effect on the military mission, the accepted bid amount and contract administration costs and the cost of in-house performance.

The Secretary of Defense must notify the Congress of any final decision to convert. The Secretary must also annually report to the Congress on the percentage of commercial and industrial type functions that are performed in-house and performed by contractor employees. The section does not apply to functions performed by 45 or fewer in-house employees, nor to functions established pursuant to the Wagner-O'Day Act. No conversion may occur to circumvent a civilian personnel ceiling, nor may a function be modified to circumvent conversion to a private contractor. Finally, the section does not apply during war or a period of declared national emergency.

##### **3.5.1.2. Background of Law**

This section was originally enacted by the DOD Authorization Act for Fiscal Year 1981.<sup>1</sup> The House version of that bill had set forth restrictions on conversion to performance by private contractors of functions then being performed by DOD personnel. The House language prohibited such conversions when used to avoid civilian personnel ceilings, and also required notification to Congress when in-house functions were being examined for potential conversion. The original legislation required cost comparisons between in-house and contractor performance and certification that the in-house activity was organized in the most efficient manner. A report to the Congress on the impact of such conversion was required, as well as notification of a final decision to convert. Finally, the House legislation provided a cause of action in U.S. district court to government employees reduced in force because of such a conversion.<sup>2</sup>

The House Committee report indicated that this provision was intended to make permanent a provision that had been first contained within the prior year's authorization bill. The

---

<sup>1</sup>Pub. L. No. 96-342, § 502, 94 Stat. 1077 (1980).

<sup>2</sup>H.R. REP. No. 6974, 97th Cong., 2d Sess. 804 (1981).

proposed language differed from the extant law by requiring the cost comparison to be based on the most efficient manner of organization, as opposed to costs at the point of decision to study the conversion. It also required reporting on an annual basis.<sup>3</sup>

In conference, the Senate receded with an amendment deleting the U.S. district court cause of action and a requirement that the public availability of the cost comparison be certified to the Congress.<sup>4</sup>

This language was codified into Title 10 in 1988.<sup>5</sup> It was amended in 1989 by the National Defense Authorization Act for Fiscal Year 1990 to add the Wagner-O'Day exemption.<sup>6</sup> The exemption originated in the House version of the bill. The House Committee Report indicated the Committee's belief that statutory contracting out restrictions should not impede federal commitments to blind and handicapped workers through Wagner-O'Day contracts.<sup>7</sup>

### **3.5.1.3. Law in Practice**

There is no direct, regulatory implementation of the overall congressional notice provisions of this section.

The Department of the Navy, Office of the Chief of Naval Operations, Shore Activities Division, recommends repeal of this statute.<sup>8</sup> That Office notes that many of the requirements of this section duplicate analysis already required under the A-76 regulatory process. That Office also notes that the requirements of this section impede management flexibility during the base closure process.

The Department of the Air Force, Deputy Assistant Secretary (Communications, Computers & Logistics), recommends that this section be amended to limit congressional notification requirements to intent to study and to decision results.<sup>9</sup> The annual congressional report could then be deleted as duplicative of these requirements.

The Office of the Assistant Secretary of Defense, (Production & Logistics), Installations, recommends that this provision be amended to provide an additional waiver for functions at installations identified for closure, noting that it is wasteful to spend time and money on cost comparisons when no viable options for in-house performance are available.<sup>10</sup>

---

<sup>3</sup>H.R. REP. No. 916, 96th Cong., 2d Sess. 140 (1980).

<sup>4</sup>H.R. REP. No. 1222, 96th Cong., 2d Sess. 93, 94 (1980).

<sup>5</sup>Pub. L. No. 100-370, 102 Stat. 851 (1988).

<sup>6</sup>Pub. L. No. 101-189, § 1132, 103 Stat. 1561 (1989).

<sup>7</sup>H.R. REP. No. 121, 101st Cong., 1st Sess. 231-232 (1989).

<sup>8</sup>Memorandum from Mr. Theodore Fredman, Assistant to the General Counsel, Department of the Navy, to Acquisition Law Task Force, dated 14 Sep. 1992.

<sup>9</sup>Memorandum from Mr. Lloyd K. Mosemann, Deputy Assistant Secretary (Communications, Computers & Logistics), Department of the Air Force, to DOD Advisory Panel, dated 21 Oct. 1992.

<sup>10</sup>Memorandum from Mr. David L. Spoede, Special Assistant, Office of the Assistant Secretary of Defense, (Production & Logistics), Installations, to DOD Panel, dated 29 Sep. 1992.

The American Federation of Government Employees, AFL-CIO, states that "this section of law is essential for Congressional oversight and public information concerning the government's contracting out program. Without the required method of disclosure, members of Congress and the public would have very limited information concerning the program."<sup>11</sup>

#### **3.5.1.4. Recommendation and Justification**

##### **Amend to eliminate unnecessary requirements and consolidate into a single streamlined statute.**

The Panel recommends consolidation of the essential requirements of this statute -- notice to Congress before conversion to private sector performance -- into a single statute at 10 U.S.C. § 24XX setting forth the general A-76 procedures applicable to the DOD.

Subsection (d) and (e) of 10 U.S.C. § 24XX contain many, but not all, of the requirements of this section. The Panel recommends retention of the notice of decision to study because it indirectly affords affected communities and parties the opportunity to participate in this process through their elected representatives. This participation can significantly benefit the contracting, decision-making process.<sup>12</sup> For that same reason, the Panel recommends retention of the requirement to report to Congress on the potential economic effect of the conversion on affected employees and the local community. This requirement ensures accountability by the DOD to the affected parties. Further, the Panel retains the requirement to notify Congress when a final decision to convert has been made. This requirement is an effective means for both internal Department and congressional oversight over the degree to which DOD functions are contracted-out. However, the Panel would repeal the requirement for an annual report of these decisions as duplicative of this requirement.

The Panel also recommends retention of the requirement to certify that conversion will result in a cost savings. The proposed statutory provision, however, would also require certification that there is cost savings and equivalent performance quality. It may be difficult to certify as to performance quality prior to actual performance by a commercial entity.<sup>13</sup> Hence, to permit flexibility and estimation in that certification, the phrase "equivalent" is used. Nonetheless, the introduction of this phrase attempts to ensure that performance quality factors are adequately considered, and particularly that the quality that may develop within an established, in-house staff is not vitiated by a solely cost-based certification. This requirement, however, is balanced by the retention of the requirement that costs of performance by government employees must be based on the most efficient method of operations. This concept attempts to discipline the comparison

---

<sup>11</sup>Letter from Mr. Robert E. Edgell, Deputy Director, Field Services Department, American Federation of Government Employees, AFL-CIO, to Acquisition Law Task Force, dated 26 Aug. 1992.

<sup>12</sup>Compare comment received from Dr. Garry Kauvar, Principal Director, Installations, Office of the Assistant Secretary of Defense (Production & Logistics), to Ms. Theresa Squillacote, dated 16 Nov. 1992 (recommendation to delete congressional notification of study because it serves to initiate pressure in advance of the collection of evidence).

<sup>13</sup>See, e.g., letter from Mr. Anthony Perfilio, Principal Deputy Staff Judge Advocate, Department of the Air Force, HQ AFMC, to Working Group Six, Advisory Panel, dated 18 Nov. 1992 ("It is difficult to provide a summary of performance by a commercial entity when that performance has not occurred.").

process by mandating in-house the type of efficiencies that the market place mandates in the private sector.

The Panel would also retain the extant exemption provisions, and add a provision that exempts the requirements for installations scheduled for closure under base realignment and closure proceedings, (as well as a conforming exemption to the newly proposed 10 U.S.C. § 24XY, discussed below). As the workforce diminishes at closing bases, many installation commanders will be forced to rely upon contractors to carry out interim requirements. It is illogical to spend time and money on cost comparisons when maintenance of in-house performance is not a viable option. As noted by the Navy commenter, "As the base closure process unfolds, it is becoming clearer that the use of a single contract to provide for interim maintenance and security during the period between closure of the base and its disposal provides the most flexible means of managing these assets. Such an approach not only facilitates the drawing down of resources but also relieves the on-site personnel from the need to maintaining [sic] a staff to support a continuing government work force."<sup>14</sup>

#### **3.5.1.5. Relationship to Objectives**

Amendment and consolidation of this statute will further the goal of streamlining and simplifying the DOD acquisition process by providing a clear statement of the rules regarding contracting for commercial and industrial functions applicable to DOD.

#### **3.5.1.6. Proposed Statute**

The proposed statutory provision set forth as 10 U.S.C. § 24XX, at subsections (a), (d) and (e), provides as follows: <sup>15</sup>

(a) **IN GENERAL** - Except as otherwise provided by law, the Secretary of Defense or secretary of a military department shall procure those supplies and services necessary for or beneficial to the performance of authorized functions of the Department of Defense from a source in the private sector, if such a source can provide the service or supply adequate to meet defined performance standards at a cost that is lower than the cost at which the Department can provide the same supply or service. This cost comparison shall include any cost differential required by law, Executive Order, or regulation. The requirements of this subsection shall not apply to inherently governmental functions or functions which the Secretary concerned determines must be performed by military or Government personnel.

(1) A DOD function may not be converted to performance by a private contractor to circumvent civilian personnel hiring policies.

(2) A DOD function may not be in any way altered for the purpose of exempting such function from conversion to performance by a private contractor.

---

<sup>14</sup>*Supra* note 8.

<sup>15</sup>See ch. 3.3.5, note 18.

\*\*\*\*

(d) **NOTICE AND REPORTING** - Prior to conversion to a private source of any DOD function currently performed by Government personnel, the Secretary of Defense or secretary of a military department must:

(1) notify the Congress of a decision to study such conversion and of a decision to convert, provide a summary of the cost comparison, certify that the performance of such function by a private contractor is expected to result in a cost savings and equivalent performance quality, and certify that the costs for performance by government employees are based on the most efficient method of operation, and,

(2) report to the Congress on the potential economic effect of the conversion on the affected employees and local community and on the effect on the military mission of the function. Such report must also include the amount of the accepted private contractor bid, of the comparable cost of performance by government employees, and of relevant contract administrative costs.

(e) This section shall not apply:

(1) to functions included on the procurement list established pursuant to section 2 of the Act of June 25, 1938, (41 U.S.C. § 47), popularly referred to as the Wagner-O'Day Act;

(2) to functions that are planned to be converted to performance by a qualified nonprofit agency for the blind or by a qualified nonprofit agency for other severely handicapped persons in accordance with that Act;

(3) to functions performed by 50 or fewer government employees;

(4) to installations that are scheduled for closure under base realignment and closure procedures;

(5) to those core logistics functions designated for in-house, government performance pursuant to section 24XY; or

(6) during war or during a period of national emergency declared by the President or Congress.

### **Current Statutes**

The current section, which would be repealed by the Panel's recommended statute, 10 U.S.C. § 24XX, provides as follows:

10 U.S.C. § 2461. Commercial or industrial type functions: required studies and reports before conversion to contractor performance

(a) Required notice to Congress. A commercial or industrial type function of the Department of Defense that on October 1, 1980, was being performed by Department of Defense civilian employees may not be converted to performance by a private contractor unless the Secretary of Defense provides to Congress in a timely manner--

(1) notification of any decision to study such function for possible performance by a private contractor;

(2) a detailed summary of a comparison of the cost of performance of such function by Department of Defense civilian employees and by private contractor which demonstrates that the performance of such function by a private contractor will result in a cost savings to the Government over the life of the contract and a certification that the entire cost comparison is available;

(3) a certification that the Government calculation for the cost of performance of such function by Department of Defense civilian employees is based on an estimate of the most efficient and cost effective organization for performance of such function by Department of Defense civilian employees; and

(4) a report, to be submitted with the certification required by paragraph (3), showing--

(A) the potential economic effect on employees affected, and the potential economic effect on the local community and Federal Government if more than 75 employees are involved, of contracting for performance of such function;

(B) the effect of contracting for performance of such function on the military mission of such function; and

(C) the amount of the bid accepted for the performance of such function by the private contractor whose bid is accepted and the cost of performance of such function by Department of Defense civilian employees, together with costs and expenditures which the Government will incur because of the contract.

(b) Congressional notification of decision to convert. If, after completion of the studies required for completion of the certification and report required by paragraphs (3) and (4) of subsection (a), a decision is made to convert the function to contractor performance, the Secretary of Defense shall notify Congress of such decision.

(c) Annual reports. Not later than February 1 of each fiscal year, the Secretary of Defense shall submit to Congress a written report describing the extent to which commercial and industrial type functions were performed by Department of Defense contractors during the preceding fiscal year. The Secretary shall include in each such report an estimate of the percentage of commercial and industrial type functions of the Department of Defense that will be performed by Department of Defense civilian employees, and the percentage of such functions that will be performed by private contractors, during the fiscal year during which the report is submitted.

(d) Waiver for small functions. Subsections (a) through (c) shall not apply to a commercial or industrial type function of the Department of Defense that is being performed by 45 or fewer Department of Defense civilian employees.

(e) Waiver for the purchase of products and services of the blind and other severely handicapped persons. Subsections (a) through (c) shall not apply to a commercial or industrial type function of the Department of Defense that--

(1) is included on the procurement list established pursuant to section 2 of the Act of June 25, 1938 (41 U.S.C. 47), popularly referred to as the Wagner-O'Day Act; or

(2) is planned to be converted to performance by a qualified nonprofit agency for the blind or by a qualified nonprofit agency for other severely handicapped persons in accordance with that Act.

(f) Additional limitations.

(1) A commercial or industrial type function of the Department of Defense that on October 1, 1980, was being performed by Department of Defense civilian employees may not be converted to performance by a private contractor to circumvent a civilian personnel ceiling.

(2) In no case may a commercial or industrial type function being performed by Department of Defense personnel be modified, reorganized, divided, or in any way changed for the purpose of exempting from the requirements of subsection (a) the conversion of all or any part of such function to performance by a private contractor.

### 3.5.2. 10 U.S.C. § 2462

#### **Contracting for certain supplies and services required when cost is lower**

##### **3.5.2.1. Summary of Law**

This section provides that the Secretary of Defense shall procure those supplies or services necessary for DOD functions from a private sector source if such a source can provide the supply or service at a real cost lower than the comparable, in-house cost. Such cost comparison must include consideration of all relevant costs that are fair and reasonable.

##### **3.5.2.2. Background of Law**

This section was originally enacted by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> The Senate version of that bill had contained a provision requiring the Secretary of Defense to ensure that all overhead and other costs, such as quality assurance, technical monitoring, liability insurance and pension costs, be included in any relevant cost comparisons. The Senate Report indicated concern that DOD was handicapping contractor bidding on such service and supply functions by adding to vendor bids an arbitrary 10% cost factor, based on contract administration costs, quality assurance and technical supervision costs, and excessive liability costs.<sup>2</sup> The Senate Report stated:

Agency cost comparisons must be made more equal for determination of contracting out. Some DOD organizations have used these handicaps to their advantage in determining the cost comparison outcome. In addition to opening the door for more competition, the competitions must be conducted on an 'apples to apples' basis. These cost comparisons are also the reason that an excessive backlog of evaluations will always exist. These are reasons why the DOD does not have to contract out if they choose not to. The cost comparisons should be able to be accomplished fairly and quickly. OMB must evaluate and modify their cost comparison regulations and enforce the intent of the contracting out goals.<sup>3</sup>

In conference, the House receded with an amendment providing that the Secretary of Defense ensure that such costs are considered and are fair and realistic.<sup>4</sup> This section was codified in 1988 and has not been amended since that time.<sup>5</sup>

<sup>2</sup>S. REP. NO. 331, 99th Cong., 2d Sess. 277-78 (1986).

<sup>3</sup>*Id.* at 278.

<sup>4</sup>H.R. CONF. REP. 1001, 99th Cong., 2d Sess. 527 (1986).

### 3.5.2.3. Law in Practice

This section sets forth the basic, contracting out policy and requirement for the DOD. This section is implemented in Title 32, Code of Federal Regulation--National Defense, Subtitle A--Department of Defense, Part 169, Commercial Activities Program, revised as of July 1, 1991.

The Office of the Assistant Secretary of Defense, (Production & Logistics), Installations, recommends that this provision be amended to provide an additional waiver for functions at installations identified for closure, noting that it is wasteful to spend time and money on cost comparisons when no viable options are available.<sup>6</sup>

The Council of Defense and Space Industry Associations (CODSIA) recommended to the Panel that this section be amended to provide specifically that cost comparisons in the contracting out process must accommodate costs or accounting procedures that are unique to the private sector.<sup>7</sup>

### 3.5.2.4. Recommendation and Justification

**Amend to eliminate unnecessary provisions and consolidate into a single streamlined statute.**

The Panel recommends amendment of this section and consolidation of the basic rule set forth in this section within a new, consolidated 24XX that sets forth all general rules for the contracting out program. The essential rule within this section - that DOD shall procure commercial services from a private source when overall costs are lower - is set forth as the general rule within the new, consolidated 24XX at subsections (a) and (b).

However, the consolidated section at 24XX includes a new requirement, at subsection (a), that the private sector source must be able to provide the supply or service "adequate to meet defined performance standards." This language, not present in the current section, attempts to introduce the concept that lower cost is not, by itself, a sufficient basis upon which to make a contracting out determination. Rather, that determination should be one that includes performance evaluation factors.

This requirement may be perceived as imposing an additional burden in this administrative process. One commenter noted that this standard may result in unnecessary litigation, that the standard is implied in any cost study, and that the requirement is essentially already included in OMB implementing guidance.<sup>8</sup> Where the requirement is present in implementing regulations, no

<sup>6</sup>Memorandum from Mr. David L. Spoede, Special Assistant, Assistant Secretary of Defense (Production & Logistics), Installations, to Acquisition Law Task Force, dated 29 Sep. 1992.

<sup>7</sup>Memorandum from Council of Defense and Space Industry Associations (CODSIA), to Messrs. Anthony Gamboa and LeRoy Haugh, dated 16 Oct. 1992.

<sup>8</sup>OFFP Pamphlet No. 4, supplementing OMB Circular A-76. See Letter from LTC Thomas J. Duffy, Chief, Logistics & Contract Law Branch, Contract Law Division, Department of the Army, Office of the Judge Advocate General, to DOD Advisory Panel, dated 12 November 1992. See also Letter from Mr. Anthony J. Perfillo,

greater burden is imposed through adoption of the requirement in statute. As noted in the analysis of 10 U.S.C. § 2461, the introduction of this standard in law would ensure that performance factors are adequately considered, and in particular that the quality that may develop within an established in-house staff is not vitiated by a solely cost-based statutory requirement. The Panel believes that this requirement more equitably balances the competing interests at stake and affords the Department additional managerial discretion in this area. The executive agency retains the flexibility to identify, when appropriate, specialized performance-based factors that may outweigh cost. Such factors could at times favor in-house performance, and at other times favor contracting out. Such flexibility is important to the DOD with its unique mission concerns, and particularly in this era of severe budget restrictions.<sup>9</sup> Overall, melding of performance standards with cost considerations provides better assurance of a greater return on expenditure than does a strictly monetary standard.

Informal comments received from the Office of Management and Budget, Federal Services Branch, General Management Division, raise the concern that the proposed statute, at subsection (a), "implies that rather than rely on the private sector, as a matter of policy, the law would require cost comparisons before private sector provision [sic] is authorized. . . . [T]he proposal moves away from reliance on the private sector -- as a matter of policy -- and appears to require that the free enterprise system prove itself in competition with govt. performance."<sup>10</sup> With the exception of the "adequate to meet defined performance standard" statement, the language of proposed statute 10 U.S.C. § 24XX fully tracks the requirements of the law as they currently exist in 10 U.S.C. § 2462. The law now requires contracting out of a function if the cost is lower, and that determination must be based on a realistic and fair cost comparison. In proposing 10 U.S.C. § 24XX, it is not the intent of the Panel to alter the previously established policy underlying the current law.

---

Principal Deputy Staff Judge Advocate, Department of the Air Force, HQ AFMC, to Ms. Theresa Squillacote, Working Group Six, Advisory Panel, dated 18 November 1992

"while we are not against adequately defined performance standards, we believe that the inclusion of this language in the statute may give rise to litigation by those seeking to have the GAO and/or the courts substitute their judgment for the Department's judgment regarding when defined performance standards are deemed to be adequate. There is no reason, in our judgment to make this requirement statutory."

However, the presence of this requirement in the implementing regulations also affords a basis for challenge through litigation.

<sup>9</sup>See, e.g., Letter from Mr. Robert J. Spazzarini, Chief, Acquisition Law Division, U.S. Army Missile Command, to Commander, U.S. Army Materiel Command, dated 27 August 1992:

"persistent budgetary considerations have highlighted the need for a changed relationship with the commercial activity program... Base support services contracts...pose a particular risk in the context of maintaining effective and efficient operations in the face of funding reductions. They have a direct and significant relationship to governmental functions inasmuch as many of the activities privatized under a base support contract (e.g., housing, water supply, sewage, heating plants, electrical systems...) can cause an unacceptable delay or disruption to an activity's operation in time of funding shortfalls."

<sup>10</sup>Datafax transmission from Mr. David Childs, Office of Management and Budget, Federal Services Branch, General Management Division, to Ms. Theresa Squillacote, Acquisition Law Task Force, dated 18 Nov. 1992.

The Panel does not recommend any additional language to address the issue of comparability of costs. The new consolidated section retains the "realistic and fair" language of the current law. The Congress fully considered this cost comparability issue in 1987 when this section was originally enacted. The Panel believes that the section should set forth broad guidelines in this area. The Panel believes that questions regarding those costs and other practices that are unique to the private sector should be resolved through regulatory implementation.

#### **3.5.2.5. Relationship to Objectives**

Amendment and consolidation of this section will further the goal of streamlining and simplifying the DOD acquisition process by providing a clear statement of the contracting out rules applicable to DOD.

#### **3.5.2.6. Proposed Section**

The proposed statutory provision 10 U.S.C. § 24XX, at subsections (a) and (b), provides as follows.<sup>11</sup>

**(a) IN GENERAL** - Except as otherwise provided by law, the Secretary of Defense or secretary of a military department shall procure those supplies and services necessary for or beneficial to the performance of authorized functions of the Department of Defense from a source in the private sector if such a source can provide the service or supply adequate to meet defined performance standards at a cost that is lower than the cost at which the Department can provide the same supply or service. This cost comparison shall include any cost differential required by law, Executive Order, or regulation. The requirements of this subsection shall not apply to inherently governmental functions or functions which the Secretary concerned determines must be performed by military or Government personnel.

(1) A DOD function may not be converted to performance by a private contractor to circumvent civilian personnel hiring policies.

(2) A DOD function may not be in any way altered for the purpose of exempting such function from conversion to performance by a private contractor.

**(b) REALISTIC AND FAIR COST COMPARISONS** - For the purpose of determining whether to contract with a source in the private sector, in contrast with performance by a government source, for the performance of a DOD function on the basis of a cost comparison, the Secretary of Defense or secretary of a military department shall ensure that all costs considered are realistic and fair. At a minimum, such estimated costs must include costs of quality assurance, technical performance monitoring, liability insurance, employee retirement and disability benefits, and all other applicable overhead costs.

---

<sup>11</sup>See chapter 3.3.5, note 18.

## **Current Statutes**

The current text of the law is as follows:

**10 U.S.C. § 2462. Contracting for certain supplies and services required when cost is lower**

**(a) IN GENERAL.** Except as otherwise provided by law, the Secretary of Defense shall procure each supply or service necessary for or beneficial to the accomplishment of the authorized functions of the Department of Defense (other than functions which the Secretary of Defense determines must be performed by military or Government personnel) from a source in the private sector if such a source can provide such supply or service to the Department at a cost that is lower (after including any cost differential required by law, Executive order, or regulation) than the cost at which the Department can provide the same supply or service.

**(b) REALISTIC AND FAIR COST COMPARISONS.** For the purpose of determining whether to contract with a source in the private sector for the performance of a Department of Defense function on the basis of a comparison of the costs of procuring supplies or services from such a source with the costs of providing the same supplies or services by the Department of Defense, the Secretary of Defense shall ensure that all costs considered (including the costs of quality assurance, technical monitoring of the performance of such function, liability insurance, employee retirement and disability benefits, and all other overhead costs) are realistic and fair.

### **3.5.3. 10 U.S.C. § 2463**

#### **Reports on savings or costs from increased use of DOD civilian personnel**

##### **3.5.3.1. Summary of Law**

This section provides that, whenever a commercial or industrial-type DOD function being performed by 50 or more private contractor employees is changed to in-house performance, the Secretary of Defense shall maintain cost data, on continued performance by private contractor employees and on performance by civilian DOD employees, for future cost comparisons. The section applies only when no statutory limit on civilian employee end strength is in effect.

##### **3.5.3.2. Background of Law**

This section was originally enacted by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> The Senate version of that bill had contained a blanket prohibition on conversion to in-house performance except in time of war or national emergency or other national security interest, or when the Secretary of Defense notifies Congress of such a conversion and provides a detailed, five-year cost comparison.

The Senate Report indicated that the provision would enable private industry to compete with the government sector wherever possible, with certain, delineated exceptions. The provision would also allow for comparison using the lowest cost to be paid by DOD.

In conference, the House receded with an amendment that would require an estimate of performance costs of functions performed by more than 50 private sector employees and periodic transmission of such cost reports to the congressional defense committees.

Technical language corrections were made in 1989, and the National Defense Authorization Act for Fiscal Year 1991 deleted a requirement of semiannual reports to the congressional defense committees showing savings or losses.<sup>2</sup>

##### **3.5.3.3. Law in Practice**

This section is implemented by 32 C.F.R. Part 169a, setting forth procedures for cost comparisons conducted under the DOD contracting out program. That regulation includes specified requirements for maintenance of cost data. DOD Instruction 4100.33, Enclosure 9, also provides for the collection and retention of costs for all comparisons.

---

<sup>1</sup>Pub. L. No. 99-661, § 1224, 100 Stat. 3967 (1986).

<sup>2</sup>Pub. L. No. 101-510, § 1301(14)(A), 104 Stat. 1668 (1990).

#### **3.5.3.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this section. The section was enacted to address a specific problem regarding conversions from private sector to in-house performance where insufficient cost analyses were being made by the Department.

Current regulations require detailed transfer studies before a function can be moved in-house from contract performance. This section addresses the need for an appropriate cost analysis before bringing a function back in-house. Collecting data pertaining to contractor or in-house performance when there is no ongoing contract is speculative and of limited value for future competitions.<sup>3</sup> Such competitions will be based on a contemporary evaluation of the winning contractor bid and the government Most Efficient Organization. This type of excessive legislative detail is contrary to the goal of a streamlined acquisition process.

#### **3.5.3.5. Relationship to Objectives**

Repeal of this section will further the goal of streamlining the DOD acquisition process by removing a legislative requirement that constitutes an administrative burden while not significantly contributing to Congress' oversight role.

---

<sup>3</sup>Letter from Col. Paul C. Smith, Chief, Contract Law Division, Department of the Army, Office of the Judge Advocate General, to DOD Advisory Panel, dated 14 Sep. 1992: "the purpose of the provision is to collect data to support future cost comparisons. We believe the requirement is unnecessary and an administrative burden which should be eliminated. Collecting data pertaining to contractor performance absent an ongoing contract can be speculative."

### **3.5.4. 10 U.S.C. § 2464**

#### **Core Logistics Functions**

##### **3.5.4.1. Summary of Law**

This section provides that DOD activities must maintain a logistics capability sufficient to ensure technical competence and resources necessary for an effective and timely response to a mobilization or other national defense emergency.

The Secretary of Defense is required to identify the logistics activities necessary to maintain that capability. Those activities, as well as the depot-level maintenance of mission-essential material performed at the Defense depot activities identified in section 1231(b) of Pub. Law No. 99-145, may not be contracted out under Circular A-76 procedures. The Secretary may, however, waive that prohibition when government performance is no longer required for national defense reasons. Such a waiver may be made only after a report is submitted to the congressional defense committees.

##### **3.5.4.2. Background of Law**

This section was originally enacted by the DOD Authorization Act for FY85.<sup>1</sup> The House version of that bill had contained a provision limiting the contracting out of core logistics functions under Circular A-76. That language would have required each service secretary or agency director to identify core logistics function, and to exempt them from A-76 provisions unless those individuals waived the limitation and reported thereon to the Congress. A congressional report on identified core logistics functions was required, and no conversions could be made until the report was submitted.

The House language was contained in an amendment to the House bill originating during floor debates. The amendment sponsor stated:

[T]his amendment is consistent with...previous efforts to specifically define the scope of the A-76 contracting-out program. Core logistics functions represent those functions which should remain in-house to preserve readiness and mobilization capabilities. These functions are generally the mission functions at supply depots, shipyards, air rework, and depot maintenance facilities. They do not include installation and base support-or housekeeping-functions which have been generally conceded to be legitimate subjects of contract review.<sup>2</sup>

---

<sup>1</sup>Pub. L. No. 98-525, § 106(a), 98 Stat. 2610 (1984).

<sup>2</sup>127 Cong. Rec. 13468 (May 23, 1984) (statement by Rep. Nichols).

The Senate version of that bill contained comparable language, but with responsibility accruing to the Secretary of Defense. The Senate language did not contain a "hold and wait" period from notification of waiver until implementation and did not contain a moratorium on conversion between the enactment of the legislation and the submission of the first core logistics report.

The Senate language arose as an amendment to the bill during floor debates. The amendment sponsor indicated that "critical logistics and readiness tasks and mission essential activities . . . are the basic jobs that should be under the direct control of DOD because they are absolutely necessary for mobilization programs, national defense contingency situations, and other emergency requirements."<sup>3</sup>

The conferees agreed to assign the responsibilities to the Secretary of Defense but adopted the House "hold and wait" period before a waiver is implemented. The conferees agreed to delete the House moratorium period.<sup>4</sup>

The law was amended the following year to specify core-logistics functions at Defense depot activities subject to the contracting out limitation. The subsequent amendment identified depot-maintenance of combat, combat support and combat service support materials at eight separate Defense depot activities.<sup>5</sup>

Technical, clarifying amendments were made to this section in 1989.<sup>6</sup>

#### **3.5.4.3. Law in Practice**

This section is implemented at 32 C.F.R. Part 169b, and DOD Directive 4151.18 (August 12, 1992).

The Council of Defense and Space Industry Associations (CODSIA) recommended to the Panel repeal of this statute on the basis that all depot-level maintenance functions should be competed freely with the private sector. CODSIA states:

Industry's concern is that DOD and the services are deciding to preserve and enlarge their internal organic capacity at the expense of the private sector without the analysis of the impact of such decisions. This can and will have damaging implications for the long-term health of the industrial base. . . .<sup>7</sup>

---

<sup>3</sup>130 Cong. Rec. 17225 (June 20, 1984) (statement by Sen. Hollings).

<sup>5</sup>Pub. L. No. 99-145, § 1231, 99 Stat. 731 (1986).

<sup>6</sup>Pub. L. No. 101-189, § 1622(c)(7), 103 Stat. 1604 (1989).

<sup>7</sup>Memorandum from Council of Defense and Space Industry Associations, (CODSIA), to Messrs. Anthony Gamboa and LeRoy Haugh, dated 16 Oct. 1992.

#### 3.5.4.4. Recommendation and Justification

##### **Amend to clarify authority of Secretary of Defense to Establish core requirements.**

The Panel recommends retention of the basic, core logistic standard of this statute.<sup>8</sup> The Panel has retained, in the new core logistics statute at 24XY, the definition of core currently set forth in this statute. The Panel believes that the Secretary of Defense or secretaries of the military departments should have the management discretion to establish core requirements under an established Department methodology. The general rule should remain that performance of such core requirements should, as a general rule, remain in-house but may be competed between relevant DOD activities, when appropriate. Further, such activities should be exempt from the provisions of Circular A-76, as they are under the current statute.<sup>9</sup>

The maintenance in-house of core logistics functions is essentially an industrial base issue<sup>10</sup>. Further, the criticality of a well-trained maintenance capability was demonstrated during Operation Desert Storm/Desert Shield. A recent, preliminary study by the House of Representatives Armed Services Committee noted that, to a substantial degree, the success of high technology weaponry during that operation was "due to the remarkable job performed by thousands of maintenance crews."<sup>11</sup> Clearly, private sector maintenance capabilities contributed significantly to that effort. And, the Panel concurs with the view presented by private sector commenters that mobilization base concerns require preservation of an adequate private sector capability, as well as a public sector one. The Panel also notes the recent conclusions of the Office of Technology Assessment that, in the future, an adequate industrial base will require an appropriate mix of private and public sector capabilities.<sup>12</sup> The Panel believes that the proposed statutory language will provide the optimum flexibility to attain an appropriate mix, while still supporting the rationale underlying this section when originally enacted, i.e., that core logistics must be maintained in-house to preserve readiness and mobilization capabilities within DOD.

Informal comments received from the Office of the Assistant Secretary of Defense (Production and Logistics), Maintenance Policy Directorate, indicate concern that the "proposal goes beyond current law and will add restrictions on the Department's ability to accomplish

---

<sup>8</sup>The Panel would delete the identification of depot-level maintenance of specific facilities contained in Pub. L. 99-145, as setting forth the basic principle regarding in-house performance of those logistics functions identified by the Secretary of Defense as core, contrary to the goal of a simplified statute setting forth only broad guidelines.

<sup>9</sup>Because much discretion rests with the Secretary, the Panel believes that it is unnecessary to retain the waiver authority currently present in the statute.

<sup>10</sup>See, Building Future Security: Strategies for Restructuring the Defense Technology and Industrial Base, Office of Technology Assessment, U.S. Congress (June 1992), chapter 5, "The Maintenance Base." That Report notes that maintenance capabilities will become even more critical as greater reliance is placed on upgrades of existing systems and as systems become more technologically complex.

<sup>11</sup>Defense for a New Era: Lessons of the Persian Gulf War, U.S. House of Representatives, Committee on Armed Services, March 30, 1992, pp. 16-17.

<sup>12</sup>*Supra* note 10.

workload consolidations and eliminate inefficient operations." <sup>13</sup> However, the Panel notes that, under the proposed statute, the Secretary retains full discretion to establish core in the first instance. Thus, the Panel does not concur in the belief that the proposal unduly restricts management flexibility in this area.

#### **3.5.4.5. Relationship to Objectives**

Amendment of this statute will further the goal of streamlining and simplifying the DOD acquisition process.

#### **3.5.4.6. Proposed Statute**

The proposed statute 10 U.S.C. § 24XY, at subsections (a) and (b), provides as follows:

(a) **POLICY** - It is essential for the national defense that Department of Defense activities maintain a core logistics capability (including personnel, equipment, and facilities) sufficient to ensure a ready and controlled source of technical competence and resources necessary for an effective and timely response to national defense contingency situations and other emergency requirements.

(b) Accordingly, the Secretary of Defense or secretary of a military department shall identify those logistics activities that are necessary to maintain the logistics capabilities described in subsection (a).

(1) Notwithstanding any other provision of law, the Secretary of Defense or secretary of a military department shall have the modification, depot maintenance, and repair of defense-related material performed by Government or military personnel at activities identified in subsection (b) as the secretary determines necessary to maintain the core logistics capabilities described in subsection (a).

(2) The Secretary of Defense or the secretary of a military department may use competition among these Government-owned facilities to determine which entity can most efficiently perform the core logistics requirements described at subsection (a) above, considering both cost and performance factors.

#### **Current Statutes**

The text of the current law is as follows:

10 U.S.C. § 2464. Core logistics functions

(a) Necessity for core logistics capability.

---

<sup>13</sup>Datafax transmission from Mr. Beirn Staples, Office of the Assistant Secretary of Defense (Production and Logistics), Maintenance Policy Directorate, to Ms. Theresa Squillacote, dated 18 Nov. 1992.

(1) It is essential for the national defense that Department of Defense activities maintain a logistics capability (including personnel, equipment, and facilities) to ensure a ready and controlled source of technical competence and resources necessary to ensure effective and timely response to a mobilization, national defense contingency situations, and other emergency requirements.

(2) The Secretary of Defense shall identify those logistics activities that are necessary to maintain the logistics capability described in paragraph (1).

**(b) Limitation on contracting.**

(1) Except as provided in paragraph (2), performance of a logistics activity identified by the Secretary under subsection (a)(2), and performance of a function of the Department of Defense described in section 1231(b) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 731), may not be contracted for performance by non-Government personnel under the procedures and requirements of Office of Management and Budget Circular A-76 or any successor administrative regulation or policy (hereinafter in this section referred to as OMB Circular A-76).

(2) The Secretary of Defense may waive paragraph (1) in the case of any such logistics activity or function and provide that performance of such activity or function shall be considered for conversion to contractor performance in accordance with OMB Circular A-76. Any such waiver shall be made under regulations prescribed by the Secretary and shall be based on a determination by the Secretary that Government performance of the activity or function is no longer required for national defense reasons. Such regulations shall include criteria for determining whether Government performance of any such activity or function is no longer required for national defense reasons.

(3) A waiver under paragraph (2) may not take effect until--

(A) the Secretary submits a report on the waiver to the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives; and

(B) a period of 20 days of continuous session of Congress or 40 calendar days has passed after the receipt of the report by those committees.

(4) For purposes of paragraph (3)(B), the continuity of a session of Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of such 20-day period.

### **3.5.5. 10 U.S.C. § 2465**

#### **Prohibition on contracts for performance of firefighting or security-guard functions**

##### **3.5.5.1. Summary of Law**

This section provides that DOD funds may not be spent to enter into contracts for the performance of firefighting or security-guard functions at any military installation or facility. The prohibition does not apply to contracts for services at locations outside the United States where armed forces members, otherwise involved in unit readiness, would be performing the function. Nor does it apply to contracts for services at GOCO facilities or for contracts extant on September 24, 1983.

##### **3.5.5.2. Background of Law**

This section was first enacted by the National Defense Authorization Act for Fiscal Year 1987.<sup>1</sup> The Senate version of that bill contained a provision that would extend for one year a freestanding, public law provision setting forth the same prohibition. The Senate language also contained a reporting requirement to review the performance standards and those inherently governmental activities within the firefighting function, and an estimate of cost savings associated with such contracting out over a five year period. The Senate Report indicated that firefighters would continue to be exempt until the congressional report indicated what positions could be contracted out in the future.<sup>2</sup>

The House version of the bill proposed codification of a permanent prohibition on firefighting functions currently being performed by DOD civilians, with the exceptions as currently listed. In conference, the House version was adopted. The conferees also agreed to extend the current prohibition on conversion of security guard functions for one additional year, unless the Secretary of Defense determines that such conversion would not adversely affect installation security, safety and readiness.<sup>3</sup>

##### **3.5.5.3. Law in Practice**

There is no direct, regulatory implementation of this section.

The Department of the Army, Office of the Judge Advocate General, the Assistant Secretary of Defense (Production and Logistics), Installations, and Department of the Navy, Office of the Chief of Naval Operations, Shore Activities Division, all recommend repeal of this statute. Comments received from the Navy office noted that this statute presented special

---

<sup>1</sup>Pub. L. No. 99-661, § 1222(a), 100 Stat. 3976 (1986).

<sup>2</sup>S. REP. NO. 331, 99th Cong., 1st Sess. 277-78 (1986).

<sup>3</sup>H.R. REP. NO. 1001, 99th Cong., 1st Sess. 526 (1986).

problems during Operation Desert Shield/Desert Storm. In one case, the Commander of the National Naval Medical Center advised the Chief of Naval Operations that he intended to use contract personnel to supplement his in-house guard force in light of a perceived terrorist threat and the lack of in-house personnel to fill existing vacancies. He was unable to do so because of this statutory prohibition. The commander advised that the National Naval Medical Center, a high visibility target, was placed at significant risk because of the prohibition.<sup>4</sup>

The Navy further notes numerous instances of short-term guard requirements that would have been ideally suited for contract support but instead were met by increased overtime or by diversion of resources from other requirements. Finally, the Navy also notes that there are locations that are uniquely suited for contract performance of such functions. For example, a radar site at Amchitka, Alaska was intended to be maintained by contract personnel. Use of sailors or government civilians to perform security-guard and firefighting functions at such a remote site has been highly unproductive given the overall reliance on a single contract for all other support services. After extensive efforts, the Navy was able to obtain specific, legislative relief from this prohibition for this one site.<sup>5</sup>

The Department of the Army, Office of the Judge Advocate General provides additional support for repeal of this statute. That Office notes that this statute prevents the Army from eliminating duplicative and costly firefighting services where army installations adjoin metropolitan areas that have robust firefighting departments. The installation is forced to maintain a complete in-house force, the cost of which is not warranted by the limited firefighting requirements of the institution. Further, that office states that a number of installations will incur substantial firefighting service costs as a result of the base closure and realignment initiatives. In one case, firefighting services will constitute over 60% of the support costs at one small installation that will be placed in an inactive status.<sup>6</sup>

#### **3.5.5.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute in its entirety. As the numerous examples set forth above demonstrate, this blanket statutory prohibition has significantly impeded management flexibility, has increased costs, and in some instances, has seriously hampered military mission requirements. The ability to decide whether or not to contract for such functions should be left to management discretion based on traditional contracting out principles.

---

<sup>4</sup>Memorandum from Mr. Theodore Fredman, Assistant to the General Counsel (FOIA), Department of the Navy, , to Acquisition Law Task Force, dated 14 Sep. 1992.

<sup>5</sup>*Id.*

<sup>6</sup>Memorandum from Col. Paul C. Smith, Chief, Contract Law Division, Department of the Army, Office of the Judge Advocate General, to DOD Advisory Panel, dated 14 Sep. 1992.

### **3.5.5.5. Relationship to Objectives**

Repeal of this statute will further the best interests of the DOD by eliminating a barrier to more efficient and economical operation of some of its facilities.

### **3.5.6. 10 U.S.C. § 2466**

#### **Limitations on the performance of depot level maintenance of materiel**

##### **3.5.6.1. Summary of Law**

This section prohibits Defense Agencies and Military Departments from contracting out more than 40% of their respective depot maintenance workloads for performance by the private sector. With regard to aviation depot-level maintenance only, the Army must retain at least 50% of the workload in-house in fiscal year 1993, with this requirement increasing by 5% each year through 1995. The section provides that the respective military department secretaries and the Secretary of Defense for a Defense Agency may waive this restriction when necessary for national security and upon notification to the Congress. The section further provides that DOD civilian employees involved in the depot-level maintenance of material may not be managed on the basis of any end-strength constraints or numbers of employees limitation, but must be managed solely by available workloads and funding.

The Sacramento Army depot in California is expressly exempted from the contracting out prohibition. The respective military department secretaries and the Secretary of Defense are to report to Congress by January 15, 1994 on the progress of maintaining this level of in-house depot-level maintenance. Finally, the section prohibits the secretaries from canceling a depot-level maintenance contract to comply with the requirements of the section.

##### **3.5.6.2. Background of Law**

This section was first enacted by the National Defense Authorization Act for Fiscal Year 1989.<sup>1</sup> The original language provided that the Secretary of Defense shall prohibit the secretaries of the Army and Air Force, in selecting a depot maintenance service entity, from competing among maintenance activities of their respective departments or between such activities and a private contractor. This provision originated in the House version of the bill. The House Committee Report merely restated the statutory prohibition.<sup>2</sup>

The section was amended in 1989 to clarify the extant prohibition and to make other, technical clarifications.<sup>3</sup>

In 1990, operation of the blanket prohibition was suspended for a one-year period to allow an evaluation of a pilot program for competition of depot maintenance workload in the Army and Air Force. The one-year pilot program was limited to one Air Force logistics center and one Army depot, and recommended to include one Navy aviation center. In implementing the pilot

<sup>1</sup>Pub. L. No. 456, § 326(a), 102 Stat. 1955 (1988).

<sup>2</sup>H.R. REP. No. 563, 100th Cong., 1st Sess. 232 (1988).

<sup>3</sup>Pub. L. No. 189, §313, 103 Stat 1412 (1989).

program, the Secretary of Defense was to ensure that all competing DOD activities submit bids with comparable estimates for direct and indirect cost factors. The Secretary was also required to report to the congressional defense committees on the program's results by March 31, 1992. Agreement on the pilot program was reached in conference in lieu of a Senate proposal to repeal 10 U.S.C. § 2466 in its entirety.<sup>4</sup> That same year the Defense Appropriations Act authorized a broader competition among the depots and the private sector. The competition was not limited to one Army and one Air Force activity but had to involve the modification, depot maintenance or repair of aircraft, vehicles or vessels.<sup>5</sup>

In 1991, section 2466 was amended to eliminate the blanket prohibition on competitions entirely, and instead require that at least 60% of the depot-level maintenance of the Army and Air Force be performed by government employees.<sup>6</sup> This limitation was to be measured in fiscal year dollars.<sup>7</sup> The House version of the bill would have allowed DOD to compete annually between \$5 to \$15 million of depot maintenance workload with the private sector and would have limited competition to 40% of depot workload. The House Committee Report based this proposal on concerns regarding a DOD proposal to compete between depots and private contractors. Specifically, such competition would:

- (1) add bid and proposal costs to government activities that bid;
- (2) skew establishment of those core in-house maintenance levels necessary to surge in critical military situations, and
- (3) result in an unequal playing field because of excessive, continuing costs that must be included in the government's bid.<sup>8</sup>

The Senate version of the bill would have extended the existing pilot program and repealed the extant prohibition entirely.

In conference, the Senate receded with amendments that codified the 60% in-house performance minimum, the prohibition on management by end-strength, waiver authority and reporting requirement.<sup>9</sup>

The same public law also contained a freestanding provision authorizing a depot maintenance competition pilot program for the Army and Air Force during fiscal years 1992 and 1993 for up to 10% of all depot-level maintenance not required to be performed in-house under the newly-enacted law.<sup>10</sup> A report with a five-year strategy for use of competition in this area

<sup>4</sup>Pub. L. No. 101-510, § 922. See H. R. Rep. No. 923, 101st Cong., 1st Sess. 195 (1990).

<sup>5</sup>Pub. L. No. 101-511, § 8072, 104 Stat. 1891 (1990).

<sup>6</sup>Pub. L. No. 102-190, § 314, 105 Stat. 1457 (1991).

<sup>7</sup>H. R. CONF. REP. No. 311, 102d Cong., 1st Sess. 526 (1991).

<sup>8</sup>H.R. REP. No. 60, 102d Cong., 1st Sess. 195 (1991).

<sup>9</sup>H.R. CONF. REP. No. 311, 102d Cong., 1st Sess. 526-27 (1991).

<sup>10</sup>Once again the Appropriations Act also contained a provision authorizing depot-level maintenance competitions that differed from the pilot program. Pub. L. No. 102-172, § 8120, 105 Stat. 1204 (1991).

must be submitted to the Congress by December 1, 1993. The same provision also prohibited the military department secretaries from canceling any extant contract to comply with the new law.

The National Defense Authorization Act for Fiscal Year 1993 converted the affirmative 60% in-house requirement for depot-level maintenance workload to a prohibition against contracting out more than 40% of the workload.<sup>11</sup> The limitation was also extended to the Navy and Defense agencies. The legislative history indicates that the prohibition should not be measured by each type of equipment or material.<sup>12</sup> In addition, the Act again amended subsection (a) to permit the Secretary of the Army to maintain only a 50% in-house workload requirement as to Army aviation, although that figure increases each year by 5% through 1995. That Act extended the reporting requirement and added the current contract cancellation prohibition. Finally, that Act also repealed the pilot program for depot-level maintenance competition. The provision authorizing depot-level maintenance competitions in the last two appropriations acts was also repealed.

At the same time, Congress added a new provision to chapter 146 of Title 10 regarding depot-level maintenance workloads. Section 2469 now requires that DOD and the military departments use competitive procedures before selecting a new entity, presumably public or private, to perform a depot maintenance workload with a value of \$3 million or more and presently being performed by a DOD depot-level activity.<sup>13</sup>

### **3.5.6.3. Law in Practice**

This section is implemented by DOD Directive 4151.18, "Maintenance of Military Materiel," (August 12, 1992). That Directive states that "it is DOD policy that the DOD Components shall provide an adequate program for maintenance of assigned materiel . . . to (a) meet peacetime readiness and combat sustainability objectives [and] (b) provide for applicable mobilization and surge requirements."<sup>14</sup> The Defense Depot Maintenance Council coordinates depot maintenance activities within DOD and its components.

The Defense Depot Maintenance Council Corporate Business Plan states that "DOD's policy is to maintain the most efficient core logistics capability for performing mission essential depot maintenance in support of the full range of military contingencies" and that "core capability will be used to satisfy a portion of peacetime requirements."<sup>15</sup> That Plan further defines core as:

Core is an integral part of a depot maintenance skill and resource base which shall be maintained within depot activities to meet contingency requirements. It will comprise only a minimum level of mission essential capability either under the control of an assigned

<sup>15</sup>As issued Dec. 1991, at 33.

or jointly determined DOD Component where economic and strategic considerations warrant.<sup>16</sup>

Finally, the DOD Cost Comparison Handbook is used to establish standards of cost comparability among bids in public/private competitions in this area.

With respect to this statute, U.S. Army Tank-Automotive Command notes that this statute should be considered for consolidation with 10 U.S.C. § 2464. That recommendation is based on the fact that this statute's legislative history indicates that the 60%/40% split is guided by the same reservation of "core workload" principle that exists in the core logistics concept.<sup>17</sup>

The Council of Defense and Space Industry Associations (CODSIA) recommended to the Panel that this statute should be repealed in its entirety as there is no justification for an arbitrary statutory limitation on the amount of work that should be withheld from private sector contracting.<sup>18</sup> CODSIA notes that the maintenance of private sector capabilities in this area is just as crucial to an effective maintenance base as are in-house capabilities.<sup>19</sup> The Department of the Army, Office of the Judge Advocate General, also comments that this statute warrants repeal, on the basis that such functions should be competed under standard, A-76 procedures.<sup>20</sup>

#### **3.5.6.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute. The Panel believes that maintenance of an arbitrary standard for in-house, depot-level maintenance by DOD impedes effective management in this area.

In 1990, the Depot Competition Pilot Program initially was limited to one selected Army depot. It was expanded the next year to 4% depot workload. The National Defense Authorization Act for Fiscal Year 1993 repealed this program in its entirety. Competitions are required now by 10 U.S.C. § 2469 in certain instances. Furthermore, in the Appropriations Act, competitions are authorized in almost all cases during FY 93.<sup>21</sup>

However, under the maze of legislation, it remains unclear whether, and to what degree, public/private or public/public competition may occur for unrestricted workload. Rather, the Panel believes that the level of mandatory, in-house depot level maintenance should be explicitly guided by the concept of core that underlies the statutory prescription in 10 U.S.C. § 2464, i.e.,

---

<sup>16</sup>*Id.*

<sup>17</sup>Memorandum from Mr. Allan Kalt, Chief, Procurement Law Division, US Army Tank-Automotive Command, to Commander, US Army Materiel Command, dated 1 Sep. 1992.

<sup>18</sup>Memorandum from Council of Defense and Space Industry Associations (CODSIA), to Messrs. Anthony Gamboa and LeRoy Haugh, dated 16 Oct. 1992.

<sup>19</sup>*Id.*

<sup>20</sup>Memorandum from Col. Paul C. Smith, Chief, Contract Law Division, Department of the Army, Office of the Judge Advocate General, to DOD Advisory Panel, dated 14 Sep. 1992.

<sup>21</sup>Pub. L. No. 102-396, § 9095, 106 Stat. 1924 (1992).

that level of maintenance capability necessary to sustain an effective, in-house maintenance base. That level should be determined at the discretion of the Secretary of Defense or military department secretary. Indeed, as noted above, the Defense Depot Maintenance Council uses a parallel core concept to manage depot maintenance within the Department. That same concept is also stated DOD policy as set forth in the relevant DOD Directive.

In its proposed 10 U.S.C. § 24XY, the Panel would require that this core maintenance capability be performed in-house. However, the assignment of in-house performance workload can be determined by competitions between government entities or by direct assignment to such entities. The Panel believes that in-house competitions can increase efficiencies in government activity operations and should be one avenue of workloading available to the Department.<sup>22</sup>

Above that core level, the secretaries should be permitted, but not required, to compete all remaining workload to achieve the best-value performance for the government. Such competition should include public/public, public/private, and private/private competitions. In such competitions, the Panel recommends a requirement that all "bids shall accurately disclose all costs properly and consistently derived from accounting systems and practices that comply with laws, policies and standards applicable to those entities."<sup>23</sup> This requirement attempts to address some of the issues that concerned Congress when it extended the pilot program in 1991 and specifically addresses the issue of the incomparability of bids among and between public and private entities. The details of comparable cost estimation among bids should be established through regulatory guidance, as it is now through the DOD Cost Comparison Handbook.<sup>24</sup>

The Panel also recommends repealing the newly enacted section 2469. The statute requires competitions before changing the performance of depot-level maintenance workloads, valued at \$3 million or more, from a DOD depot activity to a private contractor. The statute may even require competitions before changing performance from one in-house activity to another in house-activity. While in-house competitions may in certain instances increase efficiencies, they should not be the sole method for distributing workload within the Department. The same is true

---

<sup>22</sup>In support of this amendment, the Panel notes that DOD Directive 4151.18, cited above, already requires the DOD components to "improve efficiency and effectiveness of DOD depot maintenance operations through depot maintenance interservicing of similar equipment and competition between depot maintenance activities and private entities." *Id.* at 4.

<sup>23</sup>This provision would obviate further requirements as to cost comparability in public/private competitions in National Defense Appropriations Acts for FY 91 and 92. (§§ 8072 and 8120, respectively).

<sup>24</sup>Under the DOD Appropriations Act for FY 1993, cost comparability must now be certified by the Defense Contract Audit Agency (DCAA). Pub. L. No. 102-396, § 9095, 106 Stat. 1924 (1992). A staff member of the Defense Subcommittee, Senate Appropriations Committee, orally reported to a staff member of the Acquisition Law Task Force that this provision was inserted because it had been DOD policy for the DCAA to conduct pre-award audits. Thus, the provision was intended to conform the law to stated DOD policy. However, the Maintenance and Production Directorate, Assistant Secretary of Defense (Production and Logistics), orally reports that this conclusion by the Subcommittee was inaccurate. The DOD Inspector General had, on limited occasion, previously permitted DCAA to conduct pre-award audits, but only upon the request of the contracting officer. The DOD Comptroller is currently seeking an exemption from this Appropriations Act provision. A case is currently pending before the DAR Council to implement the cost requirements associated with depot-level maintenance competitions (DAR Case 91-354).

for public/private competitions. As the statute now reads there is not even a waiver provision for the competition requirement.

Finally, the Panel recommends retention of the current rule that all such competitions be exempt from traditional, A-76 procedures.

#### **3.5.6.5. Relationship to Objectives**

Repeal of this statute will further the goal of streamlining and clarifying the DOD acquisition process by setting forth one, unitary standard for core functions of the Department, including critical, maintenance base core functions.

### **3.5.7. 10 U.S.C. § 2467**

#### **Cost comparisons: requirements with respect to retirement costs and consultation with employees**

##### **3.5.7.1. Summary of Law**

This section requires DOD to include certain prescribed retirement and disability costs in any cost comparison made under Circular A-76. It also requires DOD employees responsible for making conversion decisions to consult regularly with the civilian employees who will be affected by a decision, including any relevant labor organization.

##### **3.5.7.2. Background of Law**

This section was first enacted by the National Defense Authorization Act for Fiscal Year 1989.<sup>1</sup> The language as adopted originated in the House version of the bill. The House Committee Report contains no language regarding this specific provision.<sup>2</sup>

##### **3.5.7.3. Law in Practice**

This authority is implemented in Title 32, Code of Federal Regulations--National Defense, Subtitle A--Department of Defense, Part 169c, Commercial Activities Program, revised as of July 1, 1991. The requirements are also set forth in the DOD Instruction 4100.33.

The American Federation of Government Employees, Field Services Department, notes with respect to this section that:

It is essential to maintain legislation requiring consultation with employees during development of the performance work statement and the most efficient organization study. These consultations are an important step toward increasing the competitiveness of the in-house bid. . . . [M]anagement publications herald employee participation as a key step in cost reduction.<sup>3</sup>

---

<sup>1</sup>Pub. L. No. 100-456, § 331(a), 102 Stat. 1955 (1988).

<sup>2</sup>H.R. REP. No. 563, 100th Cong., 1st Sess. (April 5, 1988).

<sup>3</sup>Letter from Mr. Robert Edgell, Deputy Director, American Federation of Government Employees, AFL-CIO, Field Services Department, to Ms. Theresa Squillacote, dated 26 Aug. 1992.

#### **3.5.7.4. Recommendation and Justification**

##### **Amend and Consolidate**

The Panel would retain the basic cost and consultation requirements of this statute within the consolidated statute 24XX. The Panel recommends amendment of the consultation requirement to vest it in the Secretary of Defense or secretary of the military department. The current requirement that each DOD officer responsible for the contracting decision shall consult with affected employees is both cumbersome and ambiguous. Rather, the Panel would require the Secretary of Defense or of the military department to implement fully the requirement to consult with those affected employees. Similarly, the Panel would state that the requirement include applicable retirement costs in broader terms, leaving it to the regulations to cite the specific, federal employee retirement costs to be included.

#### **3.5.7.5. Relationship to Objectives**

Amendment and consolidation of this statute will further the goal of streamlining and clarifying the DOD acquisition process.

#### **3.5.7.6. Proposed Statute**

Subsection (b) and (c) of the proposed statute 10 U.S.C. § 24XX provides as follows:

(b) **REALISTIC AND FAIR COST COMPARISONS**-- For the purpose of determining whether to contract with a source in the private sector, in contrast with performance by a government source, for the performance of a DOD function on the basis of a cost comparison, the Secretary of Defense or secretary of a military department shall ensure that all costs considered are realistic and fair. At a minimum, such estimated costs must include costs of quality assurance, technical performance monitoring, liability insurance, employee retirement and disability benefits, and all other applicable overhead costs.

(c) **CONSULTATION** - The Secretary of Defense shall ensure that affected civilian employees are consulted and that their views on the development and preparation of any performance work statements or management efficiency studies to be used in the cost comparison are obtained by cognizant DOD officials. In the case of employees represented by a labor organization accorded exclusive recognition under section 7111 of Title 5, U.S. Code, consultation with representative of that labor organization shall satisfy the consultation requirement in this subsection. In the case of employees not exclusively represented by a labor organization under section 7111 of Title 5, consultation with appropriate representatives of those employees shall satisfy the consultation requirement of this subsection.

#### **Current Statutes**

The text of the current § 2467, to be repealed and replaced by this proposed subsection, provides as follows:

§ 2467. Cost comparisons: requirements with respect to retirement costs and consultation with employees

**(a) REQUIREMENT TO INCLUDE RETIREMENT COSTS.**

(1) In any comparison conducted by the Department of Defense under Office of Management and Budget Circular A-76 (or any successor administrative regulation or policy) of the cost of performing commercial activities by Department of Defense personnel and the cost of performing such activities by contractor personnel, the Secretary of Defense shall include retirement system costs (as described in paragraphs (2) and (3)) of both the Department of Defense and the contractor.

(2) The retirement system costs of the Department of Defense shall include (to the extent applicable) the following:

(A) The cost of the Federal Employees' Retirement System, valued by using the normal-cost percentage (as defined by section 8401(23) of title 5, United States Code).

(B) The cost of the Civil Service Retirement System under subchapter III of chapter 83 of such title 5.

(C) The cost of the thrift savings plan under subchapter III of chapter 84 of such title 5.

(D) The cost of the old age, survivors, and disability insurance taxes imposed under section 3111(a) of the Internal Revenue Code of 1986

(3) The retirement system costs of the contractor shall include the cost of the old age, survivors, and disability insurance taxes imposed under section 3111(a) of the Internal Revenue Code of 1986, the cost of thrift or other retirement savings plans, and other relevant retirement costs.

**(b) Requirement to consult DOD employees.**

(1) Each officer or employee of the Department of Defense responsible for determining under Office of Management and Budget Circular A-76 whether to convert to contractor performance any commercial activity of the Department--

(A) shall, at least monthly during the development and preparation of the performance work statement and the management efficiency study used in making that determination, consult with civilian employees who will be affected by that determination and consider the views of such employees on the development and preparation of that statement and that study; and

(B) may consult with such employees on other matters relating to that determination.

(2)(A) In the case of employees represented by a labor organization accorded exclusive recognition under section 7111 of title 5, United States Code, consultation with representatives of that labor organization shall satisfy the consultation requirement in paragraph (1).

(B) In the case of employees other than employees referred to in subparagraph(A), consultation with appropriate representatives of those employees shall satisfy the consultation requirement in paragraph (1).

(3) The Secretary of Defense shall prescribe regulations to carry out this subsection. The regulations shall include provisions for the selection or designation of appropriate representatives of employees referred to in paragraph (2)(B) for purposes of consultation required by paragraph (1).

### **3.5.8. 10 U.S.C. § 2468**

#### **Military Installations: authority of base commanders over contracting for commercial activities**

##### **3.5.8.1. Summary of Law**

This section provides that the Secretary of Defense shall direct that the commander of each military installation shall have the authority to enter into contracts for performance of commercial activities on that installation. This authority is subject to the authority, direction and control of the Secretary. Commanders must first inventory in-house commercial activities, decide which should be subject to A-76 procedures and solicit competitive proposals for those subject to the process. The Secretary is required to prescribe regulations under which commanders exercise this authority. The authority provided to base commanders by this section expires on September 30, 1993. The section also requires commanders, to the extent practicable, to assist in finding suitable employment for employees displaced by contract.

##### **3.5.8.2. Background of Law**

This section was first enacted by the National Defense Authorization Act for Fiscal Years 1990-91.<sup>1</sup> The language originated in the House version of the bill. The House provision was intended to make permanent a prior authorization act provision (the Nichols Amendment) that required the Secretary of Defense to delegate more authority over such contractors to base commanders.

The Nichols Amendment originated as a floor amendment to the National Defense Authorization Act for FY 1988 and 89.<sup>2</sup> When it was introduced, the amendment sponsor noted that the provision was based on a model installation program previously implemented by DOD and intended to give wide latitude to base commanders to develop new and innovative management techniques.<sup>3</sup> Overall, the amendment was intended to address inadequacies in the DOD contracting out program by putting greater authority in the hands of those closest to the activities and personnel in question.<sup>4</sup>

When this provision was codified, the House Report contained an extensive discussion of DOD contracting practices, based on hearings held earlier that year.<sup>5</sup> The House Committee noted that implementation of Circular A-76 through Executive Order 12615 was greatly accelerating the conversion process, without adequate consideration of management, quality assurance and operational requirements. The Report stated that the A-76 conversion that had

---

<sup>1</sup>Pub. L. No. 101-189, § 1131(a)(1), 103 Stat. 1560 (1989).

<sup>2</sup>Pub. L. No. 100-180, § 1111, 101 Stat. 1146 (1987).

<sup>3</sup>133 Cong. Rec. 11891 (May 11, 1987)(remarks by Representative Nichols).

<sup>4</sup>*Id.*

<sup>5</sup>H.R. REP. NO. 121, 101st Cong., 1st Sess. 195-99 (1989).

occurred within the DOD had resulted in some savings and greater efficiencies. However, the Committee noted recent instances (such as the trainer aircraft maintenance functions at Columbus Air Force Base) in which the DOD commercial activities program had raised serious questions about its quality and cost-effectiveness.

In particular, data indicated that the overall effect of the program was to increase defense operation costs. Particular note was made of the costs involved in attempting to administer the A-76 program. Such costs appeared to far exceed the estimated annual savings associated with A-76 conversions. The Committee also noted the significant length of time required to complete such conversion studies, and that O&M budgets were frequently used to pay commercial activity costs that were often greater than the cost studies indicated.

In sum, the House Report stated:

[T]he Committee is concern [sic] that efforts to push the pace and scope of the commercial activities program are not realistic and are likely to result in increased cost, less efficiency and lower quality.

Consequently, the committee recommends approval of section 3441, which would place the Nichols amendment into permanent law and continue the existing delegation of authority over the A-76 program to the base commander. The committee has conducted continuous and careful oversight of the DOD commercial activities program for almost a decade, and finds that the primary problem with the program has been the inability of senior Executive Branch policy makers to recognize the practical limitations of the program. This failure to recognize reality has largely contributed to the widespread dissatisfaction with the A-76 program in the field. . . .

The Nichols amendment recognized the futility of trying to push the pace and scope of the commercial activities program beyond the Department's ability to perform quality cost comparisons that result in cost effective contracts. Above all, it recognized the necessity to have faith in the judgment of base commanders. . . .

The committee recognizes that base commanders exercising this authority are going to be facing tough decisions . . . Nevertheless, the committee continues to believe that the man on the spot should be allowed to use all available management tools, including contracting out, and to make the final decision on A-76 reviews.<sup>6</sup>

---

<sup>6</sup>*Id.* at 198-99.

In conference, the Nichols Amendment authority was merely extended through September 30, 1990. The conferees directed the Secretary of Defense to report to the congressional defense committees on the impact of this delegation.<sup>7</sup>

This section was amended in 1990 by the National Defense Authorization Act for Fiscal Year 1991, again extending the base commander authority for a one-year period, until September 30, 1990.<sup>8</sup>

In 1991, this section was amended to extend the authority until September 30, 1993.<sup>9</sup> The House had again sought to make the provision permanent law, while the Senate had sought to repeal this section entirely.<sup>10</sup>

### 3.5.8.3. Law in Practice

This section is implemented by DOD Directive 4100.33, and by Title 32--National Defense, Subtitle A--Department of Defense, Part 169a, Commercial Activities Program, revised as of July 1, 1991.

Numerous parties surveyed recommended repeal of this statute in its entirety. The Department of the Navy, Chief of Naval Operations, Shore Activities Division, notes that, because the A-76 cost comparison process can be disruptive in the short-term, many base commanders elect to avoid conducting such comparisons even when they yield significant savings and management efficiencies in the long-term.<sup>11</sup> That Office states that providing this authority to base commanders undercuts the chain-of-command in this area.<sup>12</sup> Assistant Secretary of Defense (Production and Logistics), Installations, also recommends repeal of this statute as diluting the authority of the Office of the Secretary of Defense and violating the concept of "chain-of-command."<sup>13</sup> The Department of Air Force, Deputy Assistant Secretary (Communications, Computers & Logistics), states with respect to this statute that:

Historically, the A-76 cost comparison process yields significant savings and management efficiencies. Installation commanders may have a different perspective of resource management and decisions may at times not be in the best interest of the total Air Force. In today's draw down environment, it is critical that our senior leadership retain flexibility to make decisions affecting the distribution of available resources in coordination with installation commanders. This approach ensures both installation and Air

<sup>9</sup>Pub. L. No. 102-190, § 315(a), 105 Stat. 1337 (1991).

<sup>10</sup>H.R. CONF. REP. No. 311, 102nd Cong., 1st Sess. 527 (1991).

<sup>11</sup>Memorandum from Mr. Theodore Fredman, Assistant to the General Counsel (FOIA), Department of the Navy, to Acquisition Law Task Force, dated 14 Sep. 1992.

<sup>12</sup>*Id.*

<sup>13</sup>Memorandum from Mr. David L. Spoeck, Special Assistant, Assistant Secretary of Defense (Production and Logistics), to Acquisition Law Task Force, dated 29 Sep. 1992.

Force-wide requirements are properly considered in the distribution of our limited resources.<sup>14</sup>

#### **3.5.8.4. Recommendation and Justification**

##### **Repeal**

The Panel recommends repeal of this statute. The Panel concurs in the belief that this statute undermines "chain-of-command" principles. The Panel agrees that appropriate input by a base commander is necessary to effective decision-making in this area. However, that input should be channeled through the chain-of command so that the final decision will incorporate a broader, management perspective. The Panel believes that this principle is even more important in this era of downsizing when limited resources will be available to accomplish a greater variety of tasks.

#### **3.5.8.5. Relationship to Objectives**

Repeal of this statute will streamline the DOD acquisition process and promote the best interests of the DOD by affording greater management flexibility in the contracting out process.

---

<sup>14</sup>Memorandum from Mr. Lloyd K. Mosemann, Deputy Assistant Secretary (Communications, Computers & Logistics), Department of the Air Force, to DOD Advisory Panel, dated 21 Oct. 1992.

### 3.5.9. 10 U.S.C. §§ 4532 and 9532

#### Factories and arsenals: manufacture at; abolition of

##### 3.5.9.1. Summary of Laws

These sections, at subsection (a), authorize the secretaries of the Army and Air Force to have supplies needed for their respective departments made in factories or arsenals owned by the United States, so far as economical. The Army statute, at 10 U.S.C. § 4532(a), states that the Secretary of the Army shall have supplies so manufactured. The Air Force authority, at 10 U.S.C. § 9532(a), states that the Secretary of the Air Force may have supplies so manufactured.

These sections also provide at subsection (b) that the secretaries concerned may abolish any U.S. arsenals considered unnecessary.

##### 3.5.9.2. Background of Laws

The language in subsection (a) was originally enacted in 1920.<sup>1</sup> The legislative history indicates that the provision was intended to cover the case of a factory that had been recently purchased by the government and was then laying idle.<sup>2</sup> The Comptroller General has interpreted this and related legislative history as requiring that government-owned facilities should not be permitted to lay idle if such facilities can produce defense needs at a cost no greater than that offered by private industry.<sup>3</sup> This language as it applied to the Army was expressly retained in Title I of the Army Organization Act of 1950.<sup>4</sup> The House Report on that legislation does not expressly discuss the retention of this language.<sup>5</sup>

Subsection (a) as it applies to the Air Force was initially segregated and made applicable to the Air Force by the National Security Act of 1947. In that legislation, the requirement of subsection (a) was still mandatory. However, the Air Force Reorganization Act of 1951 repealed and replaced pertinent provisions of the National Security Act of 1947.<sup>6</sup> Under that legislation, the word "shall" as used in the Army Arsenal statute was replaced by the word "may," making it permissive for the Air Force to utilize government-owned factories or arsenals. Hearings on an earlier version of this public law contain a dialogue between the House Armed Services Committee chairman and the Air Force Secretary as to this change:

[Secretary]: Now, . . . we are changing 'shall' to 'may,' and I would like to talk about that for one moment . . . . As the language stood

<sup>1</sup>Pub. L. No. 66-242, § 5, 41 Stat. 765 (1920).

<sup>2</sup>59 Cong. Rec. 4156-157 (remarks of Mr. Caldwell).

<sup>3</sup>B-143232, unpublished advisory opinion from Mr. Joseph Campbell, Comptroller General, to Hon. F. Edward Hebert, House Armed Services Committee, dated 15 Dec. 1960.

<sup>4</sup>Pub. L. No. 81-581, § 101, 64 Stat. 264 (1949).

<sup>5</sup>H.R. REP. No. 2110, 81st Cong., 2d Sess. (1950).

<sup>6</sup>Pub. L. No. 82-150, § 101(e), 65 Stat. 326 (1950).

before our change, it meant that we were compelled to manufacture at Government arsenals, . . . , all those supplies which we need which can be manufactured or produced on an economical basis at such arsenals

Now . . . we are in a period of expansion, and one of the policies that we are trying to follow out is to see to it that we have the best possible mobilization base . . . .

We do not fill [factories] to complete capacity. Now, why? Because we want to have a base from which we can expand very rapidly in time of need.

[Chairman]: So that you can make it if it is practical to do it in these United States arsenals; and, if not, you have latitude.

[Secretary]: Yes, sir; that is what we are recommending . . . .<sup>7</sup>

The House Report on this legislation indicated that the change was intended to make the statutory language permissive.<sup>8</sup>

The language at 4532(a) has been interpreted by the Comptroller General as:

- requiring mandatory use of government arsenals and government-owned factories to manufacture or produce all of its needs which could be so manufactured or produced on an economical basis;
- applying to both GOGO and GOCO facilities;
- evincing a congressional intent that government-owned industrial facilities should not be permitted to lie idle if it is possible to use such facilities to produce defense needs at a cost no greater than the comparable private industry cost; and,
- requiring comparison only of actual, out-of-pocket costs from producing at a government-owned facility.<sup>9</sup>

The language at subsections (b) was first enacted by the Army Appropriations Act of 1853 and was retained in subsequent codifications.<sup>10</sup>

### **3.5.9.3. Laws in Practice**

Section 4532 is implemented within the Department of the Army by "Implementation of Statutory Authorities for Manufacturing by Army Industrial Facilities," Memorandum dated 20 July 1992.

Both the Department of the Army, Office of the Judge Advocate General, and the U.S. Army, Tank and Automotive Command (TACOM), recommend that the Army's authority under 10 U.S.C. § 4532 be amended to give the secretary discretion to manufacture at in-house facilities, rather than the mandatory requirement in the current statute. TACOM notes as follows:

The fact that the Army Arsenal Act is mandatory, the Air Force Arsenal Act is permissive, and the Navy/Marine Corps have no parallel statute at all, also presents a potential for inequitable treatment among the services. In developing TACOM policy for implementation of the Army's Flexible Computerized Integrated Manufacturing (FCIM) initiative, a tri-service, Depot oriented effort to develop state of the art manufacturing capability with Army, Navy and Air Force Depots . . . , it became apparent that participating Depots, regardless of which service, would receive Arsenal Act evaluation (that is, out-of-pocket cost evaluation) for FCIM targeted workload of \$100,000 that had to go through the Arsenal Act make/buy decision process. It is unknown what basis of evaluation will be used by either the Air Force or the Navy in considering Army Depot offers on Air Force or Navy work offered up under this program. This situation makes it apparent that while the Army must extend all the advantages of out-of-pocket cost evaluation to the other services under its Arsenal Act procedures, it is unclear what obligation, if any, exists for the other services to extend the same treatment to the Army on their own acquisitions.<sup>11</sup>

No specific comments were received from the Department of the Air Force with respect to 10 U.S.C. § 9532.

### **3.5.9.4. Recommendation and Justification**

#### **Amend and Consolidate**

The Panel recommends that these authorities be amended and consolidated as set forth below. The Army and Air Force both maintain specialized, in-house manufacturing capabilities. These sections provide authority for the secretaries of those department to workload those activities as needed to maintain adequate in-house manufacturing capabilities.

---

<sup>11</sup>Memorandum from Allan S. Kalt, Chief, Procurement Law Division, U.S. Army, Tank and Automatic Command, to Commander, U.S. Army Materiel Command, dated 1 Sep. 1992.

The Panel considered, and rejected, amendment of these sections to track the same requirements for core logistics functions set forth in proposed statute 10 U.S.C. § 24XY. The Panel noted that the in-house manufacturing capability of the DOD is not as substantial as its in-house maintenance capability, and therefore did not warrant the application of a comparable, "core" concept.

The Panel does recommend, however, that the consolidated statute authorize the secretaries to workload manufacturing requirements at their discretion. Thus, the Panel would not maintain the mandatory authority currently set forth in section 4532. As noted in the TACOM comments, the mandatory nature of the Army provision leads to a lack of uniformity between the services in use of in-house industrial facilities and evaluation of offers from such facilities. In the face of reduced defense budgets and corresponding decreases in depot and arsenal workloads, the Army leadership has been confronted with reduced flexibility in managing the industrial base by mandatory application of the Army Arsenal Act. This situation did not exist when sufficient workload existed for depots and arsenals.

To the extent that depots have a manufacturing capacity incident to their maintenance activities, such depots have been construed as factories under the Arsenal Act. As this capacity becomes underutilized, depots have proposed to bid on new manufacturing within their capabilities, and called for out-of-pocket evaluation.<sup>12</sup> To the extent that the Arsenal Act applies and unused manufacturing exists, the Army has no option but to allow the depot to compete on an out-of-pocket basis, a significant advantage over private industry. Moving new manufacturing, traditionally an activity performed by industry, complicates preservation of the private industrial base. It is also anomalous because the main reason for depots is maintenance, not manufacturing.<sup>13</sup> Workloading them with new production may detract from their ability to respond to emergency maintenance requirements.

To a lesser extent, the same can be said of Arsenals which are manufacturing activities. However, the problem has not arisen to any significant extent with Arsenals.

Discretionary authority will allow greater flexibility and avoid "boxing-in" the Army leadership. At the same time, discretionary authority will permit efficient workloading of depots and arsenals.

#### **3.5.9.5. Relationship to Objectives**

Amendment and consolidation of these sections will further the goal of streamlining and simplifying the DOD acquisition process by setting forth a common, manufacturing authority for DOD and its components.

---

<sup>12</sup>Letterkenny Army Depot proposed teaming with Rock Island Arsenal for the Army's Paladin program, an upgrade of the M109 howitzer [the Army excluded the Depots under 10 U.S.C. § 2304(c)(3)]; Tooele Army Depot proposed to compete for the Army's 2 and 1/2 ton truck service Life Extension Program [the Depot eventually could not participate because engineering beyond their capability was required]; Tooele Army Depot proposed to compete for the Army's high mobility trailer bug [still under evaluation].

<sup>13</sup>See 10 U.S.C. 2364.

### 3.5.9.6. Proposed Statute

#### Factories and arsenals: manufacture at; ~~abolition of~~

(a) The Secretary of ~~the Army/Air Force~~ ~~[shall]~~ Defense or secretary of a military department may have supplies needed for the Department of Defense and its components ~~the Army/Air Force~~ made in factories or arsenals owned by the United States, ~~so far as these factories or arsenals can make these supplies on an economical basis.~~

(b) The Secretary of Defense or secretary of a military department may abolish any United States arsenal that he considers unnecessary.

### **3.5.10. 10 U.S.C. § 2212**

#### **Contracted advisory and assistance services: accounting procedures**

##### **3.5.10.1. Summary of the Law**

This section requires the Secretary of Defense to require that each military department maintain an accounting procedure to identify and control expenditures for contracted advisory and assistance services. The Secretary of Defense is required to issue regulations identifying those services deemed to be contracted advisory and assistance services and specifically those in direct support of and essential to a weapons system. The section then delineates numerous types of services to be considered by the Secretary. The section requires that DOD budget documents specifically identify the total amount requested for such services, and the amounts relative to each category.

##### **3.5.10.2. Background of the Law**

This section was originally enacted by the DOD Authorization Act of 1986.<sup>1</sup> The House and Senate versions of that bill had contained comparable language on this issue. The section was intended to establish congressional oversight of contracted advisory and assistance services (CAAS) by requiring DOD to define separate categories of these services and to identify them separately in budget exhibits to the Congress. In order to exempt, advisory services in support of major weapon systems from any future CAAS controls, the section required separate accounting of these system-based services and support.

Congress enacted this oversight provision because of the increased role that such contracted services were playing in the development, production and maintenance of weapons and logistics systems, and because of the lack of a clear definition in DOD of the various CAAS types: Specifically,

The conferees believe that this process of defining the services involved in [CAAS] and system services and support should enable the Defense Department to present information and data on its management of services provided by contractors in a manner which will provide each of the services, the Secretary of Defense, and Congress with a uniform system for recording CAAS expenditures and projected spending.<sup>2</sup>

---

<sup>1</sup>Pub. L. No. 99-145, § 918, 97 Stat. 690 (1985).

<sup>2</sup>H.R. CONF. REP No. 235, 99th Cong., 2nd Sess. 526 (1985).

### **3.5.10.3. Law in Practice**

This section is implemented by DOD Directive 4205.2, "DOD-Contracted CAAS," (January 27, 1986), by DFARS subpart 237.2, "Service Contracting; Consulting Services" and DFARS section 237.107, "Personal Services Contracts."<sup>3</sup>

The Office of the Director, Defense Procurement recommends repeal of this statute as duplicative of a recently-enacted permanent law provision in the Health and Human Services Appropriations Act for FY 1993.<sup>4</sup> That provision requires the Office of Management and Budget to establish funding for consulting services for each department and agency as a separate object class in each budget annually submitted to the Congress under 31 U.S.C. § 1105.<sup>5</sup> A proposed change to OMB Circular A-11 will implement this new statutory requirement.

### **3.5.10.4. Recommendation and Justification**

#### **Repeal**

The Panel recommends repeal of this statute. The Panel agrees that this statutory provision is duplicated by the provisions of new legislation. The scope of contracted advisory and assistance services for which reporting is required is virtually coextensive under both statutes. In addition, the Panel believes that it is more beneficial for this budgetary reporting requirement to be centrally managed under established OMB procedures. It is redundant to maintain a separate, comparable reporting requirement for DOD.

### **3.5.10.5. Relationship to Objectives**

Repeal of this statute will streamline and simplify the DOD acquisition process by eliminating a DOD-specific requirement that is now required of all federal agencies under another statutory provision.

---

<sup>3</sup>Comparable statutory authority, at 41 U.S.C. § 405 (b), is implemented by FAR section 37.2, and OMB Circular A-120, "Guidelines for the Use of Advisory and Assistance Services," (Jan. 4, 1988).

<sup>4</sup>Datafax transmission from Mr. Robert Nemetz, Contracted Advisory and Assistance Services (Director, Defense Procurement) to Ms. Theresa Squillacote, dated 6 Nov. 1992.

<sup>5</sup>Pub. L. No. 102-394, § 512, 106 Stat. 1826 (1992). This provision governs all federal agency budget submittals to the Congress.

### **3.5.11. 10 U.S.C. § 7314**

#### **Overhaul of naval vessels: competition between public and private shipyards**

##### **3.5.11.1. Summary of the Law**

This section compels the Secretary of the Navy to ensure that certain criteria are met in competition between public and private shipyards for the repair, alteration, overhaul, or conversion of naval vessels.

Specifically, the bid of any public shipyard must include the full costs to the United States associated with future retirement benefits of civilian employees and, in a case in which equal access to the Navy supply system is not allowed to public and private shipyards, a pro rata share of the costs of the Navy supply system. For comparability analysis, any bid from a private shipyard must include costs applicable to oversight of the contract by the appropriate Navy supervisor of shipbuilding, conversion, and repair. Lastly, this section mandates that the award be made using the results of the comparability analysis.

##### **3.5.11.2. Background of the Law**

This section was originally enacted by the National Defense Authorization Act for FY 1989.<sup>1</sup> The provision was generated by a 1988 GAO Report reviewing the Navy's cost comparability process in its public/private competitions.<sup>2</sup> That Report concluded that, while the Navy's comparability analysis was designed to satisfy the requirement for certification of comparability of all direct and indirect costs, there were additional costs to the Navy that had not been added to public shipyard proposals for cost comparability purposes. Accordingly, the GAO concluded that the Navy should add to those costs the cost to operate the Navy supply system and the full retirement costs for shipyard civilian personnel.<sup>3</sup> The GAO also concluded that the private sector should include the government's contract and supply system administration costs.<sup>4</sup>

Based on these recommendations, the House proposed the instant statutory provision, and the Senate receded in conference.<sup>5</sup>

---

<sup>1</sup>Pub. L. No. 100-456, § 1225 (a)(1), 102 Stat. 2054 (1988).

<sup>2</sup>GAO-NSIAD 88-109, "Navy Maintenance: Competing Vessel Overhauls and Repairs Between Public and Private Shipyards," B-229025, (March 1988).

<sup>3</sup>*Id.*, at 30.

<sup>4</sup>*Id.*

<sup>5</sup>H.R. CONF. REP No. 100-989, 100th Cong., 2d Sess. 2588 (1988).

### **3.5.11.3. Law in Practice**

The Office of Counsel, Naval Sea Systems Command, urges retention of this section because of need to maintain specifically identified cost categories for inclusion, or exclusion, in public bids.<sup>6</sup> That Office notes, for example, that there are unique costs incurred by public shipyards because of naval, industrial base policies. If public shipyards were obliged to include such costs, they would be severely hampered in public/private competitions.<sup>7</sup>

### **3.5.11.4. Recommendation and Justification**

#### **Retain**

The Panel recommends retention of this statute because it maintains fair competition between public and private shipyards. The Panel notes that the proposed statute 24XY provides, at subsection (d), that such bids must accurately disclose all costs properly and consistently derived from accounting systems and practices that comply with laws, policies and standards applicable to those entities. Despite this recommended language, the Panel recommends retention of this Navy-specific cost provision because of unique concerns applicable to naval ship repair. Specifically, naval industrial base policy presents an obstacle to an otherwise level playing field in shipyard public/private competitions.

### **3.5.11.5. Relationship to Objectives**

Retention of this section will promote greater efficiency in DOD acquisition practices and preservation of the shipyard industrial base.

---

<sup>6</sup>Datafax transmission from Mr. Theodore Fredman, Assistant to the General Counsel (FOIA), Department of the Navy, to Ms. Theresa Squillacote, dated 8 Dec. 1992.

<sup>7</sup>*Id.*, as supplemented by telephone conversation between Mr. Scott Garner, Office of Counsel, Naval Sea Systems Command, and Ms. Theresa Squillacote, Acquisition Law Task Force, on 6 Jan. 1992.

## **3.6. Industrial Base and Manufacturing Technology Laws**

### **3.6.0. Introduction**

The Panel considered within the scope of its review those laws within Title 10 concerning DOD Industrial Base and Manufacturing Technology policies.<sup>1</sup> However, this area of defense acquisition policy has been the subject of considerable legislative effort in the National Defense Authorization Act for Fiscal Year 1993.<sup>2</sup> That legislation repealed virtually all of these laws and enacted in their place new, and much more detailed, policies regarding the defense technology and industrial base.

The Panel believes that, because this body of legislation is new and untested, it is not feasible to engage in a full-scale analysis of each new statutory section. However, the Panel also believes that it is important to develop a position, albeit a generalized one, in this important area of defense acquisition. Therefore, based on the legislative histories of the repealed statutes, the comments that the Panel received during its survey of those laws, a review of the newly-enacted legislation, and other research, the Panel has developed a generalized comment on the industrial base legislation enacted in the National Defense Authorization Act for Fiscal Year 1993. This comment is guided by the statement of goals and objectives adopted by the Panel.

Essentially, the Panel endorses the overall goal of this legislation, but notes that it contains excessive detail. Also, the Panel recommends that Congress consider an additional policy statement as to the interplay between domestic industrial base issues and international defense trade and cooperation. Finally, the Panel notes that, in this era of downsizing, industrial base issues are increasingly generating antitrust legal and policy issues. While such issues are outside the scope of the Panel's review, they may warrant congressional scrutiny.

This subchapter summarizes the prior existing statutory structure, the newly enacted legislation and its rationale, and then comments on the new legislation, including making specific proposals where relevant.

#### **3.6.0.1. The Prior Existing Statutes**

- Section 2501: Secretary of Defense to guide the military departments on industrial base policies, including analyses of industrial base capabilities, military mobilization standards and commercial substitutes for military supplies.
- Section 2502: Under Secretary of Defense (Acquisition) to establish policies requiring industrial base analysis for major defense acquisition programs, including manufacturing efficiencies, the use of advance technology in the acquisition phases,

---

<sup>1</sup>10 U.S.C. §§ 2501 through 2517, except §§ 2504, 2505, 2506 and 2507, relating to Memoranda of Understandings, Offsets, Procurement of Goods which are Other than American, and Miscellaneous Procurement Limitations, which are discussed in Chapter 7 of this Report.

<sup>2</sup>Pub. L. No. 102-484, §§ 4201-4272, 106 Stat. 2658-770 (1992).

and use of acquisition plans that encourage use of technologies that reduce life-cycle costs.

- **Section 2503:** Under Secretary of Defense (Acquisition) to establish an Industrial Base Office to develop and implement programs and policies for defense industrial readiness, for use of advanced manufacturing technology and regulatory improvements, and for worldwide assessment of critical technologies and defense-related manufacturing capabilities.
- **Section 2504:** Secretary of Defense to evaluate the impact of Defense Memoranda of Understanding (MOUs) on industrial base and consult with Secretary of Commerce.
- **Section 2505:** President to establish an offset policy that offset contractual arrangements must consider technology transfer and industrial base issues; prohibits MOUs that would transfer defense technologies and adversely affect U.S. industrial base; U.S. firms may protest technology transfers on that basis.
- **Section 2507:** Miscellaneous domestic source procurement limitations (buses, chemical weapons antidotes, specified valves and machines, carbonyl iron powders, air circuit breakers, and typewriters).
- **Section 2509:** Secretary of Defense to consult with Secretary of Commerce and submit Defense Industrial Base Annual Report to Congress, including analysis of capability of industrial base to meet national security needs, sector financial capability to conduct R&D, to commercialize technologies, and to maintain and expand defense production base.
- **Section 2510:** Secretary of Defense to monitor and report annually on textile industrial base
- **Section 2511-2518:** Secretary of Defense to plan and implement Manufacturing Technology program; specifically, must promote computer-integrated manufacturing, concurrent engineering, subtier defense industries, and manufacturing extension programs.

### **3.6.0.2 National Defense Authorization Act for Fiscal Year 1993: New Industrial Base Legislation**

- **Section 4101:** Sets forth congressional findings with respect to defense conversion, reinvestment and transition assistance. It specifically states that the defense builddown must be structured in a manner that enhances the long-term ability of the U.S. to maintain a strong and vibrant national technology and industrial base.

- Section 4201: States that legislative purpose is to enact policies and requirements relating, inter alia, to the national technology and industrial base that further national security objectives.
- Section 4202: Repeals Chapter 148 of Title 10 (other than 2504 through 2507) and Chapter 149 (other than 2517 and 2518).<sup>3</sup> Enacts new Chapter 148, consisting of 5 subchapters. Renumbers former §§ 2504, 2505, 2506 and 2507 as §§ 2531, 2532, 2533, 2534, respectively.
- Section 4203: Sets forth definition section as first subchapter of new chapter 148. Includes definitions of "dual-use" and "critical technology."
- Section 4211: Sets forth new statement of industrial base policy as 10 U.S.C. § 2501, viz., that the national technology and industrial base must be capable of:

--supplying the force structure as necessary to meet the objectives in the President's national security report, the Secretary of Defense's policy report, and the future years defense program;

--sustaining production, maintenance and repair, and logistics, for various types of military operations;

--maintaining advanced R&D sufficient to ensure technological superiority;

--reconstituting the ability to supply and equip for a full-scale war or national emergency.

The Act also sets forth policy relating to defense reinvestment and conversion and commercial/military integration.

- Section 4212: Establishes, within a new 10 U.S.C. § 2502, a National Defense Technology and Industrial Base Council, consisting of the Secretaries of DOD, Commerce and Energy, to oversee industrial base planning and implementation within the federal sector. The Council is also charged with chairing, initially, the Economic Adjustment Committee.<sup>4</sup>
- Section 4213: Provides, in a new 10 U.S.C. § 2503, for the Secretary of Defense, in consultation with the Council, to establish a program for analysis of the technology

<sup>3</sup>This section also repeals most of Chapter 150 of Title 10. However, those statutes were not included within the scope of the Panel's review.

<sup>4</sup>This Committee was established by the National Defense Authorization Act for FY 1991, Pub. L. No. 101-510, § 4004, 104 Stat. 1849 (1990). The Conference Report for the FY 1993 National Defense Authorization Act states that § 4212 is not intended to create a new bureaucracy, but to promote better coordination among the relevant federal agencies. To that end, the Council is not to establish a new staff but to rely on its own agency resources. H.R. CONF. REP No. 966, 102d Cong., 2d Sess. 878 (1992).

and industrial base. That program must be administered by a federally funded research and development center or private entity, or by the National Defense University. The program must be coordinated with the Critical Technologies Institute. That program must assemble and analyze information, and provide support to the Council.

- **Section 4214:** Provides, in a new 10 U.S.C. § 2504, that the Secretary of Defense shall establish within the National Defense University a Defense Economic Adjustment Center to study conversion and reutilization issues.
- **Section 4215:** Requires the Council, in a new 10 U.S.C. § 2505, to prepare, annually through 1997 and biennially thereafter, a comprehensive assessment of the capability of the national technology and industrial base to attain each of the stated national security objectives. The assessment must include a critical sector economic viability analysis, with reference to the impact of program terminations and reductions on such viability, and a separate critical technology analysis. The assessment shall include considerations of foreign dependency.
- **Section 4216:** Requires,

(a) in a new 10 U.S.C. § 2506, the Council to prepare, annually through 1997 and biennially thereafter, a multiyear defense capability base plan coordinated within the Federal sector. The plan must provide specific guidance for DOD policies to ensure continued viability of each technology and industrial base sector, to reduce foreign source dependency and provide for alternative sources, manage the Defense Industrial Reserve and the DOD Manufacturing Technology program, to develop each critical technology, coordinate DOD financial policies, to encourage the use of commercial products and processes by DOD and DOE, and set forth DOD and DOE programs on conversion, and

(b) in a new 10 U.S.C. § 2440 (the major systems chapter), that major defense acquisition programs include consideration of industrial base issues.

- **Section 4217:** Authorizes the President, in a new 10 U.S.C. § 2507, to collect that data necessary for defense technology, industrial base or conversion analysis.
- **Section 4218:** Requires the Secretary of Defense to issue regulations for collection of industrial base data and for development of plans required under new law. Also sets forth specific requirements for textile and apparel industrial base issues.
- **Section 4219:** Requires that regulations issued by Secretary of Defense must include specified sector role financial capability, impact of DOD reductions, critical technologies analyses, economic viability and foreign dependency. The analytic requirements are set forth in detail in the statute.
- **Section 4220:** Requires that regulations issued by Secretary of Defense as to development of industrial base periodic plan must address specified issues, including

guidance as to manufacturing technology, critical technologies, financial policy, commercial-military integration, and major programs.

- **Section 4221:** Enacts new 10 U.S.C. § 2511 mandating the use of defense dual-use critical technologies partnerships between DOD and private sector entities. Sets forth significant detail as to selection criteria and management techniques.
- **Section 4222:** Enacts new 10 U.S.C. § 2512 mandating the use of commercial-military integration partnerships. Authorizes the Secretary of Defense to enter into contracts or cooperative agreements with eligible firms and nonprofits to establish such partnerships. Sets forth selection criteria and management techniques.
- **Section 4223:** Redesignates former 10 U.S.C. § 2524, relating to critical technologies application centers, as 10 U.S.C. § 2513, and renames such centers as the regional technology alliances assistance program.
- **Section 4224:** Enacts new 10 U.S.C. § 2514, requiring the Secretary of Defense to encourage technology transfer between DOD laboratories and research centers and other entities, consistent with national security objectives, to examine and implement methods to encourage transfer and to establish a program to diversify defense laboratories.
- **Section 4225:** Enacts new 10 U.S.C. § 2515, requiring the Secretary of Defense to establish within the OSD an Office of Technology Transition for the purpose of ensuring that the technology developed for national security purposes is integrated into the private sector.
- **Section 4226:** Enacts new 10 U.S.C. § 2516, establishing a Military-Civilian Integration and Technology Transfer Advisory Board, to ensure effective integration of commercial technologies into defense industries, to ensure transfer of defense technologies to civilian industry, to integrate civilian markets into dual-use technology development strategies, and to ensure that dual use critical technologies are used in carrying out defense reinvestment, diversification and conversion activities. Such Board shall advise the Council.
- **Section 4227:** Redesignates prior 10 U.S.C. § 2525, relating to Office for Foreign Defense Technology Monitoring and Assessment, as new 10 U.S.C. § 2517.
- **Section 4228:** Redesignates prior 10 U.S.C. § 2525, relating to Overseas Foreign Defense Technology Monitoring and Assessment Financial Assistance Program, as new 10 U.S.C. § 2518.
- **Section 4231:** Enacts new 10 U.S.C. § 2521, requiring the Secretary of Defense to establish a National Defense Manufacturing Technology Program to, among other

things, provide centralized guidance and direction on all manufacturing technology matters.

- Section 4232: Transfers prior 10 U.S.C. § 2518, relating to Defense Advanced Manufacturing Technology Partnerships, and redesignates as 10 U.S.C. § 2522.
- Section 4233: Transfers prior 10 U.S.C. § 2517, relating to Manufacturing Extension Programs, and redesignates as 10 U.S.C. § 2523.
- Section 4234: Enacts new 10 U.S.C. § 2524, requiring the Secretary of Defense to establish defense dual-use assistance extension programs to assist DOD-dependent industries in converting to commercial practices.
- Section 4235: Enacts new 10 U.S.C. § 2535, setting forth text of section 2 of the Defense Industrial Reserve Act.

The above legislative sections constitute the disposition, under the National Defense Authorization Act for Fiscal Year 1993, of those prior, industrial base-related statutes initially included in the Panel's review.

### **3.6.0.3. Comment On New Legislation**

#### **Rationale of New Legislation**

The new industrial base legislation originated in the Senate version of National Defense Authorization Act for Fiscal Year 1993. The Senate Report to that bill set forth in detail the underlying rationale for the proposed legislation.<sup>5</sup> That rationale drew heavily on prior testimony and analysis on the defense technology and industrial base by the Office of Technology Assessment (OTA).<sup>6</sup> It also relied on analysis and conclusions in the April, 1992 Report of the House Armed Services Committee Panel on the Structure of the U.S. Defense Industrial Base.<sup>7</sup>

As summarized in the Senate Report,<sup>8</sup> the proposed legislation was intended to address the effect of the defense drawdown on the industrial base. Specifically, the Report noted that, without high volume procurement contracts, defense-dependent companies will no longer be able to recoup R&D investment and would significantly lessen such expenditures. Thus, the nation

would lose a significant amount of industry funded R&D, upon which not just defense, but the economy as a whole, relies heavily.<sup>9</sup>

The Senate Report expressly rejected the notion that market forces would be adequate to ensure that the post-Cold War industrial and technology base would meet national security and economic competitiveness needs.<sup>10</sup> In this respect, the proposed legislation adopts the view stated by the OTA that the defense drawdown must be strategically managed.

The Senate Report criticized the DOD for failing adequately to undertake serious technology and industrial base planning, noting that that failure has left the United States ill-equipped to manage the defense drawdown. For example, the Report noted that many commenters had raised the problem of an inadequate, centralized database upon which the Department could effectively conduct sector analyses.<sup>11</sup>

The Report relied upon the OTA concept of "proportional downsizing," i.e., restructuring the base with a new allocation of resources and closer integration among R&D, production and maintenance. In this manner, a high technology edge could be maintained by the U.S. through such strategies as competitive prototyping, rather than fully fielded systems. The Report summarized this distinction as maintenance of warm capacity, rather than a warm production base. This goal would be achieved by greater integration of the civil and military sectors of the economy, and specifically through greatly intensified encouragement and use of dual-use technologies and manufacturing techniques by those private entities previously defense-dependent.<sup>12</sup>

To this end, the Senate bill proposed repeal of the broadly worded statutory guidance on industrial base then contained in Title 10, and enactment of a highly detailed statutory scheme that would establish a Tri-Agency Council (DOD, DOE and Commerce), supported by a federally funded research and development center, to engage in extensive prescribed industrial base assessments with equally extensive annual plans. The legislation also required extensive use of dual use critical and manufacturing technology partnerships between the Department and private entities, and mandated regional programs and field activities to build such partnerships.

In conference, the Senate version was modified and streamlined.<sup>13</sup> The Secretary of Defense's role in providing centralized guidance within the Department on industrial base programming was strengthened and clarified (the new 10 U.S.C. § 2503). The role of the Tri-Agency Council was clarified as being a consulting role; the conference agreement expressly stated that the bill was not intended to create a new bureaucracy. Finally, the detailed description and number of the assessments and plans to be provided was somewhat modified.

<sup>12</sup>*Id.* at 216-218.

<sup>13</sup>H.R. CONF. REP. NO. 966, 102d Cong., 2d Sess. 874-81 (1992).

## Panel Position on New Legislation

### Endorsement of Goal of New Legislation

Overall, the Panel endorses the direction of the industrial base legislation in the National Defense Authorization Act for Fiscal Year 1993. The Panel bases this endorsement on the consistency between the overall goal of this legislation -- greater integration of the civil and military sectors of the economy through the development of dual use technologies with commercial application -- and the goals and objectives adopted by the Panel.<sup>14</sup>

The Panel recognizes that, in broader terms, the overall competitiveness of our national economy is greatly dependent upon the increased development of commercial technologies, and that the R&D edge to sustain and build such technologies will suffer in the defense drawdown absent a concerted effort by the department to consciously foster their growth.

### Comment On New Legislation

Despite endorsement of the goal of this new legislation, the Panel believes that the new legislation could be improved in the following areas:

#### Excessive Legislative Detail

First, the Panel believes that the detailed nature of this legislation is excessive. In this respect, it differs from the Panel Objective that acquisition laws should identify the broad policy objectives and the fundamental requirements to be achieved. Detailed implementing methodology should be reserved to the acquisition regulations.

The Panel recognizes the purpose behind such detail. The prior laws in this area within Title 10 had merely set forth broad policy objectives. Yet the Congress viewed the department's industrial base management as deficient.<sup>15</sup> The Panel notes as well that in conference there was a reduction in the amount of detail initially contained in the Senate version. Most importantly, the conference agreement retained the Secretary of Defense's broad authority to implement industrial base planning centrally within the Department.

---

<sup>14</sup>Specifically, the Panel notes that Objectives 4, 5, 6 and 7, in the introduction to this Report, are furthered, directly or indirectly, by this legislation.

<sup>15</sup>Report to the Congress on the Defense Industrial Base, Department of Defense, Under Secretary of Defense (Acquisition)(Production and Logistics), November, 1991 at p. ES-2 ("Although changes in the industrial base will inevitably occur, this report highlights the fact that -- in all cases examined -- the resultant industrial base will be fully adequate...."). One industry commenter as well noted that "the problem...is the seeming inability or reluctance of the DOD to prioritize the issues addressed by [current] legislation.... Defense industrial base policy appears unfocused.... DOD needs to define realistic industrial base goals." Letter from Mr. Kenneth G. Haug, Manager, Contracts, Martin Marietta Corporation,, to Section 800 Panel, dated 8 July 1992.

## Coordinate with Defense Trade and Cooperation

Second, the Panel recommends that these laws should expressly require the Secretary of Defense, and the supporting Tri-Agency Council, to consider issues of international procurement and arms trade by the DOD in the industrial base assessment and planning. To that end, the Panel suggests an additional policy statement as follows:

(x) **POLICY OBJECTIVES RELATING TO DEFENSE INTERNATIONAL TRADE**--It is the policy of Congress that the United States attain the national defense technology and industrial base objectives set forth above by fully coordinating domestic defense acquisition practices with defense trade and cooperation, under Chapter XX of this title, and foreign military sales and assistance under Title 22 of the U.S. Code.

The Panel would also amend the assessment and planning statutes to expressly require that the same consideration be made by the Council in those areas.<sup>16</sup>

This proposal is based on the increased globalization of the defense industry, both within the Department and within the private sector. In this era of downsizing, many U.S. defense companies hope to use international collaboration to enter foreign markets with higher demand and less regulation. Thus, there is both a flow of defense-related technologies out of the U.S. and an increased reliance on foreign sources by the Department.<sup>17</sup> As one Air Force commenter noted,

The current world political situation and the global economy suggest increased emphasis on internationalization of commerce. Competition will occur on a global basis even among our allies . . . It is confusing to impose restraints on the industrial base while [at] the same time urging co-production, advanced manufacturing technologies and foreign military sale to remain competitive in a world market. When and if a development or technology is transitioned to an ally/customer we should be assured that we are working a next generation development/technology which maintains a leadership position in the international marketplace.<sup>18</sup>

---

<sup>16</sup>This recommendation parallels the Panel's recommendation in Chapter 7 of this Report, "Defense Trade and Cooperation," that those statutes pertaining to defense MOUs and cooperative agreements, and domestic preference statutes, be consolidated within a single chapter in Title 10. Several of the industrial base statutes left intact by the National Defense Authorization Act for FY93 (the prior 10 U.S.C. § 2505, 2506 and 2507) have been proposed to be relocated to this Chapter.

<sup>17</sup>See Arming Our Allies: Cooperation and Competition in Defense Technology, Office of Technology Assessment (1990).

<sup>18</sup>Memorandum from Col. K. H. Keiber, Jr., Director of Manufacturing and Quality, HQ Air Force Materiel Command, DCS/Engineering and Technical Management, to DOD Advisory Panel, dated 28 July 1992.

The Panel believes that effective domestic, industrial base analysis must also explicitly address these international trade issues. They are, in effect, "two sides of the same coin."

### **Industrial Base and Antitrust Implications**

Finally, the Panel notes that there is a matter within the area of defense industrial base issues that is beyond the scope of its charter: the interplay of defense industrial base policies and practices and the anti-trust laws. As a result of declining budgets, a number of defense contractors have considered merger, joint venture, teaming arrangements and other means to adjust to decreased business volume.

For example, in recent months, arrangements have been proposed by Alliant Techsystems and Olin Corporation, by General Electric Aerospace Division and Martin Marietta and by General Dynamics and Hughes Missile Division. These types of transactions require analysis by the contracting agencies and, in most instances, the formulation of agency positions in support or opposition to the proposed arrangement. Antitrust laws play a major role in the success or failure of the proposed arrangements. Arrangements which are favorable from a defense industrial base perspective may be objectionable under an antitrust analysis.

Both Congress and DOD are studying defense industrial base issues in order to determine the most orderly and useful way to downsize but preserve critical industrial capabilities. Such studies should address industrial base policies in light of antitrust laws. Congress and DOD should consider legislative relief to permit appropriate downsizing without adverse antitrust implications.

## **3.7. Fuel AND Energy-Related Laws**

### **3.7.0 Introduction**

The laws considered within this subchapter are all statutory provisions that relate to fuel or energy system procurement by the DOD. They are not now currently organized or grouped within Title 10 on that basis.

The Panel's treatment of these sections is straightforward: the implementing DOD offices were contacted to gain information concerning the continued utility of each section and whether any need for amendment existed. Defense Fuel Supply Center (DFSC) and the Office of the Assistant Secretary of Defense (Production & Logistics), Energy Policy Directorate, were the primary relevant DOD offices. With one exception, discussed below, those offices fully concur with the recommendations and supporting rationale set forth in this subchapter.<sup>1</sup> A comment received from a private petroleum industry association also concurred with these recommendations.<sup>2</sup> Finally, the Department of the Air Force, Office of the General Counsel, also supported the Panel's proposed disposition of these statutes.<sup>3</sup>

Some of the sections dealt directly with fuel and petroleum acquisition by DFSC. For example, DFSC sought, and the Panel recommended, amendment of DFSC's authority to waive contract procedures at 10 U.S.C. § 2404 to obtain authority to sell excess petroleum stores and credit those proceeds to applicable appropriations. The Panel also recommended a modification in DFSC's authority to contract for storage and management of fuels to accommodate management-only contracts.

Similarly, DFSC sought repeal of a prohibition on the purchase of Angolan petroleum products. However, this provision was recently modified in the National Defense Authorization Act for FY 1993.<sup>4</sup> Under this modification, the prohibition ceases to become effective upon certification by the President that free and fair elections have been conducted in Angola. As set forth in the individual analysis for this provision, the Panel recognizes that, from an acquisition policy point of view, the prohibition significantly impedes economy and efficiency in petroleum acquisition. However, because of recent congressional action on this issue, the Panel makes no formal recommendation in this area.

---

<sup>1</sup>Comments had initially been received from these offices telephonically. However, they subsequently indicated their endorsement of these recommendations by written memoranda. Letter from Ms. Kay Bushman, Associate Counsel, DFSC Office of Counsel, to Ms. Theresa Squillacote, dated 11 December 1992. Letter from Mr. Millard E. Carr, Assistant Director for Energy Policy, Energy Policy Directorate, Office of the Assistant Secretary of Defense (Production & Logistics), to Ms. Theresa Squillacote, dated 15 December 1992. For ease of reference, these supporting memoranda are not cited in each, individual analysis.

<sup>2</sup>Letter from Mr. Urvan R. Sternfels, President, National Petroleum Refiners Association, to Ms. Theresa Squillacote, Acquisition Law Task Force, dated 7 May 1992.

<sup>3</sup>Letter from Mr. John P. Janeczek, Assistant General Counsel (Procurement), Department of the Air Force, to Ms. Theresa Squillacote, Acquisition Law Task Force, dated 4 August 1992.

<sup>4</sup>Pub. L. No. 102-484, § 842, 106 Stat. 2468 (1992).

Other sections were essentially policy-related enactments, mandating environmentally sound acquisition practices by the DOD. In the absence of any significant burden on acquisition practices, these sections were recommended for retention.

Sections 2481, 2483, and 2490 granted authority to sell excess utility services. These sections were not recommended for consolidation into a single section because they were uniquely designed to parallel other, specific legislation.

Finally, the Panel recommends that this body of law be collected within Title 10 into a single chapter dealing exclusively with fuel and energy-related acquisition.

### 3.7.1. 10 U.S.C. § 2388

#### Liquid Fuels, Contracts for Storage

##### 3.7.1.1. Summary of Law

This section provides that the Secretary of a military department may contract for the storage, handling, and distribution of liquid fuels for up to five-year periods, with options to renew for additional five-year periods up to 20 years. It further provides that such contracts must cover facilities approved by the Secretary of Defense for petroleum facilities. Finally, the section provides that such contracts may include an option for purchase of the facility by the United States without regard to limitations in 31 U.S.C. § 3324 (stating that a contract payment may not be more than the value of the article or service, and restricting advances of public money).

##### 3.7.1.2. Background of Law

This law was enacted in 1956 by the Act Authorizing Construction for the Military Departments.<sup>1</sup> The Senate Report indicated that the legislation represented an attempt to provide for the dispersal of emergency fuel stocks outside of areas that would be vulnerable to attack in the event of hostilities.<sup>2</sup> The Report stated that the department had been attempting to develop such a program, but had found that the commercial petroleum storage industry was unwilling to enter into such contracts outside normal commercial areas. This reluctance stemmed from the fact that, under existing laws, leases for such facilities were limited to one-year terms, making their cost, particularly outside commercial areas, unattractive to industry. This law was proposed by DOD, therefore, in order to induce industries to engage in the storage of petroleum outside of their normal storage areas.<sup>3</sup>

##### 3.7.1.3. Law in Practice

The Defense Fuel Supply Center, Office of Counsel (DFSC-G) reports that it continues to utilize the authority at subsection (a) to enter into long-term leasing arrangements for storage of fuels and management of tank farm facilities and that DFSC wishes to retain this authority. The sole issue DFSC-G raises is that it is unable, under this subsection, to enter into contracts solely for contractor management of such facilities on government-owned property. This issue arises because the language of the subsection authorizes contracts for "storage, handling, *and* distribution . . . (emphasis added)." DFSC-G recommends that this language be amended as set forth below to authorize "build-to-lease" contracts. This authority would be useful to the DFSC because of its frequent need to provide for management of individual storage facilities on government property that are not aggregated at tank farms. DFSC-G also notes that, with the present drawdown, it will have too much storage in one place and not enough in another place. If

---

<sup>1</sup>Act of Aug. 3, 1956, § 416, 70 Stat. 1018 (1956).

<sup>2</sup>S. REP. NO. 2364, 83th Cong., 1st Sess. 434 (1958).

<sup>3</sup>*Id.*

it can quickly contract for smaller amounts of additional storage, especially at existing government locations, and eliminate other, larger storage facilities, it can realize significant savings.

Also, because DFSC has recently begun purchasing natural gas for DOD, its Office of Counsel suggests the addition of the phrase "natural gas" after the words "liquid fuels" to align the section with its new mission.

DFSC-G recommends that the language of subsection (b) be repealed as obsolete. This subsection essentially requires that storage facilities covered by contracts entered into under this section conform to technical standards prevalent in the early 1950s for hardened underground storage facilities. Such standards are now technically out-of-date and strategically obsolete as well.

With respect to subsection (c), DFSC-G continues to use this authority to exempt these long-term contracts from otherwise applicable fiscal requirements in Title 31. DFSC-G recommends its retention in full.

#### **3.7.1.4. Recommendations and Justification**

##### **I**

**Amend subsection (a) to provide separate authority to contract for storage or handling; add natural gas; vest authority in Secretary of Defense and secretaries of the military departments.**

(a) The Secretary of Defense or secretary of a military department may contract for storage facilities for, or the storage, handling and/or distribution of, liquid fuels or natural gas. Such contracts may be entered into for periods of not more than five years, with option to renew for additional periods of not more than five years each, but not for more than a total of 20 years.

This amendment would facilitate more efficient management of DFSC's role in acquiring fuel and natural gas for DOD by permitting it to contract solely for operation of storage tank facilities, even when not aggregated at a privately-owned tank farm. Such authority is particularly useful in this era of budgetary restrictions.

The Panel would add the term "natural gas" to conform the section to the newly-acquired natural gas mission of DFSC. The Panel would also amend the section to vest the authorities in both the Secretary of Defense and the secretaries of the military departments.

##### **II**

**Repeal subsection (b).**

This subsection should be deleted as authority that no longer serves a valid purpose because it references technical requirements that have become obsolete.

### III

#### Retain subsection (c) in its entirety.

Subsection (c) should be retained in its entirety. It continues to facilitate long-term contracting under this section by exempting such contracts from certain fiscal requirements that would otherwise prohibit such contracting.

#### 3.7.1.5. Relationship to Objectives

Amendment of this statute will promote the best interests of DOD by providing needed flexibility and greater economy and efficiency in contracting for petroleum and natural gas storage and management.

#### 3.7.1.6. Proposed Statute

##### **Liquid fuels and natural gas: contracts for storage, handling, ~~and~~ or distribution**

(a) ~~The Secretary of Defense or secretary of a military department may contract for the storage facilities for, or the storage, handling and/or distribution of, liquid fuels or natural gas. Such contracts may be entered into storage, handling, and distribution of liquid fuels~~ for periods of not more than five years, with options to renew for additional periods of not more than five years each, but not for more than a total of 20 years.

~~(b) This section applies only to facilities that conform to standards prescribed by the Secretary of Defense for protection, including dispersal, and that are in a program approved by the Secretary of Defense for the protection of petroleum facilities.~~

~~(e)~~ (b) A contract under this section may contain an option for the purchase by the United States of the facility covered by the contract at the expiration or termination of the contract, without regard to subsections (a) and (b) of section 3324 of title 31, and before approval of title to the underlying land by the Attorney General.

## **3.7.2. 10 U.S.C. § 2394**

### **Contracts for Energy or Fuel for Military Installations**

#### **3.7.2.1. Summary of Law**

This section authorizes the Secretary of a military department to enter into contracts for up to 30 years when contracting for the development of geothermal energy, or for the operation of energy production facilities on Department or private property. Such contracts may be entered into only after approval by the Secretary of Defense and notification to the congressional committees. The costs of such contracts may be paid from annual appropriations.

#### **3.7.2.2. Background of Law**

This section was first enacted by the Military Construction Authorization Act for FY 1979.<sup>1</sup> The Conference Report indicated that the primary purpose of this section was to permit the military departments to enter into arrangements with contractors, when in the interests of national defense to provide and operate energy production facilities on military property for periods not to exceed 30 years.<sup>2</sup> It was intended to encourage the development of geothermal energy resources where they may exist on military lands. The provision was not intended to apply to lands under the jurisdiction of the Secretary of the Interior or to the development of energy from nuclear or fossil fuel sources.<sup>3</sup>

When the source law was codified in 1982, the Senate Committee Report stated:

Should a public or quasi-public entity propose an energy or fuel production facility to serve a region, the payment of a proportionate share of the capital cost by a military department would be entirely appropriate, just as a military department may contribute to the capital cost of regional water or sewer systems. The use of the authority of this section is not intended to enable a military department to compete with a public or private utility. It is intended to permit the exploration of a wide range of co-generation possibilities so that the conservation of scarce resources may be maximized.<sup>4</sup>

---

<sup>1</sup>Pub. L. No. 95-356, § 803(a), 95 Stat. 585 (1978).

<sup>2</sup>S. Rep. No. 1448, 95th Cong., 2d Sess. 61 (1978).

<sup>3</sup>*Id.*

<sup>4</sup>H.R. REP. No. 612, 97th Cong., 2d Sess. 30 (1982).

### **3.7.2.3. Law in Practice**

The Office of the Assistant Secretary of Defense (Production & Logistics), Energy Policy Directorate, reports that this section is relied upon for co-generation third-party contracting within DOD. That Office further states that this program has been very successful. At least ten long-term contracts, avoiding large investment of capital by the Department, are in existence.

The Energy Policy Directorate recommends retention of this section in its entirety and states that no problems exist in the implementation of this statute that would warrant changes.

### **3.7.2.4. Recommendation and Justification**

#### **Retain**

This law should be retained. The goal sought by this statute, the involvement of DOD in the development of geothermal, co-generation facilities remains a valid one. The Department reports that the program generated by this statute has been highly successful.

### **3.7.2.5. Relationship to Objectives**

Retention of this statute will further the best interests of DOD by promoting environmentally and financially sound acquisition practices by the Department.

### **3.7.3. 10 U.S.C. § 2394a**

## **Procurement of Energy Systems Using Renewable Forms of Energy**

### **3.7.3.1. Summary of Law**

This section provides that, when procuring energy systems, the Secretary of a military department shall procure systems that use solar energy or other renewable forms of energy when they are cost effective and suitable to the energy need. The section requires the Secretary of Defense periodically to study the suitability of solar and other renewable energy sources and to develop appropriate guidelines. The section then defines the term "cost effective" for purposes of the statute.

### **3.7.3.2. Background of Law**

This section was originally enacted by a portion of the Military Construction Authorization Act known as the DOD Renewable Energy Utilization Act for FY 1983.<sup>1</sup> That bill was premised upon the belief that national dependence on foreign oil sources threatened the long-term economic and military security of the United States and was particularly harmful to DOD, given the critical importance of energy to virtually all DOD activities. The legislation was intended to provide a mechanism for DOD to participate in the commercialization of solar and other renewable energy technologies by mandating their use within the department when appropriate and cost effective.<sup>2</sup>

The National Defense Authorization Act for Fiscal Year 1991 repealed a congressional reporting requirement contained in the original legislation.<sup>3</sup> The 1992 life cycle costing factor was subsequently amended to conform to that factor used by other federal agencies pursuant to the National Energy Conservation Policy Act (42 U.S.C. § 8254(a)).<sup>4</sup>

### **3.7.3.3. Law in Practice**

This section is implemented in part by DOD Instruction 4170.10 (Energy Management Policy, August 8, 1991). At paragraph 4, that Instruction states that it is DOD policy to minimize energy use while meeting operational mission support requirements. That goal is to be met in part through the use of cost effective and reliable renewable energy sources pursuant to 10 U.S.C. § 2394a.

---

<sup>1</sup>Pub. L. No. 97-321, § 801(a)(1), 96 Stat. 1569 (1982). This legislation was originally introduced in 1981, but enacted in the subsequent year.

<sup>2</sup>127 Cong. Rec. 27778-779 (Nov. 17, 1981)(remarks of Rep. Mavroules).

<sup>3</sup>Pub. L. No. 101-510, § 1322(a)(7), 104 Stat. 1671 (1990).

<sup>4</sup>Pub. L. No. 102-25, § 701 (g)(2), 105 Stat. 115 (1991).

The Energy Policy Directorate, Office of the Assistant Secretary of Defense (Production & Logistics), reports that this legislation has resulted in increased use of renewable energy technologies within the department, and particularly of passive solar technology. That Office reports no ongoing problems with this program that might warrant statutory revision. A problem with life cycle costing was corrected in 1992.

#### **3.7.3.4. Recommendation and Justification**

##### **Retain**

This law should be retained. The law continues to serve the valid purpose of promoting the use of renewable energy sources within the department when appropriate and cost effective. DOD continues to consume a significant portion of federal fuel purchases. As one of the largest single consumers of fuel purchased by the Federal government, it is appropriate to maintain specific legislation aimed at DOD and designed to encourage its use of renewable energy sources.

#### **3.7.3.5. Relationship to Objectives**

Retention of this statute will serve the best interest of DOD by providing greater flexibility in the acquisition and use of energy sources.

### **3.7.4. 10 U.S.C. § 2398**

## **Procurement of Gasohol as Motor Vehicle Fuel**

### **3.7.4.1. Summary of Law**

This section provides that the Secretary of Defense shall contract to purchase domestically produced alcohol or alcohol-gasoline blends to operate DOD motor vehicles when feasible and consistent with overall defense needs. The section requires the Secretary of Defense to purchase an alcohol-gasoline blend whenever the Secretary contracts for unleaded gas for non-DOD vehicles. Bids for such contracts shall include a request for bids on domestic content alcohol-gasoline blends. Finally, the section requires the Secretary of Defense to review all exemptions to gasohol purchase requirements and to report the results to the congressional defense committees.

### **3.7.4.2. Background of Law**

This section was originally enacted by the DOD Authorization Act for FY 1980.<sup>1</sup> The Conference Report indicated that the provision was designed to encourage the use of alcohol and alcohol blends as a fuel in military motor vehicles.<sup>2</sup>

The National Defense Authorization Act for Fiscal Years 1992-93 amended this section to provide for the mandatory gasohol purchase whenever taxed unleaded gasoline is purchased. It also provided for the exemption review.<sup>3</sup>

A similar provision at 42 U.S.C. § 8871 provides that:

The President shall, by executive order, require that motor vehicles which are owned or leased by Federal agencies and are capable of operating on gasohol shall use gasohol where available and in reasonable quantities.

### **3.7.4.3. Law in Practice**

This section is implemented by Executive Order 12261, "Gasohol in Federal Motor Vehicles," January 5, 1981 and Defense Energy Policy Memorandum 88-5, "Gasohol Acquisition, Handling and Use," October 13, 1988. Under the latter memorandum, various exemptions from gasohol purchases are available to the military departments and defense agencies using gasoline.

This gasohol purchase requirement has recently been studied by the DOD. In a March 1992 report to the congressional defense committees on the use of gasohol, the Assistant

---

<sup>1</sup>Pub. L. No. 96-107, § 815, 93 Stat. 817 (1979).

<sup>2</sup>H.R. CONF. No. 546, 96th Cong., 2d Sess. 721 (1979).

<sup>3</sup>Pub. L. No. 102-190, § 841(a), 105 Stat. 1448 (1991).

Secretary of Defense (Production & Logistics) reported that, in 1990-91, 3.6% of Federal gasoline requirements were met by using gasohol. However, after reviewing the exemptions granted (some 2,200 in that year), the DOD concluded that all blanket exemptions would be terminated, and that future specific exemptions would be granted only after greater scrutiny by the reviewing authority.

DFSC Office of Counsel and the Energy Policy Directorate, Assistant Secretary of Defense (Production & Logistics) recommend retention of this statute.

#### **3.7.4.4. Recommendation and Justification**

##### **Retain**

This law should be retained. The statute continues to serve the valid purpose of promoting the use of gasohol as a substitute for the purchase of unleaded gasoline. Although arguable parallel legislation exists in Title 42, the provisions of this section are more narrowly tailored to meet the specific needs of the DOD. For example, this section provides the Secretary of Defense with greater discretion to determine the feasibility of gasohol use in light of overall defense needs than that which exists at 42 U.S.C. § 8871.

In addition, the recent legislative action in this area and the internal DOD review indicate that this program has not become sufficiently established within DOD practices as to warrant repeal or revision.

#### **3.7.4.5. Relationship to Objectives**

Retention of this statute will serve the best interest of DOD by providing greater flexibility in the acquisition and use of energy sources.

### **3.7.5. 10 U.S.C. § 2404**

## **Acquisition of Petroleum, Authority to Waive Procedures**

### **3.7.5.1 Summary of Law**

This section provides that the Secretary of Defense may waive the application of any contract formation law or procedure for the purchase of petroleum when market conditions have adversely affected or will soon adversely affect the purchase of petroleum and the waiver will facilitate the acquisition of petroleum. The waiver may be made for a single contract, a subcontract or for a class of contracts.

Under this section, the Secretary of Defense may also acquire petroleum by exchange of petroleum or its derivatives.

### **3.7.5.2. Background of Law**

This section was originally enacted by the DOD Authorization Act for FY 1985.<sup>1</sup> It was intended to facilitate the acquisition of petroleum in an emergency and to provide flexibility to enable the DOD to respond to changes in market conditions.<sup>2</sup>

### **3.7.5.3. Law in Practice**

As implemented by DOD Instruction 4220.8 (Dec. 20, 1985), and DOD Instruction 4170.10 (August 8, 1991), the authority conferred by this provision is treated as exceptional authority to be exercised only when market conditions have or are expected to have an adverse effect on DOD's ability to acquire petroleum.

The Secretary of Defense's waiver authority under this statute has been delegated to the Assistant Secretary of Defense (Production and Logistics). The Director of the Defense Logistics Agency (DLA) may exercise this authority for single contracts in limited circumstances.

Defense Fuel Supply Center, Office of Counsel (DFSC-G) reports that the waiver authority in this statute was exercised by the Assistant Secretary during Operation Desert Shield to exempt certain petroleum purchases from Trade Agreements Act requirements that prohibit purchases from GATT non-signatories, and from CAS requirements. The Director, DLA, also utilized this authority during Operation Desert Shield to exempt a specific, Shell Oil contract from the prohibition on purchase of petroleum processed from Angolan crude oil.

DFSC-G also reports that their agency makes extensive use of the exchange authority provided at subsection (c). DFSC-G notes, however, that numerous situations have arisen in

---

<sup>1</sup>Pub. L. No. 98-525, § 1234(a), 98 Stat. 2604 (1984).

<sup>2</sup>H.R. CONF. REP No. 1080, 98th Cong., 2d Sess § 1231 (1984).

which broader exchange authority would have contributed to greater economy and efficiency in the management and acquisition of fuel and other energy sources. Specifically, DFSC-G would like this exchange authority to be broadened to encompass petroleum-related services (such as storage) and natural gas products. DFSC acquired its current, natural gas mission after this section was originally enacted.

DFSC would also like direct authority to sell excess petroleum products in its inventory. DFSC cites instances in which the administrative burden and cost inefficiencies associated with an exchange would be greater than the resultant savings and less cost-efficient than a sale.

For example, DFSC has had quantities of leaded motor gasoline in Europe that it was unable to use or advantageously exchange in Europe because of restrictions on the use of leaded fuel currently being enacted throughout Europe.

Further, in some areas DFSC maintains oversupplies of fuel that, while still usable, is inefficient because the cost of long-term storage is high and no exchange is possible with a local entity. Specifically, in Florida, DFSC is holding approximately 22,000 barrels of aviation fuel which it could advantageously sell, but not exchange, to a local entity. DFSC has contracted to exchange this fuel, but at less advantageous terms than its sale would have provided.

DFSC estimates that it would utilize authority to sell approximately twice annually, but also expects that its use of such authority would increase greatly during the impending military build down.

The Assistant Secretary of Defense (Production & Logistics), Energy Policy Directorate, concurs in this recommended amendment.

#### **3.7.5.4. Recommendation and Justification**

##### **Amend to provide authority to sell**

The waiver authority set forth in this section should be retained. It continues to serve a valid purpose by providing DOD with the flexibility necessary to adapt its petroleum purchases to market conditions. This authority is particularly important for fuel purchases because of the critical role of that product in military readiness. The use of this authority during Operation Desert Shield clearly demonstrates that fact.

Further, the section should be amended as proposed by the DFSC. The amendment would bring the authority up to date by encompassing the DFSC's natural gas mission within the statute's exchange authority. Also, the additional language at the new, proposed subsection (e) authorizing the Secretary of Defense to sell petroleum when in the public interest would encourage economy and efficiency within fuel management and acquisition by permitting DOD to sell excess or outdated inventory when it is more economical and efficient than exchanging such products.

### **3.7.5.5. Relationship to Objectives**

Amendment of this statute will serve the best interests of DOD by providing greater flexibility in petroleum purchasing by the DOD.

### **3.7.5.6. Proposed Statute**

#### **§ 2404 Acquisition of petroleum: authority to waive contract procedures**

(a) The Secretary of Defense may, for any purchase of petroleum, waive the application of any provision of law prescribing procedures to be followed in the formation of contracts, prescribing terms and conditions to be included in contracts, or regulating the performance of contracts if the Secretary determines-

(1) that petroleum market conditions have adversely affected (or will in the near future adversely affect) the acquisition of petroleum by the Department of Defense; and

(2) the waiver will expedite or facilitate the acquisition of petroleum for Government needs.

(b) A waiver under subsection (a) may be made with respect to a particular contract or with respect to classes of contracts. Such a waiver that is applicable to a contract for the purchase of petroleum may also be made applicable to a subcontract under that contract.

(c) The Secretary of Defense may acquire petroleum or petroleum-related services by exchange of petroleum or petroleum derivatives related sources.

(d) In this section, the term "petroleum" means natural or synthetic crude, blends of natural or synthetic crude, blends of natural or synthetic crude, and products refined or derived from natural or synthetic crude or from such blends, and natural gas.

(e) The Secretary of Defense may sell petroleum that is in inventory if the Secretary determines that the sale would be in the public interest. Proceeds from such a sale shall be credited to authorized accounts. Funds so credited are available for obligation for the same period as the funds in the account so credited.

### **3.7.6. 10 U.S.C. § 2481**

#### **Utilities and services; sale, expansion**

##### **3.7.6.1. Summary of Law**

This law provides that the Secretary of a military department or designee may sell to purchasers, within or in the immediate vicinity of a military department activity, various public utilities and related services when no local source is available and when the sale is in the national or public interest. The section further provides that receipts from such sales shall be credited to the applicable appropriation and that minor expansions of existing systems may be made to accommodate such sales.

##### **3.7.6.2. Background of Law**

This law was originally enacted by the 1947 Act Permitting the Secretaries of the Navy and War to Supply Utilities to Persons in Vicinity of Naval or Military Activities.<sup>1</sup> The legislative provision had been initially proposed by the Secretary of the Navy because previously existing authority for such sales was both temporary and too restrictive. The desire for such permanent authority was motivated by the restrictive housing conditions existing after World War II when greater housing opportunities in remote areas were being sought.<sup>2</sup>

##### **3.7.6.3. Law in Practice**

The Assistant Secretary of Defense (Production & Logistics) and various military department offices such as the Army Housing and Engineering Office, the Army Litigation Center, and the Army Energy Policy Directorate report that this statute is currently relied upon by DOD to provide exactly the type of service originally envisioned -- the provision of utility and related services to private residents in remote areas where such services are otherwise unavailable. These Offices further report that the statute operates adequately to meet its intended purpose and that no statutory revisions are needed.

##### **3.7.6.4. Recommendation and Justification**

#### **Retain**

This law should be retained in its entirety. It continues adequately to serve a valid purpose and the authority to sell such services is not expressly available under any other statute.

<sup>1</sup>Pub. L. No. 80-211, ch. 394, 61 Stat. 675 (1947).

<sup>2</sup>S. REP. NO. 463, 80th Cong., 1st Sess. 1-3 (1947).

### **3.7.6.5. Relationship to Objectives**

Retention of this statute promotes the objective of economy and efficiency within the acquisition process by permitting the sale to the public of excess utility and related services as needed.

### **3.7.7. 10 U.S.C. § 2483**

#### **Sale of electricity from alternate energy and cogeneration production facilities**

##### **3.7.7.1. Summary of Law**

This section provides that the Secretary of a military department may sell to public or private utility companies electrical energy generated from alternate or cogeneration type production facilities under the jurisdiction of that department. Such sales shall be made under regulations consistent with the Public Utility Regulatory Policies Act of 1978 (PURPA).<sup>1</sup> The section provides that proceeds from such sales shall be credited to the applicable appropriation.

##### **3.7.7.2. Background of Law**

This law was enacted by the Military Construction Authorization Act of 1985.<sup>2</sup> The relevant conference and committee reports for that Act do not directly discuss this provision.

##### **3.7.7.3. Law in Practice**

The Office of Counsel, Army Engineering and Housing Support Center, and Army Litigation Center/Regulatory Law Office report that this law functions as a companion statute to the PURPA. The PURPA was designed to require public and private utility companies to purchase excess energy from cogeneration facilities operated by independent power producers. This statute complements that Act by authorizing DOD components to sell to these same entities excess energy from similar facilities under military jurisdiction. These offices also report that this statute is extensively relied upon by the military departments to support the sale of excess energy produced by alternative energy and cogeneration facilities under their jurisdiction. Without this authority, these offices maintain that they would be unable to enter into such contracts.

##### **3.7.7.4 Recommendation and Justification**

###### **Retain**

This law should be retained in its entirety. It continues to serve a valid purpose by encouraging environmentally sound acquisition practices within the utility industry and by affording the Department the opportunity to achieve cost savings through the proceeds of excess energy sales. In addition, this same authority is not provided by any other law. Although 10 U.S.C. § 2481 does authorize the sale of "electric power" to purchasers, that statute was not intended to authorize the sale of excess energy from cogeneration facilities. For example, 10 U.S.C. § 2481 does not reference energy produced by alternate energy or cogeneration

<sup>2</sup>Pub. L. No. 98-407, § 810(a), 98 Stat. 1523 (1984).

production facilities, as referred to in this section. The term "purchasers" in 10 U.S.C § 2481 was intended to mean private residents, not public or private utility companies. Moreover, this section, unlike 10 U.S.C § 2481, states that a military department Secretary may authorize a contractor to sell, thus accommodating Government-owned, contractor-operated facilities. Finally, this section expressly directs that implementing regulations be consistent with the PURPA. Based on these distinctions, it is clear that this law was intended to accomplish a specific policy objective in accord with the PURPA by authorizing the sale of excess energy from cogeneration facilities. Therefore, this statute is not subsumed by the provisions of 10 U.S.C. § 2481.

#### **3.7.7.5. Relationship to Objectives**

Retention of this statute promotes the objective of economy and efficiency within the acquisition process by providing authority for the sale of excess energy from cogeneration facilities.

### **3.7.8. 10 U.S.C. § 2490**

#### **Utility services: furnishing for certain buildings**

##### **3.7.8.1. Summary of Law**

This section provides that DOD appropriations may be used to provide utility services for private buildings and recreational buildings on military reservations.

##### **3.7.8.2. Background of Law**

This law was originally enacted by the DOD Authorization Act for Fiscal Year 1986.<sup>1</sup> The conference and committee reports for that legislation do not contain any reference to this particular provision.

##### **3.7.8.3. Law in Practice**

The Army Housing and Engineering Office, Office of Counsel, and the Army Litigation Center, Regulatory Law Office, report that this statute is currently relied upon by DOD components to provide utility services on a nonreimbursable basis to private entities, such as fast-food restaurants, that lease space on a military reservation and that are otherwise without direct access to such utility services. This law is also used to provide nonreimbursable utility services to nonappropriated fund activities located on military reservations. The ability to provide nonreimbursable utilities to these types of entities is needed in order to facilitate their business operations on military reservations. Without this law, DOD components would be unable to provide utility services on a nonreimbursable basis.

##### **3.7.8.4. Recommendation and Justification**

###### **Retain**

This law should be retained in its entirety as it continues to serve a valid purpose within the Department. Additionally, this authority is not provided by any other statutory provision.

##### **3.7.8.5. Relationship to Objectives**

Retention of this section promotes the best interests of DOD by providing a means of assisting commercial facilities and services and nonappropriated fund activities on military reservations.

### **3.7.9. 10 U.S.C. § 2690**

#### **Fuel sources for heating systems**

##### **3.7.9.1. Summary of Law**

This statute provides, at subsection (a), that the primary fuel source to be used in any new heating system constructed on military department lands must be the source that is most cost effective over its life cycle.

The statute also provides, at subsection (b), that heating systems at military installations in Europe may not be converted from coal to oil or any other energy source unless the conversion is required by the host government or is cost effective. Notice of the conversion must first be submitted to Congress.

##### **3.7.9.2. Background of Law**

As originally enacted in 1980, this section provided that new gas or oil heating systems could not be constructed on military department lands except in rare and unusual cases.<sup>1</sup> A comparable requirement had been set forth in DOD appropriations bills for many years.<sup>2</sup>

In 1986, this section was amended by the National Defense Authorization Act for Fiscal Year 1987.<sup>3</sup> At that time, there was an increasing concern in the Federal Republic of Germany over the environmental impact of the continued use of coal at U.S. facilities there. (Extant DOD appropriation law then prohibited U.S. facilities in Germany from converting from coal to local sources of heat). The House version of the bill had contained a provision that would have directed the military to convert from coal to local heat in Germany. The Senate version, which was ultimately enacted, prohibited the military from converting in Europe from coal to any other source unless required by the host government or unless life cycle cost effective.

##### **3.7.9.3. Law in Practice**

The Energy Policy Directorate, Assistant Secretary of Defense (Production & Logistics), reports that this provision adequately serves the Department's interests and is not harmful to the economic use of energy sources in Europe.<sup>4</sup>
