FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5095 of September 15, 1983

National Respiratory Therapy Week, 1983

By the President of the United States of America

A Proclamation

Chronic lung diseases constitute an important health problem in the United States. They afflict nearly 18 million Americans and cause nearly 70,000 deaths each year, many of which are the direct result of cigarette smoking. Thousands of other persons annually suffer some degree of permanent disability as a result of these disorders. The economic cost of these diseases has been estimated to exceed $16 billion annually.

For some of these diseases the cause is unknown, and for many there is no cure. The timely initiation of appropriate therapy, however, can usually slow their progress, relieve their symptoms, reduce the extent of permanent lung damage and respiratory disability, and avert or delay the onset of life-threatening complications. Although the lung damage already caused by these diseases cannot be undone, respiratory therapy may help preserve lung function that might otherwise be irretrievably lost and can also help the patient make the most effective use of that which remains.

Respiratory therapy may take many forms, including drugs to dilate open air passages or protect against respiratory infections; respiratory-assistance techniques to maintain adequate blood oxygen levels; and exercise programs to improve the efficiency of breathing and condition respiratory muscles to bear the increased burden imposed on them. Kicking the smoking habit is also important to all respiratory therapy.

In recognition that chronic lung diseases are an important cause of death, ill health, and disability and that respiratory therapy can do much to lessen their effects, the Congress, by Senate Joint Resolution 67, has authorized and requested the President to proclaim the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of September 25 through October 1, 1983, as National Respiratory Therapy Week. I call upon all interested organizations and persons to utilize this opportunity to focus public attention on the national health problem posed by chronic lung diseases and to reaffirm our commitment to bring these diseases under effective control.

IN WITNESS WHEREOF, I have hereunto set my hand this 15th day of September, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and eighth.

Presidential Documents

Proclamation 5096 of September 15, 1983

National Housing Week, 1983

By the President of the United States of America

A Proclamation

The provision of a home and a suitable living environment for every American family continues to be a national housing goal. Homeownership and decent housing instill pride in our citizens and contribute to the vitality of communities throughout America.

The resurgence of America's housing industry is both a contribution to and a result of our Nation's economic recovery. The substantial increase in housing starts in 1983, by restoring and creating thousands of jobs in housing and related industries, has been a major factor in the reduction of unemployment.

In recognition of our Nation's commitment to housing and homeownership and the role that housing plays in economic recovery, the Congress, by Senate Joint Resolution 98, has authorized and requested the President to issue a proclamation designating the week of October 2 through October 9, 1983, as "National Housing Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning October 2, 1983, as National Housing Week, and call upon the people of the United States and interested groups and organizations to observe this week with appropriate activities and events.

IN WITNESS WHEREOF, I have hereunto set my hand this fifteenth day of September, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and eighth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 182
Monday, September 19, 1983

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 421

Cotton Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Cotton Crop Insurance Regulations (7 CFR Part 421), effective for the 1983 and succeeding crop years, in compliance with the provisions of Secretary's Memorandum No. 1512–1, which requires periodic review of FCIC's regulations as to need, currency, clarity, and effectiveness. The intended effect of this rule is to confirm the Interim Rule published in the **Federal Register** on December 21, 1982, at 47 FR 56813.

EFFECTIVE DATE: This rule is effective on October 19, 1983.

ADDRESS: Any comments on this rule may be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this rule and the impact of implementing each option are available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: On December 21, 1982, FCIC published an Interim Rule to revise and reissue the Cotton Crop Insurance Regulations (7 CFR Part 421) the intended effect of which is to improve the debt management practices of FCIC; revise the system of reporting damage or loss to insured crops; remove certain restrictions on coverage of insurance in the various stages; reduce the time and paperwork demands on an applicant; and, comply with the provisions of Secretary's Memorandum No. 1512–1, as to reviewing the regulations with regard to currency, clarity, need, and effectiveness.

The public was given until February 22, 1983, to submit written comments on the rule, but none were received. The rule was scheduled for review following a 60-day comment period in order to prepare any amendments made necessary by such comments. During the review period, FCIC determined that, the OMB Information Collection Control Numbers applicable to FCIC, should be codified and therefore will be at 7 CFR 421.3, previously designated as "Reserved." This amendment is contained in this final rule. The amendment providing for codification of OMB Control Numbers relates to internal agency management and, therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest.

List of Subjects in 7 CFR Part 421

Crop insurance, Cotton.

PART 421—[AMENDED]

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby amends the Cotton Crop Insurance Regulations (7 CFR Part 421), effective with the 1983 and succeeding crop years, in the following instances:

1. The authority citation for 7 CFR Part 421 is:

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77, as amended (1506, 1516).

2. 7 CFR Part 421 is amended in the Table of Contents thereof by removing the word "Reserved" from § 421.3 and inserting in its place, the words "OMB control numbers."

3. 7 CFR § 421.3 is added to read as follows:

§ 421.3 OMB control numbers.

The information collection requirements contained in these regulations (7 CFR Part 421) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB control Nos. 0563–0003 and 0563–0007.

Accordingly, the interim rule published in the **Federal Register** of December 21, 1982 on pages 47 FR 56813–56820, as amended above, is adopted as final.

Done in Washington, D.C., on August 24, 1983.

Peter F. Cole,
Secretary, Federal Crop Insurance Corporation.

Dated: September 8, 1983.
Approved by:

Edward D. Hews,
Acting Manager.

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 1036

[Milk Order No. 36]

Milk in the Eastern Ohio-Western Pennsylvania Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends certain shiping standards for supply plants regulated by the Eastern Ohio-Western Pennsylvania milk order. The suspension reduces from 40 percent of receipts to 30 percent the quantity of milk that supply plants must ship to distributing plants to maintain pool plant status for September through November 1983.

This action was requested by a cooperative association which represents a substantial number of producers associated with this market. In the past year this market has experienced a substantial increase in milk production without a corresponding increase in fluid sales. As a result, not as much bulk milk from supply plants will be needed to meet the fluid milk demands of distributing plants during

the fall months. Without the suspension, unneeded and uneconomic shipments of supply plant milk would be made solely for the purpose of assuring that dairy farmers historically associated with the market will continue to have their milk priced and pooled under the order.

Notice of this proposed action was published in the **Federal Register** and interested parties were given the opportunity to submit written comments. Two cooperative associations submitted comments in support of the suspension action. No written comments opposing the suspension were received.

EFFECTIVE DATE: September 19, 1983.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-7183.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued August 16, 1983; published August 22, 1983 (48 FR 38001).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the required suspension procedures in time to include September 1983 in the suspension period. This initial request for this action was received August 9, 1983. A notice of proposed suspension was issued on August 16, 1983, inviting interested parties to comment on the proposed action by August 29, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*,) and of the order regulating the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 38001) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded an opportunity to file written data, views, and arguments thereon. Two cooperative asociations submitted comments supporting the proposed action. No written comments opposing the action were received.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the months of September through November 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1036.7(b), the language "not less than 40 percent during the months of September, October and November and" and the language "in all other months,".

Statement of Consideration

This action reduces the quantity of milk that supply plants must ship to distributing plants to maintain pool plant status under the Eastern Ohio-Western Pennsylvania order. The order requires a supply plant to ship 40 percent of its receipts to distributing plants during the months of September through November. In other months the shipping standard is 30 percent. This action removes the 40 percent standard for the months of September, October and November. As a result, a 30 percent shipping standard for pooling supply plants will apply during these months.

This action was requested by Milk Marketing Inc. (MMI), a cooperative association which represents a substantial number of producers who supply milk to the Eastern Ohio-Western Pennsylvania market. Eastern Milk Producers Cooperative Association, Inc., supported the suspension action.

During the first 6 months of 1983, receipts of producer milk at pool plants increased 8 percent over the same period in 1982. At the same time, Class I usage increased less than 2 percent. All available information indicates that this supply-demand imbalance will continue through the remainder of 1983. As a result, distributing plants will receive a higher proportion of their milk supply by direct shipment and the quantity of milk moved from supply plants to distributing plants will be reduced. In some instances, supply plants will not be able to pool all of their available milk supply without back-hauling milk at considerable expense. Suspension of the 40 percent standard is thus necessary to prevent unneeded and uneconomic shipments of milk from supply plants to distributing plants that would be made solely for the purpose of pooling the milk of dairy farmers who historically have supplied the fluid needs of the market.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that without the suspension unneeded and uneconomic shipments of milk from supply plants would likely be made solely for the purpose of pooling the milk of dairy farmers who historically have supplied the fluid needs of the market;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1036

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions of § 1036.7(b) of the order are hereby suspended for the months of September through November 1983.

Effective Date: September 9, 1983.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Signed at Washington, D.C. on: September 12, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 109

Employment Authorization; Withdrawal of Provisions Specifying Period of Time That Permission To Accept Employment Is Authorized

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: On June 27, 1983 (48 FR 29465), the Service published a final rule clarifying existing regulations relating to employment authorization for aliens admitted to the United States. Sections 109.1(b) (2) and (3) were amended to specify that temporary employment authorization is automatically terminated upon denial of the application. This notice serves as a withdrawal of that amendment to § 109.1 (b)(2) and (b)(3). A proposed rule is published elsewhere in this issue. The remaining provisions of the final rule remain as they were published with an effective date of June 28, 1983.

EFFECTIVE DATE: September 19, 1983.

FOR FURTHER INFORMATION CONTACT:

For General Information: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, Telephone: (202) 633-3048.

For Specific Information: Craig O. Raynsford, Assistant General Counsel, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, Telephone: (202) 633-1266.

SUPPLEMENTARY INFORMATION: On June 27, 1983 at 48 FR 29465, the Service published a final rule amending 8 CFR Part 109 to clarify who is eligible for employment authorization, under what conditions employment can be authorized, and when such authorization terminates.

Sections 109.1 (b)(2) and (b)(3) of Title 8 were amended to specify the period of time that permission to accept employment is authorized. After appropriate review, the Service wishes to withdraw the revisions to these sections at this time and to republish, as a separate document, a proposed revision to these sections to allow for a 60 day public comment period. Therefore, paragraphs (b)(2) and (b)(3) relating to the period of time permission to accept employment may be authorized is removed from the final order as published on June 27, 1983 (48 FR 29465).

List of Subjects in 8 CFR Part 109

Aliens, Employment.

Accordingly, Title 8 of the Code of Federal Regulations is amended as follows:

PART 109—EMPLOYMENT AUTHORIZATION

In § 109.1, paragraphs (b) (2) and (3) are revised to read as originally published on Nov. 12, 1981 (46 FR 55920):

§ 109.1 Classes of aliens eligible.

* * * * *

(b) * * *

(2) Any alien who has filed a non-frivolous application for asylum pursuant to Part 208 of this chapter may be granted permission to be employed for the period of time necessary to decide the case.

(3) Any alien who has properly filed an application for adjustment of status to permanent resident alien may be granted permission to be employed for the period of time necessary to decide the case.

* * * * *

(Secs. 103, 212, 245, Immigration and Nationality Act, as amended (8 U.S.C. 1103, 1182, 1255))

Dated: September 12, 1983.

Andrew J. Carmichael, Jr.,

Associate Commissioner, Examinations, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-CE-10-AD; Amdt. 39-4724]

Airworthiness Directives; British Aerospace, Aircraft Group (Formerly Scottish Aviation Limited) Model HP.137 Jetstream MK-1 and Series 200 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises Airworthiness Directive (AD) 83-05-08 Amendment 39-4582 applicable to British Aerospace Aircraft Group, Model HP.137 Jetstream MK-1 and Series 200 airplanes by providing a definitive test procedure to verify the proper operation of the Non-Return-Valve (NRV). Reference was made in AD 83-05-08 to manufacturer data which instructed inspection of the NRV in accordance with nonexistent vendor data. This error has come to the attention of the manufacturer and FAA and the manufacturer has published Revision 1 to SB No. 18/3 dated March 31, 1983, which incorporates reference to an acceptable inspection procedure. This revision makes the AD consistent with current manufacturer's data.

DATE: Effective September 23, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: British Aerospace, Aircraft Group, Scottish Division Jetstream Service Bulletin (SB) No. 18/3 Revision 1 dated March 31, 1983, and British Aerospace Aircraft Group Jetstream Modification No. 5179 Issue 1, dated December 1981, applicable to this AD may be obtained from British Aerospace Incorporated, 13850 McLearen Road, Dulles Industrial Aerospace Park, Herndon, Virginia 22070. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, FAA Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. A. Astorga, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium, Telephone 513.38.30; or Mr. P. Cormaci, FAA, ACE-109, 601 East 12th Street, Kansas City, Missouri 64106, Telephone 816/374-6932.

SUPPLEMENTARY INFORMATION: AD 83-05-08, Amendment 39-4582 (48 FR 10625, 10626) applicable to British Aerospace Aircraft Group Model HP.137 Jetstream MK-1 and Series 200 airplanes requires removal and inspection of the fuel filter bleed pipe NRVs, to correct an unsafe condition in the aircraft. Subsequent to the issuance of this AD, the British Aerospace, Aircraft Group and the United Kingdom Civil Aviation Authority (UKCAA) published a definitive test procedure for this valve in lieu of the previous vendor overhaul manual procedure. This amendment is to ensure that the valve is operating in accordance with its intended use and provides the owner-operator with a detailed step-by-step test procedure to accomplish this inspection. It imposes no additional burden on any person and is clarifying in nature. Therefore, notice and public procedure hereon are unnecessary, contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly and pursuant to the authority delegated to me by the Administrator AD 83-05-08, Amendment 39-4582 (48 FR 10625, 10626), § 39.13 of the Federal Aviation Regulations (14 CFR 39.13), is amended as follows:

(1) Revise the lead in paragraph following the Compliance statement to read as follows:

To detect defective fuel filter bleed pipe Non-Return-Valve (NRV) Part Number (P/N) 702CD02, unless accomplished in the previous 200 hours time-in-service, within the next 20 hours time-in-service after the effective date of this AD and thereafter at intervals not to exceed 200 hours time-in-service, accomplish the following:

(2) Revise paragraph a) to read as follows:

(a) Remove, inspect, and test the fuel filter bleed pipe NRV P/N 702CD02 for correct operation in accordance with the "Action" section of Scottish Aviation Limited Jetstream SB No. 18/3 Revision 1, March 31, 1983.

Note.—SB No. 18/3, Revision 1, specifies a detailed test procedure to verify that the valve operates as intended.

(3) Revise paragraph b) to read as follows:

(b) If a defective NRV is found, replace the valve prior to further flight.

This amendment becomes effective September 23, 1983.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); 49 U.S.C. 106(g) (Revised, Pub. L. 79-449, January 12, 1983); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note.— The FAA has determined that this document involves an amendment that is of a clarifying nature and does not impose any additional burden on any persons. Therefore, (1) it is not a major rule under Executive Order 12291, and (2) it is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Because its anticipated impact is so minimal, it does not warrant preparation of a regulatory evaluation. I certify it will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act because it is clarifying in nature, and because it involves few, if any, small entities.

Issued in Kansas City, Missouri, on September 8, 1983.

Murray E. Smith,

Director, Central Region.

[FR Doc. 83-25411 Filed 9-16-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-ASW-38; Amdt. 39-4721]

Airworthiness Directives; Enstrom Models F-28A, 280, F-28C, F-28C-2, 280C, F-28F, and 280F

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspection and lubrication of tail rotor drive shaft couplings on Enstrom Models F-28A, 280, F-28C, F-28C-2, 280C, F-28F, and 280F. This AD is needed to prevent tail rotor drive shaft coupling failure due to improper lubrication which could result in loss of directional control and subsequent loss of the helicopter.

DATES: Effective September 23, 1983.

Compliance schedule—As prescribed in body of AD.

ADDRESSES: The applicable service information, Enstrom Helicopter Corporation Service Directive Bulletin 0065, may be obtained from Enstrom Helicopter Corporation, P.O. Box 277, Menominee, Michigan 49858.

A copy of the service bulletin is contained in the Rules Docket, Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: Joseph H. McGarvey, ACE-120C, Chicago Aircraft Certification Office, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018, telephone number (312) 694-7136.

SUPPLEMENTARY INFORMATION: There have been two reports of tail rotor drive shaft coupling failures and loss of directional control causing crash landings with substantial aircraft damage. The FAA has determined that the failures were the result of excessive wear due to improper lubrication. Since this condition is likely to exist or develop in other tail rotor drive systems of the same type design, an airworthiness directive is being issued that requires repetitive inspections, replacement as necessary, and lubrication of tail rotor drive shaft couplings on Enstrom F-28A, 280, F-28C, F-28C-2, F-28F, and 280F helicopters.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Enstrom Helicopter Corporation: Applies to Enstrom Model F-28A: 280; F-28C; F-28C-2; 280C; F-28F, Serial numbers 506, 507, 509, 510, 511, 512, 513, 514, 515, 517, 527, 700, 701, 702, and 704; and 280F, Serial numbers 1212 and 1500.

Compliance is required as indicated.

To prevent the possible loss of directional control, accomplish the following:

(a) Prior to next flight after the effective date of this AD, disassemble the forward and aft tail rotor drive shaft couplings (P/N 28-13609), visually and dimensionally inspect for wear and proper tooth contact, lubricate, and reassemble, in accordance with Enstrom Service Directive Bulletin 0065, dated August 19, 1983, and the Maintenance Manual/ Maintenance Manual Supplement for the respective models or FAA approved equivalent. Couplings not complying with the prescribed wear limits are not airworthy and must be replaced with airworthy parts.

(1) Tail rotor drive shaft couplings which have been overhauled less than 100 hours prior to the effective date of this AD are exempt from the initial requirements of this paragraph.

(2) Tail rotor drive shaft couplings that have a history of crash damage in which the couplings were not magnafluxed, must be removed and magnafluxed prior to further flight.

(b) Within 100 hours' time in service after the effective date of this AD or since the last inspection in accordance with paragraph (a), and at 100-hour intervals thereafter, partially disassemble the forward and aft tail rotor drive shaft couplings (P/N 28-13609), inspect, lubricate, and reassemble in accordance with Enstrom Service Directive Bulletin 0065, dated August 19, 1983, and the Maintenance Manual/Maintenance Manual Supplement for the respective models or FAA approved equivalent.

(c) Each 600 hours' time in service or at each annual inspection, whichever occurs first after the effective date of this AD, disassemble the forward and aft tail rotor drive shaft couplings (P/N 28-13609), visually and dimensionally inspect for wear and proper tooth contact, lubricate, and reassemble in accordance with Enstrom Service Directive Bulletin 0065, dated August 19, 1983 and the Maintenance Manual/ Maintenance Manual Supplement for the respective models or FAA approved equivalent.

(d) Any equivalent method of compliance with this AD must be approved by the Manager, Chicago Aircraft Certification Office, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

(e) In accordance with FAR 21.197, flight is permitted to a base where the requirements of this AD may be accomplished.

This amendment becomes effective September 23, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended [49 U.S.C. 1354(a), 1421, and 1423]; 49 U.S.C. 106(g) [Revised, Pub. L. 97-449, January 12, 1983]; 14 CFR 11.89)

Note.—The FAA has determined that this regulation involves approximately 650 helicopters at a cost of $105 per aircraft. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291, and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures [44 FR 11034; February 26, 1979]. A copy of the final regulation evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

Issued in Fort Worth, Texas, on August 31, 1983.

F. E. Whitfield,

Acting Director, Southwest Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 83-ASO-26]

Alteration of Transition Area; Nashville, Tenn.

AGENCY: Federal Aviation Administration [FAA], DOT

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Nashville, Tennessee, transition area to accommodate future Instrument Flight Rule (IFR) operations at Cockrill Bend Airport which is presently under construction. This action lowers the base of controlled airspace in the vicinity of the new airport from 1,200 to 700 feet above the surface. The intended effect of this action is to ensure segregation of aircraft executing instrument approach procedures from other aircraft which may be operating under Visual Flight Rules (VFR) in controlled airspace. This amendment will also correct erroneous geographical coordinates for several existing airports.

EFFECTIVE DATE: 0901 G.m.t., November 24, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, July 14, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations [14 CFR Part 71] by increasing the size of the Nashville, Tennessee, transition area to provide additional controlled airspace in the vicinity of Cockrill Bend Airport which is presently under construction. In addition, several deficiencies in the existing description will be corrected (48 FR 32187). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to the circularization. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Nashville, Tennessee, transition area by lowering the base of controlled airspace in the vicinity of Cockrill Bend Airport from 1,200 to 700 feet above the surface.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Nashville, Tennessee, transition area under § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., November 24, 1983, as follows:

Nashville, TN—[Revised]

That airspace extending upward from 700 feet above the surface within a 17-mile radius of Nashville Metropolitan Airport (Lat. 36°07'37" N., Long. 86°40'53" W.), within an 8.5-mile radius of Smyrna Airport (Lat. 36°00'32" N., Long. 86°31'12" W.), Gallatin Municipal Airport (Lat. 36°22'43" N., Long. 86°24'32" W.), Lebanon Municipal Airport (Lat. 36°11'22" N., Long. 86°16'35" W.), Murfreesboro Municipal Airport (Lat. 35°52'38" N., Long. 86°22'39" W.), and Cockrill Bend Airport (Lat. 36°10'53" N., Long. 86°53'13" W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(a)]; 49 U.S.C. 106(g) [Revised, Pub. L. 97-449, January 12, 1983])

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures [44 FR 11034; February 26, 1979]; and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on September 2, 1983.

George R. LaCaille,

Acting Director, Southern Region.

14 CFR Part 97

[Docket No. 23756; Amdt. No. 1251]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration [FAA], DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washingon, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

List of Subjects in 14 CFR Part 97

Aviation safety, Standard instrument approaches.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN SIAPs identified as follows:

. . . Effective November 24, 1983

Manhattan, KS—Manhattan Muni, VOR Rwy 3, Amdt. 13
Wichita, KS—Beech Factory, VOR-B, Amdt. Orig.
Wichita, KS—Beech Factory, VOR-B, Amdt. 11, Cancelled
Wichita, KS—Cessna Acft Field, VOR-C, Amdt. Orig.
Wichita, KS—Cessna Acft Field, VOR-C, Amdt. 2, Cancelled
Wichita, KS—Wichita Mid-Continent, VOR Rwy 14, Amdt. Orig.
Wichita, KS—Wichita Mid-Continent, VOR Rwy 14, Amdt. 12, Cancelled

. . . Effective October 27, 1983

Bridgeport, CT—Igor I. Sikorsky Memorial, VOR Rwy 6, Amdt. 17
Bridgeport, CT—Igor I. Sikorsky Memorial, VOR Rwy 24, Amdt. 10
Swainsboro, GA—Emanuel County, VOR-A, Amdt. 3
Carbondale-Murphysboro, IL—Southern Illinois, VOR-B, Amdt. 2
Bloomington, IN—Monroe County, VOR Rwy 24, Amdt. 7
Kentland, IN—Kentland Muni, VOR-A, Amdt. 2
Ottumwa, IA—Ottumwa Industrial, VOR/DME Rwy 13, Amdt. 5
Ottumwa, IA—Ottumwa Industrial, VOR Rwy. 31, Amdt. 13
Longview, TX—Gregg County, VOR or TACAN Rwy 13, Amdt. 17
Longview, TX—Gregg County, VOR/DME or TACAN Rwy 31, Amdt. 4
Longview, TX—Gregg County, VOR/DME or TACAN Rwy 35, Amdt. 4

. . . Effective September 29, 1983

Sault Ste Marie, MI—Chippewa County Intl, VOR-A, Amdt. 2

. . . Effective September 7, 1983

Key West, FL—Key West Intl, VOR-B, Amdt. 6

2. By amending § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, and SDF/DME SIAPs identified as follows:

. . . Effective November 24, 1983

Wichita, KS—Wichita Mid-Continent, LOC BC Rwy 19L, Amdt. 12

. . . Effective October 27, 1983

Ottumwa, IA—Ottumwa Industrial, LOC/DME BC Rwy 13, Amdt. 1
Hibbing, MN—Chisholm-Hibbing, LOC BC Rwy 13, Amdt. 8

3. By amending § 97.27 NDB and NDB/DME SIAPs identified as follows:

. . . Effective November 24, 1983

Wichita, KS—Wichita Mid-Continent, NDB Rwy 1R, Amdt. 14

. . . Effective October 27, 1983

Fort Morgan, Co—Fort Morgan Muni, NDB Rwy 14, Amdt. Orig.
Fort Morgan, Co—Fort Morgan Muni, NDB Rwy 32, Amdt. Orig.
Carbondale-Murphysboro, IL—Southern Illinois, NDB Rwy 18, Amdt. 9
Cedar Rapids, IA—Cedar Rapids Muni, NDB Rwy 9, Amdt. 9
Greenwood, MS—Greenwood-LeFlore, NDB Rwy 18, Amdt. Orig.
Longview TX—Gregg County, NDB Rwy 13, Amdt. 11

. . . Effective September 29, 1983

Sault Ste Marie, MI—Chippewa County Intl, NDB Rwy 10, Amdt. 2
Sault Ste Marie, MI—Chippewa County Intl, NDB Rwy 34, Amdt. 1

. . . Effective September 7, 1983

Key West, Fl—Key West Intl, NDB-A, Amdt. 10

4. By amending § 97.29 ILS ILS/DME, ISMLS, MLS, MLS/DME and MLS/RNAV SIAPs identified as follows:

. . . Effective October 27, 1983

Ontario, CA—Ontario International, ILS Rwy 8L, Amdt. 3
Bridgeport, CT—Igor I. Sikorsky Memorial, ILS Rwy 6, Amdt.4

Carbondale-Murphysboro, IL—Southern Illinois, ILS Rwy 18, Amdt. 9
Cedar Rapids, IA—Cedar Rapids Muni, ILS Rwy 9, Amdt. 13
Cedar Rapids, IA—Cedar Rapids Muni, ILS Rwy 27, Amdt. 2
Ottumwa, IA—Ottumwa Industrial, ILS Rwy 31, Amdt. 3
Hibbing, MN—Chisholm-Hibbing, ILS Rwy 31, Amdt. 8
Greenwood, MS—Greenwood-LeFlore, ILS Rwy 18, Amdt. 3
New York, NY—LaGuardia, ILS Rwy 22, Amdt. 16
Chattanooga, TN—Lovell Field, ILS Rwy 2, Amdt. 4

Effective September 29, 1983

Sault Ste Marie, MI—Chippewa County Intl, ILS Rwy 16, Amdt. 3

Effective November 24, 1983

Manhattan, KS—Manhattan Muni, ILS Rwy 3, Amdt. 2
Wichita, KS—Wichita Mid-Continent, ILS Rwy 1L, Amdt. 1
Wichita, KS—Wichita Mid-Continent, ILS Rwy 1R Amdt. 14
Wichita, KS—Wichita Mid-Continent, ILS Rwy 19R, Amdt. 3

5. By amending § 97.31 RADAR SIAPs identified as follows:

Effective October 27, 1983

Longview, TX—Gregg County, RADAR-1, Amdt. 2

Effective September 7, 1983

Key West, FL—Key West Intl, RADAR-1, Amdt. 1

6. By amending § 97.33 RNAV SIAPs identified as follows:

Effective November 24, 1983

Wichita, KS—Beech Factory, RNAV Rwy 18, Amdt. Orig.
Wichita, KS—Beech Factory, RNAV Rwy 18, Amdt. 3, Cancelled

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 73

[Docket No. 83C-0051]

Listing of Color Additives for Coloring Contact Lenses; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date of August 9, 1983, for a final rule that provides for the safe use of four color additives for coloring contact lenses. This action responds to a petition filed by Custom Tint Laboratories, Inc.

DATE: Effective date confirmed: August 9, 1983.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a final rule published in the **Federal Register** of July 8, 1983 (48 FR 31374), FDA amended the color additive regulations to provide for the safe use of four color additives for coloring contact lenses. The final rule added new § 73.3117 (21 CFR 73.3117) that allows the use of 16,23-dihydrodinaphtho[2,3-*a*:2',3'-*i*] naphth[2',3':6,7]indolo 2,3-*c*]carbazole-5,10,15,17,22,24-hexone; § 73.3118 (21 CFR 73.3118) that allows the use of *N,N'*-(9,10-dihydro-9,10-dioxo-1,5-anthracenediyl)bisbenzamide; § 73.3119 (21 CFR 73.3119) that allows the use of 7,16-dichloro-6,15-dihydro-5,9,14,18-anthrazinetetrone; and § 73.3120 (21 CFR 73.3120) that allows the use of 16,17-dimethoxydinaphtho[1,2,3-*cd*:3',2',1-*lm*]perylene-5,10-dione for coloring contact lenses.

In the final rule, FDA gave interested persons until August 8, 1983, to file objections. The agency received no objections or requests for a hearing on the final rule. Therefore, FDA has concluded that the final rule published in the **Federal Register** of July 8, 1983, for these four color additives should be confirmed.

List of Subjects in 21 CFR Part 73

Color additives, Color additives exempt from certification, Cosmetics, Drugs, Medical devices.

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701(e), 706, 70 Stat. 919 as amended, 74 Stat. 399-407 as amended (21 U.S.C. 371(e), 376)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that no objections or requests for a hearing were filed in response to the final rule of July 8, 1983. Accordingly, the final rule adding §§ 73.3117, 73.3118, 73.3119, and 73.3120 to provide for the safe use of four color additives in coloring contact lenses became effective August 9, 1983.

Dated: September 12, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 83C-0128]

Color Additives; D&C Yellow No. 10

Correction

In FR Doc. 83-23708 beginning on page 39217 in the issue of Tuesday, August 30, 1983, make the following corrections:

1. On page 39218, second column, fifth line from the bottom of the first complete paragraph, "(P<0.05)" should read "(P<0.05)".

2. On page 39220, second column, the third line of the last paragraph, the date should read "September 29".

3. On the same page, the third column, in the authority citation "706(d)" should read "706(b)".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 250

Indian Fishing; Hoopa Valley Indian Reservation

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: The Bureau of Indian Affairs is amending its conservation regulations governing Indian fishing on the Hoopa Valley Reservation in response to recommendations received from Indians and from officials assigned to implement the rules. The most significant change is a closure to gillnet fishing from 9 a.m. Monday to 9 a.m. Tuesday of each week during the fall chinook run. Prior to publication of this rule, gillnet fishing was banned only from 9 a.m. to 5 p.m. on Monday of each week. Last year, however, gillnet fishing during the fall chinook run was banned from 9 a.m. Monday to 5 p.m. Wednesday of each week and from 9 a.m. to 5 p.m. on Thursday and Fridays.

DATE: This rule becomes effective September 19, 1983.

FOR FURTHER INFORMATION CONTACT: Daniel Swaney, Superintendent, Northern California Agency, Bureau of Indian Affairs, P.O. Box 367, Hoopa, California 95546, telephone number (916) 625-4285.

SUPPLEMENTARY INFORMATION: The Department of the Interior is responsible for the supervision and management of Indian Affairs under 43 U.S.C. 1457, 25 U.S.C. 2, 9 and 13 and the Reorganization Plan No. 3 of 1950 (64 Stat. 1262), including the protection of Indian fishing rights.

Normally, tribal governments are responsible for regulation of Indian fishing on a reservation. Tribal regulation on the Hoopa Valley Indian reservation has not been possible because not all tribes on the reservation have functioning governments. The Yurok Tribe has not developed an organized government able to participate in regulation of the Indian fishery. Until organization is accomplished by the Yurok Tribe, the Department will continue to regulate the fishery to assure the continued existence of this valuable tribal asset. In keeping with the Department's policy of Indian self-determination, the Department makes a special effort to consult with the Indians governed by these regulations and gives special consideration to their views in making decisions concerning these regulations. It is also recognized that the resource is best protected when the people to be regulated participate in resource management decisions.

In early February 1983, public meetings were held on the reservation to receive comments and suggestions concerning possible changes to the fishing regulations. The comments and suggestions made at those meetings were considered in developing the proposed rule, which was published in the Federal Register on June 24, 1983 (48 FR 29004). An additional public meeting was held in July in Eureka, California. Comments made at that meeting and written comments received in response to publication of the proposed rule have been considered in developing the final rule.

Changes Made Due to Comments Received

1. One commenter recommended that "anadromous fish" be defined by species because questions have arisen with respect to the applicability of the regulations to sturgeon, steelhead, and lamprey or eels. The proposed rule would have made it clear that eels or lamprey are anadromous fish, but would not have mentioned what other fish in the Klamath and Trinity Rivers are anadromous, and, therefore, covered by the regulations. The same commenter also questioned whether a conservation need exists to regulate the harvest of anadromous fish other than salmon. This proposal to define anadromous fish has been adopted. The term is defined to include salmon, steelhead, sturgeon and eels. There is biological information available that indicates that green sturgeon are particularly vulnerable to overharvest. Although not in as precarious condition as salmon in the Klamath, steelhead stocks have declined substantially from historical levels—largely due to habitat degradation. Information on the status of the stocks of sturgeon and lamprey or eels in the Klamath and Trinity is limited. That fact alone justifies some level of regulation in order to avoid a possible overharvest of those stocks. Additionally, since gillnets used to harvest steelhead or sturgeon are also likely to harvest chinook salmon—which are know to require protection—regulation of the harvest of sturgeon and steelhead is necessary to protect chinook stocks.

2. The Hoopa Valley Business Council objected to the deletion of the "stretched measure" definition even though that term has not been used in the regulations for several years. The Council reports that it is presently considering the possibility of recommending that mesh size restriction be reinstated as a way to provide for subsistence needs while conserving the resource. For the reasons discussed in more detail below, the Department would give such a recommendation from the Council special consideration. Accordingly, the definition of "stretched measure" has been retained.

Changes Recommended But Not Adopted

1. A number of commenters urged a return to the closures that applied during the fall chinook run last year. Those included daytime closures to gillnet fishing from Monday through Friday and nighttime closures on Mondays and Tuesdays of each week.

As discussed above, reservation fisheries are usually regulated by the tribes themselves. Although the non-existence of a tribal government for many Indians of the Hoopa Valley Reservation makes such self-regulation impossible at the present, it is the Department's policy to give the Indians regulated by these rules as much control of the content of these rules as is possible given the Department's responsibility to assure the preservation of the resource and the difficulties in finding a consensus on such issues.

Last year's closures did have broad support both with the Hoopa Valley Tribe and among the non-Hoopa Valley Tribal members who exercise fishing rights on the reservation. Most Indians favored the daytime closures as a necessary measure to maintain good relations with the sport fishery on the river. The two-day nighttime closure, which was probably responsible for most of the reduction in Indian harvest experienced last year, was supported by

the Indians in the hopes it would result in similar restraint by the commercial troll fishery in the ocean.

With respect to the daytime closure, the Department stated in the preamble to the regulations last year, "It is anticipated that a cooperative spirit among user groups could result in the groups working together to preserve the resource and, consequently, could produce significant conservation benefits. This particular benefit exists, however, only as long as the closures have the support of both user groups. Additional daytime closures may be desirable, but they should be achieved through agreement rather than by asking the Department to impose them on the Indian gillnet fishery unilaterally."

The Department sincerely regrets that the cooperative spirit that existed last year is apparently weaker this year. Clearly, however, the Department cannot strengthen that cooperative spirit by regulatory fiat. The Department strongly urges both user groups to work together to improve cooperation between them.

Both the Hoopa Valley Tribe and Indian fishers who are not members of that tribe have expressed the view that the response of the commercial troll industry to the restraint exercised by the Indian fishing community last year does not warrant continued Indian restraint this year.

In order to assure preservation of the resource under current conditions, the Department has committed itself to implementing regulations that will prevent the Indian harvest from exceeding 30,000 adult fall chinook this year. The Department believes imposition of a one-day closure to gillnet fishing during the fall run will keep the harvest below that level.

Some commenters asserted that, contrary to the view expressed in the preamble to the proposed rule, high water levels on the Klamath would increase rather than decrease the net harvest because increased turbidity would make the nets more efficient. Only 500 spring chinook were harvested in nets this year through July. That is only 24% of the 1982 level for the same period. Much of this reduction is attributed to high water levels and accompanying debris causing a reduction in effort as well as netting efficiency. Water levels appear to have dropped to a point where they will not seriously inhibit gillnet fishing during the fall run as was the case during the spring. It is also unlikely, however, that turbidity during the fall fishery will be high enough to make the nets significantly more efficient than in the past seasons.

In the absence of Indian community support for such measures, it is difficult, as a legal matter, to justify restraints on the Indian fishery that are not needed for conservation purposes—especially if such restraints are likely to lead to reallocation of harvest to non-Indian user groups rather than to improved run sizes.

2. A number of commenters recommended changes to the regulations that are unrelated to any changes published in the proposed rule. Among these were recommendations to address the applicability of state law to Indian fishing, to remove the residency requirement in determining eligibility to exercise fishing rights for persons who are neither *Short* plaintiffs nor members of the Hoopa Valley Tribe, to delete certain creeks from the list of creeks that may not be blocked by nets, to authorized the sale of fish seized from fishers who do not have an identification card with them, and to make the regulations appliable to all persons. Adoption of any of these recommendations in this final rule would deprive the public of an opportunity to comment on them prior to their adoption. Although none of these recommendations was considered for adoption in this document, some of them may be the subject of rulemaking later.

3. One commenter objected that the maximum penalty of $250 proposed as an amendment to §250.3(d) is excessive and impractical for minors. The commenter urged the use of other sanctions, such as forfeiture of gear and/or fish or requiring community service. Another commenter, however, urged more severe penalties for minors because some minors are used as "fronts" by adults for illegal activity. The amendment simply provides a maximum dollar amount for any fine and does not preclude the use of other non-monetary penalties other than incarceration. The Department's experience to date with violations by minors does not indicate that they are serious enough to override the Department's reluctance to incarcerate minors because of the potential adverse effects on them. Fines larger than $250 do not appear to be needed in order to deter illegal fishing by minors.

4. One commenter urged that jury trials be denied only for those offenses for which the regulations themselves exclude the possibility of a jail sentence. The proposed rule would permit the denial of a jury trial if the court rules, based on the allegations against the particular defendant, that the particular offense will not be punishable by imprisonment. The Indian Civil Rights Act, 25 U.S.C. 1302 (10) prohibits the denial of a request for a jury trial by "any person accused of an offense punishable by imprisonment." Nothing in the Indian Civil Rights Act precludes delegation to the court of authority to decide whether a specific offense is punishable by imprisonment. It would be difficult to state in advance in a regulation all the factors that could make it appropriate to punish a particular offense with a jail sentence. For those reasons the proposed rule has been adopted without change.

5. One commenter objected to the proposal to define the term "assist" to include being in a boat while Indian fishing rights are being exercised. The commenter asserted that some elderly and disabled eligible fishers need help in managing the boat in order to exercise their fishing rights safely. Permitting persons without fishing rights to accompany eligible fishers in a boat could lead to serious abuses that could result in substantially increasing the gillnet harvest to the benefit of persons who do not have Indian fishing rights. Because the federal regulations do not apply to such persons, the BIA relies on state enforcement to prevent illegal depletion of the resource by such individuals. It is clearly in the interest of the Indians to facilitate state enforcement of its restrictions on non-Indian fishers in order to maximize the number of fish for spawning and Indian harvest. Provisions have been made in the regulations for the assistance of handicapped eligible fishers by able-bodied eligible fishers.

6. Another commenter, however, urged that the definition of "assist" be expanded to prohibit persons who are not eligible fishers from carrying the fish from the river banks to the transport vehicle. The commenter noted that state law places a limit on the number of fish such persons may have in their possession at any one time. As is discussed above, the restriction on "assisting" is designed to avoid the risk that non-eligible persons will be exercising Indian fishing rights under the guise of "assisting" simply by having an eligible person accompany them while fishing. This goal is met so long as the regulations prohibit non-eligible persons from being in the boat or handling the fish while they are in the boat or caught in the gear. Under the regulations, eligible fishers are permitted to catch fish for consumption by family members even if some of those family members are not themselves eligible fishers. For that reason, there will be many occasions when such family members may

legitimately be in possession of fish caught by eligible fishers.

7. One commenter objected to the proposal to amend the definition of "commercial fishing" to make it clear that the intent to sell the fish may be formed after they are caught because the commenter believes such a change would facilitate state prosecution of Indians. The change in the definition is intended to facilitate prosecutions in the court of Indian offenses. It is not intended to have any effect on state law.

8. One commenter urged that ceremonial fishing be omitted from the regulations or else a provision be included that ceremonial fishing is to occur according to tradition and custom with disputes to be resolved by the tribe. The provision concerning ceremonial fishing is designed to give the superintendent some guidance in accommodating the free exercise of religion as is required by the First Amendment to the United States Constitution. A federal requirement that ceremonial fishing occur according to tradition would be a clear violation of the First Amendment.

9. One commenter urged that the logsheet requirement be retained and an effort be made to correct the compliance problem because information regarding the number of fish taken in the Indian gillnet fishery is a prerequisite for effective management. We agree that such information is essential. We have found, however, that the most effective method for collecting that information is to visit Indian netting sites regularly while the run is underway. We believe the data collected in this manner is much more reliable than any data we could obtain through the use of logsheets.

10. One recommendation was received to impose a minimum mesh size of 6.25 inches in order to reduce the harvest of adult steelhead. During the summer months few Indians use nets with a mesh size of less than 6.25 inches because most Indians prefer to catch chinook rather than steelhead. Smaller mesh sizes are used in the fall when the Indians are fishing for coho. At that time of the year, however, there are usually much fewer steelhead in the river than there are in the summer. Since, for these reasons, there appears to be no urgent need to impose a minimum mesh size requirement, the Department plans to await the recommendation of the Hoopa Valley Business Council before deciding whether such a requirement should be imposed.

A technical amendment is being made to §§ 250.8(b) and 250.8(c) to eliminate language applicable only to last year and to clarify the relationship between paragraph (c) and paragraph (b). Paragraph (b) restrictions apply in August and September. Paragraph (c) restrictions apply during the rest of the year.

The primary author of this document is David Etheridge, Office of the Solicitor, Division of Indian Affairs, Department of the Interior.

It has been determined that this final rule is not a major rule as that term is defined in Executive Order 12291 of February 17, 1981, 46 FR 13193, because it will have a limited economic impact on a small number of people. For the same reasons, it has been determined that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act. Pub. L. 96-354.

List of Subjects in 25 CFR Part 250

Fisheries, Fishing, Indians—land, Penalties.

This rule is being made effective upon publication in the **Federal Register** under the exception in 5 U.S.C. 553(d)(3), which permits rules to become effective in less than 30 days when provided by the agency for good cause found and published with the rule. The regulations need to be in effect by the time the fall chinook run is underway. Large numbers of fall chinook usually begin to enter the river in August.

PART 250—INDIAN FISHING—HOOPA VALLEY RESERVATION

Part 250 of Title 25 Code of Federal Regulations is amended as follows:

1. By removing paragraph (d) of § 250.1 and revising the section heading to read as follows:

§ 250.1 Purpose.

* * * * *

2. By removing paragraph (e) of §250.3, redesignating paragraph (f) of that section as paragraph (e) and by revising paragraph (d) of that section to read as follows:

§ 250.3 Application.

* * * * *

(d) Minors between the ages of 10 and 18 are eligible to receive identification cards and are subject to the provisions of this Part, but are not subject to a fine of more than $250 or incarceration.

* * * * *

3. By removing from § 250.4 the definition of "logsheet", by revising the definition of "commercial fishing", and by adding new definitions for "anadromous fish", "assist", and "eel" in alphabetical order to read as follows:

§ 250.4 Definitions.

"Anadromous fish" include salmon, steelhead, sturgeon and eels.

"Assist" as used in § 250.5(c) means providing aid to an eligible Indian fisher in placing fishing gear, checking it, removing it from the water, removing any fish caught with the gear or removing fish from the boat.

* * * * *

"Commercial fishing" means the taking of fish or fish parts with the prior or subsequent intent to sell or trade them or profit economically from them. It does not include accepting payment for the labor involved in catching fish for the elderly or incapacitated under § 250.8(t) of this Part where payment is not based on the number or weight of fish caught.

* * * * *

"Eel" means Pacific lamprey, an anadromous fish.

* * * * *

4. By revising paragraph (c) of § 250.5 to read as follows:

§ 250.5 Eligible fisher—eligible Indian.

* * * * *

(c) Except as provided under § 250.3(c), an eligible Indian who allows an ineligible person to assist in an Indian fishery on the reservation or who permits an ineligible person to be in a boat while it is being used in the exercise of Indian fishing rights is subject to the penalties set out in § 250.15.

§ 250.6 [Amended]

5. By removing paragraph (d) of § 250.6.

6. By revising the section heading and paragraph (c) of § 250.7 to read as follows:

§ 250.7 Identification and use of gear.

* * * * *

(c) Except as may be provided for elsewhere in this Part, no eligible Indian fisher may intentionally allow his or her identification number to be used on a net that he or she is not attending or fishing.

* * * * *

7. By revising paragraphs (b), (c), and (p) and adding paragraphs (w) and (x) to § 250.8 to read as follows:

§ 250.8 Permissible and prohibited fishing.

* * * * *

(b) Fishing with gillnets is prohibited from 9 a.m. Monday until 9 a.m. Tuesday of each week during the months of August and September of each year. Except as provided elsewhere in this Part, fishing with gillnets is permitted at all other times.

(c) From October 1 through July 31 of each year, fishing with gillnets is permitted seven days per week and twenty-four hours per day except that all nets must be out of the water between the hours of 9:00 a.m. and 5:00 p.m. on Monday of each week.

* * * * *

(p) No set-net fishing is allowed within 400 feet of a test seining operation conducted by either the U.S. Fish and Wildlife Service or the California Department of Fish and Game. Set-nets placed in an area normally used for test seining may be removed by law enforcement officers and held for the owner to claim if their removal is necessary in order to permit test seining operations to be conducted

* * * * *

(w) Eels may be taken by any method except by the use of snag gear as defined in § 250.4, explosives, stunning agents or caustic or lethal chemicals in any form.

(x) Ceremonial fishing may be conducted during closed hours pursuant to a special permit issued by the Superintendent of the Northern California Agency. The Superintendent may impose any conditions on the permittee that are necessary to protect the fish resource or to assure that all fish caught are used exclusively for ceremonial purposes

8. By revising paragraphs (a) and (b) of §205.11 to read as follows:

§250.11 In-season and emergency regulations.

(a) The Area Director of the Bureau of Indian Affairs is authorized to make in-season and emergency changes to the regulations when necessary to ensure proper management of the fisheries of the Klamath and Trinity Rivers. This authority includes the following powers:

(1) To close all or part of an Indian fishery when, in the Area Director's judgment, a closure is necessary to meet conservation needs.

(2) To re-open all or part of an Indian fishery when, in the Area Director's judgment, that action will not jeopardize spawning escapement.

(b) In-season or emergency regulations shall be effective 24 hours after publication in the *Eureka Times Standard*. They shall stay in effect until modified or rescinded by the Area Director. Failure to complete subsequent provisions of this section shall not affect the validity of any in-season or emergency adjustment.

* * * * *

9. By revising paragraphs (a) and (c) of § 205.12 to read as follows:

§250.12 Fish catch reporting.

(a) All eligible fishers shall allow access to harvested fish to authorized biologists, technicians, and enforcement officers for the purpose of monitoring the harvest and to check for compliance with the provisions of this part.

* * * * *

(c) The U.S. Fish and Wildlife Service will compile in-season catch data from information obtained from spot checks of fishers, landing counts, creel censuses and other information collected by State, Federal and tribal officials.

10. By revising § 205.14 to read as follows:

§250.14 Enforcement.

(a) Eligible Indians who violate the provisions of this Part or any in-season or emergency adjustments promulgated under this Part are subject to prosecution before the Court of Indian Offenses of the Hoopa Valley Indian Reservation. The Indian Civil Rights Act and, except as modified by this Part, 25 CFR 11.5 (a) and (b), 11.6–11.8, 11.11, 11.12(a), 11.14–11.19, 11.21, and 11.33–11.37 apply.

(b) *Citations.* Law enforcement officers may issue citations to any eligible Indian the officer believes has committed a violation of the regulations of this Part. Such citation shall state when and where the person is charged.

(c) *Seizure.* Confiscation of fishing gear and fish.

(1) Any net or other fishing gear used in violation of these regulations and any fish caught or possessed in violation of these regulations may be seized by a law enforcement officer. Fishing gear or fish so seized shall be held pending disposition by court order except as specifically provided in these regulations.

(2) When a net or other fishing gear is seized and the owner is unknown to the enforcement officer, the prosecutor shall, without unreasonable delay, commence proceedings in the Court of Indian Offenses by petitioning the court for a judgment forfeiting the fishing gear and/or fish. When a net or other fishing gear is seized and the fishing gear is marked with an identification number the prosecutor shall, without unreasonable delay, notify by registered mail the holder of the identification munber that his or her fishing gear has been seized. The notice of seizure shall state the date of seizure, the place of seizure, and the time of seizure and shall direct the person whose gear has been seized to notify the court directly to arrange to have the matter placed on the court's calendar.

(3) Upon filing of such petition, the enforcement officer shall set out details of the seizure, citing time, place, and location of such seizure. A notice of seizure shall be left at the site where the fishing gear of fish were confiscated. The court upon receipt of the petition shall fix a time for a hearing and cause notices for unidentified gear of fish to be posted and published. A notice shall be published at least ten days prior to the forfeiture hearing at both courthouses of the Court of Indian Offenses. The clerk of the court shall publish notices in local news media having circulation on the reservation. Such notices shall be published for a period of five days and shall set forth the reason for the hearing. Once a person claims seized fishing gear or fish, the publication of the notice shall cease.

(4) Any fishing gear forfeited shall be sold at public sale as directed by the Superintendent.

(5) Any person who satisfies the court that he or she is the owner of any fishing gear or fish seized under this section may intervene in the forfeiture proceeding on behalf of the fishing gear or fish.

(6) If there is no objection by the seizing agency, nor any Federal statutory or regulatory prohibition, all fish seized may be sold by the Superintendent, Northern California Agency, and the proceeds held pending adjudication of the charge that was the basis of the seizure. Proceeds from sales of fish that are found, upon adjudication, to have been taken in violation of these regulations shall be transferred to a special Hoopa-Yurok Fund in the U.S. Treasury. Nothing in this section shall be construed to prevent undercover law enforcement officers from selling fish as part of their duties or to make legal the purchase of fish from such officers.

(d) *Complaint procedures.* Any person regulated under this Part may file a complaint in writing against a law enforcement officer. The Superintendent of the Northern California Agency shall, without unreasonable delay, conduct an investigation into any allegation of misconduct by the BIA law enforcement officer in carrying out the duties of that office. Upon completion of the investigation, the Superintendent shall make available to the complainant, upon written request, the findings of the investigation.

11. By revising § 250.16 to read as follows:

§ 250.16 Forceable assault and impeding a Federal employee.

(a) Any person who forcibly assaults, resists, impedes, or interferes with an

employee of the Interior Department in the performance of his or her duties under this Part may be prosecuted in Federal court under 18 U.S.C. 111.

(b) Any eligible Indian who forcibly assaults, resists, impedes, or interferes with a law enforcement officer, biologist or other authorized employee in the performance of his or her duties under this Part shall be fined not more than $500, sentenced to jail for a period not to exceed six months and have his or her fishing rights suspended for not more than one hundred eighty days during the fall chinook runs.

12. By adding a new § 250.19 to read as follows:

§ 250.19 Juries.

(a) A jury trial shall be provided upon demand by the defendant in any case in which the court determines, assuming all allegations are proved true, that a jail sentence may be imposed.

(b) A list of eligible jurors shall be developed from the list of eligible Indians.

(c) A jury shall consist of six eligible Indians chosen by the judge pursuant to rules promulgated by the court.

(d) No juror may be seated unless the court concludes beyond a reasonable doubt that he or she is able to render a fair and impartial verdict.

(e) The judge shall instruct the jury in the law governing the case and the jury shall reach a verdict of guilt or innocence as to each count charged.

(f) Verdicts shall be rendered by unanimous vote.

(g) The jury shall return a verdict of guilty if it concludes beyond a reasonable doubt that the defendant committed the offense with which he or she is charged.

(h) Each juror who serves on a jury is entitled to a fee not less than the hourly mimimum wage scale established by 29 U.S.C. § 206(a)(1), and any of its subsequent revisions, plus fifteen cents per mile travel costs. Each juror shall receive the travel allowance and pay for a full day (eight hours) for any portion of a day served.

(25 U.S.C. 2, 9 and 13; Reorganization Plan No. 3 of 1950, 64 Stat. 1262)

Dated: September 1, 1983.

Kenneth L. Smith,

Assistant Secretary—Indian Affairs.

[FR Doc. 83-25384 Filed 9-16-83; 8:45 am]

BILLING CODE 4310-02-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1610

Freedom of Information Act; Schedule of Fees

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its regulations on the availability of records so that its schedule of fees for the search of records will reflect increases in the direct costs incurred by the Commission in responding to requests for records.

EFFECTIVE DATE: October 19, 1983.

FOR FURTHER INFORMATION CONTACT: Anthony J. De Marco, Assistant Legal Counsel, Legal Services, Office of the Legal Counsel, Equal Employment Opportunity Commission, 2401 E Street, NW., Washington, D.C. 20506, (202) 634-6592.

SUPPLEMENTARY INFORMATION: The Equal Employment Opportunity Commission published a notice of proposed rulemaking (48 FR 16837) on April 26, 1983, proposing to amend 29 CFR 1610.15(a). Today's action makes final the amendment of that regulation as proposed in the April 26, 1983 notice. This provision contains a schedule of fees utilized by the Commission for purposes of assessing costs to individuals who seek access to records under the Freedom of Information Act, 5 U.S.C. 552. The present fee schedule has become outdated since it does not reflect increases in direct costs to the Commission for the search for records requested. The higher costs are attributable to increases in the salaries of personnel required to search for records. The last search fee revision occurred in 1978. 43 FR 40223 (Sept. 11, 1978).

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, and Executive Order 12291, the Equal Employment Opportunity Commission certifies that the economic effects of this rule have been carefully analyzed, and that it has been determined that neither a regulatory flexibility analysis nor a regulatory impact analysis is required.

This regulation is published pursuant to the requirements of the Freedom of Information Act, 5 U.S.C. 552(a)(4)(A). This provision is also promulgated in accordance with 31 U.S.C. 438a.

Comments: No comments were received regarding the proposed changes in these regulations.

List of Subjects in 29 CFR Part 1610

Freedom of Information.

PART 1610—AVAILABILITY OF RECORDS

Section 1610.15 of Title 29 of the Code of Federal Regulations is hereby amended so that paragraph (a) will read as follows:

§ 1610.15 Schedule of fees and method of payment for services rendered.

(a) Except as otherwise provided, the following specific fees shall be applicable with respect to services rendered to members of the public under this subpart:

(1) For actual search time by clerical personnel—at the rate of $7.00 per hour.

(2) For actual search time by professional personnel—at the rate of $17.00 per hour.

(3) For copies made by photocopying machine—$.15 per page (maximum of 10 copies).

(4) For attestation of each record as a true copy—$.75 per document.

(5) For certification of each record as a true copy, under the seal of the agency—$1.00.

(6) For each signed statement of negative result of search for record—$1.00.

(7) All other direct costs of search or duplication shall be charged to the requester in the same amount as incurred by the agency.

* * * * *

(31 U.S.C. 9701)

Signed this 13th day of September, 1983.

For the Commission.

Clarence Thomas,

Chairman.

BILLING CODE 6570-06-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[Docket No. AW700DE; A-3-FRL 2430-2]

Standards of Performance for New Stationary Sources; Delegation of Authority to the State of Delaware

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Section 111(c) of the Clean Air Act permits EPA to delegate to the States the authority to implement and enforce the standards set out in 40 CFR Part 60, Standards of Performance for New Stationary Sources (NSPS). On April 20, 1983, the State of Delaware

requested EPA to delegate to it the authority for additional NSPS source categories. EPA granted the request on July 5, 1983. The State now has authority to implement and enforce NSPS for steel plants: electric arc furnaces, storage vessels for petroleum liquids constructed after May 18, 1978, lead acid battery manufacturing plants, automobile and light duty truck surface coating operations, graphic arts industries, and asphalt processing and asphalt roofing manufacture. In addition, Delaware has amended several State NSPS and NESHAP regulatory requirements. These amendments are acceptable to EPA. Applications and reports required under the NSPS which EPA has delegated Delaware authority to implement and enforce should be sent to the State's Department of Natural Resources and Environmental Control rather than to EPA Region III.

EFFECTIVE DATE: July 5, 1983.

ADDRESSES: Applications and reports required under all NSPS source categories which EPA has delegated Delaware authority to implement and enforce should be addressed to the Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover Delaware 19901, rather than to EPA Region III.

FOR FURTHER INFORMATION CONTACT: Daniel Ryan of EPA Region III's Air Management Branch, telephone 215/597-8555.

SUPPLEMENTARY INFORMATION: On April 20, 1983, the State of Delaware requested EPA to delegate to it authority to implement and enforce additional NSPS source categories. Delaware requested these delegations to supplement the delegations for other source categories which the State had already received and of which EPA had published notifications at 43 FR 6771 (1978), 44 FR 70465 (1979), and 46 FR 28402 (1981). In addition, Delaware notified EPA that the State had amended Regulation XX, *New Source Performance Standards*, by including a statement in Section 2—*Standards of Performance for Fuel Burning Equipment*—stating that this section does not apply to certain sources discussed in Section 11—*Standards of Performance for Petroleum Refineries*; by changing Section 4—*Standards of Performance for Storage Vessels for Petroleum Liquids*—by adding to the title the phrase *Constructed before May 18, 1978* to define to what sources the section pertains; and by deleting Section 11, Subsection 60.105(e), which was determined to be in conflict with other regulatory provisions and to be unnecessary. Finally, Delaware notified EPA that the State had revised Regulations XX, *New Source Performance Standards*, and XXI, *Emission Standards for Hazardous Air Pollutants*, by updating all citations to EPA references. EPA has reviewed all of these State regulatory changes and has found them acceptable.

Delegation of the additional standards was made by the following letter on July 5, 1983:

Honorable John E. Wilson III, Secretary,
Delaware Department of Natural Resources and Environmental Control,
89 Kings Highway, P.O. Box 1401, Dover, DE 19901

Dear Mr. Wilson: On September 30, 1977, October 9, 1979, and May 11, 1981, EPA delegated to the State of Delaware the authority to implement and enforce the Standards of Performance for New Stationary Sources (NSPS) for various NSPS source categories. In your letter of April 20, 1983, you requested that EPA delegate to the State of Delaware the authority to implement and enforce the NSPS for the following additional NSPS source categories: steel plants: electric arc furnaces, storage vessels for petroleum liquids constructed after May 18, 1978, lead acid battery manufacturing plants, automobile and light duty truck surface coating operations, graphic arts industries, and asphalt processing and asphalt roofing manufacture. You also requested EPA's approval of Delaware's adoption by reference of new Test Method 107A of Appendix B of 40 CFR, Part 61, promulgated by EPA at 47 FR 39485 on September 8, 1982; of new Quality Assurance Procedures 1 and 2 to 40 CFR, Part 61 and of revisions to Test Methods 106 and 107 of Appendix B to 40 CFR, Part 61, promulgated by EPA at 47 FR 39168 on September 7, 1982, and of revisions to Test Method 20 of Appendix A to 40 CFR, Part 60, promulgated by EPA at 47 FR 30480 on July 14, 1982.

We have reviewed the pertinent laws, rules and regulations of the State of Delaware and have determined that they continue to provide an adequate and effective procedure for implementing and enforcing the NSPS regulations. Therefore, we hereby delegate our authority for the implementation and enforcement of the NSPS regulations listed above to the State of Delaware for all sources located or to be located in Delaware that fall under the requirements of these regulations. We also approve Delaware's adoption by reference of the above test methods and test method revisions.

This NSPS delegation is based upon the following conditions:

1. Quarterly reports which may be combined with other reporting information are to be submitted to EPA Region III, Air Enforcement Section (3AW12) by the Delaware Department of Natural Resources and Environmental Control (DNREC) and should include the following:

(i) Source determined to be applicable during that quarter;

(ii) Applicable sources which started operation during that quarter or which started operation prior to that quarter which have not been previously reported;

(iii) The compliance status of the above, including the summary sheet from the compliance test(s); and

(iv) Any legal actions which pertain to these sources.

2. Enforcement of the NSPS regulations in the State of Delaware will be the primary responsibility of the DNREC. Where DNREC determines that such enforcement is not feasible and so notifies EPA, or where DNREC acts in a manner inconsistent with the terms of this delegation, EPA will exercise its concurrent enforcement authority pursuant to Section 113 of the Clean Air Act, as amended, with respect to sources within the State of Delaware subject to NSPS regulations.

3. Acceptance of this delegation of regulations for the source categories listed above does not commit the State of Delaware to request or accept delegation of other present or future standards and requirements. A new request for delegation will be required for any additional standards or amendments to previously delegated standards.

4. DNREC will not grant a variance from compliance with the applicable NSPS regulations if such variance delays compliance with the Federal Standards. Should DNREC grant such a variance, EPA will consider the source receiving the variance to be in violation of the applicable Federal regulations and may initiate enforcement action against the source pursuant to Section 113 of the Clean Air Act. The grant of such variance by the Agency shall also constitute grounds for revocation of delegation by EPA.

5. DNREC and EPA will develop a system of communication sufficient to guarantee that each office is always fully informed regarding the interpretation of applicable regulations. In instances where there is a conflict between DNREC's interpretation and a Federal interpretation of applicable regulations, the Federal interpretation must be applied if it is more stringent than that of DNREC.

6. If at any time there is a conflict between a DNREC regulation and Federal regulation found at 40 C.F.R. Part 60, the Federal regulation must be applied if it is more stringent than that of DNREC. If DNREC does not have the authority to enforce the more stringent Federal regulation, this portion of the delegation may be revoked.

7. DNREC will utilize the methods specified in 40 CFR Part 60 in performing source tests pursuant to these regulations. However, alternatives to continuous monitoring procedures and requirements may be acceptable upon concurrence by EPA as stipulated in 40 CFR 60.13.

8. If the Director of the Air and Waste Management Division determines that a DNREC program for enforcing or implementing the NSPS regulations is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be

effective as of the date specified in a Notice or Revocation to DNREC.

9. Information shall be made available to the public in accordance with 40 CFR 60.9.

EPA procedures permit delegation of all the Administrator's authorities under 40 CFR Part 60 except for any which require rulemaking in the **Federal Register** to implement or where Federal overview is the only way to ensure national consistency in the application of standards. Accordingly, the following authorities are not delegable under Section 111 of the Clean Air Act, as amended.

1. *Performance Tests, 60.8(b)(2) and 60.8(b)(3).* In order to ensure uniformity and technical quality in the test methods used for enforcement of national standards, EPA will retain the authority to approve alternative and equivalent methods which effectively replace a reference method. This restriction on delegation does not apply to 8(b)(1), which allows for approval of minor modifications to reference methods on a case-by-case basis.

Some subparts include general references to the authority in 60.8(b) to approve alternative or equivalent standards. Examples include, but are not necessarily limited to, §§ 60.11(b), 60.274(d), 60.396(a)(1), 60.396(a)(2), and 60.393(c)(1)(i). These references are reminders of the provisions of paragraphs 60.8 and are not separate authorities which can be delegated.

2. *Compliance with Standards and Maintenance Requirements, § 60.11(e).* The granting of an alternative opacity standard requires a site-specific opacity limit to be adopted under 40 CFR Part 60.

3. *Subpart S, § 60.195(b).* Development of alternative compliance testing schedules for primary aluminum plants is done by adopting site-specific amendments to Subpart S.

4. *Subpart Da, § 60.45a.* Commercial demonstration permits allow an alternative emission standard for a limited number of utility steam generators.

5. *Subpart GG, §§ 60.332(c)(3) and 60.335(a)(ii).* These sections pertain to approval of customized factors (fuel nitrogen content and ambient air conditions, respectively) for use by gas turbine manufacturers in assembly-line compliance testing. Since each approval potentially could affect emissions from equipment installed in a number of States, the decisionmaking must be maintained at the Federal level to ensure national consistency. Notice of approval must be published in the **Federal Register**.

6. *Equivalency Determinations, Section 111(h)(3) of the Clean Air Act.* Approval of alternative to any design, equipment, work practice, or operational standard, e.g., §§ 60.114(a) and 60.302(d)(3) is accomplished through the rulemaking process and is adopted as a change to the individual subpart.

7. *Innovative Technology Waiver, Section 111(j) of the Clean Air Act.* Innovative technology waivers must be adopted as site-specific amendments to the individual subpart. Any applications or questions pertaining to such waivers should be sent to the Director, Air and Waste Management Division, Region III. (States may be delegated the authority to enforce waiver provisions if the State has been delegated the authority to enforce NSPS).

8. *Determination of Construction or Modification (Applicability), § 60.5.* In order to ensure uniformity in making applicability determinations pertaining to sources, EPA will retain this authority. The delegated agency may exercise judgement based on the *Compendium of Applicability Determinations* issued by EPA annually, and updated quarterly. Any applicability determinations not explicitly treated in the EPA Compendium must be referred to EPA for a determination. Also, any determinations made by the State agency based on the Compendium must be sent to EPA for informational purposes in order for EPA to maintain national consistency.

A Notice announcing this delegation will be published in the **Federal Register** in the near future. The Notice will state, among other things, that effective immediately, all reports required pursuant to the above-enumerated Federal NSPS regulations by sources located in the State of Delaware should be submitted to the Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, Dover, DE 19901, in addition to EPA Region III. Any original reports which have been or may be received by EPA Region III will be promptly transmitted to DNREC.

Since this delegation is effective immediately, there is no requirement that DNREC notify EPA of its acceptance. Unless EPA receives from DNREC written notice of objections within ten (10) days of receipt of this letter, DNREC will be deemed to have accepted all of the terms of the delegation.

Sincerely Yours,

Stanley L. Laskowski,

Acting Regional Administrator.

Effective immediately, all applications, reports, and other correspondence required under the NSPS for steel plants: electric arc furnaces (Subpart AA), storage vessels for petroleum liquids constructed after May 18, 1978 (Subpart Ka), lead acid battery manufacturing plants (Subpart KK), automobile and light duty truck surface coating operations (Subpart MM), graphic arts industries (Subpart QQ), and asphalt processing and asphalt roofing manufacture (Subpart UU) should be sent to the Delaware Department of Natural Resources and Environmental Control (address above) rather than to the EPA Region III Office in Philadelphia.

(Sec. 111(c), Clean Air Act (42 U.S.C. 7411(c))

Dated: August 23, 1983.

Thomas P. Eichler,

Regional Administrator.

PART 60—[AMENDED]

Accordingly, Part 60 of 40 CFR Chapter I is amended as follows:

Section 60.4(b)(I) is amended by revising the address of the Delaware Department of Natural Resources and Environmental Control as follows:

§ 60.4 Address.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 5-10

[APD 2800.2 Chge. 33]

Bonds and Insurance

AGENCY: General Services Administration.

ACTION: Final rule

SUMMARY: The General Services Administration Procurement Regulations, Chapter 5, are amended to eliminate the requirement for use of bid guarantees on construction contracts awarded to the Small Business Administration (SBA) under the Section 8(a) program, to permit the use of payment bonds on building service contracts, to provide additional guidance on determining the acceptability of bonds, and to establish a mechanism for excluding individuals under certain circumstances from acting as an individual surety on bonds and submitted by offerors on GSA procurements. In addition, obsolete material referring to SBA's authority to waive bonding requirements on Section 8(a) contracts is deleted and material referring to the recently enacted Pub. L. 98-47 of July 13, 1983, is substituted.

EFFECTIVE DATE: September 7, 1983.

FOR FURTHER INFORMATION CONTACT: Richard H. Hopf, Director, Office of GSA Acquisition Policy and Regulations, (202-566-1224).

List of Subjects in 41 CFR Part 5-10

Bonds and insurance and Government procurement.

PART 5-10—BONDS AND INSURANCE

1. The table of contents of Part 5-10 is amended by adding the following new entries:

Sec.

5-10.103-3 Invitation for bids provision.

5-10.201 General.

5-10.203 Individual sureties.

5-10.250 Acceptability of bonds and sureties.

5-10.251 Exclusion of individual sureties.

Authority: Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).

2. The table of contents of Part 5–10 is amended by revising the entries for §§ 5–10.104–2 and 5–10.105–2 as follows:

Sec.

5–10.104–2 Other than construction contracts.

5–10.105–2 Other than construction contracts.

3. The table of contents of Part 5–10 is amended by removing the entry for § 5–10.151 in its entirety.

4. Section 5–10.103 is amended to remove the text, but retain the section heading to read as follows:

§ 5–10.103 Bid guarantees.

5. In § 5–10.103–1 paragraph (a) is revised to read as follows:

§ 5–10.103–1 Policy on use.

(a) *Construction contracts.* (1) bid guarantees shall be required for all construction contracts exceeding $25,000 when performance and payment bonds are required under the Miller Act, as amended, except that this requirement does not apply to contracts awarded under Section 8(a) of the Small Business Act. Refer to § 1–1.713–4 (g) and (h) for guidance on bonding requirements applicable to contracts to be awarded under the section 8(a) program.

(2) Bid guarantees shall be required for construction contracts which do not exceed $25,000 when it has been determined that a performance bond is essential to protect the Government as provided in § 5–10.104–1.

* * * * *

6. Section 5–10.103–2 is revised to read as follows:

§ 5–10.103–2 Amount required.

When a bid guarantee is required, the contracting officer shall determine in accordance with § 1–10.103–2 the amount, or percentage which when applied to the bid price will produce an amount that will be adequate to protect the Government from loss.

7. Section 5–10.103–3 is added to read as follows:

§ 5–10.103–3 Invitation for bids provision.

When a bid guarantee is required, a provision shall be included in the solicitation that clearly sets forth the amount of bid guarantee to be furnished. Solicitation provisions are prescribed in § 5–10.150 for this purpose.

8. Sections 5–10.104–1 and 5–10.104–2 are revised to read as follows:

§ 5–10.104–1 Construction contracts.

(a) Performance bonds as required by the Miller Act (40 U.S.C. 270a–270e), shall be provided in connection with all construction contracts that exceed $25,000, in accordance with § 1–10.104–1. This requirement is applicable to contracts awarded under Section 8(a) of the Small Business Act unless the bonding requirement has been waived by SBA pursuant to Section 8(a)(2) of the Small Business Act as amended by Pub. L. 98–47 of July 13, 1983.)

(b) Performance bonds may be required on a case-by-case basis for construction contracts which do not exceed $25,000 when it is determined in writing by the contracting officer and reviewed at a level above the contracting officer that such a requirement is in the best interest of the Government.

(c) Refer to § 1–10.104–1(b) for guidance on establishing the penal amount of the performance bond.

(d) The requirement for furnishing a performance bond shall be set forth in the Special Conditions of the solicitation document as prescribed in § 5–10.150(a).

§ 5–10.104–2 Other than construction contracts.

(a) Performance bonds shall not be required for other than construction contracts unless it is in the best interest of the Government. (See § 1–10.104–2.)

(b) Performance bonds may be required on a case-by-case basis for building service contracts in excess of $10,000, when it is determined in writing by the contracting officer and reviewed at a level above the contracting officer that it is essential to the best interest of the Government.

(c) Performance bonds shall not be required for building service contracts awarded under Section 8(a) of the Small Business Act, or contracts awarded to workshops for the blind or other severely handicapped under the Wagner O'Day Act.

(d) The penal amount of the performance bond generally shall be equal to from 10 to 50 percent of the contract price for the term of the contract at the time of the award. The contracting officer shall consider the circumstances and determine the amount of the performance bond on a case-by-case basis.

(e) The requirement for furnishing a performance bond shall be set forth in the solicitation document as prescribed in § 5–10.150(b)(2).

9. Sections 5–10.105–1 and 5–10.105–2 are revised as read as follows:

§ 5–10.105–1 Construction contracts.

(a) A payment bond shall be required, as provided by the Miller Act in connection with any construction contract exceeding $25,000, except as provided in § 1–10.105–1. This requirement is applicable to contracts awarded under Section 8(a) of the Small Business Act unless the bonding requirement has been waived by SBA pursuant to Section 8(a)(2) of the Small Business Act as amended by Pub. L. 98–47 of July 13, 1983. Payment bonds may be required on a case-by-case basis for construction contracts which do not exceed $25,000 when it is determined in writing by the contracting officer and reviewed at a level above the contracting officer that such a requirement is in the best interest of the Government.

(b) Refer to § 1–10.105–1(b) for guidance on establishing the penal amount of the payment bond.

(c) The requirement for furnishing a payment bond shall be set forth in the Special Conditions of the solicitation document as prescribed in § 5–10.150(a).

§ 5–10.105–2 Other than construction contracts.

(a) Payment bonds may be required for building service contracts when the head of the procuring activity determines in accordance with § 1–10.105–2 that such a requirement is in the best interest of the Government.

(b) The penal amount of the payment bond generally shall be equal to from 10 to 50 percent of the contract price for the term of the contract at the time of award. The contracting officer shall consider the circumstances and determine the amount of the payment bond on a case-by-case basis.

(c) The requirement for furnishing a payment bond shall be set forth in the solicitation document as prescribed in § 5–10.150(b)(3).

10. Section 5–10.109 is revised to read as follows:

§ 5–10.109 Execution and administration of bonds.

(a) Bid guarantees, other than corporate or individual sureties, shall be returned to unsuccessful offerors as soon as practicable after the opening of bids.

(b) A bid guarantee, other than corporate or individual sureties, submitted by a successful offeror shall be retained until the offeror has executed all contractual documents as may be required and has submitted an acceptable performance bond or performance and payment bonds if required.

(c) When a performance or payment bond or acceptable alternates are not furnished within the period specified by the terms of the contract, the contract may be terminated for default. (See

§§ 1–8.602–3, 1–10.103–3(a)(2) and 1–18.803–5.)

(d) In connection with any contract modification that alters the scope of work, the contracting officer shall obtain from the surety a consent statement whereby the surety agrees to be bound by the contract modification and agrees that its bond shall apply to the contract as modified. See GSPR 5–10.205. This is necessary to avoid effecting release of the surety from its obligations based upon the change of the contract scope.

(e) A surety is legally liable in the event the contractor fails to fulfill contractual obligations. To avoid the possibility of releasing a surety from liability for a contractor's default, it is necessary to furnish the surety with a copy of any notice sent to the contractor in addition to the default letter. When the Government terminates a contract for default, it is entitled to recover the excess costs involved in having the work completed except those administrative costs which are necessary for, and directly assignable to, completing the work following termination and which would not have been required had termination not been necessary. The surety must be advised of the default; it may elect to fulfill its obligations by obtaining another contractor to perform the balance of the contract work or it may reimburse the Government for any excess costs the Government incurs.

(f) A performance or payment guarantee, other than corporate or individual sureties, shall be returned to the contractor upon completing the obligations for which the guarantee was submitted.

11. In § 5–10.150, paragraphs (b)(1) and (3) are revised to read as follows:

§ 5–10.150 Solicitation provisions.

* * * * *

(b) *Other than construction contracts.* (1) When a bid guarantee is required under § 5–10.103–3, a provision substantially as follows shall be included on the solicitation along with the provision in § 1–10.103(a)(2).

Bid Guarantee

If the contract price is more than $10,000, bidders shall furnish a bid guarantee in a penal amount of —— percent of the bid price for the term of the contract (excluding options to extend the term of the contract, if any) or $3,000,000, whichever is less.

For bid guarantee purposes the amount of the bid shall be deemed to be the aggregate of each unit price bid multiplied by the applicable number of units shown on the bid form or in the method of award formula.

(End of Provision)

* * * * *

(3) When a contract requires a performance bond and a payment bond, a provision substantially as follows shall be included in the solicitation document in lieu of the provision contained in paragraph (2) of this subsection:

Performance and Payment Bonds

(a) The offeror to whom the award is made shall furnish a performance bond in an amount equal to —— percent of the contract price and a payment bond in an amount equal to —— percent of the contract price. As used herein the term "contract price" means the total amount of the contract for the term of the contract (excluding options to extend the term of the contract, if any). Bonds shall be provided within 15 calendar days after receiving the written award (or acceptance of offer) and bonding forms. The period of time for furnishing bonds may be extended for 10 calendar days, if fully justified in the opinion of the contracting officer, and if the request for the extension is received or confirmed in writing within the original 15 calendar day period.

(b) The performance and payment bonds shall be in the form of a firm commitment, supported by corporate sureties whose names appear on the list contained in Treasury Department Circular 570, individual sureties, or by other acceptable security such as postal money order, certified check, cashiers check, irrevocable letter of credit or, in accordance with Treasury Department regulations, certain bonds or notes of the United States.

(End of Provision)

§ 5–10.151 [Removed]

12. Section 5–10.151 is removed in its entirety.

13. Section 5–10.202 is revised and new §§ 5–10.201 and 5–10.203 are added, to read as follows:

§ 5–10.201 General.

This subpart supplements Subpart 1–10.2, Sureties on Bonds, and sets forth additional guidance on the requirements applicable to bonds furnished.

§ 5–10.202 Corporate sureties.

(a) Any corporate surety offered for a bond furnished the Government must appear on the list contained in the Department of Treasury Circular 570, entitled Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies. If the penal amount of a bond exceeds a surety's underwriting limit, as specified in Treasury Department Circular 570, the bond will be acceptable only under the conditions prescribed by § 1–10.202.

(b) Corporate surety bonds must be manually signed by the Attorney-in-Fact or officer of the surety company. The corporate seal of the surety company should be affixed. Failure of the surety to affix the seal may be waived as a minor informality. (See 75–2 CPD 9.) Copies of the powers of attorney from the surety company authorizing the Attorney-in-Fact to execute bonds may be requested by the contracting officer.

(c) Where a invitation for bid requires a bid be supported by a bid guarantee and an unacceptable corporate surety is submitted in fulfillment of the requirement, the bid shall be rejected as nonresponsive. A bidder shall not be permitted to substitute an acceptable surety after bid opening. (See 80–1 CPD 360.)

(d) Where a request for proposal requires a proposal be supported by a bid guarantee and an offeror does not comply, the proposal shall not be rejected since nonresponsiveness is not a criterion for negotiated procurements. During negotiations, deficiencies in a proposal in the competitive range, such as the failure to submit a bid guarantee, may be remedied by the offeror in a revised proposal. (See § 1–3.805.)

(e) A contractor submitting an unacceptable corporate surety in satisfaction of a performance or payment bond requirement may be permitted to substitute an acceptable surety for a surety previously determined to be unacceptable.

§ 5–10.203 Individual sureties.

(a) The contracting officer is responsible for making determinations regarding the acceptability of individual sureties.

(b) The following criteria shall be considered when making determinations regarding the acceptability of individual sureties:

(1) At least two individuals must execute the bond.

(2) The net worth of each individual must not be less than the penal amount of the bond. For example: If a bond in a penal amount of $50,000 is required, each individual surety must show a net worth of at least $50,000 to be considered acceptable.

(3) Each individual surety must execute a Standard Form 28, Affidavit of Individual Surety. If the SF 28 is not submitted with the offer, the contracting officer must request a SF 28. The SF 28 shall be reviewed to ascertain the net worth of the proposed individual surety. (See Block 7, line g, of SF 28.) However, the contracting officer should consider all relevant information furnished by the surety on SF 28 and make an independent determination of the surety's net worth based upon the contracting officer's best judgment.

(4) The number and amount of other bonds for which the surety is committed and the status of the contracts with

which the bonds were furnished must be considered. For example: the contracting officer may deduct the total amount of other bonds which the surety executed (Block 10 of SF 28) from the net worth figure entered in Block 7, line g, to arrive at a realistic net worth. Alternatively, the contracting officer may deduct nothing or only a portion of the amount entered in Block 10 if, upon inquiry, the contracting officer discovers that the contracts on which the bonds were written are completed in part.

(c) If the contracting officer is unable to make a determination of net worth from the SF 28, the individual surety shall be required to furnish additional information. Generally, supplementary information shall not be required unless the SF 28 is incomplete or improperly filled out or unless the contracting officer has reason to believe the surety's statement on the SF 28 does not reflect the true net worth.

(d) If the contracting officer determines that either surety's net worth is not equal to the penal amount of the bond, the bid of the firm utilizing the sureties shall be rejected as non-responsible. A finding of bidder nonresponsibility pursuant to § 1-1.1204, based on unacceptability of an individual surety need not be referred to the Small Business Administration for a competency review. (See Comp. Gen. B-203608 of June 15, 1982.)

(e) Under certain circumstances, such as when there is a record indicating a continuing pattern among certain individual sureties not to disclose outstanding bond obligations, the offeror's sureties may be rejected as unacceptable. (See Comp. Gen. B-205823, B-205843, B-206469 of Sept. 5, 1982.)

(f) In a formally advertised procurement (including restricted advertising) an offeror submitting an unacceptable surety in fulfillment of a bid guarantee may not substitute an acceptable individual surety after the bid opening is held. This holds even though the surety's acceptability is a matter of bidder responsibility. (See Comp. Gen. B-203608 of June 15, 1982.) When a negotiated procurement is involved, such a deficiency may be remedied by the offeror in a revised proposal.

(g) Any individual surety offered for a bond furnished GSA cannot have been excluded from acting as an individual surety by the Assistant Administrator for Acquisition Policy. (See § 5-10.251.) Any bid submitted in response to an invitation for bid which is accompanied by a bid guarantee backed by an individual surety who has been excluded shall be rejected as nonresponsive. When a negotiated procurement is involved, such a deficiency may be remedied by the offeror in a revised proposal.

(h) A contractor submitting an unacceptable individual surety in satisfaction of a performance or payment bond requirement may be permitted to substitute an acceptable surety for a surety previously determined to be unacceptable.

14. Sections 5-10.250 and 5-10.251 are added to read as follows:

§ 5-10.250 Acceptability of bonds and sureties.

(a) Every bond furnished in connection with a procurement must be supported by corporate or individual sureties or by other acceptable security such as postal money orders, certified check, cashier's check, irrevocable letter of credit or, in accordance with Treasury Department regulations, certain bonds or notes of the United States. Upon receipt of a required bond, the contracting officer shall ascertain the acceptability of the surety.

(b) When determining the acceptability of a bond, if there is a question of validity, the contracting officer shall seek the advice of legal counsel. For questions other than validity, the contracting officer may seek the advice of the appropriate credit and finance activity in determining acceptability.

(c) When a contracting officer has verified the acceptability of the surety on a bond, he shall so certify by placing the words Acceptability of Bond Verified, with his signature immediately thereunder, on the bond or on a properly indentified attachment. The bond shall be retained with the original of the contract. The contracting officer shall notify the contractor that the bond(s) has been accepted.

(d) Any contracting officer who becomes aware of circumstances which may serve as the basis for exclusion of an individual from acting as an individual surety on bonds submitted by offerors on GSA procurements shall refer those circumstances to the Assistant Administrator for Acquisition Policy through appropriate channels for consideration of exclusion action. (See § 5-10.251.) However, circumstances that involve possible criminal or fraudulent activities shall first be reported to the Assistant Inspector General for Investigations in the Central Office or to the appropriate special agent in charge in the regions; the Office of Inspector General may conduct an investigation and when appropriate report such apparent or suspected violations to the Assistant Administrator. Referrals for consideration of exclusion action as a minimum should include:

(1) The basis for exclusion (see § 5-10.251(b));

(2) A statement of facts;

(3) Copies of supporting documentary evidence;

(4) The individual's name and current or last known home and/or business address including zip codes;

(5) A statement of GSA's history with such individuals, if any; and

(6) A statement concerning any known active or potential criminal investigations or court proceedings.

§ 5-10.251 Exclusion of individual sureties.

(a) The Assistant Administrator for Acquisition Policy may exclude an individual from acting as an individual surety on bonds submitted by offerors on GSA procurements. Such an exclusion shall be initiated for the purpose of protecting the Government.

(b) An individual may be excluded for any of the following causes:

(1) Failure to fulfill its obligation under a bond.

(2) Willful failure to disclose other bond obligations.

(3) Misrepresentation of available assets.

(4) Any other cause affecting responsibility as a surety of such serious and compelling nature as may be determined by the Assistant Administrator to warrant exclusion.

(c) Exclusion of an individual shall continue until revoked by the Assistant Administrator. An exclusion shall only be revoked upon the submission of an application, support by documentary evidence of changed circumstances or of the elimination of the causes for which the exclusion was imposed.

(d) Prior to excluding an individual, the Assistant Administrator shall furnish the individual with a written notice stating that exclusion is being considered, setting forth the reasons for the proposed exclusion, and indicating that the individual may submit, within 30 calendar days, information in writing to explain why the exclusion should not be imposed.

(e) If the individual fails to respond to the notice of proposed exclusion outlined in (d) of this section within 30 calendar days of receipt of the notice, the exclusion shall be imposed. If a response is provided, the Assistant Administrator shall consider the information and issue a final decision on the matter.

(f) The Assistant Administrator shall be responsible for establishing and maintaining a system for distribution of information regarding individuals who have been excluded to GSA contracting activities.

Dated: September 7, 1983.

William B. Ferguson,

Acting Assistant Administrator for Acquisition Policy.

[FR Doc. 83-25364 Filed 9-16-83; 8:45 am]

BILLING CODE 6820-61-M

41 CFR Part 105-61

[GSA Order ADM 7900.2 CHGE. 19]

Public Use of Facilities of the National Archives and Records Service

AGENCY: National Archives and Records Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation revises procedures relating to the public use of auditoriums and other public spaces in the buildings and grounds of Presidential libraries operated by the National Archives and Records Service. Presidential libraries are not subject to the provisions of the Public Buildings Cooperative Use Act of 1976 (40 U.S.C. 610a). Therefore, this regulation is intended to clarify those activities considered appropriate for use of public facilities in the Presidential libraries. This regulation affects organizations and groups that wish to use these facilities for lectures, seminars, meetings, and similar activities that relate to the mission and programs of the library.

EFFECTIVE DATE: September 19, 1983.

FOR FURTHER INFORMATION CONTACT: David S. Van Tassel, Office of Presidential Libraries (202-523-3212).

SUPPLEMENTARY INFORMATION:

List of Subjects in 41 CFR Part 106-61

Archives and records, Classified information, Freedom of information, Government property management, Privacy, Facilities, Presidential libraries.

1. The table of contents for Part 105-61 is amended by revising the entry for § 105-61.305-2 to read as follows:

Sec.

105-61.305-2 Auditoriums and other public spaces.

Subpart 105-61.3—Public Use of Facilities of the National Archives and Records Service

2. Section 105-61.305-2 is revised to read as follows:

§ 105-61.305-2 Auditoriums and other public spaces

(a) Presidential library auditoriums and other public spaces in the library buildings and the library grounds are intended primarily for the use of the library in carrying out its programs. These areas may also be used by other organizations for lectures, seminars, meetings, and similar activities when these activities are sponsored, cosponsored, or authorized by the Library director to further the library's interests and when such activities will not interfere with the normal operation of the library. Any activities, sponsored, cosponsored, or authorized by the library must be related to the mission and programs of the library and must be consistent with the public perception of the library as a research and cultural institution. Application for such use shall be made in writing to the library director.

(b) Use of the auditoriums and other public spaces will not be authorized for any profitmaking, commercial advertising and sales, sectarian, or similar purpose or for any use inconsistent with those authorized in paragraph (a) of this section.

(c) No admission fee will be charged except by the library, no indirect assessment fees will be made for admission, and no collections will be taken. The library director may assess additional charges to reimburse the Government for expenses incurred as a result of the use by groups of library facilities.

3. Section 105-61.305-3 is revised to read as follows:

§ 105-61.305-3 Supplemental rules.

Library directors may establish appropriate supplemental rules governing use of Presidential libraries and adjacent buildings. Additional conditions for the use of Presidential libraries set out in Subpart 101-20.3 (except those provisions referring to Subpart 101-20.7) are hereby adopted and incorporated by reference.

(Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)))

Dated: August 26, 1983.

Ray Kline,

Acting Administrator of General Services.

[PR Docket No. 82-184; RM-3624; RM-3028]

Provision for a Temporary Permit for Additional Users of Authorized Mobile Relay Stations in the General Mobile Radio Service; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects a paragraph designation in § 1.925 of the Commission's Rules. The erroneous paragraph designation occurred in the final rules adopted in PR Docket 82-184 on January 20, 1983 (48 FR 4783, February 3, 1983.) That proceeding established a new Temporary Permit for General Mobile Radio Service Systems.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Maurice J. DePont, Private Radio Bureau, Washington, D.C. 20554, 9202) 632-4964.

Erratum

In the matter of amendment of Part 1 Subpart A, of the Commission's Rules to provide for a Temporary Permit for additional users of authorized mobile relay stations in the General Mobile Radio Service (GMRS) PR Docket 82-184; RM-3624, RM-3028.

Released: August 24, 1983.

PART 1—[AMENDED]

§ 1.925 [Corrected]

The Report and Order, adopted January 20, 1983, in this proceeding, added a new paragraph to § 1.925 of the Commission's Rules. Inadvertently, the new paragraph was designated as paragraph (h). The correct designation for the new paragraph added to § 1.925 is paragraph (i).

[PR Docket No. 82-11]

Acceptable Level of Radiated Power on 500 kHz for Compulsory Telegraph Vessels

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This item amends the FCC's marine rules to require a minimum radiated power on the distress frequency 500 kHz for compulsory fitted radio telegraph vessels. Measurements indicate a progressive decline in radiated power aboard large oceangoing vessels. This action sets a minimum acceptable level of radiated power for the purpose of meeting the statutory transmission distance specified in the Communication Act.

EFFECTIVE DATE: October 14, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Walter E. Weaver, Private Radio Bureau, (202) 632-7175.

Ship stations, Telegraph, Radio.

Report and Order (Proceeding Terminated)

In the matter of amendment of Part 83 of the rules to require compulsory telegraph vessels to be capable of generating a specified minimum field strength at a distance of one nautical mile. (PR Docket No. 83-11).

Adopted: August 31, 1983.
Released: September 7, 1983.

By the Commission.

1. On January 27, 1983, the Commission released a Notice of Proposed Rule Making (FCC 83-6, 48 FR 4847) looking to amendment of Part 83 to require compulsory telegraph vessels to be capable of generating a specified minimum field strength on the international distress and calling frequency, 500 kHz. The time provided for comments and reply comments has passed.

Background

2. Public Law No. 97 was approved May 20, 1937, to add to Title III of the Communications Act of 1934 (Act), as amended, a new Part II entitled "Radio Equipment and Radio Operators on Board Ship." Part II [1] includes Section 355(e), which reads:

"(e) The main and reserve installations shall, when connected to the main antenna, have a minimum normal range of two hundred nautical miles and one hundred nautical miles, respectively; that is, they must be capable of transmitting and receiving clearly perceptible signals from ship to ship by day and under normal conditions and circumstances over the specified ranges."

3. On May 31, 1938, the Commission ordered [2] an investigation into the facts, circumstances and conditions affecting the determination of power required for ship radio transmitters in order to comply with the terms of paragraph (d) of Section 354 of the Act. A hearing, commonly referred to as the "Ship Power Hearing", was held November 14 through 18, 1938. The Report and Order [3] in this proceeding was adopted May 19, 1939 [5] and a further Order [4] in the same proceeding was adopted July 26, 1939.

4. On June 27, 1978, the Commission released a Notice of Proposed Rule Making [6] (Gen. Doc. No. 78-185) proposing to amend Part 83 to require all compulsory telegraph vessels to be capable of generating a field strength of 30 mv/m at a distance of one nautical mile for the main installation on 500 kHz, and a field strength of 10 millivolts per meter at one nautical mile for the reserve installation.

5. The Report and Order [7] in Gen. Doc. No. 78-185 explained the procedure by which the values of field strength for the main and reserve installation were developed. It responded to the comments filed and terminated the proceeding without decision, in order that additional information could be obtained regarding antennas currently installed aboard U.S. vessels. The Appendix to that Report and Order is a Public Notice expressing the Commission's intent to continue its consideration of this matter.

6. The additional measurement of U.S. shipboard installations was completed and the results were summarized in the Notice of Proposed Rule Making. Briefly, of the 32 vessels measured, only five vessels, all of which were fitted with long wire antennas, provided a field strength of 30 millivolts per meter at a distance of one nautical mile.

Problem

7. The problem was explained in paragraph 4 of the Notice of Proposed Rule Making, as follows:

> Over the past forty years most of the considerations leading to the established values have remained constant. The one exception is antenna efficiencies. During this period, with the swing first to singlewire antennas and then to vertical antennas there has been a progressive decline in the efficiency of antennas aboard the larger oceangoing vessels. This has continued to the point where the use of 200 and 25 watt transmitters in conjunction with presently used vertical and some longwire antennas no longer assures a field strength of 30 mv/m and 10 mv/m at a distance of one nautical mile.

Comments

8. Comments were filed by the American Institute of Merchant Shipping (AIMS), W. N. Nations and Associates (Nations), and the Radio Officers Union, District 3 of the National Marine Engineers Beneficial Association, AFL/CIO (the Union). Reply comments were filed by the Union. In its comments AIMS opposed adoption of the proposed rule; Nations and the Union supported adoption of the proposed rules; and the Union urged the period proposed for implementation be substantially reduced.

Proposed Rules for Assuring Transmission Distance

9. AIMS contends that the proposed field strength standard "offers a minimal return on a cost effective contribution to safety * * * " AIMS points to the fact that the world is now in the process of developing the Future Global Maritime Distress and Safety Systems (future distress plan). This future distress plan, according to AIMS, will replace the "outmoded" telegraphy-based safety system with "superior methods of distress calling by satellite or terrestrial communications." AIMS points out that introduction of the future distress plan on a mandatory basis is projected for

[1] The text quoted is as it was amended by Pub. L. 89-121, approved August 13, 1965 79 Stat. 516. The original text (as it appears in Pub. L. No. 97) in Sections 354(d) and (f), read as follows:

"(d) The main installation shall have a normal transmitting and receiving range of at least two hundred nautical miles, that is to say, it must be capable of transmitting and receiving clearly perceptible signals from ship to ship over a range of at least two hundred nautical miles by day under normal conditions and circumstances."

"(f) . . . For the emergency or reserve installation, the normal range as defined in subsection (d) of this section shall be at least one hundred nautical miles."

[2] In Docket No. 5212.

[3] 7 FCC 354, adopted May 19, 1939.

[4] 7 FCC 365, adopted July 26, 1939.

[5] The proceeding in Docket No. 5212 determined: (1) That a field strength of 82.5 microvolts per meter at a distance of 200 nautical miles represented a "clearly perceptible signal"; (2) That this field strength (82.5 uv/m) corresponded to a field strength of 30 millivolts per meter at one nautical mile; and (3) That a transmitter of 200 watts, using a median value of efficiency (16.3%) of shipboard antennas then existing, would produce a field strength of 82.5 microvolts per meter at 200 nautical miles. Further, for the reserve installation, (4) A field strength of 10 mv/m at one nautical mile would provide a "clearly perceptible signal" at 100 nautical miles; and (5) That a reserve transmitter of 25 watts, with an antenna efficiency of 16.3%, would produce a field strength of 10 mv/m at one nautical mile.

[6] Released June 27, 1981; FCC 78-435; 43 FR 28640.

[7] Released March 24, 1978; FCC 81-96; 46 FR 19007; 85 FCC 2d 686.

the year 1990; and on a voluntary basis for 1987. Thus, AIMS concludes, it would be inconsistent for the Commission to require implementation of the field strength standard at the time when the industry is beginning to fit with new equipment to implement the future distress plan.

10. The Union acknowledges the future distress plan, but vigorously disputes predictions of its early implementation. It points to the delays which are inherent in implementation of any worldwide system and to the fact that there will be considerable overlap of the two systems while the transition takes place. The Union contends that it cannot abide a continuing condition of reduced ability to transmit a distress signal the required distance and urges, in fact, that the Commission substantially shorten the implementation period.

Discussion

11. Our obligation is to implement the Communications Act, Section 335(e). Having concluded that a transmitter power standard is insufficient to assure the statutory transmission distances, we do not have the discretion to continue that standard in effect pending future developments which are uncertain and years off, at best.

12. AIMS contends that adoption of the field-strength standard would be tantamount to ordering replacement of transmitters and antenna feed lines aboard its members' vessels. AIMS points out that the radio installation aboard the cargo vessel "Star of Texas," which we cited as an example of an acceptable installation under the field-strength standard, features an impedance which is not the industry norm. Thus, AIMS argues, shipowners will be required to undertake costly replacement of existing transmitters and antenna feed systems in order to comply with the proposed standard.

13. The Union argues in reply that impedance matching technology is readily available and inexpensive. Commenter Nations, a maritime telecommunication consultant, agrees with AIMS that considerable modification may be necessary to duplicate the "Star of Texas" system but points out that the Antenna Engineering Department of Collins Government Telecommunciations Division of Rockwell International has developed an HF/MF Vertical Ship Antenna for the U.S. Department of Commerce, Maritime Administration (MARAD). The antenna, Collins Type 938G–1, was specifically designed to provide a 30 millivolt per meter (mv/m) field strength at a distance of one nautical mile. Performance tests have shown that this antenna will deliver [8] that field strength in most directions when a 200 watt transmitter is used. When a 350 watt transmitter is used, the antenna will deliver the 30 mv/m in all directions. Nations calculates that more than 90% of U.S. vessels are presently fitted with transmitters of more than 350 watts.

14. We conclude that switching to the field-strength standard would not involve wholesale replacement of the telecommunication equipment aboard U.S. vessels. As we pointed out when we began this proceeding, we believe that most of the present vertical antenna installations will meet the standard if the feed system is efficient. Some modification and equipment replacement may be required to be sure, but these costs are outweighed by the improvement in safety conditions which will result.

Certification

15. In paragraph 13 of the Notice of Proposed Rule Making we stated that we would consider comments in regard to a program of self-certification as an alternative method (to measurement by the Commission) by which a vessel may demonstrate that its radio installation transmits a clearly perceptible signal the required distances.

16. A self-certification proposal was submitted by AIMS. AIMS points out that, by law, vessels must communicate with a coast station 24 hours prior to arrival in port and log the communication. AIMS suggests that the FCC use the log as a basis for determining compliance with Section 355(e) of the Act. We are concerned, however, that the 500 kHz distress system is a ship-to-ship alerting system. The statutory transmission distances are between ships, not between a ship and a coast station. Coast stations may have much more elaborate and higher gain antenna facilities than ship stations. Any self certification procedure involving transmissions between a ship station and a coast station will not provide a valid basis for assuring compliance with Section 355(e) of the Act.

17. In their comments, Nations and the Union oppose the concept of self-certification by communication from ship to ship on the basis that the conditions would be different in each case. Further, such communications, if carried out on 500 kHz, could intensify congestion in areas which are now heavily congested and would degrade the usefulness of 500 kHz for distress

[8] The average value of field strength was greater than 30 mv/m.

communications. Nevertheless, there is no more valid proof of a vessel's communications range than actual tests at sea. Thus we will permit a vessel to evidence that it meets the standard by producing documentation of actual communication with another vessel over the required distance. Alternatively, we will accept a certification from a professional engineer as evidence that the vessel's communications system produces the field strength specified in the new rules.

Implementation Period

18. The Union after arguing in favor of the proposed rules, argues for an implementation period of the less than three years. The Union expresses the view that the issue of human safety is most important and demands immediate attention. Based on the Commission's tests, the Union calculates that distress signals from 474 of the 559 U.S. deep-draft oceangoing vessels would not be heard at normal ranges. The Union expresses alarm at the Commission's proposal to allow three years to modify current installations. AIMS opposed the proposed rules and did not separately discuss the length of any implementation period.

19. The three year period which we had proposed for implementation was intended to be a reasonable length of time to allow for sailing schedules, delivery time for parts and equipment and installation time. While the Union's safety concerns are sufficient to persuade us to adopt the new rules, they provide little aid in determining what a reasonable length of time may be for their implementation. Accordingly, we consider that three years is reasonable and sufficient time for whatever retrofitting may be necessary under the new standard. We fully expect, however, that vessel operators will utilize the first opportunity to bring their vessels into compliance, and that all subject vessels will be in compliance with the new rules at the end of this implementation period.

Conclusion

20. We conclude that the amendments proposed in the Notice of Proposed Rule Making, modified for the reasons discussed herein, to require compulsory telegraph vessels to be capable of generating a specified minimum field strength, would be in the public interest. Further, these rule amendments are necessary in order that the Commission may comply with the mandate under the provisions of Section 355(e) of the Act.

21. We have determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this proposed rule making proceeding because the only vessels affected are large oceangoing vessels compelled by law to be fitted with radiotelegraph equipment meeting certain specified standards. The operation of a single such vessel typically runs into millions of dollars per year. Therefore, if promulgated, it will not have a significant impact on a substantial number of small entities.

22. Regarding questions on matters concerned in this document contact Walter E. Weaver (202) 632–7175.

23. Accordingly, it is ordered, that under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), the Commission's rules are amended as set forth in the attached Appendix, effective October 14, 1983.

24. It is further ordered, that this proceeding is terminated.

25. It is further ordered, that a copy of this Report and Order shall be sent to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

§ 83.441 [Amended]

1. Section 83.441 is amended by adding the following sentence at the end of paragraph (a):

§ 83.441 Inspection station.

(a) * * *

The minimum field strength capability of the main antenna (§ 83.444(a)) and of the reserve antenna (§ 83.446(a)(2)) may be evidenced by the licensee by either (1) Producing a record of communications on 500 kHz over a minimum distance of 200 nauttical miles for the main antenna and 100 nautical miles for the reserve antenna which demonstrates the transmission and reception of clearly perceptible signals from ship to ship by day and under normal conditions and circumstances, or (2) Providing documentation by a professional engineer not affiliated with the licensee or its service company that the installation produces at one natuical mile a minimum field strength of thirty (30) millivolts per meter for the main antenna and ten (10) millivolts per meter for the reserve antenna.

* * * * *

2. Section 83.444(a) is amended by revising the first sentence as follows:

§ 83.444 Requirements of main installation.

(a) The main antenna shall be as efficient as is practicable. It shall be installed and protected so as to ensure proper operation of the station. Effective October 1, 1986, the main antenna energized by the main transmitter on the frequency of 500 kHz shall produce at one nautical mile a minimum field strength of thirty (30) millivolts per meter. * * *

* * * * *

3. Paragraph (a)(2) of § 83.446 is revised to read as follows:

§ 83.446 Requirements of reserve installation.

(a) * * *

(2) The reserve antenna shall be as efficient as is practicable. It shall be adequately installed and protected so as to ensure proper operation in time of an emergency. Effective October 1, 1986, the reserve antenna energized by the reserve transmitter on the frequency of 500 kHz shall produce at one nautical mile a minimum field strength of ten (10) millivolts per meter.

* * * * *

Monday, September 19, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 993

Dried Prunes Produced in California; Time for Filing Reports and Conforming Changes

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would amend § 993.172(b) and (d) of the Administrative Rules and Regulations to change the time requirements for handlers to file the monthly "New Crop Supply and Inbound Prune Report" and the "Report of Shipments". This change would enable the Prune Marketing Committee (PMC) staff to prepare and release its statistical data on supply and shipments sooner each month, thereby better meeting the needs of the prune industry.

In addition, minor conforming changes would be made in the Administrative Rules and Regulations to reflect the change in the name of the Prune Administrative Committee to Prune Marketing Committee. This change was made when the marketing order was amended December 1981.

The information collection requirements contained in this proposal have been submitted to the Office of Management and Budget for review under Section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

DATES: Written comments on this proposal must be received by November 18, 1983.

ADDRESSES: Written comments should be submitted in duplicate to the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions will be available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Written comments also should be submitted in triplicate to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Charles Ellett, Room 3228, 726 Jackson Place, NW., Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Frank M. Grassberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447-5053.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

The proposal under consideration would amend Subpart—Administrative Rules and Regulations (7 CFR 993.101—993.174) to change form filing deadline dates and to make minor conforming changes. This subpart is issued under the marketing agreement, as amended, and Order No. 993, as amended (7 CFR 993), regulating the handling of California dried prunes. The marketing agreement and order are collectively referred to as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The proposal is based on a recommendation of the PMC.

Currently, § 933172(b) requires handlers to file with the PMC, for each month, prior to the 10th calendar day of the next succeeding month a signed report on Form PMC 11.1 "New Crop Supply and Inbound Prune Report". Similarly, § 933.172(d) requires handlers to file with the PMC, for each month prior to the 10th calendar day of the next succeeding month, a signed report on Form PMC 12.1 "Report of Shipments". The proposal would require handlers to file the reports prior to the 5th working day of the next succeeding month, which in many cases would only be 2 or 3 days earlier than the 10th calendar day because of weekends.

The proposed date changes would enable the PMC staff to prepare its monthly reports on supply and shipments sooner than they can under the current provisions, and the proposed change would make this information available to the industry sooner each month. Both reports are authorized under § 933.72 of the order.

In addition, minor conforming changes in the Administrative Rules and Regulations should be made to reflect a change in the name of the Committee from the Prune Administrative Committee to the Prune Marketing Committee. This change was made when the order was amended on December 18, 1981 (47 FR 61635).

List of Subjects in 7 CFR Part 993

Marketing agreements and orders, Plums and prunes, California.

PART 993—[AMENDED]

Therefore, the proposal is to amend Subpart—Administrative Rules and Regulations (7 CFR 993.101—993.174) as follows:

§ 993.172 [Amended]

1. Section 993.172(b) is amended by changing the phrase "prior to the 10th calendar day" to "prior to the 5th working day", and by changing the phrase "Form PAC" to "Form PMC".

2. The introductory text of paragraph (d) in § 993.172 is revised to read as follows:

§ 993.172 Reports of holdings, receipts uses, and shipments.

* * * * *

(d) *Shipments by handlers.* Each handler shall file with the Committee for each month, prior to the 5th working day of the next succeeding month, a signed report on Form PMC 12.1 "Reports of Shipments" reporting shipments of prunes during the crop year through the last day of the immediately preceding month. Such report shall contain at least the following information.

* * * * *

§ 993.102 [Amended]

3. A conforming change in § 993.102 is made by changing the phrase "Prune Administrative Committee" to "Prune Marketing Committee".

§§ 993.149-993.174 [Amended]

4. Conforming changes should be made in §§ 993.149-993.174 by changing the phrase "Form PAC" to "Form PMC" wherever if appears in those sections.

Dated: September 13, 1983.

Russell L. Hawes,

Acting Deputy Director, Fruit and Vegetable Division.

[FR Doc. 83-25471 Filed 9-16-83; 8:45 am]

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 109

Employment Authorization

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the regulations relating to employment authorization for aliens admitted to the United States. The rule would specify that temporary employment authorization is automatically terminated upon denial of the application. This rule clarifies and defines existing practice in the Service.

DATE: Comments must be received on or by: November 18, 1983.

ADDRESS: Please submit written comments in duplicate to the Director of Policy Directives and Instructions, Immigration and Naturalization Service, 425 I St., NW., Room 2011, Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

For General Information: Loretta J. Shogren, Director, Policy Directives and Instructions Immigration and Naturalization Service 425 I Street, NW., Washington, D.C. 20536, Telephone (202) 633-3048.

For Specific Information: Craig O. Raynsford, Assistant General Counsel, Immigration and Naturalization Service, 425 I Street NW., Washington, D.C. 20536, Telephone: (202) 633-1266

SUPPLEMENTARY INFORMATION: On June 27, 1983 at 48 FR 29465, the Service published a final rule clarifying existing regulations relating to employment authorization. Section 109.1 (b)(2) and (b)(3) of this final rule were withdrawn at a later date for the purpose of republishing the revisions as a proposed rule to allow for public comments.

Sections 109.1 (b)(2) and (b)(3) would be amended to specify that temporary employment authorization is automatically terminated upon denial of the application.

Previously, these sections did not specifically state that employment automatically terminated upon denial of the application, but merely implied that fact. This led to different interpretations being given to these sections by different service offices: some offices interpreting § 109.1 (b) (2) and (3) as they were intended, other offices interpreting these sections to mean that the revocation procedures outlined in § 109.2 must be followed to teminate temporary employment in adjustment of status and asylum cases. The discrepancies indicated often occurred at different district offices due to localized conditions. This amendment was intended to clarify the Service policy in this regard.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule, if promulgated, will not have a significant impact on a substantial number of small entities.

This order would not be a major rule within the definition of section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 109

Aliens, Employment.

Accordingly, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations as follows:

PART 109—EMPLOYMENT AUTHORIZATION

In § 109.1, paragraphs (b) (2) and (3) would be revised to read as follows:

§ 109.1 Classes of aliens eligible.

* * * * *

(b) * * *

(2) Any alien who has filed a nonfrivolous application for asylum under Part 208 of this title may be granted permission to be employed for the period of time necessary to decide the case; however, temporary employment authorization is automatically terminated upon denial of the application by the district director or immigration judge. If the application is approved, employment authorization would be continued under § 109.1(a)(4) of this title.

(3) Any alien who has properly filed an application for adjustment of status to permanent resident alien, or who has submitted an application for adjustment of status simultaneously with a visa petition under § 245.2(a)(2) of this title, may be granted permission to be employed for the period of time necessary to decide the case; however, temporary employment authorization is automatically terminated upon denial of the application by the district director or immigration judge. If the application is approved, employment authorization would be continued under § 109.1(a)(1) of this title.

BILLING CODE 4410-10-M

FEDERAL RESERVE SYSTEM

12 CFR Part 210

[Docket No. R-0481]

Collection of Checks and Other Items and Wire Transfer of Funds; Midweek Closings and Nonstandard Holidays

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: The Board proposes to amend Subpart A of Regulation J, governing the collection of checks and other items by Federal Reserve Banks, to permit a Reserve Bank to charge a paying bank for cash items made available to it by a Reserve Bank on a weekday that is a banking day for the Reserve Bank but not for the paying bank. Such days consist of "midweek closing days"—regular weekdays on which a depository institution chooses to close as permitted by state law and "nonstandard holidays"—days on which the paying bank is closed because of a state or local holiday but on which the Reserve Bank is open, generally because it is located in a different state or locality. Such payment would be required as a condition of Reserve Bank handling of items payable by the paying bank. A paying bank would not be required to open or to begin processing the items on such a weekday closing day, because the time for return of the items would not begin to run until the paying bank's next banking day. The Board has previously proposed this amendment to Regulation J for public comment in April 1982.

DATE: Comments must be received by October 14, 1983.

ADDRESS: Comments, which should refer to Docket No. 0481, may be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551, or delivered to Room B-2223 between 8:45 a.m. and 5:15 p.m. Comments

received may also be inspected at Room B-1122 between 8:45 a.m. and 5:15 p.m., except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information, 12 CFR 261.6(a).

FOR FURTHER INFORMATION CONTACT: Elliott C. McEntee, Assistant Director (202/452-2231) or Morgan J. Hallmon, Program Manager, Payments Mechanism Planning (202/452-3878), Division of Federal Reserve Bank Operations; Gilbert T. Schwartz, Associate General Counsel (202/452-3625), Daniel L. Rhoads, Attorney (202/452-3711), or Robert G. Ballen, Attorney (202/452-3265), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551

SUPPLEMENTARY INFORMATION:

Background. The Monetary Control Act of 1980 (Pub. L. 96-221) ("MCA") requires that fees be established for Federal Reserve Bank services. The MCA requires that the Federal Reserve price for Federal Reserve float that remains after operational means to reduce float are implemented.[1]

In April 1982, the Board requested public comment on a proposal to amend Regulation J to require a depository institution to pay for checks delivered or made available to it on days the institution is closed and on which the Reserve Bank is open. Such days consist of "midweek closing days"—regular weekdays on which a depository institution chooses to close as permitted by state law and "nonstandard holidays"—days on which the paying institution is closed because of a state or local holiday. The proposal was intended to eliminate the float that results from granting credit to the sender for checks that could not be charged to the closed paying institution.

After review of the comments and issues raised therein, the Board in April 1983 decided not to adopt the proposed amendment. The Board noted at that time that the primiary impact of the midweek closing proposal would be on small institutions in small communities that are closed during the week. The Board also determined that adoption of the proposal could adversely affect the operations of some small institutions. There was no evidence to suggest that the bulk of these institutions were closed to avoid paying for checks or to create Federal Reserve float. Finally, depository institutions closed on nonstandard holidays generally do not have the opportunity to remain open.

Rather than adopt the proposal, the Board provided the Reserve Banks with three options to eliminate or price float arising from midweek closings and nonstandard holidays. First, a Reserve Bank could modify its availability schedule for deposits of local depositors so that credit for checks drawn on closed institutions would be deferred one additional day.[2] Second, a Reserve Bank could modify its current practice of posting funds received for the account of the institution on the day the institution is closed. Third, a Reserve Bank could price all or any remaining float arising from midweek closings or nonstandard holidays by adding the value of this float to the cost of the check collection service. These procedures are scheduled to be effective October 1, 1983.

As Reserve Banks have begun preparations to implement those procedures, several of them have indicated that depository institutions have raised concerns regarding all three of the alternative procedures. With regard to the alternative of modifying availability schedules for local depositors to delay credit for checks they deposit that are drawn on closed institutions, concerns have been raised as to the inequitable treatment of the local depositor relative to other depositors. Under this alternative, a local depositor would receive credit for its deposit of a check drawn on a closed institution one day later than would a non-local depositor of the same check. In addition, there has been some indication that this alternative is likely to result in circuitous routing as checks drawn on closed banks are sent for collection through non-local depository institutions for whom credit is not deferred.

Equity considerations have also been raised concerning the alternative of adding the value of this float to the cost of the check collection service. Forty percent of the depository institutions that close midweek are located in the Chicago Federal Reserve District, and 35 percent are located in the Atlanta Federal Reserve District. Concern has been expressed that it is unfair for depository institutions that do not choose to close midweek to bear a substantial portion of the float cost of midweek closing simply because they are located in a Reserve District with a disproportionately large number of insititutions that voluntarily close midweek. Local institutions would bear a disproportionate amount of the float cost because most of the checks deposited by a depository institution with the Federal Reserve for collection are drawn on another institution located in the same Federal Reserve office territory.

With regard to the alternative of deferring credits received for the account of the institution on the day the institution is closed, it has been suggested that closed institutions will avoid this deferral by directing their credits through correspondents.

In addition, the impact of the proposed amendment to Regulation J on paying banks may have changed since Board consideration of this matter in April 1983 in view of the substantial reduction in float resulting from midweek closings and nonstandard holidays. In 1982, float resulting from midweek closings was estimated to be $160 million (daily average) and float resulting from nonstandard holidays was estimated to be $100 million (daily average). Recent data indicate, however, that float resulting from midweek closings has fallen to $110 million (daily average) and float resulting from nonstandard holidays has fallen to under $10 million (daily average). This reduction results in a corresponding reduction in the burden on payor banks of the proposal to amend Regulation J to charge the payor bank for this float.

Board's proposal. Accordingly, the Board has determined to republish for public comment the proposed amendment of Regulation J to permit Reserve Banks to charge a depository institution for checks drawn or made available to it on days the institution is closed and on which the Reserve Bank is open. This republication will provide an opportunity for paying banks and others to reassess the impact on the proposed amendment to Regulation J in view of the recent reduction in float arising from midweek closings and nonstandard holidays.

In view of the concerns previously expressed by paying banks that charging their accounts for these items could have an adverse effect upon the management of their cash positions, the Board has also determined to solicit public comment on the option of permitting paying banks to pay for the float generated by their items rather than paying for the items themselves. The methods of payment for this float would be similar to those now offered to institutions in connection with paying for interterritory check float. 48 FR 10753 (March 14, 1983).

Under the proposed amendment, cash items would be made available to the paying banks so that they may begin processing if they desire to do so.

[1] 123 *Cong. Rec.* S3167 (daily ed. March 27, 1980) (Statement of Senator Proxmire).

[2] It was determined at that time that it would be operationally infeasible for Reserve Banks to delay credit on interterritory checks drawn or closed banks because each Reserve Bank would be required to keep track of every bank in the country that is closed.

However, the items would not be considered to be received for purposes of accountability under § 210.9(a) of Regulation J, or for purposes of beginning the running of the time for return under § 210.12(a) of Regulation J, until the institution's next banking day [3] on which it actually receives the cash letter. Accordingly, the proposed amendment would not require the paying bank to open on a weekday closing day or nonstandard holiday.

Effect on small institutions. The proposed amendment would not impose any additional reporting, recording, or other compliance requirements on any institutions and would not duplicate, overlap, or conflict with any other federal rule. The most significant economic impact of the proposal on any depository institution will be the reduction of earnings on funds that could have been invested in the federal funds market had the Reserve Bank not charged the institution's account until the next banking day or had it not paid for the float associated with the checks made available to it when it was closed. The amount of such reductions will vary widely among the institutions affected, regardless of an institution's size. Nevertheless, the Board recognizes that in some instances the economic impact on an institution may be significant. As discussed above, the alternatives to this proposed amendment that were adopted by the Board in April 1983 raise concerns of equity and feasibility. The Board does not believe that other alternatives to the proposed amendment designed to lessen its impact, such as exempting small depository institutions from its coverage, would be consistent with the requirement of the MCA that the Federal Reserve price for remaining Federal Reserve float or would serve the regulatory aims of the MCA (such as equal treatment for all depository institutions and reduction of Federal Reserve float).

List of Subjects in 12 CFR Part 210

Banks, banking, Federal Reserve System.

§ 210.9 Payment.

Pursuant to its authority under section 13 of the Federal Reserve Act (12 U.S.C. 342), section 16 of the Federal Reserve Act (12 U.S.C. 248(o), 12 U.S.C. 360), and section 11(i) of the Federal Reserve Act (12 U.S.C. 248(i)), the Board proposes to amend Regulation J (12 CFR Part 210) by revising in § 210.9 the undesignated paragraph following paragraph (a)(3) to read as follows:

(a) * * *

The proceeds of any payment shall be available to the Reserve Bank by the close of the Reserve Bank's banking day on the banking day of receipt of the item by the paying bank. If the banking day of receipt is not a banking day for the Reserve Bank, payment shall be made on the next day that is a banking day for the Reserve Bank. A paying bank that is closed on a day that is a banking day for the Reserve Bank must pay on that day for a cash item made available to it on that day by the Reserve Bank or compensate for the value of float associated with such items in accordance with procedures established by the Board, but the paying bank is not considered to receive the item until its next banking day.

[3] "Banking day" is defined in Regulation J as "a day during which a bank is open to the public for carrying on substantially all its banking functions." 12 CFR 210.2(d).

CIVIL AERONAUTICS BOARD

14 CFR Ch. II

[Docket 41686, EDR-466]

Computer Reservations Systems; Alleged Competitive Abuse and Consumer Injury

Dated: September 9, 1983.

AGENCY: Civil Aeronautics Board.

ACTION: Erratum to advance notice of proposed rulemaking.

SUMMARY: This erratum is being issued to correct an inadvertent typographical error on page 25 of EDR-466 (48 FR 41180, Sept. 14, 1983). The first sentence of the paragraph beginning "Accordingly, the Civil Aeronautics Board. . ." should read: "Accordingly, the Civil Aeronautics Board grants the petitions in Dockets 41369, 41621 and 41628, and asks for comments and proposals on the issues in those petitions and this notice." (EDR-466, 48 FR 41171, September 14, 1983)

Dated: September 13, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83-AGL-13]

Proposed Alteration of Control Zone; Columbus, Ohio

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Bolton Field Airport, Columbus, Ohio, control zone to revise the airspace currently designated for the control zone.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

DATES: Comments must be received on or before October 19, 1983.

ADDRESS: Send comments on the proposal in triplicate to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 83-AGL-13, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

An informal docket will also be available for examination during normal business hours in the Airspace, Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: This action revises Bolton Field Airport control zone to accommodate existing airspace requirements. It expands the zone from a 3-mile radius to a 5-mile radius due to the instrument flight rule status of the airport while excluding portions northwest and east due to other existing airports. The revised description is presented in the text of this Notice.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate

the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–AGL–13." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, S.W., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2, which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Bolton Field Airport, Columbus, Ohio, control zone.

Section § 71.171 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Columbus, Bolton Field, OH

Within a 5-mile radius of the center, latitude 39°54'07" N., longitude 83°08'12" W., of Bolton Field Airport, excluding that portion extending beyond a 2-mile radius of the Bolton Field bearing 270° clockwise to 325° and that portion beyond a 1.5-mile radius of the Bolton Field bearing 060° clockwise to 105°. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport Facility Directory.

(Sec. 313(a), 314(a), 601 through 610, and 1102, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983))

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on August 26, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 250, 256a and 257

[Release No. 35-23049; File No. S7-990]

Rules Governing the Preservation of Records of Registered Holding Companies and their Mutual or Subsidiary Service Companies

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Securities and Exchange Commission ("Commission") requests comments on a proposal to amend and restate its regulations concerning the preservation and destruction of records of registered holding companies and their mutual or subsidiary service companies. The proposed rule is directed to modernizing the rules under the Public Utility Holding Company Act of 1935 ("Act" or "1935 Act") in light of technological changes in record keeping, and changes in related regulations of the Commission and other regulatory authorities. In general, the amendments shorten required retention periods.

DATE: Comments must be received on or before November 4, 1983.

ADDRESS: Comments should be submittd in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Comment letters received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washingtom, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Grant G. Guthrie (202 272–7677), Associate Director, Robert P. Wason (202 272–7649), Chief Financial Analyst, or James E. Lurie (202 272–7648), Special Counsel, Division of Corporate Regulation, Securities and Exchange Commission, 450 Fifth Street, NW., Washingtom, D.C. 20549.

SUPPLEMENTARY INFORMATION: Section 15(a) of the 1935 Act requires that:

> Every registered holding company and every subsidiary company thereof shall make, keep and preserve for such periods, such accounts, cost-accounting procedures, correspondence, memoranda, papers, books and other records as the Commission deems necessary or appropriate in the public interest or for the protection of investors or consumers or for the enforcement of the provisions of this title or the rules, regulations, or orders thereunder.

The Federal Energy Regulatory Commission ("FERC") has similar jurisdiction over the accounts and records of electric utility companies and interstate pipeline companies.[1] State commissions regulating electric and gas utility companies generally exercise comparable authority over local public-utility companies. This Commission has limited its specific prescriptions under

[1] FERC's authority is contained in section 301 of the Federal Power Act, 16 USC 825(a) (electric utility companies), and section 8(a) of the Natural Gas Act, 15 USC 717g(a) (pipeline companies). FERC has similar authority over oil pipelines, not relevant here.

the 1935 Act to registered holding companies and their service company subsidiaries, which are not subject to either FERC or state utility regulation.

The requirements concerning the preservation and destruction of records are contained in the appendices to the Uniform System of Accounts for Mutual and Subsidiary Service Companies (17 CFR Part 256a) and the Uniform System of Accounts for Public Utility Holding Companies (17 CFR Part 257, Appendix). When the Commission rescinded the holding company system of accounts in 1975,[2] and rewrote the service company system of accounts in 1979,[3] the appendices were left in effect, pending revision. It appears that duplication can be avoided by substituting a single regulation, proposed new Part 257, to govern record retention matters for both registered holding companies and their service company subsidiaries. The function of the holding company and the service company differ in an integrated system, the former being primarily the issuer of equity securities, policy maker and investor, while the latter provides technical and shared services to associate companies. These differences merely mean that some categories of the records in the schedules will exist in one kind of company and not the other, a difference without practical significance. The proposal thus involves rescission of the present record retention provisions and appropriate amendments to the cross references in Rules 26(d) and 93.

The principal purpose of retention requirements is to assure the availability of records of transactions of the holding and service companies with their controlled public utility companies when regulatory agencies need to verify such transactions, usually in the course of ratemaking proceedings. Historical data has an important role in ratemaking, and ratemaking procedures may postpone full examination for a substantial period of time after the transaction has occurred. Another purpose is to establish rights of security holders. Basic documents, such as articles of incorporation and indentures have a continuing significance.[4] Security holder accounts are numerous and can be the subject of dispute.

For these and similar reasons the preservation of records is important, both to the registered system and to those who deal with it. The period for preservation of particular records depends essentially on their continuing relevance to potential controversies. Statutes of limitation are an important factor, but vary from state to state and with type of transaction. The regulation prescribes minimuim retention periods. The company and its counsel are responsible for exercising judgment as to the possible need for particular records beyond that period

Important technological changes in data preservation systems make necessary a revision of the existing regulations.[5] The proposed rule recognizes preservation media currently in use, and makes clear that it is not intended to restrict further developments.

Records relating to transactions with controlled utility subsidiaries complement those of the utility company, showing the parts of the transaction, and of antecedent or otherwise related transactions, which are not a part of the utility company's records. Once the utility company's records are destroyed, the related records of associate companies would be of limited value, while authorizing their earlier destruction might impede or frustrate efforts to complete examination of the utility company's accounts.

Under the proposal, the Schedule would be simplified by appropriate modifications of the Instructions. For example, by defining the status of records of predecessors and of independent custodians in Instruction (a), and dealing generically with multipurpose records in Instruction (m), complex and repetitious special provisions, exceptions and cross references in the existing schedules become superfluous.[6] Instruction (a)(3) deals specifically with the possible overlap of service company and utility company functions. To the extent a company subject to this regulation has records of utility operations, property or obligations, those records are governed by Federal or state requirements applicable to the utility or nuclear licensee for which it acts.

The schedules have been comprehensively revised and shortened. It is proposed to delete several subjects included in the existing schedules, which have little, if any, relevance to cost of service. Payroll and personnel records included in the schedules have been limited to those required to verify time and cost data, and eliminate such items as garnishments and other personal deductions, employment applications, medical records, and disciplinary notices, which have personal implications and are governed by other laws, and claim records would no longer include investigative files.

The present schedules, developed when employee pensions were largely a matter of grace, ignore the distinction between direct employee benefit plans and the more common and important funded plans, which are separate legal entities, and many of which are now regulated under the Employment Retirement Security Act or other laws The development of a variety of plans for various purposes also was not anticipated. The proposed schedules again replace detailed specifications, which would have to be reconciled with existing or future regulation under other laws, in favor of focusing on records needed to verify cost of service. Direct benefits are merely one of the operating expenses included in proposed Item 8. Item 16(a) (payroll) has been modified to include, rather than exclude, direct pension or annuity payments. Records of employee stock plans, like dividend reinvestment plans, have been included (proposed Item 1(p)) as a category of security holder records. The company's computation of its contributions to funded plans, and any records maintained by the company with respect to benefit plans remain in proposed Item 17 (Payroll and Personnel Records). General Instruction (a)(3) will protect records maintained by the company for an associate company.

Of course, such deletions from the schedules will not actually reduce the volume of records kept by the regulated companies. The files referred to in the old schedules are business records, the need for which is self evident. But they do not seem to be useful in terms of the interests of investors or consumers under the Act. Inclusion of records of primary interest to tax collectors, employees, or tort claimants in a regulation under the Act involves judgments of relevance and importance

[2] HCAR No. 18963, May 1, 1975, 40 FR 28026 (June 20, 1975)

[3] HCAR No. 20910, Feb. 2, 1979, 44 FR 8247 (Feb. 9, 1979).

[4] The standard medium of utility debt financing is an open-end trust indenture, most of which were executed in the 1940's, but which secure numerous series of long-term bonds now extending past the year 2000. Many utility preferred stock series are perpetual. Although executed and issued by operating utility companies, the details of the creation and administration of thed issuer are often a service company function, and dividend reinvestment and employee stock ownership plans have proliferated.

[5] Liberal interpretations of references to "microfilm" in the existing schedules have permitted use of state of the art technology. But the case-by-case approach is administratively unsatisfactory

[6] For example, section 257(a)(2) (II) permitting conditional reliance on an indenture trustee's copies of the company's communications to it, is covered by the revised definition of "records" in Instruction (a), and the provisions as to duplicate records in (a)(6). These instructions also eliminate the risk of similar duplication with respect to transfer agents and other independent custodians.

which this Commission has no reason to make.

The retention periods involve two factors. Documents establishing rights, such as articles of incorporation, mortgages, title papers, and authorization are needed for as long as they are in effect, a very long period in many important areas. In addition, records of completed transactions must remain available for a reasonable audit period. The length of the retention periods proposed recognizes the significance of verified costs in utility ratemaking, and that there is a lag between the time of a transaction (or series of transactions) and its preservation in records, and the time at which it can become an issue in a test year for a ratemaking proceeding.

Regulatory Flexibility Act Certification

Pursuant to Section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that the amendment proposed herein will not, if adopted, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

Statutory Basis

The Commission proposes to amend 17 CFR Parts 250, 256a and 257 pursuant to the authority contained in sections 15(a) and 20(a) of the Act, 15 U.S.C. 79o and 79t.

List of Subjects in 17 CFR Parts 250, 256a, and 257

Accounting, Reporting and recordkeeping requirements, Securities, Utilities.

Text of Proposed Amendments

In consideration of the foregoing, the Commission hereby proposes to amend Parts 250, 256a and 257 of Chapter II, Title 17, Code of Federal Regulations, as follows:

PART 250—GENERAL RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

1. Paragraph (d) of § 250.26 is proposed to be revised to read as follows:

§ 250.26 Financial statement and recordkeeping requirements for registered holding companies and subsidiaries.

* * * * *

(d) No registered holding company which is not a public utility company shall dispose, without authorization from the Commission, of any accounts, books, or other records, except pursuant to 17 CFR Part 257.

* * * * *

2. Section 250.93 is proposed to be revised to read as follows:

§ 250.93 Accounts and records of mutual and subsidiary service companies.

Every mutual service company and every company whose organization and conduct of business the Commission has found, pursuant to § 250.88, to meet the requirements of section 13(b) (49 Stat. 825; 15 U.S.C. 79m) shall keep such accounts, cost-accounting procedures, correspondence, memoranda, papers, books, and other records in such manner and preserve them for such periods, as are prescribed in 17 CFR Part 257, and shall keep no other records with respect to the same subject matter except: (a) Records other than accounts, (b) records required by state law, (c) subaccounts or supporting accounts which are not inconsistent with the accounts required by the Uniform System of Accounts (17 CFR Part 256), and (d) such other accounts as may be authorized by the Commission.

PART 256a—[REMOVED]

3. Part 256a is proposed to be removed in its entirety.

4. The present Part 257—is proposed to be removed in its entirety and the following substituted therefor:

PART 257—PRESERVATION AND DESTRUCTION OF RECORDS OF REGISTERED PUBLIC UTILITY HOLDING COMPANIES AND OF MUTUAL AND SUBSIDIARY SERVICE COMPANIES

Sec.
257.1 General Instructions.
257.2 Schedule.

Authority: Secs. 15 and 20(a), Public Utility Holding Company Act of 1935, and § 250.26(d) and §250.93 of Title 17 CFR, thereunder.

§ 257.1 General instructions.

(a) *Scope of regulation.* The General Instructions and schedule apply to any holding company, except an electric or gas utility company, registered as a holding company under the Public Utility Holding Company Act of 1935, and to companies found by the Commission, pursuant to § 250.88 to meet the requirements of Section 13 of Act as mutual or subsidiary service companies.

(1) *Company* means a service company subject to § 250.93, or a holding company subject to § 250.26, which is not an electric utility company or a gas utility company, and any predecessor or inactive or dissolved associate company, the records of which are in the possession or control of such company.

(2) *Records* include any records prepared, maintained or held by any agent or employee of a company, including any such records of a stock transfer agent, registrar, paying agent, indenture trustee or other person employed by a company to perform services with respect to the securities of the company, insofar as such person is accountable to the company or to its security holders for such records.

The specification in the schedule of a record related to a type of transaction includes all documents and correspondence, not redundant or duplicative of other records retained, needed to explain or verify such transaction. Supporting documents such as checks or vouchers, which are separately scheduled may, nevertheless, be destroyed in accordance with the schedule for their respective class, when the company determines that the lapse of time has made it unlikely that it will need to prove the details evidenced thereby.

(3) Any company subject to this regulation, which, as agent, operator, lessor or otherwise, maintains or has possession of any records relating to the operation, property or obligations of an electric or gas utility company or natural gas company or a nuclear licensee, as defined in the Federal Power Act, the Natural Gas Act, the Atomic Energy Act or the laws of any state within which such utility company operates, shall comply with the laws or regulations as to record retention and destruction which would apply to such records if they were records of such utility company or licensee.

(4) Except for the certifications, indices and cross references specified herein, the regulation shall not be construed as requiring the preparation or maintenance of records not required to be prepared or maintained by other rules or regulations of the Commission.

(5) The regulation shall not excuse compliance with any other lawful requirement for the preservation of records for periods longer than those prescribed in the regulation.

(6) Duplicate copies of records which contain no significant information not shown on the copy preserved may be destroyed at any time. If the same document would be required under more than one scheduled item, such as an indenture also included as an exhibit in a filing required to be retained, only one copy need be preserved if cross

references are substituted for the additional copies.

(7) Notwithstanding the provisions of the regulation, the Commission may, upon the request of any company, authorize the destruction of any specified records of such company and the Commission, on its own motion or on the motion of any regulatory agency, may direct that receords which would be useful in developing facts relevant to any transaction recorded by the company be preserved for such period as the Commission may specify.

(b) *Designation of supervisory official.* Each company subject to the regulation shall designate one or more officials to supervise the preservation or authorized destruction of its records. Insofar as its records include those in the possession of a transfer agent, indenture trustee or other independent custodian, the terms of the agreement with the custodian may include provisions, not inconsistent with this regulation, for the preservation and destruction of such records by the custodian and the responsibility of the company's designated official shall be to make reasonable inquiry as to the due performance of the custodian's obligation.

(c) *Protection and storage of records.* The company shall provide reasonable protection from damage by fire, flood, and other hazards for records required by the regulation to be preserved and, in the selection of storage space, safeguard such records from unnecessary exposure to deterioration from excessive humidity, dryness, or lack of proper ventilation.

(d) *Index of records.* At each office of the company where records are kept or stored, such records as are required by the regulation to be preserved shall be so arranged, filed, and currently indexed that such records shall be readily available for inspection by authorized representatives of regulatory agencies concerned.

(e) *Defintion of record media.* (1) The data constituting the records listed in the schedules may be retained in any of the media forms in Figure 1 of this section, if the media selected has a standard life expectancy equal to or in excess of the specified retention period. In cases where media regeneration to achieve full length of period retention becomes necessary, the company shall take such action as procedure calls for and notify the Commission immediately thereafter. The specifications in Figure 1 are generic. At the request of a company, the Commission may authorize alternative media reasonably equivalent to those specified.

(2) If the media form of the record retained is other than a readable paper copy, then reader and/or printer equipment and related printout programs, if required, shall be provided by the company for data reference.

(3) The media form initially selected for the record becomes the "original" for that particular record. If subsequent conditions (e.g., improved media life expectancy, increased company resources, increased securities sales) require and the remaining retention period permits a change in the media forms, the company may convert to another media and dispose of its old equipment, provided the certification processes described in paragraph (f) of this section are observed and data referencing capability is maintained.

FIGURE 1—RECORD MEDIA

Record media/form	Media expected life	Comments and standards
1. Paper and card stock (hardcopy)	Archival permanency	For each document, paper stock should be selected with a life expectancy equal to or greater than the retention period specified for that document.
2. Tape:		
a. Magnetic (including video tape)	5 years	Assumes storage in a controlled environment with a temperature and humidity range of 60°-80°F. and 40-60% respectively. (Ref. instruction 8 for specific storage conditions).
b. Punched	Archival permanency	For each record, tape media (paper, mylar, metallic base) should be selected with a life expectancy equal to or greater than the retention period for that record.
3. Microforms:		
a. Microfilm (including Computer Output Microfilm ("COM"), Microfiche jackets and aperture cards).	Archival permanency	Assumes processing to standards and storage in a controlled environment with a temperature and humidity range of 60°-80°F. and 40-50%, respectively. (Ref. American National Standards Institute ("ANSI") standards PH 5.4-1970, PH 1.41-1976, PH 1.28-1979, PH 1.43-1981, or most current standards as accepted by the National Archives for use by federal agencies. (See 41 CFR § 101-11.5)
b. Metallic recording data strips	Archival permanency	Same storage conditions as for microfilm.

(f) *Microform and tape certification—*(1) *As the initial recording media.* (i) Each microform record series shall contain, at the beginning, a microform introduction stating the title of the record series, the date prepared, the name of the official responsible for validating or confirming the data contained therein. Each microform record series shall be closed with a clear and standard microform notation indicating the completion of the series and the date. If the microform record series is a product of Computer Output Microfilm ("COM"), the certification required of this section is not required if the series is prepared in accordance with written standard procedures developed by the company that ensure the integrity of record series which are the product of COM. Such procedures must include the name of the official responsible for validating or confirming the data contained in the record series and confirming that a particular COM record was produced in accordance with the standard procedures.

(ii) If a record series is a product of computer output paper or microfilm, any certification that may otherwise be required under paragraph (f)(1)(i) of this section is not required if:

(A) The series is prepared in accordance with written standard procedures developed by the company that ensure the integrity of record series that are the product of computer output; and

(B) Such procedures include the name or title of the official responsible for validating or confirming the data contained in the record series and confirming that a particular computer output record series was produced in accordance with the standard procedures.

(iii) Each tape record series shall be externally labeled and there shall be prepared for that series an introduction stating the record series title, date prepared, the name of the official responsible for vaildating or confirming the data contained therein and an index where appropriate. Each record series shall be closed with a clear and standard notation indicating the completion of that series and the date.

(2) *Conversion for other media.* (i) Each microform record series shall include, as an integral part, a certificate(s) stating that the microforms are direct and facsimile reproductions of the original records and that they have been made in accordance with prescribed instructions. Such certificate(s) shall be executed by a persons(s) having personal knowlege of the facts covered thereby.

(ii) Each microform record series shall commence and end with a statement as to the nature and arrangement of the records reproduced, and the date. Rolls

of film shall not be cut except to produce jacketed microfiche. Supplemental or retaken film, whether of misplaced or omitted documents or of portions of microform found to be defective, shall be attached to the beginning of the microform record series. If supplemental or retaken film of misplaced or omitted documents, or of portions of microfilm found to be defective, are attached to the microfilm record series, the certificate described in section (f)(1)(i) shall cover the supplemental or retaken film and shall state the reasons for the attachment. When a retrieval system (*e.g.*, image count indexing ("blipping")) is used, the supplemental or retaken film may be attached at the end of the series, if the provisions at the beginning of the series advise the viewer of the location of the problem frames and the supplemental or retaken images.

(iii) If, in accordance with the provisions of paragraph (g) of this section, the company elects to convert records to the tape media, the same certification provisions specified in paragraph (f)(1)(iii) of this section must be provided in the conversion program.

(g) *Change of media for existing records.* Those records prepared and maintained under previous regulations in a paper media and whose remaining retention period falls within the life expectancy range of any of the media detailed in Figure 1, may be converted to that media at the company's option, provided the applicable certification processes described in paragraph (f) of this section are observed and an audit referencing capability maintained.

(h) *Media.* (1) All records created or maintained in a media shall

(i) Be prepared, arranged, classified, identified, and indexed as to permit the subsequent location, examination, and reproduction of the record to a readable media;

(ii) Be stored in such a manner as to provide reasonable protection from hazards such as fire, flood, theft, etc., and be maintained in a controlled environment; and

(iii) Be regenerated, including proper certification, when damaged.

(2) The company shall be prepared to furnish, at its own expense, standard facilities for reading media and shall additionally provide, if the Commission so directs, copies of records in a readable form.

(3) All film stock shall be of approved operationally-permanent-record microcopying type, which meets the current specifications of the American National Standards Institute.

(4) Punched cards, tape or similar media used as intermediate records or steps in data processing for assembling data to be posted to the records of the company or used in a report or study can be destroyed at the option of the company.

(i) *Destruction of records.* The destruction of the records permitted to be destroyed under the provisions of the regulations in this part may be performed in any manner elected by the company. Precautions should be taken, however, to macerate or otherwise destroy the legibility of records, the content of which is forbidden by law to be divulged to unauthorized persons.

(j) *Premature destruction or loss of records.* When records are destroyed or lost before the expiration of the prescribed period of retention, a statement listing, as far as may be determined, the records destroyed and describing the circumstances of accidental or other premature destruction or loss shall be filed with the Commission within ninety (90) days from the date of discovery of such destruction or loss.

(k) *Schedule of records and periods of retention.* The schedules of records retention periods constitute a part of this regulation. The schedules prescribe the periods of time that designated records shall be preserved.

(l) *Retention periods designated "Destroy at Option".* Use of the retention period, "Destroy at option," in the regulation constitutes authorization for such destruction under the conditions specified for the particular types of records only if such optional destruction is based on a reasonable judgment that the records are unlikely to be needed and if such optional destruction is not in conflict with other legal retention requirements. Optional destruction of records relevant to pending or expected regulatory or legal actions is not authorized. "Destroyed at option after audit" requires retention until the company has received an opinion of its independent accountants with respect to the financial statements including the transactions to which such records relate.

(m) *Use of technical accounting terms.* For purposes of the schedules, traditional accounting terms such as ledgers, journals, registers and vouchers refer to the function rather than the form of the record. All refer to quasi-permanent records, designed to collect, classify and in some aspects summarize, various types of the company's transactions. They are interrelated and, in another traditional term, are the principal constituents of the books of account, including subsidiary ledgers and registers. The retention periods apply to records serving this function, regardless of form. A multiple purpose record, such as a service company stock stub which also serves as the shareholder's ledger, or a voucher file which also serves as the journal, referred to more than once in the schedule, is governed by the longest retention period applying to any of its functions. For brevity, the term "note" is used in the schedule to refer to an evidence of debt maturing within one year of its creation, which was not the subject of an offering registered under the Securities Act of 1933. The term "debenture" refers to a document evidencing any other unsecured debt. The term "mortgage" refers to any form of secured obligation, "bond" refers to a document evidencing a secured debt in whole or part, and "mortgagee" refers to the holder of a mortgage or bond and includes any person, such as an indenture trustee, authorized to act for a mortgagee.

§257.2 Schedule.

SCHEDULE OF RECORDS RETENTION PERIODS

Description of records	Retention period
Corporate and General	
1. Records of Securities:	
(a) Capital stock and debt ledgers.	3 years after the holder's account is closed.
(b) Subscription accounts, warrants requests for allotments and other essential papers related thereto.	2 years after settlement
(c) Stubs or similar records of the issuance of securities.	3 years after cancellation of certificate.
(d) Transfer registers or sheets or similar records.	3 years after last entry on page or sheet of the record.
(e) Papers supporting transfers.	Destroy at option or return to transferor.
(f) Cancelled capital stock certificates, bonds or debentures and coupons.	3 years after cancellation.
(g) Paid or cancelled notes	Destroy at option after changes are recorded
(h) Bonds of indemnity and affidavits covering issuances of securities to replace lost certificates.	3 years after expiration of bonds.
(i) Letters, notices, reports, statements and other communications distributed to all holders of a particular class:	
(1) Annual reports, notices of annual or special meetings of such class, solicitations of consents or waivers, notices of redemption or invitations for tender.	50 years.
(2) Interim reports, dividend notices, notices of change of corporate address, and similar communications of information of only current significance.	3 years after the date thereof.
(j) Dividend interest and coupon registers, lists or similar records.	3 years after payment.
(k) Paid dividend or interest checks.	3 years after issuance.
(l) Third party dividend orders	3 years after rescission of order.

Description of records	Retention period
(m) Trust indentures, loan agreements or other contracts or agreements securing debt securities issued.	3 years after redemption.
(n) Copies of reports, statements, letters or memoranda filed with Trustee(s) pursuant to provisions of trust indenture or other security instrument or agreement securing debt securities issued.	Do.
(o) Leases pertaining to rentals of property to or from others.	3 years after expiration.
(p) Contracts, agreements, and other records needed to administer or audit a dividend reinvestment plan or an employee benefit plan involving the purchase or issuance of securities.	6 years after expiration or cancellation.
2. Proxies and Voting Lists:	
(a) Executed proxies of holders of voting securities.	3 years after date of shareholders' meeting for which executed.
(b) Lists of holders of voting securities represented at meetings.	1 year.
3. Filings with and authorizations by regulatory agencies:	
(a) Applications, registrations or other documents filed by the company with any Federal or state regulatory agency for authorization or validation of transactions; the opinion, order or other document evidencing the agency's action thereon; and any report of consummation or compliance, with respect to:	
(1) The issue, pledge or sale of securities.	25 years or until all securities covered thereby are retired, whichever is shorter.
(2) The acquisition or disposition of assets or investments, including mergers.	25 years after close of fiscal year.
(3) Contracts with affiliates.	Do.
(4) Organization or conduct of business of the company and changes therein.	Life of corporation.
(b) Periodic or special reports filed by the Company in its own behalf with the Securities and Exchange Commission or with any other Federal or State rate-regulatory agency, including exhibits or amendments to such reports:	
(1) Annual financial, operating and statistical reports.	10 years after date of report.
(2) Monthly and quarterly reports of operating revenues, expenses, and statistics.	2 years after date of report.
(3) Transactions with associated companies.	6 years.
(4) Budgets of expenditures.	3 years.
(5) Accidents	6 years.
(6) Employees and wages.	5 years.
(7) Loans to officers and employees.	3 years after fully paid.
(8) Purchases and sales of property.	For period specified refer to property records (see item 16).
4. Organization Documents:	
(a) Titles, Franchises, and Licenses:	
(1) Certificates of incorporation, or equivalent agreements and amendments thereto.	Life of corporation.
(2) Deeds leases and other title papers (including abstracts of title and supporting data), and contracts and agreements related to the acquisition or disposition of property or investments.	6 years after property or investment is disposed of unless delivered to transferee.
(b) Minutes of stockholders, directors' and directors' committee meetings.	50 years.
(c) Minutes of meetings of system committees.	6 years after close of fiscal year.
(d) Organization Diagrams and Charts.	Destroy at option after expiration or supersession.
(e) Permits or Licenses:	
(1) Permits or licenses to conduct any part of the Company's business.	6 years after expiration.
(2) Permits or licenses for vehicles or equipment, or for other activities in business.	1 years after expiration or renewal.
5. Contracts and Agreements:	
(a) Contracts and agreements entered into by the Company for the procurement of services, such as management, consulting, accounting, legal, financial or engineering services.	6 years after cancellation or expiration.
(b) Contracts or agreements with individual employees, labor unions and other employee organizations relative to wage rates, hours and similar matters.	6 years after expiration of contract.
(c) Memoranda essential to clarify or explain provisions of contracts and agreements.	For same period as contract to which they relate.
(d) Card or book records of contracts or agreements showing renewal or expiration of same and records of performance.	Do.
Accounting	
6. Books of Account:	
(a) General and Subsidiary Ledgers.	50 years.
(b) Trial balance sheets of general and subsidiary ledgers or equivalent records.	2 years after data of trial balance.
(c) Journals: General and subsidiary journal or ledgers of originnal entry.	50 years.
(d) Cash books: General and Subsidiary or auxiliary books.	10 years.
(e) Voucher Registers: Voucher registers or similar records.	6 years.
7. Journal Vouchers and Other Papers Supporting Entries:	
(a) Vouchers supporting general and subsidiary journal entries and papers forming part of or necessary to support and explain vouchers relating to:	
(1) Organization, fixed assets, investments, issuance of capital stock, funded debt and related accounts.	50 years.
(2) All other accounts	6 years after settlement.
(b) Schedules for recurring journal entries.	6 years after settlement. Destroy when superseded if not a part of a journal entry in which event it 6(c) applies.
(c) Lists of standard journal entry numbers.	Destroy when superseded.
(d) Material and supplies disbursement and labor distribution recores.	6 years.
8. Vouchers Evidencing Disbursements:	
(a) Paid and cancelled vouchers, including analysis sheets showing detailed distribution of charges on individual vouchers and other supporting papers.	Do.
(b) Original bills and invoices for materials, services, etc., paid by vouchers.	Do.
(c) Authorization for the payment of specific voucbers.	Do.
(d) Lists of unaudited bills (accounts payable), lists of vouchers transmitted and memoranda recording changes in unaudited bills.	Do.
(e) Voucher indices	Destroy at option.
(f) Paid checks other than interest dividend and payroll checks. (See item 1(k) for interest and dividend checks and item 16(d) for payroll checks.	6 years.
(g) Purchases and stores records related to disbursement vouchers.	Do.
9. Accounts Receivable:	
(a) Records of all accounts receivable, indices to accounts receivable and summaries of distribution of such accounts.	3 years after settlement.
(b) Accounting department copies of invoices issued and supporting papers which do not accompany the original invoices and authorizations for charges including supporting papers. Insurance and Taxes	Do.
10. Insurance Records:	
(a) Records of insurance policies in force showing coverage, premiums paid and expiration date.	Destroy at option after expiration of such policies.
(b) Insurance Policies	Do.
(c) Records of self-insurance against (1) losses from fire and casualty, (2) damage to property of others and (3) personal injuries.	3 years after date of last accounting entry with respect thereto.
(d) Records of amounts recovered from insurance companies in connection with losses and records of claims against insurance companies including reports of losses and supporting papers.	6 years after settlement.
(e) Inspectors' reports and reports of condition of property.	Destroy when superseded.
(f) Reports of losses not covered by insurance.	Destroy at option after audit.
(g) Insurance maps of property and structures erected thereon.	Destroy when superseded.
(h) Records and statements relating to insurance requirements.	Destroy at option.
11. Injuries and Damages:	
(a) Claim registers, card or book indexes and similar record in connection with accidents resulting in damage to the property of others or personal injuries.	2 years after settlement.
(b) Detailed schedules or spread sheets of payments to others for personal injuries or for property damage.	Do.

Description of records	Retention period
12. Tax Records:	
(a) Copies of schedules, returns and supporting working papers to taxing authorities and records of appeals:	
(1) Federal income taxes	7 years after settlement.
(2) State or local income or property taxes.	Do.
(3) Other taxes	2 years after settlement.
(4) Agreements between and schedule of allocation by associate companies of consolidated federal income taxes.	7 years after settlement.
(b) Tax bills from taxing authorities and receipts for payment.	5 years after settlement.
(c) Summaries of taxes paid by classes of taxes, location or taxing authority.	Destroy at option.
Treasury	
13. Statements of Funds and Deposits:	
(a) Summaries and periodic statements of cash balances on hand and with depositories for Company or associate.	Do.
(b) Requisitions and receipts for funds furnished associates and others.	Destroy at option after funds have been returned or accounted for.
(c) Records of fidelity bonds of employees and others responsible for funds of the Company.	Destroy at option after liability of bonding company has expired.
14. Records of Deposits with Banks and Others:	
(a) Bank deposit slips or similar records, including authorizations for and statements of transfers of funds from one depository to another.	Destroy at option after audit.
(b) Statements from depositories showing the details of funds received, disbursed and transferred and balances on deposit.	Do.
(c) Bank reconcilement papers.	Do.
(d) Statements from banks of interest credits.	Do.
(e) Check registers or other records of checks issued, including correspondence.	6 years.
15. Records of Receipts and Disbursements:	
(a) Daily or other periodic statement of receipts or disbursements of funds.	Destroy at option after audit.
(b) Records of periodic statements of outstanding vouchers, checks, drafts, etc., issued and not presented.	Do.
(c) Reports of associates showing working fund transactions and summaries thereof.	Do.
Payroll and Personnel Records	
16. Payroll Records:	
(a) Payroll sheets or registers of payments of salaries and wages, pensions and annuities paid by company or by contractors for its account.	6 years.
(b) Records showing the distribution of salaries and wages paid for each monthly, semi-monthly or weekly payroll period and summaries or recapitulations of such distribution.	Do.
(c) Time tickets, timesheets, timecards, workmen's reports and other records showing hours worked, description of work and accounts to be charged.	Destroy at option if the basic information contained thereon is transferred to work orders or other records.
(d) Paid checks, receipts for wages paid in cash and other evidences of payment.	3 years.
(e) Authorizations for changes in wage and salary rates, summaries and reports of changes in payrolls and similar records.	Do.
(f) Payroll authorizations, records of authorized positions, and terminations.	Do.
(g) Comparative or analytical statements of payroll.	Do.
17. Personnel and Employee Benefit Records:	
(a) Records of employees' service, attendance and other essential data.	3 years after termination of employment.
(b) Detailed records of Company's computation for its contribution, plus a copy of plan.	6 years after termination of pension of annuity plan.
(c) Records pertaining to employees' benefit programs, including pension and profit sharing plans.	6 years after termination of program.
(d) Bulletins or memoranda of general instructions issued by the Company to employees pertaining to accounting, engineering, maintenance and construction methods and policies.	3 years after expiration or supersession.
Property, Depreciation and Investments	
18. Property Records:	
(a) Land and land rights records.	50 years.
(b) Building, permanent facilities and leasehold investment record.	6 years after disposition, termination of lease or write-off of property or investment.
(c) Operating equipment records.	3 years after disposition, termination of lease or write-off of property or investment.
(d) Office furniture and equipment records.	Do.
(e) Automobiles, other vehicles and related garage equipment records.	Do.
(f) Aircraft and airport equipment records.	Do.
(g) Other property records not defined elsewhere.	Do.
(h) Construction work in progress records, income ledgers, work order sheets, authorizations for expenditures, requisitions, performance reports and analysis or cost reports.	10 years after clearance to property accounts.
(i) Depreciation and amortization of property records.	Destroy at option after expiration of retention period a described for each respective type of property records in 18(a) through 18(i).
19. Investment Records:	
(a) Records of investment in associate companies.	3 years after disposition of investment.
(b) Records of other investments including temporary investments of cash.	Do.
20. Appraisals and valuations made by the company of its properties or investments or of the properties or investments of any associated companies.	3 years after disposition, termination of lease or write-off of property or investment.
Work Order and Job Order Records	
21. Work order and job order records including authorization documents, estimated cost memoranda, work order sheets for posting labor, material and other services, and summaries of expenditures for clearance to other accounts.	6 years after completion or work order.
22. Production maps, geological maps, reproductions, including aerial photographs, showing the location of all facilities the subject matter of which falls within the work orders of the company.	Do.
23. Engineering records, drawings, supporting data to include diagrams, profiles, photographs, field-survey notes, plot plans, detail drawing, and records of engineering studies that are part of or performed by the company within the work order system.	Do.
24. Records of building space occupied by various departments of the Company.	6 years.
Audit, Budget and Statistical Reports	
25. Financial, operating, and statistical reports:	
(a) Reports of examinations and audits by accountants and auditors not in the regular employ of the Company. (Including reports of public accounting firms and regulatory commission accountants.)	7 years after date of report.
(b) Internal audit reports and working papers.	Do.
(c) Annual reports regularly prepared in the course of business for internal administrative or operating purposes.	10 years after date of report.
(d) Quarterly, monthly or other periodic reports.	2 years after date of report.
26. Budgets and other forecasts (prepared for internal administrative or operating purposes) of estimated future income, receipts and expenditures in connection with financing, construction and operations and acquisitions or disposals of properties or investments by the Company and its associated companies, including revisions of such estimates and memoranda showing reasons for revisions; also records showing comparison of actual income and receipts and expenditures with estimates.	3 years.
27. Other Miscellaneous Records:	
(a) Copies of advertisements by the Company on behalf of itself or any associate company in newspapers, magazines and other publications including records thereof. (Excluding advertising of product, appliances, employment opportunities, services, territory, routine notices and invitations for bids for securities, all of which may be destroyed at option.)	6 years after date of publication.
(b) Indices of forms used by the Company.	Destroy at option when superseded.

By the Commission.

Date: September 7, 1983.

George A. Fitzsimmons,

Secretary.

Regulatory Flexibility Act Certification

I, John S.R. Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that the proposed amendments to 17 CFR Parts 250, 256a, and 257 under the Public Utility Holding Company Act

of 1935 set forth in Holding Company Act Release No. 35-23049, if adopted, will not have a significant economic impact on a substantial number of small entities. The amendments deal with the preservation of records by public-utility holding companies registered under the Holding Company Act and their service company subsidiaries. The reason for this certification is that the proposed amendments will not affect a substantial number of small entities. There are presently 12 registered holding companies and 12 service company subsidiaries of such holding companies to which the rules would apply. None of these companies is a small entity as defined in Rule 110 under the Holding Company Act (17 CFR § 250.110). Thus the proposal will not affect any small entities.

Dated: September 7, 1983.

John S.R. Shad,

Chairman.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 341

[Docket No. 76N-052B]

Cold, Cough, Allergy, Bronchodilator and Antiasthmatic Drug Products for Over-the-Counter Human Use; Tentative Final Monograph for OTC Bronchodilator Drug Products; and Reopening of Administrative Record

Correction

In FR Doc. 83-23706 beginning on page 39242 in the issue of Tuesday, August 30, 1983, make the following correction. On page 39242, third column, in the "ADDRESS" section "(HFA-205)" should read "(HFA-305)".

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[A-5-FRL 2433-2]

Designation of Areas for Air Quality Planning Purposes; Attainment Status Designations: Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA proposes to change the designation for Allen County, Indiana from nonattainment to attainment for air quality attainment relative to ozone. This revision is based on a request from the State of Indiana to redesignate this area and on the supporting data the State submitted. Under the Clean Air Act, designations can be changed if sufficient data are available to warrant such change.

DATE: All comments must be received by October 19, 1983.

ADDRESSES: Copies of the redesignation request, technical support documents and the supporting air quality data are available at the following addresses:

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 S. Dearborn Street, Chicago, Illinois 60604

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

Comments on this proposed rule should be addressed to: (Please submit an original and five copies if possible.)

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner, (312) 886-6036.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (43 FR 8962), pursuant to Section 107 of the Act, EPA designated Allen County, Indiana as nonattainment for ozone. In the February 3, 1982, **Federal Register** (47 FR 5440), EPA proposed to redesignate Allen County, Indiana from nonattainment to attainment/unclassifiable for ozone based upon monitored data from 1980. A discussion of the basis of EPA's action can be found in that Notice of Proposed Rulemaking.

Two comments were received by the Agency during the public comment period. The Northwestern Indiana Regional Coordinating Council supported the redesignation while the State of Connecticut opposed the redesignation based on the fact that the second highest ozone reading in 1980 was in excess of that allowable under the National Ambient Air Quality Standards (NAAQS). As a result of this public comment, EPA deferred rulemaking until new ozone data was received by the Agency. On March 31, 1983, the State of Indiana submitted new information to EPA and again requested redesignation of Allen County, Indiana from nonattainment to attainment for ozone. This request was based on monitored ozone concentrations during the period of 1980 through 1982.

When considering a redesignation request for ozone, a number of criteria must be considered. The most important is the ozone NAAQS which is specified in 40 CFR Part 50. The NAAQS for ozone is defined to be violated when the annual average expected number of daily exceedances of the standard (0.12 parts per million (ppm), one hour average) is greater than one (1.0). A daily exceedance occurs when the maximum hourly ozone concentration during a given day exceeds 0.124 ppm ("Guideline for the Interpretation of Ozone Air Quality Standards," EPA-450/4-79-003). The expected number of daily exceedances is calculated from the observed number of exceedances by making the assumption that the non-monitored days (invalid, missing, or incomplete) have the same fraction of daily exceedances as observed on monitored days (EPA-450/4-7-003).

EPA's policy on redesignations for ozone is discussed in memoranda from EPA's Office Air Quality Planning and Standards (OAQPS), dated December 7, 1979 and April 21, 1983. In keeping with the ozone NAAQS and with additional guidance provided in the "Guideline for the Interpretation of Ozone Air Quality Standards" (EPA-450/4-79-003), these memoranda recommend that the three most recent years of ozone monitoring data be considered. An area cannot be redesignated to attainment if the ozone NAAQS is violated at any site in the area.

During the 1980-1982 period, ozone was monitored at sites located at 17215 Woodburn and 2022 North Beacon. There were no exceedances recorded at the 17215 Woodburn monitor. The maximum highest ozone concentration recorded at the site was 0.116 ppm, which occurred in 1980. The second highest maximum ozone concentration was 0.108 ppm, which occurred in 1981.

Two exceedances of the ozone standard were recorded at the 2022 North Beacon site in 1980. Following procedures given in the "Guidelines for Interpretation of the Ozone Air Quality Standards", the expected exceedance was calculated to be 2.4 in 1980.

No exceedances of the ozone standard were recorded at this site in 1981 and 1982. Therefore, the average number of expected daily exceedances for 1980 through 1982 is 0.8. These data, in addition to the 17215 Woodburn data, demonstrate that no violations of the ozone NAAQS were observed in Allen County, Indiana during the period of 1980 through 1982.

In addition to this lack of violations, significant VOC emission reductions have occurred in the area during the most recent years as a result of the implementation of the Federal Motor Vehicle Control Program (IFMVCP). The FMVCP is expected to provide additional VOC emission reductions in future years, and will provide for maintenance of the ozone standard. Taking the above facts into consideration, EPA proposes to approve the redesignation of Allen County, Indiana to attainment for ozone.

All interested persons are inivited to submit written comments on the proposed redesignation. Written comments received by the date specified above will be considered in determining whether EPA will approve the redesignation. After review of all comments submitted, the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the redesignation.

Under 5 U.S.C. Section 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities (See 46 FR 8709, March 1, 1983).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291. (Section 107(d) of the Act, as amended (42 U.S.C. 7407)).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 96

[Gen. Docket Nos. 82-243, 83-26 and 83-30]

Allocation of For Fixed Service Usage; Creation of a Private Radio Service; Creation of a Public Air-Ground Telephone System

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of reply comment period.

SUMMARY: This *Order* extends the time periods in which to file reply comments in response to the three *Notices of Proposed Rule Making* in General Docket Nos. 82-243, 83-26 and 83-30 (47 FR 23491, May 28, 1982, 48 FR 12228, March 23, 1983, 48 FR 12253, March 23, 1983, respectively). It is necessary to extend the reply comment period in each of these dockets in order to allow complete, comprehensive and definitive responses to various marketing, engineering and traffic studies set forth by numerous comments filed on July 15, 1983.

DATE: Reply comments may now be filed on or before September 30, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: John J. Borkowski, Private Radio Bureau, Special Services Division, Washington, D.C. 20554, (202) 632-4964.

Order

In the matter of amendment of Part 2 of the Commission's rules to provide for an allocation of 6 MHz to the Government and the non-Government for fixed service usage, Gen. Dkt. No. 82-243.

In the matter of creation of an additional private radio service, Gen. Dkt. No. 83-26, RM-4121.

In the matter of amendment of the Commission's rules to allocate spectrum for, and to establish other rules and policies pertaining to the use of radio in establishing a public air-ground telephone system, Gen. Dkt. No. 83-30, RM-3524.

Adopted: August 29, 1983.

Released: September 2, 1983.

By the Chief, Private Raido Bureau and the Chief Scientist.

1. The Commission has before it a *Motion for Extension of Time* filed by the Audio Electronics Products Department of the General Electric Company (GE). In its motion GE requests an extension of time in which to file reply comments in General Docket No. 83-26 from September 6, 1983 to September 30, 1983.

2. In support of its motion, GE stated that it needed a twenty-four day extension in order to provide complete, comprehensive and definitive responses to the various marketing, engineering and traffic studies set forth by numerous comments filed by other parties on July 15, 1983. Grant of the requested extension of time, according to GE, would serve the public interest by insuring a full and complete record before the Commission. GE also appended a letter from the Personal Communications Section of the Telecommunications Group, Electronic Industries Association (EIA's support of GE's motion.

3. For the reasons advanced by GE, and in order to allow all interested parties ample time to evaluate and respond to the marketing, engineering and traffic studies included in the many comments filed in General Docket No. 83-26 only July 15, 1983, we are granting all parties an extension of time to file reply comments in this proceeding until September 30, 1983.

4. Additionally, we note that the other two captioned proceedings (General Docket Nos. 82-243 and 83-30) also now before the public for comment propose allocating spectrum in other portions of the 900 MHz band. The Commission has stated its intention to consider all three of the captioned proposals in a coordinated manner prior to making final decisions on any of them. *See Notice of Proposed Rule Making*, General Docket No. 83-26, 48 FR 12228 (March 23, 1983), at para. 78. Accordingly, we are also granting an extension of time until September 30, 1983 in which to file reply comments in General Docket Nos. 82-243 and 83-30.

5. Ordinarily, prior to making a determination in this matter, we would allow a fifteen day period for comment and an additional ten day period for reply comment. However, the reply comment period in these proceedings expires on September 6. Allowing these time periods to run would moot GE's request.

6. Therefore, it is ordered that GE's *Motion for Extension of Time* is granted. It is further ordered that interested persons may file reply comments in General Docket Nos. 82-243, 83-26 and 83-30 on or before September 30, 1983.

7. This action is taken pursuant to authority found in Sections 4 (i) and (j), 302 and 303 of the Communications Act of 1934, as amended (47 U.S.C. 154 (i) and (j), 302 and 303), and §§ 0.131, 0.31, 0.241, 0.131, 0.331 and 0.332 of the Commission's Rules (47 CFR 0.31, 0.131, 0.241, 0.131, 0.331 and 0.332).

Federal Communications Commission.

Robert S. Foosaner,

Chief Private Radio Bureau.

Robert S. Powers,

Chief, Scientist.

[FR Doc. 83-25401 Filed 9-16-83; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 83-807; RM-4327]

Protection Standards for AM Stations in Alaska; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment/reply comment period.

SUMMARY: This action extends the time for filing comments and reply comments in response to the Notice of Proposed Rule Making concerning Protection Standards for AM Stations in Alaska. Clear Channel Broadcasting Service sought the additional time so that its engineering consultants might review the basis for the interm high latitude curve proposed in the Notice.

DATES: Comments in the above noted proceeding must be filed on or before October 12, 1983, and reply comments must be filed on or before October 27, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Jonathan David, Mass Media Bureau, (202) 632-7792.

Order Extending the Time for Filing Comments and Reply Comments in Response to Notice of Proposed Rule Making.

In the matter of Protection Standards for AM Stations in Alaska; MM Docket No. 83-807, RM-4327. See 48 FR 36278, 8-10-83.

Adopted: September 8, 1983.

Released: September 12, 1983.

By the Chief, Policy and Rules Division.

1. On August 4, 1983, the Commission released a Notice of Proposed Rulemaking in the above matter inviting interested parties to file comments on or before September 12, 1983, and reply comments on or before September 27, 1983.

2. On September 2, 1983, Clear Channel Broadcasting Service ("CCBS") requested that the Commission extend the time for filing comments and reply comments in the above-noted matter. The request was made so that CCBS could have the opportunity to review the material from which the proposed interim high latitude curve had been derived. CCBS indicated that this material had not yet been made available for public inspection.

3. The Commission has received no objection from any other interested party to CCBS' request. It appears that the circumstances noted justify the extension, especially since no other party would be adversely affected by the extension.

4. Accordingly, it is ordered, that the dates for filing comments and reply comments in response to the Notice of Proposed Rule Making are extended respectively to and including October 12, 1983, and October 27, 1983.

5. This action is taken pursuant to authority found in §§ 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and §§ 0.61, 01204(b) and 0.283 of the Commission's Rules.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

[FR Doc. 83-25402 Filed 9-16-83; 8:45 am]

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 611

[Docket No. 30825-173]

Foreign Fishing

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA proposes to amend the foreign fishing regulations: (1) To establish the 1984 foreign fishing permit fee; (2) to clarify that permits will not be issued unless any financial assurances required by the Secretary of Commerce are paid and that permits may be effective for limited periods; and (3) to waive the surcharge for the Fishing Vessel and Gear Damage Compensation Fund (FVGDC) in 1984. The proposed rulemaking would (1) recover the administrative costs of processing foreign fishing permit applications; (2) allow foreign vessels to fish while protecting U.S. interests; (3) allow a period to monitor performance of the foreign vessels; and (4) recover only needed funds for the FVGDC.

DATE: Comments must be received on or before October 19, 1983.

ADDRESS: Send comments to Fees, Permits, and Regulations Division, F/M12, National Marine Fisheries Service, Washington, D.C. 20235. A draft regulatory impact review/initial regulatory flexibility analysis for this action is available at this address.

FOR FURTHER INFORMATION CONTACT: John D. Kelly, 202-634-7432.

SUPPLEMENTARY INFORMATION: NOAA will publish the fee schedule for 1984 in two segments. This is the first segment. The second segment will propose new poundage fees, and be published at a later date.

Permit fees. Since December 15, 1980, the National Marine Fisheries Service (NMFS) has determined foreign fishing permit application fees by estimating the cost of processing the applications for the calendar year (45 FR 82267, December 15, 1980). NMFS has estimated the costs of processing applications in 1984. The costs used to develop the proposed 1984 permit application fee are as follows:

Department of State:	
Salaries	$30,000
Duplicating	600
Mailing	700
Computer	3,500
Federal Register	4,100
Travel	900
Total	39,800
Department of Commerce:	
Salaries	32,000
Computer processing	20,000
Printing forms	200
Communications	200
Total	54,300
Grand total	94,100

The total estimated cost of processing permit applications in 1984 is $94,100. This total is apportioned by application by estimating that 1,100 applications will be received in 1984. NMFS is rounding the average unit cost of $86 per application, up from the 1983 fee of $73 per application. Foreign applicants would pay the $86 but no surcharge for applications in 1984. Applicants for 1984 permits should pay this amount, pending the final rule. If adjustments are necessary, they will be addressed in the final rule.

Surcharge. The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has determined that the Fishing Vessel and Gear Damage Compensation Fund established by the Fisherman's Protective Act (22 U.S.C. 1980 (10)(f)) is sufficiently capitalized to pay any claims in 1984. Capitalization of the fund is derived from a surcharge on the foreign fishing fees imposed under section 204(b)(10) of the Magnuson Fishery Conservation and Management Act (Magnuson Act) (16 U.S.C. 1801 *et seq.*). NOAA proposes to reduce this surcharge to zero percent, effectively waiving the surcharge in 1984. The appropriate change is proposed for § 611.22(b) by this notice. NOAA reserves the right to modify the surcharge at a later date if unanticipated claims occur.

Conditions for issuing permits. Section 204(b)(7) requires the Secretary of Commerce (Secretary) to establish certain conditions and restrictions which must be complied with by the owner or operator of the fishing vessel for which the permit is issued. NOAA will require certain financial assurances from a foreign nation in circumstances which warrant additional protection of U.S. interests. NOAA proposes to amend § 611.3(c)(3) to clarify that all fees, surcharges, and any other financial assurances required by the Secretary must be paid before fishing permits will

be issued by the Assistant Administrator.

Effective periods of permits. Foreign fishing permits are valid when issued but not earlier than January 1 of the year for which the permits are issued. Such permits are generally effective through December 31 of that year. Section 204(b)(7) of the Magnuson Act requires the Secretary to impose "any other condition and restriction on the permit related to fishery conservation and management which the Secretary prescribes as necessary and appropriate". Two situations have occurred in which the Secretary has limited the effective periods of some permits to periods less than the remainder of the calendar year. The first is the need to limit fishing operations to monitor performance of foreign joint venture vessels as a basis for continuing the permit for a succeeding period. The second is limiting fishing operations to monitor vessel compliance with the foreign fishing regulations. NOAA proposes to codify in § 611.3(f)(2) this authority under the Magnuson Act to limit fishing operations.

Two technical changes are proposed in §§ 611.20 and 611.22 to reflect current organizational titles. One technical change is proposed to divide paragraph 611.22(a) into two paragraphs and the last change is made to delete an unnecessary reference to Federally chartered banks.

Classification

NOAA has prepared a draft regulatory impact review initial regulatory/flexibility analysis (RIR/IRFA) that discusses the economic consequences and impacts of the proposed regulations. Copies of the RIR/IRFA are available at the above address. Based on the RIR/IRFA, the Administrator, NOAA, has determined that the proposed regulations do not constitute a major rule under E.O. 12291. The RIR/IRFA demonstrates that the proposed rules comply with the requirements of Section 2 of E.O. 12291.

These regulations will not have a significant impact on a substantial number of small entities, because the only impacts are on foreign entities. The costs to foreign vessels and their owners will be slightly increased, but the increases are only 0.2 percent of the total fishing fees projected to be paid in 1983 to the United States. The General Counsel of the Department of Commerce has certified this to the Small Business Administration.

This action does not constitute a major Federal action significantly affecting the quality of the human environment. These amendments are programmatic functions with no potential for environmental impacts under the National Environmental Policy Act.

These proposed rules have no information collection provisions, for purposes of the Paperwork Reduction Act, 44 U.S.C. 3510 *et seq.*

List of Subjects in 50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting requirements.

Dated: September 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

PART 611—[AMENDED]

For the reasons set out in the preamble, 50 CFR Part 611 is proposed to be amended as follows:

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*, unless otherwise noted.

2. Revise § 611.3 (c)(3), (f) (2) and (3) to read as follows:

§ 611.3 Permits for foreign fishing vessels.

* * * * *

(c) * * *

(3) The payment of the fees and assurances required by the Secretary, including any surcharge fees; and

* * * * * *

(f) * * *

(2) Permits are issued by the Assistant Administrator, through the Secretary of State, in Washington, D.C., U.S.A. Permits are valid when issued, but not earlier than January 1 of the year for which the permit is issued. Permits are valid only for the specific vessel(s) for which they are issued. A permit is effective through December 31 of the year for which it is issued, unless the effective period is restricted by additional conditions and restrictions attached to the permit. However, permits are not issued for small boats used for fishing which are launched from large vessels. Each such small boat is an extension of this mothership and any enforcement action or permit sanction which might result from the activities of any such small boat would be taken against the mothership. A permit specifies the permit number for each permitted vessel, the fisheries and activities authorized for each permitted vessel, any other activities authorized, any additional conditions and restrictions applicable to that permit and the date of issuance of the permit.

(3) A vessel may engage in fishing activities authorized in its permit within the effective period of the permit and only after:

* * * * *

§ 611.20 [Amended]

3. In § 611.20(c) revise "Office of Resource Conservation and Management, F/CM" to read "Office of Fishery Management, F/M1".

4. In § 611.22, designate the third sentence of § 611.22(a)(1)(ii) as § 611.22(a)(1)(iii); remove from the fourth sentence of paragraph (a)(2)(ii) the words "federally chartered"; and revise paragraphs (a)(1) and (b) to read as follows:

§ 611.22 Fee schedule for foreign fishing permits.

(a) * * *

(1) *Permit application fees.* (i) Each vessel permit application submitted under § 611.3 must be accompanied by a fee of $86 per vessel, plus the surcharge if required under paragraph (b) of this section, rounded to the nearest dollar. At the time the application is submitted to the Department of State, a check for the fees, made out to "NOAA—Department of Commerce", must be sent to: Division Chief, Fees, Permits and Regulations Division, F/M12, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. 20235. The permit fee payment must be accompanied by a list of the vessels for which payment is made.

* * * * *

(b) The owner or operator of each foreign vessel who accepts and pays permit application or poundage fees under paragraph (a) of this section may also be required to pay a surcharge. The Assistant Administrator has waived the surcharge because he has determined that the Fishing Vessel and Gear Damage Compensation Fund is capitalized sufficiently. The Assistant Administrator may reinstate or increase the surcharge during the year to a maximum level of 20 percent, if needed to maintain capitalization of the fund.

[FR Doc. 83-25422 Filed 9-16-83; 8:45 am]

BILLING CODE 3510-22-M

---

50 CFR Part 611

[Docket No. 30826.174]

Proposed Foreign Fishing Vessel Observer Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA, Commerce).

ACTION: Proposed rule.

SUMMARY: NOAA issues this proposed rule to establish a supplementary foreign fishing vessel observer program. This action is necessary to certify qualified supplementary observers, establish a reasonable fee schedule and monitor the performance of supplementary observers. This action is intended to provide for the orderly implementation of a supplementary observer program as required by law.

DATES: Comments on the proposed rule must be submitted on or before October 19, 1983.

ADDRESSES: Send comments to Gary A. Wood, National Marine Fisheries Service, F/Mx1, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT: Gary A. Wood, 202–634–7265.

SUPPLEMENTARY INFORMATION: Section 201(i)(1) of the Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that a U.S. obeserver be stationed aboard each foreign fishing vessel while it is engaged in fishing in the fishery conservation zone, with certain exceptions. Section 201(i)(6) of the Magnuson Act requires the secretary to implement a supplementary observer program if the annual appropriation is insufficient to provide for full observer coverage as required by Section 201(i)(1). In implementing a supplementary observer program, the Magnuson Act requires that NOAA do the following:

1. Certify as supplementary observers only those individuals who are citizens or nationals of the United States, and who have the requisite education or experience to carry out the duties of an observer;

2. Establish standards of conduct for supplementary observers equivalent to those applicable to Federal personnel;

3. Establish a reasonable schedule of fees that certified observers or their agents must be paid by the owners and operators of foreign fishing vessels for observer services; and

4. Monitor the performance of supplementary observers to ensure that it meets the purposes of the Magnuson Act.

The size of the supplementary observer program is dependent on foreign fishing effort and the size of the appropriation for fiscal year (FY) 1984. Foreign fishing effort in 1984 is expected to equal foreign effort in 1983. The expected appropriation for the observer program in FY 1984 is $12 million. Under such circumstances, no supplementary observers would be needed because NOAA would have sufficient appropriation to achieve full observer coverage using in-house resources.

It is unlikely that foreign fishing effort will increase in 1984. A decrease in the FY 1984 appropriation could occur, but there is no way for NOAA to predict the likelihood or size of such a decrease.

Classification

The NOAA Assistant Administrator for fisheries (Assistant Administrator) has determined that this rule is consistent with the Magnuson Act and other applicable laws.

This action is categorically excluded from the requirement to prepare an environmental assessment by NOAA Directive 02–10.

The NOAA Administrator determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Exective Order 12291, because it will not result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The General Counsel of the Department of Commerce has certified to the Small Business Administration that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities because it applies only to the owners or operators of foreign fishing vessels. As a result, a regulatory flexibility analysis was not prepared.

This rule does not contain a collection of information for purposes of the Paper Reduction Act.

List of Subjects in 50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting requirements.

Dated: September 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

PART 611—[AMENDED]

For the reasons set forth in the preamble, 50 CFR Part 611 is amended as follows:

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*, unless otherwise noted.)

2. Section 611.8 is amended by adding a new paragraph (e) to read as follows:

§ 611.8 Observers.

* * * * *

(e) (1) In the event an observer is not available for assignment to a foreign fishing vessel because of an insufficient Congressional appropriation, the Assistant Administrator will assign a supplementary observer to that vessel.

(2) Supplementary observers must be certified before they are deployed to foreign fishing vessels. Persons wishing to be certified as supplementary observers will present to the appropriate NOAA personnel office, either directly or through an agent, the following:

(i) Proof of United States citizenship or nationality; and

(ii) A written summary of relevant education or experience.

(3) Upon receipt of the material required above, the NOAA personnel office will certify the applicant as qualified for the position of supplementary observer if the following conditions are met:

(i) The applicant is a citizen or national of the United States;

(ii) The applicant has education or experience equivalent to the education or experience required of persons hired as observers by NMFS as either Federal personnel or contract employees. The education and experience required for certification may vary according to the requirements of managing the foreign fishery in which the supplementary observer would be deployed.

(4) Prior to deployment to foreign fishing vessels, certified supplementary observers must satisfactorily complete a course of training approved by the Assistant Administrator as equivalent to that received by persons hired as observers by NMFS as either Federal personnel or contract employees. The course of training may vary according to the foreign fishery in which the supplementary observer would be deployed.

(5) Prior to deployment to foreign fishing vessels, certified supplementary observers must agree in writing to abide by standards of conduct equivalent to those applicable to Federal personnel.

(6) Persons acting as supplementary observers shall be paid fees and expenses by the owners and operators of the foreign fishing vessels to which they are deployed. Fees and expenses paid to supplementary observers will, as a minimum, include the following:

(i) Salary and benefits, including overtime, equivalent to the salary and benefits paid to observers employed by NMFS. Such salary and benefits may vary according to the fishery to which a supplementary observer is deployed;

(ii) The costs of any equipment, including safety equipment, necessary to perform the duties of observers. This

equipment will be specified by the Assistant Administrator according to the requirements of the fishery. The equipment will be equivalent to the equipment used in the fishery by observers employed by NMFS.

(iii) The costs of post-certification training required by paragraph (e)(4) of this section;

(iv) The costs of travel, transportation, and per diem associated with deploying supplementary observers to foreign fishing vessels, including the costs of travel, transportation, and per diem from the supplementary observer's post of duty to the point of embarkation to the foreign fishing vessel, and then from the point of disembarkation to the post of duty from whence the trip began. For the purposes of these regulations, the Assistant Administrator will designate posts of duty for supplementary observers;

(v) The cost for U.S. Customs inspection for observers disembarking after deployment; and

(vi) The costs of travel, transportation, and per diem associated with the debriefing by NFMS officials following deployment of a supplementary observer.

(7) The owners and operators of foreign fishing vessels shall also pay to NMFS as part of the surcharge required by Section 201(i)(4) of the Magnuson Fishery Conservation and Management Act, the following costs:

(i) The costs of certifying applicants for the position of supplementary observer;

(ii) The costs associated with communications with supplementary observers for transmission of data and routine messages;

(iii) The costs for the management and analysis of data collected by supplementary observers.

(8) In the event a supplementary observer is represented by an agent, the owners and operators of foreign fishing vessels shall pay a fee to the agent to cover the administrative and overhead costs for the agent's services. This fee is a negotiable item between the owners and operators of foreign fishing vessels and the agents with whom they contract for the services of a supplementary observer.

(9) The duties of supplementary observers and their deployment and work schedules will be specified by the Assistant Administrator.

(10) All data collected by supplementary observers will be under the exclusive control of the Assistant Administrator.

(11) Certification of a supplementary observer may be suspended or revoked by the Assistant Administrator under the following conditions:

(i) A supplementary observer fails to perform the duties specified by the Assistant Administrator as provided for by paragraph (e)(9) of this section; or

(ii) A supplementary observer fails to abide by the standards of conduct provided for by paragraph (e)(5) of this section.

(12) The suspension or revocation of the certification of a supplementary observer by the Assistant Administrator may be based on the following:

(i) Boarding inspection reports by authorized officers of the U.S. Coast Guard or NMFS that indicate the supplementary observer has failed to perform his/her specified duties, and/or has failed to abide by the established standards of conduct; or

(ii) An analysis by NMFS of the data collected by supplementary observers indicating improper or incorrect data collection or recording. The failure properly to collect or record data is sufficient to justify decertification of supplementary observer; no intent to defraud need be proved.

(13) Unless otherwise provided for in these regulations, no foreign fishing vessel may conduct fishing operations within the fishery conservation zone unless a U.S. observer employed by NMFS, or certified as a supplementary observer, is aboard.

[Docket No. 30810-155]

50 CFR Parts 611 and 675

Foreign Fishing; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: Amendment 1 to the fishery management plan for the groundfish fishery in the Bering Sea and Aleutian Islands area (FMP) is approved. NOAA announces its availability and issues a proposed rulemaking to implement the amendment which (1) Establishes a multi-year, multi-species optimum yield for the Bering Sea and Aleutian Islands area groundfish complex, (2) Establishes a framework procedure for the determination and apportionment of amounts of groundfish specified for total allowable catch, domestic annual harvest, reserves, and total allowable level of foreign fishing, (3) Modifies domestic restrictions in the Winter Halibut Savings Area and Bristol Bay Pot Sanctuary, (4) Modifies foreign trawl restrictions in the area known as Petrel Bank, and (5) Modifies certain appendices and annexes to the FMP. This management approach is proposed in response to growing concern that the fishery management plan in its current form does not provide the flexibility necessary for efficient management of the groundfish resource and the fishery. The framework management approach proposed by this amendment will be administratively less cumbersome than the approach currently prescribed in the fishery management plan and will allow more timely implementation of management decisions made in response to the needs of the rapidly developing U.S. groundfish fishery and to changes in the condition of the groundfish resource itself.

DATE: Comments on the amendment and proposed rule are invited until November 3, 1983.

ADDRESSES: Comments may be mailed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802, or delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska. Copies of the amendment, environmental impact statement, and the regulatory impact review/initial regulatory flexibility analysis may be obtained from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, Alaska 99510; telephone 907-274-4563.

FOR FURTHER INFORMATION CONTACT: Susan J. Salveson (Regional Plan Coordinator), 907-586-7228.

SUPPLEMENTARY INFORMATION:

Background

The FMP was implemented on January 1, 1982 (46 FR 63295, December 31, 1981), by the NOAA Assistant Administrator for Fisheries (Assistant Administrator) under the Magnuson Fishery Conservation and Management Act (Magnuson Act). Nine amendments to the FMP have been adopted by the Council under the authority of the Magnuson Act. Four of these amendments have been implemented: Amendments 1a and 2 (47 FR 1295), Amendment 4 (48 FR 21336), Amendment 3 (48 FR 24719), and Amendment 7 (48 FR 34962); Amendment 5 was withdrawn because it was superceded by Amendment 3.

Amendment 1 to the FMP was adopted by the Council on March 27, 1981, and is the subject of this action. The amendment proposes to make the following changes to the management system prescribed in the FMP: (1) The

current optimum yield (OY) specifications for individual groundfish species are replaced by a combined OY for the entire Bering Sea and Aleutian Islands area groundfish resource, or "complex," with a total allowable catch (TAC) specified anually for each target species and for the "other species" category; (2) A new system is established for the annual determination of domestic annual harvest (DAH), total allowable level of foreign fishing (TALFF), and reserves, and for apportionment of reserves to DAH and TALFF and of the DAH that will not be harvested by U.S. fishing vessels to TALFF; (3) Domestic fishing restrictions stipulated in the FMP for the Bristol Bay Pot Sanctuary and the Winter Halibut Saving Area are changed to allow year-round fishing; (4) The time of the foreign trawl closure in Area "D", known as the Petrel Bank, is changed to coincide with the dates of the domestic king crab and Tanner crab fisheries, and to protect molting crab; and (5) Appendices and annexes to the FMP are revised to reflect changes made in the body of the FMP. These aspects of Amendment 1 are discussed further below.

OY of the Groundfish Complex

Amendment 1 replaces species-specific OYs with a combined OY specification for the entire Bering Sea and Aleutian Islands area groundfish complex. Commercial catch statistics and resource assessment surveys conducted by the National Marine Fisheries Service (NMFS) show that the groundfish complex of the Bering Sea and Aleutian Islands area can be treated as a distinct fishery management unit. The complex has more than ten commercially important species and many others of lesser or no commercial importance. It forms a large subsystem of the Bering Sea ecosystem with intricate interrelationships involving predators, prey, competitors, and the environment. The current practice of treating each species group as a management unit in relative isolation from other species groups ignors these demonstrated interrelationships, and limits the managing agencies' ability to respond quickly to fluctuations in the composition of the groundfish complex. Therefore, the productivity and maximum sustainable yeld (MSY) of groundfish species can best be determined for the groundfish complex as a unit, rather than for each of many individual species groups. OY is determined by adjusting MSY on the basis of relevant social and economic factors, in addition to short-term biological factors.

The most current information available shows that the combine MSY of target species and the "other species" fluctuates from year to year within the range of 1.7 to 2.4 million metric tons. This amount was derived by adding together the MSYs of each target species and the "other species" category, as defined in the FMP. These MSYs were estimated from a number of mathematical production models, from the examination of statistical trends relative to stock condition, and from the assessment of the overall condition of the groundfish stocks. The techniques used to analyze the data varied considerable from species to species, depending on the quality and completeness of the available data bases. The MSY of the "nonspecified species" category is established at any amount of this category that is taken incidentially to the harvest of the MSY of the target species and the "other species" categories. Nonspecified species have little or no economic value.

Amendment 1 sets the OY of the Bering Sea and Aleutian Islands area groundfish complex equal to 85 percent of the MSY range for the "target" and "other" species categories, (i.e., 1.4 to 2.0 million metric tons (mt) to the extent this can be harvested consistently with the management measures of the FMP plus the incidental harvest of the "nonspecified species" category. The deviation from the MSY reflects the combined influence of several factors that stem from the quality of the data used, condition of stocks, and inadequacies in population and ecosystem models. The OY range reflects the foreseeable variations in abundance levels of the various components of the groundfish complex induced by environmental factors and by predator/prey relationships. These variations, in turn, will affect the production from individual stocks, as well as the entire complex, that will be available for harvest from year to year.

The 1.4 to 2.0 million mt OT range approximates reported harvest levels by the Bering Sea and Aleutian Islands area groundfish fishery over the past 15 years. During this time, some groundfish stocks have declined, primarily during the late 1960s and early 1970s when, due to insufficient monitoring of the groundfish catch, annual harvests may have been much greater than the maximum reported catch of 2.4 million mt. Subsequent improvement of catch and effort data and a more conservative management regime resulted in the recovery of many affected stocks, primarily pollock and yellowfin sole. In addition, information from catch data and resource assessments indicates that the selective harvest of stocks of target species in the groundfish fishery has resulted in a change of species and stock composition in the Bering Sea. The most current information available indicates that the OY range proposed in Amendment 1 is compatible with these changes and the current status of the Bering and Aleutian Islands area groundfish resource.

Total Allowable Catch (TAC)

The annual TACs for the individual target species and for the "other species" category will be determined by the Alaska Regional Director of the National Marine Fisheries Service (NMFS) by the end of the preceding fishing year. The total TAC for all target species and the "other species" category will be within the OY range of 1.4 to 2.0 million mt, and will be subject to the management measures prescribed in the FMP. The TAC for the "nonspecified species" category equals the amount caught during the fishing year in the course of harvesting the TAC for the target and "other species" categories.

Before the Regional Director's determination, the Council will recommend to him TACs for the target species and the "other species" category based on the best available data concerning the stocks and the fisheries. These recommendations will be made available to the public for comment. If the Council does not recommend final TACs by December 15, the TACs already established will automatically constitute the Council's recommendation to the Regional Director for the new fishing year.

The Council's TAC recommendations will be based upon the following types of information:

Biological condition of the stocks. Resource assessment documents (RADs) will be prepared for the Council by July 1 of each year by the Council's Plan Maintenance Team in consultation with the Northwest and Alaska Fisheries Centers and other appropriate scientific agencies. These documents will provide information on:

a. Historical catch trend;

b. Updated estimates of MSY of the groundfish complex and of the component species groups;

c. Assessments on the stock condition of each target species and the "other species" category;

d. Assessments of the multi-species and ecosystem impacts of harvesting the groundfish complex at current levels given the assessed condition of stocks, including consideration of rebuilding depressed stocks; and

e. Alternative harvesting strategies and related effects on the component species groups.

Socioeconomic considerations. The Council's recommendation of TACs for each target species and the "other species" category will also be based on socioeconomic considerations that are consistent with the goals of the FMP, including:

a. The need to promote efficiency in the utilization of fishery resources including minimizing costs;

b. The need to manage for the optimum marketable size of a species;

c. The impact of groundfish harvests on prohibited species and the domestic target fisheries which utilize these species;

d. The desire to enhance depleted stocks;

e. Seasonal access to the groundfish fishery by domestic fishing vessels;

f. The commercial importance of a fishery to local communities;

g. The importance of a fishery to subsistence users; and

h. The need to promote domestic utilization of certain species.

Reserves

The groundfish reserve at the beginning of each fishing year will equal the sum of 15 percent of each TAC established for target species and the "other species" category's TAC. Thus, the initial TACs are automatically reduced by 15 percent from the amounts specified by the Regional Director for the year. The groundfish reserve is used for (a) Unexpected expansion of the domestic fishery, (b) Correction of operational problems of domestic and foreign fishing fleets, (c) Unexpected adjustments of species TACs according to the condition of stocks during the fishing year, and (d) Allocations.

The reserve is not designated by species or species group and will be apportioned to the fishery during the fishing year by the Regional Director in amounts and by species that he determines to be appropriate. The apportionment of the reserve to target species or to the "other species" category must be consistent with the most recent assessments of resource conditions, unless the Regional Director finds that the socioeconomic considerations listed above or specified fishery operational problems dictate otherwise. The Regional Director must also find that the apportionment of reserves will not result in overfishing as defined in the national standard guidelines for fishery conservation and management (48 FR 7402). The Regional Director may withhold reserves for conservation reasons.

Domestic Annual Harvest and Total Allowable Level of Foreign Fishing

Currently, Annex II of the FMP, "Derivation of DAH," specifies initial amounts of groundfish for the following three components of DAH: expected domestic annual processing (DAP), the domestic non-processing catch (DNP), and the U.S. harvest authorized for delivery to foreign processors (JVP). Under the current management regime, these amounts may not be adjusted without initiating the lengthy and cumbersome plan amendment process. As a result, DAH cannot be readily updated in response to the rapidly developing domestic groundfish fishery. In addition, the current total DNP amount of 1,500 mt was originally established in the FMP without prior knowledge or record of the amount of groundfish actually used by U.S. fishermen for bait or personal consumption, and in all likelihood does not truly reflect the amount of groundfish used for these purposes. Furthermore, the monitoring of the small amount of groundfish specified as DNP is not practicable and is not done.

In view of these problems, Amendment 1 eliminates Annex II to the FMP and establishes a procedure for determining DAH so that it may be updated each year without undergoing the cumbersome amendment process. First, the DNP will no longer be specified, but is assumed to be included in the estimate of DAP. Second, the DAP and JVP amounts for each target species and the "Other species" category will equal the amount harvested and processed by solely domestic and joint venture fisheries during the previous year, plus any additional amounts the Regional Director projects will be used by the U.S. fishing industry during the coming year. This projection will be based on projected increases in U.S. processing and harvesting during the coming year. These projections will be based upon the latest reliable information that is available, including industry surveys, market data, and stated intentions of representatives of the U.S. groundfish industry.

The TALFF for each target species and for the "other species" category at the beginning of the fishing year is the remainder of each TAC after subtracting the DAH and the 15 percent of the TAC which is credited to the reserve. The TALFFs may be increased during the year by apportionments of reserves and surplus DAH. The TALFF for the "nonspecified species" category equals the amount of that category caught during the fishing year while harvesting the TALFFs for the target species and "other species" categories.

The Regional Director's proposed estimates of DAP and JVP, together with his proposed deteminatons of TAC, reserves, and TALFF, will be made available for public review and comment.

Reapportionment of Reserve and Unneeded DAH

Under the current FMP, surplus DAH and reserves are reapportioned to TALFF according to a set schedule and limitations are placed on the amount of reserves that may be released to TALFF at any one time. This schedule of apportionment has been found to be too rigid for timely and efficient management of the groundfish fishery. Therefore, Amendment 1 modifies the procedure for apportioning reserves and unneeded DAH as follows.

As soon as practicable after April 1, June 1, and August 1, and on such other dates as are determined appropriate, the Regional Director will apportion to DAH any amounts from the reserve that are needed in order to prevent a closure of the domestic fishery. He will also assess the progress of the domestic and foreign fisheries and apportion to TALFF any portion of DAH or the reserve that he determines will not be harvested by U.S. fishing vessels during the remainder of the fishing year, except that no transfer of surplus DAH to TALFF may be made if that transfer is likely to have an adverse biological, economic, or social consequence. As stated above, the Regional Director can withhold reserves for conservation reasons only.

Domestic Fishing Area Limitations

Amendment 1 modifies the restrictions on the domestic fishery in the Bristol Bay Pot Sanctuary and the Winter Halibut Savings Area and reduces the size of the latter area by eliminating the "Misty Moon" grounds south of the Pribilof Islands. The FMP currently states that (1) Domestic trawling in the Bristol Bay Pot Sanctuary is allowed only during open seasons of the U.S. Bering Sea crab fisheries; (2) Domestic trawling in the Winter Halibut Savings Area is allowed from December 1 through May 31 until the domestic trawl catch reaches 2,000 metric tons; and (3) Domestic longlining in the Winter Halibut Savings Area is allowed landward of the 500 meter isobath until the total U.S. longline catch (excluding Pacific halibut) reaches 2,000 metric tons. These restrictions were initially imposed on the domestic groundfish fishery in order to reduce the mortality of juvenile halibut while still allowing

the fishing of groundfish for crab bait and some development of a domestic food fishery. Subsequent growth of the domestic groundfish fishery was accompanied by protests from domestic fishermen that current FMP provisions unreasonably hinder further development of the domestic groundfish fishery.

In view of these concerns, the Council adopted modifications to the restrictions on the domestic groundfish fishery and incorporated these changes as part of Amendment 1. When the FMP was implemented, the Assistant Administrator gave effect to the Council's intent and accommodated the concerns of the U.S. fishing industry by deleting from the implementing rules for the FMP any provision that would implement restrictions in the FMP on domestic groundfish fishing in the Bristol Bay Pot Sanctuary and Winter Halibut Savings Area. Amendment 1 now proposes to formally delete these restrictions from the FMP itself by (1) Eliminating the "Misty Moon" grounds south of the Pribilof Islands from the Winter Halibut Savings Area; (2) Allowing an experimental year-round domestic trawl fishery in the Winter Halibut Savings Area that will be monitored to the extent possible by observers; and (3) Allowing year-round domestic trawling in the Bristol Bay Pot Sanctuary and year-round domestic longlining in the Winter Halibut Savings Area.

Foreign Fishing Area Limitations

The FMP currently stipulates that Area "D", known as Petrel Bank, is closed to foreign trawling landward of 12 nautical miles from January 1 through June 30. Amendment 1 proposes to modify this restriction by closing the entire Petrel Bank to foreign trawling from seven days before the opening of the domestic king crab fishery, for which the exact date is set annually by the State of Alaska, through June 30. This closure will (1) Provide the flexibility necessary to accommodate any changes in the king crab fishing season without having to amend the FMP to support changes in regulations; (2) Maintain protection against gear conflict and groundfish preemption problems in the growing domestic Tanner crab fishery which currently operates from November 10 through June 15 in the western Aleutian Islands area; and (3) Mitigate the trawl mortality of king crab during their molting period which occurs during the spring months.

FMP Information Base

The current Annex I to the FMP, "Derivation of Acceptable Biological Catch (ABC)", is a summary of information on the status of stocks of various species and species groups which existed before 1979. This information is based mainly on single species stock assessment studies, and contains estimates of MSY, equilibrium yield (EY), and ABC. Because Amendment 1 will implement a multi-species, ecosystem approach to management, single species stock assessments by themselves will not provide sufficient biological information for determining TACs.

Amendment 1 substitutes a new Annex I to the FMP which is a description of the RAD. The RADs will be prepared annually by the Council's Plan Maintenance Team in consultation with the Northwest and Alaska Fisheries Center and other appropriate scientific agencies. The RADs will provide information on (1) The historical catch trend; (2) An updated estimate of the MSY of the groundfish complex and its component species groups; (3) Assessments of the stock condition of each target species and the "other species" category; (4) Assessments of the multi-species and ecosystem impacts of harvesting the groundfish complex at current levels given the assessed condition of stocks, including considerations of rebuilding depressed stocks; and (5) Alternative harvesting strategies and related effects on the component species groups.

The current Annex I serves two main purposes: (1) To provide readers and reviewers of the FMP with knowledge of its factual content; and (2) To illustrate the manner in which new data are used to obtain individual species groups' estimates of MSY, EY and ABC. The RAD will also serve these two purposes and will expend the biological information base necessary to form the basis for specifying TACs under a multi-species ecosystem management system.

The RADs are not part of the FMP proper, but rather are annual updates of biological information which the Council will make available to the publaic for review. This will ensure that the best available scientific information is used as the basis for establishing TACs and that the OY range for the taraget species and the "other species" categories is appropriate.

Amendment 1 also updates other appendices and annexes to the FMP to reflect the most current scientific information as of the time of the amendment's adoption. Many of these changes have no regulatory effect, and are provided for informational and illustrative purposes.

Classification

The Administrator of NOAA (Administrator) has determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. Amendment 1 will encourage development of the domestic groundfish industry and the expansion of the U.S. fishing industry as a whole by providing more access to the Bristol Bay Pot Sanctuary and the Winter Halibut Savings Area and by allowing managing acencies to be more responsive to the needs of domestic fishermen and processors. This amendment can, therefore, be expected to reduce costs for consumers and producers in that industry and to enhance the competitive position of the U.S. fishing industry relative to the fishing industries of other nations.

This proposed rule, if adopted, will have a significant economic impact on a substantial number of small entities. The regulatory impact review/initial regulatory flexibility analysis (RIR/IRFA) prepared on the proposed rule developed three possible five-year scenarios for the domestic groundfish fishery in the Bering Sea and Aleutian Islands area and analyzed the ex-vessel economic impacts of the proposed amendment under each scenario. According to the analysis, by 1986 the total U.S. catch of Bering Sea Aleutian Islands area groundfish could range between 470,000 mt and 870,000 mt. Based on 1981 price data, these domestic harvest levels would represent between $96.2 and $130 million at the ex-vessel level, alone. The management flexibility inherent In Admendment 1 would facilitate such increases in DAH and would allow more timely and efficient implementation of other management decisions made in response to the needs of the U.S. fishing industry and to changes in the condition of the groundfish resource itself. As a reslult, the economic environment necessary for the continued rapid growth of a domestic groundfish industry would be enhanced and *all* sectors of the U.S. fishing industry which utilize Bering Sea and Aleutian Island are groundfish would benefit from the implementation of the proposed amendment. A copy of the RIR/IRFA may be obtained from the Council at the address given above.

The Regional Director has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska and has submitted

this determination for review by the responsible State agency under section 307 of the Coastal Zone Management Act. The State Division of Policy Development and Planning concurred in the Council's determination on March 7, 1983.

The Regional Director has determined that Amendment 1 to the FMP (1) Is necessary and appropriate for the conservation and management of fishery resources in the Bering Sea and Aleutian Islands area and (2) Is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. He has therefore, under the Magnuson Act, approved Amendment 1. The environmental impact statement (EIS) written for the FMP also addresses Amendment 1 and is available from the Council at the address set forth above.

The proposed rulemaking does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

List of Subjects

50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting and recordkeeping requirements.

50 CFR Part 675

Fish, Fisheries, Reporting and recordkeeping requirements.

Dated: September 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Parts 611 and 675 are proposed to be amended as follows:

1. The authority citation for Part 611 reads as follows:

Authority: 16 U.S.C. *et seq.*, unless otherwise noted.

2. In § 611.93, Paragraphs (a)(3), (b)(1)(i), (b)(2), (b)(3)(ii)(A), (c)(2)(i) are revised, paragraph (c)(2)(ii)(D) is redesignated as (c)(2)(ii)(E) and the references to paragraph "(c)(2)(ii)(D)" in paragraph (c) are changed to "(c)(2)(ii)(E)", and a new paragraph (c)(2)(ii)(D) is added to read as follows:

§ 611.93 Bering Sea and Aleutian Island Area.

(a) * * *

(3) The optimum yield for the fishery regulated by this section and by 50 CFR Part 675 is a range of 1.4 to 2.0 million mt for target species and the "other species" category in the management area (to the extent this amount can be harvested consistently with this part and 50 CFR Part 675), plus the amounts of "nonspecified species" taken incidentally to the harvest of target species and the "other species" category. For a definition of the categories of species involved in the fishery, see Table 1 of this section.

(b) *Authorized fishery.* (1)(i) See 50 CFR Part 675 Subpart B for procedures to determine total allowable catch (TAC), reserve, domestic annual harvest (DAH), and total allowable level of foreign fishing (TALFF).

* * * * *

(2) For apportionment to TALFF of Reserves and surplus DAH, see 50 CFR Part 675, Subpart B.

(3) * * *

(ii) * * *

(A) *Attainment of quota.* If the amount of "other species" or any target species, except sablefish, turbots, or Pacific cod, that is apportioned to the fishery will be reached, the Regional Director will prohibit foreign trawling in all or part of the management area until January 1. If the amount of sablefish, turbots, or Pacific cod that is apportioned to the fishery will be reached, the Regional Director will prohibit all foreign harvesting in all or part of the management area until January 1.

* * * * *

(c) * * *

(2) *Trawling.* (i) Trawling by foreign vessels between 3 and 12 nautical miles from the baseline use to measure the territorial sea is allowed (A) at all times in the area bounded by 170°00' W. and 172°00' W. longitude south of the Aleutians and between 170°30' W. and 170°00' W. longitude north of the Aleutians, (B) on Petrel Bank from July 1 to seven days before the opening of the U.S. king crab fishery, and (C) from May 1 through December 31 in other areas west of 178°30' W. longitude. Petrel Bank is bordered by straight lines connecting the following coordinates in the order listed:

Latitude	Longitude
52°51' N.	178°30' W.
52°51' N.	179°00' E.
51°15' N.	179°00' E.
51°15' N.	178°30' W.
51°15' N.	178°30' W.

(ii) * * *

(D) From seven days before the opening of the U.S. king crab fishery, through June 30 in the area known as Petrel Bank, described in paragraph (c)(2)(i) of this section.

* * * * *

3. The authority citation for Part 675 is revised to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 675.20, paragraphs (a) and (b) are revised, a new paragraph (d) is added, Table 1 is revised to read as follows:

§ 675.20 General limitations.

(a) *OY, TAC, Reserve, DAH, and TALFF*— (1) *Optimum yield.* The optimum yield (OY) for the fishery regulated by this section and by 50 CFR 611.93 is a range of 1.4 to 2.0 million mt for target species and the "other species" category in the management area (to the extent this amount can be harvested consistently with this part and 50 CFR Part 611), plus the amounts of "nonspecified species" taken incidentally to the harvest of target species and the "other species" category. The species categories are defined in Table 1 of this section.

TABLE 1—CATEGORIES OF SPECIES INVOLVED IN THE BERING SEA AND ALEUTIAN ISLANDS FISHERY

Unallocated species[1]	Target species	Other species	Non-specified	Groundfish
Salmonids, halibut, herring, king crab, Tanner crab, coral, shrimp, horsehair crab, lyre crab, scallops, snails, dungeness crab, surf clams.	Pollock, cod, other flatfishes, Atka mackerel, sablefish, turbots, squid, Pacific ocean perch, other rockfish, yellowfin sole.	Sculpins, sharks, skates, eulachon, smelts, capelin, octopus.	All species not included in previous categories.	Target, "other" and non-specified species.

[1] Salmonids, Pacific halibut, Tanner crab, and any other unallocated species the retention of which is prohibited by other applicable law, must be returned to the sea with a minimum of injury.

(2) *TAC.* The Secretary of Commerce, after consultation with the North Pacific Fishery Management Council (Council), will specify the total allowable catch (TAC) for each calendar year for each target species and for the "other species" category. The sum of the TACs established must be within the OY range of 1.4–2.0 million mt for target species and the "other species" category.

(i) The annual determination of the TAC for each target species and the "other species" category, the apportionment of reserves to these species, and the reapportionment of

surplus domestic annual harvest (DAH) to total allowable level of foreign fishing (TALFF) shall be based upon and be consistent with two types of information:

(A) Biological condition of groundfish stocks as set forth in the resource assessment documents prepared annually for the Council. These documents shall provide information on historical catch trend; updated estimates of the maximum sustainable yield of the groundfish complex and its component species groups; assessments of the stock condition of each target species and the "other species" category; assessments of the multi-species and ecosystem impacts of harvesting the groundfish complex at current levels given the assessed condition of stocks, including consideration of rebuilding depressed stocks; and alternative harvesting strategies and related effects on the component species groups.

(B) Socioeconomic considerations that are consistent with the goals of the fishery management plan for the groundfish fishery of the Bering Sea and Aleutian Islands area, including the need to promote efficiency in the utilization of fishery resources, including minimizing costs; the need to manage for the optimum marketable size of a species; the impact of groundfish harvests on prohibited species and the domestic target fisheries which utilize these species; the desire to enhance depleted stocks; the seasonal access to the groundfish fishery by domestic fishing vessels; the commercial importance of a fishery to local communities; the importance of a fishery to subsistence users; and the need to promote utilization of certain species.

(3) *Reserve.* Fifteen percent of the TAC for each target species and the "other species" category is automatically placed in a reserve, and the remaining 85 percent of the TAC for each target species and the "other species" category is apportioned between DAH and TALFF. The reserve is not designated by species or species group and any amount of the reserve may be apportioned to a target species or the "other species" category provided that such apportionments are consistent with paragraph (a)(2)(i) of this section and do not result in overfishing of a target species or the "other species" category.

(4) *DAH.* (i) The initial amounts for the two components of DAH, i.e., expected domestic annual processing (DAP) and U.S. harvest authorized for delivery to foreign processors (JVP), will be determined each year by the Regional Director. The DAP and JVP amounts for each target species and for the "other species" category shall equal the actual DAP and JVP of the previous year plus any additional amounts the Regional Director projects will be used by the U.S. fishing industry during the coming fishing year. This projection shall be based upon the latest reliable information that is available, including industry surveys, market data, and stated intentions by representatives for the U.S. fishing industry.

(ii) The DAH for the "nonspecified species" category equals the amount of that category caught during the fishing year while harvesting the DAH for the target species and "other species" categories.

(5) *TALFF.* The TALFF for each target species and for the "other species" category at the beginning of the fishing year is 85 percent of each TAC minus DAH. The TALFF for the "nonspecified species" category equals the amount caught during the fishing year while harvesting the TALFF for the target species and "other species" categories.

(6) *Notices.* As soon as is practicable after October 1 of each year, the Secretary of Commerce (Secretary), after consultation with the Council, shall publish in the **Federal Register** preliminary TAC, Reserve, DAP, JVP, and TALFF amounts for each target species and for the "other species" category for the next calendar year. Public comment on these amounts shall be accepted by the Secretary for a period of 30 days after the amounts have been published in the **Federal Register.** The Secretary shall consider all timely comments when determining, after consultation with the Council, the final annual TAC, initial DAH, and initial TALFF for each target species and the "other species" category for the next year. These figures shall be published in the **Federal Register** as soon as practicable after December 15 and made available to the public through other suitable means by the Regional Director.

(7) When the combined catch by foreign and U.S. vessels in the fishery or applicable sub-area of the fishery reaches the amount of a target species or the "other species" category that is apportioned to the fishery, further fishing by U.S. vessels that involves the taking of that species is prohibited in the management area or applicable sub-area for the remainder of the fishing year.

(b) *Apportioning the reserve and surplus DAH*—(1) *Dates.*—(i) *Reserve to DAH and TALFF.* As soon as practicable after April 1, June 1, and August 1, and on such other dates as he determines appropriate, the Secretary shall apportion to DAH and TALFF all or part of the reserve in accordance with paragraphs (a)(3) and (b)(2) of this section. The Secretary shall apportion to DAH the amount of reserve that he finds will be harvested by U.S. vessels during the remainder of the year and shall apportion to TALFF the remaining portion of the reserve that will not be apportioned to DAH. Part or all of the reserve may be withheld if an apportionment would adversely affect the conservation of groundfish resources or prohibited species.

(ii) *DAH to TALFF.* As soon as practicable after April 1, June 1, and August 2, and on such other dates as he determines appropriate, the Secretary shall reassess and shall apportion to TALFF the part of DAH that he determines will not be harvested by U.S. vessels during the remainder of the fishing year. All or part of the DAH may not be apportioned to TALFF if that action would adversely affect the conservation of groundfish or prohibited species or would have an adverse impact on the socioeconomic considerations set forth in paragraph (a)(2)(i)(B) of this section.

(2) *Procedure.* (i) The Secretary shall provide all interested persons an opportunity to comment on the proposed apportionments under paragraph (b)(1) of this section before such apportionments are made, unless he finds that there is good cause for not providing a prior comment opportunity, and publishes the reasons therefore in the notice of apportionment. No apportionment may take effect until it has been published in the **Federal Register** with a statement of the findings upon which the apportionment is based. Comments provided for in this paragraph must be received by the Secretary not later than 5 days before April 1, June 1, and August 1. If the Secretary determines for good cause that a notice of apportionment must be issued without providing interested persons a prior opportunity for public comment, he shall receive comments on the apportionment for a period of 15 days after its effective date. The Secretary shall consider all timely comments in deciding whether to make a proposed apportionment or to modify an apportionment that has previously been made, and shall publish responses to those comments in the **Federal Register** as soon as it is practicable.

(ii) Comments provided for in paragraphs (a)(6) and (b)(2)(i) of this section should be addressed to Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802. The Regional Director will make available to the public during business hours the aggregate data upon which any preliminary TAC, DAH, or

TALFF figure is based or the data upon which any apportionment of surplus DAH or reserve was or is proposed to be based at the National Marine Fisheries Service Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska. These data will be available for a sufficient period to facilitate informed comment by interested persons.

* * * * *

(d) The Secretary of Commerce shall make appropriate arrangements to place observers aboard U.S. trawl vessels operating in the Winter Halibut Savings Area from December 1 through May 31. The Winter Halibut Savings Area is bounded by straight lines connecting the following coordinates in the order listed:

Latitude	Longitude
54°36' N.	164°55'42" W. (Cape Sarichef Light)
52°48' N.	170°00' W.
55°30' N.	170°00' W.
55°30' N.	168°47' W.
56°00' N.	167°45' W.
56°00' N.	166°00' W.
56°30' N.	166°00' W.
56°30' N.	163°00' W.
56°20' N.	163°00' W.
55°16' N.	166°10' W.
54°36' N.	164°55'42" W.

BILLING CODE 3510-22-M

50 CFR Part 651

[Docket No. 30818-168]

Atlantic Groundfish (Cod, Haddock and Yellowtail Flounder)

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues this proposed rule to amend the final regulations implementing the Interim Fishery Management Plan for Atlantic Groundfish (Interim Plan). This rulemaking clarifies the definition of the cod end, and describes the method an authorized officer may follow when inspecting cod ends for compliance with regulated mesh size. This rule will eliminate differences of interpretation of the cod end definition contained in the regulations with regard to compliance and enforcement.

DATE: Comments must be received on or before October 19, 1983.

ADDRESSES: Send comments to National Marine Fisheries Service, Fisheries Management Division, State Fish Pier, Gloucester, Massachusetts 01930, Attention: Groundfish Comments.

FOR FURTHER INFORMATION CONTACT: Richard Whittaker, Supervisory Special Agent, 617-281-3600.

SUPPLEMENTARY INFORMATION: NOAA issued final rules to implement the Interim Plan on October 4, 1982 (47 FR 43705). Since then, varying interpretations have occurred within the fishing community of the definition of "cod end" contained in the regulations. These varying interpretations could hinder NMFS' enforcement of the minimum mesh size requirement for cod ends. Therefore, NMFS has decided to clarify the cod end definition and the procedure an authorized officer will follow to measure cod ends to eliminate any confusion about the minimum cod end standards with which a fishing master and fishing vessel must comply.

Classification

The Secretary of Commerce issues this proposed rule to clarify the meanings of §§ 651.2 and 651.20(d)(1) of the Interim Plan regulations (47 FR 43705, October 4, 1982) for Atlantic Groundfish. Documents already submitted for the final Interim Plan regulations (see 47 FR 43709 at "Classification") concluded that the regulations were non-major under Executive Order 12291 and assessed the economic impacts on small entities under the Regulatory Flexibility Act. A final environmental impact statement (FEIS) was filed with EPA on June 11, 1982, concerning the final Interim Plan regulations which this proposed rule would amend. The amendment proposed today does not alter the context or intensity of the impacts described in the original EIS and RIR/RFA, and therefore no additional analyses have been performed. The proposed rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

List of Subjects in 50 CFR 651

Fish, Fisheries, Reporting requirements.

Dated: September 13, 1983.

Wiliam G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

PART 651—[AMENDED]

For the reasons set out in the preamble, 50 CFR Part 651 is amended as follows:

1. The authority citation for Part 651 is as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§ 651.2 [Amended]

2. In § 651.2 Definitions, delete the word "normally" from the definition of cod end.

§ 651.20 [Amended]

3. In § 651.20(d)(1), the third sentence is removed and a new sentence is added, to read: * * * An authorized officer will begin measuring the mesh at the most forward portion of the cod end that contained fish during a haulback, and continue measurement aft toward the rings.

Federal Register
Vol. 48, No. 182
Monday, September 19, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Requirements Submitted To OMB for Review

AGENCY: ACTION.

ACTION: Information Collection Request Under Review.

SUMMARY: This notice sets forth certain information about an information collection proposal by ACTION, the national volunteer agency.

Background

Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on proposed collect of information and recordkeeping requirements. Copies of the proposed forms-and supporting documents [request for clearance (SF 83), supporting statement, instructions, transmital letter and other documents] may be obtained from the agency clearance officer.

Information About This Proposed Collection

Agency Clearance Office—William W. Lovelace, 202–254–8523.

Agency Address: ACTION, 806 Connecticut Ave., NW., Washington, D.C. 20525.

OFFICE Of ACTION Issuing Proposal: Office of Policy and Planning, Evaluation Division.

Title of Form: Impact Evaluation of the Foster Grandparent Program on Foster Grandparents—Phase III.

Type of Request: Reinstatement.

Frequency of Collection: Nonrecurring.

General Description of Respondents: Individuals: Participants and corresponding comparison groups of the Foster Grandparent Program.

Estimated Number of Annual Response: 504.

Estimated Annual Report or Disclosure Burden: 378 hours.

Respondent's Obligation to Reply: Voluntary.

Person responsible for OMB Review: James L. Thomas, 202–395–6880.

Williamd W. Lovelace,

ACTION Clearance Officer.

BILLING CODE 6050-01-M

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

National Plant Genetic Resources Board; meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463, 86 Stat. 770–776), the Cooperative State Research Service announces the following meeting:

Name: National Plant Genetic Resources Board.

Date: October 6 and 7, 1983.

Time and place: 8:30 a.m. October 6—12:00 noon October 7, Student Union, University of California (Davis, CA).

Type of meeting: Open to the public. Persons may participate in the meeting as time and space permits.

Comments: The public may file written comments before or after the meeting with the contact person below.

Purpose: To review matters that pertain to plant germplasm in the United States and possible impacts on related National and international programs; and discuss other initiatives of the Board.

Contact person: C. O. Grogan, Executive Secretary, National Plant Genetic Resources Board, Cooperative State Research Service, U.S. Department of Agriculture, Room 219, West Auditor's Building, Washington, D.C. 20250, telephone (202) 447–6195/(703) 235–2628.

Done at Washington, D.C., this 14th day of September 1983.

C. I. Harris,

Acting Administrator, Cooperative State Research Service.

[FR Doc. 83-25487 Filed 9-16-83; 8:45 am]

BILLING CODE 3410-22-M

Rural Electrification Administration

East River Electric Power Cooperative, Inc.; Environmental Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Finding of No Significant Impact.

SUMMARY: REA has made a Finding of No Significant Impact concerning the construction and operation of several electric transmission lines in eastern South Dakota in Aurora, Brule, Buffalo, Codington, Grant, Hyde, Kingsbury, Lake and Robert Counties proposed by East River Electric Power Cooperative, Inc. (East River), of Madison, South Dakota. These projects are 69 kV transmission lines 41.8 kilometers (26 miles), 45.1 kilometers (28 miles), 34.6 kilometers (21.5 miles) and 33.8 kilometers (21 miles) long. East River plans to request financing assistance from REA for the proposed projects.

FOR FURTHER INFORMATION CONTACT: Copies of REA's Finding of No Significant Impact and Environmental Assessment (EA) and East River's Borrower's Environmental Report (BER) may be obtained at the Office of the Director, North Central Area-Electric, Room 0230, South Agriculture Building, Washington, D.C. 20250, telephone (202) 382–1400, or the East River Electric Power Cooperative, Inc., P.O. Drawer E, Madison, South Dakota 57042, telephone (605) 256–4536.

SUPPLEMENTARY INFORMATION: REA's Finding of No Significant Impact incorporates REA's EA and East River's BER. REA's independent evaluation of the proposed projects concudes that approval of the projects would not be a major Federal action that would significantly affect the quality of the human environment.

Alternatives discussed in the EA are no action, alternative routes, underground construction, and new generation facilities. The no action alternative would do nothing to alleviate inadequate power supply and replace deteriorated line. The alternative routes investigated were all in the same counties, generally followed nearby or adjacent section lines across similar types of land, and were approximately equal in length and environmental impact. In the Switch 248 to Madison project, route recommended by several

Federal and State agencies to avoid sensitive wetlands was selected. Underground construction was considered, but not selected, because of the greater cost and technical problems inherent in underground construction. New small-scale electric generation facilities in the vicinity of the proposed facilities would be more expensive and would still require new transmission lines, and thus offered no advantages. Although a small amount of important farmland will be removed from agricultural use, there is no practicable alternative which entirely avoids important farmlands. REA has determined that the proposed projects are acceptable alternatives because they would avoid, to the extent practicable, cultural resources, important farmland, threatened and endangered species and critical habitat, wetlands, and floodplains.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated: September 13, 1983.

Harold V. Hunter,

Administrator.

BILLING CODE 3410-16-M

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations (See, 14 CFR 302.1701 et seq.); Week Ended September 9, 1983

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Date filed	Docket No.	Description
Sept. 6, 1983	41680	Eastern Air Lines, Inc., Miami International Airport, Miami, Florida 33148. Conforming Application of Eastern Air Lines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations applies for amendment of its certificates of public convenience and necessity for Route 131 so as to authorize service between the terminal point Miami, Florida and the terminal point San Jose, Costa Rica. Answers may be filed by September 20, 1983.
Sept. 6, 1983	41681	Baker Aviation, Inc., c/o Marjorie L. Baker, P.O. Box 116, Kotzebue, Alaska 99752. Application of Baker Aviation, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations applies for a certificate of public convenience and necessity for an indefinite term to perform scheduled interstate air transportation of persons, property, and mail between the terminal point of Kotzebue to the intermediate points of Ambler, Buckland, Cape Lisburne, Deering, Kiana, Kivalina, Kobuk, Noatak, Noorvik, Point Hope, Selawik and Shungnak, Alaska. Conforming Applications, Motions to Modify Scope and Answers may be filed by October 4, 1983.
Sept. 6, 1983	41682	Capitol Air, Inc., c/o Mark S. Kahan, Law Offices of Fred D. Thompson, 1919 Pennsylvania Avenue, N.W., Suite 850, Washington, D.C. 20006. Application of Capitol Air, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations applies for an amendment of its existing certificate of public convenience and necessity over Route 191-F, or for a new certificate, sufficient to authorize air transportation of persons, property, and mail as follows: Between San Juan and Caracas, Venezuela—Conforming Applications, Motions to Modify Scope and Answers may be filed by October 4, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Preliminary Determination of Sales at Less Than Fair Value: Chloropicrin From the People's Republic of China

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary determination of sales at less than fair value: Chloropicrin from the People's Republic of China.

SUMMARY: We preliminarily determine that chloropicrin from the People's Republic of China (PRC) is being sold, or is likely to be sold, in the United States at less than fair value. Therefore, we have notified the United States International Trade Commission (ITC) of our determination, and we have directed the United States Customs Service to suspend liquidation of all entries of the subject merchandise. We have directed the U.S. Customs Service to require a cash deposit or the posting of a bond for each such entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

We found that "critical circumstances" exist with respect to imports of chloropicrin from the PRC; therefore, the suspension of liquidation is retroactive to 90 days prior to the date of publication of this notice.

If this investigation proceeds normally, we will make our final determination by November 28, 1983.

EFFECTIVE DATE: September 19, 1983.

FOR FURTHER INFORMATION CONTACT: Michael Ready, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230; telephone: (202) 377-2613.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We preliminarily determine that there is a reasonable basis to believe or suspect that chloropicrin from the PRC is being sold, or is likely to be sold, in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act).

For chloropicrin sold by China National Chemicals Import and Export Corporation (SINOCHEM), the only known exporter of the subject merchandise, we have found that the foreign market value exceeded the United States price on 100 percent of sales compared.

There was only one sale to the United States during the period of investigation. The margin of dumping on this single sale was 222 percent.

Case History

On April 6, 1983, we received a petition from counsel for LCP Chemicals & Plastics, Inc. and Niklor Chemical Company, Inc. filed on behalf of the United States Chloropicrin industry. In accordance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of chloropicrin from the PRC are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act and that these imports are materially injuring, or threaten to materially injure, a United States industry. The petitioners also alleged that critical circumstances exist with respect to imports of chloropicrin from the PRC.

After reviewing the petition, we determined that it contained sufficient grounds to initiate an antidumping investigation on chloropicrin. We notified the ITC of our action and initiated the investigation on May 2, 1983 (48 FR 19765). On June 2, 1983, the ITC found that there is a reasonable indication that imports of chloropicrin are materially injuring a United States industry (48 FR 24798).

A questionnaire was presented to counsel for SINOCHEM on June 3, 1983. A response was received on August 15, 1983.

As discussed under the "Foreign Market Value" section, we determined that the PRC is a state-controlled-economy country for the purposes of this investigation.

Scope of Investigation

The merchandise covered by this investigation is chloropicrin, also known as trichloronitromethane. A major use of the product is as a pre-plant soil fumigant. Chloropicrin is currently classifiable under item numbers 408.1600, 408.2900 and 425.5290 of the *Tariff Schedules of the United States Annotated* (TSUSA).

This investigation covers the period from November 1, 1982, to April 30, 1983. SINOCHEM is the only known PRC exporter of chloropicrin to the United States. We examined 100 percent of SINOCHEM's sales to the United States made during the period of investigation.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As Provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold to unrelated purchasers prior to its importation into the United States. We calculated the purchase price based on the FOB Chinese port price to the unrelated purchaser. We made a deduction for PRC inland freight.

Foreign Market Value

The petitioner alleged that the economy of the PRC is state controlled to the extent that sales of the subject merchandise from that country do not permit a determination of foreign market value under 19 U.S.C. 1677b(a). After analyzing the PRC's economy and considering briefs submitted by the parties, we conclude that the PRC is a state-controlled-economy country for purposes of this investigation. Among the factors we considered were that output quotas for purchase by the state are set and that prices are administered at lease up to the quota level.

As a result, section 773(c) of the Act requires us to use prices or the constructed value of such or similar merchandise in a "non-state-controlled-economy" country. Our regulations established a preference for foreign market value based upon sales prices. They further stipulate that, to the extent possible, we should determine sales prices on the basis of prices in a "non-state-controlled-economy" country at a stage of economic development comparable to the country with the state-controlled economy

Japan and France are the only non-state-controlled-economy-countries other than the United States which produce chloropicrin. Yet neither Japan or France is a suitable surrogate for purposes of this preliminary determination, because neither country is at a stage of economic development comparable to the PRC.

We therefore attempted to construct a value (in accordance with § 353.8(c) of the Commerce Regulations) based on specific components or factors of production in the PRC, valued on the basis of prices and costs in a non-state-controlled-economy country "reasonably comparable" in economic development to the PRC. Pursuant to our request, SINOCHEM provided its factors of production. However, in the short time available to us we were unable to find values of these factors in a non-state-controlled-economy country reasonably comparable to the PRC. Therefore, for the purposes of this preliminary determination we have foreign market value on the best information available pursuant to section 776(b) of the Act. In this instance the best information available was the petitioner's data with respect to the price of chloropicrin produced and sold for consumption in Japan.

We will try further to value the PRC factors of production using prices and costs in a suitable surrogate country.

Affirmative Determination of Critical Circumstances

Counsel for petitioner alleged that imports of chloropicrin from the PRC present "critical circumstances." Under section 773(e)(1) of the Act, critical circumstances exist when the Department has a reasonable basis to believe or suspect that: (1)(a) There is a history of dumping in the United States or elsewhere of the merchandise under investigation, or (b) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise under investigation at less than its fair value;

and (2) there have been massive imports of the merchandise under investigation over a relatively short period.

To determine whether there is a history of dumping of chloropicrin from the PRC in the U.S. or elsewhere, we reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping orders. There have been no past United States antidumping determinations on chloropicrin from the PRC. We also reviewed the antidumping action of other countries made available to us through the Antidumping Code Committee established by the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. We found no history of dumping of this product from the PRC.

To determine whether the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise at less than fair value,we considered all information on the record.

The industry which buys and sells chloropicrin is extremely small and closely knit. The chloropicrin consumed in the United States is either produced in the United States or imported from the PRC. There were no other sources of chloropicrin imports during the period of investigation. Petitioners allege that the PRC exporter sold chloropicrin at prices substantially below those charged by domestic producers of chloropicrin. The price differential was about 25 percent. In view of the small size of the industry and the substantial variation between the Chinese and United States prices, we preliminarily determine there is a reasonable basis to believe or suspect that the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise at less than fair value, even though the importers could not anticipate the basis of our fair value determination in a state-controlled-economy case.

In preliminarily determining whether there is a reasonable basis to believe or suspect that there have been massive imports over a relatively short period, we considered recent import penetration levels and whether imports have surged recently.

Based upon our analysis of the information, we preliminarily determine that imports of the products covered by this investigation do appear massive over a relatively short period (March through August 1983).

For the reasons described above, we preliminarily determine that critical circumstances do exist with respect to chloropicrin from the PRC.

Verification

In accordance with section 776(a) of the Act, we will verify all data used in reaching a final determination in this investigation.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of chloropicrin from the People's Republic of China which are entered, or withdrawn from warehouse, for consumption, on or after the date which is 90 days before publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average margin amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The suspension of liquidation will remain in effect until further notice. The weighted-average margin applicable to all shipments of chloropicrin from the PRC to the United States is 222 percent of the FOB Chinese port price.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

Public Comment

In accordance with § 353.47 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on October 25, 1983, at the United States Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Depty Assistant Secretary by October 18, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

This determination is being published pursuant to section 733(f) of the Act (19 U.S.C. 1673(b)).

Judith Hippler Bello,

Acting Deputy Assistance Secretary for Import Administration.

September 13, 1983.

BILLING CODE 3510-25-M

Fall-Harvested Round White Potatoes From Canada; Postponement of Final Determination and Postponement of Hearing

AGENCY: International Trade Administration, Commerce.

ACTION: Postponement of final antidumping determination and postponement of hearing.

SUMMARY: This notice informs the public that the final antidumping determination in this case and the hearing on the preliminary affirmative antidumping determination are postponed. Counsel for respondents requested postponement of the final determination, and counsel for both petitioner and respondents requested postponement of the hearing. We will now hold our hearing on September 20, 1983, and issue our final antidumping determination no later than November 4, 1983.

EFFECTIVE DATE: September 19, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Vincent Kane or Mrs. Julia E. Hathcox, Office of Investigations, Import Administration, International Trade Administration, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone (202) 377-5414 or (202) 377-0184.

SUPPLEMENTARY INFORMATION: On August 2, 1983, we published in the **Federal Register** our preliminary determination that fall-harvested round white potatoes from Canada are being, or are likely to be, sold in the United States at less than fair value. In our preliminary antidumping determination

we determined that critical circumstances do not exist for fall-harvested round white potatoes from Canada. In that notice, we explained on a company-by-company basis the methodology we used in calculating dumping margins for grower/distributors of fall-harvested round white potatoes from Canada. Margins ranged from 1 to 124.8 percent with a weighted-average margin of 17.3 percent.

Prior to this preliminary antidumping determination, we received, on February 9, 1983, a petition filed by counsel on behalf of the Maine Potato Council. In accordance with the filing requirements of § 353.36 of the Commerce Department Regulations (19 CFR 353.36), the petitioner alleged that fall-harvested white potatoes from Canada are being, or are likely to be sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or are threatening to materially injure, a United States industry. Petitioner also alleged that sales are being made at less than cost of production in Canada and that "critical circumstances" exist, as defined in section 733(e) of the Act. Fall-havested round white potatoes are currently classified under items 137.20, 137.21, 137.25 or 137.28 of the *Tariff Schedules of the United States*.

Postponement of Final Antidumping Determination

We received from counsel for the respondents in this case a request for a postponement of our final antidumping determination. Under the Tariff Act of 1930, as amended (the Act), respondents of petitioners may request a postponement of a final antidumping determination up to a maximum of 135 days from the date of publication of the preliminary determination. Counsel for the respondents requested an extension until November 16, 1983, but subsequently agreed to a lesser extension until November 4, 1983. We, therefore, will postpone our final antidumping detemination to no later than November 4, 1983.

Postponement of Hearing

We have received requests from counsel for petitioner and respondents for the postponement of the hearing on this case. The hearing has been rescheduled for September 20, 1983, at 10 a.m. in room 3708 of the Commerce Department, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

This notice is published pursuant to section 733(e) and 733(d) of the Act.

Judith Hippler Bello,

Acting Deputy Assistant Secretary for Import Administration.

September 13, 1983.

BILLING CODE 3510-25-M

Foreign-Trade Zones Board

[Docket No. 34-83]

Foreign-Trade Zone 2, New Orleans, Louisiana; Application for Relocation

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Board of Commissioners of the Port of New Orleans (the Port), grantee of Foreign Trade Zone 2, requesting authority to relocate its general-purpose foreign-trade zone to include industrial park space in New Orleans, Louisiana, within the New Orleans Customs port of entry. The application was submitted pursuant to the provisions of the Foreign Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on September 12, 1983. The applicant is authorized to make this proposal under Act No. 173 of the 1934 Regular Session of the Louisiana Legislature.

On July 16, 1946, the Port received authority from the Board to establish a foreign-trade zone in the New Orleans area (Board Order 12, 11 FR 8235, 7/31/46). While there have been a number of boundary modifications over the years, the project has remained at its original location and today includes a warehousing/distribution facility on a 19-acre site adjacent to the Napoleon Avenue Wharf on the Mississippi River. During the past 5 years, there has been a 37 percent increase in the value of merchandise handled and there have been increased inquiries for industrial uses. The facility has space for warehousing and processing activities, but lacks space for growth and cannot accommodate significant industrial activity. The Port has worked closely with New Orleans development officials in devising a new zone plan and is now requesting a reorganization of its project to a new industrial park.

The Port's new zone site will cover 76 acres in the Almonaster-Michoud Industrial District, the City's 12,000-acre industrial development project located at the intersection of the Inner Harbor Navigation Canal and Mississippi River-Gulf Outlet in eastern New Orleans. Cabot, Cabot, and Forbes has been selected as operator and will be responsible for improving the site, developing general-purpose warehousing facilities, and for providing individual parcels to firms requiring separate facilities. The existing zone facility would retain zone status for a transitional period of five years.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Max G. Willis, District Director, U.S. Customs Service, South Central Region, 423 Canal Street, New Orleans, LA 70130; and Colonel Robert C. Lee, District Engineer, U.S. Army Engineer District New Orleans, P.O. Box 60267, New Orleans, LA 70160.

Comments concerning the proposed zone relocation are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before October 19, 1983.

A copy of the application is available for public inspection at each of the following locations:

District Director's Office, U.S. Dept. of Commerce District Office, 432 International Trade Mart, No. 2 Canal Street, New Orleans, Louisiana 70130; or

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230.

Dated: September 13, 1983.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

[Order No. 224]

Approval for Expansion of Foreign-Trade Zone No. 27, Boston, Massachusetts, Within the Boston Customs Port of Entry

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Wheras, the Massachusetts Port Authority (Massport), Grantee of Foreign-Trade Zone 27, Boston, has applied to the Board for authority to

expand its zone to include a site at Boston's Logan International Airport, within the Boston Customs port of entry;

Whereas, the appplication was accepted for filing on March 1, 1983, and notice inviting public comment was given in the **Federal Register** on March 9, 1983 (Docket No. 2–83, 48 FR 9895);

Whereas, as examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to provide zone space to new tenants whose operations cannot be accommodated within existing zone space; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisified, and that approval of the application is in the public interest;

Now, Therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed March 1, 1983 (Doc. #2–83). The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations not mentioned in the application. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 13th day of September 1983.

Lawrence J. Brady

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates.

Attest:

John J. DaPonte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

[Modification No. 2 to Permit No. 354]

Marine Mammal Permit Applications; Dr. Donald B. Siniff

Notice is hereby given that pursuant to the provisions of § 216.33 of the Regulations Governing the Taking and Importing of Marine Mammals, Scientific Research Permit No. 354 issued to Dr. Donald B. Siniff, Department of Ecology and Behavioral Biology, University of Minnesota, Minneapolis, Minnesota 55455, on October 15, 1981 (46 FR 51629) is modified to allow the radio tagging of 110 newly independent young Weddell seals, in lieu of adult Weddell seals.

Accordingly, Section A–1a. of Permit No. 354 is deleted and replaced by:

"a. 130 adults may also be instrumented with radio frequency and/or sonic tags; and 110 newly independent young may be fitted with radio frequency tags as described in the modification request."

This modification becomes effective upon publication in the **Federal Register.**

The Permit, as modified, is available for review in the following office:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

Dated: September 9, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-25425 Filed 9-16-83; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Application for Permit; Marineland S.A., et al.

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:
   a. Name: Marineland S.A. (P72C).
   b. Address: Costa d'en Blanes, Palma Nova, Mallorca, Spain.
2. Type of Permit: Public Display.
3. Name and number of Animals: Atlantic bottlenose dolphin (Tursiops truncatus) 2.
4. Type of Take: To take from the wild Atlantic bottlenose dolphins from the Mississippi Sound area of the Gulf of Mexico.
5. Location of Activity:
6. Period of Activity: 2 years.

As a request for a permit to take living marine mammals to be maintained in areas outside the jurisdiction of the United States, this application has been submitted in accordance with National Marine Fisheries Service policy concerning such applications (40 FR 11619, March 12, 1975). In this regard, no application will be considered unless:

(a) It is submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, through the appropriate agency of the foreign government;

(b) It includes:

i. A certification from such appropriate government agency verifying the information set forth in the application;

ii. A certification from such government agency that the laws and regulations of the government involved permit enforcement of the terms of the conditions of the permit, and that the government will enforce such terms;

iii. A statement that the government concerned will afford comity to a National Marine Fisheries Service decision to amend, suspend or revoke a permit.

In accordance with the above cited policy, the certification and statements of the Ministry of Agriculture and Fishing in the Balearic Islands have been found appropriate and sufficient to allow consideration of this permit application.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: September 13, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Issuance of Permit To Take Marine Mammals and Endangered Species; Dr. William H. Hamner

On August 5, 1983, Notice was published in the **Federal Register** (48 FR 35694), that an application had been filed with the National Marine Fisheries Service by Dr. William H. Hamner, for a Scientific Research and Scientific Purposes Permit to take an unspecified number of marine mammals by harassment.

Notice is hereby given that on September 9, 1983, the National Marine Fisheries Service issued a Scientific Research and Scientific Purposes Permit as authorizd by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) to Dr. William H. Hamner subject to certain conditions set forth therein.

Issuance of this Permit as required by the Endangered Species Act of 1973 is based on a finding that such Permit: (1) Was applied for in good faith; (2) Will not operate to the disadvantage of the endangered species which are the subject to this Permit; (3) Will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was also issued in accordance with, and is subject to Parts 220–222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: September 9, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-25426 Filed 9-16-83; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals; Issuance of Permit; Sea World, Inc.

On August 10, 1983, Notice was published in the **Federal Register** (48 FR 36304) that an application had been filed with the National Marine Fisheries Service by Sea World, Inc., 1720 South Shores Road, Mission Bay, San Diego, California 92109, for a permit to import twelve (12) Commerson's dolphin (*Cephalorhynchus commersonii*) for public display.

Notice is hereby given that on September 12, 1983, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a permit for the importation of twelve (12) Commerson's dolphin to Sea World, Inc., subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administration for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. 20235;

Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930;

Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Dated: September 12, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The North Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Public Law 94–265, as amended), has established Plan Management Teams for Fishery Management Plans initiated by the Council.

The Plan Management Team for the Gulf of Alaska Fishery Management Plan will hold a Team meeting at the offices of the North Pacific Fishery Management Council, 605 W. 4th Ave., Anchorage, Alaska, on September 26, 1983. The purpose of the meeting is to review assessments of the Gulf of Alaska stocks to determine current estimates of biomass, possible revisions to maximum sustainable yields (MSY), preliminary equilibrium yield and annual surplus production for 1984. Plan Team meetings are open to the public and may be shortened or lengthened as necessary. Meeting time will be posted in the Council offices.

FOR FURTHER INFORMATION CONTACT: Jim H. Branson, Executie Director, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510.

Dated: September 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Western Pacific Regional Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, 16 U.S.C. 1852), to manage and conserve America's fisheries as specified by the Act.

Meeting Agenda: Review and discuss options for Pelagic management; discuss Spiny Lobster Amendments #1 (complementary State regulations) and #2 (trap size) and the Precious Corals FMP; discuss status of FY84 Administrative Budget; review foreign fishing permit applications; discuss foreign and domestic enforcement of Billfish FMP and Spiny Lobster FMP, respectively; elect officers for 1983–1984; and conduct other Council business.

DATES: September 28–29, 1983 (9 a.m. to 3 p.m., September 28, in Tamuning, Guam; 9 a.m. to 3 p.m., September 29, in Rota, CNMI.)

ADDRESS: The meeting will take place at the Pacific Islands Hotel, Tamuning, Guam, and Rota Paupau Hotel, Rota, CNMI. The meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Western Pacific Fishery Management Council, Room 1608, 1164 Bishop Street, Honolulu, Hawaii 96813, Telephone (808) 523–1368.

Dated: September 13, 1983.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange; Proposed Amendments Relating to the Live Hogs Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Chicago Mercantile Exchange has submitted a proposal to revise its live hog futures contract. The Commodity Futures Trading Commission ("Commission") has determined that the proposal is of major economic significance and that, accordingly, publication of that proposal is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments should be received on or before October 19, 1983.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the CME live hog futures contract.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., (202) 254–6990.

SUPPLEMENTARY INFORMATION: The Chicago Mercantile ("CME" or "Exchange") is proposing to revise its live hog futures contract. The CME proposal would eliminate the delivery of U.S. No. 4 grade hogs on the contract, reduce the number of U.S. No. 3 grade hogs allowed to be delivered at par and in the total delivery unit, increase the par weight range of hogs, designate a new delivery point at Sioux Falls, South Dakota, and increase the discount for hogs delivered at the St. Paul, Minnesota delivery point.

The current live hog contract specifies the par delivery unit to be 30,000 pounds of USDA Grade No. 1, 2, 3 and 4 hogs (barrows and gilts) in the weight range of 200 to 230 pounds. The contract stipulates that the average weight of the hogs in the delivery unit and at least 90 hogs in each delivery unit must fall within the 200 to 230 pound weight range. Delivery units containing live hogs weighing under 200 pound but not less than 190 pounds and weighing over 230 pounds but not more than 240 pounds are deliverable on the current contract with a discount of 50¢ per hundredweight based on the weight of such hogs delivered. Hogs weighing less than 190 or over 240 pounds are not deliverable. Under the existing contract, delivery units containing more than 90 head of USDA Grade No. 3 hogs are deliverable at a discount of 50¢ a hundredweight for the entire delivery unit with no limit on the total number of USDA No. 3 hogs. Delivery units containing up to eight head of USDA Grade No. 4 are deliverable at a discount of $2.00 per hundredweight for each such hog. Units containing more than 8 head of USDA Grade No. 4 are not deliverable on the current contract.

Under the Exchange's proposal, No. 4 grade hogs would no longer be deliverable on the contract, and fewer U.S. No. 3 grade hogs (barrows and gilts) could be delivered at par and in the total delivery unit. Delivery units containing more than 10 but not more than 30 U.S. No. 3 grade hogs would be deliverable at a discount of $2.00 per hundredweight for the U.S. No. 3 grade hogs. Units containing more than 30 U.S. No. 3 grade hogs would not be deliverable under the revised contract.

The par weight per hog would increase from a range of 210 to 240 pounds from the current 200 to 230 pounds. The revised contract would require both the average weight of hogs in the delivery unit and at least 90 hogs to fall within the 210 to 240 pound weight range. However, hogs weighing under 210 pounds but not less than 200 pounds and weighing over 240 pounds but not more than 250 pounds would be deliverable at a discount of 50¢ per hundredweight for such hogs. Hogs weighing under 200 pounds or over 250 pounds would not be deliverable.

The Exchange submits that the proposed changes in the contract's delivery units would reflect current conditions and practices in the cash hog markets. The CME states that in recent years there has been an improvement in the quality of hogs being marketed commercially. The Exchange maintains that eliminating No. 4 grade hogs from the contract, decreasing the number of U.S. No. 3 grade hogs to 10 head in a CME par delivery load, and allowing no more than 30 head of U.S. No. 3 grade hogs to be deliverable, at a discount of $2.00 a hundredweight, would make the contract more consistent with commercial hog sales than the currently allowable 90 head of U.S. No. 3 grade hogs (approximately 64 percent of the unit) in a par delivery load and the 100 percent U.S. No. 3 hogs deliverable at a discount. In addition, the Exchange notes an increased demand for a heavier weight hog. The Exchange indiates that the preferred commercial sale load consists of animals averaging in weight from 210 to 240 pounds. The Exchange maintains that an increase in the current par delivery weight range from 200–230 pounds to 210–240 pounds would reflect the average current commercial slaughter weight. The Exchange also states that allowing a 50¢ per hundredweight discount for hogs under 210 pounds but not less than 200 pounds and weighing over 240 pounds but not more than 250 pounds would adequately reflect the cash market discount for hogs in these weight groups. The Exchange believes that these revisions to the contract's delivery unit would have virtually no effect on deliverable supplies and would make commercial longs more satisfied with standing for delivery on the contract.

The Exchange's proposal also includes the designation of an additional delivery point at Sioux Falls, South Dakota with a 50¢ per hundredweight discount for hogs delivered at this location. The CME believes that there is an adequate deliverable supply of and demand for hogs as well as sufficient stockyards facilities at the proposed delivery point. The Exchange indicates that Sioux Falls serves hog producers in the states of Iowa, Minnesota and South Dakota, which combined accounted for approximately one-third of the total U.S. hog production during the past decade and one-third of the total U.S. hog slaughter in 1980. In addition, the CME states that the Sioux Falls terminal market is the largest hog market in the United States and that its stockyard has the physical capacity to handle approximately 35 CME hog deliveries a day, which is comparable to the physical capacity of the seven existing delivery points. The CME maintains that the addition of Sioux Falls as a delivery point would not subject commercial hogs standing for delivery to additional transport and/or resale costs because numerous primary slaughterhouse operations in the current delivery area also have slaughter facilities in the Sioux Falls area. The Exchange further indicates that the addition of the Sioux Falls delivery point would not generate increased basis variability because cash hog prices at Sioux Falls are highly correlated with cash hog prices at other CME delivery points. The Exchange states that the 50¢ discount at Sioux Falls would be consistent with the cash market locational differentials at Sioux Falls and the other six non-par delivery points.

Due to Exchange concerns over the large share of hog deliveries tendered at the St. Paul, Minnesota delivery point, the CME's proposal includes an

amendment to raise the St. Paul discount from 25¢ per hundredweight to 75¢ per hundredweight. The Exchange states that over the past four years 32 to 65 percent of annual hog deliveries on the contract occurred at St. Paul. The CME believes that this high percentage of hog deliveries at St. Paul is because the St. Paul delivery point is insufficiently discounted. The Exchange maintains that an evaluation of the cash price differentials at each of the contract's current non-par delivery points relative to the contract's par delivery point at Peoria, Illinois over the period 1977–1982 indicates that the contract discount for St. Paul has been significantly and consistently too small. The Exchange believes that an increase in the St. Paul discount to 75¢ would reduce the skewed distribution of hog deliveries among the delivery points because no location would be insufficiently discounted and attract a large volume of deliveries in relation to all other delivery points. The Exchange further believes that raising the St. Paul discount to 75¢ would have a positive impact on the live hog contract because there would be no clear economic advantage in making delivery at any given delivery point.

The proposed amendments to the live hog contract would become effective immediately after Commission approval for all contract months subsequently listed by the Exchange for trading, but would not be applicable to currently listed months.

In accordance with Section 5a(12) of the Commodity Exchange Act, 7 U.S.C. 7a(12) (Supp. 1982), the Commission has determined that the proposal submitted by the CME concerning its live hog futures contract is of major economic significance. Accordingly, the CME's proposal will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CME in support of the proposed rules may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1982)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitted written data, views or arguments on the proposed amendments should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by October 19, 1983. Such comment letters will be publicly available except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C. on September 14, 1983.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Flood Reduction Project at Grundy, Virginia

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement.

SUMMARY: 1. The Grundy formulation studies are being conducted in response to authorization of Section 202 of the Energy and Water Development Appropriation Act of 1981 (Pub. L. 96–367). Study objectives are to determine the best means of affording the Town of Grundy flood damage reduction measures.

2. The alternatives to be considered in detail will include that of no action, channelization of Levisa Fork at Grundy, floodproofing, and relocation of flood-prone development into flood-safe areas.

3. Public activities will deal with the overall flood damage reduction plan. Potential alternatives have been discussed with elected officials of the study area and will be presented to civic groups, private organizations, and interested individuals as detailed studies progress.

a. A formal meeting will be scheduled to provide for discussion and imput to evaluation of alternative plans and plan selection.

b. Significant issues to be analyzed in depth in the DEIS will be the impact of floods on the existing environment and the effects of alternative plans. The plans may include channelization for Levisa Fork, floodproofing, and relocations to new housing and community development sites.

c. Consultation shall be conducted with the U.S. Fish and Wildlife Service during the final planning process pursuant to the requirements of the Fish and Wildlife Coordination Act 16 U.S.C. 661 et seq. (Pub. L. 85–624) and the Endangered Species Act 16 U.S.C. 1531 et seq. (Pub. L. 93–205) and the National Park Service and State Historic Preservation Office(s) pursuant to the National Historic Preservation Act of 1966 (80 STAT 915) (Pub. L. 89–655) the Preservation of Historic and Archeological Data (88 STAT 174) (Pub. L. 93–291), and EO 11593.

4. A public meeting will be held in the community of Grundy to present the tentatively selected plan as well as other alternatives, and hold discussions with local officials and any other interested parties.

5. It is anticipated that the DEIS will be available for public review in July 1984.

Questions concerning the proposed action and DEIS can be answered by:

Mr. Jim Twohig (Study Manager)
Mr. John Wright (Environmentalist),
Huntington District, Corps of Engineers, 502 Eighth Street, Huntington, West Virginia 25701

Dated: September 1, 1983.

John O. Roach II,

Department of the Army Liaison Officer With the Federal Register.

BILLING CODE 3710-92-M

DEPARTMENT OF EDUCATION

Education Statistics Advisory Council; Meeting

AGENCY: Advisory Council on Education Statistics.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Education Statistics. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: October 6 and 7, 1983.

ADDRESS: 1200 19th Street NW., Room 823, Washington, D.C. 20208.

FOR FURTHER INFORMATION CONTACT: Robena S. Gore, Executive Director, 1200 19th Street NW., (Brown Building) Room 723–B, Washington, D.C. 20208. Telephone—(202) 254–8227.

SUPPLEMENTARY INFORMATION: The Advisory Council on Education

Statistics is established under section 406(c)(1) of the Education Amendments of 1974, Pub. L. 93-380. The Council is established to review general policies for the operation of the National Center for Education Statistics and is responsible for establishing standards to insure that statistics and analyses disseminated by the Center are of high quality and are not subject to political influence.

The meeting of the Council is open to the public. The proposed agenda includes:

Report and discussion *A Nation at Risk*, report of the National Commission on Excellence in Education, and other reports on school quality (1st day).

Review of Quality Control Proposed Study and Actions and VEDS data.

A report by the Administrator, National Center for Education Statistics, on recent activities of the Center.

A report on the state of the Department of Education by the Chairman, Dr. Donald J. Senese, Assistant Secretary, Office of Educational Research and Improvement.

Such old business and new business as the chairman or membership may put before the Council.

Records are kept of all Council proceedings, and are available for public inspection at the office of the Executive Director, Advisory Council on Education Statistics, 1200 19th Street NW. (Brown Building), Room 723-B, Washington, D.C. 20208.

Dated: September 14, 1983.

Donald J. Senese,

Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of Assistant Secretary for International Affairs

International Atomic Energy Agreements; Proposed Subsequent Arrangements; European Atomic Energy Community

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangements to be carried out under the above mentioned agreement involve approval of the following sales:

Contract Number S-EU-784, to the Atomic Energy Research Establishment, Harwell, the United Kingdom, 0.002 grams of plutonium-240, for use as standard reference material.

Contract Number S-EU-785, to the Transuranium Institute, Karlsruhe, the Federal Republic of Germany, 0.002 grams of uranium, enriched to 33 percent in U-235, and 0.002 grams of uranium-233, for use as standard reference materials.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of these nuclear materials will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: September 14, 1983.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs.

[FR Doc. 83-25472 Filed 9-16-83; 8:45 am]

BILLING CODE 6450-01-M

International Atomic Energy Agreement; Proposed Subsequent Arrangement; Japan Atomic Energy Research Center

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Japan Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following sale:

Contract Number S-JA-336, to the Japan Atomic Energy Research Center, Tokai-mura, Japan, 2 grams of uranium, depleted in the isotope U-235, for use as standard reference material.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: September 14, 1983.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs.

BILLING CODE 6450-01-M

Proposed Contract Awards

AGENCY: Department of Energy.

ACTION: Notice of Proposed Contract Awards.

SUMMARY: In accordance with Department of Energy (DOE) Procurement Regulations relating to organizational conflicts in interest, 41 CFR 9-1.5409, published in the **Federal Register** on January 11, 1979 (44 FR 2556), DOE gives public notice that contracts are being awarded, recognizing the existence of a potential organizational conflict of interest, because this is determined to be in the best interest of the United States.

FOR FURTHER INFORMATION CONTACT: Mr. Charles L. Croxton, Office of Inspector General, Room 5A–179, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–1943.

Findings, Mitigation and Determination

Under section 19 of the Federal Nonnuclear Energy Research and Development Act, Pub. L. 93–577, and section 33 of the Federal Energy Act of 1974, Pub. L. 93–275, the Department of Energy is subject to strict requirements intended to avoid organizational conflicts of interest in the award and performance of contracts for technical and management support services. An organizational conflict of interest (OCI) is considered to exist when a contractor "has past, present, or currently planned interests, that, either directly or indirectly, through a client relationship, relate to the work to be performed under a Department contract and which (1) may diminish its capacity to give impartial, technically sound, objective assistance and advice, or (2) may result in it being given an unfair competitive advantage." DOE Procurement Regulations, 41 CFR 9–1.5403. Pursuant to these statutory provisions, a contract may not be awarded unless the Secretary or his designee has made a determination that it is unlikely that an OCI would exist, or that a conflict has been avoided after inclusion of appropriate conditions in the contract. If an OCI is determined to exist and cannot be avoided, the contract may be awarded only if the Secretary or his designee determines that award would be in the best interest of the United States and includes appropriate provisions in the contract to mitigate the OCI.

Based on the following findings and determination, the proposed contracts described below will be awarded on or after September 26, 1983, after taking into account the existence of Organizational Conflicts of Interest, because the procurements are determined to be in the best interests of the United States, pursuant to the authority of Department of Energy Procurement Regulation 41 CFR 9–1.5409(a)(3). Any comments should be provided before that date to the official identified above.

Findings

1. The Department of Energy (DOE) accomplishes a major part of its mission through contractors that operate Government-owned facilities under long term cost-type contracts. These contractors, usually referred to as integrated contractors, account for and report on DOE funds, property, and cost of operations in accordance with DOE accounting and reporting systems and procedures. For Fiscal Year 1982, the combined obligations of the 45 integrated contractors was $7.9 billion.

The DOE Office of Inspector General is responsible for performing financial and compliance audits of these integrated contractors. Staffing limitations prevent the Office of Inspector General staff from performing financial statement examinations at many of the integrated contractors. To fulfill its audit oversight responsibility, the Inspector General seeks to supplement audit coverage by engaging independent public accountants (IPA's) to perform financial and compliance audits of several integrated contractors.

2. Therefore, a competitive procurement (DE–RP01–831G00031, Financial and Compliance Audit Coverage on Selected Contractors) was initiated in June 1983 to solicit IPA assistance. Offerors were requested to propose on ten groupings (designated A through J) of integrated contractors. Each group contained two integrated contractors, for a total of 20 of the Department's 45 integrated contractors. A separate contract will be awarded for each grouping.

Under the proposed DOE contracts, IPA's shall perform a financial and compliance audit (subject to scope limitations establishments by the IG) of the financial statements (balance sheet, related statement of operations, and Voucher Accounting for Net Expenditures Accrued for fiscal years ending September 30, 1983 and/or 1982 in accordance with applicable standards prescribed in the General Accounting Office *Standards for Audit of Governmental Organizations, Programs, Activities and Functions—1981 Revision* (GAO Standards)). The compliance examination is directed toward determining whether the integrated contractor has complied with the terms of the contract between DOE and the integrated contractor.

3. Based on a comprehensive evaluation of its technical proposal, Deloitte, Haskins, and Sells (DH&S) has been recognized as possessing the required auditing, staffing and background experience for performing financial and compliance audits of integrated contractors. In addition, DH&S proposed the lowest cost for two of the groups:

Group	Integrated Contractor
E	Los Alamos National Laboratory, EG&G (Nevada).
F	Brookhaven National Laboratory, NLO, Inc.

DH&S' cost proposal for group E was substantially lower than the next lowest cost proposal for that group. DH&S' proposal for group F was substantially lower than the next lowest cost proposal for group F.

4. In accordance with 41 CFR 9–1.5405, DH&S disclosed that the firm is, and has been, the independent public accountant engaged to perform an examination of financial statements by:

a. The University of California which operates Los Alamos National Laboratory, and

b. Associated Universities, Inc., which operates Brookhaven National Laboratory.

5. In order to comply with the 41 CFR 9–1.5405 disclosure requirement and to aid in the information gathering process, oral discussions were held with all proposers who had submitted technically acceptable proposals. Questions were posed concerning the nature of their business and how various aspects (e.g., organizational, financial, past or current contracts) would contribute to a possible organizational conflict of interest.

Responses in the orals were followed by best and final offer submissions from the contractors. Analyses of this information and comparisons with the work to be performed under the contract were made.

6. Based on an evaluation of the facts contained in DH&S' disclosure statement and subsequent information obtained from orals, the Department of Energy believes that there is a minor conflict of interest under 41 CFR 9–1.5409(a) although DH&S meets the independence standards set by the GAO and AICPA as described below. In performing an audit under the broad requirements contemplated by this procurement, particularly the heavy emphasis on contractual compliance, DH&S may find, and be expected to pursue and report to the IG, items of noncompliance with the terms of the DOE contract. Any questioned items (such as questioned costs) would be of potential detriment to the two parent organizations (the University of California and Associated Universities, Inc.) if subsequently sustained by the DOE contracting officer.

7. As noted above, however, DH&S meets the high standards of independence that are set by the American Institute of CPA's (AICPA). the AICPA Code of Professional Ethics requires IPA's to be independent when

expressing an opinion of financial statements, notwithstanding the fact that the IPA is remunerated by the auditee. In fact, independence in such audits is the very cornerstone of the profession.

GAO Standards state that "public accountants will be considered independent if they are independent under the AICPA Code of Professional Ethics." Additionally, GAO Standards consider three general classes of impairments to independence: personal, external and organizational. None of these conditions was considered to exist so as to affect DH&S' ability to do their work and report their findings impartially.

In view of the above, the Department of Energy believes that the national interest would not be served by the disqualification of Deloitte Haskins and Sells from contract award in accordance with 41 CFR 9-1.5409(a)(1) and award to another IPA at a substantially higher price.

Mitigation

While the Department believes that the degree of actual conflict of interest is minor, the contracts have been drafted in such a way that anomalies in performance may be detected. The contracts call for:

(a) An advance review of DH&S' compliance audit plan by the Office of Inspector General;

(b) Submission of monthly progress reports by DH&S to the Office of Inspector General;

(c) Attendance by representatives of the Office of Inspector General at formal conferences between DH&S and the auditee;

(d) Delivery of audit workpapers by DH&S. These workpapers will be reviewed by the Office of Inspector General;

(e) Inclusion in the contract of the organizational conflict of interest special clause entitled "Organizational Conflicts of Interest."

Determination

In light of the above Findings and Mitigations and in accordance with 41 CFR 9-1.5409(a)(3), the proposed contract awards are in the best interest of the United States.

Dated: September 12, 1983.

James R. Richards,

Inspector General.

BILLING CODE 6450-01-M

Office of Energy Research

Energy Research Advisory Board, Technical Panel on Magnetic Fusion; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Technical Panel on Magnetic Fusion of the Energy Research Advisory Board (ERAB).

Date and time: October 4, 1983 from 9 a.m. to 4 p.m.

Place: Seminar Room, Fusion Energy Building, 104 Union Valley Road, Valley Industrial Park, Oak Ridge, TN 37831.

Contact: Thomas J. Kuehn, U.S. Department of Energy, Office of Energy Research (ER-6), 1000 Independence Avenue, SW, Washington, DC 20585, Telephone: 202/252-8933.

Purpose of the technical panel: To perform a review of the conduct of the national magnetic fusion energy program and make recommendations to the Energy Research Advisory Board. After consideration of the Panel report, the Board shall submit such report, together with any comments that the Board deems appropriate, to the Secretary of Energy. The purpose of the Energy Research Advisory Board is to advise the Department of Energy (DOE) on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

TENTATIVE AGENDA:

- Fusion Technology Programs
- Environmental Impacts
- Discussion of Final Report Outline and Contents
- Public comment (10 minute rule)

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Thomas J. Kuehn at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. Persons desiring information locally may contact Zee Buchanan, Division of Fusion Energy, Oak Ridge National Laboratory, 615/574-0988. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on September 14, 1983.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

[FR Doc. 83-25473 Filed 9-16-83; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPRM-FRL 2435-1]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the Federal Register a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers; Office of Standards and Regulations; Information Management Section (PM-223); U.S. Environmental Protection Agency; 401 M Street, SW., Washington, D.C. 20460; telephone (202) 382-2742 or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Grants Programs

- Title: General Regulation for Assistance (EPA #0938).

Abstract: EPA requires parties to its grants/cooperative agreements to submit to EPA certain information on grant related projects, employee training, financial data qualifications of employees, etc. EPA uses the data to determine awards and award payments, and to verify that Federal funds are used correctly.

Respondents: Individuals, State and local governments, businesses, non-profit institutions and organizations.

- Title: Cost or Price Format for Subagreements Under U.S. EPA Grants (EPA #0256).

Abstract: EPA requires, in compliance with OMB Circular A-102, that recipients of EPA assistance maintain a cost/price analysis on file. If the recipient does not certify its procurement system in conformance with 40 CFR 33 § 33.110, it must submit the documented analysis to EPA upon request. The Agency uses the data to

negotiate procurements and to verify that cost/prices are reasonable.

Respondents: Recipients of EPA assistance.

Toxics Programs

• Title: Evaluation of Asbestos-in-Schools Identification and Notification Rule (EPA #1077).

Abstract: EPA is conducting a one-time survey of local education agencies to evaluate compliance with the Asbestos-in-Schools Identification and Notification Rule.The Agency will use the survey results to determine (a) exposure to materials containing friable asbestos and (b) possible follow-up action.

Respondents: Schools and state/local governments.

Water Programs

• Title: Supplementary Report on Oil or Hazardous Substance Spills (EPA #0823).

Abstract: EPA and/or the U.S. Coast Guard usually investigates spills of oil or hazardous substances into navigable waters. When an on-scene investigation cannot be conducted, EPA may request information from those responsible for the spill. The Agency uses the data to determine whether (a) cleanup effort are satisfactory and (b) any enforcement action is necessary.

Respondents: Businesses, State/local governments, and other organizations.

Agency PRA Clearance Requests Completed by OMB

Except as noted, the following ICRs were cleared on 25 August 1983:

EPA #0987, Survey of Economic Costs of Guidance for Non-Ionizing Radiation (OMB #2060–0045).

EPA #1050, NSPS Storage Vessels for Petroleum Liquids (OMB #2060–0024).

EPA #1051, NSPS Portland Cement Plan Monitoring Provisions (OMB #2060–0025).

EPA #1052, NSPS Emission & Fuel Monitoring for Fossil Fuel-Fired Steam Generators (OMB #2060–0026).

EPA #1053, NSPS Emission Monitoring & Reporting Requirements for Electric Utility Steam Generating Unit (OMB #2060–0023).

EPA #1054, NSPS Petroleum Refineries, Excess Emission Report (OMB #2060–0022).

EPA #1055, NSPS Excess Emissions Report & Recordkeeping Requirements for New Modified Kraft Pulp Mill (OMB #2060–0021).

EPA #1056, NSPS Emission Monitoring for Nitric Acid Plants (OMB #2060–0019).

EPA #1057, NSPS Emission Monitoring for Sulfuric Acid Plants, was cleared on August 29 (OMB #2060–0041).

EPA #1058, NSPS Incinerator Monitoring Provisions (OMB #2060–0040).

EPA #1059, NSPS Monitoring Requirements for Lime Manufacturing Plants (OMB #2060–0039).

EPA #1061, NSPS Monitoring Requirements for Phosphate Fertilizer Plants (OMB #2060–0037).

EPA #1062, NSPS Monitoring Requirements for Coal Preparation Plants (OMB #2060–0036).

EPA #1063, NSPS Monitoring Requirements for Sewage Treatment Plants (OMB #2060–0035).

EPA #1064, NSPS Automobiles and Light Duty Truck Surface Coating (OMB #2060–0034).

EPA #1065, NSPS Emission & Operations Monitoring Requirements for Ferroalloy Production Facilities (OMB #2060–0033).

EPA #1066, NSPS Excess Emission Report for New, Modified or Reconstructed Ammonium Sulfate Plants (OMB #2060–0032).

EPA #1068, NSPS Primary Copper, Lead & Zinc Smelters Monitoring Requirements (OMB #2060–0030).

BILLING CODE 6560-50-M

[Notice No. III-404 CRP-BKW; WIT-FRL-2435-3]

Proposed Determination To Prohibit, or Deny the Specification, or the Use for Specification, of an Area as a Disposal Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Proposed Determination.

SUMMARY: Section 404(c) of the Clean Water Act (33 U.S.C. 1251 *et seq.*) provides that, if the Administrator of the U.S. EPA determines that unacceptable adverse effects on shellfish beds, fishery areas and wildlife would result from the discharge of dredged or fill material, he may exercise his authority to withdraw or prohibit the defined area from specification as a disposal site. In effect, the Administrator would be vetoing a permit issued by the Corps of Engineers. The procedures for implementation of 404(c) are set forth in 40 CFR 231. This notice is being published in accordance with § 231.3(2) by the Regional Administrator of Region III.

On September 26, 1980, the Corps of Engineers advertised permit application No. NABOP–FR 80–0789 for the impoundment of the upper St. Mary's River. The applicant is the Maryland Department of Natural Resources, Capital Programs Administration, Tawes State Office Building, Annapolis, Maryland 21401. The proposed project site is located in the St. Mary's River and adjacent wetlands, approximately 450 yards north of Maryland Route 471, St. Mary's County, Maryland.

FOR FURTHER INFORMATION CONTACT: Karen M. Wolper, Records Clerk, Wetlands Review Section (3WM13), Environmental Protection Agency, Region III, Sixth and Walnut Streets, Philadelphia, PA 19106, (215–597–3357).

SUPPLEMENTARY INFORMATION:

Background

Under Section 404 of the Clean Water Act (33 U.S.C. 1251 *et seq.*) any person who wishes to discharge dredge or fill material into the waters, including wetlands, of the United States must first obtain a dredge or fill permit from the Secretary of the Army, acting through the Chief of Engineers.

During the public interest review of this permit application, EPA requested that an Environmental Assessment (EA) be performed (October 20, 1980). The request was made because the Corps' public notice did not provide sufficient information. EPA's major concerns were relative to project justification and the inadequacy of the resource assessment.

On December 18, 1980, EPA evaluated the Environmental Assessment (EA) submitted by the Corps. This document, prepard by the applicant, also proved to be inadequate. Subsequently, in response to indications that significant wetland areas would be inundated by project implementation, EPA requested (January 6, 1981) that a wetland inventory be conducted. A January 13, 1981 site inspection by EPA personnel

confirmed the presence of an extensive, diverse wetland area that would be destroyed should the proposed project be implemented.

A wetland inventory was submitted by the applicant on February 27, 1981. It was based on the U.S. Fish and Wildlife Service National Wetland Inventory maps of the area. This inventory revealed that at least 111 acres of wetlands were to be destroyed at the project site. The inventory was forwarded to EPA by the Corps on March 11, 1981.

On July 10, 1981, EPA recommended that the Corps' permit authorization be denied. Furthermore, EPA suggested that the project merited the preparation of an Environmental Impact Statement, pursuant to the National Environmental Policy Act, because of the involvement of Federal permitting authorities and the expenditure of Federal funds. (The project is to be funded largely through the Soil Conservation Service of the U.S. Department of Agriculture.) The original EIS was a two page document, written in 1970, which concluded that "no adverse effects on the environment have been identified." The U.S. Fish and Wildlife Service also recommended denial of permit authorization on July 24, 1981.

EPA staff then initiated an intensive wetland inventory of the entire project area. Aerial survey and photographic analysis, follwed by field evaluations were performed during March through June of 1982. These field exercises revealed a wetland system that is much more complex and diverse than had been indicated earlier. The wetland area also proved to be more extensive than previously estimated. EPA estimates that at least 170 acres of wetland would be destroyed by the project.

Proposed mitigation measures for the project were evaluated at this time and these measures were determined to be inadequate for replacement of the extensive, high quality wetlands that now exist at the project site.

The Corps of Engineers held a public hearing on September 7, 1982. Testimony was given at the hearing by representatives of the Soil Conservation Service, the Department of Natural Resources and local citizens. Subsequent to the public hearing the District Engineer decided to issue the permit, and notification of intent to issue was forwarded to EPA on September 28, 1982. Accordingly, on September 29, 1982, the Regional Administrator notified EPA headquarters of his intention to elevate the permit decision to higher authorities at EPA and the Corps, renewing Region III's objections to issuance of permit NABOP-FR 80-0789. Pursuant to the EPA-Corps memorandum of agreement, EPA headquarters submitted a 404(q) referral to the Assistant Secretary of the Army on October 27, 1982. The COE granted limited acceptance of the elevation and agreed to investigate only the mitigation issue. On January 28, 1983 the Corps notified EPA that the permit would be issued, notwithstanding EPA's objections. The permit was forwarded for signature to the State of Maryland, at which time the Chesapeake Bay Foundation filed suit against the Corps of Engineers to enjoin permit issuance.

On May 17, 1983, the permit was accepted and endorsed by the State of Maryland. On May 27, 1983, EPA Region III prepared to initiate 404(c) proceedings by notifying the Corps of Engineers of the Region's intent to issue a public notice of a proposed determination to prohibit or deny the specification, or use for specification as a disposal site of the area covered by the proposed permit No. NABOP-FR 80-0789. The Corps had 15 days to respond to EPA's letter of intent to prohibit implementation of the St. Mary's impoundment site as a disposal area through Section 404(c) proceedings. However, on June 10, 1983, a 7 day comment time extension was requested by the Corps and verbally granted by EPA. The Corps response, dated June 21, 1983, acknowledged the 404(c) action undertaken by EPA, and placed the Maryland DNR permit in an inactive status until the resolution of the 404(c) proceeding. On June 23, 1983, the Soil Conservation Service (SCS) issued a notice of intent to supplement the previous EIS concerning the St. Mary's Watershed. SCS expects to have a draft EIS completed by October 1, 1983. EPA will consider the supplemental EIS associated with the project prior to making final its 404(c) determination. Normally, at the conclusion of the public comment/public hearing period, the Regional Administrator will decide whether to recommend that the determination be made final by the Administrator or to withdraw the proposed determination. However, Region III will reopen the comment period to evaluate all information, including the supplemental EIS, prior to its 404(c) determination. In the event the applicant or the project sponsor decides not to proceed with the project, the Regional Administrator will withdraw the proposed determination. If the proposed determination becomes final by action of the EPA Administrator, it will prevent the subsequent discharge of fill material at this site.

Impoundment of the upper St. Mary's River under proposed permit No. NABOP-FR 80-0789 would have an unnecessary and unacceptable adverse impact on the fisheries, shellfisheries, wildlife, and wetland resources of the St. Mary's River Watershed. Palustrine wetland losses caused by the inundation of wetlands on the project site and by the isolation of other upstream wetland areas from the estuarine processes of the St. Mary's River Watershed total approximately 344 acres. Those losses of wetland values, combined with the estimated 198 acres already destroyed or isolated by a nearby (SCS/MD DNR) impoundment, will account for the elimination of 57% of the watershed's palustrine wetland resource.

Purpose of the Public Notice

Region III would like to obtain public comments on whether or not the impacts of the impoundment of an ecologically contributing wetland system represent an unacceptable adverse effect as described in 404(c) of the Clean Water Act. Any interested persons may submit written comments on the proposed determination. Comments should be directed to whether the proposed determination should become the final determination or whether corrective action could be taken to reduce the adverse impact of the discharge. All such comments will be considered in preparing the recommended determination. Any interested person, affected land owner, or permit applicant or holder may request a hearing by submitting a written request during the public comments period. All comments and/or requests for a hearing should be submitted no later than 60 days from the date of this notice, to Karen M. Wolper, Records Clerk, Wetlands Review Section (3WM13), Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, (215) 597-3357.

Interested persons may obtain additional information including copies of the proposed determination.

Dated: September 1, 1983.

Thomas P. Eichler,

Regional Administrator, Region III.

[FR Doc. 83-25440 Filed 9-16-83; 8:45 am]

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket No. 83-955; File No. BR-801201VG et al.]

Daniel Meister, Trustee in Bankruptcy for New Haven Radio, Inc., et al.; Hearing Designation Order

In re applications of Daniel Meister, Trustee In Bankruptcy For New Haven Radio, Inc., MM Docket No. 83-955, File No. BR-801201VG; Has: 1340 kHz, 250 W, 1 kW-LS, U; For Renewal of License of Station WNHC, New Haven, Connecticut; Daniel Meister, Trustee In Bankruptcy For New Haven Radio, Inc. (Assignor), MM Docket No. 83-956, File No. BAL-821118GB; and Wardoco, Inc. (Assignee) For Consent to the Assignment of License of Station WNHC New Haven, Connecticut; Southern Connecticut Radio New Haven, Connecticut, MM Docket No. 83-957, File No. BP-810302AB; Req: 1340 kHz, 250 W, 1 kW-LS, U; For a Construction Permit.

Adopted: July 22, 1983.

Released: September 14, 1983.

By the Chief, Mass Media Bureau.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has under consideration: (1) the license renewal application of Daniel Meister, Trustee in Bankruptcy for New Haven Radio, Inc. (hereinafter "licensee" or "trustee"), for AM radio station WNHC, New Haven, Connecticut; (2) an application for consent to the assignment of the WNHC license from the trustee to Wardoco, Inc. ("Wardoco"); and (3) the mutually-exclusive application of Southern Connecticut Radio ("Southern Connecticut") for a construction permit for a radio station specifying WNHC's frequency and facilities. Also before us are a petition to deny the WNHC license renewal application, filed on March 2, 1981, by Carl Grande and Stanley Scholsohn, the principals of Southern Connecticut, and a petiton to dismiss or deny the Southern Connecticut application filed by Meister on October 6, 1981.

Procedural Matters

2. *Southern Connecticut's Petition to Deny.* Grande and Scholsohn did not support their petition with an affidavit demonstrating personal knowledge of the facts alleged, nor did they indicate that a copy of the petition was served upon licensee. Accordingly, it does not meet the statutory requirements for a petition to deny. 47 U.S.C. 309(d) (1). Moreover, that pleading is essentially a petition to specify issues. Since the Commission's *Report and Order* in re *Revised Procedures for the Processing of Contested Broadcast Applications; Amendments of Part 1 of the Commission's Rules*, 72 FCC 2d 202 (1979), directed the deletion of all issue pleadings in pending cases, the matters sought to be raised in this petition have not been considered. Accordingly, an opportunity to raise any allegations contained therein will be afforded the parties post-designation pursuant to Section 1.229 of the Commission's Rules.

3. *Trustee's Petiton to Dismiss or Deny.* The trustee filed a "petition to Dismiss or Deny" the Southern Connecticut application five months after the deadline for petitions to deny. The trustee claims it should be considered timely since he filed it within thirty days after becoming licensee of WNHC. However, that assertion is without merit, as Section 73.3584(a) of the Commission's Rules states that petitions to deny new applications must be filed by the "cut-off" date specified in the FCC public notice, *i.e.*, May 1, 1981. While it is true that Meister was not yet licensee on that date, WNHC did have as licensee another trustee who filed the WNHC renewal application and could have timely filed a petition against Southern Connecticut's application. This truatee has failed to meet the standards established by Section 73.3584(a), which provides that extensions of time to file petitions to deny will only be granted if all parties consent or a compelling showing is made that unusual circumstances made the filing of a timely petition impossible. Accordingly, the petition will be dismissed and considered as an informal objection. The matters sought to be raised in the trustee's pleading comprise, essentially, a petition to specify issues and, accordingly, such matters have not been considered. While Southern Connecticut's application is deficient in certain respects requiring the specification of issues for hearing, see paragraph 12 *infra*, the application for purposes of filing was substantially complete and therefore, properly accepted. An opportunity to raise the other matters contained in the trustee's pleading will be afforded post-designation pursuant to Section 1.229 of the Commission's Rules. See para. 2, *supra*.

4. *Other Matters.* The WNHC license was formerly held by New Haven Radio, Inc., until September 10, 1980, when its president and sole shareholder, Anthony R. Martin-Trigona, filed a petition for voluntary reorganization pursuant to the Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York. On October 10, 1980, that Court appointed Nicholas J. Bua trustee. Bua, as trustee, succeeded by operation of law on the date of his appointment to all the duties of a Commission licensee, including the responsibility of filing a license renewal application as he did on December 1, 1980, as required by the Commission's Rules. On December 8, 1980, Bua's appointment was terminated and Trigona was placed as debtor in possession until January 20, 1981, when Daniel Meister was approved trustee by the Bankruptcy Court. On February 19, 1981, Meister requested that his name be substituted as trustee on the WNHC renewal application. Although Trigona, on December 1, 1980, tendered to the Commission a license renewal application for WNHC on behalf of New Haven Radio, Inc., that corporation was not the licensee of the station on that date. Therefore, the renewal application submitted by Trigona will be dismissed. In addition, related pleadings filed by Trigona, a "Petition to Deny and Demand for Hearing," a "Motion to Dismiss Application," a "Petition to Deny Renewal of License," a "Motion to Bar Commission Staff Members from Making Anonymous Comments to the News Media," a "Petition to Deny" the application of Daniel Meister for assignment of the license of WNHC to Wardoco Inc., and a "Motion to Dismiss Application as Fraudulent and Unauthorized," will also be dismissed.[1]

The Competing Applications

5. *Southern Connecticut.* Southern Connecticut estimates that it will require $260,125 to construct its proposed station and operate it for three months. In order to meet those costs, it intends to rely on existing capital of $200,000 and a bank loan of $135,000. However, the applicant has failed to provide any documentation for the bank loan. In addition, the application states that there are no funds on deposit in a bank or other depository and there is no balance sheet submitted to show the existence of the claimed capital. Morever, the financial statements of Southern Connecticut's two principals do not show sufficient liquid assets to provide the necessary funds for initial construction and operation.[2] Thus, the material submitted in the application does not demonstrate Southern Connecticut's financial qualifications.

---

[1] These pleadings for the most part raise matters addressed herein in the context of the trustee's and Southern Connecticut's petition. Allegations not addressed here may only be raised if Trigona is granted party status. See Section 1.223(b) of the Commission's Rules.

[2] Both have not properly described or shown the ready marketability of their non-cash assets. In addition, Grande has failed to demonstrate that his real and personal property can be relied upon to provide a readily available source of funds.

Consequently, an appropriate issue will be specified.

6. Applicants for new broadcast stations are required by Section 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. We have no evidence that Southern Connecticut published the required notice. To remedy this deficiency, Southern Connecticut must publish local notice of its application, if it has not already done so, and so inform the presiding Administrative Law Judge.

7. *WNHC.* The WNHC renewal application and the Southern Connecticut proposal are mutually exclusive in that they both seek authorization for the same frequency in New Haven. Generally, when the Commission receives an application for a new broadcast facility whose proposal would interfere with the operation of an existing station for which a renewal application is on file, a comparative hearing must be held to determine which applicant would better serve the public interest. See Section 309(d)(1) of the Communications Act of 1934, as amended (47 U.S.C. § 309(d)(1)). However, in this case, the WNHC license is held by the trustee, who is charged with operating the station until assignment of that license can be made to a qualified assignee. The trustee, therefore, seeks to renew the WNHC license in order to assign it to Wardoco. Thus, the question arises as to which proposals are to be compared in this proceeding.

8. In analogous tripartite situations, the Commission has stated that "the public interest would better be served by comparing the qualifications of the two parties intending to operate the station; namely the prospective assignee and the construction permit applicant . . ." *1400 Corp.*, 4 FCC 2d 715, 716 (1966). See also, *Cleveland Board of Education*, 87 FCC 2d 9, 10) (1981); *Bronco Broadcasting Co., Inc., et al.*, 50 FCC 2d 529, 536 (1974). Consequently, because this trustee has been under a continuing obligation to effectuate an assignment of the WNHC license, we find that the most appropriate comparison under the current circumstances would be between Wardoco, as the proposed assignee of the license, and Southern Connecticut, the applicant for a construction permit. If Southern Connecticut prevails in the hearing, it will be awarded a construction permit and the renewal application will be denied. If Wardoco prevails, the renewal and assignment applications will be granted.[3]

9. Review of the assignment application indicates that Wardoco is legally, financially, technically and otherwise qualified to operate the station as proposed. The assignment as proposed will not only fulfill the Order of the bankruptcy court, but will also permit Wardoco to participate in a comparative hearing with Southern Connecticut to determine which applicant for the WNHC facilities will provide better service to the New Haven community.

10. Accordingly, it is ordered, that the petition to dismiss or deny the Southern Connecticut application filed by the trustee is denied; the motion to dismiss and petition to deny the Southern Connecticut application, with a demand for hearing, filed by Anthony R. Martin-Trigona are dismissed; the petition to deny the renewal application of New Haven Radio, Inc., filed by Grande and Scholsohn is dismissed; the petition to deny the renewal application being prosecuted by the trustee filed by Anthony R. Martin-Trigona is dismissed; and the "Motion to Bar Commission Staff Members from Making Anonymous Comments to the News Media" filed by Anthony R. Martin-Trigona is dismissed. Additionally, the petition to deny the application of Daniel Meister for assignment of the license of WNHC to Wardoco, Inc., and the "Motion to Dismiss Application as Fraudulent and Unauthorized" are dismissed.

11. Except as indicated by the issues specified below, the applications of Southern Connecticut Radio and Wardoco, Inc. demonstrate that the applicants are legally, financially, technically and otherwise qualified to operate as proposed. A hearing will be held to compare their qualificaitons. If Southern Connecticut prevails in that hearing, it will be awarded the construction permit and the renewal application will be denied. If Wardoco prevails, the renewal and assignment applications will be granted.[4]

12. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications of Southern Connecticut Radio and Wardoco, Inc. Are designated for a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine (a) the sources and availability of Southern Connecticut's assets, and (b) in light thereof, whether Southern Connecticut is financially qualified.

2. To determine which of the proposals would, on a comparative basis, best serve the public interest; and

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

13. It is further ordered, That Southern Connecticut Radio shall inform the presiding Administrative Law Judge within 30 days of the release of this Order as to whether it has complied with the public notice requirements of Section 73.3580(f) of the Commission's Rules, or an appropriate issue will be specified by the Judge.

14. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

15. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594(g) of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 73.3594(g) of the Rules.

16. It is further ordered, That the Mass Media Bureau shall send, by Certified Mail—Return Receipt Requested, a copy of this Hearing Designation Order to each of the parties to this proceeding.

Federal Communications Commission.

Larry D. Eads,

Chief, Audio Services Division, Mass Media Bureau.

[FR Doc. 83-25407 Filed 9-16-83; 8:45 am]

BILLING CODE 6712-01-M

[3] Thus, the trustee's renewal application will be held in abeyance pending resolution of the comparative hearing. See paragraph 11, *infra*.

[4] We are also consolidating the renewal application for the sole purpose of permitting action on that application in accordance with paragraphs 8, above.

[File No. BPH-810909AJ; MM Docket No. 83-958 et al.]

Applications for Consolidated Hearing; Juarez Communications Corp. et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant	City/State	File No.	MM Docket No.
A. Juarez Communications Corporation	Atlanta, Michigan	BPH-810909AJ	83-958
B. Barr Broadcasting Corporation	do	BPH-820120AM	83-959
C. Telecommunications Partners, Ltd.	do	BPH-820415AF	83-960
D. Richard D. Stone and Clara Scatchedason d.b.a. Northland Communications.	do	BPH-820415AO	83-961
E. Up North Broadcasting Company	do	BPH-820211AL	83-962

2. Pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety in a sample standardized Hearing Designation Order (HDO) which can be found at 48 FR 22428, May 18, 1983. The issue headings shown below correspond to issue headings contained in the referenced sample HDO. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicant(s)

1. (See Appendix), A
2. Comparative, A, B, C, D, E
3. Ultimate, A, B, C, D, E

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding may be obtained, by written or telephone request, from the Mass Media Bureau's Contact Representative, Room 242, 1919 M Street, NW., Washington, D.C. 20554. Telephone (202) 632-6334.

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

Appendix—Issue(s)

To determine with respect to the following applicant(s) whether, in light of the evidence adduced concerning the deficiency set forth above in paragraph 8 *, the applicant (s) is financially qualified: A (Juarez).

[FR Doc. 83-25406 Filed 9-16-83; 8:45 am]

BILLING CODE 6712-01-M

* Paragraph 8 reads as follows: The material submitted by the applicant(s) below does not demonstrate its financial qualifications. Accordingly, an issue will be specified concerning the following deficiency: *Applicant(s)*—A (Juarez); *Deficiency*—Neither bank commitment letter nor equipment supplier letter contains specific terms.

California Telecasters, Rancho Palos Verdes, California; MM Docket No. 83-795, File No. BPCT-830325KI;

Channel 44, Inc., Rancho Palos Verdes, California; MM Docket No. 83-796, File No. BPCT-830325KJ; For Construction Permit.

Adopted: July 28, 1983.
Released: September 12, 1983.

By the Chief, Mass Media Bureau.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications for a new commercial television station to operate on Channel 44, Rancho Palos Verdes, California; a petition for leave to amend filed by Springfield Television Corporation of California Inc. (Springfield) [1]; a petition for leave to amend filed by Palos Verdes Broadcasting Company [2] and related pleadings.

2. The effective radiated visual power, antenna height above average terrain and other technical data submitted by the applicants indicate that there would be a significant difference in the size of the areas and population that the respective applicants propose to serve. Consequently, for the purpose of comparison, the areas and population which would be within the predicted 64 dBu (Grade B) contour, together with the availability of other television services of 64 dBu (Grade B) or greater intensity, will be considered under the standarad comparative issue, for the purpose of determining whether a comparative preference should accrue to any of the applicants.

3. Springfield Television Corporation of California, Inc. (Springfield), Rancho Palos Verdes Broadcasters, Inc. (RPVB, Inc.) and California Telecasters all specify the same transmitter site. On May 20, 1983, RPVB, Inc. filed an amendment to its application, which included a copy of a letter from the attorney for Santa Catalina Island Conservancy (Conservancy), owner of the proposed site. The letter, which was addressed to South Bay Broadcasting Company, Inc. (also applicant for Channel 30) indicates that the specified transmitter site is not available. Accordingly, an appropriate issue will be specified.

4. No determination has been made that the tower heights and locations proposed by Rancho Palos Verdes Broadcasters, Inc.,[3] and California Telecasters would not constitute a hazard to air navigation. Since a question exists as to whether a site on Santa Catalina Island would be available to either of these applicants, it would be futile to specify the conventional air hazard issue. Therefore, a contingent air hazard issue will be specified which will require trial of the issue only if it has been established that a site on the Island would, in fact, be available. If it is found that no site would be available on the Island to any of the applicants, each of the applicants would have to amend its application to propose a different site and obtain FAA approval for the new height and location. In that event, the presiding officer would need to specify an air hazard issue with respect to those applicants who are unable to obtain FAA approval.

5. No determination has been made that the tower heights and locations proposed by South Bay Broadcasting Company, Inc., Palos Verdes Broadcasting Company, and Channel 44, Inc. would not constitute a hazard to air navigation. Accordingly, an appropriate issue will be specified.

6. Section 73.685(e) of the Commission's Rules states that stations operating on Channels 14-83 with transmitters delivering a peak visual power of more than one kilowatt may employ directive transmitting antennas with a maximum to minimum ration in the horizontal plane of not more than 15 dB. California Telecasters and Channel 44, Inc. each proposes a directional antenna with a maximum to minimum radio in excess of 15 dB. However, each has requested a waiver of Section 73.685(e). Accordingly, an issue will be specified to determine if circumstances exist to warrant waiver of Section 73.685 of the Rules.

7. Sam Sangmyun Choi, Springfield Television Corporation of California, Inc., Palos Verdes Broadcasting Company, California Telecasters and Channel 44, Inc. each proposes a

---

[1] On May 26, 1983, Springfield petitioned for leave to amend to change its name from Springfield Television Corporation and to reflect changes in ownership. The petition will be granted and the amendment will be accepted for Section 1.65 purposes only.

[2] On June 17, 1983, Palos Verdes Broadcasting Company filed a petition for leave to amend to correct a mnor error in its application. The amendment is accepted for Section 1.65 purposes only.

[3] The Commission is not in receipt of the Federal Aviation Administration's study for Rancho Palos Verdes Broadcasters, Inc.

transmitter site that is located 1.08 miles from Station KBRT(AM), Avalon, California. Because of the proximity of the proposals to KBRT(AM), grant of a construction to permit to any of these applicants will be conditioned to ensure that KBRT's radiation pattern is not adversely affected by the construction of the proposed facility.

8. The information submitted by Springfield Television of California, Inc. (Springfield) and California Telecasters in Section V–C of their respective applications, regarding the overall tower height above ground (AGL), does not agree with the data that each of these applicants specified in Section V–G of their applications and filed with the Federal Aviation Administration (FAA). South Bay and Springfield each specifies 236.4 feet as its tower height AGL in Section V–C. However, each of their Sections V–G specifies an AGL of 242.8 feet. This is also the AGL they submitted to the FAA. California Telecasters specifies an AGL of 237 feet in Section V–C. However, Section V–G shows an AGL 247 feet, which it also filed with the FAA. Each of these applicants will be required to correct its discrepancies and submit its amendment to the presiding Administrative Law Judge within 20 days after this Order is released.

9. Section 73.636(a)(1) of the Commission's Rules states that no license for a television broadcast station shall be granted to any party if such party directly or indirectly owns, operates, or controls one or more television broadcast stations and the grant of such license will result in any overlap of the Grade B contours of the existing and proposed stations. Walter F. Ulloa, General Partner of Channel 44, Associates, a limited partnership, is employed by Spanish International Communications Corp., licensee of KMEX–TV, Channel 34, Los Angeles, California. Mr. Ulloa has been employed at KMEX–TV since 1975 in a variety of positions. From 1979 to the present Mr. Ulloa has been at various times an account executive and local sales manager. Los Angeles is within the predicted Grade A contour of Channel 44, Associates proposed facility. Accordingly, an issue will be specified to determine whether Mr. Ulloa's association with KMEX–TV, Los Angeles, California, and his interest in Channel 44, Associates' application is inconsistent with the rule; and if so, whether common ownership, operation, or control of KMEX–TV and the proposed television station would be consistent with the public interest.

10.Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

11. Accordingly, it is ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine, with respect to Springfield Television Corporation of California, Inc., Rancho Palos Verdes Broadcasters, Inc. and California Telecasters whether any of them have reasonable assurance of the availability of a transmitter site.

2. In the event that it is determined, pursuant to issue 1, above, that there is reasonable assurance that the transmitter sites proposed by Rancho Palos Verdes Broadcasters, Inc., and California Telecasters on Catalina Island will be available, to determine whether there is a reasonable possibility that the tower height and location proposed by each would constitute a hazard to air navigation.

3. To determine, with respect to South Bay Broadcasting Company Inc., Palos Verdes Broadcating Company, and Channel 44, Inc. whether there is a reasonable possibility that the tower height and location proposed by each would constitute a hazard to air navigation.

4. To determine, with respect to California Telecasters and Channel 44, Inc. whether circumstances exist to warrant a waiver of Section 73.685 of the Commission's Rules.

5. To determine with respect to Channel 44, Associates whether Mr. Ulloa's association with KMEX–TV, Los Angeles California, and his interest in the applicant are inconsistent with Section 73.636 of the Rules, and, if so, whether common ownership, operation, or control of KMEX–TV and the proposed television station would be consistent with the public interest.

6. To determine which of the proposals would, on a comparative basis, best serve the public interest.

7. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

12. It is further ordered, that, in the event of a grant of a construction permit to Sam Sangmyun Choi, Springfield Television Corporation of California, Inc., Palos Verdes Broadcasting Company, California Telecasters or Channel 44, Inc. the construction permit will be conditioned as follows:

Prior to construction of the tower authorized herein, permittee shall notify AM Station KBRT so that, if necessary, the AM station may determine operating power by the indirect method and request temporary authority from the Commission in Washington, D.C. to operate with parameters at variance in order to maintain monitoring point field strengths within authorized limits. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse effects upon the radiation pattern of the AM station. Both prior to construction of the tower and subsequent to the installation of all appurtenances thereon, a partial proof of performance, as defined by Section 73.154(a) of the Commission's Rules, shall be conducted to establish that the AM array has not been adversely affected and, prior to or simultaneous with the filing of the application for license to cover this permit, the results submitted to the Commission.

13. It is further ordered, that Springfield Television of California, Inc. and California Telecasters shall each verify or correct the overall tower height above ground specified in Section V–C, FCC Form 301 and the corresponding data filed with FAA and submit an appropriate amendment to the presiding Administrative Law Judge within 20 days after this Order is released.

14. It is further ordered, that Springfield Television Corporation of California, Inc.'s and Palos Verdes Broadcasting Company's petitions for leave to amend are granted and their amendments are accepted for Section 1.65 purposes only.

15. It is further ordered, that the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 2.

16. It is further ordered, that to avail themselves of the opportunity to be heard, the applicants and the party rspondent herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

17. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies; Elm Bancshares, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President), 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Elm Bancshares, Inc.*, Elmhurst, Illinois; to acquire 100 percent of the voting shares or assets of Bank of Clarendon Hills, Clarendon Hills, Illinois. Comments on this application must be received not later than October 13, 1983.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President), 925 Grand Avenue, Kansas City, Missouri 64198:

1. *ABC Bancshares, Inc.*, McAlester, Oklahoma; to acquire 12 percent of the voting shares or assets of Wilburton State Bancshares, Inc., Wilburton, Oklahoma. Comments on this application must be received not later than October 13, 1983.

Board of Governors of the Federal Reserve System, September 13, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-25393 Filed 9-16-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; Pocohontas Bankshares Corp. et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President), 701 East Byrd Street, Richmond, Virginia 23261:

1. *Pocahontas Bankshares Corporation*, Bluefield, West Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Bluefield, Bluefield, West Virginia. Comments on this application must be received not later than October 13, 1983.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President), 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *County Financial Corporation*, North Miami Beach, Florida; to become a bank holding company by acquiring 100 percent of the voting shares of County National Bank of South Florida, North Miami Beach, Florida. Comments on this application must be received not later than October 12, 1983.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President), 411 Locust Street, St. Louis, Missouri 63166:

1. *Peoples First Bancorp of Madisonville, Inc.*, Madisonville, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of the successor by merger to Peoples Bank and Trust Company, Madisonville, Kentucky. Comments on this application must be received not later than October 5, 1983.

Board of Governors of the Federal Reserve System, September 13, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Fleet Financial Group, Inc., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve bank not later than the date indicated.

A. **Federal Reserve Bank of Boston.** (Richard E. Randall, Vice President), 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Fleet Financial Group, Inc.*, Providence, Rhode Island (consumer finance, mortgage banking and

insurance agency; Florida): To engage *de novo* through its indirect subsidiary, Fleet Finance, Inc. in the origination of first and second real estate mortgage loans and the purchase of real estate mortgages, the origination of consumer loans and the purchase of sales finance contracts and acting as agent for the sale of credit life insurance, credit accident and health insurance and credit property insurance. The credit life and credit accident and health insurance which would be sold would be underwritten by an affiliate, Consumer Life Insurance Company, Inc. The sale of property insurance in connection with the extensions of credit by Fleet Finance, Inc., is grandfathered under section 601(D) of the Garn-St Germain Depository Institutions Act. These activities would be conducted from a *de novo* office located in Inverness, Florida serving Citrus County, Florida, and surrounding areas. Comments on this application must be received not later than October 7, 1983.

B. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President), 33 Liberty Street, New York, New York 10045:

1. *The Bank of New York Company, Inc.*, New York, New York (mortgage banking activities; New York): To engage, through its wholly-owned subsidiary Arcs Mortgage, Inc., in the following activities: making loans secured by first and second mortgages on real estate consisting of one-to-four family residential properties. Such activities would be conducted at its branch in Westbury, New York, with a primary service area of the greater New York City metropolitan area and the State of New York. Comments on this application must be received not later than October 13, 1983.

2. *Bankers Trust New York Corporation*, New York, New York (execution and clearance of futures contracts; United States and abroad): To engage through its wholly-owned subsidiary, BT Futures Corp., in executing and clearing futures contracts on U.S. government and GNMA securities, negotiable money market instruments, foreign exchange and bullion on the major commodity exchanges and their affiliated clearing associations. These activities would be conducted from offices of New York, New York and Houston, Texas, serving customers in the United States and abroad. Comments on this application must be received not later than October 13, 1983.

3. *Norstar Bancorp, Inc.*, Albany, New York (investment advisory activities; northeastern United States): To engage through its subsidiary, Norstar Investment Advisory Services Inc., in the business of acting as an investment or financial advisor to the extent permitted by section 225.4(a)(5) of Regulation Y. These activities will be conducted from an office in Rochester, New York, serving Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island and Vermont. Comments on this application must be received not later than October 13, 1983.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President), 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *First Bancgroup-Alabama, Inc.*, Mobile, Alabama (insurance activities; Alabama): To engage, through its subsidiary, FBG Insurance Agency, Inc., in the following activities; acting as insurance agent or broker. The types of insurance will include credit life insurance, accident and health insurance, property damage insurance that is directly related to an extension of credit by bank or nonbank subsidiaries of First Bancgroup-Alabama, Inc. These activities would be performed from the offices of First National Bank of Russellville, Russellville, Alabama, servicing the city of Russellville, and the surrounding area of Franklin County, Alabama. Comments on this application must be received not later than October 11, 1983.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President), 101 Market Street, San Francisco, California 94105:

1. *Security Pacific Corporation*, Los Angeles, California (mortgage and servicing activities; Wyoming): To engage through its subsidiary, Security Pacific Mortgage Corporation in the origination and acquisition of mortgage loans, including development and construction loans on multi-family and commercial properties for Security Pacific Mortgage Corporation's own account or for sale to others; and the servicing of such loans for others. These activities would be conducted from an office of Security Pacific Mortgage Corporation in Cheyenne, Wyoming, serving the State of Wyoming. Comments on this application must be received not later than October 12, 1983.

Board of Governors of the Federal Reserve System, September 13, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Blood Products Advisory Committee

Date, time, and place. October 6 and 7, 8:30 a.m., Rm. 121, Bldg. 29, Office of Biologics, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, October 6, 8:30 a.m. to 9:30 a.m.; open committee discussion, 9:30 a.m. to 11:30 a.m.; closed presentation of data, 1 p.m. to 3 p.m.; open committee discussion, 3 p.m. to 4:30 p.m.; closed committee deliberations, October 7, 8:30 a.m. to 12 m.; Mary Ann Tourault, National Center for Drugs and Biologics (HFN-830), Food and Drug Administration, Bldg. 29, 8800 Rockville Pike, Bethesda, MD 20205, 301-496-5241.

General function of the committee. The committee reviews and evaluates data on the safety, effectiveness, and appropriate use of blood products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. The theme of the meeting will be the use of marker viruses to quantitate the infectivity of plasma derivatives.

Closed presentation of data. The committee will hear trade secret or confidential commercial information from individual manufacturers relevant to pending biological license applications for plasma derivative products and on new drug applications

for plasma expanders. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Closed committee deliberations. The committee will review trade secret or confidential commercial information relevant to pending biological license applications for plasma derivative products and on new drug applications for plasma expanders. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Gastroenterology-Urology Device Section of the General medical Devices Panel

Date, time, and place. October 13 and 14, 9 a.m., Rm. 1207, 8757 Georgia Ave., Silver Spring, MD.

Type of meeting and contact person. Open public hearing, October 13, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 11 a.m.; closed presentation of data, 11 a.m. to 12 m.; open committee discussion, 1 p.m. to 2 p.m.; closed presentation of data, 2 p.m. to 3 p.m.; open committee discussion, 3 p.m. to 4 p.m.; open committee discussion, October 14, 9 a.m. to 11 a.m.; closed presentation of data, 11 a.m. to 12 m.; open committee discussion, 1 p.m. to 4 p.m.; Norman T. Welford, National Center for Devices and Radiological Health (HFK-420), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7750.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before September 30, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss premarket approval applications (PMA) for a plasmapheresis filter and control system for therapeutic purposes and for a laser for surgical purposes.

Closed presentation of data. The committee will discuss trade secret data presented by sponsors of PMA's for a plasmapheresis filter and control system for therapeutic purposes and a laser for surgical purposes. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Circulatory System Devices Panel

Date, time, and place. October 14, 8:30 a.m., Rm. 703-727A, 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, October 14, 8:30 a.m. to 11 a.m.; open committee discussion, 11 a.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 4 p.m.; Glenn A. Rahmoeller, National Center for Devices and Radiological Health (HFK-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7559.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of medical devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before September 30, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss (1) a petition for the reclassification of cardiopulmonary bypass oxygenators from class III to class II, submitted by the Health Industry Manufacturers Association; and (2) a premarket approval application for the Diplos-03 dual chamber (sensing and pacing) pacemaker pulse generator and EPR-400 programmer, submitted by Biotronik Sales, Inc.

Closed committee deliberations. The panel may discuss (1) certain trade secret or confidential commercial information concerning the premarket approval application and (2) certain investigational device exemptions for devices that will be the subject of future premarket approval applications. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Immunology Device Section of the Immunology and Microbiology Devices Panel

Date, time, and place. October 17 and 18, 9 a.m., Rm. 703-727A, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, October 17, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 12 p.m.; closed presentation of data, 1 p.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 5 p.m.; open committee discussion, October 18, 9 a.m.to 11 a.m., closed presentation of data, 11 a.m. to 1 p.m.; closed committee deliberations, 1 p.m. to 3 p.m.; open committee discussion, 3 p.m. to 5 p.m.; Srikrishna Vadlamudi, National Center for Devices and Radiological Health (HFK-440), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 5, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application (PMA) for a tumor marker test kit for use as an aid in the management of cancer patients.

Closed presentation of data. Representatives of the manufacturer will present information to the committee containing trade secret data regarding the PMA. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Closed committee deliberations. The committee will review and discuss trade secret information regarding the PMA. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however,

that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94-409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

Dated: September 13, 1983.

Mark Novitch,

Acting Commissioner of Food and Drugs.

[FR Doc. 83-25397 Filed 9-14-83; 2:54 pm]

BILLING CODE 4160-01-M

[Docket No. 83N-0.115; DESI 12368]

Isoproterenol Hydrochloride for Oral Use; Drug Efficacy Study Implementation; Withdrawal of Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of the new drug application for Proternol (controlled release) Tablets containing isoproterenol. FDA is withdrawing approval because the drug product lacks substantial evidence of effectiveness for its labeled indication. The drug product has been used for the treatment of heartblock and Adams-Stokes syndrome.

EFFECTIVE DATE: October 19, 1983.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific drug product should be identified with Docket No. 83N-0115 and reference number DESI 12368 and directed to the Division of Drug labeling compliance (HFN-310), national Center for Drugs and Biologics, food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary E. Catchings, National Center for Drugs and Biologics (HFN-8), Food and Drug Administration, 5600 Fishers Lane, Rockville MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of May 20, 1983 (48 FR 22601), the Director of the National Center for Drugs and Biologics revoked the temporary exemption that had allowed isoproterenol hydrochloride (controlled release) tablets to remain on the market beyond time limits established under the Drug Efficacy Study Implementation program. That notice also proposed to withdraw approval of the new drug application that provided for the product and offered an opportunity for hearing on the proposal. The basis of the proposal was a lack of substantial evidence of effectiveness as required by section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) and 21 CFR 314.111(a)(5). Neither the holder of the new drug application nor any other person filed a written notice of appearance and request for hearing as provided by the May 20, 1983 notice. The failure to file such an appearance constitutes an election by such persons not to avail themselves of the opportunity for hearing. Accordingly, approval of the following new drug application is being withdrawn:

NDA 12-368; Proternol (controlled-release) Tablets containing isoproterenol hydrochloride; Key Pharmaceuticals, Inc., 300 Northeast 59th St., Miami, FL 33137.

Any drug product that is identical, related, or similar to the drug product named above and is not the subject of an approved new drug application is covered by the new drug application reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance (address given above).

The Director of the National Center for Drugs and Biologics, under the

Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053 as amended (21 U.S.C. 355)), and under the authority delegated to him (21 CFR 5.82) finds that on the basis of new information before him with respect to this drug product, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug product will have the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

Therefore, pursuant to the foregoing finding, approval of NDA 12–368 and all its amendments and supplements is withdrawn effective October 10, 1983.

Shipment in interstate commerce of the product named above or of any identical, related, or similar product that is not the subject of an approved new drug application will then be unlawful.

Dated: September 9, 1983.

Harry M. Meyer, Jr.,

Director, National Center for Drugs and Biologics.

[FR Doc. 83-25413 Filed 9-16-83; 8:45 am]

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Receipt of Petition for Federal Acknowledgement of Existence as an Indian Tribe

This is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Pursuant to 25 CFR 83.8(a) notice is hereby given that the Seminole Nation of Florida, c/o Messrs. Robert T. Coulter and Curtis Berkey, Indian Law Resource Center, 601 E Street, SE, Washington D.C. 20003; has filed a documented petition for acknowledgment by the Secretary of the Interior that the group exists as an Indian tribe. The petition, which was signed by members of the group's governing body, was received by the Bureau of Indian Affairs on August 5, 1983.

This is a notice of receipt of petition and does not constitute notice that the petition is under active consideration. Notice of active consideration will be by mail to the petitioner and other interested parties at the appropriate time.

Under § 83.8(d) of this title, interested parties may submit factual or legal arguments in support of or in opposition to the group's petition. Any information submitted will be made available on the same basis as other information in the Bureau of Indian Affairs files.

The petition may be examined by appointment in the Division of Tribal Government Services, Bureau of Indian Affairs, Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20242.

Kenneth Smith,

Assistant Secretary, Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

Colorado; Filing of Plats of Survey

September 6, 1983.

The plats of survey of the following described lands were officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., September 6, 1983.

Sixth Principal Meridian

T. 4 S., R. 81 W.

The plat, in two sheets, representing the dependent resurvey of the Tenth Guide Meridian West (east boundary), the west and north boundaries, a portion of the subdivisional lines, and the survey of the subdivision of certain sections, T. 4 S., R. 81 W., Sixth Principal Meridian, Colorado, Group 558, was accepted August 15, 1983.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

New Mexico Principal Meridian

T. 41 N., R. 10 E.

The plat representing the dependent resurvey of a portion of the west boundary of Luis Maria Baca Grant No. 4, a portion of the Tenth Standard Parallel North (south boundary), and a portion of the subdivisional lines, T. 41 N., R. 10 E., New Mexico Principal Meridian, Colorado, Group 716, was accepted August 16, 1983.

T. 42 N., R. 9 E.

The plat representing the dependent resurvey of a portion of the east boundary, and a portion of the subdivisional lines, T. 42 N., R. 9 E., New Mexico Principal Meridian, Colorado, Group 716, was accepted August 16, 1983.

T. 42 N., R. 10 E.

The plat representing the dependent resurvey of a portion of the west boundary of Luis Maria Baca Grant No. 4, a portion of the south boundary, and a portion of the subdivisional lines, T. 42 N., R. 10 E., New Mexico Principal Meridian, Colorado, Group 716, was accepted August 16, 1983.

T. 43 N., R. 9 E.

The plat representing the dependent resurvey of a portion of the south boundary, a portion of the east boundary, and a portion of the subdivisional lines, T. 43 N., R. 9 E., New Mexico Principal Meridian, Colorado, Group 716, was accepted August 16, 1983.

T. 43 N., R. 10 E.

The plat representing the dependent resurvey of a portion of the south boundary, and a portion of the subdivisional lines, T. 43 N., R. 10 E., New Mexico Principal Meridian, Colorado, Group 716, was accepted August 16, 1983.

These surveys were executed to meet certain administrative needs of the Bureau of Reclamation.

All inquiries about these lands should be sent to the Colorado State Office, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202.

Kenneth D. Witt,

Chief Cadastral Surveyor for Colorado.

BILLING CODE 4310-84-M

[C-28333 and C-28334]

Colorado; Proposed Continuation of Withdrawals

Dated: September 8, 1983.

In accordance with the provisions of Section 204 of the Federal Land Policy and Management Act, the Bureau of Land Management (BLM) is reviewing possible continuation of existing Naval Oil Shale Reserve No. 1 and Naval Oil Shale Reserve No. 3 withdrawals made by virtue of the authority vested in the President.

1. Executive Order of December 6, 1916, as amended by Restoration Order of June 12, 1919, created Naval Oil Shale Reserve No. 1. The following described lands are currently proposed for withdrawal continuation:

(C-28333)

Sixth Principal Meridian

Description as conformed to latest plats of survey:

T. 5 S., R. 94 W.,
- Sec. 2, lots 2 to 7, inclusive, SW¼NE¼, S½NW¼, SW¼, and W½SE¼;
- Sec. 3, lots 1 to 4, inclusive, S½N½, and S½ (all);
- Sec. 4, lots 1 to 4, inclusive, S½N½, and S½ (all);
- Sec. 5, lots 1 to 4, inclusive, S½N½, and S½ (all);
- Sec. 6, lots 4 to 10, inclusive, S½NE¼, SE¼NW¼, E½SW¼, and SE¼ (all);

Sec. 7, lots 1 to 4, inclusive, E½W½, and E½ (all);
Sec. 8, N½, N½S½, S½SW¼, and *patented lands with minerals reserved to United States in S½SE¼;
Sec. 9, 10, and 11;
Sec. 13, W½NW¼, SW¼, and SW¼SE¼;
Secs. 14 and 15;
Sec. 16, N½N½, S½S½, and *patented lands with minerals reserved to United States in S½N½ and N½S½;
Sec. 17, W½, S½SE¼, and *patented lands with minerals reserved to United States in NE¼ and N½SE¼;
Secs. 18 to 35, inclusive;
Sec. 36, N½NE¼, SW¼NE¼, NW¼, N½SW¼, and SW¼SW¼.

T. 6 S., R. 94 W.,
Sec. 5, lots 3 and 4, and SW¼NW¼;
Sec. 6, lots 4 to 10, inclusive, S½NE¼, SE¼NW¼, E½SW¼, and SE¼;

By Protraction Diagram No. 5,

Sec. 7, NE¼NW¼ and W½NW¼.

T. 5 S., R. 95 W.,
Sec. 1, lots 1 to 4, inclusive, S½N½, and S½ (all);
Sec. 2, lots 1 to 4, inclusive, S½N½, and S½ (all);
Sec. 11 to 14, inclusive, secs. 23 to 26, inclusive, and secs. 35 and 36.

T. 6 S., R. 95 W.,
Sec. 1, lots 3 to 14, inclusive, and S½ (all);
Sec. 2, lots 1 to 12, inclusive, and S½ (all);
Sec. 3, lots 1 to 12, inclusive, E½SE¼, and *patented lands with minerals reserved to United States in SW¼ and W½SE¼;
Sec. 4, lots 1 to 12, inclusive, SW¼, W½SE¼, and *patented lands with minerals reserved to United States in E½SE¼;
Sec. 5, lots 1 to 12, inclusive, and S½ (all);
Sec. 6, lots 3 to 16, inclusive, E½SW¼, and SE¼ (all);
Sec. 7, lots 1 to 8, inclusive, W½NE¼, E½NW¼, and ****patented lands by metes and bounds in remainder of section;
Sec. 8, lots 1 to 4, inclusive, and ****patented lands by metes and bounds in remainder of section;
Sec. 9, lots 1 to 4, inclusive, and ****patented lands by metes and bounds in remainder of section;
Sec. 10, lots 1 to 7, inclusive, and E½NE¼, subject to Mineral Entry application C–012327 for lots 4 and 6, and for portions of lots 1 and 5, and E½NE¼ in unpatented Mineral Survey No. 20819, and ****patented lands by metes and bounds in remainder of section;
Sec. 11, lots 1 to 5, inclusive, N½, and N½SW¼, subject to Mineral Entry application C–012327 for lots 1, 2, 4, and 5, and for portions of lot 3, N½, and N½SW¼ in unpatented Mineral Survey No. 20819, and ****patented lands by metes and bounds in remainder of section;
Sec. 12, lots 1 and 2, N½, and NE¼SW¼, subject to Mineral Entry application C–012327 for portions of lot 1, NW¼, and NE¼SW¼ in unpatented Mineral Survey No. 20819, and ****patented lands by metes and bounds for portions of W½SW¼ south and west of lots 1 and 2;
Sec. 14, ****patented lands in N½NE¼, SW¼NE¼, W½, and NW¼SE¼;
Sec. 15, lots 2to 5, inclusive, W½SW¼, and ****patented lands by metes and bounds in remainder of section, excluding portions of SW¼NW¼ north of lot 1;
Sec. 16, **** patented lands in N½N½ and S½NW¼;
Sec. 17, lots 1 and 2, and **** patented lands by metes and bounds in remainder of section, excluding SE¼SW¼ and portions of SW¼SE¼ west of lot 3;
Sec. 18;
Sec. 19, lots 1 to 7, inclusive, and **** patented lands by metes and bounds in remainder of section;
Sec. 20, **** patented lands in W¼NW¼;
Sec. 22, lots 1, 2, and 4, E½NW¼, and **** patented lands by metes and bounds for portions of N½NE¼, SW¼NE¼, and NW¼SE¼;
Sec. 30, lots 3 and 4.

* Patented lands with all oil and gas and all shale or other rock valuable as a source of petroleum and nitrogen reserved to United States: 960.00 acres.

**** Patented lands with no minerals reserved to United States: Public lands: 4,819.49 acres, 35,587.66 acres.

The area described aggregates 41,367.15 acres in Garfield County.

Patented lands with mineral reservations to the United States are included in the continuation of the withdrawal. Lands patented subsequent to the order as amended, with no mineral reservations to the United States, are included in the continuation of the withdrawal until such time as a formal relinquishment of the order is applied to the lands. Public lands which contain unpatented mineral surveys and valid mining claims in litigation are included in the continuation of the withdrawal until such time as vested rights attach.

2. Executive Order of September 27, 1924, created Naval Oil Shale Reserve No. 3, subject to any valid existing claim and insofar as title therein remains in the United States. The following described lands are currently proposed for withdrawal continuation:

(C–28334)

Sixth Principal Meridan

Description as conformed to latest plats of survey:

T. 5 S., R. 93 W.,
Sec. 6, lots 8, 9, 10, and 12, and *** patented lands with minerals reserved to United States in SE¼NW¼;
Sec. 7, lots 5 to 8, inclusive, W½SE¼, ** patented lands with minerals reserved to United States in lots 1 to 4, inclusive;
Sec. 8, SE¼SW¼;
Sec. 17, NW¼NE¼, E½NW¼, SW¼ SW¼, and *patented lands with minerals reserved to United States in SE¼SW¼;
Sec. 18, lots 1 to 12, inclusive, and NE¼ (all);
Sec. 19, lots 1, 2, and 3, NW¼NE¼, and **patented lands with minerals reserved to United States in lot 4, NE¼NW¼, SE¼SW¼, and SW¼SE¼;
Sec. 20, lots 1 to 4, inclusive, S½NE¼, and S½;
Sec. 29, lots 1 to 8, inclusive, NE¼, and W½W½ (all);
Sec. 30, lot 4, S½SW¼, SW¼SE¼, and **patented lands with minerals reserved to United States in lot 3, N½SW¼, and NW¼SE¼;
Sec. 31, lots 1 to 4, inclusive, W½E½, and W½ (all);
Sec. 32, lots 1 to 4, inclusive, W½E½, and W½ (all).

T. 5 S., R. 94 W.,
Sec. 1, lots 5 to 13, inclusive;
Sec. 2, lot 1;
Sec. 12, lots 3 and 4, S½N½, S½, and **patented lands with minerals reserved to United States in lots 1 and 2;
Sec. 13, NE¼, E½NW¼, N½SE¼, and SE¼SE¼;
Sec. 36, SE¼NE¼, SE¼SW¼, and N½ SE¼.

T. 6 S., R. 94 W.,
Sec. 2, S½NW¼ and NW¼SW¼;

Sec. 25, lot 1, SE¼SW¼, and S½SE¼;
Sec. 26, lots 5, 6, and 7, SE¼NE¼, and N½ SE¼;
Sec. 35, lots 1 to 7, inclusive;
Sec. 36, lots 1, 2, and 7, NE¼, E½NW¼, and NE¼SE¼.
T. 7 S., R. 96 W., sec. 1, lot 1.

*Patented lands with all oil and gas and all shale or other rock valuable as a source of petroleum and nitrogen reserved to United States: 40.00 acres.

**Patented lands with all oil and gas reserved to United States: 522.74 acres.

***Patented lands with all coal reserved to United States: 40.00 acres.

****Patented lands with no minerals reserved to United States: 2,430.81 acres.

*****Patented lands reconveyed to United States with all minerals: 294.25 acres.

Public lands (total includes *****patented lands reconveyed): 19,569.54 acres.

The area described aggregates 22,603.09 acres in Garfield County.

Patented lands with mineral reservations to the United States are included in the continuation of the withdrawal. Lands patented subsequent to the order, with no mineral reservations to the United States, are included in the continuation of the withdrawal until such time as a formal relinquishment of the order is applied to the land. Public lands which contain valid mining claim in litigation are included in the continuation of the withdrawal until such time as vested rights attach.

Certain lands, patented in fee subsequent to the order, have been reconveyed to the United States with all minerals by an exchange procedure. Such lands were within the withdrawal initially, had never been formally relinquished, and are thus subject to the order upon reconveyance to the United States. The reconveyed lands are included in the continuation of the withdrawal. Certain lands, patented prior to the order with no mineral reservations to the United States and erroneously withdrawn by the order in 1924, are included in the continuation of the withdrawal until a formal relinquishment of the order is applied to the land.

The Department of Energy proposes continuation of the withdrawals for 20 years. The purpose of the withdrawals is to allow the development and use of oil shale deposits for the benefit of the United States Navy.

The Bureau of Land Management manages the surface resources of the Naval Oil Shale Reserves through an interagency agreement with the Department of Energy. The subsurface minerals remain under direct Department of Energy supervision. The custody of the property is vested in the Department of Energy. The withdrawals closed the lands to all forms of appropriation under the public land laws, including the mining laws and mineral leasing laws. No change in the segregative effect or use of the land would be affected by the continuations.

Notice is hereby given that a public hearing may be afforded in connection with the proposed withdrawal continuations. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned within 90 days of the publication of this notice. Upon a determination by the State Director, BLM, that a public hearing should be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. Public hearings will be scheduled and conducted in accordance with BLM Manual 2351.16B. Additionally, all persons who wish to submit comments, suggestions or objections in connection with the proposed withdrawal continuations may present their views in writing to the undersigned authorized officer of the BLM within 90 days of the date of publication of this notice.

The authorized officer of the BLM will undertake such investigations as are necessary and prepare a report for consideration by the Office of the Secretary of the Interior. The final determination on the continuation of the withdrawals will be published in the **Federal Register.** The existing withdrawals will continue until such final determination is made.

All communications in connection with these proposed withdrawal continuations should be addressed to the undersigned officer, Bureau of Land Management, Colorado State Office, 1037—20th Street, Denver, Colorado 80202.

Robert D. Dinsmore,

Chief, Branch of Lands and Minerals Operations.

Conveyance of Public Lands; Blaine County, Idaho

September 7, 1983.

Notices is hereby given that pursuant to the Act of October 21, 1976 (90 Stat. 2750; 43 U.S.C. 1713), a patent was issued to Alvin G. Puckett and Garnet Kidd, Kimberly, Idaho, for the following-described public land:

Boise Meridian, Idaho

T. 2 S., R. 17 E.,
Sec. 1, lot 51.

Containing .078 acres.

The purpose of this notice is to inform the public and interested State and local governmental officials of the conveyance.

Louis B. Bellesi,

Deputy State Director for Operations.

BILLING CODE 4310-84-M

[M55891]

Montana; Conveyance of Public Land

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Notice of Conveyance of Public Land in Jefferson County, Montana.

SUMMARY: Notice is hereby given that pursuant to Section 203 of the Act of October 21, 1976 (43 U.S.C. 1713 (1976)), the following described land was conveyed to Dorothy Anne Hil:

Principal Meridian, Montana

T. 9 N., R 3 W.,
Sec. 17, lot 17.

The area described contains 2.56 acres.

The purpose of this notice is to inform State and local governmental officials and other interested parties of the conveyance of the land to Dorothy Anne Hill.

Dated: September 2, 1983.

Edgar D. Stark,

Chief, Lands Adjudication Section.

BILLING CODE 4310-84-M

[W-81674]

Noncompetitive Sale of Public Lands in Hot Springs County, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value.

Sixth Principal Meridian, Wyoming

T. 46 N. R. 99 W.,
Section 13: S½S½S½SE¼SE¼SE¼ = 1.25 acres.
Section 24: Lot 3 = 2.50 acres.
Total = 3.75 acres.

The above described land is being offered as a direct, noncompetitive sale to Conrad and Dorcas V. Soderstrom, owners of the improvements on the sale tract. Soderstroms' own a large, quonset type building valued at $100,000 which is located mainly on their private land, but a small area of the building and access road extend onto public land. The building and other facilities house an oil field service business. Disposal by direct sale will protect their equity investment in the improvements on the land and eliminate any undue hardship if they were compelled to remove or otherwise dispose of the improvements. The land is not suitable for management by another Federal agency and disposal of the parcel will resolve an inadvertent unauthorized occupancy of the land. The land, because of its location or other characteristics, is dufficult and uneconomical to manage as part of the public lands and does not have legal public access. Disposal would not have any significant effect on resource values, and the public interest would best be served by this action. The sale is consistent with Bureau programs and has been discussed with the Hot Springs County Commissioners. The land will not be offered for at least sixty (60) days after the date of this notice.

The following terms and conditions will be applicable to this sale:

1. All minerals in the lands will be reserved to the United States in accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976.

2. Right-of-way for ditches and canals will be reserved to the United States.

3. Patent will be issued subject to all valid existing rights and reservation of record including the following:

a. Drainage facility right-of-way W-81671—Hot Springs County School District Number 1.

b. Power distribution line right-of-way W-80343—Pacific Power and Light Company.

4. The unauthorized occupancy be resolved by payment of fair market rental from date of construction to date of sale.

Detailed information concerning this sale, including the environmental assessment, is available at the Worland District Office, Bureau of Land Management, 1700 Robertson, Worland, Wyoming 82401 (307/347-6151).

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this Realty Action. In the absence of any action by the District Manager, this Realty Action will become the final determination of the Department of the Interior, and the required payment will be requested of Mr. and Mrs. Soderstrom.

DATE: Sixty days after the date of this notice.

ADDRESS:

Bureau of Land Management, 1700 Robertson Avenue, Worland, Wyoming.

FOR FURTHER INFORMATION CONTACT: Joseph M. Wichman, Grass Creek Area Manager, Bureau of Land Management, 1700 Robertson, Worland, Wyoming 82401, Telephone: (307) 347-6151.

Dated: September 7, 1983.

Edward L. Fisk,

Associate District Manager.

BILLING CODE 3410-84-M

Rawlins District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Rawlins District Office, Rawlins, Wyoming

ACTION: Notice of meeting of the Rawlins District Grazing Advisory Board.

SUMMARY: Notice is hereby given in accordance with Public Law 94-463 that a meeting of the Rawlins District Grazing Advisory Board will be held.

DATE: October 20, 1983.

ADDRESS: Rawlins District Office, 1300 N. 3rd Street, P.O. Box 670, Rawlins, Wyoming 82301.

FOR FURTHER INFORMATION CONTACT: David J. Walter, District Manager, Rawlins District, Bureau of Land Management, P.O. Box 670, Rawlins, Wyoming 82301 (307) 324-7171.

SUPPLEMENTARY INFORMATION: The meeting will begin at 9 a.m. in the conference room of the Rawlins District Office. The agenda for this meeting will include:

(1) Cooperative Management Agreements;
(2) Range improvements for Fiscal Year 84;
(3) The Divide Environmental Impact Statement and Range Program Summary (RPS);
(4) Wild horse roundups;
(5) Seven Lakes RPS Update;
(6) Range improvement policy;
(7) Wyoming Stewardship Program;
(8) Public sale program.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3 and 3:30 p.m. or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager on or before October 13, 1983. Depending on the number of persons wanting to make statements, a time limit may be established.

Summary minutes of the meeting will be kept in the district office and will be available during regular business hours for public review. Copies may be obtained for the cost of duplication.

David J. Walter,

District Manager.

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of availability.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM has prepared a Final Management Framework Plan Amendment/Environmental Impact Statement (MFPA/EIS) for the Las Cruces/Lordsburg Resource Area in southwestern New Mexico. The MFPA/EIS proposes to reconsider constraints on energy minerals leasing imposed by existing decisions for the Las Cruces/Lordsburg Resource Area (Dona Ana, Grant, Luna, and Hidalgo Counties), to implement a rangeland management for the 3-County Area (Luna, Hidalgo, and Grant Counties), and to consider the designation of three Areas of Critical Environmental Concern (Gila Lower Box Riparian Area, Gila Middle Box Wildlife Area, and Organ Mountain Scenic Area). The Final MFPA/EIS contains the Proposed Plan for the Las Cruces/Lordsburg Resource Area. The Proposed Plan is a refinement of the Preferred Alternative presented in the Draft MFPA/EIS published in March 1983. The Proposed Plan is BLM's proposed action. All parts of the Proposed Plan may be protested. The protest should include the following information: (1) The name, mailing address, telephone number, and interest of the person filing the protest; (2) a statement of the issue or issues being protested; (3) a statement of the part or parts being protested; (4) a copy of all documents addressing the issue or issues that were submitted during the planning process by the protesting party or an indication of the date the issue or issues were discussed for the records; and (5) a concise statement explaining why the BLM New Mexico State Director's decision is wrong. At the end of the 30-day protest period, the Proposed Plan, excluding any portions under protest, shall become final. Approval shall be withheld on any portion of the plan under protest until final action has been completed on such protest. The approval process and the final plan will be published with the Record of Decision in January 1984.

DATE: Protests on the Proposed Plan must be received no later than 30 days from this notice.

ADDRESS: Protests should be sent to the Director, Bureau of Land Management, 18th and C Streets NW, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Mary Austin, MFPA/EIS Team Leader, BLM Las Cruces District Office, P.O. Box 1420, Las Cruces, New Mexico 88004, (505) 524-8551 or FTS 571-8312.

SUPPLEMENTARY INFORMATION: Copies of the Final MFPA/EIS have been distributed to a mailing list of identified interested parties. A limited number of additional copies are available at the Las Cruces District Office, 317 N. Main, P.O. Box 1420, Las Cruces, New Mexico 88004. Public reading copies are available for review at the BLM State Office, Office of Public Affairs, Joseph M. Montoya Federal Building and U.S. Post Office, Santa Fe, New Mexico, and public and university libraries in Las Cruces, Deming, Silver City, Lordsburg, Albuquerque, New Mexico, and El Paso, Texas. A short final was prepared for this statement; therefore, the Draft and the short Final constitute the Final MFPA/EIS.

Charles W. Luscher,

State Director.

[OR-36282, OR-36283, OR-36284, OR-36285, OR-36286, OR-36287]

Sale of Public Lands; Lake County; Oregon

The following described parcels of land have been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 STAT. 2750, 43 USC 1713) at no less than the appraised fair market value:

Parcel No.	Legal description	Acreage
1, OR-36282	T. 25 S., R. 18 E., Willamette Meridian, Oregon.	
	Sec. 21, W½NW¼	80
2, OR-36283	T. 25 S., R. 19 E., Willamette Meridian, Oregon.	
	Sec. 29, SW¼ SW¼	40
3, OR-36284	T. 25 S. R. 19 E., Willamette Meridian, Oregon.	
	Sec. 29, SW¼SE¼E¼, E½SE¼	120
4, OR-36285	T. 25 S., R. 19 E., Willamette Meridian, Oregon.	
	Sec. 28, NE¼	160
5, OR-36286	T. 26 S., R. 18 E., Willamette Meridian, Oregon.	
	Sec. 13, S½	320
6, OR-36287	T. 28 S., R. 16 E., Willamette Meridian, Oregon.	
	Sec. 1, Lots 1, 2, 3, 4, SW¼NE¼, S½NW¼.	
	Sec. 2, Lot 1	199.49

Bids are being solicited for each parcel offered for sale. Appraised values are not being published in this Notice of Realty Action. The value will be disclosed only at the conclusion of the sale and only for those parcels for which acceptable bids were received; i.e., appraised value or higher.

The sale will be held on Wednesday, November 16, 1983, at 10:00 a.m., Bureau of Land Management Conference Room, 1000 South Ninth Street, Lakeview, Oregon 97630.

The above described land will be sold at public auction through a competitive bid type sale.

The sale is consistent with publicly supported Bureau planning. The sale involves isolated land completely surrounded by provate land, that is difficult and uneconomical to manage as part of the public lands, and is not suitble for management by another Federal department or agency. The public interest will be served by offering this land for sale.

Federal law requires that all bidders be U.S. citizens, 18 years of age or more, a state or state instrumentality authorized to hold property, or in the case of corporations, be authorized to own real estate in the state in which the sale land is offered.

Sealed written bids will be considered only if received by the Bureau of Land Management, 1000 South Ninth Street, P.O. Box 151, Lakeview, Oregon 97630, prior to 10:00 a.m., Wednesday, November 16, 1983. A separate written bid should be submitted for each sale parcel desired. Each written sealed bid must be accompanied by a certified check, postal money order, bank draft or cashiers check, made payable to the Department of the Interior—BLM for at least twenty percent (20%) of the amount bid and shall be enclosed in sealed envelope clearly marked, "Bid for Public Land Sales OR-36282, OR-36283, OR-36284, OR-36285, OR-36286, OR-36287, Sale Parcel Number ——, Lake County, Oregon, November 16, 1983". The written sealed bids will be opened and publicly declared at the beginning of each sale. If 2 or more envelopes containing valid bids of the same amount are received, the determination of which is to be considered the highest bid, shall be by drawing.

Subnmission of a sealed written bid is not required in order to participate in oral bidding procedures.

If sealed bids are received, oral bidding will be entertained after public declaration of the high sealed bid. If no sealed bids are received, oral bidding will commence and all oral bids shall be made in increments of $50.00. After oral bids are entertained, the successful bidder shall submit by cash, personal check, bank draft, money order, or any combination thereof, twenty percent (20%) of the purchase price immediately following the close of the sale. The terms and conditions applicable to the sale are:

1. The apparent high bidder submit the remainder of the full bid price within 30 days from the date of sale. Failure to submit the full bid price within 30 days from the date of sale shall result in sale cancellation of the specific parcel and the twenty percent (20%) deposit shall be forfeited.

2. The authorized officer may reject the highest qualified bid and release the bidder from his/her obligation and withdraw any tract from the sale, if he determines that consummation of the sale would be inconsistent with the provisions of any existing law, or collusive or other activities have hindered or restrained free and open bidding, or consummation of the sale would encourage or promote speculation in public lands.

3. The patents will contain a reservation to the United States for ditches and canals.

4. The sale is for surface estate only. The patents will contain a reservation to the United States for all minerals.

5. The sale will be subject to all valid existing rights.

Parcels not sold on the day of the sale will remain available for sale until sold or withdrawn. Bids will be solicited on these parcels at the Lakeview District during regular business hours, (7:45 a.m. to 4:30 p.m.). Interested parties bidding on these parcels shall be informed of the appraised value only when an acceptable bid has been received; i.e., appraised value or higher.

Detailed information concerning the sale, including the planning documents, environmental assessment and the record of public involvement, is available for review at the Lakeview District Office, Bureau of Land Management, 1000 South Ninth Street, Lakeview, Oregon 97630.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Lakeview District Office, Bureau of Land Management, P.O. Box 151, 1000 South Ninth Street, Lakeview, Oregon 97630. Any adverse comments received as a result of the Notice of Realty Action or notification to the congressional committees and delegations pursuant to Pub. L. 97-394, will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become a final determination of the Department of the Interior. Interested parties should continue to check with the District Office to keep themselves advised of any changes.

Dated: September 8, 1983.

Dick Harlow,

Acting District Manager.

BILLING CODE 4310-84-M

[INT FEIS 83-43]

Proposed Livestock Grazing Management for the South Sierra Foothills Planning Area, Bakersfield District, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of the Final Environmental Impact Statement (FEIS) on the Livestock Grazing Management Program in the South Sierra Foothills Planning Area.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared a final environmental impact statement concerning a proposed grazing management program for the South Sierra Foothills Planning Area in Kern and Tulare Counties in California. The proposed action would continue present livestock grazing management practices on the approximately 198,113 acres presently under grazing authorization. Other alternatives analyzed include: Livestock Maximization, Resource Protection, Balanced Resource Use, and No Domestic Livestock Grazing.

The FEIS contains only comments, responses, and minor changes to the Draft Environmental Impact Statement (DEIS) and should be used together with the DEIS. This revised procedure has saved substantial time, money, and paperwork and is authorized under 40 CFR 1503.4(c). The DEIS was made available to the public on April 30, 1983, with comments due by June 13, 1983.

A limited number of copies of the document are available upon request at the Bakersfield District Office, 800 Truxtun Avenue, Room 302, Bakersfield, CA 93301; (805) 861-4191, and the California State Office, Bureau of Land Management, 2800 Cottage Way, Sacramento, CA 95825; (916) 484-4701.

In addition to the above offices, copies of this EIS are available for public reading and review at:

Division of Rangeland Management, Bureau of Land Management, Premier Building, Room 909-H, Washington, D.C. 20006;
Caliente Resource Area Office, 520 Butte Street, Bakersfield, CA 93305;
Beale Memorial Library, 1315 Truxtun Avenue, Bakersfield, CA 93301; or
Tulare County Library, 200 W. Oak, Visalia, CA 93279

FOR FURTHER INFORMATION CONTACT: Glenn A. Carpenter, Area Manager, ATTN: SSF Team Leader, 520 Butte Street, Bakersfield, CA 93305.

Dated: September 13, 1983.

Ed Hastey,

State Director, California.

National Park Service

Upper Delaware National Scenic and Recreational River; Meeting

AGENCY: National Park Service; Upper Delaware Citizens Advisory Council.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: September 23, 1983, 7 p.m.

ADDRESS: Town of Tusten Hall, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764-0159, (717) 729-7135.

SUPPLEMENTARY INFORMATION: The advisory council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include discussion of Draft Management Plan.

The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council c/o Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764–0159. Minutes of the meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware National Scenic and Recreational River, River Road, 1¾ miles north of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: August 30, 1983.

Myra F. Harrison,

Acting Regional Director, Mid-Atlantic Region.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-111 (Sub-6)]

Railroad Services Abandonment; Detroit, Toledo and Ironton Railroad Co., Henry County, OH; Exemption

September 14, 1983.

Detroit, Toledo and Ironton Railroad Company (applicant) has filed a notice of exemption for an abandonment under 49 CFR Part 1152, Subpart F—*Exempt Abandonments*. The line to be abandoned runs from milepost 7.1 to milepost 8.4 on the Tecumseh Branch in Henry County, OH.

Applicant has certified (1) That no local traffic has moved over the line for at least 2 years and any overhead traffic on the line can be rerouted over other lines, and (2) That no formal complaint filed by a user of rail service on the line regarding cessation of service over the line either is pending with the Commission or has been decided in favor of the complainant within the 2-year period. The Public Service Commission (or equivalent agency) in Ohio has been notified in writing at least 10 days prior to the filing of this notice. *See Exemption of Out of Service Rail Lines*, 366 I.C.C. 885 (1983).

As a condition to use of this exemption, any employees affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective on October 19, 1983 (unless stayed pending reconsideration). Petitions to stay the effective date of the exemption must be filed within 10 days after publication and petitions for reconsideration, including environmental, energy and public use concerns, must be filed within 20 days after publication. If the notice of exemption contains false or misleading information, the use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

By the Commission, Richard Lewis, Acting Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

[Docket No. AB-111 (Sub-5)]

Railroad Services Abandonment; Detroit, Toledo and Ironton Railroad Co., Fayette County, OH; Exemption

September 14, 1983.

Detroit, Toledo and Ironton Railroad Company (applicant) has filed a notice of exemption for an abandonment under 49 CFR Part 1152, Subpart F—*Exempt Abandonments*. The line to be abandoned runs from milepost 236.0 to milepost 237.5 on the former main line in Fayette County, OH.

Applicant has certified (1) That no local traffic has moved over the line for at least 2 years and any overhead traffic on the line can be rerouted over other lines, and (2) That no formal compliant filed by a user of rail service on the line regarding cessation of service over the line either is pending with the Commission or has been decided in favor of the complainant within the 2-year period. The Public Service Commission (or equivalent agency) in Ohio has been notified in writing at least 10 days prior to the filing of this notice. *See Exemption of Out of Service Rail Lines*, 366 I.C.C. 885 (1983).

As a condition to use of this exemption, any employees affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective on October 19, 1983 (unless stayed pending reconsideration). Petitions to stay the effective date of the exemption must be filed within 10 days after publication and petitions for reconsideration, including environmental, energy and public use concerns, must be filed within 20 days after publication. If the notice of exemption contains false or misleading information, the use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

By the Commission, Richard Lewis, Acting Director, Office of Proceedings.

Railroad Services Abandonment; Grand Trunk Western Railroad Co., Saginaw and Bay Counties, MI; Exemption

September 14, 1983.

Grand Trunk Western Railroad Company (applicant) has filed a notice of exemption for an abandonment under 49 CFR Part 1152, Subpart F—*Exempt Abandonments*. The line to be abandoned runs from milepost 44.0 to milepost 50.6 on the Saginaw Subdivision in Saginaw and Bay Counties, MI.

Applicant has certified (1) that no local traffic has moved over the line for at least 2 years and any overhead traffic on the line can be rerouted over other lines, and (2) that no formal complaint filed by a user of rail service on the line regarding cessation of service over the line either is pending with the Commission or has been decided in favor of the complainant within the 2-year period. The Public Service Commission (or equivalent agency) in Michigan has been notified in writing at least 10 days prior to the filing of this notice. *See Exemption of Out of Service Rail Lines*, 366 I.C.C. 885 (1983).

As a condition to use of this exemption, any employees affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective on October 19, 1983 (unless stayed pending reconsideration). Petitions to stay the effective date of the exemption must be filed within 10 days after publication and petitions for reconsideration, including environmental, energy and public use concerns, must be filed within 20 days after publication. If the notice of exemption contains false or misleading information, the use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

By the Commission, Richard Lewis, Acting Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30262]

Rail Carriers; Oregon-Washington Railroad and Navigation Co. and Union Pacific Railroad Co.—Exemption for Abandonment and Discontinuance in Shoshone County, ID

AGENCY: Interstate Commerce Commission

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts from the requirements of 49 U.S.C. 10903 *et seq.* the physical abandonment by Oregon-Washington Railroad and Navigation Company of, and the discontinuance of service by Union Pacific Railroad Company over, 6.78 miles of railroad extending from milepost 80.36 at Wallace to milepost 87.14 at Burke, in Shoshone County, ID, subject to standard labor protective conditions.

DATES: This exemption will be effective on October 19, 1983. Petitions to stay the effectiveness of this decision must be filed by September 29, 1983, and petitions for reconsideration must be filed by October 11, 1983.

ADDRESSES: Send pleadings to referring Finance Docket No. 30262 to:

(1) Office of the Secretary, Interstate Commerce Commission, Washington, D.C.20423

(2) Petitioner's representative: Joseph D. Anthofer, 1416 Dodge Street, Omaha, NE 68179

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Dated: September 13, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Chairman Taylor was absent and did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

Proposed Consent Decree in Resource Conservation and Recovery Act Enforcement Action

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States* v. *Chemical Recovery Systems, Inc.*, Civil Action No. C 80–1858 has been lodged with the United States District Court for the Northern District of Ohio. The consent decree requires Chemical Recovery to excavate contaminated soil, to fill and grade the site so as to slope it towards the Black River and to plant a vegetation cover on the site. Chemical Recovery is also required to monitor the Black River for the next two years for PCBs and priority pollutants. The decree notes that Chemical Recovery has removed all drums of chemicals from the site,

removed the two distillation units previously there, and fenced the site. Stipulated penalities are provided for in the event of future noncompliance with the decree.

The consent decree may be examined at (1) the office of the United States Attorney, Northern District of Ohio, Suite 500, 1404 E. 9th Street, Cleveland, Ohio 44114, (2) the office of Regional Counsel, United States Environmental Protection Agency, 16th Floor, 230 South Dearborn Street, Chicago, Illinois 60604, and (3) the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail at the Environmental Enforcement Section at a cost of one dollar per copy.

The Department will receive comments concerning the decree for thirty (30) days from the date of this notice. Comments should be addressed to the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, D.C. 20530 and reference *United States v. Chemical Recovery Systems, Inc.*, DOJ No. 90-7-1-47.

F. Henry Habicht II,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

MOTOR CARRIER RATEMAKING STUDY COMMISSION

Public Hearing

Date: Friday, October 14, 1983.

Place: John W. McCormack Post Office and Courthouse, Post Office Square, Room 208, Boston, Massachusetts 02109.

Time: 8:30 a.m.

Purpose: To receive testimony, as mandated by the Bus Regulatory Reform Act of 1982, from various parties on: (1) Collective ratemaking in the bus industry and (2) the impact of implementation of the Bus Regulatory Reform Act of 1982 on persons over the age of 60.

Anyone who is interested in submitting written testimony for the record of the Study Commission may do so by sending same to: Gary D. Dunbar, Executive Director, Motor Carrier Ratemaking Study Commission, 100 Indiana Avenue, NW., Washington, D.C. 20001.

For further information, contact: Name: Gary D. Dunbar, Title: Executive Director, Phone No.: (202) 724-9600.

Submitted this, the 14th day of September, 1983.

Gary D. Dunbar,

Executive Director.

BILLING CODE 6820-BD-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Notice of Meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meeting of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, N.W., Washington, D.C. 20506.

Date: September 29, 1983.
Time: 9:00 a.m. to 5:00 p.m.
Room: 430.
Program: This meeting will review applications submitted for Constitutional Fellowships (College Teachers), Division of Fellowships, for projects beginning after January 1, 1984.

The proposed meeting is for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meeting will consider information that is likely to disclose: (1) trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that this meeting will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786-0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Limerick Generating Station Units 1 and 2, Meeting

The ACRS Subcommittee on Limerick Generating Station Units 1 and 2 will hold a meeting on October 7 and 8, 1983, at the Holiday Inn at Pottstown, Route 100 at West King Street, Pottstown, PA. The Subcommittee will review the application of the Philadelphia Electric Company (PECO) for an operating license.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Cognizant Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Friday, October 7, 1983—2:00 p.m. until the conclusion of business

Saturday, October 8, 1983—8:00 a.m. until the conclusion of business

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the Philadelphia Electric Company, NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements

and the time allotted therefor can be obtained by a prepaid telephone call to the Cognizant Designated Federal Employee, Dr. Richard Savio (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: September 13, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 50-409]

Dairyland Power Cooperative, LaCrosse Boiling Water Reactor; Exemption

I

Dairyland Power Cooperative (the licensee) (DPC) is the holder of Provisional Operating License No. DPR-45 which authorizes operation of the LaCrosse Boiling Water Reactor. This provides, among other things, that it is subject to all rules, regulations and orders of the Commission now or hereafter in effect. The facility is a boiling water reactor rated at 50 MW(e) and is located at the licensee's site located in Vernon County, Wisconsin.

II

The regulation, 10 CFR 50.54(w), requires that each commercial power reactor licensee shall, by June 29, 1982, have taken reasonable steps to obtain on-site property damage insurance available at reasonable cost and on reasonable terms from private sources or to demonstrate to the satisfaction of the Nuclear Regulatory Commission (the Commission) (NRC) that it possesses an equivalent amount of protection covering the facility, provided, among other things, that "this insurance must have a minimum coverage limit no less than the combined total of: (i) That offered by either American Nuclear Insurers (ANI) and Mutual Atomic Energy Reinsurance Pool (MAERP) jointly or Nuclear Mutual Limited (NML); plus (ii) that offered by Nuclear Electric Insurance Limited (NEIL), the Edison Electric Institute (EEI), ANI and MAERP jointly, or NML as excess property insurance."

On June 29, 1982, the licensee filed a Request for Exemption from the provisions of 10 CFR 50.54(w) in excess of $65 million. (10 CFR 50.54(w) currently requires licensees to be insured for a minimum of $500 million in primary coverage plus $68 million in excess property coverage.) In support of this request, the licensee submitted an estimate of decontamination and cleanup costs following a Three Mile Island, Unit 2 (TMI-2) type accident of between $5 million and $39 million. The licensee indicated that it would obtain primary property insurance covering damages up to $65 million but that it did not believe that coverage in excess of that amount was justified. The staff requested additional information from the licensee to support its estimates. This information was solicited by letters to the licensee dated August 2, 1982 and October 25, 1982. The licensee responded to these requests by letters dated September 13, 1982 and March 7, 1983. The March 7, 1983 response included a more detailed study than earlier submissions and increased its estimates of cleanup to $42.5 million in 1982 dollars.

Despite the licensee's original exemption request and two supplemental responses to NRC questions, the Commission concludes that the licensee has failed to provide adequate justification for exemption from the requirements for property insurance above $65 million. First, Dairyland has made certain assumptions in its request that appear to be unwarranted. Specifically, Dairyland asumes that no more than 10.7% of the fuel rods will rupture and that no fuel melting will occur, even in a maximum credible accident. Consistent with this is Dairyland's assumption that LaCrosse's emergency core cooling system will function adequately after an accident. In evaluating the licensee's March 7, 1983 submittal the staff found that the maximum credible accident (MCA) assumed by DPC appears to be equivalent to a design basis loss of coolant accident (LOCA) assuming a single failure evaluated to show conformance with 10 CFR 50 Appendix K. While no check has been made of the level of fuel failures for this accident, it is the staff's judgment that the stated failure level of about 10% may not be conservative, since clad failure for all rods experiencing departure from nucleate boiling may be possible. Since the intent of 10 CFR 50.54(w) is to provide for insurance in the case of core damage accidents of at least the TMI-2 severity, if not worse, the licensee has not shown anything unique in LaCrosse's design that would justify the request for an exemption on the basis of the low cleanup costs. It is clear from the statement of consideration promulgating 10 CFR 50.54(w) (47 FR 13750) that property insurance was intended by the NRC to cover at least TMI-2 type accidents. As stated in that notice, "* * * The Commission disagrees with the position taken by some commenters that it is unfair to many owners of smaller power reactors to require insurance greatly exceeding the cost of replacing the facility. A TMI-2 type accident could well require coverage approaching $1 billion, no matter what the original or size of the facility * * * Until completion of studies evaluating the cost of cleaning up accidents of varying severity, it is prudent to require for all power reactors a reasonable amount of insurance for decontamination expense" (47 FR 13752).

Finally, in a parallel situation, on November 3, 1982, the Commission granted to Consumers Power Company an exemption from the excess property insurance requirements of 10 CFR 50.54(w). Consumers Power Company operates the Big Rock Point Plant (Docket 50-155), a 72 MW(e) BWR, and found, in a comprehensive analysis of a maximum credible accident, that cleanup costs would not exceed $470 million. The staff concludes that it would not be technically consistent in granting Dairyland's full exemption request while requiring seven times the insurance coverage for Big Rock Point.

Although there is no basis for the Commission to approve the licensee's entire exemption request, there is adequate justification to exempt the licensee from the excess property insurance requirements of 10 CFR 50.54(w). Exemption from such excess requirments would be compatible both with the conclusions of Consumers Power Company's findings with respect to its Big Rock Point Plant and with findings of a study developed for the Commission *(Technology, Safety and Costs of Decommissioning Reference Light Water Reactors Following Postulated Accidents*, NUREG/CR-2601, Pacific Northwest Laboratory, November 1982). This report considers three accident scenarios with a TMI-2 type accident considered to be of intermediate severity. The information developed from these scenarios indicates that although there is some relationship between size of a reactor and accident cleanup costs, certain of the major costs involved with accident cleanup—such as defueling a damaged reactor, activities to maintain a facility in cold shutdown, and construction of new treatment facilities—are not strictly power level dependent. But because there are steps in the cleanup process where cost is directly related to core size, lower overall costs can be expected for cleanup of reactors of the size of LaCrosse. The NRC concludes that LaCrosse would be expected to encounter, in the extreme, cleanup costs that would be substantially similar to

those estimated by Consumers Power Company for its Big Rock Point Plant.

In addition, to obtain either insurance or some other method of protection such as a line or letter of credit for the $68 million required excess protection, the licensee would have to pay an additional annual premium of at least $200,000. When such excess insurance or protection is not required to cover the costs of cleanup of a maximum credible accident, the NRC believes that the cost of such insurance or protection is too burdensome.

In sum, the Commission concludes that the licensee has not provided adequate justification for being exempted from all insurance requirements of 10 CFR 50.54(w) above $65 million. Therefore, the licensee's request for exemption from the primary level of property insurance in excess of $65 million is denied. However, there is adequate justification for exemption from the excess insurance requirements of CFR 50.54(w)(1)(ii). Although a closed relation between reactor size and accident decontamination cost has not been found to exist as yet, sufficient information is available to determine that decontamination and cleanup costs occurring as a result of an accident at a reactor of LaCrosse's small size would, with a reasonable degree of assurance, be covered by $500 million insurance.

Accordingly, the Commission has determined that pursuant to 10 CFR 50.12 an exemption, in part, is authorized by law and will not endanger life or property or the comon defense and security and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption:

The licensee is exempt until further notice from the requirements of 10 CFR 50.54(w)(1)(ii), with respect to excess property insurance offered by Nuclear Electric Insurance Limited (NEIL), the Edison Electric Institute (EEI), American Nuclear Insurers (ANI) and Mutual Atomic Energy Reinsurance Pool (MAERP) jointly, or Nuclear Mutual Limited (NML). The licensee continues to be required to maintain, at a minimum, total primary insurance coverage or equivalent protection offered by ANI and MAERP jointly or NML pursuant to 10 CFR 50.54(w)(1)(ii).

The NRC staff has determined that granting this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.54(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 12th day of September, 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. *Type of submission, new, revision or extension:* Extension.

2. *The title of the information collection:* NRC Form 313M, "Application for Materials License—Medical".

3. *The form number if applicable:* NRC Form 313M.

4. *How often the collection is required:* For an initial license and for renewals every five years.

5. *Who will be required or asked to report:* Applicants for a specific license to possess and use byproduct material in humans.

6. *An estimate of the number of responses:* 600.

7. *An estimate of the total number of hours needed to complete the requirement or request:* 12,000.

8. *An indication of whether Section 3504(h), Pub. L. 96-511 applies:* Not applicable.

9. *Abstract:* Applications for specific licenses to possess and use byproduct material in humans are required to be filed on NRC Form 313M. Information submitted on the form is used to evaluate the applicant's experience, training, facilities and procedures for adequacy to protect health and safety.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 12th day of September 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. *Type of submission, new, revision or extension:* Extension.

2. *The title of the information collection:*

—DOE/NRC Forms 741 and 741A—Nuclear Material Transaction Report and NUREG/BR-0006, instructions for completing forms 741, 741A, and 740M

—DOE/NRC Form 740M—Concise Note

—IAEA Form N-71—Design Information Questionnaire

3. *The form number if applicable:* Same as item 2 above.

4. How often the collection is required:

—DOE/NRC Form 741/741A: As occasioned by special nuclear material (SNM) or source material transfers, receipts, or inventory changes that meet certain criteria.

—DOE/NRC Form 740M: When specified in Facility Attachments or Transitional Facility Attachments, or as necessary to inform the U.S. or IAEA of any qualifying statement or exception to any of the data contained in any of the other reporting forms required under the US/IAEA Safeguards Agreement.

—IAEA Form N-71: Once.

5. *Who will be required or asked to report:* Persons licensed to possess specified quantities of special nuclear material or source material, and in the case of IAEA Form N-71, licensees of facilities on the U.S. eligible list who have been notified in writing by the Commission to submit the form.

6. *An estimate of the number of responses:*

—DOE/NRC Form 741/741A: 126,000

—DOE/NRC Form 740M: 2,580

—IAEA Form N-71: 2

7. *An estimate of the total number of hours needed to complete the requirement or request:*
—DOE/NRC Form 741/741A: 126,000
—DOE/NRC Form 740M: 2,580
—IAEA Form N–71: 720

8. *An indication of whether Section 3504(h), Pub. L. 96–511 applies:* Not Applicable.

9. *Abstract:*
—NRC and Agreement State licensees are required to make inventory and accounting reports on DOE/NRC Forms 741/741A for certain source or special nuclear material inventory changes, for transfers or receipts or special nuclear material, or for transfers or receipts of 1 kilogram or more of source material.

—Licensees affected by 10 CFR Part 75 and related sections of Parts 40, 50, 70, and 150 are required to submit DOE/NRC Form 740M to inform the U.S. or the IAEA of any qualifying statement or exception to any of the data contained in any of the other reporting forms required under the U.S./IAEA Safeguards Agreement.

—Licensees of facilities that appear on the U.S. eligible list, pursuant to the U.S./IAEA Safeguards Agreement, and who have been notified in writing by the Commission, are required to complete and submit a Design Information Questionnaire, IAEA Form N–71.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395–7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 12th day of September 1983.

BILLING CODE 7590–01–M

[Docket No. 50–278]

Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Unit 3); Order Confirming Licensee Commitments on Pipe Crack Related Issues

I

The Philadelphia Electric Company (the licensee) and three other co-owners are the holders of Facility Operating License No. DPR–56 which authorizes the operation of the Peach Bottom Atomic Power Station, Unit 3 (the facility), at steady-state power levels not in excess of 3293 megawatts thermal. The facility is a boiling water reactor located at the licensee's site in York County, Pennsylvania.

II

During the current 1983 refueling outage at Peach Bottom, Unit 3, augmented inservice inspection was performed on the recirculation and residual heat removal (RHR) system piping in accordance with Office of Inspection and Enforcement Bulletin 83–02. The original sample size was expanded to 112 welds after ultrasonic (UT) indications were reported on welds in the original sampling. This represents a total of 75% of all welds in these systems. A total of 37 welds in the recirculation and RHR systems were not inspected. Examinations of these uninspected welds were either not necessary (e.g., conforming material as per NUREG–0313, Revision 1), or not practicable (e.g., high radiation, etc.). The licensee also provided information on welds on the Reactor Water Clean-up (RWCU) and Core Spray Systems. Both systems have had substantial portions of their piping replaced with conforming material to reduce susceptability to intergranular stress corrosion cracking (IGSCC). A total of 25 non-conforming welds have not been inspected in these two systems. The licensee provided technical justification for not inspecting these welds. The staff has reviewed the licensee's submittal and has concluded that the uninspected welds are not likely to be cracked to the extent of compromising the safety of the plant.

Overall, out of a total of 112 welds inspected, a total of 15 were found to show linear indications: ten 12-inch riser to elbow welds, and five residual heat removal (RHR) system 20-inch suction line welds. All indications were in the weld heat-affected-zone. In the 10 12-inch riser welds, all indications are oriented in an axial direction. The deepest indication reported in the 12-inch riser welds is 92% of wall thickness with a length of about 0.75 inches. The deepest indication in the large-size pipe welds is 40% of the wall thickness in a 20-inch RHR weld with a length of about 32 inches. In the five 20-inch RHR welds, the indications are oriented predominately in a circumferential direction.

Evaluation by the licensee, submitted by letters dated August 9, 1983, August 22, 1983 and August 30, 1983, indicates that the projected crack sizes, due to intergranular stress corrosion cracking (IGSCC) and fatigue crack growth, in two if the 20-inch RHR welds at the end of an 18-month fuel cycle would be within the ASME Code limits.

The licensee's evaluation also showed that the 10 12-inch riser welds and the three 20-inch RHR suction line welds

required repair for continued service because their calculated projected cracks would exceed the Code limits at the end of an 18-month fuel cycle.

However, all five RHR suction line welds and the ten 12-inch riser welds were repaired using a weld overlay process. The minimum overlay thickness for the riser welds is 0.25-inch and for the 20-inch RHR weld it varies from 0.25-inch to 0.5-inch. The overlay thickness is designed to meet the Code allowable limits in the new ASME Code Section XI IWB 3600 assuming the presence of through-wall cracks. The length of the overlay varies approximately from 4 to 7 inches and is designed to reduce the stress at the end of the overlay acting on the crack location. RHR welds 10–0–7, 10–0–10, and 10–0–15 are bi-metallic welds (carbon steel to stainless steel) and the overlay is applied only to the stainless steel side of the welds. Personnel of Region I confirmed that the weld overlay repairs were performed in accordance with the qualified and approved procedures consistent with ASME Code requirements.

The staff has reviewed the licensee's submittals including analysis of weld overlay design and the calculation of IGSCC crack growth, based on current crack growth data, to support the continuing service for an 18-month fuel cycle with the 15 overlay repaired welds. Region I personnel confirmed that the licensee's UT procedures, calibration standards, equipment and IGSCC detection capabilities were acceptably demonstrated in accordance with IE Bulletin 83–02.

The licensee's overlay design analysis performed by General Elecric is based on the conservative assumption that all cracks are through-wall cracks. Consequently, its analysis did not depend on any assumptions concerning UT sizing and the IGSCC crack growth rate. The required minimum overlay thickness for each defective weld is calculated by using the methodology allowed in the new ASME Code Section XI IWB 3600 to meet the required Code safety margin. For normal and upset condition, a safety margin of three is required and for the faulted and emergency condition, a safety margin of 1.5 is requried. Because the acceptable flaw in the normal condition based on new IWB 3600 is more limiting, the acceptable flaw for the faulted condition need not be considered.

For RHR welds 10–0–5 and 10–0–6, the allowable flaw depth based on new IWB 3600 is conseratively calculated to be 75.5 percent and 78.1 percent of wall thickness respectively. This calculation assumes the flaws to be fully circumferential in length and through the original pipe thickness in depth. This assumption is very conservative because the worst reported UT indication in these two welds is about 40 percent through-wall in depth and less than half of the full circumference in length. The General Electric analysis has shown that a minimum overlay thickness of 0.5 inch is more than enough to make the assumed through-wall cracks (63 percent and 65 percent of the overlay repaired wall thickness) in these two welds meet the new calculated Code allowable limits (75 percent and 78 percent). An allowable flaw depth of 82 percent was similarly calculated for RHR weld 10–0–7. This weld has a worst reported flaw with about 35 percent of wall thickness in depth and about 7 inches in length. With a minimum overlay thickness of 0.35 inch applied to this weld, the assumed fully circumferential through-wall crack (73 percent of the overlay repaired wall thickness) is well within the new calculated Code allowable limit (82 percent).

The indications reported by General Electric on RHR welds 10–0–10, and 10–0–15 may be overcalls because two independent UT examinations on the same two welds did not find any reportable indications. However, the licensee decided to apply an overlay with a minimum thickness of 0.25 inch to these two welds to increase the safety margin in structural strength and to prevent any potential leakage.

We reviewed the weld overlay design calculation made by General Electric. We concur in their conclusion that the overlay used will provide adequate reinforcement with Code required safety margin for at least the next fuel cycle of operation.

III

Although the calculations discussed above indicate that the cracks in the 15 overlay repaired welds will not progress to the point of leakage during the next fuel cycle, and margins are expected to be maintained over crack growth which could compromise safety, uncertainties in crack sizing and growth rate still remain. Further, not all welds were examined, and significant cracks could be present in welds that were not examined.

Because of these uncertainties, we have determined that improvements in the monitoring in the containment for unidentified leakage are required; therefore, new limiting conditions for operation and surveillance requirements have been developed. These enhanced surveillance measures will provide adequate assurance that possible cracks in pipes will be detected before growing to a size that will compromise the safety of the plant.

The staff also has some concern regarding the long-term growth of IGSCC cracks and its effect on the long-term operation of the plant. Therefore, we have determined that plans for corrective action or modification including replacement of the recirculation and other reactor coolant pressure boundary piping systems during the next refueling outage must be submitted for staff review at least three months before the start of the next refueling outage.

By letters dated August 9, 1983 and August 24, 1983, the licensee committed to the above described conditions on leakage monitoring and early submittal of inspection and/or modification plans. I have determined that the public health and safety requires that these commitments should be confirmed by an immediately effective Order.

IV

Accordingly, pursuant to Section 103, 161i, 161o and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered effective immediately that:

1. The licensee shall operate the reactor in accordance with the present requirements on coolant leakage in Sections 3.6.C and 4.6.C of the Technical Specifications, as modified by Attachment A to this Order.

2. Plans for corrective actions and/or modification, including replacement of the recirculation and other reactor cooling pressure boundary piping systems during the next refueling outage shall be submitted for NRC review at least three months before the start of the next refueling outage.

3. The Director, Division of Licensing, may in writing relax or terminate any of the above provisions upon written request from the licensee, if the request is timely and provides good cause for the requested action.

V

The licensee may request a hearing within twenty (20) days of the date of publication of this Order in the **Federal Register**. Any request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy shall also be sent to the Executive Legal Director at the same address. A request for a hearing shall not stay the immediate effectiveness of this order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing. If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order.

This Order is effective upon issuance.

Dated at Bethesda, Maryland, this 1st day of September 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

Attachment A

SURVEILLANCE AND LIMITING CONDITION OF OPERATION FOR PEACH BOTTOM ATOMIC POWER STATION, UNIT 3

Limiting conditions for operation	Surveillance requirements
3.6.C. *Coolant Leakage* 1. Any time irradiated fuel is in the reactor vessel and reactor coolant temperature is above 212 degress F, the rate of reactor coolant leakage to the primary containment from unidentified sources shall not exceed 5 gallons per minute. The rate of change of unidentified leakage shall not exceed 2 gallons per minute per 24 hour surveillance period when the reactor is operated in the "Run" mode. In addition, the total reactor coolant system leakage into the primary containment shall not exceed 25 gpm averaged over any 24 hour surveillance period. 2. The primary containment (Drywell) sump collection and flow monitoring system shall be operable during reactor power operation. From and after the time that this system is made or found to be inoperable for any reason, reactor power operation is permissible only during the succeeding 24 hours unless the system is made operable sooner. For purposes of this paragraph, the primary containment (Drywell) sump collection and flow monitoring system operability is defined as the ability to measure reactor coolant leakage. 3. If the conditions in 1 or 2 cannot be met, an orderly shutdown shall be initiated and the reactor shall be in at least Hot Shutdown within the next 12 hours and in Cold Shutdown Condition within the following 24 hours.	4.6.C. *Coolant Leakage* 1. Reactor coolant system leakage shall be determined by the primary containment (Drywell) sump collection and flow monitoring system and recorded every 4 hours or less.

BILLING CODE 7590-01-M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Fish Propagation Panel; Meeting Notice

AGENCY: Fish Propagation Panel of the Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of field trip to be held pursuant to the Federal Advisory Committee Act, 5 U.S.C. Appendix I. 1–4. Activities will include:

- Tour habitat improvement projects on South Fork of the John Day River
- Tour of North and Middle Forks of the John Day River

STATUS: Open.

SUMMARY: The Northwest Power Planning Council hereby announces a forthcoming field trip of its Fish Propagation Panel.

DATE: September 20–21, 1983, 8:00 a.m.–6 p.m.

ADDRESS: The field trip will be held in the John Day River area.

FOR FURTHER INFORMATION CONTACT: Curt Marshall, (503) 222–5161.

Edward Sheets,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1–8231]

Computone Systems, Inc.; Application To Withdraw From Listing and Registration

September 13, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

Computone Systems, Inc. ("Company") common stock is listed and registered on the BSE. The Company has decided to include its stock in NASDAQ. In this regard, the Company has determined that continued listing on the BSE is not necessary. The BSE has not posed an objection to this matter.

Any interested person may, on or before October 4, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-25500 Filed 9-16-83; 8:45 am]

BILLING CODE 8010-01-M

[File No. 1-8207]

The Home Depot, Inc.; Application to Withdraw from Listing and Registration

September 13, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Home Depot, Inc. ("Company") common stock is listed and registered on the BSE and is also traded over-the-counter through NASDAQ. In this regard, the Company has determined that continued listing on the BSE is not necessary. The BSE has not posed an objection to this matter.

Any interested person may, on or before October 4, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Declaration of Disaster Loan Area No. 2102]

Virginia; Delaration of Disaster Loan Area

Clifton District of Alleghany County in the State of Virginia constitutes a disaster area as a result of damage caused by a tornado which occurred on August 11, 1983. Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on November 4, 1983.

and for economic injury until the close of business on June 4, 1984, at the address listed below:

U.S. Small Business Administration, Federal Building, Room 3015, P.O. Box 10126, 400 North Eighth Street, Richmond, Virginia 23240

or other locally announced locations.

Interest rates for applicants filing for assistance under this declaration are as follows:

	Percent
Homeowners with credit available elsewhere	11.625
Homeowners without credit available elsewhere	5.875
Businesses with credit available elsewhere	11.000
Businesses without credit available elsewhere	8.000
Businesses (EIDL) without credit available elsewhere	8.000
Other (non-profit organizations including charitable and religious organizations)	11.375

It should be noted that assistance for agricultural enterprises is the primary responsibility of the Farmers Home Administration as specified in Pub. L. 96-302.

(Catalog of Federal Domestic Assistance Programs 59002 and 58008)

Dated: September 2, 1983.

TENNESSEE VALLEY AUTHORITY

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms under review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposals for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, attention: Desk Officer for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: John O. Catron, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2523, FTS 858-2523.

Type of Request: Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.

Title of Information Collection: TVA Fishing Census.

Frequence of Use: Weekly.

Type of Affected Public: Individuals or Households.

Small Businesses or Organizations Affected: No.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 24,000.

Estimated Total Annual Burden Hours: 2,400.

Estimated Annual Cost to TVA: $16,000.

Need For and Uses of Information: Creel surveys are conducted to provide benchmark information for better aquatic resource management, and assessment of benefits and impacts on the aquatic resources which result from reservoir operations and shoreline development activities.

Dated: September 12, 1983.

John W. Thompson,

Assistant General Manager, Senior Agency Official.

BILLING CODE 8120-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. S-741]

Participation by Vessels Built With Construction-Differential Subsidy in the Carriage of Crude Oil in the Domestic Trade; Application of ARCO Transportation Company

Notice is hereby given that by application of August 30, 1983, ARCO Transportation Company (ARCO) requested permission under section 506 of the Merchant Marine Act, 1936, as amended, and Part 250 of Title 46 of the Code of Federal Regulations, for its owned vessel, ARCO *Independence* to operate for six months in the Alaskan oil trade. The 262,000 deadweight ton ARCO *Independence* which was built with construction-differential subsidy (CDS), would carry crude oil from Valdez Alaska, to Panama for oncarriage only to a U.S. port. The vessel would be under time charter to Exxon Shipping Company, U.S.A. (Exxon) during the six-month period and would commence Alaskan service on or about October 15 to November 15, 1983.

The applicant states that *Exxon* has an ongoing, long-term need for VLCC size tonnage in order to assure that its requirement to move Alaskan North Slope crude will be met. The ARCO *Independence* is needed to replace the ARCO *Spirit* whose domestic trading waiver expires in September 1983. To the best knowledge of Exxon and Arco, there is no suitable Jones Act tonnage available which can provide the full shipping capacity required by Exxon in the Alaska/Panama oil trade.

Interested parties may inspect the application in the Office of the Secretary, Maritime Administration Room, 7300A, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

Any person, firm, or corporation who is a "competitor," as defined in § 250.2 of the regulations as set forth in 46 CFR 250 published in the **Federal Register** issue of June 29, 1977 (42 FR 33035), and desires to protest such application for carriage of oil in the domestic trade from Alaska to Panama should submit such protest in writing, in triplicate, to the Secretary, Maritime Administration, Washington, D.C. 20590.

Protests must be received within five working days after the date of publication of this Notice in the **Federal Register**. If a protest is received, the applicant will be advised of such protest by telephone or telegram and will be allowed three working days to respond in a manner acceptable to the Maritime Administrator. Within five working days after the due date for the applicant's response, the Maritime Administrator will advise the applicant, as well as those submitting protests, of the action taken, with a concise written explanation of such action. If no protest is received concerning the application, the Maritime Administrator will take such action as may be deemed appropriate.

BILLING CODE 4910-81-M

Notice; Maritime Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Maritime Advisory Committee will meet on September 14, 1983, from 3 p.m. to 5 p.m. in the Nassif Building, 400 7th Street SW., Washington, D.C. 20590.

in a closed session. This closed session will follow the previously announced meeting which is open to the public commencing at 10 a.m. the same day.

The entire agenda for the closed meeting will consist of discussions impacting on U.S. national security interests and sealift strategies. These matters constitute classified information that is specifically authorized by executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such executive order. Accordingly, the Maritime Administrator, in full cooperation with the Department of the Navy, has determined in writing that the public interest requires that the 3 p.m. meeting be closed to the public because it will be concerned with matters listed in section 552(b)(c)(1) of title 5, United States Code.

The need for, and availability of, U.S. Navy personnel to assist the Committee on the basis of classified data was not apparent at the time of publication of the open meeting notice.

For further information concerning this meeting, contact Bruce Carlton in the Nassif Building, 400 7th Street SW., Room 7206, Washington, D.C. 20590. Phone (202) 426-5827.

By Order of the Maritime Administrator.

Dated: September 14, 1983.

Georgia P. Stamas,

Secretary.

BILLING CODE 4910-81-M

[Docket No. S-742]

Boston VLCC Tankers, Inc., VI; Application for Permission Under Section 506 of the Merchant Marine Act, 1936, as Amended for its Vessel "Maryland" To Operate in Domestic Trade

Notice is hereby given that Boston VLCC Tankers, Inc., VI (Boston VI) has applied for written permission under section 506 of the Merchant Marine Act, 1936, as amended (Act), for its vessel, *Maryland*, to operate in the Alaskan oil trade for six months. The 265,000 deadweight ton *Maryland*, which was built with construction-differential subsidy, would carry crude oil from Valdez, Alaska, to Panama for transshipment and/or from Valdez direct to the U.S. Gulf or Caribbean for oncarriage only to a U.S. port. Boston VI State that suitable Jones Act vessels of competitors will not be available for the carriage of this cargo.

The *Maryland* would operate under time charter to Exxon Shipping Company. First loading of the vessel at Valdez would commence on or about October 18, 1983.

Interested parties may inspect the application in the Office of the Secretary, Maritime Administration Room 7300A, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

Any person, firm, or corporation who is a "competitor," as defined in § 250.2 of the regulations as set forth in 46 CFR Part 250 published in the **Federal Register** issue of June 29, 1977 (42 FR 33035), and desires to protest such application for carriage of oil in the domestic trade from Alaska to Panama should submit such protest in writing, in triplicate, to the Secretary, Maritime Administration, Washington, D.C. 20590.

Any person, firm or corporation who desires to protest such application for carriage of oil in the domestic trade from Alaska directly to the U.S. Gulf should submit such protest in writing, in triplicate, to the Secretary, Maritime Administration, Washington, D.C. 20590.

Protests must be received within five working days after the date of publication of this Notice in the **Federal Register.** If a protest is received, the applicant will be advised of such protest by telephone or telegram and will be allowed three working days to respond in a manner acceptable to the Maritime Administrator. Within five working days after the due date for the applicant's response, the Maritime Administrator will advise the applicant, as well as those submitting protests, of the action taken, with a concise written explanation of such action. If no protest is received concerning the application, the Maritime Administrator will take such action as may be deemed appropriate.

BILLING CODE 4910-81-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular, Public Debt Series—No. 30-83]

Washington, September 14, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $3,500,000,000 of United States securities, designated Treasury Bonds of 2003 (CUSIP No. 912810 DG 0). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated October 5, 1983, and will bear interest from that date, payable on a semiannual basis on May 15, 1984, and each subsequent 6 months on November 15 and May 15 until the principal becomes payable. They will mature November 15, 2003, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Thursday, September 22, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, September 21, 1983, and received no later than Wednesday, October 5, 1983.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 95.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Wednesday, October 5, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, October 3, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number of an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appears in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities

must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Carole J. Dineen,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 29-83]

Treasury Notes of October 15, 1990; Series F-1990

Washington, September 14, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $5,000,000,000 of United States securities, designated Treasury Notes of October 15, 1990, Series F-1990 (CUSIP NO. 912827 QA 3). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated October 5, 1983, and will bear interest from that date, payable on a semiannual basis on April 15, 1984, and each subsequent 6 months on October 15 and April 15 until the principal becomes payable. They will mature October 15, 1990, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, September 21, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, September 20, 1983, and received no later than Wednesday, October 5, 1983

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commerical banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commerical bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g.

99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Wednesday, October 5, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, October 3, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 28-83]

Treasury Notes of September 30, 1987, Series K-1987

Washington, September 14, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $5,750,000,000 of United States securities, designated Treasury Notes of September 30, 1987, Series K–1987 (CUSIP No. 912827 PZ 9). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Baks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Securities will be dated September 30, 1983, and will bear interest from that date, payable on a semiannual basis on March 31, 1984, and each subsequent 6 months on September 30 and March 31 until the principal becomes payable. They will mature September 30, 1987, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any state, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, September 20, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, September 19, 1983, and received no later than Friday, September 30, 1983.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from other must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender alloted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all of most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notifed only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for alloted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities alloted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Friday, September 30, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Wednesday, September 28, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securites allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public annoucements of such changes will be promptly provided.

Carole J. Dineen,

Fiscal Assistant Secretary.

Sunshine Act Meetings

Federal Register
Vol. 48, No. 182
Monday, September 19, 1983

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

1

COMMODITY CREDIT CORPORATION

TIME AND DATE: 2 p.m., September 26, 1983.

PLACE: Room 104–A, Administration Building, U.S. Department of Agriculture, Washington, D.C.

STATUS: Open/closed.

MATTERS TO BE CONSIDERED: Agenda to be announced.

CONTACT PERSON FOR MORE INFORMATION: Ray F. Voelkel, Secretary, Commodity Credit Corporation, P.O. Box 2415, Room 3090 South Building, U.S. Department of Agriculture, Washington, D.C. 20013; telephone (202) 447–3451.

2

CONSUMER PRODUCT SAFETY COMMISSION

Commission Meeting

TIME AND DATE: 10 a.m., Wednesday, September 21, 1983.

LOCATION: Third floor hearing room, 1111 18th Street NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Uninvented Gas-Fired Space Heaters: Proposed Revocation*
   The Commission will consider a draft **Federal Register** notice proposing revocation of the Commission's mandatory standard requiring the oxygen depletion sensor on unvented gas-fired space heaters (16 CFR Part 1212).
2. *Metal Chimneys—Briefing*
   The staff will brief the Commission on the safety of factory-built metal chimneys for wood-burning appliances.

Closed to the Public:

3. *Enforcement Matter (OS# 5083)*
   The staff will brief the Commission on Enforcement Matter OS# 5083.
4. *Enforcement Matter (OS# 3391)*
   The staff will brief the Commission on Enforcement Matter OS# 3391.

For recorded message containing the latest agenda information call 301–492–5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207; 301–492–6800.

CONSUMER PRODUCT SAFETY COMMISSION

Commission Meeting

TIME AND DATE: 10 a.m., Thursday, September 22, 1983.

LOCATION: Third floor hearing room, 1111 18th Street NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Strong Sensitizers—Briefing*
   The staff will brief the Commission on a draft proposal to revoke the definition of "strong sensitizer" in 16 CFR Part 1500.3(c)(5) Federal Hazardous Substances Act Regulations.
2. *Preview of TAB Recommendations—Briefing*
   The staff will brief the Commission on the final report of the Toxicological Advisory Board and the staff analysis of the report.
3. *Apparel Revisions: Final Amendment*
   The Commission will consider proposed amendments of rules establishing requirements for testing and record-keeping to support guarantees for 16 CFR Part 1610—Standard for the Flammability of Clothing Textiles.

For a recorded message containing the latest agenda information: call 301–492–5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207; 301–492–6800.

POSTAL SERVICE

(Board of Governors)

Vote to Close Meeting

At its meeting on September 7, 1983, the Board of Governors of the United States Postal Service unanimously voted to close to public observation its meeting, scheduled for October 3, 1983, in Washington, DC. The meeting will involve: (1) Consideration of the August 26, 1983, recommended decision of the Postal Rate Commission on third-class bulk rates for nonprofit mail in Docket R80–1 (rescheduled from September 30, 1983); (2) consideration of an anticipated issuance by the Postal Rate Commission of its Recommended Decision in Docket No. MC 83–2 (ZIP + 4); (3) a discussion of strategic planning in connection with

possible future rate adjustments; and (4) a discussion of possible strategies in anticipated collective bargaining negotiations, pursuant to chapter 12 of title 39 United States Code, involving parties to the 1981 National Agreements, between the Postal Service and four labor organizations representing certain postal employees, which are scheduled to expire in July 1984.

The meeting is expected to be attended by the following persons: Governors Hardesty, Babcock, Camp, Hughes, McKean, Ryan, Sullivan and Voss; Postmaster General Bolger; Deputy Postmaster General Finch; Secretary of the Board Harris; General Counsel Cox; Senior Assistant Postmasters General Coughlin and Jellison; and Counsel to the Governors Califano.

As to the first three of these agenda items, the Board is of the opinion that public access to the discussions would be likely to disclose information that will become involved in future rate or classification litigation.

Accordingly, the Board of Governors has determined that, pursuant to section 552b(c)(3) of title 5, United States Code, and section 7.3(c) of title 39, Code of Federal Regulations, these portions of the meeting are exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552b[b]), because they are likely to disclose information in connection with proceedings under chapter 36 of title 39 (having to do with postal ratemaking, mail classification and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of title 39, United States Code. The Board has determined further, that pursuant to section 552b(c)(10) of title 5, United States Code, and section 7.3(j) of title 39, Code of Federal Regulations, the discussions are exempt, because they are likely to specifically concern the participation of the Postal Service in a civil action or proceeding or the litigation of a particular case involving a determination on the record after opportunity for a hearing. The Board further determined that the public interest does not require that the Board's discussion of these matters be open to the public.

As to the fourth agenda item, the Board is of the opinion that public access to any discussion of possible strategies that Postal Service management may decide to adopt, or the positions it may decide to assert, in any collective bargaining sessions that may take place would be likely to frustrate action to carry out those strategies or assert those positions successfully. In making this determination, the Board is aware that the effectiveness of the collective bargaining process in labor-management relations has traditionally depended on the ability of the parties to prepare strategies and formulate positions without prematurely disclosing them to the opposite party. The public has a particular interest in the integrity of this process as it relates to the Postal Service, since the outcome of the negotiations between the Postal Service and the various postal unions, and consequently the cost, quality and efficiency of postal operations, may be adversely affected if the process is altered.

Accordingly, the Board of Governors has determined that, pursuant to section 552b(c)(3) of title 5, United States Code, and section 7.3(c) of title 39, Code of Federal Regulations, this portion of the meeting to be closed is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552[b]), because it is likely to disclose information prepared for use in connection with the negotiation of collective bargaining agreements under chapter 12 of title 39, United States Code, which is specifically exempted from disclosure by section 410(c)(3) of title 39, United States Code. The Board has determined further that, pursuant to section 552b(c)(9)(B) of title 5, United States Code, and section 7.3(i) of title 39, Code of Federal Rgulations, the discussion is exempt, because it is likely to disclose information the premature disclosure of which is likely to frustrate significantly proposed Postal Service action. Finally, the Board of Governors has determined that the public has an interest in maintaining the integrity of the collective bargaining process and that the public interest does not require that the Board's discussion of its possible collective bargaining strategies and positions to be open to the public.

In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the meeting to be closed may properly be closed to public observation, pursuant to section 552b(c)(3), (9)(B) and (10) of title 5 and section 410(c) (3) and (4) of title 39, United States Code, and section 7.3(c), (i) and (j) of title 39, Code of Federal Regulations.

David F. Harris,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: (To be published.)

STATUS: Closed meeting.

PLACE: 450 5th Street NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Thursday, September 8, 1983.

CHANGE IN THE MEETING: Deletion/additional item. The following item was not considered at a closed meeting scheduled on Tuesday, September 13, 1983, at 9 a.m.

Settlement of administrative proceeding of an enforcement nature.

The following additional item will be considered at a closed meeting scheduled for Thursday, September 15, 1983, following the 2:30 p.m. open meeting.

Formal order of investigation.

Chairman Shad and Commissioners Longstreth and Treadway determined that Commission business required the above change that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: JoAnn Zuercher at (202) 272-2014.

September 14, 1983.

Part II

Environmental Protection Agency

Nonferrous Smelter Orders Covering the Period January 1, 1983, to January 1, 1988; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 57

[AH-FRC 2330-1]

Nonferrous Smelter Orders Covering the Period January 1, 1983 to January 1,1988

AGENCY: Environmental Protection Agency.

ACTION: Proposed rules.

SUMMARY: The regulation proposed today would establish the minimum required contents of primary nonferrous smelter orders (NSOs) issued under Section 119 of the Clean Air Act and covering the period of time from the date of promulgation through January 1, 1988. The regulation also establishes the criteria and procedures EPA will use in issuing NSOs and in evaluating NSOs issued by States. Under Section 119, NSOs may be granted to eligible smelters by States, with EPA approval, or directly by EPA. An NSO permits a smelter to defer complying with its State Implementation Plan (SIP) emission limitation for sulfur dioxide for the period of the order. During this deferral, the smelter is required to use an interim level of constant control technology in combination with dispersion techniques to maintain the national ambient air quality standards (NAAQS) for sulfur dioxide (SO_2).

DATES: Public comment is invited. Written public comments should be addressed to the information contact named below and cited for insertion into docket number A-82-35. They must be postmarked no later than 30 days from the date of the conclusion of the Public Hearing discussed below (Minimum 60 day total comment period).

An informal hearing will be held on these proposed rules on or about October 19, 1983, tentatively in Phoenix, Arizona. Please contact Mr. Roy Rathbun at (202) 382-2887 within five (5) days if possible of this notice to assure that you will receive the information concerning the exact date, time and location of this hearing. Those who wish to make oral comments at the public hearings must, at least ten days before the date of the hearing, contact Mr. Rathbun to register.

ADDRESSES: Docket Numbers A-82-35 and DSSE 78-1 contain the documents upon which these rules are based. Those dockets are open for public inspection and copying between 8:00 A.M. and 4:00 P.M. Monday through Friday at: U.S. Environmental Protection Agency, Central Docket Section, West Tower Lobby, Gallery 1, Waterside Mall, 401 M Street, SW., Washington, D.C., 20460.

All comments on this proposed rule should be sent to the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Roy Rathbun, Stationary Source Compliance Division (EN 341), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, Telephone (202) 382-2887.

SUPPLEMENTARY INFORMATION: The remainder of this notice discusses the background of this rulemaking and the basis, purpose and contents of the regulation. The text of the proposed regulation follows this discussion.

Collection of information requirements contained in this rule have been submitted to the Office of Management and Budget for review under Section 3504(h) of the Paperwork Reduction Act. Comments on these requirements should be directed to the Office of Information and Regulatory Affairs, Office of Managemnent and Budget, attention: Desk Officer for EPA.

Under Executive Order 12291, EPA must judge whether this regulation requires a Regulatory Impact Analysis. EPA has determined that this regulation is not major and thus does not require a Regulatory Impact Analysis because it merely provides for interim relief for some entities and it requires no expenditures other than those already required under existing regulations promulgated under the Clean Air Act. Therefore, the Agency has not prepared a Regulatory Impact Analysis for this Regulation. EPA has submitted this regulation to the Office of Management and Budget (OMB) for review in accordance with Executive Order 12291.

Regarding public comments on this proposed rule, interested persons are reminded that section 307(d) (7) (B) of the Act provides, with limited exceptions, that objections to proposed rules must be raised with reasonable specificity during the comment period for those objections to be cognizable during judicial review. In the view of EPA, this requires comments of a technical nature to be accompanied by sufficiently detailed supporting documentation to permit the Agency's technical staff to evaluate the comments in detail. This is particularly important where the information necessary to evaluate the comments properly is in the control of the commenters. Smelter owners and others are therefore encouraged to submit any detailed analyses of technical issues they believe may assist EPA in responding to their concerns.

Background

Section 119 was added to the Clean Air Act when the Act was amended in 1977. A very thorough discussion of the history and content of Section 119 and how it fits into the overall air pollution control strategy governed by the Clean Air Act was published in the Preamble to the proposed first NSO regulation. Please refer to 44 FR 6284-6286 (January 31, 1979) for that complete discussion. A brief summary of that discussion follows:

Under Title I of the Clean Air Act, EPA has set national ambient air quality standards (NAAQS) for certain pollutants ("criteria pollutants") including sulfur dioxide. Title I also requires the NAAQS to be met through the establishment of state implementation plans (SIPs) governing emission sources of these pollutants.

Emissions of sulfur dioxide by industrial sources generally fall into two categories: Stack emissions and fugitive emissions. Fugitive emissions are generally defined as those released through leaks or at transfer points. Because stack emissions are responsible for the great majority of sulfur dioxide emissions, control efforts have traditionally been directed primarily at stack emissions.

The effects of stack emissions on ambient air quality can be mitigated by either constant emission reduction or dispersion techniques. Constant emission reduction techniques diminish the overall atmospheric loading of pollutants through the use of technologies or raw materials (including fuels) that prevent pollutants from being generated or that remove pollutants from waste gas on a continuous basis.

Dispersion techniques, on the other hand, do not reduce total emissions into the atmosphere on a continuous basis. Dispersion techniques include tall stacks, which disperse emissions over a wide geographic area and supplementary control systems (SCS) which vary emissions over time depending on meteorological conditions.

Reflecting Congress' concern about the potential adverse environmental effects resulting from the use of dispersion techniques, the 1977 amendments sharply restrict the permissible use of dispersion techniques in place of constant controls to meet national ambient air quality standards. However, because of its concern about the unusual economic and technological problems facing the primary nonferrous metals industry, Congress, in Section 119, permitted a limited exemption from the requirement for constant controls for

nonferrous smelters. Specifically, Section 119 permits issuance of a "primary nonferrous smelter order" (NSO) to a primary nonferrous smelter if no constant control method applicable to the smelter which would enable it to meet the applicable SO_2 SIP emission limit has been adequately demonstrated to be reasonably available (as determined by the Administrator, taking into account the cost of compliance, nonair quality health and environmental impact, and energy consideration). Under an NSO, a qualifying smelter may temporarily defer compliance with its SIP sulfur dioxide emission limitation and instead meet ambient standards through the use of dispersion techniques together with interim constant controls. Section 119 provides for up to two NSO's, the first expiring on January 1, 1983, and the second on January 1, 1988.

On June 24, 1980, EPA promulgated national regulations to implement the first NSO period of Section 119 (See 45 FR 42514). The regulations comprise Part 57 of Title 40 of the Code of Federal Regulations and include criteria for determining whether a smelter is eligible for a first period NSO. Under the first period NSO rules, a smelter was eligible for a first period NSO if the Administrator determined, based on the financial information submitted in the smelter owner's application, that the constant control equipment necessary for it to meet the SO_2 SIP emission limit was not adequately demonstrated to be reasonably available taking into account cost and other factors.

The regulations also provided for the establishment of interim requirements to minimize emissions and further ensure that the smelter's emissions did not result in violations of the NAAQS for SO_2. Those requirements included the use of dispersion-dependent techniques (tall stacks and supplementary control systems), the assumption of legal liability by a smelter relying on such techniques for violations of the NAAQS in the area affected by its emissions, the evaluation and control of fugitive emissions, and related monitoring and reporting requirements. The regulations also required the efficient use of an interim level of continuous emission reduction technology, and established criteria and procedures for a waiver of that requirement for a smelter without such controls which would be forced to close by the imposition of the interim control requirement.

The smelter was also required, during the first NSO period, to conduct a research and development (R&D) project that was designed to produce technology that would aid both the smelter and the industry in general in complying with SO_2 SIP limitations.

The regulations proposed by today's notice set out the requirements for obtaining an NSO which will be effective during the second NSO period, running from the date of promulgation through January 1, 1988. EPA has retained much of the first period regulations because they are also applicable to this NSO period. Some changes are being proposed in this notice in order to implement the specific second period NSO requirements contained in Section 119.

Certain changes also necessitated by the recent court decision in *Kennecott Corp.* v. *EPA*, 684 F.2d 1007 (D.C. Cir. 1982). The court vacated and remanded that part of the regulations dealing with the eligibility test and it also ruled that molybdenum roasters were incorrectly excluded from NSO coverage. Changes reflecting the Court's decision are included in this notice of proposed rulemaking. Other changes were also made in order to streamline the application process and reduce paperwork for both EPA and applicant smelters. These changes are described below. The reader should refer to the detailed discussion in the preamble to the proposed and final first period NSO regulations for complete explanations of individual sections of the first period regulations (See 45 FR 42514, June 24, 1980, 44 FR 6284, January 31, 1979 and EPA docket number DSSE–78–1). In light of these detailed discussions, this preamble does not discuss some portions of the first period NSO regulations which are retained in either identical or similar form in the second period NSO regulations proposed by this Notice.

1.a. Outline of Determination of NSO Eligibility

A smelter desiring an NSO must establish its eligibility by demonstrating to the Agency that there is no "adequately demonstrated" SO_2 control technology which is economically "reasonably available" for use in bringing the smelter into compliance with its SO_2 SIP emission limits by the compliance date specified in the SIP. This determination is made as follows:

A smelter applies for an NSO to the state or local air pollution control agency in which the smelter is located or to EPA with a proposal to install constant control technology selected from the list of adequately demonstrated technologies. The constant control technology selected must have the potential to bring the smelter into compliance with the SIP emission limits and must be the most cost effective which is technically feasible to implement at the smelter. A discussion of what constitutes adequately demonstrated control technology is contained in Section. 1.b.

The smelter must demonstrate that this technology is not reasonably available in light of the economic impact of installing the adequately demonstrated technology at the smelter. The NSO eligibility tests serve as the basis for determining what is reasonably available for the applicant (See Section 1.c.) If the least costly adequately demonstrated technology which would allow the smelter to comply with the SIP emission limits by the date required in the SIP is found not to be reasonably available, the smelter qualifies for an NSO.

b. Determination of Adequately Demonstrated Control Technology

As discussed above, in Section 1.a., the first step in determining eligibility for an NSO is for a smelter to select an adequately demonstrated control technology that will bring it into compliance with the SIP emission limit. Under the proposed regulations, "adequately demonstrated control technology" encompasses those control technologies which are or have been used in full scale smelting operations or in pilot smelters, in foreign or domestic locations and include but are not limited to those listed below. A determination that any control technology is adequately demonstrated must take into account nonair quality health and environmental impact and energy considerations, but not the cost of compliance. The Agency today proposes several adequately demonstrated technologies which encompass those current control technologies which have the potential capability to bring sources into compliance with the levels of constant control required in SIPs. In developing this list, the Agency believes that it has considered all control technologies used in full and/or pilot scale primary nonferrous smelting operations within the U.S.A. and in foreign countries. In addition the Agency has considered nonair quality health and environmental impacts of the listed technologies. None of the listed technologies are expected to have significant adverse impacts in these areas. Discussions of the availability of the different technologies and their nonair quality health and environmental and energy impacts can be found in the docket to this proposed regulation and in the Preamble and docket to the first period NSO regultion (#DSSE 78–1). The technologies could be categorized into

retrofit control technologies and replacement or process modification technologies. The list of technologies in each group is as follows:

(i) Retrofit Control Technologies:

(1) Sulfuric acid plant
(2) Magnesium oxide (concentration) scrubbing
(3) Lime/limestone scrubbing
(4) Ammonia Scrubbing
(5) Citrate Scrubbing
(6) DMA (N, N-dimethylanilene) scrubbing
(7) Strong stream/weak stream gas blending
(8) Coal reduction
(9) Double alkali FGD

(ii) Replacement or Process Modifications:

(1) Flash smelting
(2) Oxygen enrichment or oxygen sprinkle smelting
(3) Supplemental sulfur burning in conjunction with acid plant
(4) Electric Furnace
(5) Noranda process
(6) Fluid bed roaster
(7) Continuous smelting (Mitsubishi) process

A smelter must justify use of the chosen technology on the basis that it is the most cost effective for that particular smelter. Several technologies may be combined such that the most cost effective combination will be used. A smelter may propose use of other technologies, not mentioned in the above list, if it can demonstrate that the technology is adequate to bring the smelter into compliance with its SIP emission limit and it does not cause unreasonable adverse nonair quality health, environmental or energy impacts. However, if this technology is less cost effective than those listed in the regulations, a detailed explanation must be provided to EPA justifying its use and the reasons why it was selected. Similarly, a less cost effective technology than another *within* the proposed list of technologies must also be justified. Those requirements are intended to ensure the validity of the eligibility determination.

EPA solicits comment on this approach to the selection of control technologies as well as suggestions on other technologies which should be allowed for use in the NSO process.

c. Financial Eligibility Test To Determine Whether Any Adequately Demonstrated Technology Is Reasonably Available

Once a smelter selects the most cost effective adequately demonstrated constant control technology in the manner discussed above, it must demonstrate that the cost of such technology is economically unreasonable in order to be eligible for an NSO under Section 119(b)(3). In *Kennecott Corp.* v. *EPA*, the court interpreted Section 119(b)(3) as mandating an NSO eligibility standard short of a closure test (i.e., short of a test which would require installation of all constant control technology necessary to attain the SO_2 SIP emission limits unless such a requirement would result in a smelter shutdown). Beyond that, however, neither the court nor Congress defined "economically unreasonable." Moreover, "economically unreasonable" is not defined by economic or financial theory. Therefore, in the Agency's judgment, Section 119(b)(3) does not mandate the use of some unique NSO eligibility test. Rather, the Agency has considerable discretion in structuring an eligibility test which it deems to be fair so long as such test is short of a closure test.

The first NSO regulations adopted as an eligibility test the Net Income Test under which a smelter would be eligible for an NSO if installation of required constant controls would reduce the present value of its forecast net income to less than its liquidation value. This Net Income Test was interpreted by the court in the *Kennecott* case to be a closure test and therefore inconsistent with the intent of Congress.

In response to the *Kennecott* decision, EPA is now proposing two financial eligibility tests, the Rate of Return Test and the Profit Protection Test. If a smelter passes either test, it would be financially eligible for an NSO. The Agency believes that the tests provide a fair benchmark for determining whether the costs of installing adequately demonstrated control technologies are economically reasonable. Neither test uses closure as a benchmark for NSO eligibility, and therefore neither test is a closure test. The two tests together assure that primary nonferrous smelters will not be forced to close because of pollution control requirements, and also protect smelters from unreasonable reductions in profits and other unreasonable economic consequences which might result from pollution control requirements. The two financial eligibility tests are discussed in more detail below. Please also refer to the docket to these proposed regulations for a complete discussion of the assumptions which underly these proposed financial eligibility tests.

1. The Rate of Return Test

The Rate of Return Test compares a smelter's estimated rate of return earned on the smelter's book value of net investment [1] with the required rate of return for the nonferrous metals industry. If the estimated rate of return with constant controls is less than the required rate, a smelter passes the Rate of Return Test.

The determination of whether a smelter's rate of return with constant controls is less than the required rate of return is made as follows. The required rate of return is a weighted average of the required rates of return for equity and debt for the nonferrous metals industry as described in Section 2.6 of the Appendix.[2] The smelter's future cash flows, taking into account expenditures for constant controls, are then estimated for a seven year forecast period beyond the time of application for and NSO and for a horizon period extending 15 years beyond the last forecast year. Cash flows [3] during the forecast period are determined from historical data and projection provided by the applicant for the NSO and from certain data provided by EPA. Specifically, EPA has provided (see Appendix A) forecasts of copper smelting charges and annual percentage rates of change of wages, energy prices and gross national product price deflator. Applicant smelters must provide other financial data including, for example, production volumes, operating costs, and depreciation schedules.

Estimates of cash flows during the horizon period are based on the last two years of the forecast period.

The estimated future cash flows with constant controls are discounted at the required rate of return as described in Section 2.6.2 of the Appendix. This discounted value of future cash flows is then compared to the smelter's book value of net investment. If the discounted value of future cash flows is less than book value, then the estimated rate of return earned on the smelter's book value is less than the required rate of return and the smelter is eligible for an NSO.

The consequence of a reduction in the rate of return to less than the required rate is a reduced ability to attract capital. Investors will direct their funds away from investments earning less than the required rate toward those that

[1] Book value of net investment is defined as total assets minus current liabilities plus the depreciation of post-1977 pollution control investments. (The addition of post-1977 depreciation of pollution control investments raises the total book value and thereby does not penalize a smelter for making pollution control investments.)

[2] The required Rate of Return is the same as the weighted average cost of capital.

[3] Cash flows are defined as after tax net income plus depreciation minus investment in constant control minus sustaining capital investment.

earn the required rate or more. A significant impairment of the ability of an enterprise to attract capital would be expected to significantly impair the long term viability of that enterprise by reducing the enterprise's ability to make necessary sustaining capital investments. The Agency believes that the Rate of Return Test being proposed would assure that a smelter's ability to attract capital will not be unreasonably impaired as a result of constant control requirements.

It should be noted that the Rate of Return Test being proposed would always protect a smelter from economic consequences short of closure as a result of control requirements so long as book value is greater than liquidation value. The Agency believes that book value is higher than liquidation value generally for the nonferrous smelter industry because smelters should have relatively low liquidation values as a result of the very limited alternative use for them. Accordingly, the Agency believes that the proposed Rate of Return Test should afford an applicant smelter protection from adverse economic consequences short of closure.

2. The Profit Protection Test

The Profit Protection Test evaluates the impact of installing constant controls on pre-tax net income. The test requires that a smelter forecast its future income under two conditions: (1) Continued operation without constant SO_2 controls and (2) immediate installation of constant SO_2 controls. A smelter passes the Profit Protection Test if the present value of its forecasted pre-tax profits are estimated to fall by more than 50 percent as a result of installing the required constant controls.

Passage of the Profit Protection Test is positively correlated with passage of the Rate of Return Test. That is, a smelter passing one test is likely to pass the other test as well. However, the agency has decided to provide the Profit Protection Test as an alternative to the Rate of Return Test because there may be some circumstances in which a smelter may fail the Rate of Return Test and yet still find its profits reduced by a substantial percentage as a result of pollution control requirements.

The Agency believes that its consideration of profit reduction *per se* is consistent with § 119(b)(3) because reduction in profits is one of the examples of adverse economic consequences which Congress suggested might be considered in determining the reasonableness of constant control requirements. (See, *Kennecott* v. *EPA*, cited earlier). Moreover, a substantial reduction in profits in and of itself may significantly impair an enterprise's viability. The Agency believes that greater than 50 percent reduction in profits would be unreasonable and that the Profit Protection Test therefore protects against unreasonable reductions in profits.

Other Changes to Test—Calculating Smelter Revenues

EPA has also changed the procedure by which smelter revenues are calculated. When completing applications for the first NSO, smelters were provided forecasts of copper prices, aggregate demand, capacity utilization, and certain cost indices. Smelters were to use these forecasts, in conjunction with their own estimates of concentrate costs and other factors, to arrive at *pro forma* income and cash flows.

This procedure has been revised for the second NSO. Under the new procedure, each smelter derives its revenue estimates as though it were a toll smelter. EPA will no longer provide forecasts of copper prices, aggregate demand, or capacity utilization. Instead, the Agency will provide a forecast of copper smelting changes and a procedure by which the applicant smelter can use that forecast as an input to its own revenue estimates.

The new procedure eliminates the requirement to forecast refined copper and concentrate prices. The price fluctuations in the world copper market make accurate forecasting of these variables extremely difficult. The smelting charge approach parallels the system now used by toll smelters. It is also used as the basis for estimating customs smelter revenues and as a mechanism for determining the value that an integrated operation derives from its smelter facility.

Smelting charges will be provided only for copper smelters. Other primary nonferrous smelters must provide their own forecasts and documentation to support their forecasts.

Note.—EPA will reevaluate the economic data forecasts during the time period between this Notice of Proposed Rulemaking and the final promulgation of these regulations. If the forecasts are significantly different, EPA will make them available to the public prior to promulgation by publishing a Notice of Availability in the **Federal Register.**

2. Placement of Smelters on Compliance Schedules

a. Once a smelter has qualified for an NSO based on the evaluation made in Section 1.a. and 1.c., the issuing Agency will perform the financial eligibility test in order to determine if adequately demonstrated technology is reasonably available and can be installed before January 1, 1988. In accordance with Section 119(c)(1) of the Act, if EPA or the issuing Agency determines that such installation is reasonably available by January 1, 1988, based on an analysis using both of the financial eligibility tests, then the smelter will be placed on a compliance schedule to meet the appplicable SO_2 SIP emission limits as expeditiously as practicable, but in no event later than January 1, 1988. A smelter is excused from the obligation to submit a proposed compliance schedule if application of either of the financial eligibility tests show that the compliance technology is not reasonably available to permit compliance by Janaury 1, 1988.

Under Sections 119(c)(1) and 119(e) of the Clean Air Act, EPA or the issuing agency may evaluate at any time during the duration of a second NSO whether changed economic factors, availability of technology or other conditions would warrant placing a smelter on a SIP compliance schedule. Accordingly, the regulations provide that if an NSO were initially issued without a SIP compliance schedule on the basis of a determination that adequately demonstrated technology would not be reasonably available to permit compliance by January 1, 1988, EPA or the issuing agency may reevaluate that determination at any time during the duration of the NSO. If EPA or the issuing agency determines on the basis of such reevaluation, that adequately demonstrated technology is reasonably available to permit compliance on or before January 1, 1988, the NSO shall be amended within three months to include an appropriate SIP compliance schedule.

b. It is conceivable that some smelters may not, prior to January 1, 1988, be found able to implement adequately demonstrated technology which is reasonably available. These smelters, although they will not be placed under compliance schedules to meet SIP requirements, are still required by Section 119(c)(2) of the Clean Air Act to be in compliance with the SIP on or before January 1, 1988. A primary nonferrous smelter not meeting its SIP emission limitation by January 1, 1988, is subject to enforcement actions pursuant to Sections 113 and 120 of the Clean Air Act.

3. Interim SO_2 Controls

a. *Requirements During NSO's*

In accordance with the requirements of Section 119(d)(1)(c), except, as noted in Preamble Section 3.b, all smelters

operating under NSOs must use interim continuous reduction technology on all strong SO_2 gas streams. These control technologies must be well maintained and operated for maximum efficiency, and must not be bypassed during scheduled maintenance or where process off-gas exceeds the acid plant capacity. The validity of the Agency's prohibition against bypassing of continuous emission reduction technology during the first period NSO regulations was at issue in the *Kennecott* case and was explicitly affirmed by the Court's decision.

A smelter must also assume responsibility for maintaining the NAAQS in its designated liability area (DLA). This must be accomplished through continued operation of a supplementary control system or other method of intermittent control. EPA will determine chargeable NAAQS violations based on current applicable regulations and policy.

A total plantwide emission limit is also imposed which restricts the smelter's SO_2 stack emissions to that level which would have been associated with production at the smelter's maximum production capacity as of August 7, 1977 (the date of enactment of Section 119 of the Clean Air Act). The purpose of the plantwide emission limit is to prevent the use of dispersion as a substitute for constant control of emissions resulting from capacity expansions. Because the plantwide limit is calculated at actual capacity, it will not require any production curtailment.

In order for the optimum maintenance of the NAAQS within a smelter's DLA, these proposed regulations require certain reporting and recordkeeping requirements in connection with the SCS operations, and require the installation and operation of continuous sulfur dioxide monitors on a smelter's main stack.

b. *Waiver of Interim SO_2 Controls*

Smelters which did not possess continuous control technology (as of August 7, 1977) on strong SO_2 streams (here defined as above 3.5% SO_2 by volume) may apply for an Interim Waiver of Constant SO_2 Controls. The data required for this analysis is the same as that required under the NSO eligibility test, although the test itself is different. The test, implementing Section 119(d)(2), assesses whether the smelter would be required to close for at least one year if it had to make the expenditures necessary to meet the interim control requirements.

4. Fugitive Controls and Research and Development Requirements

A smelter issued an NSO which does not contain a compliance schedule to meet SIP requirements must, as was the case during the first period NSO regulations, conduct or participate in a specific research and development program designed to develop more effective means of compliance with the SO_2 control requirements of the applicable SIP that presently exists. Such a smelter is also subject to extensive fugitive emissions evaluation and control requirements.

A smelter which is issued an NSO that contains a compliance schedule to meet SIP requirements would not be subject to the fugitive control and research and development requirements of these regulations. The exemption from the fugitive emission control provisions is reasonable because the SIP compliance schedule itself would require fugitive emissions evaluation (if necessary) and control. The exemption from the research and development provisions is reasonable because the smelters on compliance schedules will know what they must do to achieve compliance and hence, will not need to do further R&D.

5. Notice and Opportunity for a Hearing

EPA will not grant or approve any second period NSO unless either EPA or the issuing agency has first provided notice and opportunity for a public hearing with regard to such NSO. Such a hearing must be preceded by submission of an application under these regulations. The Agency understands that all states which are likely to grant an NSO already require public hearings before issuance of an NSO. Notice and opportunity for public hearing must also be provided before issuance of any major NSO amendments.

6. Amendments to NSO

The regulations require the amendment of an NSO subsequent to initial issuance in certain situations. In addition, states and local issuing agencies are authorized to amend an NSO, subject to EPA approval. The requirements and necessary procedures are specified in § 57.104. For purposes of Section 110, 304 and 307 of the Clean Air Act, an NSO issued by a state, and necessdarily, an amendment thereto, becomes part of the applicable implementation plan (see Section 119(a)(3)). Consistent with EPA's authority to revise a state implementation plan, or portion thereof, under Section 110(c), the regulations provide that in the event an issuing agency fails to issue a required amendment, EPA may issue such amendment.

Applicability of the Regulatory Flexibility Act

As required by the Regulatory Flexibility Act (15 USC 601), the Agency has reviewed the impact of this regulation on small entities. I hereby certify that this rule, if promulgated, will not have a significant impact on a substantial number of small entities. This rule affects fewer than ten entities and merely provides interim relief to the entities affected, from expenditures already required under existing regulations promulgated under the Clear Air Act.

List of Subjects in 40 CFR Part 57

Administrative practice and procedure, Air pollution control, Metals research.

September 7, 1983.

William D. Ruckelshaus,

Administrator.

These regulations revise Part 57, Subparts A–H, as promulgated on June 24, 1980 (45 FR 43514) and as subsequently amended, as follows:

PART 57—PRIMARY NONFERROUS SMELTER ORDERS

Subpart A—General

Sec.

Subpart B—The Application and the NSO Process

Subpart C—Constant Controls and Related Requirements

Authority: Clean Air Act, (40 U.S.C. 7419).

Subpart A—General

§ 57.101 Purpose and scope.

(a) Applicability of the regulations. The regulations in Subparts A through H govern:

(1) The eligibility of smelters for a primary Nonfereous smelter Order (NSO) under Section 119 of the Clean Air act;

(2) The procedures through which an NSO can be approved or issued by EPA: and

(3) The minimum contents of each NSO required for EPA issuance or approval under section 119. Subparts I et seq., will contain NSOs in effect for individual smelters.

(b) State authority to adopt more stringent requirements. Nothing in this part shall preclude a State from imposing more stringent requirements, as provided by Section 116 of the Clean Air Act.

§ 57.102 Eligibility.

(a) A primary copper, lead, zinc, molybdenum, or other nonferrous smelter is eligible for an NSO if it meets the following conditions:

(1) The smelter was in existence and operating on August 7, 1977;

(2) The smelter is subject to an approved or promulgated sulfur dioxide (SO_2) State Implementation Plan (SIP) stack emission limitation which is adequate to ensure that National Ambient Air Quality Standards (NAAQS) for SO_2 are achieved without the use of any unauthorized dispersion techniques; and

(3) The Administrator determines, based on a showing by the smelter owner, that no means of emission limitation applicable to the smelter which would enable it to comply with its SIP stack emission limitation for SO_2 has been adequately demonstrated to be reasonably available (taking into account the cost of compliance, nonair quality health and environmental impact, and energy considerations).

(b) For the purposes of these regulations:

(1) Adequately Demonstrated Control Technology encompasses those control technologies which are or have been used in full scale smelting operations or in pilot project smelters, at foreign or domestic locations and include but are not limited to those listed below. A determination that any control technology is adequately demonstrated must take into account nonair quality health and environmenalt impact and energy considerations, but not the cost of compliance.

(i) Retrofit Control Technologies:

(A) Sulfuric acid plant.

(B) Magnesium oxide (concentration) scrubbing.

(C) Lime/limestone scrubbing.

(D) Ammonia Scrubbing.

(E) Citrate Scrubbing.

(F) DMA (N, N-dimethlylanilene) scrubbing.

(G) Strong stream/weak stream gas blending.

(H) Coal reduction.

(I) Double alkali FGD.

(ii) Replacement or Process Modifications:

(A) Flash smelting.

(B) Oxygen enrichment or oxygen sprinkle smelting.

(C) Supplemental sulfur burning in conjuction with acid plant.

(D) Electric Furnace.

(E) Noranda process.

(F) Fluid bed roaster.

(G) Continuous smelting (Mitsubishi) process.

(2) Each adequately demonstrated means of emission limitation which would enable a smelter to comply with its SIP emission limitation for SO_2 shall be considered applicable to the smelter unless the smelter operator demonstrates that the use of a particular system at that smelter is technically unreasonable, for reasons specific to that site.

(3) An applicable means of emission limitation which would enable a smelter to comply with its SIP emission limitation for SO_2 shall be considered adequately demonstrated to be reasonable available to the smelter (taking into account the cost of compliance) if the information submitted under § 57.107(a) and § 57.203(b) (plus any necessary supplemental information) shows, according to the criteria, procedures, and tests contained in Appendix A to this part, that either of the following two tests are met.

(i) The rate of return test. The present value of the smelter's future net cash flow (during and after investment in constant control technology) is more than the book value of the smelter's net investment.

(ii) The profit protection test. The constant control technology expenditure reduces the present value of the smelter's forecast pretax profits by less than 50%.

(c) When applying for an NSO, a smelter must establish that, for purpose of applying the financial eligibility tests, which adequately demonstrated constant control technology applicable to that smelter is the most economically feasible for use at that smelter.

§ 57.103 Definitions.

(a) *The Act* means the Clean Air Act, as amended.

(b) *Active use* refers to an SO_2 constant control system installed at a smelter before August 7, 1977 and not totally removed from regular service by that date.

(c) *Adequate SO_2 emission limitation* means a SIP stack emission limitation which was approved or promulgated by EPA as adequate to attain and maintain

the NAAQS in the areas affected by the stack emissions without the use of any unauthorized dispersion technique.

(d) *Administrative Law Judge* means an administrative law judge appointed under 5 U.S.C. 3105 (see also 5 CFR Part 930, as amended by 37 FR 16787), and is synonymous with the term "Hearing Examiner" as formerly used in Title 5 of the United States Code.

(e) *The Administrator* means the Administrator of the United States Environmental Protection agency, or the Administrator's authorized representative.

(f) *Ambient air* shall have the meaning given by 40 CFR 50.1(e), as that definition appears upon promulgation of this subpart, or as hereafter amended.

(g) *Ambient air quality* refers only to concentrations of sulfur dioxide in the ambient air, unless otherwise specified.

(h) *An approved measure* refers to one contained in an NSO which is in effect.

(i) *Assistant Administrator for Air, Noise and Radiation* means the Assistant Administrator for Air, Noise and Radiation of the United States Environmental Protection Agency.

(j) *Constant controls, control technology, and continuous emission reduction technology* means systems which limit the quantity, rate, or concentration, excluding the use of dilution, of emissions of air pollutants on a continuous basis.

(k) *Effective date of an NSO* means the effective date listed in the **Federal Register** publication of EPA's issuance or approval of an NSO.

(l) *EPA and the Agency* means the Administator of the United States Environmental Protection Agency, or the Administrator's authorized representative.

(m) *Fugitive emissions* means any air pollutants emitted to the atmosphere other than from a stack.

(n) *Issuance* of an NSO means the final transmittal of the NSO pursuant to § 57.107(a) by an issuing agency (other than EPA) to EPA for approval, or the publication of an NSO issued by EPA in the **Federal Register.**

(o) *Issuing agency*, unless otherwise specifically indicated, means the state or local air pollution control agency to which a smelter's owner has applied for an NSO, or which has issued the NSO or EPA, when the NSO application has been made to EPA. Any showings or demonstrations required to be made under this part to the issuing agency, when not EPA, are subject to independent determinations by EPA.

(p) *Judicial Officer* means an attorney who is a permanent or temporary employee of the United States Environmental Protection Agency.

(q) *Malfunction* means any unanticipated and unavoidable failure of air pollution control equipment or process equipment or of a process to operate in a normal or usual manner. Failures that are caused entirely or in part by poor design, poor maintenance, careless operation, or any other preventable upset condition or preventable equipment breakdown shall not be considered malfunctions. A malfunction exists only for the minimum time necessary to implement corrective measures.

(r) *Maximum production capacity* means either the maximum demonstrated rate at which a smelter has produced its principal metallic final product under the process equipment configuration and operating procedures prevailing on or before August 7, 1977, or a rate which the smelter is able to demonstrate by calculation is attainable with process equipment existing on August 7, 1977. The rate may be expressed as a concentrate feed rate to the smelter.

(s) *NAAQS and National Ambient Air Quality Standards*, unless otherwise specified, refer only to the National Primary and Secondary Ambient Air Quality Standards for sulfur dioxide.

(t) *Scheduled maintenance* means any periodic procedure, necessary to maintain the integrity or reliability of emissions control performance, which can be anticipated and scheduled in advance. In sulfuric acid plants, it includes among other items the screening or replacement of catalyst, the re-tubing of heat exchangers, and the routine repair and cleaning of gas handling/cleaning equipment.

(u) *Smelter owner and operator* means the owner or operator of the smelter, without distinction.

(v) *Supplementary control system* (SCS) means any technique for limiting the concentration of a pollutant in the ambient air by varying the emissions of that pollutant according to atmospheric conditions. For the purposes of this part, the term supplementary control system does not include any dispersion technique based solely on the use of a stack the height of which exceeds good engineering practice (as determined under regulations implementing section 123 of the Act).

(w) *Unauthorized dispersion technique* refers to any dispersion technique which, under section 123 of the Act and the regulations promulgated pursuant to that section, may not be used to reduce the degree of emission limitation otherwise required in the applicable SIP.

(x) Unless otherwise specified in this part, all terms shall have the same meaning given them by the Act.

§ 57.104 Amendment of the NSO

An NSO shall be amended whenever necessary for compliance with the requirements and purposes of this part.

(a)(1) *Issuance of amendment.* A state or local issuing agency may issue an amendment of any NSO it has issued. Any amendment issued by a State or local issuing agency shall be subject to approval by EPA to the same extent as was the original NSO. Any smelter owner may apply to the agency which originally issued its NSO for an amendment of the NSO at any time. Such an application shall be accompanied by whatever documentation is required by that agency (or EPA) to support the requested amendment.

(2)(i) Notwithstanding the requirements of paragraph (a)(1) of this section, amendments to SIP compliance schedule interim compliance dates in State-issued NSO's need not be submitted for EPA approval if the amendment does not delay the interim date by more than three months from the date as approved by the Administrator and if the final compliance date is unchanged. Delays longer than 3 months shall be handled according to the provisions of § 57.104(a)(1).

(ii) Changes made in accordance with this subparagraph may be effective immediately but must be submitted to EPA within seven days. EPA will give public notice of receipt of such changes by publication of a Notice in the **Federal Register.**

(3) In any case in which the issuing agency fails to issue an amendment necessary for compliance with the requirements and purposes of this Part, EPA may, after first giving the issuing Agency notice, issue such amendment.

(b) *Revision of SCS Manual.* Operation in accordance with the revised provisions of an SCS operational manual (see § 57.402(e)) shall not be considered a violation of an NSO while the application for approval of those revisions as NSO amendments is pending before the issuing agency (or EPA) for approval: Provided, that:

(1) No violations of NAAQS occur in the smelter's Designated Liability Area during that time; and

(2) The smelter operator has not been informed by the issuing agency or EPA that its application is not adequately documented, unless such deficiency has been remedied promptly.

(c) *Notice and opportunity for hearing.* Notice and opportunity for public hearing shall be provided before issuance of all major amendments.

§ 57.105 Submittal of required plans, proposals, and reports.

(a) The failure of a smelter owner to submit any plan, report, document or proposal as required by its NSO or by this part shall constitute a violation of its NSO.

(b) If the Administrator determines that a nonferrous smelter is in violation of a requirement contained in an NSO approved under these regulations, the Administrator shall, as provided by section 119(f) of the Act: (1) Enforce such requirement under section 113 (a), (b), or (c) of the Act; (2) revoke the order after notice and opportunity for hearing; (3) give notice of noncompliance and commence action under section 120 of the Act; or (4) take any appropriate combinations of these actions.

(c) Under section 304 of the Act, any person may commence a civil action against an owner or operator of a smelter which is alleged to be in violation of any order approved under this part.

§ 57.106 Expiration date.

Each NSO shall state its expiration date. No NSO issued under this regulation shall expire later than January 1, 1988.

§ 57.107 The state or local agency's transmittal to EPA.

(a) *Content and bases of the State or local agency's NSO.* Issuance of an NSO by a State or local agency shall be completed by the issuing agency's transmittal to the appropriate EPA Regional Office of:

(1) The text of the NSO;

(2) The application submitted by the smelter owner, except for Appendix A to this part, all correspondence between the issuing agency and the applicant relating to the NSO, and any material submitted in support of the application;

(3) A concise statement of the State or local agency's findings and their bases; and

(4) All documentation or analyses prepared by or for the issuing agency in support of the NSO.

(b) *The State or local agency's enforcement plan.* The transmittal under paragraph (a) of this section shall be accompanied by a description of the issuing agency's plans for monitoring compliance with and enforcement of the NSO. The transmittal shall also include a description of the resources which will be used to implement those plans. If the enforcement plans appear inadequate, EPA may require that the NSO be modified such that the NSO will be adequately enforced.

§ 57.108 Comparable existing SIP provisions.

Notwithstanding any other provision of this part, an NSO may contain provisions to which the affected smelter is subject under the applicable EPA-approved state implementation plan (SIP) for sulfur dioxide in lieu of the corresponding provisions which would otherwise be required under this part if the Administrator determines that those SIP provisions are substantially equivalent to the corresponding NSO provisions which would otherwise be required, and if the Administrator determines that the smelter is in substantial compliance with those SIP provisions. For the purposes of this section, provisions to which the affected smelter is subject under the applicable EPA-approved State Implementation Plan are those which became effective before the smelter owner applied for the NSO.

§ 57.109 Maintenance of pay.

The Administrator will not approve or issue an NSO for any smelter unless he has approved or promulgated SIP provisions which are applicable to the smelter and which satisfy the requirements of section 110(a)(6) of the Clean Air Act.

§ 57.110 Reimbursement to State or local agency.

As a condition of issuing an NSO, any issuing agency may require the smelter operator to pay a fee to the State or local agency sufficient to defray the issuing agency's expenses in issuing and enforcing the NSO.

§ 57.111 Severability of provisions.

The provisions promulgated in this part and the various applications thereof are distinct and severable. If any provision of this part or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions, or the application of such provisions to other persons or circumstances, which can be given effect without the invalid provision of application.

Subpart B—The Application and the NSO Process

§ 57.201 Where to apply.

Any eligible smelter may apply for an NSO to the appropriate EPA Regional Office or the appropriate State or local air pollution control agency.

(a) When application is made to EPA, all parts of the application required to be submitted under this subpart shall be sent directly to the Director, Stationary Source Compliance Division (EN-341), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Attention: Confidential Information Unit. In addition, the smelter owner shall send a copy of the application, except that part required to be submitted under § 57.203(b) (eligibility), directly to the appropriate EPA Regional Office.

(b) When application is made to the appropriate State or local agency, the smelter owner shall submit one complete copy of all parts of the application required to be submitted under this subpart to that agency, in addition to the application requirements contained in § 57.201(a), above. If the smelter owner is requesting an advance eligibility determination pursuant to § 57.203(b), such request must be made in writing and shall accompany the copy of the application being sent to the Director of the Stationary Source Compliance Division of the Environmental Protection Agency

(c) If the smelter owner is requesting a waiver of the interim constant control requirement of § 57.301, such request must be sent directly to the Director, Stationary Source Compliance Division, at the time of application, in accordance with § 57.802.

(d) *The NSO Process.* (1) A smelter desiring an NSO shall apply for an NSO by submitting an application under Subpart B including the financial information required in Appendix A. The issuing agency shall analyze the financial information according to the financial eligibility test prescribed by Subpart A and described in Appendix A. The issuing Agency shall then determine whether the smelter is able to comply with its SIP on or before the date required in the SIP by installing adequately demonstrated technology which is reasonably available. See also § 57.102(a)(3). If the test demonstrates that adequately demonstrated technology is not reasonably available to the smelter to allow it to comply with the SIP by the required compliance date, the smelter is eligible for an NSO.

(2)(i) If the smelter is determined to be eligible for an NSO under § 57.104(d)(1), the issuing Agency shall apply the Appendix A financial eligibility tests again before issuing an NSO in order to determine if the smelter can comply with its SIP requirements on or before January 1, 1988 by installing adequately demonstrated technology which is reasonably available.

(ii) If application of the tests shows that the smelter could comply by or

before January 1, 1988, the issuing agency shall notify the smelter of this determination, and shall not issue an NSO to the smelter unless the NSO contains a SIP compliance schedule meeting the requirements of 57.705. Such a compliance schedule must provide for compliance with the smelter's SO_2 SIP as expeditiously as practicable and in no case later than January 1, 1988. A smelter must submit to the issuing agency information necessary to determine a compliance schedule meeting the requirements of § 57.705. This information shall be submitted by a smelter within thirty days after the smelter is notified by the issuing agency that a SIP compliance schedule is required. The Administrator may consider an NSO application to be withdrawn for SIP enforcement purposes if a smelter fails to submit such information within the time required under this paragraph.

(iii) If no adequately demonstrated technology is found to be reasonably available to enable a smelter to comply by January 1, 1988, it would be excused from the compliance schedule requirement and it would be subject to reevaluation of its ability to comply by that date at any time during the term of the NSO. (See § 57.201(d)(3)).

(3) At any time during the term of an NSO which does not contain a SIP compliance schedule, EPA or the issuing agency may reevaluate the availability of technology to the smelter. If EPA or the issuing agency determines that adequately demonstrated technology is reasonably available to permit the smelter to comply with its SIP by or before January 1, 1988, the NSO shall be amended within 3 months time after such determination. The amendment shall require compliance with all SIP requirements by or before January 1, 1988, and shall include a compliance schedule meeting the requirements of 57.705. The determination that adequately demonstrated technology is reasonably available shall be made by reapplying the same Appendix A financial eligibility tests required by Subpart B, updated by economic data reflecting current operating conditions and currently demonstrated control technology. Any such determination and amendment shall be governed by the provisions of this Part and Section 119 of the Clean Air Act.

(4) Notice and opportunity for public hearing must be provided before issuance of any NSO.

(e) A smelter which does not possess constant SO_2 controls may apply for an interim waiver of interim constant controls by submitting an application under Subpart H. EPA then must determine the smelter's ability to afford installation of interim constant SO_2 controls at the smelter based on financial eligibility information analyzed according to the financial test prescribed in Appendix A. A waiver of the interim constant control requirement will be granted if EPA determines in accordance with the procedures of Subpart H that imposition of this requirement would necessitate closure of the smelter for at least one year.

§ 57.202 How to apply.

(a) *Letter of intent.* To initiate an application for an NSO, the owner or operator of a smelter shall send a letter of intent to an appropriate air pollution control agency. The letter of intent shall contain a statement of the owner's intent to apply for an NSO, and an agreement to provide any information required under this part. The letter of intent shall be signed by a corporate official authorized to make such commitments. Upon receipt of any letter of intent by the issuing agency, the SIP emission limitation for sulfur dioxide, as to that applicant, shall be deemed suspended for 90 days. The 90 day period may be extended for good cause at the discretion of the Administrator.

(b) *Complete application.* (1) Within the period referred to in paragraph (a) of this section, the smelter owner shall submit its completed application pursuant to § 57.201. Receipt of all parts of a substantially complete application postmarked within the original or extended application period shall be deemed to continue the suspension of the SIP emission limitation for SO_2 until the issuing agency issues or declines to issue an NSO. This suspension shall in all cases terminate, however, 90 days after receipt of the substantially completed application, unless extended for good cause at the discretion of the Administrator. If, in the Administrator's judgement, good faith effort has been made to submit a complete application, additional time may be granted to allow for correction of minor deficiencies.

(2) If an issuing agency transmits an NSO to EPA for approval before the expiration of the suspension of the federal SIP emission limitation, the suspension shall continue until EPA approves or disapproves the NSO.

§ 57.203 Contents of the application.

(a) *Claim of confidentiality.* The smelter owner may make a business confidentiality claim covering all or part of the information in the NSO application in accordance with 40 CFR Part 2, Subpart B (41 FR 36906 *et seq.*, September 1, 1976 as amended by 43 FR 39997 *et seq.*, September 8, 1978). A claim is effective only if it is made at the time the material is submitted to the issuing agincy or EPA. A claim shall be made by attaching to the information a notice of confidentiality. Information claimed as confidential will be handled by EPA under the provisions of 40 CFR Part 2, Subpart B. If no claim accompanies the information, it may be made available to the public without further notice.

(b) Each smelter owner shall make the showing required by § 57.102(a)(3) by completing and submitting Appendix A to this part and any necessary supplemental information to the issuing agency as a part of its application. Any smelter owner or State may, at its option, simultaneously submit this material to EPA for an advance eligibility determination.

(c) *Current operating information.* A complete NSO application shall also contain the following information:

(1) A process flow diagram of the smelter, including current process and instrumentation diagrams for all processes or equipment which may emit or affect the emission of sulfur dioxide; the characteristics of all gas streams emitted from the smelter's process equipment (flow rates, temperature, volumes, compositions, and variations over time); and a list of all monitoring data and strip charts, including all data, charts, logs or sheets kept with respect to the operation of any process equipment which may emit or affect the emission of sulfur dioxide;

(2) The smelter's maximum daily production capacity (as defined in § 57.103(r)), the operational rate (in pounds of concentrate charged to the smelting furnace per hour) of each major piece of process equipment when the smelter is operating at that capacity; and the smelter's average and maximum daily production rate for each product, co-product, or by-product, by year, for the past four years;

(3) The optimal conversion efficiency (defined in terms of percent of total SO_2 removed from the input flow stream) of any acid plant or other sulfur dioxide control system under the normal process operating conditions (excluding malfunctions) most conducive to optimal conversion efficiency;

(4) The average conversion efficiency of any acid plant or other sulfur dioxide control system during normal process operations (excluding malfunctions), by month, during the past four years;

(5) The percent of the time the acid plant or other control system was available for service during each month for the past four years, excluding downtime for scheduled maintenance.

and a full explanation of any major or recurring problems with the system during that time;

(6) The frequency and duration of times during the past four years when the SO_2 system was unavailable because of scheduled maintenance of the system;

(7) A description of all scheduled, periodic shutdowns of the smelter during the past four years, including their purpose, frequency and duration; and the same information with respect to unscheduled shutdowns;

(8) The gas volume, rates, and SO_2 concentration which the control system was actually designed to accommodate, taking into account any modifications made after its installation;

(9) The average monthly sulfur balance across the process and control equipment, including fugitive emissions, for the past 4 years; and

(10) A description of engineering techniques now in use at the smelter to prevent the release of fugitive emissions into the atmosphere at low elevations.

(d) *The smelter owner's proposals.* The smelter owner shall submit as part of its application, draft NSO provisions which would implement the requirements of Subparts C through G of this part. The issuing agency may use these proposals as the basis for any NSO that may be granted, or may modify these proposals in any way it deems necessary in order to comply with the requirements of this part.

(e) A smelter may submit as part of its application, information necessary to determine any SIP compliance schedule which might be required under § 57.201(d)(2).

(f) *Additional information.* The smelter owner shall designate in its application a corporate officer responsible and authorized to supply supplemental technical and economic information and explanations as required by the issuing agency during the formulation of the NSO. Failure to supply such information and explanations shall constitute a failure to submit a complete application.

(g) *Request for a waiver of constant controls.* Any request for a waiver of the interim constant control requirement of § 57.301 shall be made in accordance with § 57.802. The criteria and procedures for granting the waiver are governed by Subpart H of this part.

(h) Unless a smelter applies for a waiver in accordance with Subpart H, a smelter shall submit as part of its application a proposed schedule for compliance with the interim constant control requirements of Subpart C which satisfies the requirements of § 57.702.

Subpart C—Constant Controls and Related Requirements

§ 57.301 General requirements.

Each NSO shall require an interim level of sulfur dioxide constant controls to be operated at the smelter, unless a waiver of this requirement has been granted to the owner under Subpart H of this part. Except as otherwise provided in § 57.304, the interim constant controls shall be properly operated and maintained at all times. The NSO shall require the following gas streams to be treated by interim constant controls:

(a) In copper smelters, off-gases from fluidized bed roasters, flash furnaces, NORANDA reactors, electric furnaces and copper converters;

(b) In lead smelters, off-gases from the front end of the sintering machine and any other sinter gases which are recirculated;

(c) In zinc smelters, off-gases from multi-hearth roasters, flash roasters and fluidized bed roasters, and;

(d) In all primary nonferrous smelters, all other strong SO_2 streams.

(e) In all primary nonferrous smelters, any other process streams which were regularly or intermittently treated by constant controls at the smelter as of August 7, 1977.

§ 57.302 Performance level of interim constant controls.

(a) *Maximum feasible efficiency.* Each NSO shall require: that the smelter operate its interim constant control systems at their maximum feasible efficiency, including the making of any improvements necessary to correct the effects of any serious deficiencies; that the process and control equipment be maintained in the way best designed to ensure such operation; and that processs operations be scheduled and coordinated to facilitate treatment of process gas streams to the maximum possible extent. Maximum feasible efficiency shall be expressed in the NSO in the form of a limitation on the concentration of SO_2 in the tail gas of each individual control system in combination with an appropriate averaging period, as provided below in paragraphs (b) and (c) of this section.

(b) *The limitaition level for SO_2 concentration in the control system tail gas.* The level at which the concentration limitation is set shall take into account fluctuations in the strength and volume of process off-gases to the extent that those fluctuations affect the SO_2 content of the tail gas and cannot be avoided by improved scheduling and coordination of process operations. The limitation shall exclude the effect of any increase in emissions caused by process or control equipment malfunction. The limitation shall take into account unavoidable catalyst deterioration in sulfuric acid plants, but may prescribe the frequency of catalyst screening or replacement. The NSO shall also prohibit the smelter owner from using dilution air to meet the limitation.

(c) *Averaging period.* (1) The averaging period shall be derived in combination with the concentration limitation and shall take into account the same factors described in paragraph (b) of this section. The averaging periods established under this paragraph should generally not exceed the following:

(i) For sulfuric acid plants on copper smelters, 12 hour running average;

(ii) For sulfuric acid plants on lead smelters, 6 hour running average;

(iii) For sulfuric acid plants on zinc smelters, 2 hour running average;

(iv) For dimethylaniline (DMA) scrubbing units on copper smelters, 2 hour running average.

(2) A different averaging period may be established if the applicant demonstrates that such a period is necessary in order to account for the factors described in paragraph (b) of this section: Provided, that the period is enforceable and satisfies the criteria of paragraph (a) of this section.

(d) *Improved performance.* (1) The performance level representing maximum feasible efficiency for any existing control system (e.g., a sulfuric acid plant or a DMA scrubber) shall require the correction of the effects of any serious deficiencies in the system. For the purpose of this paragraph, at least the following problems shall constitute serious deficiencies in acid plants:

(i) Heat exchangers and associated equipment inadequate to sustain efficient, autothermal operation at the average gas strengths and volumes received by the acid plant during routine process equipment operation;

(ii) Failure to completely fill all available catalyst bed stages with sufficient catalyst;

(iii) Inability to the gas pre-treatment system to prevent unduly frequent plugging or fouling (deterioration) of catalyst or other components of the acid plant; or

(iv) Blower capacity inadequate to permit the treatment of the full volume of gas which the plant could otherwise accommodate, or in leakage of air into the flues leading to the plant, to the extent that this inadequacy results in bypassing of gas around the plant.

(2) Notwithstanding any contrary provisions of § 57.304(c) (malfunction demonstration), no excess emissions (as

defined in § 57.304(a)) shall be considered to have resulted from a malfunction in the constant control system if the smelter owner has not upgraded serious deficiencies in the constant control system in compliance with the requirements of § 57.302(d)(1), unless the smelter owner demonstrates under § 57.304(c) that compliance with those requirements would not have affected the magnitude of the emission.

(e) *Multiple control devices.* (1) At any smelter where off-gas streams are treated by various existing control systems (e.g., multiple acid plants or a DMA scrubber and an acid plant), the NSO shall require the use of those systems in the combination that will result in the maximum feasible net SO_2 removal.

(2) To the extent that compliance with this requirement is demonstrated by the smelter operator to result in excess emissions during unavoidable startup and shutdown of the control systems, those excess emissions shall not constitute violations of the NSO.

§ 57.303 Total plantwide emission limitation.

(a) *Calculation of the emission limitation.* Each NSO shall contain a requirement limiting the total allowable emissions from the smelter to the level which would have been associated with production at the smelter's maximum production capacity (as defined in § 57.103(r)) as of August 7, 1977. This limitation shall be expressed in units of mass per time and shall be calculated as the sum of uncontrolled process and fugitive emissions, and emissions from any control systems (operating at the efficiency prescribed under § 57.302). These emission rates may be derived from either direct measurements or appropriately documented mass balance calculations.

(b) *Compliance with the emission limitation.* Each NSO shall require the use of specific, enforceable testing methods and measurement periods for determining compliance with the limitation established under paragraph (a) of this section.

§ 57.304 Bypass, excess emissions and malfunctions.

(a) *Definition of excess emissions.* For the purpose of this subpart, any emissions greater than those permitted by the NSO provisions established under § 57.302 (performance level of interim constant controls) or § 57.303 (plantwide emission limitation) of this subpart shall constitute excess emissions. Emission of any gas stream identified under § 57.301(a), (b), (c), or (d) of this subpart that is not treated by a sulfur dioxide constant control system shall also constitute an excess emission under this subpart.

(b) *The excess emission report.* Each NSO shall require the smelter to report all excess emissions to the issuing agency, as provided in § 57.305(b). The report shall include the following:

(1) Identity of the stack or other emission points where the excess emissions occurred;

(2) Magnitude of the excess emissions expressed in the units of each applicable emission limitation, as well as the operating data, documents, and calculations used in determining the magnitude of the excess emissions;

(3) Time and duration of the excess emissions;

(4) Identify of the equipment causing the excess emissions;

(5) Nature and cause of such excess emissions;

(6) Steps taken to limit the excess emissions, and when those steps were commenced;

(7) If the excess emissions were the result of a malfunction, the steps taken to remedy the malfunction and to prevent the recurrence of such malfunction; and

(8) At the smelter owner's election, the demonstration specified in paragraph (c) of this section.

(c) *Malfunction demonstration.* Except as provided in § 57.302(e)(2) or in paragraph (d) or (e) of this section, any excess emission shall be a violation of the NSO unless the owner demonstrates in the excess emissions report required under paragraph (b) of this section that the excess emission resulted from a malfunction (or an unavoidable startup and shutdown resulting from a malfunction) and that:

(1) The air pollution control systems, process equipment, or processes were at all times maintained and operated, to the maximum extent practicable, in a manner consistent with good practice for minimizing emissions;

(2) Repairs were made as expeditiously as practicable, including the use of off-shift labor and overtime;

(3) The amount and duration of the excess emissions were minimized to the maximum extent practicable during periods of such emissions; and

(4) The excess emissions were not part of a recurring pattern indicative of serious deficiencies in, or inadequate operation, design, or maintenance of, the process or control equipment.

(d) *Scheduled maintenance exception.* Excess emissions occurring during scheduled maintenance shall not constitute violations of the NSO to the extent that:

(1) The expected additional annual sulfur dioxide removal by any control system (including associated process changes) for which construction had not commenced (as defined in 40 CFR 60.2 (g) and (i)) as of August 7, 1977 and which the smelter owner agrees to install and operate under Subpart F, would have offset such excess emissions if the system had been in operation throughout the year in which the maintenance was performed.

(2) The system is installed and operated as provided in the NSO provisions established under Subpart F; and

(3) The system performs at substantially the expected efficiency and reliability subsequent to its initial break-in period.

(e) An NSO may provide that excess emissions which occur during acid plant start-up as the result of the cooling of acid plant catalyst due to the unavailability of process gas to an acid plant during a prolonged SO_2 curtailment or scheduled maintenance are not excess emissions. If the NSO does so provide, it shall also require the use of techniques or practices designed to minimize these excess emissions, such as the sealing of the acid plant during prolonged curtailments, the use of auxiliary heat or SO_2 injected during the curtailment, or the preheating of the acid plant before start-up of the process equipment it serves.

§ 57.305 Compliance monitoring and reporting.

(a) *Monitoring.* (1) Each NSO shall require compliance with the control system performance requirements established pursuant to this subpart to be determined through the use of continuous monitors for measuring SO_2 concentration.

(i) Such monitors must be installed, operated and maintained in accordance with the performance specifications and other requirements contained in Appendix D to 40 CFR Part 52 or Part 60. The monitors must take and record at least one measurement of SO_2 concentration from the effluent of each control system in each 15 minute period. Failure of the monitors to record at least 95% of the 15-minute periods in any 30-day period shall constitute a violation of the NSO.

(ii) The sampling point shall be located at least 8 stack diameters (diameter measured at sampling point) downstream and 2 diameters upstream from any flow disturbance such as a bend, expansion, constriction, or flame, unless another location is approved by the Administrator.

(iii) The sampling point for monitoring emissions shall be in the duct at the centroid of the cross section if the cross sectional area is less than 4.645m² (50 ft²) or at a point no closer to the wall than 0.914m (3 ft) if the cross sectional area is 4.645m² (50 ft²) or more. The monitor sample point shall be in an area of small spatial concentration gradient and shall be representative of the concentration in the duct.

(iv) The measurement system(s) installed and used pursuant to this paragraph shall be subject to the manufacturer's recommended zero adjustment and calibration procedures at least once per 24-hour operating period unless the manufacturer specifies or recommends calibration at shorter intervals, in which case such specifications or recommendations shall be followed. Records of these procedures shall be made which clearly show instrument readings before and after zero adjustment and calibration.

(2) Each NSO shall require the monitoring of any ducts or flues used to bypass gases, required under this subpart to be treated by constant controls, around the smelter's sulfur dioxide constant control system(s) for ultimate discharge to the atmosphere. Such monitoring shall be adequate to disclose the time of the bypass, its duration, and the approximate volume and SO_2 concentration of gas bypassed.

(b) *Reporting.* (1) Each NSO shall require that the smelter maintain a record of all measurements required under paragraph (a) of this section. Results shall be summarized monthly and shall be submitted to the issuing agency within 15 days after the end of each month. The smelter owner shall retain a record of such measurements for one year after the NSO period terminates.

(2) Each NSO shall require that the smelter maintain a record of all measurements and calculations required under § 57.303(b). Results shall be summarized on a monthly basis and shall be submitted to the issuing agency at 6-month intervals. The smelter owner shall retain a record of such measurements and calculations for at least one year after the NSO terminates.

(3) The report required under § 57.304(b) shall accompany the report required under paragraph (b)(1) of this section.

(c) Quality assurance and continuous data—(1) *Quality assurance.* Each NSO shall require that the smelter submit a plan for quality assurance to the issuing agency for approval and that all monitoring performed by continuous monitors shall be verified for quality assurance by the smelter. Such plans must follow current EPA guidelines for quality assurance, in order to be approvable.

(2) *Continuous data.* Manual source testing methods equivalent to 40 CFR Part 60, Appendix A shall be used to determine compliance if the continuous monitoring system malfunctions.

Supbart D—Supplementary Control System Requirements

§ 57.401 General requirement.

Except as provided in Subpart E, each NSO shall require the smelter owner to prevent all violations to the NAAQS in the smelter's designated liability area (DLA) through the operation of an approved supplementary control system (SCS).

§ 57.402 Elements of the supplementary control system.

Each supplementary control system shall contain the following elements:

(a) *Air quality monitoring network.* An approvable SCS shall include the use of appropriate ambient air quality monitors to continuously measure the concentration of sulfur dioxide in the air in the smelter's DLA.

(1) The monitors shall be located at all points of expected SO_2 concentrations necessary to anticipate and prevent possible violations of NAAQS anywhere in the smelter's DLA. The determination of the locations where such concentrations may occur shall take into account all recorded or probable meteorological and operating conditions (including bypassing of control equipment), as well as the presence of other sources of SO_2 significantly affecting SO_2 concentrations in the DLA.

(2) The number and location of sites shall be based on dispersion modeling, measured ambient air quality data, meteorological information, and the results of the continuing review required by paragraph (f) of this section. The system shall include the use of at least 7 fixed monitors unless the issuing agency determines, on the basis of a demonstration by the smelter owner, that the use of fewer monitors would not limit coverage of points of high SO_2 concentration or otherwise reduce the capability of the smelter owner to prevent any violations of the NAAQS in the smelter's DLA.

(3) All monitors shall be continuously operated and maintained and shall meet the performance specifications contained in 40 CFR Part 53. The monitors shall be capable of routine real time measurement of maximum expected SO_2 concentrations for the averaging times of SO_2 NAAQS.

(b) *Meteorological network.* The SCS must have a meteorological assessment capability adequate to predict and identify local conditions requiring emission curtailment to prevent possible violations of the NAAQS. The meteorological assessment capability shall provide all forecast and current information necessary for successful use of the SCS operational manual required by paragraph (e) of this section.

(c) *Designated liability area.* The system shall be required to prevent all violations of the NAAQS within the smelter's DLA. The DLA of any smelter is the area within which the smelter's emissions may cause or significantly contribute to violations of the NAAQS for SO_2 when the smelter is operating at its maximum production capacity under any recorded or probable meteorological conditions. The boundaries of that area shall be specified in the NSO.

(1) Unless an acceptable demonstration is made under paragraph (c)(2) of this section, the DLA shall be a circle with a center point at the smelter's tallest stack and a minimum radius as given in the following table:

RADIUS FOR SO_2 EMISSIONS AT MAXIMUM PRODUCTION CAPACITY *

Emissions rate in tons per hour	Emission rate in grains per sec.	Radius in kilometers
16 or less	4,000 or less	11
24	6,000	16
32	8,000	24
40	10,000	32
48 or more	12,000 or more	40

* Maximum emission rates for periods not to exceed 24 hours. Minimum radii may be determined from the table by linear interpolation.

(2) The NSO may provide for a DLA with different boundaries if the smelter owner can demonstrate through the use of appropriate dispersion modeling and ambient air quality monitoring data that the smelter's controlled emissions could not cause or significantly contribute to a violation of the NAAQS beyond the boundaries of such a different area under any recorded or probable meteorological conditions.

(3) A violation of the NAAQS in the DLA of any smelter shall constitute a violation of that smelter's NSO, unless the issuing agency determines on the basis of a showing by the smelter owner that the smelter owner had taken all emission curtailment action indicated by the SCS operational manual and that the violation was caused in significant part by:

(i) Emissions of another source(s) which were in excess of the maximum permissible emissions applicable to such source(s),

(ii) Fugitive emissions of another source(s), or

(iii) Except as provided by § 57.703(a), the smelter's own fugitive emissions: Provided, that the smelter is in compliance with all requirements of or under subpart E of this Part.

(4) For the purposes of this section, maximum permissible emissions for other sources are the highest of:

(i) SIP emission limitation;

(ii) Orders in effect under section 113(d) of the Clean Air Act; or

(d) *Overlapping designated liability areas.* Notwithstanding any other provisions of this subpart, the following requirements shall apply whenever the designated liability areas of 2 or more smelters do, or may, overlap:

(1) In the case of any NSO applicant that would have a DLA which would overlap with the DLA of any other smelter that has applied for an NSO or has an NSO in effect, the NSO applicant shall include in its application an enforceable joint plan, agreed to by such other smelter(s). In determining whether a joint plan is required, the NSO applicant shall calculate its DLA according to the table in paragraph (c)(1) of this section. The DLA of the other smelter shall be calculated according to the table in paragraph (c)(1) of this section unless the other smelter has an NSO in effect, in which case the boundaries in that NSO shall be used. The enforceable joint plan shall provide for:

(i) Emission curtailment adequate to ensure that the NAAQS will not be violated in any areas of overlapping DLAs; and

(ii) Conclusive prospective allocation of legal liability in the event that the NAAQS are violated in the area of overlapping DLAs.

Such plans may, but need not, include the operation of a joint SCS system. Each NSO shall require adherence by the NSO applicant owner to the joint plan for emission curtailment and allocation of liability, unless the issuing agency determines, pursuant to the provisions of paragraph (c)(2) of this section, that the NSO applicant's DLA does not overlap with that of any other smelter.

(2) In the case of any NSO applicant that would have a DLA which would overlap with the DLA of any other smelter whose owner has not applied for an NSO (and does not have an NSO in effect), the NSO applicant's submittal shall contain a written consent, signed by a corporate official empowered to do so. The consent shall state that if, at any time thereafter, the owner of the other smelter applies for an NSO, and the other smelter's DLA would overlap with the NSO applicant's DLA, the NSO applicant will negotiate and submit an enforceable joint plan for emission curtailment and allocation of liability (as described in paragraph (d)(1) of this section). In determining whether it is necessary to submit such a consent, each smelter's DLA shall be calculated according to the table set forth in paragraph (c)(1) of this section. The consent shall state that a joint plan shall be submitted within 90 days of the issuing agency's notification to the NSO applicant of receipt of the other smelter's letter of intent, unless the issuing agency determines that the DLAs do not overlap. Failure of the NSO applicant to submit such a plan shall constitute grounds for denial of its NSO application or a violation of an effective NSO, as applicable.

(e) *The SCS operational manual.* Each NSO shall require the smelter to be operated in accordance with the provisions of an SCS operational manual approved by the issuing agency. The SCS operational manual shall describe the circumstances under which, the extent to which, and the procedures through which emissions shall be curtailed to prevent violations of the NAAQS in the smelter's DLA. Failure to curtail emissions when and as much as indicated by the manual or to follow the provisions of the manual implementing the requirements of paragraph (e)(3) of this section shall constitute a violation of the NSO.

(1) The operational manual shall prescribe emission curtailment decisions based on the use of real time information from the air quality monitoring network dispersion model estimates of the effect of emissions on air quality, and meteorological observations and predictions.

(2) The operational manual shall also provide for emission curtailment to prevent violation of the NAAQS within the smelter's DLA which may be caused in part by stack emissions, and to the extent practicable fugitive emissions, from any other source (unless that other source is a smelter subject to an NSO).

(3) The SCS operational manual shall include (but not be limited to):

(i) A clear delineation of the authority of the SCS operator to require all other smelter personnel to implement the operator's curtailment decisions;

(ii) The maintenance and calibration procedures and schedules for all SCS equipment;

(iii) A description of the procedures to be followed for the regular acquisition of all meteorological information necessary to operate the system;

(iv) The ambient concentrations and meteorological conditions that will be used as criteria for determining the need for various degrees of emission curtailment;

(v) The meteorological variables as to which judgments may be made in applying the criteria stated pursuant to subparagraph (e)(3)(iv) of this section;

(vi) The procedures through which and the maximum time period within which a curtailment decision will be made and implemented by the SCS operator;

(vii) The method for immediately evaluating the adequacy of a particular curtailment decision, including the factors to be considered in that evaluation;

(viii) The procedures through which and the time within which additional necessary curtailment will immediately be effected; and

(ix) The procedures to be followed to protect the NAAQS in the event of a mechnical failure in any element of the SCS.

(f) *Continuing review and improvement of the SCS.* Each NSO shall require the smelter owner to conduct an active program to continuously review the design and operation of the SCS to determine what measures may be available for improving the performance of the system. Among the elements of this program shall be measures to locate and examine possible places both inside and outside the DLA where unmonitored NAAQS violations may be occurring. Such measures shall include the use of modelling as appropriate and mobile ambient air quality monitors, following up on information and complaints from members of the public, and other appropriate activities. The NSO shall also require the submission of a semi-annual report to the issuing agency detailing the results of this review and specifying measures implemented to prevent the recurrence of any violations of NAAQS.

§ 57.403 Written consent.

(a) *The consent.* The NSO shall include a written consent, signed by a corporate official empowered to do so, in the following form:

> "As a condition of receiving a Primary Nonferrous Smelter Order (NSO) under section 119 of the Clean Air Act for the smelter operated by (name of company) at (location), the undersigned official, being empowered to do so, consents for the company as follows:
> (1) In any judicial or administrative proceeding to enforce the NSO, the company will not contest:
> (a) Liability for any violation of the National Ambient Air Quality Standards for sulfur dioxide in the smelter's

designated liability area (DLA), except on the ground that a determination under 40 CFR 57.402(c)(3) was clearly wrong; or
(b) The conclusive allocation of liability under NSO provisions satisfying 40 CFR 57.402(d)(1) between the company's smelter and any other smelter(s) for any violation of the National Ambient Air Quality Standards for sulfur dioxide in an area of overlapping DLAs.
(2) The issuing agency (as defined in 40 CFR 57.103) will be allowed unrestricted access at reasonable times to inspect, verify calibration of, and obtain data from ambient air quality monitors operated by the company under the requirements of the NSO."

(b) *Rights not waived by the consent.* This consent shall not be deemed to waive:

(1) Any right(s) to judicial review of any provisions of an NSO that are otherwise available to the smelter owner or operator under section 307(b) of the Clean Air Act; or

(2) The right to contest, in any forum, that any violation of an NSO was committed "knowingly" within the meaning of section 113(c) of the Clean Air Act.

§ 57.404 Measurements, records, and reports.

(a) *Measurements.* Each NSO shall require the smelter owner to install, operate, and maintain a measurement system(s) for continuously monitoring sulfur dioxide emissions and stack gas volumetric flow rates in each stack (except a stack used exclusively for bypassing control equipment) which could emit 5 percent or more of the smelter's total potential (uncontrolled) hourly sulfur dioxide emissions.

(1) Such monitors shall be installed, operated, and maintained in accordance with the performance specifications and other requirements contained in Appendices D and E to 40 CFR Part 52. The monitors must take and record at least one measurement of sulfur dioxide concentration and stack gas flow rate from the effluent of each affected stack in each fifteen-minute period. (The NSO shall require the smelter operator to devise and implement any procedures necessary for compliance with these performance specifications.)

(2) The sampling point shall be located at least eight stack diameters (diameter measured at sampling point) downstream and two diameters upstream from any flow disturbance such as a bend, expansion, constriction, or flame, unless another location is approved by the Administrator.

(3) The sampling point for monitoring emissions shall be in the duct at the centroid of the cross section if the cross sectional area is less than 4.645 m^2 (50 ft^2) or at a point no closer to the wall than 0.914m (3 ft) if the cross sectional area is 4.645m^2 (50 ft^2) or more. The monitor sample point shall be in an area of small spatial concentration gradient and shall provide a sample which is representative of the concentration in the duct.

(4) The measurement system(s) installed and used pursuant to this paragraph shall be subject to the manufacturer's recommended zero adjustment and calibration procedures at least once per 24-hour operating period unless the manufacturer specifies or recommends calibration at shorter intervals, in which case such specifications or recommendations shall be followed. Records of these procedures shall be made which clearly show instrument readings before and after zero adjustment and calibration.

(5) The results of such monitoring, calibration, and maintenance shall be submitted in the form and with the frequency specified in the NSO.

(b) *Records.* Each NSO shall require the smelter owner to maintain records of the air quality measurements made, meteorological information acquired, emission curtailment ordered (including the identity of the persons making such decisions), and calibration and maintenance performed on SCS monitors during the operation of the SCS. These records shall be maintained for the duration of the NSO.

(c) *Reports.* Each NSO shall require the smelter owner to:

(1) Submit a monthly summary indicating all places and times at which the NAAQS for SO_2 were violated in the smelter's DLA, and stating the SO_2 concentrations at such times;

(2) Immediately notify EPA and the state agency any time concentrations of SO_2 in the ambient air in the smelter's DLA reaches 0.3 part per million (800 micrograms/cubic meter), 24-hour average, or exceed the warning stage in any more stringent emergency plan in the applicable state implementation plan; and

(3) Make such other reports as may be specified in the NSO.

§ 57.405 Formulation, approval, and implementation of requirements.

(a) *SCS content of the application.* The requirements of §57.203(d) shall be satisfied with respect to this subpart as follows:

(1) Each NSO application shall include a complete description of any supplementary control system in operation at the smelter at the time of application and a copy of any SCS operational manual in use with that system.

(2) Each NSO application shall contain proposed NSO provisions for compliance with the requirements of § 57.401, § 57.402 (c), (d), and (f), § 57.403, § 57.404, and § 57.405(b)(2).

(3) Each NSO application shall include a specific plan for the development of a system fulfilling the requirements of § 57.402 (a), (b) and (e) (covering air quality monitoring network, meteorological network, and the SCS operational manual).

(b) *SCS content of the order.* (1) Each NSO shall include an approved version of the plan described in paragraph (a)(3) of this section and shall provide increments of progress towards its completion.

(2) Each NSO shall require the submission of a final report, within 6 months, evaluating the performance and adequacy of the SCS developed pursuant to the approved plan. The report shall include:

(i) A detailed description of how the criteria that form the basis for particular curtailment decisions were derived;

(ii) A complete description of each SCS element listed in § 57.402 (a) through (b) (covering monitoring, meteorology, and the DLA), and an explanation of why the elements fulfill the requirements of those sections;

(iii) A reliability study demonstrating that the SCS will prevent violations of the NAAQS in the smelter's DLA at all times. The reliability study shall include a comprehensive analysis of the system's operation during one or more three-month seasonal periods when meteorological conditions creating the most serious risk of NAAQS violations are likely to occur; and

(iv) A copy of the current SCS operational manual.

(c) *Amendment of the NSO.* Each NSO shall be amended, if necessary, within 3 months of submission of the final report required under paragraph (b)(2) of this section, to reflect the most current approved elements of the SCS and to fulfill all other requirements of this subpart. Each NSO shall also be subsequently amended (as provided in § 57.104) whenever necessary as a result of the program required by § 57.402(f) or to reflect improved SCS operating procedures or other system requirements.

Subpart E—Fugitive Emission Evaluation and Control

§ 57.501 General requirement.

(a) Each NSO shall require the smelter owner to use such control measures as may be necessary to ensure that the smelter's fugitive emissions do not result

in violations of the NAAQS for SO_2 in the smelter's DLA.

(b) A smelter which is operating under an NSO containing SIP compliance schedule established in accordance with § 57.705 is required to be making progress toward compliance with any fugitive control requirements contained in its respective SIP and need not meet the other requirements contained in this subpart.

(c) A smelter which is subject to an NSO which does not contain a SIP compliance schedule must meet the provisions of §§ 57.502 and 57.503.

§ 57.502 Evaluation.

(a) *Evaluation at the time of application.* Any smelter owner may demonstrate at the time of application for an NSO that the smelter's SO_2 fugitive emissions will not cause or significantly contribute to violations of the NAAQS in the smelter's DLA. If such demonstration is not made, the smelter owner shall submit the design and workplan for a study adequate to assess the sources of significant fugitive emissions from the smelter and their effects upon ambient air quality.

(b) *Evaluation during the first 6 months of the NSO.* The design and workplan of the study shall be approved, if adequate, by the issuing agency and included in the NSO. The study shall commence no later than the date when the NSO becomes effective and an analysis of its results shall be submitted to the issuing agency within 6 months of the effective date of the NSO. The study shall include an appropriate period during which the ambient air shall be monitored to determine the impact of fugitive emissions of sulfur dioxide, arsenic (at copper smelters only), lead (at lead and zinc smelters only), and total suspended particulates on the ambient air quality in the smelter's DLA.

§ 57.503 Control measures.

The NSO of any smelter subject to the requirements of § 57.502(b) shall be amended, if necessary, within 6 months of EPA's receipt of the analysis specified in § 57.502(b), as provided in § 57.704(c) to implement the requirement of § 57.501. Measures required to be implemented may include:

(a) *Additional supplementary control.* The use of the supplementary control system, if the additional use of the system does not interfere with the smelter owner's ability to meet the requirements of Subpart D; and

(b) *Engineering and maintenance techniques.* The use of engineering and maintenance techniques to detect and prevent leaks and capture and vent fugitive emissions through appropriate stacks. These techniques include but are not limited to:

(1) For reactors, installation and proper operation of primary hoods;

(2) For roasters, installation and proper operation of primary hoods on all hot calcine transfer points;

(3) For furnaces, installation and proper operation of primary hoods on all active matte tap holes, matte launders, slag skim bays, and transfer points;

(4) For converters, installation and proper operation of primary hoods for blowing operations, and where appropriate, secondary hoods for charging and pouring operations;

(5) For sintering machines, installation and proper operation of primary hoods on the sinter bed, all hot sinter ignition points, all concentrate laydown points, and all hot sinter transfer points;

(6) For blast furnaces, installation and proper operation of primary hoods on all active slag and lead bullion furnace tap holes and transfer points;

(7) For dross reverberatory furnaces, installation and proper operation of primary hoods on all active charging and discharging points;

(8) Maintenance of all ducts, flues and stacks in a leak-free condition to the maximum extent possible;

(9) Maintenance of all process equipment under normal operating conditions in such a fashion that out-leakage of fugitive gases will be prevented to the maximum extent possible;

(10) Secondary or tertiary hooding on process equipment where necessary; and

(11) Partial or complete building evacuation as appropriate.

Subpart F—Research and Development Requirements

§ 57.601 General requirements.

(a) This subpart is not applicable to NSOs which contain a SIP compliance schedule in accordance with § 57.705.

(b) Except as provided in paragraph (a), each NSO shall require the smelter to conduct or participate in a specific research and development program designed to develop more effective means of compliance with the sulfur dioxide control requirements of the applicable state implementation plan than presently exist.

§ 57.602 Approval of proposal.

(a) *The smelter owner's proposal.* The smelter owner's NSO application shall include a proposed NSO provision for implementing the requirement of § 57.601, a fully documented supporting analysis of the proposed program, and an evaluation of the consistency of the proposed program with the criteria listed in § 57.603. The application shall also specify:

(1) The design and substantive elements of the research and development program, including the expected amount of time required for their implementation;

(2) The annual expected capital, operating, and other costs of each element in the program;

(3) The smelter's current production processes, pollution control equipment, and emissions which are likely to be affected by the program;

(4) Potential or expected benefits of the program;

(5) The basis upon which the results of the program will be evaluated; and

(6) The names, positions, and qualifications of the individuals responsible for conducting and supervising the project.

(b) *EPA approval.* (1) If the issuing agency will not be EPA, the smelter owner or the issuing agency may also submit to EPA the information specified in paragraph (a) of this section at the same time the information is submitted to the issuing agency. As soon as possible after the receipt of the information described in paragraph (a) of this section, EPA shall certify to the issuing agency and to the applicant whether or not in the judgment of the Administrator the smelter owner's final proposals are approvable. If EPA does not receive an advance copy of the proposal, the ultimate approval will occur when the NSO is approved rather than in advance of receipt of the NSO.

(2) A prerequisite for approval of an R&D proposal by EPA and any issuing agency is that the planned work must yield the most cost effective technology possible.

(c) *Optional preproposal.* The smelter owner may, at its option, submit to EPA for its approval and comment a preproposal generally describing the project the owner intends to propose under paragraph (a) of this section. A preproposal may be submitted to EPA any time prior to the submission of a proposal under paragraph (a) of this section. As soon as possible after the receipt of a preproposal, EPA shall certify to the applicant (and to any other issuing agency, as applicable) whether or not the project would be approvable. This certification may include comments indicating necessary modifications which would make the project approvable.

§ 57.603 Criteria for approval.

The approvability of any proposed research and development program shall be judged primarily according to the following criteria:

(a) The likelihood that the project will result in the use of more effective means of emission limitation by the smelter within a reasonable period of time and that the technology can be implemented at the smelter in question, should the smelter be placed on a SIP compliance schedule at some future date when adequately demonstrated technology is reasonably available;

(b) Whether the proposed funding and staffing of the project appear adequate for its successful completion;

(c) Whether the proposed level of funding for the project is consistent with the research and development expenditure levels for pollution control found in other industries;

(d) The potential that the project may yield industrywide pollution control benefits;

(e) Whether the project may also improve control of other pollutants of both occupational and environmental significance;

(f) The potential effects of the project on energy conservation; and

(g) Other non-air quality health and environmental considerations.

§ 57.604 Evaluation of projects.

The research and development proposal shall include a provision for the employment of a qualified independent engineering firm to prepare written reports at least annually which evaluate each completed significant stage of the research and development program, including all relevant information and data generated by the program. All reports required by this paragraph shall be submitted to EPA and also to the issuing agency if it is not EPA.

57.605 Consent.

Each NSO shall incorporate by reference a binding written consent, signed by a corporate official empowered to do so, requiring the smelter owner to:

(a) Carry out the approved research and development program;

(b) Grant each issuing agency and EPA and their contractors access to any information or data employed or generated in the research and development program, including any process, emissions, or financial records which such agency determines are needed to evaluate the technical or economic merits ot the program;

(c) Grant physical access to representatives and contractors of each issuing agency to each facility at which such research is conducted;

(d) Grant the representatives and contractors of EPA and the issuing agency reasonable access to the persons conducting the program on behalf of the smelter owner for discussions of progress, interpretation of data and results, and any other similar purposes as deemed necessary by EPA or any issuing agency.

§ 57.606 Confidentiality.

The provisions of section 114 of the Act and 40 CGR Part 2 shall govern the confidentiality of any data or information provided to EPA under this subpart.

Subpart G—Compliance Schedule Requirements

§ 57.701 General requirements.

This section applies to all smelters applying for an NSO. Each NSO shall require the smelter owner to meet all of the requirements within the NSO as expeditiously as practicable. All NSO requirements shall be effective as specified. For requirements not immediately effective, the NSO shall provide increments of progress and a schedule for compliance. The schedules set forth in this subpart represent the most expeditious compliance practicable only for those smelters which do not currently have the equipment or systems required by this part. Requirements for smelters to submit compliance schedules and the processes which they must follow are outlined below.

§ 57.702 Compliance with constant control emission limitation.

This section applies to all smelters which receive an NSO, but only to the extent this section is compatible with any SIP compliance schedule required by § 57.201(d) (2) and §57.705. An NSO issued to a smelter which was previously issued a first period NSO shall require compliance with all interim constant control requirements under Subpart C immediately after issuance of the second NSO, unless the smelter received a waiver under the first NSO. Any NSO issued to a smelter not required to immediately comply with the requirement of Subpart C shall contain a schedule for compliance with those requirements [except where] a waiver is requested in accordance with Subpart H, in which case an NSO may be issued without such a schedule for compliance pending a final decision on the request under Subpart H. No final compliance date shall extend beyond 6 months of the effective date of the NSO or, if a waiver is requested in accordance with Subpart H, beyond 6 months of a final decision to deny a waiver under Subpart H, [unless] a smelter operator demonstrates that special circumstances warrant more time, in which case the schedule shall require compliance as expeditiously as practible but the 6 month limit shall not apply. An NSO which does not contain a schedule for compliance with the requirements of Subpart C because a waiver has been requested in accordance with Subpart H shall require submission of such a schedule within 30 days of a final denial of a waiver under Subpart H. Such an NSO shall be amended to include a schedule for compliance with the requirements of Subpart C within a reasonable time thereafter.

(a) Description of the overall design of the SO_2 control system(s) to be installed.

(b) Descriptions of specific process hardware to be used in achieving compliance with interim SO_2 constant controls including gas capacity values.

(c) The date by which contracts will be let or purchase orders issued to accomplish any necessary performance improvements;

(d) The date for initiating on-site construction or installation of necessary equipment;

(e) The date by which on-site construction or installation of equipment is to be completed; and

(f) The date for achievement of final compliance with interim emission limitations.

§ 57.703 Compliance with the supplementary control system requirements.

This section applies to all nonferrous smelters applying for an NSO.

(a) *Operations of existing SCS.* Each NSO shall require the immediate operation of any existing supplementary control system or one which is under a schedule developed under an NSO issued during the first NSO period, and shall require the immediate assumption of liability for violations of the NAAQS at existing monitor sites provided the SCS system meets Subpart D requirements. Each NSO shall require that all the requirements of Subpart D be satisfied within 6 months of the effective date of the NSO where an existing SCS does not fully satisfy these requirements.

(b) *Compliance schedule where no SCS exists.* Where necessary, the NSO shall also require compliance with the requirements of Subpart D to be achieved according to the following schedule:

(1) Within 6 months after issuance of the NSO the smelter shall install all

operating elements of the system, begin operating the system, complete all other measures specified in its approved SCS development plan, and begin compliance with the requirements of § 57.404.

(2) Within 9 months thereafter the smelter shall submit the SCS Report, assume liability for all violations of the NAAQS within its designated liability area, and comply with all other requirements of Subpart D.

§ 57.704 Compliance with fugitive emission evaluation and control requirements.

This section applies only to smelters not required to submit SIP Compliance Schedules under § 57.705. Each NSO shall require that smelters which were issued NSOs during the first NSO period be in compliance with all fugitive emission control requirements under Subpart E immediately after issuance of the second period NSO.

(a) *Plan for fugitive emission control.* The NSO shall provide that within a 6 month period after the submission of the report on the fugitive emission control study required by § 57.502, the smelter owner shall submit to the issuing agency for its approval a proposed fugitive emission control plan, including increments of progress, for compliance with the requirements of §§ 57.501 and 57.503.

(b) *SCS Report.* If the fugitive emission control plan submitted under paragraph (a) of this section proposes to meet the requirements of §§ 57.501 and 57.503 through the additional use of a supplementary control system, the plan shall demonstrate that the use of supplementary controls at that smelter to prevent violations of the NAAQS resulting from fugitive emissions is practicable, adequate, reliable, and enforceable. The plan shall contain increments of progress providing for completion of the implementation of each additional measure, and for corresponding compliance with the requirements of paragraphs (b) and (c) of § 57.404, within four months of appproval of the plan by the issuing agency. The plan shall also provide that within three months after completion of implementation of those additional measures, the smelter shall fully comply with the requirements of §§ 57.401 and 57.501 (including the assumption of liability for violations of NAAQS within its designated liability area), and shall submit an additional SCS report for the approval of the issuing agency. This additional final report shall correspond to that submitted under § 57.405(b)(2), except that it need not contain the 3 month study described in § 57.405(b)(2)(iii).

(c) *NSO amendment.* The amendments of the NSO required under § 57.503 shall be effected by the issuing agency as follows:

(1) With respect to the additional use of SCS, upon approval or promulgation of the plan submitted under paragraph (a) of this section and upon approval or promulgation of the requirements for the system described in the additional SCS Report under paragraph (b) of this section;

(2) With respect to the additional use of engineering techniques, upon approval or promulgation of the compliance schedule required by paragraph (a) of this section.

§ 57.705 Contents of SIP compliance schedule required by § 57.201(d) (2) and (3).

This section applies to smelters which are required to submit a SIP Compliance Schedule as discussed below.

(a) Each SIP Compliance Schedule required by § 57.201(d) (2) and (3) must contain the following elements:

(1) Description of the overall design of the SO_2 control system(s) to be installed;

(2) Descriptions of specific process hardware to be used in achieving compliance with the SIP emission limitation including gas capacity values;

(3) The date by which contracts will be let or purchase orders issued to accomplish any necessary performance improvements;

(4) The date for initiating on-site construction or installation of necessary equipment;

(5) The date by which on-site construction or installation of equipment is to be completed;

(6) The date for achievement of final compliance with SIP emission limitations; and

(7) Any other measures necessary to assure compliance with all SIP rquirements as expeditiously as practicable.

(b) Operations of SCS. Smelters to which § 57.705 is applicable must comply with all elements of § 57.703.

Subpart H—Waiver of Interim Requirement for Use of Continuous Emission Reduction Technology

§ 57.801 Purpose and Scope.

(a) This subpart shall govern all proceedings for the waiver of the interim requirement that each NSO provide for the use of constant controls.

(b) In the absence of specific provisions in this subpart, and where appropriate, questions arising at any stage of the proceeding shall be resolved at the discretion of the Presiding Officer or the Administrator, as appropriate.

§ 57.802 Request for waiver.

(a) *General.* (1) Each smelter owner requesting a waiver shall complete, sign, and submit Appendix A (Test for Eligibility for Interim Waiver). Copies of Appendix A may be obtained from any EPA Regional Administrator, or from the Director, Stationary Source Compliance Division (EN–341), United States Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Claims of confidentiality shall be made as provided in § 57.203.

(2) The smelter owner shall append to the completed and signed Appendix A full copies of all documents, test results, studies, reports, scientific literature and assessments required by Appendix A. To the extent that the material consists of generally available published material, the smelter owner may cite to the material in lieu of appending it to Appendix A. The smelter owner shall specificially designate those portions of any documents relied upon and the facts or conclusions in Appendix A to which they relate.

(b) *Effect of submitting incomplete application.* (1) The Administrator, or a person designated by him to review applications for waivers, may advise the smelter owner in writing whenever he determines that additional information is needed in order to make the waiver eligibility determinations required by Section 119(d)(2) of the Act. The smelter owner shall promptly supply such information. All additional information requested under this paragraph and filed in the manner required by paragraph (d) shall be deemed part of Appendix A.

(2) Failure to comply with the requirements of paragraphs (a) and (b)(1) of this section shall be grounds for denial of the requested waiver.

(c) *Time for requesting waivers.* Any request for a waiver must be submitted to the Administrator by the smelter owner at the time of the initial application for an NSO from the State or the Administrator, as the case may be.

(d) *Submission of request.* A copy of Appendix A (plus attachments) which has been completed for the purpose of requesting a waiver of constant control requirements shall be filed with the Administrator, addressed as follows: Director, Stationary Source Compliance Division (EN–341), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, Attn: Confidential Information Unit.

(e) *Eligibility.* No smelter shall be eligible for consideration under this subpart unless no constant controls

were installed at that smelter as of August 7, 1977.

(f) *Criteria for Decision.* The Administrator shall grant or approve a waiver, whichever is appropriate, for any eligible smelter as to which he finds, in accordance with the methods and procedures specified in Appendix A, that:

(1) The sum of the present value of the smelter's future net cash flow (after installation of interim constant control equipment) plus its terminal value would be less than the smelter's liquidation (salvage) value; or

(2) The smelter's average variable costs at all relevant levels of production (after installation of interim constant control equipment) would exceed the weighted average price of smelter output for one year or more.

§ 57.803 Issuance of tentative determination; notice.

(a) *Tentative determination.* (1) The EPA staff shall formulate and prepare:

(i) A "Staff Computational Analysis," using the financial information submitted by the smelter owner under § 57.802 to evaluate the economic circumstances of the smelter for which the waiver is sought;

(ii) A tentative determination as to whether an interim requirement for the use of constant controls would be so costly as to necessitate permanent or prolonged temporary cessation of operations at the smelter for which the waiver is requested. The tentative determination shall contain a "Proposed Report and Findings" summarizing the conclusions reached in the Staff Computational Analysis, discussing the estimated cost of interim controls, and assessing the effect upon the smelter of requiring those controls. The tentative determination shall also contain a proposed recommendation that the waiver be granted or denied, based upon the Proposed Report and Findings, and stating any additional considerations supporting the proposed recommendation. This tentative determination shall be a public document.

(2) In preparing the Proposed Report and Findings, the EPA staff shall attempt to the maximum extent feasible to avoid revealing confidential information which, if revealed, might damage the legitimate business interests of the applicant. The preceding sentence notwithstanding, the tentative determination shall be accompanied by a listing of all materials considered by EPA staff in developing the tentative determination. Subject to the provisions of § 57.814(a), full copies of all such materials shall be included in the administrative record under § 57.814, except that, to the extent the material consists of published material which is generally available, full citations to that material may be given instead.

(b) *Public notice.* Public notice of EPA's tentative determination to grant or deny an application for a waiver shall be given by:

(1) Publication at least once in a daily newspaper of general circulation in the area in which the smelter is located; and

(2) Posting in the principal office of the municipality in which the smelter is located.

(c) *Individual notice.* Individual notice of EPA's tentative determination to grant or deny an application for a waiver shall be mailed to the smelter owner by certified mail, return receipt requested, and to the air pollution control agency for the State in which the smelter is located.

(d) *Request for individual notice.* EPA shall mail notice of its tentative determination to grant or deny an application for waiver to any person upon request. Each such request shall be submitted to the Administrator in writing, shall state that the request is for individual notice of tentative determination to grant or deny any application for a waiver under section 119(d) of the Clean Air Act, and shall describe the notice or types of notices desired (e.g., all notices, notices for a particular Region, notices for a particular State, notice for a particular city).

(e) *Form of notice.* The notice of tentative determination required to be distributed under paragraphs (b), (c), and (d) of this section shall include, in addition to any other materials, the following:

(1) A summary of the information contained in Appendix A;

(2) The tentative determination prepared under paragraph (a) of this section: Provided, that except in the case of the smelter owner, a summary of the basis for the grant or denial of the waiver may be provided in lieu of the formal determinations required by paragraph (a)(1) of this section;

(3) A brief description of the procedures set forth in § 57.804 for requesting a public hearing on the waiver request, including a statement that such request must be filed within 30 days of the date of the notice;

(4) A statement that written comments on the tentative determination submitted to EPA within 60 days of the date of the notice will be considered by EPA in making a final decision on the application; and

(5) The location of the administrative record and the location at which interested persons may obtain further information on the tentative determination, including a copy of the index to the record, the tentative determination prepared under paragraph (a) of this section, and any other nonconfidential record materials.

§ 57.804 Request for hearing; request to participate in hearing.

(a) *Request for hearing.* Within 30 days of the date of publication or receipt of the notice required by § 57.803, any person may request the Administrator to hold a hearing on the tentative determination by submitting a written request containing the following:

(1) Identification of the person requesting the hearing and his interest in the proceeding;

(2) A statement of any objections to the tentative determination; and

(3) A statement of the issues which such person proposes to raise for consideration at such hearing.

(b) *Grant or denial of hearing; notification.* Whenever (1) the Administrator has received a written request satisfying the requirements of paragraph (a) of this section which presents genuine issues as to the effect on the smelter of the requirement for use of constant controls, or (2) the Administrator determines in his discretion that a hearing is necessary or appropriate, the Administrator shall give written notice of his determination to each person requesting such hearing and the smelter owner, and shall provide public notice of his determination in accordance with § 57.803(b). If the Administrator determines that a request filed under paragraph (a) of this section does not comply with the requirements of paragraph (a) or does not present genuine issues, he shall given written notice of his decision to deny a hearing to the person requesting the hearing.

(c) *Form of notice of hearing.* Each notice of hearing disseminated under paragraph (b) of this section shall contain:

(1) A statement of the time and place of the hearing;

(2) A statement identifying the place at which the official record on the application for waiver is located, the hours during which it will be open for public inspection, and the documents contained in the record as of the date of the notice of hearing;

(3) The due date for filing a written request to participate in the hearing under paragraph (d) of this section;

(4) The due date for making written submissions under 57.805; and

(5) The name, address, and office telephone number of the Hearing Clerk for the hearing.

(d) *Request to participate in hearing.* Each person desiring to participate in any hearing granted under this section, including any person requesting such a hearing, shall file a written request to participate with the Hearing Clerk by the deadline set forth in the notice of hearing. The request shall include:

(1) A brief statement of the interest of the person in the proceeding;

(2) A brief outline of the points to be addressed;

(3) An estimate of the time required; and

(4) If the request is submitted by an organization, a nonbinding list of the persons to take part in the presentation. As soon as practicable, but in no event later than two weeks before the scheduled date of the hearing, the Hearing Clerk shall make available to the public and shall mail to each person who asked to participate in the hearing a hearing schedule.

(e) *Effect of denial of or absence of request for hearing.* If no request for a hearing is made under this section, or if all such requests are denied under paragraph (b) of this section, the tentative determination issued under § 57.803 shall be treated procedurally as if it were a recommended decision issued under § 57.811(b)(2), except that for purposes of §§ 57.812 and 57.813 the term "hearing participant" shall be construed to mean the smelter owner and any person who submitted comments under § 57.803(e)(4).

§ 57.805 Submission of written comments on tentative determination.

(2) *Main comments.* Each person who has filed a request to participate in the hearing shall file with the Hearing Clerk no later than 30 days before the scheduled start of the hearing (or such other date as may be set forth in the notice of hearing) any comments which he has on the request for waiver and EPA's tentative determination, based on information which is or reasonably could have been available to that person at the time.

(b) *Reply comments.* Not later than two weeks after a full transcript of the hearing becomes available (or such other date as may be set forth in the notice of hearing), each person who has filed a request to participate in the hearing shall file with the Hearing Clerk any comments he may have on:

(1) Written comments submitted by other participants pursuant to paragraph (a) of this section;

(2) Written comments submitted in response to the notice of hearing;

(3) Material in the hearing record; and

(4) Material which was not and could not reasonably have been available prior to the deadline for submission of main comments under paragraph (a) of this section.

(c) *Form of comments.* All comments should be submitted in quadruplicate and shall include any affidavits, studies, tests or other materials relied upon for making any factual statements in the comments.

(d) *Use of comments.* (1) Written comments filed under this section shall constitute the bulk of the evidence submitted at the hearing. Oral statements at the hearing should be brief, and restricted either to points that could not have been made in written comments, or to emphasizing points which are made in the comments, but which the participant believes can be more forcefully urged in the hearing context.

(2) Notwithstanding the foregoing, within two weeks prior to either deadline specified by paragraph (a) of this section for the filing of main comments, any person who has filed a request to participate in the hearing may file a request with the Presiding Officer to submit all or part of his main comments orally at the hearing in lieu of submitting written comments. The Presiding Officer shall, within one week, grant such request if he finds that such person will be prejudiced if he is required to submit such comments in written form.

§ 57.806 Presiding Officer.

(a) *Assignment of Presiding Officer.* (1) The Administrator shall, as soon as practicable after the granting of a request for hearing under § 57.803:

(i) Appoint a Presiding Officer to chair the hearing panel, who shall be either the Assistant Administrator for Air, Noise and Radiation or the Associate Administrator for Enforcement and General Counsel; or

(ii) Request that the Chief Administrative Law Judge assign an Administrative Law Judge as Presiding Officer. The Chief Administrative Law Judge shall thereupon make the assignment.

(2) If all parties to the hearing waive their right to have the Agency or an Administrative Law Judge preside at the hearing, the Administrator shall appoint an EPA employee having the qualifications of a Judicial Officer as defined in § 57.103 to serve as Presiding Officer.

(b) *Powers and duties of Presiding Officer.* It shall be the duty of the Presiding Officer to conduct a fair and impartial hearing, assure that the facts are fully elicited, and avoid delay. The Presiding Officer shall have authority to:

(1) Chair and conduct administrative hearings held under this subpart;

(2) Administer oaths and affirmations;

(3) Receive relevant evidence: Provided, that the administrative record, as defined in § 57.814, shall be received in evidence;

(4) Consider and rule upon motions, dispose of procedural requests, and issue all necessary orders;

(5) Hold conferences for the settlement or simplification of the issues or the expediting of the proceedings; and

(6) Do all other acts and take all measures necessary for the maintenance of order and for the efficient, fair and impartial conduct of proceedings under this subpart.

§ 57.807 Hearing.

(a) *Composition of hearing panel.* The Presiding Officer shall preside at the hearing held under this subpart. An EPA panel shall also take part in the hearing. In general, the membership of the panel shall consist of EPA employees having special expertise in areas related to the issues to be addressed at the hearing, including economists and engineers. For this reason, the membership of the panel may change as different issues are presented for discussion.

(b) *Additional hearing participants.* Either before or during the hearing, the Presiding Officer, after consultation with the panel, may request that a person not then scheduled to participate in the hearing (including an EPA employee or a person identified by any scheduled hearing participant as having knowledge concerning the issues raised for discussion at the hearing) make a presentation or make himself available for cross-examination at the hearing.

(c) *Questioning of hearing participants.* The panel members may question any person participating in the hearing. Cross-examination by persons other then panel members shall not be permitted at this stage of the proceeding except where the Presiding Officer determines, after consultation with the panel, that circumstances compel such cross-examination. However, persons in the hearing audience, including other hearing participants, may submit written questions to the Presiding Officer for the Presiding Officer to ask the participants, and the Presiding Officer may, after consultation with the panel, and in his sole discretion, ask these questions.

(d) *Submission of additional material.* Participants in the hearing shall submit for the hearing record such additional material as the hearing panel may request within 10 days following the

close of the hearing, or such other period of time as is ordered by the Presiding Officer. Participants may also submit additional information for the hearing record on their own accord within 10 days after the close of the hearing.

(e) *Transcript.* A verbatim transcript shall be made of the hearing.

§ 57.808 Opportunity for cross-examination.

(a) *Request for cross-examination.* After the close of the panel hearing conducted under this part, any participant in that hearing may submit a written request for cross-examination. The request shall be received by EPA within one week after a full transcript of the hearing becomes available and shall specify:

(1) The disputed issue(s) of material fact as to which cross-examination is requested. This shall include an explanation of why the questions at issue are factual, rather than of an analytical or policy nature; the extent to which they are in dispute in the light of the record made thus far, and the extent to which and why they can reasonably be considered material to the decision on the application for a waiver; and

(2) The person(s) the participant desires to cross-examine, and an estimate of the time necessary. This shall include a statement as to why the cross-examination requested can be expected to result in full and true disclosure resolving the issue of material fact involved.

(b) *Order granting or denying request for cross-examination.* As expeditiously as practicable after receipt of all requests for cross-examination under paragraph (a) of this section, the Presiding Officer, after consultation with the hearing panel, shall issue an order either granting or denying each such request, which shall be disseminated to all persons requesting cross-examination and all persons to be cross-examined. If any request for cross-examination is granted, the order shall specify:

(1) The issues as to which cross-examination is granted;

(2) The persons to be cross-examined on each issue;

(3) The persons allowed to conduct cross-examination;

(4) Time limits for the examination of witnesses; and

(5) The date, time and place of the supplementary hearing at which cross-examination shall take place. In issuing this ruling, the Presiding Officer may determine that one or more participants have the same or similar interests and that to prevent unduly repetitious cross-examination, they should be required to choose a single representative for purposes of cross-examination. In such a case, the order shall simply assign time for cross-examination by that single representative without identifying the representative further.

(c) *Supplementary hearing.* The Presiding Officer and at least one member of the original hearing panel shall preside at the supplementary hearing. During the course of the hearing, the Presiding Officer shall have authority to modify handy order issued under paragraph (b) of this section. A verbatim transcript shall be made of this hearing.

(d) *Alternatives to cross-examination.* (1) No later than the time set for requesting cross-examination, a hearing participant may request that alternative methods of clarifying the recorded (such as the submittal of additional written information) be used in lieu of or in addition to cross-examination. The Presiding Officer shall issue an order granting or denying such request at the time he issues (or would have issued) an order under paragraph (b) of this section. If the request is granted, the order shall specify the alternative provided and any other relevant information (e.g., the due date for submitting written information).

(2) In passing on any request for cross-examination submitted under paragraph (a) of this section, the Presiding Officer may, as a precondition to ruling on the merits of such request, require that alternative means of clarifying the record be used whether or not a request to do so has been made under the preceding paragraph. The person requesting cross-examination shall have one week to comment on the results of utilizing such alternative means, following which the Presiding Officer, as soon as practicable, shall issue an order granting or denying such person's request for cross-examination.

§ 57.809 Ex parte communications.

(a) *General.* (1) No interested person outside the Agency or member of the Agency trial staff shall make or knowingly cause to be made to any member of the decisional body an ex parte communication relevant to the merits of the proceedings. (2) No member of the decisional body shall make or knowingly cause to be made to any interested person outside the Agency or member of the Agency trial staff an ex parte communication relevant to the merits of the proceedings.

(b) *Effect of receipt of ex parte communication.* (1) A member of the decisional body who receives or who makes or knowingly causes to be made a communication prohibited by this subsection shall place in the record all written communications or memoranda stating the substance of all oral communications together with all written responses and memoranda stating the substance of all responses.

(2) Upon receipt by any member of the decisionmaking body of an ex parte communication knowingly made or knowingly caused to be made by a party or representative of a party in violation of this section, the person presiding at the stage of the hearing then in progress may, to the extent consistent with justice and the policy of the Clean Air Act, require the party to show cause why its claim or interest in the proceedings should not be dismissed, denied, disregarded, or otherwise adversely affected on account of such violation.

(c) *Definitions.* For purposes of this section, the following definitions shall apply:

(1) *Agency trial staff* means those Agency employees, whether temporary or permanent, who have been designated by the Agency as available to investigate, litigate, and present the evidence arguments and position ofthe Agency in the evidentiary hearing or non-adversary panel hearing. Appearance as a witness does not necessarily require a person to be designated as a member of the Agency trial staff;

(2) *Decisional body* means any Agency employee who is or may reasonably be expected to be involved in the decisional process of the proceeding including the Administrator, Judicial Officer, Presiding Officer, the Regional Administrator (if he does not designate himself as a member of the Agency trial staff), and any of their staff participating in the decisional process. In the case of a non-adversary panel hearing, the decisional body shall also include the panel members whether or not permanently employed by the Agency;

(3) *Ex parte communication* means any communication, written or oral, relating to the merits of the proceeding between the decisional body and an interested person outside the Agency or the Agency trial staff which was not originally filed or stated in the administrative record or in the hearing. Ex parte communications do not include:

(i) Communications between Agency employees other than between the Agency trial staff and the member of the decisional body;

(ii) Discussions between the decisional body and either:

(A) Interested persons outside the Agency, or;

(B) The Agency trial staff if all parties have received prior written notice of such proposed communications and have been given the opportunity to be present and participate therein.

(4) "Interested person outside the Agency" includes the smelter owner, any person who filed written comments in the proceeding, any person who requested the hearing, any person who requested to participate or intervene in the hearing, any participant or party in the hearing and any other interested person not employed by the Agency at the time of the communications, and the attorney of record for such persons.

§ 57.810 Filing of briefs, proposed findings, and proposed recommendations.

Unless otherwise ordered by the Presiding Officer, each hearing participant may, within 20 days after reply comments are submitted under § 57.805(b), or if a supplementary hearing for the purpose of cross-examination has been held under § 57.808(c), within 20 days after the transcript of such supplemental hearing becomes available or if alternative methods of clarifying the record have been used under § 57.808(d), within 20 days after the alternative methods have been employed, file with the Hearing Clerk and serve upon all other hearing participants proposed findings and proposed recommendations to replace in whole or in part the findings and recommendations contained in the tentative determination. Any such person may also file, at the same time, a brief in support of his proposals, together with references to relevant pages of transcript and to relevant exhibits. Within 10 days thereafter each participant may file a reply brief concerning alternative proposals. Oral argument may be held at the discretion of the Presiding Officer on motion of any hearing participant or sua sponte.

§ 57.811 Recommended decision.

As soon as practicable after the conclusion of the hearing, one or more responsible employees of the Agency shall evaluate the record for preparation of a recommended decision and shall prepare and file a recommended decision with the Hearing Clerk. The employee(s) preparing the decision will generally be members of the hearing panel and may include the Presiding Officer. Such employee(s) may consult with and receive assistance from any member of the hearing panel in drafting a recommended decision and may also delegate the preparation of the recommended decision to the panel or to any member or members of it. This decision shall contain the same elements as the tentative determination. After the recommended decision has been filed, the Hearing Clerk shall serve a copy of such decision on each hearing participant and upon the Administrator.

§ 57.812 Appeal from or review of recommended decision.

(a) *Exceptions.* (1) Within 20 days after service of the recommended decision, any hearing participant may take exception to any matter set forth in such decision or to any adverse order or ruling of the Presiding Officer prior to or during the hearing to which such participant objected, and may appeal such exceptions to the Administrator by filing them in writing with the Hearing Clerk. Such exceptions shall contain alternative findings and recommendations, together with references to the relevant pages of the record and recommended decision. A copy of each document taking exception to the recommended decision shall be served upon every other hearing participant. Within the same period of time each party filing exceptions shall file with the Administrator and shall serve upon all hearing participants a brief concerning each of the exceptions being appealed. Each brief shall include page references to the relevant portions of the record and to the recommended decision.

(2) Within 10 days of the service of exceptions and briefs under paragraph (a) (1) of this section, any hearing participant may file and serve a reply brief responding to exceptions or arguments raised by any other hearing participant together with references to the relevant portions of the record, recommended decision, or opposing brief. Reply briefs shall not, however, raise additional exceptions.

(b) *Sua sponte review by the Administrator.* Whenever the Administrator determines sua sponte to review a recommended decision, notice of such intention shall be served upon the parties by the Hearing Clerk within 30 days after the date of service of the recommended decision. Such notice shall include a statement of issues to be briefed by the hearing participants and a time schedule for the service and filing of briefs.

(c) *Scope of appeal or review.* The appeal of the recommended decision shall be limited to the issues raised by the appellant, except when the Administrator determines that additional issues should be briefed or argued. If the Administrator determines that briefing or argument of additional issues is warranted, all hearing participants shall be given reasonable written notice of such determination to permit preparation of adequate argument.

(d) *Argument before the Administrator.* The Administrator may, upon request by a party or sua sponte, set a matter for oral argument. The time and place for such oral argument shall be assigned after giving consideration to the convenience of the parties.

§ 57.813 Final decision.

(a) *After review.* As soon as practicable after all appeal or other review proceedings have been completed, the Administrator shall issue his final decision. Such a final decision shall include the same elements as the recommended decision, as well as any additional reasons supporting his decisions on exceptions filed by hearing participants. The final decision may accept or reject all or part of the recommended decision. The Administrator may consult with the Presiding Officer, members of the hearing panel or any other EPA employee in preparing his final decision. The Hearing Clerk shall file a copy of the decision on all hearing participants.

(b) *In the absence of review.* If no party appeals a recommended decision to the Administrator and if the Administrator does not review it sua sponte, he shall be deemed to have adopted the recommended decision as the final decision of the Agency upon the expiration of the time for filing any exceptions under § 57.812(a).

(c) *Timing of judicial review.* For purposes of judicial review, final Agency action on a request for a waiver of the interim requirement that each NSO provide for the use of constant controls shall not occur until EPA approves or disapproves the issuance of an NSO to the source requesting such a waiver.

§ 57.814 Administrative Record.

(a) *Establishment of record.* (1) Upon receipt of request for a waiver, an administrative record for that request shall be established, and a Record and Hearing Clerk appointed to supervise the filing of documents in the record and to carry out all other duties assigned to him under this subpart.

(2) All material required to be included in the record shall be added to the record as soon as feasible after its receipt by EPA. All material in the record shall be appropriately indexed. The Hearing Clerk shall make appropriate arrangements to allow members of the public to copy all

nonconfidential record materials during normal EPA business hours.

(3) Confidential record material shall be indexed under (a)(2) of this section. Confidential record material shall, however, be physically maintained in a separate location from public record material.

(4) Confidential record material shall consist of the following:

(i) Any material submitted pursuant to § 57.802 for which a proper claim of confidentiality has been made under section 114(c) of the Act and 40 CFR Part 2; and

(ii) The Staff Computational Analysis prepared under § 57.803.

(b) *Record for issuing tentative determination.* The administrative record for issuing the tentative determination required by § 57.803 shall consist of the material submitted under § 57.802 and any additional materials supporting the tentative determination.

(c) *Record for acting on requests for cross-examination.* The administrative record for acting on requests for cross-examination under § 57.808 shall consist of the record for issuing the tentative determination, all comments timely submitted under §§ 57.803 (e)(4) and 57.805, the transcript of the hearing, and any additional material timely submitted under § 57.807(d).

(d) *Record for preparation of recommended decision.* The administrative record for preparation of the recommended decision required by § 57.811 shall consist of the record for acting on requests for cross-examination, the transcript of any supplementary hearing held under § 57.808(c), any materials timely submitted in lieu of or in addition to cross-examination under § 57.808(d), and all briefs, proposed findings of fact and proposed recommendations timely submitted under § 57.810.

(e) *Record for issuance of final decision.* (1) Where no hearing has been held, the administrative record for issuance of the Administrator's final decision shall consist of the record for issuing the tentative determination, any comments timely submitted under § 57.803(e)(4), any briefs or reply briefs timely submitted under § 57.812 (a) through (c), and the transcript of any oral argument granted under § 57.812(d).

(2) Where a hearing has been held, the administrative record for issuance of the Administrator's final decision shall consist of the record of preparation of the recommended decision, any briefs or reply briefs submitted under § 57.812 (a) through (c), and the transcript of any oral argument granted under § 57.812(d).

§ 57.815 State notification.

The Administrator shall give notice of the final decision in writing to the air pollution control agency of the State in which the smelter is located.

§ 57.816 Effect of negative recommendation.

No waiver of the interim requirement for the use of constant controls shall be granted by the Administrator or a State in the absence of a positive recommendation by the Administrator that such a waiver be granted.

Appendix A—Primary Nonferrous Smelter Order (NSO) Application

Instructions

1. *General Instructions*

1.1 Purpose of the Application
1.2 NSO financial Tests
1.3 Confidentiality

2. *NSO Financial Reporting Overview*

2.1 Revenue and Cost Assignment
2.2 Transfer Prices on Affiliated Party Transactions
2.3 Forecasting Requirements
2.4 EPA Furnished Forecast Data
2.5 Applicant Generated Forecasts

D.2 Interim Controls Cost Forecast
D.3 Interim Controls Forecast Profit and Loss Summary
D.4 Interim Controls Sustaining Capital Investment Forecast
D.5 Cash Proceeds from Liquidation
D.6 Permanent Waiver from Interim Controls Test

1. General Instructions

1.1 *Purpose of the Application*

This application provides financial reporting schedules and the accompanying instructions for EPA's determination of eligibility for a nonferrous smelter order (NSO), and for a waiver of the interim constant controls requirement of an NSO. Although the determination of eligibility for an NSO is prerequisite for the determination of a waiver, Appendix A, as a matter of convenience to applicants, includes both the NSO and waiver tests and reporting schedules.

In order to support an NSO eligibility determination, the applicant must submit operating and financial data as specified by the schedules included in this application. Specific instructions for completing each schedule are provided in subsequent sections of the instructions. In general, applicants must provide:

(a) Annual income statements, balance sheets and supporting data covering the five most recent fiscal years for the smelter for which the NSO is requested.

(b) Forecasts of operating revenues, operating costs, net income from operations and capital investments for the firm's smelter operations subject to this application, on the basis of anticipated smelter operations without sulfur dioxide control facilities installed after 1977.

(c) Forecasts of operating revenues, operating costs, net income from operations and capital investments for the firm's smelter operations subject to this application, on the basis of anticipated smelter operations with expected additional sulfur dioxide control facilities required to comply with the smelter's SIP emission limitation.

(d) For smelters applying for a waiver of interim constant controls, forecasts of operating revenues, operating costs, and capital investment for the firm's smelter operations prepared on the basis of anticipated smelter operations with additional pollution control facilities required to comply with interim constant control requirements.

1.2 NSO Financial Tests

EPA will use separate tests to determine eligibility for an NSO and to evaluate applications for a waiver of the interim constant control requirement. The two tests for NSO eligibility employ a present value approach for determining the reasonable availability of constant control technology that will enable an applicant to achieve full compliance with its SIP sulfur dioxide emission limitation. The tests for the waiver of the interim constant control requirements employ variable costing and discounted cash flow standards for evaluating an applicant's economic

capability to implement those requirements.

1.2.1 *NSO Eligibility Tests.* Each applicant must establish that the system of production and/or constant control technology that will enable the smelter to achieve full compliance with its SIP SO_2 emission limitation standard is not reasonably available. An applicant will determine financial eligibility for an NSO by passing at least one of the following two tests.

(a) *Profit Protection Test.* The smelter will experience a reduction in pre-tax profits of 50 percent or more after undertaking the required installation of constant controls.

(b) *Rate of Return Test.* The smelter will earn a rate of return below the industry average cost of capital after undertaking the required installation of constant controls.

1.2.2 *Temporary Waiver from Interim Controls.* Applicants that do not have an existing constant controls system may apply for a waiver from requirements for the interim controls. Applicants will be eligible for a temporary waiver from the interim constant control requirement if they can establish pursuant to the procedures in this application that the imposition of such control requirements would economically necessitate closure of the smelter facility for a period of one year or longer. The economic justification for a non-permanent closure under this temporary waiver test is defined as a situation in which the smelter's projected operating revenues for one or more years during which the NSO is in effect are inadequate to cover variable operating costs anticipated after installing the required interim control technology. Temporary waivers will be granted for only the period of time over which applicants can establish an inability by the firm to cover its variable operating costs. Interim control waiver requests based on the smelter's projected inability to earn adequate income after installation of interim pollution control equipment will be subject to the permanent waiver test.

1.2.3 *Permanent Waiver from Interim Controls.* Applicants without an existing constant controls system will be eligible for a full waiver from the interim use of such controls if they can establish pursuant to the procedure in this application that an imposition of interim control requirements would necessitate permanent closure of the smelter. Economic justification for a permanent closure is defined as a situation in which the present value of future cash flows anticipated from the smelter after installing the required interim control technology is less than the smelter's current salvage value under an orderly plan of liquidation.

1.2.4 *EPA Contact for NSO Inquiries.* Inquiries concerning this portion of the requirements for NSO application should be addressed to Roy Rathbun, Environmental Protection Agency, EN 341, 401 M Street SW, Washington, D.C. 20460.

1.2.5 *Certification.* The NSO Certification Statement must be signed by an authorized officer of the applicant firm.

1.3 *Confidentiality*

Applicants may request that information contained in this application be treated as confidential. Agency regulations concerning claims of confidentiality of business information are contained in 40 CFR Part 2 Subpart B (41 FR 36902 *et seq.*, September 1, 1976, as amended by 43 FR 39997 *et seq.*, September 8, 1978). The regulations provide that a business may, if it desires, assert a business confidentiality claim covering part or all of the information furnished to EPA. The claim must be made at the same time the applicable information is submitted. The manner of asserting such claims is specified in 40 CFR 2.203(b). Information covered by such a claim will be handled by the Agency in accordance with procedures set forth in the Subpart B regulations. EPA will not disclose information on a business that has made a claim of confidentiality, except to the extent of and in accordance with 40 CFR Part 2, Subpart B. However, if no claim of confidentiality is made when information is furnished to EPA, the information may be made available to the public without notice to the business.

2. NSO Financial Reporting Overview

2.1 *Revenue and Cost Assignment.* The amounts assigned to operations of the smelter subject to this NSO application should include (1) revenues and costs directly attributable to the smelter's operating activities and (2) indirect operating costs shared with other segments of the firm to the extent that a specific causal and beneficial relationship can be identified for the allocation of such costs to the smelter. Do not allocate revenues and costs associated with central administrative activities for which specific causal and beneficial relationships to the activities of the smelter cannot be established. Nonallocable items include, but are not restricted to, amounts such as dividend and interest income on centrally administered protfolio investments, central corporate administrative office expenses and interest on long-term debt financing arrangements. Provide a detailed explanation of amounts classified as nontraceable on a separate schedule and attach as part of Exhibit B.

2.2 *Transfer Prices on Affiliated Party Transactions.* Certain transactions by the smelter subject to an NSO application may reflect sales to or purchases from "affiliated" customers or suppliers with whom the smelter has a common bond of ownership and/or managerial control In preparing this application, affiliated party transactions shall be defined as transactions with any entity that the firm, or its owners, controls directly or indirectly either through an ownership of 10 percent or more of the entity's voting interests or through an exercise of managerial responsibility. Applicants must attach as part of Exhibit B supporting schedules explaining the pricing policies established on affiliated party transactions incorporated in the financial reporting schedules.

Prices on inter-segment material and product transfers within a firm, or on external purchases from and sales to other affiliated suppliers and customers, may differ from the prices on comparable transactions with unaffiliated suppliers and customers. In this event, applicants also must present in the Exhibit B supporting schedules and incorporate in the NSO financial reporting schedules appropriate adjustments for restating affiliated party transactions. Affiliated party transactions must be restated at either (a) equivalent prices on comparable transactions with unaffiliated parties if such price quotations can be obtained or (b) prices that provide the selling entity with a normal profit margin above its cost of sales if a meaningful comparision with unaffiliated transaction prices cannot be established.

A "normal" profit margin is defined as the gross operating profit per dollar of operating revenue that will provide an average after-tax rate of return on permanent capital (total assets less current liabilities). This average rate of return is defined differently for the historical and forecast periods. The applicant must use a rate of return of 10.3 percent for the *historical* period. This figure is based on a historical average earned rate of return for the nonferrous metals industrry.[1] EPA may update this figure periodically. The updates will be available in the rulemaking docket or from the **INFORMATION CONTACT** noted in the **Federal Register**. For the *forecast* period,

[1] The derivation of this figure is explained in a memorandum to EPA in EPA Docket No. A-82-35.

the applicant must use a rate of return equal to the current weighted average cost of capital for the nonferrous metals industry, as computed in Section 2.6.

Forecast smelting charges for integrated smelters can be computed from forecast market smelting charges. Integrated copper smelters must use as the basis of their forecast revenues the forecast copper smelting charges provided by EPA, adjusted as described in Section 2.4.1. An applicant may petition EPA to accept other forecasts, providing the forecast methodology is fully documented as part of Exhibit B.

2.3 *Forecasting Requirements.* NSO applicants must provide the Agency with financial forecasts in Schedules B.1 through B.6 and C.1 through C.2. Applicants requesting either a temporary or permanent waiver from interim constant control requirements also must provide an additional set of financial forecasts in Schedules D.1 through D.4.

2.3.1 *Forecast Period.* The forecast period must include at least two full years following completion and startup of the required pollution control system. The forecast period shall be from 1983 through 1989 for an NSO application filed in 1983. If an application is filed in a later year, the 1983 through 1989 period should be adjusted accordingly. All references in this Appendix to the period 1983 through 1989 should be interpreted accordingly.

2.3.2 *Forecast Adjustments by Control Case.* Some line items that have the same title in several schedules may contain different information because they are based on different assumptions regarding pollution controls. Production interruptions or curtailments due to the installation of pollution control facilities may require adjustment to certain revenue and cost estimates in the respective control cases. For example, production curtailments associated with supplementary control systems may be the basis for the pre-control case, yet are eliminated when constant controls replace supplementary control systems in the constant controls case. The application of pollution control techniques that involve process changes in the smelter's operations (e.g., conversion to flash smelting) also may require specific forecasts by applicants of associated impacts on incremental operating revenues and costs.

2.3.3 *Nominal Dollar Basis.* Applicants must make their financial forecasts in terms of nominal dollars. Forecasts of selected parameters provided by EPA will furnish guidelines to an applicant in preparing the required cost and revenue estimates. In particular, copper smelting charges provided in nominal-dollar terms must be used directly by the applicant as given; i.e., the stipulated charge estimates should not be inflated.

2.3.4 *Tolling Service Equivalent Basis.* Applicants must express all revenue forecasts on a tolling service equivalent basis. Thus, forecast revenues are computed as the product of the forecast quantity of processed concentrate, the forecast average product grade of the concentrate (the percent of metal in the concentrate), and the forecast smelting charge. Smelters that are not tolling smelters and that do not use the copper smelting charges provided by EPA (as explained in Section 2.4.1) can forecast a smelting charge from forecast product grade of the concentrate, percent recovery, and product and concentrate prices. The forecast prices and derivation of the smelting charge must be fully documented in Exhibit B.

2.4 *EPA-Furnished Forecast Data.* In making projections for the period 1983 through 1989, applicants must, except as noted below, use the indices provided by EPA. The table below presents yearly values for each index (expressed as annual percentage rates of change) to be used by smelters applying for an NSO before January 1, 1984. Those applying on or after January 1, 1984, may obtain updates from EPA which are available in the rulemaking docket or from the **INFORMATION CONTACT** noted in the **Federal Register.**

	1983	1984	1985	1986	1987	1988	1989
Copper smelting charge * (cents per pound)	12.0	14.7	15.0	16.6	16.1	16.2	16.4
Annual percentage rates of change:							
Wages	5.9	6.3	6.6	6.9	7.1	7.3	7.4
Energy prices:							
Electricity	7.0	11.0	10.2	7.5	7.8	8.0	7.4
Natural gas	18.0	12.7	14.6	8.7	9.6	10.4	11.0
Coal	5.7	8.6	9.3	9.5	10.8	10.9	11.2
Fuel oil	0.9	5.7	7.7	9.6	9.8	10.4	11.7
GNP price deflator	5.2	5.7	6.2	6.2	6.2	6.3	6.3

* Reference charge for calculating smelter-specific copper smelting charges as described in Section 2.4.1.

2.4.1 *Copper smelting charge.* EPA will supply a forecast of reference copper smelting charges. These charges, which are f.o.b. U.S. mine, are based on an estimate of export smelting charges and on the differential value of copper in the U.S. and the world market. They must be used in forecasting unaffiliated party revenues for the period following the expiration of existing contracts and in forecasting affiliated party revenues for the entire forecast period. The applicant may petition EPA to accept its own smelting charge forecast for the post-contract period, provided that such forecast is fully documented and substantiated as part of Exhibit B.

The EPA forecast export charge represents the world market copper smelting charge with copper valued at the London Metal Exchange (LME) copper price. This charge serves as the reference charge for the applicant copper smelter in calculating its smelting charges. Applicant copper smelters must derive their smelting charges from this world market charge as described in paragraph (a) below.

The applicant may adjust the derived smelter-specific smelting charge to account for other factors, provided the adjustments are fully documented as part of Exhibit B. An example of such a factor is the unit deduction for metallurgical losses in smelting. Adjustment for this factor is discussed in paragraph (b) below.

(a) *The derivation of a smelter-specific smelting charge from the world market charge* is based on assumptions regarding transportation costs and the U.S. producer-world copper price differential. The EPA forecast export charge is the forecast smelting charge available at a Japanese smelter, with copper valued at the London Metal Exchange (LME) copper price. The charge includes no freight costs, which must be paid by the mine. A U.S. smelter determines its smelting charge to a mine by meeting the combined world market smelting charge, adjusted to reflect copper valued at the U.S. producer price, and the transportation charge from the mine to the Japanese smelter. This combined price is the highest that a mine is willing to pay for smelting.

The smelter's net smelting charge is equal to the combined world smelting charge, adjusted to the U.S. producer price for copper (i.e., the export forecast charge plus the U.S. producer price premium), and the transportation cost between the mine and a Far East smelter, minus the cost of transporting the concentrate between the mine and the applicant smelter.

The applicant smelter's net smelting charge for concentrate from an individual mine is computed by first adding the U.S. producer price-LME world price differential to the EPA-supplied forecast. The cost of

transporting copper from the U.S. mine to the Far East is then added to this figure. The net smelting charge is obtained by subtracting from this total the cost of transporting copper from the mine to the applicant smelter.

In making these calculations, an applicant applying during 1983 must use a 3 cent per pound U.S. producer price premium (relative to the LME price). It must use a 11.1 cent per pound (1982 dollars) freight cost between an Arizona mine and the Far East. If used, this freight cost must be converted to nominal dollars of the respective forecast years by applying the EPA-provided GNP price deflator. Updates of the producer price premium and the freight cost will be available in the rulemaking docket or from the **INFORMATION CONTACT** noted in the **Federal Register**. The applicant may substitute its own forecasts of these values if it can substantiate such forecasts. All supporting documentation for such applicant-supplied forecasts must be supplied in Exhibit B. The applicant must also supply (and document in Exhibit B) an estimate of the transportation charge from mine to smelter and, for a non-Arizona mine, an estimate of the freight charges from that mine to the Far East.

The following two representative examples illustrate this methodology for making the transportation and U.S. producer price premium adjustment.

(1) The applicant smelter, located in Arizona, obtains concentrate from an adjacent mine. The freight charge from mine to smelter is zero. The mine is willing to pay the applicant smelter an amount no higher than the sum of the world market smelting charge (adjusted for the copper value differential) and the transportation cost of shipping copper from the mine to the Far East. This combined cost is the net charge received by the applicant smelter. If the export smelting charge is 12 cents per pound, the applicant smelter would calculate a net smelting charge equal to 26.1 cents: 12 cents plus 3 cents (for the U.S. producer price premium) plus 11.1 cents (for the freight cost between the mine and the Far East).

(2) The applicant smelter obtains concentrate from a non-adjacent mine. The mine will pay a charge no higher than the total market smelting charge, valued at the U.S. producer price, and the transportation costs between the mine and a Far East smelter. The applicant's net smelting charge is equal to this combined cost minus the transportation costs for shipping the concentrate between mine and applicant smelter.

Suppose that the mine to Far East freight charge is 13 cents per pound and the mine to applicant smelter freight charge is 4 cents per pound. If the export smelting charge is 12 cents per pound, the net smelting charge is equal to 24 cents per pound: 12 cents plus 3 cents (for the U.S. producer price premium) plus 13 cents (for the freight cost to the Far East) minus 4 cents (for the freight cost to the applicant smelter).

(b) *The EPA forecast charges are based on a one unit deduction for metallurgical losses.* This means that if a concentrate grades 25 percent copper, the mine is only credited with 24 percent for metal return. The one unit deduction on 25 percent concentrate is equivalent to a 96 percent payment for contained copper. Should a smelter recover less than 96 percent, its revenue would be less than the EPA forecast smelting charge. Should a smelter recover more than 96 percent, its revenue would be greater than the EPA forecast smelting charge.

2.4.2 *Indices (Annual Percentage Changes).* These indices, which are expressed as annual percentage rate changes in price, must be used only for estimating the rate of price increases for the forecast period following the expiration of the applicant's current contracts. Where contracts expire during the calendar year, prices should be calculated by rounding to the nearest quarter and interpolating to the next calendar year if necessary. The applicant may petition EPA to accept another projection for the forecast period following the expiration of current contracts, providing the projection is fully documented as part of Exhibit B.

The wage indices are to be applied to wages paid to manufacturing labor. The energy price indices are to be applied to prices of the respective energy products. The GNP price deflators are to be applied to prices for non-metal, non-labor, and non-energy inputs.

2.5 *Applicant-Generated Forecasts.* Within the specified limitations, applicants may petition EPA to accept a method of forecasting smelting charges and by-product, co-product and other prices. The method selected must be explained and unit prices or cost provided where applicable. The forecast elements must be compatible with an applicant's historical cost and revenue elements to permit direct comparisons of historical and forecast data. Applicants must attach as part of Exhibit B appropriate schedules explaining variances between forecast and historical unit costs for the smelter.

To the maximum extent practicable, by-product, co-product and (when applicable) unaffiliated smelting charges must be stated at market prices adjusted to f.o.b. smelter. Adjustments of these pricing bases must be made to reflect differences in grades and types of production. All adjustments must be consistent with expected sales, grades and types of concentrate processed. Applicants must attach as part of Exhibit B schedules describing and explaining the methods used to forecast these revenue items and the adjustments required for these revenue forecasts.

Applicants must explain fully any changes from the historical data that are required to forecast labor productivity, ore-concentrate grade and composition, materials and energy consumption per unit of output, yield rates and other physical input/output relationships.

Existing contractual terms must be used in forecasting those sales or input costs or prices to which the applicant is committed by contracts. The use of contract-dictated prices must be disclosed and supported by attaching as part of Exhibit B the terms and duration of labor and other supplier arrangements.

Cost of compliance estimates need not be to the accuracy of final design/bid estimates; feasibility grade estimates will be acceptable. Updated cost of compliance estimates used in internal five year plans or specially prepared estimates of costs of compliance will generally be satisfactory.

2.6 *Weighted Average Cost of Capital for Nonferrous Metal Producers.* The industry average cost of capital is a weighted average of the rates of return for equity and debt. Its components are the interest rate and the return on equity specific to the nonferrous metals industry.

2.6.1 *Computation.*[2] The applicant must compute the cost of capital according to the following formula:

$$R = (0.65 \times E) + (0.182 \times I)$$

where

R = weighted average cost of capital
E = return on equity
I = interest rate.

The components are calculated as follows:

(a) *Return on equity for the nonferrous metals industry.* The 20 year Treasury bond yield to maturity plus a risk premium of 7.75 percent.

(b) *Interest Rate.* 20 year Treasury bond yield to maturity plus a risk premium of 3.0 percent.

[2] The derivation of the formula and the basis of the parameters are explained in a memorandum to EPA in EPA Docket No. A-82-35.

(c) *Source of the 20 Year Treasury bond yield. Federal Reserve Bulletin,* most recent monthly issue. Use the average yield for the most recent full month.

2.6.2 *Discount Factor.* The discount factor corresponding to the weighted average cost of capital for any forecast year is computed according to the following equation:

$$DF = \frac{1}{(1+R)^N}$$

where
DF = discount factor
R = weighted average cost of capital
N = the number of years in the future (e.g., for the applicant applying in 1983, N = 2 for the forecast year 1984).

The horizon value, which is described in Section 2.7, is computed as of 1989, the end of the detailed forecast period. The discount factor to be applied to the horizon value is the same as for any other 1989 figure. For example, if the application is made in 1983, the value of N is 7.

2.7 *Horizon Value.* The horizon value is the present value of a stream of cash flows or net income for 15 years beyond the last forecast year. Applicants must compute the horizon value by capitalizing the average forecast value of the last two forecast years using the current real weighted cost of capital. The line item instructions for schedules having a horizon value entry will specify the values to be capitalized.

The applicant averages the values of the last two years after expressing both values in terms of the last year's dollars. The two-year average value is then multiplied by 9.6. This is the factor associated with capitalizing a 15 year value stream at the current *real* weighted cost of capital of 6.2 percent.

2.8 Data Entry

2.8.1 *Rounding.* All amounts (including both dollar values and physical units) reported in the schedules and exhibits accompanying this application must be rounded to the nearest thousand and expressed in thousands of dollars or units unless otherwise indicated in the instructions.

2.8.2 *Estimates.* Where an applicant's records cannot produce the specific data required by this application, the use of estimates will be allowed if a meaningful estimate can be made without significant distortion of the reported results. Data estimates must be supported by attaching on a separate sheet of paper as a part of Exhibit B an explanation identifying where such estimates are used and showing explicitly how the estimates were made.

2.8.3 *Missing Data.* Applicants must provide, where applicable, all operating and financial data requested by this application. Only substantially complete applications can be accepted for processing by the Agency. Questions concerning data entries for which information is not provided by or cannot reasonably be estimated from the applicant's existing accounting records should be addressed to the EPA Contact for NSO Inquiries.

2.8.4 *Historical Period.* The annual data requested in the historical schedules, Schedules A.1 through A.4, must be reported for each of the five fiscal years immediately preceding the year in which this application is filed. The historical period shall be from fiscal years 1978 through 1982 for an NSO application filed in 1983. If an application is filed in a later year, the references in this Appendix to the period 1978 through 1082 should be interpreted accordingly.

2.9 Use of Schedules

All applicants must complete Schedules A.1 through A.4, which record historical revenues, cost, and capital investment data. These schedules will be used by EPA to assist in evaluating forecast data. Completion of the remaining schedules depends on the test required of the applicant.

2.9.1 *NSO Eligibility.* An NSO applicant must pass one of the following two tests and complete the corresponding schedules.

(a) *Profit Protection Test.* The applicant must complete Schedules B.1 through B.7 to determine eligibility under the Profit Protection Test. Schedules B.1 and B.2 report the base case (without constant controls) revenue and cost forecast, respectively, and Schedule B.3 summarizes Schedules B.1 and B.2. Base case production forecasts should reflect any production curtailments associated with interim controls currently (preforecast) installed on smelters. Schedules B.4 and B.5 report the revenue and cost forecast, respectively, for the constant controls case, and Schedule B.6 summarizes Schedules B.4 and B.5 for the Profit Protection Test.

Schedule B.7 presents the calculations for the Profit Protection Test. The applicant enters the forecast profits from Schedules B.3 and B.6. The present value of the forecast profits is then computed for each case. If the present value of forecast pre-tax profits with constant controls is less than 50 percent of the present value of forecast pre-tax profits without controls (base case) the smelter passes the test and is eligible for an NSO. The smelter also passes the test if the present value of forecast pre-tax profits without controls (base case) is negative.

(b) *Rate of Return Test.* The applicant must complete Schedules B.4, B.5, and C.1 through C.3 to determine eligibility under the Rate of Return Test. Schedules B.4 and B.5 report the revenue and cost forecast, respectively, for the constant controls case, and Schedule C.1 summarizes Schedules B.4 and B.5 for the Rate of Return Test. Schedule C.2 reports forecast sustaining capital investment for the constant controls case.

Schedule C.3 presents the calculations for the Rate of Return Test. In Schedule C.3, the applicant reports the forecast cash flows from Schedules C.1 and C.2, computes their present value, and subtracts the value of invested capital (taken from Schedule A.4) to yield net present value. If the net present value is less than zero, the smelter passes the test and is eligible to receive an NSO. This result indicates that the smelter is expected to earn a rate of return less than the industry average cost of capital.

2.9.2 *Interim Control Waivers.* An applicant for a waiver from interim controls must complete either a portion or all of Schedules D.1 through D.6, depending on whether the application is for a temporary or permanent waiver.

(a) *Temporary Waiver from Interim Controls Test.* The applicant must complete Schedules D.1 through D.3 to determine eligibility for a temporary waiver from interim controls. Schedules D.1 and D.2 report forecast revenue and cost data for the interim controls case. Schedule D.3 summarizes Schedules D.1 and D.2 and calculates gross operating profit. If gross operating profit is negative for any year during which the NSO is in effect, the applicant is eligible for a temporary waiver.

(b) *Permanent Waiver from Interim Controls Test.* The applicant must complete Schedules D.1 through D.6. Schedules D.1 and D.2 report forecast revenue and cost data for the interim controls case. Schedule D.3 summarizes Schedules D.1 and D.2, and Schedule D.4 reports forecast sustaining capital under the interim controls case. Schedule D.5 reports cash proceeds from liquidation.

Schedule D.6 presents the calculations for the permanent waiver test. In Schedule D.6, the applicant computes net present value by subtracting the current salvage value (taken from Schedule D.5) from the present value of

net cash flow projections (taken from Schedules D.3 and D.4). If this net present value is negative, the applicant is eligible for a permanent waiver.

2.10 Use of Exhibits

In addition to data required by the schedules included in this application, the following information must be attached as exhibits.

2.10.1 *Exhibit A. Background information on the firm's organizational structure and its associated accounting and financial reporting systems for primary nonferrous activities.* This information must include, where applicable, the firm's:

(a) Operating association with and ownership control in consolidated subsidiaries, unconsolidated subsidiaries, joint ventures and other affiliated companies.

(b) Organizational subdivision of its primary nonferrous activities into profit centers, cost centers and/or related financial reporting entities employed to control the operation of its mines, concentrators, smelters, refineries and other associated facilities.

(c) Material and product flows among the smelter subject to this NSO application, other integrated facilities and its affiliated suppliers and/or customers. In the case of integrated facilities, applicants must provide process flow diagrams depicting the operating interrelationships among its mines, concentrators, smelters, refineries and other integrated facilities. For both integrated and nonintegrated facilities, applicants also must describe the proportion contributed to its primary nonferrous activities by material purchases from and product sales to affiliated suppliers.

(d) Annual operating capacity over the five most recent fiscal years for the smelter subject to this application and the firm's other nonferrous facilities. Operating capacity must be defined in terms of the total quantity of throughput that could have been processed with the available facilities after giving appropriate allowance to normal downtime requirements for maintenance and repairs. Operating capacity data also must consider both capacity balancing requirements among processing steps and annual processing yield rates attainable for each facility.

(e) Weighted average analysis of concentrates processed and tonnage produced annually over each of the five most recent fiscal years by the smelter subject to this application. The operators of integrated facilities also must provide annual data over the five-year period on both the sources of and a weighted average analysis of concentrates and ores processed and tonnage produced by individual profit centers.

(f) Accounting system and policies for recording investment expenditures, operating revenues, operating costs and income taxes associated with its primary nonferrous activities. Applicants also must provide a complete description of allocation techniques employed for assigning investments, revenues, costs and taxes to individual profit, cost or departmental centers for which costs are accumulated. Applicants must further indicate the relationship of cost and/or departmental accounting entities to the firm's established profit centers.

(g) Annual and five-year operating and capital expenditure plans (or budgets) by individual nonferrous profit center. These documents must include previous plans prepared for the five preceding fiscal years as well as the current one-year and five-year operating and capital expenditure plans. At least the current one-year and five-year plans must provide a specific breakdown of investment expenditures and operating costs associated with the operation and maintenance of each profit center's existing and proposed pollution control facilities.

2.10.2 *Exhibit B. Supplemental description and explanation of items appearing in the financial reporting schedules.* Other parts of Section 2 and the detailed instructions for the Schedules specify the information required in Exhibit B.

2.10.3 *Exhibit C. Financial data documentation.* Applicants must document annual balance sheet, income statement and supporting data reported for the firm's preceding five fiscal years or for that portion of the past five years during which the firm engaged in smelter operations. This documentation must be provided by attaching to the application:

(a) Sec. 10–K reports filed by the parent corporation and its unconsolidated subsidiaries for each of the proceding five fiscal years.

(b) Certified financial statements prepared (a) on a consolidated basis for the parent corporation and its consolidated subsidiaries and (b) for the firm's unconsolidated subsidiaries and affiliates. This requirement may be omitted for those years in which Sec. 10–K reports have been attached to this Exhibit.

(c) Business Segment Information reports filed with the Securities and Exchange Commission by the firm and its unconsolidated subsidiaries for each of the preceding five years (as available).

Detailed Instructions for Each Schedule

Schedule A.1—Historical Revenue Data

General

Use Schedule A.1 to report annual historical revenue data for fiscal years 1978 through 1982. Revenues include product sales and associated operating revenues, net of returns and allowances, from smelter sales and/or transfers of copper, lead, zinc and molybdenum or other nonferrous metal products and tolling services to both unaffiliated and affiliated customers. The line items in Schedule A.1 are explained in the following instructions.

Lines 01, 14, 27 and 40—Primary Nonferrous product Sales. Report for each year the total quantity of copper, lead, zinc and molybdenum or other nonferrous metal product sales.

Lines 02, 15, 28 and 41—Unaffiliated Customer Sales. Report for each year the respective quantities of copper, lead, zinc and molybdenum or other nonferrous metal product sales to unaffiliated customers.

Lines 03, 16, 29 and 42—Unaffiliated Customer Revenues. Report for each year the total operating revenues derived from smelter sales of copper, lead, zinc and molybdenum or other nonferrous metals to unaffiliated customers.

Lines 04, 17, 30 and 43—Unaffiliated Customer Prices. Report for each year the average unit price received on smelter sales of copper, lead, zinc and molybdenum or other nonferrous metals to unaffiliated customers. The prices are computed as operating revenues reported on Lines 03, 16, 29 and 42 divided by the quantities reported on lines 02 15, 28 and 41, respectively.

Lines 05, 18, 31 and 44—Average Product Quality Grade. Report for each year the average quality rating assigned to copper, lead, zinc and molybdenum or other nonferrous metal products purchased by the smelter's unaffiliated customers.

Lines 06, 19, 32 and 45—Affiliated Customer Sales. Report for each year the respective quantities of copper, lead, zinc and molybdenum or other nonferrous metal product sales to affiliated customers.

Lines 07, 20, 33 and 46—Affiliated Customer Revenues. Report for each year the total operating revenues derived from smelter sales of copper, lead, zinc and molybdenum or other nonferrous metals to affiliated customers. These revenues should be stated at prices equivalent to those received on comparable sales to unaffiliated customers as described in

Section 2.2. Attach as part of Exhibit B an explanation of the methodology used to state affiliated customer revenues.

Lines 08, 21, 34 and 47—Affiliated Customer Prices. Report for each year the average unit price received on smelter sales of copper, lead, zinc and molybdenum or othr nonferrous metals to affiliated customers. The prices are computed as operating revenues reported on Lines 07, 20, 33 and 46 divided by the quantities reported on Lines 06, 19, 32 and 45, respectively.

Lines 09, 22, 35 and 48—Average Product Quality Grade. Report for each year the average quality rating assigned to copper, lead, zinc and molybdenum or other nonferrous metal products purchased by the smelter's affiliated customers.

Lines 10, 23, 36 and 49—Total Primary Product Revenues. Report for each year total operating revenues derived from the smelter's sales to unaffiliated and affiliated customers of copper (Lines 03 + 07), lead (Lines 16 +20), zinc (Lines 29 + 33) and molybdenum or other nonferrous metals (Lines 42 + 46).

Lines 11, 24, 37 and 50—Transfer Price Adjustments. Report for each year operating revenue adjustments required to equate affiliated customer transfer prices with unaffiliated customer market prices on smelter sales of copper, lead, zinc and molybdenum or other nonferrous metals. Attach as part of Exhibit B an explanation of the method used for restating transfer prices where such adjustments are necessary.

Lines 12, 25, 38 and 51—Other Revenue Adjustments. Report for each year sales returns and allowances and other adjustments applicable to the smelter's revenues derived from copper, lead, zinc and molybdenum or other nonferrous metal product sales. Attach as part of Exhibit B a schedule reporting the types and amounts of such adjustments.

Lines 13, 26, 39 and 52—Adjusted Product Revenues. Enter for each year the sums of Lines 10 through 12 for adjusted copper sales (Line 13), Lines 23 through 25 for adjusted lead sales (Line 26), Lines 36 through 38 for adjusted zinc sales (Line 39) and Lines 49 through 51 for adjusted molybdenum or other nonferrous metal sales (Line 52).

Line 53—Primary Metal Revenues. Enter for each year the sum of Lines 13, 26, 39 and 52.

Line 54—Toll Concentrates Processed. Report for each year the total quantity of toll concentrates processed.

Lines 55 to 58—Customer Toll Revenues. Report for each year the quantity of toll concentrates processed for unaffiliated customers (Line 55), total operating revenues derived from this processing (Line 56), average price charged per ton of concentrate processed (Line 57=Line 56/55) and the average quality rating assigned to toll concentrates processed for unaffiliated customers (Line 58).

Lines 59 to 62—Affiliated Customer Toll Revenues. Report for each year the quantity of toll concentrates processed for affiliated customers (Line 59), total operating revenues derived from such processing (Line 60), average price charged per ton of concentrate processed (Line 61=Line 60/59) and the average quality rating (Line 62) assigned to toll concentrates processed for affiliated customers.

Line 63—Tolling Service Revenues. Enter for each year the total of amounts reported on Lines 56 and 60.

Line 64—Transfer Price Adjustments. Report for each year operating revenue adjustments required to equate affiliated customer transfer prices with market prices charged to unaffiliated customers on the smelter's tolling services. Attach as part of Exhibit B an explanation of the method used for restating transfer prices where such adjustments are necessary.

Line 65—Other Revenue Adjustments. Report for each year other adjustments applicable to the smelter's tolling service revenues. Attach as part of Exhibit B a schedule reporting the types and amounts of such adjustments.

Line 66—Adjusted Tolling Service Revenues. Enter for each year the total of Lines 63 through 65.

Line 67—Co-Product Revenues. Report for each year the net revenues from sales of co-products derived from the smelter's operations. Attach as part of Exhibit B a schedule showing by individual type of co-product, the quantity produced and sold, market price per unit of sales and total revenues derived from the co-product sales.

Line 68—Pollution Control By-product Revenues. Report for each year revenues from the sale of by-products derived from operation of the smelter's pollution control facilities. Attach as part of Exhibit B a schedule showing by type of by-product produced, the quantity of output, market price received per unit of output sold and total revenue derived from the by-product sales.

Line 69—Other By-product Revenues. Report for each year revenues from the sales of gold, silver and other by-products derived from the smelter's operations. Attach as part of Exhibit B a schedule providing additional documentation as specified in the instruction for Line 68.

Line 70—Total Co-product and By-product Revenues. Enter for each year the total of Lines 67 through 69.

Schedule A.2—Historical Cost Data

General

Use Schedule A.2 to report annual historical cost and input quantities for smelter operations for fiscal years 1978 through 1982. The line items in Schedule A.2 are explained in the following instructions.

Line 01—Total Quantity Purchased Report for each year the total quantity of concentrates purchased by the smelter. This will be the sum of Lines 02 and 06. Do not include the quantity of toll concentrates.

Line 02—Quantity Purchased. Report for each year the total quantity of concentrates purchased from unaffiliated suppliers by the smelter. Attach as a part of Exhibit B a description of the types and grades of these concentrates. Do not include the quantity of toll concentrates.

Line 03—Concentrate Cost. Report for each year the outlays paid to unaffiliated suppliers for concentrates. Attach as part of Exhibit B an explanation of the method(s) used in determining these outlays and relationship between concentrate prices and the types and grades of concentrates purchased from unaffiliated suppliers.

Line 04—Average Unit Price. Report for each year the average unit price paid for purchases of concentrates from unaffiliated suppliers. Generally, this value will be equivalent to Line 03 divided by Line 02. If this equivalency does not hold, attach as a part of Exhibit B an explanation of the variance.

Line 05—Average Concentrate Grade. Report for each year the average concentrate grade of concentrates purchased from unaffiliated suppliers. Attach as part of Exhibit B an explanation of this average. The average should correspond to the average price reported in Line 04.

Line 06—Quantity Purchased. Report for each year the total quantity of concentrates purchased from affiliated suppliers by the smelter. Attach as part of Exhibit B a description of the types and grades of these concentrates. Do not include the quantity of toll concentrates.

Line 07—Concentrate Cost. Report for each year the actual outlays paid to affiliated suppliers for concentrates. Attach as part of Exhibit B an explanation of the method(s) used in determining these outlays and relationship between concentrate prices and the types and grades of concentrates purchased from affiliated suppliers. Do not reflect any adjustments to market prices here.

Line 08—Average Unit Price. Report for each year the average unit price paid for purchases of concentrates from affiliated suppliers. Generally, this value will be equivalent to Line 07 divided by Line 06. If this equivalency does not hold, attach as part of Exhibit B an explanation of the variance.

Line 09—Average Concentrate Grade. Report for each year the average concentrate grade of concentrates purchased from affiliated suppliers. Attach as part of Exhibit B an explanation of this average. The average should correspond to the average price reported in Line 08.

Line 10—Total Concentrate Cost. Enter for each year the sum of Lines 03 and 07.

Line 11—Transfer Price Adjustments. Enter for each year the amounts required to adjust outlays paid to affiliated suppliers to market value. Refer to Section 2.2 for instructions on the restatement of affiliated party transactions. Attach as part of Exhibit B a description and the computations of any required cost adjustments.

Line 12—Other Cost Adjustments. Enter for each year the amounts of any other cost adjustments required such as freight or allowances. Attach as part of Exhibit B the identification and the derivation of these adjustments.

Line 13—Adjusted Concentrate Cost. Enter for each year the adjusted concentrate cost reflecting the adjustments reported in Lines 11 and 12.

Line 14—Direct Labor Hours. Report for each year the quantity of direct labor hours required to support the processing levels previously reported. Attach as part of Exhibit B an explanation of the labor productivity factors involved.

Line 15—Average Hourly Wage Rate. Report for each year the average wage rate paid per unit of direct labor input. Attach as part of Exhibit B a description of direct labor costs factors under existing labor contracts and an explanation of the method(s) used to determine wage rates.

Line 16—Total Wage Payments. Enter for each year the product of Lines 14 and 15.

Line 17—Supplemental Employee Benefits. Report adjustments required to direct labor costs for other employee compensation under supplemental benefit plans. Attach as part of Exhibit B a description of such plans and their costs and an explanation of the method(s) used to determine such costs.

Line 18—Total Production Labor Cost. Enter for each year the total of Lines 16 and 17.

Lines 19, 22, 25, 28, and 31—Energy Quantities. Report for each year the quantity of energy by type required to support the processing levels reported in the smelter's revenue. Attach as part of Exhibit B, an explanation of energy use factors and qualities considered in determining the smelter's energy requirements.

Lines 20, 23, 26, 29 and 32—Unit Prices. Report for each year a price paid per unit of energy input by type of energy. Attach as part of Exhibit B, a description of the energy price factors under existing energy contracts and an explanation of the method(s) used to determine unit energy prices.

Lines 21, 24, 27, 30 and 33—Total Payments. Enter for each year the products of quantity and prices paid for electricity (Lines 19 x 20), natural gas (Lines 22 x 23), coal (Lines 25 x 26), fuel oil (Lines 28 x 29), and other (Lines 31 x 32).

Line 34—Total Energy Costs. Enter for each year the total of Lines 21, 24, 27, 30 and 33.

Schedule A.3—Historical Profit and Loss Summary

General

Use Schedule A.3 to report annual revenues, costs and income taxes assignable to operation of the smelter subject to this NSO application for fiscal years 1978 through 1982. Assignable revenues and costs should include only the results of transactions either (1) directly associated with smelter operations or (2) for which the applicant can establish a causal and beneficial relationship with smelter operations pursuant to instructions in Section 2.1. The line items in Schedule A.3 are explained in the following instructions.

Line 01—Primary Metal Sales. Enter the totals reported in Schedule A.1, Line 40.

Line 02—Co-Product and By-Product Sales. Report for each year annual revenues, net of returns and allowances, derived from smelter sales and/or transfers of co-products and by-product to both unaffiliated and affiliated customers. Attach as part of Exhibit B a supporting schedule for each major co-product and by-product component of smelter revenues. Segregate the revenues reported by major co-product and by-product components into their unaffiliated customer and affiliated customer elements. Report for each component's unaffiliated and affiliated customer revenue elements the (1) average grade of product sold, (2) actual quantity sold, (3) average price per unit, and (4) total smelter revenues. Also show for each product line any adjustments required to restate transfer prices and explain the basis for such adjustments. Refer to Section 2.2 for instructions on the restatement of affiliated customer revenues.

Line 03—Tolling Service Revenues. Enter the totals reported in Schedule A.1, Line 53.

Line 04—Other Operating Revenues. Report for each year annual revenues directly associated with smelter operations that have not previously been reported on Lines 01 through 03. Attach as part of Exhibit B a schedule showing the types and amounts of sales reported as other operating revenue. The following non-operating revenue and income items should *not* be included as other operating revenue or as a part of revenues reported on Lines 01 through 03.

- Royalties, licensing fees and other income from intangibles.
- Interest and dividend income on portfolio investments.
- Equity in income (loss) of unconsolidated subsidiaries and affiliates.
- Gain (loss) from discountinued operations and disposal of property.
- Minority interest adjustment to consolidated subsidiary income.

Line 05—Total Operating Revenue. Enter for each year the total of Lines 01 through 04.

Line 06—Concentrates Processed. Report the cost of concentrates processed and sold or transferred to unaffiliated and affiliated customers from Schedule A.2, Line 13. Concentrates purchased from unaffiliated suppliers should be valued at the actual prices paid. Concentrates purchased from affiliated suppliers should be valued at or, if necessary, restated to equivalent prices quoted by unaffiliated suppliers. If prices used to report revenues are c.i.f. and concentrate costs are f.o.b. smelter, all transportation charges paid on the smelter's or buyer's account should be excluded from smelter expense. Attach as part of Exhibit B supporting schedules showing the:

- Annual value of concentrate purchases classified according to purchases from unaffiliated and affiliated suppliers.
- Cost of sales adjustments to concentrate purchases for net annual additions to or withdrawals from concentrate inventories, freight-in on concentrate purchases and inventory spoilage.
- Impact on cost of sales for restating, where applicable, the cost of concentrate purchases from affiliated suppliers to the equivalent prices paid to unaffiliated suppliers.
- Volumes, grades and net prices of concentrate purchases from unaffiliated

and affiliated suppliers by type of concentrate purchased.

• Volumes, grades and net prices associated with toll concentrates processed by type of concentrate.

Line 07—Other Materials Costs. Report for each year annual costs incurred for flux, refractories, coke and other materials used by the smelter in its processing of concentrates. Materials purchased from unaffiliated suppliers should be valued at the actual prices paid after adjustment for transportation costs incurred. Materials purchased from affiliated suppliers should be valued at or, if necessary, restated to equivalent prices quited by unaffiliated suppliers. Include in Exhibit B supporting schedules showing the:

• Annual value of material purchases classified according to purchases from unaffiliated and affiliated suppliers.

• Cost of sales adjustments to material purchases for net annual additions to or withdrawls from material inventories, freight costs on material purchases and inventory loss.

• Impact on cost of sales for restating, where applicable, the costs of material purchases from affiliated suppliers to equivalent prices paid to unaffiliated suppliers.

• Classification of other material costs by major cost factors for each cost component that exceeds 20 percent of any line item in the cost of sales schedule.

Line 08—Production Labor Costs. Report for each year total direct labor costs incurred by the smelter for processing purchased and toll concentrates, Schedule A.2, Line 18. Include in Exhibit B supporting schedules showing the:

• Manhours and wage rates for major labor classifications.

• Potential impact on wage rates of provision in the smelter's current labor contracts.

• Explanation of major variances observed in direct labor costs over the five-year period as a result of factors such as strikes or new labor contracts.

Line 09—Energy Costs. Enter the totals reported in Schedule A.2, Line 34.

Line 10—Pollution Control Costs. Report for each year expenses incurred for operating and maintaining pollution control facilities. All by-product credits associated with pollution control facility operations should be eliminated and reported on Line 02. Depreciation and amortization charges against the smelter's pollution control facilities should be reported separately on Line 18. Attach as part of Exhibit B supporting schedules showing the:

• Major pollution control cost elements with their values classified according to direct and indirect cost factors.

• Techniques used to allocate indirect polution control costs to major cost pools.

Line 11—Production Overhead. Report for each year the total costs for indirect labor, indirect materials and other production overhead costs associated with the smelter. Attach as part of Exhibit B a schedule showing annual overhead costs by major cost components associated with the smelter's operations. For each cost component, where appropriate, identify the quantity and unit price element of overhead costs.

Line 12—Other Production Costs. Report for each year annual smelter overhead and other production costs not previously reported on Lines 06 through 11. By-product credits, if any, should be eliminated and reported on Line 02 as operating revenues. Attach as part of Exhibit B supporting schedules showing the:

• Major cost elements classified according to direct and indirect production costs.

• Disaggregation of major overhead cost components into their fixed and variable cost elements.

• Allocation techniques used in assigning indirect overhead costs to the major cost components.

• Elements of overhead costs represented by purchases from affiliated suppliers and adjustments, if any, required to restate these costs on the basis of equivalent prices paid to unaffiliated supplier.

Line 13—Total Cost of Sales. Enter for each year the total of Lines 06 through 12.

Line 14—Gross Operating Profit. Enter for each year the difference between Lines 05 and 13.

Line 15—Selling, General & Administrative (SG&A) Expenses. Report for each year SG&A expenses attributable to the smelter's annual operating activities. Exclude those operating costs to be reported separately on Lines 16 through 21 and those costs for which causal and beneficial relationships to the smelter cannot be established. Attach as part of Exhibit B supporting schedules(1) segregating SG&A expenses by major espense components, (2) classifying the major expense components according to thise costs incurred directly by smelter operations and costs allocated to the smelter from indirect cost pools, and (3) explaining the basis used for indirect cost allocations.

Line 16—Taxes, Other Than Income Tax. Report for each year all taxes (exclusive of Federal, state, local and foreign income taxes) assignable to the smelter's operations. Attach as part of Exhibit B, a schedule that (1) segregates these operating taxes by major component, (2) classifies each component according to direct and indirect cost elements, and (3) explains the basis used for indirect cost allocations.

Line 17—Research Costs. Report for each year research costs (exclusive of capitalized costs reported in Schedule A.4) that are assignable to the smelter's annual operations. Attach as part of Exhibit B a schedule (1) segregating exploration and research costs by major expense components, (2) classifying each expense component according to direct and indirect cost elements, and (3) explaining the basis used for indirect cost allocations.

Line 18—Pollution Control Depreciation and Amortization. Report for each year annual depreciation and amortization charges attributable to the smelter's investment in pollution control factilities and equipment. Reported charges should be computed in accordance with depreciation and amortization methods adopted for tax reporting purposes by the firm. Attach as part of Exhibit B a schedule segregating the smelter's pollution control facility investments into major depreciable asset components. Describe for each asset component the (1) depreciation method adopted for tax reporting purposes, (2) annual depreciation and amortization charges by applicable year, (3) classification of annual charges into direct and indirect cost elements, and (4) basis used for indirect cost allocations.

Line 19—Other Facility Depreciation and Amortization. Report for each year annual depreciation and amortization charges (exclusive of charges reported on Line 18) assignable to the smelter's operations. Refer to Line 18 instructions for additional reporting requirements.

Line 20—Interest on Short-Term Debt. Report for each year interest expense and associated financial charges on current liabilities in accordance with the assignment instructions in Section 2.1. Do not include interest on the portion of long-term debt due within the current year for each reporting period.

Line 21—Miscellaneous Operating Expenses. Report for each year any additional expenses assignable to the smelter's annual operations. Attach as part of Exhibit B a schedule (1) segregating these additional expenses into major expense components, (2) classifying each expense component according to costs incurred directly by the smelter and costs allocated to the

smelter from indirect cost pools, and (3) explaning the basis used for indirect cost allocations.

Line 22—Total Other Operating Expenses. Enter for each year the total of Lines 15 through 21.

Line 23—Income from Operations. Enter for each year the difference between Lines 14 and 22.

Line 24—Gain/(Loss) from Disposition of Property. Report net gains or losses recognized during each year from disposition of property, plant and equipment. Report such gains or losses in accordance with the firm's normal practice for certified financial statement reporting. If such gains or losses are not significant and are classified otherwise, no reclassification need be made. A note to this effect must be included in Exhibit B.

Line 25—Miscellaneous Income and Expenses. Report minority interest in income, foreign currency translation effects, and other non-operating income and expenses directly assignable to the smelter and not recognized elsewhere on this schedule. Report such items in accordance with the accounting methods used for certified financial reporting purposes.

Line 26—Total Other Income and Expenses. Enter for each year the sum of Lines 24 and 25.

Line 27—Net Taxable Income. Enter for each year the difference between Lines 23 and 26.

Schedule A.4—Historical Capital Investment Summary

General

Use Schedule A.4 to report annual end-of-period asset investments and current liabilities for fiscal years 1978 through 1982. These figures must correspond with the revenues and costs associated with operation of the smelter subject to this NSO application as reported in Schedule A.3.

The amounts assigned to the subject smelter should include both (1) investments and liabilities directly identifiable with the smelter's operating activities and (2) asset investments shared with other segments to the extent that a specific causal and beneficial relationship can be established for the intersegment allocation of such investments. Do not allocate to the smelter the costs of assets maintained for general corporate purposes. Provide a detailed explanation of amounts classified as nontraceable on a separate schedule and attach as part of Exhibit B.

Applicants shall also restate trade receivables and payables for transfer price adjustments on the smelter's transactions with affiliated customers. The line items in Schedule A.4 are explained in the following instructions.

Line 01—Cash on Hand and Deposit. Report for each year total cash balances assignable to the smelter's operations at the end of each year on the basis of causal and beneficial relationships with total corporate activities. Attach as part of Exhibit B an explanation of the basis used for allocation.

Line 02—Temporary Cash Investments. Report for each year temporary cash investments in time deposits or other short-term securities. Included only those investments either held by the smelter to meet current-period tax payments or other budgeted expenditures specifically identifiable with the smelter's continued operation. Exclude any temporary cash investments for which no specific future outlay requirement can be identified.

Attach as part of Exhibit B a schedule classifying temporary cash investments according to identifiable budgeted expenditure requirements.

Lines 03 and 04—Net Trade Receivables. Report for each year trade accounts and notes, net of reserves for uncollectible items, assignable to the smelter in relation to its unaffiliated (Line 03) and affiliated (Line 04) customer sales and transfers. Trade receivables reported by the smelter as due from affiliated customers should be stated or, if necessary, restated on credit terms equivalent to those received by unaffiliated customers on a sale of comparable products. Attach as part of Exhibit B a schedule showing adjustments in the smelter's receivables investments required to equate trade credit terms extended to affiliated and unaffiliated customers.

Lines 05 and 06—Inventory Investments. Report for each year respective end-of-period investments in raw material, work-in-process and finished good inventories held to support the smelter's production and sale of products (Line 05) and associated inventories of other materials and supplies (Line 06). Inventory purchases from affiliated suppliers should be stated or, if necessary, restated at market prices prevailing on purchases from unaffiliated suppliers. Attach as part of Exhibit B a schedule (1) describing whether inventories have been valued on a last-in-first-out (LIFO), first-in-first-out (FIFO) or other cost allocation process, (2) describing the smelter's transfer pricing policies on inventory purchases from affiliated suppliers, and (3) presenting adjustments required in reported inventory investments to reflect restatements of transfer prices on purchases from affiliated suppliers.

Line 07—Other Current Assets. Report for each year prepaid expenses, deferred charges, non-trade notes and accounts receivable, and other assets classified as current for certified financial statement reporting purposes that are assignable to the smelter's operations. Attach as part of Exhibit B a schedule classifying these other current assets according to their types and amounts.

Line 08—Total Current Assets. Enter for each year the total of Lines 01 through 07.

Lines 09 to 14—Property, Plant and Equipment. Report for each year by individual line item property, plant and equipment investments assignable to smelter operations. Include in gross facility investments at the end of each period both (1) property, plant and equipment directly associated with the smelter's operations and (2) facilities shared with other operating segments to the extent that a causal and beneficial relationship can be established for the inter-segment allocation of such facility investments.

Attach as part of Exhibit B a schedule reporting by individual line item the annual capital expenditures on additional property, plant and equipment investments in the smelter's operations. Further classify these annual capital expenditures into both (1) investments required to maintain the smelter versus investments in smelter expansion and improvement and (2) direct facility versus joint-use facilty investments. Explain the method used for allocating capital expenditures on joint-use facilities to the smelter's operations. Refer to Line 17 instructions for additional reporting requirements on the smelter's facility investments.

Line 15—Total Smelter Investment. Enter for each year the total of Lines 09 through 14.

Line 16—Accumulated Depreciation and Amortization. Report for each year accumulated depreciation, amortization and other valuation charges recorded for certified financial statement reporting purposes in relation to smelter investment as reported on Line 15. Other valuation charges are defined in Financial Accounting Standards Board (FASB) Statement No. 19 as losses recognized in connection with an impairment in the value of an unimproved property below its acquisition cost. Refer to Line 17 instructions for additional reporting requiirements on smelter facility investments.

Line 17—Net Smelter Investment. Enter for each year the difference between Lines 15 and 16. Attach as part

of Exhibit B a schedule classifying gross facility investments, accumulated depreciation, amortization charges, and net facility investments by major pollution control and non-pollution control components. Identify for each asset component the direct versus joint-use investments assigned to the smelter and explain the basis used to allocate amounts associated with joint-use facilities to the smelter.

Line 18—Other Non-Current Assets. Report for each year other assets assignable to the smelter's operations. Attach as part of Exhibit B a schedule reporting by type and amount the major components of such investments.

Line 19—Total Smelter Capital Investment. Enter for each year the total of Lines 08, 17 and 18.

Line 20 and 21—Trade Accounts and Notes Payable. Report for each year trade accounts and notes due on the smelter's purchases from unaffiliated suppliers (Line 20) and on its intersegment transfers or purchases from affiliated suppliers (Line 21). Trade payables reported by the smelter as due to affiliated suppliers should be stated or, if necessary, restated on terms equivalent to those received from unaffiliated suppliers on a purchase of comparable materials. Attach as part of Exhibit B a schedule showing adjustments required on the smelter's trade payables to equate trade credit terms received from affiliated and unaffiliated suppliers.

Line 22—Other Expense Accruals. Report for each year payments classified as current for salaries and wages, other employee benefits, operating taxes and related operating expenses assignable to the smelter's operations. Attach as part of Exhibit B a schedule classifying by type and amount the major components of such accruals.

Line 23—Current Notes Payable. Report for each year payments due to nontrade creditors on short-term financing arrangements directly associated with the smelter's operations. Exclude current installments due on long-term debt financing arrangements, notes due to offices and directors, intersegment loans or advances and loans or advances from affiliated operating segments.

Line 24—Other Current Liabilities. Report for each year other nontrade payables classified as current obligations assignable to the smelter's operations.

Line 25—Total Current Liabilities. Enter for each year the total of Lines 20 through 24.

Line 26—Net Smelter Capital Investment. Enter for each year the difference between Lines 19 and 25.

Schedule B.1—Pre-Control Revenue Forecast

General

Use Schedule B.1 to report annual forecasts of operating revenues anticipated during the years 1983 through 1989 from operation of the smelter subject to this NSO application. These pre-control revenue projections should be based on revenues and production associated with operating the smelter without any SO_2 controls that may have been installed after 1977. Forecast smelter revenues should be expressed on a tolling service equivalent basis as described in Section 2.3.4.

Copper smelters that will process concentrates containing an average of 1,000 pounds per hour or more of arsenic during the forecast period should assume that they will use best engineering techniques to control fugitive emissions of arsenic. All smelters should assume that they will be required to install whatever technically feasible equipment is necessary to reduce their process and fugitive emissions of lead enough to achieve a concentration of 1.5 micrograms per cubic meter (mg/m^3) on a 90-day average basis in the ambient air by January 1, 1985. All smelters should also assume that they will be required to meet all other regulatory requirements in effect at the time the application is made.

The line items in Schedule B.1 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts and (3) provide data and information to support the forecasts.

Lines 01 and 05—Concentrates Processed. Report for each year the forecast quantity of concentrates processed for unaffiliated parties (Line 01) and affiliated parties (Line 05).

Lines 02 and 06—Smelting Charge. Report for each year the forecast smelting charge for unaffiliated parties (Line 02) and affiliated parties (Line 06). See Section 2.4 for forecast copper smelting charges furnished by EPA.

Lines 03 and 07—Total Smelter Revenues. Report for each year the forecast total operating revenues derived from processing concentrates. The total for unaffiliated parties (Line 03) is equal to the product of Lines 01, 02, and 04, and for affiliated parties (Line 07), the product of Lines 05, 06, and 08.

Line 04 and 08—Average Product Grade. Report for each year the forecast average quality rating assigned to concentrates processed for unaffiliated parties (Line 04) and affiliated parties (Line 08).

Line 09—Total Co-Product Revenues. Report for each year the forecast net revenues from sales of co-products derived from the smelter's operations. Attach as part of Exhibit B a schedule showing by individual type of co-product, the forecast quantity produced and sold, forecast market price per unit of sales, and forecast total revenues derived from the co-product sales.

Line 10—Total By-product Revenues From Pollution Control Facilities. Report for each year forecast revenues from the sale of by-products derived from operation of the smelter's pollution control facilities, excluding those SO_2 controls installed after 1977. Attach as part of Exhibit B a schedule showing by type of by-product produced (e.g., sulfuric acid) the forecast quantity of output, forecast market price per unit of output sold, and forecast total revenue derived from the by-product sales.

Line 11—Total By-product Revenues From Other Smelter Processing. Report forecast revenues from the sales of gold, silver, and other by-products derived from the smelter's operations. Attach as part of Exhibit B a schedule providing additional documentation as specified in the instructions for Line 10.

Line 12—Total Co-product and By-product Revenues. Enter for each year the total of Lines 09 through 11.

Schedule B.2—Pre-Control Cost Forecast

General

Use Schedule B.2 to report annual forecasts of operating costs anticipated during the years 1983 through 1989 from operation of the smelter subject to this NSO application. These pre-control cost projections should be based on costs and production associated with operating the smelter without any SO_2 controls that may have been installed after 1977.

Copper smelters that will process concentrates containing an average of 1,000 pounds per hour or more of arsenic during the forecast period should assume that they will use best engineering techniques to control fugitive emissions of arsenic. All smelters should assume that they will be required to install whatever technically feasible equipment is necessary to reduce their process and fugitive emissions of arsenic to achieve a concentration of 1.5 micrograms per cubic meter (mg/m^3) on a 90-day average basis in the ambient air by January 1, 1985. All smelters should also

assume that they will be required to meet all other regulatory requirements in effect at the time the application is made.

The line items in Schedule B.2 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts, and (3) provide data and information to support the forecasts.

Line 01—Direct Labor Hours. Report for each year the quantity of direct labor hours required to support the processing levels previously reported. Attach as part of Exhibit B an explanation of the labor productivity factors involved.

Line 02—Average Hourly Wage Rate. Report for each year the forecast average wage rate per unit of direct labor input. Attach as part of Exhibit B a description of direct labor cost factors under any existing labor contracts that extend to the forecast period and an explanation of the methodology used to forecast wage rates. EPA-provided forecast wage indices are reported in Section 2.4.

Line 03—Total Wage Payments. Enter for each year the product of Lines 01 and 02.

Line 04—Supplemental Employee Benefits. Report for each year adjustments required to direct labor costs for other employee compensation under supplemental benefit plans. Attach as part of Exhibit B a description of such plans and their costs and an explanation of the methodology used to forecast such costs. EPA-provided forecast wage indices are reported in Section 2.4.

Line 05—Total Production Labor Cost. Enter for each year the total of Lines 03 and 04.

Lines 06, 09, 12, 15 and 18—Energy Qunatities. Report for each year the quantity of energy by type required to support the processing levels reported in the smelter's revenue. Attach as part of Exhibit B an explanation of energy characteristics and use factors considered in forecasting the smelter's future energy requirements.

Lines 07, 10, 13, 16, and 19—Unit Prices. Report for each year the forecast price per unit of energy input by type of energy. Attach as part of Exhibit B a description of the energy price factors under any existing energy contracts that extend to the forecast period and an explanation of the methodology used to forecast unit energy prices. EPA-provided forecast energy indices are reported in Section 2.4.

Lines 08, 11, 14, 17, and 20—Total Payments Enter for each year the products of quantity and prices paid for electricity (Lines 06 × 07), natural gas (Lines 09 x 10), coal (Lines 12 × 13), fuel oil (Lines 15 × 16), and other (Lines 18 × 19).

Line 21—Total Energy Costs. Enter for each year the total of Lines 08, 11, 14, 17, and 20.

Schedule B.3—Pre-Control Forecast Profit and Loss Summary

General

Use Schedule B.3 to report annual forecasts of operating revenues and operating costs derived in Schedules B.1 and B.2 for the years 1983 through 1989. The transfer of line items from Schedules B.1 and B.2 to this Schedule is explained in the following instructions.

Line 01—Smelter Revenues-Unaffiliated Parties. Enter the totals reported in Schedule B.1, Line 03.

Line 02—Smelter Revuenes-Affiliated Parties. Enter the totals reported in Schedule B.1, Line 07.

Line 03—Co-product and By-product Sales Revenues. Enter the totals reported in Schedule B.1, Line 12.

Line 04—Other Operating Revenues. Report operating revenues anticipated from sources not accounted for under Lines 01 through 03. Refer to instructions for Line 04 of Schedule A.3 for items that should not be included in "Other Revenues." Attach as part of Exhibit B a schedule showing annual amounts forecast by individual revenue component for "other" operating revenues associated with the smelter's forecast pre-control operations. Identify in the supporting schedule any differences in the "other" revenue components reported in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 05—Total Operating Revenues. Enter for each year the total of Lines 01 through 04.

Line 06—Material Costs. Report total costs forecast for flux, refractories, coke and other materials directly associated with the smelter's processing of concentrates. Attach as part of Exhibit B a schedule showing the annual amounts forecast by major material cost components. For each cost component, identify the forecast quantity and unit price elements of material cost and explain the basis for forecasting these quantity and price elements. Identify in the supporting schedule any differences in the "other" material cost components shown in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 07—Production Labor Costs. Enter the totals reported in Schedule B.2, Line 05.

Line 08—Energy Costs. Enter the total reported in Schedule B.2, Line 21.

Line 09—Pollution Control Costs. Report the total costs forecast for expenses identifiable with operation and maintenace of all pollution control equipment and facilities except SO_2 controls installed after 1977. By-product credits associated with operation of the pollution control facilities should be eliminated from the cost accounts, reclassified to Schedule B.1, Line 10 and included in Line 03 of this Schedule. Attach a schedule as part of Exhibit B classifying pollution control costs by major cost components. Explain the basis used for estimating each of the cost components.

Line 10—Production Overhead Costs. Report the total costs forecast for indirect labor, indirect materials and other production overhead costs associated with the smelter's constant controls forecasts. Attach as part of Exhibit B a schedule showing annual overhead costs projected by major cost components associated with the smelter's operations. For each cost component, where appropriate, identify the forecast quantity and unit price elements of overhead costs and explain the basis for estimating these quantity and price elements. Also identify in the supporting schedule any differences in production overhead cost classifications used in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 11—Other Production Costs. Report other forecast production costs not previously reported on Lines 06 through 10. Attach as part of Exhibit B supporting schedules showing the basis of the forecasts.

Line 12—Total Cost of Sales. Enter for each year the sum of operating costs reported on Lines 06 through 11.

Line 13—Gross Operating Profit. Enter for each year the difference between Lines 05 and 12.

Line 14—Selling, General and Administrative Expenses. Report the total costs forecast for administrative, marketing and general corporate overhead functions that directly or indirectly support the smelter's operations. Refer to the NOS Financial Reporting Overview for a general discussion of indirect cost allocations from overhead cost pools. Attach as part of Exhibit B a schedule classifying selling, general and administrative expenses into major cost components. Indicate whether each component represents costs directly assignable to the smelter or indirect costs allocated from other business segments to the smelter. Explain the basis used for

estimating the amount of expected costs included in each component and the basis used for allocating indirect cost elements to the smelter. Identify and explain any differences between the selling, general and administrative cost classification used in this Schedule and that used in Line 15 of Schedule A.3.

Line 15—Taxes Other than Income Taxes. Report the total costs forecast for property taxes and associated levies paid to governmental units by or for the benefit of the smelter operation. Attach as part of Exhibit B a schedule classifying operating taxes by major component. Indicate whether each component represents taxes directly assignable to the smelter or taxes that have been allocated among more than one facility. Explain the basis used for estimating taxes and the basis for any allocation of taxes to the smelter. Identify and explain any differences between the component classifications used in this Schedule and those used in Line 16 of Schedule A.3.

Line 16—Research Costs. Report the estimates of research costs incurred directly by or for the benefit of the smelter operations. Attach as part of Exhibit B a schedule classifying the costs by major direct and indirect cost components. Explain the basis for estimating the costs assigned to each component. Identify and explain any differences between classifications used in this Schedule and those used in Line 17 of Schedule A.3.

Line 17—Pollution Control Facility Depreciation and Amortization. Report the estimates of depreciation and amortization charges associated with the smelter's actual and forecast investment in all pollution control equipment and facilities, except SO_2 controls installed after 1977. Attach as part of Exhibit B supporting schedules classifying pollution control facilities by major assets or asset groups. For each facility component, indicate the depreciation or amortization method that would be reported for certified financial statement reporting purposes. Based on that method, report the original cost of the component assets, undepreciated balance of the component assets, the remaining depreciable life and the annual depreciation or amortization charge. Indicate for each asset component whether the depreciation and amortization charges represent direct cost assignments or indirect cost allocations to the smelter.

Line 18—Other Smelter Facility Depreciation and Amortization. Report the pro forma estimates of depreciation and amortization charges associated with the smelter's investment in equipment and facilities other than those classified as pollution control facilities. Attach as part of Exhibit B supporting schedules prepared according to the instructions for Line 18 above.

Line 19—Interest on Short-Term Debt. Report the estimates of interest and other financing charges on forecast short-term obligations as classified in the smelter's current liabilities on Schedule A.4. Interest and associated financing charges on long-term debt should not be included as an expense identifiable with the smelter's operations. Attach as part of Exhibit B a schedule showing the interest-bearing, short-term debt contracts identifiable with the smelter's operations, the interest rate projected for these contracts, and the estimated annual interest charges. Identify and explain any differences between the classifications used in this Schedule and those used in Line 20 of Schedule A.3.

Line 20—Miscellaneous Operating Expenses. Report only the total operating expenses associated with or allocated to the smelter that cannot be appropriately classified in one of the preceding line items. Attach as part of Exhibit a schedule showing the classification of these residual operating expenses into major cost components. Explain the basis used for forecasting the cost under each component. Identify each cost component in terms of direct or indirect cost and explain the basis used for allocating the indirect costs to smelter operations. Identify and explain any differences between cost classifications included in this Schedule and those used in Line 21 of Schedule A.3.

Line 21—Total Other Operating Expenses. Enter for each year the sum of operating costs reported on Lines 14 through 20.

Line 22—Income From Operations. Enter for each year the difference between Lines 21 and 13.

Schedule B.4—Constant Controls Revenue Forecast

General

Use Schedule B.4 to report annual forecasts of operating revenues anticipated during the years 1983 through 1989 from operation of the smelter subject to this NSO application. These constant controls revenue forecasts should be based on an assumption that the applicant immediately implements a program of additional pollution control facility investments sufficient to achieve full compliance with the smelter's SIP stack emission limitations for sulfur dioxide. Forecast smelter revenues should be expressed on a tolling service equivalent basis as described in Section 2.3.4.

The assumed investment program should be based on whichever adequately demonstrated system, applicable to the smelter, that would be most economically beneficial subsequent to installation of the system. For this purpose, adequately demonstrated systems include those specified in Section 57.102(b)(1).

Copper smelters that will process concentrates containing an average of 1,000 pounds per hour or more of arsenic during the forecast period should assume that they will use best engineering techniques to control fugitive emissions of arsenic. All smelters should assume that they will be required to install whatever technically feasible equipment is necessary to reduce their process and fugitive emissions of lead enough to achieve a concentration of 1.5 micrograms per cubic meter (mg/m3) on a 90-day average basis in the ambient air by January 1, 1985. All smelters should also assume that they will be required to meet all other regulatory requirements in effect at the time the application is made.

The line items in Schedule B.4 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts, and (3) provide data and information to support the forecasts.

Lines 01 and 05—Concentrates Processed. Report for each year the forecast quantity of concentrates processed for unaffiliated parties (Line 01) and affiliated parties (Line 05).

Lines 02 and 06—Smelting Charge. Report for each year the forecast smelting charge for unaffiliated parties (Line 02) and affiliated parties (Line 06). See Section 2.4 for forecast copper smelting charges furnished by EPA.

Lines 03 and 07—Total Smelter Revenues. Report for each year the forecast total operating revenues derived from processing concentrates. The total for unaffiliated parties (Line 03) is equal to the product of Lines 01, 02, and 04, and for affiliated parties (Line 07), the product of Lines 05, 06, and 08.

Lines 04 and 08—Average Product Grade. Report for each year the forecast average quality rating assigned to concentrates processed for unaffiliated parties (Line 04) and affiliated parties (Line 08).

Line 09—Total Co-Product Revenues. Report for each year the forecast net

revenues from sales of co-products derived from the smelter's operations. Attach as part of Exhibit B a schedule showing by individual type of co-product, the forecast quantity produced and sold, forecast market price per unit of sales, and forecast total revenues derived from the co-product sales.

Line 10—Total By-product Revenues From Pollution Control Facilities. Report for each year forecast revenues from the sale of by-products derived from operation of the smelter's pollution control facilities. Attach as part of Exhibit B a schedule showing by type of by-product produced (e.g., sulfuric acid) the forecast quantity of output, forecast market price per unit of output sold, and forecast total revenue derived from the by-product sales.

Line 11—Total By-product Revenues From Other Smelter Processing. Report forecast revenues from the sales of gold, silver, and other by-products derived from the smelter's operations. Attach as part of Exhibit B a schedule providing additional documentation as specified in the instructions for Line 10.

Line 12—Total Co-product and By-product Revenues. Enter for each year the total of Lines 09 through 11.

Schedule B.5—Constant Controls Cost Forecast

General

Use Schedule B.5 to report annual forecasts of operating costs anticipated during the years 1983 through 1989 from operation of the smelter subject to this NSO application. These constant controls cost forecasts should be based on an assumption that the applicant immediately implements a program of additional pollution control facility investments sufficient to achieve full compliance with the smelter's SIP stack emission limitations for sulfur dioxide.

The assumed investment program should be based on whichever adequately demonstrated system, applicable to the smelter, would be most economically beneficial subsequent to installation of the system. For this purpose, adequately demonstrated systems include those specified in Section 57.102 (b)(1).

Copper smelters that will process concentrates containing an average of 1,000 pounds per hour or more of arsenic during the forecast period should assume that they will use best engineering techniques to control fugitive emissions of arsenic. All smelters should assume that they will be required to install whatever technically feasible equipment is necessary to reduce their process and fugitive emissions of lead enough to achieve a concentration of 1.5 micrograms per cubic meter (mg/m^3) on a 90-day average basis in the ambient air by January 1, 1985. All smelters should also assume that they will be required to meet all other regulatory requirements in effect at the time the application is made.

The line items in Schedule B.5 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts, and (3) provide data and information to support the forecasts.

Line 01—Direct Labor Hours. Report for each year the quantity of direct labor hours required to support the processing levels previously reported. Attach as part of Exhibit B an explanation of the labor productivity factors involved.

Line 02—Average Hourly Wage Rate. Report for each year the forecast average wage rate per unit of direct labor input. Attach as part of Exhibit B a description of direct labor cost factors under any existing labor contracts that extend to the forecast period and an explanation of the methodology used to forecast wage rates. EPA-provided forecast wage indices are reported in Section 2.4.

Line 03—Total Wage Payments. Enter for each year the product of Lines 01 and 02.

Line 04—Supplemental Employee Benefits. Report for each year adjustments required to direct labor costs for other employee compensation under supplemental benefit plans. Attach as part of Exhibit B a description of such plans and their costs and an explanation of the methodology used to forecast such costs. EPA-provided forecast wage indices are reported in Section 2.4.

Line 05—Total Production Labor Cost. Enter for each year the total of Lines 03 and 04.

Lines 06, 09, 12, 15, and 18—Energy Quantities. Report for each year the quantity of energy by type required to support the processing levels reported in the smelter's revenue. Attach as part of Exhibit B an explanation of energy characteristics and use factors considered in forecasting the smelter's future energy requirements.

Lines 07, 10, 13, 16, and 19—Unit Prices. Report for each year the forecast price per unit of energy input by type of energy. Attach as part of Exhibit B a description of the energy price factors under any existing energy contracts that extend to the forecast period and an explanation of the methodology used to forecast unit energy prices. EPA-provided forecast energy indices are reported in Section 2.4.

Lines 08, 11, 14, 17, and 20—Total Payments. Enter for each year the products of quantity and prices paid for electricity (Lines 06 x 07), natural gas (Lines 09 x 10), coal (Lines 12 x 13), fuel oil (Lines 15 x 16), and other (Lines 18 x 19).

Line 21—Total Energy Costs. Enter for each year the total of Lines 08, 11, 14, 17, and 20.

Schedule B.6—Constant Controls Forecast Profit and Loss Summary for the Profit Protection Test

General

Use Schedule B.6 to report annual forecasts of operating revenues and operating costs derived in Schedules B.4 and B.5 for the years 1983 through 1989. These constant controls forecasts should be based on an assumption that the applicant immediately implements a program of additional pollution control facility investments sufficient to achieve full compliance with the smelter's SIP stack emission limitations for sulfur dioxide. The transfer of line items from Schedules B.4 and B.5 to this Schedule is explained in the following instructions.

Line 01—Smelter Revenues—Unaffiliated Parties. Enter the totals reported in Schedule B.4, Line 03.

Line 02—Smelter Revenues-Affiliated Parties. Enter the totals reported in Schedule B.4, Line 07

Line 03—Co-product and By-product Sales Revenues. Enter the totals reported in Schedule B.4, Line 12.

Line 04—Other Operating Revenues. Report operating revenues anticipated from sources not accounted for under Lines 01 through 03. Refer to instructions for Line 04 of Schedule A.3 for items that should not be included in "Other Operating Revenues." Attach as part of Exhibit B a schedule showing annual amounts forecast by individual revenue component for "other" operating revenues associated with the smelter's forecast constant controls operations. Identify in the supporting schedule any differences in the "other" revenue components reported in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 05—Total Operating Revenues. Enter for each year the total of lines 01 through 04.

Line 06—Material Costs. Report total costs forecast for flux, refractories, coke and other materials directly associated with the smelter's processing of concentrates. Attach as part of Exhibit B a schedule showing the annual amounts forecast by major material cost

components. For each cost component, identify the forecast quantity and unit price elements of material cost and explain the basis for forecasting these quantity and price elements. Identify in the supporting schedule any differences in the "other" material cost components shown in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 07—Production Labor Costs. Enter the totals reported in Schedule B.5, Line 05.

Line 08—Energy Costs. Enter the totals reported in Schedule B.5, Line 21.

Line 09—Pollution Control Costs. Report the total costs forecast for expenses identifiable with operation and maintenance of all pollution control equipment and facilities. By-product credits associated with operation of the pollution control facilities should be eliminated from the cost accounts, reclassified to Schedule B.4 Line 10 and included in Line 03 of this Schedule. Attach a schedule as part of Exhibit B classifying pollution control costs by major cost components. Explain the basis used for estimating each of the cost components.

Line 10—Production Overhead Costs. Report the total costs forecast for indirect labor, indirect materials and other production overhead costs associated with the smelter's constant controls forecasts. Attach as part of Exhibit B a schedule showing annual overhead costs projected by major cost components associated with the smelter's operations. For each cost component, where appropriate, identify the forecast quantity and unit price elements of overhead costs and explain the basis for estimating these quantity and price elements. Also identify in the supporting schedule any differences in production overhead cost classifications used in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 11—Other Production Costs. Report other forecast production costs not previously reported on Lines 06 through 10. Attach as part of Exhibit B supporting schedules showing the basis of the forecasts.

Line 12—Total Cost of Sales. Enter for each year the sum of operating costs reported on Lines 06 through 11.

Line 13—Gross Operating Profit. Enter for each year the difference between Lines 05 and 12.

Line 14—Selling, General and Administrative Expenses. Report the total costs forecast for administrative, marketing and general corporate overhead functions that directly or indirectly support the smelter's operations. Refer to the NSO Financial Reporting Overview for a general discussion of indirect cost allocations from overhead cost pools. Attach as part of Exhibit B a schedule classifying selling, general and administrative expenses into major cost components. Indicate whether each component represents costs directly assignable to the smelter or indirect costs allocated from other business segments to the smelter. Explain the basis used for estimating the amount of expected costs included in each component and the basis used for allocating indirect cost elements to the smelter. Identify and explain any differences between the selling, general and administrative cost classification used in this Schedule and that used in Line 15 of Schedule A.3.

Line 15—Taxes, Other than Income Taxes. Report the total costs forecast for property taxes and associated levies paid to governmental units by or for the benefit of the smelter operation. Attach as part of Exhibit B a schedule classifying operating taxes by major component. Indicate whether each component represents taxes directly assignable to the smelter or taxes that have been allocated among more than one facility. Explain the basis used for estimating taxes and the basis for any allocation of taxes to the smelter. Identify and explain any differences between the component classifications used in this Schedule and those used in Line 16 of Schedule A.3.

Line 16—Research Costs. Report the estimate of research costs incurred directly by or for the benefit of the smelter operations. Attach as part of Exhibit B a schedule classifying the costs by major direct and indirect cost components. Explain the basis for estimating the costs assigned to each component. Identify and explain any differences between classifications used in this Schedule and those used in Line 17 of Schedule A.3.

Line 17—Pollution Control Facility Depreciation and Amortization. Report the estimates of depreciation and amortization charges associated with the smelter's actual and forecast investment in all pollution control equipment and facilities. Attach as part of Exhibit B supporting schedules classifying pollution control facilities by major assets or asset groups. For each facility component, indicate the depreciation or amortization method that would be reported for certified financial statement reporting purposes. Based on that method, report the original cost of the component assets, undepreciated balance of the component assets, the remaining depreciable life and the annual depreciation or amortization charge. Indicate for each asset component whether the depreciation and amortization charges represent direct cost assignments or indirect cost allocations to the smelter.

Line 18—Other Smelter Facility Depreciation and Amortization. Report the pro forma estimates of depreciation and amortization charges associated with the smelter's investment in equipment and facilities other than those classified as pollution control facilities. Attach as part of Exhibit B supporting schedules prepared according to the instructions for Line 18 above.

Line 19—Interest on Short-Term Debt. Report the estimates of interest and other financing charges on forecast short-term obligations as classified in the smelter's current liabilities on Schedule A.4. Interest and associated financing charges on long-term debt should not be included as an expense identifiable with the smelter's operations. Attach as part of Exhibit B a schedule showing the interest-bearing, short-term debt contracts identifiable with the smelter's operations, the interest rate projected for these contracts, and the estimated annual interest charges. Identify and explain any differences between the classifications used in this Schedule and those used in Line 20 of Schedule A.3.

Line 20—Miscellaneous Operating Expenses. Report only the total operating expenses associated with or allocated to the smelter that cannot be appropriately classified in one of the preceding line items. Attach as part of Exhibit B a schedule showing the classification of these residual operating expenses into major cost components. Explain the basis used for forecasting the cost under each component. Identify each cost component in terms of direct or indirect cost and explain the basis used for allocating the indirect costs to smelter operations. Identify and explain any differences between cost classifications included in this Schedule and those used in Line 21 of Schedule A.3.

Line 21—Total Other Operating Expenses. Enter for each year the sum of operating costs reported on Lines 14 through 20.

Line 22—Income From Operations. Enter for each year the difference between Lines 21 and 13.

Schedule B.7—Profit Protection Test

General

Applicants must complete this Schedule and/or Schedule C.3 and the accompanying schedules if they seek eligibility for an NSO. The line items in

Schedule B.7 are explained in the following instructions.

Line 01—Net Income from Operations. Enter for each year the amounts reported in Schedule B.3, Line 22.

Line 02—Discount Factors. Enter the discount factor for each year, computed as described in the instructions under Section 2.6.

Line 03—Present Value of Future Net Income. Enter for each year the product of Lines 01 and 02.

Line 04—Horizon Value. Enter under the Total column, the estimated horizon value of the smelter. This shall be computed by capitalizing the forecast net income from operations in Line 01 as described in the instructions under Section 2.7.

Line 05—Discount Factor. Enter under the Total column the appropriate discount factor corresponding to the weighted cost of capital, computed as described in the instructions under Section 2.6.

Line 06—Present Value of Horizon Value. Enter under the Total column the product of Lines 04 and 05.

Line 07—Present Value of Future Net Income. Enter under the Total column the sum of amounts previously reported on Line 03 for 1983 through 1989.

Line 08—Total Present Value. Enter for each year the sum of Lines 06 and 07.

Line 09—Net Income from Operations. Enter for each year the amount reported in Schedule B.6, Line 22.

Line 10—Discount Factors. Follow the instructions for Line 02.

Line 11—Present Value of Future Net Income. Enter for each year the product of Lines 09 and 10.

Line 12—Horizon Value. Enter under the Total column, the estimated horizon value of the smelter. This shall be computed by capitalizing the forecast net income from operations in Line 09 as described in the instructions under Section 2.7.

Line 13—Discount Factor. Follow the instructions for Line 05.

Line 14—Present Value of Horizon Value. Enter under the Total column the product of Lines 12 and 13.

Line 15—Present Value of Future Net Income. Enter under the Total column the sum of amounts previously reported on Line 11 for 1983 through 1989.

Line 16—Total Present Value. Enter the sum of Lines 14 and 15.

Line 17—Ratio for Total Present Value of Constant Controls Case to Total Present Value of Pre-Control Case. Enter the ratio of Lines 16 to 08. If this ratio is less than .50, the smelter passes the Profit Protection Test. An applicant also passes the Profit Protection Test if the reported total present value of pre-tax profits for the pre-control case on Line 08 is a negative value.

Schedule C.1—Constant Controls Forecast Profit and Loss Summary for the Rate of Return Test

General

Use Schedule C.1 to report forecast revenue and cost information derived in Schedules B.4 and B.5 for the years 1983 through 1989. These constant controls forecast should be based on an assumption that the applicant immediately implements a program of additional pollution control facility investments sufficient to achieve full compliance with the smelter's SIP stack emission limitations for sulfur dioxide. The transfer of line items from Schedules B.4 and B.5 to this Schedule is explained in the following instructions.

Line 01—Smelter Revenues-Unaffiliated Parties. Enter the totals reported in Schedule B.4, Line 03.

Line 02—Smelter Revenues-Affiliated Parties. Enter the totals reported in Schedule B.4, Line 07.

Line 03—Co-product and By-product Sales Revenues. Enter the totals reported in Schedule B.4, Line 12.

Line 04—Other Operating Revenues. Report operating revenues anticipated from sources not accounted for under Lines 01 through 03. Refer to instructions for Line 04 of Schedule A.3 for items that should not be included in "Other Operating Revenues." Attach as part of Exhibit B a schedule showing annual amounts forecast by individual revenue component for "other" operating revenues associated with the smelter's forecast constant controls operations. Identify in the supporting schedule any differences in the "other" revenue components reported in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 05—Total Operating Revenues. Enter for each year the total of Lines 01 through 04.

Line 06—Material Costs. Report total costs forecast for flux, refractories, coke and other materials directly associated with the smelter's processing of concentrates. Attach as part of Exhibit B a schedule showing the annual amounts forecast by major material cost components. For each cost component, identify the forecast quantity and unit price elements of material cost and explain the basis for forecasting these quantity and price elements. Identify in the supporting schedule any differences in the "other" material cost compoments shown in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 07—Production Labor Costs. Enter the totals reported in Schedule B.5, Line 05.

Line 08—Energy Costs. Enter the totals reported in Schedule B.5, Line 21.

Line 09—Pollution Control Costs. Report the total costs forecast for expenses identifiable with operation and maintenance of all pollution control equipment and facilities. By-product credits associated with operation of the pollution control facilities should be eliminated from the cost accounts, reclassified to Schedule B.4, Line 10 and included in Line 03 of this Schedule. Attach a schedule as part of Exhibit B classifying pollution control costs by major cost components. Explain the basis used for estimating each of the cost components.

Line 10—Production Overhead Costs. Report the total costs forecast for indirect labor, indirect labor, indirect materials and other production overhead costs associated with the smelter's constant controls forecasts. Attach as part of Exhibit B a schedule showing annual overhead costs projected by major cost components associated with the smelter's operations. For each cost component, where appropriate, identify the forecast quantity and unit price elements of overhead costs and explain the basis for estimating these these quantity and price elements. Also identify in the supporting schedule any differences in production overhead cost classifications used in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 11—Other Production Costs. Report other forecast production costs not previously reported on Lines 06 through 10. Attach as part of Exhibit B supporting schedules showing the basis of the forecasts.

Line 12—Total Cost of Sales. Enter for each year the sum of operating costs reported on Lines 06 through 10.

Line 13—Gross Operating Profit. Enter for each year the difference between Lines 05 and 12.

Line 14—Selling, General and Administrative Expenses. Report the total costs forecast for administrative, marketing and general corporate overhead functions that directly or indirectly support the smelter's operations. Refer to the NSO Financial Reporting Overview for a general discussion of indirect cost allocations from overhead cost pools. Attach as part of Exhibit B a schedule classifying selling, general and administrative expenses into major cost components. Indicate whether each component represents costs directly assignable to

the smelter or indirect costs allocated from other business segments to the smelter. Explain the basis used for estimating the amount of expected costs included in each component and the basis used for allocating indirect cost elements to the smelter. Identify and explain any differences between the selling, general and administrative cost classification used in this Schedule and that used in Line 15 of Schedule A.3.

Line 15—Taxes, Other than Income Taxes. Report the Total costs forecast for property taxes and associated levies paid to governmental units by or for the benefit of the smelter operation. Attach as part of Exhibit B a schedule classifying operating taxes by major component. Indicate whether each component represents taxes directly assignable to the smelter or taxes that have been allocated among more than one facility. Explain the basis used for estimating taxes and the basis for any allocation of taxes to the smelter. Identify and explain any differences between the component classifications used in this Schedule and those used in Line 16 of Schedule A.3.

Line 16—Research Costs. Report the estimates of research costs incurred directly by or for the benefit of the smelter operations. Attach as part of Exhibit B a schedule classifying the costs by major direct and indirect cost components. Explain the basis for estimating the costs assigned to each component. Identify and explain any differences between classifications used in this Schedule and those used in Line 17 of Schedule A.3.

Line 17—Pollution Control Facility Depreciation and Amortization. Report the estimates of depreciation and amortization charges associated with the smelter's actual and forecast investment in all pollution control equipment and facilities. Attach as part of Exhibit B supporting schedules classifying pollution control facilities by major assets or asset groups. For each facility component, indicate the depreciation or amortization method that would be reported for tax purposes. Based on that method, report the original cost of the component assets, undepreciated balance of the component assets, the remaining depreciable life and the annual depreciation or amortization charge. Indicate for each asset component whether the depreciation and amortization charges represent direct cost assignments or indirect cost allocations to the smelter.

Line 18—Other Smelter Facility Depreciation and Amortization. Report the pro forma estimates of depreciation and amortization charges associated with the smelter's investment in equipment and facilities other than those classified as pollution control facilities. Attach as part of Exhibit B supporting schedules prepared according to the instructions for Line 18 above.

Line 19—Interest on Short-/term Debt. Report the estimates of interest and other financing charges on forecast short-term obligations as classified in the smelter's current liabilities on Schedule A.4. Interest and associated financing charges on longterm debt should not be included as an expense identifiable with the smelter's operations. Attach as part of Exhibit B a schedule showing the interest-bearing, short-term debt contracts identifiable with the smelter's operations, the interest rate projected for these contracts, and the estimated annual interest charges. Identify and explain any differences between the classifications used in this Schedule and those used in Line 20 of Schedule A.3.

Line 20—Miscellaneous Operating Expenses. Report only the total operating expenses associated with or allocated to the smelter that cannot be appropriately classified in one of the preceding line items. Attach as part of Exhibit B a schedule showing the classification of these residual operating expenses into major cost components. Explain the basis used for forecasting the cost under each component. Identify each cost component in terms of direct or indirect cost and explain the basis used for allocating the indirect costs to smelter operations. Identify and explain any differences between cost classifications included in this Schedule and those used in Line 21 of Schedule A.3.

Line 21—Total Other Operating Expenses. Enter for each year the sum of operating costs reported on Lines 14 through 20.

Line 22—Income From Operations. Enter for each year the difference between Lines 21 and 13.

Line 23—Income Taxes. Enter the product of income from operations (Line 22) and the sum of the Federal, state and local marginal tax rates. Attach as part of Exhibit B a schedule detailing the estimated Marginal tax rate by taxing entity.

Line 24—Net Income from Operations. Enter for each year the difference between Line 23 and 22.

Schedule C.2—Constant Controls Sustaining Capital Investment Forecast

General

The applicant should estimate and report, in Schedule C.2., yearly sustaining capital outlays for maintenance of the smelter's existing productive capability. These estimates should be forecast under the assumption that full compliance with SIP emission limitations for SO_2 will be achieved. Major elements of these outlays should be disclosed, as well as the total of such outlays. Estimates shall be restricted to those items that will be capitalized for tax purposes. These outlays shall primarily be for plant replacement, although outlays for improvements and expansion may be included to the extent that improvements and/or expansion, exclusive of required pollution control outlays, can be justified as economically feasible. Estimates of sustaining capital shall exclude any incremental investment for constant control requirements. Sustaining capital investments in facilities shared with other operating segments shall be allocated in accordance with the instructions given below.

Estimates of sustaining capital shall be compatible with productive capacity and pollution control requirements underlying the operating revenue and cost forecasts incorporated in Schedule C.1.

Lines 01 to 06—Sustaining Capital. Report for each year by individual line item property, plant and equipment sustaining capital investments assignable to smelter operations. Include both (1) property, plant and equipment directly associated with the smelter's operations and (2) facilities shared with other operating segments to the extent that a causal and beneficial relationship can be established for the intersegment allocations of such facility investments.

Attach as part of Exhibit B a schedule disclosing by individual line item the major elements of annual capital expenditures for sustaining capital. Further classify these annual capital expenditures into both (1) investments required to maintain the smelter versus investments in smelter expansion and improvements and (2) direct facility versus joint-use facility investments. Explain the method used for allocating capital expenditures on joint-use facilities to the smelter's operations.

Lines 07—Total Smelter Sustaining Capital. Enter for each year the total of Lines 01 through 06. Transfer the reported total for each year to Schedule C.3, Line 06.

Schedule C.3—Rate of Return Test

General

Applicants must complete this Schedule and/or Schedule B.7 and the accompanying schedules if they seek

eligibility for an NSO. The line items in Schedule C.3 are explained in the following instructions.

Line 01—Net Income from Operations. Enter for each year the amounts reported in Schedule C.1, Line 24.

Lines 02 and 03—Depreciation and Amortization. Enter for each year the amounts reported in Schedule C.1, Lines 17 and 18, respectively.

Line 04—Operating Cash Flow. Enter for each year the total of amounts reported on Lines 01 through 03.

Line 05—Constant Controls Capital Investment. Enter the estimated capital outlays for constant controls for the years during which outlays would be made. These values shall correspond to the investment estimates shown in the supporting schedules for Line 17 of Schedule C.1. Changes on working capital investment due to investment in constant controls facilities may be added to the capital investment estimates shown in the supporting schedules for Schedule C.1.

Line 06—Sustaining Capital. Enter for each year the amounts reported in Schedule C.2, Line 07.

Line 07—Total. Enter for each year the sum of lines 05 and 06.

Line 08—Net Cash Flow Projections. Enter for each year the difference between Lines 04 and 07.

Line 09—Discount Factors. Enter the discount factor for each year, computed as described in the instructions under Section 2.6.

Line 10—Present Value of Future Cash Flows. Enter for each year the product of Lines 08 and 09.

Line 11—Horizon Value. Enter under the Total column the estimated horizon value of the smelter. This shall be computed by capitalizing net cash flow projections in Line 08 as described in the instructions under Section 2.7.

Line 12—Discount Factor. Enter under the Total column the appropriate discount factor, computed as described in the instructions under Section 2.6.

Line 13—Present Value of Horizon Value. Enter under the Total column the product of Lines 11 and 12.

Line 14—Present Value of Future Cash Flows. Enter under the Total column the sum of amounts previously reported on Line 10 for 1983 through 1989.

Line 15—Total Present Value. Enter the sum of Lines 13 and 14.

Line 16—Net Smelter Capital Investment. Enter under the Total column the amount reported in Schedule A.4, Line 26 for 1982 if the value is greater than zero. If the value is zero or less, enter zero.

Line 17—Post-1977 Pollution Control Depreciation. Enter under the Total column the accumulated depreciation for sulfur dioxide control investments made after 1977 as reported in the supporting schedules to Schedule A.4, Line 17.

Line 18—Total. Enter the sum of Lines 16 and 17.

Line 19—Net Present Value. Enter the difference between Lines 15 and 18. Applicants reporting a negative net present value will pass the rate of return test.

Schedule D.1—Interim Controls Revenue Forecast

General

Use Schedule D.1 to report annual forecasts of operating revenues anticipated during the years 1983 through 1989 from operation of the smelter applying for an interim controls waiver. These interim controls revenue and production projections should be based on immediately implementing a program of interim controls. The assumed investment progrm should be based on the installation and operation of a well-designed sulfuric acid plant to treat all strong gas streams.

Forecast smelter revenues should be expressed on a tolling service equivalent basis as described in Section 2.3.4. The line items in Schedule D.1 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts, and (3) provide data and information to support the forecasts.

Lines 01 and 05—Concentrates Processed. Report for each year the forecast quantity of concentrates processed for unaffiliated parties (Line 01) and affiliated parties (Line 05).

Lines 02 and 06—Smelting Charge. Report for each year the forecast smelting charge for unaffiliated parties (Line 02) and affiliated parties (Line 06). See Section 2.4 for forecast copper smelting charges furnished by EPA.

Line 03 and 07—Total Smelter Revenues. Report for each year the forecast total operating revenues derived from processing concentrates. The total for unaffiliated parties (Line 03) is equal to the product of Lines 01, 02, and 04, and for affiliated parties (Line 07), the product of Lines 05, 06, and 08.

Lines 04 and 08—Average Product Grade. Report for each year the forecast average quality rating assigned to concentrates processed for unaffiliated parties (Line 04) and affiliated parties (Line 08).

Line 09—Total Co-Product Revenues. Report for each year the forecast net revenues from sales of co-products derived from the smelter's operations. Attach as part of Exhibit B a schedule showing by individual type of co-product the forecast quantity produced and sold, forecast market price per unit of sales, and forecast total revenues derived from the co-product sales.

Line 10—Total By-Product Revenues From Pollution Control Facilities. Report for each year forecast revenues from the sale of by-products derived from operation of the smelter's pollution control facilities. Attach as part of Exhibit B a schedule showing by type of by-product produced (e.g., sulfuric acid) the forecast quantity of output, forecast market price per unit of output sold, and forecast total revenue derived from the by-product sales.

Line 11—Total By-product Revenues From Other Smelter Processing. Report forecast revenues from the sales of gold, silver, and other by-products derived from the smelter's operations. Attach as part of Exhibit B a schedule providing additional documentation as specified in the instructions for Line 10.

Line 12—Total Co-product and By-product Revenues. Enter for each year the total of Lines 09 through 11.

Schedule D.2—Interim Controls Cost Forecast

General

Use Schedule D.2 to report annual forecasts of operating costs anticipated during the years 1981 through 1989 from operation of the smelter applying for an interim controls waiver. These interim controls cost and production projections should be based on immediately implementing a program of interim controls. The assumed investment program should be based on the installation and operation of a well-designed sulfuric acid plant to treat all strong gas streams.

The line items in Schedule D.2 are explained in the following instructions. Attach as part of Exhibit B schedules to (1) explain the methods used to make the required forecasts, (2) explain differences, if any, between historical trends and the forecasts, and (3) provide data and information to support the forecasts.

Line 01—Direct Labor Hours. Report for each year the quantity of direct labor hours required to support the processing levels previously reported. Attach as part of Exhibit B an explanation of the labor productivity factors involved.

Line 02—Average Hourly Wage Rate. Reports for each year the forecast average wage rate per unit of direct labor input. Attach as part of Exhibit B a

description of direct labor cost factors under any existing labor contracts that extend to the forecast period and an explanation of the methodology used to forecast wage rates. EPA-provided forecast wage indices are reported in Section 2.4.

Line 03—Total Wage Payments. Enter for each year the product of Lines 01 and 02.

Line 04—Supplemental Employee Benefits. Report for each year adjustments required to direct labor costs for other employee compensation under supplemental benefit plans. Attach as part of Exhibit B a description of such plans and their costs and an explanation of the methodology used to forecast such costs. EPA-provided forecast wage indices are reported in Section 2.4.

Line 05—Total Production Labor Cost. Enter for each year the total of Lines 03 and 04.

Lines 06, 09, 12, 15, and 18—Energy Quantities. Report for each year the quantity of energy by type required to support the processing levels reported in the smelter's revenue. Attach as part of Exhibit B an explanation of energy characteristics and use factors considered in forecasting the smelter's future energy requirements.

Lines 07, 10, 13, 16, and 19—Unit Prices. Report for each year the forecast price per unit of energy input by type of energy. Attach as part of Exhibit B a description of the energy price factors under any existing energy contracts that extend to the forecast period and an explanation of the methodology used to forecast unit energy prices. EPA-provided forecast energy indices are reported in Section 2.4.

Lines 08, 11, 14, 17, and 20—Total Payments. Enter for each year the products of quantity and prices paid for electricity (Lines 06×07), natural gas (Lines 09×10), coal (Lines 12×13), fuel oil (Lines 15×16), and other (Lines 18×19).

Line 21—Total Energy Costs. Enter for each year the total of Lines 08, 11, 14, 17, and 20.

Schedule D.3—Interim Controls Forecast Profit and Loss Summary

General

Use Schedule D.3 to report forecast revenue and cost information summed in Schedules D.1 and D.2 for the years 1983 through 1989. The transfer of line items from Schedules D.1 and D.2 to this Schedule is explained in the following instructions.

Line 01—Smelter Revenues—Unaffiliated Parties. Enter the totals reported in Schedule D.1, Line 03.

Line 02—Other Smelter Revenues—Affiliated Parties. Enter the totals reported in Schedule D.1, Line 07.

Line 03—Co-product and By-product Sales Revenues. Enter the totals reported in Schedule D.1, Line 12.

Line 04—Other Operating Revenues. Report operating revenues anticipated from sources not accounted for under Lines 01 through 03. Refer to instructions for Line 04 of Schedule A.3 for items that should not be included in "Other Operating Revenues." Attach as part of Exhibit B a schedule showing annual amounts forecast by individual revenue component for "other" operating revenues associated with the smelter's forecast interim controls operations. Identify in the supporting schedule any differences in the "other" revenue components reported in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 05—Total Operating Revenues. Enter for each year the total of Lines 01 through 04.

Line 06—Material Costs. Report total costs forecast for flux, refractories, coke and other materials directly associated with the smelter's processing of concentrates. Attach as part of Exhibit B a schedule showing the annual amounts forecast by major material cost components. For each cost component, identify the forecast quantity and unit price elements of material cost and explain the basis for forecasting these quantity and price elements. Identify in the supporting schedule any differences in the "other" material cost components shown in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 07—Production Labor Costs. Enter the totals reported in Schedule D.2, Line 05.

Line 08—Energy Costs. Enter the totals reported in Schedule D.2, Line 21.

Line 09—Pollution Control Costs. Report the total costs forecast for expenses identifiable with operation and maintenance of all pollution control equipment and facilities. By-product credits associated with operation of the pollution control facilities should be eliminated from the cost accounts, reclassified to Schedule D.1, Line 10 and included in Line 03 of this Schedule. Attach a schedule as part of Exhibit B classifying pollution control costs by major cost components. Explain the basis used for estimating each of the cost components.

Line 10—Production Overhead Costs. Report the total costs forecast for indirect labor, indirect materials and other production overhead costs associated with the smelter's constant controls forecasts. Attach as part of Exhibit B a schedule showing annual overhead costs projected by major cost components associated with the smelter's operations. For each cost component, where appropriate, identify the forecast quantity and unit price elements of overhead costs and explain the basis for estimating these quantity and price elements. Also identify in the supporting schedule any differences in production overhead costs classifications used in this Schedule and Schedule A.3 and explain the reasons for such differences.

Line 11—Other Production Costs. Report other forecast production costs not previously reported on Lines 06 through 10. Attach as part of Exhibit B supporting schedules showing the basis of the forecasts.

Line 12—Total Cost of Sales. Enter for each year the sum of operating costs reported on Lines 06 through 11.

Line 13—Gross Operating Profit. Enter for each year the difference between Lines 05 and 12.

Line 14—Selling, General and Administrative Expenses. Report the total costs forecast for administrative, marketing and general corporate overhead functions that directly or indirectly support the smelter's operations. Refer to the NSO Financial Reporting Overview for a general discussion of indirect cost allocations from overhead cost pools. Attach as part of Exhibit B a schedule classifying selling, general and administrative expenses into major cost components. Indicate whether each component represents costs directly assignable to the smelter or indirect costs allocated from other business segments to the smelter. Explain the basis used for estimating the amount of expected costs included in each component and the basis used for allocating indirect cost elements to the smelter. Identify and explain any differences between the selling, general and administrative cost classification used in this Schedule and that used in Line 15 of Schedule A.3.

Line 15—Taxes, Other than Income Taxes. Report the total costs forecast for property taxes and associated levies paid to governmental units by or for the benefit of the smelter operation. Attach as part of Exhibit B a schedule classifying operating taxes by major component. Indicate whether each component represents taxes directly assignable to the smelter or taxes that have been allocated among more than one facility. Explain the basis used for estimating taxes and the basis for any allocation of taxes to the smelter. Identify and explain any differences between the component classifications

used in this Schedule and those used in Line 16 of Schedule A.3.

Line 16—Research Costs. Report the estimates of research costs incurred directly by or for the benefit of the smelter operations. Attach as part of Exhibit B a schedule classifying the costs by major direct and indirect cost components. Explain the basis for estimating the costs assigned to each component. Identify and explain any differences between classifications used in this Schedule and those used in Line 17 of Schedule A.3.

Line 17—Pollution Control Facility Depreciation and Amortization. Report the estimates of depreciation and amortization charges associated with the smelter's actual and forecast investment in all pollution control equipment and facilities. Attach as part of Exhibit B supporting schedules classifying pollution control facilities by major assets or asset groups. For each facility component, indicate the depreciation or amortization method that would be reported for tax purposes. Based on that method, report the original cost of the component assets, undepreciated balance of the component assets, the remaining depreciable life and the annual depreciation or amortization charge. Indicate for each asset component whether the depreciation and amortization charges represent direct cost assignments or indirect cost allocations to the smelter.

Line 18—Other Smelter Facility Depreciation and Amortization. Report the pro forma estimates of depreciation and amortization charges associated with the smelter's investment in equipment and facilities other than those classified as pollution control facilities. Attach as part of Exhibit B supporting schedules prepared according to the instructions for Line 18 above.

Line 19—Interest on Short-Term Debt. Report the estimates of interest and other financing charges on forecast short-term obligations as classified in the smelter's current liabilities on Schedule A.4. Interest and associated financing charges on long-term debt should not be included as an expense identifiable with the smelter's operations. Attach as part of Exhibit B as schedule showing the interest-bearing, short-term debt contracts identifiable with the smelter's operations, the interest rate projected for these contracts, and the estimated annual interest charges. Identify and explain any differences between the classifications used in this Schedule and those used in Line 20 of Schedule A.3.

Line 20—Miscellaneous Operating Expenses. Report only the total operating expenses associated with or allocated to the smelter that cannot be appropriately classified in one of the preceding line items. Attach as part of Exhibit B a schedule showing the classification of these residual operating expenses into major cost components. Explain the basis used for forecasting the cost under each component. Identify each cost component in terms of direct or indirect cost and explain the basis used for allocating the indirect costs to smelter operations. Identify and explain any differences between cost classifications included in this Schedule and those used in Line 21 of Schedule A.3.

Line 21—Total Other Operating Expenses. Enter for each year the sum of operating costs reported on Lines 14 through 20.

Line 22—Income From Operations. Enter for each year the difference between Lines 21 and 13.

Line 23—Income Taxes. Enter the product of income from operations (Line 22) and the sum of the Federal, state and local marginal tax rates. Attach as part of Exhibit B a schedule detailing the estimated marginal tax rate by taxing entity.

Line 24—Net Income from Operations. Enter for each year the difference between Lines 23 and 22.

The temporary waiver from interim controls test is on Line 13. Applicants will be eligible for a temporary waiver from the interim developoment of constant control technology for sulfur dioxide emissions if the reported gross operating profit on Line 14 is a negative value for one or more years during which the NSO is in effect.

Schedule D.4—Interim Controls Sustaining Capital Investment Forecast

General

The applicant should estimate and report in Schedule D.4 yearly sustaining capital outlays for maintenance of the smelter's existing productive capability. These estimates should be forecast under the assumption that the smelter is operated after implementing a program of interim controls. Major elements of these outlays should be disclosed, as well as the total of such outlays. Estimates shall be restricted to those items that will be capitalized for tax purposes. These outlays shall primarily be for plant replacement, although outlays for improvements and expansion may be included to the extent that improvements and/or expansion, exclusive of required pollution control outlays, can be justified as economically feasible. Estimates of sustaining capital shall exclude any incremental investment for constant control requirements. Sustaining capital investments in facilities shared with other operating segments shall be allocated in accordance with the instructions given below.

Estimates of sustaining capital shal be compatible with productive capacity and pollution control requirements underlying the operating revenue and cost forecasts incorporated in Schedule D.3.

Lines 01 to 06—Sustaining Capital. Report for each year by individual line item property, plant and equipment sustaining capital investments assignable to smelter operations. Include both (1) property, plant and equipment directly associated with the smelter's operations and (2) facilities shared with other operating segments to the extent that a causal and beneficial relationship can be established for the intersegment allocations of such facility investments.

Attach as part of Exhibit B a schedule disclosing by individual line item the major elements of annual capital expenditures for sustaining capital. Further classify these annual capital expenditures into both (1) investments required to maintain the smelter versus investments in smelter expansion and improvements and (2) direct facility versus joint-use facility investments. Explain the method used for allocating capital expenditures on joint-use facilities to the smelter's operations.

Line 07—Total Smelter Sustaining Capital. Enter for each year the total of Lines 01 through 06. Transfer the reported total for each year to Schedule D.6, Line 06.

Schedule D.5—Cash Proceeds From Liquidation

General

Use Schedule D.5 to calculate cash proceeds from liquidation. Applicants should determine the current salvage value of their existing investment in the smelter as the net proceeds that could be derived through an orderly liquidation of the smelter's assets. The net cash proceeds should be reported after an appropriate allowance for disposal costs, contractual claims against the smelter (e.g., labor termination penalties), and income tax effects on the corporation of such liquidation costs.

The applicant must stipulate the most advantageous alternative market (use) for the smelter's facilities. Generally, this market will be:

- Secondary market for used plant and equipment.

• Sale for scrap.

• Abandonment where the disposal cost exceeds scrap value.

The current net salvage value should be disaggregated into the same property, plant and equipment asset groups reported under the historical capital investment summary, Schedule A.4. The line items in Schedule D.5 are explained in the following instructions.

Line 01—Current Assets. Enter in Columns 1 and 2, the value of total current assets shown in Line 08 of Schedule A.4 (Historical Capital Investment Summary) for 1982. No gain or loss should be reported in Columns 3 through 5 for the liquidation of current asset investments.

Lines 02–07—Property Plant and Equipment. Enter in Column 1 the appraised liquidation value (in terms of pretax cash proceeds) of the smelter by asset group. This estimate should be certified by a qualified third party professional appraiser and shall represent the best use and highest alternative value of these assets. The liquidation value of any assets which are jointly used by the smelter and other operating segments shall be excluded if, upon closure of the smelter, such assets would continue in service for the non-smelter activity.

In Column 2, report the net book value of these assets for which liquidation values have been reported in Column 1. The reported values should correspond with amounts reported for 1982 in lines 09 through 15 in Schedule A.4 as adjusted for appropriate eliminations of joint-use facilities and reconciliation to a net book value as reported for income taxes. Attach as part of Exhibit B supporting schedules showing all adjustments and conversion of net book value as reported on the financial statements, to net book value that would be used for income tax purposes.

Compute Column 3 as Column 1 less Column 2. The gain (or loss) shown in column 3 shall be segregated into ordinary income and capital gains components subject to taxation pursuant to applicable income tax rules. Enter ordinary income in Column 4 and capital gains in Column 5.

Line 08—Total Smelter Investment. Enter the sum of Lines 02 through 07 for each of the columns.

Line 09—Other Non-current Assets. In Column 1, report the appraised value of other non-current assets in accordance with the instructions for Line 18, Schedule A.4, except that any joint asset(s) that would continue in the event of smelter liquidation shall be excluded. This estimate shall be certified by a qualified third-party professional appraiser.

In Column 2, report the net book value of the non-current assets directly corresponding to those assets included in the liquidation value estimated under Column 1.

The remaining columns shall be completed in accordance with the instructions given above for Lines 02 to 06.

Lines 10—Total Smelter Value. Enter the sum of Lines 01, 08 and 09.

Line 11—Total Current Liabilities. Report in both Columns 1 and 2, the value of total current liabilities shown in Line 25 of Schedule A.4 for 1982.

Line 12—Gross Liquidation Value. Enter the difference between Lines 10 and 11.

Line 13—Liquidation Costs. In Columns 1, 3 and 4, report the value of any liquidation costs such as labor contract termination penalties, severance pay and related costs, associated with closure of the smelter.

Line 14—Taxable Gain (or Loss). Enter in Columns 4 and 5, the differences between Lines 12 and 13.

Line 15—Income Tax Rate. Enter the sum of the Federal, State and local marginal tax rates of the firm for ordinary income and capital gains in Columns 4 and 5, respectively. Attach as part of Exhibit B a schedule detailing the estimated marginal tax rate by taxing entity.

Line 16—Income Tax on Gain (or Loss). In columns 4 and 5, enter the product of Line 14 and the marginal income tax rates reported in Line 15. In Column 1, enter the sum of Columns 4 and 5.

Line 17—After-Tax Cash Proceeds. Enter in Column 1 the difference between Line 12 and the sum of Lines 13 and 16.

Schedule D.6—Permanent Waiver from Interim Controls Test

General

Applicants must complete this Schedule and its supporting schedules if they seek a permanent waiver from interim control requirements. The line items in Schedule D.6 are explained in the following instructions.

Line 01—Net Income from Operations. Enter for each year the amounts reported in Schedule D.3, Line 24.

Lines 02 and 03—Depreciation and Amortization. Enter for each year the amounts reported in Schedule D.3, Line 17 and 18, respectively.

Line 04—Operating Cash Flow. Enter for each year the total of amounts reported on Lines 01 through 03.

Line 05—Interim Controls Capital Investment. Enter the estimated capital outlays for interim controls for the years during which outlays would be made. These values shall correspond to the investment estimates shown in the supporting schedules for Line 17 of Schedule D.3. Changes in working capital investment due to investment in interim controls facilities may be added to the capital investment estimates shown in the supporting schedules for Schedule D.3.

Line 06—Sustaining Captial. Enter for each year the amounts reported in Schedule D.4, Line 07.

Line 07—Total. Enter for each year the sum of Lines 05 and 06.

Line 08—Net Cash Flow Projections. Enter for each year the difference between Lines 04 and 07.

Line 09—Discount Factors. Enter the discount factor for each year, computed as described in the instructions under Section 2.6.

Line 10—Present Value of Future Cash Flows. Enter for each year the product of Lines 08 and 09.

Line 11—Horizon Value. Enter under the Total column the estimated horizon value of the smelter. This shall be computed by capitalizing net cash flow projections in Line 08 as described in the instructions under Section 2.7.

Line 12—Discount Factor. Enter under the Total column the appropriate discount factor, computed as described in the instructions under Section 2.6.

Line 13—Present Value of Horizon Value. Enter under the Total column the product of Lines 11 and 12.

Line 14—Present Value of Future Cash Flows. Enter under the Total column the sum of amounts previously reported on Line 10 for 1983 through 1989.

Line 15–Total Present Value. Enter the sum of Lines 13 and 14.

Line 16–Current Salvage Value. Enter the amount reported in Schedule D.5, Line 17, if the value is greater than zero. If the value is zero or less, enter zero.

Line 17—Net Present Value. Enter the difference between Lines 15 and 16. Applicants reporting a negative net present value will be eligible for a permanent waiver from interim use of a constant control system for sulfur dioxide emissions.

SCHEDULE A.1—HISTORICAL REVENUE DATA

[Smelter identification]

	Line	1978	1979	1980	1981	1982
A. Copper product sales:						
1. Total quanity sold	01					
2. Unaffiliated customer sales:						
a. Quantity sold	02					
b. Operating revenue	03					
c. Average unit price	04					
d. Average product grade	05					
3. Affiliated customer sales:						
a. Quantity sold	06					
b. Operating revenue	07					
c. Average unit price	08					
d. Average product grade	09					
4. Adjusted copper revenues:						
a. Total copper revenues	10					
b. Transfer price adjustment	11					
c. Other revenue adjustments	12					
d. Adjusted copper revenues	13					
B. Lead product sales:						
1. Total quantity sold	14					
2. Unaffiliated customer sales:						
a. Quantity sold	15					
b. Operating revenue	16					
c. Average unit price	17					
d. Average product grade	18					
3. Affiliated customer sales:						
a. Quantity sold	19					
d. Operating revenue	20					
c. Average unit price	21					
d. Average product grade	22					
4. Adjusted lead revenues:						
a. Total lead revenues	23					
b. Transfer price adjustment	24					
c. Other revenue adjustments	25					
d. Adjusted lead revenues	26					
C. Zinc product sales:						
1. Total quantity sold	27					
2. Unaffiliated customer sales:						
a. Quantity sold	28					
b. Operating revenue	29					
c. Average unit price	30					
d. Average product grade	31					
3. Affiliated customer sales:						
a. Quantity sold	32					
b. Operating revenue	33					
c. Average unit price	34					
d. Average product grade	35					
4. Adjusted zinc revenues:						
a. Total zinc revenues	36					
b. Transfer price adjustment	37					
c. Other revenue adjustments	38					
d. Adjusted zinc revenues	39					
D. Molybdenum or other nonferrous metal sales:						
1. Total quantity sold	40					
2. Unaffiliated customer sales:						
a. Quantity sold	41					
b. Operating revenue	42					
c. Average unit price	43					
d. Average product grade	44					
3. Affiliated customer sales:						
a. Quantity sold	45					
b. Operating revenue	46					
c. Average unit price	47					
d. Average product grade	48					
4. Adjusted molybdenum or other nonferrous metal revenues:						
a. Total molybdenum or other nonferrous metal revenues	49					
b. Transfer price adjustment	50					
c. Other revenue adjustments	51					
d. Adjusted molybdenum or other nonferrous metal revenues	52					
E. Primary metal revenues	53					
F. Tolling service revenues:						
1. Total toll concentrates processed	54					
2. Unaffiliated customer revenues:						
a. Concentrates processed	55					
b. Operating revenue	56					
c. Average unit price	57					
d. Average product grade	58					
3. Affiliated customer revenues:						
a. Concentrates processed	59					
b. Operating revenue	60					
c. Average unit price	61					
d. Average product grade	62					
4. Adjusted tolling service revenues:						
a. Total tolling service revenue	63					
b. Transfer price adjustment	64					
c. Other revenue adjustments	65					
d. Adjusted tolling service revenues	66					
G. Coproduct and by product sales:						
1. Total coproduct revenues	67					
2. Total byproduct revenues:						
a. Pollution control facilities	68					

SCHEDULE A.1—HISTORICAL REVENUE DATA—Continued

[Smelter identification]

	Line	1978	1979	1980	1981	1982
b. Other smelter processing	69					
3. Total coproduct and byproduct revenues	70					

SCHEDULE A.2—HISTORICAL COST DATA

[Smelter identification]

	Line	1978	1979	1980	1981	1982
A. Concentrate costs:						
1. Total quantity purchased	01					
2. Unaffiliated purchases:						
a. Quantity purchased	02					
b. Concentrate cost	03					
c. Average unit price	04					
d. Average concentrate grade	05					
3. Affiliated purchases:						
a. Quantity purchased	06					
b. Concentrate cost	07					
c. Average unit price	08					
d. Average concentrate grade	09					
4. Adjusted concentrate costs:						
a. Total concentrate costs	10					
b. Transfer price adjustment	11					
c. Other cost adjustments	12					
d. Adjusted concentrate cost	13					
B. Production labor cost:						
1. Direct labor hours	14					
2. Average hourly wage rate	15					
3. Total wage payments	16					
4. Supplemental employee benefits	17					
5. Total production labor cost	18					
C. Energy costs:						
1. Electricity:						
a. Quantity in kilowatt hours	19					
b. Price per kwh	20					
c. Total electricity payments	21					
2. Natural gas:						
a. Quantity in mcf	22					
b. Price per mcf	23					
c. Total natural gas payments	24					
c. Coal:						
a. Quantity in tons	25					
b. Price per ton	26					
c. Total coal payments	27					
4. Fuel oil:						
a. Quantity in gallons	28					
b. Price per gallon	29					
c. Total fuel oil payments	30					
5. Other (specify):						
a. Quantity (specific units)	31					
b. Price per unit	32					
c. Total payments	33					
6. Total energy costs	34					

SCHEDULE A.3—HISTORICAL PROFIT AND LOSS SUMMARY

[Smelter identification]

	Line	1978	1979	1980	1981	1982
A. Operating revenues:						
1. Primary metal sales	01					
2. Coproduct and byproduct sales	02					
3. Tolling service revenues	03					
4. Other operating revenues	04					
5. Total operating revenues	05					
B. Cost of sales:						
1. Concentrates processed	06					
2. Other materials	07					
3. Production labor	08					
4. Energy costs	09					
5. Pollution control cost	10					
6. Production overhead	11					
7. Other production costs	12					
8. Total cost of sales	13					
C. Gross operating profit	14					
D. Other operating expenses:						
1. Selling, general and administrative	15					
2. Taxes, other than income tax	16					
3. Research costs	17					
4. Depreciation and amortization:						
a. Pollution control facilities	18					
b. Other smelter facilities	19					

SCHEDULE A.3—HISTORICAL PROFIT AND LOSS SUMMARY—Continued

[Smelter identification]

	Line	1978	1979	1980	1981	1982
5. Interest on short term debt	20					
6. Miscellaneous operating expenses	21					
7. Total other operating expenses	22					
E. Income from operations	23					
F. Other income and (expense):						
1. Gain/(loss) on disposition of property	24					
2. Miscellaneous other income and (expense)	25					
3. Total other income and (expense)	26					
G. Net taxable income	27					

SCHEDULE A.4—HISTORICAL CAPITAL INVESTMENT SUMMARY

[Smelter identification]

	Line	1978	1979	1980	1981	1982
A. Current assets:						
1. Cash on hand and deposit	01					
2. Temporary cash investments	02					
3. Trade receivables, net:						
a. Unaffiliated customers	03					
b. Affiliated customers	04					
4. Inventories:						
a. Raw materials and products	05					
b. Other materials and supplies	06					
5. Other current assets	07					
6. Total current assets	08					
B. Property, plant and equipment:						
1. Land	09					
2. Buildings and improvements	10					
3. Machinery and equipment	11					
4. Transportation equipment	12					
5. Pollution control facilities	13					
6. Other fixed assets	14					
7. Total smelter investment	15					
8. Less: Accumulated depreciation and amortization	16					
9. Net smelter investment	17					
C. Other noncurrent assets	18					
D. Total smelter capital investment	19					
E. Current liabilities:						
1. Trade accounts and notes payable:						
a. Unaffiliated suppliers	20					
b. Affiliated suppliers	21					
2. Other expense accruals	22					
3. Notes payable, current	23					
4. Other current liabilities	24					
5. Total current liabilities	25					
F. Net smelter capital investment	26					

SCHEDULE B.1—PRE-CONTROL REVENUE FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast smelter revenues—unaffiliated parties:								
1. Concentrates processed	01							
2. Smelting charge	02							
3. Total smelter revenues	03							
4. Average product grade	04							
B. Forecast smelter revenues—affiliated parties:								
1. Concentrates processed	05							
2. Smelting charge	06							
3. Total smelter revenues	07							
4. Average product grade	08							
C. Forecast co-product and by-product sales:								
1. Total co-product revenues	09							
2. Total by-product revenues from:								
a. Pollution control facilities	10							
b. Other smelter processing	11							
3. Total co-product and by-product revenues	12							

SCHEDULE B.2—PRE-CONTROL COST FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast production labor cost:								
1. Direct labor hours	01							
2. Average hourly wage rate	02							
3. Total wage payments	03							
4. Supplemental employee benefits	04							
5. Total production labor cost	05							
B. Forecast energy costs:								
1. Electricity:								
a. Quantity in kilowatt hours	06							
b. Price per kwh	07							
c. Total electricity payments	08							
2. Natural gas:								
a. Quantity in mcf	09							
b. Price per mcf	10							
c. Total natural gas payments	11							
3. Coal:								
a. Quantity in tons	12							
b. Price per ton	13							
c. Total coal payments	14							
4. Fuel oil:								
a. Quantity in gallons	15							
b. Price per gallon	16							
c. Total fuel oil payments	17							
5. Other (specify):								
a. Quantity (specific units)	18							
b. Price per unit	19							
c. Total payments	20							
6. Total energy costs	21							

SCHEDULE B. 3—PRE-CONTROL FORECAST PROFIT AND LOSS SUMMARY

[Smelter idnetification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast operating revenues:								
1. Smelter revenues—unaffiliated parties	01							
2. Smelter revenues—affiliated parties	02							
3. Co-product and by-product sales	03							
4. Other operating revenues	04							
5. Total operating revenues	05							
B. Forecast cost of sales:								
1. Material costs	06							
2. Production labor costs	07							
3. Energy costs	08							
4. Pollution control costs	09							
5. Production overhead	10							
6. Other production costs	11							
7. Total costs of sales	12							
C. Forecast gross operating profit	13							
D. Forecast other operating expenses:								
1. Selling, general and administrative expenses	14							
2. Taxes, other than income tax	15							
3. Research costs	16							
4. Depreciation and amortization								
a. Pollution control facilities	17							
b. Other smelter facilities	18							
5. Interest on short-term debt	19							
6. Miscellaneous operating expenses	20							
7. Total other operating expenses	21							
E. Forecast income from operations	22							

SCHEDULE B.4—CONSTANT CONTROLS REVENUE FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast smelter revenues—unaffiliated parties:								
1. Concentrates processed	01							
2. Smelting charge	02							
3. Total smelter revenues	03							
4. Average product grade	04							
B. Forecast smelter revenues—affiliated parties:								
1. Concentrates processed	05							
2. Smelting charge	06							
3. Total smelter revenues	07							
4. Average product grade	08							

SCHEDULE B.4—CONSTANT CONTROLS REVENUE FORECAST—Continued

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
C. Forecast co-product and by-product sales:								
1. Total co-product revenues	09							
2. Total by-product revenues from:								
a. Pollution control facilities	10							
b. Other smelter processing	11							
3. Total co-product and by-product revenues	12							

SCHEDULE B.5—CONSTANT CONTROLS COST FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast production labor cost:								
1. Direct labor hours	01							
2. Average hourly wage rate	02							
3. Total wage payments	03							
4. Supplemental employee benefits	04							
5. Total production labor cost	05							
B. Forecast energy costs:								
1. Electricity:								
a. Quantity in kilowatt hours	06							
b. Price per kwh	07							
c. Total electricity payments	08							
2. Natural gas:								
a. Quantity in mcf	09							
b. Price per mcf	10							
c. Total natural gas payments	11							
3. Coal:								
a. Quantity in tons	12							
b. Price per ton	13							
c. Total coal payments	14							
4. Fuel oil:								
a. Quantity in gallons	15							
b. Price per gallon	16							
c. Total fuel oil payments	17							
5. Other (specify):								
a. Quantity (specific units)	18							
b. Price per unit	19							
c. Total payments	20							
6. Total energy costs	21							

SCHEDULE B.6—CONSTANT CONTROLS PROFIT AND LOSS SUMMARY FOR THE PROFIT PROTECTION TEST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast operating revenues:								
1. Smelter revenues—unaffiliated parties	01							
2. Smelter revenues—affiliated parties	02							
3. Co-product and by-product sales	03							
4. Other operating revenues	04							
5. Total operating revenues	05							
B. Forecast cost of sales:								
1. Material costs	06							
2. Production labor costs	07							
3. Energy costs	08							
4. Pollution control costs	09							
5. Production overhead	10							
6. Other production costs	11							
7. Total cost of sales	12							
C. Forecast gross operating profit	13							
D. Forecast other operating expenses:								
1. Selling, general and administrative expenses	14							
2. Taxes, other than income tax	15							
3. Research costs	16							
4. Depreciation and amortization								
a. Pollution control facilities	17							
b. Other smelter facilities	18							
5. Interest on short-term debt	19							
6. Miscellaneous operating expenses	20							
7. Total other operating expenses	21							
E. Forecast income from operations	22							

SCHEDULE B.7—PROFIT PROTECTION TEST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989	Total
A. Pre-Control Case:									
1. Net income from operations	01								XXXX
2. Discount factors	02								XXXX
3. Present value of future net income	03								XXXX
4. Horizon value	04	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
5. Discount factor	05	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
6. Present value of horizon value	06	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
7. Present value of future net income	07	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
8. Total present value	08	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
B. Constant controls case:									
1. Net income from operations	09								XXXX
2. Discount factors	10								XXXX
3. Present value of future net income	11								XXXX
4. Horizon value	12	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
5. Discount factor	13	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
6. Present value of horizon value	14	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
7. Present value of future net income	15	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
8. Total present value	16	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
C. Ratio of total present value of constant controls case to total present value of base case	17	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	

SCHEDULE C.1—CONSTANT CONTROLS PROFIT AND LOSS SUMMARY FOR THE RATE OF RETURN TEST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast operating revenues:								
1. Smelter revenues—unaffiliated parties	01							
2. Smelter revenues—affiliated parties	02							
3. Co-product and by-product sales	03							
4. Other operating revenues	04							
5. Total operating revenues	05							
B. Forecast cost of sales:								
1. Material costs	06							
2. Production labor costs	07							
3. Energy costs	08							
4. Pollution control costs	09							
5. Production overhead	10							
6. Other production costs	11							
7. Total cost of sales	12							
C. Forecast gross operating profit	13							
D. Forecast other operating expenses:								
1. Selling, general and administrative expenses	14							
2. Taxes, other than income tax	15							
3. Research costs	16							
4. Depreciation and amortization:								
a. Pollution control facilities	17							
b. Other smelter facilities	18							
5. Interest on short-term debt	19							
6. Miscellaneous operating expenses	20							
7. Total other operating expenses	21							
E. Forecast income from operations	22							
F. Forecast income taxes	23							
G. Forecast net income from operations	24							

SCHEDULE C.2—CONSTANT CONTROLS SUSTAINING CAPITAL INVESTMENT FORECAST

[Smelter identification]

Sustaining capital	Line	1983	1984	1985	1986	1987	1988	1989
1. Land	01							2
2. Buildings and improvements	02							2
3. Machinery and equipment	03							2
4. Transportation equipment	04							2
5. Pollution control facilities	05							2
6. Other fixed assets	06							2
7. Total smelter sustaining capital	07							2

SCHEDULE C.3—RATE OF RETURN TEST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989	Total
A. Operating cash flow projection:									
1. Net income from operations	01								XXXX
2. Depreciation and amortization:									
a. Pollution control facilities	02								XXXX
b. Other smelter facilities	03								XXXX

SCHEDULE C.3—RATE OF RETURN TEST—Continued

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989	Total
3. Operating cash flow	04								XXXX
4. Capital expenditure projections:									
a. Constant controls	05								XXXX
b. Sustaining capital	06								XXXX
Total	07								XXXX
5. Net cash flow projections	08								XXXX
6. Discount factors	09								XXXX
7. Present value of future cash flows	10								XXXX
B. Net present value:									
1. Horizon value	11	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
2. Discount factor	12	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
3. Present value of horizon value	13	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
4. Present value of future cash flows	14	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
5. Total present value	15	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
6. Invested capital:									
a. Net smelter capital investment	16	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
b. Post-1977 pollution control depreciation	17	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
c. Total	18	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
7. Net present value	19	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	

SCHEDULE D.1—INTERIM CONTROLS REVENUE FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast smelter revenues—unaffiliated parties:								
1. Concentrates processed	01							
2. Smelting charge	02							
3. Total smelter revenues	03							
4. Average product grade	04							
B. Forecast smelter revenues—affiliated parties:								
1. Concentrates processed	05							
2. Smelting Charge	06							
3. Total smelter revenues	07							
4. Average product grade	08							
C. Forecast co-product and by-product sales:								
1. Total co-product revenues	09							
2.! Total by-product revenues from:								
a. Pollution control facilities	10							
b. Other smelter processing	11							
3. Total co-product and by-product revenues	12							

SCHEDULE D.2—INTERIM CONTROL REVENUE FORECAST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast production labor cost:								
1. Direct labor hours	01							
2. Average hourly wage rate	02							
3. Total wage payments	03							
4. Supplemental employee benefits	04							
5. Total production labor cost	05							
B. Forecast energy costs:								
1. Electricity:								
a. Quantity in kilowatt hours	06							
b. Price per kwh	07							
c. Total electricity payments	08							
2. Natural gas:								
a. Quantity in mcf	09							
b. Price per mcf	10							
c. Total natural gas payments	11							
3. Coal:								
a. Quantity in tons	12							
b. Price per ton	13							
c. Total coal payments	14							
4. Fuel oil:								
a. Quality in gallons	15							
b. Price per gallon	16							
c. Total fuel oil payments	17							
5. Other (specify):								
a. Quantity (specific units)	18							
b. Price per unit	19							
c. Total payments	20							

SCHEDULE D.2—INTERIM CONTROL REVENUE FORECAST—Continued

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
6. Total energy costs	21							

SCHEDULE D.3—INTERIM CONTROLS FORECAST PROFIT AND LOSS SUMMARY

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989
A. Forecast operating revenues:								
1. Smelter revenues—unaffiliated parties	01							
2. Smelter revenues—affiliated parties	02							
3. Co-product and by-product sales	03							
4. Other operating revenues	04							
5. Total operating revenues	05							
B. Forecast cost of sales:								
1. Material costs	06							
2. Production labor costs	07							
3. Energy costs	08							
4. Pollution control costs	09							
5. Production overhead	10							
6. Other production costs	11							
7. Total cost of sales	12							
C. Forecast gross operating profit	13							
D. Forecast other operating expenses:								
1. Selling, general and administrative expenses	14							
2. Taxes, other than income tax	15							
3. Research costs	16							
4. Depreciation and amortization								
a. Pollution control facilities	17							
b. Other smelter facilities	18							
5. Interest on short-term debt	19							
6. Miscellaneous operating expenses	20							
7. Total other operating expenses	21							
E. Forecast income from operations	22							
F. Forecast income taxes	23							
G. Forecast net income from operations	24							

SCHEDULE D.4—INTERIM CONTROL SUSTAINING CAPITAL INVESTMENT FORECAST

[Smelter identification]

Sustaining capital	Line	1983	1984	1985	1986	1987	1988	1989
1. Land	01							
2. Buildings and improvements	02							
3. Machinery and equipment	03							
4. Transportation equipment	04							
5. Pollution control facilities	05							
6. Other fixed assets	06							
7. Total smelter sustaining capital	07							

SCHEDULE D.5—CASH PROCEEDS FROM LIQUIDATION

[Smelter identification]

	Line	(1) Estimated liquidation value	(2) Reported net book value	(3) Total gain (loss)	Gain (loss) subject to taxation as—	
					(4) Ordinary income	(5) Capital gain
A. Total current assets	01			XXXXX	XXXXX	XXXXX
B. Property, plant and equipment:						
1. Land	02					
2. Buildings and improvements	03					
3. Machinery and equipment	04					
4. Transportation equipment	05					
5. Pollution control facilities	06					
6. Other fixed assets	07					
7. Total	08					
C. Other Noncurrent assets	09					
D. Total smelter value	10					
E. Total current liabilities	11			XXXXX	XXXXX	XXXXX
F. Gross liquidation value	12					
G. Liquidation costs	13		XXXXX			XXXXX
H. Net Taxable Gain (or loss)	14	XXXXX	XXXXX	XXXXX		
I. Income tax rate	15	XXXXX	XXXXX	XXXXX		
J. Income tax on gain (loss)	16		XXXXX	XXXXX		
K. After tax cash proceeds from liquidation	17		XXXXX	XXXXX	XXXXX	XXXXX

SCHEDULE D.6—PERMANENT WAIVER FROM INTERIM CONTROL TEST

[Smelter identification]

	Line	1983	1984	1985	1986	1987	1988	1989	Total
A. Operating cash flow projection:									
1. Net income from operations	01								XXXX
2. Depreciation and amortization:									
a. Pollution control facilities	02								XXXX
b. Other smelter facilities	03								XXXX
3. Operating cash flow	04								XXXX
4. Capital expenditure projections:									
a. Interim controls	05								XXXX
b. Sustaining capital	06								XXXX
c. Total	07								XXXX
5. Net cash flow projections	08								XXXX
6. Discount factors	09								XXXX
7. Present value of future cash flows	10								XXXX
B. Net present value:									
1. Horizon value	11	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
2. Discount factor	12	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
3. Present value of horizon value	13	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
4. Present value of future cash flows	14	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
5. Total present value	15	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
6. Current salvage value	16	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	
7. Net present value	17	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX	XXXX

Department of Defense

General Services Administration

National Aeronautics and Space Administration

Federal Acquisition Regulation; Final Rule

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Ch. 1

Establishing the Federal Acquisition Regulation

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Federal Acquisition Regulation (FAR) establishes (a) a single regulation for use by all Executive agencies in their acquisition of supplies and services with appropriated funds, and (b) the Federal Acquisition Regulations System consisting of the FAR and agency acquisition regulations that implement or supplement the FAR. The FAR is prepared, issued, and maintained, and the Federal Acquisition Regulations System is prescribed, jointly by the Secretary of Defense, the Administrator of General Services, and the Administrator, National Aeronautics and Space Administration, under their several statutory authorities. The FAR, together with agency supplemental regulations, replaces the current Federal Procurement Regulations System, the Defense Acquisition Regulation, and the NASA Procurement Regulation. Regulations in Titles 32 and 41 of the Code of Federal Regulations will continue to apply to existing contracts. The major intended effects of the FAR are to (a) produce a clear, understandable document that maximizes feasible uniformity in the acquisition process, (b) reduce the proliferation of agency acquisition regulations, (c) implement recommendations made by the Commission on Government Procurement, the Federal Paperwork Commission, various Congressional groups, and others, and (d) facilitate agency, industry, and public participation in the development and maintenance of the FAR and agency acquisition regulations.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT:
Mr. James T. Brannan, Director, Defense Acquisition Regulatory Council, for DOD, (202) 697-9125;
Mr. William B. Ferguson, Chairman, Civilian Agency Acquisition Council, for Civilian agencies other than NASA, (202) 566-1043;
Mr. Hugh H. Wilson, Director, Procurement Policy Division, for NASA, (202) 755-8530.

SUPPLEMENTARY INFORMATION:

Note.—Copies of the FAR in the **Federal Register**, loose-leaf, and CFR form may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the FAR in loose-leaf form will be available before January 1, 1984.

List of Subjects in 48 CFR Chapter 1

Government procurement.

For the reasons set out in the preamble, there is established in the Code of Federal Regulations Title 48—Federal Acquisition Regulations System, Chapter 1—Federal Acquisition Regulation, consisting of Parts 1 through 69 to read as set forth below.

1984 EDITION

Foreword

The Federal Acquisition Regulation (FAR) is the primary regulation for use by all Federal Executive agencies in their acquisition of supplies and services with appropriated funds. The FAR System has been developed in accordance with the requirements of the Office of Federal Procurement Policy Act of 1974, as amended by Pub. L. 96-83. The FAR is issued within applicable laws under the joint authorities of the Administrator of General Services, the Secretary of Defense, and the Administrator for the National Aeronautics and Space Administration, under the broad policy guidelines of the Administrator for Federal Procurement Policy.

The FAR, together with agency supplemental regulations, replaces the current Federal Procurement Regulations System, the Defense Acquisition Regulation, and the NASA Procurement Regulation. It precludes agency acquisition regulations that unnecessarily repeat, paraphrase, or otherwise restate the FAR and it limits agency acquisition regulations to those necessary to implement FAR policies and procedures within an agency. The FAR provides for coordination, simplicity, and uniformity in the Federal acquisition process. The FAR includes changes recommended by the Commission on Government Procurement, the Federal Paperwork Commission, various congressional groups, and others. It also provides for agency and public participation in developing the FAR and agency acquisition regulations.

This edition is the initial publication of the FAR. It is effective on April 1, 1984, in accordance with procedures to be established by the undersigned.

Caspar W. Weinberger,
Secretary of Defense.

Gerald P. Carmen,
Administrator of General Services.

James M. Beggs,
Administrator, National Aeronautics and Space Administration.

FEDERAL ACQUISITION REGULATION

SUBCHAPTER A—General

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

1.000 Scope of part.

This part sets forth basic policies and general information about the Federal Acquisition Regulations System including purpose, authority, applicability, issuance, arrangement, numbering, dissemination, implementation, supplementation, maintenance, administration, and deviation. Subparts 1.2, 1.3, and 1.4 prescribe administrative procedures for maintaining the FAR System.

SUBPART 1.1—PURPOSE, AUTHORITY, ISSUANCE

1.101 Purpose.

The Federal Acquisition Regulations System is established for the codification and publication of uniform policies and procedures for acquisition by all executive agencies. The Federal Acquisition Regulations System consists of the Federal Acquisition Regulation (FAR), which is the primary document, and agency acquisition regulations that implement or supplement the FAR. The FAR includes guidelines and procedures for administering and maintaining the FAR System.

1.102 Authority.

(a) The development of the FAR System is in accordance with the requirements of the Office of Federal Procurement Policy Act of 1974 (Pub. L. 93-400), as amended by Pub. L. 96-83.

(b) The FAR is prepared, issued, and maintained, and the FAR System is prescribed, jointly by the Secretary of

Defense, the Administrator of General Services, and the Administrator, National Aeronautics and Space Administration, under their several statutory authorities.

1.103 Applicability.

The FAR applies to all acquisitions as defined in Part 2 of the FAR, except where expressly excluded.

1.104 Issuance.

1.104-1 Publication and code arrangement.

(a) The FAR is published in (1) the daily issue of the Federal Register, (2) cumulated form in the Code of Federal Regulations (CFR), and (3) a separate loose-leaf edition.

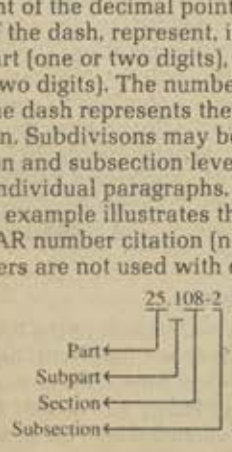
(b) The FAR is issued as Chapter 1 of Title 48, CFR. Subsequent chapters are reserved for agency acquisition regulations that implement or supplement the FAR (see Subpart 1.3). The CFR Staff will assign chapter numbers to requesting agencies.

(c) Each numbered unit or segment (e.g., part, subpart, section, etc.) of an agency acquisition regulation that is codified in the CFR shall begin with the chapter number. However, the chapter number assigned to the FAR will not be included in the numbered units or segments of the FAR.

1.104-2 Arrangement of regulations.

(a) *General.* The FAR is divided into subchapters, parts (each of which deals with a separate aspect of acquisition), subparts, sections, and subsections.

(b) *Numbering.* (1) The numbering system permits the discrete identification of every FAR paragraph. The digits to the left of the decimal point represent the part number. The numbers to the right of the decimal point and to the left of the dash, represent, in order, the subpart (one or two digits), and the section (two digits). The number to the right of the dash represents the subsection. Subdivisons may be used at the section and subsection level to identify individual paragraphs. The following example illustrates the make-up of a FAR number citation (note that subchapters are not used with citations):



(2) Subdivisions below the section or subsection level shall consist of parenthetical alphanumerics reading from highest to lowest indenture as follows: lower case alphabet, Arabic numbers, lower case Roman numerals, and upper case alphabet. The following example is illustrative:

(a)(1)(i)(A)

Subdivisions, below the 4th level shall repeat the sequence.

(c) *References and citations.* (1) Unless otherwise stated, cross-references indicate parts, subparts, sections, subsections, paragraphs, subparagraphs, or subdivisions of this regulation.

(2) This regulation may be referred to as the Federal Acquisition Regulation or the FAR.

(3) Using the FAR coverage at 9.106-4(d) as a typical illustration, reference to the—

(i) Part would be "FAR Part 9" outside the FAR and "Part 9" within the FAR.

(ii) Subpart would be "FAR Subpart 9.1" outside the FAR and "Subpart 9.1" within the FAR.

(iii) Section would be "FAR 9.106" outside the FAR and "9.106" within the FAR.

(iv) Subsection would be "FAR 9.106-4" outside the FAR and "9.106-4" within the FAR.

(v) Paragraph would be "FAR 9.106-4(d)" outside the FAR and "9.106-4(d)" within the FAR.

(4) Citations of authority (e.g., statutes or executive orders) in the FAR shall follow the Federal Register form guides.

1.104-3 Copies.

Copies of the FAR in Federal Register, loose-leaf, and CFR form may be purchased from the Superintendent of Documents, Government Printing Office (GPO), Washington, DC 20402.

SUBPART 1.2—ADMINISTRATION

1.201 Maintenance of the FAR.

1.201-1 The two councils.

(a) Subject to the authorities discussed in 1.102, revisions to the FAR will be prepared and issued through the coordinated action of two councils, the Defense Acquisition Regulatory Council (DAR Council) and the Civilian Agency Acquisition Council (CAA Council). Members of these councils shall—

(1) Represent their agencies on a full-time basis;

(2) Be selected for their superior qualifications in terms of acquisition experience and demonstrated professional expertise; and

(3) Be funded by their respective agencies.

(b) The chairperson of the CAA Council shall be the representative of the Administrator of General Services. The other members of this council shall be one each representative from the (1) Departments of Agriculture, Commerce, Energy, Health and Human Services, Housing and Urban Development, Interior, Labor, and Transportation, and (2) Environmental Protection Agency, Small Business Administration, and Veterans Administration.

(c) The Director of the DAR Council shall be the representative of the Secretary of Defense. The operation of the DAR Council will be as prescribed by the Secretary of Defense. Membership shall include representatives of the military Departments, the Defense Logistics Agency, and the National Aeronautics and Space Administration.

(d) Responsibility for processing revisions to the FAR is apportioned by the two councils so that each council has cognizance over specified parts or subparts.

(e) Each council shall be responsible for—

(1) Agreeing on all revisions with the other council;

(2) Submitting to the FAR Secretariat (see 1.201-2) the information required under paragraphs 1.501(c) and (e) for publication in the Federal Register of a notice soliciting comments on a proposed revision to the FAR;

(3) Considering all comments received in response to notice of proposed revisions;

(4) Arranging for public meetings;

(5) Preparing any final revision in the appropriate FAR format and language; and

(6) Submitting any final revision to the FAR Secretariat for publication in the Federal Register and printing for distribution.

1.201-2 FAR Secretariat.

(a) The General Services Administration is reponsible for establishing and operating the FAR Secretariat to print, publish, and distribute the FAR through the Code of Federal Regulations system (including a loose-leaf edition with periodic updates).

(b) Additionally, the FAR Secretariat shall provide the two councils with centralized services for—

(1) Keeping a synopsis of current FAR cases and their status;

(2) Assigning FAR case numbers;

(3) Maintaining official files;

(4) Assisting parties interested in reviewing the files on completed cases; and

(5) Performing miscellaneous administrative tasks pertaining to the maintenance of the FAR.

1.202 Agency compliance with the FAR.

Agency compliance with the FAR (see 1.304) is the responsibility of the Secretary of Defense (for the military departments and defense agencies), the Administrator of General Services (for civilian agencies other than NASA), and the Administrator of NASA (for NASA activities).

SUBPART 1.3—AGENCY ACQUISITION REGULATIONS

1.301 Policy.

(a) Subject to the authorities in (c) below and other statutory authority and, except as stated in 1.301(b) below, an agency head may issue or authorize the issuance of agency acquisition regulations that (1) implement or supplement the FAR and (2) incorporate, together with the FAR, agency-wide policies, procedures, contract clauses, and solicitation provisions that govern the contracting process or otherwise control the relationship between the agency, including any of its suborganizations, and contractors or prospective contractors. Agency-wide acquisition regulations shall be published in the Federal Register as required by law.

(b) Subject to the authorities in (c) below and other statutory authority, an agency head may issue or authorize the issuance of internal agency guidance at any o ganizational level (e.g., designations and delegations of authority, assignments of responsibilities, work-flow procedures, and internal reporting requirements). Such agency internal guidance need not be published in the Federal Register.

(c) Agency acquisition regulations implementing or supplementing the FAR are, for—

(1) The military departments and defense agencies, issued subject to the authority of the Secretary of Defense;

(2) NASA activities, issued subject to the authorities of the Administrator of NASA; and

(3) The civilian agencies other than NASA, issued by the heads of those agencies subject to the overall authority of the Administrator of General Services or independent authority the agency may have.

1.302 Limitations.

Agency acquisition regulations shall be limited to—

(a) Those necessary to implement FAR policies and procedures within the agency; and

(b) Additional policies, procedures, solicitation provisions, or contract clauses that supplement the FAR to satisfy the specific needs of the agency.

1.303 Codification and public participation.

(a) Agency acquisition regulations that are published in the Federal Register shall be codified under an assigned chapter in Title 48, Code of Federal Regulations, and shall parallel the FAR in format, arrangement, and numbering system (but see 1.104-1(c)). Coverage in an agency acquisition regulation that implements a specific part, subpart, section, or subsection of the FAR shall be numbered and titled to correspond to the appropriate FAR number and title. Supplementary material for which there is no counterpart in the FAR shall be codified using chapter, part, subpart, section, or subsection numbers of 70 and up (e.g., for the Department of Interior, whose assigned chapter number in Title 48 is 14, Part 1470, Subpart 1401.70, section 1401.370, or subsection 1401.301-70.)

(b) Agency heads shall establish procedures to assure public participation when appropriate in the promulgation of agency acquisition regulations that must be published in the Federal Register (see 1.301(a)). The coverage on public participation in Subpart 1.5 shall be the principal guideline for establishing these procedures.

1.304 Agency control and compliance procedures.

(a) Under the authorities of 1.301(c), agencies shall control and limit issuance of agency acquisition regulations and shall establish formal procedures for the review of these regulations to assure compliance with this Part 1.

(b) Agency acquisition regulations shall not—

(1) Unnecessarily repeat, paraphrase, or otherwise restate material contained in the FAR or higher-level agency acquisition regulations; or

(2) Except as required by law or as provided in Subpart 1.4, conflict or be inconsistent with FAR content.

(c) Agencies shall evaluate all regulatory coverage in agency acquisition regulations to determine if it could apply to other agencies. Coverage that is not peculiar to one agency shall be recommended for inclusion in the FAR.

SUBPART 1.4—DEVIATIONS FROM THE FAR

1.400 Scope of subpart.

This subpart prescribes the policies and procedures for authorizing deviations from the FAR. Exceptions pertaining to the use of forms prescribed by the FAR are covered in Part 53 rather than in this subpart.

1.401 Definition.

"Deviation" means any one or combination of the following:

(a) The issuance or use of a policy, procedure, solicitation provision (see definition in 52.101(a)), contract clause (see definition in 52.101(a)), method, or practice of conducting acquisition actions of any kind at any stage of the acquisition process that is inconsistent with the FAR.

(b) The omission of any solicitation provision or contract clause when its prescription requires its use.

(c) The use of any solicitation provision or contract clause with modified or alternate language that is not authorized by the FAR (see definitions of "modification" and "alternate" in 52.101(a)).

(d) The use of a solicitation provision or contract clause prescribed by the FAR on a "substantially as follows" or "substantially the same as" basis (see definitions in 52.101(a)), if such use is inconsistent with the intent, principle, or substance of the prescription or related coverage on the subject matter in the FAR.

(e) The authorization of lesser or greater limitations on the use of any solicitation provision, contract clause, policy, or procedure prescribed by the FAR.

(f) The issuance of policies or procedures that govern the contracting process or otherwise control contracting relationships that are not incorporated into agency acquisition regulations in accordance with 1.301(a).

1.402 Policy.

Unless precluded by law, executive order, or regulation, deviations from the FAR may be granted as specified in this subpart when necessary to meet the specific needs and requirements of each agency. The development and testing of new techniques and methods of acquistion should not be stifled simply because such action would require a FAR deviation. The fact that deviation authority is required should not, of itself, deter agencies in their development and testing of new techniques and acquisition methods. Refer to 31.101 for instructions concerning deviations pertaining to the subject matter of Part 31, Contract Cost Principles and Procedures.

1.403 Individual deviations.

Individual deviations affect only one contracting action, and, unless 1.405(e) is applicable, may be authorized by agency heads or their designees. The justification and agency approval shall be documented in the contract file and a copy of the approved deviation shall be furnished to the FAR Secretariat through a central agency control point.

1.404 Class deviations.

Class deviations affect more than one contracting action. When it is known that a class deviation will be required on a permanent basis, an agency should propose an appropriate FAR revision to cover the matter. A copy of each approved class deviation shall be furnished to the FAR Secretariat.

(a) For civilian agencies except NASA, class deviations may be authorized by agency heads or their designees, unless 1.405(e) is applicable. Delegation of this authority shall not be made below the head of a contracting activity. Authorization of class deviations by agency officials is subject to the following limitations:

(1) An agency official who may authorize a class deviation, before doing so, shall consult with the chairperson of the Civilian Agency Acquisition Council (CAA Council), unless that agency official determines that urgency precludes such consultation.

(2) Recommended revisions to the FAR shall be transmitted to the FAR Secretariat by agency heads or their designees for authorizing class deviations.

(b) For DOD, class deviations shall be controlled and approved by the Deputy Under Secretary of Defense Research and Engineering (Acquisition Management) and shall be processed in accordance with agency regulations.

(c) For NASA, class deviations shall be controlled and approved by the Assistant Administrator for Procurement after consultation with the Deputy Under Secretary of Defense Research and Engineering (Acquisition Management). Deviations shall be processed in accordance with agency regulations.

1.405 Deviations pertaining to treaties and executive agreements.

(a) "Executive agreements," as used in this section, means Government-to-Government agreements, including agreements with international organizations, to which the United States is a party.

(b) Any deviation from the FAR required to comply with a treaty to which the United States is a party is authorized, unless the deviation would be inconsistent with FAR coverage based on a law enacted after the execution of the treaty.

(c) Any deviation from the FAR required to comply with an executive agreement is authorized unless the deviation would be inconsistent with FAR coverage based on law.

(d) A copy of the text of any deviation authorized under paragraphs (b) or (c) of this section shall be transmitted to the FAR Secretariat through a central agency control point.

(e) If a deviation required to comply with a treaty or an executive agreement is not authorized by paragraphs (b) or (c) of this section, then the request for deviation shall be processed through the FAR Secretariat to the appropriate council.

SUBPART 1.5—AGENCY AND PUBLIC PARTICIPATION

1.501 Solicitation of agency and public views.

(a) "Significant revisions of the FAR," as used in this section, means revisions that alter the substantive meaning of any coverage in the FAR having a substantial impact on the public. This expression, for example, does not include editorial, stylistic, or other revisions that have no impact on the basic meaning of the coverage being revised.

(b) Views of agencies and nongovernmental parties or organizations will be considered in formulating acquisition policies and regulations under the FAR.

(c) The opportunity to submit written comments on proposed significant revisions of the FAR will be provided by a notice in the Federal Register. Each of these notices shall state that—

(1) The text and an explanation of a proposed revision to a specified FAR segment is available for examination; and

(2) Comments on the proposed revision, addressed to the FAR Secretariat, are solicited for consideration in the formulation of the final revision that will be published in the Federal Register.

(d) Normally, at least 60 days will be given for the receipt of comments.

(e) Councils need not solicit comments if the (1) proposed coverage does not constitute a significant revision of the FAR, or (2) solicitation is impractical, such as when a new statute must be implemented in a relatively short period of time.

(f) Consideration shall also be given to unsolicited recommendations for revisions of the FAR that have been submitted in writing with sufficient data and rationale to permit their evaulation.

1.502 Public meetings.

Public meetings may be appropriate when a decision to adopt, amend, or delete FAR coverage is likely to benefit from significant additional views and discussion.

SUBPART 1.6—CONTRACTING AUTHORITY AND RESPONSIBILITIES

1.601 General.

Authority and responsibility to contract for authorized supplies and services are vested in the agency head. The agency head may establish contracting activities and delegate to heads of such contracting activities broad authority to manage the agency's contracting functions. Contracts may be entered into and signed on behalf of the Government only by contracting officers. In some agencies, a relatively small number of high level officials are designated contracting officers solely by virtue of their positions. Contracting officers below the level of a head of a contracting activity shall be selected and appointed under 1.603.

1.602 Contracting officers.

1.602-1 Authority.

(a) Contracting officers have authority to enter into, administer, or terminate contracts and make related determinations and findings. Contracting officers may bind the Government only to the extent of the authority delegated to them. Contracting officers shall receive from the appointing authority (see 1.603-1) clear instructions in writing regarding the limits of their authority. Information on the limits of the contracting officers' authority shall be readily available to the public and agency personnel.

(b) No contract shall be entered into unless the contracting officer ensures that all requirements of law, executive orders, regulations, and all other applicable procedures, including clearances and approvals, have been met.

1.602-2 Responsibilities.

Contracting officers are responsible for ensuring performance of all necessary actions for effective contracting, ensuring compliance with the terms of the contract, and safeguarding the interests of the United States in its contractual relationships. In order to perform these responsibilities, contracting officers should be allowed wide latitude to exercise business judgment. Contracting officers shall—

(a) Ensure that the requirements of 1.602-1(b) have been met, and that sufficient funds are available for obligation;

(b) Ensure that contractors receive impartial, fair, and equitable treatment; and

(c) Request and consider the advice of specialists in audit, law, engineering, transportation, and other fields, as appropriate.

1.603 Selection, appointment, and termination of appointment.

1.603-1 General.

Consistent with 1.301(c), the agency shall establish a system for the selection, appointment, and termination of appointment of contracting officers. Agency heads or their designees may select and appoint contracting officers and terminate their appointments.

1.603-2 Selection.

In selecting contracting officers, the appointing official shall consider the complexity and dollar value of the acquisitions to be assigned and the candidate's experience, training, education, business acumen, judgment, character, and reputation. Examples of selection criteria include—

(a) Experience in Government contracting and administration, commercial purchasing, or related fields;

(b) Education or special training in business administration, law, accounting, engineering, or related fields;

(c) Knowledge of acquisition policies and procedures, including this and other applicable regulations;

(d) Specialized knowledge in the particular assigned field of contracting; and

(e) Satisfactory completion of acquisition training courses.

1.603-3 Appointment.

Contracting officers shall be appointed in writing on a "Certificate of Appointment," SF 1402, which shall state any limitation on the scope of authority to be exercised, other than limitations contained in applicable laws or regulations. Appointing officials shall maintain files containing copies of all Certificates of Appointment that have not been terminated.

1.603-4 Termination.

Termination of a contracting officer appointment will be by letter, unless the Certificate of Appointment contains other provisions for automatic termination. Terminations may be for reasons such as reassignment, termination of employment, or unsatisfactory performance. No termination shall operate retroactively.

PART 2—DEFINITIONS OF WORDS AND TERMS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

2.000 Scope of part.

This part defines words and terms commonly used in this regulation. Other terms are defined in the part or subpart with which they are particularly associated (see the Index for locations).

SUBPART 2.1—DEFINITIONS

As used throughout this regulation, the following words and terms are used as defined in this subpart unless (a) the context in which they are used clearly requires a different meaning or (b) a different definition is prescribed for a particular part or portion of a part.

"Acquisition" means the acquiring by contract with appropriated funds of supplies or services (including construction) by and for the use of the Federal Government through purchase or lease, whether the supplies or services are already in existence or must be created, developed, demonstrated, and evaluated. Acquisition begins at the point when agency needs are established and includes the description of requirements to satisfy agency needs, solicitation and selection of sources, award of contracts, contract financing, contract performance, contract administration, and those technical and management functions directly related to the process of fulfilling agency needs by contract.

"Affiliates" means associated business concerns or individuals if, directly or indirectly, (a) either one controls or can control the other or (b) a third party controls or can control both.

"Agency head" (see "head of the agency").

"Contract" means a mutually binding legal relationship obligating the seller to furnish the supplies or services (including construction) and the buyer to pay for them. It includes all types of commitments that obligate the Government to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include (but are not limited to) awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance; and bilateral contract modifications. Contracts do not include grants and cooperative agreements covered by 41 U.S.C. 501, et seq. For discussion of various types of contracts, see Part 16.

"Contract administration office" means an office that performs (a) assigned postaward functions related to the administration of contracts and (b) assigned preaward functions.

"Contracting" means purchasing, renting, leasing, or otherwise obtaining supplies or services from nonfederal sources. Contracting includes description (but not determination) of supplies and services required, selection and solicitation of sources, preparation and award of contracts, and all phases of contract administration. It does not include making grants or cooperative agreements.

"Contracting activity" means an element of an agency designated by the agency head and delegated broad authority regarding acquisition functions.

"Contracting office" means an office that awards or executes a contract for supplies or services and performs postaward functions not assigned to a contract administration office.

"Contracting officer" means a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the contracting officer acting within the limits of their authority as delegated by the contracting officer. "Administrative contracting officer (ACO)" refers to a contracting officer who is administering contracts. "Termination contracting officer (TCO)" refers to a contracting officer who is settling terminated contracts. A single contracting officer may be responsible for duties in any or all of these areas. Reference in this regulation to administrative contracting officer or termination contracting officer does not (a) require that a duty be performed at a particular office or activity or (b) restrict in any way a contracting officer in the performance of any duty properly assigned.

"Executive agency" means an executive department, a military department, or any independent establishment within the meaning of 5 U.S.C. 101, 102, and 104(1), respectively, and any wholly owned Government corporation within the meaning of 31 U.S.C. 846.

"Federal agency" means any executive agency or any independent

establishment in the legislative or judicial branch of the Government (except the Senate, the House of Representatives, the Architect of the Capitol, and any activities under the Architect's direction).

"Head of the agency" (also called "agency head") means the Secretary, Attorney General, Administrator, Governor, Chairperson, or other chief official of an executive agency, unless otherwise indicated, including any deputy or assistant chief official of an executive agency and, for the Department of Defense, the Under Secretary and any Assistant Secretary of the Departments of the Army, Navy, and Air Force and the Director and Deputy Director of Defense agencies; and the term "authorized representative" means any person, persons, or board (other than the contracting officer) authorized to act for the head of the agency or Secretary.

"Head of the contracting activity" includes the official who has overall responsibility for managing the contracting activity.

"May" denotes the permissive. However, the words "no person may..." mean that no person is required, authorized, or permitted to do the act described.

"National defense" means any activity related to programs for military or atomic energy production or construction, military assistance to any foreign nation, stockpiling, or space.

"Offer" means a response to a solicitation that, if accepted, would bind the offeror to perform the resultant contract. Responses to invitations for bids (formal advertising) are offers called "bids;" responses to requests for proposals (negotiation) are offers called "proposals;" responses to requests for quotations (negotiation) are *not* offers and are called "quotes." For unsolicited proposals, see Subpart 15.5.

"Possessions" includes the Virgin Islands, Johnston Island, American Samoa, Guam, Wake Island, Midway Island, and the guano islands, but does not include Puerto Rico, leased bases, or trust territories.

"Shall" denotes the imperative.

"Supplies" means all property except land or interest in land. It includes (but is not limited to) public works, buildings, and facilities; ships, floating equipment, and vessels of every character, type, and description, together with parts and accessories; aircraft and aircraft parts, accessories, and equipment; machine tools; and the alteration or installation of any of the foregoing.

"United States," when used in a geographic sense, means the 50 States and the District of Columbia.

SUBPART 2.2—DEFINITIONS CLAUSE

The contracting officer shall insert the clause at 52.202-1, Definitions, in solicitations and contracts except when (a) a fixed-price research and development contract that is expected to be $2,500 or less is contemplated or (b) a purchase order is contemplated. If the contract is for personal services; construction; architect-engineer services; or dismantling, demolition, or removal of improvements, the contracting officer shall use the clause with its Alternate I. Additional definitions may be included; *provided*, they are consistent with this clause and the Federal Acquisition Regulation.

PART 3—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

3.000 Scope of part.

This part prescribes policies and procedures for avoiding improper business practices and personal conflicts of interest and for dealing with their apparent or actual occurrence.

SUBPART 3.1—SAFEGUARDS

3.101 Standards of conduct.

3.101-1 General.

Government business shall be conducted in a manner above reproach and, except as authorized by statute or regulation, with complete impartiality and with preferential treatment for none. Transactions relating to the expenditure of public funds require the highest degree of public trust and an impeccable standard of conduct. The general rule is to avoid strictly any conflict of interest or even the appearance of a conflict of interest in Government-contractor relationships. While many Federal laws and regulations place restrictions on the actions of Government personnel, their official conduct must, in addition, be such that they would have no reluctance to make a full public disclosure of their actions.

3.101-2 Solicitation and acceptance of gratuities by Government personnel.

As a rule, no Government employee may solicit or accept, directly or indirectly, any gratuity, gift, favor, entertainment, loan, or anything of monetary value from anyone who (a) has or is seeking to obtain Government business with the employee's agency, (b) conducts activities that are regulated by the employee's agency, or (c) has interests that may be substantially affected by the performance or nonperformance of the employee's

official duties. Certain limited exceptions are authorized in agency regulations.

3.101-3 Agency regulations.

(a) Agencies are required by Executive Order 11222 of May 8, 1965, and 5 CFR 735 to prescribe "Standards of Conduct." These agency standards contain—

(1) Agency-authorized exceptions to 3.101-2; and

(2) Disciplinary measures for persons violating the standards of conduct.

(b) Requirements for employee financial disclosure and restrictions on private employment for former Government employees are in Office of Personnel Management and agency regulations implementing Public Law 95-521, which amended 18 U.S.C. 207.

3.102 Officials not to benefit.

3.102-1 General.

41 U.S.C. 22 requires that most Government contracts explicitly state that no member of Congress shall be admitted to any share or part of the contract or any benefit arising from it. If a contract is made between the U.S. Government and any member of or delegate to Congress, or resident commissioner, it may constitute a violation of 18 U.S.C. 431 and 432, resulting in—

(a) Both the officer or employee of the Government who awarded the contract and the member, delegate, or resident commissioner being subject to criminal penalties;

(b) The contract being void; and

(c) The contractor having to return any consideration paid by the Government under the contract.

3.102-2 Contract clause.

The contracting officer shall insert the clause at 52.203-1, Officials Not to Benefit, in solicitations and contracts, except those related to agriculture that are exempted by 41 U.S.C. 22.

3.103 Independent pricing.

3.103-1 Solicitation provision.

The contracting officer shall insert the provision at 52.203-2, Certificate of Independent Price Determination, in solicitations when a firm-fixed-price contract or fixed-price contract with economic price adjustment is contemplated, unless—

(a) The acquisition is to be made under the small purchase procedures in Part 13;

(b) The work is to be performed by foreign suppliers outside the United States, its possessions, and Puerto Rico;

(c) The solicitation is a request for technical proposals under two-step formal advertising procedures; or

(d) The solicitation is for utility services for which rates are set by law or regulation.

3.103-2 Evaluating the certification.

(a) *Evaluation guidelines.* (1) None of the following, in and of itself, constitutes "disclosure" as it is used in subparagraph (a)(2) of the Certificate of Independent Price Determination (hereafter, the certificate):

(i) The fact that a firm has published price lists, rates, or tariffs covering items being acquired by the Government.

(ii) The fact that a firm has informed prospective customers of proposed or pending publication of new or revised price lists for items being acquired by the Government.

(iii) The fact that a firm has sold the same items to commercial customers at the same prices being offered to the Government.

(2) For the purpose of subparagraph (b)(2) of the certificate, an individual may use a blanket authorization to act as an agent for the person(s) responsible for determining the offered prices if—

(i) The proposed contract to which the certificate applies is clearly within the scope of the authorization; and

(ii) The person giving the authorization is the person within the offeror's organization who is responsible for determining the prices being offered at the time the certification is made in the particular offer.

(3) If an offer is submitted jointly by two or more concerns, the certification provided by the representative of each concern applies only to the activities of that concern.

(b) *Rejection of offers suspected of being collusive.* (1) If the offeror deleted or modified subparagraph (a)(1) or (a)(3) or paragraph (b) of the certificate, the offeror's bid or proposal shall be rejected.

(2) If the offeror deleted or modified subparagraph (a)(2) of the certificate, the offeror must have furnished with its offer a signed statement of the circumstances of the disclosure of prices contained in the bid or proposal. The chief of the contracting office shall review the altered certificate and the statement and shall determine, in writing, whether the disclosure was made for the purpose or had the effect of restricting competition. If the determination is positive, the bid or proposal shall be rejected; if it is negative, the bid or proposal shall be considered for award.

(3) Whenever an offer is rejected under subparagraph (1) or (2) above, or the certificate is suspected of being false, the contracting officer shall report the situation to the Attorney General in accordance with 3.303.

(4) The determination made under subparagraph (2) above shall not prevent or inhibit the prosecution of any criminal or civil actions involving the occurrences or transactions to which the certificate relates.

3.103-3 The need for further certifications.

A contractor that properly executed the certificate before award does not have to submit a separate certificate with each proposal to perform a work order or similar ordering instrument issued pursuant to the terms of the contract, where the Government's requirements cannot be met from another source.

SUBPART 3.2—CONTRACTOR GRATUITIES TO GOVERNMENT PERSONNEL

3.201 Applicability.

This subpart applies to all executive agencies, except that coverage concerning exemplary damages applies only to the Department of Defense (10 U.S.C. 2207).

3.202 Contract clause.

The contracting officer shall insert the clause at 52.203-3, Gratuities, in solicitations and contracts, except those for personal services and those between military departments or defense agencies and foreign governments that do not obligate any funds appropriated to the Department of Defense.

3.203 Reporting suspected violations of the Gratuities clause.

Agency personnel shall report suspected violations of the Gratuities clause to the contracting officer or other designated official in accordance with agency procedures. The agency reporting procedures shall be published as an implementation of this section 3.203 and shall clearly specify—

(a) What to report and how to report it; and

(b) The channels through which reports must pass, including the function and authority of each official designated to review them.

3.204 Treatment of violations.

(a) Before taking any action against a contractor, the agency head or a designee shall determine, after notice and hearing under agency procedures, whether the contractor, its agent, or another representative, under a contract containing the Gratuities clause—

(1) Offered or gave a gratuity (e.g., an entertainment or gift) to an officer, official, or employee of the Government; and

(2) Intended by the gratuity to obtain a contract or favorable treatment under a contract (intent generally must be inferred).

(b) Agency procedures shall afford the contractor an opportunity to appear with counsel, submit documentary evidence, present witnesses, and confront any person the agency presents. The procedures should be as informal as practicable, consistent with principles of fundamental fairness.

(c) When the agency head or designee determines that a violation has occurred, the Government may—

(1) Terminate the contractor's right to proceed;

(2) Initiate debarment or suspension measures as set forth in Subpart 9.4; and

(3) Assess exemplary damages, if the contract uses money appropriated to the Department of Defense.

SUBPART 3.3—REPORTS OF IDENTICAL BIDS AND SUSPECTED ANTITRUST VIOLATIONS

3.301 General.

(a) Practices that eliminate competition or restrain trade usually lead to excessive prices and may warrant criminal, civil, or administrative action against the participants. Examples of anticompetitive practices are collusive bidding, follow-the-leader pricing, rotated low bids, collusive price estimating systems, and sharing of the business.

(b) Contracting personnel are an important potential source of investigative leads for antitrust enforcement and should therefore be sensitive to indications of unlawful behavior by offerors and contractors. Agency personnel shall report instances of identical bids in advertised acquisitions, in accordance with agency regulations, for referral to the Attorney General under 3.302. Agency personnel shall also report, in accordance with agency regulations, evidence of suspected antitrust violations in either advertised or competitively negotiated acquisitions for possible referral to (1) the Attorney General under 3.303 and (2) the agency office responsible for contractor debarment and suspension under Subpart 9.4.

3.302 Reporting identical bids.

3.302-1 Definitions.

"Identical bids" means bids for the same line item that are determined to be identical as to unit price or total line item amount, with or without the application of evaluation factors (e.g., discount or transportation cost).

"Line item" means an item of supply or service, specified in an invitation for bids, for which the bidder must bid a separate price.

3.302-2 Reporting requirements.

(a) Executive Order 10936 of April 24, 1961, requires submission of a report to the Attorney General when identical bids are received in connection with a formally advertised acquisition exceeding $10,000. In implementing this order, the Attorney General requires submission of a report concerning such an acquisition whenever the response to a solicitation under formal advertising procedures, including small business and labor surplus area restricted advertising, results in—

(1) The total bid value of all line items exceeding $10,000 (based on the apparent low bid for each line item); and

(2) The receipt of identical bids on at least one line item for which the apparent low bid exceeds $2,500.

(b) In the case of indefinite delivery contracts, the Government's estimated line item quantities shall be used in computing the bid value of line items for the purposes of identifying identical bids and meeting the reporting thresholds.

(c) Reports are required regardless of the—

(1) Disposition of the solicitation (e.g., award or cancellation);

(2) Fact that the identical bids were not the low bids; or

(3) Fact that the bids contain qualifying or restrictive limitations (e.g., all-or-none bids, or award on one item being conditioned on award of other items).

(d) A report filed with respect to an acquisition shall list each identically bid item except those for which—

(1) The apparent low bid is $2,500 or less; or

(2) Bids are received only from foreign sources with delivery and performance outside the United States, its possessions, and Puerto Rico.

(e) Agencies shall submit reports to the Attorney General on U.S. Department of Justice Form DJ 1500, Identical Bid Report for Procurement (see 53.303-DJ-1500). Preparation and distribution instructions are printed on the cover of each pad of forms. Reports shall be submitted within 20 days after the disposition of all bids.

(f) If identical bids are involved and a bidder fails to provide the information required by the solicitation provision at 52.214-8, Parent Company and Identifying Data, the contracting officer shall make one inquiry to obtain the information. If the bidder still does not provide it, the contracting officer shall indicate this in a note on the identical bid report.

3.303 Reporting suspected antitrust violations.

(a) Agencies are required by 41 U.S.C. 252(d) and 10 U.S.C. 2305(d) to report to the Attorney General bids received after formal advertising that evidence a violation of the antitrust laws. Agencies should also report offers received in competitively negotiated acquisitions if they evidence a violation of the antitrust laws. These reports are in addition to those required by 3.302 and Subpart 9.4.

(b) The antitrust laws are intended to ensure that markets operate competitively. Any agreement or mutual understanding among competing firms that restrains the natural operation of market forces is suspect. Paragraph (c) below identifies behavior patterns that are often associated with antitrust violations. Activities meeting the descriptions in paragraph (c) are not necessarily improper, but they are sufficiently questionable to warrant notifying the appropriate authorities, in accordance with agency procedures.

(c) Practices or events that may evidence violations of the antitrust laws include—

(1) The existence of an "industry price list" or "price agreement" to which contractors refer in formulating their offers;

(2) A sudden change from competitive bidding to identical bidding;

(3) Simultaneous price increases or follow-the-leader pricing;

(4) Rotation of bids or proposals, so that each competitor takes a turn in sequence as low bidder, or so that certain competitors bid low only on some sizes of contracts and high on other sizes;

(5) Division of the market, so that certain competitors bid low only for contracts let by certain agencies, or for contracts in certain geographical areas, or on certain products, and bid high on all other jobs;

(6) Establishment by competitors of a collusive price estimating system;

(7) The filing of a joint bid by two or more competitors when at least one of the competitors has sufficient technical capability and productive capacity for contract performance;

(8) Any incidents suggesting direct collusion among competitors, such as the appearance of identical calculation or spelling errors in two or more competitive offers or the submission by one firm of offers for other firms; and

(9) Assertions by the employees, former employees, or competitors of

offerors, that an agreement to restrain trade exists.

(d) In addition to being reported under 3.302, identical bids shall be reported under this section if the agency has some reason to believe that the bids resulted from collusion.

(e) Agency reports shall be addressed to the Attorney General, U.S. Department of Justice, Washington, DC 20530, Attention: Assistant Attorney General, Antitrust Division, and shall include—

(1) A brief statement describing the suspected practice and the reason for the suspicion; and

(2) The name, address, and telephone number of an individual in the agency who can be contacted for further information.

(f) Questions concerning this reporting requirement may be communicated by telephone directly to the Office of the Assistant Attorney General, Antitrust Division.

SUBPART 3.4—CONTINGENT FEES

3.400 Scope of subpart.

This subpart prescribes policies and procedures that restrict contingent fee arrangements for soliciting or obtaining Government contracts to those permitted by 10 U.S.C. 2306(b) and 41 U.S.C. 254(a).

3.401 Definitions.

"Bona fide agency," as used in this subpart, means an established commercial or selling agency, maintained by a contractor for the purpose of securing business, that neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Bona fide employee," as used in this subpart, means a person employed by a contractor and subject to the contractor's supervision and control as to time, place, and manner of performance, who neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds out as being able to obtain any Government contract or contracts through improper influence.

"Contingent fee," as used in this subpart, means any commission, percentage, brokerage, or other fee that is contingent upon the success that a person or concern has in securing a Government contract.

"Improper influence," as used in this subpart, means any influence that induces or tends to induce a Government employee or officer to give consideration or to act regarding a Government contract on any basis other than the merits of the matter.

3.402 Statutory requirements.

Contractors' arrangements to pay contingent fees for soliciting or obtaining Government contracts have long been considered contrary to public policy because such arrangements may lead to attempted or actual exercise of improper influence. In 10 U.S.C. 2306(b) and 41 U.S.C. 254(a), Congress affirmed this public policy but permitted certain exceptions. These statutes—

(a) Require in every negotiated contract a warranty by the contractor against contingent fees;

(b) Permit, as an exception to the warranty, contingent fee arrangements between contractors and bona fide employees or bona fide agencies; and

(c) Provide that, for breach or violation of the warranty by the contractor, the Government may annul the contract without liability or deduct from the contract price or consideration, or otherwise recover, the full amount of the contingent fee.

3.403 Applicability.

This subpart applies to all contracts. Statutory requirements for negotiated contracts are, as a matter of policy, extended to formally advertised contracts.

3.404 Solicitation provision and contract clause.

(a) Prospective contractors are generally required to disclose contingent fee arrangements, other than those with full-time bona fide employees working solely for the prospective contractor, in order to permit the Government to evaluate the arrangements before award.

(b) The contracting officer shall insert the provision at 52.203-4, Contingent Fee Representation and Agreement, in solicitations, except when—

(1) Contracting by formal advertising, and the contract amount is expected to be $25,000 or less;

(2) The contract amount is not expected to exceed the appropriate small purchase limitation in Part 13;

(3) The solicitation is for perishable subsistence supplies, and the contract amount is expected to be $25,000 or less;

(4) The solicitation is for personal services to be paid for on a time basis;

(5) The solicitation is for utility services, at rates regulated by Federal, State, or other regulatory bodies, from a public utility company that is the sole source;

(6) The award under the solicitation is to be made in a foreign country; or

(7) Any other Department of Defense contracts, individually or by class, have been designated by the Secretary for exception. Reports of such exceptions shall be filed promptly with the Administrator of General Services Administration.

(c) The contracting officer shall insert the clause at 52.203-5, Covenant Against Contingent Fees, in all solicitations and contracts.

3.405 Review of Contingent Fee Representation and Agreement.

(a) Prospective contractors may not use any claimed professional or special relationship (other than that of a full-time bona fide employee working solely for the prospective contractor) as a basis for nondisclosure of contingent fee arrangements. The fact that a fee is for information does not exclude it from the definition of contingent fee.

(b) Contracting officers shall review each prospective contractor's offer or quotation and take the following actions:

(1) Ensure that the prospective contractor has completed both subparagraph (a)(1) and (a)(2) of the solicitation provision at 52.203-4, Contingent Fee Representation and Agreement.

(2) Consider failure to complete the representation a minor informality and afford the prospective contractor another opportunity to comply.

(3) If the prospective contractor still does not furnish the representation, reject the offer or quotation.

(4) If the prospective contractor answered subparagraphs (a)(1) and (a)(2) of the representation negatively, accept the representation, unless there is a reason to question its accuracy, and proceed with the contractual action.

(5) If the prospective contractor has answered subparagraph (a)(1) or (a)(2) affirmatively, secure a completed Standard Form 119, Statement of Contingent or Other Fees (see 53.301-119), or the statement authorized by the representation and agreement.

3.406 Award before receipt of the SF 119.

Contracting officers may award formally advertised contracts before receipt of the SF 119 or the statement. Negotiated contracts may not be awarded before receipt and evaluation of the SF 119 or statement, unless specifically approved by the chief of the contracting office.

3.407 Failure or refusal to furnish the SF 119.

If the prospective contractor fails or refuses to furnish the SF 119 or the statement in response to the contracting

officer's request, the chief of the contracting office shall determine whether to make further efforts to secure the SF 119 or statement or to initiate appropriate actions under 3.409.

3.408 Evaluation of the SF 119.

3.408-1 Responsibilities.

(a) The contracting officer shall evaluate the SF 119 and all related information to determine—

(1) Whether a contingent fee arrangement exists between the prospective contractor and a person or company other than a full-time bona fide employee working solely for the prospective contractor; and

(2) When such a contingent fee arrangement does exist, whether it meets the statutory exception permitting contingent fee arrangements with bona fide employees or agencies.

(b) The contracting officer's documentation of the evaluation, conclusion, and any proposed actions shall be reviewed at a level above the contracting officer in accordance with agency procedures.

3.408-2 Evaluation criteria.

(a) *Improper influence.* By definition (see 3.401), a bona fide employee or bona fide agency neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts. If the contracting officer decides that there is a reasonable basis to conclude that improper influence has been or will be exerted or proposed, or that the employee or agency has held out as being able to obtain any Government contract or contracts through improper influence, the employee or agency shall not be considered bona fide.

(b) *Bona fide employee.* An employee may be bona fide but not work on a full-time basis solely for the contractor (e.g., small business concerns may need to employ persons who also represent other concerns). Prospective contractors must disclose such arrangements in the representation and agreement and submit the SF 119 or the statement. However, contingent compensation arrangements with bona fide employees, customary in the trade, are within the statutory exception and are not prohibited. In determining whether an employee is bona fide, the contracting officer shall—

(1) Compare the employment arrangement to the definition of bona fide employee in 3.401;

(2) Consider the criteria in subparagraphs (c)(1), (2), and (5) below, as appropriate; and

(3) Consider the continuity of employment. The employment must contemplate some continuity and not be solely for obtaining one or more specific Government contracts.

(c) *Bona fide agency.* The following guidelines are intended to help contracting officers determine whether an agency is a "bona fide agency," as defined in 3.401. They describe circumstances ordinarily existing in acceptable arrangements in which the agency is bona fide. However, the guidelines are not individually or collectively inviolable rules. The contracting officer must evaluate each arrangement in its totality, including attendant facts and circumstances.

(1) The fee should not be inequitable or exorbitant when compared to the services performed or to customary fees for similar services related to commercial business.

(2) The agency should have adequate knowledge of the contractor's products and business, as well as other qualifications necessary to sell the products or services on their merits.

(3) The contractor and the agency should have a continuing relationship or, in newly established relationships, should contemplate future continuity.

(4) The agency should be an established concern that has existed for a considerable period, or be a newly established going concern likely to continue in the future. The business of the agency should be conducted in the agency name and characterized by the customary indicia of the conduct of regular business.

(5) While an agency that confines its selling activities to Government contracts is not disqualified, the fact that an agency represents the contractor in Government and commercial sales should receive favorable consideration.

3.409 Misrepresentations or violations of the Covenant Against Contingent Fees.

(a) Government personnel who suspect or have evidence of attempted or actual exercise of improper influence, misrepresentation of a contingent fee arrangement, or other violation of the Covenant Against Contingent Fees shall report the matter promptly to the contracting officer or appropriate higher authority in accordance with agency procedures.

(b) When there is specific evidence or other reasonable basis to suspect one or more of the violations in paragraph (a) above, the chief of the contracting office shall review the facts and, if appropriate, take or direct one or more of the following, or other, actions:

(1) If before award, reject the bid or proposal.

(2) If after award, enforce the Government's right to annul the contract or to recover the fee.

(3) Initiate suspension or debarment action under Subpart 9.4.

(4) Refer suspected fraudulent or criminal matters to the Department of Justice, as prescribed in agency regulations.

3.410 Records.

For enforcement purposes, agencies shall preserve any representation and the original SF 119 or statement, together with all other pertinent data, including a record of actions taken. Contracting offices shall not retire or destroy these records until it is certain that they are no longer needed for enforcement purposes. If the original record is maintained in a central file, a copy must be retained in the contract file.

SUBPART 3.5—OTHER IMPROPER BUSINESS PRACTICES

3.501 Buying-in.

3.501-1 Definition.

"Buying-in" means submitting an offer below anticipated costs, expecting to—

(a) Increase the contract amount after award (e.g., through unnecessary or excessively priced change orders); or

(b) Receive follow-on contracts at artificially high prices to recover losses incurred on the buy-in contract.

3.501-2 General.

(a) Buying-in may decrease competition or result in poor contract performance. The contracting officer must take appropriate action to ensure buying-in losses are not recovered by the contractor through the pricing of (1) change orders or (2) follow-on contracts subject to cost analysis.

(b) The Government should minimize the opportunity for buying-in by seeking a price commitment covering as much of the entire program concerned as is practical by using—

(1) Multiyear contracting, with a requirement in the solicitation that a price be submitted only for the total multiyear quantity; or

(2) Priced options for additional quantities that, together with the firm contract quantity, equal the program requirements (see Subpart 17.2).

(c) Other safeguards are available to the contracting officer to preclude recovery of buying-in losses (e.g., amortization of nonrecurring costs (see 15.804-6(f)) and treatment of unreasonable price quotations (see 15.803(d)).

3.502 Subcontractor kickbacks.

(a) The Anti-Kickback Act (41 U.S.C. 51-54) was passed to deter subcontractors from making payments to influence the award of subcontracts. The Act—

(1) Prohibits payments, by or on behalf of a subcontractor in any tier under any Government negotiated contract, as an inducement to or acknowledgment of the award of a subcontract or order (a payment includes a fee, commission, compensation, gift, or gratuity to the prime contractor or any higher tier subcontractor or to any officer, partner, employee, or agent of the prime contractor or any higher tier subcontractor);

(2) Prohibits the subcontractor from charging these payments to the prime contractor or higher tier subcontractor;

(3) Creates a conclusive presumption that the payments have been included in the price of the subcontract or order and borne by the Government;

(4) Provides for the Government to recover these payments from the subcontractor or recipient by court action or by setoff of moneys otherwise due the subcontractor (this may be accomplished either by the Government directly or by the prime contractor); and

(5) Imposes criminal penalties on any person who knowingly makes or receives these payments.

(b) Agencies shall report suspected violations of the Act in accordance with agency procedures.

SUBPART 3.6—CONTRACTS WITH GOVERNMENT EMPLOYEES OR ORGANIZATIONS OWNED OR CONTROLLED BY THEM

3.601 Policy.

Except as specified in 3.602, a contracting officer shall not knowingly award a contract to a Government employee or to a business concern or other organization owned or substantially owned or controlled by one or more Government employees. This policy is intended to avoid any conflict of interest that might arise between the employees' interests and their Government duties, and to avoid the appearance of favoritism or preferential treatment by the Government toward its employees.

3.602 Exceptions.

The agency head, or a designee not below the level of the head of the contracting activity, may authorize an exception to the policy in 3.601 only if there is a most compelling reason to do so, such as when the Government's needs cannot reasonably be otherwise met.

3.603 Responsibilities of the contracting officer.

(a) Before awarding a contract, the contracting officer shall obtain an authorization under 3.602 if—

(1) The contracting officer knows, or has reason to believe, that a prospective contractor is one to which award is otherwise prohibited under 3.601; and

(2) There is a most compelling reason to make an award to that prospective contractor.

(b) The contracting officer shall comply with the requirements and guidance in Subpart 9.5 before awarding a contract to an organization owned or substantially owned or controlled by Government employees.

PART 4—ADMINISTRATIVE MATTERS

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

4.000 Scope of part.

This part prescribes policies and procedures relating to the administrative aspects of contract execution, distribution, reporting, retention, and files.

SUBPART 4.1—CONTRACT EXECUTION

4.101 Contracting officer's signature.

(a) Only contracting officers shall sign contracts on behalf of the United States. The contracting officer's name and official title shall be typed, stamped, or printed on the contract. The contracting officer normally signs the contract after it has been signed by the contractor. The contracting officer shall ensure that the signer(s) have authority to bind the contractor (see specific requirements in 4.102 below).

(b) Each signed or reproduced copy of the signed contract or modification that is intended to have the same force and effect as the signed original shall be marked "DUPLICATE ORIGINAL".

4.102 Contractor's signature.

(a) *Individuals.* A contract with an individual shall be signed by that individual. A contract with an individual doing business as a firm shall be signed by that individual, and the signature shall be followed by the individual's typed, stamped, or printed name and the words ", an individual doing business as ....." [*insert name of firm*].

(b) *Partnerships.* A contract with a partnership shall be signed in the partnership name. Before signing for the Government, the contracting officer shall obtain a list of all partners and ensure that the individual(s) signing for the partnership have authority to bind the partnership.

(c) *Corporations.* A contract with a corporation shall be signed in the corporate name, followed by the word "by" and the signature and title of the person authorized to sign. The contracting officer shall ensure that the person signing for the corporation has authority to bind the corporation.

(d) *Joint venturers.* A contract with joint venturers may involve any combination of individuals, partnerships, or corporations. The contract shall be signed by each participant in the joint venture in the manner prescribed in paragraphs (a) through (c) above for each type of participant. When a corporation is participating, the contracting officer shall obtain from the corporation secretary a certificate stating that the corporation is authorized to participate in the joint venture.

(e) *Agents.* When an agent is to sign the contract, other than as stated in paragraphs (a) through (d) above, the agent's authorization to bind the principal must be established by evidence satisfactory to the contracting officer.

4.103 Contract clause.

The contracting officer shall insert the clause at 52.204-1, Approval of Contract, in solicitations and contracts when agency procedures require written approval of the contract at a level above that of the contracting officer.

SUBPART 4.2—CONTRACT DISTRIBUTION

4.201 Procedures.

Contracting officers shall distribute copies of contracts or modifications within 10 working days after execution by all parties. As a minimum, the contracting officer shall—

(a) Distribute simultaneously one signed copy or reproduction of the signed contract (see 4.101(b)), to the contractor and the paying office;

(b) When a contract is assigned to another office for contract administration (see Subpart 42.2), provide to that office—

(1) One copy or reproduction of the signed contract and of each modification (stamped "DUPLICATE ORIGINAL"; see 4.101(b)); and

(2) A copy of the contract distribution list, showing those offices that should receive copies of modifications, and any changes to the list as they occur;

(c) Distribute one copy to each accounting and finance office (funding office) whose funds are cited in the contract;

(d) When the contract is not assigned for administration but contains a Cost Accounting Standards clause, provide one copy of the contract to the cognizant administrative contracting officer and mark the copy "FOR COST ACCOUNTING STANDARDS ADMINISTRATION ONLY" (see 30.401(b));

(e) Provide one copy of each contract or modification that requires audit service to the appropriate field audit office listed in the "Directory of Federal Contract Audit Offices" (copies of this directory can be ordered from the U.S. Government Printing Office, Superintendent of Documents, Washington, DC 20402, referencing stock numbers 008-007-03189-9 and 008-007-03190-2 for Volumes I and II, respectively); and

(f) Provide copies of contracts and modifications to those organizations required to perform contract administration support functions (e.g., when manufacturing is performed at multiple sites, the contract administration office cognizant of each location).

4.202 Agency distribution requirements.

Agencies shall limit additional distribution requirements to the minimum necessary for proper performance of essential functions. When contracts are assigned for administration to a contract administration office located in an agency different from that of the contracting office (see Part 42), the two agencies shall agree on any necessary distribution in addition to that prescribed in 4.201 above.

SUBPART 4.3—[RESERVED]

SUBPART 4.4—SAFEGUARDING CLASSIFIED INFORMATION WITHIN INDUSTRY

4.401 Definitions.

"Classified acquisition" means an acquisition that consists of one or more contracts in which offerors would be required to have access to classified information (Confidential, Secret, or Top Secret) to properly submit an offer or quotation, to understand the performance requirements of a classified contract under the acquisition, or to perform the contract.

"Classified contract" means any contract that requires, or will require, access to classified information (Confidential, Secret, or Top Secret) by the contractor or its employees in the performance of the contract. A contract may be a classified contract even though the contract document is not classified.

"Classified information" means any information or material that is owned by, produced by or for, or under the control of the United States Government, and determined pursuant to Executive Order 12065, June 28, 1978 (43 FR 28949, July 3, 1978) or prior orders to require protection against unauthorized disclosure, and is so designated.

4.402 General.

(a) Executive Order 10865, February 20, 1960 (25 FR 1583, February 25, 1960), entitled "Safeguarding Classified Information Within Industry," as amended by Executive Order 10909, January 17, 1961 (26 FR 508, January 20, 1961), forms the basis for agency regulations concerning safeguarding the release of classified information to U.S. industry.

(b) The Department of Defense (DOD) has incorporated the requirements of these Executive Orders into the Defense Industrial Security Program (DISP), administered by the Defense Investigative Service, 1900 Half Street, SW, Washington, DC 20324, (Director for Industrial Security). The following DOD publications implement the program:

(1) *Industrial Security Regulation* (ISR) (DOD 5220.22-R).

(2) *Industrial Security Manual for Safeguarding Classified Information* (ISM) (DOD 5220.22-M).

(c) Procedures for the protection of information relating to foreign classified contracts awarded to U.S. industry, and instructions for the protection of U.S. information relating to classified contracts awarded to foreign firms, are prescribed in Section VIII of the ISR.

(d) Part 27, Patents, Data, and Copyrights, contains policy and procedures for safeguarding classified information in patent applications and patents.

4.403 Responsibilities of contracting officers.

(a) *Presolicitation phase.* Contracting officers shall review all proposed solicitations to determine whether access to classified information may be required by offerors, or by a contractor during contract performance.

(1) If access to classified information of another agency may be required, the contracting officer shall—

(i) Determine if the agency is covered by the DISP; and

(ii) Follow that agency's procedures for determining the security clearances of firms to be solicited.

(2) If the classified information required is from the contracting officer's agency, the contracting officer shall follow agency procedures.

(b) *Solicitation phase.* Contracting officers shall—

(1) Ensure that the classified acquisition is conducted as required by the DISP or agency procedures, as appropriate; and

(2) Include (i) an appropriate Security Requirements clause in the solicitation (see 4.404), and (ii) as appropriate, in solicitations and contracts when the contract may require access to classified information, a requirement for security safeguards in addition to those provided in the clause (52.204-2, Security Requirements).

(c) *Award phase.* Contracting officers shall inform contractors and subcontractors of the security classifications and requirements assigned to the various documents, materials, tasks, subcontracts, and components of the classified contract as follows:

(1) Agencies covered by the DISP shall use the Contract Security Classification Specification, DD Form 254. The contracting officer, or authorized representative, is the approving official for the form and shall ensure that it is prepared and distributed in accordance with Section VII of the ISR.

(2) Contracting officers in agencies not covered by the DISP shall follow agency procedures.

4.404 Contract clause.

(a) The contracting officer shall insert the clause at 52.204-2, Security Requirements, in solicitations and contracts when the contract may require access to classified information, unless the conditions specified in paragraph (d) below apply.

(b) If a cost contract (see 16.302) for research and development with an educational institution is contemplated, the contracting officer shall use the clause with its Alternate I.

(c) If a construction or architect-engineer contract where employee identification is required for security reasons is contemplated, the contracting officer shall use the clause with its Alternate II.

(d) If the contracting agency is not covered by the DISP and has prescribed a clause and alternates that are substantially the same as those at 52.204-2, the contracting officer shall use the agency-prescribed clause as required by agency procedures.

SUBPART 4.5—[RESERVED]

SUBPART 4.6—CONTRACT REPORTING

4.600 Scope of subpart.

This subpart prescribes uniform reporting requirements for the Federal Procurement Data System (FPDS).

4.601 Federal Procurement Data System.

(a) The FPDS provides a comprehensive mechanism for assembling, organizing, and presenting contract placement data for the Federal Government. Federal agencies report data to the Federal Procurement Data Center (FPDC), which collects, processes, and disseminates official statistical data on Federal contracting. The data provide (1) a basis for recurring and special reports to the President, the Congress, the General Accounting Office, Federal executive agencies, and the general public; (2) a means of measuring and assessing the impact of Federal contracting on the Nation's economy and the extent to which small business concerns and small disadvantaged business concerns are sharing in Federal contracts; and (3) data for other policy and management control purposes.

(b) The *FPDS Reporting Manual* provides a complete list of reporting and nonreporting agencies and organizations. This manual (available at no charge from the Federal Procurement Data Center, General Services Administration, Suite 900, 4040 N. Fairfax Drive, Arlington, VA 22203, telephone (703) 235-2141) provides the necessary instruction to the data collection point in each agency as to what data are required and how often to provide the data.

(c) Data collection points in each agency report data on SF 279, Individual Contract Action Report (over $10,000), and SF 281, Summary of Contract Actions of $10,000 or less, or computer-generated equivalent.

SUBPART 4.7—CONTRACTOR RECORDS RETENTION

4.700 Scope of subpart.

This subpart provides policies and procedures for retention of records by contractors to meet the records review requirements of the Government. In this subpart, the terms "contracts" and "contractors" include "subcontracts" and "subcontractors."

4.701 Purpose.

The purpose of this subpart is to generally describe records retention requirements and to allow reductions in the retention period for specific classes of records under prescribed circumstances.

4.702 Applicability.

(a) This subpart applies to records generated under contracts that contain one of the following clauses:

(1) Examination of Records by Comptroller General (52.215-1).

(2) Audit—Formal Advertising (52.214-26).

(3) Audit—Negotiation (52.215-2).

(b) This subpart is not mandatory on Department of Energy contracts for which the Comptroller General allows alternative records retention periods. Apart from this exception, this subpart applies to record retention periods under contracts that are subject to Chapter 137, Title 10, U.S.C., and the Federal Property and Admininstrative Services Act of 1949, as amended, 40 U.S.C. 471 et seq.

4.703 Policy.

(a) Except as stated in 4.703(b), contractors shall make available books, records, documents, and other supporting evidence to satisfy contract negotiation, administration, and audit requirements of the contracting agencies and the Comptroller General for (1) 3 years after final payment or, for certain records, (2) the period specified in 4.705 and 4.704, whichever of these periods expires first.

(b) Contractors shall make available the foregoing documents and supporting evidence for a longer period of time than is required in 4.703(a) if—

(1) A retention period longer than that cited in 4.702(a) is specified in any contract clause; or

(2) The contractor, for its own purposes, retains the foregoing documents and supporting evidence for a longer period. Under this circumstance, the retention period shall be the period of the contractor's retention or 3 years after final payment, whichever period expires first.

(c) Contractors need not retain duplicate copies of records or supporting documents unless they contain significant information not shown on the record copy.

(d) Contractors need not retain intermediate data records consisting of punched cards, electronic tape, or comparable media if printouts or listings are prepared and maintained. The printouts or listings must show the details of the transactions charged or allocated to individual Government contracts and must identify the supporting source documents.

4.704 Calculation of retention periods.

(a) The retention periods in 4.705 are calculated from the end of the contractor's fiscal year in which an entry is made charging or allocating a cost to a Government contract or subcontract. If a specific record contains a series of entries, the retention period is calculated from the end of the contractor's fiscal year in which the

final entry is made. The contractor should cut off the records in annual blocks and retain them for block disposal under the prescribed retention periods.

(b) When records generated during a prior contract are relied upon by a contractor for cost or pricing data in negotiating a succeeding contract, the prescribed periods shall run from the date of the succeeding contract.

(c) If two or more of the record categories described in 4.705 are interfiled and screening for disposal is not practical, the contractor shall retain the entire record series for the longest period prescribed for any category of records.

4.705 Specific retention periods.

The contractor shall retain the records identified in 4.705-1 through 4.705-3 for the periods designated, provided retention is required under 4.702. Records are identified in this subpart in terms of their purpose or use and not by specific name or form number. Although the descriptive identifications may not conform to normal contractor usage or filing practices, these identifications apply to all contractor records that come within the description.

4.705-1 Financial and cost accounting records.

(a) Accounts receivable invoices, adjustments to the accounts, invoice registers, carrier freight bills, shipping orders, and other documents which detail the material or services billed on the related invoices: Retain 4 years.

(b) Material, work order, or service order files, consisting of purchase requisitions or purchase orders for material or services, or orders for transfer of material or supplies: Retain 4 years.

(c) Cash advance recapitulations, prepared as posting entries to accounts receivable ledgers for amounts of expense vouchers prepared for employees' travel and related expenses: Retain 4 years.

(d) Paid, canceled, and voided checks, other than those issued for the payment of salary and wages: Retain 4 years.

(e) Accounts payable records to support disbursements of funds for materials, equipment, supplies, and services, containing originals or copies of the following and related documents: remittance advices and statements, vendors' invoices, invoice audits and distribution slips, receiving and inspection reports or comparable certifications of receipt and inspection of material or services, and debit and credit memoranda: Retain 4 years.

(f) Labor cost distribution cards or equivalent documents: Retain 2 years.

(g) Petty cash records showing description of expenditures, to whom paid, name of person authorizing payment, and date, including copies of vouchers and other supporting documents: Retain 2 years.

4.705-2 Pay administration records.

(a) Payroll sheets, registers, or their equivalent, of salaries and wages paid to individual employees for each payroll period; change slips; and tax withholding statements: Retain 4 years.

(b) Clock cards or other time and attendance cards: Retain 2 years.

(c) Paid checks, receipts for wages paid in cash, or other evidence of payments for services rendered by employees: Retain 2 years.

4.705-3 Acquisition and supply records.

(a) Store requisitions for materials, supplies, equipment, and services: Retain 2 years.

(b) Work orders for maintenance and other services: Retain 4 years.

(c) Equipment records, consisting of equipment usage and status reports and equipment repair orders: Retain 4 years.

(d) Expendable property records, reflecting accountability for the receipt and use of material in the performance of a contract: Retain 4 years.

(e) Receiving and inspection report records, consisting of reports reflecting receipt and inspection of supplies, equipment, and materials: Retain 4 years.

(f) Purchase order files for supplies, equipment, material, or services used in the performance of a contract; supporting documentation and backup files including, but not limited to, invoices, and memoranda; e.g., memoranda of negotiations showing the principal elements of subcontract price negotiations (see 52.244-1 and 52.244-2): Retain 4 years.

(g) Production records of quality control, reliability, and inspection: Retain 4 years.

4.706 Microfilming records.

4.706-1 General.

(a) Contractors may use microfilm (e.g., film chips, jackets, aperture cards, microprints, roll film, and microfiche) for recordkeeping, subject to the limitations in this subpart.

(b) In the process of microfilming documents, the contractor shall also microfilm all relevant notes, worksheets, and other papers necessary for reconstructing or understanding the records.

(c) The contractor shall review all microfilm before destroying the hard-copy documents to ensure legibility and reproducibility of the microfilm.

(d) Unless earlier retirement of records is permitted by 4.705, or the administrative contracting officer agrees to a lesser retention period when the contractor has established adequate internal controls including continuing surveillance over the microfilm system, the contractor shall not destroy original records that have been microfilmed, until—

(1) All claims under the contract are settled;

(2) Eighteen months have passed since final payment; or

(3) The time original records are required to be kept by other laws or regulations has elapsed.

4.706-2 Filing and retrieval.

The contractor shall—

(a) Maintain an effective indexing system to permit timely and convenient access to the microfilmed records by the Government;

(b) Provide strict security measures to prevent the loss of microfilm and to safeguard classified information;

(c) Store microfilm in a fireproof cabinet in an environment ensuring the safety of these records for the specified retention periods; and

(d) Have adequate viewing equipment and provide printouts the approximate size of the original material.

4.706-3 Quality control.

(a) Microfilm, when displayed on a microfilm reader (viewer) or reproduced on paper, must exhibit a high degree of legibility and readability.

(b) The quality of the contractor's record microfilming process is subject to periodic review by the administrative contracting officer.

SUBPART 4.8—CONTRACT FILES

4.800 Scope of subpart.

This subpart prescribes requirements for establishing, maintaining, and disposing of contract files for all contractual actions. The application of this subpart to small purchases and other simplified procedures covered by Part 13 is optional. See also documentation requirements in 13.106(c).

4.801 General.

(a) The head of each office performing contracting, contract administration, or paying functions shall establish files containing the records of all contractual actions.

(b) The documentation in the files (see 4.803) shall be sufficient to constitute a

complete history of the transaction for the purpose of—

(1) Providing a complete background as a basis for informed decisions at each step in the acquisition process;

(2) Supporting actions taken;

(3) Providing information for reviews and investigations; and

(4) Furnishing essential facts in the event of litigation or congressional inquiries.

(c) The files to be established include—

(1) A file for cancelled solicitations;

(2) A file for each contract; and

(3) A file such as a contractor general file, containing documents relating—for example—to (i) no specific contract, (ii) more than one contract, or (iii) the contractor in a general way (e.g., contractor's management systems, past performance, or capabilities).

4.802 Contract files.

(a) A contract file should generally consist of—

(1) The contracting office contract file, which shall document the basis for the acquisition and the award, the assignment of contract administration (including payment responsibilities), and any subsequent actions taken by the contracting office;

(2) The contract administration office contract file, which shall document actions reflecting the basis for and the performance of contract administration responsibilities; and

(3) The paying office contract file, which shall document actions prerequisite to, substantiating, and reflecting contract payments.

(b) Normally, each file should be kept separately; however, if appropriate, any or all of the files may be combined; e.g., if all functions or any combination of the functions are performed by the same office.

(c) Files shall be maintained at organizational levels that shall ensure—

(1) Effective documentation of contract actions;

(2) Ready accessibility to principal users;

(3) Minimal establishment of duplicate and working files;

(4) The safeguarding of classified documents; and

(5) Conformance with agency regulations for file location and maintenance.

(d) If the contract files or file segments are decentralized (e.g., by type or function) to various organizational elements or to other outside offices, responsibility for their maintenance shall be assigned. A central control and, if needed, a locator system should be established to ensure the ability to locate promptly any contract files.

4.803 Contents of contract files.

The following are examples of the records normally contained, if applicable, in contract files:

(a) *Contracting office contract file.* (1) Purchase request, acquisition planning information, and other presolicitation documents.

(2) Request for authority to negotiate, and associated determination and findings.

(3) Evidence of availability of funds.

(4) Synopsis of proposed acquisition as published in the Commerce Business Daily or reference thereto.

(5) The list of sources solicited, approval of and justification for limiting the number of sources, and a list of any firms or persons whose requests for copies of the solicitation were denied, together with the reasons for denial.

(6) Set-aside decision.

(7) Government estimate of contract price.

(8) A copy of the solicitation.

(9) Security requirements and evidence of required clearances.

(10) A copy of each offer or quotation, the related abstract, and records of determinations concerning late offers or quotations. Unsuccessful offers or quotations may be maintained separately, if cross-referenced to the contract file.

(11) Contractor's contingent fee representation and other certifications and representations.

(12) Preaward survey reports or reference to previous preaward survey reports relied upon.

(13) Source selection documentation.

(14) Contracting officer's determination of the contractor's responsibility.

(15) Small Business Administration Certificate of Competency.

(16) Records of contractor's compliance with labor policies including equal employment opportunity policies.

(17) Cost or pricing data and Certificates of Current Cost or Pricing Data or a required justification for waiver.

(18) Packaging and transportation data.

(19) Cost or price analysis.

(20) Audit reports or reasons for waiver.

(21) Record of negotiation.

(22) Justification for type of contract.

(23) Authority for deviations from this regulation, statutory requirements, or other restrictions.

(24) Required approvals of award and evidence of legal review.

(25) Notice of award.

(26) The original of (i) the signed contract or award, (ii) all contract modifications, and (iii) documents supporting modifications executed by the contracting office.

(27) Synopsis of award or reference thereto.

(28) Notice to unsuccessful quoters or offerors and record of any debriefing.

(29) Acquisition management reports (see Subpart 4.6).

(30) Bid, performance, payment, or other bond documents, or a reference thereto, and notices to sureties.

(31) Report of postaward conference.

(32) Notice to proceed, stop orders, and any overtime premium approvals granted at the time of award.

(33) Documents requesting and authorizing modification in the normal assignment of contract administration functions and responsibility.

(34) Approvals or disapprovals of requests for waivers or deviations from contract requirements.

(35) Rejected engineering change proposals. These proposals may be filed separately for early disposal (see 4.805(h)).

(36) Royalty, invention, and copyright reports (including invention disclosures) or reference thereto.

(37) Contract completion documents.

(38) Documentation regarding termination actions for which the contracting office is responsible.

(39) Cross-references to pertinent documents that are filed elsewhere.

(40) Any additional documents on which action was taken or that reflect actions by the contracting office pertinent to the contract.

(41) A current chronological list identifying the awarding and successor contracting officers, with inclusive dates of responsibility.

(b) *Contract administration office contract file.* (1) Copy of the contract and all modifications, together with official record copies of supporting documents executed by the contract administration office.

(2) Any document modifying the normal assignment of contract administration functions and responsibility.

(3) Security requirements.

(4) Cost and pricing data, Certificates of Current Cost or Pricing Data, cost or price analysis, and other documentation supporting contractual actions executed by the contract administration office.

(5) Preaward survey information.

(6) Purchasing system information.

(7) Consent to subcontract or purchase.

(8) Performance and payment bonds and surety information.

(9) Postaward conference records.
(10) Orders issued under the contract.
(11) Notice to proceed and stop orders.
(12) Insurance policies or certificates of insurance or references to them.
(13) Documents supporting advance or progress payments.
(14) Progressing, expediting, and production surveillance records.
(15) Quality assurance records.
(16) Property administration records.
(17) Documentation regarding termination actions for which the contract administration office is responsible.
(18) Cross reference to other pertinent documents that are filed elsewhere.
(19) Any additional documents on which action was taken or that reflect actions by the contract administration office pertinent to the contract.
(20) Contract completion documents.
(c) *Paying office contract file.* (1) Copy of the contract and any modifications.
(2) Bills, invoices, vouchers, and supporting documents.
(3) Record of payments or receipts.
(4) Other pertinent documents.

4.804 Closeout of contract files.

4.804-1 Closeout by the office administering the contract.

(a) Except as provided in paragraph (c) below, time standards for closing out contract files are as follows:
(1) Small purchase files should be considered closed when the contracting officer receives evidence of receipt of property and final payment, unless otherwise specified by agency regulation.
(2) Files for all firm-fixed-price contracts other than small purchases should be closed within 6 months of the month in which the contracting officer receives evidence of physical completion.
(3) Files for contracts requiring settlement of indirect cost rates should be closed within 36 months of the month in which the contracting officer receives evidence of physical completion.
(4) Files for all other contracts should be closed within 20 months of the month in which the contracting officer receives evidence of physical completion.
(b) When closing out the contract files at 4.804-1(a)(2), (3), and (4), the contracting officer shall use the closeout procedures at 4.804-5. However, these closeout actions may be modified to reflect the extent of administration that has been performed.
(c) A contract file shall not be closed if (1) the contract is in litigation or under appeal, or (2) in the case of a termination, all termination actions have not been completed.

4.804-2 Closeout of the contracting office files if another office administers the contract.

(a) Small purchase files should be considered closed when the contracting officer receives evidence of receipt of property and final payment, unless otherwise specified by agency regulation.
(b) All other contract files shall be closed as soon as practicable after the contracting officer receives a contract completion statement from the contract administration office. The contracting officer shall ensure that all contractual actions required have been completed and shall prepare a statement to that effect. This statement is authority to close the contract file and shall be made a part of the official contract file.

4.804-3 Closeout of paying office contract files.

The paying office shall close the contract file upon issuance of the final payment voucher.

4.804-4 Physically completed contracts.

(a) Except as provided in paragraph (b) below, a contract is considered to be physically completed when—
(1) (i) The contractor has completed the required deliveries and the Government has inspected and accepted the supplies;
(ii) The contractor has performed all services and the Government has accepted these services; and
(iii) All option provisions, if any, have expired; or
(2) The Government has given the contractor a notice of complete contract termination.
(b) Facilities contracts and rental, use, and storage agreements are considered to be physically completed when—
(1) The Government has given the contractor a notice of complete contract termination; or
(2) The contract period has expired.

4.804-5 Detailed procedures for closing out contract files.

(a) The office administering the contract is responsible for initiating (automated or manual) administrative closeout procedures to ensure that—
(1) Disposition of classified material is completed;
(2) Final patent report is cleared;
(3) Final royalty report is cleared;
(4) There is no outstanding value engineering change proposal;
(5) Plant clearance report is received;
(6) Property clearance is received;
(7) All interim or disallowed costs are settled;
(8) Price revision is completed;
(9) Subcontracts are settled by the prime contractor;
(10) Prior year indirect cost rates are settled;
(11) Termination docket is completed;
(12) Contract audit is completed;
(13) Contractor's closing statement is completed;
(14) Contractor's final invoice has been submitted; and
(15) Deobligation of excess funds is recommended.
(b) When the actions in paragraph (a) above have been verified, the contracting officer administering the contract shall ensure that a contract completion statement, containing the following information, is prepared:
(1) Contract administration office name and address (if different from the contracting office).
(2) Contracting office name and address.
(3) Contract number.
(4) Last modification number.
(5) Last call or order number.
(6) Contractor name and address.
(7) Dollar amount of excess funds, if any.
(8) Voucher number and date, if final payment has been made.
(9) Invoice number and date, if the final approved invoice has been forwarded to a disbursing office of another agency or activity and the status of the payment is unknown.
(10) A statement that all required contract administration actions have been fully and satisfactorily accomplished.
(11) Name and signature of the contracting officer.
(12) Date.
(c) When the statement is completed, the contracting officer shall ensure that—
(1) The signed original is placed in the contracting office contract file (or forwarded to the contracting office for placement in the files if the contract administration office is different from the contracting office); and
(2) A signed copy is placed in the appropriate contract administration file if administration is performed by a contract administration office.

4.805 Disposal of contract files.

Agencies shall prescribe procedures for the handling, storing, and disposing of contract files. However, such procedures shall include provisions that the documents specified below shall not be destroyed before the times indicated:

Document	Retention Period
(a) Records pertaining to exceptions or protests, claims for or against the United States, investigations, cases pending or in litigation, or similar matters.	Until final clearance or settlement, or until the retention period otherwise specified for the document in paragraphs (b) through (n) below is completed, whichever is later.
(b) Signed originals of (1) contracts and (2) modifications thereto.	6 years and 3 months after final payment.
(c) Data pertaining to each contract negotiation under 15.201, and 15.207 through 15.215.	6 years and 3 months after final payment.
(d) Signed originals of determinations and findings authorizing contracting by negotiation, and copies of documents supporting the determinations and findings.	6 years and 3 months after final payment.
(e) Signed originals of small purchases and modifications thereto and construction contracts under $2,000.	3 years after final payment.
(f) All unsuccessful offers or quotations that pertain to contracts below the appropriate small purchase limitation in Part 13.	Retain 1 year after date of award or until final payment, whichever is later; but if the contracting officer determines that the files have future value to the Government, retain as long as advisable.
(g) Contract status (progressing), expediting, and production surveillance records.	6 months after final payment.
(h) Rejected engineering change proposals.	6 months after final payment.
(i) Labor compliance records, including equal employment opportunity records.	3 years after final payment.
(j) Documents pertaining generally to the contractor as described at 4.801(c)(3).	Until superseded or obsolete.
(k) Records or documents other than those in paragraphs 4.805(a)-(j) above pertaining to contracts below the appropriate small purchase limitation in Part 13.	1 year after final payment.
(l) Records or documents other than those in paragraphs 4.805(a)-(k) above pertaining to contracts above the appropriate small purchase limitation in Part 13.	6 years and 3 months after final payment.
(m) Files for cancelled solicitations (see 4.801(c)(1)).	5 years after cancellation.
(n) Solicited and unsolicited unsuccessful bids and proposals above the appropriate small purchase limitation in Part 13.	
(1) When filed separately from contract case files.	Until contract completion date.
(2) When filed with contract case files.	6 years and 3 months after final payment.

PART 5—PUBLICIZING CONTRACT ACTIONS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

5.000 Scope of part.

This part prescribes policies and procedures for publicizing contract opportunities and award information.

5.001 Policy.

Contracting officers shall publicize contract actions offering competitive opportunities for contractors and subcontractors, in order to—

(a) Increase competition;

(b) Broaden industry participation in meeting Government requirements; and

(c) Assist small business concerns, small disadvantaged business concerns, and labor surplus area concerns in obtaining contracts and subcontracts.

SUBPART 5.1—DISSEMINATION OF INFORMATION

5.101 Methods of disseminating information.

(a) Except as provided in 5.202, contracting officers shall disseminate information on proposed contracts in amounts over $5,000 for civilian agencies and $10,000 for defense agencies by—

(1) Synopsizing in the Commerce Business Daily (CBD) (see Subpart 5.2); and

(2) Displaying a copy of each solicitation that provides at least 10 calendar days for submitting offers for an unclassified contractual action on bulletin boards in the contracting office and/or at additional public places from the date of issuance until 7 calendar days after the offers have been opened; however, should posting of the solicitation be impractical, the bulletin board notices shall describe the solicitation and give the location where a copy of the solicitation may be examined.

(b) In addition, one or more of the following methods may be used:

(1) Preparing periodic handouts listing proposed contracts, and displaying them as in 5.101(a)(2).

(2) Assisting local trade associations in disseminating information to their members.

(3) Making brief announcements of proposed contracts to newspapers, trade journals, magazines, or other mass communication media for publication without cost to the Government.

(4) Placing paid advertisements in newspapers or other communications media, subject to the following limitations:

(i) Contracting officers shall place paid advertisements of proposed contracts only when it is anticipated that effective competition cannot be obtained otherwise (see 5.205(d)).

(ii) Contracting officers shall not place advertisements of proposed contracts in a newspaper published and printed in the District of Columbia unless the supplies or services will be furnished, or the labor performed, in the District of Columbia or adjoining counties in Maryland or Virginia (44 U.S.C. 3701).

(iii) Advertisements published in newspapers must be under proper written authority in accordance with 44 U.S.C. 3702 (see 5.502(a)).

5.102 Availability of solicitations.

(a) The contracting officer shall—

(1) Maintain a reasonable number of copies of solicitations publicized in the CBD, including specifications and other pertinent information (upon request, potential sources not initially solicited shall be mailed or provided copies of solicitations, if available);

(2) Provide copies of a limited solicitation to firms requesting copies that were not initially solicited, but only after advising the requester of the determination to limit the solicitation to a specified firm or firms possessing the

capability to meet the requirements for award;

(3) Provide copies on a "first-come-first-served" basis, for pickup at the contracting office, to publishers, trade associations, information services, and other members of the public having a legitimate interest (for construction, see 36.211); and

(4) In addition to the methods of disseminating proposed contract information in 5.101(a) and (b), provide upon request to small business concerns, as required by 15 U.S.C. 637(b)—

(i) A copy of the solicitation and specifications;

(ii) The name and telephone number of an employee of the agency to answer questions on the solicitation; and

(iii) Adequate citations to each applicable major Federal law or agency rule with which small business concerns must comply in performing the contract.

(b) This section 5.102 applies to classified contracts to the extent consistent with agency security requirements (see 5.202(a)).

SUBPART 5.2—SYNOPSES OF PROPOSED CONTRACTS

5.201 General.

(a) Under the Small Business Act (see 15 U.S.C. 637(e)), the Secretary of Commerce is empowered to—

(1) Obtain notices (synopses) of proposed defense agency (i.e., agencies subject to the provisions of 10 U.S.C. 137) contracts of $10,000 and above, and proposed civil agency contracts of $5,000 and above (but see 5.205(c) for contracts for architect-engineer services), from any agency engaged in contracting for supplies and services in the United States, its possessions, and Puerto Rico; and

(2) Publicize a synopsis in the Commerce Business Daily (CBD) immediately after the necessity for each contract is established.

(b) Other than for the exceptions in 5.202, and special situations in 5.205, the contracting officer shall transmit a synopsis to the CBD (see 5.207) for each proposed—

(1) Contract meeting the applicable threshold in 5.201(a)(1);

(2) Effort to locate private commercial sources for cost comparison purposes under OMB Circular A-76 (see 5.205(d));

(3) Modification to an existing contract that obligates new funds for additional supplies and services (but see 5.202(i)), including definitization of letter contracts that have not been previously synopsized, that meet the applicable threshold in 5.201(a)(1); and

(4) Contract or order in any amount when advantageous to industry or the Government.

(c) The primary purpose of the CBD is to identify contracting and subcontracting opportunities.

(d) Subscriptions to the CBD can be entered at any Department of Commerce office. Complimentary subscriptions are available to Government offices on a limited basis.

5.202 Exceptions.

Synopsizing is not required when any of the following are involved:

(a) Classified matters, when the synopsis cannot be worded to preclude the disclosure of classified information, or when disclosure of the Government's interest in the proposed contract would violate security requirements. Other classified contracts require publication in the CBD, even though access to classified matter might be necessary to submit a proposal or perform the contract.

(b) Perishable subsistence.

(c) Utility services (except telecommunications services).

(d) Unusual or compelling emergencies in which the Government would be seriously injured if offers were permitted to be made more than 15 calendar days after issuing the solicitation, or the date of transmitting the synopsis, whichever is earlier. The circumstances involved shall be documented in the contract file by the contracting officer.

(e) Orders placed under existing contracts. This exception does not apply to orders placed under basic ordering agreements (BOA's) unless the agreements themselves were previously synopsized.

(f) Contracts from or through another Government agency, including contracts with the Small Business Administration (SBA) under section 8(a) of the Small Business Act.

(g) Acquisitions from a mandatory source of supply.

(h) Solicitation of offers from foreign sources only.

(i) Modifications to existing contracts that were previously synopsized, or for which new funds are not obligated for additional supplies and services (see 5.201(b)(3)).

5.203 Time of synopsizing.

To allow concerns not on current solicitation mailing lists time to prepare offers or quotations, contracting officers shall—

(a) Transmit synopses of proposed contracts to the CBD for publication no less than 10 calendar days before issuing solicitations, or before placing orders against BOA's if the agreements were not previously synopsized;

(b) Transmit synopses to the CBD for publication of proposed contracts involving architect-engineer services and research and development, allowing no less than 14 calendar days before issuing solicitations for the proposed contracts;

(c) Use a date on or about the intended date if a definite date for issuing the solicitation is not established; however, if this is not feasible, forward the synopsis to the CBD to arrive not later than the date of issuance of solicitations; and

(d) Properly document any reasons that prevent the synopsis from being forwarded to the CBD at the required time.

5.204 Presolicitation notices.

Contracting officers shall synopsize presolicitation notices. Synopsizing a second time is not required when the solicitation is issued. However, if the presolicitation notice contains a set-aside provision that is later canceled, the contracting officer shall synopsize the proposed contract a second time when the solicitation is issued.

5.205 Special situations.

(a) *Research and development (R&D) advance notices.* Contracting officers shall publish in the CBD advance notices of their interest in R&D fields. Each notice shall be titled "Research and Development Sources Sought," cite the appropriate Numbered Note, and include the name and telephone number of the contracting officer or other contracting activity official from whom technical details of the project can be obtained. This will enable sources to submit information for evaluation of their R&D capabilities. Contracting officers shall synopsize all subsequent solicitations for R&D contracts, including those resulting from a previously synopsized advance notice, unless one of the exceptions in 5.202 applies.

(b) *Personal and professional services.* Except when exempted by 5.202, contracting officers shall synopsize in the CBD solicitations for personal and professional services (see Subparts 37.1 and 37.2) when it is feasible and practicable to do so and in the Government's interest.

(c) *Architect-engineer services.* Except when exempted by 5.202, contracting officers shall publicize solicitations for architect-engineer services as follows:

(1) Synopsize in the CBD each contract to be made in the United

States, its possessions, and Puerto Rico for which the total fee (including phases and options) is expected to exceed $10,000.

(2) When the total fee is not expected to exceed $10,000, or when the contract is to be made outside the United States, its possessions, and Puerto Rico, the contracting officer may display a notice of the proposed contract at the contracting office and use other optional publicizing methods authorized by 5.101(b).

(d) *Cost comparison under OMB Circular A-76.* When making cost comparisons between contractor and Government performance under the procedures prescribed in Subpart 7.3 and OMB Circular A-76, the contracting officer shall not arrive at a conclusion that there are no commercial sources capable of providing the required supplies or services until publicizing the requirement in the CBD at least three times in a 90 calendar-day period, with a minimum of 30 calendar days between each. When necessary to meet an urgent requirement, this may be limited to a total of two publications in the CBD in a 30 calendar-day period, with a minimum of 15 calendar days between each.

5.206 Synopses of subcontract opportunities.

(a) Contracting officers shall, if in the Government's interest and significant subcontracting opportunities exist, publish in the CBD the names and addresses of prospective offerors in accordance with subparagraphs (1) and (2) below. The synopsis shall include Numbered Note 27, which reads as follows: "It is suggested that small business firms or others interested in subcontracting opportunities in connection with the described acquisition, make direct contact with firm(s) listed."

(1) In negotiated acquisitions over $500,000, the contracting officer shall indicate in the synopsis the firms to whom solicitations will be issued (if no more than 5 firms will be solicited), to enable small business concerns and others interested in subcontracting to contact prospective prime contractors early in the acquisition.

(2) In two-step formally advertised acquisitions, the contracting officer shall indicate in the synopsis those firms that have submitted acceptable technical proposals in the first step of two-step formal advertising and will be issued solicitations in the second step.

(b) Contracting officers shall encourage prime contractors and subcontractors to use the CBD to publicize subcontracting opportunities stemming from their Government business. Subcontract information should be mailed directly to the CBD under the heading "Subcontracting Assistance Wanted," using the format in 5.207.

5.207 Preparation and transmittal of synopses.

(a) *Transmittal.* Contracting officers shall transmit synopses of proposed contracts--

(1) By the most effective transmission means or devices available, or if no other, daily via first class mail; and

(2) Addressed to the following:
U.S. Department of Commerce
Commerce Business Daily
P.O. Box 5999
Chicago, IL 60680.

(b) *Format.* Contracting officers shall prepare synopses in the following format:

(1) *General.* Use conventional typing with upper and lower case letters, standard punctuation, and commonly used abbreviations. Write text in such detail that it will be understood by interested parties.

(2) *Spacing.* Begin lines in the text, except paragraph beginnings, flush with the left margin. Use double-spaced lines. Put each separate proposed contract in a separate paragraph.

(3) *Contracting office and address.* Begin the name and address of the contracting office on the first line of the text. Do not abbreviate except for the names of States. The address shall include an attention phrase identifying the person to contact for further information, including title, code, and telephone number.

(4) *Description of the supply/service.* Begin five spaces from the left margin, several lines under the name and address of the contracting office. Type the following elements, to the extent applicable, horizontally in the following sequence, with each element separated by two hyphens:

(i) Supply/service classification code (see 5.207(f)) (if more than one classification is involved, enter the code for the one with the largest dollar volume).

(ii) Name of supply/service.

(iii) National stock number (NSN), if assigned.

(iv) Specification, including notation "QPL" if the specification requires a qualified product.

(v) Manufacturer, including part number, drawing number, etc.

(vi) Size or dimensions.

(vii) Basic material from which fabricated.

(viii) Quantity, including options for additional quantities.

(ix) Unit of issue.

(x) Destination information.

(xi) Delivery schedule.

(xii) Solicitation number.

(xiii) Solicitation opening and closing dates.

(xiv) Duration of the contract period.

(xv) For architect-engineer projects, and other projects for which the codes are insufficient, brief details of the location, scope of services required, cost range and limitations, type of contract, estimated starting and completion dates, and significant evaluation factors by which selection will be made.

(xvi) Numbered Notes (see 5.207(d)), including instructions for set-asides for small businesses and labor surplus area concerns.

(5) *Supplies subject to the Trade Agreements Act of 1979.* See Part 25.

(c) *Set-asides.* (1) When the proposed acquisition provides for a total small business or labor surplus area (LSA) set-aside, state: "The proposed contract listed here is a 100-percent small business (or labor surplus area) set-aside."

(2) When there is a proposed partial small business or LSA set-aside, state: "An additional quantity of ..... is being reserved for ..... [*insert 'small business' or 'labor surplus area' as appropriate*] concerns under a partial determination."

(d) *Numbered Notes.*

(1) The first issue of the CBD each week lists all current "Numbered Notes." The Notes describe how to respond to the synopsis of a proposed contract; the qualifications a prospective contractor must have to be considered for an award; and the availability of plans, specifications, or other information. When one or more of the Notes applies to a synopsis, contracting officers should incorporate the content of the Note(s) by reference at the end of the synopsis; e.g., "See Note(s) ....." New Notes may be added to the list only when they apply to more than one agency. Contracting officers shall also include the substance of Numbered Notes whenever a proposed contract is publicized by other means than the CBD (see 5.101).

(2) If the acquisition is subject to the requirements of the Trade Agreements Act of 1979 (see 5.207(b)(5)), Numbered Note 12 shall be referenced in the synopsis.

(e) *Information not covered by Numbered Notes.* To alert prospective contractors to information not covered by Numbered Notes, contracting officers should identify the following unusual circumstances in the synopsis:

(1) "*Availability of specifications, plans, or drawings.* It is impracticable to

distribute the applicable ..... [*insert 'specifications,' 'plans,' 'drawings,' or other appropriate words*] with the solicitation. These contract documents may be examined or obtained at....."

(2) "*Availability of background research report.* This contract for basic research is a continuation of an effort conducted for the past ..... [*insert period*]. A research report containing findings to date is not available to the Government."

(3) "*Production requirements.* The production of the supplies listed requires a substantial initial investment or an extended period of preparation for manufacture."

(4) "*Standardization requirements.* This contract is for technical equipment. A determination was made under section 15.213 of the Federal Acquisition Regulation that standardization and interchangeability of parts are necessary in the public interest. To achieve standardization, solicitations will be issued only to the following firms: .....[*insert names and addresses of these firms*]."

(f) (1) The contracting officer shall use the following classification codes to describe services:

Code	Description
A	Experimental, developmental, test, and basic and applied research work.
H	Expert and consultant services.
J	Maintenance and repair of equipment.
K	Modification, alteration, and rebuilding of equipment.
L	Technical representative services (e.g., services of technical specialists required to assist with the installation, checking, operation, and maintenance of complex equipment).
M	Operation and maintenance of Government-owned facility.
N	Installation of equipment (use code K if the contract also involves modification, alteration, or rebuilding of the equipment).
O	Funeral and Chaplain services.
P	Salvage services (services required to salvage property of any kind).
Q	Medical services.
R	Architect-engineer services.
S	Housekeeping services; e.g.—
	Utilities (gas, electric, telephone, etc.);
	Laundry and dry cleaning;
	Custodial-janitorial;
	Insect and rodent control;
	Packing and crating;
	Storage;
	Garbage and trash collection;
	Food;
	Fueling;
	Fire protection;
	Building and grounds maintenance;
	Care of remains-funerals; and
	Guards.
T	Photographic, mapping, printing, and publication services; e.g.—
	Film processing;
	Cataloging;
	Charting;
	Reproduction;
	Technical writing;
	Art; and
	Printing.
U	Training.
V	Transportation services; e.g.—
	Passenger and cargo transportation;
	Vessel charter;
	Vessel operation;
	Tug service;
	Stevedoring;
	Vehicle hire; and
	Railway equipment charter.
W	Lease or rental, except transportation equipment; e.g.—
	Lease of ADP or EAM equipment; and
	Lease of earth-moving equipment.
X	Miscellaneous (includes all services not covered by any other code).
Y	Construction; i.e., new construction and major additions to existing buildings or facilities.
Z	Maintenance, repair, and alteration of real property; i.e., painting, building maintenance, alteration and repair, grounds maintenance and repair, roads maintenance and repair.

(2) The contracting officer shall use the following classification codes to describe supplies:

Code	Description
10	Weapons.
11	Nuclear ordnance.
12	Fire control equipment.
13	Ammunition and explosives.
14	Guided missiles.
15	Aircraft and airframe structural components.
16	Aircraft components and accessories.
17	Aircraft launching, landing, and ground handling equipment.
18	Space vehicles.
19	Ships, small craft, pontoons, and floating docks.
20	Ship and marine equipment.
22	Railway equipment.
23	Motor vehicles, trailers, and cycles.
24	Tractors.
25	Vehicular equipment components.
26	Tires and tubes.
28	Engines, turbines, and components.
29	Engine accessories.
30	Mechanical power transmission equipment.
31	Bearings.
32	Woodworking machinery and equipment.
34	Metalworking machinery.
35	Service and trade equipment.
36	Special industry machinery.
37	Agricultural machinery and equipment.
38	Construction, mining, excavating, and highway maintenance equipment.
39	Materials handling equipment.
40	Rope, cable, chain, and fittings.
41	Refrigeration and air-conditioning equipment.
42	Fire fighting, rescue, and safety equipment.
43	Pumps and compressors.
44	Furnace, steam plant, and drying equipment and nuclear reactors.
45	Plumbing, heating, and sanitation equipment.
46	Water purification and sewage treatment equipment.
47	Pipe, tubing, hose, and fittings.
48	Valves.
49	Maintenance and repair shop equipment.
51	Hand tools.
52	Measuring tools.
53	Hardware and abrasives.
54	Prefabricated structures and scaffolding.
55	Lumber, millwork, plywood, and veneer.
56	Construction and building materials.
58	Communication equipment.
59	Electrical and electronic equipment components.
61	Electric wire, and power and distribution equipment.
62	Lighting fixtures and lamps.
63	Alarm and signal systems.
65	Medical, dental, and veterinary equipment and supplies.
66	Instruments and laboratory equipment.
67	Photographic equipment.
68	Chemicals and chemical products.
69	Training aids and devices.
70	General-purpose ADP equipment, software, supplies, and support equipment.
71	Furniture.
72	Household and commercial furnishings and appliances.
73	Food preparation and serving equipment.
74	Office machines.
75	Office supplies and devices.
76	Books, maps, and other publications.
77	Musical instruments, phonographs, and home-type radios.
78	Recreational and athletic equipment.
79	Cleaning equipment and supplies.
80	Brushes, paints, sealers, and adhesives.
81	Containers, packaging, and packing supplies.
83	Textiles, leather, furs, apparel and shoe findings, tents, and flags.
84	Clothing, individual equipment, and insignia.
85	Toiletries.
87	Agricultural supplies.
88	Live animals.
89	Subsistence.
91	Fuels, lubricants, oils, and waxes.
93	Nonmetallic fabricated materials.
94	Nonmetallic crude materials.
95	Metal bars, sheets, and shapes.
96	Ores, minerals, and their primary products.
99	Miscellaneous.

SUBPART 5.3—SYNOPSES OF CONTRACT AWARDS

5.301 General.

(a) Contracting officers shall synopsize in the Commerce Business Daily (CBD) awards of contracts exceeding $100,000 that are to be performed in whole or in part within the United States; however, the dollar threshold is not a prohibition against publicizing an award of a smaller amount when publicizing would be advantageous to industry or to the Government.

(b) Exceptions to this policy include awards—

(1) To the SBA under section 8(a) of the Small Business Act;

(2) For perishable subsistance items;

(3) For brand-name items for commissary resale; and

(4) Classified contracts that are not synopsized in accordance with 5.202(a).

5.302 Preparation and transmittal of synopses of awards.

Contracting officers shall—

(a) Transmit synopses of contract awards in the same manner as prescribed in 5.207; and

(b) In addition to the applicable elements in 5.207(b)(4), include the following in the synopsis of award:

(1) Contract number and date and, in parentheses, the solicitation number.

(2) Name and address of the contractor.

(3) Dollar amount of the award.

(4) The following details of f.o.b. destination contracts, when total shipments from origin to destination will exceed 200,000 pounds, and destinations are firm:

(i) Origin point of shipment when different from the address of the contractor.

(ii) Continental United States destination of shipment.

(iii) Scheduled delivery period (beginning and ending dates).

(5) A statement of the industries, crafts, processes, or component items for which subcontractors are desired in a geographic area indicated by the contractor. This information shall be included when requested by the prime contractor.

5.303 Announcement of contract awards.

(a) *Public Announcement.* Contracting officers shall make information available on awards over $3 million in sufficient time for the agency concerned to announce it by 4:00 p.m. Washington, DC time on the day of award. Contracts excluded from this reporting requirement include those placed with (1) the Small Business Administration under Section 8(a) of the Small Business Act, and (2) with foreign firms when the place of delivery or performance is outside the United States or its possessions. Agencies shall not release information on awards before the public release time of 4:00 p.m. Washington, DC time.

(b) *Local Announcement.* Agencies may also release information on contract awards to the local press or other media. When local announcements are made for contract awards of $10,000 or more, they shall include—

(1) For awards after formal advertising, a statement that the contract was awarded after competition by formal advertising, the number of offers solicited and received, and the basis for selection (e.g., the lowest responsible bidder); or

(2) For awards after negotiation, the information prescribed by 15.1001(c), and after competitive negotiation (either price or design competition), a statement to this effect, and in general terms the basis for selection.

SUBPART 5.4—RELEASE OF INFORMATION

5.401 General.

(a) A high level of business security must be maintained in order to preserve the integrity of the acquisition process. When it is necessary to obtain information from potential contractors and others outside the Government for use in preparing Government estimates, contracting officers shall ensure that the information is not publicized or discussed with potential contractors.

(b) Contracting officers may make available maximum information to the public, except information—

(1) On plans that would provide undue or discriminatory advantage to private or personal interests;

(2) Received in confidence from an offeror;

(3) Otherwise requiring protection under Freedom of Information Act (see Subpart 24.2) or Privacy Act (see Subpart 24.1); or

(4) Pertaining to internal agency communications (e.g., technical reviews, contracting authority or other reasons, or recommendations referring thereto).

(c) This policy applies to all Government personnel who participate directly or indirectly in any stage of the acquisition cycle.

5.402 General public.

Contracting officers shall process requests for specific information from the general public, including suppliers, in accordance with Subpart 24.1 or 24.2, as appropriate.

5.403 Requests from Members of Congress.

(a) *Individual requests.* Contracting officers shall give Members of Congress, upon their request, detailed information regarding any particular contract. When responsiveness would result in disclosure of classified matter, business confidential information, or information prejudicial to competitive acquisition, the contracting officer shall refer the proposed reply, with full documentation, to the agency head and inform the legislative liaison office of the action.

(b) *Inclusion on solicitations mailing lists.* Upon request of a Congressional Committee or Subcommittee Chairperson, contracting officers shall place any member of a Committee or Subcommittee on the applicable solicitation mailing lists to receive automatic distribution of solicitations in the specific area of interest.

5.404 Release of long-range acquisition estimates.

To assist industry planning and to locate additional sources of supply, it may be desirable to publicize estimates of unclassified long-range acquisition requirements. Estimates may be publicized as far in advance as possible.

5.404-1 Release procedures.

(a) *Application.* The agency head, or a designee, may release long-range acquisition estimates if the information will—

(1) Assist industry in its planning and facilitate meeting the acquisition requirements;

(2) Not encourage undesirable practices (e.g., attempts to corner the market or hoard industrial materials); and

(3) Not indicate the existing or potential mobilization of the industry as a whole.

(b) *Conditions.* The agency head shall ensure that—

(1) Classified information is released through existing security channels in accordance with agency security regulations;

(2) The information is publicized as widely as practicable to all parties simultaneously by any of the means described in this part;

(3) Each release states that (i) the estimate is based on the best information available, (ii) the information is subject to modification and is in no way binding on the Government, and (iii) more specific information relating to any individual item or class of items will not be furnished until the proposed acquisition is synopsized in the CBD, or the solicitation is issued;

(4) Each release contains the name and address of the contracting officer that will process the acquisition;

(5) Modifications to the original release are publicized as soon as possible, in the same manner as the original; and

(6) Each release—

(i) Is coordinated in advance with small business, public information, and public relations personnel, as appropriate;

(ii) Contains, if applicable, a statement that small business or LSA set-asides may be involved, but that a determination can be made only when acquisition action is initiated; and

(iii) Contains the name or description of the item, and the estimated quantity to be acquired by calendar quarter, fiscal year, or other period. It may also contain such additional information as the number of units last acquired, the unit price, and the name of the last supplier.

5.404-2 Announcements of long-range acquisition estimates.

Further publication, consistent with the needs of the individual case, may be accomplished by announcing in the CBD that long-range acquisition estimates have been published and are obtainable, upon request, from the contracting officer.

5.405 Exchange of acquisition information.

(a) When the same item or class of items is being acquired by more than one agency, or by more than one contracting activity within an agency, the exchange and coordination of pertinent information, particularly cost and pricing data, between these agencies or contracting activities is necessary to promote uniformity of

treatment of major issues and the resolution of particularly difficult or controversial issues. The exchange and coordination of information is particularly beneficial during the period of acquisition planning, presolicitation, evaluation, and pre-award survey.

(b) When substantial acquisitions of major items are involved or when the contracting activity deems it desirable, the contracting activity shall request appropriate information (on both the end item and on major subcontracted components) from other agencies or contracting activities responsible for acquiring similar items. Each agency or contracting activity receiving such a request shall furnish the information requested. The contracting officer, early in a negotiation of a contract, or in connection with the review of a subcontract, shall request the contractor to furnish information as to the contractor's or subcontractor's previous Government contracts and subcontracts for the same or similar end items and major subcontractor components.

SUBPART 5.5—PAID ADVERTISEMENTS

5.501 Definitions.

"Advertisement," as used in this subpart, means any single message prepared for placement in communication media, regardless of the number of placements.

"Publication," as used in this subpart, means (a) the placement of an advertisement in a newspaper, magazine, trade or professional journal, or any other printed medium, or (b) the broadcasting of an advertisement over radio or television.

5.502 Authority.

(a) *Newspapers.* Authority to approve the publication of paid advertisements in newspapers is vested in the head of each agency (44 U.S.C. 3702). This approval authority may be delegated (5 U.S.C. 302 (b)). Contracting officers shall obtain written authorization in accordance with agency procedures before advertising in newspapers.

(b) *Other media.* Unless the agency head determines otherwise, advance written authorization is not required to place advertisements in media other than newspapers.

5.503 Procedures.

(a) *General.* Orders for paid advertisements may be placed directly with the media or through an advertising agency. Contracting officers shall give small and disadvantaged business concerns maximum opportunity to participate in these acquisitions.

(b) *Rates.* Advertisements may be paid for at rates not over the commercial rates charged private individuals, with the usual discounts (44 U.S.C. 3703).

(c) *Forms.* (1) When contracting directly with the media for advertising, contrating officers shall—

(i) Use Standard Form 26, Award/Contract, when the dollar amount of the acquisition exceeds the small purchase dollar limitations (see 13.000); or

(ii) Use Optional Form 347, Order for Supplies or Services, or an approved agency form, when the dollar amount of the acquisition does not exceed the small purchase dollar limitations (see 13.000).

(2) When issuing a delivery order under a basic ordering agreement with an advertising agency for advertising, contracting officers should use Optional Form 347, or an approved agency form.

(d) *Proof of advertising.* Every invoice for advertising shall be accompanied by a copy of the advertisement or an affidavit of publication furnished by the publisher, radio or television station, or advertising agency concerned (44 U.S.C. 3703). Paying offices shall retain the proof of advertising until the General Accounting Office settles the paying office's account.

(e) *Payment.* Upon receipt of an invoice supported by proof of advertising, the contracting officer shall attach a copy of the written authority (see 5.502(a)) and submit the invoice for payment under agency procedures.

5.504 Use of advertising agencies.

(a) *General.* Basic ordering agreements may be placed with advertising agencies for assistance in producing and placing advertisements when a significant number will be placed in several publications and in national media. Services of advertising agencies include, but are not limited to, counseling as to selection of the media for placement of the advertisement, contacting the media in the interest of the Government, placing orders, selecting and ordering typography, copywriting, and preparing rough layouts.

(b) *Use of commission-paying media.* The services of advertising agencies in placing advertising with media often can be obtained at no cost to the Government, over and above the space cost, as many media give advertising agencies a commission or discount on the space cost that is not given to the Government.

(c) *Use of noncommission-paying media.* Some media do not grant advertising agencies a commission or discount, meaning the Government can obtain the same rate as the advertising agency. If the advertising agency agrees to place advertisements in noncommission-paying media as a no-cost service, the basic ordering agreement shall so provide. If the advertising agency will not agree to place advertisements at no cost, the agreement shall (1) provide that the Government may place orders directly with the media, or (2) specify an amount that the Government will pay if the agency places the orders.

(d) *Art work, supplies, and incidentals.* The basic ordering agreement also may provide for the furnishing by the advertising agency of art work, supplies, and incidentals, including brochures and pamphlets, but not their printing. "Incidentals" may include telephone calls, telegrams, and postage incurred by the advertising agency on behalf of the Government.

PART 6—[RESERVED]

SUBCHAPTER B—Acquisition Planning

PART 7—ACQUISITION PLANNING

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

7.000 Scope of part.

This part prescribes policies and procedures for—

(a) Developing acquisition plans;

(b) Determining whether to use commercial or Government resources

for acquisition of supplies or services; and

(c) Deciding whether it is more economical to lease equipment rather than purchase it.

SUBPART 7.1—ACQUISITION PLANS

7.101 Definitions.

"Acquisition planning" means the process by which the efforts of all personnel responsible for an acquisition are coordinated and integrated through a comprehensive plan for fulfilling the agency need in a timely manner and at a reasonable cost. It includes developing the overall strategy for managing the acquisition.

"Design-to-cost" is a concept that establishes cost elements as management goals to achieve the best balance between life-cycle cost, acceptable performance, and schedule. Under this concept, cost is a design constraint during the design and development phases and a management discipline throughout the acquisition and operation of the system or equipment.

"Life-cycle cost" means the total cost to the Government of acquiring, operating, supporting, and (if applicable) disposing of the items being acquired.

"Planner," as used in this subpart, means the designated person or office responsible for developing and maintaining a written plan, or for the planning function in those acquisitions not requiring a written plan.

7.102 Policy.

For acquisitions other than small, repetitive buys, agencies shall perform coordinated planning, integrating the efforts of all personnel responsible for significant aspects of the acquisition. The purpose of this planning is to ensure that the Government meets its needs in the most effective, economical, and timely manner. Agencies that have a detailed acquisition planning system in place that generally meets the criteria of this subpart need not revise their system to specifically meet the criteria.

7.103 Agency-head responsibilities.

The agency head or a designee shall prescribe procedures for—

(a) Establishing criteria and thresholds at which increasingly greater detail and formality in the planning process is required as the acquisition becomes more complex and costly, specifying those cases in which a written plan shall be prepared;

(b) Writing plans either on a system basis or on an individual contract basis, depending upon the acquisition;

(c) Ensuring that the principles of this subpart are used, as appropriate, for those acquisitions that do not require a written plan as well as for those that do;

(d) Designating planners for acquisitions;

(e) Reviewing and approving acquisition plans and revisions to these plans;

(f) Establishing criteria and thresholds at which design-to-cost and life-cycle-cost techniques will be used;

(g) Establishing standard acquisition plan formats, if desired, suitable to agency needs; and

(h) Waiving requirements of detail and formality, as necessary, in planning for acquisitions having compressed delivery or performance schedules because of the urgency of the need.

7.104 General procedures.

(a) Acquisition planning should begin as soon as the agency need is identified, preferably well in advance of the fiscal year in which contract award is necessary. In developing the plan, the planner shall form a team consisting of all those who will be responsible for significant aspects of the acquisition, such as contracting, fiscal, legal, and technical personnel. The planner should review previous plans for similar acquisitions and discuss them with the key personnel involved in those acquisitions. At key dates specified in the plan or whenever significant changes occur, and no less often than annually, the planner shall review the plan and, if appropriate, revise it.

(b) Requirements and logistics personnel should avoid issuing requirements on an urgent basis or with unrealistic delivery or performance schedules, since it generally restricts competition and increases prices. Early in the planning process, the planner should consult requirements and logistics personnel who determine type, quality, quantity, and delivery requirements.

(c) An acquisition plan may be used to support a determination and findings (D&F) (see Subpart 15.3).

7.105 Contents of written acquisition plans.

In order to facilitate attainment of the acquisition objectives, the plan must identify those milestones at which decisions should be made (see subparagraph (b)(19) below). The plan shall address all the technical, business, management, and other significant considerations that will control the acquisition. The specific content of plans will vary, depending on the nature, circumstances, and stage of the acquisition. In preparing the plan, the planner shall follow the applicable instructions in paragraphs (a) and (b) below, together with the agency's implementing procedures.

(a) *Acquisition background and objectives.* (1) *Statement of need.* Introduce the plan by a brief statement of need. Summarize the technical and contractual history of the acquisition. Discuss feasible acquisition alternatives and any related in-house effort.

(2) *Applicable conditions.* State all significant conditions affecting the acquisition, such as (i) requirements for compatibility with existing or future systems or programs and (ii) any known cost, schedule, and capability or performance constraints.

(3) *Cost.* Set forth the established cost goals for the acquisition and the rationale supporting them, and discuss related cost concepts to be employed, including, as appropriate, the following items:

(i) *Life-cycle cost.* Discuss how life-cycle cost will be considered. If it is not used, explain why. If appropriate, discuss the cost model used to develop life-cycle-cost estimates.

(ii) *Design-to-cost.* Describe the design-to-cost objective(s) and underlying assumptions, including the rationale for quantity, learning-curve, and economic adjustment factors. Describe how objectives are to be applied, tracked, and enforced. Indicate specific related solicitation and contractual requirements to be imposed.

(iii) *Application of should-cost.* Describe the application of should-cost analysis to the acquisition (see 15.810).

(4) *Capability or performance.* Specify the required capabilities or performance characteristics of the supplies or services being acquired and state how they are related to the need.

(5) *Delivery or performance-period requirements.* Describe the basis for establishing delivery or performance-period requirements (see Subpart 12.1). Explain and provide reasons for any urgency if it results in concurrency of development and production or constitutes justification for noncompetitive contracting.

(6) *Trade-offs.* Discuss the expected consequences of trade-offs among the various cost, capability or performance, and schedule goals.

(7) *Risks.* Discuss technical, cost, and schedule risks and describe what efforts are planned or underway to reduce risk and the consequences of failure to achieve goals. If concurrency of development and production is planned, discuss its effects on cost and schedule risks.

(b) *Plan of action.* (1) *Sources.* Indicate the prospective sources of supplies and/or services that will meet the need. Consider required sources of supplies and services (see Part 8). Include consideration of small business, small disadvantaged business, and labor surplus area concerns (see Parts 19 and 20). If the acquisition or a part of it is for commercial or commercial-type products (see Part 11), address the results of market research and analysis and indicate their impact on the various elements of the plan.

(2) *Competition.* Describe how competition will be sought, promoted, and sustained throughout the course of the acquisition. Discuss component breakout for competition, if applicable. If noncompetitive contracting is being recommended, identify the source and discuss why competition cannot be used. Justification for a noncompetitive acquisition may be referenced and attached to the plan.

(3) *Source-selection procedures.* Discuss the source-selection procedures for the acquisition, including the timing for submission and evaluation of proposals, and the relationship of evaluation factors to the attainment of the acquisition objectives (see Subpart 15.6).

(4) *Contracting considerations.* For each contract contemplated, discuss contract type selection (see Part 16); use of multiyear contracting, options, or other special contracting methods (see Part 17); any special clauses, special solicitation provisions, or FAR deviations required (see Subpart 1.4); whether formal advertising or negotiation will be used and why; whether equipment will be acquired by lease or purchase (see Subpart 7.4) and why; and any other contracting considerations.

(5) *Authority for contracting by negotiation.* If contracting by negotiation is contemplated, cite the authority (see Subpart 15.2) for using negotiation and discuss the basis for selecting that particular authority. If a D&F to justify negotiation will be required (see Subpart 15.3) and the acquisition plan will be used to support that D&F, provide the information needed.

(6) *Budgeting and funding.* Describe how budget estimates were derived and discuss the schedule for obtaining adequate funds at the time when they are required (see Subpart 32.7).

(7) *Product descriptions.* In accordance with Part 10, explain the choice of product description types to be used in the acquisition.

(8) *Priorities, allocations, and allotments.* When urgency of the requirement dictates a particularly short delivery or performance schedule, certain priorities may apply. If so, specify the method for obtaining and using priorities, allocations, and allotments, and the reasons for them (see Subpart 12.3).

(9) *Contractor versus Government performance.* Address the consideration given to OMB Circular No. A-76 (see Subpart 7.3).

(10) *Management information requirements.* Discuss, as appropriate, what management system will be used by the Government to monitor the contractor's effort.

(11) *Make or buy.* Discuss any consideration given to make-or-buy programs (see Subpart 15.7).

(12) *Test and evaluation.* To the extent applicable, describe the test program of the contractor and the Government. Describe the test program for each major phase of a major system acquisition. If concurrency is planned, discuss the extent of testing to be accomplished before production release.

(13) *Logistics considerations.* Describe—

(i) The assumptions determining contractor or agency support, both initially and over the life of the acquisition, including consideration of contractor or agency maintenance and servicing (see Subpart 7.3) and distribution of commercial products (see Part 11);

(ii) The reliability, maintainability, and quality assurance requirements, including any planned use of warranties (see Part 46); and

(iii) The requirements for contractor data (including repurchase data) and data rights, their estimated cost, and the use to be made of the data (see Part 27).

(14) *Government-furnished property.* Indicate any property to be furnished to contractors, including material and facilities, and discuss any associated considerations, such as its availability or the schedule for its acquisition (see Part 45).

(15) *Government-furnished information.* Discuss any Government information, such as manuals, drawings, and test data, to be provided to prospective offerors and contractors.

(16) *Environmental considerations.* Discuss environmental issues associated with the acquisition, the applicability of an environmental assessment or environmental impact statement (see 40 CFR 1502), the proposed resolution of environmental issues, and any environment-related requirements to be included in solicitations and contracts.

(17) *Security considerations.* For acquisitions dealing with classified matters, discuss how adequate security will be established, maintained, and monitored (see Subpart 4.4).

(18) *Other considerations.* Discuss, as applicable, energy conservation measures, standardization concepts, the industrial readiness program, the Defense Production Act, the Occupational Safety and Health Act, foreign sales implications, and any other matters germane to the plan not covered elsewhere.

(19) *Milestones for the acquisition cycle.* Address the following steps and any others appropriate:

Acquisition plan approval.

D&F approval.

Completion of acquisition-package preparation.

Statement of work.

Specifications.

Data requirements.

Purchase request.

Issuance of solicitation.

Evaluation of proposals, audits, and field reports.

Beginning and completion of negotiations.

Contract preparation, review, and clearance.

SUBPART 7.2—[RESERVED]

SUBPART 7.3—CONTRACTOR VERSUS GOVERNMENT PERFORMANCE

7.300 Scope of subpart.

This subpart prescribes policies and procedures for use in acquisitions of commercial or industrial products and services subject to (a) OMB Circular No. A-76 (the Circular), Policies for Acquiring Commercial or Industrial Products and Services Needed by the Government, and (b) the Cost Comparison Handbook (the Handbook), Supplement No. 1 to OMB Circular No. A-76.

7.301 Policy.

The Circular provides that it is the policy of the Government to (a) rely generally on private commercial sources for supplies and services, if certain criteria are met, while recognizing that some functions are inherently Governmental and must be performed by Government personnel, and (b) give appropriate consideration to relative cost in deciding between Government performance and performance under contract. In comparing the costs of

Government and contractor performance, the Circular provides that agencies shall base the contractor's cost of performance on firm offers.

7.302 General.

The Circular and the Handbook—

(a) Prescribe the overall policies and detailed procedures required of all agencies in making cost comparisons between contractor and Government performance. In making cost comparisons, agencies shall—

(1) Prepare an estimate of the cost of Government performance based on the same work statement and level of performance as apply to offerors; and

(2) Compare the total cost of Government performance to the total cost of contracting with the potentially successful offeror.

(b) Provide that solicitations and synopses of the solicitations issued to obtain offers for comparison purposes shall state that they will not result in a contract if Government performance is determined to be more advantageous (see the solicitation provisions at 52.207-1 and 52.207-2);

(c) Provide that each cost comparison shall be reviewed by an activity independent of the activity which prepared the cost analysis to ensure conformance with the instructions in the Handbook; and

(d) Provide that, ordinarily, agencies should not incur the delay and expense of conducting cost comparison studies to justify a Government commercial or industrial activity whose annual operating costs are estimated to be less than $100,000. Activities below this threshold should be performed by contract unless in-house performance is justified. However, if there is reason to believe that inadequate competition or other factors are causing commercial prices to be unreasonable, a cost comparison study may be conducted.

7.303 Determining availability of private commercial sources.

(a) During acquisition planning reviews, contracting officers shall assist in identifying private commercial sources.

(b) In making all reasonable efforts to identify such sources, the contracting officer shall assist in—

(i) Synopsizing the requirement in the Commerce Business Daily at least three times in a 90-day period with a minimum of 30 days between notices (but, when necessary to meet an urgent requirement, this notification may be limited to a total of two notices in a 30-day period with a minimum of 15 days between them); and

(ii) Requesting assistance from the Small Business Administration, the Department of Commerce, and the General Services Administration.

7.304 Procedures.

(a) *Work statement.* When private commercial sources are available and a cost comparison is required, the Government's functional managers responsible for the comparison or another group shall prepare a comprehensive, performance-oriented work statement. The work statement must—

(1) Accurately reflect the actual Government requirement, stating adequately *what* is to be done without prescribing *how* it is to be done;

(2) Include performance standards that can be used to ensure a comparable level of performance for both Government and contractor and a common basis for evaluation; and

(3) Be reviewed by the contracting officer to ensure that it is adequate and appropriate to serve as a basis for solicitation and award.

(b) *Cost estimate.* The agency personnel who develop the cost estimate for Government performance—

(1) Enter on a cost-comparison form (see Cost Comparison Handbook, Exhibit 1) the cost estimate and the other elements required to accomplish a cost comparison;

(2) Review the estimate for completeness and accuracy and have the estimate audited; and

(3) Submit to the contracting officer the completed form and all necessary detailed supporting data in a sealed, dated envelope not later than the time established for receipt of initial proposals or bid opening. If more time is needed to develop the Government's cost estimate, the contracting officer shall amend the opening date of the solicitation.

(c) *Solicitation.* (1) The contracting officer shall issue a solicitation based on the work statement prepared in accordance with paragraph (a) above. Prepriced option prices in existing contracts will not be used instead of issuing a new solicitation when conducting a cost comparison under a new start.

(2) Firm offers shall be required for the period covered by the cost comparison, by using (i) a base contract period and any applicable priced options to total the amount of time represented by the cost estimate for Government performance (see Subpart 17.2), or (ii) a multiyear contract when appropriate (see Subpart 17.1).

(3) Solicitations shall not, unless a proper determination to the contrary is made, limit award to U.S. offerors.

(d) *Integrity of cost comparison.* (1) The confidentiality of (i) the cost estimate for Government performance and (ii) the bids in formally advertised cost comparisons shall be maintained until the time of bid opening, to ensure that they are completely independent.

(2) For cost comparisons conducted using the results of negotiation procedures, confidentiality and independence shall be maintained until after negotiations are completed and the most advantageous offer has been selected.

(3) Personnel who have knowledge of the cost figures in the cost estimate for Government performance shall not participate in the offer-evaluation process unless the contract file is adequately documented to show that no other qualified personnel were available.

7.305 Solicitation provisions and contract clause.

(a) The contracting officer shall, when contracting by formal advertising, insert in solicitations issued for the purpose of comparing the costs of contractor and Government performance the provision at 52.207-1, Notice of Cost Comparison (Advertised).

(b) The contracting officer shall, when contracting by negotiation, insert in requests for proposals issued for the purpose of comparing the costs of contractor and Government performance the provision at 52.207-2, Notice of Cost Comparison (Negotiated).

(c) The contracting officer shall insert the clause at 52.207-3, Right of First Refusal of Employment, in solicitations issued for the purpose of making a cost comparison covering work currently being performed by the Government and in contracts that result from the solicitations.

7.306 Evaluation.

The evaluation procedure to be followed after the contracting officer receives the cost estimate for Government performance [see 7.304(b)] and the responses to the solicitation differs from conventional contracting procedures as follows:

(a) *Formal advertising.* (1) At the public bid opening, after recording of bids, the contracting officer shall—

(i) Open the sealed envelope containing the cost-comparison form on which the cost estimate for Government performance has been entered;

(ii) Enter on the cost-comparison form the price of the apparent low bidder;

(iii) Announce the result, based on the initial cost-comparison form, stating that this result is subject to required agency processing, including evaluation for responsiveness and responsibility, completion and audit of the cost-comparison form (see Cost Comparison Handbook, Exhibit 1), and resolution of any requests for review under the appeals procedure (see 7.307);

(iv) State that no final determination for performance by the Government or under contract will be made during the public review period specified in the solicitation (at least 5 working days, up to a maximum of 15 working days if the contracting officer considers the action to be complex; the public review period begins when the documents identified in (v) below are available to interested parties), plus any additional time required for the appeals procedure; and

(v) Make available for this public review by interested parties the abstract of bids, completed cost-comparison form, and detailed data supporting the cost estimate for Government performance.

(2) After evaluation of bids (see Subpart 14.4) and determinations of responsibility, the contracting officer shall provide the price of the low responsive, responsible bidder to the preparer of the cost estimate for Government performance, for (i) final Government review of the cost-comparison form and (ii) origination of a decision summary form (see Cost Comparison Handbook, Exhibit 2).

(3) Upon completion of the review process, including resolution of any request under 7.307, the responsible agency official shall make the final determination for performance by the Government or under contract and furnish the approved decision summary form to the contracting officer, who shall either award a contract or cancel the solicitation as required.

(4) The contracting officer shall make the completed and approved cost-comparison analysis available to interested parties upon request.

(b) *Negotiation.* The contracting officer shall receive proposals, evaluate them (see Subpart 15.6), conduct negotiations, and select the most advantageous proposal in accordance with normal contracting procedures (see Part 15). The contracting officer shall, before public announcement, open the sealed estimate in the presence of the preparer, enter the amount of the most advantageous responsible proposal on the cost-comparison form, and return the form to the preparer of the cost estimate for Government performance for completion. The preparer shall give due consideration to all types of costs which could add or subtract from the cost of either mode of performance.

(1) If the result of the cost comparison favors performance under contract and the responsible agency official approves the result, the contracting officer shall award a contract in accordance with agency procedures. Concurrently with the award, the contracting officer shall publicly—

(i) Notify interested parties of the result of the cost comparison;

(ii) Inform interested parties that the completed cost-comparison form and detailed supporting data are available for review;

(iii) Announce the contractor's name; and

(iv) Advise interested parties that contractor preparations for performance are conditioned upon completion of the public review period specified in the solicitation plus any additional period required by the appeals procedure.

(2) If the result of the cost comparison favors Government performance, the contracting officer shall—

(i) Notify interested parties of the result of the cost comparison;

(ii) Inform interested parties that the completed cost-comparison form and detailed supporting data relative to the Government cost estimate are available for public review (see subparagraph (3) below); and

(iii) Announce the price of the offer most advantageous to the Government.

(3) The public review period shall begin with the contracting officer's announcement of the cost-comparison result and availability of the cost comparison forms and detailed supporting data to interested parties. The review period shall last for the period specified in the solicitation (at least 5 working days, up to a maximum of 15 working days if the contracting officer considers the action to be complex). Upon completion of the public review period and resolution of any questions raised under 7.307 below, a decision summary form shall be completed by the preparer of the cost estimate for Government performance and approved under agency procedures. The contracting officer shall then, in the case of subparagraph (1) above, give the contractor notice to commence or cancel the contract as appropriate or, in the case of subparagraph (2) above, cancel the solicitation or award the contract, as appropriate.

7.307 Appeals.

(a) The Circular provides that each agency shall establish an appeals procedure for informal administrative review of the initial cost-comparison result. The appeals procedure shall provide for an independent, objective review of the initial result by an official at the same level as, or at a higher level than, the official who approved that result. This review must be completed within 30 days after the contracting officer receives a request under paragraph (b) below. The purpose is to protect the rights of affected parties and to ensure that final agency determinations are fair, equitable, and in accordance with established policy.

(b) The Circular provides that the appeals procedure shall be used only to resolve questions concerning the calculation of the cost comparison and shall not apply to questions concerning selection of one contractor in preference to another, which shall be treated as prescribed in 14.407-8, Protests against award. Directly affected parties may request review of any discrepancy in the cost comparison. Any such requests shall be made in writing to the contracting officer, who shall forward them in accordance with agency procedures. Such requests shall be considered only if based on specific objections and received within the public review period stated in the solicitation.

SUBPART 7.4—EQUIPMENT LEASE OR PURCHASE

7.400 Scope of subpart.

This subpart provides guidance pertaining to the decision to acquire equipment by lease or purchase. It applies to both the initial acquisition of equipment and the renewal or extension of existing equipment leases.

7.401 Acquisition considerations.

(a) Agencies should consider whether to lease or purchase equipment based on a case-by-case evaluation of comparative costs and other factors. The following factors are the minimum that should be considered:

(1) Estimated length of the period the equipment is to be used and the extent of use within that period.

(2) Financial and operating advantages of alternative types and makes of equipment.

(3) Cumulative rental payments for the estimated period of use.

(4) Net purchase price.

(5) Transportation and installation costs.

(6) Maintenance and other service costs.

(7) Potential obsolescence of the equipment because of imminent technological improvements.

(b) The following additional factors should be considered, as appropriate,

depending on the type, cost, complexity, and estimated period of use of the equipment:

(1) Availability of purchase options.

(2) Potential for use of the equipment by other agencies after its use by the acquiring agency is ended.

(3) Trade-in or salvage value.

(4) Imputed interest.

(5) Availability of a servicing capability, especially for highly complex equipment; e.g., can the equipment be serviced by the Government or other sources if it is purchased?

7.402 Acquisition methods.

(a) *Purchase method.* (1) Generally, the purchase method is appropriate if the equipment will be used beyond the point in time when cumulative leasing costs exceed the purchase costs.

(2) Agencies should not rule out the purchase method of equipment acquisition in favor of leasing merely because of the possibility that future technological advances might make the selected equipment less desirable.

(b) *Lease method.* (1) The lease method is appropriate if it is to the Government's advantage under the circumstances. The lease method may also serve as an interim measure when the circumstances—

(i) Require immediate use of equipment to meet program or system goals; but

(ii) Do not currently support acquisition by purchase.

(2) If a lease is justified, a lease with option to purchase is preferable.

(3) Generally, a long term lease should be avoided, but may be appropriate if an option to purchase or other favorable terms are included.

7.403 General Services Administration assistance.

(a) When requested by an agency, the General Services Administration (GSA) will assist in lease or purchase decisions by providing information such as—

(1) Pending price adjustments to Federal Supply Schedule contracts;

(2) Recent or imminent technological developments;

(3) New techniques; and

(4) Industry or market treads.

(b) Agencies may request information from the following GSA offices:

(1) Office of Information Resources Management Policy (KMA), Washington, DC 20405, for information on automatic data processing and telecommunications equipment acquisitions.

(2) Office of Procurement (FC), Washington, DC 20406, for information on other types of equipment.

PART 8—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

8.000 Scope of part.

This part deals with the acquisition of supplies and services from or through Government supply sources.

8.001 Priorities for use of Government supply sources.

(a) Except as required by 8.002, or as otherwise provided by law, agencies shall satisfy requirements for supplies and services from or through the sources and publications listed below in descending order of priority as prescribed in 41 CFR 101-26.107:

(1) *Supplies.*

(i) Agency inventories;

(ii) Excess from other agencies (see Subpart 8.1);

(iii) Federal Prison Industries, Inc. (see Subpart 8.6);

(iv) Procurement lists of products available from the Committee for Purchase from the Blind and Other Severely Handicapped (see Subpart 8.7);

(v) Wholesale supply sources, such as stock programs of the General Services Administration (GSA) (see 41 CFR 101-26.3), the Defense Logistics Agency (see 41 CFR 101-26.6), the Veterans Administration (see 41 CFR 101-26.704), and military inventory control points;

(vi) Mandatory Federal Supply Schedules (see Subpart 8.4);

(vii) Optional use Federal Supply Schedules (see Subpart 8.4); and

(viii) Commercial sources (including educational and nonprofit institutions).

(2) *Services.*

(i) Procurement lists of services available from the Committee for Purchase from the Blind and Other Severely Handicapped (see Subpart 8.7);

(ii) Mandatory Federal Supply Schedules (see Subpart 8.4) and mandatory GSA term contracts for personal property rehabilitation (see 41 CFR 101-42.1);

(iii) Optional use Federal Supply Schedules (see Subpart 8.4) and optional use GSA term contracts for personal property rehabilitation (see 41 CFR 101-42.1); and

(iv) Federal Prison Industries, Inc. (see Subpart 8.6), or other commercial sources (including educational and nonprofit institutions).

(b) Sources other than those listed in paragraph (a) may be used as prescribed in 41 CFR 101-26.301 and in a public exigency as prescribed in 15.202 and in 41 CFR 101-25.101-5.

8.002 Use of other Government supply sources.

Agencies shall satisfy requirements for the following supplies or services from or through specified sources, as applicable:

(a) Jewel bearings and related items (see Subpart 8.2);

(b) Public utility services (see Subpart 8.3);

(c) Printing and related supplies (see Subpart 8.8);

(d) Automatic data processing and telecommunications acquisitions (see Part 39);

(e) Leased motor vehicles (see Subpart 8.11);

(f) Strategic and critical materials from excess GSA inventories (See 41 CFR 101-14.2); and

(g) Helium (see 30 CFR Parts 601 and 602).

SUBPART 8.1—EXCESS PERSONAL PROPERTY

8.101 Definition.

"Excess personal property" means any personal property (see 45.601) under the control of a Federal agency that the agency head or a designee determines is not required for its needs and for the discharge of its responsibilities.

8.102 Policy.

When it is practicable to do so, agencies shall use excess personal property as the first source of supply in fulfilling their requirements and those of their cost-reimbursement contractors. Accordingly, agencies shall ensure that all personnel make positive efforts to satisfy agency requirements by obtaining and using excess personal property (including that suitable for adaptation or substitution) before initiating contracting action.

8.103 Information on available excess personal property.

Information regarding the availability of excess personal property can be obtained through—

(a) Review of excess personal property catalogs and bulletins issued by the General Services Administration (GSA);

(b) Personal contact with GSA or the activity holding the property;

(c) Submission of supply requirements to the regional offices of GSA (GSA Form 1539, Request for Excess Personal Property, is available for this purpose); and

(d) Examination and inspection of reports and samples of excess personal property in GSA regional offices.

8.104 Obtaining nonreportable property.

GSA will assist agencies in meeting their requirements for supplies of the types excepted from reporting as excess by the Federal Property Management Regulations (41 CFR 101-43.312). Federal agencies requiring such supplies should contact the appropriate GSA regional office.

SUBPART 8.2—JEWEL BEARINGS AND RELATED ITEMS

8.201 Definitions.

"Jewel bearing" means a piece of synthetic corundum (sapphire or ruby) of any shape, except a phonograph needle, that has one or more polished surfaces to provide supporting surfaces or low-friction contact areas for revolving, oscillating, or sliding parts in an instrument, mechanism, subassembly, or part. A jewel bearing may be unmounted or may be mounted into a ring or bushing. Examples are watch holes—olive, watch holes—straight, pallet stones, roller jewels (jewel pins), endstones (caps), vee (cone) jewels, instrument rings, cups, and double cups.

"Plant," as used in this subpart, means the Government-owned, contractor-operated William Langer Plant, Rolla, North Dakota.

"Related item," as used in this subpart, means a piece of synthetic corundum (sapphire or ruby), other than a jewel bearing, that (a) is made from material produced by the Verneuil flame fusion process, (b) has a geometric shape up to a maximum of 1 inch in any dimension, (c) requires extremely close tolerances and highly polished surfaces identical to those involved in manufacturing jewel bearings, and (d) is either mounted in a retaining or supporting structure or unmounted. Examples are window, nozzle, guide, knife edge, knife edge plate, insulator domed pin, slotted insulator, sphere, ring gauge, spacer, disc, valve seat, rod, vee groove, D-shaped insulator, and notched plate.

8.202 Policy.

Except as otherwise provided in this subpart, (a) jewel bearings shall be acquired from the Plant and (b) related items shall be acquired either from domestic manufacturers or from the Plant.

8.203 Procedures.

8.203-1 Contract clause and solicitation provision.

(a) The contracting officer shall insert the clause at 52.208-1, Required Sources for Jewel Bearings and Related Items, in solicitations and contracts that may involve items (or any subassembly, component, or part of such items) in the Federal supply classes and groups listed in paragraph (b) below, except for—

(1) Small purchases under Part 13;

(2) Items purchased and used outside the United States, its possessions, and Puerto Rico; or

(3) Items that the contracting officer knows do not contain jewel bearings or related items (the contractor's certification required by 8.203-2 does not in itself satisfy this requirement).

(b) Federal supply classes and groups:

(1)	Federal Supply Classes
6605	Navigational Instruments
6610	Flight Instruments
6615	Autopilot Mechanisms and Airborne Gyro Components
6620	Engine Instruments

(1)	Federal Supply Classes
6625	Electrical- and Electronic-Properties Measuring and Testing Instruments
6630	Chemical-Analysis Instruments
6635	Physical-Properties Testing Equipment
6636	Environmental Chambers and Related Equipment
6640	Laboratory Equipment and Supplies
6645	Time-Measuring Instruments
6650	Optical Instruments
6655	Geophysical and Astronomical Instruments
6660	Meteorological Instruments and Apparatus
6665	Hazard-Detecting Instruments and Apparatus
6670	Scales and Balances
6675	Drafting, Surveying, and Mapping Instruments
6680	Liquid- and Gas-Flow, Liquid-Level, and Mechanical-Motion Measuring Instruments
6685	Pressure-, Temperature-, and Humidity-Measuring and Controlling Instruments
6695	Combination and Miscellaneous Instruments

(2)	Federal Supply Groups
12	Fire-Control Equipment
14	Guided Missiles
15	Aircraft, Airframe Structural Components
16	Aircraft Components and Accessories
18	Space Vehicles
23	Motor Vehicles and Motorcycles
25	Vehicular Equipment Components
42	Firefighting, Rescue, and Safety Equipment
52	Measuring Tools
58	Communications Equipment
59	Electrical and Electronic Equipment Components
63	Alarm and Signal Systems
65	Medical, Dental, and Veterinary Equipment and Supplies
67	Photographic Equipment
69	Training Aids and Devices

(c) The contracting officer shall insert the solicitation provision at 52.208-2, Jewel Bearings and Related Items Certificate (see 8.203-2 following), in solicitations that contain the clause at 52.208-1, Required Sources for Jewel Bearings and Related Items, except those for research and development.

8.203-2 Offeror's certification.

(a) The provision at 52.208-2 requires the offeror to (1) certify as to whether or not jewel bearings and/or related items will be incorporated into contract end items, (2) accept certain purchase requirements, and (3) attach an estimate of the jewel bearings and related items required. While failure to submit the certificate set forth in the provision with the offer does not make the offer nonresponsive, the contracting officer must obtain the certificate before award.

(b) The contracting officer shall annotate any affirmative certificate from a successful offeror with (1) the number of the contract awarded that offeror, (2) identification of the contract administration office cognizant of that contract, and (3) the date of award. The contracting officer shall forward one copy of the certificate and the attachment it calls for to the Plant and one copy of the certificate and attachment to the cognizant contract administration office. The Plant will compare the attachment with actual orders and notify the contract administration office of any serious discrepancies.

(c) The contract administration office shall review contractor records and require corrective action, if necessary, if (1) the Plant informs it of serious discrepancies between certifications and orders or (2) the contract administration office believes that there is noncompliance with the clause at 52.208-1, Required Sources for Jewel Bearings and Related Items.

8.203-3 Declination or rejection of orders.

(a) The Plant may initially decline to accept a contractor's or subcontractor's order because of the customer's current excessive and overdue indebtedness to the Plant. The Plant's declination under these circumstances is not in itself justification for (1) a waiver of the requirement to purchase from the Plant and (2) adjustment in the contract price. If the contractor or subcontractor disagrees with the Plant as to this indebtedness, the contracting officer may require the Plant to accept the order and to make shipment on a cash-on-delivery (c.o.d.) basis.

(b) Rejection of orders by the Plant—or by any other domestic manufacturer—for reasons other than those in paragraph (a) above shall not provide relief from the requirement to purchase from the Plant or other domestic manufacturer, unless the contracting officer determines that such relief is in the Government's best interest. The contracting officer shall evaluate the impact of the rejection and make an equitable adjustment in the contract price, in the delivery schedule, or in both, if one is warranted.

SUBPART 8.3—ACQUISITION OF UTILITY SERVICES

8.300 Scope of subpart.

This subpart prescribes policies and procedures for the acquisition of utility services. Agency policies and procedures predating the effective date of the Federal Acquisition Regulation (FAR) may continue to be used for 2 years after that date. However, any new or changed policies or procedures, or any policies or procedures to be used following the 2-year period, must be approved in advance by the appropriate FAR council.

8.301 Definitions.

"Areawide contract," as used in this subpart, means a master contract entered into between the General Services Administration (GSA) and a utility service supplier to cover the utility service acquisitions of all Federal agencies from the particular utility service supplier for a period not to exceed 10 years. Federal agencies, including the Department of Defense (DOD), are covered when an authorization attached to the areawide contract is completed and accepted by the utility service supplier and executed by the agency and the utility service supplier.

"Authorization," as used in this subpart, means the ordering document under an areawide contract.

"Connection charge," as used in this subpart, means a payment by an agency for special or local facilities on either one or both sides of the delivery point that are required to make connections with the nearest point of supply and are usually installed, owned, and operated by a utility service supplier.

"Separate contract," as used in this subpart, means a utility services contract executed for a period not to exceed 10 years, to cover the utility services to a specific facility.

"Termination liability," as used in this subpart, means a contingent obligation to pay the unamortized portion of special or local connecting facilities, usually installed, owned, and operated by the utility service supplier, if an agency terminates the utility service contract before expiration of its term specified in the contract or tariff of the utility service supplier.

"Utility service," as used in this subpart, means a service such as the furnishing of electricity, gas, water, steam and sewerage that is available to the general public and performed by governmental entities or private companies. Utility services are ordinarily subject to governmental regulation. The term also includes services such as snow removal and removal or disposal of garbage, rubbish, and trash that are performed on a contractual basis, which may or may not be subject to government or public regulation. This term does not include telecommunications services (see Part 39).

8.302 Applicability.

(a) Except as provided in paragraph (b) below, this subpart applies to the acquisition of utility services or connection charges costing $10,000 or more, by agencies in the United States, its possessions, and the Commonwealth of Puerto Rico.

(b) This subpart does not apply to—

(1) Utility services produced, distributed, or sold by a Federal agency (other than consolidated purchase, joint use, or cross service); or

(2) Utility services (other than those required for administrative purposes) obtained by purchase, exchange, or otherwise by a Federal power or water marketing agency incident to that agency's marketing or distribution program.

(c) The Statement of Areas of Understanding between Department of Defense and General Services Administration (15 F.R. 8227, as amended at 22 F.R. 871) governs the acquisition of utility services by DOD. Therefore, DOD shall not be subject to this subpart as specifically indicated within this subpart.

8.303 General.

(a) Except as otherwise specified, agencies shall submit all information required by GSA under this subpart to General Services Administration, Public Buildings Service, Office of Public Utilities (PU), Washington, DC 20405.

(b) Agencies requiring technical or consulting assistance in the acquisition of utility services, including assistance in negotiating with a potential supplier (see 8.304-3), may contact GSA at the address given in paragraph (a) above.

(c) GSA will, upon request, furnish the services provided for in this subpart to any Federal agency, mixed ownership Government corporation, the District of Columbia, the Senate, the House of Representatives, or the Architect of the Capitol and any activity under its direction.

8.304 Acquiring utility services.

8.304-1 GSA long-term contracts.

(a) GSA has statutory authority to enter into long-term contracts for utility services for periods not to exceed a term of 10 years (40 U.S.C. 481). These contracts may be in the form of an areawide contract or a separate contract. GSA may delegate this authority to other agencies that have qualified staffs.

(b) A long-term contract may be justified and is usually required by any of the following circumstances:

(1) The Government will obtain lower rates, larger discounts, or more favorable conditions of service.

(2) A proposed connection charge, termination liability, or any other facilities charge to be paid by the Government will be reduced or eliminated.

(3) The utility service supplier refuses to render the desired service except under a long-term contract.

(c) Other conditions for acquisitions under long-term contracts shall be determined by the specific delegation of authority to the agency from GSA.

8.304-2 GSA areawide contracts.

(a) GSA enters into areawide contracts with suppliers for the furnishing of utility services to Federal agencies located within the service areas of those suppliers.

(b) An areawide contract requires the utility service supplier to furnish the needed services—

(1) Upon bilateral execution of the authorization under the contract;

(2) Without further negotiation;

(3) At the published or unpublished current rate schedules and tariffs applicable to the classes and characteristics of the services;

(4) Subject to all terms of the areawide contract; and

(5) To all Government-owned or Government-leased facilities as long as the agency pays the bills directly to the utility service supplier and not the leasor as part of its lease agreement.

(c) An agency in an area covered by an areawide contract shall acquire utility services under that contract unless the agency determines that (1) more advantageous competing services are available from another supplier without an effective areawide contract, or (2) it is in the Government's interest to negotiate special rates or special services under a separate contract which departs from the published or unpublished current rate schedules of the utility service supplier.

(d) Upon request, GSA will furnish agencies a list of the current areawide contracts showing the kinds of utility services, the suppliers, and the areas served. GSA will also provide a copy of any areawide contract upon request. Each contract includes an authorization form for requesting service, service connection, disconnection, or change.

(e) When utility services are acquired under an areawide contract, the agency shall use the authorization attached to the appropriate GSA areawide contract. The form prescribed for ordering may be modified to satisfy the fiscal and administrative requirements of the agency and to contain any necessary additional contract terms. The authorization shall not be modified, however, to be used as a public voucher in lieu of Standard Form 1034, Public Voucher for Purchases and Services Other than Personal.

(f) All agencies acquiring utility services under an areawide contract shall furnish to GSA an executed copy of the authorization requesting service, service connection, disconnection, or change within 30 days after execution by the agency.

(g) When, pursuant to paragraph (c) above, an agency determines it appropriate to acquire utility services under a separate contract, 8.304-3 shall apply to the acquisition, except that DOD may acquire the services under its own regulations implementing the Statement of Areas of Understanding (see 8.302(c)).

8.304-3 Separate contracts.

(a) When GSA initiates or is requested to negotiate a separate contract, the acquiring agency shall furnish the following information to GSA:

(1) The technical and acquisition data required in 8.307-1(a) and 8.307-4; and

(2) Such other technical data as GSA may request to complete the contract.

(b) Other conditions for acquisition of utility services under separate contracts shall be determined by the specific delegation of authority to the agency from GSA in accordance with 8.307-3.

(c) In determining whether to negotiate special rates or special services in an area not covered by an areawide contract, consideration should be given to the following:

(1) The public utility supplier's tariff and rate schedules in light of the magnitude of the services required.

(2) Any unusual characteristics of services required which are not provided for under the supplier's tariffs and current rate schedules.

(3) Any special equipment or facility requirements which are not provided for under the supplier's tariffs and current rate schedules.

(4) Any special technical contract terms required by the agency which are not provided for under the supplier's tariff and current rate schedule.

8.304-4 Consolidated purchase, joint use, or cross-service.

(a) Agencies shall use consolidated purchase, joint use, or cross-service to acquire utility services or facilities when advantageous to the Government and in accordance with the policies and procedures at Subpart 17.5, Interagency Acquistions under the Economy Act. This requirement is not applicable if utility services are furnished without charge by another Government agency as part of space acquisition.

(b) The agencies involved under paragraph (a) above shall use a memorandum of understanding or other appropriate document to specify the services or facilities to be supplied, the estimated costs, and other conditions under which they will be acquired.

(c) These memorandums shall be subject to on-site post reviews or periodic reporting as may be required by GSA. (see 8.306). This paragraph (c) does not apply to DOD.

8.304-5 Agency acquisition.

(a) This subsection 8.304-5 does not apply to DOD.

(b) In the absence of areawide contracts for a particular location, GSA separate contracts, consolidated purchases, joint use, or cross-service arrangements, or as otherwise authorized in this section 8.304, agencies may acquire utility services and facilities and pay related connection charges within the scope of their authority, subject to the policy and procedures of this subpart.

(c) The contracting officer shall determine the appropriate contracting method in accordance with the instructions of Parts 13 through 15 of this regulation. If formal advertising is not feasible, negotiation may be used under 15.210. Except as authorized by 8.304-5(h), agencies shall use a utility service contract instead of standard utility services supplier application forms or similar documents (also see 8.304-5(g)).

(d) The contracting officer shall determine if more than one supplier can furnish the needed utility services. Although unusual, when such competition exists, the contracting officer shall solicit competitive bids or proposals for the services.

(e) The contracting officer shall acquire utility services by bilateral written contract, whether or not rates or conditions of service are fixed or adjusted by a Federal, State, or other public regulatory body, if—

(1) The supplier requires the execution of a contract;

(2) The utility service is available from more than one source (see paragraph (d) above);

(3) The annual cost of the service at the time of initiation or annual review is estimated to exceed the appropriate small purchase limitation in Part 13;

(4) A proposed connection charge, termination liability, purchase cost, cumulative leasing cost, or any other facilities charge (whether or not refundable) to be paid by the agency is estimated to exceed the appropriate small purchase limitation in Part 13; or

(5) The contracting officer determines that a bilateral written contract would be in the Government's interest.

(f) The contracting officer may acquire utility services by purchase order except when a bilateral written contract is required under paragraph (e) above.

(g) If a utility service supplier refuses to execute a contract, the agency shall notify GSA of the supplier's refusal to execute a contract, and forward full documentation including a copy of the record of negotiations. The agency may then acquire services by use of a Government purchase order or other written request for service, after a written definite and final refusal is received from a corporate officer of the supplier.

(h) When the utility supplier refuses to execute a contract (see 8.304-5(g)), the contracting officer may use the commercial forms and clauses of the utility companies in acquiring utility services by bilateral contract (except see paragraph (c) above). The contracting officer must take precautions to delete from such forms any language that may be contrary to Federal law and regulations. The contracting officer shall also comply with the requirements of 8.309 concerning the insertion of mandatory clauses in the contract.

(i) Each agency shall provide GSA (upon GSA's request) with duplicate copies of the agency's utility bills.

8.305 Rate increases.

(a) This section 8.305 does not apply to DOD.

(b) When a supplier proposes increases in rates by filing for approval with the regulatory body controlling the supplier's rates, the agency should forward the matter, including percentage of increase and amount of increase, to GSA for appropriate action.

(c) When the regulatory body approves the utility supplier's rate increase, further modification of any utility contract is not necessary, since copies of the utility supplier's new rate schedules as approved by the regulatory body will serve as the authority to pay the increased or decreased rates.

8.306 Post contract review or periodic reporting.

All acquisition documents and supporting records retained in accordance with 4.805 shall be subject to any on-site postreview or periodic reporting that may be required by GSA. See 8.307 concerning prior review of certain acquisitions. This section 8.306 does not apply to DOD.

8.307 Precontract acquisition reviews.

This section 8.307 does not apply to DOD.

8.307-1 General.

(a) Either GSA or the acquiring agency, if authorized under this section 8.307, shall review certain proposed utility services acquisitions before the contracting officer executes a binding contract. The review shall apply to—

(1) Proposed authorizations under GSA areawide contracts;

(2) Proposed memorandums of understanding or interagency agreements for consolidated purchase, joint use, or cross-service by one agency for another; and

(3) Proposed separate utility service contracts.

(b) The review is required when—

(1) The annual cost of the service to be acquired is estimated by the using agency, at the time of initiation of the service or annual review, to exceed $150,000 for separate contracts or $250,000 for authorizations under effective areawide contracts; or

(2) A proposed connection charge, termination liability, or other facilities charge to be paid by the agency (whether or not refundable) is estimated to exceed $75,000 for separate contracts or $125,000 for authorizations under effective areawide contracts.

(c) Approval of a proposed acquisition after review shall be based on written determinations and findings from the acquiring agency that all of the following criteria, as a minimum, are met:

(1) The proposed supplier is either the sole source of the required service or has been selected after consideration of more than one source of supply.

(2) The service to be provided is adequate in terms of quantity, quality, and delivery schedule to meet the acquiring agency's needs.

(3) The selected rate schedule is the most advantageous of the rate schedules available to the agency in terms of economy, efficiency, or service and is based upon the class, conditions, and characteristics of services being rendered to the agency.

(4) The proposed facilities charge, if any, is (i) necessary to secure the required service, (ii) based on current cost or pricing data, and (iii) reasonable in total amount, and may be certified for payment by the agency.

(5) The proposed acquisition meets the requirements of this subpart.

8.307-2 Precontract review by GSA.

(a) Each agency shall refer applicable proposed acquisitions of utility services to GSA for review unless an agency has its own program of prior review under 8.307-3.

(b) GSA shall acknowledge the date of receipt of the referral from the agency.

(c) If GSA does not provide comments to the referring agency within 20 workdays after a proposed utility services acquisition is received for review (or within a lesser period if agreed upon), the referring agency may complete negotiations and execute the contract.

(d) Proposed acquisitions forwarded for GSA prior review shall contain the

technical and acquisition data required by 8.307-1(c) and 8.307-4.

8.307-3 Precontract review by acquiring agency.

(a) Agencies having authorization from GSA by direct delegation of authority may conduct their own programs of utility acquisition reviews in accordance with this subpart.

(b) Agencies that do not have the authorization indicated in paragraph (a) above, but that have the qualified technical personnel to conduct an agency review program, may seek a direct delegation of authority to conduct such a program from the Office of Public Utilities, at the address stated in 8.303(a).

(c) Agency authority to conduct prior reviews shall not preclude the referral of any specific case to GSA for assistance, if desired by the agency.

(d) Any agency having responsibility for review shall provide by agency procedure for uniform application of the guidelines in 8.307-4.

8.307-4 Guidelines and data for precontract review.

(a) The office proposing to acquire utility services shall assemble and furnish complete information relating to each proposed acquisition sufficiently in advance to permit a complete review by either GSA or the acquiring agency.

(b) The information furnished for review shall include—

(1) A technical description or specifications of the type, quantity, and quality of service required; and

(2) A copy of any service proposal or proposed contract.

(c) If not included in the foregoing, a copy of the following additional documents and data shall be furnished, if applicable:

(1) A complete copy or copies of the published or unpublished current rate schedules and tariffs of the utility supplier.

(2) The following data concerning quantity, quality, and delivery schedule of required services when new or initial services are to commence:

(i) The date initial service is required.

(ii) Data, for the first calendar year of full service, on estimated maximum demand, monthly consumption, and estimated annual cost of the service and connection charges to be paid by the agency.

(iii) Known or estimated time schedule for growth to ultimate requirements.

(iv) Estimated ultimate maximum demand and ultimate monthly consumption.

(v) A simple schematic diagram or line drawing showing the meter locations and the location of the new utility facilities to be constructed by the Government and the new connecting facilities to be constructed by the utility supplier to provide the new services.

(vi) Accounting and appropriation data to cover the required utility services and any connection charges required to be paid by the agency to receive such utility services.

(3) Identification of all available sources or methods of supply, the cost effectiveness of each, and a statement of the ability of each source to provide the required services, including the location and a description of each available supplier's facilities at the nearest point of service.

(4) Identification of any unusual factors affecting the acquisition.

(5) The following data concerning proposed facilities and related charges or costs:

(i) Proposed refundable or nonrefundable connection charge, termination liability, or other facilities charge to be paid by the Government, together with a description of the supplier's proposed facilities and estimated construction costs entering into the determination of the proposed connection charge, termination liability, or facilities charge.

(ii) The basis for the connection charge including the tariff provisions or written policy of the utility supplier.

(iii) A statement by the supplier that any proposed facilities charge is not in excess of the charge that other customers would be required to pay for like facilities under similar class and condition of service.

(iv) A copy of the acquiring agency's estimate to make its own connection to the supplier's facilities, in lieu of paying the connection charge proposed by the utility supplier. In the case of proposed water and sewage contracts, the acquiring agency shall provide its estimates to construct and operate its own utility facilities in lieu of participating in a cost-sharing construction program with the proposed utility supplier.

(d) For existing utility services, the agency shall furnish the data required above under 8.307-4(a), (b), (c)(1) and the following additional information:

(1) A copy of the monthly bills covering the most recent 12 months.

(2) A tabulation, by months, for the most recent 12 months, showing the utility demands, consumption and charges, fuel adjustment charges and the average monthly cost per unit of consumption.

(3) A tabulation by months, for the next 12 months showing the same data as requested in (2) above.

(4) Accounting and appropriation data to cover the costs for the continuation of utility services.

(5) A simple schematic diagram or line drawing suitable to be included in the utility services contract showing the meter locations.

(6) For electric service contracts, state if the transformer at the point of delivery is owned by the Government or the utility supplier and if the metering is made on the primary or secondary side of such transformer.

8.308 Capital credits.

Capital credits are a form of cash reimbursement or offset of billings by Reconstruction Electrification Administration-financed Cooperatives to their customers. See 41 CFR 101-33.3 for procedures on processing these capital credits.

8.309 Contract Clauses.

(a) The contracting officer shall insert the clause at 52.208-3, Conflicts, in solicitations and contracts for utility services.

(b) The contracting officer shall also insert in solicitations and contracts for utility services the provisions and clauses prescribed elsewhere in the FAR, as appropriate for each acquisition, depending on the conditions that are applicable.

SUBPART 8.4—ORDERING FROM FEDERAL SUPPLY SCHEDULES

8.401 General.

(a) The Federal Supply Schedule program, directed and managed by the General Services Administration (GSA), provides Federal agencies with a simplified process for obtaining commonly used supplies and services at prices associated with volume buying. Indefinite delivery contracts (primarily requirements contracts) are established with commercial firms to provide supplies and services at stated prices for given periods of time. The schedule contracting office issues publications, titled Federal Supply Schedules, containing the information necessary for placing delivery orders with the contractors. Ordering offices issue delivery orders directly to the schedule contractors for the required supplies or services. Similar systems of schedule-type contracting are used for automatic data processing equipment and services, for telecommunications equipment and services and for military items managed by the Department of Defense. These systems are not included in the Federal

Supply Schedule program covered by this subpart.

(b) Ordering offices may request copies of schedules by completing GSA Form 457, FSS Publications Mailing List Application, and mailing it to the GSA Centralized Mailing Lists Services, Building 41, Denver Federal Center, Denver, Colorado 80225. Copies of GSA Form 457 and the GSA publication titled "Federal Supply Schedule Program Guide" (which includes a listing of schedules and information on the use of schedules) may also be obtained from the above address.

8.402 Applicability.

(a) This subpart applies to—

(1) Federal agencies ordering supplies or services from Federal Supply Schedules on either a mandatory or optional (nonmandatory) basis (see 8.404);

(2) Civilian and military commissaries and nonappropriated fund activities authorized by a Federal agency to use Federal Supply Schedules for their own use, not for resale; and

(3) Contractors authorized under Part 51 to order from schedules.

(b) This subpart does not apply to agencies placing orders for automatic data processing and telecommunications items or services from schedules. See Part 39 for policies and procedures for placing orders for those items or services.

8.403 Types of Federal Supply Schedules.

8.403-1 Single-award schedules.

Single-award schedules cover contracts made with one supplier at a stated price for delivery to a geographic area as defined in the schedule. Most schedules contain all information necessary for placing orders. Some schedules specify that contractor catalogs must be used for additional ordering information to aid in the selection of fabrics, colors, and similar variables.

8.403-2 Multiple-award schedules.

Multiple-award schedules cover contracts made with more than one supplier for comparable supplies and services. Contracts are awarded to suppliers of the same generic types of items at varying prices for delivery within the same geographic area. Contractor catalogs and pricelists must be used with the schedules to prepare delivery orders. The catalogs and pricelists contain information such as item descriptions, prices and discounts, order limitations, and delivery.

8.403-3 New Item Introductory Schedule.

The New Item Introductory Schedule (NIIS) provides the means to introduce new or improved products into the Federal Supply System. The schedule lists brand names of products available from various suppliers. With the exception of GSA, the only mandatory user of this schedule, Federal agencies and agencies authorized by law or agreement may use the NIIS on an optional basis. Ordering offices must use contractor catalogs and pricelists with the schedule to prepare delivery orders.

8.404 Using schedules.

(a) Before soliciting commercial sources, executive agencies shall determine if the required supplies or services, or similar supplies or services fulfilling the same purpose, are available from schedules (see FPMR 101-26.4). If so, the ordering office shall proceed in accordance with the procedure of 8.404-1 or 8.404-2, as appropriate.

(b) In the case of mandatory schedules, ordering offices shall not (1) solicit bids, proposals, quotations, or otherwise test the market solely for the purpose of seeking alternative sources to Federal Supply Schedules; or (2) request formal or informal quotations from Federal Supply Schedule contractors for the purpose of price comparisons.

8.404-1 Mandatory use.

Schedules identify executive agencies required to use them as mandatory sources of supply. The single-award schedule shall be used as a primary source and the multiple-award schedule as a secondary source. The following are exceptions to the mandatory-use requirement:

(a) *Urgent requirements.* When an ordering office requires supplies or services with a shorter delivery time than specified in the schedules, and time permits, the ordering office shall request the contractor by letter, telegram, mailgram, or telephone conversation (confirmed in writing) to state the best delivery time that can be met under the circumstances and subject to all other terms and conditions of the schedule contract. The contractor shall be instructed to reply to the inquiry within not more than 3 workdays after receipt, by the same or a faster communications medium than the one by which the inquiry was received. If the contractor offers accelerated delivery acceptable to the ordering office, orders shall obligate the contractor to make the shorter delivery under all other terms and conditions of the contract. When the contractor fails to reply, or the best delivery time does not meet the ordering office's requirements, use of the schedule is not mandatory.

(b) *Small requirements.* Dollar or quantity minimums are established for most schedules, below which ordering offices are not obligated to order and contractors are not obligated to accept orders. Ordering offices may submit orders below established minimums, subject to the contractor's acceptance. Once an order is accepted, the contractor is obligated to perform according to all the terms and conditions of the contract. Some schedules require the contractor to accept orders below the dollar or quantity minimum, but authorize the contractor to include a service charge up to a certain dollar amount. In these cases, the schedule will contain specific obligations and entitlements.

(c) *Maximum order limitation.* (1) Most schedules stipulate a dollar amount or unit quantity above which agencies shall not submit orders and contractors shall not accept orders. There may be a maximum order limitation (MOL) for each item as well as for the total order. Ordering offices should not reduce or split their requirements simply to avoid an MOL. Rather, ordering offices should consolidate their requirements whenever possible to take advantage of lower prices normally obtainable through definite quantity contracts for quantities exceeding the MOL.

(2) Ordering offices shall submit requirements exceeding the MOL in FEDSTRIP/MILSTRIP format, as applicable, to the GSA support region in accordance with FPMR 101-26.401-4(c), unless specified otherwise in the schedule. Optional schedule users may use this procedure.

(d) *Geographic coverage.* Each schedule defines geographic areas of coverage on a national, zonal, regional, or other basis. Ordering offices shall place orders with contractors serving the geographic areas in which consignees are located. When a consignee is located outside the geographic area of coverage, mandatory use is not applicable.

(e) *Lower prices for identical items.* (1) When an ordering office finds that an identical product (make and model) included on a multiple-award schedule is available from another source at a price lower than the schedule price, the office may purchase the item subject to the requirements to obtain competition.

(2) All cost and related considerations for lower priced products shall be evaluated, including but not limited to comparisons of warranties,

transportation costs (origin and destinations), and delivery terms.

(3) When products are purchased from commercial sources on the open market (i.e., not under an existing government contract) at delivered prices that are lower than the prices provided by multiple-award schedule contracts, copies of the purchase orders shall be sent to the General Services Administration (FCC), Washington, DC 20406, at the time the orders are issued.

(f) *Absence of follow-on award.* Ordering offices, after any consultation required by the schedule, are not required to forego or postpone their legitimate needs pending the award or renewal of any schedule contract.

8.404-2 Optional use.

(a) The following optional users may order from schedules and contractors may accept their orders:

(1) All executive agencies not specified in the schedules as mandatory users.

(2) All other agencies and activities of the Government, including legislative and judicial agencies as provided by law or agreement, nonappropriated fund activities as prescribed in 41 CFR 101-26.000, and the Government of the District of Columbia.

(3) Government contractors authorized to order under Part 51.

(4) Mixed-ownership Government corporations as defined in the Government Corporation Control Act (31 U.S.C. 856).

(b) If a contractor accepts an order from an optional user under a schedule contract, all terms of the schedule contract apply to that order. Acceptance may be by written notice, delivery or performance, or failure to return the order within the time specified in the contract (usually 7 workdays).

8.404-3 Requests for waivers.

(a) When an ordering office that is a mandatory user under a schedule determines that items available from the schedule will not meet its specific needs, but similar items from another source will, it shall submit a request for waiver to the Assistant Administrator, Office of Federal Supply and Services (F), GSA, Washington, DC 20406, except as provided in (b) below. Requests shall contain the following information:

(1) A complete description of the required items, whenever possible; e.g., descriptive literature such as cuts, illustrations, drawings, and brochures that explain the characteristics and/or construction.

(2) A comparison of prices and the technical differences between the requested item and the schedule item, identifying as a minimum the—

(i) Inadequacies of the schedule item to perform required functions; and

(ii) Technical, economic, or other advantages of the item requested.

(3) Quantity required.

(4) Estimated annual usage or a statement that the requirement is nonrecurrent or unpredictable.

(b) Ordering offices shall not initiate action to acquire similar items from nonschedule sources until a request for waiver is approved, except as otherwise provided in interagency agreements.

8.405 Ordering office responsibilities.

Ordering offices shall place orders directly with contractors and shall perform contract administration on individual orders. Ordering offices should deal directly with contractors concerning contract performance (see 41 CFR 101-26.403-1).

8.405-1 Ordering from multiple-award schedules.

(a) Orders should be placed with the schedule contractor offering the lowest delivered price available. However, the ordering office shall fully justify in their contract file, any orders over $500 per line item placed at other than the lowest price. Justification for ordering a higher priced item may be based on such considerations as—

(1) Delivery time in terms of actual need that cannot be met by a contractor offering a lower price;

(2) Specific or unusual requirements such as differences in performance characteristics;

(3) Compatibility with existing equipment or systems;

(4) Trade-in considerations that favor a higher priced item and produce the lowest net cost; and

(5) Special features of one item not provided by comparable items that are required in effective program performance.

(b) When two or more items at the same delivered price will meet an ordering office's needs, the ordering office shall give preference to the items of small business and/or labor surplus area concerns by following the order of priority in 14.407-6 for equal low bids.

(c) When a schedule lists both foreign and domestic items that will meet the ordering office's needs, the ordering office shall apply the procedures of Part 25, Foreign Acquisition.

(d) If an item available from a multiple-award schedule is ordered from the schedule contractor at a price lower than the schedule price, the ordering office shall notify the schedule contracting office within 10 days.

8.405-2 Order placement.

Ordering offices may use Optional Form 347, or an agency-prescribed form, to order items from schedules and shall place orders directly with the contractor within the limitations specified in each schedule. Orders shall include, at a minimum, the following information in addition to any information required by the schedule:

(a) Complete shipping and billing addresses.

(b) Contract number and date.

(c) Agency order number.

(d) F.o.b. delivery point; i.e., origin or destination.

(e) Discount terms.

(f) Delivery time.

(g) Special item number or national stock number.

(h) Brief, complete description of each item (when ordering by model number, features and options such as color, finish, and electrical characteristics, if available, must be specified).

(i) Quantity and any variation in quantity.

(j) Number of units.

(k) Unit price.

(l) Total price of order.

(m) Points of inspection and acceptance.

(n) Other pertinent data; e.g., delivery instructions or receiving hours and size-of-truck limitation.

(o) Marking requirements.

(p) Level of preservation, packaging, and packing.

8.405-3 Inspection and acceptance.

(a) Consignees shall inspect supplies at destination except when—

(1) The schedule provides for the schedule contracting agency to perform source inspection (in this case, the schedule will indicate that mandatory source inspection is required); or

(2) A schedule item is covered by a product description, and the ordering office determines that the schedule contracting agency's inspection assistance is needed (inspection assistance may be based on the ordering volume, the complexity of items, or the past performance of the supplier).

(b) When the schedule contracting agency performs the inspection, as specified in the schedule, the ordering office will provide two copies of the order specifying source inspection to the schedule contracting agency. The schedule contracting agency will notify the ordering office of acceptance or rejection of the supplies.

(c) Material inspected at source by the schedule contracting agency, and determined to conform with the product description of the schedule, shall not be

reinspected for the same purpose. The consignee shall limit inspection to quantity and condition on receipt.

(d) Unless otherwise provided in the schedule, acceptance shall be conclusive except as regards latent defects, fraud, or such gross mistakes as amount to fraud.

8.405-4 Delinquent performance.

When the contractor fails to perform on the order, the ordering office may terminate the order for default or give the contractor further opportunity to perform by modifying the order to establish a new delivery date (obtaining consideration as necessary).

8.405-5 Termination for default.

(a) (1) An ordering office may terminate any one or more orders for default in accordance with Part 49, Termination of Contracts. The schedule contracting office shall be notified of all cases where an ordering office has declared a Federal Supply Schedule contractor in default or fraud is suspected.

(2) Should the contractor claim that the failure was excusable, the ordering office shall promptly refer the matter to the schedule contracting office. In the absence of a decision by the schedule contracting office (or by the head of the schedule contracting agency, on appeal) excusing the failure, the ordering office may charge the contractor with excess costs resulting from repurchase.

(3) Any repurchase shall be made at as reasonable a price as possible considering the quality required by the Government, delivery requirement, and administrative expenses. Copies of all repurchase orders, except the copy furnished to the contractor or any other commercial concern, shall include the notation "Repurchase against the account of ..... under Delivery Order ..... under Contract ....."

(4) When excess costs are anticipated, the ordering office may withhold funds due the contractor as offset security. Ordering offices shall minimize excess costs to be charged against the contractor and collect or setoff any excess costs owed.

(5) If an ordering office is unable to collect excess costs, it shall take the following actions:

(i) Notify the schedule contracting office within 60 days after final payment to the replacement contractor. The notice shall include the following information about the defaulted order:

(A) Name and address of the contractor.

(B) Schedule, contract, and order number.

(C) National stock or special item number(s), and a brief description of the item(s).

(D) Cost of schedule items involved.

(E) Excess costs to be collected.

(F) Other pertinent data.

(ii) In addition to the above, the notice shall include the following information about the replacement contract:

(A) Name and address of the contractor.

(B) Item repurchase cost.

(C) Repurchase order number and date of payment.

(D) Contract number, if any.

(E) Other pertinent data.

(b) Only the schedule contracting officer may terminate for default any or all items covered by the schedule contract. When notified of default action by the schedule contracting officer with respect to defaulted items, ordering offices shall—

(1) Refuse to accept further performance by the contractor;

(2) Not place further orders with the contractor;

(3) Repurchase against the contractor in default from sources designated by the schedule contracting officer; or

(4) Proceed as otherwise directed by the schedule contracting officer.

(c) All actions taken regarding terminations for default shall comply with the applicable requirements in Part 49.

8.405-6 Termination for convenience.

(a) Ordering offices may terminate individual orders for the convenience of the Government. Only the schedule contracting officer may terminate any or all items covered by the schedule contract for the convenience of the Government.

(b) Before terminating orders for convenience, the ordering office shall endeavor to enter into a "no cost" cancellation agreement with the contractor.

(c) All actions taken regarding terminations for convenience shall comply with the applicable requirements in Part 49.

8.405-7 Disputes.

The ordering office shall refer all unresolved disputes under orders to the schedule contracting office for action under the Disputes clause of the contract.

8.406 Blanket purchase agreements.

Ordering offices should consider using a Blanket Purchase Agreement (BPA) with schedule contractors to reduce the number of orders and billing and payment documents required for repetitive orders. When the schedule provides for quantity discounts, considerable savings may be effected by establishing a BPA for items for which there is a foreseeable demand. Ordering offices shall comply with Subpart 13.2 and the schedule when establishing a BPA.

8.407 Delivery.

(a) *Destination delivery.* Destination delivery (store-door) in a schedule means delivery to the door (unloading dock) of the location specified by the ordering office. This delivery is not subject to additional charges except when there is a specified charge for store-door delivery in the tariff of the delivering carrier. When destination delivery is subject to a charge, the contractor or carrier shall be instructed to annotate bills of lading or freight bills "Delivery service requested," and to show a separate item on the invoice for the charge. The ordering office may request delivery to a railroad siding at no additional cost. When destination delivery cannot be accomplished, delivery will be made to the freight station nearest the consignee at no additional cost.

(b) *Delivery within consignee's premises.* Delivery within consignee's premises is sometimes available at an additional cost. This service may be requested on an optional basis by ordering offices but contractors may refuse to provide it. Some schedules provide instructions for requesting the service, provide a means for determining the cost, and establish a time limit for the contractor to refuse. Under other schedules, when contractors refuse to deliver within the consignees' premises, ordering offices must make their own arrangements.

(c) *Shipping point/origin delivery.* Shipping point/origin delivery requires ordering offices to pay transportation costs unless delivery is requested within the commercial zone of the shipping point, as prescribed by the Interstate Commerce Commission in 49 CFR 1048. When the carrier accepts supplies from the contractor, title for the supplies passes to the ordering office. Payment should be made upon the contractor's submission of invoices and proof of shipment.

(d) *Special transportation.* Ordering offices may request premium methods of transportation on items delivered f.o.b. destination. When this is done, ordering offices must pay the difference between "freight" and the requested mode. Transportation details such as these are subject to agreement between ordering offices and the schedule contractors.

8.408 Deficiencies or discrepancies in shipments.

Ordering offices shall process deficiencies or discrepancies in shipments as follows:

(a) The ordering office and contractor shall resolve complaints concerning the quality of material inspected at destination. However, the ordering office should report significant instances of poor quality to the schedule contracting officer.

(b) When it is established that the contractor is at fault for nonconforming supplies or services, the following options are available to the ordering office:

(1) Require the nonconforming supplies or services to be corrected in place or removed for correction, by and at the expense of the contractor.

(2) Accept the supplies or services with an agreed reduction in price.

(3) Terminate the order for default.

(c) When items are covered by warranty, quality deficiencies shall be handled as provided in Subpart 46.6.

(d) Discrepancies concerning other than the quality of the material; e.g., overages, shortages, or damages, shall be—

(1) Processed as provided in 41 CFR 101-40.7 or as directed by the schedule contracting agency, when there are discrepancies in quantity or condition of material received from that shown on the covering bill of lading (transportation-type discrepancy); or

(2) Resolved between the ordering office and the contractor when there exists any discrepancy in quantity or condition of material received from that shown on the covering invoices or shipment packing list.

SUBPART 8.5—[RESERVED]

SUBPART 8.6—ACQUISITION FROM FEDERAL PRISON INDUSTRIES, INC.

8.601 General.

(a) Federal Prison Industries, Inc. (FPI), also referred to as UNICOR, is a self-supporting, wholly owned Government corporation of the District of Columbia.

(b) FPI provides training and employment for prisoners confined in Federal penal and correctional institutions through the sale of its products and services to Government agencies (18 U.S.C. 4121-4128).

(c) FPI diversifies its products and services to prevent private industry from experiencing unfair competition from prison workshops or activities.

8.602 Policy.

(a) Agencies shall purchase required supplies of the classes listed in the Schedule of Products made in Federal Penal and Correctional Institutions (referred to in this subpart as "the Schedule") at prices not to exceed current market prices, using the procedures in this subpart.

(b) Agencies are encouraged to use the facilities of FPI to the maximum extent practicable in purchasing (1) supplies that are not listed in the Schedule, but that are of a type manufactured in Federal penal and correctional institutions, and (2) services that are listed in the Schedule.

(c) Agencies should ask FPI whether unlisted products of the type normally produced by FPI can be added to the Schedule.

8.603 Purchase priorities.

(a) FPI and the Workshops for the Blind and Other Severely Handicapped may produce identical supplies or services. When this occurs, ordering offices shall purchase supplies and services in the following priorities:

(1) Supplies:

(i) Federal Prison Industries, Inc. (41 U.S.C. 48).

(ii) Workshops.

(iii) Commercial sources.

(2) Services:

(i) Workshops.

(ii) Federal Prison Industries, Inc.

(iii) Commercial sources.

(b) Supplies and services manufactured or performed by FPI are in strict conformity with Federal Specifications. These supplies and services are listed in the Schedule. Copies of the Schedule are available from Federal Prison Industries, Inc., Department of Justice, Washington, DC 20534.

8.604 Ordering procedures.

(a) Contracting officers shall order (1) less-than-carload lots of common-use items (Schedule A of the Schedule) from the regional warehouses of GSA, unless it is more practical and economical to purchase directly from FPI, and (2) carload lots of common-use items, and other items listed in the Schedule, from FPI.

(b) Contracting officers shall prepare orders to FPI using the procedures in the Schedule.

(c) When the contracting officer believes that the FPI price exceeds the market price, the matter may be referred to the cognizant product division identified in the Schedule or to the FPI Washington office for resolution.

8.605 Clearances.

(a) Clearance is required from FPI before products on the Schedule are acquired from other sources, except when the conditions in 8.606 apply. FPI clearances ordinarily are of the following types:

(1) General or blanket clearances issued when classes of articles or services are not available from FPI.

(2) Formal clearances issued in response to requests from offices desiring to acquire, from other sources, supplies listed in the Schedule and not covered by a general clearance. Requests should be addressed to Federal Prison Industries, Inc., Department of Justice, Washington, DC 20534.

(b) Purchases from other sources because of a lower price are not normally authorized, and clearances will not be issued on this basis except as a result of action taken to resolve questions of price under 8.604(c).

(c) Disputes regarding price, quality, character, or suitability of products produced by FPI are subject to arbitration as specified in 18 U.S.C. 4124. The statute provides that the arbitration shall be conducted by a board consisting of the Comptroller General of the United States, the Administrator of General Services, and the Director of the Office of Management and Budget, or their representatives. The decisions of the board are final and binding on all parties.

8.606 Exceptions.

FPI clearances are not required when—

(a) Public exigency requires immediate delivery or performance;

(b) Suitable used or excess supplies are available;

(c) Purchases are made from GSA of less-than-carload lots of common-use items stocked by GSA (see Schedule A of the Schedule);

(d) The products are acquired and used outside the United States; or

(e) Orders are for listed items totaling $25 or less that require delivery within 10 days.

SUBPART 8.7—ACQUISITION FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

8.700 Scope of subpart.

This subpart prescribes the policies and procedures for implementing the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c), referred to in this subpart as "the Act," and the rules of the Committee for Purchase from the Blind and Other Severely Handicapped (41 CFR Part 51).

8.701 Definitions.

"Allocation," as used in this subpart, means an action taken by a central nonprofit agency to designate the workshops that will produce definite quantities of supplies or perform specific services upon receipt of orders from ordering offices.

"Central nonprofit agency," as used in this subpart, means the National Industries for the Blind, which has been designated to represent workshops serving blind individuals; or the National Industries for the Severely Handicapped, which has been designated to represent workshops serving severely handicapped individuals other than blind.

"Committee," as used in this subpart, means the Committee for Purchase from the Blind and Other Severely Handicapped.

"Government" or "entity of the Government" means any entity of the legislative or judicial branch, any executive agency, military department, Government corporation, or independent establishment, the U.S. Postal Service, or any nonappropriated-fund instrumentality of the Armed Forces.

"Ordering office" means any activity in an entity of the Government that places orders for the purchase of supplies or services.

"Procurement List," as used in this subpart, means a list of supplies (including military resale commodities) and services that the Committee has determined are suitable for purchase by the Government under the Javits-Wagner-O'Day Act.

"Workshop for the blind" or "workshop for the other severely handicapped" (referred to jointly as workshops) means a qualified nonprofit agency for the blind or for the other severely handicapped approved by the Committee to produce a commodity for or provide a service to the Government under the Act.

8.702 General.

The Committee is an independent Government activity with members appointed by the President of the United States. It is responsible for—

(a) Determining those supplies and services to be purchased by all entities of the Government from workshops for the blind and other severely handicapped;

(b) Establishing prices for the supplies and services; and

(c) Establishing rules and regulations to implement the Act.

8.703 Procurement List.

(a) The Committee publishes a Procurement List of all the supplies and services required to be purchased from the workshops. Copies of the Procurement List may be obtained by submitting GSA Form 457 to the General Services Administration, Building 41, Denver Federal Center, Denver, CO 80225. Mailing code OOSC-0002 applies.

(b) The Procurement List identifies workshop supplies available from—

(1) General Services Administration (GSA) stocks at supply distribution facilities;

(2) The Defense Logistics Agency (DLA) system; and

(3) Federal Prison Industries, Inc.

8.704 Purchase priorities.

(a) The Act requires the Government to purchase supplies or services on the Procurement List, at prices established by the Committee, from a qualified workshop if they are available within the period required. When identical supplies or services are on the Procurement List and the Schedule of Products issued by Federal Prison Industries, Inc., ordering offices shall purchase supplies and services in the following priorities:

(1) Supplies:

(i) Federal Prison Industries, Inc. (41 U.S.C. 48).

(ii) Workshops.

(iii) Commercial sources.

(2) Services:

(i) Workshops.

(ii) Federal Prison Industries, Inc.

(iii) Commercial sources.

(b) No other provision of the FAR shall be construed as permitting an exception to the mandatory purchase of items on the Procurement List.

(c) The Procurement List identifies those supplies for which the ordering office must obtain a formal clearance (8.605) from Federal Prison Industries, Inc., before making any purchases from workshops.

8.705 Procedures.

8.705-1 General.

(a) Ordering offices shall obtain supplies and services on the Procurement List from the central nonprofit agency or its designated workshops, except that supplies identified on the Procurement List as available from DLA or GSA supply distribution facilities shall be obtained through DLA or GSA procedures. If a distribution facility cannot provide the supplies, it shall inform the ordering office, which shall then order from the workshop designated by the Committee.

(b) Supply distribution facilities in DLA and GSA shall obtain supplies on the Procurement List from the central nonprofit agency identified or its designated workshops.

8.705-2 Direct-order process.

Central nonprofit agencies may authorize ordering offices to transmit orders for specific supplies or services directly to a workshop. The written authorization remains valid until it is revoked by the central nonprofit agency or the Committee. The central nonprofit agency shall specify the normal delivery or performance leadtime required by the workshop. The ordering office shall reflect this leadtime in its orders.

8.705-3 Allocation process.

(a) When the direct order process has not been authorized, the ordering office shall submit a letter request for allocation (requesting the designation of the workshop to produce the supplies or perform the service) to the central nonprofit agency designated in the Procurement List. Ordering offices shall request allocations in sufficient time for a reply, for orders to be placed, and for the workshop to produce the supplies or provide the service within the required delivery or performance schedule.

(b) The ordering office's request to the central nonprofit agency for allocation shall include the following information:

(1) For supplies—Item name, stock number, latest specification, quantity, unit price, date delivery is required, and destination to which delivery is to be made.

(2) For services—Type and location of service required, latest specification, work to be performed, estimated volume, and required date or dates for completion.

(3) Other requirements; e.g., packing, marking, as necessary.

(c) When an allocation is received, the ordering office shall promptly issue an order to the specified workshop or to the central nonprofit agency, as instructed by the allocation. If the issuance of an order is to be delayed for more than 15 days beyond receipt of the allocation, or canceled, the ordering office shall advise the central nonprofit agency immediately.

(d) Ordering offices may issue orders without limitation as to dollar amount and shall record them upon issuance as obligations. Each order shall include, as a minimum, the information contained in the request for allocation. Ordering offices shall also include additional instructions necessary for performance under the order; e.g., on the handling of

Government-furnished property, reports required, and notification of shipment.

8.705-4 Compliance with orders.

(a) The central nonprofit agency shall inform the ordering office of changes in leadtime experienced by its workshops to minimize requests for extensions once the ordering office places an order.

(b) The ordering office shall grant a request by a central nonprofit agency or workshop for revision in the delivery or completion schedule, if feasible. If extension of the delivery or completion date is not feasible, the ordering office shall notify the appropriate central nonprofit agency and request that it reallocate the order, or grant a purchase exception authorizing acquisition from commercial sources.

(c) When a workshop fails to perform under the terms of an order, the ordering office shall make every effort to resolve the noncompliance with the workshop involved and to negotiate an adjustment before taking action to cancel the order. If the problem cannot be resolved with the workshop, the ordering office shall refer the matter for resolution first to the central nonprofit agency and then, if necessary, to the Committee.

(d) When, after complying with 8.705-4(c), the ordering office determines that it must cancel an order, it shall notify the central nonprofit agency and, if practical, request a reallocation of the order. When the central nonprofit agency cannot reallocate the order, it shall grant a purchase exception permitting use of commercial sources, subject to approval by the Committee when the value of the purchase exception is $2,500 or more.

8.706 Purchase exceptions.

(a) Ordering offices may acquire supplies or services listed on the Procurement List from commercial sources only if the acquisition is specifically authorized in a purchase exception granted by the designated central nonprofit agency.

(b) The central nonprofit agency shall promptly grant purchase exceptions when—

(1) The workshops cannot provide the supplies or services within the time required, and commercial sources can provide them earlier in the quantities required; or

(2) The quantity required cannot be produced or provided economically by the workshops.

(c) The central nonprofit agency granting the exception shall specify the quantity and delivery or performance period covered by the exception.

(d) When a purchase exception is granted, the contracting officer shall—

(1) Initiate purchase action within 15 days following the date of the exception or any extension granted by the central nonprofit agency; and

(2) Provide a copy of the solicitation to the central nonprofit agency when it is issued.

(e) The Committee may also grant a purchase exception, under any circumstances it considers appropriate.

8.707 Prices.

(a) The prices on the Procurement List are fair market prices established by the Committee. All prices for supplies ordered under this subpart are f.o.b. origin.

(b) Prices for supplies are normally adjusted semiannually. Prices for services are normally adjusted annually.

(c) The Committee may request the agency responsible for acquiring the supplies or service to assist it in establishing or revising the fair market price. The Committee has the authority to establish prices without prior coordination with the responsible contracting office.

(d) Price changes shall normally apply to all orders received by the workshop on or after the effective date of the change. In special cases, after considering the views of the ordering office, the Committee may make price changes applicable to orders received by the workshop prior to the effective date of the change.

(e) If an ordering office desires packing, packaging, or marking of supplies other than the standard pack as provided on the Procurement List, any difference in costs shall be included as a separate item on the workshop's invoice. The ordering office shall reimburse the workshop for these costs.

(f) Ordering offices may make recommendations to the Committee at any time for price revisions for supplies and services on the Procurement List.

8.708 Shipping.

(a) Delivery is accomplished when a shipment is placed aboard the vehicle of the initial carrier. The time of delivery is the date shipment is released to and accepted by the initial carrier.

(b) Shipment is normally under Government bills of lading. However, for small orders, ordering offices may specify other shipment methods.

(c) When shipments are under Government bills of lading, the bills of lading may accompany orders or be otherwise furnished promptly. Failure of an ordering office to furnish bills of lading or to designate a method of transportation may result in an excusable delay in delivery (see Subpart 49.4, Termination for Default).

(d) Workshops shall include transportation costs for small shipments paid by workshops as an item on the invoice. The ordering office shall reimburse the workshop for these costs.

8.709 Payments.

The ordering office shall normally make payments for supplies or services on the Procurement List within 20 days, but no later than 30 days after shipment or after receipt of a correct invoice or voucher.

8.710 Quality of merchandise.

Supplies and services provided by workshops shall comply with the applicable Government specifications and standards cited in the order. When no specifications or standards exist—

(a) Supplies shall be of the highest quality and equal to similar items available on the commercial market; and

(b) Services shall conform to good commercial practices.

8.711 Quality complaints.

(a) When the quality of supplies or services received is unsatisfactory, the using activity shall take the following actions:

(1) For supplies received from DLA supply centers or GSA supply distribution facilities, notify the supplying agency.

(2) For supplies or services received from workshops for the blind or other severely handicapped, address complaints to the workshop involved, with a copy to the appropriate central nonprofit agency.

(b) When quality problems cannot be resolved by the workshop and the ordering office, the ordering office shall first contact the central nonprofit agency and then, if necessary, the Committee for resolution.

8.712 Specification changes.

(a) The ordering office shall notify the workshop and appropriate central nonprofit agency of any change in specifications or standards. In the absence of such written notification, the workshop shall produce the supplies or provide the services under the specification or standard cited in the order.

(b) The contracting activity shall provide advance notification to the Committee and the central nonprofit agency on actions that affect supplies on the Procurement List and shall permit them to comment before action is taken, particularly when it involves—

(1) Changes that require new national stock numbers;

(2) Deleting items from the supply system;

(3) Standardization; or

(4) Developing new items to replace items on the Procurement List.

8.713 Optional acquisition of supplies and services.

(a) Ordering offices may acquire supplies and services not included on the Procurement List from a workshop that is the low responsive, responsible offeror under a solicitation issued by other authorized acquisition methods.

(b) Ordering offices should forward solicitations to workshops that may be qualified to provide the supplies or services required.

8.714 Communications with the central nonprofit agencies and the Committee.

(a) The addresses of the central nonprofit agencies are contained in the current issue of the Procurement List.

(b) Any matter requiring referral to the Committee shall be addressed to the Executive Director of the Committee at the address contained in the current issue of the Procurement List.

SUBPART 8.8—ACQUISITION OF PRINTING AND RELATED SUPPLIES

8.800 Scope of subpart.

This subpart provides policy limiting acquisition of Government printing and related supplies as required by 44 U.S.C. 501, 502, 504, and 1121; and the Government Printing and Binding Regulations, published by the Joint Committee on Printing (JCP), Congress of the United States.

8.801 Definitions.

"Government printing" means printing, binding, blank-book, and microform work (including any items requiring the processes of composition, platemaking, presswork, or binding) for the use of an executive department, independent agency, or establishment of the Government.

"Related supplies," as used in this subpart, means supplies that are used and equipment that is usable in printing and binding operations.

8.802 Policy.

(a) Generally, all Government printing authorized by law is done at the Government Printing Office (GPO) except when the JCP specifically approves otherwise. If the GPO is not equipped to do the work, the JCP may grant approval for the Public Printer (head of GPO) to (1) contract the work out or (2) authorize an agency to contract for its own work or establish an in-house capability.

(b) The JCP regulations require the head of each agency to designate a central printing authority to serve as the liaison with the JCP and the Public Printer on matters related to printing. Contracting officers shall obtain approval from their designated central printing authority before contracting in any manner, whether directly or through contracts for other supplies or services, for the items defined in 8.801. Examples of Government printing requiring this approval include composition, platemaking, presswork, binding, and micrographics (when used as a substitute for printing).

(c) Further, 44 U.S.C. 1121 provides that the Public Printer may acquire and furnish paper and envelopes (excluding envelopes printed in the course of manufacture) in common use by two or more Government departments, establishments, or services in the District of Columbia, and provides for reimbursement of the Public Printer from available appropriations or funds. Paper and envelopes that are furnished by the Public Printer may not be acquired in any other manner.

SUBPART 8.9—[RESERVED]

SUBPART 8.10—[RESERVED]

SUBPART 8.11—LEASING OF MOTOR VEHICLES

8.1100 Scope of subpart.

This subpart covers the procedures for the leasing, from commercial concerns, of motor vehicles that comply with Federal Motor Vehicle Safety Standards and applicable State motor vehicle safety regulations. It does not apply to motor vehicles leased outside the United States.

8.1101 Definitions.

"Leasing," as used in this subpart, means the acquisition of motor vehicles, other than by purchase from private or commercial sources, and includes the synonyms "hire" and "rent."

"Motor vehicle" means an item of equipment, mounted on wheels and designed for highway and/or land use, that (a) derives power from a self-contained power unit or (b) is designed to be towed by and used in conjunction with self-propelled equipment.

8.1102 Presolicitation requirements.

(a) Before preparing solicitations for leasing of motor vehicles, contracting officers shall obtain from the requiring activity a written certification that—

(1) The vehicles requested are of maximum fuel efficiency and minimum body size, engine size, and equipment (if any) necessary to fulfill operational needs, and meet prescribed fuel economy standards;

(2) The head of the requiring agency, or a designee, has certified that the requested passenger automobiles (sedans and station wagons) larger than Type IA, IB, or II (small, subcompact, or compact) are essential to the agency's mission;

(3) Internal approvals have been received; and

(4) The General Services Administration has advised that it cannot furnish the vehicles.

(b) Generally, solicitations shall not be limited to current-year production models. However, with the prior approval of the head of the contracting office, solicitations may be limited to current models on the basis of overall economy.

8.1103 Contract requirements.

Contracting officers shall include the following items in each contract for leasing motor vehicles:

(a) Scope of contract.

(b) Method of computing payments.

(c) A listing of the number and type of vehicles required, and the equipment and accessories to be provided with each vehicle.

(d) Responsibilities of the contractor or the Government for furnishing gasoline, motor oil, antifreeze, and similar items.

(e) Unless it is determined that it will be more economical for the Government to perform the work, a statement that the contractor shall perform all maintenance on the vehicles.

(f) A statement as to the applicability of pertinent State and local laws and regulations, and the responsibility of each party for compliance with them.

(g) Responsibilities of the contractor or the Government for emergency repairs and services.

8.1104 Contract clauses.

The contracting officer shall insert the following clauses in solicitations and contracts for leasing of motor vehicles, unless the motor vehicles are leased in foreign countries:

(a) The clause at 52.208-4, Vehicle Lease Payments.

(b) The clause at 52.208-5, Condition of Leased Vehicles.

(c) The clause at 52.208-6, Marking of Leased Vehicles.

(d) The provisions and clauses prescribed elsewhere in the FAR for solicitations and contracts for supplies when a fixed-price contract is contemplated, but excluding—

(1) The clause at 52.212-9, Variation in Quantity;

(2) The clause at 52.232-1, Payments;

(3) The clause at 52.222-20, Walsh-Healey Public Contracts Act; and

(4) The clause at 52.246-16, Responsibility for Supplies.

PART 9—CONTRACTOR QUALIFICATIONS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

9.000 Scope of part.

This part prescribes policies, standards, and procedures pertaining to prospective contractors' responsibility; debarment, suspension, and ineligibility; qualified products; first article testing and approval; contractor team arrangements; defense production pools and research and development pools; and organizational conflicts of interest.

SUBPART 9.1—RESPONSIBLE PROSPECTIVE CONTRACTORS

9.100 Scope of subpart.

This subpart prescribes policies, standards, and procedures for determining whether prospective contractors and subcontractors are responsible.

9.101 Definitions.

"Preaward survey" means an evaluation by a surveying activity of a prospective contractor's capability to perform a proposed contract.

"Responsible prospective contractor" means a contractor that meets the standards in 9.104.

"Surveying activity" means the cognizant contract administration office or, if there is no such office, another organization designated by the agency to conduct preaward surveys.

9.102 Applicability.

(a) This subpart applies to all proposed contracts with any prospective contractor that is located—

(1) In the United States, its possessions, or Puerto Rico; or

(2) Elsewhere, unless application of the subpart would be inconsistent with the laws or customs where the contractor is located.

(b) This subpart does not apply to proposed contracts with (1) foreign, State, or local governments; (2) other U.S. Government agencies or their instrumentalities; or (3) agencies for the blind or other severely handicapped (see Subpart 8.7).

9.103 Policy.

(a) Purchases shall be made from, and contracts shall be awarded to, responsible prospective contractors only.

(b) No purchase or award shall be made unless the contracting officer makes an affirmative determination of responsibility. In the absence of information clearly indicating that the prospective contractor is responsible, the contracting officer shall make a determination of nonresponsibility. If the prospective contractor is a small business concern, the contracting officer shall comply with Subpart 19.6, Certificates of Competency and Determinations of Eligibility. (If Section 8(a) of the Small Business Act (15 U.S.C. 637) applies, see Subpart 19.8.)

(c) The award of a contract to a supplier based on lowest evaluated price alone can be false economy if there is subsequent default, late deliveries, or other unsatisfactory performance resulting in additional contractual or administrative costs.

While it is important that Government purchases be made at the lowest price, this does not require an award to a supplier solely because that supplier submits the lowest offer. A prospective contractor must affirmatively demonstrate its responsibility, including, when necessary, the responsibility of its proposed subcontractors.

9.104 Standards.

9.104-1 General standards.

To be determined responsible, a prospective contractor must—

(a) Have adequate financial resources to perform the contract, or the ability to obtain them (see 9.104-3(b));

(b) Be able to comply with the required or proposed delivery or performance schedule, taking into consideration all existing commercial and governmental business commitments;

(c) Have a satisfactory performance record (see 9.104-3(c));

(d) Have a satisfactory record of integrity and business ethics;

(e) Have the necessary organization, experience, accounting and operational controls, and technical skills, or the ability to obtain them (including, as appropriate, such elements as production control procedures, property control systems, and quality assurance measures applicable to materials to be produced or services to be performed by the prospective contractor and subcontractors) (see 9.104-3(b));

(f) Have the necessary production, construction, and technical equipment and facilities, or the ability to obtain them (see 9.104-3(b)); and

(g) Be otherwise qualified and eligible to receive an award under applicable laws and regulations. For standards pertaining specifically to construction contracts, see Subparts 36.2, 36.3, and 36.4.

9.104-2 Special standards.

(a) When it is necessary for a particular acquisition or class of acquisitions, the contracting officer shall develop, with the assistance of appropriate specialists, special standards of responsibility. Special standards may be particularly desirable when experience has demonstrated that unusual expertise or specialized facilities are needed for adequate contract performance. The special standards shall be set forth in the solicitation (and so identified) and shall apply to all offerors.

(b) Contracting officers shall award contracts for subsistence only to those prospective contractors that meet the general standards in 9.104-1 and are approved in accordance with agency sanitation standards and procedures.

9.104-3 Application of standards.

(a) *Manufacturer or regular dealer.* As prescribed in 22.608, the contracting officer shall investigate and determine Walsh-Healey Act eligibility and not rely on the prospective contractor's representation, if—

(1) A protest as to eligibility has been lodged (see 22.608-3); or

(2) The contracting officer has knowledge that casts doubt on the validity of the representation.

(b) *Ability to obtain resources.* Except to the extent that a prospective contractor has sufficient resources or proposes to perform the contract by subcontracting, the contracting officer shall require acceptable evidence of the prospective contractor's ability to obtain required resources (see 9.104-1(a), (e), and (f)). Acceptable evidence normally consists of a commitment or explicit arrangement, that will be in existence at the time of contract award, to rent, purchase, or otherwise acquire the needed facilities, equipment, other resources, or personnel.

(c) *Satisfactory performance record.* A prospective contractor that is or recently has been seriously deficient in contract performance shall be presumed to be nonresponsible, unless the contracting officer determines that the circumstances were properly beyond the contractor's control or that the contractor has taken appropriate corrective action. Past failure to apply sufficient tenacity and perseverance to perform acceptably is strong evidence of nonresponsibility. The contracting officer shall consider the number of contracts involved and extent of deficiency of each in making this evaluation.

(d) *Affiliated concerns.* Affiliated concerns (see "Affiliates" and "Concerns" in 19.101) are normally considered separate entities in determining whether the concern that is to perform the contract meets the applicable standards for responsibility. However, the contracting officer shall consider the affiliate's past performance and integrity when they may adversely affect the prospective contractor's responsibility.

(e) *Small business concerns.* If a small business concern's offer that would otherwise be accepted is to be rejected because of a determination of nonresponsibility, the contracting officer shall refer the matter to the Small Business Administration, which will decide whether or not to issue a Certificate of Competency (see Subpart 19.6).

9.104-4 Subcontractor responsibility.

(a) Generally, prospective prime contractors are responsible for determining the responsibility of their prospective subcontractors (but see 9.405 and 9.405-2 regarding debarred, ineligible, or suspended firms). Determinations of prospective subcontractor responsibility may affect the Government's determination of the prospective prime contractor's responsibility. A prospective contractor may be required to provide written evidence of a proposed subcontractor's responsibility.

(b) When it is in the Government's interest to do so, the contracting officer may directly determine a prospective subcontractor's responsibility (e.g., when the prospective contract involves medical supplies, urgent requirements, or substantial subcontracting). In this case, the same standards used to determine a prime contractor's responsibility shall be used by the Government to determine subcontractor responsibility.

9.105 Procedures.

9.105-1 Obtaining information.

(a) Before making a determination of responsibility, the contracting officer shall possess or obtain information sufficient to be satisfied that a prospective contractor currently meets the applicable standards in 9.104.

(b) (1) Generally, the contracting officer shall obtain information regarding the responsibility of prospective contractors, including requesting preaward surveys when necessary (see 9.106), promptly after a bid opening or receipt of offers. However, in negotiated contracting, especially when research and development is involved, the contracting officer may obtain this information before issuing the request for proposals. Requests for information shall ordinarily be limited to information concerning (i) the low bidder or (ii) those offerors in range for award.

(2) Preaward surveys shall be managed and conducted by the surveying activity.

(i) If the surveying activity is a contract administration office—

(A) That office shall advise the contracting officer on prospective contractors' financial competence and credit needs; and

(B) The administrative contracting officer shall obtain from the auditor any information required concerning the adequacy of prospective contractors' accounting systems and these systems'

suitability for use in administering the proposed type of contract.

(ii) If the surveying activity is not a contract administration office, the contracting officer shall obtain from the auditor any information required concerning prospective contractors' financial competence and credit needs, the adequacy of their accounting systems, and these systems' suitability for use in administering the proposed type of contract.

(3) Information on financial resources and performance capability shall be obtained or updated on as current a basis as is feasible up to the date of award.

(c) The contracting officer should use the following sources of information to support determinations of responsibility or nonresponsibility:

(1) The Consolidated List of Debarred, Suspended, and Ineligible Contractors maintained in accordance with Subpart 9.4.

(2) Records and experience data, including verifiable knowledge of personnel within the contracting office, audit offices, contract administration offices, and other contracting offices.

(3) The prospective contractor—including bid or proposal information, questionnaire replies, financial data, information on production equipment, and personnel information.

(4) Preaward survey reports (see 9.106).

(5) Other sources such as publications; suppliers, subcontractors, and customers of the prospective contractor; financial institutions; Government agencies; and business and trade associations.

(d) Contracting offices and cognizant contract administration offices that become aware of circumstances casting doubt on a contractor's ability to perform contracts successfully shall promptly exchange relevant information.

9.105-2 Determinations and documentation.

(a) *Determinations.* (1) The contracting officer's signing of a contract constitutes a determination that the prospective contractor is responsible with respect to that contract. When an offer on which an award would otherwise be made is rejected because the prospective contractor is found to be nonresponsible, the contracting officer shall make, sign, and place in the contract file a determination of nonresponsibility, which shall state the basis for the determination.

(2) If the contracting officer determines and documents that a responsive small business lacks certain elements of responsibility, the contracting officer shall comply with the procedures in Subpart 19.6. When a certificate of competency is issued for a small business concern (see Subpart 19.6), the contracting officer may accept the factors covered by the certificate without further inquiry.

(b) *Support documentation.* Documents and reports supporting a determination of responsibility or nonresponsibility, including any preaward survey reports and any applicable Certificate of Competency, must be included in the contract file.

9.105-3 Disclosure of preaward information.

(a) Except as provided in Subpart 24.2, Freedom of Information Act, information (including the preaward survey report) accumulated for purposes of determining the responsibility of a prospective contractor shall not be released or disclosed outside the Government.

(b) The contracting officer may discuss preaward survey information with the prospective contractor before determining responsibility. After award, the contracting officer or, if it is appropriate, the head of the surveying activity or a designee may discuss the findings of the preaward survey with the company surveyed.

9.106 Preaward surveys.

9.106-1 Conditions for preaward surveys.

(a) A preaward survey is normally required when the information on hand or readily available to the contracting officer is not sufficient to make a determination regarding responsibility. However, if the contemplated contract (1) will be for $25,000 or less or (2) will have a fixed price of less than $100,000 and will involve commercial products (see 11.001) only, the contracting officer should *not* request a preaward survey unless circumstances justify its cost or the matter requires referral to the Small Business Administration (see Subpart 19.6, Certificates of Competency and Determinations of Eligibility).

(b) When a cognizant contract administration office becomes aware of a prospective award to a contractor about which unfavorable information exists and no preaward survey has been requested, it shall promptly obtain and transmit details to the contracting officer.

(c) Before beginning a preaward survey, the surveying activity shall ascertain whether the prospective contractor is debarred, suspended, or ineligible (see Subpart 9.4). If the prospective contractor is debarred, suspended, or ineligible, the surveying activity shall advise the contracting officer promptly and not proceed with the preaward survey unless specifically requested to do so by the contracting officer.

9.106-2 Requests for preaward surveys.

The contracting officer's request to the surveying activity (Preaward Survey of Prospective Contractor (General), SF 1403) shall—

(a) Identify additional factors about which information is needed;

(b) Include the complete solicitation package (unless it has previously been furnished), and any information indicating prior unsatisfactory performance by the prospective contractor;

(c) State whether the contracting office will participate in the survey;

(d) Specify the date by which the report is required. This date should be consistent with the scope of the survey requested and normally shall allow at least 7 working days to conduct the survey; and

(e) When appropriate, limit the scope of the survey.

9.106-3 Interagency preaward surveys.

When the contracting office and the surveying activity are in different agencies, the procedures of this section 9.106 and Subpart 42.1 shall be followed along with the requlations of the agency in which the surveying activity is located, except that reasonable special requests by the contracting office shall be accommodated.

9.106-4 Reports.

(a) The surveying activity shall complete the applicable parts of SF 1403, Preaward Survey of Prospective Contractor (General); SF 1404, Preaward Survey of Prospective Contractor—Technical; SF 1405, Preaward Survey of Prospective Contractor—Production; SF 1406, Preaward Survey of Prospective Contractor—Quality Assurance; SF 1407, Preaward Survey of Prospective Contractor—Financial Capability; and SF 1408, Preaward Survey of Prospective Contractor—Accounting System; and provide a narrative discussion sufficient to support both the evaluation ratings and the recommendations.

(b) When the contractor surveyed is a small business that has received preferential treatment on an ongoing contract under Section 8(a) of the Small Business Act (15 U.S.C. 637) or has received a Certificate of Competency during the last 12 months, the surveying activity shall consult the appropriate Small Business Administration field office before making an affirmative recommendation regarding the

contractor's responsibility or nonresponsibility.

(c) When a preaward survey discloses previous unsatisfactory performance, the surveying activity shall specify the extent to which the prospective contractor plans, or has taken, corrective action. Lack of evidence that past failure to meet contractual requirements was the prospective contractor's fault does not necessarily indicate satisfactory performance. The narrative shall report any persistent pattern of need for costly and burdensome Government assistance (e.g., engineering, inspection, or testing) provided in the Government's interest but not contractually required.

(d) When the surveying activity possesses information that supports a recommendation of complete award without an on-site survey and no special areas for investigation have been requested, the surveying activity may provide a short-form preaward survey report. The short-form report shall consist solely of the Preaward Survey of Prospective Contractor (General), SF 1403. Sections III and IV of this form shall be completed and block 21 shall be checked to show that the report is a short-form preaward report.

SUBPART 9.2—QUALIFIED PRODUCTS

9.200 Scope of subpart.

This subpart prescribes policies and procedures regarding the acquisition of qualified products.

9.201 Definitions.

"Qualified product" means an item that has been examined and tested for compliance with specification requirements and qualified for inclusion in a qualified products list.

"Qualified products list (QPL)" means a list that identifies the qualified item by specification, Government designation, part or model number or trade name, test or qualification reference, manufacturer's name and address, and place of manufacture.

"Specification preparing activity (SPA)" means the activity designated in a specification as responsible for development and maintenance of the specification, and any qualified products list associated with the specification.

9.202 General.

(a) Qualification is the process by which products are obtained from manufacturers or distributors, examined and tested for compliance with specification requirements, and then included in a list of qualified products. Generally, qualification is performed in advance and independently of any specific acquisition action. After qualification, the products are included in a Federal or Military QPL. Suppliers whose products are qualified and who furnish evidence of the qualification are eligible for award although not yet included in the QPL.

(b) Specifications requiring a qualified product are included in the following publications:

(1) Index of Federal Specifications and Standards, FPMR 101-29.1.

(2) Department of Defense Index of Specifications and Standards.

(c) Instructions concerning qualification procedures are included in the following publications:

(1) Federal Standardization Handbook, FPMR 101-29, Chapter IV.

(2) Defense Standardization Manual 4120.3-M, Chapter IV, as amended by Military Standards 961 and 962.

(d) The publications listed in paragraphs (b) and (c) above are sold to the public by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Civil agencies may obtain the publications from the General Services Administration, Specifications Section (WFSIS), Washington, DC 20407. Defense agencies may obtain the publications from the Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120.

9.203 Responsibilities of a specification preparing activity (SPA).

The responsibilities of a SPA include the following:

(a) Arranging publicity for the qualification requirements.

(b) Qualifying products that meet specification requirements.

(c) Listing manufacturers and suppliers whose products are qualified in the current QPL.

(d) Furnishing QPL's to prospective offerors and the public upon request.

(e) Clarifying, as necessary, qualification requirements.

(f) In appropriate cases, when requested by the contracting officer, providing and publicizing written waivers of qualification requirements.

(g) Withdrawing or omitting qualification of a listed product, as necessary.

(h) Advising persons furnished a QPL, and suppliers whose products are on a QPL, that—

(1) The QPL does not constitute endorsement of the product by the Government;

(2) The products listed have been qualified under the latest applicable specification;

(3) The QPL may be amended without notice;

(4) The listing of a product does not release the supplier from compliance with the specification; and

(5) Use of the QPL information for advertising or publicity is permitted. However, the supplier must not state or imply that the product is the only product of that type qualified, or that the Government in any way recommends or endorses the product.

(i) Reexamining a qualified product when—

(1) The manufacturer has modified the product, changed the material or the processing sufficiently so the validity of previous qualification is questionable;

(2) The requirements in the specification have been amended or revised sufficiently to affect the character of the product; and

(3) It is necessary to determine that the quality of the product is maintained in conformance with the specification.

9.204 Justification for including qualification requirements.

Subject to approval within the SPA's parent agency at a level above the head of the SPA, a qualification requirement may be included in a specification when any of the following conditions exist:

(a) The time required to conduct the examinations and tests to determine compliance with all the technical requirements of the specification will exceed 30 days (720 hours).

(b) The necessary examinations and tests for qualification would require special equipment not commonly available.

(c) The specification covers life survival or emergency lifesaving equipment.

9.205 Opportunity for qualification before solicitation.

(a) If the SPA determines that a product is to be qualified, the SPA shall urge manufacturers to submit their products for qualification and, when possible, give manufacturers sufficient time to arrange for qualification before issuing a solicitation. The SPA shall furnish notice of the qualification requirement to the U.S. Department of Commerce, Office of Field Operations, P.O. Box 5999, Chicago, Illinois 60680, for synopsis in the Commerce Business Daily. The notice shall include—

(1) Intent to establish a QPL for a product;

(2) The specification number and name of the product;

(3) The name and address of the SPA to which the request for qualification should be submitted;

(4) The cut-off date for submission of products for qualification testing;

(5) A precautionary notice that the product submitted for qualification testing will not be tested until the applicant has furnished the SPA with any specific information that may be requested of the manufacturer;

(6) Notification that upon the establishment of a QPL for the product, consideration in all future awards for the product will be given only to those products accepted for inclusion in the applicable QPL's; and

(7) The approximate time period following submission of a product for qualification testing within which the applicant will be notified by the SPA whether the product passed or failed the qualification testing.

(b) The SPA shall keep QPL's open for inclusion of products from additional suppliers, including eligible products from designated countries under the terms of the International Agreement on Government Procurement.

9.206 Acquiring qualified products.

9.206-1 General.

(a) If qualified products are being acquired, the contracting officer shall consider only those offers that offer products identified in the offer as qualified for inclusion in the QPL applicable at the time set for opening of bids or award of negotiated contracts.

(b) If a qualified product is to be acquired by the prime contractor as a component of an end item, the contracting officer shall require the prime contractor to furnish a component that is a qualified product before award of a subcontract for the component. Any delay resulting from the prime contractor's awaiting qualification approval of a component by the Government shall not constitute excusable delay if a previously qualified component could have been acquired by the prime contractor in time to meet the end item delivery schedule (see the clause at 52.209-2, Qualified Products—Components of End Items).

(c) In acquisitions involving qualified products, the contracting officer shall take the following steps:

(1) Use presolicitation notices in appropriate cases to advise potential suppliers before issuing solicitations involving qualified products. The notices shall identify the specification requiring qualification and specify an allowable time period, consistent with delivery requirements, for prospective offerors to qualify their products. The notice shall be synopsized in accordance with 5.204. If a presolicitation notice is not used, the general synopsizing requirements of Subpart 5.2 apply.

(2) Distribute solicitations to prospective contractors whether or not their products are qualified.

(3) In appropriate cases, request the SPA to waive qualification requirements and specify in solicitations when qualification requirements are waived.

(4) Forward requests from potential suppliers for information on qualification to the SPA.

(5) Allow the maximum time, consistent with delivery requirements, between issuing the solicitation and the opening of bids or the award of a negotiated contract. This period shall be not less than 30 calendar days, unless urgency justifies a shorter period and the contracting officer documents the file accordingly.

9.206-2 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 52.209-1, Qualified Products—End Items, in solicitations when acquiring qualified products as end items.

(b) The contracting officer shall insert the clause at 52.209-2, Qualified Products—Components of End Items, in solicitations and contracts, when acquiring qualified products as components of end items.

9.206-3 Competition.

(a) *Presolicitation.* If qualified products are to be acquired as an end item, the contracting officer shall review the applicable QPL before solicitation to ascertain whether the number of sources is adequate for competition. If the number of sources is inadequate, the contracting officer shall request the SPA to—

(1) Indicate the anticipated date on which any products presently undergoing tests will be qualified so that the solicitation could be rescheduled to include these additional products; or

(2) Indicate an alternate means of quality assurance other than qualification.

(b) *Postsolicitation.* The contracting officer shall submit to the SPA the names and addresses of concerns who request copies of the solicitation and are not included on the QPL. The SPA may then try to interest those concerns in qualifying their products.

9.207 Removal or omission from a qualified products list.

The contracting officer shall promptly report to the SPA conditions that may merit removal or omission of a product from a QPL. These conditions exist when—

(a) Products are submitted for inspection that do not meet the specification;

(b) Products were previously rejected and the defects were not corrected when resubmitted for inspection;

(c) The supplier fails to request reevaluation of a qualification following change of location or ownership of the plant where the qualified product was manufactured (see the provision at 52.209-1, Qualified Products—End Items, and the clause at 52.209-2, Qualified Products—Components of End Items);

(d) The manufacturer has discontinued manufacture of the product;

(e) The supplier requests removal of the item from the QPL;

(f) A condition of the qualification was violated; e.g., advertising or publicity contrary to 9.203(h)(5);

(g) Revised specifications require new testing and qualification;

(h) Manufacturing or design changes require new testing and qualification;

(i) The manufacturer is on the Consolidated List of Debarred, Suspended, and Ineligible Contractors (see Subpart 9.4) (the SPA may remove or omit a product from a QPL for this condition without advance notification but will subsequently notify the manufacturer of the action taken); or

(j) Performance of the contract, under which qualified products are furnished, is otherwise unsatisfactory.

SUBPART 9.3—FIRST ARTICLE TESTING AND APPROVAL

9.301 Definitions.

"Approval," as used in this subpart, means the contracting officer's written notification to the contractor accepting the test results of the first article.

"First article," as used in this subpart, means preproduction models, initial production samples, test samples, first lots, pilot lots, and pilot models.

"First article testing" means testing and evaluating the first article for conformance with specified contract requirements before or in the initial stage of production.

9.302 General.

First article testing and approval (hereafter referred to as testing and approval) ensures that the contractor can furnish a product that conforms to all contract requirements for acceptance. Before requiring testing and approval, the contracting officer shall consider the—

(a) Impact on cost or time of delivery;

(b) Risk to the Government of foregoing such test; and

(c) Availability of other, less costly, methods of ensuring the desired quality.

9.303 Use.

Testing and approval may be appropriate when—

(a) The contractor has not previously furnished the product to the Government;

(b) The contractor previously furnished the product to the Government, but—

(1) There have been subsequent changes in processes or specifications;

(2) Production has been discontinued for an extended period of time; or

(3) The product acquired under a previous contract developed a problem during its life.

(c) The product is described by a performance specification; or

(d) It is essential to have an approved first article to serve as a manufacturing standard.

9.304 Exceptions.

Normally, testing and approval is not required in contracts for—

(a) Research or development;

(b) Products requiring qualification before award (e.g., when an applicable qualified products list exists (see Subpart 9.2));

(c) Products normally sold in the commercial market; or

(d) Products covered by complete and detailed technical specifications, unless the requirements are so novel or exacting that it is questionable whether the products would meet the requirements without testing and approval.

9.305 Risk.

Before first article approval, the acquisition of materials or components, or commencement of production, is normally at the sole risk of the contractor. To minimize this risk, the contracting officer shall provide sufficient time in the delivery schedule for acquisition of materials and components, and for production after receipt of first article approval. When Government requirements preclude this action, the contracting officer may, before approval of the first article, authorize the contractor to acquire specific materials or components or commence production to the extent essential to meet the delivery schedule (see Alternate II of the clause at 52.209-3, First Article Approval—Contractor Testing, and Alternate II of the clause at 52.209-4, First Article Approval—Government Testing. Costs incurred based on this authorization are allocable to the contract for (1) progress payments and (2) termination settlements if the contract is terminated for the convenience of the Government.

9.306 Solicitation requirements.

Solicitations containing a testing and approval requirement shall—

(a) Provide, in the circumstance where the contractor is to be responsible for the first article approval testing—

(1) The performance or other characteristics that the first article must meet for approval;

(2) The detailed technical requirements for the tests that must be performed for approval; and

(3) The necessary data that must be submitted to the Government in the first article approval test report.

(b) Provide, in the circumstance where the Government is to be responsible for the first article approval testing—

(1) The performance or other characteristics that the first article must meet for approval; and

(2) The tests to which the first article will be subjected for approval.

(c) Inform offerors that the requirement may be waived when supplies identical or similar to those called for have previously been delivered by the offeror and accepted by the Government;

(d) Permit the submission of alternative offers, one including testing and approval and the other excluding testing and approval (if eligible under 9.306(c));

(e) State clearly the first article's relationship to the contract quantity (see paragraph (e) of the clause at 52.209-3, First Article Approval—Contractor Testing, or 52.209-4, First Article Approval—Government Testing);

(f) Contain a delivery schedule for the production quantity (see 12.104). The delivery schedule may—

(1) Be the same whether or not testing and approval is waived; or

(2) Provide for earlier delivery when testing and approval is waived and the Government desires earlier delivery. In the latter case, any resulting difference in delivery schedules shall not be a factor in evaluation for award. The clause at 52.209-4, First Article Approval—Government Testing, shall contain the delivery schedule for the first article;

(g) Provide for the submission of contract numbers, if any, to document the offeror's eligibility under 9.306(c);

(h) State whether the approved first article will serve as a manufacturing standard; and

(i) Include, when the Government is responsible for first article testing, the Government's estimated testing costs as a factor for use in evaluating offers (when appropriate).

9.307 Government administration procedures.

(a) Before the contractor ships the first article, or the first article test report, to the Government laboratory or other activity responsible for approval at the address specified in the contract, the contract administration office shall provide that activity with as much advance notification as is feasible of the forthcoming shipment, and—

(1) Advise that activity of the contractual requirements for testing and approval, or evaluation, as appropriate;

(2) Call attention to the notice requirement in paragraph (b) of the clause at 52.209-3, First Article Approval— Contractor Testing, or 52.209-4, First Article Approval—Government Testing; and

(3) Request that the activity inform the contract administration office of the date when testing or evaluation will be completed.

(b) The Government laboratory or other activity responsible for first article testing or evaluation shall inform the contracting office whether to approve, conditionally approve, or disapprove the first article. The contracting officer shall then notify the contractor of the action taken and furnish a copy of the notice to the contract administration office. The notice shall include the first article shipment number, when available, and the applicable contract line item number. Any changes in the drawings, designs, or specifications determined by the contracting officer to be necessary shall be made under the Changes clause, and not by the notice of approval, conditional approval, or disapproval furnished the contractor.

9.308 Contract clauses.

9.308-1 Testing performed by the contractor.

(a) (1) The contracting officer shall insert the clause at 52.209-3, First Article Approval—Contractor Testing, in solicitations and contracts when a fixed-price contract is contemplated and it is intended that the contract require (i) first article approval and (ii) that the contractor be required to conduct the first article testing.

(2) If it is intended that the contractor be required to produce the first article and the production quantity at the same facility, the contracting officer shall use the clause with its Alternate I.

(3) If it is necessary to authorize the contractor to purchase material or to commence production before first article approval, the contracting officer shall use the clause with its Alternate II.

(b) (1) The contracting officer shall insert a clause substantially the same as the clause at 52.209-3, First Article Approval—Contractor Testing, in solicitations and contracts when a cost-reimbursement contract is contemplated and it is intended that the contract require (i) first article approval and (ii) that the contractor be required to conduct the first article test.

(2) If it is intended that the contractor be required to produce the first article and the production quantity at the same facility, the contracting officer shall use a clause substantially the same as the clause at 52.209-3, First Article Approval—Contractor Testing, with its Alternate I.

(3) If it is necessary to authorize the contractor to purchase material or to commence production before first article approval, the contracting officer shall use a clause substantially the same as the clause at 52.209-3, First Article Approval—Contractor Testing, with its Alternate II.

9.308-2 Testing performed by the Government.

(a) (1) The contracting officer shall insert the clause at 52.209-4, First Article Approval—Government Testing, in solicitations and contracts when a fixed-price contract is contemplated and it is intended that the contract require first article approval and that the Government will be responsible for conducting the first article test.

(2) If it is intended that the contractor be required to produce the first article and the production quantity at the same facility, the contracting officer shall use the basic clause with its Alternate I.

(3) If it is necessary to authorize the contractor to purchase material or to commence production before first article approval, the contracting officer shall use the basic clause with its Alternate II.

(b) (1) The contracting officer shall insert a clause substantially the same as the clause at 52.209-4, First Article Approval—Government Testing, in solicitations and contracts when a cost-reimbursement contract is contemplated and it is intended that the contract require first article approval and that the Government be responsible for conducting the first article test.

(2) If it is intended that the contractor be required to produce the first article and the production quantity at the same facility, the contracting officer shall use a clause substantially the same as the clause at 52.209-4, First Article Approval—Government Testing, with its Alternate I.

(3) If it is necessary to authorize the contractor to purchase material or to commence production before first article approval, the contracting officer shall use a clause substantially the same as the clause at 52.209-4, First Article Approval—Government Testing, with its Alternate II.

SUBPART 9.4—DEBARMENT, SUSPENSION, AND INELIGIBILITY

9.400 Scope of subpart.

(a) This subpart—

(1) Prescribes policies and procedures governing the debarment and suspension of contractors by agencies for the causes given in 9.406-2 and 9.407-2;

(2) Provides for the listing of these debarred and suspended contractors, and of contractors declared ineligible (see the definition of "ineligible" in 9.403); and

(3) Sets forth the consequences of this listing.

(b) Although this subpart does cover the listing of ineligible contractors (9.404) and the effect of this listing (9.405(b)), it does not prescribe policies and procedures governing declarations of ineligibility.

9.401 Applicability.

This subpart does not apply to recipients of Federal assistance.

9.402 Policy.

(a) Agencies shall solicit offers from, award contracts to, and consent to subcontracts with responsible contractors only. Debarment and suspension are discretionary actions that, taken in accordance with this subpart, are appropriate means to effectuate this policy.

(b) The serious nature of debarment and suspension requires that these sanctions be imposed only in the public interest for the Government's protection and not for purposes of punishment. Agencies shall impose debarment or suspension to protect the Government's interest and only for the causes and in accordance with the procedures set forth in this subpart.

(c) Agencies shall establish appropriate procedures to implement the policies and procedures of this subpart.

9.403 Definitions.

"Adequate evidence" means information sufficient to support the reasonable belief that a particular act or omission has occurred.

"Affiliates." Business concerns or individuals are affiliates if, directly or indirectly, (a) either one controls or can control the other or (b) a third controls or can control both.

"Agency," as used in this subpart, means any executive department, military department or defense agency, or other agency or independent establishment of the executive branch.

"Consolidated List of Debarred, Suspended, and Ineligible Contractors" means a list compiled, maintained, and distributed by the General Services Administration, in accordance with 9.404, containing the names of contractors debarred or suspended by agencies under the procedures of this subpart, as well as contractors declared ineligible under other statutory or regulatory authority.

"Contractor," as used in this subpart, means any individual or other legal entity that (a) submits offers for or is awarded, or reasonably may be expected to submit offers for or be awarded, a Government contract or a subcontract under a Government contract or (b) conducts business with the Government as an agent or representative of another contractor.

"Conviction" means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or a plea, and includes a conviction entered upon a plea of nolo contendere.

"Debarment," as used in this subpart, means action taken by a debarring official under 9.406 to exclude a contractor from Government contracting and Government-approved subcontracting for a reasonable, specified period; a contractor so excluded is "debarred."

"Debarring official" means (a) an agency head or (b) a designee authorized by the agency head to impose debarment.

"Indictment" means indictment for a criminal offense. An information or other filing by competent authority charging a criminal offense shall be given the same effect as an indictment.

"Ineligible," as used in this subpart, means excluded from Government contracting (and subcontracting, if appropriate) pursuant to statutory, Executive order, or regulatory authority other than this regulation and its implementing and supplementing regulations; for example, pursuant to the Davis-Bacon Act and its related statutes and implementing regulations, the Service Contract Act, the Equal Employment Opportunity Acts and Executive orders, the Walsh-Healey Public Contracts Act, the Buy American Act, or the Environmental Protection Acts and Executive orders.

"Legal proceedings" means any civil judicial proceeding to which the Government is a party or any criminal proceeding. The term includes appeals from such proceedings.

"Preponderance of the evidence" means proof by information that, compared with that opposing it, leads to the conclusion that the fact at issue is more probably true than not.

"Suspending official" means (a) an agency head or (b) a designee authorized by the agency head to impose suspension.

"Suspension," as used in this subpart, means action taken by a suspending official under 9.407 to disqualify a contractor temporarily from Government contracting and Government-approved subcontracting; a contractor so disqualified is "suspended."

9.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.

(a) The General Services Administration (GSA) shall—

(1) Compile and maintain a current, consolidated list of all contractors debarred, suspended, or declared ineligible by agencies or by the General Accounting Office;

(2) Revise and distribute the list quarterly and issue monthly supplements to all agencies and the General Accounting Office; and

(3) Provide with the list the name and telephone number of the official responsible for its maintenance and distribution.

(b) The consolidated list shall indicate—

(1) The names and addresses of all debarred, suspended, or ineligible contractors, in alphabetical order, with cross-references when more than one name is involved in a single action;

(2) The name of the agency or other authority taking the action;

(3) The cause for the action (see 9.406-2 and 9.407-2 for causes authorized under this subpart) or other statutory or regulatory authority;

(4) The scope of the action;

(5) The termination date for each listing; and

(6) The name and telephone number of the point of contact for the action.

(c) Each agency shall—

(1) Notify GSA of the information required by paragraph (b) above within 5 working days after the action becomes effective;

(2) Notify GSA within 5 working days after modifying or rescinding an action;

(3) Notify GSA of the names and addresses of agency organizations that are to receive the consolidated list and the number of copies to be furnished to each;

(4) In accordance with internal retention procedures, maintain records relating to each suspension or debarment action taken by the agency;

(5) Establish procedures to provide for the effective use of the list, to ensure that the agency does not solicit offers from, award contracts to, or consent to subcontracts with listed contractors, except as otherwise provided in this subpart; and

(6) Direct inquiries concerning listed contractors to the agency or other authority that took the action.

9.405 Effect of listing.

(a) Debarred or suspended contractors are excluded from receiving contracts, and agencies shall not solicit offers from, award contracts to, or consent to subcontracts with these contractors, unless the acquiring agency's head or a designee determines that there is a compelling reason for such action (see 9.405-2, 9.406-1(c), and 9.407-1(d)).

(b) Contractors listed as having been declared ineligible on the basis of statutory or other regulatory procedures are excluded from receiving contracts and, if applicable, subcontracts, under the conditions and for the period set forth in the statute or regulation. Agencies shall not solicit offers from, award contracts to, or consent to subcontracts with these contractors under those conditions and for that period.

9.405-1 Continuation of current contracts.

(a) Notwithstanding the debarment or suspension of a contractor, agencies may continue contracts or subcontracts in existence at the time the contractor was debarred or suspended, unless the acquiring agency's head or a designee directs otherwise. A decision as to the type of termination action, if any, to be taken should be made only after review by agency contracting and technical personnel and by counsel to ensure the propriety of the proposed action.

(b) Agencies shall not renew current contracts or subcontracts of debarred or suspended contractors, or otherwise extend their duration, unless the acquiring agency's head or a designee states in writing the compelling reasons for renewal or extension.

9.405-2 Restrictions on subcontracting.

When a debarred or suspended contractor is proposed as a subcontractor for any subcontract subject to Government consent, approval shall not be given unless the acquiring agency's head or a designee states in writing the compelling reasons for this approval.

9.406 Debarment.

9.406-1 General.

(a) The debarring official may, in the public interest, debar a contractor for any of the causes in 9.406-2, using the procedures in 9.406-3. The existence of a cause for debarment, however, does not necessarily *require* that the contractor be debarred; the seriousness of the contractor's acts or omissions and any mitigating factors should be considered in making any debarment decision.

(b) Debarment constitutes debarment of all divisions or other organizational elements of the contractor, unless the debarment decision is limited by its terms to specific divisions, organizational elements, or commodities. The debarring official may extend the debarment decision to include any affiliates of the contractor if they are (1) specifically named and (2) given written notice of the proposed debarment and an opportunity to respond (see 9.406-3(c)).

(c) A contractor's debarment shall be effective throughout the executive branch of the Government, unless an acquiring agency's head or a designee states in writing the compelling reasons justifying continued business dealings between that agency and the contractor.

9.406-2 Causes for debarment.

The debarring official may debar a contractor for any of the causes listed in paragraphs (a) through (c) following:

(a) Conviction of or civil judgment for—

(1) Commission of fraud or a criminal offense in connection with (i) obtaining, (ii) attempting to obtain, or (iii) performing a public contract or subcontract;

(2) Violation of Federal or State antitrust statutes relating to the submission of offers;

(3) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; or

(4) Commission of any other offense indicating a lack of business integrity or business honesty that seriously and directly affects the present responsibility of a Government contractor or subcontractor.

(b) Violation of the terms of a Government contract or subcontract so serious as to justify debarment, such as—

(1) Willful failure to perform in accordance with the terms of one or more contracts; or

(2) A history of failure to perform, or of unsatisfactory performance of, one or more contracts.

(c) Any other cause of so serious or compelling a nature that it affects the present responsibility of a Government contractor or subcontractor.

9.406-3 Procedures.

(a) *Investigation and referral.* Agencies shall establish procedures for the prompt reporting, investigation, and referral to the debarring official of matters appropriate for that official's consideration.

(b) *Decisionmaking process.* (1) Agencies shall establish procedures governing the debarment decisionmaking process that are as informal as is practicable, consistent with principles of fundamental fairness. These procedures shall afford the contractor (and any specifically named affiliates) an opportunity to submit, in person, in writing, or through a representative, information and argument in opposition to the proposed debarment.

(2) In actions not based upon a conviction or judgment, if it is found that the contractor's submission in opposition raises a genuine dispute over facts material to the proposed debarment, agencies shall also—

(i) Afford the contractor an opportunity to appear with counsel, submit documentary evidence, present witnesses, and confront any person the agency presents; and

(ii) Make a transcribed record of the proceedings and make it available at cost to the contractor upon request, unless the contractor and the agency, by mutual agreement, waive the requirement for a transcript.

(c) *Notice of proposal to debar.* Debarment shall be initiated by advising the contractor and any specifically named affiliates, by certified mail, return receipt requested—

(1) That debarment is being considered;

(2) Of the reasons for the proposed debarment in terms sufficient to put the contractor on notice of the conduct or transaction(s) upon which it is based;

(3) Of the cause(s) relied upon under 9.406-2 for proposing debarment;

(4) That, within 30 days after receipt of the notice, the contractor may submit, in person, in writing, or through a representative, information and argument in opposition to the proposed debarment, including any additional specific information that raises a genuine dispute over the material facts;

(5) Of the agency's procedures governing debarment decisionmaking;

(6) Of the potential effect of the proposed debarment; and,

(7) If no suspension is in effect, that the agency will not solicit offers from, award contracts to, renew or otherwise extent contracts with, or consent to subcontracts with the contractor pending a debarment decision.

(d) *Debarring official's decision.* (1) In actions based upon a conviction or judgment, or in which there is no genuine dispute over material facts, the debarring official shall make a decision on the basis of all the information in the administrative record, including any submission made by the contractor. If no suspension is in effect, the decision shall be made within 30 working days after receipt of any information and argument submitted by the contractor, unless the debarring official extends this period for good cause.

(2) (i) In actions in which additional proceedings are necessary as to disputed material facts, written findings of fact shall be prepared. The debarring official shall base the decision on the facts as found, together with any information and argument submitted by the contractor and any other information in the administrative record.

(ii) The debarring official may refer matters involving disputed material facts to another official for findings of fact. The debarring official may reject any such findings, in whole or in part, only after specifically determining them to be arbitrary and capricious or clearly erroneous.

(iii) The debarring official's decision shall be made after the conclusion of the proceedings with respect to disputed facts.

(3) In any action in which the proposed debarment is not based upon a conviction or civil judgment, the cause for debarment must be established by a preponderance of the evidence.

(e) *Notice of debarring official's decision.* (1) If the debarring official decides to impose debarment, the contractor and any affiliates involved shall be given prompt notice by certified mail, return receipt requested—

(i) Referring to the notice of proposed debarment;

(ii) Specifying the reasons for debarment;

(iii) Stating the period of debarment, including effective dates; and

(iv) Advising that the debarment is effective throughout the executive branch of the Government unless the head of an acquiring agency or a designee makes the statement called for by 9.406-1(c).

(2) If debarment is not imposed, the debarring official shall promptly notify the contractor and any affiliates involved, by certified mail, return receipt requested.

9.406-4 Period of debarment.

(a) Debarment shall be for a period commensurate with the seriousness of the cause(s). Generally, a debarment should not exceed 3 years. If suspension precedes a debarment, the suspension period shall be considered in determining the debarment period.

(b) The debarring official may extend the debarment for an additional period, if that official determines that an extension is necessary to protect the Government's interest. However, a debarment may not be extended solely on the basis of the facts and circumstances upon which the initial debarment action was based. If debarment for an additional period is determined to be necessary, the procedures of 9.406-3 above shall be followed to extend the debarment.

(c) The debarring official may reduce the period or extent of debarment, upon the contractor's request, supported by documentation, for reasons such as—

(1) Newly discovered material evidence;

(2) Reversal of the conviction or judgment upon which the debarment was based;

(3) Bona fide change in ownership or management;

(4) Elimination of other causes for which the debarment was imposed; or

(5) Other reasons the debarring offical deems appropriate.

9.406-5 Scope of debarment.

(a) The fraudulent, criminal, or other seriously improper conduct of any officer, director, shareholder, partner, employee, or other individual associated with a contractor may be imputed to the contractor when the conduct occurred in connection with the individual's performance of duties for or on behalf of the contractor, or with the contractor's knowledge, approval, or acquiescence. The contractor's acceptance of the benefits derived from the conduct shall be evidence of such knowledge, approval, or acquiescence.

(b) The fraudulent, criminal, or other seriously improper conduct of a contractor may be imputed to any officer, director, shareholder, partner, employee, or other individual associated with the contractor who participated in, knew of, or had reason to know of the contractor's conduct.

(c) The fraudulent, criminal, or other seriously improper conduct of one contractor participating in a joint venture or similar arrangement may be imputed to other participating contractors if the conduct occurred for or on behalf of the joint venture or similar arrangement, or with the knowledge, approval, or acquiescence of these contractors. Acceptance of the benefits derived from the conduct shall be evidence of such knowledge, approval, or acquiescence.

9.407 Suspension.

9.407-1 General.

(a) The suspending official may, in the public interest, suspend a contractor for any of the causes in 9.407-2, using the procedures in 9.407-3.

(b) Suspension is a serious action to be imposed on the basis of adequate evidence, pending the completion of investigation or legal proceedings, when it has been determined that immediate action is necessary to protect the Government's interest. In assessing the adequacy of the evidence, agencies should consider how much information is available, how credible it is given the circumstances, whether or not important allegations are corroborated, and what inferences can reasonably be drawn as a result. This assessment should include an examination of basic documents such as contracts, inspection reports, and correspondence.

(c) Suspension constitutes suspension of all divisions or other organizational elements of the contractor, unless the suspension decision is limited by its terms to specific divisions, organizational elements, or commodities. The suspending official may extend the suspension decision to include any affiliates of the contractor if they are (1) specifically named and (2) given written notice of the suspension and an opportunity to respond (see 9.407-3(c)).

(d) A contractor's suspension shall be effective throughout the executive branch of the Government, unless an acquiring agency's head or a designee states in writing the compelling reasons justifying continued business dealings between that agency and the contractor.

9.407-2 Causes for suspension.

(a) The suspending official may suspend a contractor suspected, upon adequate evidence, of—

(1) Commission of fraud or a criminal offense in connection with (i) obtaining, (ii) attempting to obtain, or (iii) performing a public contract or subcontract;

(2) Violation of Federal or State antitrust statutes relating to the submission of offers;

(3) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; or

(4) Commission of any other offense indicating a lack of business integrity or business honesty that seriously and directly affects the present responsibility of a Government contractor or subcontractor.

(b) Indictment for any of the causes in paragraph (a) above constitutes adequate evidence for suspension.

(c) The suspending official may upon adequate evidence also suspend a contractor for any other cause of so serious or compelling a nature that it affects the present responsibility of a Government contractor or subcontractor.

9.407-3 Procedures.

(a) *Investigation and referral.* Agencies shall establish procedures for the prompt reporting, investigation, and referral to the suspending official of matters appropriate for that official's consideration.

(b) *Decisionmaking process.* (1) Agencies shall establish procedures governing the suspension decisionmaking process that are as informal as is practicable, consistent with principles of fundamental fairness. These procedures shall afford the contractor (and any specifically named affiliates) an opportunity, following the imposition of suspension, to submit, in person, in writing, or through a representative, information and argument in opposition to the suspension.

(2) In actions not based on an indictment, if it is found that the contractor's submission in opposition raises a genuine dispute over facts material to the suspension and if no determination has been made, on the basis of Department of Justice advice, that substantial interests of the Government in pending or contemplated legal proceedings based on the same facts as the suspension would be prejudiced, agencies shall also—

(i) Afford the contractor an opportunity to appear with counsel, submit documentary evidence, present witnesses, and confront any person the agency presents; and

(ii) Make a transcribed record of the proceedings and make it available at cost to the contractor upon request, unless the contractor and the agency, by mutual agreement, waive the requirement for a transcript.

(c) *Notice of suspension.* When a contractor and any specifically named affiliates are suspended, they shall be immediately advised by certified mail, return receipt requested—

(1) That they have been suspended and that the suspension is based on an indictment or other adequate evidence that the contractor has committed irregularities (i) of a serious nature in business dealings with the Government or (ii) seriously reflecting on the propriety of further Government dealings with the contractor—any such irregularities shall be described in terms sufficient to place the contractor on notice without disclosing the Government's evidence;

(2) That the suspension is for a temporary period pending the completion of an investigation and such legal proceeding as may ensure;

(3) Of the cause(s) relied upon under 9.407-2 for imposing suspension;

(4) Of the effect of the suspension;

(5) That, within 30 days after receipt of the notice, the contractor may submit, in person, in writing, or through a representative, information and argument in opposition to the suspension, including any additional specific information that raises a genuine dispute over the material facts; and

(6) That additional proceedings to determine disputed material facts will be conducted unless (i) the action is based on an indictment or (ii) a determination is made, on the basis of Department of Justice advice, that the substantial interests of the Government in pending or contemplated legal proceedings based on the same facts as the suspension would be prejudiced.

(d) *Suspending official's decision.* (1) In actions (i) based on an indictment, (ii) in which the contractor's submission does not raise a genuine dispute over material facts, or (iii) in which additional proceedings to determine disputed material facts have been denied on the basis of Department of Justice advice, the suspending official's decision shall be based on all the information in the administrative record, including any submission made by the contractor.

(2) (i) In actions in which additional proceedings are necessary as to disputed material facts, written findings of fact shall be prepared. The suspending official shall base the decision on the facts as found, together with any information and argument submitted by the contractor and any other information in the administrative record.

(ii) The suspending official may refer matters involving disputed material facts to another official for findings of fact. The suspending official may reject any such findings, in whole or in part, only after specifically determining them to be arbitrary and capricious or clearly erroneous.

(iii) The suspending official's decision shall be made after the conclusion of the proceedings with respect to disputed facts.

(3) The suspending official may modify or terminate the suspension or leave it in force (for example, see 9.406-

4(c) for the reasons for reducing the period or extent of debarment). However, a decision to modify or terminate the suspension shall be without prejudice to the subsequent imposition of (i) suspension by any other agency or (ii) debarment by any agency.

(4) Prompt written notice of the suspending official's decision shall be sent to the contractor and any affiliates involved, by certified mail, return receipt requested.

9.407-4 Period of suspension.

(a) Suspension shall be for a temporary period pending the completion of investigation and any ensuing legal proceedings, unless proceedings, unless sooner terminated by the suspending official or as provided in this subsection.

(b) If legal proceedings are not initiated within 12 months after the date of the suspension notice, the suspension shall be terminated unless an Assistant Attorney General requests its extension, in which case it may be extended for an additional 6 months. In no event may a suspension extend beyond 18 months, unless legal proceedings have been initiated within that period.

(c) The suspending official shall notify the Department of Justice of the proposed termination of the suspension, at least 30 days before the 12-month period expires, to give that Department an opportunity to request an extension.

9.407-5 Scope of suspension.

The scope of suspension shall be the same as that for debarment (see 9.406-5), except that the procedures of 9.407-3 shall be used in imposing suspension.

SUBPART 9.5—ORGANIZATIONAL CONFLICTS OF INTEREST

9.500 Scope of subpart.

This subpart prescribes responsibilities, general rules, and procedures for identifying, evaluating, and resolving organizational conflicts of interest. It also provides examples to assist contracting officers in applying these rules and procedures to individual contracting situations.

9.501 Definition.

An "organizational conflict of interest" exists when the nature of the work to be performed under a proposed Government contract may, without some restriction on future activities, (a) result in an unfair competitive advantage to the contractor or (b) impair the contractor's objectivity in performing the contract work.

9.502 Applicability.

(a) This subpart applies to contracts with either profit or nonprofit organizations, including nonprofit organizations created largely or wholly with Government funds.

(b) The applicability of this subpart is not limited to any particular kind of acquisition. However, organizational conflicts of interest are more likely to occur in contracts involving—

(1) Management support services;

(2) Consultant or other professional services;

(3) Contractor performance of or assistance in technical evaluations; or

(4) Systems engineering and technical direction work performed by a contractor that does not have overall contractual responsibility for development or production.

9.503 Waiver.

The agency head or a designee may waive any general rule or procedure of this subpart by determining that its application in a particular situation would not be in the Government's interest. Any request for waiver must be in writing, shall set forth the extent of the conflict, and requires approval by the agency head or a designee. Agency heads shall not delegate waiver authority below the level of head of a contracting activity.

9.504 Contracting officer responsibilities.

(a) Using the general rules, procedures, and examples in this subpart, contracting officers shall analyze planned acquisitions in order to—

(1) Identify and evaluate potential organizational conflicts of interest as early in the acquisition process as possible; and

(2) Avoid, neutralize, or mitigate significant potential conflicts before contract award.

(b) Contracting officers should obtain the advice of counsel and the assistance of appropriate technical specialists in evaluating potential conflicts and in developing any necessary solicitation provisions and contract clauses (see 9.508).

(c) Before issuing a solicitation for a contract that may involve a significant potential conflict, the contracting officer shall recommend to the head of the contracting activity a course of action for resolving the conflict (see 9.507).

(d) In fulfilling their responsibilities for identifying and resolving potential conflicts, contracting officers should avoid creating unnecessary delays, burdensome information requirements, and excessive documentation. The contracting officer's judgment need be formally documented only when a substantive issue concerning potential organizational conflict of interest exists.

9.505 General rules.

The general rules in 9.505-1 through 9.505-4 prescribe limitations on contracting as the means of avoiding, neutralizing, or mitigating organizational conflicts of interest that might otherwise exist in the stated situations. Some illustrative examples are provided in 9.509. Conflicts may arise in situations not expressly covered in this section 9.505 or in the examples in 9.509. Each individual contracting situation should be examined on the basis of its particular facts and the nature of the proposed contract. The exercise of common sense, good judgment, and sound discretion is required in both the decision on whether a significant potential conflict exists and, if it does, the development of an appropriate means for resolving it. The two underlying principles are—

(a) Preventing the existence of conflicting roles that might bias a contractor's judgment; and

(b) Preventing unfair competitive advantage.

9.505-1 Providing systems engineering and technical direction.

(a) A contractor that provides systems engineering and technical direction for a system but does not have overall contractual responsibility for its development, its integration, assembly, and checkout, or its production shall not (1) be awarded a contract to supply the system or any of its major components or (2) be a subcontractor or consultant to a supplier of the system or any of its major components.

(b) Systems engineering includes a combination of substantially all of the following activities: determining specifications, identifying and resolving interface problems, developing test requirements, evaluating test data, and supervising design. Technical direction includes a combination of substantially all of the following activities: developing work statements, determining parameters, directing other contractors' operations, and resolving technical controversies. In performing these activities, a contractor occupies a highly influential and responsible position in determining a system's basic concepts and supervising their execution by other contractors. Therefore this contractor should not be in a position to make decisions favoring its own products or capabilities.

9.505-2 Preparing specifications or work statements.

(a) (1) If a contractor prepares and furnishes complete specifications covering nondevelopmental items, to be used in a competitive acquisition, that contractor shall not be allowed to furnish these items, either as a prime contractor or as a subcontractor, for a reasonable period of time including, at least, the duration of the initial production contract. This rule shall not apply to—

(i) Contractors that furnish at Government request specifications or data regarding a product they provide, even though the specifications or data may have been paid for separately or in the price of the product; or

(ii) Situations in which contractors, acting as industry representatives, help Government agencies prepare, refine, or coordinate specifications, regardless of source, provided this assistance is supervised and controlled by Government representatives.

(2) If a single contractor drafts complete specifications for nondevelopmental equipment, it should be eliminated for a reasonable time from competition for production based on the specifications. This should be done in order to avoid a situation in which the contractor could draft specifications favoring its own products or capabilities. In this way the Government can be assured of getting unbiased advice as to the content of the specifications and can avoid allegations of favoritism in the award of production contracts.

(3) In development work, it is normal to select firms that have done the most advanced work in the field. These firms can be expected to design and develop around their own prior knowledge. Development contractors can frequently start production earlier and more knowledgeably than firms that did not participate in the development, and this can affect the time and quality of production, both of which are important to the Government. In many instances the Government may have financed the development. Thus, while the development contractor has a competitive advantage, it is an unavoidable one that is not considered unfair; hence no prohibition should be imposed.

(b) (1) If a contractor prepares, or assists in preparing, a work statement to be used in competitively acquiring a system or services—or provides material leading directly, predictably, and without delay to such a work statement—that contractor may not supply the system, major components of the system, or the services unless—

(i) It is the sole source;

(ii) It has participated in the development and design work; or

(iii) More than one contractor has been involved in preparing the work statement.

(2) Agencies should normally prepare their own work statements. When contractor assistance is necessary, the contractor might often be in a position to favor its own products or capabilities. To overcome the possibility of bias, contractors are prohibited from supplying a system or services acquired on the basis of work statements growing out of their services, unless excepted in subparagraph (1) above.

(3) For the reasons given in 9.505-2(a)(3), no prohibitions are imposed on development and design contractors.

9.505-3 Providing technical evaluation or consulting services.

Contracts involving (a) technical evaluations of other contractors' offers or products or (b) consulting services (see 37.201) shall not generally be awarded to a contractor that would evaluate, or advise the Government concerning, its own products or activities, or those of a competitor, without proper safeguards to ensure objectivity and protect the Government's interests. In this connection, OMB Circular No. A-120, Guidelines for the Use of Consulting Services, and implementing agency regulations, should be consulted for additional guidance.

9.505-4 Obtaining access to proprietary information.

(a) A contractor that gains access to proprietary information of other companies in performing advisory services for the Government must agree with the other companies to (1) protect their information from unauthorized use or disclosure for as long as it remains proprietary and (2) refrain from using the information for any purpose other than that for which it was furnished. The contracting officer shall obtain copies of these agreements and ensure that they are properly executed.

(b) Proprietary information is information considered so valuable by its owners that it is held secret by them and their licensees. When a contractor requires such information from others to perform a Government contract and can use the leverage of the contract to obtain it, the contractor may gain an unfair competitive advantage unless restrictions are imposed. These restrictions protect the information and encourage companies to provide it when necessary for contract performance. They are not intended to protect information (1) furnished voluntarily without limitations on its use or (2) available to the Government or contractor from other sources without restriction.

9.506 Information sources.

When information concerning prospective contractors is necessary to identify and evaluate potential organizational conflicts of interest or to develop recommended actions, contracting officers should first seek it from within the Government or from other readily available sources. Government sources include the files and the knowledge of personnel within the contracting office, other contracting offices, the cognizant contract administration and audit activities, and offices concerned with contract financing. Non-Government sources include publications and commercial services, such as credit rating services, trade and financial journals, and business directories and registers.

9.507 Procedures.

(a) If the contracting officer initially decides that a particular acquisition involves a significant potential organizational conflict of interest, before issuing the solicitation the contracting officer shall submit to the head of the contracting activity for approval—

(1) A written analysis, including a recommended course of action for avoiding, neutralizing, or mitigating the conflict, based on the general rules in 9.505 or on another basis not expressly stated in that section;

(2) A draft solicitation provision (see 9.508-1); and,

(3) If appropriate, a proposed contract clause (see 9.508-2).

(b) The head of the contracting activity shall—

(1) Review the contracting officer's analysis and recommended course of action, including the draft provision and any proposed clause;

(2) Consider the benefits and detriments to the Government and prospective contractors; and

(3) Approve, modify, or reject the recommendation in writing.

(c) The contracting officer shall—

(1) Include the approved provision and any approved clause in the solicitation;

(2) Consider additional information provided by prospective contractors in response to the solicitation or during negotiations; and,

(3) Before awarding the contract, resolve the potential conflict in a manner consistent with the approval or

other direction by the head of the contracting activity; or,

(4) If the prospective contractor disagrees and requests higher level review, provide the decision and the contractor's position to the agency head or a designee for review and final decision.

(d) If, during the effective period of any restriction (see 9.508), a contracting office transfers acquisition responsibility for the item or system involved, it shall notify the successor contracting office of the restriction, sending a copy of the contract under which the restriction was imposed.

9.508 Solicitation provision and contract clause.

9.508-1 Solicitation provision.

As indicated in the general rules in 9.505, significant potential organizational conflicts of interest are normally resolved by imposing some restraint, appropriate to the nature of the conflict, upon the contractor's eligibility for future contracts or subcontracts. Therefore, affected solicitations shall contain a provision that—

(a) Invites offerors' attention to this Subpart 9.5;

(b) States the nature of the potential conflict as seen by the contracting officer;

(c) States the nature of the proposed restraint upon future contractor activities; and,

(d) Depending on the nature of the acquisition, states whether or not the terms of any proposed clause and the application of this subpart to the contract are subject to negotiation.

9.508-2 Contract clause.

(a) If, as a condition of award, the contractor's eligibility for future prime contract or subcontract awards will be restricted or the contractor must agree to some other restraint, the solicitation shall contain a proposed clause that specifies both the nature and duration of the proposed restraint. The contracting officer shall include the clause in the contract, first negotiating the clause's final terms with the successful offeror, if it is appropriate to do so (see 9.508-1(d) above).

(b) The restraint imposed by a clause shall be limited to a fixed term of reasonable duration, sufficient to avoid the circumstance of unfair competitive advantage or potential bias. This period varies. It might end, for example, when the first production contract using the contractor's specifications or work statement is awarded, or it might extend through the entire life of a system for which the contractor has performed systems engineering and technical direction. In every case, the restriction shall specify termination by a specific date or upon the occurrence of an identifiable event.

9.509 Examples.

The examples in paragraphs (a) through (i) following illustrate situations in which questions concerning organizational conflicts of interest may arise. They are not all inclusive, but are intended to help the contracting officer apply the general rules in 9.505 to individual contract situations.

(a) Company A agrees to provide systems engineering and technical direction for the Navy on the powerplant for a group of submarines (i.e., turbines, drive shafts, propellers, etc.). Company A should not be allowed to supply any powerplant components. Company A can, however, supply components of the submarine unrelated to the powerplant (e.g., fire control, navigation, etc.). In this example, the system is the powerplant, not the submarine, and the ban on supplying components is limited to those for the system only.

(b) Company A is the systems engineering and technical direction contractor for system X. After some progress, but before completion, the system is canceled. Later, system Y is developed to achieve the same purposes as system X, but in a fundamentally different fashion. Company B is the systems engineering and technical direction contractor for system Y. Company A may supply system Y or its components.

(c) Company A develops new electronic equipment and, as a result of this development, prepares specifications. Company A may supply the equipment.

(d) XYZ Tool Company and PQR Machinery Company, representing the American Tool Institute, work under Government supervision and control to refine specifications or to clarify the requirements of a specific acquisition. These companies may supply the item.

(e) Before an ADP equipment acquisition is conducted, Company A is awarded a contract to prepare data system specifications and equipment performance criteria to be used as the basis for the equipment competition. Since the specifications are the basis for selection of commercial hardware, a potential conflict of interest exists. Company A should be excluded from the initial follow-on ADP hardware acquisition.

(f) Company A receives a contract to define the detailed performance characteristics an agency will require for purchasing rocket fuels. Company A has not developed the particular fuels. When the definition contract is awarded, it is clear to both parties that the agency will use the performance characteristics arrived at to choose competitively a contractor to develop or produce the fuels. Company A may not be awarded this follow-on contract.

(g) Company A receives a contract to prepare a detailed plan for scientific and technical training of an agency's personnel. It suggests a curriculum that the agency endorses and incorporates in its request for proposals to institutions to establish and conduct the training. Company A may not be awarded a contract to conduct the training.

(h) Company A is selected to study the use of lasers in communications. The agency intends to ask that firms doing research in the field make proprietary information available to Company A. The contract must require Company A to (1) enter into agreements with these firms to protect any proprietary information they provide and (2) refrain from using the information in supplying lasers to the Government or for any purpose other than that for which it was intended.

(i) An agency that regulates an industry wishes to develop a system for evaluating and processing license applications. Contractor X helps develop the system and process the applications. Contractor X should be prohibited from acting as a consultant to any of the applicants during its period of performance and for a reasonable period thereafter.

SUBPART 9.6—CONTRACTOR TEAM ARRANGEMENTS

9.601 Definition.

"Contractor team arrangement" means an arrangement in which—

(a) Two or more companies form a partnership or joint venture to act as a potential prime contractor; or

(b) A potential prime contractor agrees with one or more other companies to have them act as its subcontractors under a specified Government contract or acquisition program.

9.602 General.

(a) Contractor team arrangements may be desirable from both a Government and industry standpoint in order to enable the companies involved to (1) complement each other's unique capabilities and (2) offer the Government the best combination of performance, cost, and delivery for the system or product being acquired.

(b) Contractor team arrangements may be particularly appropriate in complex research and development acquisitions, but may be used in other appropriate acquisitions, including production.

(c) The companies involved normally form a contractor team arrangement before submitting an offer. However, they may enter into an arrangement later in the acquisition process, including after contract award.

9.603 Policy.

The Government will recognize the integrity and validity of contractor team arrangements; *provided*, the arrangements are identified and company relationships are fully disclosed in an offer or, for arrangements entered into after submission of an offer, before the arrangement becomes effective. The Government will not normally require or encourage the dissolution of contractor team arrangements.

9.604 Limitations.

Nothing in this subpart authorizes contractor team arrangements in violation of antitrust statutes or limits the Government's rights to—

(a) Require consent to subcontracts (see Subpart 44.2);

(b) Determine, on the basis of the stated contractor team arrangement, the responsibility of the prime contractor (see Subpart 9.1);

(c) Provide to the prime contractor data rights owned or controlled by the Government;

(d) Pursue its policies on competitive contracting, subcontracting, and component breakout after initial production or at any other time; and

(e) Hold the prime contractor fully responsible for contract performance, regardless of any team arrangement between the prime contractor and its subcontractors.

SUBPART 9.7—DEFENSE PRODUCTION POOLS AND RESEARCH AND DEVELOPMENT POOLS

9.701 Definition.

"Pool," as used in this subpart, means a group of concerns (see 19.101) that have—

(a) Associated together in order to obtain and perform, jointly or in conjunction with each other, defense production or research and development contracts;

(b) Entered into an agreement governing their organization, relationship, and procedures; and

(c) Obtained approval of the agreement by either—

(1) The Small Business Administration (SBA) under section 9 or 11 of the Small Business Act (15 U.S.C. 638 or 640) (see 13 CFR 125); or

(2) A designated official under Part V of Executive Order 10480, August 14, 1953 (18 FR 4939, August 20, 1953) and section 708 of the Defense Production Act of 1950 (50 U.S.C. App. 2158).

9.702 Contracting with pools.

(a) Except as specified in this subpart, a pool shall be treated the same as any other prospective or actual contractor.

(b) The contracting officer shall not award a contract to a pool unless the offer leading to the contract is submitted by the pool in its own name or by an individual pool member expressly stating that the offer is on behalf of the pool.

(c) Upon receipt of an offer submitted by a group representing that it is a pool, the contracting officer shall verify its approved status with the SBA District Office Director or other approving agency and document the contract file that the verification was made.

(d) Contracts with pools are exempt from the "manufacturer or regular dealer" requirement of the Walsh-Healey Public Contracts Act (41 U.S.C. 35) (see Subparts 9.1 and 22.6 and 41 CFR 50-201.604(d)).

(e) Pools approved by the SBA under the Small Business Act are entitled to the preferences and privileges accorded to small business concerns. Approval under the Defense Production Act does not confer these preferences and privileges.

(f) Before awarding a contract to an unincorporated pool, the contracting officer shall require each pool member participating in the contract to furnish a certified copy of a power of attorney identifying the agent authorized to sign the offer or contract on that member's behalf. The contracting officer shall attach a copy of each power of attorney to each signed copy of the contract retained by the Government.

9.703 Contracting with individual pool members.

(a) Pool members may submit individual offers, independent of the pool. However, the contracting officer shall not consider an independent offer by a pool member if that pool member participates in a competing offer submitted by the pool.

(b) If a pool member submits an individual offer, independent of the pool, the contracting officer shall consider the pool agreement, along with other factors, in determining whether that pool member is a responsible prospective contractor under Subpart 9.1.

PART 10—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

10.000 Scope of part.

This part prescribes policies and procedures for using specifications, standards, and other purchase descriptions in the acquisition process.

10.001 Definitions.

"Brand-name description" means a purchase description that identifies a product by its brand name and model or part number or other appropriate nomenclature by which the product is offered for sale.

"Department of Defense Index of Specifications and Standards" (DODISS) means the Department of Defense (DOD) publication that lists unclassified Federal and military specifications and standards, related standardization documents, and voluntary standards approved for use by DOD.

"Federal specification or standard" means a specification or standard issued or controlled by the General Services Administration (GSA) and listed in the Index of Federal Specifications and Standards.

"General Services Administration Index of Federal Specifications and Standards" means the GSA publication that lists Federal specifications and standards, including supplements, that have been implemented for use by all Federal agencies.

"Purchase description" means a description of the essential physical characteristices and functions required to meet the Government's minimum needs.

"Responsible agency" means the agency controlling the index in which a

particular specification or standard is listed.

"Specification" means a description of the technical requirements for a material, product, or service that includes the criteria for determining whether these requirements are met. Specifications shall state only the Government's actual minimum needs in a manner to encourage maximum practicable competition.

"Standard" means a document that establishes engineering and technical limitations and applications of items, materials, processes, methods, designs, and engineering practices. It includes any related criteria deemed essential to achieve the highest practical degree of uniformity in materials or products, or interchangeability of parts used in those products. Standards may be used in specifications, invitations for bids, proposals, and contracts.

"Voluntary standard" means a standard established by a private sector body and available for public use. The term does not include private standards of individual firms. For further guidance, see OMB Circular No. A-119, Federal Participation in Development and Use of Voluntary Standards.

10.002 Policy.

(a) Agency development and use of specifications and purchase descriptions shall, to the maximum extent practicable, promote full and free competition in acquisition and reliance on the private sector.

(b) Agencies shall—

(1) Specify their needs in a form that permits maximum practicable competition and innovation;

(2) State only the minimum agency needs in specifications and purchase descriptions; and

(3) Avoid restrictive features that would limit acceptable offers to one or a few offerors' products unless the features are essential to satisfy the agency's minimum needs.

10.003 Responsibilities.

(a) The Administrator of GSA, under separate authority and regulations, prepares, maintains, and controls specifications and standards covering products commonly used by Government agencies, and lists those descriptions in the Index of Federal Specifications and Standards.

(b) The Secretary of Defense, under separate authority and regulations, prepares, maintains, and controls military specifications, standards, and other documents unique to DOD and lists those product descriptions in the DODISS.

10.004 Selecting specifications or descriptions for use.

(a) (1) Plans, drawings, specifications, standards, or purchase descriptions for acquisitions shall state only the Government's actual minimum needs and describe the supplies and/or services in a manner that will encourage maximum practicable competition.

(2) Items to be acquired shall be described (i) by citing the applicable specifications and standards or (ii) by a description containing the necessary requirements.

(3) Specifications and standards shall be selectively applied and tailored in their application.

(i) "Selective application" is the process of reviewing and selecting from available specifications, standards, and related documents those which have application to a particular acquisition.

(ii) "Tailoring" is the process by which individual sections, paragraphs or sentences of the selected specifications, standards, and related document are reviewed and modified so that each one selected states only the Government's minimum requirements. Such tailoring need not be made a part of the basic specification or standard but will vary with each application, dependent upon the nature of the acquisition.

(b) (1) When authorized by 10.006(a), or when no applicable specification exists, agencies may use a purchase description, subject to pertinent restrictions on repetitive use. An adequate purchase description should set forth the essential physical and functional characteristics of the materials or services required. As many of the following characteristics as are necessary to express the Government's minimum requirements should be used in preparing purchase descriptions:

(i) Common nomenclature.

(ii) Kind of material; i.e., type, grade, alternatives, etc.

(iii) Electrical data, if any.

(iv) Dimensions, size, or capacity.

(v) Principles of operation.

(vi) Restrictive environmental conditions.

(vii) Intended use, including—

(A) Location within an assembly, and

(B) Essential operating condition.

(viii) Equipment with which the item is to be used.

(ix) Other pertinent information that further describes the item, material, or service required.

(2) Purchase descriptions shall not be written so as to specify a product, or a particular feature of a product, peculiar to one manufacturer, thereby precluding consideration of a product manufactured by another company, unless it is determined, in accordance with agency procedures, that the particular feature is essential to the Government's requirements, and that other companies' similar products lacking the particular feature would not meet the minimum requirements for the item.

(3) Generally, the minimum acceptable purchase description is the identification of a requirement by use of brand name followed by the words "or equal." This technique should be used only when an adequate specification or more detailed description cannot feasibly be made available by means other than inspection and analysis in time for the acquisition under consideration. Agencies should provide detailed guidance and necessary clauses for use by contracting activities when using this technique.

(4) Purchase descriptions of services should outline to the greatest degree practicable the specific services the contractor is expected to perform.

(c) Except as provided in (b) above, when considering the acquisition of products sold or traded to the general public in the course of normal business operations at prices based on established catalog or market prices, agencies should consult Part 11 and implementing agency regulations for guidance on acquiring commercial products.

(d) *Foreign purchase descriptions.* Unless precluded by law, products that are acquired overseas may be acquired by using purchase descriptions prepared by foreign governments or foreign industry associations, if the description will satisfy the agency's actual minimum requirements.

(e) *Packing, packaging, and marking requirements.* In accordance with agency regulations, contracting offices shall require adequate packaging and marking of supplies to prevent deterioration and damage during shipping, handling, and storage. In acquiring commercial products, contracting offices should consult Part 11 and implementing agency regulations.

10.005 Management of purchase descriptions.

(a) Responsible agencies shall ensure compliance with the policies prescribed in this part for all specifications and standards listed in their indexes.

(b) When a responsible agency determines, in accordance with its established procedures and criteria, that a listed specification or standard does not meet a particular minimum need of the Government, applicable amendments, revisions, or new descriptions shall be prepared and used. (See 10.007 with regard to deviations.)

(c) Recommendations for changes in specifications and standards listed in the Index of Federal Specifications and Standards should be submitted to the General Services Administration, Office of Federal Supply and Services, Cataloging Division, Washington, D.C. 20406. Recommendations for changes in military specifications and standards and other standardization documents listed in the DODISS should be submitted to the cognizant preparing activity.

10.006 Using specifications and standards.

(a) *Mandatory specifications and standards.* (1) Unless otherwise authorized by law or approved under 10.007(a) below, specifications and standards listed in the Index of Federal Specifications and Standards are mandatory for use by all agencies acquiring supplies or services covered by such specifications and standards, except when the acquisition is—

(i) Required under a public exigency, and using the indexed product description would delay obtaining the requirement;

(ii) For items purchased under the appropriate small purchase limitation in Part 13;

(iii) For products acquired and used overseas;

(iv) For items, excluding military clothing, acquired for authorized resale; or

(v) For construction or new installations of equipment, where nationally recognized industry or technical source specifications and standards are available.

(2) Military specifications and standards are mandatory for use by the Department of Defense (DOD), as are voluntary standards adopted by DOD and listed in the DODISS, except when any of the exceptions in (a)(1) above apply.

(b) *Commercial exception.* (1) In addition to the exceptions given in paragraph (a) above, agencies should consider stating their needs in a purchase description, when appropriate under Part 11 and implementing agency regulations, even though there is an indexed specification.

(2) The agency responsible for a specification may designate it as one for which this exception cannot be used, if the agency head or a designee determines this to be necessary.

10.007 Deviations.

When the exceptions in 10.006 above do not apply and an existing specification does not meet an agency's minimum needs, agencies may authorize deviations as follows:

(a) Each agency taking deviations shall establish procedures whereby a designated official having substantial contracting responsibility shall be responsible for ensuring that—

(1) Federal specifications are used, and requirements for exceptions and deviations are complied with;

(2) Justification for exceptions and deviations are subject to competent review before authorization, and that such justifications can be fully substantiated if post audit is required;

(3) Major or repeated deviations are not taken except as prescribed in (b) below; and

(4) Notification of deviation or recommendation for change in the specification is sent promptly in duplicate to the General Services Administration (FM), Washington, DC 20406. (A statement of the deviations with a justification and, where applicable, recommendation for revision or amendment of the specification shall be included. A notification is required for major deviations such as those that will result in the introduction of a new item of supply as evidenced by the development of a new item identification, or when a deviation is take repeatedly.)

(b) Deviations taken and reported by the agency in accordance with (a) above may not be continued, except under the following conditions:

(1) When an agency submits notification of major or repeated deviations that have been taken but makes no recommendation for change in the specification, GSA will notify the agency as to whether such deviations may be continued in subsequent contracting. In cases where continued deviations are not approved and the agency contracting has progressed to a point where it would be impracticable to amend or cancel the action, such action may be completed, but the deviation shall not be continued by the agency in subsequent contracts.

(2) When an agency has recommended changing the specification consistent with the deviations it has taken and reported, those deviations may be continued until such time as the recommended change is incorporated in the specification. When coordination with Federal agencies and industry does not result in acceptance of the change, such deviations shall not be continued by the agency in subsequent contracts.

(c) Deviations from military specifications shall be in accordance with any applicable DOD regulations.

10.008 Identification and availability of specifications.

(a) Solicitations citing specifications listed in the Index of Federal Specifications and Standards, DODISS, or other agency index shall identify each specification's approval date and the dates of any applicable amendments and revisions. Contracting offices will not normally furnish these cited specifications with the solicitation, except when—

(1) The product being acquired will be so complex that the specification must be furnished with the solicitation to enable prospective contractors to make a competent initial evaluation of the solicitation;

(2) In the judgment of the contracting officer, it would be impracticable for prospective contractors to obtain the specifications in reasonable time to respond to the solicitation; or

(3) A prospective contractor who has not previously bid on the product requests a copy of the specification.

(b) Solicitations shall not contain general identification references such as "the issue in effect on the date of the solicitation."

(c) Solicitations citing voluntary standards shall advise offerors to obtain the standards from the publisher.

(d) Contracting offices shall clearly identify in the solicitation specifications and any other pertinent documents not listed in the Index of Federal Specifications and Standards or DODISS and normally furnish them with the solicitation.

(e) When specifications refer to other specifications, such references shall (1) be restricted to documents, or appropriate portions of documents, that shall apply in the acquisition; (2) cite the extent of their applicability; (3) not conflict with other specifications and provisions of the solicitation; and (4) identify all applicable first tier references.

(f) Contracting offices shall furnish with the solicitation any brand name or equal description used.

(g) The Index of Federal Specifications and Standards and DODISS may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

10.009 User satisfaction.

(a) Agencies shall encourage users to communicate with acquisition organizations on—

(1) The adequacy of specifications to communicate the user's minimum needs;

(2) Product capability;

(3) Product failures and deficiencies; and

(4) Suggestions for corrective actions.

(b) Whenever practicable, the agency may provide affected industry an opportunity to comment on the critiques.

(c) Acquisition organizations shall consider user critiques and take appropriate action on bona fide complaints and suggestions.

10.010 Acquiring used or reconditioned material, former Government surplus property, and residual inventory.

(a) Generally, all contractually furnished supplies and their components, including former Government property, will be new, including recycled (see Subpart 23.4 for policy on recovered materials). However, agencies may acquire used or reconditioned material, former Government surplus property, or residual inventory conforming to the solicitation's requirements, if the contracting officer determines that it is acceptable. When such a determination is made, the solicitation shall clearly identify the supplies or their components that need not be new, along with the necessary details on their acceptability. Offerors wishing to provide such used or reconditioned material, former Government surplus property, or residual inventory shall do so in accordance with the clause at 52.210-5, New Material, or the provision at 52.210-6, Listing of Used or Reconditioned Material, Residual Inventory, and Former Government Surplus Property, and the clause at 52.210-7, Used or Reconditioned Material, Residual Inventory, and Former Government Surplus Property, as appropriate.

(b) Contracting officers shall consider the following when determining whether used or reconditioned materials, former Government surplus property, or residual inventory are acceptable:

(1) Safety of persons or property.

(2) Total cost to the Government (including maintenance, inspection, testing, and useful life).

(3) Performance requirements.

(4) Availability and cost of new materials and components.

(c) With regard to former Government surplus property, the contracting officer shall ensure that the prices paid for such items are reasonable considering overall cost savings to the Government. When a contract calls for material to be furnished at cost, the allowable charge for former Government surplus property shall not exceed the cost at which the contractor acquired the property.

10.011 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the provision at 52.210-1, Availability of Specifications Listed in the Index of Federal Specifications and Standards, in solicitations that (i) are issued by civilian agency contracting offices and (ii) cite specifications listed in the Index that are not furnished with the solicitation.

(b) The contracting officer shall insert the provision at 52.210-2, Availability of Specifications Listed in the DOD Index of Specifications and Standards (DODISS), in solicitations that (i) are issued by DOD contracting offices and (ii) cite specifications listed in the DODISS that are not furnished with the solicitation.

(c) The contracting officer shall insert a provision substantially the same as the provision at 52.210-3, Availability of Specifications Not Listed in the GSA Index of Federal Specifications and Standards, in solicitations that cite specifications that are not listed in the Index and are not furnished with the solicitation, but may be obtained from a designated source.

(d) The contracting officer shall insert a provision substantially the same as the provision at 52.210-4, Availability for Examination of Specifications Not Listed in the Index of Federal Specifications and Standards, in solicitations that cite specifications that are not listed in the Index and are available for examination at a specified location.

(e) (1) The contracting officer shall insert the clause at 52.210-5, New Material, in solicitations and contracts for supplies, unless, in the judgment of the contracting officer, the clause would serve no useful purpose.

(2) The contracting officer may insert the clause in solicitations and contracts for services that may involve the incidental furnishing of parts.

(f) (1) The contracting officer shall insert the provision at 52.210-6, Listing of Used or Reconditioned Material, Residual Inventory, and Former Government Surplus Property, in solicitations for supplies, unless, in the judgment of the contracting officer, the provision would serve no useful purpose.

(2) The contracting officer may insert the provision in solicitations for services that may involve the incidental furnishing of parts.

(g) (1) The contracting officer shall insert the clause at 52.210-7, Used or Reconditioned Material, Residual Inventory, and Former Government Surplus Property, in solicitations and contracts for supplies, unless, in the judgment of the contracting officer, the clause would serve no useful purpose.

(2) The contracting officer may insert the clause in solicitations and contracts for services that may involve the incidental furnishing of parts.

PART 11—ACQUISITION AND DISTRIBUTION OF COMMERCIAL PRODUCTS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

11.000 Scope of part.

This part prescribes policies and procedures for the acquisition of commercial products and the use of commercial distribution systems.

11.001 Definitions.

"Commercial product" means a product, such as an item, material, component, subsystem, or system, sold or traded to the general public in the course of normal business operations at prices based on established catalog or market prices (see 15.804-3(c) for explanation of terms).

"Commercial-type product" means a commercial product (a) modified to meet some Government-peculiar physical requirement or addition or (b) otherwise identified differently from its normal commercial counterparts.

"Market research and analysis" means the process used for collecting and analyzing information about the commercial marketplace to arrive at the best approach for acquiring, distributing, and supporting particular products.

11.002 Policy.

In a manner consistent with statutes, Executive Orders, and governing regulations regarding maximum competition, agencies shall acquire commercial products and use commercial distribution systems whenever these products or distribution systems adequately satisfy the Government's needs (except see Part 8, Required Sources of Supplies and Services).

11.003 General.

Acquisition of commercial products begins with a description of the Government's needs stated in functional terms in sufficient detail so that market research and analysis can be used to

help determine whether commercial products, distribution systems, and logistics support are available to fill those needs.

11.004 Market research and analysis.

(a) *General.* Once the Government's needs have been functionally described, market research and analysis shall be conducted to ascertain the availability of commercial products to meet those needs and to identify the market practices, including warranty terms, of firms engaged in producing, distributing, and supporting these products.

(b) *Requirements.* Agencies shall conduct market research and analysis as needed to assure adequate competition and that the Government's needs are met in a cost effective manner. The extent of market research and analysis will vary depending upon such factors as urgency, estimated dollar value, complexity, and past experience.

(c) *Developing information.* Market research and analysis involves obtaining the following information, as appropriate:

(1) The availability of products suitable, as is or with minor modification, for meeting the need.

(2) The terms and conditions and warranty practices under which commercial sales of the products are made.

(3) The requirements of controlling laws and regulations.

(4) The number of sales and length of time over which they must occur to provide reasonable assurance that a particular product is reliable.

(5) The distribution and support capabilities of potential suppliers, including alternative arrangements and cost estimates.

(6) The potential cost of modifying commercial products to meet particular needs, if required.

(d) *Information sources.* The information described in paragraph (c) above may be acquired from the following sources, among others:

(1) Source lists for items of a similar nature maintained at contracting activities.

(2) Catalogs published by manufacturers, distributors, and dealers.

(3) Informational requests for quotations.

(4) Responses to advance notices and solicitation synopses published in *Commerce Business Daily*.

(5) GSA Federal Supply Schedules.

(6) Other Federal agencies.

11.005 Acceptability.

(a) The acceptability of commercial products to meet Government needs depends upon reliability, performance, logistics support requirements, and cost, among other things.

(b) When products meeting detailed specifications have satisfied user needs in the past, solicitations for commercial or commercial-type products to fill the same requirement should include provisions allowing the former producers to be considered for award under the detailed specifications as long as the specifications are current and all potential suppliers are competing on a similar basis.

11.006 Evaluation.

To establish that a product offered is a commercial or commercial-type product, certain information may be required from each offeror. This information should cover the minimum period of time identified by market research and analysis as necessary to establish reliability. Requested information may include:

(a) Catalogue identification.

(b) Total sales of the same or similar items to the public.

(c) Length of time the product has been sold in the commercial market place.

(d) Period covered by the information.

(e) Other pertinent information necessary to determine that the product is a commercial or commercial-type product.

11.007 Distribution options.

Market research and analysis should examine what commercial distribution systems are available in the market place. If these systems offer economic advantages to the Government, provide adequate logistics support, and are compatible with competitive contracting, they should be considered for use in conjunction with commercial purchases.

PART 12—CONTRACT DELIVERY OR PERFORMANCE

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

12.000 Scope of part.

This part prescribes policies and procedures relating to delivery or performance under contracts for supplies, services, and construction.

SUBPART 12.1—DELIVERY OR PERFORMANCE SCHEDULES

12.101 General.

(a) The time of delivery or performance is an essential contract element and shall be clearly stated in solicitations. Contracting officers shall ensure that delivery or performance schedules are realistic and meet the requirements of the acquisition. Schedules that are unreasonably tight or difficult of attainment (1) tend to restrict competition, (2) are inconsistent with small business policies, and (3) may result in higher contract prices.

(b) Solicitations shall, except when clearly unnecessary, inform bidders or offerors of the basis on which their bids or proposals will be evaluated with respect to time of delivery or performance.

(c) If timely delivery or performance is unusually important to the Government, liquidated damages clauses may be used (see Subpart 12.2).

12.102 Factors to consider in establishing schedules.

(a) *Supplies or services.* When establishing a contract delivery or performance schedule, consideration shall be given to applicable factors such as the—

(1) Urgency of need;

(2) Production time;

(3) Market conditions;

(4) Transportation time;

(5) Industry practices;

(6) Capabilities of small business concerns;

(7) Administrative time for obtaining and evaluating offers and for awarding contracts;

(8) Time for contractors to comply with any conditions precedent to contract performance; and

(9) Time for the Government to perform its obligations under the contract; e.g., furnishing Government property.

(b) *Construction.* When scheduling the time for completion of a construction contract, the contracting officer shall consider applicable factors such as the—

(1) Nature and complexity of the project;

(2) Construction seasons involved;

(3) Required completion date;

(4) Availability of materials and equipment;

(5) Capacity of the contractor to perform; and

(6) Use of multiple completion dates. (In any given contract, separate completion dates may be established for separable items of work. When multiple completion dates are used, requests for extension of time must be evaluated with respect to each item, and the affected completion dates modified when appropriate.)

12.103 Supplies or services.

(a) The contracting officer may express contract delivery or performance schedules in terms of—

(1) Specific calendar dates;

(2) Specific periods from the date of the contract; i.e., from the date of award or acceptance by the Government, or from the date shown as the effective date of the contract;

(3) Specific periods from the date of receipt by the contractor of the notice of award or acceptance by the Government (including notice by receipt of contract document executed by the Government); or

(4) Specific time for delivery after receipt by the contractor of each individual order issued under the contract, as in indefinite delivery type contracts and GSA schedules.

(b) The time specified for contract performance should not be curtailed to the prejudice of the contractor because of delay by the Government in giving notice of award.

(c) If the delivery schedule is based on the date of the contract, the contracting officer shall mail or otherwise furnish to the contractor the contract, notice of award, acceptance of proposal, or other contract document not later than the date of the contract.

(d) If the delivery schedule is based on the date the contractor receives the notice of award, or if the delivery schedule is expressed in terms of specific calendar dates on the assumption that the notice of award will be received by a specified date, the contracting officer shall send the contract, notice of award, acceptance of proposal, or other contract document by certified mail, return receipt requested, or by any other method that will provide evidence of the date of receipt.

(e) In invitations for bids, if the delivery schedule is based on the date of the contract, and a bid offers delivery based on the date the contractor receives the contract or notice of award, the contracting officer shall evaluate the bid by adding 5 days (as representing the normal time for arrival through ordinary mail). If the offered delivery date computed with mailing time is later than the delivery date required by the invitation for bids, the bid shall be considered nonresponsive and rejected. If award is made, the delivery date will be the number of days offered in the bid after the contractor actually receives the notice of award.

12.104 Contract clauses.

(a) *Supplies or services.* (1) The contracting officer may use a time of delivery clause to set forth a required delivery schedule and to allow an offeror to propose an alternative delivery schedule. The clauses and their alternates may be used in solicitations and contracts substantially as shown, they may be changed, or new clauses may be written.

(2) The contracting officer may insert in solicitations and contracts for supplies or services a clause substantially the same as the clause at 52.212-1, Time of Delivery, if the Government requires delivery by a particular time and the delivery schedule is to be based on the date of the contract. If the delivery schedule is expressed in terms of specific calendar dates or specific periods and is based on an assumed date of award, the contracting officer may use the clause with its Alternate I. If the delivery schedule is expressed in terms of specific calendar dates or specific periods and is based on an assumed date the contractor will receive notice of award, the contracting officer may use the clause with its Alternate II. If the delivery schedule is to be based on the actual date the contractor receives a written notice of award, the contracting officer may use the clause with its Alternate III.

(3) The contracting officer may insert in solicitations and contracts for supplies or services a clause substantially the same as the clause at 52.212-2, Desired and Required Time of Delivery, if the Government desires delivery by a certain time but requires delivery by a specified later time, and the delivery schedule is to be based on the date of the contract. If the delivery schedule is expressed in terms of specific calendar dates or specific periods and is based on an assumed date of award, the contracting officer may use the clause with its Alternate I. If the delivery schedule is expressed in terms of specific calendar dates or specific periods and is based on an assumed date the contractor will receive notice of award, the contracting officer may use the clause with its Alternate II. If the delivery schedule is to be based on the actual date the contractor receives a written notice of award, the contracting officer may use the clause with its Alternate III.

(b) *Construction.* The contracting officer shall insert the clause at 52.212-3, Commencement, Prosecution, and Completion of Work, in solicitations and contracts when a fixed-price construction contract is contemplated. The clause may be changed to accommodate the issuance of orders under indefinite-delivery contracts. If the completion date is expressed as a specific calendar date, computed on the basis of the contractor receiving the notice to proceed by a certain day, the contracting officer may use the clause with its Alternate I.

SUBPART 12.2—LIQUIDATED DAMAGES

12.201 General.

This subpart provides policies and procedures for the use of liquidated damages clauses in solicitations and contracts for supplies, services, and construction, entered into by formal advertising or negotiation.

12.202 Policy.

(a) Liquidated damages clauses should be used only when both (1) the time of delivery or performance is such an important factor in the award of the contract that the Government may reasonably expect to suffer damage if the delivery or performance is delinquent, and (2) the extent or amount of such damage would be difficult or impossible to ascertain or prove. In deciding whether to include a liquidated damage clause in a contract, the contracting officer should consider the probable effect on such matters as pricing, competition, and the costs and difficulties of contract administration.

(b) The rate of liquidated damages used must be reasonable and considered on a case-by-case basis since liquidated

damages fixed without any reference to probable actual damages may be held to be a penalty, and therefore unenforceable. The contract may also include an overall maximum dollar amount or period of time, or both, during which liquidated damages may be assessed, to ensure that the result is not an unreasonable assessment of liquidated damages.

(c) The contracting officer shall take all reasonable steps to mitigate liquidated damages. If a liquidated damages clause is included in a contract and a basis for termination for default exists, the contracting officer should take appropriate action expeditiously to obtain performance by the contractor or to terminate the contract (see Subpart 49.4). If delivery or performance is desired after termination for default, efforts must be made to obtain the delivery or performance elsewhere within a reasonable time. Efficient administration of contracts containing a liquidated damages clause is imperative to prevent undue loss to defaulting contractors and to protect the interests of the Government.

(d) If a contract provides for liquidated damages for delay, the Comptroller General, on the recommendation of the head of the agency concerned, is authorized and empowered by law to make a remission, that in the discretion of the Comptroller General is just and equitable, of the whole or any part of such damages.

12.203 Procedures.

(a) If a liquidated damages clause is to be used in a contract, the applicable clause and appropriate rate(s) of liquidated damages shall be included in the solicitation.

(b) If a liquidated damages clause is used in a construction contract, the rate(s) of liquidated damages to be assessed against the contractor should be for each day of delay and the rate(s) should as a minimum cover the estimated cost of inspection and superintendence for each day of delay in completion. Whenever the Government will suffer other specific losses due to the failure of the contractor to complete the work on time, the rate(s) should also include an amount for these items. Examples of specific losses are—

(1) The cost of substitute facilities;

(2) The rental of buildings and/or equipment; or

(3) The continued payment of quarters allowances.

(c) If appropriate to reflect the probable damages, considering that the Government can terminate for default or take other appropriate action, the rate of assessment of liquidated damages may be in two or more increments which provide a declining rate of assessment as the delinquency continues. The contract may also include an overall maximum dollar amount or period of time, or both, during which liquidated damages may be assessed, to ensure that the result is not an unreasonable assessment of liquidated damages.

12.204 Contract clauses.

(a) The contracting officer may insert the clause at 52.212-4, Liquidated Damages—Supplies, Services, or Research and Development, in solicitations and contracts when a fixed-price contract is contemplated for supplies, services, or research and development (see 12.202).

(b) The contracting officer may insert the clause at 52.212-5, Liquidated Damages—Construction, in solicitations and contracts for construction, except construction contracts on a cost-plus-fixed-fee basis (see 12.202). If different completion dates are specified in the contract for separate parts or stages of the work, the contracting officer shall use the clause with its Alternate I.

(c) The contracting officer shall insert the clause at 52.212-6, Time Extensions, in solicitations and contracts for construction in which the clause at 52.212-5, Liquidated Damages—Construction, is used with its Alternate I.

SUBPART 12.3—PRIORITIES, ALLOCATIONS, AND ALLOTMENTS

12.300 Scope of subpart.

This subpart implements Department of Commerce regulations in prescribing policies and procedures relating to the use of the Defense Materials System (DMS) and the Defense Priorities System (DPS) in solicitations and contracts. (See 15 CFR 330-354.)

12.301 Definitions.

"Authorized controlled material order (ACM order)" means any delivery order for any controlled material (as distinct from a product containing controlled material) bearing an authorized program identification, the calendar quarter in which delivery is required, and the certification required by DMS Regulation 1 or any other applicable regulation or order of the Office of Industrial Resource Administration, Department of Commerce.

"Controlled material" means domestic and imported steel, copper, aluminum, and nickel alloys, in the forms and shapes specified in Schedule I of DMS Regulation 1, whether new, remelted, rerolled, or redrawn.

"Delivery order" means any purchase order, contract, shipping or other instruction calling for delivery of any material or product, or performance of construction or service, on a particular date or dates or within specified periods of time. (See DMS Regulation 1.)

"Rated order" means any delivery order for any product, service, or material other than controlled material, bearing an authorized rating and the certification required by DPS Regulation 1 or any other applicable regulation or order of the Office of Industrial Resource Administration, Department of Commerce. Two types of ratings are authorized for "rated orders"—a DX rating and a DO rating. DX and DO rated orders have preferential status, and take precedence over unrated orders previously or subsequently received; however, DX rated orders take precedence over DO rated orders.

12.302 General.

(a) The Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 et seq.), includes provisions for keeping specific defense programs and energy production programs on schedule and maintaining an administrative means of promptly mobilizing the nation's economic resources in the event of war or national emergency. The Act provides that (1) priorities may be used to require contractors to accept and perform rated orders in preference to others, and (2) materials and facilities may be allocated for defense and energy production purposes.

(b) The Office of Industrial Resource Administration, Department of Commerce, has the responsibility for establishing the basic priorities and allocations rules for industrial production to support defense and energy production programs. This is accomplished through a series of regulations and orders called the Defense Materials System and the Defense Priorities System. The DMS Regulation 1 and DPS Regulation 1 specify in their respective schedules the authorized program identifications and agencies.

(c) In supply contracts that are ratable, i.e., required to be supported with rating and allotment authority, agency heads shall ensure compliance with the priorities and allocations program, including DPS Regulation 1, DMS Regulation 1, and other applicable rules and regulations published by the Office of Industrial Resource Administration. The rating of ratable orders under $2,500 is optional.

12.303 Procedures.

(a) Precedence among rated orders is established in DMS Regulation 1 for controlled materials, and in DPS Regulation 1 for all other materials, products, and services. In general, ACM orders and DO rated orders take precedence over unrated orders, and DX rated orders take precedence over ACM orders and DO rated orders.

(b) Rules are provided in DMS Regulation 1 and DPS Regulation 1 for properly identifying and certifying rated orders. To be a valid rated order, contracts shall contain the following in addition to normal contractual requirements:

(1) DO or DX rating.

(2) DMS allotment number on ACM orders.

(3) Certification "Certified for National Defense Use Under DMS Regulation 1" or "Certified for National Defense Use Under DPS Regulation 1", as appropriate.

(4) Required delivery date(s).

(c) In accordance with the DMS and the DPS regulations, rated contracts and purchase orders or ACM orders may be placed on selected suppliers when adequate response to a solicitation is not received. If there are no offers received in response to a solicitation or the offers received do not cover the entire requirement, normal acquisition procedures shall be followed in attempting to locate sources to the extent exigencies will permit. If the efforts are unsuccessful and it is then determined that the acquisition must be accomplished, rated orders in the form of rated contracts, rated purchase orders, or an ACM order shall be presented to one or more (as appropriate) selected suppliers or manufacturers qualified to produce the item or material. This will be accomplished by a cover letter, signed by the contracting officer, citing the requirements of the Defense Production Act and DPS Regulation 1, and requesting timely acceptance by the contractor. The letter will also request that any reasons for rejection be promptly furnished in writing.

(d) Rated orders or ACM orders that are rejected by suppliers shall be forwarded through established agency channels to the Office of Industrial Resource Administration, Department of Commerce, for appropriate action.

12.304 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 52.212-7, Rated or Authorized Controlled Material Orders, in solicitations that will result in the placement of rated orders or ACM orders.

(b) The contracting officer shall insert the clause at 52.212-8, Priorities, Allocations, and Allotments, in solicitations and contracts that are ratable, except for contracts under $2,500 that are not rated.

SUBPART 12.4—VARIATION IN QUANTITY

12.401 Supply contracts.

(a) A fixed-price supply contract may authorize Government acceptance of a variation in the quantity of items called for if the variation is caused by conditions of loading, shipping, or packing, or by allowances in manufacturing processes. Any permissible variation shall be stated as a percentage and it may be an increase, a decrease, or a combination of both; however, contracts for subsistence items may use other applicable terms of variation in quantity.

(b) There should be no standard or usual variation percentage. The overrun or underrun permitted in each contract should be based upon the normal commercial practices of a particular industry for a particular item, and the permitted percentage should be no larger than is necessary to afford a contractor reasonable protection. The permissible variation shall not exceed plus or minus 10 percent unless a different limitation is established in agency regulations. Consideration shall be given to the quantity to which the percentage variation applies. For example, when delivery will be made to multiple destinations and it is desired that the quantity variation apply to the item quantity for each destination, this requirement must be stated in the contract.

(c) Contractors are responsible for delivery of the specified quantity of items in a fixed-price contract, within allowable variations, if any. If a contractor delivers a quantity of items in excess of the contract requirements plus any allowable variation in quantity, particularly small dollar value overshipments, it results in unnecessary administrative costs to the Government in determining disposition of the excess quantity. Accordingly, the contract may include the clause at 52.212-10, Delivery of Excess Quantities of $100 or Less, to provide that—

(1) Excess quantities of items totaling up to $100 in value may be retained without compensating the contractor; and

(2) Excess quantities of items totaling over $100 in value may, at the Government's option, be either returned at the contractor's expense or retained and paid for at the contract unit price.

12.402 Construction contracts.

Construction contracts may authorize a variation in estimated quantities of unit-priced items. When the variation between the estimated quantity and the actual quantity of a unit-priced item is more than plus or minus 15 percent, an equitable adjustment in the contract price shall be made upon the demand of either the Government or the contractor. The contractor may request an extension of time if the quantity variation is such as to cause an increase in the time necessary for completion. The contracting officer must receive the request in writing within 10 days from the beginning of the period of delay. However, the contracting officer may extend this time limit before the date of final settlement of the contract. The contracting officer shall ascertain the facts and make any adjustment for extending the completion date that the findings justify.

12.403 Contract clauses.

(a) The contracting officer shall insert the clause at 52.212-9, Variation in Quantity, in solicitations and contracts, when a fixed-price supply contract is contemplated for supplies, and for services that involve the furnishing of supplies.

(b) The contracting officer may insert the clause at 52.212-10, Delivery of Excess Quantities of $100 or Less, in solicitations and contracts, when a fixed-price supply contract is contemplated.

(c) The contracting officer shall insert the clause at 52.212-11, Variation in Estimated Quantity, in solicitations and contracts when a fixed-price construction contract is contemplated that authorizes a variation in the estimated quantity of unit-priced items.

SUBPART 12.5—SUSPENSION OF WORK, STOP-WORK ORDERS, AND GOVERNMENT DELAY OF WORK

12.501 General.

Situations may occur during contract performance that cause the Government to order a suspension of work, or a work stoppage. This subpart provides clauses to meet these situations and a clause for settling contractor claims for unordered Government caused delays that are not otherwise covered in the contract.

12.502 Suspension of work.

A suspension of work under a construction or architect-engineer contract may be ordered by the contracting officer for a reasonable

period of time. If the suspension is unreasonable, the contractor may submit a written claim for increases in the cost of performance, excluding profit.

12.503 Stop-work orders.

(a) Stop-work orders may be used, when appropriate, in any negotiated fixed-price or cost-reimbursement supply, research and development, or service contract if work stoppage may be required for reasons such as advancement in the state-of-the-art, production or engineering breakthroughs, or realignment of programs.

(b) Generally, a stop-work order will be issued only if it is advisable to suspend work pending a decision by the Government and a supplemental agreement providing for the suspension is not feasible. Issuance of a stop-work order shall be approved at a level higher than the contracting officer. Stop-work orders shall not be used in place of a termination notice after a decision to terminate has been made.

(c) Stop-work orders should include—

(1) A description of the work to be suspended;

(2) Instructions concerning the contractor's issuance of further orders for materials or services;

(3) Guidance to the contractor on action to be taken on any subcontracts; and

(4) Other suggestions to the contractor for minimizing costs.

(d) Promptly after issuing the stop-work order, the contracting officer should discuss the stop-work order with the contractor and modify the order, if necessary, in light of the discussion.

(e) As soon as feasible after a stop-work order is issued, but before its expiration, the contracting officer shall take appropriate action to—

(1) Terminate the contract;

(2) Cancel the stop-work order (any cancellation of a stop-work order shall be subject to the same approvals as were required for its issuance); or

(3) Extend the period of the stop-work order if it is necessary and if the contractor agrees (any extension of the stop-work order shall be by a supplemental agreement).

12.504 Government delay of work.

(a) The clause at 52.212-15, Government Delay of Work, provides for the administrative settlement of contractor claims that arise from delays and interruptions in the contract work caused by the acts, or failures to act, of the contracting officer. This clause is not applicable if the contract otherwise specifically provides for an equitable adjustment because of the delay or interruption; e.g., when the Changes clause is applicable.

(b) The clause does not authorize the contracting officer to order a suspension, delay, or interruption of the contract work and it shall not be used as the basis or justification of such an order.

(c) If the contracting officer has notice of an unordered delay or interruption covered by the clause, the contracting officer shall act to end the delay or take other appropriate action as soon as practicable.

(d) The contracting officer shall retain in the file a record of all negotiations leading to any adjustment made under the clause, and related cost or pricing data.

12.505 Contract clauses.

(a) The contracting officer shall insert the clause at 52.212-12, Suspension of Work, in solicitations and contracts when a fixed-price construction or architect-engineer contract is contemplated.

(b) The contracting officer may, when contracting by negotiation, insert the clause at 52.212-13, Stop-Work Order, in solicitations and contracts for supplies, services, or research and development. If a cost-reimbursement contract is contemplated, the contracting officer shall use the clause with its Alternate I.

(c) The contracting officer shall insert the clause at 52.212-14, Stop-Work Order—Facilities, in solicitations and contracts when a facilities acquisition contract or a consolidated facilities contract is contemplated.

(d) The contracting officer shall insert the clause at 52.212-15, Government Delay of Work, in solicitations and contracts when a fixed-price contract is contemplated for supplies other than commercial or modified-commercial items. The clause use is optional when a fixed-price contract is contemplated for services, or for supplies that are commercial or modified-commercial items.

SUBCHAPTER C—Contracting Methods and Contract Types

PART 13—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

13.000 Scope of part.

This part prescribes policies and procedures for the acquisition of supplies, nonpersonal services, and construction from commercial sources, the aggregate amount of which does not exceed—

(a) $10,000 for civil agencies (i.e., agencies subject to Title 41 U.S.C. 252(c)(3)); or

(b) $25,000 for defense agencies subject to Title 10 U.S.C. 2304 (a)(3).

SUBPART 13.1—GENERAL

13.101 Definitions.

"Bulk funding" means a system whereby a contracting officer receives authorization from a fiscal and accounting officer to obligate funds on purchase documents against a specified lump sum of funds reserved for the purpose for a specified period of time rather than obtaining individual obligational authority on each purchase document.

"Delivery Order," as used in this part, means an order for supplies or services placed against an established contract or with Government sources of supply.

"Purchase Order," as used in this part, means an offer by the Government to buy certain supplies or nonpersonal services and construction from commercial sources, upon specified terms and conditions, the aggregate amount of which does not exceed the small purchase limit. The Optional Form 347, Order for Supplies or Services, is designed for this purpose.

"Small purchase" means an acquisition of supplies, nonpersonal services, and construction in the amount of $10,000 or less for civilian agencies and $25,000 or less for defense agencies, using the procedures prescribed in this part.

"Small purchase procedures" means the methods prescribed in this part for making small purchases using imprest funds, purchase orders, and blanket purchase agreements. The term excludes—

(a) Requirements obtained through the use of Delivery Orders;

(b) Contracts with the Small Business Administration (SBA) under Section 8(a) of the Small Business Act (see Part 19); and

(c) Contracts awarded through (1) formal advertising (see Part 14), (2) the negotiation procedures in Part 15, or (3) small business or labor surplus area set-asides (see Part 19 and 20), other than small business-small purchase set-asides prescribed in 13.105.

13.102 Purpose.

The purpose of this part is to prescribe simplified procedures for small purchases in order to (1) reduce administrative costs and (2) improve opportunities for small business concerns and small disadvantaged business concerns to obtain a fair proportion of Government contracts.

13.103 Policy.

(a) The procedures prescribed in this part shall be used to the maximum extent practicable for all purchases of supplies or services not exceeding the small purchase limitation unless requirements can be met by using required sources of supply (see Part 8).

(b) Small purchase procedures shall not be used in the acquisition of supplies and services initially estimated to exceed the small purchase limitation even though resulting awards do not exceed that limit. Requirements aggregating more than the small purchase dollar limitation shall not be broken down into several purchases that are less than the limit merely to permit negotiation under small purchase procedures.

13.104 Procedures.

(a) All purchases covered by this part shall be made by negotiation and shall cite the appropriate negotiation authority (see Subpart 15.2). Contracting officers shall use the small purchase procedure that is most suitable, efficient, and economical in the circumstances of each acquisition. Contracting officers may use the procedures in this part in acquisitions from Government supply sources (see Part 8), if their use is authorized by the basic contract or concurred in by the source.

(b) Related items (such as small hardware items or spare parts for vehicles) may be included in one solicitation and the award made on an "all-or-none" basis if suppliers are so advised when quotations are requested.

(c) Agencies shall use bulk funding to the maximum extent practicable to reduce processing time, handling, and documentation. Bulk funding is particularly appropriate if numerous purchases using the same type of funds are to be made during a given period.

(d) Agencies shall inspect items or services acquired under small purchase procedures as prescribed in 46.404.

(e) Agencies shall use United States-owned foreign currency, if appropriate, in making payments for small purchases (see Subpart 25.3).

(f) This part does not preclude using (1) Standard Form 1442, Solicitation, Offer and Award (Construction, Alteration, or Repair), for construction contracts (see 36.701(b)) or (2) negotiated two-party contracts (see Part 15), for acquisitions not exceeding the small purchase limitation.

13.105 Small business-small purchase set-asides.

(a) Except as provided in paragraphs (b), (c), and (d) below, each acquisition of supplies or services that has an anticipated dollar value of $10,000 or less and is subject to small purchase procedures, shall be reserved exclusively for small business concerns. This shall be accomplished by using the category of set-asides established by Pub. L. 95-507, specifically for small purchases, identified as small business-small purchase set-asides.

(b) The requirements of this section 13.105 apply only to purchases in the United States, its territories and possessions, Puerto Rico, and the Trust Territory of the Pacific Islands (see 19.000(b)). Foreign concerns shall not be solicited or awarded acquisitions reserved for small business concerns.

(c) The requirement for small business-small purchase set-asides does not affect the responsibility of agencies to make purchases from required sources of supply, such as Federal Prison Industries, Industries for the Blind and Other Severely Handicapped, and mandatory multiple-award Federal Supply Schedule contracts.

(d) (1) Each written solicitation under a small business-small purchase set-aside shall contain the provision at 52.219-4, Notice of Small Business-Small Purchase Set-Aside. If the solicitation is oral, however, information substantially identical to that which is in the provision shall be given to potential quoters.

(2) If the contracting officer determines there is no reasonable expectation of obtaining quotations from two or more responsible small business concerns (or at least one if the purchase does not exceed the dollar threshold, prescribed in 13.106, for obtaining competition and price reasonableness) that will be competitive in terms of market price, quality, and delivery, the contracting officer need not proceed with the small business-small purchase set-aside and may purchase on an unrestricted basis.

(3) If the contracting officer proceeds with the small business-small purchase set-aside and receives a quotation from only one responsible small business concern at a reasonable price (see 13.106(c)), the contracting officer shall make an award to that concern. However, if the contracting officer does not receive a reasonable quotation from a responsible small business concern, the contracting officer may cancel the small business- small purchase set-aside and complete the purchase on an unrestricted basis.

(4) When proceeding under 13.105(d)(1) or (3), the contracting officer shall ascertain the availability of small business suppliers by telephone or other informal means (see 13.106(b)(4)).

(5) If the purchase is on an unrestricted basis under 13.105(d)(2), the contracting officer shall document in the file the reason for the unrestricted purchase.

(e) Policy concerning nonmanufacturers under small business-small purchase set-asides is prescribed in 19.501(f)(2).

13.106 Competition and price reasonableness.

(a) *Purchases not over $1,000.* (1) Purchases not exceeding this limit may be made without securing competitive quotations if the contracting officer considers the prices to be reasonable.

(2) Such purchases shall be distributed equitably among qualified suppliers.

(3) If practical, a quotation shall be solicited from other than the previous supplier before placing a repeat order.

(4) The administrative cost of verifying the reasonableness of the price of purchases not exceeding $1,000 may more than offset potential savings from detecting instances of overpricing. Therefore, action to verify price reasonableness need be taken only when—

(i) The buyer or contracting officer suspects or has information (e.g., comparison to previous prices paid or personal knowledge of the item involved) to indicate that the price may not be reasonable; or

(ii) Purchasing an item for which no comparable pricing information is readily available (e.g., an item that is not the same as, or is not similar to, other items that have been recently purchased on a competitive basis).

(b) *Purchases over $1,000.* (1) Contracting officers shall solicit quotations from a reasonable number of qualified sources to ensure that the purchase is advantageous to the Government, price and other factors considered, including the administrative cost of the purchase. See Part 5 for requirements regarding publicizing contract actions. Solicitations may be limited to one source if the contracting officer determines that only one source is reasonably available; e.g., if the requirement is for (i) utility services available only from one source, or (ii) educational services available only from an educational or nonprofit institution and for which it is impractical to obtain competition.

(2) Generally, quotations should be solicited orally except that written solicitations shall be used for construction contracts over $2,000. Written solicitations should be used when—

(i) A large number of line items is included in a single proposed acquisition;

(ii) Obtaining oral quotations is not considered economical or practical;

(iii) Special specifications are involved; e.g., the product is different from that normally or previously purchased; or

(iv) The suppliers are located outside the local trade area.

(3) Reasonable competition for small purchases ordinarily can be obtained without soliciting quotations from sources outside the trade area in which the purchasing office is located. Contracting officers shall not limit solicitations to suppliers of well known and widely distributed makes or brands, nor shall quotations be solicited on a personal preference basis. New supply sources, disclosed through trade journals or other media, shall be continuously reviewed and, if appropriate, added to the list of available sources.

(4) (i) Unless exempted from this requirement by the head of the contracting activity, each contracting office shall maintain a small purchase source list (or lists, if more convenient) and shall record on the list the status of each source (when the status is made known to the contracting office) in the following categories:

(A) Small business.

(B) Small disadvantaged business.

(C) Certified in a labor surplus area.

(ii) The status information shall be used to ensure that small business concerns are given opportunities to submit quotations in response to small purchase solicitations. The names of additional concerns may be obtained from the Small and Disadvantaged Business Utilization Specialist who, in turn, may request support from the SBA Procurement Center Representative or other Federal and private sources which maintain lists of small business concerns. (See Subpart 19.1 for pertinent definitions.)

(5) Generally, solicitation should be limited to three suppliers. If practicable, two sources not included in the previous solicitation should be requested to furnish quotations.

(6) The following factors influence the number of quotations required in connection with any particular purchase:

(i) The nature of the article or service to be purchased and whether it is highly competitive and readily available in several makes or brands, or is relatively noncompetitive.

(ii) Information obtained in making recent purchases of the same or similar item.

(iii) The urgency of the proposed purchase.

(iv) The dollar value of the proposed purchase.

(v) Past experience concerning specific dealers' prices.

(7) If suppliers furnish standing price quotations on supplies or services required on an intermittent and recurring basis, the information may be used in lieu of obtaining individual quotations each time a purchase is contemplated. The buyer shall ensure that the price information is current and that the Government obtains the benefit of maximum discounts.

(8) Occasionally an item can be obtained only from a supplier who quotes a minimum order price or quantity that either unreasonably exceeds stated quantity requirements or results in an unreasonable price for the quantities required. In these instances, the contracting officer should inform the requiring activity of all facts regarding the quotation and request it to confirm or alter its requirement. The file shall be documented to support the final action taken.

(9) Notification to unsuccessful suppliers shall be given only if requested.

(c) *Data to support small purchases over $1,000.* (1) The determination that a proposed price is reasonable should be based on competitive quotations. If only one response is received, or the price variance between multiple responses reflects lack of adequate competition, a statement shall be included in the contract file giving the basis of the determination of fair and reasonable price. The determination may be based on a comparison of the proposed price with prices found reasonable on previous purchases, current price lists, catalogs, advertisements, similar items in a related industry, value analysis, the contracting officer's personal knowledge of the item being purchased, or any other reasonable basis. In any case, the contracting officer should gain as much knowledge as practicable of the physical and material characteristics and intended use of the item to be purchased as an aid to determine price reasonableness.

(2) If only one source is solicited, an additional notation shall be made to explain the absence of competition, except for acquisition of utility services available only from one source or of educational services from nonprofit institutions.

(3) The following illustrate the extent to which quotation information should be recorded:

(i) *Oral solicitations.* The contracting office shall establish and maintain informal records of oral price quotations in order to reflect clearly the propriety of placing the order at the price paid with the supplier concerned. In most cases, this will consist merely of showing the names of the suppliers contacted and the prices and other terms and conditions quoted by each. Handwritten notations on the purchase requisition are satisfactory for this purpose.

(ii) *Written solicitations.* Written records of solicitations may be limited to notes or abstracts to show prices, delivery, references to printed price lists used, the vendor or vendors contacted, and other pertinent data.

(4) Purchasing offices shall retain data supporting small purchases to the minimum extent and duration necessary for management review purposes. (See Subpart 4.8, Contract Files.)

13.107 Solicitation and evaluation of quotations.

(a) *Forms.* (1) Except when quotations are solicited orally, Standard Form 18, Request for Quotations (illustrated in 53.301-18), is designed for use in obtaining price, delivery, and related information from suppliers.

(2) Standard Form 18 is available for use by all agencies, and shall be used when using the form is considered economical and efficient for obtaining written quotations for small purchases.

(3) Standard Form 36, Continuation Sheet, may be used with Standard Form 18 when additional space is needed.

(4) If Standard Form 18 is not used for written solicitations, contracting officers may request quotations using an agency-designed form, an agency-approved automated format, or teletype.

(5) Each agency-designed request for quotations form shall conform with Standard Form 18, insofar as practical.

(6) When using a teletype for transmission of a request for quotations, the provisions and clauses applicable to the solicitation shall be incorporated by reference.

(b) *Discounts.* Consistent with the applicable principles in 14.407-3, contracting officers shall make every effort to obtain trade and prompt payment discounts. However, prompt payment discounts shall not be considered in the evaluation of quotations.

(c) *Transportation charges.* Contracting officers shall evaluate quotations inclusive of transportation charges from the shipping point of the supplier to the delivery destination.

13.108 Legal effect of quotations.

(a) A quotation is not an offer and, consequently, cannot be accepted by the Government to form a binding contract (see 15.402(e)). Therefore, issuance by the Government of an order for supplies or services in response to a supplier's quotation does not establish a contract. The order is an offer by the Government to the supplier to buy certain supplies or services upon specified terms and conditions. A contract comes into being when the supplier accepts the offer.

(b) When appropriate, the contracting officer may request the supplier to indicate acceptance of an order by notification to the Government, preferably in writing. In other circumstances, the supplier may indicate acceptance by furnishing the supplies or services ordered or by proceeding with the work to the point where substantial performance has occurred.

(c) If the Government issues an order resulting from a quotation, the Government may (by written notice to the supplier, at any time before acceptance occurs) withdraw, amend, or cancel its offer. (See 13.504 for procedures on termination or cancellation of purchase orders.)

13.109 Agency use of indefinite delivery contracts.

Small purchase costs and processing time may be reduced through the use of indefinite delivery contracts (see Subpart 16.5) that permit delivery orders to be placed by several contracting or ordering offices in one or more executive agencies. Therefore, contracting offices are encouraged to seek opportunities to cooperate with each other to achieve small purchase efficiency and economy through the use of indefinite delivery contracts.

SUBPART 13.2—BLANKET PURCHASE AGREEMENTS

13.201 General.

(a) A blanket purchase agreement (BPA) is a simplified method of filling anticipated repetitive needs for supplies or services by establishing "charge accounts" with qualified sources of supply (see Subpart 16.7 for additional coverage of agreements).

(b) BPA's are designed to reduce administrative costs in accomplishing small purchases by eliminating the need for issuing individual purchase documents.

(c) BPA's should be established at the appropriate level responsible for providing supplies for its own operations or for other offices, installations, projects, or functions. Such levels, for example, may be organized supply points, separate independent or detached field parties, or one-person posts or activities.

(d) The use of BPA's does not exempt the agency from responsibility for keeping obligations and expenditures within available funds, but this should be done by using simplified methods and by avoiding formal fiscal recording of individual deliveries and transactions.

13.202 Reserved.

13.203 Establishment of Blanket Purchase Agreements.

13.203-1 General.

(a) The following are circumstances under which contracting officers may establish BPA's:

(1) If there is a wide variety of items in a broad class of goods (e.g., hardware) that are generally purchased but the exact items, quantities, and delivery requirements are not known in advance and may vary considerably.

(2) If there is a need to provide commercial sources of supply for one or more offices or projects in a given area that do not have or need authority to purchase otherwise.

(3) In any other case in which the writing of numerous purchase orders can be avoided through the use of this procedure.

(b) A BPA may be established without a purchase requisition or a commitment of funds.

(c) To reduce the possibility of dormant funds and to increase flexibility in the use of any given BPA, contracting officers generally should not cite accounting and appropriation data in BPA's (but see 13.204(e)(4)).

(d) BPA's should be made with firms from which numerous individual purchases will likely be made in a given period. For example, if past experience has shown that certain firms are dependable and consistently lower in price than other firms dealing in the same commodities, and if numerous small purchases are usually made from such suppliers, it would be advantageous to establish BPA's with those firms.

(e) To the extent practical, BPA's for items of the same type should be placed concurrently with more than one supplier. All competitive sources should be given an equal opportunity to furnish supplies or services under BPA's.

(f) BPA's may also be established with Federal Supply Schedule contractors (see Subpart 8.4) and ADTS Schedule contractors (see Part 39), if not inconsistent with the terms of the applicable schedule contract.

(g) If it is determined that BPA's would be advantageous, suppliers should be contacted to make the necessary arrangements for securing maximum discounts, documenting the individual purchase transactions, periodic billing, and other necessary details.

(h) A BPA may be limited to furnishing individual items or commodity groups or classes, or it may be unlimited for all items or services that the source of supply is in a position to furnish.

(i) BPA's shall be prepared and issued on any agency-authorized purchase order form.

(j) BPA's shall contain the following terms and conditions:

(1) *Description of agreement.* A statement that the supplier shall furnish supplies or services, described in general terms, if and when requested by the contracting officer (or the authorized representative of the contracting officer) during a specified period and within a stipulated aggregate amount, if any.

(2) *Extent of obligation.* A statement that the Government is obligated only to the extent of authorized purchases actually made under the BPA.

(3) *Pricing.* A statement that the prices to the Government shall be as low or lower than those charged the supplier's most favored customer for comparable quantities under similar terms and conditions, in addition to any discounts for prompt payment.

(4) *Purchase limitation.* A statement that specifies the dollar limitation for each individual purchase under the BPA (see 13.204(b)).

(5) *Notice of individuals authorized to purchase under the BPA and dollar limitations.* A statement that a list of names of individuals authorized to purchase under the BPA, identified by organizational component, and the dollar limitation per purchase for each individual shall be furnished to the supplier by the contracting officer.

(6) *Delivery tickets.* A requirement that all shipments under the agreement, except subscriptions and other charges for newspapers, magazines, or other periodicals, shall be accompanied by delivery tickets or sales slips which shall contain the following minimum information:

(i) Name of supplier.

(ii) BPA number.

(iii) Date of purchase.

(iv) Purchase number.

(v) Itemized list of supplies or services furnished.

(vi) Quantity, unit price, and extension of each item, less applicable discounts (unit prices and extensions need not be shown when incompatible with the use of automated systems; *provided*, that the invoice is itemized to show this information).

(vii) Date of delivery or shipment.

(7) *Invoices.* One of the following statements (except that statement (iii) should not be used if the accumulation of the individual invoices by the Government materially increases the administrative costs of this purchase method):

(i) A summary invoice shall be submitted at least monthly or upon expiration of this BPA, whichever occurs first, for all deliveries made during a billing period, identifying the delivery tickets covered therein, stating their total dollar value, and supported by receipted copies of the delivery tickets.

(ii) An itemized invoice shall be submitted at least monthly or upon expiration of this BPA, whichever occurs first, for all deliveries made during a billing period and for which payment has not been received. These invoices need not be supported by copies of delivery tickets.

(iii) When billing procedures provide for an individual invoice for each delivery, these invoices shall be accumulated; *provided*, that—

(A) A consolidated payment will be made for each specified period; and

(B) The period of any discounts will commence on the final date of the billing period or on the date of receipt of invoices for all deliveries accepted during the billing period, whichever is later.

(iv) An invoice for subscriptions or other charges for newspapers, magazines, or other periodicals shall show the starting and ending dates and shall state either that ordered subscriptions have been placed in effect or will be placed in effect upon receipt of payment.

(k) BPA's in which the fast payment procedure is used shall include the requirements stated under 13.303(b).

13.203-2 Clauses.

(a) The contracting officer shall insert in each BPA the clauses prescribed elsewhere in the FAR that are required for or applicable to the particular BPA.

(b) Unless a clause prescription specifies otherwise, (e.g., see 22.305(a)(1), 22.605(a)(5), or 22.1006), if the prescription includes a dollar threshold, the amount to be compared to that threshold is that of any particular order under the BPA.

13.204 Purchases under Blanket Purchase Agreements.

(a) The use of a BPA does not authorize purchases that are not otherwise authorized by law or regulation. For example, the blanket purchase agreement, being a method of simplifying the making of individual small purchases, shall not be used to avoid the small purchase limitation.

(b) Unless otherwise specified in agency regulations, individual purchases under BPA's shall not exceed the dollar limitation for small purchases (see 13.103).

(c) The existence of a BPA does not justify sole source purchasing or avoiding small business-small purchase set-asides. The requirements of 13.106 and 13.107 also apply to each order under a BPA.

(d) If there is an insufficient number of BPA's to ensure adequate competition for a particular purchase, the contracting officer shall—

(1) Solicit quotations from other sources and make the purchase as appropriate; and

(2) Establish additional BPA's to facilitate future purchases if (i) recurring requirements for the same or similar items or services seem likely, (ii) qualified sources are willing to accept BPA's, and (iii) it is otherwise practical to do so.

(e) Documentation of purchases under BPA's shall be limited to essential information and forms, as follows:

(1) Purchases under BPA's generally should be made orally, but a purchase document may be issued if written communications are necessary to ensure that the vendor and the purchaser agree concerning the transaction.

(2) If a purchase document is not issued, the essential elements (e.g., date, vendor, items or services, price, delivery date) shall be recorded on the purchase requisition, in an informal memorandum, or on a form developed locally for the purpose.

(3) If a purchase document is issued, informal correspondence, an authorized purchase form, or a form developed locally for the purpose, may be used.

(4) Documentation of individual purchases under BPA's shall also cite the pertinent purchase requisitions and the accounting and appropriation data.

(5) When delivery is made or the services are performed, the vendor's sales document, delivery document, or invoice may (if it reflects the essential elements) be used for the purpose of recording receipt and acceptance of the items or services. However, if the purchase is assigned to another activity for administration, receipt and acceptance of supplies or services shall be documented by signature and date on the agency specified form by the authorized Government representative

after verification and notation of any exceptions.

13.205 Review procedures.

(a) The contracting officer placing orders under a BPA, or the designated representative of the contracting officer, shall review the BPA files at least semiannually to ensure that authorized procedures are being followed.

(b) The contracting officer that entered into the BPA shall—

(1) Ensure that each BPA is reviewed at least annually and, if necessary, updated at that time; and

(2) Maintain awareness of changes in market conditions, sources of supply, and other pertinent factors that may warrant making new arrangements with different suppliers or modifying existing arrangements.

(c) If an office other than the purchasing office that established a BPA is authorized to make purchases under that BPA, the agency that has jurisdiction over the office authorized to make the purchases shall ensure that the procedures in paragraph (a) above are being followed.

13.206 Completion of Blanket Purchase Agreements.

An individual BPA is considered complete when the purchases under it equal its total dollar limitation, if any, or when its stated time period expires.

SUBPART 13.3—FAST PAYMENT PROCEDURE

13.301 General.

The fast payment procedure is designed to reduce lead time to consignees and to improve supplier relations by expediting payment for small purchases. The procedure provides for payment for supplies based on the contractor's submission of an invoice that constitutes a representation that—

(a) The supplies have been delivered to a post office, common carrier, or point of first receipt by the Government; and

(b) The contractor agrees to replace, repair, or correct supplies not received at destination, damaged in transit, or not conforming to purchase agreements.

13.302 Conditions for use.

If the conditions in paragraphs 13.302(a) through (c) are present, the fast payment procedure should be used to the maximum extent possible, provided the use is consistent with the other conditions of the purchase. Use of the fast payment procedure would not be indicated, for example, for small purchases by an activity if material being purchased is destined for use at that activity and contract administration will be performed by the purchasing office at that activity. The conditions for use of the fast payment procedure are as follows:

(a) Individual orders do not exceed $10,000 for civilian agencies and $25,000 for DOD, except that executive agencies may establish higher dollar limitations for specified activities or items.

(b) Title to the supplies will vest in the Government (1) upon delivery to a post office or common carrier for mailing or shipment to destination, or (2) upon receipt by the Government if the shipment is by means other than Postal Service or common carrier.

(c) The supplier agrees to replace, repair, or correct supplies not received at destination, damaged in transit, or not conforming to purchase requirements.

13.303 Preparation and execution of orders.

(a) Orders incorporating the fast payment procedure shall be issued on Optional Form 347, Order for Supplies or Services, or other agency authorized purchase order form (but see 13.204(e) for purchases under BPA's). Orders may be either priced or unpriced.

(b) Contracts, purchase orders, or BPA's using the fast payment procedure shall include the following:

(1) A requirement that the supplies be shipped transportation or postage prepaid.

(2) A requirement that invoices be submitted directly to the finance or other office designated in the order, or in the case of unpriced purchase orders, to the contracting officer (see 13.502(c)).

(3) The following statement on consignee's copy: *Consignee's Notification to Purchasing Activity of Nonreceipt, Damage, or Nonconformance.* The consignee shall notify the purchasing office promptly after the specified date of delivery of supplies not received, damaged in transit, or not conforming to specifications of the purchase order. Unless extenuating circumstances exist, the notification should be made not later than 60 days after the specified date of delivery.

(4) A requirement that the contractor mark outer shipping containers "FAST PAY".

13.304 Responsibility for collection of debts.

The contracting officer shall be primarily responsible for collecting debts resulting from failure of contractors to properly replace, repair, or correct supplies lost, damaged, or not conforming to purchase requirements (see 32.605(b) and 32.606).

13.305 Contract clause.

The contracting officer shall insert the clause at 52.213-1, Fast Payment Procedure, in solicitations and contracts when the conditions in 13.302 are applicable and it is intended that the fast payment procedure be used in the contract (in the case of BPA's, the contracting officer may elect to insert the clause either in the BPA or in orders under the BPA).

SUBPART 13.4—IMPREST FUND

13.401 Definition.

"Imprest fund," as used in this subpart, means a cash fund of a fixed amount established by an advance of funds, without charge to an appropriation, from an agency finance or disbursing officer to a duly appointed cashier, for disbursement as needed from time to time in making payment in cash for relatively small purchases.

13.402 General.

This subpart prescribes policies and procedures for using imprest funds to make small purchases of supplies or services. Related policies and regulations concerning the establishment of and accounting for imprest funds, including the responsibilities of designated cashiers and alternates, are contained in Part IV of the Treasury Fiscal Requirements Manual for Guidance of Departments and Agencies, Title 7 of the General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies, and the agency implementing regulations. Agencies shall also be guided by the Manual of Procedures and Instructions for Cashiers, issued by the Bureau of Financial Operations, Fiscal Service, Department of the Treasury.

13.403 Agency responsibilities.

Each agency using imprest funds shall—

(a) Periodically review and determine whether there is continuing need for each fund established, and that amounts of those funds are not in excess of actual needs;

(b) Take prompt action to have imprest funds adjusted to a level commensurate with demonstrated needs whenever circumstances warrant such action; and

(c) Develop and issue appropriate implementing regulations. These regulations shall include (but are not limited to) procedures covering—

(1) Designation of personnel authorized to make purchases using imprest funds; and

(2) Documentation of purchases using imprest funds, including documentation of (i) receipt and acceptance of supplies and services by the Government, (ii) receipt of cash payments by the suppliers, and (iii) cash advances and reimbursements.

13.404 Conditions for use.

Imprest funds may be used for small purchases when—

(a) The transaction does not exceed $150 ($300 under emergency conditions) or such other limits as have been approved by the Department of the Treasury for an individual agency;

(b) The use of imprest funds is considered to be advantageous to the Government; and

(c) The use of imprest funds for the transaction otherwise complies with any additional conditions established by agencies and with the policies and regulations referenced in 13.402.

13.405 Procedures.

(a) Each purchase using imprest funds shall be based upon an authorized purchase requisition.

(b) Normally, orders to suppliers should be placed orally and without soliciting competition if prices are considered reasonable.

(c) Purchases shall be distributed equitably among qualified suppliers (see 13.105).

(d) Prompt payment discounts shall be solicited.

(e) Any agency-authorized purchase order form or Standard Form 1165, Receipt for Cash-Subvoucher, may be used if a written order is considered necessary; e.g., if required by the supplier for discount, tax exemption, or other reasons. If a purchase order is used for this purpose, it shall be endorsed "Payment to be made from Imprest Fund."

(f) The individual authorized to make purchases using imprest funds shall—

(1) Furnish to the imprest fund cashier a copy of the purchase requisition annotated to reflect (i) that an imprest fund purchase has been made, (ii) the unit prices and extensions, (iii) the supplier's name and address, and (iv) the date of anticipated delivery; and

(2) Require the supplier to include with delivery of the supplies an invoice, packing slip, or other sales instrument giving (i) the supplier's name and address, (ii) list and quantity of items, (iii) unit prices and extensions, and (iv) cash discount, if any.

SUBPART 13.5—PURCHASE ORDERS

13.501 General.

(a) Except as provided under the unpriced purchase order method (see 13.502), purchase orders (1) shall be issued on a fixed-price basis, and (2) shall not contain economic price adjustment or redetermination clauses.

(b) Purchase orders shall include any trade and prompt payment discounts that are offered, consistent with the applicable principles in 14.407-3.

(c) Purchase orders shall specify the quantity of supplies or services ordered (but see Subpart 12.4).

(d) Inspections under small purchases shall be as prescribed in Part 46. Orders generally shall provide that inspection and acceptance will be at destination and source inspection should be specified only if required by Part 46. If inspection and acceptance are to be performed at destination, advance copies of the purchase order shall be furnished to consignee(s) for material receipt purposes. Receiving reports shall be accomplished immediately upon receipt and acceptance of material.

(e) F.o.b. destination shall be specified for supplies to be delivered within the United States, except Alaska and Hawaii, unless there are valid reasons to the contrary.

(f) Each purchase order shall contain a definite calendar date by which delivery of supplies or performance of services are required.

(g) The contracting officer's signature on purchase orders shall be in accordance with 4.201. Facsimile signature may be used in the production of purchase orders by automated methods.

(h) Distribution of copies of purchase orders and related forms shall be limited to those copies required for essential administration and transmission of contractual information.

13.502 Unpriced purchase orders.

(a) An unpriced purchase order is an order for supplies or services, the price of which is not established at the time of issuance of the order.

(b) An unpriced purchase order may be used only when—

(1) It is anticipated that the transaction will not exceed the small purchase limit;

(2) It is impractical to obtain pricing in advance of issuance of the purchase order; and

(3) The purchase is for—

(i) Repairs to equipment requiring disassembly to determine the nature and extent of repairs;

(ii) Sole source material for which cost cannot be readily established; or

(iii) Supplies or services for which prices are known to be competitive but exact prices are not known (e.g., miscellaneous repair parts, maintenance agreements).

(c) Unpriced purchase orders may be issued by using written purchase orders or written telecommunications (see 13.506). A realistic monetary limitation, either for each line item or for the total order, shall be placed on each unpriced purchase order (see 13.507(d)). The monetary limitation shall be an obligation subject to adjustment when the firm price is established. The contracting office shall follow-up each order to ensure timely pricing. The contracting officer or the contracting officer's designated representative shall review the invoice price and, if reasonable (see 13.106(c)), process the invoice for payment.

13.503 Obtaining contractor acceptance and modifying purchase orders.

(a) When it is desired to consummate a binding contract between the parties before the contractor undertakes performance, the contracting officer shall require written acceptance of the purchase order by the contractor.

(b) A purchase order may be modified by use of (1) Standard Form 30, Amendment of Solicitation/Modification of Contract; (2) an agency-designed form or an agency-approved automated format; or (3) if not prohibited by agency regulations, a purchase order form.

(c) Each purchase order modification shall identify the order it modifies and shall contain an appropriate modification number.

(d) Contracting officers need not obtain a contractor's written acceptance of a purchase order modification, unless the written acceptance is—

(1) Determined by the contracting officer to be necessary to ensure the contractor's compliance with the purchase order as revised; or

(2) Required by agency regulations.

13.504 Termination or cancellation of purchase orders.

(a) If a purchase order that has been accepted in writing by the contractor is to be terminated, the contracting officer shall process the termination action as prescribed by Part 49.

(b) If a purchase order that has not been accepted in writing by the contractor is to be cancelled, the contracting officer shall notify the contractor in writing that the purchase order has been cancelled, request the contractor's written acceptance of the cancellation, and proceed as follows:

(1) If the contractor accepts the cancellation and does not claim that costs were incurred as a result of beginning performance under the purchase order, no further action is

required; i.e., the purchase order shall be considered cancelled.

(2) If the contractor does not accept the cancellation or claims that costs were incurred as a result of beginning performance under the purchase order, the contracting officer shall process the termination action as prescribed by Part 49.

13.505 Purchase order and related forms.

13.505-1 Optional Form (OF) 347, Order for Supplies or Services, and Optional Form 348, Order for Supplies or Services Schedule-Continuation.

(a) *General.* (1) Optional Form 347 (illustrated in 53.302-347) and Optional Form 348 (illustrated in 53.302-348) are multipurpose forms designed for the following uses:

(i) Negotiated purchases of supplies or services not in excess of the small purchase limit.

(ii) A delivery order for ordering or scheduling deliveries against established contracts or from Government sources of supply.

(iii) A receiving and inspection report.

(iv) An invoice.

(2) Optional Forms 347 and 348, may be used when the agency concerned considers it economical and efficient to do so (also see 13.505-2).

(b) *Clauses.* (1) Clauses generally suitable for most small purchases are incorporated by reference on the reverse of Optional Form 347, (but see 13.507).

(2) Agencies may add (i) other clauses prescribed by the FAR, as appropriate, and (ii) agency clauses, if they do not conflict with clauses prescribed by the FAR and are designated as agency clauses.

13.505-2 Agency order forms in lieu of Optional Forms 347 and 348.

(a) Order forms used in lieu of Optional Forms 347 and 348 shall conform insofar as practicable with the forms illustrated in 53.302-347 and 53.302-348.

(b) Agencies using agency order forms in lieu of Optional Form 347 may print on those forms the clauses they consider to be generally suitable for most of their small purchases. The clauses, however, (1) should include the clauses incorporated by reference on the reverse of Optional Form 347, (2) may include clauses not listed on the reverse of Optional Form 347 that are prescribed by the FAR, and (3) may include agency clauses, if they do not conflict with clauses prescribed by the FAR and are designated as agency clauses (see 13.507).

13.505-3 Standard Form 44, Purchase Order-Invoice-Voucher.

(a) Standard Form 44, Purchase Order-Invoice-Voucher (illustrated in 53.301-44) is a pocket-size purchase order form designed primarily for on-the-spot, over-the-counter purchases of supplies and nonpersonal services while away from the purchasing office or at isolated activities. It is a multipurpose form that can be used as a purchase order, receiving report, invoice, and public voucher.

(b) Standard Form 44 may be used if all of the following conditions are satisfied:

(1) Except for purchases made under public exigency circumstances, the amount of the purchase is not over $2,500. Agencies may establish higher dollar limitations for specific activities or items.

(2) The supplies or services are immediately available.

(3) One delivery and one payment will be made.

(4) Its use is determined to be more economical and efficient than use of other small purchase methods.

(c) General procedural instructions governing the use of Standard Form 44 are printed on the form and on the inside front cover of each book of forms.

(d) Agencies shall provide adequate safeguards regarding the control of forms and accounting for purchases.

13.506 Purchase orders via written telecommunications.

(a) A written telecommunicated purchase order is an order for supplies or services that is electrically transmitted to a supplier and is not signed by the contracting officer.

(b) A written telecommunicated purchase order may be used only when all of the following conditions are present:

(1) Its use is more advantageous to the Government than any other small purchase technique.

(2) An unsigned transmitted order is acceptable to the supplier.

(3) The order is approved by the contracting officer before its transmission.

(4) The order does not require written acceptance by the supplier.

(5) The purchasing office retains all contract administration functions.

(c) When a written telecommunicated purchase order is used—

(1) Clauses appropriate to the purchase order shall be incorporated by reference in the transmitted order;

(2) Administrative information that is not needed by the supplier should not be transmitted but should be placed only on copies intended for internal distribution;

(3) The same distribution shall be made of the transmitted order as is made of written purchase orders; and

(4) No purchase order form shall be issued.

(d) A written telecommunicated purchase order may be unpriced if it meets the conditions in 13.502.

13.507 Clauses.

(a) Except as provided in paragraph (b) below, each purchase order (and each purchase order modification (see 13.503)) shall incorporate all clauses required for or applicable to the particular acquisition. The clauses listed on Optional Form 347, are not necessarily all that are required.

(b) Since there is, for all practical purposes, simultaneous placing of purchase orders on Standard Form 44 and delivery of the items ordered, clauses are not required for purchases using this form.

(c) The contracting officer shall insert the clause at 52.213-2, Invoices, in purchase orders that authorize advance payments (see 31 U.S.C. 530) for subscriptions or other charges for newspapers, magazines, periodicals, or other publications (i.e., any publication printed, microfilmed, photocopied, or magnetically or otherwise recorded for auditory or visual usage).

(d) The contracting officer shall insert the clause at 52.213-3, Notice to Supplier, in unpriced purchase orders.

PART 14—FORMAL ADVERTISING

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

14.000 Scope of part.

This part prescribes (a) the basic requirements of contracting for supplies and services (including construction) by formal advertising, (b) the information to be included in the solicitation (invitation for bids), (c) procedures concerning the submission of bids, (d) requirements for opening and evaluating bids and awarding contracts, and (e) procedures for two-step formal advertising.

SUBPART 14.1—USE OF FORMAL ADVERTISING

14.101 Elements of formal advertising.

Formal advertising is a method of contracting that employs competitive bids, public opening of bids, and awards. The following steps are involved:

(a) *Preparation of invitations for bids.* Invitations must describe the requirements of the Government clearly, accurately, and completely. Unnecessarily restrictive specifications or requirements that might unduly limit the number of bidders must be avoided. The invitation includes all documents (whether attached or incorporated by reference) furnished prospective bidders for the purpose of bidding.

(b) *Publicizing the invitation for bids.* Invitations must be publicized through distribution to prospective bidders, posting in public places, and such other means as may be appropriate. Publicizing must occur a sufficient time before public opening of bids to enable prospective bidders to prepare and submit bids.

(c) *Submission of bids.* Bidders must submit sealed bids to be opened at the time and place stated in the solicitation for the public opening of bids.

(d) *Contract award.* After bids are publicly opened, an award will be made to that responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Government, price and other factors considered.

14.102 (Reserved)

14.103 Policy.

14.103-1 General.

(a) Contracts shall be awarded in accordance with formal advertising procedures whenever feasible and practicable. Except where negotiation is specifically required by this regulation (e.g., foreign purchases by overseas activities), this rule shall be followed even though the existing conditions would satisfy one or more of the circumstances permitting negotiation (see Subpart 15.2).

(b) Bids shall be solicited from all qualified sources deemed necessary by the contracting officer to assure full and free competition consistent with the acquisition of the required supplies or services.

(c) Current lists of bidders shall be maintained in accordance with 14.205.

(d) Formal advertising shall be used for classified acquisitions (see 4.401) if its use does not violate agency security requirements.

(e) The policy for pricing modifications of formally advertised contracts appears in 15.804-2.

14.103-2 Limitations.

No awards shall be made as a result of formal advertising unless—

(a) Bids have been solicited as required by Subpart 14.2;

(b) Bids have been submitted as required by Subpart 14.3;

(c) Any business clearances and approvals that are required by agency procedures have been obtained; and

(d) An award is made to the responsible bidder (see 9.1) whose bid is responsive to the terms of the invitation for bids and is most advantageous to the Government, price and other factors considered, as provided in Subpart 14.4.

14.104 Types of contracts.

Firm-fixed-price contracts shall be used when the method of contracting is formal advertising, except that fixed-price contracts with economic price adjustment clauses may be used if authorized in accordance with 16.203 when some flexibility is necessary and feasible. Such clauses must afford all bidders an equal opportunity to bid.

14.105 Solicitations for informational or planning purposes.

See 15.405.

SUBPART 14.2—SOLICITATION OF BIDS

14.201 Preparation of invitation for bids.

14.201-1 Uniform contract format.

(a) Contracting officers shall prepare invitations for bids and contracts using the uniform contract format outlined in Table 14-1 to the maximum practicable extent. The use of the format facilitates preparation of the solicitation and contract as well as reference to, and use of, those documents by bidders and contractors. It need not be used for acquisition of the following:

(1) Construction (see Part 36).

(2) Shipbuilding (including design, construction, and conversion), ship overhaul, and ship repair.

(3) Subsistence items.

(4) Supplies or services requiring special contract forms prescribed elsewhere in this regulation that are inconsistent with the uniform contract format.

(b) Information suitable for inclusion in invitations for bids under the uniform contract format shall also be included in invitations for bids not subject to that format if applicable.

(c) Solicitations to which the uniform contract format applies shall include Parts I, II, III, and IV. If any section of the uniform contract format does not apply, the contracting officer should so mark that section in the solicitation. Upon award, the contracting officer shall not physically include Part IV in the resulting contract, but shall retain it in the contract file. Award by acceptance of a bid on the award portion of Standard Form 33, Solicitation, Offer and Award (SF 33), or Standard Form 26, Award/Contract (SF 26), incorporates Section K, Representations, certifications, and other statements of bidders, in the resultant contract even though not physically attached.

TABLE 14-1

Uniform Contract Format

Section	Title
	Part I—The Schedule
A	Solicitation/contract form
B	Supplies or services and prices
C	Description/specifications

Uniform Contract Format

Section	Title
	Part IV—Representations and Instructions
K	Representations, certifications, and other statements of bidders
L	Instructions, conditions, and notices to bidders
M	Evaluation factors for award

14.201-2 Part I—The Schedule.

The contracting officer shall prepare the Schedule as follows:

(a) *Section A, Solicitation/contract form.* (1) Prepare the invitation for bids on SF 33, unless otherwise permitted by this regulation. The SF 33 is the first page of the solicitation and includes Section A of the uniform contract format.

(2) When the SF 33 is not used, include the following on the first page of the invitation for bids:

(i) Name, address, and location of issuing activity, including room and building where bids must be submitted.

(ii) Invitation for bids number.

(iii) Date of issuance.

(iv) Time specified for receipt of bids.

(v) Number of pages.

(vi) Requisition or other purchase authority.

(vii) Requirement for bidder to provide its name and complete address, including street, city, county, State, and ZIP code.

(viii) A statement that bidders should include in the bid the address to which payment should be mailed, if that address is different from that of the bidder.

(b) *Section B, Supplies or services and prices.* Include a brief description of the supplies or services; e.g., item number, national stock number/part number if applicable, title or name identifying the supplies or services, and quantities (see Part 10, Specifications, Standards, and Other Product Descriptions). The SF 33 may be supplemented as necessary by the Standard Form 36 (SF 36), Continuation Sheet (53.301-36).

(c) *Section C, Description/specifications.* Include any description or specifications needed in addition to Section B to permit full and free competition (see Part 10, Specifications, Standards, and Other Product Descriptions).

(d) *Section D, Packaging and marking.* Provide packaging, packing, preservation, and marking requirements, if any (see 10.004(e)).

(e) *Section E, Inspection and acceptance.* Include inspection, acceptance, quality assurance, and reliability requirements (see Part 46, Quality Assurance).

(f) *Section F, Deliveries or performance.* Specify the requirements for time, place, and method of delivery or performance (see Part 12, Contract Delivery or Performance).

(g) *Section G, Contract administration data.* Include any required accounting and appropriation data and any required contract administration information or instructions other than those on the solicitation form.

(h) *Section H, Special contract requirements.* Include a clear statement of any special contract requirements that are not included in Section I, Contract clauses, or in other sections of the uniform contract format.

14.201-3 Part II—Contract clauses.

Section I, Contract clauses. The contracting officer shall include in this section the clauses required by law or by this regulation and any additional clauses expected to apply to any resulting contract, if these clauses are not required to be included in any other section of the uniform contract format. Clauses that are incorporated by reference shall be included in this section (see 52.102-1(c)).

14.201-4 Part III—Documents, exhibits, and other attachments.

Section J, List of documents, exhibits, and other attachments. The contracting officer shall list the title, date, and number of pages for each attached document.

14.201-5 Part IV—Representations and instructions.

The contracting officer shall prepare the representations and instructions as follows:

(a) *Section K, Representations, certifications, and other statements of bidders.* Include in this section those solicitation provisions that require representations, certifications, or the submission of other information by bidders.

(b) *Section L, Instructions, conditions, and notices to bidders.* Insert in this section solicitation provisions and other information and instructions not required elsewhere to guide bidders. Provisions that are incorporated by reference shall be included in this section (see 52.102-1(c)).

(c) *Section M, Evaluation factors for award.* Identify all factors other than the bid price that will be considered in evaluating bids and awarding the contract. See 14.407-5.

14.201-6 Solicitation provisions.

(a) The provisions prescribed in this subsection are limited to subjects that are general in nature, do not come under

other subject areas of the FAR, and pertain to the preparation and submission of bids.

(b) The contracting officer shall insert in all invitations for bids the provisions at—

(1) 52.214-1, Solicitation Definitions—Formal Advertising;

(2) 52.214-2, Type of Business Organization—Formal Advertising;

(3) 52.214-3, Acknowledgment of Amendments to Invitations for Bids; and

(4) 52.214-4, False Statements in Bids.

(c) The contracting officer shall insert the following provisions in invitations for bids unless they are for construction that is not estimated to exceed $10,000. The use of these provisions in invitations for bids for construction that is not estimated to exceed $10,000 is optional:

(1) 52.214-5, Submission of Bids.

(2) 52.214-6, Explanation to Prospective Bidders.

(3) 52.214-7, Late Submissions, Modifications, and Withdrawals of Bids.

(d) The contracting officer shall insert in invitations for bids, unless they are for construction that is not estimated to exceed $10,000, the provision at 52.214-8, Parent Company and Identifying Data.

(e) The contracting officer shall insert in invitations for bids, except those for construction, the provisions at—

(1) 52.214-9, Failure to Submit Bid; and

(2) 52.214-10, Contract Award—Formal Advertising.

(f) The contracting officer shall insert in invitations for bids to which the uniform contract format applies, the provisions at—

(1) 52.214-11, Order of Precedence—Formal Advertising; and

(2) 52.214-12, Preparation of Bids.

(g) The contracting officer shall insert the provision at 52.214-13, Telegraphic Bids, in invitations for bids if the contracting officer decides to authorize telegraphic bids.

(h) The contracting officer shall insert the provision at 52.214-14, Place of Performance—Formal Advertising, in invitations for bids except those in which the place of performance is specified by the Government.

(i) The contracting officer shall insert the provision at 52.214-15, Period for Acceptance of Bids, in invitations for bids (IFB's) that are not issued on SF 33 except IFB's (1) for construction work or (2) in which the Government specifies a minimum acceptance period.

(j) The contracting officer shall insert the provision at 52.214-16, Minimum Bid Acceptance Period, in invitations for bids, except for construction, if the contracting officer determines that a minimum acceptance period must be specified.

(k) The contracting officer shall insert the provision at 52.214-17, Affiliated Bidders, in invitations for bids if the contracting officer determines that disclosure of affiliated bidders is necessary to prevent practices prejudicial to fair and open competition, such as improper multiple bidding.

(l) The contracting officer shall insert the provision at 52.214-18, Preparation of Bids—Construction, in invitations for bids for construction work estimated to exceed $10,000. The use of this provision in invitations for bids for construction work that is not estimated to exceed $10,000 is optional.

(m) The contracting officer shall insert the provision at 52.214-19, Contract Award—Formal Advertising—Construction, in all invitations for bids for construction work that is estimated to exceed $10,000.

(n) Use of the provision at 52.215-4, Notice of Possible Standardization, may be appropriate in invitations for bids involving supplies that are likely to become standardized. See 15.213(c)(2) and the prescription in 15.407(b).

(o) (1) The contracting officer shall insert the provision at 52.214-20, Bid Samples, in invitations for bids if bid samples are required.

(2) If it appears that the conditions in 14.202-4(f)(1) will apply and the contracting officer anticipates granting waivers thereunder and—

(i) If the nature of the required product *does not* necessitate limiting the grant of a waiver to a product produced at the same plant in which the product previously acquired or tested was produced, the contracting officer shall use the provision with its Alternate I; or

(ii) If the nature of the required product necessitates limiting the grant of a waiver to a product produced at the same plant in which the product previously acquired or tested was produced, the contracting officer shall use the provision with its Alternate II.

(3) See 14.202-4(f)(2) regarding waiving the requirement for all bidders.

(p) (1) The contracting officer shall insert the provision at 52.214-21, Descriptive Literature, in invitations for bids if (i) descriptive literature is required to evaluate the technical acceptability of an offered product and (ii) the required information will not be readily available unless it is submitted by bidders.

(2) Use the basic clause with its Alternate I if the possibility exists that the contracting officer may waive the requirement for furnishing descriptive literature for a bidder offering a previously supplied product that meets specification requirements of the current solicitation.

(3) See 14.202-5(e)(2) regarding waiving the requirement for all bidders.

(q) The contracting officer shall insert the provision at 52.214-22, Evaluation of Bids for Multiple Awards, in invitations for bids if the contracting officer determines that multiple awards might be made if doing so is economically advantageous to the Government.

(r) The contracting officer shall insert the provision at 52.214-23, Late Submissions, Modifications, and Withdrawals of Technical Proposals under Two-Step Formal Advertising, in solicitations for technical proposals in step one of two-step formal advertising.

(s) The contracting officer shall insert the provision at 52.214-24, Multiple Technical Proposals, in solicitations for technical proposals in step one of two-step formal advertising if the contracting officer permits the submission of multiple technical proposals.

(t) The contracting officer shall insert the provision at 52.214-25, Step Two of Two-Step Formal Advertising, in invitations for bids issued under step two of two-step formal advertising.

14.201-7 Contract clauses.

(a) When contracting by formal advertising, the contracting officer shall insert the clause at 52.214-26, Audit—Formal Advertising, in solicitations and contracts if the contract amount is expected to exceed $100,000.

(b) (1) When contracting by formal advertising, the contracting officer shall insert the clause at 52.214-27, Price Reduction for Defective Cost or Pricing Data—Modifications—Formal Advertising, in solicitations and contracts if the contract amount is expected to exceed $500,000.

(2) In exceptional cases, the head of the contracting activity may waive the requirement for inclusion of the clause in a contract with a foreign government or agency of that government. The authorizations for the waiver and the reasons for granting it shall be in writing.

(c) (1) When contracting by formal advertising, the contracting officer shall insert the clause at 52.214-28, Subcontractor Cost or Pricing Data—Modifications—Formal Advertising, in solicitations and contracts if the contract amount is expected to exceed $500,000.

(2) In exceptional cases, the head of the contracting activity may waive the requirement for inclusion of the clause in a contract with a foreign government or agency of that government. The authorizations for the waiver and the reasons for granting it shall be in writing.

14.202 General Rules for solicitation of bids.

14.202-1 Bidding time.

(a) *Policy.* A reasonable time for prospective bidders to prepare and submit bids shall be allowed in all invitations, consistent with the needs of the Government. A bidding time (i.e., the time between issuance of the solicitation and opening of bids) of at least 30 calendar days shall be provided, unless the contracting officer determines that a shorter period is reasonable (or is both reasonable and necessary to satisy an urgent requirement). For construction contracts see 36.303(a).

(b) *Factors to be considered.* Because of unduly limited bidding time, some potential sources may be precluded from bidding and others may be forced to include amounts for contingencies that, with additional time, could be eliminated. To avoid unduly restricting competition or paying higher-than-necessary prices, consideration shall be given to such factors as the following in establishing a reasonable bidding time: (1) degree of urgency; (2) complexity of requirement; (3) anticipated extent of subcontracting; (4) whether use was made of preinvitation notices; (5) geographic distribution of bidders; and (6) normal mailing time for both invitations and bids.

14.202-2 Telegraphic bids.

(a) Telegraphic bids and mailgrams shall be authorized only when—

(1) The date for the opening of bids will not allow bidders sufficient time to submit bids on the prescribed forms; or

(2) Prices are subject to frequent changes.

(b) If telegraphic bids are to be authorized, see 14.201-6(g). Unauthorized telegraphic bids shall not be considered (see 14.301(b)).

14.202-3 Bid envelopes.

(a) Postage or envelopes bearing "Postage and Fees Paid" indicia shall not be distributed with the invitation for bids or otherwise supplied to prospective bidders.

(b) To provide for ready identification and proper handling of bids, Optional Form 17, Sealed Bid Label, may be furnished with each bid set. The form may be obtained from the General Services Administration (see 53.107).

14.202-4 Bid samples.

(a) *Definition.* "Bid sample" means a sample to be furnished by a bidder to show the characteristics of the product offered in a bid.

(b) *Policy.*

(1) Bidders shall not be required to furnish bid samples unless there are characteristics of the product that cannot be described adequately in the specification or purchase description.

(2) Bid samples will be used only to determine the responsiveness of the bid and will not be used to determine a bidder's ability to produce the required items.

(3) Bid samples may be examined for any required characteristic, whether or not such characteristic is adequately described in the specification, if listed in accordance with subdivision (e)(1)(ii) below.

(4) Bids will be rejected as nonresponsive if the sample fails to conform to each of the characteristics listed in the invitation.

(c) *When to use.* The use of bid samples would be appropriate for products that must be suitable from the standpoint of balance, facility of use, general "feel," color, pattern, or other characteristics that cannot be described adequately in the specification. However, when more than a minor portion of the characteristics of the product cannot be adequately described in the specification, products should be acquired by two-step formal advertising or negotiation, as appropriate.

(d) *Justification.* The reasons why acceptable products cannot be acquired without the submission of bid samples shall be set forth in the contract file, except where the submission is required by the formal specifications (Federal, Military, or other) applicable to the acquisition.

(e) *Requirements for samples in invitations for bids.* (1) Invitations for bids shall—

(i) State the number and, if appropriate, the size of the samples to be submitted and otherwise fully describe the samples required; and

(ii) List all the characteristics for which the samples will be examined.

(2) If bid samples are required, see 14.201-6(o).

(f) *Waiver of requirement for bid samples.* (1) The requirement for furnishing bid samples may be waived when a bidder offers a product previously or currently being contracted for or tested by the Government and found to comply with specification requirements conforming in every material respect with those in the current invitation for bids. When the requirement may be waived, see 14.201-6(o)(2).

(2) Where samples required by a Federal, Military, or other formal specification are not considered necessary and a waiver of the sample requirements of the specification has been authorized, a statement shall be included in the invitation that notwithstanding the requirements of the specification, samples will not be required.

(g) *Unsolicited samples.* Bid samples furnished with a bid that are not required by the invitation generally will not be considered as qualifying the bid and will be disregarded. However, the bid sample will not be disregarded if it is clear from the bid or accompanying papers that the bidder's intention was to qualify the bid. (See 14.404-2(d) if the qualification does not conform to the solicitation.)

(h) *Handling of bid samples.*

(1) Samples that are not destroyed in testing shall be returned to bidders at their request and expense, unless otherwise specified in the invitation.

(2) Disposition instructions shall be requested from bidders and samples disposed of accordingly.

(3) Samples ordinarily will be returned collect to the address from which received if disposition instructions are not received within 30 days. Small items may be returned by mail, postage prepaid.

(4) Samples that are to be retained for inspection purposes in connection with deliveries shall be transmitted to the inspecting activity concerned, with instructions to retain the sample until completion of the contract or until disposition instructions are furnished.

(5) Where samples are consumed or their usefulness is impaired by tests, they will be disposed of as scrap unless the bidder requests their return.

14.202-5 Descriptive literature.

(a) *Definition.* "Descriptive literature" means information, such as cuts, illustrations, drawings, and brochures, which shows the characteristics or construction of a product or explains its operation. It is furnished by bidders as a part of their bids to describe the products offered. The term includes only information required to determine acceptability of the product. It excludes other information such as that furnished in connection with the qualifications of a bidder or for use in operating or maintaining equipment.

(b) *Policy.* Bidders shall not be required to furnish descriptive literature unless the contracting office needs it to determine before award whether the products offered meet the specification and to establish exactly what the bidder proposes to furnish.

(c) *Justification.* The reasons why product acceptability cannot be determined without the submission of descriptive literature shall be set forth in the contract file, except when such submission is required by formal

specifications (Federal, Military, or other) applicable to the acquisition.

(d) *Requirements of invitation for bids.*

(1) The invitation shall clearly state (i) what descriptive literature is to be furnished, (ii) the purpose for which it is required, (iii) the extent to which it will be considered in the evaluation of bids, and (iv) the rules that will apply if a bidder fails to furnish the literature before bid opening or if the literature furnished does not comply with the requirements of the invitation.

(2) If bidders are to furnish descriptive literature, see 14.201-6(p).

(e) *Waiver of requirements for descriptive literature.*

(1) The requirement for furnishing descriptive literature may be waived if—

(i) The bidder states in the bid that the product being offered is the same as a product previously or currently being furnished to the contracting activity; and

(ii) The contracting officer determines that the product offered by the bidder complies with the specification requirements of the current invitation for bids. When the requirement may be waived, see 14.201-6(p)(2).

(2) When descriptive literature is not considered necessary and a waiver of literature requirements of a Federal, Military, or other formal specification has been authorized, a statement shall be included in the invitation that, notwithstanding the requirements of the specifications, descriptive literature will not be required.

(3) If the solicitation provides for a waiver, a bidder may submit a bid on the basis of either the descriptive literature to be furnished or a previously furnished product. If the bid is submitted on one basis, the bidder is precluded from having it considered on the other basis after bids are opened.

(f) *Unsolicited descriptive literature.* If descriptive literature is furnished when not required by the invitation for bids, the procedures set forth in 14.202-4(g) shall be followed.

14.202-6 Final review of invitations for bids.

Each invitation for bids shall be thoroughly reviewed before issuance to detect and correct discrepancies or ambiguities that could limit competition or result in the receipt of nonresponsive bids. Contracting officers are responsible for the reviews.

14.203 Methods of soliciting bids.

14.203-1 Mailing or delivery to prospective bidders.

Invitations for bids or pre-invitation notices shall be mailed or delivered to a sufficient number of prospective bidders to ensure adequate competition. Invitations may be provided in accordance with 5.102 to others having a legitimate interest, to the extent that invitations for bids are available. When a contracting office is located in the United States, any solicitation sent to a prospective bidder located at a foreign address shall be sent by international air mail if security classification permits.

14.203-2 Dissemination of information concerning invitations for bids.

(a) Procedures concerning display of bids in a public place, information releases to newspapers and trade journals, paid advertisements, and synopsizing in the Commerce Business Daily are set forth in 5.101 and 5.2.

(b) For procedures that apply to publishing notices in the Commerce Business Daily when it is necessary in developing cost comparisons to determine whether commercial sources are available, as prescribed by OMB Circular A-76, see 5.205(d) and 7.303(b).

14.204 Records of invitations for bids and records of bids.

(a) Each contracting office shall retain a record of each invitation that it issues and each abstract or record of bids. Contracting officers shall review and utilize the information available in connection with subsequent acquisitions of the same or similar items.

(b) The file for each invitation shall show the distribution that was made and the date the invitation was issued. The names and addresses of prospective bidders who requested the invitation and were not included on the original solicitation list shall be added to the list and made a part of the record.

14.205 Solicitation mailing lists.

14.205-1 Establishment of lists.

(a) Solicitation mailing lists shall be established by contracting activities to assure access to adequate sources of supplies and services. This rule need not be followed, however, when the requirements of the contracting office can be obtained within the local trade area through use of the small purchase procedures (see Part 13), or are nonrecurring. Lists may be established as (1) a central list for use by all contracting offices within the contracting activity or (2) local lists maintained by each contracting office.

(b) All eligible and qualified concerns that have submitted solicitation mailing list applications, or that the contracting office considers capable of filling the requirements of a particular acquisition, shall be placed on the appropriate solicitation mailing list. See also 5.403(b). Planned producers under the Industrial Preparedness Planning Program shall be included on lists for their planned items. Prospective bidders shall be notified that they have been added to solicitation mailing lists in accordance with agency procedures. The issuance of a solicitation within a reasonable time may be considered appropriate notification. Applicants shall be notified if they do not meet the criteria for placement on the list.

(c) The names of prospective bidders who are furnished invitations in response to their requests shall be added to the list of those initially mailed copies of a particular solicitation, so that they will be furnished copies of any solicitation amendments, etc. However, when it is known that the request was made by a person or an organization that is known not to be a prospective bidder, no entry shall be made on the list.

(d) (1) Standard Form 129, Solicitation Mailing List Application, shall be used for obtaining information needed to establish and maintain lists. Supplemental information, where required, may be obtained as specified in agency implementing regulations.

(2) The application shall be submitted and signed by the supplier (the manufacturer or regular dealer), as distinguished from an agent of the supplier. However, suppliers are not precluded from designating, in the Standard Form 129, their agents to receive solicitations.

(3) In order to enable suppliers to indicate readily the items on which they will generally desire to submit bids, there shall be attached to Standard Form 129 forwarded to suppliers for completion, a list of items, or item groups, or an index to such listing of the items, acquired by the contracting activity maintaining the list, which are considered applicable to the supplier's type of business.

(e) Business concerns listed on solicitation mailing lists shall be identified by size in accordance with 19.102. Size status should be established before listing a business concern on a list. Disadvantaged business concern designations shall be shown on the list whenever noted on the Standard Form 129 submitted by a particular concern.

14.205-2 Removal of names from solicitation mailing lists.

(a) The name of each concern failing to either (1) submit a bid, (2) respond to a pre-invitation notice (see 14.205-4(c)), or (3) otherwise respond to an invitation for bids may be removed from the solicitation mailing list without notice to

the concern. However, the removal shall be limited to the items involved in the invitation or notice. When a concern fails to respond to two consecutive invitations or preinvitation notices, its name shall be removed from the list to the extent indicated in this paragraph. However, in individual cases, concerns failing to respond may be retained on a list if retention is in the best interest of the Government. Both actual bids and written requests for retention on the lists shall be deemed to be "responses" to invitations for bids or preinvitation notices. If this procedure results in limited solicitation mailing lists, the contracting officer should request an explanation from the concerns that did not respond.

(b) Concerns that have been debarred from Government contracts or otherwise determined to be ineligible to receive an award shall be removed from solicitation mailing lists to the extent required by the debarment, suspension, or other determination of ineligibility.

14.205-3 Reinstatement on solicitation mailing lists.

Concerns that have been removed from solicitation mailing lists may be reinstated (a) upon written request, (b) by filing a new application on Standard Form 129, or (c) by the submission of a bid. Debarred or suspended firms shall not be reinstated during the period of a debarment or suspension.

14.205-4 Excessively long solicitation mailing lists.

(a) *General.* Solicitation mailing lists should be used to promote competition commensurate with the dollar value of the proposed contract. As much of the solicitation mailing list shall be used as is compatible with efficiency and economy in securing competition. Where the number of bidders on a mailing list is excessive in relation to a specific acquisition, the list may be reduced consistent with this paragraph and paragraphs (b) and (c) below. Nonetheless, solicitations should be furnished to others upon request, in accordance with 5.102. Also, bids shall not be disregarded merely because the bidder was not formally invited to bid.

(b) *Rotation of lists.* By using different portions of a list for separate acquisitions, solicitation mailing lists may be rotated. However, considerable judgment must be exercised in determining whether the size of the acquisiton justifies the rotation. The use of a pre-invitation notice (see paragraph (c) below), time permitting, also should be considered. In rotating a list, the interests of small businesses (see 19.202-4) and labor surplus areas (see 20.104(e) and (f)) shall be considered. Whenever a list is rotated, bids shall be solicited from (1) the previously successful bidder, (2) prospective suppliers who have been added to the solicitation mailing list since the last solicitation, and (3) concerns on the segment of the list selected for use in a particular acquisition. However, the rule does not apply when such action would be precluded by use of a total set-aside (see Parts 19 and 20).

(c) *Pre-invitation notices.* In lieu of initially forwarding complete bid sets, the contracting officer may send pre-invitation notices to concerns on the solicitation mailing list. The notice shall (1) specify the final date for receipt of requests for a complete bid set, (2) briefly describe the requirement and furnish other essential information to enable concerns to determine whether they have an interest in the invitation, and (3) notify concerns that, if no bid is to be submitted, they should advise the issuing office in writing if future invitations are desired for the type of supplies or services involved. Drawings, plans, and specifications normally will not be furnished with the pre-invitation notice. The return date of the notice must be sufficiently in advance of the mailing date of the invitation for bids to permit an accurate estimate of the number of bid sets required. Bid sets shall be sent to concerns that request them in response to the notice. This procedure is particularly suitable when invitations for bids and solicitation mailing lists are lengthy.

14.205-5 Release of solicitation mailing lists.

(a) Contracting activities shall make the central and local solicitation mailing lists established under this part available to the public in response to written requests made in accordance with agency regulations implementing Subpart 24.2.

(b) When invitations for bids for construction contracts have been issued, trade journals, prospective subcontractors, material suppliers, bidders, and others having a bona fide interest will be supplied upon request with a list of all prospective bidders furnished copies of the plans and specifications.

14.206 Small business and labor surplus area set-asides.

See parts 19 and 20.

14.207 Pre-bid conference.

A pre-bid conference may be used, generally in a complex acquisition, as a means of briefing prospective bidders and explaining complicated specifications and requirements to them as early as possible after the invitation has been issued and before the bids are opened. It shall never be used as a substitute for amending a defective or ambiguous invitation. The conference shall be conducted in accordance with the procedure prescribed in 15.409.

14.208 Amendment of invitation for bids.

(a) If it becomes necessary to make changes in quantity, specifications, delivery schedules, opening dates, etc., or to correct a defective or ambiguous invitation, such changes shall be accomplished by amendment of the invitation for bids using Standard Form 30, Amendment of Solicitation/Modification of Contract. The fact that a change was mentioned at a pre-bid conference does not relieve the necessity for issuing an amendment. Amendments shall be sent, before the time for bid opening, to everyone to whom invitations have been furnished and shall be displayed in the bid room.

(b) Before amending an invitation for bids, the period of time remaining until bid opening and the need to extend this period shall be considered. When only a short time remains before the time set for bid opening, consideration should be given to notifying bidders of an extension of time by telegrams or telephone. Such extension must be confirmed in the amendment.

(c) Any information given to a prospective bidder concerning an invitation for bids shall be furnished promptly to all other prospective bidders as an amendment to the invitation (1) if such information is necessary for bidders to submit bids or (2) if the lack of such information would be prejudicial to uninformed bidders. The information shall be furnished even though a pre-bid conference is held. No award shall be made on the invitation unless such amendment has been issued in sufficient time to permit all prospective bidders to consider such information in submitting or modifying their bids.

14.209 Cancellation of invitations before opening.

(a) The cancellation of an invitation for bids usually involves a loss of time, effort, and money spent by the Government and bidders. Invitations should not be cancelled unless cancellation is clearly in the public interest; e.g., (1) where there is no longer a requirement for the supplies or services or (2) where amendments to the invitation would be of such magnitude that a new invitation is desirable.

(b) When an invitation is cancelled, bids that have been received shall be returned unopened to the bidders and a notice of cancellation shall be sent to all prospective bidders to whom invitations were issued.

(c) The notice of cancellation shall (1) identify the invitation for bids by number and short title or subject matter, (2) briefly explain the reason the invitation is being cancelled, and (3) where appropriate, assure prospective bidders that they will be given an opportunity to bid on any resolicitation of bids or any future requirements for the type of supplies or services involved. Cancellations shall be recorded in accordance with 14.403(d).

14.210 Qualified products.

See Subpart 9.2.

14.211 Release of acquisition information.

(a) *Before synopsis or solicitation.* Information concerning proposed acquisitions shall not be released outside the Government before solicitation except when pre-invitation notices have been used in accordance with 14.205-4(c) or 36.302, or long-range acquisition estimates have been issued in accordance with 5.404. Within the Government, such information shall be restricted to those having a legitimate interest. Releases of information shall be made (1) to all prospective bidders, and (2) as nearly as possible at the same time, so that one prospective bidder shall not be given unfair advantage over another.

(b) *After synopsis or solicitation.* Discussions with prospective bidders regarding a solicitation shall be conducted and technical or other information shall be transmitted only by the contracting officer or superiors having contractual authority or by others specifically authorized. Such personnel shall not furnish any information to a prospective bidder that alone or together with other information may afford an advantage over others. However, general information that would not be prejudical to other prospective bidders may be furnished upon request; e.g., explanation of a particular contract clause or a particular condition of the schedule in the invitation for bids, and more specific information or clarifications may be furnished by amending the solicitation (see 14.208).

SUBPART 14.3—SUBMISSION OF BIDS

14.301 Responsiveness of bids.

(a) To be considered for award, a bid must comply in all material respects with the invitation for bids. Such compliance enables all bidders to stand on an equal footing and maintains the integrity of the formal advertising system.

(b) Telegraphic bids shall not be considered unless permitted by the invitation. The term "telegraphic bids" means bids submitted by telegram or by mailgram.

(c) Bids should be filled out, executed, and submitted in accordance with the instructions in the invitation. If a bidder uses its own bid form or a letter to submit a bid, the bid may be considered only if (1) the bidder accepts all the terms and conditions of the invitation and (2) award on the bid would result in a binding contract with terms and conditions that do not vary from the terms and conditions of the invitation.

14.302 Bid submission.

(a) Bids shall be submitted so that they will be received in the office designated in the invitation for bids (referred to in paragraphs (b) and (c) below as the "designated office") not later than the exact time set for opening of bids.

(b) Except as specified in paragraph (c) below, if telegraphic bids are authorized, a telegraphic bid that is communicated by means of a telephone call to the designated office shall be considered if—

(1) Agency regulations authorize such consideration;

(2) The telephone call is made by the telegraph office that received the telegraphic bid;

(3) The telephone call is received by the designated office not later than the time set for the bid opening;

(4) The telegraph office that received the telegraphic bid sends the designated office the telegram that formed the basis for the telephone call;

(5) The telegram indicates on its face that it was received in the telegraph office before the telephone call was received by the designated office; and

(6) The bid in the telegram is identical in all essential respects to the bid received in the telephone call from the telegraph office.

(c) If the conditions in paragraph (b) above apply and the bid received by telephone is the apparent low bid, award may not be made until the telegram is received by the designated office; however, if the telegram is not received by the designated office within 5 days after the bid opening date, the bid shall be rejected.

14.303 Modification or withdrawal of bids.

(a) Bids may be modified or withdrawn by written or telegraphic notice received in the office designated in the invitation for bids not later than the exact time set for opening of bids. Unless proscribed by agency regulations, a telegraphic modification or withdrawal of a bid received in such office by telephone from the receiving telegraph office shall be considered. However, the message shall be confirmed by the telegraph company by sending a copy of the written telegram that formed the basis for the telephone call. Modifications received by telegram (including a record of those telephoned by the telegraph company) shall be sealed in an envelope by a proper official. The official shall write on the envelope (1) the date and time of receipt and by whom and (2) the number of the invitation for bids, and shall sign the envelope. No information contained in the envelope shall be disclosed before the time set for bid opening.

(b) A bid may be withdrawn in person by a bidder or its authorized representative if, before the exact time set for opening of bids, the identity of the persons requesting withdrawal is established and that person signs a receipt for the bid.

14.304 Late bids, late modifications of bids, or late withdrawal of bids.

14.304-1 General.

Bids received in the office designated in the invitation for bids after the exact time set for opening are "late bids."

(a) A late bid, modification of bid, or withdrawal of bid shall not be considered unless received before contract award, and either—

(1) It was sent by registered or certified mail not later than 5 calendar days before the bid receipt date specified; or

(2) It was sent by mail (or telegram if authorized) and it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the Government installation.

(b) The only acceptable evidence to establish the date of mailing of a late bid, modification, or withdrawal sent either by registered or certified mail is a U. S. or Canadian Postal Service postmark on the wrapper or on the original receipt from the U. S. or Canadian Postal Service. If neither postmark shows a legible date, the bid, modification, or withdrawal shall be deemed to have been mailed late. (The term "postmark" means a printed, stamped, or otherwise placed impression (exclusive of a postage meter machine impression) that is readily identifiable without further action as having been supplied and affixed on the

date of mailing by employees of the U. S. or Canadian Postal Service. Therefore, bidders should request the postal clerk to place a hand cancellation bull's-eye "postmark" on both the receipt and the envelope or wrapper.)

(c) The only acceptable evidence to establish the time of receipt at the Government installation is the time/date stamp of such installation on the bid wrapper or other documentary evidence of receipt maintained by the installation.

(d) Notwithstanding the above, a late modification of an otherwise successful bid which makes its terms more favorable to the Government will be considered at any time it is received and may be accepted.

14.304-2 Notification to late bidders.

When a bid, modification of bid, or withdrawal of bid is received late and it is clear from available information that it cannot be considered, the contracting officer shall promptly notify the bidder accordingly. However, when a late bid, modification of bid, or withdrawal of bid is transmitted by registered or certified mail and is received before award but it is not clear from available information whether it can be considered, the bidder shall be promptly notified substantially as follows:

Your bid in response to Invitation for Bids Number ..... dated ..... for ..... [*insert subject matter or short title*] was received after the time for opening specified in the Invitation. Accordingly, your bid will not be opened or considered for award unless there is received from you by .....[*insert date*] the original post office receipt for registered or certified mail showing a date of mailing not later than the fifth calendar day before the date specified for opening (e.g., a bid submitted in response to a solicitation requiring receipt of bids by the 20th of the month must have been mailed by the 15th or earlier).

14.304-3 Disposition of late submissions.

Late bids, modification of bids, or withdrawal of bids that are not considered for award shall be held unopened, unless opened for identification, until after award and then retained with other unsuccessful bids. However, any bid bond or guarantee shall be returned.

14.304-4 Records.

The following shall, if available, be included in the contracting office files with respect to each late bid, modification of bid, or withdrawal of bid:

(a) A statement of the date and hour of mailing, filing, or delivery.

(b) A statement of the date and hour of receipt.

(c) The determination, with supporting facts, as to whether or not the late bid was considered for award.

(d) A statement of the disposition of the late bid.

(e) The envelope, or other covering, if the late bid was considered for award.

SUBPART 14.4—OPENING OF BIDS AND AWARD OF CONTRACT

14.400 Scope of subpart.

This subpart contains procedures for the receipt, handling, opening, and disposition of bids including mistakes in bids, and subsequent award of contract.

14.401 Receipt and safeguarding of bids.

(a) All bids (including modifications) received before the time set for the opening of bids shall be kept secure. Except as provided in paragraph (b) below, the bids shall remain unopened in a locked bid box or safe. If an invitation for bids is cancelled, bids shall be returned to the bidders. Necessary precautions shall be taken to ensure the security of the bid box or safe. Before bid opening, information concerning the identity and number of bids received shall be made available only to Government employees. Such disclosure shall be only on a "need to know" basis. When bid samples are submitted, they shall be handled with sufficient care to prevent disclosure of characteristics before bid opening.

(b) Envelopes marked as bids but not identifying the bidder or the solicitation may be opened solely for the purpose of identification, and then only by an official designated for this purpose. If a sealed bid is opened by mistake (e.g., because it is not marked as being a bid), the envelope shall be signed by the opener, whose position shall also be written thereon, and delivered to the designated official. This official shall immediately write on the envelope (1) an explanation of the opening, (2) the date and time opened, and (3) the invitation for bids number, and shall sign the envelope. The official shall then immediately reseal the envelope.

14.402 Opening of bids.

14.402-1 Unclassified bids.

(a) The bid opening officer shall decide when the time set for opening bids has arrived and shall inform those present of that decision. The officer shall then (1) personally and publicly open all bids received before that time, (2) if practical, read the bids aloud to the persons present, and (3) have the bids recorded. The original of each bid shall be carefully safeguarded, particularly until the abstract of bids required by 14.403 has been made and its accuracy verified.

(b) Performance of the procedure in paragraph (a) above may be delegated to an assistant, but the bid opening officer remains fully responsible for the actions of the assistant.

(c) Examination of bids by interested persons shall be permitted if it does not interfere unduly with the conduct of Government business. Original bids shall not be allowed to pass out of the hands of a Government official unless a duplicate bid is not available for public inspection. The original bid may be examined by the public only under the immediate supervision of a Government official and under conditions that preclude possibility of a substitution, addition, deletion, or alteration in the bid.

14.402-2 Classified bids.

The opening of classified bids shall not be accessible to the general public. Openings may be witnessed and the results recorded by those bidder representatives (a) who have been previously cleared from a security standpoint and (b) who represent bidders who were invited to bid. Bids shall be made available to those persons authorized to attend the opening of bids. No public record shall be made of bids or bid prices received in response to classified invitations for bids.

14.402-3 Postponement of openings.

(a) A bid opening may be postponed even after the time scheduled for bid opening (but otherwise in accordance with 14.208) and—

(1) The contracting officer has reason to believe that the bids of an important segment of bidders have been delayed in the mails for causes beyond their control and without their fault or negligence (e.g., flood, fire, accident, weather conditions, or strikes); or

(2) Emergency or unanticipated events interrupt normal governmental processes so that the conduct of bid openings as scheduled is impractical.

(b) At the time of a determination to postpone a bid opening under subparagraph (a)(1) above, an announcement of the determination shall be publicly posted. If practical before issuance of a formal amendment of the invitation, the determination shall be otherwise communicated to prospective bidders who are likely to attend the scheduled bid opening.

(c) In the case of subparagraph (a)(2) above, the contracting officer may proceed with the bid opening as soon as practical after the time scheduled

without prior amendment to the invitation for bids or notice to bidders, whenever the delay incident to the amendment or notice is not in the Government's interest. In such cases, the time of actual bid opening shall be deemed to be the time set for bid opening for the purpose of determining "late bids" under 14.303. A note should be made on the abstract of bids or otherwise added to the file explaining the circumstances of the postponement.

14.403 Recording of bids.

(a) Standard Form 1409, Abstract of Offers, or Standard Form 1419, Abstract of Offers—Construction (or automated equivalent), shall be completed and certified as to its accuracy by the bid opening officer as soon after bid opening as practicable. Where bid items are too numerous to warrant complete recording of all bids, abstract entries for individual bids may be limited to item numbers and bid prices. In preparing these forms, the extra columns and SF 1409 Back, Abstract of Offers—Continuation, may be used to label and record such information as the contracting activity deems necessary.

(b) Abstracts of offers for unclassified acquisitions shall be available for public inspection. Such abstracts shall not contain information regarding failure to meet minimum standards of responsibility, apparent collusion of bidders, or other notations properly exempt from disclosure to the public in accordance with agency regulations implementing Subpart 24.2.

(c) The forms identified in paragraph (a) above need not be used by the Defense Fuel Supply Center for acquisitions of coal or petroleum products or by the Defense Personnel Support Center for perishable subsistence items.

(d) If an invitation for bids is cancelled before the time set for bid opening, this fact shall be recorded together with a statement of the number of bids invited and the number of bids received.

14.404 Rejection of bids.

14.404-1 Cancellation of invitations after opening.

(a) (1) Preservation of the integrity of the competitive bid system dictates that, after bids have been opened, award must be made to that responsible bidder who submitted the lowest responsive bid, unless there is a compelling reason to reject all bids and cancel the invitation.

(2) Every effort shall be made to anticipate changes in a requirement before the date of opening and to notify all prospective bidders of any resulting modification or cancellation. This will permit bidders to change their bids and prevent unnecessary exposure of bid prices.

(3) As a general rule, after the opening of bids, an invitation should not be cancelled and readvertised due solely to increased requirements for the items being acquired. Award should be made on the initial invitation for bids and the additional quantity should be treated as a new acquisition.

(b) When it is determined before award but after opening that the requirements of 10.008 (relating to the availability and identification of specifications) have not been met, the invitation shall be cancelled.

(c) Invitations may be cancelled before award but after opening when, consistent with subparagraph (a)(1) above, the contracting officer determines in writing that—

(1) Inadequate or ambiguous specifications were cited in the invitation;

(2) Specifications have been revised;

(3) The supplies or services being contracted for are no longer required;

(4) The invitation did not provide for consideration of all factors of cost to the Government, such as cost of transporting Government-furnished property to bidders' plants;

(5) Bids received indicate that the needs of the Government can be satisfied by a less expensive article differing from that for which the bids were invited;

(6) All otherwise acceptable bids received are at unreasonable prices;

(7) The bids were not independently arrived at in open competition, were collusive, or were submitted in bad faith (see Subpart 3.3 for reports to be made to the Department of Justice);

(8) A cost comparison as prescribed in OMB Circular A-76 and Subpart 7.3 shows that performance by the Government is more economical; or

(9) For other reasons, cancellation is clearly in the Government's interest.

(d) Should administrative difficulties be encountered after bid opening that may delay award beyond bidders' acceptance periods, the several lowest bidders whose bids have not expired (irrespective of the acceptance period specified in the bid) should be requested, before expiration of their bids, to extend in writing the bid acceptance period (with consent of sureties, if any) in order to avoid the need for readvertisement.

(e) Under some circumstances, use of negotiation is authorized to complete a cancelled formally advertised acquisition. See 15.210(b)(3) and (4) and 15.214.

14.404-2 Rejection of individual bids.

(a) Any bid that fails to conform to the essential requirements of the invitation for bids shall be rejected.

(b) Any bid that does not conform to the applicable specifications shall be rejected unless the invitation authorized the submission of alternate bids and the supplies offered as alternates meet the requirements specified in the invitation.

(c) Any bid that fails to conform to the delivery schedule or permissible alternates stated in the invitation shall be rejected.

(d) A bid shall be rejected when the bidder imposes conditions that would modify requirements of the invitation or limit the bidder's liability to the Government, since to allow the bidder to impose such conditions would be prejudicial to other bidders. For example, bids shall be rejected in which the bidder—

(1) Protects against future changes in conditions, such as increased costs, if total possible costs to the Government cannot be determined;

(2) Fails to state a price and indicates that price shall be "price in effect at time of delivery";

(3) States a price but qualifies it as being subject to "price in effect at time of delivery";

(4) When not authorized by the invitation, conditions or qualifies a bid by stipulating that it is to be considered only if, before date of award, the bidder receives (or does not receive) award under a separate solicitation;

(5) Requires that the Government is to determine that the bidder's product meets applicable Government specifications; or

(6) Limits rights of the Government under any contract clause.

(e) A low bidder may be requested to delete objectionable conditions from a bid provided the conditions do not go to the substance, as distinguished from the form, of the bid, or work an injustice on other bidders. A condition goes to the substance of a bid where it affects price, quantity, quality, or delivery of the items offered.

(f) Any bid may be rejected if the contracting officer determines in writing that it is unreasonable as to price.

(g) Bids received from any person or concern that is suspended, debarred, or ineligible (see Subpart 9.4) shall be rejected if the period of suspension, debarment, or ineligibility has not expired as of the bid opening date.

(h) Low bids received from concerns determined to be not responsible

pursuant to Subpart 9.1 shall be rejected (but if a bidder is a small business concern, see 19.6 with respect to certificates of competency).

(i) When a bid guarantee is required and a bidder fails to furnish the guarantee in accordance with the requirements of the invitation for bids, the bid shall be rejected, except as otherwise provided in 28.101-4.

(j) The originals of all rejected bids, and any written findings with respect to such rejections, shall be preserved with the papers relating to the acquisition.

(k) After submitting a bid, if all of a bidder's assets or that part related to the bid are transferred during the period between the bid opening and the award, the transferee may not be able to take over the bid. Accordingly, the contracting officer shall reject the bid unless the transfer is effected by merger, operation of law, or other means not barred by 41 U.S.C. 15 or 31 U.S.C. 203.

14.404-3 Notice to bidders of rejection of all bids.

When it is determined necessary to reject all bids, the contracting officer shall notify each bidder that all bids have been rejected and shall state the reason for such action.

14.404-4 Restrictions on disclosure of descriptive literature.

When a bid is accompanied by descriptive literature (as defined in 14.202-5(a)), and the bidder imposes a restriction that prevents the public disclosure of such literature, the restriction may render the bid nonresponsive. The restriction renders the bid nonresponsive if it prohibits the disclosure of sufficient information to permit competing bidders to know the essential nature and type of the products offered or those elements of the bid that relate to quantity, price, and delivery terms. The provisions of this paragraph do not apply to unsolicited descriptive literature submitted by a bidder if such literature does not qualify the bid (see 14.202-5(f)).

14.404-5 All or none qualifications.

Unless the solicitation provides otherwise, a bid may be responsive notwithstanding that the bidder specifies that award will be accepted only on all, or a specified group, of the items. Bidders shall not be permitted to withdraw or modify "all or none" qualifications after bid opening since such qualifications are substantive and affect the rights of other bidders.

14.405 Minor informalities or irregularities in bids.

A minor informality or irregularity is one that is merely a matter of form and not of substance. It also pertains to some immaterial defect in a bid or variation of a bid from the exact requirements of the invitation that can be corrected or waived without being prejudicial to other bidders. The defect or variation is immaterial when the effect on price, quantity, quality, or delivery is negligible when contrasted with the total cost or scope of the supplies or services being acquired. The contracting officer either shall give the bidder an opportunity to cure any deficiency resulting from a minor informality or irregularity in a bid or waive the deficiency, whichever is to the advantage of the Government. Examples of minor informalities or irregularities include failure of a bidder to—

(a) Return the number of copies of signed bids required by the invitation;

(b) Furnish required information concerning the number of its employees;

(c) Sign its bid, but only if—

(1) The unsigned bid is accompanied by other material indicating the bidder's intention to be bound by the unsigned bid (such as the submission of a bid guarantee or a letter signed by the bidder, with the bid, referring to and clearly identifying the bid itself); or

(2) The firm submitting a bid has formally adopted or authorized, before the date set for opening of bids, the execution of documents by typewritten, printed, or stamped signature and submits evidence of such authorization and the bid carries such a signature;

(d) Acknowledge receipt of an amendment to an invitation for bids, but only if—

(1) The bid received clearly indicates that the bidder received the amendment, such as where the amendment added another item to the invitation and the bidder submitted a bid on the item; or

(2) The amendment involves only a matter of form or has either no effect or merely a negligible effect on price, quantity, quality, or delivery of the item bid upon;

(e) Furnish affidavits concerning parent company and affiliates, if required pursuant to the clause at 52.214-8, Parent Company and Identifying Data, and 52.214-17, Affiliated Bidders; and

(f) Execute the certifications with respect to Equal Opportunity and Affirmative Action Programs, as set forth in the clauses at 52.222-22, Previous Contracts and Compliance Reports, and 52.222-25, Affirmative Action Compliance.

14.406 Mistakes in bids.

14.406-1 General.

After the opening of bids, contracting officers shall examine all bids for mistakes. In cases of apparent mistakes and in cases where the contracting officer has reason to believe that a mistake may have been made, the contracting officer shall request from the bidder a verification of the bid, calling attention to the suspected mistake. If the bidder alleges a mistake, the matter shall be processed in accordance with this section 14.406. Such actions shall be taken before award.

14.406-2 Apparent clerical mistakes.

(a) Any clerical mistake, apparent on its face in the bid, may be corrected by the contracting officer before award. The contracting officer first shall obtain from the bidder a verification of the bid intended. Examples of apparent mistakes are—

(1) Obvious misplacement of a decimal point;

(2) Obviously incorrect discounts (for example, 1 percent 10 days, 2 percent 20 days, 5 percent 30 days);

(3) Obvious reversal of the price f.o.b. destination and price f.o.b. origin; and

(4) Obvious mistake in designation of unit.

(b) Correction of the bid shall be effected by attaching the verification to the original bid and a copy of the verification to the duplicate bid. Correction shall not be made on the face of the bid; however, it shall be reflected in the award document.

14.406-3 Other mistakes disclosed before award.

In order to minimize delays in contract awards, administrative determinations may be made as described in this 14.406-3 in connection with mistakes in bids alleged after opening of bids and before award. The authority to permit correction of bids is limited to bids that, as submitted, are responsive to the invitation and may not be used to permit correction of bids to make them responsive. This authority is in addition to that in 14.406-2 or that may be otherwise available.

(a) If a bidder requests permission to correct a mistake and clear and convincing evidence establishes both the existence of the mistake and the bid actually intended, the agency head may make a determination permitting the bidder to correct the mistake; *provided*, that if this correction would result in displacing one or more lower bids, such a determination shall not be made unless the existence of the mistake and the bid actually intended are

ascertainable substantially from the invitation and the bid itself.

(b) If (1) a bidder requests permission to withdraw a bid rather than correct it, (2) the evidence is clear and convincing both as to the existence of a mistake and as to the bid actually intended, and (3) the bid, both as uncorrected and as corrected, is the lowest received, the agency head may make a determination to correct the bid and not permit its withdrawal.

(c) If, under paragraph (a) or (b) above, (1) the evidence of a mistake is clear and convincing only as to the mistake but not as to the intended bid, or (2) the evidence reasonably supports the existence of a mistake but is not clear and convincing, the agency head may make a determination permitting the bidder to withdraw the bid. The contracting officer may make this determination if the agency head elects not to make a determination under paragraph (a) or (b) above or (d) below.

(d) If the evidence does not warrant a determination under paragraph (a), (b), or (c) above, the agency head may make a determination that the bid be neither withdrawn nor corrected.

(e) Heads of agencies may delegate their authority to make the determinations under paragraphs (a), (b), (c), and (d) of this 14.406-3 to a central authority, or a limited number of authorities as necessary, in their agencies, without power of redelegation.

(f) Each proposed determination shall have the concurrence of legal counsel within the agency concerned before issuance.

(g) Suspected or alleged mistakes in bids shall be processed as follows. A mere statement by the administrative officials that they are satisfied that an error was made is insufficient.

(1) The contracting officer shall immediately request the bidder to verify the bid. Action taken to verify bids must be sufficient to reasonably assure the contracting officer that the bid as confirmed is without error, or to elicit the allegation of a mistake by the bidder. To assure that the bidder will be put on notice of a mistake suspected by the contracting officer, the bidder should be advised as appropriate—

(i) That its bid is so much lower than the other bids or the Government's estimate as to indicate a possibility of error;

(ii) Of important or unusual characteristics of the specifications;

(iii) Of changes in requirements from previous purchases of a similar item; or

(iv) Of other data proper for disclosure, that will put the bidder on notice of the suspected mistake.

(2) If the bid is verified, the contracting officer shall consider the bid as originally submitted. If the time for acceptance of bids is likely to expire before a decision can be made, the contracting officer shall request all bidders whose bids may become eligible for award to extend the time for acceptance of their bids in accordance with 14.404-1(d). If the bidder whose bid is believed erroneous does not (or cannot) grant an extension of time, the bid shall be considered as originally submitted (but see subparagraph (5) below). If the bidder alleges a mistake, the contracting officer shall advise the bidder to make a written request to withdraw or modify the bid. The request must be supported by statements (sworn statements, if possible) and shall include all pertinent evidence such as the bidder's file copy of the bid, the original worksheets and other data used in preparing the bid, subcontractors' quotations, if any, published price lists, and any other evidence that establishes the existence of the error, the manner in which it occurred, and the bid actually intended.

(3) When the bidder furnishes evidence supporting an alleged mistake, the contracting officer shall refer the case to the appropriate authority (see paragraph (e) above) together with the following data:

(i) A signed copy of the bid involved.

(ii) A copy of the invitation for bids and any specifications or drawings relevant to the alleged mistake.

(iii) An abstract or record of the bids received.

(iv) The written request by the bidder to withdraw or modify the bid, together with the bidder's written statement and supporting evidence.

(v) A written statement by the contracting officer setting forth—

(A) A description of the supplies or services involved;

(B) The expiration date of the bid in question and of the other bids submitted;

(C) Specific information as to how and when the mistake was alleged;

(D) A summary of the evidence submitted by the bidder;

(E) In the event only one bid was received, a quotation of the most recent contract price for the supplies or services involved or, in the absence of a recent comparable contract, the contracting officer's estimate of a fair price for the supplies or services;

(F) Any additional pertinent evidence; and

(G) A recommendation that either the bid be considered for award in the form submitted, or the bidder be authorized to withdraw or modify the bid.

(4) When time is of the essence because of the expiration of bids or otherwise, the contracting officer may refer the case by telegraph or telephone to the appropriate authority. Ordinarily, the contracting officer will not refer mistake in bid cases by telegraph or telephone to the appropriate authority when the determination set forth in paragraphs (a) or (b) above is applicable, since actual examination is generally necessary to determine whether the evidence presented is clear and convincing.

(5) Where the bidder fails or refuses to furnish evidence in support of a suspected or alleged mistake, the contracting officer shall consider the bid as submitted unless (1) the amount of the bid is so far out of line with the amounts of other bids received, or with the amount estimated by the agency or determined by the contracting officer to be reasonable, or (ii) there are other indications of error so clear, as to reasonably justify the conclusion that acceptance of the bid would be unfair to the bidder or to other bona fide bidders. Attempts made to obtain the information required and the action taken with respect to the bid shall be fully documented.

(h) Each agency shall maintain records of all determinations made in accordance with this subsection 14.406-3, the facts involved, and the action taken in each case. Copies of all such determinations shall be included in the file.

(i) Nothing contained in this subsection 14.406-3 prevents an agency from submitting doubtful cases to the Comptroller General for advance decision.

14.406-4 Mistakes after award.

If a contractor's discovery and request for correction of a mistake in bid is not made until after the award, it shall be processed under the procedures of Part 33 and the following:

(a) When a mistake in a contractor's bid is not discovered until after award, the mistake may be corrected by contract amendment if correcting the mistake would be favorable to the Government without changing the essential requirements of the specifications.

(b) In addition to the cases contemplated in paragraph (a) above or as otherwise authorized by law, agencies are authorized to make a determination—

(1) To rescind a contract;

(2) To reform a contract (i) to delete the items involved in the mistake or (ii) to increase the price if the contract

price, as corrected, does not exceed that of the next lowest acceptable bid under the original invitation for bids; or

(3) That no change shall be made in the contract as awarded, if the evidence does not warrant a determination under subparagraphs (1) or (2) above.

(c) Determinations under subparagraphs (b)(1) and (2) above may be made only on the basis of clear and convincing evidence that a mistake in bid was made. In addition, it must be clear that the mistake was (1) mutual, or (2) if unilaterally made by the contractor, so apparent as to have charged the contracting officer with notice of the probability of the mistake.

(d) Each proposed determination shall be coordinated with legal counsel in accordance with agency procedures.

(e) Mistakes alleged or disclosed after award shall be processed as follows:

(1) The contracting officer shall request the contractor to support the alleged mistake by submission of written statements and pertinent evidence, such as (i) the contractor's file copy of the bid, (ii) the contractor's original worksheets and other data used in preparing the bid, (iii) subcontractors' and suppliers' quotations, if any, (iv) published price lists, and (v) any other evidence that will serve to establish the mistake, the manner in which the mistake occurred, and the bid actually intended.

(2) The case file concerning an alleged mistake shall contain the following:

(i) All evidence furnished by the contractor in support of the alleged mistake.

(ii) A signed statement by the contracting officer—

(A) Describing the supplies or services involved;

(B) Specifying how and when the mistake was alleged or disclosed;

(C) Summarizing the evidence submitted by the contractor and any additional evidence considered pertinent;

(D) Quoting, in cases where only one bid was received, the most recent contract price for the supplies or services involved, or in the absence of a recent comparable contract, the contracting officer's estimate of a fair price for the supplies or services and the basis for the estimate;

(E) Setting forth the contracting officer's opinion whether a bona fide mistake was made and whether the contracting officer was, or should have been, on constructive notice of the mistake before the award, together with the reasons for, or data in support of, such opinion;

(F) Setting forth the course of action with respect to the alleged mistake that the contracting officer considers proper on the basis of the evidence, and if other than a change in contract price is recommended, the manner by which the supplies or services will otherwise be acquired; and

(G) Disclosing the status of performance and payments under the contract, including contemplated performance and payments.

(iii) A signed copy of the bid involved.

(iv) A copy of the invitation for bids and any specifications or drawings relevant to the alleged mistake.

(v) An abstract of written record of the bids received.

(vi) A written request by the contractor to reform or rescind the contract, and copies of all other relevant correspondence between the contracting officer and the contractor concerning the alleged mistake.

(vii) A copy of the contract and any related change orders or supplemental agreements.

(f) Each agency shall include in the contract file a record of (1) all determinations made in accordance with this 14.406-4, (2) the facts involved, and (3) the action taken in each case.

14.407 Award.

14.407-1 General.

(a) The contracting officer shall make a contract award (1) by written notice, (2) within the time for acceptance specified in the bid or an extension (see 14.404-1(d), and (3) to that responsible bidder whose bid, conforming to the invitation, will be most advantageous to the Government, price and other factors considered (for a discussion of other factors to be considered, see 14.407-5). Award shall not be made until all required approvals have been obtained and the award otherwise conforms with 14.103-2.

(b) If less than three bids have been received, the contracting officer shall examine the situation to ascertain whether the small number of responses is attributable to an absence of any of the prerequisites of formal advertising (see 14.101). Award shall be made notwithstanding the limited number of bids. However, the contracting officer shall initiate, if appropriate, corrective action to increase competition in future solicitations for the same or similar items, and include a notation of such action in the records of the invitation for bids (see 14.204).

(c) (1) Award shall be made by mailing or otherwise furnishing a properly executed award document to the successful bidder.

(2) When a notice of award is issued, it shall be followed as soon as possible by the formal award.

(3) When more than one award results from any single invitation for bids, separate award documents shall be suitably numbered and executed.

(4) When an award is made to a bidder for less than all of the items that may be awarded to that bidder and additional items are being withheld for subsequent award, the first award to that bidder shall state that the Government may make subsequent awards on those additional items within the bidder's bid acceptance period.

(5) All provisions of the invitation for bids, including any acceptable additions or changes made by a bidder in the bid, shall be clearly and accurately set forth (either expressly or by reference) in the award document. The award is an acceptance of the bid, and the bid and the award constitute the contract.

(d) (1) Award is generally made by using the Award portion of Standard Form (SF) 33, Solicitation, Offer and Award. If an offer leads to further changes, the resulting contract shall be prepared as a bilateral document on SF 26, Award/Contract. However, if the prospective contractor amends its offer in writing to reflect any necessary changes, the amended offer may be accepted by using the Award portion of either SF 33 or SF 26.

(2) Use of the Award portion of SF 33 or SF 26 does not preclude the additional use of informal documents, including telegrams, as notices of awards.

14.407-2 Responsible bidder—reasonableness of price.

The contracting officer shall determine that a prospective contractor is responsible (see Subpart 9.1) and that the prices offered are reasonable before awarding the contract. The price analysis techniques in 15.805-2 may be used as guidelines. In each case the determination shall be made in the light of all prevailing circumstances. Particular care must be taken in cases where only a single bid is received.

14.407-3 Prompt payment discounts.

Prompt payment discounts shall not be considered in the evaluation of bids. However, any discount offered will form a part of the award, and will be taken by the payment center if payment is made within the discount period specified by the bidder. As an alternative to indicating a discount in conjunction with the offer, bidders may prefer to offer discounts on individual invoices.

14.407-4 Economic price adjustment.

(a) *Bidder proposes economic price adjustment.*

(1) When a solicitation does not contain an economic price adjustment clause but a bidder proposes one with a ceiling that the price will not exceed, the bid shall be evaluated on the basis of the maximum possible economic price adjustment of the quoted base price.

(2) If the bid is eligible for award, the contracting officer shall request the bidder to agree to the inclusion in the award of an approved economic price adjustment clause (see 16.203) that is subject to the same ceiling. If the bidder will not agree to an approved clause, the award may be made on the basis of the bid as originally submitted.

(3) Bids that contain economic price adjustments with no ceiling shall be rejected unless a clear basis for evaluation exists.

(b) *Government proposes economic price adjustment.*

(1) When an invitation contains an economic price adjustment clause and no bidder takes exception to the provisions, bids shall be evaluated on the basis of the quoted prices without the allowable economic price adjustment being added.

(2) When a bidder increases the maximum percentage of economic price adjustment stipulated in the invitation or limits the downward economic price adjustment provisions of the invitation, the bid shall be rejected as nonresponsive.

(3) When a bid indicates deletion of the economic price adjustment clause, the bid shall be rejected as nonresponsive since the downward economic price adjustment provisions are thereby limited.

(4) When a bidder decreases the maximum percentage of economic price adjustment stipulated in the invitation, the bid shall be evaluated at the base price on an equal basis with bids that do not reduce the stipulated ceiling. However, after evaluation, if the bidder offering the lower ceiling is in a position to receive the award, the award shall reflect the lower ceiling.

14.407-5 Other factors to be considered.

The factors set forth in paragraphs (a) through (f) below may be applicable in evaluating bids for award.

(a) Foreseeable costs or delays to the Government resulting from such factors as differences in inspection, locations of supplies, and transportation. If bids are on an f.o.b. origin basis (see 47.303 and 47.305), transportation costs to the designated points shall be considered in determining the lowest cost to the Government.

(b) Changes made, or requested by the bidder, in any of the provisions of the invitation for bids if the change does not constitute a ground for rejection under 14.404.

(c) Advantages or disadvantages to the Government that might result from making more than one award (see 14.201-6(q)). The contracting officer shall assume, for the purpose of making multiple awards, that $250 would be the administrative cost to the Government for issuing and administering each contract awarded under a solicitation. Individual awards shall be for the items or combinations of items that result in the lowest aggregate cost to the Government, including the assumed administrative costs.

(d) Qualified products (see Subpart 9.2).

(e) Federal, State, and local taxes (see Part 29).

(f) Origin of supplies, and, if foreign, the application of the Buy American Act or any other prohibition on foreign purchases (see Part 25).

14.407-6 Equal low bids.

(a) Contracts shall be awarded in the following order of priority when two or more low bids are equal in all respects:

(1) Small business concerns that are also labor surplus area concerns.

(2) Other small business concerns.

(3) Other business concerns that are also labor surplus area concerns.

(4) Other business concerns.

(b) If two or more bidders still remain equally eligible after application of paragraph (a) above, award shall be made by a drawing by lot limited to those bidders. If time permits, the bidders involved shall be given an opportunity to attend the drawing. The drawing shall be witnessed by at least three persons, and the contract file shall contain the names and addresses of the witnesses and the person supervising the drawing.

(c) When an award is to be made by using the priorities under this 14.407-6, the contracting officer shall include a written agreement in the contract that the contractor will perform, or cause to be performed, the contract in accordance with the circumstances justifying the priority used to break the tie or select bids for a drawing by lot.

14.407-7 Documentation of award.

(a) The contracting officer shall document compliance with 14.103-2 in the contract file.

(b) The documentation shall either state that the accepted bid was the lowest bid received, or list all lower bids with reasons for their rejection in sufficient detail to justify the award.

(c) When an award is made after receipt of equal low bids, the documentation shall describe how the tie was broken.

14.407-8 Protests against award.

(a) *General.*

(1) Contracting officers shall consider all protests or objections to the award of a contract, whether submitted before or after award. If a protest is oral and the matter cannot be resolved, written confirmation of the protest shall be requested. The protester shall be notified in writing of the final decision of the written protest. (See 19.302 for protests of small business status and 22.608-3 for protests involving eligibility under the Walsh-Healey Public Contracts Act.) An interested party wishing to protest to the Comptroller General of the United States against an award of a contract should do so in accordance with General Accounting Office (GAO) Regulations (4 CFR Part 21).

(2) When a protest, before or after award, has been lodged with a higher authority or the GAO and the contracting officer is requested to submit a report, it should include a copy of—

(i) The protest;

(ii) The bid submitted by the protesting bidder and a copy of the bid of the bidder who is being considered for award, or whose bid is being protested.

(iii) The invitation, including the specifications or portions relevant to the protest;

(iv) The abstract of offers or relevant portions;

(v) Any other documents that are relevant to the protest; and

(vi) The contracting officer's signed statement setting forth findings, actions, and recommendations and any additional evidence or information deemed necessary in determining the validity of the protest. The statement shall be fully responsive to the allegation of the protest. If the award was made after receipt of the protest, the contracting officer's report will include the determination prescribed in subparagraph (b)(4) below.

(3) Other persons, including bidders, involved in or affected by the protest shall be given notice of the protest and its basis in appropriate cases. These persons shall also be advised that they may submit their views and relevant information to the contracting officer within a specified period of time. Normally, the time specified will be 1 week. In addition, these persons should be further advised that, if the protest has

been lodged with the GAO, copies of such submissions should be furnished directly to the GAO.

(4) Since timely action on protests is essential, they should be handled on a priority basis. Upon receipt of informal advice that a protest has been lodged with the GAO, the contracting officer shall immediately begin compiling the information necessary for a report to the GAO. To further expedite processing, the official who furnishes the agency's report to the GAO should, upon request of the protester or the GAO, simultaneously furnish a complete copy (except for classified or privileged information) to the protester and advise the GAO that this has been done. In such instances, the protester shall be requested to furnish a copy of any comments on the administrative report directly to the GAO as well as to the contracting officer.

(5) Agencies shall furnish the GAO with the name, title, and telephone number of one or more officials (in both field and headquarters offices, if desired) whom the GAO may contact regarding protests. Each agency shall be responsible for promptly advising the GAO of any change in the designated officials. Agencies may provide for reports to be forwarded directly to the GAO by the office handling the contract.

(b) *Protests before award.*

(1) The contracting officer may require that written confirmation of an oral protest be submitted by a specified time and inform the protester that award will be withheld until the specified time. If the written protest is not received by the time specified, the oral protest may be disregarded. Award may be made in the normal manner unless the contracting officer finds it necessary to take remedial action.

(2) When a protest against the making of an award is received and award will be withheld pending disposition of the protest, the bidders whose bids might become eligible for award should be informed of the protest. In addition, those bidders should be requested, before expiration of the time for acceptance of their bids, to extend the time for acceptance in accordance with 14.404-1(d) to avoid the need for readvertisement. In the event of failure to obtain such extensions of bids, consideration should be given to proceeding with award under subparagraph (4) below.

(3) When a protest has been lodged with the contracting office, the views of the GAO should be obtained before award if considered desirable. When it is known that a protest has been lodged directly with the GAO, a determination to make award under subparagraph (4) below must be approved at a level above the contracting officer in accordance with agency procedures. While award need not be withheld pending final disposition by the GAO of a protest, a notice of intent to make award in such circumstances shall be furnished the GAO. Formal or informal advice should be obtained concerning the current status of the case before making the award.

(4) When a written protest is received, award shall not be made until the matter is resolved, unless the contracting officer determines that—

(i) The materials and services to be contracted for are urgently required;

(ii) Delivery or performance will be unduly delayed by failure to make award promptly; or

(iii) A prompt award will otherwise be advantageous to the Government.

(5) If award is made under subparagraph (4) above, the contracting officer shall document the file to explain the need for an immediate award. The contracting officer also shall give written notice to the protester and others concerned of the decision to proceed with the award.

(c) *Protests after award.* Protests received after award shall be handled in accordance with agency procedures. Although persons involved in or affected by the filing of a protest may be limited, at least the contractor shall be furnished the notice of protest and its basis in accordance with subparagraph (a)(3) above. When it appears likely that an award may be invalidated and a delay in receiving the supplies or services is not prejudicial to the Government's interest, the contracting officer should consider seeking a mutual agreement with the contractor to suspend performance on a no-cost basis.

14.408 Information to bidders.

14.408-1 Award of unclassified contracts.

(a) The contracting office shall as a minimum (subject to any restrictions in Subpart 9.4)—

(1) Notify unsuccessful bidders promptly that their bids were not accepted;

(2) Extend appreciation for the interest the unsuccessful bidders have shown in submitting a bid; and

(3) When award is made to other than a low bidder, state the reason for rejection in the notice to each of the unsuccessful low bidders.

(b) Notification to unsuccessful bidders may be oral or in writing through the use of a form postal card or other appropriate means.

(c) Should additional information be requested, the contracting office shall provide the unsuccessful bidders with the name and address of the successful bidder, the contract price, and the location where a copy of the abstract of offers is available for inspection. However, when multiple awards have been made and furnishing information on the successful bids would require so much work as to interfere with normal operations of the contracting office, only information concerning location of the abstract of offers need be given.

(d) When a request is received concerning an unclassified invitation from an inquirer who is neither a bidder nor a representative of a bidder, the contracting office should make every effort to furnish the names of successful bidders and, if requested, the prices at which awards were made. However, when such requests require so much work as to interfere with the normal operations of the contracting office, the inquirer will be advised where a copy of the abstract of offers may be seen.

(e) Requests for records shall be governed by agency regulations implementing Subpart 24.2.

14.408-2 Award of classified contracts.

In addition to 14.408-1, if classified information was furnished or created in connection with the solicitation, the contracting officer shall advise the unsuccessful bidders, including any who did not bid, to take disposition action in accordance with agency procedures. The name of the successful bidder and the contract price will be furnished to unsuccessful bidders only upon request. Information regarding a classified award shall not be furnished by telephone.

SUBPART 14.5—TWO-STEP FORMAL ADVERTISING

14.501 General.

Two-step formal advertising is a method of contracting designed to obtain the benefits of formal advertising when adequate specifications are not available. An objective is to permit the development of a sufficiently descriptive and not unduly restrictive statement of the Government's requirements, including an adequate technical data package, so that subsequent acquisitions may be made by conventional formal advertising. This method is especially useful in acquisitions requiring technical proposals, particularly those for complex items. It is conducted in two steps:

(a) Step one consists of the request for, submission, evaluation, and (if necessary) discussion of a technical proposal. No pricing is involved. The objective is to determine the

acceptability of the supplies or services offered. As used in this context, the word "technical" has a broad connotation and includes, among other things, the engineering approach, special manufacturing processes, and special testing techniques. It is the proper step for clarification of questions relating to technical requirements. Conformity to the technical requirements is resolved in this step, but not responsibility as defined in 9.1.

(b) Step two involves the submission of sealed priced bids by those who submitted acceptable technical proposals in step one. Bids submitted in step two are evaluated and the awards made in accordance with Subparts 14.3 and 14.4.

14.502 Conditions for use.

(a) Unless other factors require the use of negotiation; e.g., see 15.213, two-step formal advertising shall be used in preference to negotiation when all of the following conditions are present:

(1) Available specifications or purchase descriptions are not definite or complete or may be too restrictive to permit full and free competition without technical evaluation, and any necessary discussion, of the technical aspects of the requirement to ensure mutual understanding between each source and the Government.

(2) Definite criteria exist for evaluating technical proposals.

(3) More than one technically qualified source is expected to be available.

(4) Sufficient time will be available for use of the two-step method.

(5) A firm-fixed-price contract or a fixed-price contract with economic price adjustment will be used.

(b) None of the following precludes the use of two-step formal advertising:

(1) Multi-year contracting.

(2) Government-owned facilities or special tooling to be made available to the successful bidder.

(3) A total small business and/or labor surplus area set-aside (see 19.502-2 and 20.201).

(4) A first or subsequent production quantity is being acquired under a performance specification.

14.503 Procedures.

14.503-1 Step one.

(a) Requests for technical proposals shall be distributed to qualified sources in accordance with 14.103-1(b). In addition, the request shall be published in the Commerce Business Daily in accordance with Part 5. The request must include, as a minimum, the following:

(1) A description of the supplies or services required.

(2) A statement of intent to use the two step method.

(3) The requirements of the technical proposal.

(4) The evaluation criteria.

(5) A statement that the technical proposals shall not include prices or pricing information.

(6) The date, or date and hour, by which the proposal must be received (see 14.201-6(r)).

(7) A statement that (i) in the second step, only bids based upon technical proposals determined to be acceptable, either initially or as a result of discussions, will be considered for awards and (ii) each bid in the second step must be based on the bidder's own technical proposals.

(8) A statement that (i) offerors should submit proposals that are acceptable without additional explanation or information, (ii) the Government may make a final determination regarding a proposal's acceptability solely on the basis of the proposal as submitted, and (iii) the Government may proceed with the second step without requesting further information from any offeror; however, the Government may request additional information from offerors of proposals that it considers reasonably susceptible of being made acceptable, and may discuss proposals with their offerors.

(9) A statement that a notice of unacceptability will be forwarded to the offeror upon completion of the proposal evaluation and final determination of unacceptability.

(10) A statement either that only one technical proposal may be submitted by each offeror or that multiple technical proposals may be submitted. When specifications permit different technical approaches, it is generally in the Government's interest to authorize multiple proposals. If multiple proposals are authorized, see 14.201-6(s).

(b) Information on delivery or performance requirements may be of assistance to bidders in determining whether or not to submit a proposal and may be included in the request. The request shall also indicate that the information is not binding on the Government and that the actual delivery or performance requirements will be contained in the invitation issued under step two.

(c) Upon receipt, the contracting officer shall—

(1) Safeguard proposals against disclosure to unauthorized persons;

(2) Accept and handle data marked in accordance with 15.413 as provided in that section; and

(3) Remove any reference to price or cost.

(d) The contracting officer shall establish a time period for evaluating technical proposals. The period may vary with the complexity and number of proposals involved. However, the evaluation should be completed quickly.

(e) (1) Evaluations shall be based on the criteria in the request for proposals but not consideration of responsibility as defined in 9.1. Proposals shall be categorized as—

(i) Acceptable;

(ii) Reasonably susceptible of being made acceptable; or

(iii) Unacceptable.

(2) Any proposal which modifies, or fails to conform to the essential requirements or specifications of, the request for technical proposals shall be considered nonresponsive and categorized as unacceptable.

(f) (1) The contracting officer may proceed directly with step two if there are sufficient acceptable proposals to ensure adequate price competition under step two, and if further time, effort and delay to make additional proposals acceptable and thereby increase competition would not be in Government's interest. If this is not the case, the contracting officer shall request bidders whose proposals may be made acceptable to submit additional clarifying or supplementing information. The contracting office shall identify the nature of the deficiencies in the proposal or the nature of the additional information required. The contracting officer may also arrange discussions for this purpose. No proposal shall be discussed with any offeror other than the submitter.

(2) In initiating requests for additional information, the contracting officer shall fix an appropriate time for bidders to conclude discussions, if any, submit all additional information, and incorporate such additional information as part of their proposals submitted. Such time may be extended in the discretion of the contracting officer. If the additional information incorporated as part of a proposal within the final time fixed by the contracting officer establishes that the proposal is acceptable, it shall be so categorized. Otherwise, it shall be categorized as unacceptable.

(g) When a technical proposal is found unacceptable (either initially or after clarification), the contracting officer shall promptly notify the offeror of the basis of the determination and that a revision of the proposal will not be considered. Upon written request and as soon as possible after award, the

contracting officer shall debrief unsuccessful offerors (see 15.1002).

(h) Late technical proposals are governed by 15.412.

(i) If it is necessary to discontinue two-step formal advertising, the contracting officer shall include a statement of the facts and circumstances in the contract file. Each offeror shall be notified in writing. When step one results in no acceptable technical proposal or only one acceptable technical proposal, the acquisition may be continued by negotiation under the authority of 15.210(b)(3) (but see 15.210(c)).

14.503-2 Step two.

(a) Formal advertising procedures shall be followed except that invitations for bids will—

(1) Be issued only to those offerors submitting acceptable technical proposals in step one;

(2) Include the provision prescribed in 14.201-6(t);

(3) Prominently state that the bidder shall comply with the specifications and the bidder's technical proposal; and

(4) Not be synopsized in the Commerce Business Daily as an acquisition opportunity nor publicly posted (see 5.101(a)).

(b) The names of firms that submitted acceptable proposals in step one will be listed in the Commerce Business Daily for the benefit of prospective subcontractors (see 5.206(b)).

PART 15—CONTRACTING BY NEGOTIATION

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

15.000 Scope of part.

This part prescribes policies and procedures governing contracting for supplies and services by negotiation.

SUBPART 15.1—GENERAL REQUIREMENTS FOR NEGOTIATION

15.100 Scope of subpart.

This subpart covers general requirements regarding negotiated contracts. Detailed and specific requirements appear throughout this regulation.

15.101 Definition.

"Negotiation" means contracting without formal advertising. Any contract awarded without the use of formal advertising procedures is a negotiated contract (see 14.101).

15.102 General.

Compared to formal advertising, negotiation is a more flexible procedure that includes the receipt of proposals from offerors, permits bargaining, and usually affords offerors an opportunity to revise their offers before award of a contract. Bargaining—in the sense of discussion, persuasion, alteration of initial assumptions and positions, and give-and-take—may apply to price, schedule, technical requirements, type of contract, or other terms of a proposed contract.

15.103 Use of negotiation.

Negotiation may be used only when permitted under one of the statutory authorizations discussed in Subpart 15.2. Notwithstanding the existence of conditions permitting negotiation under one of these statutory authorizations, formal advertising shall be used for acquisitions in excess of the applicable small purchase limitation in Part 13 whenever it is feasible and practicable to do so. Contracting officers must exercise good judgment in selecting the method of contracting.

15.104 Authorization and approval.

No contract shall be entered into as a result of negotiation unless—

(a) The contemplated contract action comes under one of the statutory authorizations permitting negotiation;

(b) All required determinations and findings have been made; and

(c) All required clearances and approvals have been obtained.

15.105 Competition.

Negotiated contracts shall be awarded on a competitive basis to the maximum practical extent. To this end:

(a) Offers shall be solicited from the maximum number of qualified sources consistent with the nature of and the need for the supplies or services being acquired. Acquisition information shall be publicized in accordance with 5.101.

(b) Before negotiating a contract on a noncompetitive basis, the contracting officer is responsible not only for ensuring that competition is not feasible and practicable under the existing conditions and circumstances but also for acting whenever possible to avoid the need for subsequent noncompetitive contracts. This process shall include—

(1) Examination of the reasons precluding competition for the current requirement; and

(2) Taking steps to foster competition in the future, particularly with respect to the availability of complete and accurate data, reasonableness of delivery requirements, and possible breakout of components for competitive contracting.

(c) Contracts in excess of the applicable small purchase limitation in Part 13 shall not be negotiated on a noncompetitive basis without prior review at a level above the contracting officer. However, prior review is not required for acquisitions of electric power or energy, gas (natural or manufactured), water, other utility services, or educational services from nonprofit institutions, provided that acquisitions of public utility services shall comply with Subpart 8.3, Acquisition of Utility Services. Competition should be obtained in the case of bottled gas distributors.

15.106 Contract clauses.

15.106-1 Examination of Records clause.

(a) This subsection implements 10 U.S.C. 2313(b) and (c) and 41 U.S.C. 254(c).

(b) When contracting by negotiation (including small business restricted advertising), the contracting officer shall insert the clause at 52.215-1, Examination of Records by Comptroller General, in solicitations and contracts, except when—

(1) Making small purchases (see Part 13);

(2) Contracting for utility services at rates not exceeding those established to apply uniformly to the public, plus any applicable reasonable connection charge; or

(3) Making contracts with foreign contractors for which the agency head authorizes omission under Subpart 25.9.

(c) In connection with administration of the clause in research and development contracts with nonprofit institutions, including subcontracts under these contracts, the Comptroller General does not require original documentation of transportation costs (exclusive of travel).

15.106-2 Audit—Negotiation clause.

(a) This subsection implements 10 U.S.C. 2313(a), 41 U.S.C. 254(b), and 10 U.S.C. 2306(f).

(b) The contracting officer shall, when contracting by negotiation, insert the clause at 52.215-2, Audit—Negotiation, in solicitations and contracts, unless the acquisition is a small purchase under Part 13. In facilities contracts, the contracting officer shall use the clause with its Alternate I.

SUBPART 15.2—NEGOTIATION AUTHORITIES

15.200 Scope of subpart.

(a) This subpart identifies the statutory authorities (including application and limitations) for using negotiation as a method of contracting. These authorities are exceptions to the general requirement for formal advertising. Requirements for determinations and findings to support use of these authorities are in Subpart 15.3.

(b) The Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252(c)) and 10 U.S.C. 2304(a), formerly referred to as the Armed Services Procurement Act of 1947, each authorize, under certain conditions, the negotiation of purchases and contracts. The Department of Defense, Coast Guard, and National Aeronautics and Space Administration are subject to 10 U.S.C. 2304(a). Other executive agencies are subject to 41 U.S.C. 252(c).

(c) Conditions for the use of negotiation authorities are listed in 15.201 through 15.217 (see 36.401 for construction contracts). Contracting officers shall use the U.S. Code citation applicable to their agency. Note that

15.216 and 15.217 each list only one authority and that its applicability is not extended by this regulation to agencies not already subject to that authority. Each negotiated contract shall contain a reference to the specific authority under which it was negotiated. When appropriate, priorities for use of a specific negotiation authority are included in the limitations paragraphs of this subpart.

15.201 National emergency.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(1) or 41 U.S.C. 252(c)(1) (see 15.200).

(2) Purchases and contracts may be negotiated if determined to be necessary in the public interest during a national emergency declared by Congress or the President. At present, a state of national emergency exists by reason of Presidential Proclamation No. 2914 of December 16, 1950.

(b) *Application.* (1) As required by 41 U.S.C. 252(c)(1) and 10 U.S.C. 2304(a)(1), it has been determined necessary in the public interest during this period of national emergency that contracts be negotiated by executive agencies under these authorities—

(i) In keeping with the labor surplus area set-aside program; and

(ii) For unilateral small business set-asides.

(2) In addition, it has been determined for those agencies subject to 10 U.S.C 2304(a)(1) (see 15.200(b)) that contracts may be negotiated under this authority in the following instances—

(i) For disaster area programs;

(ii) For the total or any part of the requirements set aside that are not filled by awards made in accordance with the terms of the Notice of Labor Surplus Area Set-Aside, when the use of formal advertising is not feasible and practicable under the circumstances and no other negotiation authority is more appropriate; and

(iii) To place the total or any part of the requirements set aside (unilateral or joint) that are not filled by awards to small business concerns when the use of formal advertising is not feasible and practicable under the circumstances and no other negotiation authority is more appropriate.

(c) *Limitations.* These authorities shall not be used when negotiation is authorized under 15.206 except that, in the event of a labor surplus area or small business set-aside, these authorities shall be used in preference to any other negotiation authority. These authorities shall not be used to negotiate a reasonable price with a responsible low small business bidder whose bid the contracting officer has determined to be unreasonable under Small Business Restricted Advertising procedures. When such an unreasonable bid is received, the contracting officer shall dissolve the set-aside and solicit offers on an unrestricted basis by the use of formal advertising if feasible and practicable or, if appropriate, by other negotiation authority.

15.202 Public exigency.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(2) or 41 U.S.C. 252(c)(2) (see 15.200).

(2) Purchases and contracts may be negotiated if the public exigency will not permit the delay incident to advertising.

(b) *Application.* In order to use these authorities, the need must be compelling and of unusual urgency (*as when the Government would be seriously injured, financially or otherwise, if the supplies or services were not furnished by a certain date, and if they could not be purchased by that date by means of formal advertising*). These authorities apply regardless of whether the urgency could or should have been foreseen. When negotiating under these authorities, competition to the maximum extent practicable, within the time allowed, shall be obtained.

(c) *Limitations.* Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the contracting officer (15.307). These authorities shall not be used when negotiation is authorized for purchases not in excess of the applicable small purchase limitation in Part 13 (see 15.203) or for purchase outside the United States (see 15.206).

15.203 Purchases under the small purchase limitation.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(3) or 41 U.S.C. 252(c)(3) (see 15.200).

(2) Purchases and contracts may be negotiated if the aggregate amount involved is not in excess of the applicable small purchase limitation in Part 13.

(b) *Application.* Purchases or contracts aggregating not more than the applicable small purchase limitation in Part 13 shall be made using the small purchase procedures (see Part 13).

(c) *Limitations.* These authorities shall not be used when negotiation is authorized for purchases outside the United States (15.206). When small business set-asides are made, the authority for unilateral set-asides (15.201) or for joint set-asides (15.215) shall be cited. When negotiations have been initiated under another authority in this subpart, that authority shall be cited as the negotiation authority for any resulting contract, even though one or more contracts of less than the applicable small purchase limitation in Part 13 may result.

15.204 Personal or professional services.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(4) or 41 U.S.C. 252(c)(4) (see 15.200).

(2) Purchases and contracts may be negotiated for personal or professional services.

(b) *Application.* These authorities shall be used only when all of the following conditions have been satisfied:

(1) If personal services, they must be performed by an individual and not by a concern (professional services, on the other hand, may be performed by an individual contractor in person or by a concern or organization) (see Part 37).

(2) The services are of a professional nature, or are to be performed under Government supervision and paid for on a time basis.

(3) Acquisition of the services is authorized by law and is accomplished in accordance with requirements of any such law and applicable agency procedures.

(c) *Limitations.* These authorities shall not be used to negotiate contracts for services when any other authority in this subpart is available and appropriate.

15.205 Services of educational institutions.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(5) or 41 U.S.C. 252(c)(5) (see 15.200).

(2) Purchases and contracts may be negotiated for any service to be rendered by any university, college, or other educational institution.

(b) *Application.* Examples of services by a university, college, or other educational institution that may be contracted for under these authorities are:

(1) Educational or vocational training services rendered in connection with the training and education of personnel, and for related necessary material, services, and supplies.

(2) Experimental, developmental, or research work (including services, tests, and reports necessary or incidental to this work), and related reports.

(3) Analyses, studies, or reports.

(c) *Limitations.* Except as authorized for Educational Service Agreements, these authorities shall not be used when negotiation is authorized for purchases not in excess of the applicable small

purchase limitation in Part 13 (15.203) or for purchases outside the United States (15.206).

15.206 Purchases outside the United States.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(6) or 41 U.S.C. 252(c)(6) (see 15.200).

(2) Purchases and contracts may be negotiated if the supplies or services are to be acquired and used outside the United States, its possessions, its territories, and Puerto Rico.

(b) *Application.* These authorities shall be used only to acquire supplies or services that are actually purchased from sources outside and used outside the limits of the United States, its possessions, its territories, and Puerto Rico, such as supplies or services (including construction) for overseas installations or for the use of overseas personnel.

(c) *Limitations.* When these authorities are available for the negotiation of a contract, no other negotiation authority shall be used, nor shall formal advertising be used.

15.207 Medicines or medical supplies.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(7) or 41 U.S.C. 252(c)(7) (see 15.200).

(2) Purchases and contracts may be negotiated for medicines or medical supplies.

(b) *Application.* These authorities shall be used only for supplies that are peculiar to the field of medicine, including technical equipment such as surgical and orthopedic appliances, X-ray supplies and equipment, and the like, but not including prosthetic equipment.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the contracting officer (see 15.307). These authorities shall not be used when negotiation is authorized for purchases not in excess of the applicable small purchase limitation in Part 13 (15.203), or for purchases outside the United States (15.206).

(2) Whenever it is determined to be practicable, suitable advance publicity shall be given regarding the supplies involved and other relevant considerations for a period of at least 15 days before contracting under these authorities.

15.208 Supplies purchased for authorized resale.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(8) or 41 U.S.C. 252(c)(8) (see 15.200).

(2) Purchases and contracts may be negotiated for supplies purchased for authorized resale.

(b) *Application.* These authorities shall be used only for purchases for resale through commissaries or other similar facilities. Ordinarily, these purchases will involve only brand name or proprietary articles desired or preferred by customers of the selling activities.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying their use and signed by the contracting officer (see 15.307). These authorities shall not be used when negotiation is authorized for purchases not in excess of the applicable small purchase limitation in Part 13 (15.203), for purchase outside the United States (15.206), or for subsistence supplies (15.209).

(2) Whenever it is determined to be practicable, suitable advance publicity shall be given regarding the supplies involved and other relevant considerations for a period of at least 15 days before contracting under these authorities.

15.209 Subsistence supplies.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(9) or 41 U.S.C. 252(c)(9) (see 15.200).

(2) Purchases and contracts may be negotiated for perishable or nonperishable subsistence supplies.

(b) *Application.* These authorities may be used for the purchase of any kind of subsistence supplies.

(c) *Limitations.* These authorities shall not be used when negotiation is authorized for purchases not in excess of the applicable small purchase limitation in Part 13 (15.203) or for purchases outside the United States (15.206).

15.210 Impracticable to secure competition by formal advertising.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(10) or 41 U.S.C. 252(c)(10) (see 15.200).

(2) Purchases and contracts may be negotiated for supplies or services for which it is impracticable to secure competition by formal advertising.

(b) *Application.* Illustrative circumstances in which these authorities may be used are:

(1) When supplies or services can be obtained only from one person or firm ("sole source of supply").

(2) When competition is precluded because of the existence of patent rights, copyrights, secret processes, control of basic raw material, or similar circumstances (however, the mere existence of such rights or circumstances does not in and of itself justify the use of these authorities) (see Part 27).

(3) When bids have been solicited using formal advertising (see Part 14), and no responsive bid has been received from a responsible bidder, or step one of two-step formal advertising results in no or only one acceptable technical proposal.

(4) When bids have been solicited using formal advertising (see Part 14), and the responsive bid or bids do not cover the quantitative requirements of the invitation for bids, in which case negotiation is permitted for the remaining requirements.

(5) When acquiring electric power or energy, gas (natural or manufactured), water, or other utility services, or when the contemplated contract is for construction of a part of a utility system and it would not be practicable to allow a contractor other than the utility company itself to work upon the system.

(6) When acquiring training film, motion picture production, manuscripts, or similar products or services.

(7) When acquiring technical nonpersonal services involving the assembly, installation, or servicing (or instruction in these matters) of equipment of a highly technical or specialized nature.

(8) When acquiring studies or surveys other than those calling for services of educational institutions (15.205) or for experimental, developmental, or research work (15.211).

(9) When acquiring construction, maintenance, repairs, alterations, or inspection, and the exact nature or amount of the work to be done is not known.

(10) When acquiring stevedoring, terminal, warehousing, or switching services, and the rates either are (i) established by law or regulation or (ii) so numerous or complex that it is impracticable to set them forth in the specifications of an invitation for bids.

(11) When acquiring commercial transportation, including (i) services for the operation of Government-owned vehicles, vessels, or aircraft and (ii) time, space, trip, and voyage charters, except for transportation services furnished by common carriers (for which negotiation is authorized under 15.215, and Section 321 of the Transportation Act of 1940, 49 U.S.C. 10721).

(12) When acquiring services related to the acquisition of perishable subsistence (such as protective storage, icing, processing, packaging, handling, and transportation), when it is impracticable to advertise for such

services a sufficient time in advance of the delivery of the perishable subsistence.

(13) When it is impossible to draft, for an invitation for bids, adequate specifications or any other adequately detailed description of the required supplies or services.

(14) When acquiring, under applicable agency regulations, storage (and related services) of household goods.

(15) When acquiring parts or components as replacement parts in support of equipment specially designed by the manufacturer, when the data available are not adequate to assure that the part or component will perform the same function in the equipment as the part or component it is to replace.

(16) When the proposed contract is for facilities (as defined in 45.301), and the performance required can be obtained from only one person or firm.

(17) When acquiring construction where a contractor or group of contractors is already at work on the site, and it would not be practicable to allow another contractor or an additional contractor to work on the same site, or when the amount is too small to interest other contractors to mobilize and demobilize.

(18) When the contemplated acquisition is to be reimbursed by a foreign country and requires that the product be obtained from a particular firm as specified in a Letter of Agreement or other written direction.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the contracting officer (15.307).

(2) These authorities shall not be used when negotiation is authorized by any other authority, except that these authorities shall be used if appropriate in preference to the authorities to negotiate purchases not to be publicly disclosed (15.212) and for foreign military sales (as illustrated in subparagraph (b)(18) above).

(3) The applications illustrated in subparagraphs (b)(3) and (4) above shall not be used when Small Business Restricted Advertising has been used (see Subpart 19.5). However, these authorities may be used in the case of partial set-asides, unless the contracting officer decides that the failure to obtain sufficient responsive bids was caused by the existence of the set-asides (see 15.201).

15.211 Experimental, developmental, or research work.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(11) or 41 U.S.C. 252(c)(11) (see 15.200).

(2) Purchases and contracts may be negotiated for supplies or services that the agency head determines to be for experimental, developmental, or research work, or for making or furnishing supplies for experiment, test, development, or research.

(b) *Application.* Illustrative circumstances in which these authorities might be used are—

(1) Contracts relating to theoretical analysis, exploratory studies, and experiment in any field of science or technology;

(2) Developmental contracts calling for the practical application of investigative findings and theories of a scientific or technical nature;

(3) Contracts for such quantities and kinds of equipment, supplies, parts, accessories, or patent rights to these, and drawings or designs of them, as are necessary for experiment, development, research, or test; and

(4) Contracts for services, tests, and reports necessary or incidental to experimental, developmental, or research work.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority (see 15.307 for signatory authority).

(2) These authorities shall not be used for—

(i) Purchases not in excess of the applicable small purchase limitation in Part 13 when negotiation could be authorized under 15.203, or for purchases outside the United States when negotation could be authorized under 15.206;

(ii) Negotiated contracts with educational institutions, which shall be negotiated in accordance with 15.205; or

(iii) Contracts for quantity production, except that quantities necessary to permit complete and adequate experiment, development, research, or testing may be purchased under these authorities. (Research or development contracts calling for the production of a reasonable number of experimental or test models or prototypes are not contracts for quantity production.)

15.212 Purchases not to be publicly disclosed.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(12) or 41 U.S.C. 252(c)(12) (see 15.200).

(2) Purchases and contracts may be negotiated for supplies or services whose acquisition the agency head determines should not be publicly disclosed because of their character, ingredients, or components.

(b) *Application.* These authorities may be used for purchases or contracts classified "Confidential" or higher, or when, because of other considerations, the contract should not be publicly disclosed.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the agency head (see 15.307).

(2) These authorities shall not be used in preference to any other authority in 15.201 through 15.217, except as provided in 15.204(c).

15.213 Technical equipment requiring standardization and interchangeability of parts.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(13) or 41 U.S.C. 252(c)(13) (see 15.200).

(2) Purchases and contracts may be negotiated for equipment that the the agency head determines to be technical equipment for which (i) standardization and interchangeability of parts are necessary in the public interest and (ii) acquisition by negotiation is necessary to ensure that standardization and interchangeability.

(3) In addition, 41 U.S.C. 252(c)(13) requires that, if its authority is to be used, the agency head must determine that acquisition without advertising "is necessary in special situations or in particular localities in order to assure standardization of equipment and interchangeability of parts and such standardization and interchangeability are necessary in the public interest."

(b) *Application.* (1) These authorities may be used to acquire additional units and replacement items of specified makes and models of technical equipment and parts—

(i) When 41 U.S.C. 252(c)(13) applies for use in special situations or in particular localities; or

(ii) When technical requirements of the armed forces or other agencies are involved, and the equipment or parts have been adopted as standard items of supply in accordance with agency procedures and are—

(A) For forces whose primary mission is to participate in combat or for their integral supporting elements;

(B) An integral part of or used in direct support of a weapons system; or

(C) For use in Alaska or Hawaii or outside the rest of the United States, in theaters of operations, on board maritime vessels, or at advanced or detached bases.

(2) These authorities may be used, for example—

(i) To limit the variety and quantity or parts that must be carried in stock;

(ii) To make available, by standardization, parts that may be interchanged among items of damaged or worn equipment;

(iii) To acquire from selected suppliers technical equipment that is available from a number of suppliers but that otherwise would vary so in performance or design characteristics (notwithstanding detailed specifications and rigid inspection) as to prevent standardization and interchangeability of parts; or

(iv) To provide a uniform configuration of equipment for material programmed for Military Assistance Program countries.

(3) Before an agency decides to acquire specified makes and models under these authorities, it shall consider—

(i) The feasibility, from an economical and timely deployment standpoint, of distributing or redistributing on a selected geographic basis the equipment and parts already in the supply system;

(ii) The practicability or economy of using or developing an agency design that would permit standardization of components and parts under an agency standardization program;

(iii) Whether standardization will impair the capability of industry to meet mobilization requirements of all agencies;

(iv) The practicability of interchanging parts and cannibalizing equipment;

(v) Whether future acquisition of the selected item of equipment can be effected at reasonable prices;

(vi) Whether standardization will appreciably reduce the variety and quantity of parts that must be carried in stock;

(vii) Whether standardization will render obsolete large dollar value inventories of equipment and supporting parts already in the supply system, without compensating benefits;

(viii) Whether standardization will enhance agency mission capability;

(ix) Possible savings in training personnel or in acquiring technical literature;

(x) Whether the standardization will adversely affect existing specifications and standards;

(xi) The degree to which the current design of the specified make and model has been changed from the design of the equipment in the supply system;

(xii) In cases when agency mission capability is not overriding, whether the benefits and/or cost savings anticipated from standardization will equal or exceed those to be expected from unrestricted competition.

(4) In arriving at a determination to standardize under these authorities, the originating agency shall consult other user agencies, as appropriate, in order to ensure the full benefit of the action.

(5) Standardization approval under these authorities shall be for a stated period bearing a reasonable relationship to the life of the equipment. Agency procedures shall provide for periodic reviews to determine whether the standardization should be continued, revised, or canceled.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the agency head (see 15.307).

(2) These authorities shall not be used for initial acquisitions of equipment or spare parts, or to select arbitrarily the equipment or parts of certain suppliers. If supplies subsequently might possibly be standardized for applications specified in 15.213(b)(1), see paragraph (d) below.

(3) These authorities shall not be used unless the agency head determines that—

(i) The equipment constitutes technical equipment;

(ii) Standardization of the equipment and interchangeability of its parts are necessary in the public interest; and

(iii) When 41 U.S.C. 252(c)(13) applies, negotiation is necessary in special situations or in particular localities to ensure required standardization and interchangeability; or

(iv) When 10 U.S.C. 2304(a)(13) applies, acquisition of the equipment or of its parts by negotiation is necessary to ensure the necessary standardization and interchangeability of its parts.

(4) Each agency shall maintain, on a current basis, a master list of items for which determinations and findings have been made under these authorities.

(d) *Approval for using standardization solicitation provision.* The contracting officer shall obtain the approval of the chief of the contracting office before using the provision at 52.215-4, Notice of Possible Standardization (see 15.213(c) and 15.407(b)).

15.214 Negotiation after advertising.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(15) or 41 U.S.C. 252(c)(14) (see 15.200).

(2) Purchases and contracts may be negotiated for supplies or services for which the agency head determines that bid prices received after formal advertising are unreasonable as to all or part of the requirements, or were not independently reached in open competition.

(b) *Application.* These authorities shall be used only when the agency head determines, in accordance with the requirements of 15.307, that bid prices, after formal advertising for such supplies or services, are unreasonable or were not independently reached in open competition. Indications of possible violation of antitrust laws or collusive bidding are to be reported to the Department of Justice as provided in 3.303.

(c) *Limitations.* (1) Every contract negotiated under these authorities shall be supported by a determination and findings justifying the use of the appropriate authority and signed by the agency head or, where permitted by law, the agency head's designee (see Table 15-1 in 15.307).

(2) After such determination, and after rejection of all bids, no negotiated purchase or contract shall be entered into unless—

(i) Prior notice of intention to negotiate and a reasonable opportunity to negotiate have been given by the contracting officer to each responsible bidder that submitted a bid in response to the invitation for bids;

(ii) The negotiated price is the lowest negotiated price offered by any responsible supplier; and

(iii) The negotiated price is lower than the lowest rejected bid price of a responsible bidder, as determined by the agency head.

15.215 Otherwise authorized by law.

(a) *Authorities.*

(1) Citation: 10 U.S.C. 2304(a)(17) or 41 U.S.C. 252(c)(15) (see 15.200).

(2) Purchases and contracts may be negotiated if otherwise authorized by law.

(b) *Application.* This statutory provision preserves the authority to negotiate contracts conferred by other legislation. For example, the Small Business Act (15 U.S.C. 644(a) Supp V, 1981), is the basis for the negotiation of contracts set aside for small business concerns through joint determinations.

(1) When negotiating pursuant to this authority, cite the authorizing law in the purchase or contract instrument.

(2) When 10 U.S.C. 2304(a)(17) applies, this authority shall be used only to the extent authorized by agency acquisition regulations.

(3) When 41 U.S.C. 252(c)(15) applies—

(i) The requirement of 41 U.S.C. 254 (concerning such matters as contingent fees, examination of records, and

various aspects of cost-type contracting) shall also apply; and

(ii) Other statutory authority of an agency to acquire "without advertising" or "without regard to section 3709 of the Revised Statutes" is construed to authorize negotiation pursuant to 41 U.S.C. 252(c)(15) and without regard to the advertising requirements of 41 U.S.C. 252(c) and 253.

15.216 Technical or specialized supplies requiring substantial initial investment or extended period of preparation for manufacture.

(a) *Authority.*

(1) Citation: 10 U.S.C. 2304(a)(14). 41 U.S.C. 252(c) contains no comparable negotiation authority (see 15.200).

(2) A purchase or contract may be negotiated for technical or special supplies if the agency head determines—

(i) That they require a substantial initial investment or an extended period of preparation for manufacture; and

(ii) That formal advertising (A) would be likely to result in additional cost to the Government because of duplication of investment or (B) would result in duplication of necessary preparation that would delay the acquisition unduly.

(b) *Application.* (1) This authority may be used to acquire technical or specialized supplies such as aircraft, tanks, radar, guided missiles, rockets, and similar items; their major components; and any supplies of a technical or specialized nature that may be needed for their use or operation. Such acquisition generally involves—

(i) High starting costs already paid for by the Government or by the supplier;

(ii) Preliminary engineering and development work that would not be useful to or usable by any other supplier;

(iii) Elaborate special tooling already acquired;

(iv) Substantial time and effort already expended in developing a prototype or an initial production model; or

(v) Important design changes that will continue to be developed by the supplier.

(2) This authority will, in general, be used in situations when it is preferable to place a production contract with the supplier that developed the equipment. In such instances, the Government would (i) be assured of the benefit of the techniques, tooling, and equipment already acquired by that supplier, or (ii) avoid undue delay arising from a new supplier having to acquire such techniques, tooling, and equipment. However, this exception should not be used to avoid duplication of private investment, unless the duplication would be likely to result in additional cost to the Government.

(c) *Limitations.* This authority shall not be used unless the agency head determines, in accordance with the requirements of 15.307, that—

(1) The supplies are of a technical or special nature requiring a substantial initial investment or an extended period of preparation for manufacture; and

(2) Contracting by formal advertising either—

(i) Would be likely to result in additional cost to the Government by reason of duplication of investment; or

(ii) Would result in duplication of necessary preparation that would unduly delay the acquisition.

15.217 Purchases in the interest of national defense or industrial mobilization.

(a) *Authority.*

(1) Citation: 10 U.S.C. 2304(a)(16). 41 U.S.C. 252(c) contains no comparable negotiation authority (see 15.200).

(2) Purchases and contracts may be negotiated if the agency head determines that (i) it is in the interest of national defense to have a plant, mine, or other facility, or a producer, manufacturer, or other supplier available for furnishing property or services in case of a national emergency; or (ii) the interest of industrial mobilization in case of such an emergency, or the interest of national defense in maintaining active engineering, research, and development, would otherwise be subserved.

(b) *Application.* This authority may be used to implement plans and programs developed under the direction of the agency head to provide an industrial mobilization base that can meet production requirements for essential supplies and services. Use of this authority should be considered, for instance, when it is necessary to—

(1) Keep vital facilities or suppliers in business or make them available in the event of a national emergency;

(2) Train a selected supplier in the furnishing of critical supplies or services, prevent the loss of a supplier's ability and employees' skills, or maintain active engineering, research, and development work;

(3) Maintain properly balanced sources of supply for meeting the requirements of acquisition programs in the interest of industrial mobilization (when the quantity required is substantially larger than the quantity that must be awarded in order to meet the objectives of this authority, that portion not required to meet such objectives will ordinarily be acquired by formal advertising or by negotiation under another negotiation authority);

(4) Limit competition for current acquisition of selected supplies or services approved for production planning under the Industrial Preparedness Program to planned producers with whom industrial preparedness agreements for those items exist, or limit award to offerors who agree to enter into industrial preparedness agreements;

(5) Create or maintain the required domestic capability for production of critical supplies by limiting competition to items manufactured in the United States or the United States and Canada (it is not necessary to use this negotiation authority when acquiring items covered by Subpart 8.2, Jewel Bearings and Related Items);

(6) Continue in production contractors that are manufacturing critical items when there would otherwise be a break in production; or

(7) Divide current production requirements among two or more contractors to provide for an adequate industrial mobilization base.

(c) *Limitations.* Every contract negotiated under this authority shall be supported by a determination and findings justifying its use and signed by the agency head (see 15.307). This authority shall not be used unless the agency head determines, in accordance with the requirements of Subpart 15.3, that—

(1) It is in the interest of national defense to have a particular plant, mine, or other facility or a particular producer, manufacturer, or other supplier available for furnishing supplies or services in case of a national emergency, and negotiation is necessary to that end;

(2) The interest of industrial mobilization in case of a national emergency would be subserved by negotiation with a particular supplier; or

(3) The interest of national defense in maintaining active engineering, research, and development, would be subserved by negotiation with a particular supplier.

SUBPART 15.3—DETERMINATIONS AND FINDINGS TO JUSTIFY NEGOTIATION

15.300 Scope of subpart.

This subpart prescribes policies and procedures for the use of determinations and findings (D&F's) to justify the use of negotiation in lieu of formal advertising. Requirements for D&F's for other actions can be found with the appropriate subject matter.

15.301 Definition.

"Determination and findings" (D&F) means a special form of written approval by an authorized official that is required by statute or regulation as a prerequisite to taking certain contracting actions. The "determination" is a conclusion or decision supported by the "findings." The findings are statements of fact or rationale essential to support the determination and must cover each requirement of the statute or regulation.

15.302 General.

(a) A D&F is required to authorize use of certain statutory authorities for contracting by negotiation in lieu of formal advertising. Paragraph (c), "Limitations," under the negotiation authorities described in Subpart 15.2 states whether a D&F is required (see also 15.307).

(b) A D&F shall ordinarily be for an individual purchase or contract. Under the procedures described in 15.303, class D&F's may be executed for classes of purchases or contracts.

(c) The approval to negotiate granted by a D&F is restricted to the proposed acquisition(s) reasonably described in that D&F. D&F's may provide for a reasonable degree of flexibility, if such flexibility is not inconsistent with the negotiation authority involved. Furthermore, in the application of an approved D&F to a negotiation situation, reasonable variations in estimated quantities or prices are permitted, unless the D&F specifies otherwise.

(d) When an option is anticipated, the D&F shall state the approximate quantity to be awarded initially and the extent of the increase to be permitted by the option.

15.303 Class D&F's.

(a) A class D&F authorizes negotiation of classes of purchases or contracts. A class may consist of the same or related supplies or services, or require essentially identical justification under the same negotiation authority.

(b) The findings in a class D&F shall fully support the use of the proposed negotiation authority either for the class of items as a whole or for each item.

(c) A class D&F shall be for a specified period, with the expiration date stated in the document.

(d) A class D&F shall not be construed to authorize negotiation of any purchase or contract within the class that feasibly and practicably could be accomplished through formal advertising.

15.304 Content.

Each D&F shall set forth enough facts and circumstances to clearly and convincingly justify the specific determination made and establish that the use of formal advertising would not be feasible or practicable. As a minimum, each D&F shall include, in the prescribed agency format, the following information:

(a) Identification of the agency and of the contracting activity, and specific identification of the document as a "Determination and Findings."

(b) Nature and/or description of the action being approved.

(c) Citation of the appropriate statute and/or regulation upon which the D&F is based (see Subpart 15.2).

(d) Findings that detail the particular circumstances, facts, or reasoning essential to support the determination. Necessary supporting documentation shall be obtained from appropriate requirements and technical personnel.

(e) A determination, based on the findings, that the proposed action is justified under the applicable statute or regulation.

(f) Expiration date of the D&F, if required (see 15.306).

(g) The signature of the official authorized to sign the D&F (see 15.307) and the date signed.

15.305 Supersession, modification, and cancellation.

(a) If a D&F is superseded by another D&F, that action shall not render invalid any action taken under the original D&F.

(b) A modification of the D&F will not require cancellation of the solicitation if the D&F, as modified, supports negotiation under any applicable statutory authority.

(c) If a D&F is canceled, but the facts continue to support negotiation under a statutory authority for which a D&F is not required (see Subpart 15.2), cancellation of the solicitation is not required.

15.306 Expiration.

Expiration dates are required for class D&F's and are optional for individual D&F's. Authority to act under a D&F expires when it is exercised or on an expiration date specified in the document, whichever occurs first. When a request for proposal has been furnished to prospective offerors before the expiration date, the authority under the D&F will continue until award of the contract(s) resulting from that solicitation.

15.307 Signatory authority.

When a D&F is required, it shall be signed by the appropriate official in accordance with agency regulations before the solicitation is issued. Authority to sign and/or delegate signature authority for D&F's approving use of various negotiation authorities is as shown in Table 15-1. Under the applicable statutes, agency heads may not delegate their authority to sign D&F's except as shown in Table 15-1.

Table 15-1. Signatory Authority

Negotiation Authority	Signatory Authority
Public Exigency (see 15.202) Medicines/Medical Supplies (see 15.207) Supplies Purchased for Authorized Resale (see 15.206) Impracticable to Secure Competition (see 15.210)	Individual D&F's may be signed by the contracting officer. Class D&F's shall be signed by the agency head or any agency official to whom such authority is delegated.
Experimental, Developmental, or Research Work (see 15.211)	
(For agencies subject to 10 U.S.C. 2304(a)(11))	Individual D&F's for contracts negotiated under 10 U.S.C. 2304(a)(11) shall be signed by the agency head when more than $5,000,000 will be expended. Unless reserved to a higher organizational level by agency regulations, the D&F may be signed by the contracting officer when neither the contract nor any single modification will be over $5,000,000. When it is known in advance that the scope of the contract will be expanded to include additional phases or when it will be incrementally funded, total estimated costs will be used to determine the level of signature. Authority to make class D&F's for contracts negotiated under 10 U.S.C. 2304(a)(11) may be delegated by the agency head, provided that any such delegation related to (a)(11) shall limit individual transactions under a class to $5,000,000 or less.
(For agencies subject to 41 U.S.C. 252(c)(11))	Individual D&F's for contracts negotiated under 41 U.S.C. 252(c)(11) shall be signed by the agency head when more than $25,000 will be obligated. Authority to sign D&F's may be delegated to a chief officer responsible for contracting when neither the contract nor any single modification will be over $25,000. When it is known in advance that the scope of the contract will be expanded to include additional phases or when it will be incrementally funded, total estimated costs will be used to determine the level of signature. Class D&F's for contracts negotiated under 41 U.S.C. 252(c)(11) shall be signed only by the agency head.
Purchases Not to be Publicly Disclosed (see 15.212) Technical Equipment Requiring Standardization and Interchangeability of Parts (see 15.213)	Both individual and class D&F's shall be signed only by the agency head.

Table 15-1. Signatory Authority—Continued

Negotiation Authority	Signatory Authority
Technical Specialized Supplies Requiring Substantial Initial Investment or Extended Period of Preparation for Manufacturing (applicable to agencies under 10 U.S.C. only) (see 15.216)	
Purchases in the Interest of National Defense or Industrial Mobilization (applicable to agencies under 10 U.S.C. only) (see 15.217)	
Negotiation After Formal Advertising (see 15.214)	
(For agencies subject to 10 U.S.C. 2304(a)(15))	Both individual and class D&F's for contracts negotiated under 10 U.S.C. 2304(a)(15) shall be signed only by the agency head.
(For agencies subject to 41 U.S.C. 252(c)(14))	Both individual and class D&F's for contracts negotiated under 41 U.S.C. 252(c)(14) shall be signed by the agency head or any official to whom such authority is delegated.

SUBPART 15.4—SOLICITATION AND RECEIPT OF PROPOSALS AND QUOTATIONS

15.400 Scope of subpart.

This subpart prescribes policies and procedures for (a) preparing and issuing requests for proposals (RFP's) and requests for quotations (RFQ's) and (b) receiving proposals and quotations.

15.401 Applicability.

This subpart applies to solicitations issued when contracting by negotiation, except—

(a) Small purchases (see Part 13);

(b) Small business restricted advertising and other types of restricted advertising (see Part 14); and

(c) Two-step formal advertising (see Subpart 14.5).

15.402 General.

(a) Requests for proposals (RFP's) or requests for quotations (RFQ's) are used in negotiated acquisitions to communicate Government requirements to prospective contractors and to solicit proposals or quotations from them. Except as permitted by paragraph (f) below, contracting officers shall issue written solicitations. Solicitations shall contain the information necessary to enable prospective contractors to prepare proposals or quotations properly. Solicitation provisions and contract clauses may be incorporated into solicitations and contracts by reference, when authorized by Subpart 52.1.

(b) Contracting officers shall furnish identical information concerning a proposed acquisition to all prospective contractors. Government personnel shall not provide the advantage of advance knowledge concerning a future solicitation to any prospective contractor (but see 5.404, 15.404, and 15.405).

(c) Except for solicitations for information or planning purposes (see subparagraph (e)(1) below and 15.405), contracting officers shall solicit proposals or quotations only when there is a definite intention to award a contract. Subpart 7.3 provides additional instructions for solicitations involving cost comparisons between Government and contractor performance.

(d) A proposal received in response to an RFP is an offer that can be accepted by the Government to create a binding contract, either following negotiations or, when authorized by 15.610, without discussion. Contracting officers should normally issue RFP's when they consider it reasonable to expect prospective contractors to respond with offers, even though they anticipate negotiations after receipt of offers. An RFP shall not be used for a solicitation for information or planning purposes. Solicitations involving cost comparisons between Government and contractor performance (see 7.302(b)) are not for information or planning purposes.

(e) A quotation received in response to an RFQ is not an offer and cannot be accepted by the Government to create a binding contract. It is informational in character. An RFQ may be used when the Government does not intend to award a contract on the basis of the solicitation but wishes to obtain price, delivery, or other market information for planning purposes (see 15.405).

(f) Oral solicitations are authorized for perishable subsistence. An oral solicitation may also be used when processing a written solicitation would delay the acquisition of supplies or services to the detriment of the Government. Use of an oral solicitation does not relieve the contracting officer from complying with other requirements of this regulation. In addition to other applicable documentation requirements (see Subpart 4.1), documentation of oral solicitations shall include—

(1) A justification for use of an oral solicitation;

(2) Item description, quantity, and delivery schedule;

(3) Sources solicited, including the date, time, name of individual contacted, and prices quoted; and

(4) The solicitation number provided to the prospective contractors.

15.403 Solicitation mailing lists.

Contracting offices shall establish, maintain, and use lists of potential sources in accordance with 14.205.

15.404 Presolicitation notices and conferences.

(a) *General.* Presolicitation notices and conferences may be used as preliminary steps in negotiated acquisitions in order to—

(1) Develop or identify interested sources;

(2) Request preliminary information based on a general description of the supplies or services involved;

(3) Explain complicated specifications and requirements to interested sources; and

(4) Aid prospective contractors in later submitting proposals without undue expenditure of effort, time, and money.

(b) *Presolicitation notices.* (1) When presolicitation notices are used, the contracting officer shall prepare and issue the notice to potential sources and shall synopsize the notice in accordance with Subpart 5.2.

(2) Each presolicitation notice shall—

(i) Define as explicitly as possible the information to be furnished in the response;

(ii) Indicate whether it is contemplated that the presolicitation notice will be followed by a conference and a formal solicitation; and

(iii) Request an expression of interest in the contemplated acquisition by a specified date.

(3) In complex acquisitions, the presolicitation notice may also request information pertaining to management, engineering, and production capabilities. Detailed drawings, specifications, or plans will not normally be included with a presolicitation notice.

(4) The contracting officer shall furnish copies of the solicitation to (i) all those responding affirmatively to the presolicitation notice and (ii) other prospective contractors upon their request (but see Subpart 9.4, Debarment, Suspension, and Ineligibility).

(c) *Presolicitation conferences.* (1) The presolicitation conference may be used only when approved at a level higher than the contracting officer. It shall not be used as a method for prequalification of offerors.

(2) The contracting officer shall—

(i) Advise all organizations responding to the presolicitation notice of the details of any pending presolicitation conference;

(ii) Conduct the conference and arrange for technical and legal personnel to attend, as appropriate; and

(iii) Furnish copies of the solicitation to all organizations attending the conference, unless they decline to participate in the acquisition.

15.405 Solicitations for information or planning purposes.

15.405-1 General.

When information necessary for planning purposes cannot be obtained from potential sources by more economical and less formal means, the contracting officer may determine in writing that a solicitation for information or planning purposes is justified. If this determination is approved, in accordance with agency procedures, at a level higher than that of the contracting officer, the contracting officer shall then issue the solicitation.

15.405-2 Solicitation provision.

The contracting officer shall insert on the face of each solicitation (other than those excluded by 15.401) issued for information or planning purposes the provision at 52.215-3, Solicitation for Information or Planning Purposes.

15.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).

15.406-1 Uniform contract format.

(a) Contracting officers shall prepare solicitations and resulting contracts using the uniform contract format outlined in Table 15-2. The format facilitates preparation of the solicitation and contract, as well as reference to and use of those documents by offerors and contractors. The uniform contract format is optional for acquisitions outside the United States, its possessions, its territories, and Puerto Rico. It does not apply to the following:

(1) Basic agreements (see 16.702).

(2) Construction and architect-engineer contracts (see Part 36).

(3) Shipbuilding (including design, construction, and conversion), ship overhauls, and ship repairs.

(4) Subsistence.

(5) Contracts requiring special contract forms prescribed elsewhere in this regulation that are inconsistent with the uniform contract format.

(6) Contracts exempted by the agency head or a designee.

(b) Solicitations to which the uniform contract format applies shall include Parts I, II, III, and IV (see 15.406-2 through 15.406-5). Upon award, contracting officers shall not physically include Part IV in the resulting contract, but shall retain in their contract file Section K, Representations, certifications, and other statements of offerors, as completed by the contractor. Award by acceptance of a proposal on the award portion of SF 33 or SF 26 incorporates Section K by reference in the resultant contract. Contracts requiring a bilateral document shall incorporate Section K by reference in the signed contract.

TABLE 15-2

Uniform Contract Format

Section	Title
	Part I—The Schedule
A	Solicitation/contract form
B	Supplies or services and prices/costs
C	Description/specifications/ work statement
D	Packaging and marking
E	Inspection and acceptance
F	Deliveries or performance
G	Contract administration data
H	Special contract requirements
	Part II—Contract Clauses
I	Contract clauses
	Part III—List of Documents, Exhibits, and Other Attachments
J	List of attachments
	Part IV—Representations and Instructions
K	Representations, certifications, and other statements of offerors or quoters
L	Instructions, conditions, and notices to offerors or quoters
M	Evaluation factors for award

15.406-2 Part I—The Schedule.

The contracting officer shall prepare the contract Schedule as follows:

(a) *Section A, Solicitation/contract form.*

(1) Prepare RFP's on Standard Form 33, Solicitation, Offer and Award (53.301-33), unless otherwise permitted by Part 53. The first page of the SF 33 is the first page of the solicitation and includes section A of the uniform contract format.

(2) Prepare RFQ's on Standard Form 18, Request for Quotations (53.301-18). Agencies may overprint the SF 18 to provide for Section A of the uniform contract format.

(3) When neither SF 33 nor SF 18 is used, include the following on the first page of the solicitation:

(i) Name, address, and location of issuing activity, including room and building where proposals or quotations must be submitted.

(ii) Solicitation number.

(iii) Date of issuance.

(iv) Closing date and time.

(v) Number of pages.

(vi) Requisition or other purchase authority.

(vii) Brief description of item or service.

(viii) Requirement for the offeror or quoter to provide its name and complete address, including street, city, county, State, Zip code, and the Data Universal Numbering System (DUNS) Number applicable to that name and address.

(ix) A statement that offerors or quoters should include in the offer or quotation the address to which payment should be mailed, if that address is different from that shown for the offeror or quoter.

(b) *Section B, Supplies or services and prices/costs.* Include on the second page of the solicitation brief descriptions of the supplies or services; e.g., item number, national stock number/part number if applicable, nouns, and quantities. (This includes incidental deliverables such as manuals and reports.) The second page may be supplemented as necessary by Standard Form 36, Continuation Sheet (53.301-36).

(c) *Section C, Description/ specifications/work statement.* Include any description or specifications needed in addition to Section B (see Part 10, Specifications, Standards, and Other Product Descriptions).

(d) *Section D, Packaging and marking.* Provide packaging, packing, preservation, and marking requirements, if any (see 10.004(e)).

(e) *Section E, Inspection and acceptance.* Include inspection, acceptance, quality assurance, and reliability requirements (see Part 46, Quality Assurance).

(f) *Section F, Deliveries or performance.* Specify the requirements for time, place, and method of delivery or performance (see Part 12, Contract Delivery or Performance, and 47.301-1).

(g) *Section G, Contract administration data.* Include any required accounting and appropriation data and any required contract administration information or instructions other than those on the solicitation form.

(h) *Section H, Special contract requirements.* Include a clear statement of any special contract requirements that are not included in Section I, Contract clauses, or in other sections of the uniform contract format.

15.406-3 Part II—Contract clauses.

Section I, Contract clauses. The contracting officer shall include in this section the clauses required by law or by this regulation and any additional clauses expected to be included in any resulting contract, if these clauses are not required in any other section of the uniform contract format. Any alteration pertaining to the contract shall be included in this section as part of the clause at 52.252-4, Alterations in

Contract. See Part 52, Solicitation Provisions and Contract Clauses. Clauses that are incorporated by reference shall be included in this section (see 52.102-1(c)).

15.406-4 Part III—List of Documents, exhibits, and other attachments.

Section J, List of attachments. The contracting officer shall list the title, date, and number of pages for each attached document, exhibit, and other attachment.

15.406-5 Part IV—Representations and Instructions.

The contracting officer shall prepare the representations and instructions as follows:

(a) *Section K, Representations, certifications, and other statements of offerors or quoters.* Include in this section those solicitation provisions that require representations, certifications, or the submission of other information by offerors or quoters.

(b) *Section L, Instructions, conditions, and notices to offerors or quoters.* Insert in this section solicitation provisions and other information and instructions not required elsewhere to guide offerors or quoters in preparing proposals or quotations. Any alteration pertaining to the solicitation shall be included in this section as part of the provision at 52.252-3, Alterations in Solicitation. Provisions that are incorporated by reference shall be included in this section. Prospective offerors or quoters may be instructed to submit technical proposals in severable parts to meet agency requirements. The severable parts should provide for separation of technical and cost or pricing data. The instructions may specify further organization of proposal or quotation parts, such as (1) administrative, (2) management, (3) technical, and (4) cost or pricing data.

(c) *Section M, Evaluation factors for award.* Identify any factors other than price that will be major considerations in awarding the contract (see 15.605(e)). When technical proposals or quotations are requested and award will be based on technical and other factors in addition to price or cost, the solicitation shall specify at least (1) the significant evaluation factors and (2) the relative importance the Government places on the evaluation factors.

15.407 Solicitation provisions.

(a) "Solicitations," as used in this section, means requests for proposals (RFP's) and requests for quotations (RFQ's) other than those excluded by 15.401 and those for information or planning purposes. See 15.405-2 for the solicitation provision used with solicitations for information or planning purposes.

(b) The contracting officer may, upon the approval of the chief of the contracting office (see 15.213(d)), insert the provision at 52.215-4, Notice of Possible Standardization, in solicitations for supplies that subsequently might be standardized for applications specified in 15.213(b)(1). See 14.201-6(n) regarding use of the provision in invitations for bids.

(c) The contracting officer shall insert in solicitations the provisions at—

(1) 52.215-5, Solicitation Definitions;

(2) 52.215-6, Type of Business Organization;

(3) 52.215-7, Unnecessarily Elaborate Proposals or Quotations;

(4) 52.215-8, Acknowledgment of Amendments to Solicitations;

(5) 52.215-9, Submission of Offers;

(6) 52.215-10, Late Submissions, Modifications, and Withdrawals of Proposals;

(7) 52.215-11, Authorized Negotiators; and

(8) 52.215-12, Restriction on Disclosure and Use of Data.

(d) The contracting officer shall insert in RFP's the provisions at—

(1) 52.215-13, Preparation of Offers;

(2) 52.215-14, Explanation to Prospective Offerors;

(3) 52.215-15, Failure to Submit Offer; and

(4) 52.215-16, Contract Award.

(e) The contracting officer shall insert the provision at 52.215-17, Telegraphic Proposals, in solicitations that authorize telegraphic proposals or quotations.

(f) The contracting officer shall insert the provision at 52.215-18, Order of Precedence, in solicitations to which the uniform contract format applies.

(g) The contracting officer shall insert the provision at 52.215-19, Period for Acceptance of Offer, in RFP's that are not issued on SF 33 except those (1) for construction work or (2) in which the Government specifies a minimum acceptance period.

(h) The contracting officer shall insert the provision at 52.215-20, Place of Performance, in solicitations except those in which the place of performance is specified by the Government.

15.408 Issuing solicitations.

(a) The contracting officer shall issue unclassified solicitations to potential sources in conformance with the policy in 15.105 and the policy and procedures in Part 5.

(b) Solicitations involving classified information shall be handled as prescribed by agency regulations.

(c) If the contracting office is located in the United States and the security classification permits, any solicitation or related correspondence sent to a foreign address shall be sent by international air mail. Similarly, if the security classification permits, contracting offices located outside the United States shall use international air mail in appropriate circumstances.

15.409 Pre-proposal conferences.

(a) A pre-proposal conference may be held to brief prospective offerors after a solicitation has been issued but before offers are submitted. Generally, the Government uses these conferences in complex negotiated acquisitions to explain or clarify complicated specifications and requirements.

(b) The contracting officer shall decide if a pre-proposal conference is required and make the necessary arrangements, including the following:

(1) If notice was not in the solicitation, give all prospective offerors who received the solicitation adequate notice of the time, place, nature, and scope of the conference.

(2) If time allows, request prospective offerors to submit written questions in advance. Prepared answers can then be delivered during the conference.

(3) Arrange for technical and legal personnel to attend the conference, if appropriate.

(c) The contracting officer or a designated representative shall conduct the pre-proposal conference, furnish all prospective offerors identical information concerning the proposed acquisition, make a complete record of the conference, and promptly furnish a copy of that record to all prospective offerors. Conferees shall be advised that—

(1) Remarks and explanations at the conference shall not qualify the terms of the solicitation; and

(2) Terms of the solicitation and specifications remain unchanged unless the solicitation is amended in writing.

15.410 Amendment of solicitations before closing date.

(a) After issuance of a solicitation, but before the date set for receipt of proposals, it may be necessary to (1) make changes to the solicitation, including, but not limited to, significant changes in quantity, specifications, or delivery schedules, (2) correct defects or ambiguities, or (3) change the closing date for receipt of proposals. Standard Form 30, Amendment of Solicitation/Modification of Contract (53.301-30), shall be used for amending a request for proposals (RFP).

(b) The contracting officer shall determine if the closing date needs to be changed when amending a solicitation. If the time available before closing is insufficient, prospective offerors or quoters shall be notified by telegram or telephone of an extension of the closing date, and the notification shall be confirmed in the written amendment to the solicitation. The contracting officer shall not award a contract unless any amendments made to an RFP have been issued in sufficient time to be considered by prospective offerors.

(c) Any information given to a prospective offeror or quoter shall be furnished promptly to all other prospective offerors or quoters as a solicitation amendment if (1) the information is necessary in submitting proposals or quotations or (2) the lack of such information would be prejudicial to a prospective offeror or quoter.

15.411 Receipt of proposals and quotations.

(a) The procedures for receipt and handling of proposals and quotations in negotiated acquisitions should be similar to the receipt and safeguarding of bids in formal advertising (see 14.401). Proposals and quotations shall be marked with the date and time of receipt.

(b) After receipt, proposals and quotations shall be safeguarded from unauthorized disclosure. Classified proposals and quotations shall be handled in accordance with agency regulations. Also see OMB Circular No. A-76, the supplemental Handbook, and Subpart 7.3, Contractor Versus Government Performance, for safeguarding cost-comparison information.

15.412 Late proposals and modifications.

(a) "Modification," as used in this section, means a modification of a proposal, including a final modification in response to the contracting officer's request for "best and final" offers. The term does not include normal revisions of offers made during the conduct of negotiations by offerors selected for discussion.

(b) Offerors are responsible for submitting offers, and any modifications to them, so as to reach the Government office designated in the solicitation on time. Unless the solicitation states a specific time, the time for receipt is 4:30 p.m., local time for the designated Government office on the date that proposals are due.

(c) Except as authorized for NASA in its regulations, proposals, and modifications to them, that are received in the designated Government office after the exact time specified are "late" and shall be considered only if (1) they are received before award is made, and (2) the circumstances, including acceptable evidence of date of mailing or receipt at the Government installation, meet the specific requirements of the provision at 52.215-10, Late Submissions, Modifications, and Withdrawals of Proposals.

(d) When a late proposal or modification is received and it is clear from available information that it cannot be considered for award, the contracting officer shall promptly notify the offeror that it was received late and will not be considered. The notice need not be given when the proposed contract is to be awarded within a few days and the notice prescribed in 15.1001(c)(1) would suffice.

(e) When a late proposal or modification is transmitted by registered or certified mail and is received before award, but it is not clear from available information whether it can be considered, the offeror shall be promptly notified substantially in accordance with the notice in 14.304-2, appropriately modified to relate to proposals.

(f) Late proposals and modifications that are not considered shall be held unopened, unless opened for identification, until after award and then retained with other unsuccessful proposals.

(g) The following shall, if available, be included in the contracting office files for each late proposal, quotation, or modification:

(1) The date of mailing, filing, or delivery.

(2) The date and hour of receipt.

(3) Whether or not considered for award.

(4) The envelope, wrapper, or other evidence of date of submission.

15.413 Disclosure and use of information before award.

15.413-1 Alternate I.

(a) After receipt of proposals, none of the information contained in them or concerning the number or identity of offerors shall be made available to the public or to anyone in the Government not having a legitimate interest.

(b) During the preaward or preacceptance period of a negotiated acquisition, only the contracting officer, the contracting officer's superiors having contractual authority, and others specifically authorized shall transmit technical or other information and conduct discussions with prospective contractors. Information shall not be furnished to a prospective contractor if, alone or together with other information, it may afford the prospective contractor an advantage over others (see 15.610, Written and oral discussion). However, general information that is not prejudicial to others may be furnished upon request.

(c) Prospective contractors and subcontractors may place restrictions on the disclosure and use of data in proposals and quotations (see 15.407(c)(8) and the provision at 52.215-12, Restriction on Disclosure and Use of Data). Contracting officers shall not exclude proposals from consideration merely because they restrict disclosure and use of data, nor shall they be prejudiced by that restriction. The portions of the proposal that are so restricted (except for information that is also obtained from another source without restriction) shall be used only for evaluation and shall not be disclosed outside the Government without permission of the prospective contractor (but see Subpart 24.2, Freedom of Information Act).

15.413-2 Alternate II.

Agency regulations may provide that the following alternate procedures may be used instead of those specified in 15.413-1.

(a) Proposals furnished to the Government are to be used for evaluation purposes only. Disclosure outside the Government for evaluation is permitted only to the extent authorized by, and in accordance with the procedures in, 15.413-2(f).

(b) While the Government's limited use of proposals does not require that the proposal bear a restrictive notice, proposers should, if they desire to maximize protection of their trade secrets or confidential or privileged commercial and financial information contained in them, apply the restrictive notice prescribed in the provision at 52.215-12, Restriction on Disclosure and Use of Data, to such information (also see 15.407(c)(8)). In any event, information contained in proposals will be protected to the extent permitted by law, but the Government assumes no liability for the use or disclosure of information (data) not made subject to such notice in accordance with the provision at 52.215-12.

(c) If proposals are received with more restrictive conditions than those in the provision at 52.215-12, the contracting officer or coordinating officer shall inquire whether the submitter is willing to accept the conditions of the provision of 52.215-12. If the submitter does not, the contracting officer or coordinating officer shall, after consultation with counsel, either return

the proposal or accept it as marked. Contracting officers shall not exclude from consideration any proposals merely because they contain an authorized or agreed-to notice, nor shall they be prejudiced by such notice.

(d) Release of proposal information (data) before decision as to the award of a contract, or the transfer of valuable and sensitive information between competing offerors during the competitive phase of the acquisition process, would seriously disrupt the Government's decision-making process and undermine the integrity of the competitive acquisition process, thus adversely affecting the Government's ability to solicit competitive proposals and award a contract which would best meet the Government's needs and serve the public interest. Therefore, to the extent permitted by law, none of the information (data) contained in proposals (except as authorized in agency regulations) is to be disclosed outside the Government before the Government's decision as to the award of a contract. In the event an outside evaluation is to be obtained, it shall be only to the extent authorized by, and in accordance with the procedures of, 15.413-2(f).

(e) In order to assure that solicited proposals (whether bearing a restrictive notice or not) are properly handled, agency implementing regulations may require the following Government notice to be placed on the cover sheet upon their receipt. (This notice is required for all unsolicited proposals, see 15.508.) This is a Government notice for internal handling purposes and does not affect any obligations or rights the Government may have with regard to the use or disclosure of any information (data) contained in the proposal or quotation.

GOVERNMENT NOTICE FOR HANDLING PROPOSALS

This proposal shall be used and disclosed for evaluation purposes only, and a copy of this Government notice shall be applied to any reproduction or abstract thereof. Any authorized restrictive notices which the submitter places on this proposal shall also be strictly complied with. Disclosure of this proposal outside the Government for evaluation purposes shall be made only to the extent authorized by, and in accordance with, the procedures in (cite agency regulations implementing 15.413-2(f)).

If agency implementing regulations do not authorize release of proposals outside the Government for evaluation purposes, the last sentence of the foregoing Government notice is to be deleted.

(f) If authorized in agency implementing regulations, agencies may release proposals outside the Government for evaluation, consistent with the following:

(1) Decisions to release proposals outside the Government for evaluation purposes shall be made by the agency head or designee;

(2) Written agreement must be obtained from the evaluator that the information (data) contained in the proposal will be used only for evaluation purposes and will not be further disclosed;

(3) Any authorized restrictive legends placed on the proposal by the prospective contractor or subcontractor or by the Government shall be applied to any reproduction or abstracted information made by the evaluator;

(4) Upon completing the evaluation, all copies of the proposal, as well as any abstracts thereof, shall be returned to the Government office which initially furnished them for evaluation; and

(5) All determinations to release the proposal outside the Government take into consideration requirements for avoiding organizational conflicts of interest and the competitive relationship, if any, between the prospective contractor or subcontractor and the prospective outside evaluator.

(g) The submitter of any proposal shall be provided notice adequate to afford an opportunity to take appropriate action before release of any information (data) contained therein pursuant to a request under the Freedom of Information Act (5 U.S.C. 552); and, time permitting, the submitter should be consulted to obtain assistance in determining the eligibility of the information (data) in question as an exemption under the Act. (See also Subpart 24.2, Freedom of Information Act.)

15.414 Forms.

(a) Standard Form 33 (SF 33), Solicitation, Offer and Award (see 53.301-33), shall be used in connection with negotiated acquisitions when it appears advantageous to begin negotiations by soliciting written offers whose written acceptance by the Government will create a binding contract without further action. Award may be made using the Award portion of SF 33.

(b) Standard Form 26 (SF 26), Award/Contract (see 53.301-26), shall be used when entering into negotiated contracts when the signature of both parties on a single document is appropriate, unless—

(1) The contract is entered into by means of Standard Form 33;

(2) The contract is for the construction, alteration, or repair of buildings, bridges, roads, or other real property;

(3) The acquisition is one for which the FAR prescribes special contract forms; or

(4) Use of a purchase order is appropriate.

SUBPART 15.5—UNSOLICITED PROPOSALS

15.500 Scope of subpart.

This subpart prescribes policies and procedures for submission, receipt, evaluation, and acceptance of unsolicited proposals.

15.501 Definitions.

"Advertising material," as used in this subpart, means material designed to acquaint the Government with a prospective contractor's present products or potential capabilities, or to determine the Government's interest in buying these products.

"Commercial product offer" means an offer of a commercial product that is usually sold to the general public and that the vendor wishes to see introduced in the Government's supply system as an alternate or replacement for an existing supply item.

"Contribution," as used in this subpart, means a concept, suggestion, or idea presented to the Government for its use with no indication that the source intends to devote any further effort to it on the Government's behalf.

"Coordinating office," as used in this subpart, means a point of contact established within the agency to coordinate the receipt, evaluation, and disposition of unsolicited proposals.

"Technical correspondence," as used in this subpart, means written requests for information regarding Government interest in research areas, submissions of research descriptions, preproposal explorations, and other written technical inquiries.

"Unsolicited proposal" means a written offer to perform a task or effort submitted to the Government by an offeror without solicitation by the Government, with the objective of obtaining a contract.

15.502 Policy.

Agencies shall encourage the submission of unsolicited proposals and avoid organizational or regulatory constraints that may inhibit generation and acceptance of innovative or unique ideas from prospective contractors.

15.503 General.

(a) Unsolicited proposals are a valuable means for Government agencies to obtain innovative or unique methods or approaches to accomplishing their missions from sources outside the Government.

(b) Advertising material, commercial product offers, contributions, or technical correspondence as defined in 15.501 are not unsolicited proposals.

(c) A valid unsolicited proposal must—

(1) Be innovative or unique;

(2) Be independently originated and developed by the offeror;

(3) Be prepared without Government supervision;

(4) Include sufficient detail to permit a determination that Government support could be worthwhile and the proposed work could benefit the agency's research and development or other mission responsibilities; and

(5) Not be an advance proposal for a specific documented agency requirement that can be acquired by competitive methods.

(d) Unsolicited proposals in response to broad agency announcements are considered to be independently originated.

(e) Agencies that receive unique or innovative unsolicited proposals not related to their missions may identify for the offeror other agencies whose missions bear a reasonable relationship to the proposal's subject matter.

15.504 Advance guidance.

(a) Agencies shall encourage potential offerors to make preliminary contacts with appropriate agency personnel before expending extensive effort on a detailed unsolicited proposal or submitting proprietary data to the Government. These preliminary contacts should include—

(1) Inquiries as to the general need for the type of effort contemplated; and

(2) Contacts with agency technical personnel for the limited purpose of obtaining an understanding of the agency mission and responsibilities relative to the type of effort contemplated.

(b) Agencies shall make available to potential offerors of unsolicited proposals at least the following free written information:

(1) Definition (see 15.501), and content (see 15.505), of an unsolicited proposal acceptable for formal evaluation.

(2) Requirements concerning responsible prospective contractors (see Subpart 9.1), and organizational conflicts of interest (see Subpart 9.5).

(3) Role of technical correspondence before proposal preparation.

(4) Agency contact points for information regarding advertising, contributions, solicitation mailing lists, and other types of transactions frequently mistaken for unsolicited proposals.

(5) Procedures for submission and evaluation of unsolicited proposals.

(6) Information sources on agency objectives and areas of potential interest.

(7) Instructions for identifying and marking proprietary information so that restrictive legends conform to 15.509.

(c) Agency personnel shall conduct personal contacts without making any agency commitments concerning the acceptance of unsolicited proposals.

15.505 Content of unsolicited proposals.

Unsolicited proposals should contain the following information to permit consideration in an objective and timely manner:

(a) Basic information including—

(1) Offeror's name and address and type of organization; e.g., profit, nonprofit, educational, small business;

(2) Names and telephone numbers of technical and business personnel to be contacted for evaluation or negotiation purposes;

(3) Identity of proprietary data to be used only for evaluation purposes;

(4) Names of other Federal, State, local agencies, or parties receiving the proposal or funding the proposed effort;

(5) Date of submission; and

(6) Signature of a person authorized to represent and contractually obligate the offeror.

(b) Technical information including—

(1) Concise title and abstract (approximately 200 words) of the proposed effort;

(2) A reasonably complete discussion stating the objectives of the effort or activity, the method of approach and extent of effort to be employed, the nature and extent of the anticipated results, and the manner in which the work will help to support accomplishment of the agency's mission;

(3) Names and biographical information on the offeror's key personnel who would be involved, including alternates; and

(4) Type of support needed from the agency; e.g., facilities, equipment, materials, or personnel resources.

(c) Supporting information including—

(1) Proposed price or total estimated cost for the effort in sufficient detail for meaningful evaluation;

(2) Period of time for which the proposal is valid (a six month minimum is suggested);

(3) Type of contract preferred;

(4) Proposed duration of effort;

(5) Brief description of the organization, previous experience in the field, and facilities to be used; and

(6) Required statements, if applicable, about organizational conflicts of interest, security clearances, and environmental impacts.

15.506 Agency procedures.

(a) Agencies shall establish procedures, including assurance of accountability, for controlling the receipt, evaluation, and timely disposition of proposals consistent with the requirements of this subpart. The procedures shall include controls on the reproduction and disposition of proposal material, particularly data identified by the offeror as subject to duplication, use, or disclosure restrictions.

(b) Agencies shall establish contact points (see 15.501) to coordinate the receipt and handling of unsolicited proposals. Contact points outside agency contracting offices shall coordinate with qualified contracting personnel.

15.506-1 Receipt and initial review.

(a) Before initiating a comprehensive evaluation, the agency contact point shall determine if the unsolicited proposal—

(1) Contains sufficient technical and cost information;

(2) Has been approved by a responsible official or other representative authorized to contractually obligate the offeror; and

(3) Complies with the marking requirements of 15.509.

(b) If the proposal meets these requirements, the contact point shall promptly acknowledge and process the proposal. If it does not, the contact point shall provide the offeror an opportunity to submit the required data.

(c) Agencies are not required to perform comprehensive evaluations of unsolicited proposals not related to their missions. If such proposals are received, the agency contact point shall promptly reply to the offeror, state how the agency interprets the proposal, and why it is not being evaluated.

15.506-2 Evaluation.

(a) Comprehensive evaluations shall be coordinated by the agency contact point, who shall attach or imprint on each unsolicited proposal circulated for evaluation the legend required by 15.509(d). When performing a comprehensive evaluation of an unsolicited proposal, evaluators shall consider the following factors, in addition to any others appropriate for the particular proposal:

(1) Unique or innovative methods, approaches or ideas originated or assembled by the offeror.

(2) Overall scientific, technical or socio-economic merits of the proposal.

(3) Potential contribution of the effort to the agency's specific mission.

(4) The offeror's capabilities, related experience, facilities, techniques, or unique combinations of these which are integral factors for achieving the proposal objectives.

(5) The qualifications, capabilities, and experience of the proposed principal investigator, team leader, or key personnel who are critical in achieving the proposal objectives.

(b) The evaluators shall notify the coordinating office of their conclusions and recommendations when the evaluation is completed.

15.507 Contracting methods.

(a) A favorable comprehensive evaluation of an unsolicited proposal does not, in itself, necessarily justify negotiating on a noncompetitive basis. Agency contact points shall return an unsolicited proposal to the offeror, citing reasons, when its substance—

(1) Is available to the Government without restriction from another source;

(2) Closely resembles a pending competitive solicitation; or

(3) Is otherwise not sufficiently innovative or unique to justify acceptance.

(b) The contracting officer may award a negotiated noncompetitive contract when—

(1) An unsolicited proposal has received a favorable comprehensive evaluation;

(2) It is not of the character described in 15.507(a); and

(3) The agency technical office sponsoring the contract supports its recommendation with facts and circumstances that preclude competition, including consideration of the evaluation factors in 15.506-2(a), and furnishes the necessary funds.

(c) If the unsolicited proposal is acceptable for award without competition, the agency and offeror shall use the proposal as the basis for negotiation.

15.508 Prohibitions.

(a) Government personnel shall not use any data, concept, idea, or other part of an unsolicited proposal as the basis, or part of the basis, for a solicitation or in negotiations with any other firm unless the offeror is notified of and agrees to the intended use. However, this prohibition does not preclude using any data, concept, or idea available to the Government from other sources without restriction.

(b) Government personnel shall not disclose restrictively marked information (see 15.509) included in an unsolicited proposal. The disclosure of such information concerning trade secrets, processes, operations, style of work, apparatus, and other matters, except as authorized by law, may result in criminal penalties under 18 U.S.C. 1905.

15.509 Limited use of data.

(a) An unsolicited proposal may include data that the offeror does not want disclosed for any purpose other than evaluation. If the offeror wishes to restrict the proposal, the title page must be marked with the following legend:

USE AND DISCLOSURE OF DATA

The data in this proposal shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate the proposal; *provided*, that if a contract is awarded to this offeror as a result of or in connection with the submission of these data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the contract. This restriction does not limit the Government's right to use information contained in the data if it is obtainable from another source without restriction. The data subject to this restriction are contained in Sheets _____.

(b) The offeror shall also mark each restricted sheet with the following legend:

Use or disclosure of proposal data is subject to the restriction on the title page of this Proposal.

(c) The coordinating office shall return to the offeror any unsolicited proposal marked with a legend different from that provided in 15.509(a). The return letter will state that the proposal cannot be considered because it is impracticable for the Government to comply with the legend and that the agency will consider the proposal if it is resubmitted with the proper legend.

(d) The coordinating office shall place a cover sheet on the proposal or clearly mark it as follows, unless the offeror clearly states in writing that no restrictions are imposed on the disclosure or use of the data contained in the proposal:

UNSOLICITED PROPOSAL
USE OF DATA LIMITED

All Government personnel must exercise EXTREME CARE to ensure that the information in this proposal is not disclosed outside the Government and is NOT DUPLICATED, USED, OR DISCLOSED in whole or in part for any purpose other than evaluation of the proposal, without the written permission of the offeror. If a contract is awarded on the basis of this proposal, the terms of the contract shall control disclosure and use.

This notice does not limit the Government's right to use information contained in the proposal if it is obtainable from another source without restriction.

This is a Government notice, and shall not by itself be construed to impose any liability upon the Government or Government personnel for disclosure or use of data contained in this proposal.

(e) The above notice is used solely as a manner of handling unsolicited proposals that will be compatible with this subpart. However, the use of this notice shall not be used to justify the withholding of a record nor to improperly deny the public access to a record where an obligation is imposed on an agency by the Freedom of Information Act, 5 U.S.C. 552, as amended. A prospective offeror should identify trade secrets, commercial or financial information, and privileged or confidential information to the Government (see 15.509(a)).

(f) When an agency receives an unsolicited proposal without any restrictive legend from an educational or nonprofit organization or institution, and an evaluation outside the Government is necessary, the coordinating office shall—

(1) Attach a cover sheet clearly marked with the legend in 15.509(d);

(2) Change the beginning of this legend to read "*All Government and non-Government personnel....*";

(3) Delete the words "*is not disclosed outside the Government and*"; and

(4) Require any non-Government evaluator to give a written agreement stating that data in the proposal will not be disclosed to others outside the Government.

(g) If the proposal is received with the restrictive legend (15.509(a)), the modified cover sheet shall also be used and permission shall be obtained from the offeror before release of the proposal for outside evaluation.

(h) When an agency receives an unsolicited proposal with or without a restrictive legend from other than an educational or nonprofit organization or institution, and evaluation by Government personnel outside the agency or by experts outside of the Government is necessary, written permission must be obtained from the offeror before release of the proposal for evaluation. The coordinating office shall (1) clearly mark the cover sheet with the legend in 15.509(d) or as modified in 15.509(f) and (2) obtain a written agreement from any non-Government evaluator stating that data in the

proposal will not be disclosed to persons outside the Government.

SUBPART 15.6—SOURCE SELECTION

15.600 Scope of subpart.

This subpart prescribes policies and procedures for selection of a source or sources in competitive negotiated acquisitions. Formal source selection procedures, involving boards, councils, or other groups for proposal evaluation, are in 15.612. Alternative procedures that limit discussions with offerors during the competition are discussed in 15.613.

15.601 Definitions.

"Clarification," as used in this subpart, means communication with an offeror for the sole purpose of eliminating minor irregularities, informalities, or apparent clerical mistakes in the proposal. It is achieved by explanation or substantiation, either in response to Government inquiry or as initiated by the offeror. Unlike discussion (see definition below), clarification does not give the offeror an opportunity to revise or modify its proposal, except to the extent that correction of apparent clerical mistakes results in a revision.

"Deficiency," as used in this subpart, means any part of a proposal that fails to satisfy the Government's requirements.

"Discussion," as used in this subpart, means any oral or written communication between the Government and an offeror, whether or not initiated by the Government, that (a) involves information essential for determining the acceptability of a proposal, or (b) provides the offeror an opportunity to revise or modify its proposal.

"Source selection authority" means the Government official in charge of selecting the source. This title is most often used when the selection process is formal and the official is someone other than the contracting officer.

15.602 Applicability.

(a) This subpart applies to negotiated contracting when source selection is based on—

(1) Cost or price competition between proposals that meet the Government's minimum requirements stated in the solicitation; or

(2) Competition involving an evaluation and comparison of cost or price and other factors.

(b) This subpart does not apply to sole-source awards or to small purchases under Part 13.

15.603 Purpose.

Source selection procedures are designed to—

(a) Maximize competition;

(b) Minimize the complexity of the solicitation, evaluation, and the selection decision;

(c) Ensure impartial and comprehensive evaluation of offerors' proposals; and

(d) Ensure selection of the source whose proposal has the highest degree of realism and whose performance is expected to best meet stated Government requirements.

15.604 Responsibilities.

(a) Agency heads or their designees are responsible for source selection.

(b) The cognizant technical official is responsible for the technical requirements related to the source selection process.

(c) The contracting officer is responsible for contractual actions related to the source selection process, including—

(1) Issuing solicitations to which this subpart applies in accordance with Subpart 15.4 and this subpart;

(2) Conducting or coordinating cost or price analyses as prescribed in Subpart 15.8;

(3) Conducting or controlling all negotiations concerning cost or price, technical requirements, and other terms and conditions; and

(4) Selecting the source for contract award, unless another official is designated as the source selection authority.

15.605 Evaluation factors.

(a) The factors that will be considered in evaluating proposals should be tailored to each acquisition and include only those factors that will have an impact on the source selection decision.

(b) The evaluation factors that apply to an acquisition and the relative importance of those factors are within the broad discretion of agency acquisition officials. However, price or cost to the Government shall be included as an evaluation factor in every source selection. Other evaluation factors that may apply to a particular acquisition are cost realism, technical excellence, management capability, personnel qualifications, experience, past performance, schedule, and any other relevant factors.

(c) While the lowest price or lowest total cost to the Government is properly the deciding factor in many source selections, in certain acquisitions the Government may select the source whose proposal offers the greatest value to the Government in terms of performance and other factors. This may be the case, for example, in the acquisition of research and development or professional services, or when cost-reimbursement contracting is anticipated.

(d) In awarding a cost-reimbursement contract, the cost proposal should not be controlling, since advance estimates of cost may not be valid indicators of final actual costs. There is no requirement that cost-reimbursement contracts be awarded on the basis of lowest proposed cost, lowest proposed fee, or the lowest total proposed cost plus fee. The award of cost-reimbursement contracts primarily on the basis of estimated costs may encourage the submission of unrealistically low estimates and increase the likelihood of cost overruns. The primary consideration should be which offeror can perform the contract in a manner most advantageous to the Government, as determined by evaluation of proposals according to the established evaluation criteria.

(e) The solicitation shall clearly state the evaluation factors that will be considered in making the source selection and their relative importance (see 15.406-5(c)). Numerical weights, which may be employed in the evaluation of proposals, need not be disclosed in solicitations. The solicitation shall inform offerors of minimum requirements that apply to particular evaluation factors.

15.606 Changes in Government requirements.

(a) When, either before or after receipt of proposals, the Government changes, relaxes, increases, or otherwise modifies its requirements, the contracting officer shall issue a written amendment to the solicitation. When time is of the essence, oral advice of changes may be given if the changes involved are not complex and all firms to be notified (see paragraph (b) below) are notified as near to the same time as possible. The contracting officer shall make a record of the oral advice and promptly confirm that advice in writing (see 15.410).

(b) In deciding which firms to notify of a change, the contracting officer shall consider the stage in the acquisition cycle at which the change occurs and the magnitude of the change, as follows:

(1) If proposals are not yet due, the amendment shall be sent to all firms that have received a solicitation.

(2) If the time for receipt of proposals has passed but proposals have not yet been evaluated, the amendment should

normally be sent only to the responding offerors.

(3) If the competitive range (see 15.609(a)) has been established, only those offerors within the competitive range shall be sent the amendment.

(4) If a change is so substantial that it warrants complete revision of a solicitation, the contracting officer shall cancel the original solicitation and issue a new one, regardless of the stage of the acquisition. The new solicitation shall be issued to all firms originally solicited and to any firms added to the original list.

(c) If the proposal considered to be most advantageous to the Government (as determined according to the established evaluation criteria) involves a departure from the stated requirements, the contracting officer shall provide all offerors an opportunity to submit new or amended proposals on the basis of the revised requirements; *provided*, that this can be done without revealing to the other offerors the solution proposed in the original departure or any other information that is entitled to protection (see 15.407(b)(8) and 15.610(d)).

15.607 Disclosure of mistakes before award.

(a) Contracting officers shall examine all proposals for minor informalities or irregularities and apparent clerical mistakes (see 14.405 and 14.406). Communication with offerors to resolve these matters is clarification, not discussion within the meaning of 15.610. However, if the resulting communication prejudices the interest of other offerors, the contracting officer shall not make award without discussions with all offerors within the competitive range.

(b) Except as indicated in paragraph (c) below, mistakes not covered in paragraph (a) above are usually resolved during discussion (see 15.610).

(c) When award without discussion is contemplated, the contracting officer shall comply with the following procedure:

(1) If a mistake in a proposal is suspected, the contracting officer shall advise the offeror (pointing out the suspected mistake or otherwise identifying the area of the proposal where the suspected mistake is) and request verification. If the offeror verifies its proposal, award may be made.

(2) If an offeror alleges a mistake in its proposal, the contracting officer shall advise the offeror that it may withdraw the proposal or seek correction in accordance with subparagraph (3) below.

(3) If an offeror requests permission to correct a mistake in its proposal, the agency head (or a designee not below the level of chief of the contracting office) may make a written determination permitting the correction; *provided*, that (i) both the existence of the mistake and the proposal actually intended are established by clear and convincing evidence from the solicitation and the proposal and (ii) legal review is obtained before making the determination.

(4) If the determination under subparagraph (3) above cannot be made, and the contracting officer still contemplates award without discussion, the offeror shall be given a final opportunity to withdraw or to verify its proposal.

(5) Verification, withdrawal, or correction under subparagraphs (1) through (4) above is not considered discussion within the meaning of 15.610. If, however, correction of a mistake requires reference to documents, worksheets, or other data outside the solicitation and proposal in order to establish the existence of the mistake, the proposal intended, or both, the mistake may be corrected only through discussions under 15.610.

15.608 Proposal evaluation.

Proposal evaluation is an assessment of both the proposal and the offeror's ability (as conveyed by the proposal) to successfully accomplish the prospective contract.

(a) *Cost or price evaluation.* The contracting officer shall use cost or price analysis (see Subpart 15.8) to evaluate the cost estimate or price, not only to determine whether it is reasonable, but also to determine the offeror's understanding of the work and ability to perform the contract. The contracting officer shall document the cost or price evaluation.

(b) *Technical evaluation.* If any technical evaluation is necessary beyond ensuring that the proposal meets the minimum requirements in the solicitation, the cognizant technical official, in documenting the technical evaluation, shall include—

(1) The basis for evaluation;

(2) An analysis of the technically acceptable and unacceptable proposals, including an assessment of each offeror's ability to accomplish the technical requirements;

(3) A summary, matrix, or quantitative ranking of each technical proposal in relation to the best rating possible; and

(4) A summary of findings.

15.609 Competitive range.

(a) The contracting officer shall determine which proposals are in the competitive range for the purpose of conducting written or oral discussion (see 15.610(b)). The competitive range is determined on the basis of cost or price and other factors that were stated in the solicitation and shall include all proposals that have a reasonable chance of being selected for award. When there is doubt as to whether a proposal is in the competitive range, the proposal should be included.

(b) If the contracting officer, after complying with 15.610(b), determines that a proposal no longer has a reasonable chance of being selected for contract award, it may no longer be considered for selection.

(c) The contracting officer shall notify in writing an unsuccessful offeror at the earliest practicable time that its proposal is no longer eligible for award (see 15.1001(b)(1)).

(d) If the contracting officer initially solicits unpriced technical proposals, they shall be evaluated to determine which are acceptable to the Government or could, after discussion, be made acceptable. After necessary discussion of these technical proposals is completed, the contracting officer shall (1) solicit price proposals for all the acceptable technical proposals which offer the greatest value to the Government in terms of performance and other factors and (2) make award to the low responsible offeror, either without or following discussion, as appropriate. Except in acquisition of architect-engineer services (see Subpart 36.6), a competitive range determination must include cost or price proposals.

15.610 Written or oral discussion.

(a) The requirement in paragraph (b) below for written or oral discussion need not be applied in acquisitions—

(1) Of $25,000 or less;

(2) In which prices are fixed by law or regulation;

(3) In which date of delivery or performance will not permit discussion;

(4) Of the set-aside portion of a partial set-aside;

(5) Involving small business restricted advertising; or

(6) In which adequate competition or accurate prior cost experience with the product or service clearly demonstrates that acceptance of the most favorable initial proposal without discussion would result in a fair and reasonable price; *provided*, that—

(i) The solicitation notified all offerors of the possibility that award might be made without discussion; and

(ii) The award is in fact made without any written or oral discussion with any offeror.

(b) Except as provided in paragraph (a) above, the contracting officer shall conduct written or oral discussion with all responsible offerors who submit proposals within the competitive range. The content and extent of the discussions is a matter of the contracting officer's judgment, based on the particular facts of each acquisition (but see paragraphs (c) and (d) below).

(c) The contracting officer shall—

(1) Control all discussions;

(2) Advise the offeror of deficiencies in its proposal so that the offeror is given an opportunity to satisfy the Government's requirements;

(3) Attempt to resolve any uncertainties concerning the technical proposal and other terms and conditions of the proposal;

(4) Resolve any suspected mistakes by calling them to the offeror's attention as specifically as possible without disclosing information concerning other offerors' proposals or the evaluation process (see 15.607 and Part 24); and

(5) Provide the offeror a reasonable opportunity to submit any cost or price, technical, or other revisions to its proposal that may result from the discussions.

(d) The contracting officer and other Government personnel involved shall not engage in—

(1) Technical leveling (i.e., helping an offeror to bring its proposal up to the level of other proposals through successive rounds of discussion, such as by pointing out weaknesses resulting from the offeror's lack of diligence, competence, or inventiveness in preparing the proposal);

(2) Technical transfusion (i.e., Government disclosure of technical information pertaining to a proposal that results in improvement of a competing proposal); or

(3) Auction techniques, such as—

(i) Indicating to an offeror a cost or price that it must meet to obtain further consideration;

(ii) Advising an offeror of its price standing relative to another offeror (however, it is permissible to inform an offeror that its cost or price is considered by the Government to be too high or unrealistic); and

(iii) Otherwise furnishing information about other offerors' prices.

15.611 Best and final offers.

(a) Upon completion of discussions, the contracting officer shall issue to all offerors still within the competitive range a request for best and final offers.

(b) The request shall include—

(1) Notice that discussions are concluded;

(2) Notice that this is the opportunity to submit a best and final offer;

(3) A common cutoff date and time that allows a reasonable opportunity for submission of written best and final offers; and

(4) Notice that if any modification is submitted, it must be received by the date and time specified and is subject to the Late Submissions, Modifications, and Withdrawals of Proposals or Quotations provision of the solicitation (see 15.412).

(c) After receipt of best and final offers, the contracting officer should not reopen discussions unless it is clearly in the Government's interest to do so (e.g., it is clear that information available at that time is inadequate to reasonably justify contractor selection and award based on the best and final offers received). If discussions are reopened, the contracting officer shall issue an additional request for best and final offers to all offerors still within the competitive range.

(d) Following evaluation of the best and final offers, the contracting officer (or other designated source selection authority) shall select that source whose best and final offer is most advantageous to the Government, consistent with the established evaluation factors.

15.612 Formal source selection.

(a) *General.* A source selection process is considered "formal" when a specific evaluation group structure is established to evaluate proposals and select the source for contract award. This approach is generally used in high-dollar-value acquisitions and may be used in other acquisitions as prescribed in agency regulations. The source selection organization typically consists of an evaluation board, advisory council, and designated source selection authority at a management level above that of the contracting officer.

(b) *Responsibilities.* When using formal source selection, the agency head or a designee shall ensure that—

(1) The official to be responsible for the source selection is formally designated as the source selection authority;

(2) The source selection authority formally establishes an evaluation group structure appropriate to the requirements of the particular solicitation; and

(3) Before conducting any presolicitation conferences (see 15.404) or issuing the solicitation, the source selection authority approves a source selection plan.

(c) *Source Selection Plan.* As a minimum, the plan shall include—

(1) A description of the organization structure;

(2) Proposed presolicitation activities;

(3) A summary of the acquisition strategy;

(4) A statement of the proposed evaluation factors and their relative importance;

(5) A description of the evaluation process, methodology, and techniques to be used; and

(6) A schedule of significant milestones.

(d) *Source Selection Decision.* The source selection authority shall use the factors established in the solicitation (see 15.605) to make the source selection decision.

(1) The source selection authority shall consider any rankings and ratings, and, if requested, any recommendations prepared by evaluation and advisory groups.

(2) The supporting documentation prepared for the selection decision shall show the relative differences among proposals and their strengths, weaknesses, and risks in terms of the evaluation factors. The supporting documentation shall include the basis and reasons for the recommendation.

(e) *Safeguarding information.* Consistent with Part 24, agencies shall exercise particular care to protect source selection information on a strict need-to-know basis.

(1) During the selection process, approval by the source selection authority shall be obtained before any release of source selection data. After the source selection, releasing authority shall be as prescribed in agency procedures. In all cases, agency procedures should prescribe the releasing authority.

(2) Government personnel shall not contact or visit a contractor regarding a proposal under source selection evaluation, without the prior approval of the source selection authority.

(f) *Postaward notices and debriefings.* See 15.1001(c) and 15.1002.

15.613 Alternative source selection procedures.

(a) The National Aeronautics and Space Administration (NASA) and the Department of Defense (DOD) have developed, and use in appropriate situations, source selection procedures that limit discussions with offerors during the competition, and that differ from other procedures prescribed in Subpart 15.6. The procedures are the NASA Source Evaluation Board procedures and the DOD "Four-Step"

Source Selection Procedures. Detailed coverage of these procedures is in the respective agency acquisition regulations.

(b) Other agencies may use either the NASA or DOD procedure as a model in developing their own procedures, including applicability criteria, consistent with mission needs.

SUBPART 15.7—MAKE-OR-BUY PROGRAMS

15.700 Scope of subpart.

This subpart prescribes policies and procedures for obtaining, evaluating, negotiating, and agreeing to prime contractors' proposed make-or-buy programs and for incorporating make-or-buy programs into contracts. Consent to subcontracts and review of contractors' purchasing systems are separate actions covered in Part 44, Subcontracting Policies and Procedures.

15.701 Definitions.

"Buy item" means an item or work effort to be produced or performed by a subcontractor.

"Make item" means an item or work effort to be produced or performed by the prime contractor or its affiliates, subsidiaries, or divisions.

"Make-or-buy program" means that part of a contractor's written plan for a contract identifying (a) those major items to be produced or work efforts to be performed in the prime contractor's facilities and (b) those to be subcontracted.

15.702 General.

The prime contractor is responsible for managing contract performance, including planning, placing, and administering subcontracts as necessary to ensure the lowest overall cost and technical risk to the Government. Although the Government does not expect to participate in every management decision, it may reserve the right to review and agree on the contractor's make-or-buy program when necessary to ensure (a) negotiation of reasonable contract prices, (b) satisfactory performance, or (c) implementation of socioeconomic policies.

15.703 Acquisitions requiring make-or-buy programs.

(a) Contracting officers shall require prospective contractors to submit make-or-buy programs for all negotiated acquisitions whose estimated value is $2 million or more, except when the proposed contract—

(1) Is for research or development and—if prototypes or hardware are involved—no significant follow-on production under the same contract is anticipated;

(2) Is priced on the basis of (i) adequate price competition or (ii) established catalog or market prices of commercial items sold in substantial quantities to the general public, or has only prices set by law or regulation (see 15.804-3); or

(3) Involves only work that the contracting officer determines is not complex.

(b) Contracting officers may require prospective contractors to submit make-or-buy programs for negotiated acquisitions whose estimated value is under $2 million only if the contracting officer (1) determines that the information is necessary and (2) documents the reasons in the contract file.

15.704 Items and work included.

The information required from a prospective contractor in a make-or-buy program shall be confined to those major items or work efforts that would normally require company management review of the make-or-buy decision because they are complex, costly, needed in large quantities, or require additional facilities to produce. Raw materials, commercial products (see 11.001), and off-the-shelf items (see 46.101) shall not be included, unless their potential impact on contract cost or schedule is critical. As a rule, make-or-buy programs should not include items or work efforts estimated to cost less than (a) 1 percent of the total estimated contract price or (b) a dollar amount set by the agency, whichever is greater.

15.705 Solicitation requirements.

When prospective contractors are required to submit proposed make-or-buy programs (see 15.703), the solicitation shall include—

(a) A statement that the program and required supporting information must accompany the offer;

(b) A description of factors to be used in evaluating the proposed program, such as capability, capacity, availability of small business and labor surplus area concerns for subcontracting, establishment of new facilities in or near labor surplus areas, delivery or performance schedules, control of technical and schedule interfaces, proprietary processes, technical superiority or exclusiveness, and technical risks involved; and

(c) A requirement that the offeror's program include or be supported by the following information:

(1) A description of each major item or work effort (see 15.704).

(2) Categorization of each major item or work effort as "must make," "must buy," or "can either make or buy."

(3) For each item or work effort categorized as "can either make or buy," a proposal either to "make" or to "buy."

(4) Reasons for (i) categorizing items and work efforts as "must make" or "must buy" and (ii) proposing to "make" or to "buy" those categorized as "can either make or buy." The reasons must include the consideration given to the evaluation factors described in the solicitation and be in sufficient detail to permit the contracting officer to evaluate the categorization or proposal.

(5) Designation of the plant or division proposed to make each item or perform each work effort and a statement as to whether the existing or proposed new facility is in or near a labor surplus area.

(6) Identification of proposed subcontractors, if known, and their location and size status (see also Subpart 19.7 for subcontracting plan requirements).

(7) Any recommendations to defer make-or-buy decisions when categorization of some items or work efforts is impracticable at the time of submission.

(8) Any other information the contracting officer requires in order to evaluate the program.

15.706 Evaluation, negotiation, and agreement.

(a) Contracting officers shall evaluate and negotiate proposed make-or-buy programs as soon as practicable after their receipt and before contract award. When the program is to be incorporated in the contract (see 15.707) and the design status of the product being acquired does not permit accurate precontract identification of major items or work efforts, the contracting officer shall notify the prospective contractor in writing that these items or efforts, when identifiable, shall be added under the clause at 52.215-21, Changes or Additions to Make-or-Buy Program.

(b) In preparing to evaluate and negotiate prospective contractors' make-or-buy programs, the contracting officer shall request the recommendations of appropriate personnel, including technical and program management personnel, and the activity small and disadvantaged business utilization specialist. The proposed program shall also be made available to the Small Business Administration representative, if any, for review and recommendation. The contracting officer shall request these recommendations early enough to consider them fully before (1) agreeing to a make-or-buy program or (2)

consenting to a change in a make-or-buy program already incorporated in a contract.

(c) The contractor has the basic responsibility for make-or-buy decisions. Therefore, its recommendations should be accepted unless they are inconsistent with Government interests or policy.

(d) Contracting officers shall give primary consideration to the effect of the proposed make-or-buy program on price, quality, delivery, and performance, including technical or financial risk involved. The evaluation of "must make" and "must buy" items should normally be confined to ensuring that they are properly categorized. The effect of the following factors on the Government's interests shall also be considered:

(1) Whether the contractor has justified performing work in plant that differs significantly from its normal operations.

(2) Whether the contractor's recommended program requires Government investment in new or other facilities in order for the contractor to perform the work in plant. (This additional cost to the Government would not be reflected in the contract price.)

(3) The impact of the contractor's projected plant work loading on indirect costs.

(4) The contractor's consideration of the competence, ability, experience, and capacity available in other firms, especially small business, small disadvantaged business, or labor surplus area concerns.

(5) The projected location of any required additional facilities in or near labor surplus areas.

(6) The contractor's make-or-buy history regarding the type of item concerned.

(7) The scope of proposed subcontracts, including the type and level of technical effort involved.

(8) Other factors such as future requirements, engineering, tooling, starting load costs, market conditions, technical superiority, and the availability of personnel and materials.

(e) Contracting officers shall not normally agree to proposed "make items" when the products or services are (1) not regularly manufactured or provided by the contractor and are available—quality, quantity, delivery, and other essential factors considered— from another firm at equal or lower prices or when they are (2) regularly manufactured or provided by the contractor, but available—quality, quantity, delivery, and other essential factors considered— from another firm at lower prices. However, the contracting officer may agree to these as "make items" if their categorization as "buy items" would increase the Government's overall cost for the contract or acquisition program.

15.707 Incorporating make-or-buy programs in contracts.

(a) After agreement is reached, the contracting officer may incorporate the make-or-buy program in negotiated contracts for—

(1) Major systems (see Part 34) or their subsystems or components, regardless of contract type; or

(2) Other supplies and services if (i) the contract is a cost-reimbursable contract, or a cost-sharing contract in which the contractor's share of the cost is less than 25 percent, and (ii) the contracting officer determines that technical or cost risks justify Government review and approval of changes or additions to the make-or-buy program.

(b) It may be necessary to incorporate some items of significant value in the make-or-buy program as "make" or, alternatively, as "buy" even though the opposite categorization would result in greater economy for the Government. If this situation occurs in any fixed-price incentive or cost-plus-incentive-fee contract, the contracting officer shall specify these items in the contract and state that they are subject to paragraph (d) of the clause at 52.215-21, Changes or Additions to Make-or-Buy Program (see 15.708 below). If the contractor proposes to reverse the categorization of such items during contract performance, the contract price shall be subject to equitable reduction.

15.708 Contract clause.

The contracting officer shall insert the clause at 52.215-21, Changes or Additions to Make-or-Buy Program, in solicitations and contracts when it is contemplated that a make-or-buy program will be incorporated in the contract. If a less economical "make" or "buy" categorization is selected for one or more items of significant value, the contracting officer shall use the clause with (a) its Alternate I, if a fixed-price incentive contract is contemplated, or (b) its Alternate II, if a cost-plus-incentive-fee contract is contemplated.

SUBPART 15.8—PRICE NEGOTIATION

15.800 Scope of subpart.

This subpart prescribes the cost and price negotiation policies and procedures applicable to initial and revised pricing of (a) negotiated prime contracts (including subcontract pricing under them when required) and (b) contract modifications (including modifications to contracts awarded by formal advertising).

15.801 Definitions.

"Cost analysis" means the review and evaluation of the separate cost elements and proposed profit of (a) an offeror's or contractor's cost or pricing data and (b) the judgmental factors applied in projecting from the data to the estimated costs, in order to form an opinion on the degree to which the proposed costs represent what the contract should cost, assuming reasonable economy and efficiency.

"Cost or pricing data" means all facts as of the time of price agreement that prudent buyers and sellers would reasonably expect to affect price negotiations significantly. Cost or pricing data are factual, not judgmental, and are therefore verifiable. While they do not indicate the accuracy of the prospective contractor's judgment about estimated future costs or projections, they do include the data forming the basis for that judgment. Cost or pricing data are more than historical accounting data; they are all the facts that can be reasonably expected to contribute to the soundness of estimates of future costs and to the validity of determinations of costs already incurred. They also include such factors as (a) vendor quotations; (b) nonrecurring costs; (c) information on changes in production methods and in production or purchasing volume; (d) data supporting projections of business prospects and objectives and related operations costs; (e) unit-cost trends such as those associated with labor efficiency; (f) make-or-buy decisions; (g) estimated resources to attain business goals; and (h) information on management decisions that could have a significant bearing on costs.

"Field pricing support" means a review and evaluation of the contractor's or subcontractor's proposal by any or all field pricing support personnel (see 15.805-5(a)(2)).

"Forward pricing rate agreement" means a written agreement negotiated between a contractor and the Government to make certain rates available during a specified period for use in pricing contracts or modifications. Such rates represent reasonable projections of specific costs that are not easily estimated for, identified with, or generated by a specific contract, contract end item, or task. These projections may include rates for labor, indirect costs, material obsolescence and usage, spare parts provisioning, and material handling.

"Price," as used in this subpart, means cost plus any fee or profit applicable to the contract type.

"Price analysis" means the process of examining and evaluating a proposed price without evaluating its separate cost elements and proposed profit.

"Technical analysis," as used in this subpart, means the examination and evaluation by personnel having specialized knowledge, skills, experience, or capability in engineering, science, or management of proposed quantities and kinds of materials, labor, processes, special tooling, facilities, and associated factors set forth in a proposal in order to determine and report on the need for and reasonableness of the proposed resources assuming reasonable economy and efficiency.

15.802 Policy.

(a) The Truth in Negotiations Act, Pub. L. 87-653 (10 U.S.C. 2306(f)), provides that the Department of Defense, the National Aeronautics and Space Administration, and the Coast Guard shall require a prime contractor or any subcontractor to submit and certify cost or pricing data under certain circumstances. The Act also requires inclusion of contract clauses that provide for reduction of the contract price by any significant amounts that such price was increased because of submission of contractor or subcontractor defective cost or pricing data. The Act's requirements are applied as a matter of policy to all other executive agencies by the Administrator, General Services Administration.

(b) Contracting officers shall—

(1) Purchase supplies and services from responsible sources at fair and reasonable prices;

(2) Price each contract separately and independently and not (i) use proposed price reductions under other contracts as an evaluation factor or (ii) consider losses or profits realized or anticipated under other contracts; and

(3) Not include in a contract price any amount for a specified contingency to the extent that the contract provides for price adjustment based upon the occurrence of that contingency.

15.803 General.

(a) Since information from sources other than an offeror's or contractor's records may significantly affect the Government's negotiating position, Government personnel shall not disclose to an offeror or contractor any conclusions, recommendations, or portions of administrative contracting officer or auditor reports regarding the offeror's or contractor's proposal without the concurrence of the contracting officer responsible for negotiation. This prohibition does not preclude disclosing discrepancies or mistakes of fact (such as duplications, omissions, and errors in computation) contained in the cost or pricing data supporting the proposal.

(b) Before issuing a solicitation, the contracting officer shall (when it is feasible to do so) develop an estimate of the proper price level or value of the supplies or services to be purchased. Estimates can range from simple budgetary estimates to complex estimates based on inspection of the product itself and review of such items as drawings, specifications, and prior data.

(c) Price negotiation is intended to permit the contracting officer and the offeror to agree on a fair and reasonable price. Price negotiation does not require that agreement be reached on every element of cost. Reasonable compromises may be necessary, and it may not be possible to negotiate a price that is in accord with all the contributing specialists' opinions or with the contracting officer's prenegotiation objective. The contracting officer is responsible for exercising the requisite judgment and is solely responsible for the final pricing decision. The recommendations and counsel of contributing specialists, including auditors, are advisory only. However, the contracting officer should include comments in the price negotiation memorandum when significant audit or other specialist recommendations are not adopted.

(d) The contracting officer's primary concern is the price the Government actually pays; the contractor's eventual cost and profit or fee should be a secondary concern. The contracting officer's objective is to negotiate a contract of a type and with a price providing the contractor the greatest incentive for efficient and economical performance. The negotiation of a contract type and a price are related and should be considered together with the issues of risk and uncertainty to the contractor and the Government. Therefore the contracting officer should not become preoccupied with any single element and should balance the contract type, cost, and profit or fee negotiated to achieve a total result and price fair and reasonable to both the Government and the contractor. If, however, the contractor insists on a price or demands a profit or fee that the contracting officer considers unreasonable and the contracting officer has taken all authorized actions (including determining the feasibility of developing an alternative source) without success, the contracting officer shall then refer the contract action to higher authority. Disposition of the action by higher authority should be documented.

15.804 Cost or pricing data.

15.804-1 General.

(a) Cost or pricing data submitted by an offeror or contractor enable the Government to perform cost or price analysis and ultimately enable the Government and the contractor to negotiate fair and reasonable prices. Cost or pricing data may be submitted actually or by specific identification in writing.

(b) The Armed Services Procurement Regulation Manual for Contract Pricing (ASPM No. 1) was issued by the Department of Defense to guide pricing and negotiating personnel. It provides detailed discussions and examples applying pricing policies to pricing problems. ASPM No. 1 is available for use for instruction and professional guidance. However, it is not directive, and its references to Department of Defense forms and regulations should be considered informational only. Copies of ASPM No. 1 (Stock No. 008-000-00221-5) may be purchased from the Superintendent of Documents, Attn: Mail List Section, U.S. Government Printing Office, Washington, DC 20402.

15.804-2 Requiring certified cost or pricing data.

(a) (1) Except as provided in 15.804-3, certified cost or pricing data are required before accomplishing any of the following actions:

(i) The award of any negotiated contract (except for unpriced actions such as letter contracts) expected to exceed $500,000.

(ii) The modification of any formally advertised or negotiated contract (whether or not cost or pricing data were initially required) when the modification involves a price adjustment expected to exceed $500,000. (For example, a $150,000 modification resulting from a reduction of $350,000 and an increase of $200,000 is a pricing adjustment exceeding $500,000). This requirement does not apply when unrelated and separately priced changes for which cost or pricing data would not otherwise be required are included for adminstrative convenience in the same modification.

(iii) The award of a subcontract at any tier, if the contractor and each higher tier subcontractor have been required to furnish certified cost or pricing data, when the subcontract is expected to exceed $500,000.

(iv) The modification of any subcontract covered by subdivision (iii) above, when the price adjustment (see subdivision (ii) above) is expected to exceed $500,000.

(2) If cost or pricing data are needed for pricing actions over $25,000 and not in excess of $500,000, certified cost or pricing data may be obtained. There should be relatively few instances where certified cost or pricing data and inclusion of defective pricing clauses would be justified in awards between $25,000 and $500,000. The amount of data required to be submitted should be limited to that data necessary to allow the contracting officer to determine the reasonableness of the price. Whenever certified cost or pricing data are required for pricing actions of $500,000 or less, the contracting officer shall document the file to justify the requirement. When awarding a contract of $25,000 or less, the contracting officer shall not require certified cost or pricing data.

(b) When certified cost or pricing data are required, the contracting officer shall require the contractor or prospective contractor to submit to the contracting officer (and to have any subcontractor or prospective subcontractor submit to the prime contractor or appropriate subcontractor tier) the following in support of any proposal:

(1) The cost or pricing data.

(2) A certificate of current cost or pricing data, in the format specified in 15.804-4, certifying that to the best of its knowledge and belief, the cost or pricing data were accurate, complete, and current as of the date of final agreement on price.

15.804-3 Exemptions from or waiver of submission of certified cost or pricing data.

(a) *General.* Except as provided in paragraphs (b) and (c) below, the contracting officer shall not require submission or certification of cost or pricing data when the contracting officer determines that prices are—

(1) Based on adequate price competition (see paragraph (b) below);

(2) Based on established catalog or market prices of commercial items sold in substantial quantities to the general public (see paragraph (c) below); or

(3) Set by law or regulation (see paragraph (d) below).

(b) *Adequate price competition.* (1) Price competition exists if—

(i) Offers are solicited;

(ii) Two or more responsible offerors that can satisfy the Government's requirements submit priced offers responsive to the solicitation's expressed requirements; and

(iii) These offerors compete independently for a contract to be awarded to the responsible offeror submitting the lowest evaluated price.

(2) If price competition exists, the contracting officer shall presume that it is adequate unless—

(i) The solicitation is made under conditions that unreasonably deny to one or more known and qualified offerors an opportunity to compete;

(ii) The low offeror has such a decided advantage that it is practically immune from competition; or

(iii) There is a finding, supported by a statement of the facts and approved at a level above the contracting officer, that the lowest price is unreasonable.

(3) A price is "based on" adequate price competition if it results directly from price competition or if price analysis alone clearly demonstrates that the proposed price is reasonable in comparison with current or recent prices for the same or substantially the same items purchased in comparable quantities, terms, and conditions under contracts that resulted from adequate price competition.

(c) *Established catalog or market prices.* A proposal is exempt from the requirement for submission of certified cost or pricing data if the prices are, or are based on, established catalog or established market prices of commercial items sold in substantial quantities to the general public. In order to qualify for this exemption, the terms of the proposed purchase, such as quantity and delivery requirements, should be sufficiently similar to those of the commercial sales that the catalog or market price will be fair and reasonable.

(1) "Established catalog prices" must be recorded in a form regularly maintained by the manufacturer or vendor. This form may be a catalog, price list, schedule, or other verifiable and established record. The record must (i) be published or otherwise available for customer inspection and (ii) state current or last sales price to a significant number of buyers constituting the general public (see subparagraph (5) below).

(2) "Established market prices" are current prices that (i) are established in the course of ordinary and usual trade between buyers and sellers free to bargain and (ii) can be substantiated by data from sources independent of the manufacturer or vendor.

(3) "Commercial items" are supplies or services regularly used for other than Government purposes and sold or traded to the general public in the course of normal business operations.

(4) An item is "sold in substantial quantities" only when the quantities regularly sold are sufficient to constitute a real commercial market. Nominal quantities, such as models, samples, prototypes, or experimental units, do not meet this requirement. For services to be sold in substantial quantities, they must be customarily provided by the offeror, using personnel regularly employed and equipment (if any is necessary) regularly maintained solely or principally to provide the services.

(5) The "general public" is a significant number of buyers other than the Government or affiliates of the offeror; the item involved must not be for Government end use. For the purpose of this subsection 15.804-3, items acquired for "Government end use" include items acquired for foreign military sales.

(6) A price is "based on" a catalog or market price only if the item being purchased is sufficiently similar to the catalog- or market-priced commercial item to ensure that any difference in prices can be identified and justified without resort to cost analysis.

(7) If an item is substantially similar to a commercial item for which there is an established catalog or market price at which substantial quantities are sold to the general public, but the price proposed is not *based on* this catalog or market price (see subparagraph (6) above), the contracting officer may, if doing so will result in a fair and reasonable price, limit any requirement for cost or pricing data to those data that pertain to the differences between the items. When the difference between the catalog or market price of an item or items and the proposed total contract price is $500,000 or more, the contracting officer shall require submission of certified cost or pricing data to identify and justify that difference unless an exemption or waiver is granted.

(8) Even though there is an established catalog or market price of commercial items sold in substantial quantities to the general public, the contracting officer may require cost or pricing data if (i) the contracting officer makes a written finding that the price is not reasonable, including the facts upon which the finding is based, and (ii) the finding is approved at a level above the contracting officer.

(d) *Prices set by law or regulation.* A price set by law or regulation is exempt from the requirement for submission of certified cost or pricing data. Pronouncements in the form of periodic rulings, reviews, or similar actions of a governmental body, or embodied in the laws, are sufficient to establish the price.

(e) *Claiming and granting exemption.* To receive an exemption under paragraph (c) or (d) above, the offeror must ordinarily claim it on Standard Form 1412, Claim for Exemption from Submission of Certified Cost or Pricing Data, when the total proposed amount exceeds $500,000 and more than one catalog item for which an exemption is claimed exceeds $25,000. When an exemption is claimed for more than one item in a proposal, a separate SF 1412 is required for each such item exceeding $25,000 except as otherwise provided in the solicitation. The contracting officer may grant an exemption and need not require the submission of SF 1412 when—

(1) The Government has acted favorably on an exemption claim for the same item or similar items within the past year. In that case, except as otherwise directed by the contracting officer, the offeror may furnish a copy of the prior claim and related Government action. The offeror must also submit a statement to the effect that to its knowledge since the prior submission, except as expressly set forth in the statement, there have been no changes in the catalog price or discounts, volume of actual sales, or the ratio of sales for Government end use to sales in other categories which would cause a cumulative change in price exceeding $25,000;

(2) Special arrangements for the submission of exemption claims have been made in anticipation of repetitive acquisitions of catalog items;

(3) There is evidence, before solicitation, that the item has an acceptable established catalog or market price or a price set by law or regulation. Evidence may include (i) recent submissions by offerors or (ii) the contracting officer's knowledge of market conditions, prevailing prices, or sources.

(f) *Verification.* (1) When a prospective contractor requests exemption from submission of certified cost or pricing data, the contracting officer shall ensure that applicable criteria in either paragraph (c) or (d) above, as appropriate, are satisfied before issuing the exemption.

(2) SF 1412 lists three categories of sales related to the established catalog price of a commercial item sold in substantial quantities to the general public: A, Sales to the U.S. Government or to contractors for U.S. Government use; B, Sales at catalog price to the general public; and C, Sales to the general public at other than catalog price. Although "substantial quantities" cannot be precisely defined (see subparagraph (c)(4) above), the following guidelines are provided for determining whether exemption claims submitted under the catalog price provision of SF 1412 meet the "substantial quantities" criterion:

(i) Sales to the general public are normally regarded as substantial if (A) Category B and C sales are not negligible in themselves and comprise at least 55 percent of total sales of the item and (B) Category B sales comprise at least 75 percent of the total of Category B and C sales.

(ii) Sales to the general public are rarely considered substantial enough to grant an exemption if (A) Category B and C sales comprise less than 35 percent of total sales of the item or (B) Category B sales comprise less than 55 percent of the total of Category B and C sales.

(iii) When percentages fall between those above, the contracting officer should analyze the individual situation in order to determine whether or not an exemption is justified.

(3) The contracting officer may verify or obtain verification (including audit or contract administration assistance) of the submitted data pertaining to catalog or market prices or prices set by law or regulation. Access to the prospective contractor's records is limited to access to the facts bearing directly on the exemption claimed. It does not extend to cost, profit, or other data relevant solely to the reasonableness of the catalog or proposed price.

(g) *Individual or class exemptions.* The chief of the contracting office may authorize individual or class exemptions for exceptional cases when the contracting officer recommends that an exemption should be made, even though the case does not strictly meet all the criteria for catalog- or market-price exemption. The quantity and prices of actual commercial sales compared with prices offered to the Government, and price relationships as influenced by prevailing trade practices, are the important factors for consideration. The Government's need and the prospective contractor's resistance are not appropriate considerations.

(h) *Price analysis.* Even though an item qualifies for exemption from the requirement for submission of certified cost or pricing data, the contracting officer shall make a price analysis to determine the reasonableness of the price and any need for further negotiation. Unless information is available from Government sources, it may be necessary to obtain from the prospective contractor information such as that regarding—

(1) The supplier's marketing system (e.g., use of jobbers, brokers, sales agencies, or distributors);

(2) The services normally provided commercial purchasers (e.g., engineering, financing, or advertising or promotion);

(3) Normal quantity per order; and

(4) Annual volume of sales to largest customers.

(i) *Waiver for exceptional cases.* The agency head (or, if the contract is with a foreign government or agency, the head of the contracting activity) may, in exceptional cases, waive the requirement for submission of certified cost or pricing data. The authorization for the waiver and the reasons for granting it shall be in writing. The agency head may delegate this authority.

15.804-4 Certificate of Current Cost or Pricing Data.

(a) When certified cost or pricing data are required under 15.804-2, the contracting officer shall require the contractor to execute a Certificate of Current Cost or Pricing Data, shown below, and shall include the executed certificate in the contract file. The certificate states that the cost or pricing data are accurate, complete, and current as of the date the contractor and the Government agreed on a price. Only one certificate shall be required; the contractor shall submit it as soon as practicable after price agreement is reached.

CERTIFICATE OF CURRENT COST OR PRICING DATA

This is to certify that, to the best of my knowledge and belief, the cost or pricing data (as defined in section 15.801 of the Federal Acquisition Regulation (FAR) and required under FAR subsection 15.804-2) submitted, either actually or by specific identification in writing, to the contracting officer or to the contracting officer's representative in support of .....* are accurate, complete, and current as of .....**. This certification includes the cost or pricing data supporting any advance agreements and forward pricing rate agreements between the offeror and the Government that are part of the proposal.

Firm.....

Name.....

Title.....

Date of execution*** .....

* Identify the proposal, quotation, request for price adjustment, or other submission involved, giving the appropriate identifying number (e.g., RFP No.).

** Insert the day, month, and year when price negotiations were concluded and price agreement was reached.

*** Insert the day, month, and year of signing, which should be as close as practicable to the date when the price negotiations were concluded and the contract price was agreed to.

(End of certificate)

(b) The certificate does not constitute a representation as to the accuracy of the contractor's judgment on the estimate of future costs or projections. It does apply to the data upon which the judgment or estimate was based. This distinction between fact and judgment should be clearly understood. If the contractor had information reasonably available at the time of agreement showing that the negotiated price was not based on accurate, complete, and current data, the contractor's responsibility is not limited by any lack of personal knowledge of the information on the part of its negotiators.

(c) Closing or cutoff dates should be included as part of the data submitted with the proposal. Certain data may not be reasonably available before normal periodic closing dates (e.g., actual indirect costs). Before agreement on price, the contractor shall update all data as of the latest dates for which information is reasonably available. Data within the contractor's or a subcontractor's organization on matters significant to contractor management and to the Government will be treated as reasonably available. What is significant depends upon the circumstances of each acquisition.

(d) Possession of a Certificate of Current Cost or Pricing Data is not a substitute for examining and analyzing the contractor's proposal.

(e) Even though the solicitation may have requested cost or pricing data, the contracting officer shall not require a Certificate of Current Cost or Pricing Data when the resulting award is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation (see 15.804-3(a) through (d)).

(f) The exercise of an option at the price established in the initial negotiation in which certified cost or pricing data were used does not require recertification.

(g) Contracting officers shall not require certification at the time of agreement for data supplied in support of forward pricing rate agreements (see 15.809) or other advance agreements. When a forward pricing rate agreement or other advance agreement is used in partial support of a later contractual action that requires a certificate, the price proposal certificate shall cover (1) the data originally supplied to support the forward pricing rate agreement or other advance agreement and (2) all data required to update the price proposal to the time of agreement on contract price.

(h) Negotiated final pricing actions (such as termination settlements and total final price agreements for fixed-price incentive and redeterminable contracts) are contract modifications requiring certified cost or pricing data if (1) the total final price agreement for such settlements or agreements exceeds $500,000 or (2) the partial termination settlement plus the estimate to complete the continued portion of the contract exceeds $500,000 (see 49.105(c)(15)).

15.804-5 Reserved.

15.804-6 Procedural requirements.

(a) The contracting officer shall specify (1) whether or not cost or pricing data are required, (2) whether or not certification will be required, (3) the extent of cost or pricing data required if complete data are not necessary, and (4) the form (see paragraph (b) below) in which the cost or pricing data shall be submitted. Even if the solicitation does not so specify, however, the contracting officer is not precluded from requesting such data if they are later found necessary.

(b) (1) Cost or pricing data shall be submitted on Standard Form 1411 (SF 1411), Contract Pricing Proposal Cover Sheet, unless required to be submitted on one of the termination forms specified in Subpart 49.6. Data supporting forward pricing rate agreements or final indirect cost proposals shall be submitted in a format acceptable to the contracting officer.

(2) Contract pricing proposals submitted on SF 1411 with supporting attachments shall be prepared to satisfy the instructions and appropriate format of Table 15-3.

TABLE 15-3 INSTRUCTIONS FOR SUBMISSION OF A CONTRACT PRICING PROPOSAL

1. SF 1411 provides a vehicle for the offeror to submit to the Government a pricing proposal of estimated and/or incurred costs by contract line item with supporting information, adequately cross-referenced, suitable for detailed analysis. A cost-element breakdown, using the applicable format prescribed in 7A, B, or C below, shall be attached for each proposed line item and must reflect any specific requirements established by the contracting officer. Supporting breakdowns must be furnished for each cost element, consistent with offeror's cost accounting system. When more than one contract line item is proposed, summary total amounts covering all line items must be furnished for each cost element. If agreement has been reached with Government representatives on use of forward pricing rates/factors, identify the agreement, include a copy, and describe its nature. Depending on offeror's system, breakdowns shall be provided for the following basic elements of cost, as applicable:

Materials—Provide a consolidated priced summary of individual material quantities included in the various tasks, orders, or contract line items being proposed and the basis for pricing (vendor quotes, invoice prices, etc.).

Subcontracted Items—Include parts, components, assemblies, and services that are to be produced or performed by others in accordance with offeror's design, specifications, or direction and that are applicable only to the prime contract. For each subcontract over $500,000, the support should provide a listing by source, item, quantity, price, type of subcontract, degree of competition, and basis for establishing source and reasonableness of price, as well as the results of review and evaluation of subcontract proposals when required by FAR 15.806.

Standard Commercial Items—Consists of items that offeror normally fabricates, in whole or in part, and that are generally stocked in inventory. Provide an appropriate explanation of the basis for pricing. If price is based on cost, provide a cost breakdown; if priced at other than cost, provide justification for exemption from submission of cost or pricing data, as required by FAR 15.804-3(e).

Interorganizational Transfer (at other than cost)—Explain pricing method used. (See FAR 31.205-26).

Raw Material—Consists of material in a form or state that requires further processing. Provide priced quantities of items required for the proposal.

Purchased Parts—Includes material items not covered above. Provide priced quantities of items required for the proposal.

Interorganizational Transfer (at cost)—Include separate breakdown of cost by element.

Direct Labor—Provide a time-phased (e.g., monthly, quarterly, etc.) breakdown of labor hours, rates, and cost by appropriate category, and furnish bases for estimates.

Indirect Costs—Indicate how offeror has computed and applied offeror's indirect costs, including cost breakdowns, and showing trends and budgetary data, to provide a basis for evaluating the reasonableness of proposed rates. Indicate the rates used and provide an appropriate explanation.

Other Costs—List all other costs not otherwise included in the categories described above (e.g., special tooling, travel, computer and consultant services, preservation, packaging and packing, spoilage and rework, and Federal excise tax on finished articles) and provide bases for pricing.

Royalties—If more than $250, provide the following information on a separate page for each separate royalty or license fee: name and address of licensor; date of license agreement; patent numbers, patent application serial numbers, or other basis on which the royalty is payable; brief description (including any part or model numbers of each contract item or component on which the royalty is payable); percentage or dollar rate of royalty per unit; unit price of contract item; number of units; and total dollar amount of royalties. In addition, if specifically requested by the contracting officer, provide a copy of the current license agreement and identification of applicable claims of specific patents. (See FAR 27.204 and 31.205-37).

Facilities Capital Cost of Money—When the offeror elects to claim facilities capital cost of money as an allowable cost, the offeror must submit Form CASB-CMF and show the calculation of the proposed amount (see FAR 31.205-10).

2. As part of the specific information required, the offeror must submit with offeror's proposal, and clearly identify as such, cost or pricing data (that is, data that are verifiable and factual and otherwise as defined at FAR 15.801). In addition, submit with offeror's proposal any information reasonably required to explain offeror's estimating process, including—

a. The judgmental factors applied and the mathematical or other methods used in the estimate, including those used in projecting from known data; and

b. The nature and amount of any contingencies included in the proposed price.

3. There is a clear distinction between submitting cost or pricing data and merely making available books, records, and other documents without identification. The requirement for submission of cost or pricing data is met when all accurate cost or pricing data reasonably available to the offeror have been submitted, either actually or by specific identification, to the contracting officer or an authorized representative. As later information comes into the offeror's possession, it should be promptly submitted to the contracting officer. The requirement for submission of cost or pricing data continues up to the time of final agreement on price.

4. In submitting offeror's proposal, offeror must include an index, appropriately referenced, of all the cost or pricing data and information accompanying or identified in the proposal. In addition, any future additions and/or revisions, up to the date of agreement on price, must be annotated on a supplemental index.

5. By submitting offeror's proposal, the offeror, if selected for negotiation, grants the contracting officer or an authorized representative the right to examine those books, records, documents, and other supporting data that will permit adequate evaluation of the proposed price. This right may be exercised at any time before award.

6. As soon as practicable after final agreement on price, but before the award resulting from the proposal, the offeror shall, under the conditions stated in FAR 15.804-4, submit a Certificate of Current Cost or Pricing Data.

7. HEADINGS FOR SUBMISSION OF LINE-ITEM SUMMARIES:

A. New Contracts (including Letter contracts).

COST ELEMENTS	PROPOSED CONTRACT ESTIMATE—TOTAL COST	PROPOSED CONTRACT ESTIMATE—UNIT COST	REFERENCE
(1)	(2)	(3)	(4)

Under Column (1)—Enter appropriate cost elements.

Under Column (2)—Enter those necessary and reasonable costs that in offeror's judgment will properly be incurred in efficient contract performance. When any of the costs in this column have already been incurred (e.g., under a letter contract or unpriced order), describe them on an attached supporting schedule. When preproduction or startup costs are significant, or when specifically requested to do so by the contracting officer, provide a full identification and explanation of them.

Under Column (3)—Optional, unless required by the contracting officer.

Under Column (4)—Identify the attachment in which the information supporting the specific cost element may be found. Attach separate pages as necessary.

B. Change Orders (modifications).

COST ELEMENTS	ESTIMATED COST OF ALL WORK DELETED	COST OF DELETED WORK ALREADY PERFORMED	NET COST TO BE DELETED	COST OF WORK ADDED	NET COST OF CHANGE	REFERENCE
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Under Column (1)—Enter appropriate cost elements.

Under Column (2)—Include (i) current estimates of what the cost would have been to complete deleted work not yet performed, and (ii) the cost of deleted work already performed.

Under Column (3)—Include the incurred cost of deleted work already performed, actually computed if possible, or estimated in the contractor's accounting records. Attach a detailed inventory of work, materials, parts, components, and hardware already purchased, manufactured, or performed and deleted by the change, indicating the cost and proposed disposition of each line item. Also, if offeror desires to retain these items or any portion of them, indicate the amount offered for them.

Under Column (4)—Enter the net cost to be deleted which is the estimated cost of all deleted work less the cost of deleted work already performed. Column (2) less Column (3) = Column (4).

Under Column (5)—Enter the offeror's estimate for cost of work added by the change. When nonrecurring costs are significant, or when specifically requested to do so by the contracting officer, provide a full identification and explanation of them.

Under Column (6)—Enter the net cost of change which is the cost of work added, less the net cost to be deleted. When this result is negative, place the amount in parentheses. Column (4) less Column (5) = Column (6).

Under Column (7)—Identify the attachment in which the information supporting the specific cost element may be found. Attach separate pages as necessary.

C. Price Revision/Redetermination.

CUTOFF DATE	NUMBER OF UNITS COMPLETED	NUMBER OF UNITS TO BE COMPLETED	CONTRACT AMOUNT	REDETERMINATION PROPOSAL AMOUNT	DIFFERENCE
(1)	(2)	(3)	(4)	(5)	(6)

COST ELEMENTS	INCURRED COST—PREPRODUCTION	INCURRED COST—COMPLETED UNITS	INCURRED COST—WORK IN PROCESS	TOTAL INCURRED COST	ESTIMATED COST TO COMPLETE	ESTIMATED TOTAL COST	REFERENCE
(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)

Under Column (1)—Enter the cutoff date required by the contract, if applicable.
Under Column (2)—Enter the number of units completed during the period for which experienced costs of production are being submitted.
Under Column (3)—Enter the number of units remaining to be completed under the contract.
Under Column (4)—Enter the cumulative contract amount.
Under Column (5)—Enter the offeror's redetermination proposal amount.
Under Column (6)—Enter the difference between the contract amount and the redetermination proposal amount. When this result is negative, place the amount in parenthesis. Column (4) less Column (5) = Column (6).
Under Column (7)—Enter appropriate cost elements. When residual inventory exists, the final costs established under fixed-price-incentive and fixed-price-redeterminable arrangements should be net of the fair market value of such inventory. In support of subcontract costs, submit a listing of all subcontracts subject to repricing action, annotated as to their status.
Under Column (8)—Enter all costs incurred under the contract before starting production and other nonrecurring costs (usually referred to as startup costs) from offeror's books and records as of the cutoff date. These include such costs as preproduction engineering, special plant rearrangement, training program, and any identifiable nonrecurring costs such as initial rework, spoilage, pilot runs, etc. In the event the amounts are not segregated in or otherwise available from offeror's records, enter in this column offeror's best estimates. Explain the basis for each estimate and how the costs are charged on offeror's accounting records (e.g., included in production costs as direct engineering labor, charged to manufacturing overhead, etc.). Also show how the costs would be allocated to the units at their various stages of contract completion.
Under Columns (9) and (10)—Enter in Column (9) the production costs from offeror's books and records (exclusive of preproduction costs reported in Column (8)) of the units completed as of the cutoff date. Enter in Column (10) the costs of work in process as determined from offeror's records or inventories at the cutoff date. When the amounts for work in process are not available in contractor's records but reliable estimates for them can be made, enter the estimated amounts in Column (10) and enter in Column (9) the differences between the total incurred costs (exclusive of preproduction costs) as of the cutoff date and these estimates. Explain the basis for the estimates, including identification of any provision for experienced or anticipated allowances, such as shrinkage, rework, design changes, etc. Furnish experienced unit or lot costs (or labor hours) from inception of contract to the cutoff date, improvement curves, and any other available production cost history pertaining to the item(s) to which offeror's proposal relates.
Under Column (11)—Enter total incurred costs (Total of Columns (8), (9), and (10)).
Under Column (12)—Enter those necessary and reasonable costs that in contractor's judgment will properly be incurred in completing the remaining work to be performed under the contract with respect to the item(s) to which contractor's proposal relates.
Under Column (13)—Enter total estimated cost (Total of Columns (11) and (12)).
Under Column (14)—Identify the attachment in which the information supporting the specific cost element may be found. Attach separate pages as necessary.

(c) Closing or cutoff dates should be included as part of the data submitted with the proposal. If possible, the contracting officer and offeror should reach a prior understanding on criteria for establishing closing or cutoff dates (see 15.804-4(c)).

(d) The requirement for submission of cost or pricing data is met if all cost or pricing data reasonably available to the offeror are either submitted or identified in writing by the time of agreement on price. However, there is a clear distinction between submitting cost or pricing data and merely making available books, records, and other documents without identification. The latter does not constitute "submission" of cost or pricing data.

(e) If cost or pricing data are required and the offeror initially refuses to provide necessary data, the contracting officer shall again attempt to secure the data. If the offeror persists in the refusal, the contracting officer shall withhold the award or price adjustment and refer the contract action to higher authority, including details of the attempts made to resolve the matter and a statement of the practicability of obtaining the supplies or services from another source.

(f) Preproduction and startup costs include costs such as preproduction engineering, special tooling, special plant rearrangement, training programs, and such nonrecurring costs as initial rework, initial spoilage, and pilot runs. When these costs may be a significant cost factor in an acquisition, the contracting officer shall require in the solicitation that the offeror provide (1) an estimate of total preproduction and startup costs, (2) the extent to which these costs are included in the proposed price, and (3) the intent to absorb, or plan for recovery of, any remaining costs. If a successful offeror has indicated an intent to absorb any portion of these costs, the contract shall expressly provide that such portion will not be charged to the Government in any future noncompetitive pricing action.

(g) (1) The requirement for contractors to obtain cost or pricing data from prospective subcontractors is prescribed at 15.806. However, these data do not have to be submitted to the Government unless called for under subparagraph (2) below.

(2) The contracting officer shall require a contractor that is required to submit certified cost or pricing data also to submit to the Government (or cause the submission of) accurate, complete, and current cost or pricing data from prospective subcontractors in support of each subcontract cost estimate that is (i) $1,000,000 or more, (ii) both more than $500,000 and more than 10 percent of the prime contractor's proposed price, or (iii) considered to be necessary for adequately pricing the prime contract.

(3) If the prospective contractor satisfies the contracting officer that a subcontract will be priced on the basis of one of the exemptions in 15.804-3, the contracting officer normally shall not require submission of subcontractor cost or pricing data to the Government in that case. If the subcontract estimate is based upon the cost or pricing data of the prospective subcontractor most likely to be awarded the subcontract, the contracting officer shall not require submission to the Government of data from more than one proposed subcontractor for that subcontract.

(4) The contracting officer shall require the prospective contractor to support subcontractor cost estimates below the threshold in 15.806(b) with any data or information (including other subcontractor quotations) needed to establish a reasonable price.

(h) Subcontractor cost or pricing data shall be accurate, complete, and current as of the date of final price agreement given on the contractor's Certificate of Current Cost or Pricing Data. The prospective contractor shall be responsible for updating a prospective subcontractor's data.

(i) When the prospective contractor has generally complied with subcontract cost or pricing data requirements, the contracting officer may, in exceptional cases, excuse failure to do so for particular subcontracts and award the prime contract. Each such excuse, unless limited to allowing additional time, requires approval by the chief of the contracting office. For each subcontract involved, the contractor remains obligated to obtain prospective subcontractor cost or pricing data before actual award of that subcontract. For each such subcontract, the contracting officer shall—

(1) Allow additional time for submission of data up to the date of agreement upon the prime contract price;

(2) Withdraw the requirement if data submitted are adequate to support the subcontract estimate;

(3) Reserve the subcontract item for future pricing;

(4) Consider another contract type; or

(5) Make other arrangements to provide an adequate basis for price agreement.

15.804-7 Defective cost or pricing data.

(a) If, before agreement on price, the contracting officer learns that any cost or pricing data submitted are inaccurate,

incomplete, or noncurrent, the contracting officer shall immediately bring the matter to the attention of the prospective contractor, whether the defective data increase or decrease the contract price. The contracting officer shall negotiate, using any new data submitted or making satisfactory allowance for the incorrect data. The price negotiation memorandum shall reflect the revised facts.

(b) If, after award, cost or pricing data are found to be inaccurate, incomplete, or noncurrent as of the date of final agreement on price given on the contractor's or subcontractor's Certificate of Current Cost or Pricing Data, the Government is entitled to a price adjustment, including profit or fee, of any significant amount by which the price was increased because of the defective data. This entitlement is ensured by including in the contract one of the clauses prescribed in 15.804-8 and set forth at 52.215-22, Price Reduction for Defective Cost or Pricing Data, and 52.215-23, Price Reduction for Defective Cost or Pricing Data—Modifications. The clauses give the Government the right to a price adjustment for defects in cost or pricing data submitted by the contractor, a prospective subcontractor, or an actual subcontractor. In arriving at a price adjustment under the clause, the contracting officer shall consider—

(1) The time by which the cost or pricing data became reasonably available to the contractor;

(2) The extent to which the Government relied upon the defective data; and

(3) Any understated cost or pricing data submitted in support of price negotiations, up to the amount of the Government's claim for overstated pricing data arising out of the same pricing action (for example, the initial pricing of the same contract or the pricing of the same change order). Such offsets need not be in the same cost groupings (e.g., material, direct labor, or indirect costs).

(c) If, after award, the contracting officer learns or suspects that the data furnished were not accurate, complete, and current, or were not adequately verified by the contractor as of the time of negotiation, the contracting officer shall request an audit to evaluate the accuracy, completeness, and currency of the data. Only if the audit reveals that the data certified by the contractor were defective may the Government evaluate the profit-cost relationships. The contracting officer shall not reprice the contract solely because the profit was greater than forecast or because some contingency specified in the submission failed to materialize.

(d) For each advisory audit received based on a postaward review which indicates defective pricing, the contracting officer shall make a determination as to whether or not the data submitted were defective and relied upon. Before making such a determination, the contracting officer should give the contractor an opportunity to support the accuracy, completeness, and currency of the data in question. The contracting officer shall prepare a memorandum indicating (1) the contracting officer determination as to whether or not the submitted data were accurate, complete, and current as of the certified date and whether or not the Government relied on the data, and (2) the results of any contractual action taken. The contracting officer shall send one copy of this memorandum to the auditor and, if the contract has been assigned for administration, one copy to the administrative contracting officer (ACO). The contracting officer shall notify the contractor by copy of this memorandum, or otherwise, of the determination.

(e) If (1) both contractor and subcontractor submitted and (2) the contractor certified cost or pricing data, the Government has the right, under the clauses at 52.215-22, Price Reduction for Defective Cost or Pricing Data, and 52.215-23, Price Reduction for Defective Cost or Pricing Data—Modifications, to reduce the prime contract price if it was significantly increased because a subcontractor submitted defective data. This right applies whether these data supported subcontract cost estimates or supported firm agreements between subcontractor and contractor.

(f) If Government audit discloses defective subcontractor cost or pricing data, the information necesssary to support a reduction in prime contract and subcontract prices may be available only from the Government. To the extent necessary to secure a prime contract price reduction, the contracting officer should make this information available to the prime contractor or appropriate subcontractors upon request. If release of the information would compromise Government security or disclose trade secrets or confidential business information, the contracting officer shall release it only under conditions that will protect it from improper disclosure. Information made available under this paragraph shall be limited to that used as the basis for the prime contract price reduction. In order to afford an opportunity for corrective action, the contracting officer should give the prime contractor reasonable advance notice before determining to reduce the prime contract price.

(1) When a prime contractor includes defective subcontract data in arriving at the price but later awards the subcontract to a lower priced subcontractor (or does not subcontract for the work), any adjustment in the prime contract price due to defective subcontract data is limited to the difference (plus applicable indirect cost and profit markups) between (i) the subcontract price used for pricing the prime contract and (ii) either the actual subcontract price or the actual cost to the contractor, if not subcontracted, provided the data on which the actual subcontract price is based are not themselves defective.

(2) Under cost-reimbursement contracts and under all fixed-price contracts except (i) firm-fixed-price contracts and (ii) contracts with economic price adjustment, payments to subcontractors that are higher than they would be had there been no defective subcontractor cost or pricing data shall be the basis for disallowance or nonrecognition of costs under the clauses prescribed in 15.804-8. The Government has a continuing and direct financial interest in such payments that is unaffected by the initial agreement on prime contract price.

15.804-8 Contract clauses.

(a) *Price Reduction for Defective Cost or Pricing Data.* The contracting officer shall, when contracting by negotiation, insert the clause at 52.215-22, Price Reduction for Defective Cost or Pricing Data, in solicitations and contracts when it is contemplated that cost or pricing data will be required (see 15.804-2).

(b) *Price Reduction for Defective Cost or Pricing Data—Modifications.* The contracting officer shall, when contracting by negotiation, insert the clause at 52.215-23, Price Reduction for Defective Cost or Pricing Data—Modifications, in solicitations and contracts when (1) it is contemplated that cost or pricing data will be required (see 15.804-2) for the pricing of contract modifications, and (2) the clause prescribed in paragraph (a) above has not been included.

(c) *Subcontractor Cost or Pricing Data.* The contracting officer shall insert the clause at 52.215-24, Subcontractor Cost or Pricing Data, in solicitations and contracts when the clause prescribed in paragraph (a) above is included.

(d) *Subcontractor Cost or Pricing Data—Modifications.* The contracting officer shall insert the clause at 52.215-25, Subcontractor Cost or Pricing Data—Modifications, in solicitations and

contracts when the clause prescribed in paragraph (b) above is included.

15.805 Proposal analysis.

15.805-1 General.

(a) The contracting officer, exercising sole responsibility for the final pricing decision, shall, as appropriate, coordinate a team of experts and request and evaluate the advice of specialists in such fields as contracting, finance, law, contract audit, packaging, quality control, engineering traffic management, and contract pricing. The contracting officer should have appropriate specialists attend the negotiations when complex problems involving significant matters will be addressed. The contracting officer may assign responsibility to a negotiator or price analyst for (1) determining the extent of specialists' advice needed and evaluating that advice, (2) coordinating a team of experts, (3) consolidating pricing data and developing a prenegotiation objective (see 15.807), and (4) conducting negotiations.

(b) When cost or pricing data are required, the contracting officer shall make a cost analysis to evaluate the reasonableness of individual cost elements. In addition, the contracting officer should make a price analysis to ensure that the overall price offered is fair and reasonable. When cost or pricing data are not required, the contracting officer shall make a price analysis to ensure that the overall price offered is fair and reasonable.

(c) The contracting officer shall require prospective contractors to perform (1) price analysis for all significant proposed subcontracts and purchase orders and (2) cost analysis when the prospective subcontractor is required to submit cost or pricing data or the contractor is unable to perform an adequate price analysis (see 15.806(a)).

15.805-2 Price analysis.

The contracting officer is responsible for selecting and using whatever price analysis techniques will ensure a fair and reasonable price. One or more of the following techniques may be used to perform price analysis:

(a) Comparison of price quotations received in response to the solicitation.

(b) Comparison of prior quotations and contract prices with current quotations for the same or similar end items.

(c) Application of rough yardsticks (such as dollars per pound or per horsepower, or other units) to highlight significant inconsistencies that warrant additional pricing inquiry.

(d) Comparison with competitive published price lists, published market prices of commodities, similar indexes, and discount or rebate arrangements.

(e) Comparison of proposed prices with independent Government cost estimates (see 15.803(b)).

15.805-3 Cost analysis.

The contracting officer shall, as appropriate, use the techniques and procedures outlined in paragraphs (a) through (f) below to perform cost analysis:

(a) Verification of cost or pricing data and evaluation of cost elements, including—

(1) The necessity for and reasonableness of proposed costs, including allowances for contingencies;

(2) Projection of the offeror's cost trends, on the basis of current and historical cost or pricing data;

(3) A technical appraisal of the estimated labor, material, tooling, and facilities requirements and of the reasonableness of scrap and spoilage factors; and

(4) The application of audited or negotiated indirect cost rates (see Subpart 42.7), labor rates, and cost of money or other factors.

(b) Evaluating the effect of the offeror's current practices on future costs. In conducting this evaluation, the contracting officer shall ensure that the effects of inefficient or uneconomical past practices are not projected into the future. In pricing production of recently developed, complex equipment, the contracting officer should make a trend analysis of basic labor and materials even in periods of relative price stability.

(c) Comparison of costs proposed by the offeror for individual cost elements with—

(1) Actual costs previously incurred by the same offeror;

(2) Previous cost estimates from the offeror or from other offerors for the same or similar items;

(3) Other cost estimates received in response to the Government's request;

(4) Independent Government cost estimates by technical personnel; and

(5) Forecasts or planned expenditures.

(d) Verification that the offeror's cost submissions are in accordance with the contract cost principles and procedures in Part 31 and, when applicable, the requirements and procedures in Part 30, Cost Accounting Standards.

(e) Review to determine whether any cost or pricing data necessary to make the contractor's proposal accurate, complete, and current have not been either submitted or identified in writing by the contractor. If there are such data, the contracting officer shall attempt to obtain them and negotiate, using them or making satisfactory allowance for the incomplete data.

(f) Analysis of the results of any make-or-buy program reviews, in evaluating subcontract costs.

15.805-4 Technical analysis.

When cost or pricing data are required, the contracting officer should generally request a technical analysis of proposals, asking that requirements, logistics, or other appropriate qualified personnel review and assess, as a minimum—

(a) The quantities and kinds of material proposed;

(b) The need for the number and kinds of labor hours and the labor mix;

(c) The special tooling and facilities proposed;

(d) The reasonableness of proposed scrap and spoilage factors; and

(e) Any other data that may be pertinent to the cost or price analysis.

15.805-5 Field pricing support.

(a) (1) When cost or pricing data are required, contracting officers shall request a field pricing report (which may include an audit review by the cognizant contract audit activity) before negotiating any contract or modification resulting from a proposal in excess of $500,000, except as otherwise authorized under agency procedures, unless information available to the contracting officer is considered adequate to determine the reasonableness of the proposed cost or price. When available data are considered adequate for a reasonableness determination, the contracting officer shall document the contract file to reflect the basis of the determination.

(2) Field pricing reports are intended to give the contracting officer a detailed analysis of the proposal, for use in contract negotiations. Field pricing support personnel include, but are not limited to, administrative contracting officers, contract auditors, price analysts, quality assurance personnel, engineers, and small business and legal specialists.

(b) Contracting officers should not request field pricing support for proposed contracts or modifications of an amount less than that specified in subparagraph (a)(1) above. An exception may be made when a reasonable pricing result cannot be established, because of (1) lack of knowledge of the particular contractor, (2) sensitive conditions, or (3) an inability to evaluate the price

reasonableness through price analysis or cost analysis of existing data.

(c) (1) When initiating field pricing support, the contracting officer shall do so by sending a request to the cognizant administrative contracting officer (ACO). When field pricing support is not available, or is exempted by agency regulations, the contracting officer may initiate an audit by sending the request directly to the cognizant audit office. In both cases, the contracting officer shall, in the request, (i) prescribe the extent of the support needed, (ii) state the specific areas for which input is required, (iii) include the information necessary to perform the review (such as the offeror's proposal and the applicable portions of the solicitation, particularly those describing requirements and delivery schedules), and (iv) assign a realistic deadline for receipt of the report.

(2) Assignment of unrealistically short deadlines may reduce the quality of the audit and field pricing reports and may make it impossible to establish the fairness and reasonableness of the price.

(3) Agency field pricing procedures shall not preclude free and open communication among the contracting officer, ACO, and auditor.

(d) Only the auditor shall have general access to the offeror's books and financial records. This limitation does not preclude the contracting officer, the ACO, or their representatives from requesting any data from or reviewing offeror records necessary to the discharge of their responsibilities. The duties of auditors and those of other specialists may require both to evaluate the same elements of estimated costs. They shall review the data jointly or concurrently when possible, the auditor rendering services within the audit area of responsibility and the other specialists rendering services within their own areas of responsibility. The auditor shall promptly report to the contracting officer any denial of access to records or to cost or pricing data considered essential to the preparation of a satisfactory audit report.

(e) The auditor shall begin the audit as soon as possible after receiving the contracting officer's request. The auditor is responsible for the scope and depth of the audit. As a minimum, the audit report shall include the following:

(1) The findings on specific areas listed in the contracting officer's request.

(2) An explanation of the basis and method used by the offeror in proposal preparation.

(3) An identification of the original proposal and of all subsequent written formal and other identifiable submissions by which cost or pricing data were either submitted or identified.

(4) A description of cost or pricing data coming to the attention of the auditor that were not submitted but that may have a significant effect on the proposed cost or price.

(5) A list of any cost or pricing data submitted that are not accurate, complete, and current and of any cost representations that are unsupported. When the result of deficiencies is so great that the auditor considers the proposal impaired as a basis for negotiation, the contracting officer should be advised so that prompt corrective action may be taken.

(6) The originals of all technical analyses received by the auditor and a quantification of the dollar effect of the technical analysis findings.

(7) If the auditor believes that the offeror's estimating methods or accounting system are inadequate to support the proposal or to permit satisfactory administration of the contract contemplated, a statement to that effect.

(8) A statement of the extent to which the auditor has discussed discrepancies or mistakes of fact in the proposal with the offeror.

(f) The auditor shall not discuss auditor conclusions or recommendations on the offeror's estimated or projected costs with the offeror unless specifically requested to do so by the contracting officer.

(g) If field pricing support was not requested, the auditor shall send the completed audit report directly to the contracting officer. If field pricing support was requested, the auditor shall send the completed audit report to the ACO for forwarding, without change, with the field pricing report. The ACO shall consolidate the field pricing report inputs and send a field pricing report, accompanied by the original copy of the audit report, to the contracting officer by the assigned date. The ACO shall send the auditor a copy of the field pricing report (without the audit report and technical analysis). Audit and field pricing reports shall be made a part of the official contract file.

(h) If any information is disclosed after submission of the audit report that may significantly affect the audit findings, the contracting officer or the ACO should promptly advise the auditor, who shall determine whether to issue a supplemental report.

(i) The prime contractor or higher tier subcontractor is responsible for conducting appropriate cost analyses before awarding subcontracts. However, the contracting officer may request audit or field pricing support to analyze and evaluate the proposal of a subcontractor at any tier (notwithstanding availability of data or analyses performed by the prime contractor) if the contracting officer believes that such support is necessary to ensure reasonableness of the total proposed price. This step may be appropriate when, for example—

(1) There is a business relationship between the contractor and subcontractor not conducive to independence and objectivity;

(2) The contractor is a sole source and the subcontract costs represent a substantial part of the contract cost;

(3) The contractor has been denied access to the subcontractor's records; or

(4) The contracting officer determines that, because of factors such as the size of the proposed subcontractor price, audit or field pricing support for a subcontract or subcontracts at any tier is critical to a fully detailed analysis of the prime contract proposal.

(j) When the contracting officer requests the cognizant ACO or auditor to review a subcontractor's cost estimates, the request shall include, when available, a copy of any review prepared by the prime contractor or higher tier subcontractor, the subcontractor's proposal, cost or pricing data provided by the subcontractor, and the results of the prime contractor's cost or price analysis.

(k) When the Government performs the subcontract analysis, the Government shall furnish to the prime contractor or higher tier subcontractor, with the consent of the subcontractor reviewed, a summary of the analysis performed in determining any unacceptable costs, by element, included in the subcontract proposal. If the subcontractor withholds consent, the Government shall furnish a range of unacceptable costs for each element in such a way as to prevent giving away subcontractor proprietary data.

15.806 Subcontract pricing considerations.

(a) Subcontractors must submit to the contractor or higher tier subcontractor cost or pricing data or claims for exemption from the requirement to submit them. The contractor and higher tier subcontractor are responsible for (1) conducting price analysis and, when the subcontractor is required to submit cost or pricing data or if the contractor or higher tier subcontractor is unable to perform an adequate price analysis, cost analysis for all subcontracts and (2) including the results of subcontract reviews and evaluations as part of their own cost or pricing data submission (see 15.805-5(i) through (k)).

(b) Except when the subcontract prices are based on adequate price competition or on established catalog or market prices of commercial items sold in substantial quantities to the general public or are set by law or regulation, any contractor required to submit certified cost or pricing data also shall obtain certified cost or pricing data before awarding any subcontract or purchase order expected to exceed $500,000 or issuing any modification involving a price adjustment expected to exceed $500,000 (see example of pricing adjustment at 15.804-2(a)(1)(ii) and see 15.804-6(g) through (i)).

(c) The requirements in paragraphs (a) and (b) above, modified to relate to higher tier subcontractors rather than to the prime contractor, shall apply to lower tier subcontracts for which subcontractor cost or pricing data are required.

15.807 Prenegotiation objectives.

(a) The process of determining prenegotiation objectives helps the contracting officer to judge the overall reasonableness of proposed prices and to negotiate a fair and reasonable price or cost and fee. In setting the prenegotiation objectives, the contracting officer shall analyze the offeror's proposal, taking into account the field pricing report, if any; any audit report and technical analysis whether or not part of a field pricing report; and other pertinent data such as independent Government cost estimates and price histories. This process may include fact-finding sessions with the offeror when the contracting officer deems appropriate.

(b) The contracting officer shall establish prenegotiation objectives before the negotiation of any pricing action. The scope and depth of the analysis supporting the objectives should be directly related to the dollar value, importance, and complexity of the pricing action. When cost analysis is required, the analysis shall address (1) the pertinent issues to be negotiated, (2) the cost objectives, and (3) a profit or fee objective.

(c) The Government's cost objective and proposed pricing arrangement directly affect the profit or fee objective. Because profit or fee is only one of several interrelated variables, the contracting officer shall not agree on profit or fee without concurrent agreement on cost and type of contract. Specific agreement on the exact values or weights assigned to individual profit-analysis factors (see 15.905) is not required during negotiations and should not be attempted.

15.808 Price negotiation memorandum.

(a) At the conclusion of each negotiation of an initial or revised price, the contracting officer shall promptly prepare a memorandum of the principal elements of the price negotiation. The memorandum shall be included in the contract file and shall contain the following minimum information:

(1) The purpose of the negotiation.

(2) A description of the acquisition, including appropriate identifying numbers (e.g., RFP No.).

(3) The name, position, and organization of each person representing the contractor and the Government in the negotiation.

(4) The current status of the contractor's purchasing system when material is a significant cost element.

(5) If certified cost or pricing data were required, the extent to which the contracting officer—

(i) Relied on the cost or pricing data submitted and used them in negotiating the price; and

(ii) Recognized as inaccurate, incomplete, or noncurrent any cost or pricing data submitted; the action taken by the contracting officer and the contractor as a result; and the effect of the defective data on the price negotiated.

(6) If cost or pricing data were not required in the case of any price negotiation over $500,000, the exemption or waiver used and the basis for claiming or granting it.

(7) If certified cost or pricing data were required in the case of any price negotiation under $500,000, the rationale for such requirement.

(8) A summary of the contractor's proposal, the field pricing report recommendations, and the reasons for any pertinent variances from the field pricing report recommendations.

(9) The most significant facts or considerations controlling the establishment of the prenegotiation price objective and the negotiated price including an explanation of any significant differences between the two positions.

(10) The basis for determining the profit or fee prenegotiation objective and the profit or fee negotiated.

(b) Whenever a field pricing report has been submitted, the contracting officer shall forward a copy of the price negotiation memorandum (PNM) to the cognizant audit office and a copy to the cognizant administrative contracting officer. When appropriate, information on how the advisory services of the field pricing support team can be made more effective should be provided separately.

15.809 Forward pricing rate agreements.

(a) Negotiation of forward pricing rate agreements (FPRA's) may be requested by the contracting officer or the contractor or initiated by the administrative contracting officer (ACO). In determining whether or not to establish such an agreement, the ACO should consider whether the benefits to be derived from the agreement are commensurate with the effort of establishing and monitoring it. Normally, FPRA's should be negotiated only with contractors having a significant volume of Government contract proposals. The cognizant contract administration agency shall determine whether an FPRA will be established.

(b) The ACO shall obtain the contractor's proposal and require that it include cost or pricing data that are accurate, complete, and current as of the date of submission. The ACO shall invite the cognizant contract auditor and contracting offices having a significant interest to participate in developing a Government objective and in the negotiations. Upon completing negotiations, the ACO shall prepare a price negotiation memorandum (PNM) (see 15.808) and forward copies of the PNM and FPRA to the cognizant auditor and to all contracting offices that are known to be affected by the FPRA. A Certificate of Current Cost or Pricing Data shall not be required at this time (see 15.804-4(g)).

(c) The FPRA shall provide specific terms and conditions covering expiration, application, and data requirements for systematic monitoring to assure the validity of the rates. The agreement shall provide for cancellation at the option of either party and shall require the contractor to submit to the ACO and to the cognizant contract auditor any significant change in cost or pricing data.

(d) Offerors are required (see 15.804-4(g)) to describe any FPRA's in each specific pricing proposal to which the rates apply and identify the latest cost or pricing data already submitted in accordance with the agreement. All data submitted in connection with the agreement, updated as necessary, form a part of the total data that the offeror certifies to be accurate, complete, and current at the time of agreement on price for an initial contract or for a contract modification.

(e) Contracting officers will use FPRA rates as bases for pricing all contracts, modifications, and other contractual actions to be performed during the period covered by the agreement, unless the ACO determines that changed

conditions have invalidated part or all of the agreement. Conditions that may affect the agreement's validity shall be promptly reported to the ACO.

(1) If the ACO determines that the agreement is still valid, the ACO shall notify the individual or agency that reported the changed conditions.

(2) If the ACO determines that a changed condition has invalidated the agreement, the ACO shall notify all interested parties of the extent of its effect and initiate revision of the agreement.

(f) When an FPRA has been invalidated, the contractor, ACO, and contracting officer shall reflect the changed condition in proposals, cost analyses, and negotiations, pending revision of the agreement.

15.810 Should-cost analysis.

(a) Should-cost analysis is a specialized form of cost analysis employing an integrated team of Government contracting, contract administration, pricing, audit, and engineering representatives. It differs from regular cost analysis in its depth, in the fact that it is conducted at the contractor's plant, and in the extent to which the Government identifies and challenges inefficiencies in the contractor's management and operations rather than merely challenging certain proposed costs. The purpose of should-cost analysis is to (1) identify uneconomical or inefficient practices in the contractor's management and operations, (2) quantify their impact on cost in order to develop a realistic price objective for negotiation, and (3) lead to both short- and long-range improvements in the contractor's economy and efficiency.

(b) A should-cost analysis should be considered, particularly in the case of a major system acquisition (see Part 34), when—

(1) Some initial production has already taken place;

(2) The contract will be awarded on a sole-source basis;

(3) There are future year production requirements for substantial quantities of like items;

(4) The items being acquired have a history of increasing costs;

(5) The work is sufficiently defined to permit an effective analysis and major changes are unlikely;

(6) Sufficient time is available to plan and conduct the should-cost analysis adequately; and

(7) Personnel with the required skills are available or can be assigned for the duration of the should-cost analysis.

(c) When a should-cost analysis is planned, the contracting officer should state this fact (1) in the acquisition plan (see Subpart 7.1) and (2) in the solicitation.

(d) The contracting officer should decide which elements of the contractor's operation have the greatest potential for cost savings and assign the available personnel resources accordingly. While the particular elements to be analyzed are a function of the contract work task, elements such as manufacturing, pricing and accounting, management and organization, and subcontract and vendor management are normally reviewed in a should-cost analysis.

(e) In acquisitions for which a should-cost analysis is conducted, field pricing reports (see 15.805) are required only to the extent that they contribute to the combined team position. The contracting officer shall consider the findings and recommendations of the should-cost analysis when negotiating the contract price. After completing the negotiation, the contracting officer shall provide the administrative contracting officer a report of any identified uneconomical or inefficient practices, together with a report of correction or disposition agreements reached with the contractor.

15.811 Estimating systems.

(a) The consistent preparation of proposals using an acceptable estimating system benefits both the Government and the contractor by increasing the accuracy and reliability of individual proposals. Cognizant audit activities, when it is appropriate to do so, shall establish and manage regular programs for reviewing selected contractors' estimating systems or methods, in order to (1) reduce the scope of reviews to be performed on individual proposals, (2) expedite the negotiation process, and (3) increase the reliability of proposals. The results of estimating system reviews shall be documented in survey reports.

(b) The auditor shall send a copy of the estimating system survey report and a copy of the official notice of corrective action required to each contracting office and contract administration office having substantial business with that contractor. Significant deficiencies not corrected by the contractor shall be a consideration in subsequent proposal analyses and negotiations.

(c) In determining the acceptability of a contractor's estimating system, the auditor should consider—

(1) The source of data for estimates and the procedures for ensuring that the data are accurate, complete, and current;

(2) The documentation developed and maintained in support of the estimate;

(3) The assignment of responsibilities for originating, reviewing, and approving estimates;

(4) The procedures followed for developing estimates for direct and indirect cost elements;

(5) The extent of coordination and communication between organizational elements responsible for the estimate; and

(6) Management support, including estimate approval, establishment of controls, and training programs.

SUBPART 15.9—PROFIT

15.900 Scope of subpart.

This subpart—

(a) Prescribes policies for establishing the profit or fee portion of the Government prenegotiation objective;

(b) Applies to price negotiations based on cost analysis;

(c) Prescribes policies for agencies' development and use of a structured approach for determining the profit or fee prenegotiation objective (see 15.905 for the contents of a structured approach); and

(d) Specifies (1) situations requiring contracting officers to analyze profit and (2) considerations for that analysis.

15.901 General.

(a) Profit or fee prenegotiation objectives do not necessarily represent net income to contractors. Rather, they represent that element of the potential total remuneration that contractors *may* receive for contract performance over and above allowable costs. This potential remuneration element and the Government's estimate of allowable costs to be incurred in contract performance together equal the Government's total prenegotiation objective. Just as actual costs may vary from estimated costs, the contractor's actual realized profit or fee may vary from negotiated profit or fee, because of such factors as efficiency of performance, incurrence of costs the Government does not recognize as allowable, and contract type.

(b) It is in the Government's interest to offer contractors opportunities for financial rewards sufficient to (1) stimulate efficient contract performance, (2) attract the best capabilities of qualified large and small business concerns to Government contracts, and (3) maintain a viable industrial base.

(c) Both the Government and contractors should be concerned with profit as a motivator of efficient and effective contract performance. Negotiations aimed merely at reducing prices by reducing profit, without proper

recognition of the function of profit, are not in the Government's interest. Negotiation of extremely low profits, use of historical averages, or automatic application of predetermined percentages to total estimated costs do not provide proper motivation for optimum contract performance. With the exception of statutory ceilings in 15.903(d) on profit and fee, agencies shall not (1) establish administrative ceilings or (2) create administrative procedures that could be represented to contractors as de facto ceilings.

15.902 Policy.

(a) Structured approaches (see 15.905) for determining profit or fee prenegotiation objectives provide a discipline for ensuring that all relevant factors are considered. Subject to the authorities in 1.301(c), agencies making noncompetitive contract awards over $100,000 totaling $50 million or more a year—

(1) Shall use a structured approach for determining the profit or fee objective in those acquisitions that require cost analysis; and

(2) May prescribe specific exemptions for situations in which mandatory use of a structured approach would be clearly inappropriate.

(b) Agencies may use another agency's structured approach.

15.903 Contracting officer responsibilities.

(a) When the price negotiation is not based on cost analysis, contracting officers are not required to analyze profit.

(b) When the price negotiation is based on cost analysis, contracting officers in agencies that have a structured approach shall use it to analyze profit. When not using a structured approach, contracting officers shall comply with 15.905-1 in developing profit or fee prenegotiation objectives.

(c) Contracting officers shall use the Government prenegotiation cost objective amounts as the basis for calculating the profit or fee prenegotiation objective. Before the allowability of facilities capital cost of money, this cost was included in profits or fees. Therefore, before applying profit or fee factors, the contracting officer shall exclude any facilities capital cost of money included in the cost objective amounts. If the prospective contractor fails to identify or propose facilities capital cost of money in a proposal for a contract that will be subject to the cost principles for contracts with commercial organizations (see Subpart 31.2), facilities capital cost of money will not be an allowable cost in any resulting contract (see 15.904).

(d) (1) The contracting officer shall not negotiate a price or fee that exceeds the following statutory limitations, imposed by 10 U.S.C. 2306(d) and 41 U.S.C. 254(b):

(i) For experimental, developmental, or research work performed under a cost-plus-fixed-fee contract, the fee shall not exceed 15 percent of the contract's estimated cost, excluding fee.

(ii) For architect-engineering services for public works or utilities, the contract price or the estimated cost and fee for production and delivery of designs, plans, drawings, and specifications shall not exceed 6 percent of the estimated cost of construction of the public work or utility, excluding fees.

(iii) For other cost-plus-fixed-fee contracts, the fee shall not exceed 10 percent of the contract's estimated cost, excluding fee.

(2) The limitations in subdivisions (1)(i) and (iii) above shall apply also to the maximum fees on cost-plus-incentive-fee and cost-plus-award-fee contracts. However, the maximum-fee limitation for a specific cost-plus-incentive-fee or cost-plus-award-fee contract may be waived in accordance with Subpart 1.4.

(e) The contracting officer shall not require any prospective contractor to submit details of its profit or fee objective but shall consider them if they are submitted voluntarily.

(f) If a change or modification (1) calls for essentially the same type and mix of work as the basic contract and (2) is of relatively small dollar value compared to the total contract value, the contracting officer may use the basic contract's profit or fee rate as the prenegotiation objective for that change or modification.

15.904 Solicitation provision and contract clause.

The contracting officer shall insert the clause at 52.215-30, Facilities Capital Cost of Money, and the clause at 52.215-31, Waiver of Facilities Capital Cost of Money, in solicitations and contracts that are subject to the cost principles for contracts with commercial organizations (see Subpart 31.2). If, however, the contractor elects to claim facilities capital cost of money as an allowable cost in the contractor's proposal, the clause at 52.215-31 is inapplicable in the resulting contract.

15.905 Profit-analysis factors.

15.905-1 Common factors.

Unless it is clearly inappropriate or not applicable, each factor outlined in paragraphs (a) through (f) following shall be considered by agencies in developing their structured approaches and by contracting officers in analyzing profit whether or not using a structured approach.

(a) *Contractor effort.* This factor measures the complexity of the work and the resources required of the prospective contractor for contract performance. Greater profit opportunity should be provided under contracts requiring a high degree of professional and managerial skill and to prospective contractors whose skills, facilities, and technical assets can be expected to lead to efficient and economical contract performance. Subfactors (1) through (4) following shall be considered in determining contractor effort, but they may be modified in specific situations to accommodate differences in the categories used by prospective contractors for listing costs:

(1) *Material acquisition.* This subfactor measures the managerial and technical effort needed to obtain the required purchased parts and material, subcontracted items, and special tooling. Considerations include (i) the complexity of the items required, (ii) the number of purchase orders and subcontracts to be awarded and administered, (iii) whether established sources are available or new or second sources must be developed, and (iv) whether material will be obtained through routine purchase orders or through complex subcontracts requiring detailed specifications. Profit consideration should correspond to the managerial and technical effort involved.

(2) *Conversion direct labor.* This subfactor measures the contribution of direct engineering, manufacturing, and other labor to converting the raw materials, data, and subcontracted items into the contract items. Considerations include the diversity of engineering, scientific, and manufacturing labor skills required and the amount and quality of supervision and coordination needed to perform the contract task.

(3) *Conversion-related indirect costs.* This subfactor measures how much the indirect costs contribute to contract performance. The labor elements in the allocable indirect costs should be given the profit consideration they would receive if treated as direct labor. The other elements of indirect costs should be evaluated to determine whether they (i) merit only limited profit consideration because of their routine nature or (ii) are elements that contribute significantly to the proposed contract.

(4) *General management.* This subfactor measures the prospective contractor's other indirect costs and general and administrative (G&A) expense, their composition, and how much they contribute to contract performance. Considerations include (i) how labor in the overhead pools would be treated if it were direct labor, (ii) whether elements within the pools are routine expenses or instead are elements that contribute significantly to the proposed contract, and (iii) whether the elements require routine as opposed to unusual managerial effort and attention.

(b) *Contract cost risk.* (1) This factor measures the degree of cost responsibility and associated risk that the prospective contractor will assume (i) as a result of the contract type contemplated and (ii) considering the reliability of the cost estimate in relation to the complexity and duration of the contract task. Determination of contract type should be closely related to the risks involved in timely, cost-effective, and efficient performance. This factor should compensate contractors proportionately for assuming greater cost risks.

(2) The contractor assumes the greatest cost risk in a closely priced firm-fixed-price contract under which it agrees to perform a complex undertaking on time and at a predetermined price. Some firm-fixed-price contracts may entail substantially less cost risk than others because, for example, the contract task is less complex or many of the contractor's costs are known at the time of price agreement, in which case the risk factor should be reduced accordingly. The contractor assumes the least cost risk in a cost-plus-fixed-fee level-of-effort contract, under which it is reimbursed those costs determined to be allocable and allowable, plus the fixed fee.

(3) In evaluating assumption of cost risk, contracting officers shall, except in unusual circumstances, treat time-and-materials, labor-hour, and firm-fixed-price, level-of-effort terms contracts as cost-plus-fixed-fee contracts.

(c) *Federal socioeconomic programs.* This factor measures the degree of support given by the prospective contractor to Federal socioeconomic programs, such as those involving small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals, handicapped sheltered workshops, labor surplus areas, and energy conservation. Greater profit opportunity should be provided contractors who have displayed unusual initiative in these programs.

(d) *Capital investments.* This factor takes into account the contribution of contractor investments to efficient and economical contract performance.

(e) *Cost-control and other past accomplishments.* This factor allows additional profit opportunities to a prospective contractor that has previously demonstrated its ability to perform similar tasks effectively and economically. In addition, consideration should be given to (1) measures taken by the prospective contractor that result in productivity improvements and (2) other cost-reduction accomplishments that will benefit the Government in follow-on contracts.

(f) *Independent development.* Under this factor, the contractor may be provided additional profit opportunities in recognition of independent development efforts relevant to the contract end item without Government assistance. The contracting officer should consider whether the development cost was recovered directly or indirectly from Government sources.

15.905-2 Additional factors.

In order to foster achievement of program objectives, each agency may include additional factors in its structured approach or take them into account in the profit analysis of individual contract actions.

SUBPART 15.10—PREAWARD AND POSTAWARD NOTIFICATIONS, PROTESTS, AND MISTAKES

15.1001 Notifications to offerors.

(a) *General.* The contracting officer shall notify each offeror whose proposal is determined to be unacceptable or whose offer is not selected for award, unless disclosure might prejudice the Government's interest. However, notice is not required if the contract is for—

(1) Subsistence;

(2) Personal or professional services (see 15.204);

(3) Services of educational institutions (see 15.205);

(4) Supplies or services purchased and used outside the United States (see 15.206); or

(5) Supplies or services for which only foreign firms have been solicited.

(b) *Preaward notices.* (1) When the proposal evaluation period for a solicitation estimated at over $10,000 is expected to exceed 30 days, or when a limited number of offerors have been selected as being within the competitive range (see 15.609), the contracting officer, upon determining that a proposal is unacceptable, shall promptly notify the offeror. The notice shall at least state (i) in general terms the basis for the determination and (ii) that a revision of the proposal will not be considered.

(2) In a small business set-aside (see Subpart 19.5), upon completion of negotiations and determinations of responsibility, but prior to award, the contracting officer shall inform each unsuccessful offeror in writing of the name and location of the apparent successful offeror. The notice shall also state that (i) the Government will not consider subsequent revisions of the unsuccessful proposal and (ii) no response is required unless a basis exists to challenge the small business size status of the apparently successful offeror. The notice is not required under the circumstances described in paragraph (a) above or when the contracting officer determines in writing that the urgency of the requirement necessitates award without delay.

(c) *Postaward notices.* (1) Promptly after award of contracts resulting from solicitations over $10,000, the contracting officer shall notify unsuccessful offerors in writing, unless preaward notice was given under paragraph (b) above. The notice shall include—

(i) The number of offerors solicited;

(ii) The number of proposals received;

(iii) The name and address of each offeror receiving an award;

(iv) The items, quantities, and unit prices of each award (if the number of items or other factors makes listing unit prices impracticable, only the total contract price need be furnished); and

(v) In general terms, the reason the offeror's proposal was not accepted, unless the price information in (iv) above readily reveals the reason. In no event shall an offeror's cost breakdown, profit, overhead rates, trade secrets, manufacturing processes and techniques, or other confidential business information be disclosed to any other offeror.

(2) Upon request, the contracting officer shall also furnish the information described in 15.1001(c)(1)(i) through (iv) above to the successful offeror.

(3) Upon request and subject to the exceptions in 15.1001(a), the contracting officer shall furnish the information described in 15.1001(c)(1)(i) through (v) above to unsuccessful offerors in solicitations of $10,000 or less.

15.1002 Debriefing of unsuccessful offerors.

(a) When a contract is awarded on a basis other than price (see Subpart 15.6), unsuccessful offerors, upon their written request, shall be debriefed and

furnished the basis for the selection decision and contract award.

(b) Debriefing information shall include the Government's evaluation of the significant weak or deficient factors in the proposal; however, point-by-point comparisons with other offerors' proposals shall not be made. Debriefing shall not reveal the relative merits or technical standing of competitors or the evaluation scoring. Moreover, debriefing shall not reveal any information that is not releasable under the Freedom of Information Act; for example—

(1) Trade secrets;

(2) Privileged or confidential manufacturing processes and techniques; and

(3) Commercial and financial information that is privileged or confidential, including cost breakdowns, profit, indirect cost rates, and similar information.

(c) The contracting officer shall include a summary of the debriefing in the contract file.

15.1003 Protests against award.

Protests against award in negotiated acquisitions shall be treated substantially the same as in formal advertising (see 14.407-8).

15.1004 Discovery of mistakes.

For treatment of mistakes in an offeror's proposal that are discovered before award, see 15.607. Mistakes in a contractor's proposal that are disclosed after award shall be processed in accordance with 14.406-4.

PART 16—TYPES OF CONTRACTS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

16.000 Scope of part.

This part describes types of contracts that may be used in acquisitions other than small purchases under Part 13. It prescribes policies and procedures and provides guidance for selecting a contract type appropriate to the circumstances of the acquisition.

SUBPART 16.1—SELECTING CONTRACT TYPES

16.101 General.

(a) A wide selection of contract types is available to the Government and contractors in order to provide needed flexibility in acquiring the large variety and volume of supplies and services required by agencies. Contract types vary according to (1) the degree and timing of the responsibility assumed by the contractor for the costs of performance and (2) the amount and nature of the profit incentive offered to the contractor for achieving or exceeding specified standards or goals.

(b) The contract types are grouped into two broad categories: fixed-price contracts (see Subpart 16.2) and cost-reimbursement contracts (see Subpart 16.3). The specific contract types range from firm-fixed-price, in which the contractor has full responsibility for the performance costs and resulting profit (or loss), to cost-plus-fixed-fee, in which the contractor has minimal responsibility for the performance costs and the negotiated fee (profit) is fixed. In between are the various incentive contracts (see Subpart 16.4), in which the contractor's responsibility for the performance costs and the profit or fee incentives offered are tailored to the uncertainties involved in contract performance.

16.102 Policies.

(a) Contracts resulting from formal advertising shall be firm-fixed-price contracts or fixed-price contracts with economic price adjustment.

(b) Contracts negotiated under Part 15 may be of any type or combination of types that will promote the Government's interest, except as restricted in this part (see 10 U.S.C. 2306(a) and 41 U.S.C. 254(a)). Contract types not described in this regulation shall not be used, except as a deviation under Subpart 1.4.

(c) The cost-plus-a-percentage-of-cost system of contracting shall not be used (see 10 U.S.C. 2306(a) and 41 U.S.C. 254(b)). Prime contracts (including letter contracts) other than firm-fixed-price contracts shall, by an appropriate clause, prohibit cost- plus-a-percentage-of-cost subcontracts (see clauses

prescribed in Subpart 44.2 for cost-reimbursement contracts and Subparts 16.2 and 16.4 for fixed-price contracts).

(d) No contract may be awarded before the execution of any determination and findings (D&F's) required by this part. Minimum requirements for the content of D&F's required by this part are substantially the same as those for the D&F's treated in 15.304.

16.103 Negotiating contract type.

(a) Selecting the contract type is generally a matter for negotiation and requires the exercise of sound judgment. Negotiating the contract type and negotiating prices are closely related and should be considered together. The objective is to negotiate a contract type and price (or estimated cost and fee) that will result in reasonable contractor risk and provide the contractor with the greatest incentive for efficient and economical performance.

(b) A firm-fixed-price contract, which best utilizes the basic profit motive of business enterprise, shall be used when the risk involved is minimal or can be predicted with an acceptable degree of certainty. However, when a reasonable basis for firm pricing does not exist, other contract types should be considered, and negotiations should be directed toward selecting a contract type (or combination of types) that will appropriately tie profit to contractor performance.

(c) In the course of an acquisition program, a series of contracts, or a single long-term contract, changing circumstances may make a different contract type appropriate in later periods than that used at the outset. In particular, contracting officers should avoid protracted use of a cost-reimbursement or time-and-materials contract after experience provides a basis for firmer pricing.

(d) Each contract file shall include documentation to show why the particular contract type was selected, except for (1) small purchases under Part 13, (2) repetitive purchases on a firm fixed-price basis, and (3) awards made on the set-aside portion of formally advertised solicitations partially set aside for either small business, labor surplus area concerns, or disaster area concerns.

16.104 Factors in selecting contract types.

There are many factors that the contracting officer should consider in selecting and negotiating the contract type. They include the following:

(a) *Price competition.* Normally, effective price competition results in realistic pricing, and a fixed-price contract is ordinarily in the Government's interest.

(b) *Price analysis.* Price analysis (see 15.805-2), with or without competition, may provide a basis for selecting the contract type. The degree to which price analysis can provide a realistic pricing standard should be carefully considered, even when there may not be full and free competition.

(c) *Cost analysis.* In the absence of effective price competition and if price analysis is not sufficient, the cost estimates of the offeror and the Government provide the bases for negotiating contract pricing arrangements. It is essential that the uncertainties involved in performance and their possible impact upon costs be identified and evaluated, so that a contract type that places a reasonable degree of cost responsibility upon the contractor can be negotiated.

(d) *Type and complexity of the requirement.* Complex requirements, particularly those unique to the Government, usually result in greater risk assumption by the Government. This is especially true for complex research and development contracts, when performance uncertainties or the likelihood of changes makes it difficult to estimate performance costs in advance. As a requirement recurs or as quantity production begins, the cost risk should shift to the contractor, and a fixed-price contract should be considered.

(e) *Urgency of the requirement.* If urgency is a primary factor, the Government may choose to assume a greater proportion of risk or it may offer incentives to ensure timely contract performance.

(f) *Period of performance or length of production run.* In times of economic uncertainty, contracts extending over a relatively long period may require economic price adjustment terms.

(g) *Contractor's technical capability and financial responsibility.*

(h) *Adequacy of the contractor's accounting system.* Before agreeing on a contract type other than firm-fixed-price, the contracting officer shall ensure that the contractor's accounting system will permit timely development of all necessary cost data in the form required by the proposed contract type. This factor may be critical when the contract type requires price revision while performance is in progress, or when a cost-reimbursement contract is being considered and all current or past experience with the contractor has been on a fixed-price basis.

(i) *Concurrent contracts.* If performance under the proposed contract involves concurrent operations under other contracts, the impact of those contracts, including their pricing arrangements, should be considered.

(j) *Extent and nature of proposed subcontracting.* If the contractor proposes extensive subcontracting, a contract type reflecting the actual risks to the prime contractor should be selected.

16.105 Solicitation provision.

The contracting officer shall complete and insert the provision at 52.216-1, Type of Contract, in requests for proposals and in requests for quotations unless the solicitation is for (a) a small purchase (see Part 13) or (b) information or planning purposes (see 15.405).

SUBPART 16.2—FIXED-PRICE CONTRACTS

16.201 General.

Fixed-price types of contracts provide for a firm price or, in appropriate cases, an adjustable price. Fixed-price contracts providing for an adjustable price may include a ceiling price, a target price (including target cost), or both. Unless otherwise specified in the contract, the ceiling price or target price is subject to adjustment only by operation of contract clauses providing for equitable adjustment or other revision of the contract price under stated circumstances.

16.202 Firm-fixed-price contracts.

16.202-1 Description.

A firm-fixed-price contract provides for a price that is not subject to any adjustment on the basis of the contractor's cost experience in performing the contract. This contract type places upon the contractor maximum risk and full responsibility for all costs and resulting profit or loss. It provides maximum incentive for the contractor to control costs and perform effectively and imposes a minimum administrative burden upon the contracting parties.

16.202-2 Application.

A firm-fixed-price contract is suitable for acquiring commercial products or commercial-type products (see 11.001) or for acquiring other supplies or services on the basis of reasonably definite functional or detailed specifications (see 10.001) when the contracting officer can establish fair and reasonable prices at the outset, such as when—

(a) There is adequate price competition;

(b) There are reasonable price comparisons with prior purchases of the

same or similar supplies or services made on a competitive basis or supported by valid cost or pricing data;

(c) Available cost or pricing information permits realistic estimates of the probable costs of performance; or

(d) Performance uncertainties can be identified and reasonable estimates of their cost impact can be made, and the contractor is willing to accept a firm fixed price representing assumption of the risks involved.

16.203 Fixed-price contracts with economic price adjustment.

16.203-1 Description.

A fixed-price contract with economic price adjustment provides for upward and downward revision of the stated contract price upon the occurrence of specified contingencies. Economic price adjustments are of three general types:

(a) *Adjustments based on established prices.* These price adjustments are based on increases or decreases from an agreed-upon level in published or otherwise established prices of specific items or the contract end items.

(b) *Adjustments based on actual costs of labor or material.* These price adjustments are based on increases or decreases in specified costs of labor or material that the contractor actually experiences during contract performance.

(c) *Adjustments based on cost indexes of labor or material.* These price adjustments are based on increases or decreases in labor or material cost standards or indexes that are specifically identified in the contract.

16.203-2 Application.

A fixed-price contract with economic price adjustment may be used when (i) there is serious doubt concerning the stability of market or labor conditions that will exist during an extended period of contract performance, and (ii) contingencies that would otherwise be included in the contract price can be identified and covered separately in the contract. Price adjustments based on established prices should normally be restricted to industry-wide contingencies. Price adjustments based on labor and material costs should be limited to contingencies beyond the contractor's control. For use of economic price adjustment in formally advertised contracts, see 14.407-4.

(a) In establishing the base level from which adjustment will be made, the contracting officer shall ensure that contingency allowances are not duplicated by inclusion in both the base price and the adjustment requested by the contractor under economic price adjustment clause.

(b) In contracts that do not require submission of cost or pricing data, the contracting officer shall obtain adequate information to establish the base level from which adjustment will be made and may require verification of data submitted.

16.203-3 Limitations.

A fixed-price contract with economic price adjustment shall not be used unless the contracting officer determines that it is necessary either to protect the contractor and the Government against significant fluctuations in labor or material costs or to provide for contract price adjustment in the event of changes in the contractor's established prices.

16.203-4 Contract clauses.

(a) *Adjustment based on established prices—standard supplies.* (1) The contracting officer shall, when contracting by negotiation, insert the clause at 52.216-2, Economic Price Adjustment—Standard Supplies, or an agency-prescribed clause as authorized in subparagraph (2) below, in solicitations and contracts when all of the following conditions apply:

(i) A fixed-price contract is contemplated.

(ii) The requirement is for standard supplies that have an established catalog or market price, verified using the criteria in 15.804-3.

(iii) The contracting officer has made the determination specified in 16.203-3.

(2) If all the conditions in subparagraph (a)(1) above apply and the contracting officer determines that the use of the clause at 52.216-2 is inappropriate, the contracting officer may use an agency-prescribed clause instead of the clause at 52.216-2.

(3) If the negotiated unit price reflects a net price after applying a trade discount from a catalog or list price, the contracting officer shall document in the contract file both the catalog or list price and the discount. (This does not apply to prompt payment or cash discounts.)

(b) *Adjustment based on established prices—semistandard supplies.* (1) The contracting officer shall, when contracting by negotiation, insert the clause at 52.216-3, Economic Price Adjustment—Semistandard Supplies, or an agency-prescribed clause as authorized in subparagraph (2) below, in solicitations and contracts when all of the following conditions apply:

(i) A fixed price is contemplated.

(ii) The requirement is for semistandard supplies for which the prices can be reasonably related to the prices of nearly equivalent standard supplies that have an established catalog or market price, verified using the criteria in 15.804-3.

(iii) The contracting officer has made the determination specified in 16.203-3.

(2) If all conditions in subparagrph (b)(1) above apply and the contracting officer determines that the use of the clause at 52.216-3 is inappropriate, the contracting officer may use an agency-prescribed clause instead of the clause at 52.216-3.

(3) If the negotiated unit price reflects a net price after applying a trade discount from a catalog or list price, the contracting officer shall document in the contract file both the catalog or list price and the discount. (This does not apply to prompt payment or cash discounts.)

(4) Before entering into the contract, the contracting officer and contractor must agree in writing on the identity of the standard supplies and the corresponding contract line items to which the clause applies.

(5) If the supplies are standard, except for preservation, packaging, and packing requirements, the clause prescribed in 16.203-4(a), shall be used rather than this clause.

(c) *Adjustments based on actual cost of labor or material.* (1) The contracting officer shall, when contracting by negotiation, insert a clause that is substantially the same as the clause at 52.216-4, Economic Price Adjustment—Labor and Material, or an agency-prescribed clause as authorized in subparagraph (2) below, in solicitation and contracts when all of the following conditions apply:

(i) A fixed-price contract is contemplated.

(ii) There is no major element of design engineering or development work involved.

(iii) One or more identifiable labor or material cost factors are subject to change.

(iv) The contracting officer has made the determination specified in 16.203-3.

(2) If all conditions in subparagraph (c)(1) above apply and the contracting officer determines that the use of the clause at 52.216-4 is inappropriate, the contracting officer may use an agency-prescribed clause instead of the clause at 52.216-4.

(3) The contracting officer shall describe in detail in the contract Schedule—

(i) The types of labor and materials subject to adjustment under the clause;

(ii) The labor rates, including fringe benefits (if any) and unit prices of materials that may be increased or decreased; and

(iii) The quantities of the specified labor and materials allocable to each unit to be delivered under the contract.

(4) In negotiating adjustments under the clause, the contracting officer shall—

(i) Consider work in process and materials on hand at the time of changes in labor rates, including fringe benefits (if any) or material prices;

(ii) Not include in adjustments any indirect cost (except fringe benefits as defined in 31.205-6(m)) or profit; and

(iii) Consider only those fringe benefits specified in the contract Schedule.

(d) *Adjustments based on cost indexes of labor or material.* The contracting officer should consider using an economic price adjustment clause based on cost indexes of labor or material under the circumstances and subject to approval as described in subparagraphs (1) and (2) below.

(1) A clause providing adjustment based on cost indexes of labor or materials may be appropriate when—

(i) The contract involves an extended period of performance with significant costs to be incurred beyond 1 year after performance begins;

(ii) The contract amount subject to adjustment is substantial; and

(iii) The economic variables for labor and materials are too unstable to permit a reasonable division of risk between the Government and the contractor, without this type of clause.

(2) Any clause using this method shall be prepared and approved under agency procedures. Because of the variations in circumstances and clause wording that may arise, no standard clause is prescribed.

16.204 Fixed-price incentive contracts.

A fixed-price incentive contract is a fixed-price contract that provides for adjusting profit and establishing the final contract price by a formula based on the relationship of final negotiated total cost to total target cost. Fixed-price incentive contracts are covered in Subpart 16.4, Incentive Contracts. See 16.403 for more complete descriptions and for application, limitations, and prescribed clauses for these contracts.

16.205 Fixed-price contracts with prospective price redetermination.

16.205-1 Description.

A fixed-price contract with prospective price redetermination provides for (a) a firm fixed price for an initial period of contract deliveries or performance and (b) prospective redetermination, at a stated time or times during performance, of the price for subsequent periods of performance.

16.205-2 Application.

A fixed-price contract with prospective price redetermination may be used in acquisitions of quantity production or services for which it is possible to negotiate a fair and reasonable firm fixed price for an initial period, but not for subsequent periods of contract performance.

(a) The initial period should be the longest period for which it is possible to negotiate a fair and reasonable firm fixed price. Each subsequent pricing period should be at least 12 months.

(b) The contract may provide for a ceiling price based on evaluation of the uncertainties involved in performance and their possible cost impact. This ceiling price should provide for assumption of a reasonable proportion of the risk by the contractor and, once established, may be adjusted only by operation of contract clauses providing for equitable adjustment or other revision of the contract price under stated circumstances.

16.205-3 Limitations.

This contract type shall not be used unless—

(a) Negotiations have established that (1) the conditions for use of a firm-fixed-price contract are not present (see 16.202-2), and (2) a fixed-price incentive contract would not be more appropriate;

(b) The contractor's accounting system is adequate for price redetermination;

(c) The prospective pricing periods can be made to conform with operation of the contractor's accounting system; and

(d) There is reasonable assurance that price redetermination actions will take place promptly at the specified times.

16.205-4 Contract clause.

The contracting officer shall, when contracting by negotiation, insert the clause at 52.216-5, Price Redetermination—Prospective, in solicitations and contracts when a fixed-price contract is contemplated and the conditions specified in 16.205-2 and 16.205-3(a) through (d) apply.

16.206 Fixed-ceiling-price contracts with retroactive price redetermination.

16.206-1 Description.

A fixed-ceiling-price contract with retroactive price redetermination provides for (a) a fixed ceiling price and (b) retroactive price redetermination within the ceiling after completion of the contract.

16.206-2 Application.

A fixed-ceiling-price contract with retroactive price redetermination is appropriate for research and development contracts estimated at $100,000 or less when it is established at the outset that a fair and reasonable firm fixed price cannot be negotiated and that the amount involved and short performance period make the use of any other fixed-price contract type impracticable.

(a) A ceiling price shall be negotiated for the contract at a level that reflects a reasonable sharing of risk by the contractor. The established ceiling price may be adjusted only if required by the operation of contract clauses providing for equitable adjustment or other revision of the contract price under stated circumstances.

(b) The contract should be awarded only after negotiation of a billing price that is as fair and reasonable as the circumstances permit.

(c) Since this contract type provides the contractor no cost control incentive except the ceiling price, the contracting officer should make clear to the contractor during discussion before award that the contractor's management effectiveness and ingenuity will be considered in retroactively redetermining the price.

16.206-3 Limitations.

This contract type shall not be used unless—

(a) The contract is for research and development and the estimated cost is $100,000 or less;

(b) The contractor's accounting system is adequate for price redetermination;

(c) There is reasonable assurance that the price redetermination will take place promptly at the specified time; and

(d) The head of the contracting activity (or a higher-level official, if required by agency procedures) approves its use in writing.

16.206-4 Contract clause.

The contracting officer shall, when contracting by negotiation, insert the clause at 52.216-6, Price Redetermination—Retroactive, in solicitations and contracts when a fixed-price contract is contemplated and the conditions in 16.206-2 and 16.206-3(a) through (d) apply.

16.207 Firm-fixed-price, level-of-effort term contracts.

16.207-1 Description.

A firm-fixed-price, level-of-effort term contract requires (a) the contractor to provide a specified level of effort, over a stated period of time, on work that can be stated only in general terms and (b)

the Government to pay the contractor a fixed dollar amount.

16.207-2 Application.

A firm-fixed-price, level-of-effort term contract is suitable for investigation or study in a specific research and development area. The product of the contract is usually a report showing the results achieved through application of the required level of effort. However, payment is based on the effort expended rather than on the results achieved.

16.207-3 Limitations.

This contract type may be used only when—

(a) The work required cannot otherwise be clearly defined;

(b) The required level of effort is identified and agreed upon in advance;

(c) There is reasonable assurance that the intended result cannot be achieved by expending less than the stipulated effort; and

(d) The contract price is $100,000 or less, unless approved by the chief of the contracting office.

SUBPART 16.3—COST-REIMBURSEMENT CONTRACTS

16.301 General.

16.301-1 Description.

Cost-reimbursement types of contracts provide for payment of allowable incurred costs, to the extent prescribed in the contract. These contracts establish an estimate of total cost for the purpose of obligating funds and establishing a ceiling that the contractor may not exceed (except at its own risk) without the approval of the contracting officer.

16.301-2 Application.

Cost-reimbursement contracts are suitable for use only when uncertainties involved in contract performance do not permit costs to be estimated with sufficient accuracy to use any type of fixed-price contract.

16.301-3 Limitations.

A cost-reimbursement contract may be used only when—

(a) The contractor's accounting system is adequate for determining costs applicable to the contract;

(b) Appropriate Government surveillance during performance will provide reasonable assurance that efficient methods and effective cost controls are used; and

(c) A determination and findings has been executed, in accordance with agency procedures, showing that (1) this contract type is likely to be less costly than any other type or (2) it is impractical to obtain supplies or services of the kind or quality required without the use of this contract type (see 10 U.S.C. 2306(c), 2310(b), and 2311 or 41 U.S.C. 254(b), 257(c), and 257(a)).

(d) See 15.903(e) for statutory limitations on price or fee.

16.302 Cost contracts.

(a) *Description.* A cost contract is a cost-reimbursement contract in which the contractor receives no fee.

(b) *Application.* A cost contract may be appropriate for research and development work, particularly with nonprofit educational institutions or other nonprofit organizations, and for facilities contracts.

(c) *Limitations.* See 16.301-3.

16.303 Cost-sharing contracts.

(a) *Description.* A cost-sharing contract is a cost-reimbursement contract in which the contractor receives no fee and is reimbursed only for an agreed-upon portion of its allowable costs.

(b) *Application.* A cost-sharing contract may be used when the contractor agrees to absorb a portion of the costs, in the expectation of substantial compensating benefits.

(c) *Limitations.* See 16.301-3.

16.304 Cost-plus-incentive-fee contracts.

A cost-plus-incentive-fee contract is a cost-reimbursement contract that provides for an initially negotiated fee to be adjusted later by a formula based on the relationship of total allowable costs to total target costs. Cost-plus-incentive-fee contracts are covered in Subpart 16.4, Incentive Contracts. See 16.404-1 for a more complete description and discussion of application of these contracts. See 16.301-3 for limitations.

16.305 Cost-plus-award-fee contracts.

A cost-plus-award-fee contract is a cost-reimbursement contract that provides for a fee consisting of (a) a base amount (which may be zero) fixed at inception of the contract and (b) an award amount, based upon a judgmental evaluation by the Government, sufficient to provide motivation for excellence in contract performance. Cost-plus-award-fee contracts are covered in Subpart 16.4, Incentive Contracts. See 16.404-2 for a more complete description and discussion of application of these contracts. See 16.301-3 and 16.404-2(c) for limitations.

16.306 Cost-plus-fixed-fee contracts.

(a) *Description.* A cost-plus-fixed-fee contract is a cost-reimbursement contract that provides for payment to the contractor of a negotiated fee that is fixed at the inception of the contract. The fixed fee does not vary with actual cost, but may be adjusted as a result of changes in the work to be performed under the contract. This contract type permits contracting for efforts that might otherwise present too great a risk to contractors, but it provides the contractor only a minimum incentive to control costs.

(b) *Application.* (1) A cost-plus-fixed-fee contract is suitable for use when the conditions of 16.301-2 are present and, for example—

(i) The contract is for the performance of research or preliminary exploration or study, and the level of effort required is unknown; or

(ii) The contract is for development and test, and using a cost-plus-incentive-fee contract is not practical.

(2) A cost-plus-fixed-fee contract normally should not be used in development of major systems (see Part 34) once preliminary exploration, studies, and risk reduction have indicated a high degree of probability that the development is achievable and the Government has established reasonably firm performance objectives and schedules.

(c) *Limitations.* No cost-plus-fixed-fee contract shall be awarded unless—

(1) All limitations in 16.301-3 are complied with; and

(2) The agency head or designee has signed a determination and findings establishing the basis for application of the statutory price or fee limitation (see 15.903(e)).

(d) *Completion and term forms.* A cost-plus-fixed-fee contract may take one of two basic forms—completion or term.

(1) The completion form describes the scope of work by stating a definite goal or target and specifying an end product. This form of contract normally requires the contractor to complete and deliver the specified end product (e.g., a final report of research accomplishing the goal or target) within the estimated cost, if possible, as a condition for payment of the entire fixed fee. However, in the event the work cannot be completed within the estimated cost, the Government may require more effort without increase in fee, provided the Government increases the estimated cost.

(2) The term form describes the scope of work in general terms and obligates the contractor to devote a specified level of effort for a stated time period. Under this form, if the performance is considered satisfactory by the Government, the fixed fee is payable at the expiration of the agreed-upon period, upon contractor certification that

the level of effort specified in the contract has been expended in performing the contract work. Renewal for further periods of performance is a new acquisition that involves new cost and fee arrangements.

(3) Because of the differences in obligation assumed by the contractor, the completion form is preferred over the term form whenever the work, or specific milestones for the work, can be defined well enough to permit development of estimates within which the contractor can be expected to complete the work.

(4) The term form shall not be used unless the contractor is obligated by the contract to provide a specific level of effort within a definite time period.

16.307 Contract clauses.

(a) The contracting officer shall insert the clause at 52.216-7, Allowable Cost and Payment, in solicitations and contracts when a cost-reimbursement contract (other than a facilities contract) is contemplated.

(b) The contracting officer shall insert the clause at 52.216-8, Fixed Fee, in solicitations and contracts when a cost-plus-fixed-fee contract (other than a facilities contract or a construction contract) is contemplated.

(c) The contracting officer shall insert the clause at 52.216-9, Fixed-Fee—Construction, in solicitations and contracts when a cost-plus-fixed-fee construction contract is contemplated.

(d) The contracting officer shall insert the clause at 52.216-10, Incentive Fee, in solicitations and contracts when a cost-plus-incentive-fee contract (other than a facilities contract) is contemplated.

(e) (1) The contracting officer shall insert the clause at 52.216-11, Cost Contract—No Fee, in solicitations and contracts when a cost-reimbursement contract is contemplated that provides no fee and is not a cost-sharing contract or a facilities contract.

(2) If a cost-reimbursement research and development contract with an educational institution or a nonprofit organization that provides no fee or other payment above cost and is not a cost-sharing contract is contemplated, and if the contracting officer determines that withholding of a portion of allowable costs is not required, the contracting officer shall use the clause with its Alternate I.

(f) (1) The contracting officer shall insert the clause at 52.216-12, Cost-Sharing Contract—No Fee, in solicitations and contracts when a cost-sharing contract (other than a facilities contract) is contemplated.

(2) If a cost-sharing research and development contract with an educational institution or a nonprofit organization is contemplated, and if the contracting officer determines that withholding of a portion of allowable costs is not required, the contracting officer shall use the clause with its Alternate I.

(g) (1) The contracting officer shall insert the clause at 52.216-13, Allowable Cost and Payment—Facilities, in solicitations and contracts when a cost-reimbursement consolidated facilities contract or a cost-reimbursement facilities acquisition contract (see 45.302-6) is contemplated.

(2) If a facilities acquisition contract is contemplated and, in the judgment of the contracting officer, it may be necessary to withhold payment of an amount to protect the Government's interest, the contracting officer shall use the clause with its Alternate I.

(h) The contracting officer shall insert the clause at 52.216-14, Allowable Cost and Payment—Facilities Use, in solicitations and contracts when a facilities use contract is contemplated.

(i) The contracting officer shall insert the clause at 52.216-15, Predetermined Indirect Cost Rates, in solicitations and contracts when a cost-reimbursement research and development contract with an educational institution (see 42.705-3(b)) is contemplated and predetermined indirect cost rates are to be used.

SUBPART 16.4—INCENTIVE CONTRACTS

16.401 General.

(a) Incentive contracts as described in this subpart are appropriate when a firm-fixed-price contract is not appropriate and the required supplies or services can be acquired at lower costs and, in certain instances, with improved delivery or technical performance, by relating the amount of profit or fee payable under the contract to the contractor's performance. Incentive contracts are designed to obtain specific acquisition objectives by—

(1) Establishing reasonable and attainable targets that are clearly communicated to the contractor; and

(2) Including appropriate incentive arrangements designed to (i) motivate contractor efforts that might not otherwise be emphasized and (ii) discourage contractor inefficiency and waste.

(b) When predetermined, formula-type incentives on technical performance or delivery are included, increases in profit or fee are provided only for achievement that surpasses the targets, and decreases are provided for to the extent that such targets are not met. The incentive increases or decreases are applied to performance targets rather than minimum performance requirements.

(c) The two basic categories of incentive contracts are fixed-price incentive contracts (see 16.403) and cost-reimbursement-incentive contracts (see 16.404). Since it is usually to the Government's advantage for the contractor to assume substantial cost responsibility and an appropriate share of the cost risk, fixed-price incentive contracts are preferred when contract costs and performance requirements are reasonably certain. Cost-reimbursement incentive contracts are subject to the overall limitations in 16.301 that apply to all cost-reimbursement contracts.

16.402 Application of predetermined, formula-type incentives.

16.402-1 Cost incentives.

(a) Most incentive contracts include only cost incentives, which take the form of a profit or fee adjustment formula and are intended to motivate the contractor to effectively manage costs. No incentive contract may provide for other incentives without also providing a cost incentive (or constraint).

(b) Except for cost-plus-award-fee contracts (see 16.404-2), incentive contracts include a target cost, a target profit or fee, and a profit or fee adjustment formula that (within the constraints of a price ceiling or minimum and maximum fee) provides that—

(1) Actual cost that meets the target will result in the target profit or fee;

(2) Actual cost that exceeds the target will result in downward adjustment of target profit or fee; and

(3) Actual cost that is below the target will result in upward adjustment of target profit or fee.

16.402-2 Technical performance incentives.

(a) Technical performance incentives may be considered in connection with specific product characteristics (e.g., a missile range, an aircraft speed, an engine thrust, or a vehicle maneuverability) or other specific elements of the contractor's performance. These incentives should be designed to tailor profit or fee to results achieved by the contractor, compared with specified target goals.

(b) Technical performance incentives may be particularly appropriate in major systems contracts, both in development (when performance objectives are known and the fabrication of prototypes for test and evaluation is required) and in production (if improved performance

is attainable and highly desirable to the Government).

(c) Technical performance incentives may involve a variety of specific characteristics that contribute to the overall performance of the end item. Accordingly, the incentives on individual technical characteristics must be balanced so that no one of them is exaggerated to the detriment of the overall performance of the end item.

(d) Performance tests are generally essential in order to determine the degree of attainment of performance targets. Therefore, the contract must be as specific as possible in establishing test criteria such as testing conditions, instrumentation precision, and data interpretation.

(e) Because performance incentives present complex problems in contract administration, the contracting officer should negotiate them in full coordination with Government engineering and pricing specialists.

(f) It is essential that the Government and contractor agree explicitly on the effect that contract changes (e.g., pursuant to the Changes clause) will have on performance incentives.

(g) The contracting officer must exercise care, in establishing performance criteria, to recognize that the contractor should not be rewarded or penalized for attainments of Government-furnished components.

16.402-3 Delivery incentives.

(a) Delivery incentives should be considered when improvement from a required delivery schedule is a significant Government objective. It is important to determine the Government's primary objectives in a given contract (e.g., earliest possible delivery or earliest quantity production).

(b) Incentive arrangements on delivery should specify the application of the reward-penalty structure in the event of Government-caused delays or other delays beyond the control, and without the fault or negligence, of the contractor or subcontractor.

16.402-4 Structuring multiple-incentive contracts.

A properly structured multiple-incentive arrangement should—

(a) Motivate the contractor to strive for outstanding results in all incentive areas; and

(b) Compel trade-off decisions among the incentive areas, consistent with the Government's overall objectives for the acquisition. Because of the interdependency of the Government's cost, the technical performance, and the delivery goals, a contract that emphasizes only one of the goals may jeopardize control over the others. Because outstanding results may not be attainable for each of the incentive areas, all multiple-incentive contracts must include a cost incentive (or constraint) that operates to preclude rewarding a contractor for superior technical performance or delivery results when the cost of those results outweighs their value to the Government.

16.403 Fixed-price incentive contracts.

(a) *Description.* A fixed-price incentive contract is a fixed-price contract that provides for adjusting profit and establishing the final contract price by application of a formula based on the relationship of total final negotiated cost to total target cost. The final price is subject to a price ceiling, negotiated at the outset. The two forms of fixed-price incentive contracts, firm target and successive targets, are further described in 16.403-1 and 16.403-2 below.

(b) *Application.* A fixed-price incentive contract is appropriate when—

(1) A firm-fixed-price contract is not suitable;

(2) The nature of the supplies or services being acquired and other circumstances of the acquisition are such that the contractor's assumption of a degree of cost responsibility will provide a positive profit incentive for effective cost control and performance; and

(3) If the contract also includes incentives on technical performance and/or delivery, the performance requirements provide a reasonable opportunity for the incentives to have a meaningful impact on the contractor's management of the work.

(c) *Limitations.* A fixed-price incentive contract may be used only when a determination and findings has been executed, in accordance with agency procedures, showing that (1) this contract type is likely to be less costly than any other type or (2) it is impractical to obtain supplies or services of the kind or quality required without the use of this contract type (see 10 U.S.C. 2306(c), 2310(b), and 2311 or 41 U.S.C. 254(b), 257(b), and 257(a)).

(d) *Billing prices.* In fixed-price incentive contracts, billing prices are established as an interim basis for payment. These billing prices may be adjusted, within the ceiling limits, upon request of either party to the contract, when it becomes apparent that final negotiated cost will be substantially different from the target cost.

16.403-1 Fixed-price incentive (firm target) contracts.

(a) *Description.* A fixed-price incentive (firm target) contract specifies a target cost, a target profit, a price ceiling (but not a profit ceiling or floor), and a profit adjustment formula. These elements are all negotiated at the outset. The price ceiling is the maximum that may be paid to the contractor, except for any adjustment under other contract clauses. When the contractor completes performance, the parties negotiate the final cost, and the final price is established by applying the formula. When the final cost is less than the target cost, application of the formula results in a final profit greater than the target profit; conversely, when final cost is more than target cost, application of the formula results in a final profit less than the target profit, or even a net loss. If the final negotiated cost exceeds the price ceiling, the contractor absorbs the difference as a loss. Because the profit varies inversely with the cost, this contract type provides a positive, calculable profit incentive for the contractor to control costs.

(b) *Application.* A fixed-price incentive (firm target) contract is appropriate when the parties can negotiate at the outset a firm target cost, target profit, and profit adjustment formula that will provide a fair and reasonable incentive and a ceiling that provides for the contractor to assume an appropriate share of the risk. When the contractor assumes a considerable or major share of the cost responsibility under the adjustment formula, the target profit should reflect this responsibility.

(c) *Limitations.* This contract type may be used only when—

(1) The contractor's accounting system is adequate for providing data to support negotiation of final cost and incentive price revision;

(2) Adequate cost or pricing information for establishing reasonable firm targets is available at the time of initial contract negotiation; and

(3) The determination and findings required by 16.403(c) has been signed.

(d) *Contract Schedule.* The contracting officer shall specify in the contract Schedule the target cost, target profit, and target price for each item subject to incentive price revision.

16.403-2 Fixed-price incentive (successive targets) contracts.

(a) *Description.* (1) A fixed-price incentive (successive targets) contract specifies the following elements, all of which are negotiated at the outset:

(i) An initial target cost.

(ii) An initial target profit.

(iii) An initial profit adjustment formula to be used for establishing the firm target profit, including a ceiling and floor for the firm target profit. (This formula normally provides for a lesser degree of contractor cost responsibility than would a formula for establishing final profit and price.)

(iv) The production point at which the firm target cost and firm target profit will be negotiated (usually before delivery or shop completion of the first item).

(v) A ceiling price that is the maximum that may be paid to the contractor, except for any adjustment under other contract clauses providing for equitable adjustment or other revision of the contract price under stated circumstances.

(2) When the production point specified in the contract is reached, the parties negotiate the firm target cost, giving consideration to cost experience under the contract and other pertinent factors. The firm target profit is established by the formula. At this point, the parties have two alternatives, as follows:

(i) They may negotiate a firm fixed price, using the firm target cost plus the firm target profit as a guide.

(ii) If negotiation of a firm fixed price is inappropriate, they may negotiate a formula for establishing the final price using the firm target cost and firm target profit. The final cost is then negotiated at completion, and the final profit is established by formula, as under the fixed-price incentive (firm target) contract (see 16.403-1 above).

(b) *Application.* A fixed-price incentive (successive targets) contract is appropriate when—

(1) Available cost or pricing information is not sufficient to permit the negotiation of a realistic firm target cost and profit before award;

(2) Sufficient information is available to permit negotiation of initial targets; and

(3) There is reasonable assurance that additional reliable information will be available at an early point in the contract performance so as to permit negotiation of either (i) a firm fixed price or (ii) firm targets and a formula for establishing final profit and price that will provide a fair and reasonable incentive. This additional information is not limited to experience under the contract, itself, but may be drawn from other contracts for the same or similar items.

(c) *Limitations.* This contract type may be used only when—

(1) The contractor's accounting system is adequate for providing data for negotiating firm targets and a realistic profit adjustment formula, as well as later negotiation of final costs;

(2) Cost or pricing information adequate for establishing a reasonable firm target cost is reasonably expected to be available at an early point in contract performance; and

(3) The determination and findings required by 16.403(c) has been signed.

(d) *Contract Schedule.* The contracting officer shall specify in the contract Schedule the initial target cost, initial target profit, and initial target price for each item subject to incentive price revision.

16.404 Cost-reimbursement incentive contracts.

See 16.301 for requirements applicable to all cost-reimbursement contracts, for use in conjunction with the following subsections.

16.404-1 Cost-plus-incentive-fee contracts.

(a) *Description.* The cost-plus-incentive-fee contract is a cost-reimbursement contract that provides for the initially negotiated fee to be adjusted later by a formula based on the relationship of total allowable costs to total target costs. This contract type specifies a target cost, a target fee, minimum and maximum fees, and a fee adjustment formula. After contract performance, the fee payable to the contractor is determined in accordance with the formula. The formula provides, within limits, for increases in fee above target fee when total allowable costs are less than target costs, and decreases in fee below target fee when total allowable costs exceed target costs. This increase or decrease is intended to provide an incentive for the contractor to manage the contract effectively. When total allowable cost is greater than or less than the range of costs within which the fee-adjustment formula operates, the contractor is paid total allowable costs, plus the minimum or maximum fee.

(b) *Application.* (1) A cost-plus-incentive-fee contract is appropriate for development and test programs when (i) a cost-reimbursement contract is necessary (see 16.301-2) and (ii) a target cost and a fee adjustment formula can be negotiated that are likely to motivate the contractor to manage effectively.

(2) The contract may include technical performance incentives when it is highly probable that the required development of a major system is feasible and the Government has established its performance objectives, at least in general terms. This approach may also apply to other development programs, if the use of both cost and technical performance incentives is desirable and administratively practical.

(3) The fee adjustment formula should provide an incentive that will be effective over the full range of reasonably foreseeable variations from target cost. If a high maximum fee is negotiated, the contract shall also provide for a low minimum fee that may be a zero fee or, in rare cases, a negative fee.

(c) *Limitations.* No cost-plus-incentive-fee contract shall be awarded unless all limitations in 16.301-3 are complied with.

16.404-2 Cost-plus-award-fee contracts.

(a) *Description.* A cost-plus-award-fee contract is a cost-reimbursement contract that provides for a fee consisting of (1) a base amount fixed at inception of the contract and (2) an award amount that the contractor may earn in whole or in part during performance and that is sufficient to provide motivation for excellence in such areas as quality, timeliness, technical ingenuity, and cost-effective management. The amount of the award fee to be paid is determined by the Government's judgmental evaluation of the contractor's performance in terms of the criteria stated in the contract. This determination is made unilaterally by the Government and is not subject to the Disputes clause.

(b) *Application.* (1) The cost-plus-award-fee contract is suitable for use when—

(i) The work to be performed is such that it is neither feasible nor effective to devise predetermined objective incentive targets applicable to cost, technical performance, or schedule;

(ii) The likelihood of meeting acquisition objectives will be enhanced by using a contract that effectively motivates the contractor toward exceptional performance and provides the Government with the flexibility to evaluate both actual performance and the conditions under which it was achieved; and

(iii) Any additional administrative effort and cost required to monitor and evaluate performance are justified by the expected benefits.

(2) The number of evaluation criteria and the requirements they represent will differ widely among contracts. The criteria and rating plan should motivate the contractor to improve performance in the areas rated, but not at the expense of at least minimum acceptable performance in all other areas.

(3) Cost-plus-award-fee contracts shall provide for evaluation at stated intervals during performance, so that the

contractor will periodically be informed of the quality of its performance and the areas in which improvement is expected. Partial payment of fee shall generally correspond to the evaluation periods. This makes effective the incentive which the award fee can create by inducing the contractor to improve poor performance or to continue good performance.

(c) *Limitations.* No cost-plus-award-fee contract shall be awarded unless—

(1) All of the limitations in 16.301-3 are complied with;

(2) The maximum fee payable (i.e., the base fee plus the highest potential award fee) complies with the limitations in 16.301-3; and

(3) The contract amount, performance period, and expected benefits are sufficient to warrant the additional administrative effort and cost involved.

16.405 Contract clauses.

(a) The contracting officer shall insert the clause at 52.216-16, Incentive Price Revision—Firm Target, in solicitations and contracts when a fixed-price incentive (firm target) contract is contemplated. If the contract calls for supplies or services to be ordered under a provisioning document or Government option and the prices are to be subject to the incentive price revision under the clause, the contracting officer shall use the clause with its Alternate I.

(b) The contracting officer shall insert the clause at 52.216-17, Incentive Price Revision—Successive Targets, in solicitations and contracts when a fixed-price incentive (successive targets) contract is contemplated. If the contract calls for supplies or services to be ordered under a provisioning document or Government option and the prices are to be subject to incentive price revision under the clause, the contracting officer shall use the clause with its Alternate I.

(c) The clause at 52.216-7, Allowable Cost and Payment, is prescribed in 16.307(a) for insertion in solicitations and contracts when a cost-plus-incentive-fee contract or a cost-plus-award-fee contract is contemplated.

(d) The clause at 52.216-10, Incentive Fee, is prescribed in 16.307(d) for insertion in solicitations and contracts when a cost-plus-incentive-fee contract is contemplated.

(e) The contracting officer shall insert an appropriate award fee clause in solicitations and contracts when a cost-plus-award-fee contract is contemplated, provided that the clause—

(1) Is prescribed by or approved under agency acquisition regulations;

(2) Is compatible with the clause at 52.216-7, Allowable Cost and Payment; and

(3) Expressly excludes from the operation of the Disputes clause any disagreement by the contractor concerning the amount of the award fee.

SUBPART 16.5—INDEFINITE-DELIVERY CONTRACTS

16.501 General.

(a) There are three types of indefinite-delivery contracts—definite-quantity contracts, requirements contracts, and indefinite-quantity contracts. The appropriate type of indefinite-delivery contract may be used when the exact times and/or quantities of future deliveries are not known at the time of contract award.

(b) The various types of indefinite-delivery contracts offer the following advantages:

(1) All three types permit (i) Government stocks to be maintained at minimum levels and (ii) direct shipment to users.

(2) Indefinite-quantity contracts and requirements contracts also permit (i) flexibility in both quantities and delivery scheduling and (ii) ordering of supplies or services after requirements materialize.

(3) Indefinite-quantity contracts limit the Government's obligation to the minimum quantity specified in the contract.

(4) Requirements contracts may permit faster deliveries when production lead time is involved, because contractors are usually willing to maintain limited stocks when the Government will obtain all of its actual purchase requirements from the contractor.

(c) Indefinite-delivery contracts may provide for firm fixed prices (see 16.202), fixed prices with economic price adjustment (see 16.203), fixed prices with prospective redetermination (see 16.205), or prices based on catalog or market prices (see 15.804-3(c)). When prices are based on catalog or market prices, the price to be paid may be determined by establishing an adjustment factor and applying it to the price in industrywide pricing guides or manufacturers' price catalogs. Normally, the adjustment factor will be a fixed percentage discount to be applied to the price in effect on the date of each order. When fast payment procedures are included in indefinite-delivery contracts, the contracting officer shall include in the contract the special data required by 13.303(b).

16.502 Definite-quantity contracts.

(a) *Description.* A definite-quantity contract provides for delivery of a definite quantity of specific supplies or services for a fixed period, with deliveries to be scheduled at designated locations upon order.

(b) *Application.* A definite-quantity contract may be used when it can be determined in advance that (1) a definite quantity of supplies or services will be required during the contract period and (2) the supplies or services are regularly available or will be available after a short lead time.

16.503 Requirements contracts.

(a) *Description.* A requirements contract provides for filling all actual purchase requirements of designated Government activities for specific supplies or services during a specified contract period, with deliveries to be scheduled by placing orders with the contractor.

(1) For the information of offerors and contractors, the contracting officer shall state a realistic estimated total quantity in the solicitation and resulting contract. This estimate is not a representation to an offeror or contractor that the estimated quantity will be required or ordered, or that conditions affecting requirements will be stable or normal. The contracting officer may obtain the estimate from records of previous requirements and consumption, or by other means, and should base the estimate on the most current information available.

(2) The contract shall state, if feasible, the maximum limit of the contractor's obligation to deliver and the Government's obligation to order. The contract may also specify maximum or minimum quantities that the Government may order under each individual order and the maximum that it may order during a specified period of time.

(b) *Application.* A requirements contract may be used when the Government anticipates recurring requirements but cannot predetermine the precise quantities of supplies or services that designated Government activities will need during a definite period. Generally, a requirements contract is appropriate for items or services that are commercial products or commercial-type products (see 11.001). Funds are obligated by each delivery order, not by the contract itself.

(c) *Government property furnished for repair.* When a requirements contract is used to acquire work (e.g., repair, modification, or overhaul) on existing items of Government property, the

contracting officer shall specify in the Schedule that failure of the Government to furnish such items in the amounts or quantities described in the Schedule as "estimated" or "maximum" will not entitle the contractor to any equitable adjustment in price under the Government Property clause of the contract.

16.504 Indefinite-quantity contracts.

(a) *Description.* An indefinite-quantity contract provides for an indefinite quantity, within stated limits, of specific supplies or services to be furnished during a fixed period, with deliveries to be scheduled by placing orders with the contractor.

(1) The contract shall require the Government to order and the contractor to furnish at least a stated minimum quantity of supplies or services and, if and as ordered, the contractor to furnish any additional quantities, not to exceed a stated maximum. The contracting officer may obtain the basis for the maximum from records of previous requirements and consumption, or by other means, but the maximum quantity should be realistic and based on the most current information available.

(2) To ensure that the contract is binding, the minimum quantity must be more than a nominal quantity, but it should not exceed the amount that the Government is fairly certain to order.

(3) The contract may also specify maximum or minimum quantities that the Government may order under each delivery order and the maximum that it may order during a specific period of time.

(b) *Application.* An indefinite-quantity contract may be used when (1) the Government cannot predetermine, above a specified minimum, the precise quantities of supplies or services that will be required during the contract period and (2) it is inadvisable for the Government to commit itself for more than a minimum quantity. An indefinite-quantity contract should be used only for items or services that are commercial products or commercial-type products (see 11.001) and when a recurring need is anticipated. Funds for other than the stated minimum quantity are obligated by each delivery order, not by the contract itself.

16.505 Contract clauses.

(a) The contracting officer shall insert the clause at 52.216-18, Ordering, in solicitations and contracts when a definite-quantity contract, a requirements contract, or an indefinite-quantity contract is contemplated.

(b) The contracting officer shall insert a clause substantially the same as the clause at 52.216-19, Delivery-Order Limitations, in solicitations and contracts when a definite-quantity contract, a requirements contract, or an indefinite-quantity contract is contemplated.

(c) The contracting officer shall insert the clause at 52.216-20, Definite Quantity, in solicitations and contracts when a definite-quantity contract is contemplated.

(d) (1) The contracting officer shall insert the clause at 52.216-21, Requirements, in solicitations and contracts when a requirements contract is contemplated.

(2) If the contract is for nonpersonal services and related supplies and covers estimated requirements that exceed a specific Government activity's internal capability to produce or perform, the contracting officer shall use the clause with its Alternate I.

(3) If the contract includes subsistence for both Government use and resale in the same Schedule, and similar products may be acquired on a brand-name basis, the contracting officer shall use the clause with its Alternate II (but see subparagraph (5) below).

(4) If the contract involves a partial small business or labor surplus area set-aside, the contracting officer shall use the clause with its Alternate III (but see subparagraph (5) below).

(5) If the contract (i) includes subsistence for both Government use and resale in the same Schedule and similar products may be acquired on a brand-name basis and (ii) involves a partial small business or labor surplus area set-aside, the contracting officer shall use the clause with its Alternate IV.

(e) The contracting officer shall insert the clause at 52.216-22, Indefinite Quantity, in solicitations and contracts when an indefinite-quantity contract is contemplated.

16.506 Ordering.

(a) The contracting officer shall include in the Schedule of indefinite-delivery contracts the names of the activity or activities authorized to issue orders under indefinite-delivery contracts.

(b) If appropriate, authorization for placing oral orders may be included in the contract Schedule; *provided*, that procedures have been established for obligating funds and that oral orders are confirmed in writing.

(c) Orders may be placed by written telecommunication, if provided for in the contract Schedule.

(d) Orders placed under indefinite-delivery contracts shall contain the following information:

(1) Date of order.

(2) Contract number and order number.

(3) Item number and description, quantity, and unit price.

(4) Delivery or performance date.

(5) Place of delivery or performance (including consignee).

(6) Packaging, packing, and shipping instructions, if any.

(7) Accounting and appropriation data.

(8) Any other pertinent information.

SUBPART 16.6—TIME-AND-MATERIALS, LABOR-HOUR, AND LETTER CONTRACTS

16.601 Time-and-materials contracts.

(a) *Description.* A time-and-materials contract provides for acquiring supplies or services on the basis of (1) direct labor hours at specified fixed hourly rates that include wages, overhead, general and administrative expenses, and profit and (2) materials at cost, including, if appropriate, material handling costs as part of material costs.

(b) *Application.* A time-and-materials contract may be used only when it is not possible at the time of placing the contract to estimate accurately the extent or duration of the work or to anticipate costs with any reasonable degree of confidence.

(1) *Government surveillance.* A time-and-materials contract provides no positive profit incentive to the contractor for cost control or labor efficiency. Therefore, appropriate Government surveillance of contractor performance is required to give reasonable assurance that efficient methods and effective cost controls are being used.

(2) *Material handling costs.* When included as part of material costs, material handling costs shall include only costs clearly excluded from the labor-hour rate. Material handling costs may include all appropriate indirect costs allocated to direct materials in accordance with the contractor's usual accounting procedures consistent with Part 31.

(3) *Optional method of pricing material.* When the nature of the work to be performed requires the contractor to furnish material that it regularly sells to the general public in the normal course of its business, the contract may provide for charging material on a basis other than at cost if—

(i) The total estimated contract price does not exceed $25,000 or the estimated price of material so charged does not exceed 20 percent of the estimated contract price;

(ii) The material to be so charged is identified in the contract;

(iii) No element of profit on material so charged is included as profit in the fixed hourly labor rates; and

(iv) The contract provides (A) that the price to be paid for such material shall be based on an established catalog or list price in effect when material is furnished, less all applicable discounts to the Government, and (B) that in no event shall the price exceed the contractor's sales price to its most-favored customer for the same item in like quantity, or the current market price, whichever is lower.

(c) *Limitations.* A time-and-materials contract may be used (1) only after the contracting officer executes a determination and findings that no other contract type is suitable and (2) only if the contract includes a ceiling price that the contractor exceeds at its own risk. The contracting officer shall document the contract file to justify the reasons for and amount of any subsequent change in the ceiling price.

16.602 Labor-hour contracts.

Description. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. See 16.601(b) and 16.601(c) for application and limitations, respectively.

16.603 Letter contracts.

16.603-1 Description.

A letter contract is a written preliminary contractual instrument that authorizes the contractor to begin immediately manufacturing supplies or performing services.

16.603-2 Application.

(a) A letter contract may be used when (1) the Government's interests demand that the contractor be given a binding commitment so that work can start immediately and (2) negotiating a definitive contract is not possible in sufficient time to meet the requirement. However, a letter contract should be as complete and definite as feasible under the circumstances.

(b) When a letter contract award is based on price competition, the contracting officer shall include an overall price ceiling in the letter contract.

(c) Each letter contract shall, as required by the clause at 52.216-25, Contract Definitization, contain a negotiated definitization schedule including (1) dates for submission of the contractor's price proposal, required cost or pricing data, and, if required, make-or-buy and subcontracting plans, (2) a date for the start of negotiations, and (3) a target date for definitization, which shall be the earliest practicable date for definitization. The schedule will provide for definitization of the contract within 180 days after the date of the letter contract or before completion of 40 percent of the work to be performed, whichever occurs first. However, the contracting officer may, in extreme cases and according to agency procedures, authorize an additional period. If, after exhausting all reasonable efforts, the contracting officer and the contractor cannot negotiate a definitive contract because of failure to reach agreement as to price or fee, the clause at 52.216-25 requires the contractor to proceed with the work and provides that the contracting officer may, with the approval of the head of the contracting activity, determine a reasonable price or fee in accordance with Subpart 15.8 and Part 31, subject to appeal as provided in the Disputes clause.

(d) The maximum liability of the Government inserted in the clause at 52.216-24, Limitation of Government Liability, shall be the estimated amount necessary to cover the contractor's requirements for funds before definitization. However, it shall not exceed 50 percent of the estimated cost of the definitive contract unless approved in advance by the official that authorized the letter contract.

(e) The contracting officer shall assign a priority rating to the letter contract if it is appropriate under 12.304.

16.603-3 Limitations.

A letter contract may be used only after the head of the contracting activity or a designee executes a determination and findings that no other contract is suitable. Letter contracts shall not—

(a) Commit the Government to a definitive contract in excess of the funds available at the time the letter contract is executed;

(b) Be entered into without competition when competition is practicable; or

(c) Be amended to satisfy a new requirement unless that requirement is inseparable from the existing letter contract. Any such amendment is subject to the same requirements and limitations as a new letter contract.

16.603-4 Contract clauses.

(a) The contracting officer shall include in each letter contract the clauses required by this regulation for the type of definitive contract contemplated and any additional clauses known to be appropriate for it.

(b) In addition, the contracting officer shall insert the following clauses in solicitations and contracts when a letter contract is contemplated:

(1) The clause at 52.216-23, Execution and Commencement of Work, except that this clause may be omitted from letter contracts awarded on SF 26;

(2) The clause at 52.216-24, Limitation of Government Liability, with dollar amounts completed in a manner consistent with 16.603-2(d); and

(3) The clause at 52.216-25, Contract Definitization, with its paragraph (b) completed in a manner consistent with 16.603-2(c). If the letter contract is being awarded on the basis of price competition, the contracting officer shall use the clause with its Alternate I.

(c) The contracting officer shall also insert the clause at 52.216-26, Payments of Allowable Costs Before Definitization, in solicitations and contracts if a cost-reimbursement definitive contract is contemplated, unless the acquisition involves conversion, alteration, or repair of ships.

SUBPART 16.7—AGREEMENTS

16.701 Scope.

This subpart prescribes policies and procedures for establishing and using basic agreements and basic ordering agreements. (See Subpart 13.2 for blanket purchase agreements (BPA's) and see 35.015(b) for additional coverage of basic agreements with educational institutions and nonprofit organizations.)

16.702 Basic agreements.

(a) *Description.* A basic agreement is a written instrument of understanding, negotiated between an agency or contracting activity and a contractor, that (1) contains contract clauses applying to future contracts between the parties during its term and (2) contemplates separate future contracts that will incorporate by reference or attachment the required and applicable clauses agreed upon in the basic agreement. A basic agreement is not a contract.

(b) *Application.* A basic agreement should be used when a substantial number of separate contracts may be awarded to a contractor during a particular period and significant recurring negotiating problems have been experienced with the contractor. Basic agreements may be used with negotiated fixed-price or cost-reimbursement contracts.

(1) Basic agreements shall contain (i) clauses required for negotiated contracts by statute, executive order, and this regulation and (ii) other clauses prescribed in this regulation or agency

acquisition regulations that the parties agree to include in each contract as applicable.

(2) Each basic agreement shall provide for discontinuing its future applicablity upon 30 days' written notice by either party.

(3) Each basic agreement shall be reviewed annually before the anniversary of its effective date and revised as necessary to conform to the requirements of this regulation. Basic agreements may need to be revised before the annual review due to mandatory statutory requirements. A basic agreement may be changed only by modifying the agreement itself and not by a contract incorporating the agreement.

(4) Discontinuing or modifying a basic agreement shall not affect any prior contract incorporating the basic agreement.

(5) Contracting officers of one agency should obtain and use existing basic agreements of another agency to the maximum practical extent.

(c) *Limitations.* A basic agreement shall not—

(1) Cite appropriations or obligate funds;

(2) State or imply any agreement by the Government to place future contracts or orders with the contractor; or

(3) Be used in any manner to restrict competition.

(d) *Contracts incorporating basic agreements.* (1) Each contract incorporating a basic agreement shall include a scope of work and price, delivery, and other appropriate terms that apply to the particular contract. The basic agreement shall be incorporated into the contract by specific reference (including reference to each amendment) or by attachment.

(2) The contracting officer shall include clauses pertaining to subjects not covered by the basic agreement, but applicable to the contract being negotiated, in the same manner as if there were no basic agreement.

(3) If an existing contract is modified to effect new acquisition, the modification shall incorporate the most recent basic agreement, which shall apply only to work added by the modification, except that this action is not mandatory if the contract or modification includes all clauses required by statute, executive order, and this regulation as of the date of the modification. However, if it is in the Government's interest and the contractor agrees, the modification may incorporate the most recent basic agreement for application to the entire contract as of the date of the modification.

16.703 Basic ordering agreements.

(a) *Description.* A basic ordering agreement is a written instrument of understanding, negotiated between an agency, contracting activity, or contracting office and a contractor, that contains (1) terms and clauses applying to future contracts (orders) between the parties during its term, (2) a description, as specific as practicable, of supplies or services to be provided, and (3) methods for pricing, issuing, and delivering future orders under the basic ordering agreement. A basic ordering agreement is not a contract.

(b) *Application.* A basic ordering agreement may be used to expedite contracting for uncertain requirements for supplies or services when specific items, quantities, and prices are not known at the time the agreement is executed, but a substantial number of requirements for the type of supplies or services covered by the agreement are anticipated to be purchased from the contractor. Under proper circumstances, the use of these procedures can result in economies in ordering parts for equipment support by reducing administrative lead-time, inventory investment, and inventory obsolescence due to design changes.

(c) *Limitations.* A basic ordering agreement shall not state or imply any agreement by the Government to place future contracts or orders with the contractor or be used in any manner to restrict competition.

(1) Each basic ordering agreement shall—

(i) Describe the method for determining prices to be paid to the contractor for the supplies or services;

(ii) Include delivery terms and conditions or specify how they will be determined;

(iii) List one or more Government activities authorized to issue orders under the agreement;

(iv) Specify the point at which each order becomes a binding contract (e.g., issuance of the order, acceptance of the order in a specified manner, or failure to reject the order within a specified number of days);

(v) Provide that failure to reach agreement on price for any order issued before its price is established (see paragraph (d)(3) below) is a dispute under the Disputes clause included in the basic ordering agreement; and

(vi) If fast payment procedures will apply to orders, include the special data required by 13.303(b).

(2) If a basic ordering agreement is to be restricted to acquiring specific supplies or services available from only one source, the contracting officer, before issuing the basic ordering agreement, shall—

(i) Sign, and obtain any required approvals of, a determination and findings that competition is impracticable for all orders that may be issued;

(ii) Synopsize the prospective basic ordering agreement; and

(iii) If a contract administration office is authorized to issue orders (see 42.202(c)), provide to the administrative contracting officer evidence of the synopsis and a copy of the determination and findings and appropriate approvals.

(3) Each basic ordering agreement shall be reviewed annually before the anniversary of its effective date and revised as necessary to conform to the requirements of this regulation. Basic ordering agreements may need to be revised before the annual review due to mandatory statutory requirements. A basic ordering agreement shall be changed only by modifying the agreement itself and not by individual orders issued under it. Modifying a basic ordering agreement shall not retroactively affect orders previously issued under it.

(d) *Orders.* A contracting officer representing any Government activity listed in a basic ordering agreement may issue orders for required supplies or services covered by that agreement.

(1) Before issuing an order under a basic ordering agreement, the contracting officer shall—

(i) Obtain competition or determine that it is impracticable to obtain competition;

(ii) If the order is being placed after competition, ensure that use of the basic ordering agreement is not prejudicial to other offerors; and

(iii) Obtain any applicable reviews or approvals, sign or obtain any required determination and findings, and comply with other requirements, as if the order were a contract awarded independently of a basic ordering agreement.

(2) Contracting officers shall—

(i) Issue orders under basic ordering agreements on Optional Form (OF) 347, Order for Supplies or Services, or on any other appropriate contractual instrument;

(ii) Incorporate by reference the provisions of the basic ordering agreement; and

(iii) Cite the applicable negotiation authority in each order.

(3) The contracting officer shall neither make any final commitment nor authorize the contractor to begin work

on an order under a basic ordering agreement until prices have been established, unless the order establishes a ceiling price limiting the Government's obligation and either—

(i) The basic ordering agreement provides adequate procedures for timely pricing of the order early in its performance period; or

(ii) The need for the supplies or services is compelling and unusually urgent (i.e., when the Government would be seriously injured, financially or otherwise, if the requirement is not met sooner than would be possible if prices were established before the work began). The contracting officer shall proceed with pricing as soon as practical. In no event shall an entire order be priced retroactively.

PART 17—SPECIAL CONTRACTING METHODS

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

17.000 Scope of part.

This part prescribes policies and procedures for the acquisition of supplies and services through special contracting methods, including—

(a) Multi-year contracting;

(b) Options; and

(c) Leader company contracting.

SUBPART 17.1—MULTIYEAR CONTRACTING

17.101 Definitions.

"Advance acquisition," as used in this subpart, means an exception to the full funding policy which allows acquisition of long leadtime items (advanced long lead acquisition) or economic order quantities (EOQ) of items (advance EOQ acquisition) in a fiscal year in advance of that in which the related end item is to be acquired. Advance acquisitions may include materials, parts, and components as well as costs associated with the further processing of those materials, parts, and components.

"Annual funding," as used in this subpart, means the current Congressional practice of limiting authorizations and appropriations to 1 fiscal year at a time. The term should not be confused with 2-year or 3-year funds which permit the Executive Branch more than 1 year to obligate the funds.

"Cancellation," as used in this subpart, means the cancellation of the total requirements of all remaining program years. Cancellation results when the contracting officer (a) notifies the contractor of nonavailability of funds for contract performance for any subsequent program year, or (b) fails to notify the contractor that funds are available for performance of the succeeding program year requirement.

"Cancellation ceiling," as used in this subpart, means the maximum amount that the Government will pay the contractor which the contractor would have recovered as a part of the unit price, had the contract been completed. The amount which is actually paid to the contractor upon settlement for unrecovered costs (which can only be equal to or less than the ceiling) is referred to as the cancellation charge. This ceiling generally includes only nonrecurring costs.

"Multiyear acquisition," as used in this subpart, means contracting, to some degree, for more than the current year requirement. Examples include multiyear contracts and advance EOQ acquisition. Generally, advance long lead acquisitions in support of a single year's requirement would not be considered in a multiyear acquisition.

"Multiyear contracts," as used in this subpart, means contracts covering more than 1-year's but not in excess of 5-year's requirements, unless otherwise authorized by statute. Total contract quantities and annual quantities are planned for a particular level and type of funding as displayed in a current 5-year development plan. Each program year is annually budgeted and funded and, at the time of award, funds need only to have been appropriated for the first year. The contractor is protected against loss resulting from cancellation by contract provisions which allow reimbursement of costs included in the cancellation ceiling.

"Multiyear funding," as used in this subpart, means Congressional authorization and appropriation covering more than 1 fiscal year. The term should not be confused with 2-year or 3-year funds which cover only 1 fiscal year's requirement but permit the Executive Branch more than 1-year to obligate the funds.

"No-year funding," as used in this subpart, means Congressional funding that does not require obligation in any specific year or years.

"Nonrecurring costs," as used in this subpart, means those production costs which are generally incurred on a one time basis and include such costs as plant or equipment relocation, plant rearrangement, special tooling and special test equipment, preproduction engineering, initial spoilage and rework, and specialized work force training (see 17.103-1(d)(2)).

"Recurring costs," as used in this subpart, means production costs that vary with the quantity being produced such as labor and materials.

"Termination for convenience," as used in this subpart, means the procedure which may apply to any Government contract, including multiyear contracts. As contrasted with cancellation, termination can be effected at any time during the life of the contract (cancellation is effected between fiscal years) and can be for the total quantity or a partial quantity

(whereas cancellation must be for all subsequent fiscal years' quantities).

"Termination liability," as used in this subpart, means the maximum cost the Government would incur if a contract is terminated. In the case of a multiyear contract terminated before completion of the current fiscal year's deliveries, termination liability would include an amount for both current year termination charges and outyear cancellation charges.

"Termination liability funding," as used in this subpart, means obligating contract funds to cover the contractor's expenditures plus termination liability but not the total cost of the completed end items.

17.102 Policy.

17.102-1 Uses.

(a) Multiyear contracting may be used when no-year or multiyear funds are available or, in the case of 1-year funds, when multiyear contracting is specifically authorized by statute. (Specific statutory authority is needed for an agency to make financial commitments for amounts greater than those appropriated annually by the Congress. See 31 U.S.C. 665.)

(b) The multiyear contracting method may be used for the acquisition of services or supplies (including, but not limited to systems, subsystems, major equipment, components, parts, materials, supplies and the advance acquisition thereof, and commercial and noncommercial items).

17.102-2 General.

(a) Multiyear contracting is a special contracting method used to acquire known requirements in quantities and total cost not over planned requirements for 5 years unless otherwise authorized by statute, even though the total funds ultimately to be obligated are not available at the time of contract award. This method may be used in formally advertised or negotiated (either competitive or noncompetitive) acquisition.

(b) Under multiyear contracting, contract requirements are budgeted and financed for the program year for which they are authorized. Prices are solicited both for the current 1-year program requirement alone and for the total multiyear requirements. Award is made on whichever alternative offers the lowest unit prices to the Government. (With respect to competitive contracting, award may be based only on price or price and other factors considered.) If award is made on the multiyear basis, funds are obligated only for the first year's requirement, with succeeding years' requirements funded annually.

(c) If funds do not become available to support the succeeding years' requirements, the agency must cancel the contract. Multiyear contracts may contain a contract term allowing reimbursement of unrecovered nonrecurring costs included in prices for canceled items to protect the contractor against loss resulting from cancellation.

17.102-3 Objectives.

(a) Use of multiyear contracting is encouraged to take advantage of one or more of the following:

(1) Lower costs.

(2) Enhancement of standardization.

(3) Reduction of administrative burden in the placement and administration of contracts.

(4) Substantial continuity of production or performance, thus avoiding annual startup costs, preproduction testing costs, makeready expenses, and phaseout costs.

(5) Stabilization of contractor work forces.

(6) Avoidance of the need for establishing and "proving out" quality control techniques and procedures for a new contractor each year.

(7) Broadening the competitive base with opportunity for participation by firms not otherwise willing or able to compete for lesser quantities, particularly in cases involving high startup costs.

(8) Provide incentives to contractors to improve productivity through investment in capital facilities, equipment, and advanced technology.

(b) Contracts awarded under this multiyear procedure shall be firm-fixed-price, fixed-price with economic price adjustment, or fixed-price incentive.

(c) Given the longer performance period associated with multiyear acquisition, consideration in pricing contracts should be given to the use of economic price adjustment terms, profit objectives comparable with risk, and financing arrangements which reflect contractor cash flow requirements.

(d) Multiyear contracting is a flexible contracting method applicable to a wide range of acquisitions. The requirements of this subpart and the clauses at 52.217-1, Limitation of Price and Contractor Obligations, and 52.217-2 Cancellation of Items, respectively, may be modified in the following respects:

(1) *Level unit prices.* Multiyear contract procedures provide for the amortization of certain costs over the entire contract quantity resulting in identical (level) unit prices (except when economic price adjustment provisions apply) for all items or services under the multiyear contract. When level unit pricing is not in the Government's interest, the head of a contracting activity or a designee may approve the use of variable unit pricing, provided that for competitive proposals there is a valid method of evaluation.

(2) *Cancellation provisions.* Whether, or to what extent, cancellation provisions are used in multiyear acquisitions will depend on the unique circumstances of each acquisition. The head of a contracting activity or a designee may authorize the use of modified cancellation provisions or the exclusion of cancellation provisions from the contract.

(3) *Recurring costs in cancellation ceiling.* The inclusion of recurring costs in cancellation ceilings is an exception to normal contract financing arrangements and requires approval by the agency head or a designee.

(4) *Annual and multiyear proposals.* Circumstances in which both annual and multiyear offers or only multiyear offers will be requested are prescribed in 17.103-2. Obtaining both provides reduced lead time for making an annual award in the event that the multiyear award is not in the Government's interest. Obtaining both also provides a basis for the computation of savings and other benefits. However, the preparation and evaluation of dual proposals may increase administrative costs and workloads for both offerors and the Government, especially for large or complex acquisitions. The head of a contracting activity or a designee may authorize the use of an Invitation for Bid (IFB) or a Request for Proposal (RFP) requesting only multiyear prices in a solicitation, provided it is found that such a solicitation is in the Government's interest, and that dual proposals are not necessary to meet the objectives listed in 17.102-3(a).

17.103 Procedures.

17.103-1 General.

(a) *Criteria.* Except as limited in 17.103-1(b), multiyear contracting may be used when one or more of the objectives in 17.102-3 can be met, and the following criteria are present:

(1) The use of such a contract will result in reduced total costs under the contract.

(2) The minimum need for the item to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, acquisition rate, and total quantities.

(3) There is a reasonable expectation that throughout the contemplated

contract period the department or agency will request funding for the contract at the level required to avoid contract cancellation.

(4) There is a stable design for the item to be acquired and the technical risks associated with such items are not excessive.

(5) The estimates of both the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.

(b) *Limitations.* Except as permitted by statute, agencies shall not use multiyear contracts when—

(1) Funds covering the acquisition are limited by statute for obligation during the fiscal year in which the contract is executed; or

(2) Requirements exceed a 5-year planned program.

(c) *Method of contracting.* The nature of the requirement should govern the selection of the method of contracting, since the multiyear procedure is compatible with formal advertising, including two-step formal advertising, and negotiation.

(d) *Cancellation.* (1) All program years except the first are subject to cancellation. For each program year subject to cancellation, the contracting officer shall establish a cancellation ceiling. Ceilings must exclude amounts for items included in prior program years. The contracting officer shall reduce the cancellation ceiling for each program year in direct proportion to the remaining requirements subject to cancellation. For example, consider that the total nonrecurring costs (see 15.804-6) are estimated at 10 percent of the total multiyear price, and the percentages for each of the program-year requirements for 5-years are (i) 30 in the first year, (ii) 30 in the second, (iii) 20 in the third, (iv) 10 in the fourth, and (v) 10 in the fifth. The cancellation percentages, after deducting 3 percent for the first program year, would be 7, 4, 2, and 1 percent of the total price applicable to the second, third, fourth, and fifth program years, respectively.

(2) In determining cancellation ceilings, the contracting officer must estimate reasonable preproduction or startup, labor learning, and other nonrecurring costs to be incurred by an "average" prime contractor or subcontractor, which would be applicable to, and which normally would be amortized over, the items or services to be furnished under the multiyear requirements. Nonrecurring costs include such costs, where applicable, as plant or equipment relocation or rearrangement, special tooling and special test equipment, preproduction engineering, initial rework, initial spoilage, pilot runs, allocable portions of the costs of facilities to be acquired or established for the conduct of the work, costs incurred for the assembly training and transportation of a specialized work force to and from the job site, and unrealized labor learning. They shall not include any costs of labor or materials, or other expenses (except as indicated above), which might be incurred for performance of subsequent program year requirements. The total estimate of the above costs must then be compared with the best estimate of the contract cost to arrive at a reasonable percentage or dollar figure. To perform this calculation, the contracting officer should obtain in-house engineering cost estimates identifying the detailed recurring and nonrecurring costs, and indicating labor learning implications.

(3) The contracting officer shall establish cancellation dates for each program year's requirements regarding production lead time and the date by which funding for these requirements can reasonably be established. The contracting officer shall include these dates in the schedule, as appropriate.

(e) *Cancellation ceilings.* Cancellation ceilings and dates may be revised after issuing the solicitation if necessary. In formal advertising, the contracting officer shall change the ceiling by amending the solicitation before bid opening. In two-step formal advertising, discussions conducted during the first step may indicate the need for revised ceilings and dates which may be incorporated in step two. In a negotiated acquisition, negotiations with offerors may provide information requiring a change in cancellation ceilings and dates before final negotiation and contract award.

(f) *Funding/payment of cancellation charges.* Cancellation charges need not be funded before cancellation. If cancellation occurs, the contractor is entitled to payment (see the clause at 52.217-2, Cancellation of Items).

(g) *Presolicitation or pre-bid conferences.* To ensure that all interested sources of supply are thoroughly aware of how multiyear contracting is accomplished, use of presolicitation or pre-bid conferences may be advisable.

(h) *Payment limit.* The contracting officer shall limit the Government's payment obligation to an amount available for contract performance. The contracting officer shall insert the amount for the first program year in the contract upon award and modify it for successive program years upon availability of funds.

(i) *Termination payment.* If the contract is terminated for the convenience of the Government in whole, including items subject to cancellation, the Government's obligation shall not exceed the amount specified in the Schedule as available for contract performance, plus the cancellation ceiling.

(j) *Economic price adjustment clauses.* Economic price adjustment clauses are adaptable to multiyear contracting needs. When the period of production is likely to warrant a labor and material costs contingency in the contract price, the contracting officer should normally use an economic price adjustment clause (see 16.203).

(k) *Price adjustment clause.* When contracting for services, the contracting officer—

(1) Shall add the clause at 52.222-43, Fair Labor Standards Act and Service Contract Act—Price Adjustment (Multiyear and Option Contracts), when the contract includes the clause at 52.222-41, Service Contract Act of 1965;

(2) May modify the clause at 52.222-43 in overseas contracts when laws, regulations, or international agreements require contractors to pay higher wage rates; or

(3) May use an economic price adjustment clause authorized by 16.203 when potential fluctuations require coverage, and are not included in cost contingencies provided for by the clause at 52.222-43.

17.103-2 Solicitations.

Solicitations for multiyear contracts shall reflect all the factors to be considered for evaluation, specifically including the following:

(a) The requirements, by item or service, for the—

(1) First program year; and

(2) Multiyear contract including the requirements for each program year.

(b) When previous acquisitions of the item or service have been made with competition, a provision that a price may be submitted—

(1) For the total requirements of the first program year, or for the total multiyear requirements, or both; or

(2) Only for the total multiyear requirement, and that prices on a single-year basis will not be considered when (i) competition in future acquisitions would be impracticable after award of a contract covering the first program year requirement and (ii) it is necessary to prevent a first program year "buy-in."

(c) When previous acquisitions for the item or service have been made without competition, and a first program year "buy-in" is not anticipated, include—

(1) A provision that a price must be submitted for the first program year requirements, that a price may be submitted for the total multiyear requirements, and that an offer on only the multiyear requirements will be nonresponsive; and

(2) A provision that if only one offer on the multiyear requirements is received that is both responsive and from a responsible offeror, the Government reserves the right to disregard the offer on the multiyear requirements and make an award only for the first program year requirements; or

(d) When competition after the first program year would be impracticable after award of a contract covering the first program year requirement, and it is necessary to prevent a first program year "buy-in," include—

(1) A provision that a price may be submitted only on the total multiyear requirement and that prices on a single-year basis will not be considered for the purpose of award.

(2) A provision that if only one offer on the multiyear requirements is received that is both responsive and from a responsible offeror, the Government reserves the right to cancel the solicitation and resolicit on a single-year basis by whatever procedures are then appropriate.

(e) A provision that the unit price of each item or service in the multiyear requirement shall be the same for all program years (level unit price) included. (See 16.203 for the use of an economic price adjustment clause which might effect the level unit price.)

(f) Criteria for comparing the lowest evaluated submission on the first program year's requirement against the lowest evaluated submission on the multiyear requirements (see 17.103-3(e)).

(g) Criteria for evaluation factors other than price where the acquisition is on the basis of price and other factors.

(h) A provision that if the Government determines before award that only the first program year requirements are needed, the Government may evaluate offers and make award solely on the basis of price offered on that year's requirements.

(i) A provision specifying a separate cancellation ceiling (on a percentage or dollar basis) and dates applicable to each program year subject to a cancellation (see 17.103-1(d)).

(j) A prominently placed provision directing attention to the multiyear features of the solicitation, and to—

(1) The clause at 52.217-1, Limitation of Price and Contractor Obligations, which limits the the payment obligation of the Government to the requirements of the first program year and to those requirements of succeeding program years funded by the Government (see 17.103-5);

(2) The clause at 52.217-2, Cancellation of Items, which allows the Government to cancel by a specific date or within a specific period, all remaining program years; and

(3) The cancellation ceiling set forth in the schedule.

(k) A statement that award will not be made on less than the first program year requirements.

(l) In the event the solicitation is only for supplies and delivery destinations are unknown—

(1) A definite place or places as the point to which transportation costs will be computed (but only for the purpose of evaluation); and

(2) Insert the provision at 52.247-49, Destination Unknown, which is prescribed at 47.305-5(b)(2).

(m) If Government administrative costs are to be used as a factor in evaluation (see 17.103-3(e)(2)), the dollar amount of those costs. Unless Government administrative costs incident to annual contracting and administration can be reasonably established, they shall not be used as a factor for evaluation.

(n) Where the multiyear acquisition is being computed on a basis other than price alone, the solicitation shall advise of the relative importance of the evaluation factors.

(o) When Government property is provided, it may be used on a rent-free basis. The solicitation shall then contain detailed procedures for eliminating competitive advantage (see Subpart 45.2).

17.103-3 Evaluation.

In addition to the factors in 17.103-2, the contracting officer shall comply with the following:

(a) Evaluation of offers shall involve (1) determination of the lowest overall evaluated cost to the Government for both the multiyear and the first program year acquisition, and (2) comparison of the cost of buying the total requirement under a multiyear acquisition with the cost of buying the total requirement in successive independent acquisitions.

(b) The cancellation ceiling shall not be a factor for evaluation.

(c) If Government property is provided, the contracting officer shall, for evaluation purposes, add an amount for the use of such property computed to eliminate competitive advantage to each offeror's unit price for the first program year requirement and the unit price for the multiyear requirements.

(d) When the solicitation only provides for submission of prices for the total multiyear quantity, submission of prices for the single-year quantity will be disregarded but will not render the offer nonresponsive as to any alternative multiyear submission by the offeror.

(e) To determine the lowest evaluated unit price, the contracting officer shall compare the lowest evaluated offer on the first program year alternative against the lowest evaluated offer on the multiyear alternative as follows:

(1) Multiply the evaluated unit price for each item of the lowest evaluated offer on the first program year alternative by the total number of units of that item required by the multiyear alternative.

(2) Add the total amount for all the items to the dollar amount of any administrative costs identified in the solicitation.

(3) Compare this result against the total evaluated price of the lowest offer on the multiyear alternative.

(4) Where the multiyear acquisition is being computed on a basis other than price alone, the contracting officer shall conduct the evaluation based on the evaluation factors contained in the solicitation (see 17.103-2(m)).

(5) The evaluation procedures contained in this subpart may be modified if necessary to meet the unique circumstances of a particular acquisition.

17.103-4 Award.

(a) When the acquisition is on the basis of price only, the contracting officer shall award to firms offering the lowest evaluated unit price whether that price is on a single-year or a multiyear basis.

(b) When the acquisition is on the basis of price and other factors, the contracting officer shall award to the offeror submitting the proposal most advantageous to the Government, price and other factors considered.

(c) In the case of noncompetitive acquisitions, awards shall be made only if a detailed review of the cost and technical proposals supports the objectives of 17.103-1, and significant benefits of cost savings will result from multiyear acquisitions.

(d) However, if only one responsive offer is received on the multiyear requirements from a responsible offeror, the contracting officer shall proceed as follows:

(1) If the solicitation gave the offeror the choice of submitting prices on a single-year or multiyear basis, or both,

make the award under 17.103-4(a) or 17.103-4(b).

(2) If the solicitation required the submission of prices on the first program year requirements (see 17.103-2(c)(1)), make award to the lowest evaluated offeror on the single-year basis, even though the multiyear price submission may represent the lowest evaluated price submission. However, if the multiyear price offers distinct advantages to the Government, a multiyear award may be made with the advance approval of the head of the contracting activity.

(3) If the solicitation restricted the submission of prices to the multiyear basis only, cancel it and issue a new solicitation. However, if the multiyear price offers distinct advantages to the Government, a multiyear award may be made with the advance approval of the head of the contracting activity.

(e) If the contract is awarded for multiyear requirements, the Schedule shall state that the award was made under "multiyear contracting."

17.104 Related areas.

17.104-1 Set-asides.

(a) Total small business or labor surplus area set-asides and multiyear contracting are compatible and may be used together.

(b) Partial set-asides for small business or labor surplus area concerns generally are not compatible with multiyear contracting when high startup costs are involved because of the potential duplication of costs by the set-aside and non-set-aside contractors. However—

(1) Even when high startup costs are involved, partial set-asides combined with the multiyear procedure may be appropriate if the criteria for partial set-asides are met under Part 19 and it is likely that the broader competition will offset any duplication of startup costs; and

(2) Partial set-asides are compatible with multiyear contracting when the multiyear procedure is based on cost savings from anticipated production over longer periods of time. (Partial labor surplus area set-asides are only authorized for DOD activities at this time.)

(c) When considering combining multiyear contracting and set-asides, the contracting officer shall request the advice of the activity's small business specialist and the SBA representative, if one is assigned to the activity, and permit them to review the facts and make recommendations.

17.104-2 Multiyear subcontracts.

(a) The benefits and advantages of multiyear prime contracts may frequently be increased by multiyear subcontracts under the prime contracts. While prime contractors should be encouraged to employ multiyear subcontracts, the choice of the appropriate subcontract types remains with the prime contractor who should employ multiyear subcontracts only when in its judgment—

(1) The subcontract item or service is of stable design and specification;

(2) The quantity required is reasonably firm and continuing;

(3) Effective competition may be enhanced; and

(4) Multiyear subcontracts can reasonably be expected to result in reduced prices.

(b) Multiyear subcontracts may be particularly desirable under a sole source, multiyear prime contract since effective competition at the subcontract level may be enhanced and the attendant cost reductions realized by the prime contractor and the Government.

17.104-3 Options.

Benefits may accrue by providing for options with a multiyear contract. In that event, contracting officers must follow both the requirements of Subpart 17.2 and the following:

(a) Option prices should not include (1) charges for plant and equipment already amortized, or (2) other nonrecurring charges which were included in the basic contract price. Accordingly, solicitations should require offerors to submit prices for option quantities which do not include such charges.

(b) Contracting officers should also consider including a term allowing the Government the option, upon payment of the unamortized portion of the cost of the plant or equipment, to take title to them.

17.104-4 Multiyear contracting using modified requirements contracts.

(a) *Description of procedure.* Multiyear acquisition of supplies and/or services may be accomplished using a requirements contract, modified from the type discussed in 16.503 as described below. This type of contract will only be used when anticipated annual requirements, expressed as the Best Estimated Quantity (BEQ), can be projected with reasonable certainty. Under this method, a fixed-price contract is awarded for specified supplies and/or services up to a designated maximum quantity with orders placed on an as-required basis during the multiyear period. Contracts awarded only on the first program year requirements will not include provision for cancellation charges. The modified requirements contract differs from the contract discussed in 16.503 in the following respects:

(1) Contract quantities anticipated to be acquired are set forth in the contract as the BEQ.

(2) Nonrecurring costs are to be amortized on the BEQ.

(3) The contractor is entitled to reimbursement for preproduction and other nonrecurring costs in accordance with the contract schedule cancellation ceiling in the event that the Government orders lesser quantities than the aggregate BEQ, or cancels program year requirements by cancellation notice.

(4) Quantities in excess of the aggregate BEQ and up to the maximum quantity set forth in the schedule will be priced exclusive of the nonrecurring costs amortizing on the BEQ.

(b) *Solicitation procedures.* Solicitation procedures shall be in conformance with those contained in 17.103-2 except the term "requirements" as used in 17.103-2 will be deemed to mean BEQ. The solicitation shall include the following:

(1) A BEQ and a maximum quantity for each item for both the first program year and for each subsequent program year. The maximum quantity for individual program years is not separately priced.

(2) A line item, essentially as follows, to apply to quantities exceeding the aggregate multiyear BEQ:

"The price established for this line item is applicable to all units ordered in excess of the aggregate BEQ of... and up to the total multiyear contract maximum quantity ..."

(3) Applicable solicitation schedule notes, essentially as follows:

(i) "NOTE 1: Offeror will submit unit price for the single year requirement, which shall apply to all quantities up to the single year maximum in the event that a 1-year requirements contract is awarded only for the single-year requirement. If a contract is awarded only on the first program year requirements, such a contract will not provide for any cancellation charges."

(ii) "NOTE 2: Offeror will submit a single unit price, inclusive of nonrecurring costs, to be entered on the schedule as the BEQ price for each program year, applicable to quantities within and up to the aggregate BEQ, under multiyear procedures."

(iii) "NOTE 3: Offerors will also submit a single unit price, exclusive of

nonrecurring costs amortized over the BEQ, applicable only to quantities ordered in excess of the aggregate BEQ and up to the total multiyear contract maximum quantity."

(4) A statement that quantities ordered in excess of the program year BEQ but which do not exceed the aggregate BEQ will be priced inclusive of nonrecurring costs.

(5) A statement that evaluation will be on the basis of the lowest unit price offered for the first program year BEQ against the lowest unit price offered for the aggregate BEQ.

(6) A statement setting forth a single cancellation ceiling, applicable only in the event of contract award on the multiyear basis.

(7) A notification that the amount of cancellation charges payable shall be determined on the basis of the ratio between the total quantity ordered at the time of cancellation and the aggregate contract BEQ.

(8) A date of specific time period for Government notification to the contractor as to the availability or nonavailability of funds and any anticipated significant changes in the BEQ for the succeeding program year.

(9) A statement that in the event the contract is awarded for more than one program year, the contract will include the clause at 52.217-2, Cancellation of Items, with its Alternate I.

17.105 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the following clauses in solicitations and contracts when a multiyear contract or a multiyear modified-requirements contract is contemplated:

(1) The clause at 52.217-1, Limitations of Price and Contractor Obligations.

(2) The clause at 52.217-2, Cancellation of Items. If a multiyear modified requirements contract is awarded for more than one program year, the contracting officer shall use the clause with its Alternate I.

(b) For purposes of determining the provisions and clauses applicable to solicitations and contracts under the procedure in 17.104-4 above, prescriptions pertaining to requirements contracts are applicable (see 16.505(a), 16.505(b), and 16.505(d)).

(c) Provisions and clauses prescribed elsewhere in the FAR shall also be used when the conditions specified in their prescriptions are applicable.

SUBPART 17.2—OPTIONS

17.200 Scope of subpart.

This subpart prescribes policies and procedures for the use of option solicitation provisions and contract clauses. It does not apply to contracts for (a) services involving the construction, alteration, or repair (including dredging, excavating, and painting) of buildings, bridges, roads, or other kinds of real property; (b) architect-engineer services; (c) research and development services; (d) automatic data processing (ADP) equipment systems; and (e) telecommunications equipment and services. However, it does not preclude the use of options in those contracts.

17.201 Definition.

"Option" means a unilateral right in a contract by which, for a specified time, the Government may elect to purchase additional supplies or services called for by the contract, or may elect to extend the term of the contract.

17.202 Use of options.

(a) Subject to the limitations of paragraphs (b) and (c) below, the contracting officer may include options in contracts when it is in the Government's interest.

(b) Inclusion of an option is normally not in the Government's interest when, in the judgment of the contracting officer, the foreseeable requirements involve—

(1) Minimum economic quantities (i.e., quantities large enough to permit the recovery of startup costs and the production of the required supplies at a reasonable price); and

(2) Delivery requirements far enough into the future to permit competitive acquisition, production, and delivery.

(c) The contracting officer shall not employ options if—

(1) The supplies or services are readily available on the open market;

(2) The contractor will incur undue risks; e.g., the price or availability of necessary materials or labor is not reasonably foreseeable;

(3) An indefinite quantity or requirements contract is appropriate (except that the contracting officer may use options for extending the term of such contracts);

(4) Market prices for the supplies or services involved are likely to change substantially; or

(5) The option represents known firm requirements for which funds are available unless (i) the basic quantity is a learning or testing quantity and (ii) competition for the option is impracticable once the initial contract is awarded.

(d) In recognition of (1) the Government's need in certain service contracts for continuity of operations and (2) the potential cost of disrupted support, options may be included in service contracts if there is an anticipated need for a similar service beyond the first contract period.

17.203 Solicitations.

(a) Solicitations shall include appropriate option provisions and clauses when resulting contracts will provide for the exercise of options (see 17.208).

(b) Solicitations containing option provisions shall state the basis of evaluation, either exclusive or inclusive of the option and, when appropriate, shall inform offerors that it is anticipated that the Government may exercise the option at time of award.

(c) Solicitations normally should allow option quantities to be offered without limitation as to price, and there shall be no limitation as to price if the option quantity is to be considered in the evaluation for award (see 17.206).

(d) Solicitations that allow the offer of options at unit prices which differ from the unit prices for the basic requirement shall state that offerors may offer varying prices for options, depending on the quantities actually ordered and the dates when ordered.

(e) If it is anticipated that the Government may exercise an option at the time of award and if the condition specified in paragraph (d) above applies, solicitations shall specify the price at which the Government will evaluate the option (highest option price offered or option price for specified requirements).

(f) Solicitations may, in unusual circumstances, require that options be offered at prices no higher than those for the initial requirement; e.g., when (1) the option cannot be evaluated under 17.206, or (2) future competition for the option is impracticable.

(g) Solicitations that require the offering of an option at prices no higher than those for the initial requirement shall—

(1) Specify that the Government will accept an offer containing an option price higher than the base price only if the acceptance does not prejudice any other offeror; and

(2) Limit option quantities for additional supplies to not more than 50 percent of the initial quantity of the same contract line item. In unusual circumstances, an authorized person at a level above the contracting officer may approve a greater percentage of quantity.

17.204 Contracts.

(a) The contract shall specify limits on the purchase of additional supplies or services, or the overall duration of the

term of the contract, including any extension.

(b) The contract shall state the period within which the option may be exercised.

(c) The period shall be set so as to provide the contractor adequate lead time to ensure continuous production.

(d) The period may extend beyond the contract completion date for service contracts. This is necessary for situations when exercise of the option would result in the obligation of funds that are not available in the fiscal year in which the contract would otherwise be completed.

(e) The total of the basic and option periods shall not exceed 5 years in the case of services, and the total of the basic and option quantities shall not exceed the requirement for 5 years in the case of supplies, unless otherwise authorized by statute.

(f) Contracts may express options for increased quantities of supplies or services in terms of (1) percentage of specific line items, (2) increase in specific line items, or (3) additional numbered line items identified as the option.

(g) Contracts may express extensions of the term of the contract as an amended completion date or as additional time for performance; e.g., days, weeks, or months.

17.205 Documentation.

(a) The contracting officer shall justify in writing the quantities or the term under option, the notification period for exercising the option, and any limitation on option price under 17.203(g); and shall include the justification document in the contract file.

(b) Written determinations and findings that are required for negotiated contracts shall specify both the basic requirement and the increase permitted by the option.

17.206 Evaluation.

(a) The contracting officer may consider the option quantity in the award evaluation for a firm-fixed-price contract or a fixed-price contract with economic price adjustment (see 17.208(c)(1)); *provided*, that an authorized person at a level above the contracting officer determines, before the solicitation is issued, that—

(1) There is a known requirement that exceeds the basic quantity to be awarded but (i) the basic quantity is a learning or testing requirement, or (ii) due to the unavailability of funds, the agency cannot exercise the option at the time of award; *provided*, that in this latter case there is reasonable certainty that funds will be available thereafter to permit exercise of the option; and

(2) Competition for the option quantity is impracticable once the initial contract is awarded. This determination shall reflect factors such as substantial startup or phase-in costs, superior technical ability resulting from performance of the initial contract, and long preproduction leadtime for a new producer.

(b) The contracting officer may consider the option quantity in the award evaluation for fixed-price incentive contracts (see 17.208(c)(2)) if—

(1) The determination in paragraph (a) above was made before issuance of the solicitation; and

(2) The solicitation (i) specifies an incentive arrangement and (ii) specifies that the agency will base the ceiling price and target profit for the basic and option quantities on stated percentages of the offeror's target cost. These percentages shall be specified in the solicitation and shall apply to all proposals.

17.207 Exercise of options.

(a) When exercising an option, the contracting officer shall provide written notice to the contractor within the time period specified in the contract.

(b) When the contract provides for economic price adjustment and the contractor requests a revision of the price, the contracting officer shall determine the effect of the adjustment on prices under the option before the option is exercised.

(c) The contracting officer may exercise options only after determining that—

(1) Funds are available;

(2) The requirement covered by the option fulfills an existing Government need; and

(3) The exercise of the option is the most advantageous method of fulfilling the Government's need, price and other factors (see paragraphs (d) and (e) below) considered.

(d) The contracting officer, after considering price and other factors, shall make the determination on the basis of one of the following:

(1) A new solicitation fails to produce a better price or a more advantageous offer than that offered by the option. If it is anticipated that the best price available is the option price or that this is the more advantageous offer, the contracting officer should not use this method of testing the market.

(2) An informal analysis of prices or an examination of the market indicates that the option price is better than prices available in the market or that the option is the more advantageous offer.

(3) The time between the award of the contract containing the option and the exercise of the option is so short that it indicates the option price is the lowest price obtainable or the more advantageous offer. The contracting officer shall take into consideration such factors as market stability and comparison of the time since award with the usual duration of contracts for such supplies or services.

(e) The determination of other factors under (c)(3) of this section should take into account the Government's need for continuity of operations and potential costs of disrupting operations.

(f) Before exercising an option, the contracting officer shall determine that such action is in accordance with the terms of the option and the requirements of this section. The written determination shall be included in the contract file.

(g) The contract modification or other written document which notifies the contractor of the exercise of the option shall cite the option clause as authority. The negotiation authorities under 41 U.S.C. 252(c) or 10 U.S.C. 2304(a) are not applicable and shall not be cited.

17.208 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert a provision substantially the same as the provision at 52.217-3, Evaluation Exclusive of Options, in solicitations when the solicitation includes an option clause and does not include one of the provisions prescribed in paragraph (b) or (c) below.

(b) The contracting officer shall insert a provision substantially the same as the provision at 52.217-4, Evaluation of Options Exercised at Time of Contract Award, in solicitations when the solicitation includes an option clause and an option may be exercised at the time of contract award.

(c) (1) The contracting officer shall insert a provision substantially the same as the provision at 52.217-5, Evaluation of Options, in solicitations when (i) the solicitation contains an option clause; (ii) an option is not to be exercised at the time of contract award; (iii) a firm-fixed-price contract, a fixed-price contract with economic price adjustment, or other type of contract approved under agency procedures is contemplated; and (iv) a determination has been made as specified in 17.206(a).

(2) If all conditions in (c)(1) above apply, except that a fixed-price incentive contract is contemplated and the conditions in 17.206(b) apply, the contracting officer shall use a provision substantially the same as the provision

at 52.217-5, Evaluation of Options, with its Alternate I.

(d) The contracting officer shall insert a clause substantially the same as the clause at 52.217-6, Option for Increased Quantity, in solicitations and contracts, other than those for services, when the inclusion of an option is appropriate (see 17.200 and 17.202) and the option quantity is expressed as a percentage of the basic contract quantity or as an additional quantity of a specific line item.

(e) The contracting officer shall insert a clause substantially the same as the clause at 52.217-7, Option for Increased Quantity—Separately Priced Line Item, in solicitations and contracts, other than those for services, when the inclusion of an option is appropriate (see 17.200 and 17.202) and the option quantity is identified as a separately priced line item having the same nomenclature as a corresponding basic contract line item.

(f) The contracting officer shall insert a clause substantially the same as the clause at 52.217-8, Option to Extend Services, in solicitations and contracts for services when the inclusion of an option is appropriate (see 17.200 and 17.202), unless the conditions specified in paragraph (g) below apply.

(g) The contracting officer shall insert a clause substantially the same as the clause at 52.217-9, Option to Extend the Term of the Contract—Services, in solicitations and contracts for services when the inclusion of an option is appropriate (see 17.200 and 17.202) and it is necessary to include in the contract a requirement that the Government shall give the contractor a preliminary written notice of its intent to extend the contract, a stipulation that an extension of the contract includes an extension of the option, and/or a specified limitation on the total duration of the contract.

SUBPART 17.3—[RESERVED]

SUBPART 17.4—LEADER COMPANY CONTRACTING

17.401 General.

Leader company contracting is an extraordinary acquisition technique that is limited to special circumstances and utilized only when its use is in accordance with agency procedures. A developer or sole producer of a product or system is designated under this acquisition technique to be the leader company, and to furnish assistance and know-how under an approved contract to one or more designated follower companies, so they can become a source of supply. The objectives of this technique are one or more of the following:

(a) Reduce delivery time.

(b) Achieve geographic dispersion of suppliers.

(c) Maximize the use of scarce tooling or special equipment.

(d) Achieve economies in production.

(e) Ensure uniformity and reliability in equipment, compatibility or standardization of components, and interchangeability of parts.

(f) Eliminate problems in the use of proprietary data that cannot be resolved by more satisfactory solutions.

(g) Facilitate the transition from development to production and to subsequent competitive acquisition of end items or major components.

17.402 Limitations.

(a) Leader company contracting is to be used only when—

(1) The leader company has the necessary production know-how and is able to furnish required assistance to the follower(s);

(2) No other source can meet the Government's requirements without the assistance of a leader company;

(3) The assistance required of the leader company is limited to that which is essential to enable the follower(s) to produce the items; and

(4) Its use is authorized in accordance with agency procedures.

(b) When leader company contracting is used, the Government shall reserve the right to approve subcontracts between the leader company and the follower(s).

17.403 Procedures.

(a) The contracting officer may award a prime contract to a—

(1) Leader company, obligating it to subcontract a designated portion of the required end items to a specified follower company and to assist it to produce the required end items;

(2) Leader company, for the required assistance to a follower company, and a prime contract to the follower for production of the items; or

(3) Follower company, obligating it to subcontract with a designated leader company for the required assistance.

(b) The contracting officer shall ensure that any contract awarded under this arrangement contains a firm agreement regarding disclosure, if any, of contractor trade secrets, technical designs or concepts, and specific data, or software, of a proprietary nature.

SUBPART 17.5—INTERAGENCY ACQUISITIONS UNDER THE ECONOMY ACT

17.500 Scope of subpart.

This subpart prescribes policies and procedures applicable to interagency acquisitions under the Economy Act (31 U.S.C. 686). Policies and procedures for acquisitions from required sources of supplies are prescribed in Part 8.

17.501 Definition.

"Interagency acquisition" means a procedure by which an agency needing supplies or services (the requesting agency) obtains them from another agency (the servicing agency).

17.502 General.

Under the Economy Act, an agency may place orders with any other agency for supplies or services that the servicing agency may be in a position or equipped to supply, render, or obtain by contract if it is determined by the head of the requesting agency, or designee, that it is in the Government's interest to do so.

17.503 Determination requirements.

(a) The determination prescribed in 17.502 shall include a finding that—

(1) Legal authority for the acquisition otherwise exists; and

(2) The action does not conflict with any other agency's authority or responsibility; e.g., that of the Administrator of General Services under the Federal Property and Administrative Services Act (see 40 U.S.C. 481, 486, and 41 CFR 101-25.2).

(b) If the acquisition involves the use of a commercial or industrial activity operated by the servicing agency, the determination shall also include a finding that the acquisition conforms to the requirements of Subpart 7.3, Contractor Versus Government Performance.

17.504 Ordering procedures.

(a) When placing an order for supplies or services from another Government agency, the contracting officer shall first obtain the determination required in 17.502.

(b) The order may be placed on any form or document that is acceptable to both agencies. The order should include—

(1) A description of the supplies or services required;

(2) Delivery requirements;

(3) A funds citation;

(4) A payment provision (see 17.505); and

(5) Acquisition authority as may be appropriate (see 17.504(d)).

(c) The requesting and servicing agencies should agree to procedures for the resolution of disagreements that may arise under interagency acquisitions, including, in appropriate circumstances, the use of a third-party forum. If a third party is proposed, consent of the third party should be obtained in writing.

(d) When an interagency acquisition requires the servicing agency to award a contract, the following procedures apply:

(1) If a determination and findings (D&F) is required by law or regulation (e.g., to justify the use of negotiation), the servicing agency shall execute and issue the D&F. The requesting agency shall furnish the servicing agency any information needed to make the D&F.

(2) The requesting agency shall also be responsible for furnishing other assistance that may be necessary, such as providing special contract terms or other requirements that must comply with any condition or limitation applicable to the funds of the requesting agency.

(3) The servicing agency is responsible for compliance with all other legal or regulatory requirements applicable to the contract, including the requirement that there be adequate statutory authority for the contractual action.

17.505 Payment.

(a) Under the Economy Act—

(1) The servicing agency may request the requesting agency, in writing, for advance payment by check for all or part of the estimated cost of furnishing the supplies or services; or

(2) If approved by the servicing agency, payment by check for actual costs may be made by the requesting agency after the supplies or services have been furnished.

(b) If advance payment is made, adjustments on the basis of actual costs shall be made as agreed by the agencies.

(c) Bills rendered or requests for advance payment shall not be subject to audit or certification in advance of payment.

SUBPART 17.6—MANAGEMENT AND OPERATING CONTRACTS

17.600 Scope of subpart.

This subpart prescribes policies and procedures for management and operating contracts for the Department of Energy and any other agency having requisite statutory authority.

17.601 Definition.

"Management and operating contract" means an agreement under which the Government contracts for the operation, maintenance, or support, on its behalf, of a Government-owned or -controlled research, development, special production, or testing establishment wholly or principally devoted to one or more major programs of the contracting Federal agency.

17.602 Policy.

(a) Heads of agencies, with requisite statutory authority, may determine in writing to authorize contracting officers to enter into or renew any management and operating contract in accordance with the agency's statutory authority and the agency's regulations governing such contracts. This authority shall not be delegated. Every contract so authorized shall show its authorization upon its face.

(b) Agencies may authorize management and operating contracts only in a manner consistent with the guidance of this subpart and only if they are consistent with the situations described in 17.604.

(c) Within 2 years of the effective date of this regulation, agencies shall review their current contractual arrangements in the light of the guidance of this subpart, in order to (1) identify, modify as necessary, and authorize management and operating contracts and (2) modify as necessary or terminate contracts not so identified and authorized, except that any contract with less than 4 years remaining as of the effective date of this regulation need not be terminated, nor need it be identified, modified, or authorized unless it is renewed or its terms are substantially renegotiated.

17.603 Limitations.

(a) Management and operating contracts shall not be authorized for—

(1) Functions involving the direction, supervision, or control of Government personnel, except for supervision incidental to training;

(2) Functions involving the exercise of police or regulatory powers in the name of the Government, other than guard or plant protection services;

(3) Functions of determining basic Government policies;

(4) Day-to-day staff or management functions of the agency or of any of its elements; or

(5) Functions that can more properly be accomplished in accordance with Subpart 45.3, Providing Government Property to Contractors.

(b) Since issuance of an authorization under 17.602(a) is deemed sufficient proof of compliance with paragraph (a) immediately above, nothing in paragraph (a) immediately above shall affect the validity or legality of such an authorization.

17.604 Identifying management and operating contracts.

A management and operating contract is characterized both by its purpose (see 17.601) and by the special relationship it creates between Government and contractor. The following criteria can generally be applied in identifying management and operating contracts:

(a) Government-owned or -controlled facilities must be utilized; for instance, (1) in the interest of national defense or mobilization readiness, (2) to perform the agency's mission adequately, or (3) because private enterprise is unable or unwilling to use its own facilities for the work.

(b) Because of the nature of the work, or because it is to be performed in Government facilities, the Government must maintain a special, close relationship with the contractor and the contractor's personnel in various important areas (e.g., safety, security, cost control, site conditions).

(c) The conduct of the work is wholly or at least substantially separate from the contractor's other business, if any.

(d) The work is closely related to the agency's mission and is of a long-term or continuing nature, and there is a need (1) to ensure its continuity and (2) for special protection covering the orderly transition of personnel and work in the event of a change in contractors.

17.605 Award, renewal, and extension.

(a) Effective work performance under management and operating contracts usually involves high levels of expertise and continuity of operations and personnel. Because of program requirements and the unusual (sometimes unique) nature of the work performed under management and operating contracts, the Government is often limited in its ability to effect competition or to replace a contractor. Therefore contracting officers should take extraordinary steps before award to assure themselves that the prospective contractor's technical and managerial capacity are sufficient, that organizational conflicts of interest are adequately covered, and that the contract will grant the Government broad and continuing rights to involve itself, if necessary, in technical and managerial decisionmaking concerning performance.

(b) The contracting officer shall review each management and operating contract, following agency procedures, at appropriate intervals and at least once every 5 years. The review should

determine whether meaningful improvement in performance or cost might reasonably be achieved. Any extension or renewal of an operating and management contract must be authorized at a level within the agency no lower than the level at which the original contract was authorized in accordance with 17.602(a).

(c) Replacement of an incumbent contractor is usually based largely upon expectation of meaningful improvement in performance or cost. Therefore, when reviewing contractor performance, contracting officers should consider—

(1) The incumbent contractor's overall performance, including, specifically, technical, administrative, and cost performance;

(2) The potential impact of a change in contractors on program needs, including safety, national defense, and mobilization considerations; and

(3) Whether it is likely that qualified offerors will compete for the contract.

PART 18—[RESERVED]

SUBCHAPTER D—Socioeconomic Programs

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

19.000 Scope of part.

(a) This part implements the acquisition-related sections of the Small Business Act (15 U.S.C. 631 et seq.), applicable sections of the Armed Services Procurement Act (10 U.S.C. 2301 et seq., the Federal Property and Administrative Services Act (41 U.S.C. 252), and Executive Order 12138, May 18, 1979. It covers—

(1) The determination that a concern is eligible for participation in the programs identified in this part;

(2) The respective roles of executive agencies and the Small Business Administration (SBA) in implementing the programs;

(3) Setting acquisitions aside for exclusive competitive participation by small business concerns;

(4) The certificate of competency program;

(5) The subcontracting assistance program;

(6) The "8(a)" program, under which agencies contract with the SBA for goods or services to be furnished under a subcontract by a small disadvantaged business concern; and

(7) The use of women-owned small business concerns.

(b) This part applies only inside the United States, its territories and possessions, Puerto Rico, the Trust Territory of the Pacific Islands, and the District of Columbia.

SUBPART 19.1—TERMS AND SIZE STANDARDS

19.101 Explanation of terms.

"Affiliates." For the purpose of this part, business concerns are affiliates of each other if, directly or indirectly, (a) either one controls or has the power to control the other or (b) another concern controls or has the power to control both. In determining whether affiliation exists, consideration is given to all appropriate factors including common ownership, common management, and contractual relationships; *provided*, that restraints imposed by a franchise agreement are not considered in determining whether the franchisor controls or has the power to control the franchisee, if the franchisee has the right to profit from its effort, commensurate with ownership, and bears the risk of loss or failure. Any business entity may be found to be an affiliate, whether or not it is organized for profit or located inside the United States.

"Annual receipts" means the gross income (less returns and allowances, sales of fixed assets, and interaffiliate transactions) of a concern (and its domestic and foreign affiliates) from sales of products and services, interest, rents, fees, commissions, and/or from whatever other source derived for its most recently completed fiscal year (whether on a cash, accrual, completed contracts, percentage of completion, or other acceptable accounting basis). If a concern has been in business less than a year, its annual receipts for the purpose of a size standard based on 1 year's receipts shall be computed by determining its average weekly receipts for the period in which it has been in business and multiplying such figure by 52. If a concern has been in business less than 3 years, its average annual receipts for the purpose of a size standard based on 3 years' receipts shall be computed by determining its average weekly receipts for the period in which it has been in business, and multiplying such figure by 52. If a concern has acquired an affiliate during the applicable accounting period, it is necessary in computing the applicant's annual receipts to include the affiliate's receipts during the entire applicable accounting period, rather than only its receipts during the period in which it has been an affiliate. The receipts of a former affiliate are not included even if such a concern had been an affiliate during a portion of the applicable accounting period.

"Asian-Indian Americans" means United States citizens whose origins are in India, Pakistan, or Bangladesh.

"Asian-Pacific Americans" means United States citizens whose origins are in Japan, China, the Philippines, Vietnam, Korea, Samoa, Guam, the U.S. Trust Territory of the Pacific Islands, the Northern Mariana Islands, Laos, Cambodia, or Taiwan.

"Base maintenance" means furnishing at an installation within the several States, Commonwealth of Puerto Rico, Virgin Islands, the Trust Territory of the Pacific Islands, or the District of Columbia, three or more services which may include but are not limited to such maintenance activities as janitorial and custodial services, protective guard services, commissary services, base housing maintenance, fire prevention services, safety engineering services, messenger services, grounds maintenance and landscaping services, and air-conditioning and refrigeration maintenance. However, whenever the contracting officer determines before issuing bids that the estimated value of one of the foregoing services constitutes more than 50 percent of the estimated value of the entire contract, the contract shall not be classified as base maintenance but in the industry in which such service is classified.

"Certificate of competency" means the certificate issued by the Small Business Administration (SBA) stating that the holder is responsible (with respect to all elements of responsibility, including but not limited to capability, competency, capacity, credit, integrity, perseverance, and tenacity) for the purpose of receiving and performing a specific Government contract.

"Concern," as used in this part, means any business entity located inside the United States that is organized for profit (even if it is owned by a nonprofit entity), pays U.S. taxes, and/or uses American products, material, and/or labor, etc. A "concern" may be an individual, a partnership, a corporation, a joint venture, an association, or a cooperative. (See also "affiliates," above.)

"Determination of eligibility," as used in this part, means the written determination issued by the SBA or the Department of Labor certifying that the holder is a manufacturer or regular dealer under the Walsh-Healey Public Contracts Act (see 22.608-2(f)(2)).

"Economically disadvantaged individuals" means socially disadvantaged individuals whose ability to compete in the free enterprise system is impaired due to diminished opportunities to obtain capital and credit as compared to others in the same line of business who are not socially disadvantaged. Individuals who certify that they are members of named groups (Black Americans, Hispanic Americans, Native Americans, Asian-Pacific Americans, Asian-Indian Americans) are to be considered socially and economically disadvantaged.

"Industry," as used in this part, means all concerns primarily engaged in similar lines of activity, as listed and described in the Standard Industrial Classification (SIC) Manual.

"Native Americans" means American Indians, Eskimos, Aleuts, and native Hawaiians.

"Not dominant in the field of operation," as used in this part, means not exercising a controlling or major influence in an industry. A controlling or major influence can be derived from factors such as business volume, number of employees, financial resources, competitiveness, ownership or control of materials, processes, patents, license agreements, facilities, sales territory, and nature of business activity.

"Set-aside for small business" means the reserving of an acquisition exclusively for participation by small business concerns. A set-aside may be open to all small businesses or, except for the Department of Defense, restricted to small businesses located in labor surplus areas. A set-aside of a single acquisition or a class of acquisitions may be total or partial.

"Small business concern" means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria and size standards in 13 CFR 121 (see 19.102).

"Small business restricted advertising" means a special method of negotiated acquisition using formal advertising procedures not restricting solicitation, bidding, and contract award to small business concerns.

"Small business subcontractor" means any concern that—

(a) Qualifies as a small business under 13 CFR 121 when bidding on a subcontract that will exceed $10,000;

(b) Employs, with its affiliates, not more than 500 people, when bidding on a subcontract for $10,000 or less; or

(c) Is a nonmanufacturer and employs not more than 500 people.

"Small disadvantaged business concern" means a small business concern that (a) is at least 51 percent owned by one or more individuals who are both socially and economically disadvantaged, or a publicly owned business having at least 51 percent of its stock owned by one or more socially and economically disadvantaged individuals and (b) has its management and daily business controlled by one or more such individuals.

"Socially disadvantaged individuals" means individuals who have been subjected to racial or ethnic prejudice or cultural bias because of their identity as a member of a group without regard to their qualities as individuals.

19.102 Size standards.

(a) The SBA establishes small business size standards on an industry-by-industry basis. These size standards are also set forth in SBA's regulations at 13 CFR 121.

(b) Small business size standards are applied by—

(1) Classifying the product or service being acquired in the industry whose definition, as found in the Standard Industrial Classification (SIC) Manual, best describes the principal nature of the product or service being acquired;

(2) Identifying the size standard SBA established for that industry; and

(3) Specifying the size standard in the solicitation, so that offerors can appropriately represent themselves as small or large.

(c) For size standard purposes, a product or service shall be classified in only one industry, whose definition best describes the principal nature of the product or service being acquired even though for other purposes it could be classified in more than one.

(d) When acquiring a product or service that could be classified in two or more industries with different size standards, contracting officers shall apply the size standard for the industry accounting for the greatest percentage of the contract price.

(e) If a solicitation calls for more than one item and allows offers to be submitted on any or all of the items, an offeror must meet the size standard for each item it offers to furnish. If a solicitation calling for more than one item requires offers on all or none of the items, an offeror may qualify as a small business by meeting the size standard for the item accounting for the greatest percentage of the total contract price.

(f) If there is no size standard in this subpart or in 13 CFR 121 for the industry, field of operation, or activity in which a concern is engaged, the concern is a small business if, including its affiliates, it is independently owned and operated, is not dominant in the field of operation in which it is bidding on Government contracts, and for manufacturing concerns has no more than 500 employees and for concerns offering services its average annual receipts for its preceding 3 fiscal years do not exceed $2 million.

(g) In subsections 19.102-1 through 19.102-7, "number of employees" means the average number of people employed (full or part time, temporary, or other) by a concern and its affiliates during the last complete pay period in the 3rd month of each calendar quarter based on the preceding 4 calendar quarters. If a concern has been in business less than 12 months, "number of employees" means the average employment during each of the pay periods it has been in business. If a concern acquired an affiliate during the applicable accounting period, include the affiliate's employees during the entire accounting period, regardless of when the affiliation took place. If a concern lost an affiliate during the applicable accounting period, do not include the former affiliates' employees. If the concern in question has been determined to be eligible for SBA financial assistance under Section 7(b)(5) of the Small Business Act, see 13 CFR 121.3-2(t) for further guidance on determining its number of employees for size standard purposes.

19.102-1 Size standards for construction and special trades.

(a) *Construction.* A concern is small if its average annual receipts for its preceding 3 fiscal years did not exceed $12 million. However, if 75 percent or more of the work (in terms of dollar value) called for by the contract is classified in one of the industries, subindustries, or classes of products listed in this paragraph, the concern is small if its average annual receipts for its preceding 3 fiscal years did not exceed the size standard for that industry, subindustry, or class of products. (See Division C, "Contract Construction," of the SIC Manual.)

Classification Code	Industry, Subindustry, or Class of Products	Size Standard*
	MAJOR GROUP 17—CONSTRUCTION—SPECIAL TRADE CONTRACTORS	
1711 -	Plumbing, heating (except electric), and air-conditioning	$5
1721 -	Painting, paperhanging, and decorating	5
1731 -	Electrical work	5
1741 -	Masonry, stone setting, and other stonework	5
1742 -	Plastering, drywall, acoustical and insulation work	5
1743 -	Terrazzo, tile, marble, and mosaic work	5
1751 -	Carpentering and flooring	5
1752 -	Floor laying and other floorwork, not elsewhere classified	5
1761 -	Roofing and sheet metal work	5
1771 -	Concrete work	5
1781 -	Water well drilling	5
1791 -	Structural steel erection	5
1793 -	Glass and glazing work	5
1794 -	Excavating and foundation work	5
1795 -	Wrecking and demolition work	5
1796 -	Installation or erection of building equipment, not elsewhere classified	5
1799 -	Special trade contractors, not elsewhere classified	5

* (Average Annual Receipts)(Millions)

(b) *Dredging.* A concern is small if (1) its average annual receipts for its preceding 3 fiscal years did not exceed $9.5 million, and (2) at least 40 percent of the yardage in the contract's plans and specifications is dredged with equipment owned by the concern or obtained from another small business dredging concern.

19.102-2 Size standards for manufacturing industries.

(a) *Canned and preserved food.* A concern is small if it has no more than 500 employees exclusive of agricultural labor, which is defined in section (k) of the Federal Unemployment Tax Act, 26 U.S.C. 3306(k).

(b) *Pneumatic tires for passenger cars, motorcycles, trucks, buses, and off-the-road vehicles within Classification Codes 30111 and 30112. (This paragraph does not apply to acquisitions for repairing and/or retreading pneumatic aircraft tires, which are considered to be within Code 3011).* A concern is small if, during the preceding calendar year—

(1) More than 50 percent of the worldwide manufacturing value of its pneumatic tires was attributable to tires manufactured in the United States;

(2) Its worldwide manufacturing value was less than 5 percent of the value of all pneumatic tires manufactured in the United States; and

(3) Its principal products manufactured, produced, or sold worldwide constitute less than 10 percent of the total value of such products manufactured, produced, or sold in the United States.

(c) *Passenger cars (classified in SIC Code 37171).* A concern is small if, during the preceding calendar year—

(1) More than 50 percent of the worldwide manufacturing value of its passenger cars was attributable to passenger cars manufactured in the United States;

(2) Its worldwide manufacturing value was less than 5 percent of the value of all passenger cars manufactured in the United States; and

(3) Its principal products manufactured, produced, or sold worldwide constitute less than 10 percent of the value of such products manufactured, produced, or sold in the United States.

(d) *Rebuilding on a factory basis or equivalent (not limited to original equipment manufacturers).* For contracts to restore machinery or equipment to a condition that is as serviceable and as like new as possible (exclusive of ordinary or minor repairs and preservation operations), a concern is small if it meets the small business size standard applicable to the original manufacturer.

(e) *Fluid milk (classified in SIC Code 2026).* A concern is small if it has no more than 500 employees, exclusive of employees who deliver milk to homes.

(f) *Other manufacturing industries.* A concern is small if its number of employees (see 19.102(g)) does not exceed the size standard for its industry, as follows:

Classification Code	Industry	Size Standard (Number of Employees)
	MAJOR GROUP 20—FOOD AND KINDRED PRODUCTS	
2032	Canned specialties	1000
2043	Cereal breakfast foods	1000
2046	Wet corn milling	750
2052	Cookies and crackers	750
2062	Cane sugar refining	750
2063	Beet sugar	750
2076	Vegetable oil mills, except corn, cottonseed and soybean	1000
2079	Shortening, table oils, margarine and other edible fats and oils, not elsewhere classified	750
2085	Distilled, rectified, and blended liquors	750
	MAJOR GROUP 21—TOBACCO MANUFACTURERS	
2111	Cigarettes	1000
	MAJOR GROUP 22—TEXTILE MILL PRODUCTS	
2211	Broad-woven fabric mills, cotton	1000
2261	Finishers of broad-woven fabrics of cotton	1000
2271	Woven carpets and rugs	750
2295	Fabrics, not rubberized	1000
2296	Tire cord and fabric	1000
	MAJOR GROUP 26—PAPER AND ALLIED PRODUCTS	
2611	Pulpmills	750
2621	Papermills, except building papermills	750
2631	Paperboard mills	750
2646	Pressed and molded pulp goods	750
2654	Sanitary food containers	750
2661	Building paper and building board mills	750
	MAJOR GROUP 28—CHEMICALS AND ALLIED PRODUCTS	
2812	Alkalies and chlorine	1000
2813	Industrial gases	1000
2816	Inorganic pigments	1000
2819	Industrial inorganic chemicals, not elsewhere classified	1000
2821	Plastics materials, synthetic resins, and nonvulcanizable elastomers	750
2822	Synthetic rubber (vulcanizable elastomers)	1000
2823	Cellulosic manmade fibers	1000
2824	Synthetic organic fibers, except cellulosic	1000
2833	Medicinal chemicals and botanical products	750
2834	Pharmaceutical preparations	750

37111	Passenger cars (knocked down or assembled).	See 19.102-2(c) and 13 CFR 121.3-8(b)(5)

Classification Code	Industry	Size Standard (Number of Employees)
3721	Aircraft (includes maintenance, but excludes contracts solely for preventive maintenance (see 14 CFR 1.1))	1500 (See Footnote 1.)
3724	Aircraft engines and engine parts (includes guided missile engines and engine parts) (includes maintenance, but excludes contracts solely for preventive maintenance (see 14 CFR 1.1))	1000 (See Footnote 1)
3728	Aircraft parts and auxiliary equipment, not elsewhere classified	1000
3731	Shipbuilding and repairing	1000
3743	Railroad equipment	1000
3761	Guided missiles and space vehicles	1000
3764	Guided missiles and space vehicle propulsion units and propulsion unit parts (includes guided missile engines and engine parts)	1000
3769	Guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified	1000
3795	Tanks and tank components	1000

Footnote 1. "Maintenance," for the purpose of the small business size standard (13 CFR 121.3-16, Schedule B, Major Group 37), means inspection, overhaul, repair, preservation, and the replacement of parts, but excludes preventive maintenance. "Preventive maintenance" means simple or minor preservation operations and the replacement of small standard parts not involving complex assembly operations.

Classification Code	Industry	Size Standard (Number of Employees)
	MAJOR GROUP 39—MISCELLANEOUS MANUFACTURING INDUSTRIES	
3996	Linoleum, asphalted-felt-base, and other hard surface floor coverings, not elsewhere classified	750

19.102-3 Size standards for nonmanufacturing industries (except construction or services).

A concern offering to furnish a product it did not manufacture is small if—

(a) It has no more than 500 employees; and

(b) It is offering to furnish products of a small business manufacturer or producer that were manufactured or produced in the United States, except that under a small business-small purchase set-aside a concern may furnish any domestically produced or manufactured product.

19.102-4 Size standards for research, development, and/or testing industries.

(a) A concern is small if it is bidding on a contract for research and/or development that requires delivery of a manufactured product and (1) it qualifies as a small business manufacturer within the meaning of 19.102-2 (see 13 CFR 121.3-8(b)) or (2) it qualifies as a small business nonmanufacturer within the meaning of 19.102-3 (see 13 CFR 121.3-8(c)).

(b) A concern bidding on a contract for testing or for research and/or development that does not require delivery of a manufactured product is small if it has no more than 500 employees.

19.102-5 Size standards for service industries.

(a) A concern offering to perform services (including, but not limited to, services listed and described in Division I, Services, of the SIC Manual) not listed in this subpart is small if its average annual receipts for its preceding 3 fiscal years did not exceed $2 million.

(b) For the following services, a concern is small if its average annual receipts for its preceding 3 fiscal years did not exceed the size standard for the specific service.

Service	Size Standard*
Engineering (other than marine engineering)	$7.5
Motion picture production or services	$8
Janitorial and custodial	$4.5
Base maintenance	$7.5
Marine cargo handling	$7.5
Naval architectural and marine engineering	$9
Food services	$5.5
Laundry (including linen supply, diaper services, and industrial laundering)	$4
Cleaning and dyeing (including rug cleaning)	$1.5
Flight training	$7
Computer programming	$4
Motorcar rental and leasing or truck rental	$7
Data processing	$4
Computer maintenance	$7
Helicopters or fixed-wing aircraft	$3.5
Refuse collection, with or without disposal	$3.5
Protective services	$4.5
Tire recapping (See Footnote 2.)	$4

* (Average Annual Receipts)(Millions)

Footnote 2. This standard applies only to contracts requiring tire retreading and repair (SIC 7534), and not to contracts for the repairing and/or retreading of pneumatic aircraft tires, which is considered for size standard purposes to be manufacturing within the meaning of SIC Code 3011. (See 13 CFR 121.3-8(e)(12).)

19.102-6 Size standards for transportation industries.

A concern offering to provide passenger or freight transportation not classified elsewhere in this subpart is small if—

(a) It has no more than 500 employees;

(b) It is bidding on air transportation and has no more than 1,500 employees;

(c) It is offering to provide local and/or long distance trucking, warehousing and/or packing and crating, and/or freight-forwarding, and its average annual receipts do not exceed $7 million; or

(d) It is primarily engaged in providing offshore marine services and its annual receipts do not exceed $10 million. Offshore marine services, which are furnished to concerns engaged in offshore oil and/or natural gas exploration, include drilling production or marine research, and services such as passenger and freight transportation, rig towing, anchor handling, and related logistical services, to and from the work site or at sea (13 CFR 121.3-2(u)).

19.102-7 Size standards for refined petroleum products industries.

(a) A concern offering to furnish a refined petroleum product other than paving mixtures and blocks (SIC Code 2951), asphalt felts and coatings (SIC Code 2952), lubricating oils and grease (SIC Code 2992), or products of petroleum and coal not elsewhere classified (SIC Code 2999), is small if—

(1) (i) It has no more than 1,500 employees;

(ii) Its capacity is not more than 50,000 barrels per day of crude oil or bona fide feedstock from facilities that are owned, leased, under an exchange agreement (except on a refined-product-for-refined-product basis), or under a throughput or other processing agreement with the same effect as though the facilities were leased; and

(iii) At least 90 percent of the product delivered will be refined by the offeror, from either crude oil or bona fide feedstocks, using its own employees and facilities that it owns or obtains under a bona fide lease; or

(2) It has no more than 500 employees and is furnishing a product that has been refined by a concern that qualifies as a small business under (a)(1) above.

(b) A petroleum refining concern that meets the requirements of subdivisions (a)(1)(i) and (ii) above may furnish the product of a refinery that is not small if—

(1) It obtains the product under a bona fide exchange agreement with the refiner of the product to be delivered to the Government. The agreement must (i) be in effect on the date of the offer, (ii) require exchanges in a stated ratio on a refined-petroleum-product-for-a-refined-petroleum-product basis, (iii) preclude a monetary settlement, and (iv) require that the products exchanged for the products to be delivered to the Government meet the requirements of subdivision (a)(1)(iii) above;

(2) The exchange of products is completed within 90 days after the Government contract delivery date; and

(3) Delivery to the Government is made in the same Petroleum Administration for Defense (PAD) District (under Schedule C of 13 CFR 121) as that in which the small refinery is located.

SUBPART 19.2—POLICIES

19.201 General policy.

(a) It is the policy of the Government to place a fair proportion of its acquisitions with small business concerns and small disadvantaged business concerns. Such concerns shall also have the maximum practicable opportunity to participate as subcontractors in the contracts awarded by any executive agency, consistent with efficient contract performance. The Small Business Administration (SBA) counsels and assists small business concerns and assists contracting personnel to ensure that a fair proportion of contracts for supplies and services is placed with small business.

(b) Heads of contracting activities are responsible for effectively implementing the Small Business and Small Disadvantaged Business Utilization Programs within their activities, including achieving program goals. They are to ensure that contracting and technical personnel maintain knowledge of small and small disadvantaged business program requirements and take all reasonable action to increase small business participation in their activities' contracting processes.

(c) The Small Business Act requires each agency with contracting authority to establish an Office of Small and Disadvantaged Business Utilization (see section (k) of the Small Business Act and 13 CFR 125.4(g)(7)). Management of the office shall be the responsibility of an officer or employee of the agency who shall, in carrying out the purposes of the Act—

(1) Be known as the Director of Small and Disadvantaged Business Utilization;

(2) Be appointed by the agency head;

(3) Be responsible to and report directly to the agency head or the deputy to the agency head;

(4) Be responsible for the agency carrying out the functions and duties in sections 8 and 15 of the Small Business Act;

(5) Have supervisory authority over agency personnel to the extent that their functions and duties relate to sections 8 and 15 of the Small Business Act;

(6) Assign a small business technical advisor to each contracting activity within the agency to which the SBA has assigned a representative (see 19.402)—

(i) Who shall be a full-time employee of the contracting activity, well qualified, technically trained, and familiar with the supplies or services contracted for by the activity; and

(ii) Whose principal duty is to assist the SBA's assigned representative in performing functions and duties relating to sections 8 and 15 of the Small Business Act.

(7) Cooperate and consult on a regular basis with the SBA in carrying out the agency's functions and duties in sections 8 and 15 of the Small Business Act.

(d) Small and Disadvantaged Business Utilization Specialists shall be appointed and act in accord with agency regulations.

19.202 Specific policies.

In order to further the policy in 19.201(a), contracting officers shall comply with the specific policies listed below.

19.202-1 Encouraging small business participation in acquisitions.

Small business concerns shall be afforded an equitable opportunity to compete for all contracts that they can perform to the extent consistent with the Government's interest. When applicable, the contracting officer shall take the following actions:

(a) Divide proposed acquisitions of supplies and services (except construction) into reasonably small lots (not less than economic production runs) to permit offers on quantities less than the total requirement.

(b) Plan acquisitions such that, if practicable, more than one small business concern may perform the work, if the work exceeds the amount for which a surety may be guaranteed by SBA against loss under 15 U.S.C. 694b.

(c) Ensure that delivery schedules are established on a realistic basis that will encourage small business participation to the extent consistent with the actual requirements of the Government.

(d) Encourage prime contractors to subcontract with small business concerns (see Subpart 19.7).

19.202-2 Locating small business sources.

The contracting officer shall, to the extent practicable, encourage maximum participation by small business concerns, small disadvantaged business concerns, and women-owned small business concerns in acquisitions by taking the following actions:

(a) Include on mailing lists all established and potential small business sources, including those located in labor surplus areas, if the concerns have submitted acceptable applications or appear from other representations to be qualified small business concerns.

(b) Before issuing solicitations, make every reasonable effort to find additional small business concerns, unless lists are already excessively long and only some of the concerns on the list will be solicited. This effort should include contacting the agency SBA procurement center representative, or if there is none, the SBA.

(c) Publicize solicitations and contract awards in the "Commerce Business Daily" (see Subparts 5.2 and 5.3).

19.202-3 Equal low bids.

In the event of equal low bids, awards shall be made first to small business concerns which are also labor surplus area concerns, and second to small business concerns which are not also labor surplus area concerns.

19.202-4 Solicitation.

The contracting officer shall encourage maximum response to solicitations by small business, small disadvantaged business concerns, and women-owned small business concerns by taking the following actions:

(a) Allow the maximum amount of time practicable for the submission of offers.

(b) Furnish specifications, plans, and drawings with solicitations, or furnish information as to where they may be obtained or examined.

(c) Send solicitations to (1) all small business concerns on the solicitation mailing list, or (2) a pro rata number of small business concerns when less than a complete list is used.

(d) Provide to any small business concern, upon its request, a copy of bid sets and specifications with respect to any contract to be let, the name and telephone number of an agency contact to answer questions related to such prospective contract and adequate citations to each major Federal law or agency rule with which such business concern must comply in performing such contract other than laws or agency rules with which the small business must comply when doing business with other than the Government.

19.202-5 Data collection and reporting requirements.

Agencies shall measure the extent of small business participation in their acquisition programs by taking the following actions:

(a) Require each prospective contractor to represent whether it is a small business, small disadvantaged business concern, or women-owned small business (see the provisions at 52.219-1, Small Business Concern Representation, 52.219-2, Small Disadvantaged Business Concern Representation, and 52.219-3, Women-Owned Small Business Representation).

(b) Accurately measure the extent of participation by small business concerns, small disadvantaged business concerns, and women-owned small

businesses in Government acquisitions in terms of the total value of contracts placed with small business concerns during each fiscal year, and report data to the SBA at the end of each fiscal year (see Subpart 4.6).

SUBPART 19.3—DETERMINATION OF STATUS AS A SMALL BUSINESS CONCERN

19.301 Representation by the offeror.

(a) To be eligible for award as a small business, an offeror must represent in good faith that it is a small business at the time of written self certification. An offeror may represent that it is a small business concern in connection with a specific solicitation if it meets the definition of a small business concern applicable to the solicitation and has not been determined by the Small Business Administration (SBA) to be other than a small business.

(b) The contracting officer shall accept an offeror's representation in a specific bid or proposal that it is a small business unless (1) another offeror or interested party challenges the concern's small business representation or (2) the contracting officer has a reason to question the representation. Challenges of and questions concerning a specific representation shall be referred to the SBA in accordance with 19.302.

(c) An offeror's representation that it is a small business is not binding on the SBA. If an offeror's small business status is challenged, the SBA will evaluate the status of the concern and make a determination, which will be binding on the contracting officer, as to whether the offeror is a small business. A concern cannot become eligible for a specific award by taking action to meet the definition of a small business concern after the SBA has determined that it is not a small business.

19.302 Protesting a small business representation.

(a) Any offeror or other interested party may protest the small business representation of an offeror in a specific offer.

(b) Any time after offers are opened, the contracting officer may question the small business representation of any offeror in a specific offer by filing a contracting officer's protest (see paragraph (c) below).

(c) (1) Any contracting officer who receives a protest, whether timely or not, or who, as the contracting officer, wishes to protest the small business representation of an offeror, shall promptly forward the protest to the SBA Regional Office for the geographical area where the principal office of the concern in question is located.

(2) The protest, or confirmation if the protest was initiated orally, shall be in writing and shall contain the basis for the protest with specific, detailed evidence to support the allegation that the offeror is not small. The SBA will dismiss any protest that does not contain specific grounds for the protest.

(d) In order to affect a specific solicitation, a protest must be timely. SBA's regulations on timeliness are contained in 13 CFR 121.3-5.

(1) To be timely, a protest by any concern or other interested party must be received by the contracting officer (see (i) and (ii) below) by the close of business of the 5th business day after bid opening (in formally advertised acquisitions) or receipt of the special notification from the contracting officer that identifies the apparently successful offeror (in negotiated acquisitions) (see 15.1001(b)(2)).

(i) A protest may be made orally if it is confirmed in writing either within the 5-day period or by letter postmarked no later than 1 day after the oral protest.

(ii) A protest may be made in writing if it is delivered by hand, telegram, or letter postmarked within the 5-day period.

(2) A contracting officer's protest is always considered timely whether filed before or after award.

(e) Upon receiving a protest, the SBA will—

(1) Notify the contracting officer and the protestant of the date it was received, and that the size of the concern being challenged is under consideration by the SBA; and

(2) Furnish to the concern whose representation is being protested a copy of the protest and a blank SBA Form 355, Application for Small Business Determination, by certified mail, return receipt requested.

(f) Within 3 business days after receiving a copy of the protest and the form, the challenged offeror must file with the SBA a completed SBA Form 355 and a statement answering the allegations in the protest, and furnish evidence to support its position. If the offeror does not submit the required material within the 3 business days or another period of time granted by the SBA, the SBA may assume that the disclosure would be contrary to the offeror's interests.

(g) (1) Within 10 business days after receiving a protest, the challenged offeror's response, and other pertinent information, the SBA will determine the size status of the challenged concern and notify the contracting officer, the protestant, and the challenged offeror of its decision by certified mail, return receipt requested.

(2) The SBA Regional Administrator will determine the small business status of the questioned bidder or offeror and notify the contracting officer and the bidder or offeror of the determination. Award may be made on the basis of that determination. This determination is final unless it is appealed in accordance with paragraph (i) below, and the contracting officer is notified of the appeal before award. If an award was made before the time the contracting officer received notice of the appeal, the contract shall be presumed to be valid.

(h) (1) After receiving a protest involving an offeror being considered for award, the contracting officer shall not award the contract until (i) the SBA has made a size determination or (ii) 10 business days have expired since SBA's receipt of a protest, whichever occurs first; however, award shall not be withheld when the contracting officer determines in writing that an award must be made to protect the public interest.

(2) After the 10-day period has expired, the contracting officer may, when practical, continue to withhold award until the SBA's determination is received, unless further delay would be disadvantageous to the Government.

(3) Whenever an award is made before the receipt of SBA's size determination, the contracting officer shall notify SBA that the award has been made.

(4) If a protest is received that challenges the small business status of an offeror not being considered for award, the contracting officer is not required to suspend contracting action. The contracting officer shall forward the protest to the SBA (see 19.302(c)(1)) with a notation that the concern is not being considered for award, and shall notify the protestant of this action.

(i) An appeal from an SBA size determination may be filed by (1) any concern or other interested party whose protest of the small business representation of another concern has been denied by an SBA Regional Administrator, (2) any concern or other interested party that has been adversely affected by a Regional Administrator's decision, or (3) the SBA Associate Administrator for the SBA program involved. SBA's regulations on appeals are contained in 13 CFR 121.3-6.

(j) A protest which is not timely, even though received before award, shall be forwarded to the Small Business Administration regional office (see 19.302(c)(1) above), with a notation on it that the protest is not timely. The

protestant shall be notified that the protest cannot be considered on the instant acquisition but has been referred to SBA for its consideration in any future actions. A protest received by a contracting officer after award of a contract shall be forwarded to the Small Business Administration regional office with a notation that award has been made. The protestant shall be notified that the award has been made and that the protest has been forwarded to SBA for its consideration in future actions.

19.303 Determining product or service classifications.

(a) The contracting officer shall determine the appropriate product or service classification and related small business size standard and include them in solicitations, except when small purchase procedures are used.

(b) If different products or services are required in the same solicitation, the solicitation shall identify the appropriate small business size standard for each product or service.

(c) The contracting officer's determination is final unless appealed as provided below.

(1) If the solicitation period is longer than 30 days, the appeal must be filed not less than 10 business days before the bid opening or proposal submission date. If the solicitation period is shorter than 30 days, the appeal must be filed not less than 5 business days before the bid opening or proposal submission date.

(2) The appeal shall be in writing and shall be addressed to the Chairperson, Size Appeals Board, Small Business Administration, Washington, D.C. 20416. No particular form is prescribed for the appeal. However, the appellant shall submit an original and one legible copy, and to avoid time-consuming correspondence, it should include—

(i) The character and date of the determination being appealed;

(ii) The number and date of the solicitation, and the name and address of the contracting officer;

(iii) The reasons why the contracting officer's determination is alleged to be erroneous;

(iv) Documentary evidence to support the allegation; and

(v) The action sought by the appellant.

(3) The SBA Size Appeals Board will promptly notify the contracting officer of its receipt of a valid appeal and, if possible, will inform the contracting officer of its ruling on the appeal before the end of the solicitation period. The SBA decision, if received before the date offers are due, shall be considered final and the solicitation shall be amended to (i) reflect the decision and (ii) change the date offers are due, if appropriate. SBA rulings received after the due date shall not apply to the pending acquisition, but shall apply to future acquisitions of the product or service.

19.304 Solicitation provisions.

(a) The contracting officer shall insert the provision at 52.219-1, Small Business Concern Representation, in solicitations when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

(b) The contracting officer shall insert the provision at 52.219-2, Small Disadvantaged Business Concern Representation, in solicitations (other than those for small purchases), when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

(c) The contracting officer shall insert the provision at 52.219-3, Women-Owned Small Business Representation, in solicitations (other than those for small purchases), when the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia.

SUBPART 19.4—COOPERATION WITH THE SMALL BUSINESS ADMINISTRATION

19.401 General.

(a) The Small Business Act is the authority under which the Small Business Administration (SBA) and agencies consult and cooperate with each other in formulating policies to ensure that small business and small disadvantaged business interests will be recognized and protected.

(b) The Director of Small and Disadvantaged Business Utilization serves as the agency focal point for interfacing with SBA.

19.402 Small Business Administration procurement center representatives.

(a) The SBA may assign one or more procurement center representatives to any contracting activity or contract administration office to carry out SBA policies and programs. Assigned SBA procurement center representatives are required to comply with agency directives governing the conduct of contracting personnel and the release of contract information. The SBA must obtain for its procurement center representatives security clearances required by the agency.

(b) Upon their request and subject to applicable acquisition and security regulations, contracting officers shall give SBA procurement center representatives access to all reasonably obtainable contract information that is directly pertinent to their official duties.

(c) The duties assigned by SBA to its procurement center representatives include the following:

(1) Reviewing proposed acquisitions to recommend (i) the setting aside of selected acquisitions not unilaterally set aside by the contracting officer, (ii) new qualified small and small disadvantaged business sources, and (iii) breakout of components for competitive acquisitions.

(2) Recommending concerns for inclusion on solicitation mailing lists or on a list of concerns to be solicited in a specific acquisition.

(3) Appealing to the chief of the contracting office any contracting officer's determination not to solicit a concern recommended by the SBA for a particular acquisition, when not doing so results in no small business being solicited.

(4) Conducting periodic reviews of the contracting activity to which assigned to ascertain whether it is complying with the small business policies in this regulation.

(5) Sponsoring and participating in conferences and training designed to increase small business participation in the contracting activities of the office.

SUBPART 19.5—SET-ASIDES FOR SMALL BUSINESS

19.501 General.

(a) The purpose of small business set-asides is to award certain acquisitions exclusively to small business concerns.

(b) The determination to make a set-aside may be unilateral or joint. A unilateral determination is one which is made by the contracting officer. A joint determination is one which is recommended by the Small Business Administration (SBA) procurement center representative and concurred in by the contracting officer.

(c) The contracting officer shall review acquisitions to determine if they can be set aside for small business, giving consideration to the recommendations of agency personnel having cognizance of the agency's small and disadvantaged business utilization program and documenting why a set-aside is inappropriate when the acquisition is not set aside. If the acquisition is set aside based on this review, it is a unilateral set-aside by the contracting officer. Agencies may

establish threshold levels for this review depending upon their needs. In automated contracting systems, all proposed acquisitions which are not small business-small purchase set-asides will be considered for small business set-asides in accordance with 19.502-2(a). If necessary, the screening for set-asides will be accomplished before entering such requirements into the system.

(d) At the request of an SBA procurement center representative, the contracting officer shall make available for review at the contracting office (to the extent of the SBA representative's security clearance) all proposed acquisitions in excess of $10,000 that have not been unilaterally set aside for small business.

(e) To the extent practicable, unilateral determinations initiated by a contracting officer shall be used as the basis for small business set-asides rather than joint determinations by an SBA procurement center representative and a contracting officer.

(f) (1) Consistent with the requirements of Pub. L. 95-507, a special category of set-asides, identified as small business-small purchase set-asides, has been established for acquisitions of supplies or services that have an anticipated dollar value of $10,000 or less and are subject to small purchase procedures (see 13.105 and 19.508).

(2) A small nonmanufacturer responding to a small business-small purchase set-aside may furnish any domestically produced or manufactured product.

(g) Once a product or service has been acquired successfully by a contracting office on the basis of a small business set-aside, all future requirements of that office for that particular product or service not subject to simplified small purchase procedures shall, if required by agency regulations, be acquired on the basis of a repetitive set-aside. This procedure will be followed unless the contracting officer determines that there is not a reasonable expectation that (1) offers will be obtained from at least two responsible small business concerns offering the products of different small business concerns and (2) at least two responsible reasonable prices. Withdrawal of a repetitive set-aside will be in accordance with 19.506.

(h) If a proposed small business set-aside is estimated to exceed $1,000,000 in value and a bond is required, the contracting officer shall, to the extent practicable, divide requirements so as to allow more than one concern to perform the work.

(i) All solicitations involving set-asides must specify the applicable small business size standard and product classification (see 19.303).

19.502 Setting aside acquisitions.

19.502-1 Requirements for setting aside acquisitions.

Using the order of precedence in 19.504, the contracting officer shall set aside an individual acquisition or class of acquisitions when it is determined to be in the interest of (a) maintaining or mobilizing the Nation's full productive capacity, (b) war or national defense programs, or (c) assuring that a fair proportion of Government contracts is placed with small business concerns, and when the circumstances described in 19.502-2 or 19.502-3(a) exist.

19.502-2 Total set-asides.

The entire amount of an individual acquisition or class of acquisitions, including contracts for architect-engineer services, research, development, test and evaluation, maintenance repair, and construction except small business-small purchase set-asides, shall be set aside for exclusive small business participation if the contracting officer determines that there is a reasonable expectation that (a) offers will be obtained from at least two responsible small business concerns offering the products of different small business concerns and (b) awards will be made at reasonable prices. Total set-asides shall not be made unless such a reasonable expectation exists (but see 19.502-3 as to partial set asides). Although past acquisition history of the item or similar items is always important, it is not the only factor to be considered in determining whether a reasonable expectation exists. In making R&D small business set-asides, there must also be a reasonable expectation of obtaining from small business the best scientific and technological sources consistent with the demands of the proposed acquisition for the best mix of cost, performances, and schedules.

19.502-3 Partial set-asides.

(a) The contracting officer shall set aside a portion of an acquisition, except for construction, for exclusive small business participation when—

(1) A total set-aside is not appropriate (see 19.502-2);

(2) The requirement is severable into two or more economic production runs or reasonable lots;

(3) One or more small business concerns are expected to have the technical competence and productive capacity to satisfy the set-aside portion of the requirement at a reasonable price;

(4) The acquisition is not subject to small purchase procedures; and

(5) A partial set-aside shall not be made if there is a reasonable expectation that only two concerns (one large and one small) with capability will respond with offers unless authorized by the head of a contracting activity on a case-by-case basis. Similarly, a class of acquisitions, not including construction, may be partially set aside. Under certain specified conditions, partial set-asides may be used in conjunction with multiyear contracting procedures.

(b) When the contracting officer determines that a portion of an acquisition is to be set aside, the requirement shall be divided into a set-aside portion and a non-set-aside portion, each of which shall (1) be an economic production run or reasonable lot and (2) have terms and a delivery schedule comparable to the other. When practicable, the set-aside portion should make maximum use of small business capacity.

(c) (1) The contracting officer shall award the non-set-aside portion using normal contracting procedures.

(2) (i) After all awards have been made on the non-set-aside portion, the contracting officer shall negotiate with eligible concerns on the set-aside portion, as provided in the solicitation, and make award. Negotiations shall be conducted only with those offerors who have submitted responsive offers on the non-set-aside portion. Negotations shall be conducted with small business concerns in the order of priority as indicated in the solicitation (but see (ii) below). The set-aside portion shall be awarded as provided in the solicitation. An offeror entitled to receive the award for quantities of an item under the non-set-aside portion and who accepts the award of additional quantities under the set-aside protion shall not be requested to accept a lower price because of the increased quantities of the award, nor shall negotiation be conducted with a view to obtaining such a lower price based solely upon receipt of award of both portions of the acquisition. This does not prevent acceptance by the contracting officer of voluntary reductions in the price from the low eligible offeror before award, acceptance of voluntary refunds, or the change of prices after award by negotiation of a contract modification.

(ii) If equal low offers are received on the non-set-aside portion from concerns eligible for the set-aside portion, the concern that is awarded the non-set-aside part of the acquisition shall have

first priority with respect to negotiations for the set-aside.

19.502-4 Methods of conducting set-asides.

(a) Total and partial small business set-asides may be conducted by using conventional negotiation or a special method of contracting known as "Small Business Restricted Advertising." Whenever possible, the latter method shall be used. The use of either method constitutes a negotiated acquisition, and requires that the appropriate statutory authority for negotiation be cited in solicitation and contract documents (see Subpart 15.2).

(b) Small Business Restricted Advertising shall be conducted following the procedures for formal advertising prescribed in Part 14, except that solicitation, bidding, and award(s) shall be restricted to small business concerns. Offers received from concerns that do not qualify as small business concerns shall be considered nonresponsive and shall be rejected.

19.502-5 Insufficient causes for not setting aside an acquisition.

None of the following is, in itself, sufficient cause for not setting aside an acquisition:

(a) A large percentage of previous contracts for the required item(s) has been placed with small business concerns.

(b) The item is on an established planning list under the Industrial Readiness Planning Program. However, a total set-aside shall not be made when the list contains a large business Planned Emergency Producer of the item(s) who has conveyed a desire to supply some or all of the required items.

(c) The item is on a Qualified Products List. However, a total set-aside shall not be made if the list contains the products of large business unless none of the large businesses desires to participate in the acquisition.

(d) A period of less than 30 days is available for receipt of offers.

(e) The contract is classified.

(f) Small business concerns are already receiving a fair proportion of the agency's contracts for supplies and services.

(g) A class set-aside of the item or service has been made by another contracting activity.

(h) A "brand name or equal" product description will be used in the solicitation.

19.503 Setting aside a class of acquisitions.

(a) A class of acquisitions of selected products or services, or a portion of the acquisitions, may be set aside for exclusive participation by small business concerns if individual acquisitions in the class will meet the criteria in 19.502-1, 19.502-2, or 19.502-3(a). The determination to make a class set-aside shall not depend on the existence of a current acquisition if future acquisitions can be clearly foreseen.

(b) The determination to set aside a class of acquisitions may be either unilateral or joint.

(c) Each class set-aside determination shall be in writing and must—

(1) Specifically identify the product(s) and service(s) it covers;

(2) Provide that the set-aside does not apply to any acquisition accomplished using small purchase procedures;

(3) Provide that the set-aside applies only to the (named) contracting office(s) making the determination; and

(4) Provide that the set-aside does not apply to any individual acquisition if the requirement is not severable into two or more economic production runs or reasonable lots, in the case of a partial class set-aside.

(d) The contracting officer shall review each individual acquisition arising under a class set-aside to identify any changes in the magnitude of requirements, specifications, delivery requirements, or competitive market conditions that have occurred since the initial approval of the class set-aside. If there are any changes of such a material nature as to result in probable payment of an unreasonable price by the Government or in a change in the capability of small business concerns to satisfy the requirements, the contracting officer may withdraw or modify (see 19.506(a)) the unilateral or joint set-aside by giving written notice to the SBA procurement center representative (if one is assigned), stating the reasons.

19.504 Set-aside program order of precedence.

(a) In carrying out small business set-aside programs, contracting officers of agencies other than the Department of Defense (DOD) shall award contracts and encourage placement of subcontracts in the following order of precedence (see 15 U.S.C. 644(e) and (f) and Pub. L. 96-302):

(1) A total set-aside for small business concerns located in labor surplus areas.

(2) A total set-aside for small business concerns.

(3) A partial set-aside for small business concerns located in labor surplus areas.

(4) A partial set-aside for small business concerns.

(5) Total labor surplus area set-aside for concerns that are not small businesses.

(b) Set-aside priorities of DOD are different from the above and are set forth in the DOD FAR Supplement.

19.505 Rejecting set-aside recommendations.

(a) If the contracting officer rejects a recommendation of the SBA procurement center representative, written notice shall be furnished to the SBA procurement center representative within 5 business days.

(b) The SBA procurement center representative may appeal the contracting officer's rejection to the head of the contracting activity (or designee) within 2 business days after receiving the notice. The head of the contracting activity (or designee) shall render a decision in writing, and provide it to the SBA representative within 7 business days. Pending issuing the decision to the SBA procurement center representative, the contracting officer shall suspend action on the acquisition.

(c) If the head of the contracting activity agrees that the contracting officer's rejection was appropriate, the SBA procurement center representative may—

(1) Within 1 business day, request the contracting officer to suspend action on the acquisition until the SBA Administrator appeals to the agency head (see paragraph (f) below); and

(2) The SBA shall be allowed 15 business days after making such a written request, within which the Administrator of SBA (i) may appeal to the Secretary of the Department concerned, and (ii) shall notify the contracting officer whether the further appeal has, in fact, been taken. If notification is not received by the contracting officer within the 15-day period, it shall be deemed that the SBA request to suspend contracting action has been withdrawn and that an appeal to the Secretary was not taken.

(d) When the contracting officer has been notified within the 15-day period that the SBA has appealed to the agency head, the head of the contracting activity (or designee) shall forward justification for its decision to the agency head. The contracting officer shall suspend contract action until notification is received that the SBA appeal has been settled.

(e) The agency head shall reply to the SBA within 30 business days after receiving the appeal. The decision of the agency head shall be final.

(f) A request to suspend action on an acquisition need not be honored if the

contracting officer determines that proceeding to contract award and performance is in the public interest. The contracting officer shall include in the contract file a statement of the facts justifying the determination, and shall promptly notify the SBA representative of the determination and provide a copy of the justification.

19.506 Withdrawing or modifying set-asides.

(a) If, before award of a contract involving a set-aside for small business, the contracting officer considers that award to a small business concern would be detrimental to the public interest (e.g., because of unreasonable price), the contracting officer may withdraw the set-aside determination whether it was unilateral or joint. The contracting officer shall initiate a withdrawal of an individual set-aside by giving written notice to the agency small and disadvantaged business utilization specialist and the SBA procurement center representative, if one is assigned, stating the reasons. In a similar manner, the contracting officer may modify a unilateral or joint class set-aside to withdraw one or more individual acquisitions.

(b) If the agency small and disadvantaged business utilization representative does not agree to a withdrawal or modification, the case shall be promptly referred to the SBA representative (if one is assigned) for review. If an SBA representative is not assigned, disagreements between the agency small and disadvantaged business utilization representative and the contracting officer shall be resolved using agency procedures. However, the procedures are not applicable to automatic dissolutions of set-asides (see 19.507) or dissolution of small business-small purchase set-asides (see 13.105).

(c) The contracting officer shall prepare a written statement supporting any withdrawal or modification of a set-aside and include it in the contract file.

19.507 Automatic dissolution of a set-aside.

(a) If a set-aside acquisition or portion of an acquisition is not awarded, the unilateral or joint determination to set the acquisition aside is automatically dissolved for the unawarded portion of the set-aside. The required supplies and/or services for which no award was made may be acquired by formal advertising or negotiation, as appropriate.

(b) Before issuing a solicitation for the items called for in a small business set-aside that was dissolved, the contracting officer shall ensure that the delivery schedule is realistic in the light of all relevant factors, including the capabilities of small business concerns.

19.508 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the provision at 52.219-4, Notice of Small Business-Small Purchase Set-Aside, in each written solicitation of quotations or offers to provide supplies and/or services when (1) the contract is to be performed inside the United States, its territories or possessions, Puerto Rico, the Trust Territory of the Pacific Islands, or the District of Columbia, (2) the contract amount is expected to be $10,000 or less, and (3) the acquisition is subject to small purchase procedures; unless purchase on an unrestricted basis is appropriate, as specified in 13.105(d).

(b) (This paragraph (b) does not apply to DOD.) The contracting officer shall insert the clause at 52.219-5, Notice of Total Small Business-Labor Surplus Area Set-Aside, in solicitations and contracts involving total small business-labor surplus area set-asides (see 19.504(a)(1)).

(c) The contracting officer shall insert the clause at 52.219-6, Notice of Total Small Business Set-Aside, in solicitations and contracts involving total small business set-asides (see 19.504(a)(2)).

(d) The contracting officer shall insert the clause at 52.219-7, Notice of Partial Small Business Set-Aside, in solicitations and contracts involving partial small business set-asides (see 19.504(a)(4)).

SUBPART 19.6—CERTIFICATES OF COMPETENCY AND DETERMINATIONS OF ELIGIBILITY

19.601 General.

(a) For the definition of "certificate of competency (COC)," see 19.101. The COC program empowers the Small Business Administration (SBA) to certify to Government contracting officers as to all elements of responsibility of any small business concern to receive and perform a specific Government contract. The COC program does not extend to questions concerning regulatory requirements imposed and enforced by other Federal agencies.

(b) For the definition of "determination of eligibility," see 19.101. Under this program, SBA may certify to Government contracting officers that an otherwise qualified small business concern is an eligible Government contractor under the Walsh-Healey Public Contracts Act. Requirements of the Walsh-Healey Public Contracts Act are covered in Subpart 22.6. For information regarding the contracting officer's responsibility to determine that a contractor is eligible or ineligible, see 9.104-3(a).

19.602 Procedures.

19.602-1 Referral.

(a) Upon determining and documenting that a responsive small business lacks certain elements of responsibility (including, but not limited to, competency, capability, capacity, credit, integrity, perseverance, and tenacity), the contracting officer shall—

(1) Withhold contract award (see 19.602-3); and

(2) Refer the matter to the cognizant SBA Regional Office in accordance with agency procedures, except that referral is not necessary if small purchase procedures are being used or if the small business concern—

(i) Is determined to be unqualified and ineligible because it does not meet the standard in 9.104-1(g); *provided*, that the determination is approved by the chief of the contracting office; or

(ii) Is suspended or debarred under Executive Order 11246 or Subpart 9.4.

(b) If a partial set-aside is involved, the contracting officer shall refer to the SBA the entire quantity to which the concern may be entitled, if responsible.

(c) The referral shall consist of—

(1) A notice that a small business concern has been determined to be nonresponsible, specifying the elements of responsibility the contracting officer found lacking; and

(2) A copy of the solicitation, drawings and specifications, preaward survey findings, pertinent technical and financial information, abstract of bids (if available), and any other pertinent information that supports the contracting officer's determination.

(d) For any single acquisition, the contracting officer shall make only one referral at a time regarding a determination of nonresponsibility.

19.602-2 Issuing or denying a certificate of competency (COC).

(a) Within 15 business days (or a longer period agreed to by the SBA and the contracting agency) after receiving a notice that a small business concern lacks certain elements of responsibility, the SBA will take the following actions:

(1) Inform the small business concern of the contracting officer's determination and offer it an opportunity to apply to the SBA for a certificate of competency (COC). (A concern wishing to apply for a COC should notify the SBA Regional Office for the geographical area where it is located.)

(2) Upon timely receipt of the application and required documentation, send an SBA team to visit the concern to investigate it only for the specific elements of responsibility that the agency notice specified as lacking, and to make recommendations to the SBA Regional Administrator.

(3) If the Regional Administrator plans to issue or recommend issuance of a COC, provide advance notice of the proposed action to the contracting officer together with a brief statement of the reasons for it. If the contracting officer disagrees with the proposal, resolve the disagreement as provided in 19.602-3.

(b) The SBA Regional Administrator will—

(1) Notify the concern and the contracting officer that the COC is denied;

(2) If the contract is for $500,000 or less, issue the COC; or

(3) If the contract is for more than $500,000 forward a recommendation to the SBA Central Office that a COC be issued.

(c) Upon receipt of a recommendation from the Regional Administrator to issue a COC, the SBA Central Office may—

(1) Notify the concern and the contracting officer that the COC is denied; or

(2) Send the COC to the contracting officer and advise the concern, through the Regional Office, of the action.

19.602-3 Resolving differences between the agency and the Small Business Administration.

(a) When disagreements arise about a concern's ability to perform, the contracting officer and the SBA shall make every effort to reach a resolution before the SBA takes final action on a COC. This shall be done through the complete exchange of information and in accordance with agency procedures. If agreement cannot be reached between the contracting officer and the SBA Regional Office, the contracting officer shall request that the Regional Office suspend action and refer the matter to the SBA Central Office for review.

(b) The SBA Central Office, upon receiving a referral, shall—

(1) Inform the contracting officer that it does not concur with its Regional Office; or

(2) Inform the contracting officer that it concurs with its Regional Office.

In either case, the initial notification shall be by telephone to the contracting officer, followed by written confirmation.

(c) If the agency intends to file a formal appeal, it shall notify the SBA Central Office within 10 business days (or a period acceptable to both) after receiving the Central Office's written position on the matter. The agency shall file any formal appeal within 10 business days after SBA is informed that an appeal will be taken, or within a period acceptable to both.

(d) The SBA Central Office shall make the final determination.

19.602-4 Awarding the contract.

(a) If new information causes the contracting officer to determine that the concern referred to the SBA is actually responsible to perform the contract, and award has not already been made under paragraph (c) below, the contracting officer shall reverse the determination of nonresponsibility, notify the SBA of this action, withdraw the referral, and proceed to award the contract.

(b) The contracting officer shall award the contract to the concern in question if the SBA issues a COC after receiving the referral. An SBA-certified concern shall not be required to meet any other requirements of responsibility. SBA COC's are conclusive with respect to all elements of responsibility of prospective small business contractors.

(c) The contracting officer shall proceed with the acquisition and award the contract to another appropriately selected and responsible offeror if the SBA has not issued a COC within 15 business days (or a longer period of time agreed to with the SBA) after receiving the referral.

SUBPART 19.7—SUBCONTRACTING WITH SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

19.701 Definition.

"Subcontract," as used in this subpart, means any agreement (other than one involving an employer-employee relationship) entered into by a Government prime contractor or subcontractor calling for supplies and/or services required for contract performance, contract modification, or subcontract.

19.702 Statutory requirements.

Any contractor receiving a contract for more than $10,000 shall agree in the contract that small business concerns and small disadvantaged business concerns shall have the maximum practicable opportunity to participate in contract performance consistent with its efficient performance.

(a) Except as stated in paragraph (b) below, the Small Business Act imposes the following requirements regarding subcontracting with small businesses and small business subcontracting plans.

(1) In negotiated acquisitions, each solicitation of offers to perform a contract or contract modification, which individually is expected to exceed $500,000 ($1,000,000 for construction) and that has subcontracting possibilities shall require the apparently successful offeror to submit an acceptable subcontracting plan. If the apparently successful offeror fails to negotiate a subcontracting plan acceptable to the contracting officer within the time limit prescribed by the contracting officer, the offeror will be ineligible for award.

(2) In formally advertised acquisitions, each invitation for bids to perform a contract or contract modification, which individually is expected to exceed $500,000 ($1,000,000 for construction) and that has subcontracting possibilities, shall require the bidder selected for award to submit a subcontracting plan. If the selected bidder fails to submit a plan within the time limit prescribed by the contracting officer, the bidder will be ineligible for award.

(b) Subcontracting plans (see subparagraphs (a)(1) and (2) above) are not required—

(1) From small business concerns;

(2) For personal services contracts;

(3) For contracts or contract modifications that will be performed entirely outside of any State, territory, or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico; or

(4) For modifications to contracts that do not contain the clause at 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns (or equivalent prior DAR, FPR, or NASA clauses) e.g., contracts awarded before Pub. L. 95-507 and which are within the scope of the contract.

(c) Any contractor or subcontractor failing to comply in good faith with the requirements of the subcontracting plan is in material breach of its contract.

19.703 Eligibility requirements for participating in the program.

(a) To be eligible as a subcontractor under the program, a concern must represent itself as a small business concern or small disadvantaged business concern.

(1) To represent itself as a small business concern, a concern must meet the definition in 19.101.

(2) To represent itself as a small disadvantaged business concern, a concern must meet the definition in 19.101. Individuals who certify that they are members of named groups (Black Americans, Hispanic Americans, Native

Americans, Asian-Pacific Americans, Asian-Indian Americans) may represent themselves as socially and economically disadvantaged. Individuals who are not members of named groups may also represent themselves, and participate in the program, as socially and economically disadvantaged if they are qualified by the SBA under the procedures in 13 CFR 124.1-1(c)(3)(iii). The Office of Minority Small Business and Capital Ownership Development in the SBA has the final authority to determine the eligibility of a concern to be designated as a small disadvantaged business concern, and will answer inquiries from contractors and others regarding eligibility.

(b) A contractor acting in good faith may rely on the written representation of its subcontractor regarding the subcontractor's status as either a small business concern or a small disadvantaged business concern.

19.704 Subcontracting plan requirements.

(a) Each subcontracting plan required under 19.702(a)(2) and (3) must include—

(1) Separate percentage goals for using small business concerns and small disadvantaged business concerns as subcontractors;

(2) The name of an individual employed by the offeror who will administer the offeror's subcontracting program, and a description of the duties of the individual;

(3) A description of the efforts the offeror will make to ensure that small business concerns and small disadvantaged business concerns will have an equitable opportunity to compete for subcontracts;

(4) Assurances that the offeror will include the clause at 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns (see 19.708(b)), in all subcontracts that offer further subcontracting opportunities, and that the offeror will require all subcontractors (except small business concerns) that receive subcontracts in excess of $500,000 ($1,000,000 for construction) to adopt a plan similar to the plan required by the clause at 52.219-9, Small Business and Small Disadvantaged Business Subcontracting Plan (see 19.708(c));

(5) Assurances that the offeror will (i) cooperate in any studies or surveys as may be required, (ii) submit periodic reports in order to allow the Government to determine the extent of compliance by the offeror with the subcontracting plan, and (iii) submit Standard Form (SF) 294, Subcontracting Report for Individual Contracts, and SF 295, Summary Subcontract Report, in accordance with the instructions on the forms.

(6) A recitation of the types of records the offeror will maintain to demonstrate procedures adopted to comply with the requirements and goals in the plan, including establishing source lists; and a description of the offeror's efforts to locate small and small disadvantaged business concerns and to award subcontracts to them.

(b) Contractors may establish, on a plant or division-wide basis, a master subcontracting plan which contains all the elements required by the clause at 52.219-9, Small Business and Small Disadvantaged Business Subcontracting Plan, except goals. Master plans shall be effective for a 1-year period after approval by the contracting officer; however, a master plan when incorporated in an individual plan shall apply to that contract throughout the life of the contract.

19.705 Responsibilities of the contracting officer under the subcontracting assistance program.

19.705-1 General support of the program.

The contracting officer may encourage the development of increased subcontracting opportunities in negotiated acquisition by providing monetary incentives such as payments based on actual subcontracting achievement or award fee contracting (see the clause at 52.219-10, Incentive Subcontracting Program for Small and Small Disadvantaged Business Concerns, and 19.708(c)). When using any contractual incentive provision based upon rewarding the contractor monetarily for exceeding goals in the subcontracting plan, the contracting officer must ensure that (a) the goals are realistic and (b) any rewards for exceeding the goals are commensurate with the efforts the contractor would not have otherwise expended. Incentive provisions should normally be negotiated after reaching final agreement with the contractor on the subcontracting plan.

19.705-2 Determining the need for a subcontracting plan.

The contracting officer shall take the following actions to determine whether a proposed contractual action requires a subcontracting plan:

(a) Determine whether the proposed contractual action will meet the dollar threshold in 19.702(a)(2) or (3). If the action includes options or similar provisions, include their value in determining whether the threshold is met.

(b) Determine whether subcontracting possibilities exist by considering relevant factors such as—

(1) Whether firms engaged in the business of furnishing the types of items to be acquired customarily contract for performance of part of the work or maintain sufficient in-house capability to perform the work;

(2) Whether there are likely to be product prequalification requirements; and

(3) A potential contractor's long-standing contractual relationship with its suppliers.

(c) If it is determined that there are no subcontracting possibilities, the determination must be approved at a level above the contracting officer and placed in the contract file.

(d) Due to their unique circumstances, major system acquisition programs, as well as other complex or sensitive acquisitions involving formal source selection procedures, may necessitate negotiating subcontracting plans with all firms in a competitive range in order to afford the maximum practicable opportunity for small business and small disadvantaged business concerns to participate and preserve the integrity of the competitive process. When the simultaneous negotiation of such plans is necessary, the solicitation (1) may require offerors to include proposed subcontracting plans in their initial proposals and (2) may indicate that subcontracting plans will be negotiated concurrently with cost, technical, and management proposals.

19.705-3 Preparing the solicitation.

The contracting officer shall provide the Small Business Administration's (SBA's) resident procurement center representative, if any, a reasonable period of time to review any solicitation requiring submission of a subcontracting plan and to submit advisory findings before the solicitation is issued.

19.705-4 Reviewing the subcontracting plan.

The contracting officer shall review the subcontracting plan for adequacy, ensuring that the required information, goals, and assurances are included (see 19.704).

(a) No detailed standards apply to every subcontracting plan. Instead, the contracting officer must consider each plan in terms of the circumstances of the particular acquisition, including—

(1) Previous involvement of small business concerns as prime contractors or subcontractors in similar acquisitions;

(2) Proven methods of involving small business concerns as subcontractors in similar acquisitions; and

(3) The relative success of methods the contractor intends to use to meet the goals and requirements of the plan, as evidenced by records maintained by contractors.

(b) If, under a formally advertised solicitation, a bidder submits a plan that does not cover each of the six required elements (see 19.704), the contracting officer shall advise the bidder of the deficiency and request submission of a revised plan by a specific date. If the bidder does not submit a plan which incorporates the six required elements within the time allotted, the bidder shall be ineligible for award. If the plan, although responsive, evidences the bidder's intention not to comply with its obligations under the clause at 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns, the contracting officer may find the bidder nonresponsible.

(c) In negotiated acquisitions, the contracting officer shall determine whether the plan is acceptable based on the negotiation of each of the six elements of the plan (see 19.704). Subcontracting goals should be set at a level that the parties reasonably expect can result from the offeror expending good faith efforts to use small and small disadvantaged subcontractors to the maximum practicable extent. No goal should be negotiated upward if it is apparent that a higher goal will significantly increase the Government's cost or seriously impede the attainment of acquisition objectives. An incentive subcontracting clause (see 52.219-10, Incentive Subcontracting Program for Small and Small Disadvantaged Business Concerns), may be used when additional and unique contractor effort could significantly increase subcontract awards to small or small disadvantaged businesses.

(d) In determining the acceptability of a proposed subcontracting plan, the contracting officer should take the following actions:

(1) Evaluate the offeror's past performance in awarding subcontracts for the same or similar products or services to small and small disadvantaged business concerns. If information is not available on a specific type of product or service, evaluate the offeror's overall past performance.

(2) Evaluate the offeror's make-or-buy policy or program to ensure that it does not conflict with the offeror's proposed subcontracting plan and is in the Government's interest. If the contract involves products or services that are particularly specialized or not generally available in the commercial market, consider the offeror's current capacity to perform the work and the possibility of reduced subcontracting opportunities.

(3) Evaluate subcontracting potential, considering the offeror's make-or-buy policies or programs, the nature of the products or services to be subcontracted, and the known availability of small and small disadvantaged business concerns in the geographical area where the work will be performed.

(4) Advise the offeror of available sources of information on potential small and small disadvantaged business subcontractors, as well as any specific concerns known to be potential subcontractors. If the offeror's proposed goals are questionable, the contracting officer shall emphasize that the information should be used to develop realistic and acceptable goals.

(5) Obtain advice and recommendations from the SBA procurement center representative (if any) and the agency small and disadvantaged business utilization representative.

19.705-5 Awards involving subcontracting plans.

(a) In making an award that requires a subcontracting plan, the contracting officer shall be responsible for the following:

(1) Consider the contractor's compliance with the subcontracting plans submitted on previous contracts as a factor in determining contractor responsibility.

(2) Assure that a subcontracting plan was submitted when required.

(3) Notify the SBA resident procurement center representative of the opportunity to review the proposed contract (including the plan and supporting documentation). The notice shall be issued in sufficient time to provide the representative a reasonable time to review the material and submit advisory recommendations to the contracting officer. Failure of the representative to respond in a reasonable period of time shall not delay contract award.

(4) Determine any fee that may be payable if an incentive is used in conjunction with the subcontracting plan.

(5) Ensure that an acceptable plan is incorporated into and made a material part of the contract.

(b) Letter contracts and similar undefinitized instruments, which would otherwise meet the requirements of 19.703(a)(2) and (3), shall contain at least a preliminary basic plan addressing the requirements of 19.705 and in such cases require the negotiation of the final plan within 90 days after award or before definitization, whichever occurs first.

19.705-6 Postaward responsibilities of the contracting officer.

After a contract or contract modification containing a subcontracting plan is awarded, the contracting officer is responsible for the following:

(a) Notifying the SBA of the award by sending a copy of the award document to the Assistant Regional Administrator for Office of Procurement and Technical Assistance in the SBA region where the contract will be performed.

(b) Forwarding a copy of each plan and any associated approvals to the SBA's Central Office, 1441 L Street N.W., Washington, DC 20416, Attention: AA/PTA, if any company-wide plans were received from offerors of commercial products.

(c) Giving to the assigned SBA resident procurement center representative (if any) a copy of—

(1) Any subcontracting plan submitted in response to a formally advertised solicitation; and

(2) The final negotiated subcontracting plan that was incorporated into a negotiated contract or contract modification.

(d) Notifying the SBA resident procurement center representative of the opportunity to review subcontracting plans in connection with contract modifications.

19.706 Responsibilities of the cognizant administrative contracting officer.

(a) The administrative contracting officer is responsible for assisting in evaluating subcontracting plans, and for monitoring, evaluating, and documenting contractor performance under the clause prescribed in 19.708(b) and any subcontracting plan included in the contract. The contract administration office shall provide the necessary information and advice to support the contracting officer, as appropriate, by furnishing—

(1) Documentation on the contractor's performance and compliance with subcontracting plans under previous contracts;

(2) Information on the extent to which the contractor is meeting the plan's goals for subcontracting with eligible small and small disadvantaged business concerns;

(3) Information on whether the contractor's efforts to ensure the participation of small and small

disadvantaged business concerns are in accordance with its subcontracting plan;

(4) Information on whether the contractor is requiring its subcontractors to adopt similar subcontracting plans; and

(5) Immediate notice if, during performance, the contractor is failing to meet its commitments under the clause prescribed in 19.708(b) or the subcontracting plan.

(b) If the contractor does not comply in good faith with the subcontracting plan, the administrative contracting officer shall, upon contract completion, make appropriate recommendations that contracting officers may use for future contracts.

19.707 The Small Business Administration's role in carrying out the program.

(a) Under the program, the SBA may—

(1) Assist both Government agencies and contractors in carrying out their responsibilities with regard to subcontracting plans;

(2) Review (within 5 working days) any solicitation that meets the dollar threshold in 19.702(a)(2) or (3) before the solicitation is issued;

(3) Review (within 5 working days) before execution any negotiated contractual document requiring a subcontracting plan, including the plan itself, and submit recommendations to the contracting officer, which shall be advisory in nature; and

(4) Evaluate compliance with subcontracting plans, either on a contract-by-contract basis, or, in the case of contractors having multiple contracts, on an aggregate basis.

(b) The SBA is not authorized to (1) prescribe the extent to which any contractor or subcontractor shall subcontract, (2) specify concerns to which subcontracts will be awarded, or (3) exercise any authority regarding the administration of individual prime contracts or subcontracts.

19.708 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the clause at 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns, in solicitations and contracts when the contract amount is expected to be over $10,000 unless—

(1) A personal services contract is contemplated (see 37.104); or

(2) The contract, together with all its subcontracts, is to be performed entirely outside of any State, territory, or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

(b) The contracting officer shall, when contracting by negotiation, insert the clause at 52.219-9, Small Business and Small Disadvantaged Business Subcontracting Plan, in solicitations and contracts that (1) offer subcontracting possibilities, (2) are expected to exceed $500,000 ($1,000,000 for construction of any public facility), and (3) are required to include the clause at 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns, unless the acquisition has been set aside for small business or is to be accomplished under the 8(a) program. When contracting by formal advertising rather than by negotiation, the contracting officer shall use the clause with its Alternate I.

(c) (1) The contracting officer may, when contracting by negotiation, insert in solicitations and contracts a clause substantially the same as the clause at 52.219-10, Incentive Subcontracting Program for Small and Small Disadvantaged Business Concerns, when a subcontracting plan is required (see 19.702(a)(2)), and inclusion of a monetary incentive is, in the judgment of the contracting officer, necessary to increase subcontracting opportunities for small and disadvantaged business concerns, and is commensurate with the efficient and economical performance of the contract; unless the conditions in (c)(3) below are applicable. The contracting officer may vary the terms of the clause as specified in (c)(2) below.

(2) Various approaches may be used in the development of small and small disadvantaged business concerns' subcontracting incentives. They can take many forms, from a fully quantified schedule of payments based on actual subcontract achievement to an award fee approach employing subjective evaluation criteria (see (c)(3) below). The incentive should not reward the contractor for results other than those that are attributable to the contractor's efforts under the incentive subcontracting program.

(3) As specified in (c)(2) above, the contracting officer may include small and small disadvantaged business subcontracting as one of the factors to be considered in determining the award-fee in a cost-plus-award-fee contract; in such cases, however, the contracting officer shall not use the clause at 52.219-10, Incentive Subcontracting Program for Small and Small Disadvantaged Business Concerns.

SUBPART 19.8—CONTRACTING WITH THE SMALL BUSINESS ADMINISTRATION (THE 8(a) PROGRAM)

19.801 General.

(a) Section 8(a) of the Small Business Act established a program that authorizes the Small Business Administration (SBA) to enter into all types of contracts with other agencies and let subcontracts for performing those contracts to firms eligible for program participation. SBA's subcontractors are referred to as "8(a) contractors."

(b) (1) When, acting under the authority of the program, the SBA certifies to an agency that the SBA is competent and responsible to perform a specific contract, the contracting officer is authorized, in the contracting officer's discretion, to award the contract to the SBA based upon mutually agreeable terms and conditions.

(2) If the SBA and the contracting officer fail to agree, the matter may be submitted for determination to the agency head by SBA's Administrator. Notification of a proposed referral to the agency head by SBA must be received by the contracting officer within 5 business days after the SBA is formally notified of the contracting officer's decision. SBA must provide the request for determination to the agency head within 15 business days. If timely appeal or timely notice of appeal is not made, the SBA's offer to contract will be deemed to have been revoked.

19.802 Selecting concerns for the 8(a) program.

Selecting concerns for the 8(a) program is the responsibility of SBA and is based on the criteria established in 13 CFR 124.1-1(c).

19.803 Selecting acquisitions for the 8(a) program.

(a) Through their cooperative efforts, the SBA and an agency match the agency's requirements with the capabilities of 8(a) concerns to establish a basis for the agency to contract with the SBA under the program.

(1) The SBA identifies acquisition opportunities needed to support the program based on the knowledge and capability of firms in the program.

(2) Agencies may also review other proposed acquisitions for the purpose of identifying requirements which may be awarded to the SBA. The agency will promptly notify SBA of any acquisitions which are available for award to SBA under Section 8(a).

(b) If the SBA and an agency determine that an agency has, or will

have, acquisitions suitable for the 8(a) concern, the SBA will request the agency's commitment to support the concern's business plan. The request will contain at least the following information:

(1) Identification of the concern and its owners.

(2) Background information on the concern, including any and all information pertaining to the concern's technical capability and capacity to perform.

(3) The firm's present production capacity and related facilities, and how any additional needed facilities will be provided in order to ensure that the firm will be fully capable of satisfying the agency's requirements.

(4) The extent to which contracting assistance is needed in the present and the future, described in terms that will enable the agency to relate the concern's plans to present and future agency requirements.

(5) If construction is involved, the request shall also include the following:

(i) The concern's capabilities in and qualifications for accomplishing various categories of maintenance, repair, alteration, and construction work in specific categories such as mechanical, electrical, heating and air-conditioning, demolition, building, painting, paving, earth work, waterfront work, and general construction work.

(ii) The concern's capacity in each construction category in terms of estimated dollar value (e.g., electrical, up to $100,000).

(iii) Any other information concerning the capabilities of the proposed contractor that pertains to the requested commitment.

(c) The SBA will initiate an individual request to contract for each proposed follow-on 8(a) contract. This will permit the agency involved to verify the availability of requirements, funding, and other pertinent factors before actual negotiation of follow-on contracts. The SBA must certify its competence and responsibility to perform each individual contract.

19.804 Agency evaluation of the Small Business Administration's request for a commitment.

(a) In determining the extent to which it can honor a request for a commitment to support a business plan, the agency should evaluate—

(1) Its current and future plans to acquire the specific items or work that the SBA's contractor is seeking to provide, identified in terms of—

(i) Quantities required or the number of construction projects planned; and

(ii) Performance or delivery requirements, including required monthly production rates, when applicable;

(2) Its current and future plans to acquire items or work similar in nature and complexity to those specified in the business plan, if there are no known requirements for the specified items or work;

(3) Problems encountered in previous acquisitions of the items or work from the SBA's contractor and/or other contractors;

(4) The impact of any delay in delivery;

(5) Whether the items or work have previously been acquired using small business set-asides; and

(6) Any other pertinent information about the SBA's contractor, the items, or the work. This includes any information concerning the firm's capabilities. When necessary, the contracting agency shall make an independent review of the factors in 19.803(b)(4) and other aspects of the firm's capabilities which would ensure the satisfactory performance of the requirement being considered for commitment to the 8(a) program.

(b) After completing its evaluation, the agency shall notify the SBA of the extent of its plans to place 8(a) contracts with the SBA for specific quantities of items or work. The notification must identify the time frames within which prime contract and subcontract actions must be completed in order for the agency to meet its responsibilities. If any planned contracts are for construction or service work, the notification must also contain the following information applicable to each prospective contract:

(1) The scope of the proposed work.

(2) A detailed Government cost estimate.

(3) Plans and specifications.

(4) Any applicable wage determinations issued by the Department of Labor under the Davis-Bacon Act or the Service Contract Act.

(5) Required performance schedules.

(6) Any other pertinent and reasonably available data.

19.805 Pricing the 8(a) contract.

The contracting officer shall price the 8(a) contract in accordance with Subpart 15.8. If required by Subpart 15.8, the SBA shall obtain certified cost or pricing data from its contractor.

19.806 Estimating the current fair market price and business development expense.

19.806-1 General.

(a) The contracting officer shall estimate the current fair market price of the work to be performed by the SBA's contractor. This estimate shall be based on reasonable costs under normal competitive conditions and not on lowest possible costs.

(b) Any excess of the negotiated price of the contract over the estimated current fair market price is eligible for funding as business development expense. Business development expense may include costs of start-up, training, and similar investment or learning costs in excess of those normally incurred by established concerns engaged in the same business.

(c) If a contract is awarded that includes business development expense, that expense will be funded by the SBA.

19.806-2 Estimating the current fair market price.

(a) In estimating the current fair market price for an acquisition other than those covered in (b) below, the contracting officer shall use price or cost analysis and consider commercial prices for similar products and services, available in-house cost estimates, data (including cost or pricing data) submitted by the SBA or its contractor, and data obtained from any other Government agency.

(b) In estimating a current fair market price for a repeat purchase, the contracting officer shall consider recent award prices for the same items or work if there is comparability in quantities, conditions, terms, and performance times. The estimated price should be adjusted to reflect differences in specifications, plans, transportation costs, packaging and packing costs, and other circumstances. Price indices may be used as guides to determine the changes in labor or material costs. Comparison of commercial prices for similar items may also be used.

19.806-3 Pricing review by the Small Business Administration.

(a) The negotiated contract price, the estimated current fair market price, and the amount of any business development expense are subject to the review and concurrence of the SBA.

(b) If, during its review, the SBA requests audit assistance in determining the reasonableness of the negotiated contract price, the contracting activity shall furnish it to the extent it is available. If requested by the SBA, the contracting officer shall also make available the data used to estimate the current fair market price.

(c) When the SBA and the contracting officer agree on the estimated current fair market price of a proposed 8(a) contract, the SBA will assume responsibility for reviewing, validating,

approving, and funding any business development expense.

19.806-4 Funding business development expense.

(a) Upon completing its review, the SBA will either (1) fund the business development expense by reimbursing the contracting activity before contract award, or (2) decide not to fund the expense, in which case the contracting officer shall not award a contract unless the negotiated contract price is reduced by the amount of the expense.

(b) SBA's regulations on business development expenses are contained in 13 CFR 124.1-4.

19.807 Contract negotiation.

(a) The SBA is responsible for initiating negotiations with the agency within the time established by the agency. If the SBA does not initiate negotiations within the agreed-to time and the agency cannot allow additional time, the agency may, after notifying the SBA, proceed with the acquisition from other sources.

(b) The SBA's contractor should participate, whenever practicable, in negotiating the contract terms. When mutually agreeable, the SBA may authorize the contracting activity to negotiate directly with the SBA's contractor. Whether or not direct negotiations take place, the SBA is responsible for approving the resulting contract before award and determining whether its contractor shall be required to provide a performance bond.

19.808 Preaward considerations.

The contracting officer should request a preaward survey of the SBA's contractor whenever considered useful. A cognizant contract administration office may be requested to assist in reviewing a specific element of responsibility.

19.809 Preparing the contracts.

19.809-1 General.

(a) The contract to be awarded by the agency to the SBA shall be prepared in accordance with agency procedures and in the same detail as would be required in a contract with a business concern. The contracting officer shall use the Standard Form 26 as the award form. The appropriate negotiation authority shall be cited on the face of the document.

(b) The agency shall prepare the contract that the SBA will award to its contractor in accordance with agency procedures, as if the agency were awarding the contract directly to the SBA's contractor, except for the following:

(1) The award form shall cite "15 U.S.C. 637(a)" as the negotiation authority.

(2) Appropriate clauses shall be included, as necessary, to reflect that the contract is between the SBA and its contractor.

(3) The following items shall be inserted by the SBA when it makes the award:

(i) The SBA contract number.

(ii) The effective date.

(iii) The typed name of the SBA's contracting officer.

(iv) The signature of the SBA's contracting officer.

(v) The date signed.

(4) At the same time the items in subparagraph (3) above are completed, the SBA will obtain the signature of its contractor on the contract.

(5) If the contract is for construction work, it shall include requirements of the Miller Act with respect to performance and payment bonds (see Part 28).

19.809-2 Contract clauses.

(a) The contracting officer shall insert the clause at 52.219-11, Special 8(a) Contract Conditions, in contracts between the SBA and the agency when the acquisition is accomplished using the procedures of this subpart.

(b) The contracting officer shall insert the clause at 52.219-12, Special 8(a) Subcontract Conditions, in contracts between the SBA and its 8(a) contractor.

19.810 Contract administration.

(a) The contracting officer shall assign contract administration functions, as required, based on the location of the SBA's contractor (see DOD Directory of Contract Administration Services Components (DOD 4105.59-H).)

(b) The contract for the SBA and its contractor shall be provided to the SBA along with the one between the SBA and the agency, and shall be distributed by the SBA. Both contracts shall be executed and distributed in accordance with Part 4.

(c) To the extent consistent with the awarding agency's capability and resources, SBA contractors furnishing requirements shall be afforded production and technical assistance, including, when appropriate, identification of causes of deficiencies in their products and suggested corrective action to make such products acceptable.

SUBPART 19.9—CONTRACTING OPPORTUNITIES FOR WOMEN-OWNED SMALL BUSINESSES

19.901 Policy.

In response to the need to aid and stimulate women's business enterprise, Executive Order 12138, May 18, 1979 directs agencies to take appropriate action to facilitate, preserve, and strengthen women's business enterprise and to ensure full participation by women in the free enterprise system. Appropriate action includes the award of subcontracts under Federal prime contracts.

19.902 Contract clause.

To encourage the use of women-owned small business in subcontracting, the clauses at 52.219-13, Utilization of Women-Owned Small Businesses, shall be included in all contracts expected to exceed $10,000 except (i) contracts which, including all subcontracts thereunder, are to be performed entirely outside the United States, its possessions, Puerto Rico, and the Trust Territory of the Pacific Islands, and (ii) contracts for services which are personal in nature.

PART 20—LABOR SURPLUS AREA CONCERNS

Sec.

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

20.000 Scope of part.

This part prescribes policies and procedures for aiding labor surplus areas in the United States, its territories and possessions, the Commonwealth of

Puerto Rico, and the Trust Territory of the Pacific Islands. It implements Defense Manpower Policy No. 4B, May 23, 1980 (44 CFR 331), U.S. Department of Labor Regulations (20 CFR 654, Subpart A), and the Small Business Act (15 U.S.C. 644(d), (e), and (f)).

SUBPART 20.1—GENERAL

20.101 Definitions.

"Labor surplus area" means a geographical area identified by the Department of Labor in accordance with 20 CFR 654, Subpart A, as an area of concentrated unemployment or underemployment or an area of labor surplus.

"Labor surplus area concern" means a concern that together with its first-tier subcontractors will perform substantially in labor surplus areas. Performance is substantially in labor surplus areas if the costs incurred under the contract on account of manufacturing, production, or performance of appropriate services in labor surplus areas exceed 50 percent of the contract price.

20.102 General policy.

Subject to the order of precedence in 19.504, the Government shall award appropriate contracts to eligible labor surplus area (LSA) concerns and encourage contractors to place subcontracts with LSA concerns.

20.103 Contract clause.

(a) In contracts not set aside for LSA concerns, the offeror's status as an LSA concern may affect entitlement to award in the case of tie offers or evaluation in accordance with the Buy American Act. Therefore, offerors shall be afforded an opportunity to establish status as LSA concerns.

(b) The contracting officer shall insert the clause at 52.220-1, Preference for Labor Surplus Area Concerns, in solicitations and contracts that (1) exceed the appropriate small purchase limitation in Part 13 and (2) are not set aside for LSA concerns.

20.104 Specific policies.

When a proposed contract is estimated to exceed the appropriate small purchase limitation in Part 13, the agency shall—

(a) Set aside the acquisition as provided in Subpart 20.2;

(b) Promptly disseminate available publications and information that identify LSA's to acquisition personnel;

(c) Consider Department of Labor classifications of LSA's as conclusive for each contracting action;

(d) Give LSA concerns, which are on appropriate solicitation lists, the opportunity to submit offers on any acquisition for which they are qualified, unless the acquisition is otherwise restricted (e.g., total small business set-aside);

(e) Solicit all prospective LSA concerns, when less than a complete solicitation list is used;

(f) Give preference to LSA concerns as prescribed in 14.407-6, when equal low bids are received;

(g) Encourage subcontracting with LSA concerns (see Subpart 20.3);

(h) Assist depressed industries (see 20.105);

(i) Cooperate with the Departments of Labor and Commerce, the Small Business Administration, and the Federal Emergency Management Agency (FEMA) to achieve the objectives of this Part 20; and

(j) See 25.404 regarding purchases from qualifying countries where LSA set-asides are involved.

20.105 Depressed industries.

When an entire industry is depressed, FEMA under Defense Manpower Policy No. 4B may establish appropriate measures on an industry wide, rather than on an area-wide, basis. Designations of depressed industries are made by FEMA notifications. Contracting officers shall give industries special treatment as specified in the notification. No price differentials shall be paid to carry out the policies of these notifications.

20.106 Records and reports.

Agencies shall maintain records of contracts performed in LSA's as necessary to prepare required reports (see Subpart 4.6).

SUBPART 20.2—SET-ASIDES

20.201 Set-asides for labor surplus area concerns.

20.201-1 Total set-asides.

Subject to the order of precedence in 19.504, and in accordance with any applicable agency procedure, the contracting officer shall set aside the entire amount of an individual acquisition or class of acquisitions for LSA concerns when there is a reasonable expectation that offers will be obtained from a sufficient number of responsible LSA concerns so that awards will be made at reasonable prices. Past acquisition history of the item or similar items is not the only controlling factor that agencies shall consider in determining whether a reasonable expectation exists.

20.201-2 Department of Defense set-asides.

(a) Except as noted in paragraph (b) below, this Part 20 does not apply to contracts awarded by Department of Defense (DOD) components. This exemption results from 10 U.S.C. 2392, which precludes payment by DOD of a price differential in contracts awarded for purposes of relieving economic dislocations, and from special provisions in annual Defense Appropriation Acts. Detailed implementation by DOD of Defense Manpower Policy 4B is contained in the DOD FAR Supplement and applicable agency procedures.

(b) Contracts funded by Military Construction Appropriation Acts, and any other Defense contracts that are not subject to a limitation on payment of a price differential for relieving economic dislocation are subject to 20.201-1.

20.202 Contract clause.

The contracting officer shall insert the clause at 52.220-2, Notice of Total Labor Surplus Area Set-Aside, in solicitations and contracts estimated to exceed the appropriate small purchase limitation in Part 13 that are totally set aside for LSA concerns.

20.203 Rejection of set-asides.

The contracting officer may not base the rejection of an LSA set-aside on any of the following:

(a) A large part of the previous acquisition of the required item was placed with LSA concerns.

(b) The item is on an established planning list under the Industrial Preparedness Planning Program.

(c) The item is on a Qualified Products List (see Subpart 9.2).

(d) A period of less than 30 days from the date of issuance of the solicitation is prescribed for the submission of offers.

(e) The acquisition is classified.

20.204 Award procedures.

(a) The contracting officer shall award contracts involving total LSA set-asides by conventional negotiation or by labor surplus area restricted advertising. Whenever possible, the contracting officer shall use the restricted advertising method. The use of either method constitutes a negotiated acquisition and requires that the appropriate statutory authority for negotiation be cited in solicitation and contract documents (see Subpart 15.2).

(b) Labor surplus area restricted advertising uses the procedures for formal advertising prescribed in Part 14 except that solicitation, bidding, and award are restricted to LSA concerns.

Offers received from concerns that do not qualify as LSA concerns shall be considered nonresponsive and shall be rejected.

20.205 Withdrawal of set-asides.
