- 3 (a) Sense of Congress.—It is the sense of Con-4 gress that—
- 5 (1) it is critical that the Air Force has the ca-6 pability to train against an advanced air adversary 7 in order to be prepared for conflicts against a mod-8 ern enemy force, and that in order to have this capa-9 bility, the Air Force must have access to an ad-10 vanced adversary force prior to United States adver-11 saries fielding a 5th-generation operational capa-12 bility; and
 - (2) the Air Force's plan to use low-rate initial production F–35As as aggressor aircraft reflects a recognition of the need to field a modernized aggressor fleet.

10	ommendations to facilitate sharing frameworks in
11	the bands of electromagnetic spectrum that are the
12	subject of the test beds.
13	(f) Appropriate Committees of Congress.—In
14	this subsection, the term "appropriate committees of Con
15	gress" means—
16	(1) the Committee on Armed Services and the
17	Committee on Commerce, Science, and Transpor
18	tation of the Senate; and
19	(2) the Committee on Armed Services and the
20	Committee on Energy and Commerce of the House
21	of Representatives.
22	SEC. 215. SENSE OF THE SENATE ON THE ADVANCED BAT
23	TLE MANAGEMENT SYSTEM.
24	It is the sense of the Senate that—

- (1) the Senate supports the vision of the Air Force for the Advanced Battle Management System (ABMS) as a system of systems that can integrate air, space, and other systems to detect, track, target, and direct effects against threats in all domains;
 - (2) such a capability will be essential to the ability of the Air Force to operate effectively as part, and in support, of the Joint Force, especially in the highly-contested operating environments established by near-peer competitors;
 - (3) the Senate is concerned that the Air Force has not moved quickly enough over the past year to begin defining the requirements and maturing the technologies that will be essential for the Advanced Battle Management System, especially in light of the pending retirement of the Joint Surveillance and Target Attack Radar System (JSTARS) aircraft that the Advanced Battle Management System is conceived, in part, to replace;
 - (4) the Senate understands that the Air Force is moving deliberately to analyze alternative concepts for the Advanced Battle Management System and adopt an architectural approach to its design;
- (5) the Advanced Battle Management System,
 as a multidomain system of systems, must have a

1	central command and control capability that can in-
2	tegrate these systems into a unified warfighting ca-
3	pability;
4	(6) emerging technologies, such as artificial in-
5	telligence and automated sensor fusion, should be
6	built into the command and control capability for
7	the Advanced Battle Management System from the
8	start;
9	(7) such technologies would improve the ability
10	of the Advanced Battle Management System to sup-
11	port human operators with—
12	(A) the rapid processing and fusion of
13	multidomain sensor data;
14	(B) the highly-automated identification
15	classification, tracking, and targeting of threats
16	in all domains;
17	(C) the creation of a real-time common op-
18	erating picture from multidomain intelligence
19	and the ability to direct effects on the battle-
20	field at machine-to-machine speeds from all of
21	the systems comprising the Advanced Battle
22	Management System; and
23	(8) for an effort as ambitious and complex as
24	the Advanced Rattle Management System, the Sen.

ate encourages the Air Force to use existing acquisi-

1	tion authorities to begin a rapid prototyping effort
2	to refine the requirements and software-intensive
3	technologies that will be integral to the command
4	and control capability of the Advanced Battle Man-
5	agement System.

- 1 "(B) The Secretary of the Army or the Secretary of

- 25 trict of Columbia under subsection (a).".

1	(c) Responsibilities.—Subsection (c) of such sec-

6	(2) in paragraph (1), by striking "he" and in-
7	serting "such officer"; and
8	(3) in paragraph (2), by inserting ", the Chief
9	of Staff of the Army or the Chief of Staff of the Air
10	Force (as applicable), or the Chief of the National
11	Guard Bureau" before the period at the end.
12	(d) Other Matters.—Such section is further
13	amended—
14	(1) by striking subsection (d), as redesignated
15	by subsection (b)(1) of this section; and
16	(2) by striking subsection (e).
17	(e) Intrustment of Monies.—Such section is fur-
18	ther amended—

20	section (d); and

5	SEC. 1039. LIMITATION ON PLACEMENT BY THE UNDER
6	SECRETARY OF DEFENSE FOR PERSONNEL
7	AND READINESS OF WORK WITH FEDERALLY
8	FUNDED RESEARCH AND DEVELOPMENT
9	CENTERS.
10	(a) Limitation.—The Under Secretary of Defense
11	for Personnel and Readiness may not place any work with
12	a federally funded research and development center
13	(FFRDC) until the Under Secretary submits to the Com-
14	mittees on Armed Services of the Senate and the House
15	of Representatives a report on all studies, reports, and
16	other analyses being undertaken for the Under Secretary
17	as of the date of the report by federally funded research
18	and development centers.
19	(b) Elements.—The report required by subsection
20	(a) shall set forth the following:
21	(1) A list of each study, report, and analysis de-
22	scribed by subsection (a).
23	(2) For each study, report, or analysis, the fol-
24	lowing:
25	(A) Title.

1	(B) Federally funded research and develop-
2	ment center undertaking.
3	(C) Amount of contract.
4	(D) Anticipated completion date.
5	SEC. 1040. TERMINATION OF REQUIREMENT FOR DEPART-
6	MENT OF DEFENSE FACILITY ACCESS CLEAR-
7	ANCES FOR JOINT VENTURES COMPOSED OF
8	PREVIOUSLY-CLEARED ENTITIES.
9	A clearance for access to a Department of Defense
10	installation or facility may not be required for a joint ven-
11	ture if that joint venture is composed entirely of entities
12	that are currently cleared for access to such installation
13	or facility.
14	SEC. 1041. DESIGNATION OF DEPARTMENT OF DEFENSE
15	STRATEGIC ARCTIC PORTS.
16	(a) FINDINGS.—Congress makes the following find-
17	ings:
18	(1) The strategic importance of the Arctic con-
19	tinues to increase as the United States and other
20	countries recognize the military significance of the
21	sea lanes and choke points within the region and un-
22	derstand the potential for power projection from the
23	Arctic into multiple regions.
24	(2) On January 19, 2018, Secretary of Defense
25	James Mattis released the document titled "2018

- National Defense Strategy of the United States of
 America" in which the Secretary outlined the reemergence of long-term, strategic competition by
 countries classified by the National Security Strategy as revisionist powers.
 - (3) Russia and China have conducted military exercises together in the Arctic, have agreed to connect the Northern Sea Route, claimed by Russia, with China's Maritime Silk Road, and are working together in developing natural gas resources in the Arctic.
 - (4) The Government of the Russian Federation—
 - (A) has prioritized the development of Arctic capabilities and has made significant investments in military infrastructure in the Arctic, including the creation of a new Arctic Command and the construction or refurbishment of 16 deepwater ports and 14 airfields in the region;
 - (B) has approximately 40 icebreakers as of May 2019, including several nuclear-powered icebreakers, is currently constructing four icebreakers, and is planning to build an additional eight icebreakers; and

1	(C) conducted the largest military exercise
2	since the 1980s, Vostok 2018, which included—
3	(i) 300,000 troops;
4	(ii) 1,000 aircraft;
5	(iii) 80 ships;
6	(iv) 36,000 vehicles; and
7	(v) notably, 3,200 Chinese troops, 30
8	Chinese rotary and fixed-wing aircraft, and
9	900 Chinese tanks.
10	(5) The Government of the People's Republic of
11	China—
12	(A) released, in January 2018, its new
13	Arctic Strategy, the Polar Silk Road, in which
14	it declares itself as a "near-Arctic state", even
15	though its nearest territory to the Arctic is 900
16	miles away;
17	(B) has publicly stated that it seeks to ex-
18	pand its "Belt and Road Initiative" to the Arc-
19	tic region, including current investment in the
20	natural gas fields in the Yamal Peninsula in
21	Russia, rare-earth element mines in Greenland,
22	and the real estate, alternative energy, and fish-
23	eries in Iceland; and
24	(C) has shown great interest in expanding
25	its Arctic presence, including through—

1	(i) the operation of research vessels in
2	the region;
3	(ii) the recent construction of the
4	Xuelong 2, or Snow Dragon II, the only
5	polar research boat vessel in the world that
6	can break ice while going forward or back-
7	ward;
8	(iii) a freedom of navigation operation
9	in the Aleutian Islands in 2015; and
10	(iv) its recent plans to develop a
11	33,000 ton nuclear-powered icebreaker.
12	(6) The economic significance of the Arctic con-
13	tinues to grow as countries around the globe begin
14	to understand the potential for maritime transpor-
15	tation through, and economic and trade development
16	in, the region.
17	(7) The Arctic is home to 13 percent of the
18	world's undiscovered oil, 30 percent of its undis-
19	covered gas, an abundance of uranium, rare earth
20	minerals, gold, diamonds, and millions of square
21	miles of untapped resources, including abundant
22	fisheries.
23	(8) The Bering Strait is experiencing signifi-
24	cant increases in international traffic from vessels
25	transiting the Northern Sea Route, increases which

1	are projected to continue if decreases in sea ice cov-
2	erage continue.
3	(9) Along a future ice-free Arctic shipping
4	route, a ship sailing from South Korea to Germany
5	would have an average travel time of just 23 days,
6	compared to 34 days via the Suez Canal and 46
7	days via the Cape of Good Hope.
8	(10) In a speech at the Arctic Forum in Sep-
9	tember 2011, Russian Federation President Vladi-
10	mir Putin highlighted the Northern Sea Route as a
11	potential alternative to the Suez Canal and has pub-
12	licly stated plans to invest \$11,400,000,000 along
13	the Northern Sea Route by 2024.
14	(11) Increases in human, maritime, and re-
15	source development activity in the Arctic region are
16	expected to create additional mission requirements
17	for the Department of Defense and the Department
18	of Homeland Security, given—
19	(A) the strategic focus of the Government
20	of the Russian Federation and the Government
21	of the People's Republic of China on the Arctic;
22	(B) overlapping territorial claims; and
23	(C) the potential for maritime accidents,
24	oil spills, and illegal fishing near the exclusive

economic zone of the United States.

1	(12) The increasing role of the United States in
2	the Arctic has been highlighted in each of the last
3	four National Defense Authorization Acts.
4	(13) Section 1068 of the National Defense Au-
5	thorization Act for Fiscal Year 2016 (Public Law
6	114-92; 129 Stat. 992) required a new Department
7	of Defense strategy to protect United States na-
8	tional security interests in the Arctic region.
9	(14) Section 1095 of the National Defense Au-
10	thorization Act for Fiscal Year 2017 (Public Law
11	114–328; 130 Stat. 2438) required the Department
12	of Defense to create criteria to designate a Depart-
13	ment of Defense Strategic Arctic Port.
14	(15) Section 122 of the National Defense Au-
15	thorization Act for Fiscal Year 2018 (Public Law
16	115–91; 131 Stat. 1310) authorized the procure-
17	ment of one polar-class heavy icebreaker vessel.
18	(16) Section 151 of the John S. McCain Na-
19	tional Defense Authorization Act for Fiscal Year
20	2019 (Public Law 115–232) authorized the procure-
21	ment of five additional polar-class icebreaker vessels
22	and expressed that the Coast Guard should—
23	(A) maintain an inventory of not fewer
24	than six polar-class icebreaker vessels;

1	(B) award a contract for the first new
2	polar-class icebreaker not later than fiscal year
3	2019 and deliver the icebreaker not later than
4	fiscal year 2023; and
5	(C) deliver the second through sixth polar-
6	class icebreakers at a rate of one vessel per
7	year in fiscal years 2025 through 2029.
8	(17) In January 2017, the Department of De-
9	fense released a report entitled "Report to Congress
10	on Strategy to Protect United States National Secu-
11	rity Interests in the Arctic Region" to update "the
12	ways and means" the Department of Defense in-
13	tends to use to achieve its objectives as it imple-
14	ments the 2013 National Strategy for the Arctic Re-
15	gion, including—
16	(A) enhancing the capability of United
17	States forces to defend the homeland and exer-
18	cise sovereignty;
19	(B) strengthening deterrence at home and
20	abroad;
21	(C) preserving freedom of the seas in the
22	Aretic; and
23	(D) evolving the infrastructure and capa-
24	bilities of the Department in the Arctic con-
25	sistent with changing conditions and needs.

(18) The United States Coast Guard Arctic Strategic Outlook released in April 2019 states, "Demonstrating commitment to operational pres-ence, Canada, Denmark, and Norway have made strategic investments in ice-capable patrol ships charged with national or homeland security missions. [The United States] is the only Arctic State that has not made similar investments in ice-capable sur-face maritime security assets. This limits the ability of the Coast Guard, and the Nation, to credibly up-hold sovereignty or respond to contingencies in the Arctic''.

- (19) On January 12, 2017, Secretary of Defense James Mattis stated, "The Arctic is key strategic terrain . . . Russia is taking aggressive steps to increase its presence there . . . I will prioritize the development of an integrated strategy for the Arctic. I believe that our interests and the security of the Arctic would benefit from increasing the focus of the Department of Defense on this region".
- (20) On January 9, 2019, Secretary of the Air Force Heather Wilson and Chief of Staff of the Air Force General David Goldfein wrote, ". . . the Arctic has become even more important to the nation. Both a northern approach to the United States, as

well as a critical location for projecting American power, its geo-strategic significance is difficult to overstate".

(21) On February 26, 2019, General John Hyten, Commander of the United States Strategic Command, stated, "In particular, the Arctic is an area that we really need to focus on and really look at investing. That is no longer a buffer zone. We need to be able to operate there. We need to be able to communicate there. We need to have a presence there that we have not invested in in the same way that our adversaries have. And they see that as a vulnerability from us, whereas it is becoming a strength for them and it is a weakness for us, we need to flip that equation".

O'Shaughnessy, Commander of the United States Northern Command stated, "It has become clear that defense of the homeland depends on our ability to detect and defeat threats operating both in the Arctic and passing through the Arctic. Russia's fielding of advanced, long-range cruise missiles capable of flying through the northern approaches and striking targets in the United States and Canada has emerged as the dominant military threat in the

- Arctic. . . . Meanwhile, China has declared that it is not content to remain a mere observer in the Arctic and has taken action to normalize its naval and commercial presence in the region in order to increase its access to lucrative resources and shipping routes. I view the Arctic as the front line in the defense of the United States and Canada . . .".
 - (23) On May 6, 2019, Admiral Karl Schultz, Commandant of the Coast Guard stated, "We talk about the Arctic as a competitive space. We've seen China, we see Russia investing extensively. China built icebreakers in the time since we updated our strategy. China's been operating off the Alaskan Arctic for a good part of the last six years on an annual basis. [The Coast Guard is] championing increased capabilities in the Arctic . . . better communications, better domain awareness I want to see the Arctic remain a peaceful domain. China's a self-declared Arctic state. They're not one of the eight Arctic nations, so for me, for the service, its presence equals influence".
- 22 (24) On May 6, 2019, Secretary of State Mike 23 Pompeo stated that—
- 24 (A) the Arctic "has become an arena for power and for competition", and the United

1	States is "entering a new age of strategic en-
2	gagement in the Arctic, complete with new
3	threats to the Arctic and its real estate, and to
4	all of our interests in that region.";
5	(B) "Arctic sea lanes could become the
6	21st century Suez and Panama Canals.";
7	(C) "We're concerned about Russia's claim
8	over the international waters of the Northern
9	Sea Route, including its newly announced plans
10	to connect it with China's Maritime Silk
11	Road.";
12	(D) "In the Northern Sea Route, Moscow
13	already illegally demands other nations request
14	permission to pass, requires Russian maritime
15	pilots to be aboard foreign ships, and threatens
16	to use military force to sink any that fail to
17	comply with their demands.";
18	(E) there is a "pattern of aggressive Rus-
19	sian behavior here in the Arctic" and "we know
20	Russian territorial ambitions can turn violent";
21	and
22	(F) we do not want "the Arctic Ocean to
23	transform into a new South China Sea, fraught
24	with militarization and competing territorial
25	claims", nor do we want "the fragile Arctic en-

- vironment exposed to the same ecological devastation caused by China's fishing fleet in the seas off its coast, or unregulated industrial activity in its own country".
- 5 (25) On December 6, 2018, Secretary of the 6 Navy Richard Spencer stated, "We need to have a 7 strategic Arctic port up in Alaska. We need to be 8 doing FONOPs in the northwest – in the northern 9 passage. . . . peace through presence with a sub-10 marine is a little tough".
 - (26) Meanwhile, the two closest strategic seaports, as designated by the Department of Defense, to the Arctic Circle are the Port of Anchorage and the Port of Tacoma, located approximately 1,500 nautical miles and 2,400 nautical miles away, respectively, and approximately 1,900 nautical miles and 2,800 nautical miles respectively from Barrow, Alaska.
- (27) The distance from Bangor, Maine, to Key
 West, Florida, is approximately 1,450 nautical miles.
- 21 (b) Sense of Congress.—It is the sense of Con-22 gress that—
- 23 (1) the Arctic is a region of strategic impor-24 tance to the national security interests of the United 25 States and the Department of Defense must better

12

13

- align its presence, force posture, and capabilities to meet the growing array of challenges in the region; and
 - (2) although much progress has been made to increase awareness of Arctic issues and to promote increased presence in the region, additional measures, including the designation of one or more strategic Arctic ports, are needed to show the commitment of the United States to this emerging strategic choke point of future great power competition.

(c) Report Required.—

- (1) In General.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense, in consultation with the Chairman of the Joint Chiefs of Staff, the Commanding General of the United States Army Corps of Engineers, the Commandant of the Coast Guard, and the Administrator of the Maritime Administration, shall submit to the congressional defense committees a report evaluating potential sites for one or more strategic ports in the Arctic.

8	Coast Guard vessel, including an Arleigh Burke
9	class destroyer of the Navy, a national security
10	cutter, and a heavy polar ice breaker of the
11	Coast Guard;
12	(B) an evaluation of the amount of suffi-
13	cient and suitable space needed to create capac-
14	ity for equipment and fuel storage, techno-
15	logical infrastructure, and civil infrastructure to
16	support military and civilian operations, includ-
17	ing—
18	(i) aerospace warning;
19	(ii) maritime surface and subsurface
20	warning;
21	(iii) maritime control and defense;
22	(iv) maritime domain awareness;
23	(v) homeland defense;
24	(vi) defense support to civil authori-
25	ties;

1	(vii) humanitarian relief;
2	(viii) search and rescue;
3	(ix) disaster relief;
4	(x) oil spill response;

6	ation; and

2	struction necessary to initiate and sustain ex-
3	pected operations at such sites; and
4	(G) such other information as the Sec-
5	retary deems relevant.
6	(d) Designation of Strategic Arctic Ports.—
7	Not later than 90 days after the date on which the report
8	required under subsection (c) is submitted, the Secretary
9	of Defense, in consultation with the Chairman of the Joint
10	Chiefs of Staff, the Commanding General of the United
11	States Army Corps of Engineers, the Commandant of the
12	Coast Guard, and the Administrator of the Maritime Ad-
13	ministration, shall designate one or more ports as Depart-
14	ment of Defense Strategic Arctic Ports from the sites
15	identified under subsection (c)(2)(E).
16	(e) Rule of Construction.—Nothing in this sec-

18	priations for the Department of Defense for the establish-
19	ment of any port designated pursuant to this section.
20	(f) Arctic Defined.—In this section, the term
21	"Arctic" has the meaning given that term in section 112
22	of the Arctic Research and Policy Act of 1984 (15 U.S.C.
23	4111).

2	POLICY AND PROGRAM REDESIGNATION.
3	(a) Sense of the Senate.—It is the Sense of the
4	Senate that—
5	(1) the United States must continue to pursue
6	a comprehensive missile defense strategy that will
7	deliver integrated and effective capabilities to
8	counter ballistic, cruise, and hypersonic missile
9	threats;
10	(2) adversaries are quickly expanding the capa-
11	bilities of their existing missile systems, adding new
12	and unprecedented types of missile capabilities to
13	their arsenals, and further integrating offensive mis-
14	siles into their coercive threats, military exercises,
15	and war planning;
16	(3) both Russia and China are rapidly enhanc-
17	ing their existing offensive missile systems and de-
18	veloping advanced sea-, ground-, and air-launched
19	cruise missiles as well as hypersonic capabilities;
20	(4) due to the proliferation of offensive ballistic
21	and cruise missiles and the emergence of game-
22	changing hypersonic weapons technologies, all of
23	which threaten regional balances, our allies and
24	partners, United States deployed armed forces, and

the United States homeland, missile defenses become

1	an even more critical element of United States strat-
2	egy; and
3	(5) the United States must outpace adversary
4	offensive missile capabilities.
5	(b) Expansion of Policy.—Section 1681(a) of the

15	siders appropriate, redesignate all strategies, policies, pro-
16	grams, and systems under the jurisdiction of the Secretary
17	to reflect that missile defense programs of the United
18	States defend against ballistic, cruise, and hypersonic mis-
19	siles in all phases of flight.

24	Senate that—

1	(1) Congress has expressed support for a space-
2	based missile defense sensor program, in the two
3	most recent enacted National Defense Authorization
4	Acts;
5	(2) the Secretary of Defense should rapidly de-
6	velop and deploy a persistent, space-based sensor ar-
7	chitecture to ensure missile defenses of the United
8	States are more effective against ballistic missile
9	threats and more responsive to emergent threats
10	from hypersonic and cruise missiles;
11	(3) the responsibility for developing and deploy-
12	ing a hypersonic and ballistic tracking space sensor
13	should remain within the Director of the Missile De-
14	fense Agency; and
15	(4) the Director of the Missile Defense Agency
16	should deploy a hypersonic and ballistic tracking
17	space sensor constellation as soon as technically fea-
18	sible.
19	(b) Assignment of Primary Responsibility for
20	DEVELOPMENT AND DEPLOYMENT OF HYPERSONIC AND
21	BALLISTIC TRACKING SPACE SENSOR.—Not later than 30
22	days after the date of the enactment of this Act, the Sec-
23	retary shall—
24	(1) assign the Director of the Missile Defense
25	Agency with the principal responsibility for the de-

1	velopment and deployment of a hypersonic and bal-
2	listic tracking space sensor; and
3	(2) submit to the congressional defense commit-
4	tees certification of such assignment.
5	(c) Certification Regarding Funding of
6	Hypersonic and Ballistic Tracking Space Sensor
7	PROGRAM.—At the same time that the President submits
8	to Congress pursuant to section 1105 of title 31, United
9	States Code, the annual budget request of the President
10	for fiscal year 2021, the Under Secretary of Defense
11	Comptroller and the Director for Cost Assessment and
12	Program Evaluation shall jointly certify to the congres-
13	sional defense committees whether the hypersonic and bal-
14	listic tracking space sensor program is sufficiently funded
15	in the future-years defense program for the Missile De-
16	fense Agency.
17	(d) Deployment Deadline.—Section 1683(a) of
18	the National Defense Authorization Act for Fiscal Year
19	2018 (Public Law 115–91; 10 U.S.C. 2431 note) is

4	tor shall begin on-orbit testing of a hypersonic and
5	ballistic tracking space sensor no later than Decem-

7	soon as technically feasible thereafter.
8	"(3) Waiver.—The Secretary of Defense may
9	waive the deadline for testing specified in paragraph
10	(2) if the Secretary submits to the congressional de-
11	fense committees a report containing—
12	"(A) the explanation why the Secretary
13	cannot meet such deadline;
14	"(B) the technical risks and estimated cost
15	of accelerating the program to attempt to meet
16	such deadline;
17	"(C) an assessment of threat systems that
18	could not be detected or tracked persistently
19	due to waiving such deadline; and
20	"(D) a plan, including a timeline, for be-
21	ginning the required testing.".

4	Under Secretary of Defense for Research and Engineer-
5	ing, the Missile Defense Agency, the Office of the Director
6	for Operational Test and Evaluation, the operational test
7	agencies, the military departments, and warfighters
8	should—
9	(1) be strongly commended for a highly success-
10	ful 2018 flight test campaign, which consisted of 13
11	total flight test events including—
12	(A) FTX-35, which successfully proved
13	interoperability between Terminal High Altitude
14	Area Defense (THAAD) and the Phased Array
15	Tracking Radar to Intercept on Target (PA-
16	TRIOT) to detect and track a simulated en-
17	gagement with a short-range ballistic missile;
18	(B) Pacific Dragon 2018, which success-
19	fully demonstrated joint ballistic missile defense
20	interoperability with Japan and Korea to en-
21	gage a short-range ballistic missile with a
22	Standard Missile 3 (SM-3) Block IB by a Jap-
23	anese ship and an Aegis Ashore site;
24	(C) JFTM-5, which successfully dem-
25	onstrated the intercept of an short-range bal-

1	listic missile with a Standard Missile 3 Block
2	IB threat upgrade from a Japanese ship;
3	(D) FTM-45, which successfully dem-
4	onstrated the intercept of a medium-range bal-
5	listic missile with a Standard Missile 3 Block
6	IIA from a United States ship; and
7	(E) FTI-03, which as a part of the oper-
8	ational test of the European Phased Adaptive

13	and
14	(2) be especially recognized for the success of
15	FTG-11, the first salvo test of the United States of

17	which two ground-based interceptors were launched
18	nearly simultaneously from the same location and
19	successfully intercepted the kill vehicle of a threat-
20	representative intercontinental ballistic missile tar-
21	get, and then the next most lethal object.

2	a comprehensive approach to preventing and defeat-
3	ing the rapidly expanding offensive missile threat
4	through a combination of deterrence, active and pas-
5	sive missile defense, and attack operations;
6	(2) to counter the expanding offense missile ca-
7	pabilities of potential adversaries and hedge against
8	unanticipated missile threats, the Secretary of De-
9	fense should aggressively pursue new missile defense
10	capabilities and examine concepts and technologies
11	for advanced missile defense systems;
12	(3) the Secretary should fully implement the
13	2019 Missile Defense Review's focus on increasing
14	investments in and deploying new technologies and

17	missile defense systems are more survivable, includ-
18	ing through—
19	(A) more distributed air and missile de-
20	fense operations; and
21	(B) improved camouflage, concealment
22	and deception, including emission control.
