

GOVERNMENT

Augmented Intelligence

Operationalizing AI for Government at Scale

The Team

Omar Haroun
CEO & Founder

A serial entrepreneur with two successful startup exits (Text IQ, Sportaneous), Omar is a Columbia JD/MBA and Oxford PPE graduate. He brings deep expertise in AI, legal tech, and procurement automation, having led companies adopted by Fortune 500s and government agencies.

Coleman Monroe
Head of Product

A recognized leader in AI with experience across Microsoft and Bain. Coleman leads the development and overall vision of Eudia's AI capabilities suite used by thousands of users across public and private sectors.

Michael Masiello
Founding Government Lead

Background spanning emerging government technology, modernization, and public sector improvement, Mike brings deep experience in advancing AI and emerging capabilities to support mission execution and acquisition reform.

Dylan Mrla
Product Manager, Government

Unique combination of domain knowledge and AI product expertise positions him at the forefront of efforts to modernize high level professionals through human-centered technology particularly in defense acquisition.

From Concept to Capability

Moving Beyond Proof Of Concept to Full- Scale Deployment

Beyond Theoretical

Active Direct-to-Phase II SBIR contract with 39 CONS; multiple prototypes operationalized in real-world contracting environment

Purpose Built for Real, Mission-Driven Outcomes

Research published by The Naval Postgraduate School with contributions from Space Systems Command, Office of the Chief of Space Force Contracting, Air Force Test Center, AFMC & 39CONS

Delivering Reductions in PALT by 38% and growing
High performing teams achieve full potential through responsible AI Integration

Trustworthy & Compliant

Connects disparate data sources to include the FAR, DFARS and supplemental documents, securely storing and processing them.

Congressional Alignment

Alignment with 13 congressional offices on approach to AI integration within highly regulated organizations

Enterprise grade security

Ensures compliance, data security, and best practices for enterprise-grade deployment – FedRAMP Ready

Proven Dual-Use Impact Across Commercial and Government

With Eudia, the U.S. Air Force is Shaping the Future of Acquisition with Trustworthy AI

Purpose-Built to Work Across Regulated Domains

Backed with Confidence by Top Silicon Valley VCs

Series A Funding

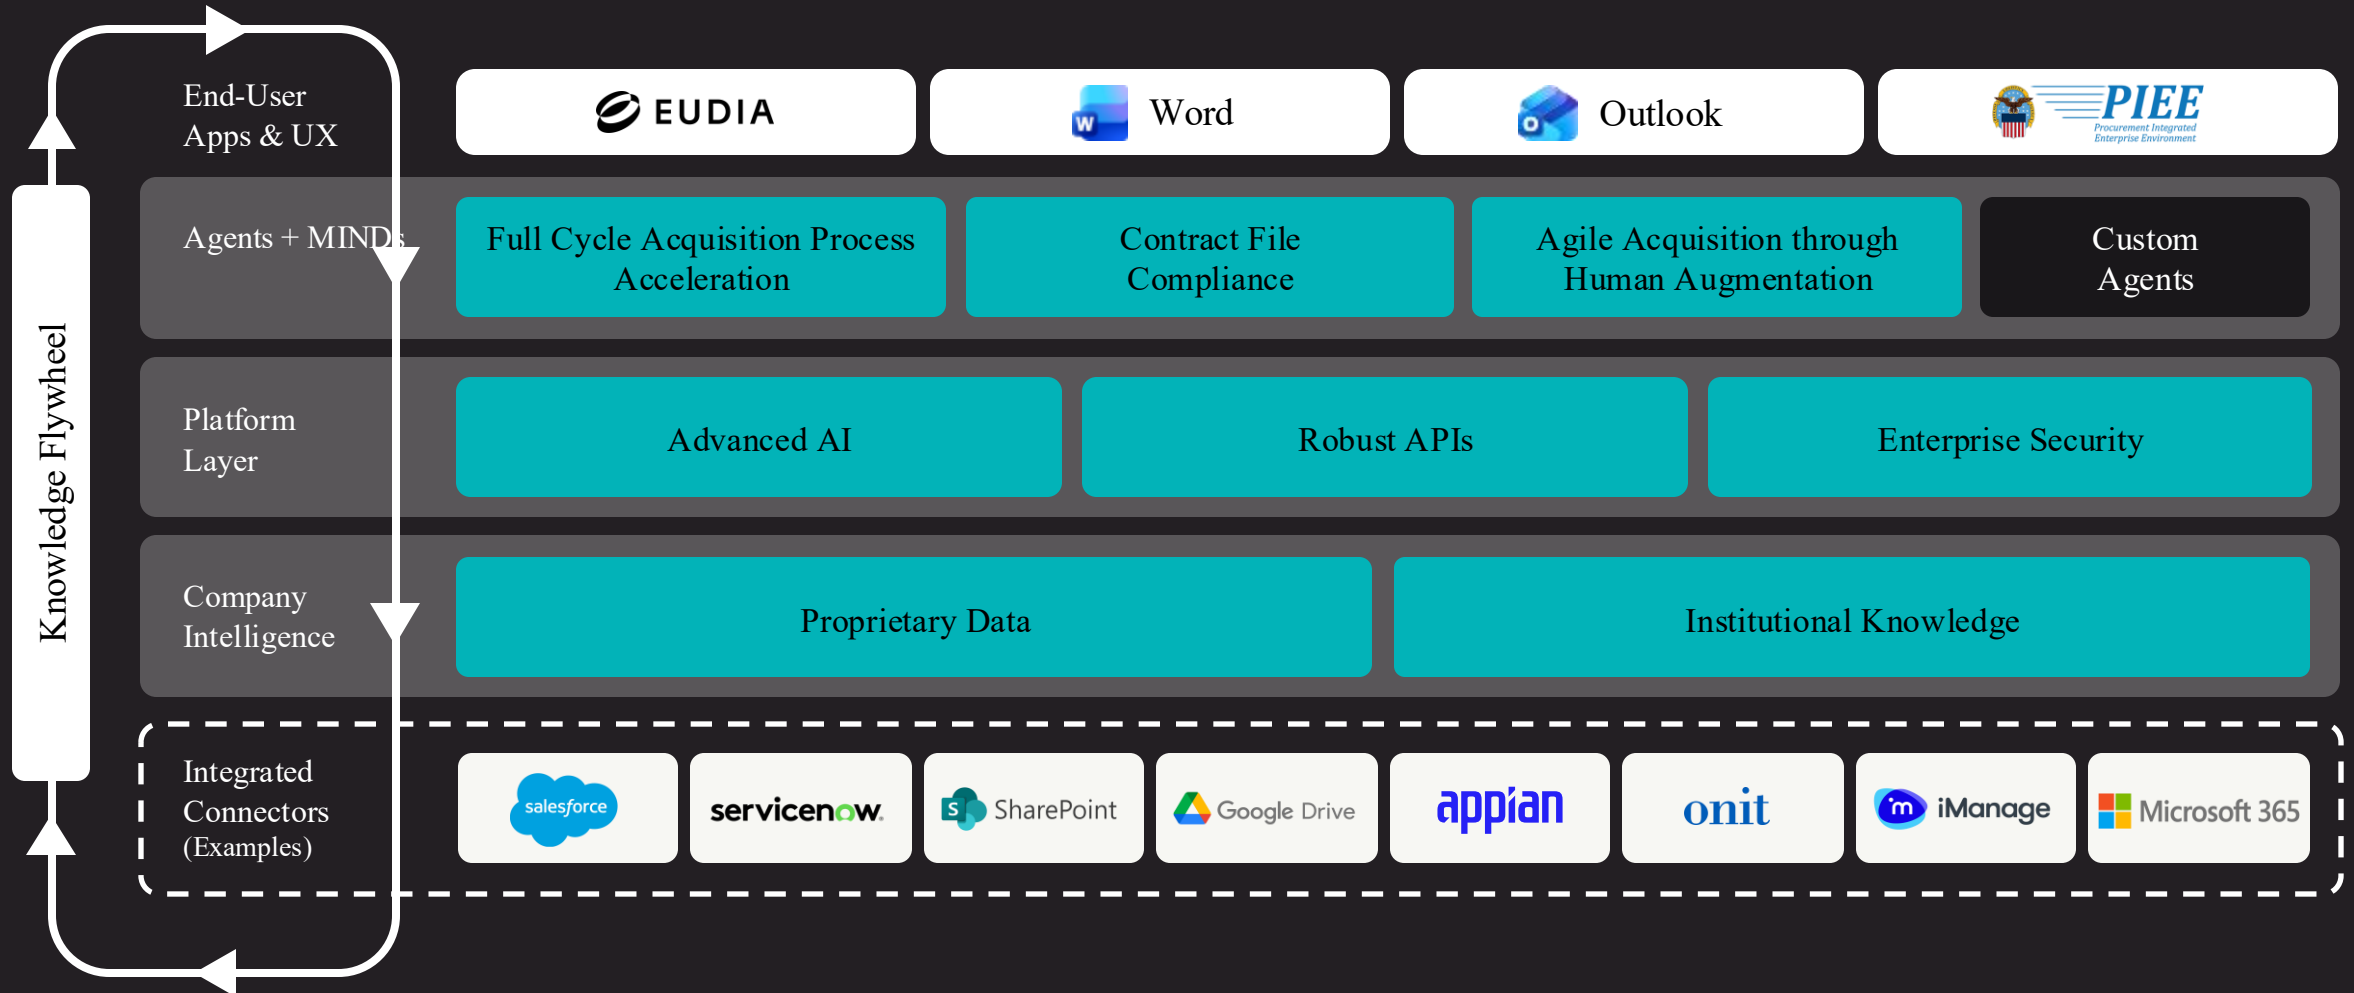

Permanent Capital

Augmented Intelligence Platform Solution Overview

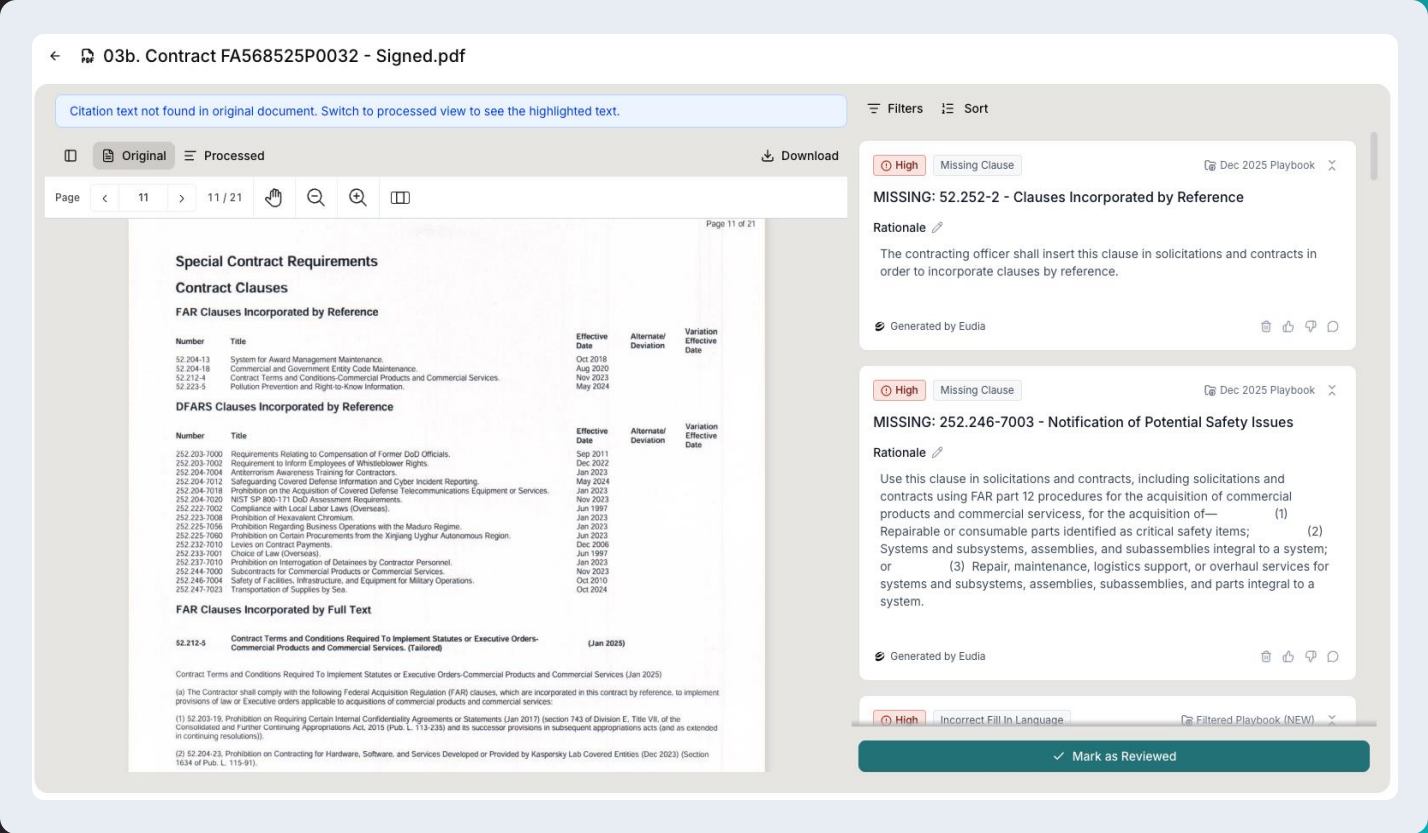

Customize the building blocks of the platform to develop contracting “Brain”

Functionality

Figure 1: The Eudia **Augmented Contract Review (ACR)** application was designed to build expertise while keeping humans at the center of decision authority from end-to-end. Augmented with AI, perform real-time compliance reviews of a human-generated SF1449. The application flags missing clauses, identifies errors such as out-of-scope clauses, and highlights incorrect fill-in language. ACR also recommends CLIN structure improvements along the way.

Functionality

Figure 2: Eudia's 'Ask AI' Contract Insights application transforms years of collective knowledge into an easily accessible resource. Users query across a squadron's entire contract repository in natural language, e.g. "What justification language did we use for brand name LAN Cables last year?". Immediate results are surfaced including citations to source documents for validation. Junior 6C personnel gain access to rich knowledge, and experienced officers gain time for research while humans remain at the center of decision authority.

The screenshot displays the Eudia 'Ask AI' interface. On the left, a table lists document names and contract names. On the right, a chat window titled 'Ask AI' shows a query and a response.

Document Name	Contract Name
02b. Contract FA568525P0030 - Signed....	SOLICITATION/CONT
03b. Contract FA568525P0032 - Signed....	SOLICITATION/CONT
04b. Order FA568525F0030 - Signed.pdf	SOLICITATION/CONT
05b. Contract - FA568525P0047.pdf	SOLICITATION/CONT
06b. Contract - FA568525P0040.pdf	SOLICITATION/CONT

How can I help you today?

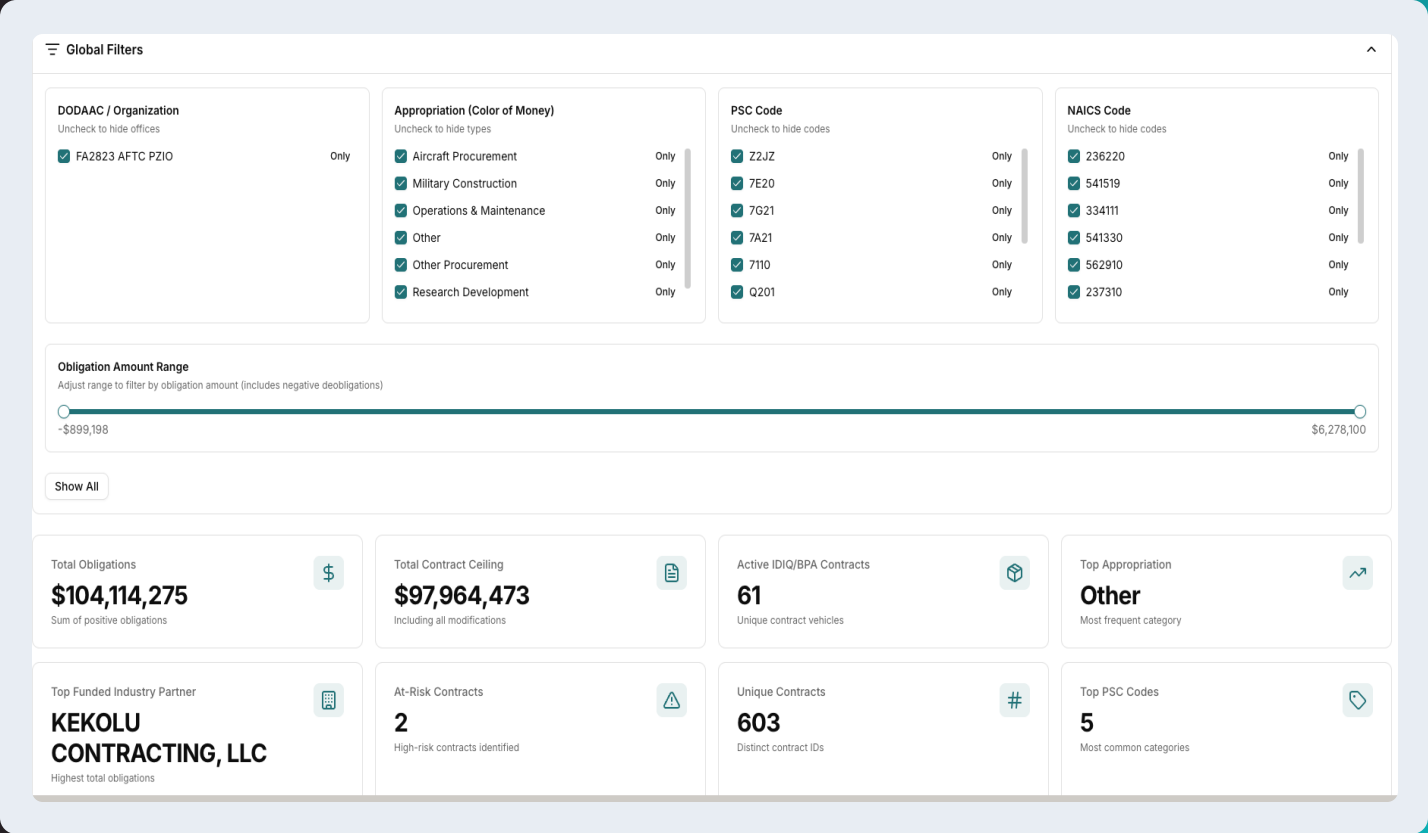

All 1763 documents selected

how are our service contracts typically structured? is there a dollar figure where past precedence has shown it makes economical sense to create an IDIQ?

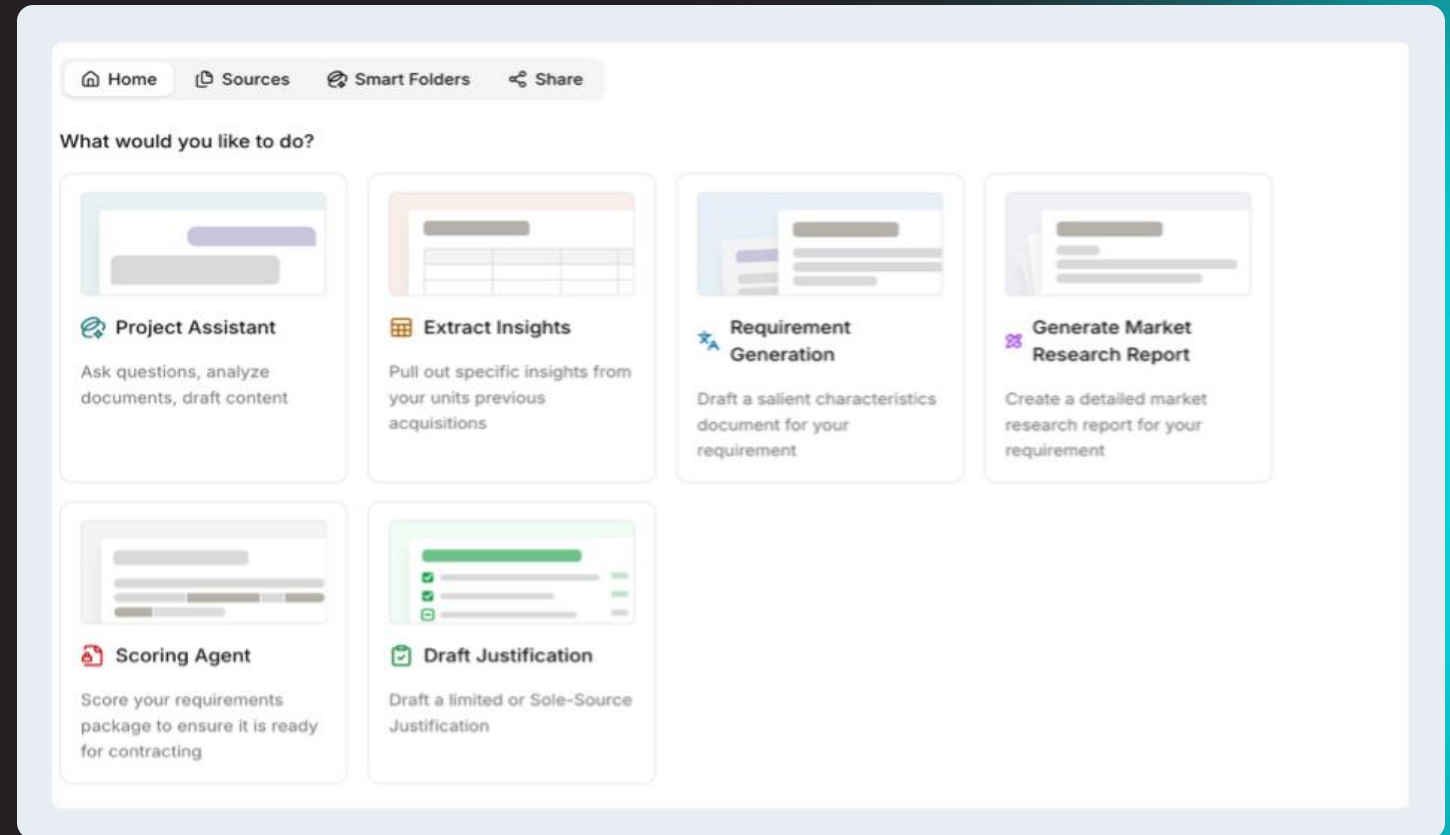

Functionality

Figure 3: The Eudia Contract Insights Dashboard provides real-time portfolio-level intelligence and complete visibility into contracting operations. Real-time insights on obligation tracking, contract ceiling values, active indefinite delivery vehicles, and at-risk contract identification is all clearly displayed front & center, keeping the human central to individual and organizational contracting decisions.

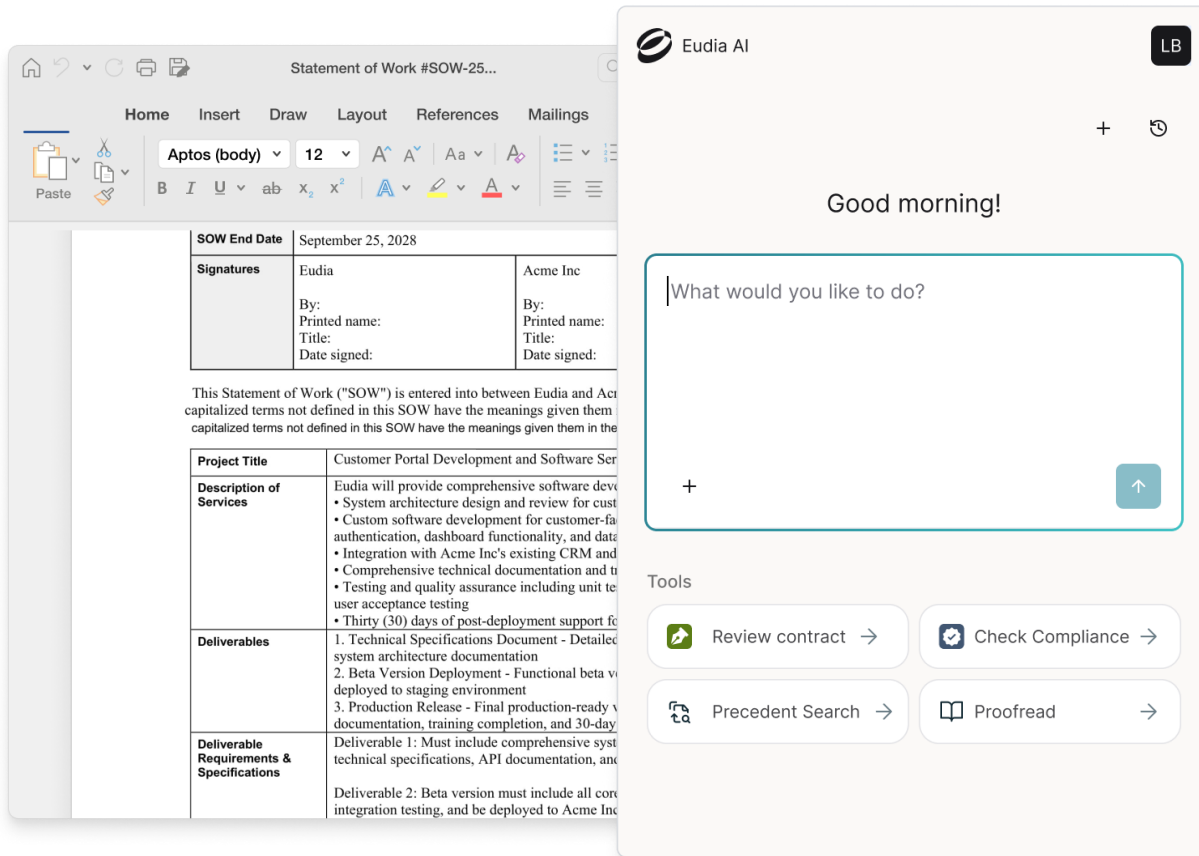

Functionality

Figure 4: Sigma, Eudia's AI Workspace comes with AI agents ready to work for you! Purpose-built agents keenly dial-in on the time-consuming 'grunt work' contracting teams are faced with daily as part of the job. Sigma lets users create individual projects that can be shared with other individuals and data sources relevant to a given project. Sigma helps accelerate and improve countless tasks across the board, resulting in ever-increasing time savings for everyone.

Eudia for Word

Expert intelligence embedded directly in your document. Draft, edit, review, and access Department Brains without leaving Word.

 **Draft**
Draft legal documentation, clauses, and language from scratch — using precedent, reference docs, or your own expertise.

 **Edit**
Call agents to surgically redline your document, targeted, precise, and guided by your knowledge.

 **Review**
Use your expert MINDs to agentially review documents for risk, apply surgical redlines, and generate persuasive comments.

 **Knowledge**
Tap into your Department Brain and legal data directly in Word — instant, cited answers from your data via Assistant.

Eudia for Outlook

Bring the power of Eudia to every email – draft with full context, get instant answers, and seamlessly route to your legal projects.

 **Draft**
Draft replies or compose new emails informed by your full Eudia context: insights, knowledge, legal databases, and more.

 **Assistant**
An AI assistant right in your inbox. Ask questions about an email thread, an attachment, or anything in your Eudia system.

 **Send to Projects**
Seamlessly push emails and attachments into Compliance, Litigation, or M&A projects. No downloads, no switching apps.

 **Knowledge**
Get instant answers to questions triggered by any email, powered by your Departmental Brain, right in your inbox.

Powered by deep legal and regulatory data

Eudia integrates comprehensive third-party data sources, giving you the foundation to deliver expert-level outcomes.

U.S. Case Law

- 14M+ opinions across all U.S. jurisdictions
- Federal & state appellate + district courts

Statutes & Regulations

- All 50 states, DC & Puerto Rico
- Federal U.S. Code & CFR
- Regulatory change monitoring

Intellectual Property

- USPTO patent grants & applications
- USPTO trademark registrations
- Full text, claims & classifications

Corporate & Securities

- SEC EDGAR 10-K, 10-Q, 8-K filings
- Proxy statements & ownership reports
- All U.S. public companies

International Law

- 10M+ European legal documents
- 190+ jurisdictions, updated daily
- EUR-Lex, CJEU & ECtHR case law
